Forward Looking Statements

This Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), which are subject to the safe harbor created by such sections. When used in this Form 10-Q or future filings by First BanCorp. (the "Corporation") with the U.S. Securities and Exchange Commission ("SEC"), in the Corporation's press releases or in other public or stockholder communications, or in oral statements made with the approval of an authorized executive officer, the word or phrases "would be," "will allow," "intends to," "will likely result," "ar expected to," "should," "anticipate" and similar statements of a future or forward-looking nature that reflect our current views with respect to future events and financial performance are meant to identify "forward-looking statements."

First BanCorp. wishes to caution readers not to place undue reliance on any such "forward-looking statements," which speak only as of the date made, and to advise readers that various factors, including but not limited to the following, could cause actual results to differ materially from those expressed in, or implied by, such "forward-looking statements":

- uncertainty about whether the Corporation will be able to continue to fully comply with the written agreement dated June 3, 2010 (the "Written Agreement") that the Corporation entered into with the Federal Reserve Bank of New York (the "New York FED" or "Federal Reserve") that, among other things, requires the Corporation to serve as a source of strength to FirstBank Puerto Rico ("FirstBank" or "the Bank") and that, except with the consent generally of the New York FED and the Board of Governors of the Federal Reserve System (the "Federal Reserve Board"), prohibits the Corporation from paying dividends to stockholders or receiving dividends from FirstBank, making payments on trust preferred securities or subordinated debt and incurring, increasing or guaranteeing debt or repurchasing any capital securities.

- the ability of the Puerto Rico government or any of its public corporations or other instrumentalities to repay its debt obligations, including the effect of the recent payment default of a government public corporation, and recent and any future downgrades of the long-term and short-term debt ratings of the Puerto Rico government, which could exacerbate Puerto Rico's adverse economic conditions;

- a decrease in demand for the Corporation's products and services and lower revenues and earnings because of the continued recession in Puerto Rico, the current fiscal problems of the Puerto Rico government, the payment default by a government public corporation and recent credit downgrades of the Puerto Rico government's debt;

- uncertainty as to the availability of certain funding sources, such as retail brokered certificates of deposit ("brokered CDs");

- the Corporation's reliance on brokered CDs to fund operations and provide liquidity;

- the risk of not being able to fulfill the Corporation's cash obligations or resume paying dividends to the Corporation's stockholders in the future due to the Corporation's need to receive approval from the New York FED and the Federal Reserve Board to receive dividends from FirstBank or FirstBank's failure to generate sufficient cash flow to make a dividend payment to the Corporation;

- the strength or weakness of the real estate markets and of the consumer and commercial sectors and their impact on the credit quality of the Corporation's loans and other assets, which has contributed and may continue to contribute to, among other things, high levels of non-performing assets, charge-offs and provisions for loan and lease losses and may subject the Corporation to further risk from loan defaults and foreclosures;

- the ability of FirstBank to realize the benefits of its deferred tax assets subject to the remaining valuation allowance;

- additional adverse changes in general economic conditions in Puerto Rico, the United States ("U.S."), and the U.S. Virgin Islands ("USVI"), and British Virgin Islands ("BVI"), including the interest rate environment, market liquidity, housing absorption rates, real estate prices, and disruptions in the U.S. capital markets, which has reduced interest margins and affected funding sources, and has affected demand for all of the Corporation's products and services and reduced the Corporation's revenues and earnings, and the value of the Corporation's assets, and may once again have these effects;

- an adverse change in the Corporation's ability to attract new clients and retain existing ones;

- the risk that additional portions of the unrealized losses in the Corporation's investment portfolio is determined to be other-than-temporary, including additional impairments on the Puerto Rico government's obligations;

- uncertainty about regulatory and legislative changes for financial services companies in Puerto Rico, the U.S., the USVI and the BVI, which could affect the Corporation's financial condition or performance and could cause the Corporation's actual results for future periods to differ materially from prior results and anticipated or projected results;

- changes in the fiscal and monetary policies and regulations of the U.S. federal government and the Puerto Rico and other governments, including those determined by the Federal Reserve Board, the New York FED, the Federal Deposit Insurance Corporation ("FDIC"), government-sponsored housing agencies, and regulators in Puerto Rico, the USVI and the BVI;

- the risk of possible failure or circumvention of controls and procedures and the risk that the Corporation's risk management policies may not be adequate;

- the risk that the FDIC may increase the deposit insurance premium and/or require special assessments to replenish its insurance fund, causing an additional increase in the Corporation's non-interest expenses;

- the impact on the Corporation's results of operations and financial condition of acquisitions and dispositions, including the acquisition of loans and branches of Doral Bank as well as the assumption of deposits at the branches during the first quarter of 2015;

- a need to recognize impairments on financial instruments, goodwill or other intangible assets relating to acquisitions;

- the risk that downgrades in the credit ratings of the Corporation's long-term senior debt will adversely affect the Corporation's ability to access necessary external funds;

- the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") on the Corporation's businesses, business practices and cost of operations; and

- general competitive factors and industry consolidation.

The Corporation does not undertake, and specifically disclaims any obligation, to update any "forward-looking statements" to reflect occurrences or unanticipated events or circumstances after the date of such statements except as required by the federal securities laws.

Investors should refer to the Corporation's Annual Report on Form 10-K for the year ended December 31, 2014, as well as "Part II, Item 1A, Risk Factors" in this quarterly report on Form 10-Q, for a discussion of such factors and certain risks and uncertainties to which the Corporation is subject.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1 – BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

The Consolidated Financial Statements (unaudited) of First BanCorp. ("the Corporation") have been prepared in conformity with the accounting policies stated in the Corporation's Audited Consolidated Financial Statements included in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2014. Certain information and note disclosures normally included in the financial statements prepared in accordance with generally accepted accounting principles in the United States of America ("GAAP") have been condensed or omitted from these statements pursuant to the rules and regulations of the SEC and, accordingly, these financial statements should be read in conjunction with the Audited Consolidated Financial Statements of the Corporation for the year ended December 31, 2014, which are included in the Corporation's 2014 Annual Report on Form 10-K. All adjustments (consisting only of normal recurring adjustments) that are, in the opinion of management, necessary for a fair presentation of the statement of financial position, results of operations and cash flows for the interim periods have been reflected. All significant intercompany accounts and transactions have been eliminated in consolidation.

The results of operations for the quarter and six-month period ended June 30, 2015 are not necessarily indicative of the results to be expected for the entire year.

Adoption of new accounting requirements and recently issued but not yet effective accounting requirements

The Financial Accounting Standards Board ("FASB") has issued the following accounting pronouncements and guidance relevant to the Corporation's operations:

In January 2014, the FASB updated the Accounting Standards Codification (the "Codification") to clarify when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan so that the loan should be derecognized and the real estate property recognized in the financial statements. The Update clarifies that an in substance repossession or foreclosure occurs, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either: (i) the creditor obtaining legal title to the residential real estate property upon completion of a

foreclosure, or (ii) the borrower conveying all interest in the residential real estate property to the creditor to satisfy the loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. In addition, creditors are required to disclose on an annual and interim basis both (i) the amount of the foreclosed residential real estate property held and (ii) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. The amendments are effective for public business entities for annual periods beginning after December 15, 2014, and interim periods within those fiscal years. Early adoption is permitted. The guidance can be implemented using either a modified retrospective transition method or a prospective transition method. The Corporation adopted the provisions of this guidance on a prospective basis during the first quarter of 2015 without any material impact on the Corporation's financial statements. Refer to Notes 7 and 10 for required disclosures.

In May 2014, the FASB updated the Codification to create a new, principle-based revenue recognition framework. The Update is the culmination of efforts by the FASB and the International Accounting Standards Board to develop a common revenue standard for U.S. GAAP and International Financial Reporting Standards. The core principal of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This guidance describes a 5-step process entities can apply to achieve the core principle of revenue recognition and requires disclosures sufficient to enable users of financial statements to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers and the significant judgments used in determining that information. The new framework is effective for public business entities for annual periods beginning after December 15, 2017, including interim periods within those reporting periods, as a result of the FASB's recent amendment to the standard to defer the effective date by one year. Early adoption is permitted for interim periods beginning after December 15, 2016. The Corporation is currently evaluating the impact that the adoption of this guidance will have on the presentation and disclosures in its financial statements.

In June 2014, the FASB updated the Codification to respond to stakeholders' concerns about current accounting and disclosures for repurchase agreements and similar transactions. This Update requires two accounting changes. First, the Update changes the accounting for repurchase-to-maturity transactions to secured borrowing accounting. Second, for repurchase financing arrangements, the Update requires separate accounting for a transfer of a financial asset executed contemporaneously with a repurchase agreement with the same counterparty, which will result in secured borrowing accounting for the repurchase agreement. Additionally, the Update introduces new disclosures to (i) increase transparency about the types of collateral pledged in secured borrowing transactions and (ii) enable users to better understand transactions in which the transferor retains substantially all of the exposure to the economic return on the transferred financial asset throughout the term of the transaction. For public business entities, the disclosure for repurchase agreements, securities lending transactions, and repurchase-to-maturity transactions accounted for as secured borrowings is required to be presented for annual periods beginning after December 15, 2014, and for interim periods beginning after March 15, 2015. All other accounting and disclosure amendments in the Update are effective for public business entities for the first interim or annual period beginning after December 15, 2014. The adoption of this guidance did not have a material effect on the Corporation's financial statements.

In June 2014, the FASB updated the Codification to provide guidance for determining compensation cost under specific circumstances when an employee's compensation award is eligible to vest regardless of whether the employee is rendering service on the date the performance target is achieved. This Update becomes effective for annual and interim periods beginning after December 15, 2015 with early adoption permitted. The Corporation is currently evaluating the impact that the adoption of this guidance will have on the presentation and disclosures in its financial statements, if any.

In August 2014, the FASB updated the Codification to reduce the diversity found in the classification of certain foreclosed mortgage loans held by creditors that are either fully or partially guaranteed under government programs. Consistency in classification upon foreclosure is expected in order to provide more decision-useful information. The amendments in this Update require that a mortgage loan be derecognized and that a separate other receivable be recognized upon foreclosure if: (i) the loan has a government guarantee that is not separable from the loan before foreclosure; (ii) at the time of foreclosure, the creditor has the intent to convey the real estate property to the guarantor and make a claim on the guarantee, and the creditor has the ability to recover under the claim, and (iii) at the time of foreclosure, any amount of the claim that is determined on the basis of the fair value of the real estate is fixed. Upon foreclosure, the separate other receivable should be measured based on the amount of the loan balance (principal and interest) expected to be recovered from the guarantor. The Update is effective for public business entities for annual periods, and interim periods within those annual periods beginning after December 15, 2014. The guidance can be implemented using either a prospective transition method or a modified retrospective transition method. The Corporation adopted the provisions of this guidance on a prospective basis during the first quarter of 2015 without any material impact on the Corporation's financial statements.

In August 2014, the FASB updated the Codification to provide guidance in GAAP about management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. Management's evaluation should be based on relevant conditions and events that are known and reasonably knowable at the date that the financial statements are issued. If conditions or events raise substantial doubt about an entity's ability to continue as a going concern, but the substantial doubt is alleviated as a

result of consideration of management's plans, the entity should disclose information that enables users of the financial statements to understand such determination. The Update is effective for all business entities for annual periods ending after December 15, 2016, and for annual periods and interim periods thereafter. Early application is permitted. The Corporation expects the adoption of this guidance will have no impact on the Corporation's financial position, results of operations, comprehensive income, cash flows and disclosures.

In November 2014, the FASB updated the Codification to clarify how current GAAP should be interpreted in evaluating the economic characteristics and risk of a host contract in a hybrid financial instrument that is issued in the form of a share. In addition, the Update was issued to clarify that, in evaluating the nature of a host contract, an entity should assess the substance of the relevant terms and features (that is, the relative strength of the debt-like or equity-like terms and features given the facts and circumstances) when considering how to weight those terms and features. The effects of initially adopting this Update should be applied on a modified retrospective basis to existing hybrid financial instruments issued in the form of a share as of the beginning of the fiscal year for which the amendments are effective. Retrospective application is permitted to all relevant prior periods. This Update is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early adoption in an interim period is permitted. The Corporation is currently evaluating the impact of the adoption of this guidance on its consolidated financial statements, if any.

In January 2015, the FASB updated the Codification to eliminate from GAAP the concept of extraordinary items as part of its initiative to reduce complexity in accounting standards (the Simplification Initiative). Under current GAAP, an event or transaction is presumed to be an ordinary and usual activity of the reporting entity unless evidence clearly supports its classification as an extraordinary item. In order to be classified as an extraordinary item, the event or transaction must be: (i) unusual in nature, and (ii) infrequent in occurrence. Before the update was issued, an entity was required to segregate these items from the results of ordinary operations and show the items separately in the income statement, net of tax, after income from continuing operations. This Update is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early adoption in an

interim period is permitted. The Corporation expects the adoption of this guidance will have no impact on the Corporation's consolidated financial statements.

In February 2015, the FASB updated the Codification to eliminate the deferral of FAS 167, which has allowed reporting entities with interests in certain investment funds to follow the previous consolidation guidance in FIN 46(R), and to make other changes to both the variable interest model and the voting model. While the Update is aimed at asset managers, it will affect all reporting entities involved with limited partnerships or similar entities. In some cases, consolidation conclusions will change. In other cases, reporting entities will need to provide additional disclosure about entities that currently are not considered VIEs but will be considered VIEs under the new guidance when they have a variable interest in those VIEs. Regardless of whether conclusions change or additional disclosure requirements are triggered, reporting entities will need to re-evaluate limited partnerships or similar entities for consolidation and revise their documentation. For public business entities, the Update is effective for annual and interim periods beginning after December 15, 2015. Early adoption is permitted, including adoption in an interim period. A reporting entity must apply the amendments retrospectively. The Corporation is currently evaluating the impact of the adoption of this guidance on its consolidated financial statements, if any.

In April 2015, the FASB updated the Codification to clarify that customers should determine whether a cloud computing arrangement includes the license of software by applying the same guidance cloud service providers use to make this determination. Examples of cloud computing arrangements include software as a service, platform as a service, infrastructure as a service and other hosting arrangements. If a hosting arrangement includes a software license for internal use software, the software license should be accounted for by the customer under ASC 350-40. A license of software other than internal use software would be accounted for by the customer under other U.S. GAAP (e.g., a research and development cost and software to be sold, leased or otherwise marketed). If a hosting arrangement includes a software licenses, then that would be in addition to any service contract in the arrangement. Hosting arrangements that do not include software licenses should be accounted for as service contracts. The Update also eliminates the existing requirement for customers to account for software licenses they acquire by analogizing to the guidance on leases. Instead, customers will account for software licenses that are in the scope of ASC 350-40 in the same manner as licenses of other intangible assets. Entities have the option of applying the guidance (1) prospectively to all arrangements entered into or materially modified after the effective date or (2) retrospectively. Entities that elect prospective application are required to disclose the reason for the change in accounting principle, the transition method, and a description of the financial statement line items affected by the change. Entities that elect retrospective application must disclose the information required by ASC 250. For public business entities, the guidance is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2015. Early adoption is permitted. The Corporation is currently evaluating the impact of the adoption of this guidance on its consolidated financial statements, if any.

In May 2015, the FASB updated the Codification to provide guidance in disclosures for investments in certain entities that calculate net asset value (NAV) per share (or its equivalent). This Update removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient and modifies certain disclosure requirements. This guidance is effective for interim and annual reporting periods in fiscal years beginning after December 31, 2015, and requires retrospective adoption. Early adoption is permitted. The adoption of this pronouncement is not expected to have an impact on the Corporation's

consolidated financial statements.

NOTE 2 – BUSINESS COMBINATION

On February 27, 2015, FirstBank acquired 10 Puerto Rico branches of Doral Bank, assumed $522.7 million in deposits related to such branches, acquired approximately $324.8 million in principal balance of loans, primarily residential mortgage loans, acquired $5.5 million of property, plant and equipment and received $217.7 million of cash, through an alliance with Banco Popular of Puerto Rico (“Popular”), who was the successful lead bidder with the FDIC on the failed Doral Bank, as well as other co-bidders (the “Doral Bank Transaction”). This transaction solidified FirstBank as the second largest bank in Puerto Rico, enhanced FirstBank’s presence in geographical areas in Puerto Rico with growth potential for deposits and mortgage originations, two of the main business strategies of FirstBank, and provides a stable source of low-cost deposits that are expected to support and enhance future growth activities.

Under the FDIC’s bidding format, Popular was the lead bidder and party to the purchase and assumption agreement with the FDIC covering all assets and deposits to be acquired by Popular and its alliance co-bidders. Popular entered into back to back purchase assumption agreements with the alliance co-bidders, including FirstBank, for the transferred assets and deposits. There is no loss-share arrangement with the FDIC related to the acquired assets.

The Corporation accounted for this transaction as a business combination. The following table identifies the fair value of assets acquired and liabilities assumed from Doral Bank on February 27, 2015:

	Asset/Liabilities (at Fair Value) (In thousands)		
ASSETS			
Cash	$	217,659	
Loans		311,410	
Premises and equipment, net		5,450	
Core Deposit Intangible		5,820	
Total assets acquired		540,339	
LIABILITIES			
Deposits		523,517	
Other liabilities		3,379	
Net assets - Bargain purchase gain	$	13,443	

The application of the acquisition-method of accounting resulted in a bargain purchase gain of $13.4 million, which is included in non-interest income in the Corporation’s consolidated statement of (loss) income for the six-month period ended June 30, 2015, and a core deposit intangible of $5.8 million. The net after-tax gain of $8.2 million represents

the excess of the estimated fair value of the assets acquired (including cash payments received from the FDIC) over the estimated fair value of the liabilities assumed and is influenced significantly by the FDIC-assisted transaction process.

The following is a description of the methods used to determine the fair values of significant assets and liabilities presented above:

Cash and due from banks – The carrying amount of these assets is a reasonable estimate of fair value based on the short-term nature of these assets. This balance primarily represents the cash settlement received from Popular for the net equity received, assets discount bid and other customary closing adjustments.

Loans – Fair values for loans were based on a discounted cash flow methodology that uses market-driven assumptions such as prepayment rate, default rate, and loss severity on a loan level basis. The forecasted cash flows are then discounted by yields observed in sales of similar portfolios in Puerto Rico and the continental U.S.

The Corporation evaluated the residential mortgage loans acquired and determined that $227.9 million are non-credit impaired purchased loans, which have been accounted for in accordance with the provisions of FASB ASC Topic 310-20, *Nonrefundable Fees and Other Costs*, and were recorded with a premium of $1.3 million. The remaining approximately $93.3 million of residential mortgage loans were considered purchased credit impaired loans within the provisions of FASB ASC Topic 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality*, and were recorded with a $13.4 million discount. These purchased credit impaired loans will recognize interest income through accretion of the difference between the fair value of the loans and the expected cash flows.

Core deposit intangible – This intangible asset represents the value of the relationships that Doral Bank had with its deposit customers. The fair value of this intangible asset was estimated based on a discounted cash flow methodology that gave appropriate consideration to expected customer attrition rates, cost of the deposit base, and the net maintenance cost attributable to customer deposits. The Corporation recorded at acquisition $5.8 million of core deposit intangible.

Deposits – The fair values used for the demand and savings deposits that comprise the transaction accounts acquired, by definition, equal the amounts payable on demand at the acquisition date. The fair value adjustment of $0.8 million was applied for time deposits because the estimated weighted average interest rate of the assumed certificates of deposits was estimated to be above the current market rates.

ASC Topic 805 requires the measurement of all recognized assets acquired and liabilities assumed in a business combination at their acquisition-date fair values. Accordingly, the Corporation initially recorded amounts for the fair values of the assets acquired and liabilities assumed based on the best information available at the acquisition date. The Corporation may retrospectively adjust these amounts to reflect new information obtained during the measurement period (not to exceed 12 months) about facts and circumstances that existed as of the acquisition date that, if known, would have affected the acquisition-date fair value measurements. Any retrospective adjustments to acquisition date fair values will affect the bargain purchase gain recognized. During the first half of 2015, the Corporation incurred $11.2 million of expenses related to loan and deposit accounts acquired from Doral, of which $4.6 million represents acquisition and conversion costs that are considered non-recurring in nature and $3.6 million represents interim servicing costs until the completion in May 2015 of the conversion to the FirstBank systems. These expenses are primarily included as part of professional fees in the consolidated statement of income (loss).

The Corporation's operating results for the six-month period ended June 30, 2015 include the operating results of the acquired assets and assumed liabilities subsequent to the acquisition date. The Corporation also considered the pro forma requirements of ASC 805 and deemed it not necessary to provide pro forma financial information pursuant to that standard for the Doral Bank transaction as it was not material to the Corporation.

NOTE 3 – EARNINGS PER COMMON SHARE

The calculations of earnings (losses) per common share for the quarters and six-month periods ended June 30, 2015 and 2014 are as follows:

	Quarter Ended June 30,		Six-Month Period Ended June 30,	
	2015	2014	2015	2014
	(In thousands, except per share information)			
Net (loss) income	$ (34,074)	$ 21,225	$ (8,428)	$ 38,308
Favorable impact from issuing common stock in exchange for Series A through E preferred stock (1)	-	1,280	-	1,659
Net (loss) income attributable to common stockholders	$ (34,074)	$ 22,505	$ (8,428)	$ 39,967
Weighted-Average Shares:				
Average common shares outstanding	211,247	208,202	210,968	206,974
Average potential dilutive common shares	-	1,942	-	1,543
Average common shares outstanding- assuming dilution	211,247	210,144	210,968	208,517
(Loss) earnings per common share:				
Basic	$ (0.16)	$ 0.11	$ (0.04)	$ 0.19
Diluted	$ (0.16)	$ 0.11	$ (0.04)	$ 0.19

(1) Excess of carrying amount of the Series A through E preferred stock exchanged over the fair value of new common shares issued in the second quarter and first half of 2014.

Earnings (loss) per common share is computed by dividing net income (loss) attributable to common stockholders by the weighted average number of common shares issued and outstanding. Net income (loss) attributable to common stockholders represents net income (loss) adjusted for any preferred stock dividends, including any dividends declared, and any cumulative dividends related to the current dividend period that have not been declared as of the end of the period. For the quarter and six-month period ended June 30, 2014, net income attributable to common stockholders includes the one-time effect on retained earnings of the issuance of common stock in exchange for Series A through E preferred stock. These transactions are discussed in Note 19 to the unaudited consolidated financial statements. Basic weighted average common shares outstanding excludes unvested shares of restricted stock.

Adoption of new accounting requirements and recently issued but not yet effective accounting requirements

Potential common shares consist of common stock issuable under the assumed exercise of stock options, unvested shares of restricted stock, and outstanding warrants using the treasury stock method. This method assumes that the potential common shares are issued and the proceeds from the exercise, in addition to the amount of compensation cost attributable to future services, are used to purchase common stock at the exercise date. The difference between the number of potential shares issued and the shares purchased is added as incremental shares to the actual number of shares outstanding to compute diluted earnings per share. Stock options, unvested shares of restricted stock, and outstanding warrants that result in lower potential shares issued than shares purchased under the treasury stock method are not included in the computation of dilutive earnings per share since their inclusion would have an antidilutive effect on earnings per share. Stock options not included in the computation of outstanding shares because they were antidilutive amounted to 69,848 and 82,575 for the quarters and six-month periods ended June 30, 2015 and 2014, respectively. Warrants outstanding to purchase 1,285,899 shares of common stock and 2,939,794 unvested shares of restricted stock were excluded from the computation of diluted earnings per share for the quarter and six-month period ended June 30, 2015 because the Corporation reported a net loss attributable to common stockholders for the periods and their inclusion would have an antidilutive effect.

NOTE 4 – STOCK-BASED COMPENSATION

As of January 21, 2007, the Corporation's 1997 stock option plan expired and no additional awards could be granted under that plan. All outstanding awards granted under this plan have continued in full force and effect since then, subject to their original terms.

The activity of stock options granted under the 1997 stock option plan for the six-month period ended June 30, 2015 is set forth below:

	Number of Options		Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (Years)		Aggregate Intrinsic Value (In thousands)
Beginning of period outstanding and exercisable	82,575	$	187.75			
Options expired	(11,395)		358.80			
Options cancelled	(1,332)		164.10			
End of period outstanding and exercisable	69,848	$	160.30	1.1	$	-

On April 29, 2008, the Corporation's stockholders approved the First BanCorp. 2008 Omnibus Incentive Plan (the "Omnibus Plan"). The Omnibus Plan provides for equity-based compensation incentives (the "awards") through the grant of stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares, and other stock-based awards. The Omnibus Plan authorizes the issuance of up to 8,169,807 shares of common stock, subject to adjustments for stock splits, reorganizations and other similar events. The Corporation's Board of Directors, upon receiving the relevant recommendation of the Compensation Committee, has the power and authority to determine those eligible to receive awards and to establish the terms and conditions of any awards, subject to various limits and vesting restrictions that apply to individual and aggregate awards.

Under the Omnibus Plan, during the first half of 2015, 30,068 shares of restricted stock were awarded to one of the Corporation's independent directors subject to vesting periods that range from 1 to 5 years. In addition, during the first half of 2015, the Corporation issued 793,964 shares of restricted stock that will vest based on the employees' continued service with the Corporation. For 40,000 of the 793,964 shares awarded to employees, the requisite service period was three months and already vested in 2015. For the remaining 753,964 shares granted to employees, fifty percent (50%) of those shares vest in two years from the grant date and the remaining 50% vest in three years from the grant date.

Included in those 753,964 shares of restricted stock are 615,464 shares granted to certain senior officers consistent with the requirements of the Troubled Asset Relief Program ("TARP") Interim Final Rule, which permit TARP recipients to grant "long-term restricted stock" without violating the prohibition on paying or accruing a bonus payment provided that: (i) the value of the grant may not exceed one-third of the amount of the employee's annual compensation, (ii) no portion of the grant may vest before two years after the grant date, and (iii) the grant must be subject to a further restriction on transfer or payment as described below. Specifically, the stock that has otherwise vested may not become transferable at any time earlier than as permitted under the schedule set forth by TARP, which is based on the repayment in 25% increments of the aggregate financial assistance received, from the U.S. Department of Treasury (the "U. S. Treasury"). Hence, notwithstanding the vesting period mentioned above, the employees covered by TARP restrictions are restricted from transferring the shares. The U.S. Treasury confirmed that, effective March 2014, it has recovered more than a 25% of its investment in First BanCorp. Therefore, the restriction on transfer relating to 25% of the shares granted under TARP requirements was released.

The fair value of the shares of restricted stock granted in 2015 was based on the market price of the Corporation's outstanding common stock on the date of the grant. For the 615,464 shares of restricted stock granted under the TARP requirements, the market price was discounted to account for TARP transferability restrictions. For purposes of determining the awards' fair value, the Corporation estimated an appreciation of 14% in the value of the common stock using the Capital Asset Pricing Model as a basis of what would be a market participant's expected return on the Corporation's stock and assumed that the Treasury would hold the common stock of the Corporation that it currently owns for a period not to exceed one year, resulting in a fair value of $3.18 for restricted shares granted under the TARP requirements. Also, the Corporation uses empirical data to estimate employee termination; separate groups of employees that have similar historical exercise behavior were considered separately for valuation purposes.

The following table summarizes the restricted stock activity in 2015 under the Omnibus Plan for both executive officers covered by the TARP requirements and other employees as well as for independent directors:

	Six-Month Period Ended June 30, 2015			
	Number of shares of restricted stock			Weighted-Average Grant Date Fair Value
Non-vested shares at beginning of year	2,327,156		$	3.39
Granted	824,032			3.93
Forfeited	(17,500)			5.48
Vested	(193,894)			5.07
Non-vested shares at June 30, 2015	2,939,794		$	3.42

For the quarter and six-month period ended June 30, 2015, the Corporation recognized $1.0 million and $2.0 million, respectively, of stock-based compensation expense related to restricted stock awards, compared to $0.8 million and $1.2 million for the same periods in 2014. As of June 30, 2015, there was $5.1 million of total unrecognized compensation cost related to nonvested shares of restricted stock. The weighted average period over which the Corporation expects to recognize such cost is 2.2 years.

During the second quarter of 2014, the Corporation awarded to its independent directors 210,840 shares of restricted stock that vest ratably over a 5-year period. In addition, during the first half of 2014, the Corporation issued 810,138 shares of restricted stock that will vest based on the employees' continued service with the Corporation. Fifty percent (50%) of those shares vest in two years from the grant date and the remaining 50% vest in three years from the grant date. Included in those 810,138 shares of restricted stock are 653,138 shares granted to certain senior officers consistent with the requirements of TARP. The employees covered by TARP are restricted from transferring the shares, subject to certain conditions as explained above.

The fair value of the shares of restricted stock granted in the first six months of 2014 was based on the market price of the Corporation's outstanding common stock on the date of the grant. For the 653,138 shares of restricted stock granted under the TARP requirements, the market price was discounted due to postvesting restrictions. For purposes of computing the discount, the Corporation estimated an appreciation of 16% in the value of the common stock using the Capital Asset Pricing Model as a basis of what would be a market participant's expected return on the Corporation's stock and assumed that the U.S. Treasury would hold the common stock of the Corporation that it owned as of the date of the grants for an additional two years, resulting in a fair value of $2.63 for restricted shares granted under the TARP requirements.

Stock-based compensation accounting guidance requires the Corporation to develop an estimate of the number of share-based awards that will be forfeited due to employee or director turnover. Quarterly changes in the estimated forfeiture rate may have a significant effect on share-based compensation, as the effect of adjusting the rate for all expense amortization is recognized in the period in which the forfeiture estimate is changed. If the actual forfeiture rate is higher than the estimated forfeiture rate, then an adjustment is made to increase the estimated forfeiture rate, which will result in a decrease in the expense recognized in the financial statements. If the actual forfeiture rate is lower than the estimated forfeiture rate, then an adjustment is made to decrease the estimated forfeiture rate, which will result in an increase in the expense recognized in the financial statements. When unvested options or shares of restricted stock are forfeited, any compensation expense previously recognized on the forfeited awards is reversed in the period of the forfeiture. Approximately $36 thousand and $5 thousand of compensation expense was reversed during the first half of 2015 and 2014, respectively, related to forfeited awards.

Also, under the Omnibus Plan, effective April 1, 2013, the Corporation's Board of Directors determined to increase the salary amounts paid to certain executive officers primarily by paying the increased salary amounts in the form of shares of the Corporation's common stock, instead of cash. During the first half of 2015, the Corporation issued 168,265 shares of common stock with a weighted average market value of $6.20 as salary stock compensation. This resulted in a compensation expense of $1.0 million recorded in the first half of 2015.

For the first half of 2015, the Corporation withheld 56,486 shares from the common stock paid to certain senior officers as additional compensation and 61,372 shares of restricted stock that vested during the first quarter of 2015, to cover employees' payroll and income tax withholding liabilities; these shares are held as treasury shares. The Corporation paid any fractional share of salary stock that the officer was entitled to in cash. In the consolidated financial statements, the Corporation treats shares withheld for tax purposes as common stock repurchases.

NOTE 5 – INVESTMENT SECURITIES

Investment Securities Available for Sale

The amortized cost, non-credit loss component of other-than-temporary impairment ("OTTI") recorded in other comprehensive income ("OCI"), gross unrealized gains and losses recorded in OCI, approximate fair value, and weighted average yield of investment securities available for sale by contractual maturities as of June 30, 2015 and December 31, 2014 were as follows:

	June 30, 2015					
	Amortized cost	Noncredit Loss Component of OTTI Recorded in OCI	Gross Unrealized		Fair value	Weighted average yield%
			gains	losses		
	(Dollars in thousands)					
U.S. Treasury securities:						
After 1 to 5 years	7,542	-	-	4	7,538	0.57
Obligations of U.S.						
government-sponsored

Maturities of mortgage-backed securities are based on contractual terms assuming no prepayments. Expected maturities of investments might differ from contractual maturities because they may be subject to prepayments and/or call options. The weighted average yield on investment securities available for sale is based on amortized cost and, therefore, does not give effect to changes in fair value. The net unrealized gain or loss on securities available for sale and the non credit loss component of OTTI are presented as part of OCI.

The following tables show the Corporation's available-for-sale investments' fair value and gross unrealized losses, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, as of June 30, 2015 and December 31, 2014. The tables also include debt securities for which an OTTI was recognized and only the amount related to a credit loss was recognized in earnings. Unrealized losses for which OTTI had been recognized have been reduced by any subsequent recoveries in fair value.

Assessment for OTTI

On a quarterly basis, the Corporation performs an assessment to determine whether there have been any events or economic circumstances indicating that a security with an unrealized loss has suffered an OTTI. A debt security is considered impaired if the fair value is less than its amortized cost basis at the reporting date. The accounting literature requires the Corporation to assess whether the unrealized loss is other than temporary.

OTTI losses must be recognized in earnings if an investor has the intent to sell the debt security or it is more likely than not that it will be required to sell the debt security before recovery of its amortized cost basis. However, even if an investor does not expect to sell a debt security, it must evaluate expected cash flows to be received and determine if a credit loss has occurred.

An unrealized loss is generally deemed to be other-than-temporary and a credit loss is deemed to exist if the present value of the expected future cash flows is less than the amortized cost basis of the debt security. The credit loss component of an OTTI, if any, is recorded as a component of net impairment losses on investment securities in the accompanying consolidated statements of income (loss), while the remaining portion of the impairment loss is recognized in OCI, provided the Corporation does not intend to sell the underlying debt security and it is "more likely than not" that the Corporation will not have to sell the debt security prior to recovery.

Debt securities issued by U.S. government agencies, government-sponsored entities and the Treasury accounted for approximately 97% of the total available-for-sale portfolio as of June 30, 2015 and no credit losses are expected, given the explicit and implicit guarantees provided by the U.S. federal government. The Corporation's assessment for OTTI was concentrated mainly on Puerto Rico Government debt securities, with an amortized cost of $52.7 million, and on private label mortgage-backed securities ("MBS") with an amortized cost of $39.8 million for which credit losses are evaluated on a quarterly basis. The Corporation considered the following factors in determining whether a credit loss exists and the period over which the debt security is expected to recover:

- The length of time and the extent to which the fair value has been less than the amortized cost basis;
- Any adverse change to the credit conditions and liquidity of the issuer, taking into consideration the latest information available about the overall financial condition of the issuer, credit ratings, recent legislation and government actions affecting the issuer's industry and actions taken by the issuer to deal with the present economic climate;
- Changes in the near term prospects of the underlying collateral of a security, if any, such as changes in default rates, loss severity given default, and significant changes in prepayment assumptions; and

- The level of cash flows generated from the underlying collateral, if any, supporting the principal and interest payments of the debt securities.

The Corporation recorded OTTI losses on available-for-sale debt securities as follows:

	Quarter ended June 30,		Six-Month Period Ended June 30,	
	2015	**2014**	**2015**	**2014**
(In thousands)				
Total other-than-temporary impairment losses	$ (29,521)	$ -	$ (29,521)	$ -
Noncredit-related impairment portion recognized in OCI	16,665		16,665	
Portion of other-than-temporary impairment losses previously recognized in OCI	(241)	-	(397)	-
Net impairment losses recognized in earnings (1)	$ (13,097)	$ -	$ (13,253)	$ -

(1) Approximately $12.9 million of the credit impairment recognized in earnings consisted of credit losses on Puerto Rico Government debt securities and $0.2 million was associated with credit losses on private label MBS.

The following tables summarize the roll-forward of credit losses on debt securities held by the Corporation for which a portion of an OTTI is recognized in OCI:

	Cumulative OTTI credit losses recognized in earnings on securities still held

As of June 30, 2015, the Corporation owns Puerto Rico Government debt securities in the aggregate amount of $52.7 million (net of a $12.9 million OTTI), carried on its books at a fair value of $34.6 million. During the six-month period ended June 30, 2015, the fair value of these obligations decreased by $13.0 million. In February and March 2014, Standard & Poor's ("S&P"), Moody's Investor Service ("Moody's") and Fitch Ratings ("Fitch") downgraded the Commonwealth of Puerto Rico general obligations bonds and other obligations of Puerto Rico instrumentalities to non-investment grade categories. In June and July 2015, the three major credit rating agencies downgraded Puerto Rico's general obligation debt further into non-investment grade after the government's recent announcements about concerns on its ability to pay its financial obligations. The issuers of Puerto Rico government and agencies bonds held by the Corporation have not defaulted, and the contractual payments on these securities have been made as scheduled. However, in August 2015 there was a payment default to creditors of the Public Finance Corporation, a government public corporation.

As of June 30, 2015, in consideration of the latest available information about the Puerto Rico Government's financial condition, including the Government's June 2015 statements as to its intentions to restructure its outstanding bond obligations, the Corporation applied a discounted cash flow analysis to its Puerto Rico Government debt securities in order to calculate the cash flows expected to be collected and to determine if any portion of the decline in market value of these securities was considered a credit-related other-than-temporary impairment. The analysis derives an estimate of value based on the present value of risk-adjusted cash flows of the underlying securities and included the following components:

- The contractual future cash flows of the bonds are projected based on the key terms as set forth in the official statements for each security. Such key terms include, among others, the interest rate, amortization schedule, if any, and maturity date.

- The risk-adjusted cash flows are calculated based on a probability of default analysis and recovery rate assumptions, including the weighting of different scenarios of ultimate recovery, considering the credit rating of each security. Constant monthly default rates are assumed throughout the life of the bonds, which are based on the respective security's credit rating as of the date of the analysis.

- The adjusted future cash flows are then discounted at the original effective yield of each investment based on the purchase price and expected risk-adjusted future cash flows as of the purchase date of each investment.

The discounted risk-adjusted cash flow analysis for three of the bonds held by the Corporation as part of its available-for-sale securities portfolio resulted in a cumulative default probability in the range of 68% to 70% (weighted-average of 70%), thus reflecting that it is more likely than not that these three bonds will default during their remaining terms. Based on this analysis, the Corporation determined that it is unlikely to receive all the remaining contractual interest and principal amounts when due on these bonds and recorded a $12.9 million other-than-temporary credit-related impairment assuming recovery rates ranging from 50% to 82% (weighted-average of 64%).

Adoption of new accounting requirements and recently issued but not yet effective accounting requirements

The Corporation does not have the intention to sell the securities and has sufficient capital and liquidity to hold these securities until a recovery of the fair value occurs; as such, only the credit loss component was reflected in earnings. Given the significant uncertainty of a debt restructuring process, the Corporation cannot be certain that future impairment charges will not be required against these securities.

In addition, during the first half of 2015, the Corporation recorded a $0.4 million credit-related impairment loss associated with private label MBS, which are collateralized by fixed-rate mortgages on single-family residential properties in the United States. The interest rate on these private-label MBS is variable, tied to 3-month LIBOR and limited to the weighted-average coupon of the underlying collateral. The underlying mortgages are fixed-rate single-family loans with original high FICO scores (over 700) and moderate original loan-to-value ratios (under 80%), as well as moderate delinquency levels.

Based on the expected cash flows derived from the model, and since the Corporation does not have the intention to sell the securities and has sufficient capital and liquidity to hold these securities until a recovery of the fair value occurs, only the credit loss component was reflected in earnings. Significant assumptions in the valuation of the private label MBS were as follows:

	June 30, 2015				December 31, 2014		
	Weighted Average		Range		Weighted Average		Range
Discount rate	14.5%		14.5%		14.5%		14.5%
Prepayment rate	29%		17.37%-100.00%		32%		19.89%-100.00%
Projected Cumulative Loss Rate	6.9%		0.16%-80.00%		7.9%		0.64%-80.00%

NOTE 6 – OTHER EQUITY SECURITIES

Institutions that are members of the FHLB system are required to maintain a minimum investment in FHLB stock. Such minimum investment is calculated as a percentage of aggregate outstanding mortgages, and an additional investment is required that is calculated as a percentage of total FHLB advances, letters of credit, and the collateralized portion of interest-rate swaps outstanding. The stock is capital stock issued at $100 par value. Both stock and cash dividends may be received on FHLB stock.

As of June 30, 2015 and December 31, 2014, the Corporation had investments in FHLB stock with a book value of $25.4 million and $25.5 million, respectively. The net realizable value is a reasonable proxy for the fair value of these instruments. Dividend income from FHLB stock for each of the quarters ended June 30, 2015 and 2014, was $0.3 million and for each of the six-month periods ended June 30, 2015 and 2014 was $0.6 million.

The shares of FHLB stock owned by the Corporation were issued by the FHLB of New York. The FHLB of New York is part of the Federal Home Loan Bank System, a national wholesale banking network of 12 regional, stockholder-owned congressionally chartered banks. The Federal Home Loan Banks are all privately capitalized and operated by their member stockholders. The system is supervised by the Federal Housing Finance Agency, which ensures that the Federal Home Loan Banks operate in a financially safe and sound manner, remain adequately capitalized and able to raise funds in the capital markets, and carry out their housing finance mission.

The Corporation has other equity securities that do not have a readily available fair value. The carrying value of such securities as of June 30, 2015 and December 31, 2014 was $0.7 million and $0.3 million, respectively.

NOTE 7 – LOANS HELD FOR INVESTMENT

The following table provides information about the loan portfolio held for investment:

	June 30, 2015	December 31, 2014
(In thousands)		
Residential mortgage loans, mainly secured by first mortgages	$ 3,327,350	$ 3,011,187
Commercial loans:		
Construction loans	120,848	123,480
Commercial mortgage loans	1,518,151	1,665,787
Commercial and Industrial loans (1)	2,352,111	2,479,437
Total commercial loans	3,991,110	4,268,704
Finance leases	228,280	232,126
Consumer loans	1,670,935	1,750,419
Loans held for investment	9,217,675	9,262,436
Allowance for loan and lease losses	(221,518)	(222,395)
Loans held for investment, net	$ 8,996,157	$ 9,040,041

(1) As of June 30, 2015 and December 31, 2014, includes $1.0 billion and $1.1 billion, respectively, of commercial loans that are secured by real estate but are not dependent upon the real estate for repayment.

Loans held for investment on which accrual of interest income had been discontinued as of the indicated dates were as follows:

(In thousands)	June 30, 2015	December 31, 2014
Non-performing loans:		
Residential mortgage	$ 175,035	$ 180,707
Commercial mortgage	95,088	148,473
Commercial and Industrial	143,935	122,547
Construction:		
Land	12,877	15,030
Construction-residential	3,241	14,324
Consumer:		
Auto loans	17,689	22,276

Finance leases		3,257			5,245
Other consumer loans		12,451			15,294
Total non-performing loans held for investment (1) (2) (3)	$	463,573		$	523,896

(1)	As of June 30, 2015 and December 31, 2014, excludes $48.0 million and $54.6 million, respectively, of non-performing loans held for sale.
(2)	Amount excludes purchased-credit impaired ("PCI") loans with a carrying value of approximately $178.5 million and $102.6 million as of June 30, 2015 and December 31, 2014, respectively, primarily mortgage loans acquired from Doral Bank in the first quarter of 2015 and second quarter of 2014, as further discussed below. These loans are not considered non-performing due to the application of the accretion method, under which these loans will accrete interest income over the remaining life of the loans using an estimated cash flow analysis.
(3)	Non-performing loans exclude $400.8 million and $494.6 million of Trouble Debt Restructuring ("TDR") loans that are in compliance with modified terms and in accrual status as of June 30, 2015 and December 31, 2014, respectively.

Loans in Process of Foreclosure

As of June 30, 2015, the recorded investment of residential mortgage loans collateralized by residential real estate property that are in the process of foreclosure amounted to $157.0 million. The Corporation commences the foreclosure process on residential real estate loans when a borrower becomes 120 days delinquent in accordance with the guidelines of the Consumer Financial Protection Bureau (CFPB). Foreclosure procedures and timelines vary depending on whether the property is located in a judicial or non-judicial state. Judicial states (Puerto Rico) require the foreclosure to be processed through the state’s court while foreclosure in non-judicial states is processed without court intervention. Foreclosure timelines vary according to state law and Investor Guidelines. Occasionally foreclosures may be delayed due to mandatory mediations, bankruptcy, court delays and title issues, among other reasons.

The Corporation's aging of the loans held for investment portfolio is as follows:

As of June 30, 2015 (In thousands)	30-59 Days Past Due	60-89 Days Past Due	90 days or more Past Due (1)	Total Past Due	Purchased Credit-Impaired Loans	Current	Total loans held for investment	90 days past due and still accruing (2)
Residential mortgage:								
FHA/VA and other government-guaranteed loans (2) (3) (4)	$ -	$ 7,849	$ 90,923	$ 98,772	$ -	$ 50,068	$ 148,840	$ 90,923

Other consumer loans	9,334	5,359	15,399	30,092	-	644,695	674,787	2,948
Total loans held for investment	$ 140,298	$ 162,146	$ 641,892	$ 944,336	$ 178,494	$ 8,094,845	$ 9,217,675	$ 178,319

(1) Includes non-performing loans and accruing loans which are contractually delinquent 90 days or more (i.e., FHA/VA guaranteed loans and credit cards). Credit card loans continue to accrue finance charges and fees until charged-off at 180 days.

(2) It is the Corporation's policy to report delinquent residential mortgage loans insured by the FHA or guaranteed by the VA as past-due loans 90 days and still accruing as opposed to non-performing loans since the principal repayment is insured. These balances include $37.4 million of residential mortgage loans insured by the FHA or guaranteed by the VA, which are over 18 months delinquent, and are no longer accruing interest as of June 30, 2015.

(3) As of June 30, 2015, includes $28.1 million of defaulted loans collateralizing Government National Mortgage Association ("GNMA") securities for which the Corporation has an unconditional option (but not an obligation) to repurchase the defaulted loans.

(4) According to the Corporation's delinquency policy and consistent with the instructions for the preparation of the Consolidated Financial Statements for Bank Holding Companies (FR Y-9C) required by the Federal Reserve Board, residential mortgage, commercial mortgage, and construction loans are considered past due when the borrower is in arrears two or more monthly payments. FHA/VA government guaranteed loans, other residential mortgage loans, commercial mortgage loans, land loans, construction-commercial loans and construction-residential loans past due 30-59 days as of June 30, 2015 amounted to $10.3 million, $181.6 million, $16.2 million, $2.9 million, $5.2 million, and $3.1 million, respectively.

As of December 31, 2014	**30-59 Days Past Due**	**60-89 Days Past Due**	**90 days or more Past Due (1)**				**Total loans held for investment**	**90 days past due and still accruing (2)**

(In thousands)				**Total Past Due**	**Purchased Credit-Impaired Loans**	**Current**

(1) Includes non-performing loans and accruing loans which are contractually delinquent 90 days or more (i.e. FHA/VA guaranteed loans and credit cards). Credit card loans continue to accrue finance charges and fees until charged-off at 180 days.

(2) It is the Corporation's policy to report delinquent residential mortgage loans insured by the FHA or guaranteed by the VA as past-due loans 90 days and still accruing as opposed to non-performing loans since the principal repayment is insured. These balances include $40.4 million of residential mortgage loans insured by the FHA or guaranteed by the VA, which are over 18 months delinquent, and are no longer accruing interest as of December 31, 2014.

(3) As of December 31, 2014, includes $9.3 million of defaulted loans collateralizing GNMA securities for which the Corporation has an unconditional option (but not an obligation) to repurchase the defaulted loans.

(4) According to the Corporation's delinquency policy and consistent with the instructions for the preparation of the Consolidated Financial Statements for Bank Holding Companies (FR Y-9C) required by the Federal Reserve Board, residential mortgage, commercial mortgage, and construction loans are considered past due when the borrower is in arrears two or more monthly payments. FHA/VA government guaranteed loans, other residential mortgage loans, commercial mortgage loans, land loans and construction-residential loans past due 30-59 days as of December 31, 2014 amounted to $14.0 million, $189.1 million, $20.8 million, $0.8 million and $1.0 million, respectively.

The Corporation's credit quality indicators by loan type as of June 30, 2015 and December 31, 2014 are summarized below:

	Commercial Credit Exposure-Credit Risk Profile Based on Creditworthiness category:				
June 30, 2015	**Substandard**	**Doubtful**	**Loss**	**Total Adversely Classified (1)**	**Total Portfolio**
(In thousands)					
Commercial mortgage	$ 161,579	$ 117	$ -	$ 161,696	$ 1,518,151
Construction:					
Land	14,500	1	-	14,501	51,614
Construction-commercial	11,490	-	-	11,490	39,142
Construction-residential	3,241	-	-	3,241	30,092
Commercial and Industrial	218,604	896	523	220,023	2,352,111
	Commercial Credit Exposure-Credit Risk Profile Based on Creditworthiness category:				
December 31, 2014	**Substandard**	**Doubtful**	**Loss**	**Total Adversely Classified (1)**	**Total Portfolio**
(In thousands)					
Commercial mortgage	$ 273,027	$ 897	$ -	$ 273,924	$ 1,665,787
Construction:					
Land	16,915	-	-	16,915	55,921
Construction-commercial	11,790	-	-	11,790	24,562
Construction-residential	13,548	776	-	14,324	42,997
Commercial and Industrial	234,926	4,884	801	240,611	2,479,437

(1) Excludes $48.0 million ($7.8 million land, $39.1 million construction-commercial, $0.9 million construction-residential and $0.2 million commercial mortgage) and $54.6 million ($7.8 million land, $39.1 million construction-commercial, $0.9 million construction-residential and $6.8 million commercial mortgage) as of June 30, 2015 and December 31, 2014, respectively, of non-performing loans held for sale.

The Corporation considers a loan as adversely classified if its risk rating is Substandard, Doubtful or Loss. These categories are defined as follows:

Substandard- A Substandard asset is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Assets so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful- Doubtful classifications have all the weaknesses inherent in those classified Substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently known facts, conditions and values, highly questionable and improbable. A Doubtful classification may be appropriate in cases where significant risk exposures are perceived, but Loss cannot be determined because of specific reasonable pending factors which may strengthen the credit in the near term.

Loss- Assets classified Loss are considered uncollectible and of such little value that their continuance as bankable assets is not warranted. This classification does not mean that the asset has absolutely no recovery or salvage value, but rather that it is not practical or desirable to defer writing off this basically worthless asset even though partial recovery may be affected in the future. There is little or no prospect for near term improvement and no realistic strengthening action of significance pending.

June 30, 2015	Consumer Credit Exposure-Credit Risk Profile based on Payment activity									
	Residential Real-Estate				Consumer					
	FHA/VA/ Guaranteed (1)		Other residential loans		Auto		Finance Leases		Other Consumer

Purchased Credit Impaired ("PCI") Loans

As described in Note 2, Business Combination, the Corporation acquired PCI loans as part of the Doral Bank transaction and in previously completed asset acquisitions, which are accounted under ASC 310-30. These previous transactions include the acquisition from Doral Financial in the second quarter of 2014 of all its rights, title and interest in first and second residential mortgages loans in full satisfaction of secured borrowings owed by such entity to FirstBank, and the acquisition in 2012 of a FirstBank-branded credit card loans portfolio from FIA Card Services ("FIA").

Under ASC 310-30, the acquired PCI loans were aggregated into pools based on similar characteristics (i.e. delinquency status, loan terms). Each loan pool is accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows. Since the loans are accounted for by the Corporation under ASC 310-30, they are not considered non-performing and will continue to have an accretable yield as long as there is a reasonable expectation about the timing and amount of cash flows expected to be collected. The Corporation recognizes additional losses on this portfolio when it is probable that the Corporation will be unable to collect all cash flows expected as of the acquisition date plus additional cash flows expected to be collected arising from changes in estimates after the acquisition date.

The carrying amount of PCI loans follows:

	June 30, 2015		December 31, 2014	
(In thousands)				
Residential mortgage loans	$	175,234	$	98,494
Commercial mortgage loans		3,260		3,393
Credit Cards		-		717
Total PCI loans	$	178,494	$	102,604
Allowance for loan losses		(3,164)		-
Total PCI loans, net of allowance for loan losses	$	175,330	$	102,604

The following tables present PCI loans by past due status as of June 30, 2015 and December 31, 2014:

As of June 30, 2015 (In thousands)	**30-59 Days**		**60-89 Days**		**90 days or more**		**Total Past Due**		**Current**		**Total PCI loans**	
Residential mortgage loans (1)	$	-	$	16,775	$	17,820	$	34,595	$	140,639	$	175,234

	30-59 Days	60-89 Days	90 days or more	Total Past Due	Current	Total PCI loans
Commercial mortgage loans (1)	-	-	408	408	2,852	3,260
Credit Cards	-	-	-	-	-	-
	$ -	$ 16,775	$ 18,228	$ 35,003	$ 143,491	$ 178,494

(1) According to the Corporation's delinquency policy and consistent with the instructions for the preparation of the Consolidated Financial Statements for Bank Holding Companies (FR Y-9C) required by the Federal Reserve Board, residential mortgage and commercial mortgage loans are considered past due when the borrower is in arrears two or more monthly payments. PCI residential mortgage loans and commercial mortgage loans past due 30-59 days as of June 30, 2015 amounted to $31.5 million and $0.8 million, respectively.

As of December 31, 2014 (In thousands)	**30-59 Days**	**60-89 Days**	**90 days or more**	**Total Past Due**	**Current**	**Total PCI loans**
Residential mortgage loans (1)	$ -	$ 12,571	$ 15,176	$ 27,747	$ 70,747	$ 98,494
Commercial mortgage loans (1)	-	356	443	799	2,594	3,393
Credit Cards	47	25	42	114	603	717
	$ 47	$ 12,952	$ 15,661	$ 28,660	$ 73,944	$ 102,604

(1) According to the Corporation's delinquency policy and consistent with the instructions for the preparation of the Consolidated Financial Statements for Bank Holding Companies (FR Y-9C) required by the Federal Reserve Board, residential mortgage and commercial mortgage loans are considered past due when the borrower is in arrears two or more monthly payments. PCI residential mortgage loans and commercial mortgage loans past due 30-59 days as of December 31, 2014 amounted to $16.6 million and $0.8 million, respectively.

Initial Fair Value and Accretable Yield of PCI Loans

At acquisition, the Corporation estimated the cash flows the Corporation expected to collect on PCI loans. Under the accounting guidance for PCI loans, the difference between the contractually required payments and the cash flows expected to be collected at acquisition is referred to as the nonaccretable difference. This difference is neither accreted into income nor recorded on the Corporation’s consolidated statement of financial condition. The excess of cash flows expected to be collected over the estimated fair value is referred to as the accretable yield and is recognized in interest income over the remaining life of the loans, using the effective-yield method.

The following table presents acquired loans from Doral Bank in the first quarter of 2015 accounted for pursuant to ASC310-30 as of the acquisition date:

(In thousands)		
Contractually- required principal and interest	$	166,947
Less: Nonaccretable difference		(48,739)
Cash flows expected to be collected		118,208
Less: Accretable yield		(38,319)
Fair value of loans acquired in 2015 (1)	$	79,889

(1) Amounts are estimates based on the best information available at the acquisition date and adjustments in future quarters may occur up to one year from the date of acquisition.

The cash flows expected to be collected consider the estimated remaining life of the underlying loans and include the effects of estimated prepayments.

Changes in accretable yield of acquired loans

Subsequent to acquisition, the Corporation is required to periodically evaluate its estimate of cash flows expected to be collected. These evaluations, performed quarterly, require the continued use of key assumptions and estimates, similar to the initial estimate of fair value. Subsequent changes in the estimated cash flows expected to be collected may result in changes in the accretable yield and nonaccretable difference or reclassifications from nonaccretable yield to accretable. Increases in the cash flows expected to be collected will generally result in an increase in interest income over the remaining life of the loan or pool of loans. Decreases in expected cash flows due to further credit deterioration will generally result in an impairment charge recognized in the Corporation’s provision for loan and lease losses, resulting in an increase to the allowance for loan losses. During the second quarter of 2015, the Corporation established a $3.2 million reserve related to PCI loans acquired from Doral Financial in 2014. The reserve is driven by the revisions to the expected cash flows of the portfolio for the remaining term of the loan pool based on market conditions.

Adoption of new accounting requirements and recently issued but not yet effective accounting requirements

Changes in the accretable yield of PCI loans for the quarter and six-month period ended June 30, 2015 and 2014 were as follows:

	Quarter ended June 30, 2015		Quarter ended June 30, 2014		Six-month period ended June 30, 2015		Six-month period ended June 30, 2014	
(In thousands)								
Balance at beginning of period	$	118,502	$	-	$	82,460	$	-
Additions (accretable yield at acquisition of loans from Doral)		-		86,759		38,319		86,759
Accretion recognized in earnings		(3,007)		(612)		(5,284)		(612)
Reclassification from non accretable		8,793		-		8,793		-
Balance at end of period	$	124,288	$	86,147	$	124,288	$	86,147

The outstanding principal balance of PCI loans, including amounts charged off by the Corporation, amounted to $223.4 million as of June 30, 2015 (December 2014 - $135.5 million).

Changes in the carrying amount of loans accounted for pursuant to ASC 310-30 follows:

		Quarter Ended		Six-Month Period Ended
		June 30, 2015		June 30, 2015
(In thousands)				
Balance at beginning of period	$	181,114	$	102,604
Additions (1)		-		79,889
Accretion		3,007		5,284
Collections and charge-offs		(5,627)		(9,283)
Ending balance	$	178,494	$	178,494
Allowance for loan losses		(3,164)		(3,164)
Ending balance, net of allowance for loan losses	$	175,330	$	175,330

(1) Represents the estimated fair value of the PCI loans acquired from Doral at the date of acquisition.

Purchases and Sales of Loans

As described in Note 2, Business Combination, on February 27, 2015, FirstBank acquired $324.8 million in principal of loans, primarily residential mortgage loans through an alliance with other co-bidders on the failed Doral Bank, a portion of which was accounted for as PCI loans, as described above. Pursuant to the terms of the purchase and assumption agreement, FirstBank purchased the loans at an aggregate discount of 9.0%, or approximately $29 million, through an FDIC facilitated transaction. The transaction was accounted for under ASC Topic 820, which requires all recognized assets acquired and liabilities assumed in a business combination to be measured at their acquisition-date fair values. The fair value of the loans acquired in this transaction was $311.4 million at the acquisition date.

In addition, during the first half of 2015, the Corporation purchased $46.0 million of residential mortgage loans consistent with a strategic program established by the Corporation in 2005 to purchase ongoing residential mortgage loan production from mortgage bankers in Puerto Rico. Also, during the first half of 2015, the Corporation purchased a $21.1million participation in a commercial mortgage loan. Generally, the loans purchased from mortgage bankers were conforming residential mortgage loans. Purchases of conforming residential mortgage loans provide the Corporation the flexibility to retain or sell the loans, including through securitization transactions, depending upon the Corporation's interest rate risk management strategies. When the Corporation sells such loans, it generally keeps the servicing of the loans.

In the ordinary course of business, the Corporation sells residential mortgage loans (originated or purchased) to GNMA and government-sponsored entities ("GSEs") such as Fannie Mae ("FNMA") and Freddie Mac ("FHLMC"), which generally securitize the transferred loans into mortgage-backed securities for sale into the secondary market. The Corporation sold approximately $75.5 million of performing residential mortgage loans to FNMA and FHLMC during

the first half of 2015. Also, during the first half of 2015, the Corporation sold $131.0 million of FHA/VA mortgage loans to GNMA, which package them into mortgage-backed securities. The Corporation's continuing involvement in these loan sales consists primarily of servicing the loans. In addition, the Corporation agreed to repurchase loans when it breaches any of the representations and warranties included in the sale agreement. These representations and warranties are consistent with the GSEs' selling and servicing guidelines (i.e., ensuring that the mortgage was properly underwritten according to established guidelines).

For loans sold to GNMA, the Corporation holds an option to repurchase individual delinquent loans issued on or after January 1, 2003 when the borrower fails to make any payment for three consecutive months. This option gives the Corporation the ability, but not the obligation, to repurchase the delinquent loans at par without prior authorization from GNMA.

Under ASC Topic 860, Transfer and Servicing, once the Corporation has the unilateral ability to repurchase the delinquent loan, it is considered to have regained effective control over the loan and is required to recognize the loan and a corresponding repurchase liability on the balance sheet regardless of the Corporation's intent to repurchase the loan.

During the first half of 2015, the Corporation repurchased pursuant to its repurchase option with GNMA $6.3 million of loans previously sold to GNMA. The principal balance of these loans is fully guaranteed and the risk of loss related to the repurchased loans is generally limited to the difference between the delinquent interest payment advanced to GNMA computed at the loan's interest rate and the interest payments reimbursed by FHA, which are computed at a pre-determined debenture rate. Repurchases of GNMA loans allow the Corporation, among other things, to maintain acceptable delinquency rates on outstanding GNMA pools and remain as a seller and servicer in good standing with GNMA. The Corporation generally remediates any breach of representations and warranties related to the underwriting of such loans according to established GNMA guidelines without incurring losses. The Corporation does not maintain a liability for estimated losses as a result of breaches in representations and warranties.

Loan sales to FNMA and FHLMC are without recourse in relation to the future performance of the loans. The Corporation repurchased at par loans previously sold to FNMA and FHLMC in the amount of $0.5 million during the first half of 2015. The Corporation's risk of loss with respect to these loans is also minimal as these repurchased loans are generally performing loans with documentation deficiencies. No losses related to breaches of representations and warranties were incurred in the first half of 2015. Historically, losses experienced on these loans have been immaterial. As a consequence, as of June 30, 2015, the Corporation does not maintain a liability for estimated losses on loans expected to be repurchased as a result of breaches in loan and servicer representations and warranties.

In addition, the Corporation sold a $20.0 million loan participation during the second quarter of 2015.

Bulk Sale of Assets

During the second quarter of 2015, the Corporation completed the sale of commercial and construction loans with a book value of $147.5 million ($90.7 million of commercial mortgage loans, $45.8 million of commercial and industrial, and $11.0 million of construction loans), comprised mostly of non-performing and adversely classified loans, as well as other real estate owned ("OREO") with a book value of $2.9 million, in a cash transaction. The sale price of this bulk sale was $87.3 million. Approximately $15.3 million of reserves had been allocated to the loans. This transaction resulted in total charge-offs of $61.4 million and an incremental pre-tax loss of $48.7 million, including $0.9 million in professional service fees directly attributable to the bulk sale.

Loan Portfolio Concentration

The Corporation's primary lending area is Puerto Rico. The Corporation's banking subsidiary, First Bank, also lends in the USVI and BVI markets and in the United States (principally in the state of Florida). Of the total gross loans held for investment of $9.2 billion as of June 30, 2015, approximately 82% have credit risk concentration in Puerto Rico, 11% in the United States, and 7% in the USVI and BVI.

As of June 30, 2015, the Corporation had $340.0 million of credit facilities, excluding investment securities, granted to the Puerto Rico government, its municipalities and public corporations, of which $326.7 million was outstanding (book value of $325.8 million), compared to $308.0 million outstanding as of December 31, 2014. In addition, the outstanding balance of facilities granted to the government of the Virgin Islands amounted to $59.1 million as of June 30, 2015, compared to $57.7 million as of December 31, 2014. Approximately $204.3 million of the granted credit facilities outstanding consisted of loans to municipalities in Puerto Rico. Municipal debt exposure is secured by ad valorem taxation without limitation as to rate or amount on all taxable property within the boundaries of each municipality. The good faith, credit, and unlimited taxing power of the applicable municipality have been pledged to the repayment of all outstanding bonds and notes. Approximately $23.3 million consisted of loans to units of the central government, and approximately $99.0 million ($98.1 million book value) consisted of loans to public corporations that generally receive revenues from the rates they charge for services or products, such as electric power services, including a credit facility extended to the Puerto Rico Electric Power Authority ("PREPA"), with a book value of $74.1 million. The PREPA credit facility was placed in non-accrual status in the first quarter of 2015, and interest payments are now recorded on a cost-recovery basis. Major public corporations have varying degrees of independence from the central government and many receive appropriations or other payments from the Puerto Rico's government general fund. Debt issued by the central government can either carry the full faith, credit and taxing power of the Commonwealth of Puerto Rico or represent an obligation that is subject to annual budget appropriations.

Furthermore, as of June 30, 2015, the Corporation had $131.0 million outstanding in financings to the hotel industry in Puerto Rico where the borrower and underlying collateral are the primary sources of repayment and the Puerto Rico Tourism Development Fund ("TDF") provides a secondary guarantee for payment performance, compared to $133.3 million as of December 31, 2014. The TDF is a subsidiary of the Government Development Bank for Puerto Rico ("GDB") that works with private-sector financial institutions to structure financings for new hospitality projects. The Corporation has been receiving payments from TDF to cover scheduled payments on these financings since late 2012, including collections of interest and principal of approximately $4.6 million in 2015 and $8.6 million in 2014. In addition, the Corporation had $124.0 million in indirect exposure to residential mortgage loans that are guaranteed by the Puerto Rico Housing Authority. Mortgage loans guaranteed by the Puerto Rico Housing Authority are secured by the underlying properties and the guarantees serve to cover shortfalls in collateral in the event of a borrower default.

As disclosed in Note 5, S&P, Moody’s and Fitch downgraded the credit rating of the Commonwealth of Puerto Rico’s debt to non-investment grade categories. The Corporation cannot predict at this time the impact that the current fiscal situation of the Commonwealth of Puerto Rico, including the government’s recent announcements regarding its ability to pay debt and the payment default of a government public corporation (Public Finance Corporation), and the various legislative and other measures adopted and to be adopted by the Puerto Rico government in response to such fiscal situation will have on the Puerto Rico economy and on the Corporation’s financial condition and results of operations.

Troubled Debt Restructurings

The Corporation provides homeownership preservation assistance to its customers through a loss mitigation program in Puerto Rico that is similar to the U.S. government’s Home Affordable Modification Program guidelines. Depending upon the nature of borrowers’ financial condition, restructurings or loan modifications through this program as well as other restructurings of individual commercial, commercial mortgage, construction, and residential mortgage loans in the U.S. mainland fit the definition of a TDR. A restructuring of a debt constitutes a TDR if the creditor for economic or legal reasons related to the debtor’s financial difficulties grants a concession to the debtor that it would not otherwise consider. Modifications involve changes in one or more of the loan terms that bring a defaulted loan current and provide sustainable affordability. Changes may include the refinancing of any past-due amounts, including interest and escrow, the extension of the maturity of the loan and modifications of the loan rate. As of June 30, 2015, the Corporation’s total TDR loans of $634.8 million consisted of $375.3 million of residential mortgage loans, $157.0 million of commercial and industrial loans, $60.0 million of commercial mortgage loans, $6.4 million of construction loans, and $36.0 million of consumer loans. Outstanding unfunded commitments on TDR loans amounted to $47 thousand as of June 30, 2015.

The Corporation’s loss mitigation programs for residential mortgage and consumer loans can provide for one or a combination of the following: movement of interest past due to the end of the loan, extension of the loan term, deferral of principal payments and reduction of interest rates either permanently or for a period of up to four years (increasing back in step-up rates). Additionally, in certain cases, the restructuring may provide for the forgiveness of contractually due principal or interest. Uncollected interest is added to the end of the loan term at the time of the restructuring and not recognized as income until collected or when the loan is paid off. These programs are available only to those borrowers who have defaulted, or are likely to default, permanently on their loan and would lose their homes in the foreclosure action absent some lender concession. Nevertheless, if the Corporation is not reasonably assured that the borrower will comply with its contractual commitment, properties are foreclosed.

Prior to permanently modifying a loan, the Corporation may enter into trial modifications with certain borrowers. Trial modifications generally represent a six-month period during which the borrower makes monthly payments under the anticipated modified payment terms prior to a formal modification. Upon successful completion of a trial modification, the Corporation and the borrower enter into a permanent modification. TDR loans that are participating in or that have been offered a binding trial modification are classified as TDRs when the trial offer is made and

continue to be classified as TDRs regardless of whether the borrower enters into a permanent modification. As of June 30, 2015, we classified an additional $9.9 million of residential mortgage loans as TDRs that were participating in or had been offered a trial modification.

For the commercial real estate, commercial and industrial, and construction loan portfolios, at the time of a restructuring, the Corporation determines, on a loan-by-loan basis, whether a concession was granted for economic or legal reasons related to the borrower's financial difficulty. Concessions granted for commercial loans could include: reductions in interest rates to rates that are considered below market; extension of repayment schedules and maturity dates beyond original contractual terms; waivers of borrower covenants; forgiveness of principal or interest; or other contract changes that would be considered a concession. The Corporation mitigates loan defaults for its commercial loan portfolios through its collection function. The function's objective is to minimize both early stage delinquencies and losses upon default of commercial loans. In the case of the commercial and industrial, commercial mortgage, and construction loan portfolios, the Corporation's Special Asset Group ("SAG") focuses on strategies for the accelerated reduction of non-performing assets through note sales, short sales, loss mitigation programs, and sales of OREO. In addition to the management of the resolution process for problem loans, the SAG oversees collection efforts for all loans to prevent migration to the non-performing and/or adversely classified status. The SAG utilizes relationship officers, collection specialists, and attorneys. In the case of residential construction projects, the workout function monitors project specifics, such as project management and marketing, as deemed necessary. The SAG utilizes its collections infrastructure of workout collection officers, credit work-out specialists, in-house legal counsel, and third-party consultants. In the case of residential construction projects and large commercial loans, the SAG function also utilizes third-party specialized consultants to monitor the residential and commercial construction projects in terms of construction, marketing and sales, and assist with the restructuring of large commercial loans.

In addition, the Corporation extends, renews, and restructures loans with satisfactory credit profiles. Many commercial loan facilities are structured as lines of credit, which are mainly one year in term and, therefore, are required to be renewed annually. Other facilities may be restructured or extended from time to time based upon changes in the borrower's business needs, use of funds, timing of completion of projects, and other factors. If the borrower is not deemed to have financial difficulties, extensions, renewals, and restructurings are done in the normal course of business and not considered concessions, and the loans continue to be recorded as performing.

Selected information on TDRs that includes the recorded investment by loan class and modification type is summarized in the following tables. This information reflects all TDRs:

	June 30, 2015					
(In thousands)	Interest rate below market	Maturity or term extension	Combination of reduction in interest rate and extension of maturity	Forgiveness of principal and/or interest	Other (1)	Total
Troubled Debt Restructurings:

Paid-off and partial payments		(8,811)		(27,655)
Ending balance of TDRs	$	628,233	$	628,233

TDRs are classified as either accrual status or nonaccrual loans. A loan on nonaccrual and restructured as a TDR will remain on nonaccrual status until the borrower has proven the ability to perform under the modified structure, generally for a minimum of six months, and there is evidence that such payments can and are likely to continue as agreed. Performance prior to the restructuring, or significant events that coincide with the restructuring, are included in assessing whether the borrower can meet the new terms and may result in the loans being returned to accrual status at the time of the restructuring or after a shorter performance period. If the borrower's ability to meet the revised payment schedule is uncertain, the loan remains classified as a nonaccrual loan. Loan modifications increase the Corporation's interest income by returning a non-performing loan to performing status, if applicable, increase cash flows by providing for payments to be made by the borrower, and limits increases in foreclosure and OREO costs. The

Corporation continues to consider a modified loan as an impaired loan for purposes of estimating the allowance for loan and lease losses. A TDR that specifies an interest rate that at the time of the restructuring is greater than or equal to the rate the Corporation is willing to accept for a new loan with comparable risk may not be reported as a TDR or an impaired loan in the calendar years subsequent to the restructuring if it is in compliance with its modified terms. The Corporation did not remove loans from the TDR classification during the first six months of 2015.

The following table provides a breakdown between accrual and nonaccrual status of TDRs:

(In thousands)	June 30, 2015					
		Accrual		Nonaccrual (1) (2)		Total TDRs
Non-FHA/VA Residential Mortgage loans	$	288,759	$	86,562	$	375,321
Commercial Mortgage Loans		29,900		30,065		59,965
Commercial and Industrial Loans		51,426		105,622		157,048
Construction Loans:						
Land		688		2,203		2,891
Construction-residential		3,079		432		3,511
Consumer Loans - Auto		12,254		6,551		18,805
Finance Leases		2,153		228		2,381
Consumer Loans - Other		12,575		2,264		14,839
Total Troubled Debt Restructurings	$	400,834	$	233,927	$	634,761

(1) Included in non-accrual loans are $96.7 million in loans that are performing under the terms of the restructuring agreement but are reported in non-accrual status until the restructured loans meet the criteria of sustained payment performance under the revised terms for reinstatement to accrual status and there is no doubt about full collectability.

(2) Excludes non-accrual TDRs held for sale with a carrying value of $39.1 million as of June 30, 2015.

(In thousands)	December 31, 2014					
		Accrual		Nonaccrual (1) (2)		Total TDRs
Non- FHA/VA Residential Mortgage loans	$	266,810	$	82,965	$	349,775
Commercial Mortgage Loans		69,374		58,392		127,766

Total Troubled Debt Restructurings	$	494,640	$	199,813	$	694,453

Adoption of new accounting requirements and recently issued but not yet effective accounting requirements

(1)	Included in non-accrual loans are $52.8 million in loans that are performing under the terms of the restructuring agreement but are reported in non-accrual status until the restructured loans meet the criteria of sustained payment performance under the revised terms for reinstatement to accrual status and there is no doubt about full collectability.
(2)	Excludes non-accrual TDRs held for sale with a carrying value of $45.7 million as of December 31, 2014.

TDRs exclude restructured residential mortgage loans that are guaranteed by the U.S. federal government (i.e., FHA/VA loans) totaling $79.5 million. The Corporation excludes FHA/VA guaranteed loans from TDRs given that, in the event that the borrower defaults on the loan, the principal and interest (debenture rate) are guaranteed by the U.S. government; therefore, the risk of loss on these types of loans is very low. The Corporation does not consider loans with U.S. federal government guarantees to be impaired loans for the purpose of calculating the allowance for loan and lease losses.

Loan modifications that are considered TDRs completed during the quarter and six-month period ended June 30, 2015 and 2014 were as follows:

(Dollars in thousands)	**Quarter ended June 30, 2015**

Recidivism, or the borrower defaulting on its obligation pursuant to a modified loan, results in the loan once again becoming a non-performing loan. Recidivism occurs at a notably higher rate than do defaults on new origination loans, so modified loans present a higher risk of loss than do new origination loans. The Corporation considers a loan to have defaulted if the borrower has failed to make payments of either principal, interest, or both for a period of 90 days or more.

Loan modifications considered TDRs that defaulted during the quarters and six-month periods ended June 30, 2015 and June 30, 2014 and had become TDRs during the 12-months preceding the default date were as follows:

	Quarter ended June 30,						
(Dollars in thousands)	**2015**				**2014**		
	Number of contracts		**Recorded Investment**		**Number of contracts**		**Recorded Investment**

Adoption of new accounting requirements and recently issued but not yet effective accounting requirements

For certain TDRs, the Corporation splits the loans into two new notes, A and B notes. The A note is restructured to comply with the Corporation's lending standards at current market rates, and is tailored to suit the customer's ability to make timely interest and principal payments. The B note includes the granting of the concession to the borrower and varies by situation. The B note is charged off but the obligation is not forgiven to the borrower, and any payments collected are accounted for as recoveries. At the time of the restructuring, the A note is identified and classified as a TDR. If the loan performs for at least six months according to the modified terms, the A note may be returned to accrual status. The borrower's payment performance prior to the restructuring is included in assessing whether the borrower can meet the new terms and may result in the loan being returned to accrual status at the time of the restructuring. In the periods following the calendar year in which a loan is restructured, the A note may no longer be reported as a TDR if it is on accrual, is in compliance with its modified terms, and yields a market rate (as determined and documented at the time of the restructuring).

The recorded investment in loans held for investment restructured using the A/B note restructure workout strategy was approximately $41.0 million as of June 30, 2015. The following table provides additional information about the volume of this type of loan restructuring and the effect on the allowance for loan and lease losses in the first six months of 2015 and 2014:

(In thousands)	**June 30, 2015**				**June 30, 2014**
Principal balance deemed collectible at end of period	$	41,000		$	62,159
Amount (recovery) charged off	$	-		$	(4,106)
(Reductions) charges to the provision for loan losses	$	(62)		$	(4,725)
Allowance for loan losses at end of period	$	669		$	942

Of the loans comprising the $41.0 million that have been deemed collectible, approximately $40.0 million were placed in accrual status as the borrowers have exhibited a period of sustained performance. These loans continue to be individually evaluated for impairment purposes.

NOTE 8 – ALLOWANCE FOR LOAN AND LEASE LOSSES

The changes in the allowance for loan and lease losses were as follows:

As discussed in Note 7, under the heading "Bulk Sale of Assets," during the second quarter of 2015, the Corporation completed the sale of commercial and construction loans with a book value of $147.5 million, mostly comprised of non-performing and adversely classified loan. This transaction resulted in charge-offs of approximately $61.4 million. The inclusion of the $61.4 million of charge-offs from the bulk sale in the historical loss rates had an impact of approximately $15.5 million on the general reserve for loan losses determined for loans collectively evaluated for impairment.

The Corporation incorporated the charge-offs information from the second quarter 2015 bulk sale in its measurement of credit impairment for loans collectively measured. The total bulk sale charge offs were included in the determination of historical loss rates with no reduction for the additional market discount related to the bulk sale resolution; in the past the Corporation had separated the market component of the loss. The decision to include total charge-offs, with no qualitative adjustment for the steep discount on this bulk sale, considered the potential use of similar credit resolution strategies in the future in light of the current economic conditions in Puerto Rico. The effect of this position resulted in the aforementioned increase of $15.5 million in related allowance which management feels better reflects the inherent risk in the portfolio.

As of June 30, 2015, the Corporation maintained a $0.5 million reserve for unfunded loan commitments mainly related to outstanding construction and commercial and industrial loan commitments. The reserve for unfunded loan commitments is an estimate of the losses inherent in off-balance sheet loan commitments to borrowers that are experiencing financial difficulties at the balance sheet date. It is calculated by multiplying an estimated loss factor by an estimated probability of funding, and then by the period-end amounts for unfunded commitments. The reserve for unfunded loan commitments is included as part of accounts payable and other liabilities in the consolidated statement of financial condition.

NOTE 9 – LOANS HELD FOR SALE

The Corporation's loans held-for-sale portfolio was composed of:

(In thousands)	June 30, 2015		December 31, 2014	
Residential mortgage loans	$	31,994	$	22,315
Construction loans		47,802		47,802
Commercial mortgage loans		230		6,839
Total	$	80,026	$	76,956

Non-performing loans held for sale totaled $48.0 million ($0.2 million commercial mortgage and $47.8 million construction loans) and $54.6 million ($6.8 million commercial mortgage and $47.8 million construction loans) as of June 30, 2015 and December 31, 2014, respectively.

During the second quarter of 2015, the Corporation completed the sale of a $6.6 million non-performing commercial mortgage loan as part of the bulk sale of assets.

NOTE 10 – OTHER REAL ESTATE OWNED

The following table presents OREO inventory as of the dates indicated:

(In thousands)	June 30, 2015		December 31, 2014	
OREO				
OREO balances, carrying value:				
FHA/VA-Guaranteed (1)	$	7,274	$	7,059
Other residential		25,954		22,520
Commercial		72,528		75,654
Construction		16,373		18,770
Total	$	122,129	$	124,003

(1)	As of June 30, 2015, excludes $0.1 million of foreclosures completed in 2015 that meet the conditions of ASC 310-40 and are presented as a receivable (other assets) in the statement of financial condition.

NOTE 11 – DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

One of the market risks facing the Corporation is interest rate risk, which includes the risk that changes in interest rates will result in changes in the value of the Corporation’s assets or liabilities and the risk that net interest income from its loan and investment portfolios will be adversely affected by changes in interest rates. The overall objective of the Corporation’s interest rate risk management activities is to reduce the variability of earnings caused by changes in interest rates.

The Corporation designates a derivative as a fair value hedge, a cash flow hedge or an economic undesignated hedge when it enters into the derivative contract. As of June 30, 2015 and December 31, 2014, all derivatives held by the Corporation were considered economic undesignated hedges. These undesignated hedges are recorded at fair value with the resulting gain or loss recognized in current earnings.

The following summarizes the principal derivative activities used by the Corporation in managing interest rate risk:

Interest rate cap agreements - Interest rate cap agreements provide the right to receive cash if a reference interest rate rises above a contractual rate. The value increases as the reference interest rate rises. The Corporation enters into interest rate cap agreements for protection from rising interest rates.

Interest rate swaps - Interest rate swap agreements generally involve the exchange of fixed and floating-rate interest payment obligations without the exchange of the underlying notional principal amount. As of June 30, 2015, the Corporation has no interest rate swaps outstanding. In the past, most of the interest rate swaps were used for protection against rising interest rates. Similar to

unrealized gains and losses arising from changes in fair value, net interest settlements on interest rate swaps are recorded as an adjustment to interest income or interest expense depending on whether an asset or liability is being economically hedged.

Forward Contracts - Forward contracts are sales of to-be-announced ("TBA") mortgage-backed securities that will settle over the standard delivery date and do not qualify as "regular way" security trades. Regular-way security trades are contracts that have no net settlement provision and no market mechanism to facilitate net settlement and provide for delivery of a security within the time generally established by regulations or conventions in the market place or exchange in which the transaction is being executed. The forward sales are considered derivative instruments that need to be marked to market. These securities are used to economically hedge the FHA/VA residential mortgage loan securitizations of the mortgage-banking operations. Unrealized gains (losses) are recognized as part of mortgage banking activities in the Consolidated Statements of Income (Loss).

To satisfy the needs of its customers, the Corporation may enter into nonhedging transactions. On these transactions, generally, the Corporation participates as a buyer in one of the agreements and as a seller in the other agreement under the same terms and conditions.

In addition, the Corporation may enter into certain contracts with embedded derivatives that do not require separate accounting as these are clearly and closely related to the economic characteristics of the host contract. When the embedded derivative possesses economic characteristics that are not clearly and closely related to the economic characteristics of the host contract, it is bifurcated, carried at fair value, and designated as a trading or non-hedging derivative instrument.

The following table summarizes the notional amounts of all derivative instruments:

	Notional Amounts				
	As of June 30, 2015			**As of December 31, 2014**	
	(In thousands)				
Undesignated economic hedges:					
Interest rate contracts:					
Interest rate swap agreements	$	-		$	5,440
Written interest rate cap agreements		36,481			37,132
Purchased interest rate cap agreements		36,481			37,132
Forward Contracts:					
Sale of GNMA TBAs		44,000			19,000
	$	116,962		$	98,704

Adoption of new accounting requirements and recently issued but not yet effective accounting requirements

Notional amounts are presented on a gross basis with no netting of offsetting exposure positions.

The following table summarizes the fair value of derivative instruments and the location in the statement of financial condition:

	Asset Derivatives			Liability Derivatives		
	Statement of Financial Condition Location	June 30, 2015 Fair Value	December 31, 2014 Fair Value	Statement of Financial Condition Location	June 30, 2015 Fair Value	December 31, 2014 Fair Value
(In thousands)

		$ 136	$ 39		$ 102	$ 187

The following table summarizes the effect of derivative instruments on the statement of income (loss):

(In thousands)	Location of Gain or (loss) Recognized in Income on Derivatives	Gain (or Loss) Quarter Ended June 30, 2015	Gain (or Loss) Quarter Ended June 30, 2014	Gain (or Loss) Six-Month Period Ended June 30, 2015	Gain (or Loss) Six-Month Period Ended June 30, 2014
Undesignated economic hedges:					
Interest rate contracts:					
Interest rate swap agreements	Interest income - Loans	$ -	$ 261	$ -	$ 574
Forward contracts:					
Sales of GNMA TBAs	Mortgage banking activities	254	(237)	182	(402)
Total gain on derivatives		$ 254	$ 24	$ 182	$ 172

Derivative instruments, such as interest rate swaps, are subject to market risk. As is the case with investment securities, the market value of derivative instruments is largely a function of the financial market's expectations regarding the future direction of interest rates. Accordingly, current market values are not necessarily indicative of the future impact of derivative instruments on earnings. This will depend, for the most part, on the shape of the yield curve, the level of interest rates, as well as the expectations for rates in the future.

A summary of interest rate swaps is as follows:

(Dollars in thousands)	As of June 30, 2015	As of December 31, 2014
Pay fixed/receive floating :		
Notional amount (1)	$ -	$ 5,440
Weighted-average receive rate at period end	-	2.03%
Weighted-average pay rate at period end	-	3.45%

Adoption of new accounting requirements and recently issued but not yet effective accounting requirements

(1)	The remaining interest rate swap with a notional amount of $5.4 million matured during the second quarter of 2015.							
	As of June 30, 2015 the Corporation had not entered into any derivative instrument containing credit-risk related contingent features.							

NOTE 12 – OFFSETTING OF ASSETS AND LIABILITIES

The Corporation enters into master agreements with counterparties, primarily related to derivatives and repurchase agreements, that may allow for netting of exposures in the event of default. In an event of default, each party has a right of set-off against the other party for the amounts owed in the related agreement and any other amount or obligation owed in respect of any other agreement or transaction between them. The following table presents information about the offsetting of financial assets and liabilities as well as derivative assets and liabilities:

NOTE 13 – GOODWILL AND OTHER INTANGIBLES

Goodwill as of June 30, 2015 and December 31, 2014 amounted to $28.1 million, recognized as part of “Other Assets” in the consolidated statement of financial condition. The Corporation conducted its annual evaluation of goodwill and intangibles during the fourth quarter of 2014. The Corporation’s goodwill is related to the acquisition of FirstBank Florida in 2005.

The Corporation bypassed the qualitative assessment in 2014 and proceeded directly to perform the first step of the two-step goodwill impairment test. The Step 1 evaluation of goodwill allocated to the Florida reporting unit under both valuation approaches (market and discounted cash flow analysis) indicated that the fair value of the unit was above the carrying amount of its equity book value as of the valuation date (October 1); therefore, the completion of Step 2 was not required. Based on the analysis under both the market and discounted cash flow analysis, the estimated fair value of the equity of the reporting unit exceeded the carrying amount of the entity, including goodwill at the evaluation date. There have been no events related to the Florida reporting unit that could indicate potential goodwill impairment since the date of the last evaluation; therefore, no goodwill impairment evaluation was performed during the first half of 2015. Goodwill and other indefinite life intangibles are reviewed at least annually for impairment.

In connection with the acquisition of the FirstBank-branded credit card loan portfolio in the second quarter of 2012, the Corporation recognized a purchased credit card relationship intangible of $24.5 million, which is being amortized over the next 6.4 years on an accelerated basis based on the estimated attrition rate of the purchased credit card accounts, which reflects the pattern in which the economic benefits of the intangible asset are consumed. These benefits are consumed as the revenue stream generated by the cardholder relationship is realized.

The core deposit intangible acquired in the February 2015 Doral Bank transaction amounted to $5.8 million.

The following table shows the gross amount and accumulated amortization of the Corporation’s intangible assets recognized as part of Other Assets in the consolidated statement of financial condition:

	As of June 30, 2015			**As of December 31, 2014**	
(Dollars in thousands)					
Core deposit intangible:					
Gross amount, beginning of period	$	45,844		$	45,844
Addition as a result of acquisition		5,820			-
Accumulated amortization		(41,381)			(40,424)

Net carrying amount	$	10,283		$	5,420
Remaining amortization period		9.7 years			8.4 years
Purchased credit card relationship intangible:					
Gross amount	$	24,465		$	24,465
Accumulated amortization		(9,611)			(8,076)
Net carrying amount	$	14,854		$	16,389
Remaining amortization period		6.4 years			6.9 years

For the quarter and six-month period ended June 30, 2015, the amortization expense of core deposit intangibles amounted to $0.6 million and $1.0 million, respectively (2014 - $0.4 million and $0.8 million, respectively). For the quarter and six-month period ended June 30, 2015, the amortization expense of the purchased credit card relationship intangible amounted to $0.8 million and $1.5 million, respectively (2014 - $0.9 million and $1.7 million, respectively).

The estimated aggregate amortization expense related to these intangible assets for future periods is as follows:		
		Amount
		(In thousands)
2015	$	2,652
2016		4,884
2017		4,270
2018		3,313
2019 and after		10,018

NOTE 14 – NON CONSOLIDATED VARIABLE INTEREST ENTITIES AND SERVICING ASSETS

The Corporation transfers residential mortgage loans in sale or securitization transactions in which it has continuing involvement, including servicing responsibilities and guarantee arrangements. All such transfers have been accounted for as sales as required by applicable accounting guidance.

When evaluating transfers and other transactions with Variable Interest Entities ("VIEs") for consolidation, the Corporation first determines if the counterparty is an entity for which a variable interest exists. If no scope exception is applicable and a variable interest exists, the Corporation then evaluates if it is the primary beneficiary of the VIE and whether the entity should be consolidated or not.

Below is a summary of transfers of financial assets to VIEs for which the Corporation has retained some level of continuing involvement:

GNMA

The Corporation typically transfers first lien residential mortgage loans in conjunction with GNMA securitization transactions in which the loans are exchanged for cash or securities that are readily redeemed for cash proceeds and servicing rights. The securities issued through these transactions are guaranteed by the issuer and, as such, under seller/servicer agreements, the Corporation is required to service the loans in accordance with the issuers' servicing guidelines and standards. As of June 30, 2015, the Corporation serviced loans securitized through GNMA with a principal balance of $1.2 billion.

Trust Preferred Securities

In 2004, FBP Statutory Trust I, a financing subsidiary of the Corporation, sold to institutional investors $100 million of its variable rate trust-preferred securities. The proceeds of the issuance, together with the proceeds of the purchase by the Corporation of $3.1 million of FBP Statutory Trust I variable rate common securities, were used by FBP Statutory Trust I to purchase $103.1 million aggregate principal amount of the Corporation's Junior Subordinated Deferrable Debentures. Also in 2004, FBP Statutory Trust II, a statutory trust that is wholly owned by the Corporation, sold to institutional investors $125 million of its variable rate trust-preferred securities. The proceeds of the issuance, together with the proceeds of the purchase by the Corporation of $3.9 million of FBP Statutory Trust II variable rate common securities, were used by FBP Statutory Trust II to purchase $128.9 million aggregate principal amount of the Corporation's Junior Subordinated Deferrable Debentures. The debentures are presented in the

Corporation's consolidated statement of financial condition as Other Borrowings, net of related issuance costs. The variable rate trust-preferred securities are fully and unconditionally guaranteed by the Corporation. During the second quarter of 2015, the Corporation exchanged $5.3 million of trust preferred securities (FBP Statutory Trust I) for 852,831 shares of the Corporation's common stock. The Junior Subordinated Deferrable Debentures issued by the Corporation in April 2004 and in September 2004 mature on June 17, 2034 and September 20, 2034, respectively; however, under certain circumstances, the maturity of Junior Subordinated Deferrable Debentures may be shortened (such shortening would result in a mandatory redemption of the variable rate trust-preferred securities). The Collins Amendment to the Dodd-Frank Act eliminates certain trust-preferred securities from Tier 1 Capital. Bank Holding Companies, such as the Corporation, must fully phase out these instruments from Tier I capital by January 1, 2016 (25% allowed in 2015 and 0% in 2016); however, these instruments may remain in Tier 2 capital until the instruments are redeemed or mature. Under the indentures, the Corporation has the right, from time to time, and without causing an event of default, to defer payments of interest on the subordinated debentures by extending the interest payment period at any time and from time to time during the term of the subordinated debentures for up to twenty consecutive quarterly periods. Future interest payments are subject to the Federal Reserve approval. The Corporation elected to defer the interest payments that were due on quarterly periods since March 2012. The aggregate amount of payments deferred and accrued approximates $24.9 million as of June 30, 2015.

Grantor Trusts

During 2004 and 2005, a third party to the Corporation, from now on identified as the seller, established a series of statutory trusts to effect the securitization of mortgage loans and the sale of trust certificates. The seller initially provided the servicing for a fee, which is senior to the obligations to pay trust certificate holders. The seller then entered into a sales agreement through which it sold and issued the trust certificates in favor of the Corporation's banking subsidiary. Currently, the Bank is the sole owner of the trust certificates; the servicing of the underlying residential mortgages that generate the principal and interest cash flows, is performed by another third party, which receives a servicing fee. The securities are variable rate securities indexed to 90-day LIBOR plus a spread. The principal payments from the underlying loans are remitted to a paying agent (servicer) who then remits interest to the Bank; interest income is shared to a certain extent with the FDIC, which has an interest only strip ("IO") tied to the cash flows of the underlying loans and is entitled to receive the excess of the interest income less a servicing fee over the variable rate income that the Bank earns on the securities. This IO is limited to the weighted average coupon of the securities. The FDIC became the owner of the IO upon its intervention of the seller, a failed financial institution. No recourse agreement exists and the risk from losses on non accruing loans and repossessed collateral is absorbed by the Bank as the sole holder of the certificates. As of June 30, 2015, the amortized balance and carrying value of Grantor Trusts amounted to $39.8 million and $29.4 million, respectively, with a weighted average yield of 2.18%.

Investment in unconsolidated entity

On February 16, 2011, FirstBank sold an asset portfolio consisting of performing and non-performing construction, commercial mortgage and commercial and industrial loans with an aggregate book value of $269.3 million to CPG/GS, an entity organized under the laws of the Commonwealth of Puerto Rico and majority owned by PRLP Ventures LLC ("PRLP"), a company created by Goldman, Sachs & Co. and Caribbean Property Group. In connection with the sale, the Corporation received $88.5 million in cash and a 35% interest in CPG/GS, and made a loan in the amount of $136.1 million representing seller financing provided by FirstBank. The loan had a seven-year maturity and bears variable interest at 30-day LIBOR plus 300 basis points and is secured by a pledge of all of the acquiring entity's assets as well as the PRLP's 65% ownership interest in CPG/GS. As of June 30, 2015, the carrying amount of the loan was $15.5 million, which was included in the Corporation's Commercial and Industrial loans held for investment portfolio. FirstBank's equity interest in CPG/GS is accounted for under the equity method and included as part of Investment in unconsolidated entity in the Consolidated Statements of Financial Condition. When applying the equity method, the Bank follows the Hypothetical Liquidation Book Value method ("HLBV") to determine its share of CPG/GS's earnings or loss. Under HLBV, the Bank determines its share in CPG/GS's earnings or loss by determining the difference between its "claim on CPG/GS's book value" at the end of the period as compared to the beginning of the period. This claim is calculated as the amount the Bank would receive if CPG/GS were to liquidate all of its assets at recorded amounts determined in accordance with GAAP and distribute the resulting cash to the investors, PRLP, and FirstBank, according to their respective priorities as provided in the contractual agreement. The Bank reports its share of CPG/GS's operating results on a one-quarter lag basis. In addition, as a result of using HLBV, the difference between the Bank's investment in CPG/GS and its claim on the book value of CPG/GS at the date of the investment, known as the basis difference, is amortized over the estimated life of the investment, or five years. CPG/GS records its loans receivable under the fair value option. The loss recorded in the first half of 2014 reduced to zero the carrying amount of the Bank's investment in CPG/GS. No negative investment needs to be reported as the Bank has no legal

obligation or commitment to provide further financial support to this entity; thus, no further losses will be recorded on this investment. Any potential increase in the carrying value of the investment in CPG/GS, under the HLBV method, would depend upon how better off the Bank is at the end of the period than it was at the beginning of the period after the waterfall calculation performed to determine the amount of gain allocated to the investors.

FirstBank also provided an $80 million advance facility to CPG/GS to fund unfunded commitments and costs to complete projects under construction, which was fully disbursed in 2011, and a $20 million working capital line of credit to fund certain expenses of CPG/GS. During 2013, the working capital line of credit was renewed and reduced to $7 million for a period of two years expiring on September 2015. During 2012, CPG/GS repaid the outstanding balance of the advance facility to fund unfunded commitments, and the funds became available to redraw under a one-time revolver agreement. These loans bear variable interest at 30-day LIBOR plus 300 basis points. As of June 30, 2015, the carrying value of the revolver agreement and working capital line was $23.6 million and $0, respectively, which was included in the Corporation's commercial and industrial loans held for investment portfolio.

Cash proceeds received by CPG/GS are first used to cover operating expenses and debt service payments, including the note receivable, the advance facility, and the working capital line, described above, which must be substantially repaid before proceeds can be used for other purposes, including the return of capital to both PRLP and FirstBank. FirstBank will not receive any return on its equity interest until PRLP receives an aggregate amount equivalent to its initial investment and a priority return of at least 12%, resulting in FirstBank's interest in CPG/GS being subordinate to PRLP's interest. CPG/GS will then begin to make payments pro rata to PRLP and FirstBank, 35% and 65%, respectively, until FirstBank has achieved a 12% return on its invested capital and the aggregate amount of distributions is equal to FirstBank's capital contributions to CPG/GS.

The Bank has determined that CPG/GS is a VIE in which the Bank is not the primary beneficiary. In determining the primary beneficiary of CPG/GS, the Bank considered applicable guidance that requires the Bank to qualitatively assess the determination of the primary beneficiary (or consolidator) of CPG/GS based on whether it has both the power to direct the activities of CPG/GS that

most significantly impact the entity's economic performance and the obligation to absorb losses of CPG/GS that could potentially be significant to the VIE or the right to receive benefits from the entity that could potentially be significant to the VIE.

The Bank determined that it does not have the power to direct the activities that most significantly impact the economic performance of CPG/GS as it does not have the right to manage the loan portfolio, impact foreclosure proceedings, or manage the construction and sale of the property; therefore, the Bank concluded that it is not the primary beneficiary of CPG/GS. As a creditor to CPG/GS, the Bank has certain rights related to CPG/GS; however, these are intended to be protective in nature and do not provide the Bank with the ability to manage the operations of CPG/GS. Since CPG/GS is not a consolidated subsidiary of the Bank and the transaction met the criteria for sale accounting under authoritative guidance, the Bank accounted for this transaction as a true sale, recognizing the cash received, the notes receivable, and the interest in CPG/GS and derecognizing the loan portfolio sold.

The initial fair value of the investment in CPG/GS was determined using techniques with significant unobservable (Level 3) inputs. The valuation inputs included an estimate of future cash flows, expectations about possible variations in the amount and timing of cash flows, and a discount factor based on a rate of return. The Corporation researched available market data and internal information (i.e., proposals received for the servicing of distressed assets and public disclosures and other information about similar structures and/or of distressed asset sales) and determined reasonable ranges of expected returns for FirstBank’s equity interest.

The rate of return of 17.57% was used as the discount factor to estimate the value of FirstBank’s equity interest and represents the Bank’s estimate of the yield a market participant would have required at the time of the transaction. A reasonable range of equity returns was assessed based on consideration of a range of company-specific risk premiums. The valuation of this type of equity interest is highly subjective and somewhat dependent on nonobservable market assumptions, which may result in variations from market participant to market participant.

The following table shows summarized unaudited income statement information of CPG/GS for the quarters and six-month periods ended June 30, 2015 and 2014:

	Quarter Ended		Six-Month Period Ended	
	June 30, 2015	June 30, 2014	June 30, 2015	June 30, 2014
	(In thousands)		(In thousands)	
Revenues, including net realized gains on sale of investments in loans and OREO	$ 944	$ 2,118	$ 1,531	$ 2,869
Gross (loss) profit	$ (2,657)	$ (455)	$ (10,897)	$ (1,963)
Net loss	$ (2,522)	$ (2,355)	$ (10,273)	$ (4,802)

Servicing Assets

Through its sale of mortgages, the Corporation is actively involved in the securitization of pools of FHA-insured and VA-guaranteed mortgages for issuance of GNMA mortgage-backed securities. Also, certain conventional conforming loans are sold to FNMA or FHLMC with servicing retained. The Corporation recognizes as separate assets the rights to service loans for others, whether those servicing assets are originated or purchased.

The changes in servicing assets are shown below:

	Quarter ended June 30,				Six-Month period ended June 30,			
(In thousands)	2015		2014		2015		2014	
Balance at beginning of period	$	22,973	$	22,026	$	22,838	$	21,987
Capitalization of servicing assets		1,474		1,017		2,547		2,069
Amortization		(795)		(790)		(1,651)		(1,573)
Adjustment to fair value		(109)		39		(147)		(180)
Other (1)		(24)		(22)		(68)		(33)
Balance at end of period	$	23,519	$	22,270	$	23,519	$	22,270

(1) Amount represents the adjustment to fair value related to the repurchase of loans serviced for others.

Impairment charges are recognized through a valuation allowance for each individual stratum of servicing assets. The valuation allowance is adjusted to reflect the amount, if any, by which the cost basis of the servicing asset for a given stratum of loans being serviced exceeds its fair value. Any fair value in excess of the cost basis of the servicing asset for a given stratum is not recognized.

Changes in the impairment allowance related to servicing assets were as follows:

	Quarter ended June 30,		Six-Month Period Ended June 30,	
(In thousands)	2015	2014	2015	2014
Balance at beginning of period	$ 93	$ 431	$ 55	$ 212
Temporary impairment charges	128	24	186	243
Recoveries	(19)	(63)	(39)	(63)
Balance at end of period	$ 202	$ 392	$ 202	$ 392

The components of net servicing income are shown below:

	Quarter ended June 30,		Six-Month Period Ended June 30,	
(In thousands)	2015	2014	2015	2014
Servicing fees	$ 1,780	$ 1,689	$ 3,544	$ 3,360
Late charges and prepayment penalties	177	177	367	341
Adjustment for loans repurchased	(24)	(22)	(68)	(33)
Other (1)	(14)	(689)	(103)	(1,047)
Servicing income, gross	1,919	1,155	3,740	2,621
Amortization and impairment of servicing assets	(904)	(751)	(1,798)	(1,753)
Servicing income, net	$ 1,015	$ 404	$ 1,942	$ 868

(1) Mainly consisted of compensatory fees imposed by GSEs and losses related to representations and warranties.

The Corporation's servicing assets are subject to prepayment and interest rate risks. Key economic assumptions used in determining the fair value at the time of sale of the related mortgages ranged as follows:

	Maximum		Minimum	
Six-Month Period Ended June 30, 2015:				
Constant prepayment rate:				
Government guaranteed mortgage loans	9.2	%	7.9	%
Conventional conforming mortgage loans	9.0	%	7.9	%
Conventional non-conforming mortgage loans	14.0	%	12.9	%
Discount rate:				
Government guaranteed mortgage loans	11.5	%	11.5	%
Conventional conforming mortgage loans	9.5	%	9.5	%
Conventional non-conforming mortgage loans	13.8	%	13.8	%
Six-Month Period Ended June 30, 2014:				
Constant prepayment rate:				
Government guaranteed mortgage loans	9.6	%	9.1	%
Conventional conforming mortgage loans	9.4	%	8.9	%
Conventional non-conforming mortgage loans	13.4	%	12.7	%
Discount rate:				
Government guaranteed mortgage loans	11.5	%	11.5	%
Conventional conforming mortgage loans	9.5	%	9.5	%
Conventional non-conforming mortgage loans	13.9	%	13.8	%

As of June 30, 2015, fair values of the Corporation's servicing assets were based on a valuation model that incorporates market driven assumptions regarding discount rates and mortgage prepayment rates, adjusted by the particular characteristics of the Corporation's servicing portfolio. The weighted-averages of the key economic assumptions used by the Corporation in its valuation model and the sensitivity of the current aggregate fair value to immediate 10% and 20% adverse changes in those assumptions for mortgage loans as of June 30, 2015 were as follows:

	(Dollars in thousands)	
Carrying amount of servicing assets	$	23,519
Fair value	$	26,429
Weighted-average expected life (in years)		9.40
Constant prepayment rate (weighted-average annual rate)		9.16%
Decrease in fair value due to 10% adverse change	$	881
Decrease in fair value due to 20% adverse change	$	1,713

Discount rate (weighted-average annual rate)		10.63%	
Decrease in fair value due to 10% adverse change	$	1,130	
Decrease in fair value due to 20% adverse change	$	2,173	

These sensitivities are hypothetical and should be used with caution. As the figures indicate, changes in fair value based on a 10% variation in assumptions generally cannot be extrapolated because the relationship between the change in assumption and the change in fair value may not be linear. Also, in this table, the effect of a variation in a particular assumption on the fair value of the servicing asset is calculated without changing any other assumption; in reality, changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments), which may magnify or counteract the sensitivities.

NOTE 15 – DEPOSITS

The following table summarizes deposit balances:

(In thousands)		June 30, 2015		December 31, 2014
Type of account:				
Non-interest bearing checking accounts	$	1,271,464	$	900,616
Savings accounts		2,549,230		2,450,484
Interest-bearing checking accounts		1,063,381		1,054,136
Certificates of deposit		2,289,688		2,191,663
Brokered CDs		2,330,813		2,887,046
	$	9,504,576	$	9,483,945

Brokered CDs mature as follows:

(In thousands)		June 30, 2015
Three months or less	$	564,546
Over three months to six months		514,170
Over six months to one year		570,971
One to three years		645,059
Three to five years		-
Over five years		36,067
Total	$	2,330,813

The following are the components of interest expense on deposits:

(In thousands)	Quarter Ended June 30, 2015		Quarter Ended June 30, 2014		Six-Month Period Ended June 30, 2015		Six-Month Period Ended June 30, 2014	
Interest expense on deposits	$	16,096	$	17,750	$	32,455	$	36,264
Accretion of premium from acquisitions		(285)		-		(285)		-

Amortization of broker placement fees		1,169			1,716			2,504			3,501
Interest expense on deposits	$	16,980		$	19,466		$	34,674		$	39,765

NOTE 16 – SECURITIES SOLD UNDER AGREEMENTS TO REPURCHASE

Securities sold under agreements to repurchase (repurchase agreements) consist of the following:

(Dollars in thousands)	June 30, 2015			December 31, 2014	
Repurchase agreements, interest ranging from 1.96% to 3.36%					
(December 31, 2014- 2.45% to 4.50%) (1)(2)	$	700,000		$	900,000

(1) Reported net of securities purchased under agreements to repurchase (reverse repurchase agreement) by counterparty, when applicable, pursuant to ASC 210-20-45-11.

(2) As of June 30, 2015, includes $600 million with an average rate of 2.96% that lenders have the right to call before their contractual maturities at various dates beginning on July 9, 2015. Subsequent to July 9, 2015, no lender has exercised its call option on repurchase agreements. In addition, $500 million is tied to variable rates.

In the first quarter of 2015, the Corporation restructured $400 million of its repurchase agreements, $200 million of which were restructured by extending the contractual maturity and changing from a fixed interest rate to a variable rate, and entered into $200 million of reverse repurchase agreements with the same counterparty (effective April, 2015) under a master netting arrangement that provides for a right to setoff that meets the conditions of ASC 210-20-45-11. These repurchase agreements and reverse repurchase agreements are presented net on the consolidated statement of financial condition. In addition, in the first quarter of 2015, the Corporation restructured an additional $200 million of its repurchase agreements with a different counterparty by extending the contractual maturity and reducing the interest rate in these agreements.

Repurchase agreements mature as follows:

	June 30, 2015 (In thousands)	
Over one year to three years	$	500,000
Over five years		200,000
Total	$	700,000

As of June 30, 2015 and December 31, 2014, the securities underlying such agreements were delivered to the dealers

with which the repurchase agreements were transacted.

Repurchase agreements as of June 30, 2015, grouped by counterparty, were as follows:

(Dollars in thousands)			Weighted-Average
Counterparty		**Amount**	**Maturity (In Months)**
Citigroup Global Markets	$	300,000	16
JP Morgan Chase		200,000	79
Dean Witter / Morgan Stanley		100,000	28
Credit Suisse First Boston		100,000	3
	$	700,000	

NOTE 17 – ADVANCES FROM THE FEDERAL HOME LOAN BANK (FHLB)

The following is a summary of the advances from the FHLB:

(Dollars in thousands)		June 30, 2015		December 31, 2014
Fixed-rate advances from FHLB, with a weighted-average interest rate of 1.17%	$	325,000	$	325,000

Advances from FHLB mature as follows:

(In thousands)		June 30, 2015
Over one year to three years		300,000
Over three to four years		25,000
Total	$	325,000

As of June 30, 2015, the Corporation had additional capacity of approximately $656.0 million on this credit facility based on collateral pledged at the FHLB, including a haircut reflecting the perceived risk associated with holding the collateral.

NOTE 18 – OTHER BORROWINGS

Other borrowings consist of:

(In thousands)	June 30, 2015		December 31, 2014

Junior subordinated debentures due in 2034,				
interest-bearing at a floating rate of 2.75%				
over 3-month LIBOR (3.03% as of June 30, 2015				
and 2.99% as of December 31, 2014)	$	97,626	$	103,093
Junior subordinated debentures due in 2034,				
interest-bearing at a floating rate of 2.50%				
over 3-month LIBOR (2.78% as of June 30, 2015				
and 2.75% as of December 31, 2014)		128,866		128,866
	$	226,492	$	231,959

60

NOTE 19 – STOCKHOLDERS' EQUITY

Common Stock

As of June 30, 2015 and December 31, 2014, the Corporation had 2,000,000,000 authorized shares of common stock with a par value of $0.10 per share. As of June 30, 2015 and December 31, 2014, there were 215,552,377 and 213,724,749 shares issued, respectively, and 214,694,470 and 212,984,700 shares outstanding, respectively. On July 30, 2009, the Corporation announced the suspension of common and preferred stock dividends effective with the preferred dividend for the month of August 2009.Refer to Note 4 for information about transactions related to common stock under the Omnibus Plan.

During the second quarter of 2015, the Corporation issued 852,831 shares of its common stock in exchange for trust preferred securities with a liquidation value of $5.3 million. As a result of this transaction, common stock increased by $85 thousand, which represents the par value of the shares issued. Also additional paid in capital increased by the excess of the common stock fair value over the par value, or $5.5 million. With this exchange, the other borrowings balance decreased by $5.5 million.

Preferred Stock

The Corporation has 50,000,000 authorized shares of preferred stock with a par value of $1, redeemable at the Corporation's option subject to certain terms. This stock may be issued in series and the shares of each series will have such rights and preferences as are fixed by the Board of Directors when authorizing the issuance of that particular series. As of June 30, 2015, the Corporation has five outstanding series of non-convertible, non-cumulative preferred stock: 7.125% non-cumulative perpetual monthly income preferred stock, Series A; 8.35% non-cumulative perpetual monthly income preferred stock, Series B; 7.40% non-cumulative perpetual monthly income preferred stock, Series C; 7.25% non-cumulative perpetual monthly income preferred stock, Series D; and 7.00% non-cumulative perpetual monthly income preferred stock, Series E. The liquidation value per share is $25.

Effective January 17, 2012, the Corporation delisted all of its outstanding series of nonconvertible, noncumulative preferred stock from the New York Stock Exchange. The Corporation has not arranged for listing and/or registration on another national securities exchange or for quotation of the Series A through E Preferred Stock in a quotation medium.

In the first half of 2014, the Corporation issued an aggregate of 4,597,121 shares of its common stock in exchange for an aggregate of 1,077,726 shares of the Corporation's Series A through E Preferred Stock, having an aggregate liquidation value of $26.9 million. The shares of common stock were issued to holders of the Series A through E Preferred Stock in separate and unrelated transactions in reliance upon the exemption set forth in Section 3(a)(9) of the Securities Act, for securities exchanged by an issuer with existing security holders where no commission or other remuneration is paid or given directly or indirectly by the issuer for soliciting such exchange. The carrying (liquidation) value of the Series A through E preferred stock exchanged, or $26.9 million, was reduced, and common stock and additional paid-in capital was increased in the amount of the fair value of the common stock issued. The Corporation recorded the par value of the shares issued as common stock ($0.10 per common share) or $0.5 million. The excess of the common stock fair value over the par value, or $23.9 million, was recorded in additional paid-in capital. The excess of the carrying amount of the shares of preferred stock over the fair value of the shares of common stock, or $1.7 million, was recorded as an increase to retained earnings and an increase in earnings per common share computation.

Treasury stock

During the first half of 2015, the Corporation withheld an aggregate of 117,858 shares of the common stock paid to certain senior officers as additional compensation and of restricted stock that vested during 2015 to cover employees' payroll and income tax withholding liabilities; these shares are also held as treasury shares. As of June 30, 2015 and December 31, 2014, the Corporation had 857,907 and 740,049 shares held as treasury stock, respectively.

FirstBank Statutory Reserve (Legal Surplus)

The Banking Law of the Commonwealth of Puerto Rico requires that a minimum of 10% of FirstBank's net income for the year be transferred to legal surplus until such surplus equals the total of paid-in-capital on common and preferred stock. Amounts transferred to the legal surplus account from the retained earnings account are not available for distribution to the stockholders without the prior consent of the Puerto Rico Commissioner of Financial Institutions. The Puerto Rico Banking Law provides that when the expenditures of a Puerto Rico commercial bank are greater than receipts, the excess of the expenditures over receipts shall be charged against the undistributed profits of the bank, and the balance, if any shall be charged against the reserve fund, as a reduction thereof. If there is no reserve fund sufficient to cover such balance in whole or in part, the outstanding amount shall be charged against the capital account and the Bank cannot pay dividends until it can replenish the reserve fund to an amount of at least 20% of the original capital contributed. During the fourth quarter of 2014, $40.0 million was transferred to the legal surplus reserve. FirstBank's legal surplus reserve, included as part of retained earnings in the Corporation's statement of financial condition, amounted to $40.0 million as of June 30, 2015. There were no transfers to the legal surplus reserve during the first half of 2015.

NOTE 20 - INCOME TAXES

Income tax expense includes Puerto Rico and USVI income taxes as well as applicable United States ("U.S.") federal and state taxes. The Corporation is subject to Puerto Rico income tax on its income from all sources. As a Puerto Rico corporation, First Bancorp. is treated as a foreign corporation for U.S. and USVI income tax purposes and is generally subject to U.S. and USVI income tax only on its income from sources within the U.S. and USVI or income effectively connected with the conduct of a trade or business in those regions. Any such tax paid is also creditable against the Corporation's Puerto Rico tax liability, subject to certain conditions and limitations.

Under the Puerto Rico Internal Revenue Code of 2011, as amended (the "2011 PR Code"), the Corporation and its subsidiaries are treated as separate taxable entities and are not entitled to file consolidated tax returns and, thus, the Corporation is not able to utilize losses from one subsidiary to offset gains in another subsidiary. Accordingly, in order to obtain a tax benefit from a net operating loss ("NOL"), a particular subsidiary must be able to demonstrate sufficient taxable income within the applicable NOL carry forward period. The 2011 PR Code provides a dividend received deduction of 100% on dividends received from "controlled" subsidiaries subject to taxation in Puerto Rico and 85% on dividends received from other taxable domestic corporations.

The Corporation has maintained an effective tax rate lower than the maximum statutory rate mainly by investing in government obligations and mortgage-backed securities exempt from U.S. and Puerto Rico income taxes and by doing business through an International Banking Entity ("IBE") unit of the Bank, and through the Bank's subsidiary, FirstBank Overseas Corporation, whose interest income and gain on sales is exempt from Puerto Rico and U.S. income taxation. The IBE and FirstBank Overseas Corporation were created under the International Banking Entity Act of Puerto Rico, which provides for total Puerto Rico tax exemption on net income derived by IBEs operating in Puerto Rico on the specific activities identified in the IBE Act. An IBE that operates as a unit of a bank pays income taxes at the corporate standard rates to the extent that the IBE's net income exceeds 20% of the bank's total net taxable income.

In 2010, the Corporation established a valuation allowance for substantially all of the deferred tax assets of its banking subsidiary, FirstBank, primarily due to significant operational losses driven by charges to the provision for loan losses, a three-year cumulative loss position as of the end of the year 2010, and uncertainty regarding the amount of future taxable income that the Bank could forecast. As of December 31, 2014, based upon the assessment of all positive and negative evidence, management concluded that it was more likely than not that FirstBank will generate sufficient taxable income within the applicable NOL carry-forward periods to realize $313.0 million of its deferred tax assets and, therefore, reversed $302.9 million of the valuation allowance. As of June 30, 2015, the deferred tax assets, net of a valuation allowance of $204.0 million, amounted to $310.4 million and management concluded, based upon the assessment of all positive and negative evidence, that it is more likely than not that the Corporation will generate sufficient taxable income within the applicable NOL carry-forward periods to realize such amount.

The Corporation recorded an income tax benefit of $9.8 million and $1.8 million in the second quarter and first six-months of 2015, respectively, compared to an income tax benefit of $0.3 million and an income tax expense of $0.6 million for the same periods in 2014. For the six-month period ended June 30, 2015, the Corporation calculated the provision for income taxes by applying the estimated annual effective tax rate for the full fiscal year to ordinary income or loss. The Corporation had historically calculated the provision for income taxes for interim periods by using a discrete effective tax rate method since it had a full valuation allowance on most of its deferred tax assets. As a result of the partial valuation allowance release during the fourth quarter of 2014, management will use the estimated annual effective tax rate as required by ASC 740 for interim period reporting. In the computation of the consolidated worldwide estimated annual effective tax rate, ASC 740-270 requires the exclusion of legal entities with pre-tax losses from which a tax benefit cannot be recognized. The year to date consolidated worldwide estimated effective tax rate, excluding entities with pre-tax losses from which a tax benefit cannot be recognized, is 30%. The year to date effective tax rate including all entities is 18%. The income tax benefit recorded in the first half of 2015 is a result of applying the estimated annual effective tax rate to the year to date ordinary loss. The pre-tax loss in 2015 was mainly driven by the $12.9 million OTTI on Puerto Rico Government debt securities held by the Corporation as part of its available-for-sale securities portfolio, $4.6 million in non-recurring acquisition and conversion costs related to the Doral Bank transaction and a bulk sale of non-performing and classified assets which resulted in a loss of $48.7 million.

As of June 30, 2015, the Corporation did not have Unrecognized Tax Benefits ("UTBs") recorded on its books. During 2014, the Corporation reached a final settlement with the IRS in connection with the 2007-2009 examination periods. As a result, the Corporation released a portion of its reserve for uncertain tax positions, resulting in a tax benefit of $1.8 million, and paid $2.5 million to settle the tax liability resulting from the audit.

During the second quarter of 2015, the Corporation settled the previously accrued interest of $1.3 million related to the aforementioned IRS examination. The Corporation classifies all interest and penalties, if any, related to tax uncertainties as income tax expense. Audit periods remain open for review until the statute of limitations has passed. The statute of limitation under the 2011 PR code is 4 years; the statute of limitation for Virgin Islands and U.S. income tax purposes are each three years after a tax return is due or filed, whichever is later. The completion of an audit by the taxing authorities or the expiration of the statute of limitation for a given audit period could result in an adjustment to the Corporation's liability for income taxes. Any such adjustment could be material to the

results of operations for any given quarterly or annual period based, in part, upon the results of operations for the given period. For Virgin Islands and U.S. income tax purposes, all tax years subsequent to 2011 remain open to examination. The 2012 U.S. federal tax return is currently under examination by the IRS. For Puerto Rico purposes, all tax years subsequent to 2010 remain open to examination.

During 2013, the Puerto Rico Government approved Act No. 40, which imposed a national gross receipts tax. The national gross receipts tax for financial institutions was computed on the basis of 1% of gross income, net of allowable exclusions. Subject to certain limitations, a financial institution was able to claim a credit of 0.5% of its gross income, against its regular income tax or the alternative minimum tax ("AMT"). However, on December 22, 2014, the Governor of Puerto Rico signed Act No. 238, which amended the 2011 PR Code. Act No. 238 clarifies that the national gross receipts tax will not be applicable to taxable years starting after December 31, 2014. Accordingly, during this first half of 2015, the Corporation did not record national gross receipts tax expense. During the first half of 2014, a $2.8 million gross receipt tax expense was included as part of "Taxes, other than income taxes" in the consolidated statement of income and a $1.4 million benefit related to this credit was recorded as a reduction to the provision for income taxes.

In May 28, 2015, the Puerto Rico legislature approved Act 72-2015 enacting amendments to the Puerto Rico Internal Revenue Code. Amendments related to the income tax provision determination include changes to the alternative minimum tax computation, and changes to the use limitation on net operating losses and capital losses for 2015 and future taxable years. The change in tax law affected the Corporation's income tax computation by limiting the net operating loss deduction to 80% of taxable income, compared to a 90% limitation on prior years. This change was incorporated in our annual estimated effective tax rate and did not have a significant impact in the current year.

NOTE 21 – FAIR VALUE

Fair Value Measurement

The FASB authoritative guidance for fair value measurement defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. This guidance also establishes a fair value hierarchy for classifying financial instruments. The hierarchy is based on whether the inputs to the valuation techniques used to measure fair value are observable or unobservable. Three levels of inputs may be used to measure fair value:

Level 1	Valuations of Level 1 assets and liabilities are obtained from readily available pricing sources for market transactions involving identical assets or liabilities. Level 1 assets and liabilities include equity securities that trade in an active exchange market, as well as certain U.S. Treasury and other U.S. government and agency securities and corporate debt securities that are traded by dealers or brokers in active markets.
Level 2	Valuations of Level 2 assets and liabilities are based on observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include (i) mortgage-backed securities for which the fair value is estimated based on the value of identical or comparable assets, (ii) debt securities with quoted prices that are traded less frequently than exchange-traded instruments, and (iii) derivative contracts whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data.
Level 3	Valuations of Level 3 assets and liabilities are based on unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models for which the determination of fair value required significant management judgments estimation.

For 2015, there were no transfers into or out of the Level 1, Level 2 or Level 3 measurement classification of the fair value hierarchy.

Financial Instruments Recorded at Fair Value on a Recurring Basis

Investment securities available for sale

The fair value of investment securities was the market value based on quoted market prices (as is the case with equity securities, U.S. Treasury notes, and non-callable U.S. Agency debt securities), when available (Level 1), or market prices for identical or comparable assets (as is the case with MBS and callable U.S. agency debt) that are based on observable market parameters, including benchmark yields, reported trades, quotes from brokers or dealers, issuer spreads, bids, offers and reference data including market research operations (Level 2). Observable prices in the market already consider the risk of nonperformance. During the second quarter of 2015, the Corporation recorded an OTTI of $12.9 million on certain Puerto Rico Government debt securities, specifically bonds of GDB and the Puerto Rico Public Buildings Authority. The credit impairment loss was based on the probability of default and loss severity in the event of default in consideration of the latest available information about the Puerto Rico Government's financial condition, including the Puerto Rico Government's intentions to restructure its outstanding bond obligations. Refer to Note 5 for significant assumptions used to determine the credit impairment portion, including default rates and recovery rates which are unobservable inputs. If listed prices or quotes are not available, fair value is based upon models that use unobservable inputs due to the limited market activity of the instrument, as is the case with certain private label mortgage-backed securities held by the Corporation (Level 3).

Private label MBS are collateralized by fixed-rate mortgages on single-family residential properties in the United States; the interest rate on the securities is variable, tied to 3-month LIBOR and limited to the weighted-average coupon of the underlying collateral. The market valuation represents the estimated net cash flows over the projected life of the pool of underlying assets applying a discount rate that reflects market observed floating spreads over LIBOR, with a widening spread based on a nonrated security. The market valuation is derived from a model that utilizes relevant assumptions such as prepayment rate, default rate, and loss severity on a loan level basis. The Corporation modeled the cash flow from the fixed-rate mortgage collateral using a static cash flow analysis according to collateral attributes of the underlying mortgage pool (i.e. loan term, current balance, note rate, rate adjustment type, rate adjustment frequency, rate caps, and others) in combination with prepayment forecasts obtained from a commercially available prepayment model (ADCO). The variable cash flow of the security is modeled using the 3-month LIBOR forward curve. Loss assumptions were driven by the combination of default and loss severity estimates, taking into account loan credit characteristics (loan-to-value, state, origination date, property type, occupancy loan purpose, documentation type, debt-to-income ratio, and other) to provide an estimate of default and loss severity.

Refer to the table below for further information regarding qualitative information for all assets and liabilities measured at fair value using significant unobservable inputs (Level 3).

Derivative instruments

The fair value of most of the Corporation's derivative instruments is based on observable market parameters and takes into consideration the credit risk component of paying counterparties, when appropriate, except when collateral is pledged. That is, on interest rate swaps, the credit risk of both counterparties is included in the valuation; and, on options and caps, only the seller's credit risk is considered. The derivative instruments, namely swaps and caps, were valued based on a discounted cash flow approach using the related LIBOR and swap rate for each cash flow. Derivatives include interest rate swaps used for protection against rising interest rates. For these interest rate swaps, a credit component was not considered in the valuation since the Corporation has fully collateralized with investment securities any marked-to-market loss with the counterparty and, if there were market gains, the counterparty had to deliver additional collateral to the Corporation.

Although most of the derivative instruments are fully collateralized, a credit spread is considered for those that are not secured in full. The cumulative marked-to-market effect of credit risk in the valuation of derivative instruments for the quarter and six-month periods ended June 30, 2015 and 2014 was immaterial.

Assets and liabilities measured at fair value on a recurring basis are summarized below:

The table below presents qualitative information for significant assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) at June 30, 2015:

	June 30, 2015				
(In thousands)	**Fair Value**		**Valuation Technique**	**Unobservable Input**	**Range**
Investment securities available-for-sale:					
Private label MBS	$	29,510	Discounted cash flow	Discount rate	14.5%
				Prepayment rate	17.37% -100.00% (Weighted Average 29%)
				Projected cumulative loss rate	0.16% -80.00% (Weighted Average 6.9%)
Puerto Rico Government Obligations		2,130	Discounted cash flow	Prepayment speed	2.89%

Information about Sensitivity to Changes in Significant Unobservable Inputs

Private label MBS: The significant unobservable inputs in the valuation include the probability of default, the loss severity assumption and prepayment rates. Shifts in those inputs would result in different fair value measurements. Increases in the probability of default, the loss severity assumptions, and prepayment rates in isolation would generally result in an adverse effect on the fair value of the instruments. Meaningful and possible shifts of each input were modeled to assess the effect on the fair value estimation.

Puerto Rico Government Obligations: The significant unobservable input used in the fair value measurement of this Level 3 instrument is the assumed prepayment rate. A significant increase (decrease) in the assumed rate would lead to a higher (lower) fair value estimate. Loss severity and probability of default are not included as significant unobservable variables because the obligations are guaranteed by the Puerto Rico Housing Finance Authority ("PRHFA"). The PRHFA credit risk is modeled by discounting the cash flows using a curve appropriate to the PRHFA credit rating.

The tables below summarize changes in unrealized gains and losses recorded in earnings for the quarters and six-month periods ended June 30, 2015 and 2014 for Level 3 assets and liabilities that are still held at the end of each

period:

	Changes in Unrealized Losses		Changes in Unrealized Losses	
	Quarter ended June 30, 2015		Quarter ended June 30, 2014	
Level 3 Instruments Only	**Securities**		**Securities**	
(In thousands)	**Available For Sale**		**Available For Sale**	
Changes in unrealized losses relating to assets still held at reporting date:				
Net impairment losses on available-for-sale investment securities (credit component)	$	(241)	$	-

	Changes in Unrealized Losses		Changes in Unrealized Losses	
	Six-Month Period Ended June 30, 2015		Six-Month Period Ended June 30, 2014	
Level 3 Instruments Only	**Securities**		**Securities**	
(In thousands)	**Available For Sale**		**Available For Sale**	
Changes in unrealized losses relating to assets still held at reporting date:				
Net impairment losses on available-for-sale investment securities (credit component)	$	(397)	$	-

Additionally, fair value is used on a nonrecurring basis to evaluate certain assets in accordance with GAAP. Adjustments to fair value usually result from the application of lower-of-cost or market accounting (e.g., loans held for sale carried at the lower-of-cost or fair value and repossessed assets) or write downs of individual assets (e.g., goodwill, loans).

As of June 30, 2015, impairment or valuation adjustments were recorded for assets recognized at fair value on a non-recurring basis as shown in the following table:

	Carrying value as of June 30, 2015			(Losses) recorded for the Quarter Ended June 30, 2015	(Losses) recorded for the Six-Month Period Ended June 30, 2015
	Level 1	Level 2	Level 3		
	(In thousands)				
Loans receivable [1]	$ -	$ -	$ 298,935	$ (3,586)	$ (15,850)
OREO [2]	-	-	122,129	(1,906)	(5,751)
Mortgage servicing rights [3]	-	-	23,519	(109)	(147)
Loans Held For Sale [4]	-	-	48,032	-	-

(1) Mainly impaired commercial and construction loans. The impairment was generally measured based on the fair value of the collateral. The fair value was derived from external appraisals that take into consideration prices in observed transactions involving similar assets in similar locations but adjusted for specific characteristics and assumptions of the collateral (e.g. absorption rates), which are not market observable.

(2) The fair value was derived from appraisals that take into consideration prices in observed transactions involving similar assets in similar locations but adjusted for specific characteristics and assumptions of the properties (e.g. absorption rates and net operating income of income producing properties) that are not market observable. Losses were related to market valuation adjustments after the transfer of the loans to the OREO portfolio.

(3) Fair value adjustments to mortgage servicing rights were mainly due to assumptions associated with mortgage prepayment rates. The Corporation carries its mortgage servicing rights at the lower of cost or market, measured at fair value on a non-recurring basis. Assumptions for the value of mortgage servicing rights include: Prepayment rate of 9.16%, Discount Rate of 10.63%.

(4) The value of these loans was derived from external appraisals, adjusted for specific characteristics of the loans, and for loans with signed sale agreements, the value was determined based on the sales price in such agreements.

As of June 30, 2014, impairment or valuation adjustments were recorded for assets recognized at fair value on a non-recurring basis as shown in the following table:

	Carrying value as of June 30, 2014	

	Level 1	Level 2	Level 3	(Losses) Gains recorded for the Quarter Ended June 30, 2014	(Losses) Gains recorded for the Six-Month Period Ended June 30, 2014
	(In thousands)				
Loans receivable [(1)]	$ -	$ -	$ 484,381	$ (3,742)	$ (34,193)
OREO [(2)]	-	-	121,842	(4,481)	(8,958)
Mortgage servicing rights [(3)]	-	-	22,270	39	(180)
Loans Held For Sale [(4)]	-	-	54,755	-	-

(1) Mainly impaired commercial and construction loans. The impairment was generally measured based on the fair value of the collateral. The fair value was derived from external appraisals that take into consideration prices in observed transactions involving similar assets in similar locations but adjusted for specific characteristics and assumptions of the collateral (e.g. absorption rates), which are not market observable.

(2) The fair value was derived from appraisals that take into consideration prices in observed transactions involving similar assets in similar locations but adjusted for specific characteristics and assumptions of the properties (e.g. absorption rates and net operating income of income producing properties) that are not market observable. Losses were related to market valuation adjustments after the transfer of the loans to the OREO portfolio.

(3) Fair value adjustments to the mortgage servicing rights were mainly due to assumptions associated with mortgage prepayments rates. The Corporation carries its mortgage servicing rights at the lower of cost or market, measured at fair value on a non-recurring basis. Assumptions for the value of mortgage servicing rights include: Prepayment Rate of 9.78%, Discount Rate of 10.62%.

(4) The value of these loans was derived from external appraisals, adjusted for specific characteristics of the loans, and, for loans with signed sale agreements, the value was determined based on the sales price on such agreements.

Qualitative information regarding the fair value measurements for Level 3 financial instruments is as follows:

	June 30, 2015		
	Method		**Inputs**
Loans	Income, Market, Comparable Sales, Discounted Cash Flows		External appraised values; probability weighting of broker price opinions; management assumptions regarding market trends or other relevant factors
OREO	Income, Market, Comparable Sales, Discounted Cash Flows		External appraised values; probability weighting of broker price opinions; management assumptions regarding market trends or other relevant factors
Mortgage servicing rights	Discounted Cash Flow		Weighted average prepayment rate of 9.16%; weighted average discount rate of 10.63%

The following is a description of the valuation methodologies used for instruments that are not measured or reported at fair value on a recurring basis or reported at fair value on a non-recurring basis. The estimated fair value was calculated using certain facts and assumptions, which vary depending on the specific financial instrument.

Cash and due from banks and money market investments

The carrying amounts of cash and due from banks and money market investments are reasonable estimates of their fair value. Money market investments include held-to-maturity securities, which have a contractual maturity of three months or less. The fair value of these securities is based on quoted market prices in active markets that incorporate the risk of nonperformance.

Other equity securities

Equity or other securities that do not have a readily available fair value are stated at their net realizable value, which management believes is a reasonable proxy for their fair value. This category is principally composed of stock that is owned by the Corporation to comply with FHLB regulatory requirements. The realizable value of the FHLB stock equals its cost as this stock can be freely redeemed at par.

Loans receivable, including loans held for sale

The fair value of loans held for investment and for mortgage loans held for sale was estimated using discounted cash flow analyses, based on interest rates currently being offered for loans with similar terms and credit quality and with adjustments that the Corporation's management believes a market participant would consider in determining fair value. Loans were classified by type, such as commercial, residential mortgage, and automobile. These asset categories were further segmented into fixed- and adjustable-rate categories. Valuations are carried out based on categories and not on a loan-by-loan basis. The fair values of performing fixed-rate and adjustable-rate loans were calculated by discounting expected cash flows through the estimated maturity date. This fair value is not currently an indication of an exit price as that type of assumption could result in a different fair value estimate. The fair value of credit card loans was estimated using a discounted cash flow method and excludes any value related to a customer account relationship. Other loans with no stated maturity, like credit lines, were valued at book value. Prepayment assumptions were considered for non-residential loans. For residential mortgage loans, prepayment estimates were based on a prepayments model that combined both historical calibration and current market prepayment expectations. Discount rates were based on the U.S.Treasury and LIBOR/Swap Yield Curves at the date of the analysis, and included appropriate adjustments for expected credit losses and liquidity. For impaired collateral dependent loans, the impairment was primarily measured based on the fair value of the collateral, which is derived from appraisals that take into consideration prices in observable transactions involving similar assets in similar locations. The market valuation of the loans acquired from Doral Bank in the first quarter of 2015 was derived from a model of forecasted cash flows that uses market-driven assumptions such as prepayment rate, default rate, and loss severity on a loan level basis. The forecasted cash flows are then discounted by yields observed in sales of similar portfolios in Puerto Rico and the continental U.S.

Deposits

The estimated fair value of demand deposits and savings accounts, which are deposits with no defined maturities, equals the amount payable on demand at the reporting date. The fair values of retail fixed-rate time deposits, with stated maturities, are based on the present value of the future cash flows expected to be paid on the deposits. The cash flows were based on contractual maturities; no early repayments were assumed. Discount rates were based on the LIBOR yield curve.

The estimated fair value of total deposits excludes the fair value of core deposit intangibles, which represent the value of the customer relationship measured by the value of demand deposits and savings deposits that bear a low or zero rate of interest and do not fluctuate in response to changes in interest rates.

The fair value of brokered CDs, which are included within deposits, is determined using discounted cash flow analyses over the full term of the CDs. The fair value of the CDs is computed using the outstanding principal amount. The discount rates used were based on brokered CD market rates as of June 30, 2015. The fair value does not incorporate the risk of nonperformance, since interests in brokered CDs are generally sold by brokers in amounts of less than $250,000 and, therefore, are insured by the FDIC.

Securities sold under agreements to repurchase

Some repurchase agreements reprice at least quarterly, and their outstanding balances are estimated to be their fair value. Where longer commitments are involved, fair value is estimated using exit price indications of the cost of unwinding the transactions as of the end of the reporting period. The brokers who are the counterparties provide these indications. Securities sold under agreements to repurchase are fully collateralized by investment securities.

Advances from FHLB

The fair value of advances from FHLB with fixed maturities is determined using discounted cash flow analyses over the full term of the borrowings, using indications of the fair value of similar transactions. The cash flows assume no early repayment of the borrowings. Discount rates are based on the LIBOR yield curve. Advances from FHLB are fully collateralized by mortgage loans and, to a lesser extent, investment securities.

Other borrowings

Other borrowings consist of junior subordinated debentures. Projected cash flows from the debentures were discounted using the Bloomberg BB Finance curve plus a credit spread. This credit spread was estimated using the difference in yield curves between swap rates and a yield curve that considers the industry and credit rating of the Corporation as issuer of the note at a tenor comparable to the time to maturity of the debentures.

The following table presents the carrying value and the estimated fair value of financial instruments as of June 30, 2015 and December 31, 2014:

	Total Carrying Amount in Statement of Financial Condition June 30, 2015	**Fair Value Estimate June 30, 2015**	**Level 1**	**Level 2**	**Level 3**

NOTE 22 – SUPPLEMENTAL CASH FLOW INFORMATION

Supplemental cash flow information is as follows:

	Six-Month Period Ended June 30,				
	2015			2014	
	(In thousands)				
Cash paid for:					
Interest on borrowings	$	48,648		$	51,817
Income tax		2,439			2,524
Non-cash investing and financing activities:					
Additions to other real estate owned		27,625			13,267
Additions to auto and other repossessed assets		39,928			43,091
Capitalization of servicing assets		2,547			2,069
Loan securitizations		130,999			104,236
Preferred stock exchanged for new common stock issued:					
Preferred stock exchanged (Series A through E)		-			26,022
New common stock issued		-			24,363
Trust preferred securities exchanged for new common stock issued:					
Trust preferred securities exchanged		5,303			-
New common stock issued		5,628			-
Fair value of assets acquired (liabilities assumed) in the Doral Bank transaction:					
Loans		311,410			-
Premises and equipment, net		5,450			-
Core Deposit intangible		5,820			-
Deposits		(523,517)			-

Supplemental cash flow information is as follows:

NOTE 23 – SEGMENT INFORMATION

Based upon the Corporation's organizational structure and the information provided to the Chief Executive Officer of the Corporation and, to a lesser extent, the Board of Directors, the operating segments are driven primarily by the Corporation's lines of business for its operations in Puerto Rico, the Corporation's principal market, and by geographic areas for its operations outside of Puerto Rico. As of June 30, 2015, the Corporation had six reportable segments: Commercial and Corporate Banking; Mortgage Banking; Consumer (Retail) Banking; Treasury and Investments; United States Operations, and Virgin Islands Operations. Management determined the reportable segments based on the internal reporting used to evaluate performance and to assess where to allocate resources. Others factors such as the Corporation's organizational chart, nature of the products, distribution channels, and the economic characteristics of the product were also considered in the determination of the reportable segments.

The Commercial and Corporate Banking segment consists of the Corporation's lending and other services for large customers represented by specialized and middle-market clients and the public sector. The Commercial and Corporate Banking segment offers commercial loans, including commercial real estate and construction loans, and floor plan financings, as well as other products, such as cash management and business management services. The Mortgage Banking segment consists of the origination, sale, and servicing of a variety of residential mortgage loans. The Mortgage Banking segment also acquires and sells mortgages in the secondary markets. In addition, the Mortgage Banking segment includes mortgage loans purchased from other local banks and mortgage bankers. The Consumer (Retail) Banking segment consists of the Corporation's consumer lending and deposit-taking activities conducted mainly through its branch network and loan centers. The Treasury and Investments segment is responsible for the Corporation's investment portfolio and treasury functions executed to manage and enhance liquidity. This segment lends funds to the Commercial and Corporate Banking, Mortgage Banking and Consumer (Retail) Banking segments to finance their lending activities and borrows from those segments and from the United States Operations segment. The Consumer (Retail) Banking and the United States Operations segments also lend funds to other segments. The interest rates charged or credited by Treasury and Investments, the Consumer (Retail) Banking and the United States Operations segments are allocated based on market rates. The difference between the allocated interest income or expense and the Corporation's actual net interest income from centralized management of funding costs is reported in the Treasury and Investments segment. The United States Operations segment consists of all banking activities conducted by FirstBank in the United States mainland, including commercial and retail banking services. The Virgin Islands Operations segment consists of all banking activities conducted by the Corporation in the USVI and BVI, including commercial and retail banking services.

The accounting policies of the segments are the same as those referred to in Note 1- "Nature of Business and Summary of Significant Accounting Policies" in the audited consolidated financial statements of the Corporation for the year ended December 31, 2014, which are included in the Corporation's 2014 Annual Report on Form 10-K.

The Corporation evaluates the performance of the segments based on net interest income, the estimated provision for loan and lease losses, non-interest income and direct non-interest expenses. The segments are also evaluated based on the average volume of their interest-earning assets less the allowance for loan and lease losses.

73

Supplemental cash flow information is as follows:

The following table presents information about the reportable segments:

(In thousands)	Mortgage Banking	Consumer (Retail) Banking	Commercial and Corporate	Treasury and Investments	United States Operations	Virgin Islands Operations	Total

Supplemental cash flow information is as follows:

The following table presents a reconciliation of the reportable segment financial information to the consolidated totals:

	Quarter Ended June 30, 2015	Quarter Ended June 30, 2014	Six-Month Period Ended June 30, 2015	Six-Month Period Ended June 30, 2014
Net (loss) income :				
Total (loss) income for segments and other	$ (11,059)	$ 45,773	$ 36,199	$ 91,343
Other non-interest (loss) gain (1)	-	(670)	13,443	(7,280)
Other operating expenses (2)	(32,859)	(24,154)	(59,882)	(45,144)
(Loss) income before income taxes	(43,918)	20,949	(10,240)	38,919
Income tax benefit (expense)	9,844	276	1,812	(611)
Total consolidated net (loss) income	$ (34,074)	$ 21,225	$ (8,428)	$ 38,308
Average assets:				
Total average earning assets for segments	$ 11,908,667	$ 12,013,689	$ 11,924,822	$ 12,054,854
Other average earning assets (1)	-	152	-	3,343
Average non-earning assets	945,660	640,718	940,335	656,179
Total consolidated average assets	$ 12,854,327	$ 12,654,559	$ 12,865,157	$ 12,714,376

(1) The bargain purchase gain on the acquisition of assets and assumption of deposits from Doral Bank in 2015 as well as the activities related to the Bank's equity interest in CPG/GS are presented as an Other non-interest income (loss) and the investment in CPG/GS is presented as Other average earning assets in the tables above.

(2) Expenses pertaining to corporate administrative functions that support the operating segments but are not specifically attributable to or managed by any segment are not included in the reported financial results of the operating segments. The unallocated corporate expenses include certain general and administrative expenses and related depreciation and amortization expenses.

NOTE 24 – REGULATORY MATTERS, COMMITMENTS AND CONTINGENCIES

Supplemental cash flow information is as follows:

The Corporation is subject to various regulatory capital requirements imposed by the federal banking agencies. Failure to meet minimum capital requirements can result in certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material adverse effect on the Corporation's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Corporation must meet specific capital guidelines that involve quantitative measures of the Corporation's assets and liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Corporation's capital amounts and classification are also subject to qualitative judgments and adjustment by the regulators with respect to minimum capital requirements, components, risk weightings, and other factors.

FirstBank received notification from the FDIC that the Consent Order under which the Bank had been operating since June 2, 2010 was terminated effective April 29, 2015. Although the Consent Order has been terminated, First BanCorp. is still subject to the Written Agreement that the Corporation entered into with the Federal Reserve Bank of New York on June 3, 2010.

The Written Agreement provides, among other things, that the holding company must serve as a source of strength to FirstBank, and that, except with the consent generally of the New York FED and Federal Reserve Board, (1) the holding company may not pay dividends to stockholders or receive dividends from FirstBank, (2) the holding company and its nonbank subsidiaries may not make payments on trust-preferred securities or subordinated debt, and (3) the holding company cannot incur, increase, or guarantee debt or repurchase any capital securities. The Written Agreement also requires that the holding company submit a capital plan that reflects sufficient capital at First BanCorp. on a consolidated basis, which must be acceptable to the New York FED, and follow certain guidelines with respect to the appointment or change in responsibilities of senior officers. The foregoing summary is not complete and is qualified in all respects by reference to the actual language of the Written Agreement.

The Corporation submitted its Capital Plan setting forth its plans for how to improve capital positions to comply with the Written Agreement over time. In addition to the Capital Plan, the Corporation submitted to its regulators a liquidity and brokered CD plan, including a contingency funding plan, a non-performing asset reduction plan, a budget and profit plan, a strategic plan, and a plan for the reduction of classified and special mention assets. As of June 30, 2015, the Corporation had completed all of the items included in the Capital Plan and is continuing to work on reducing non-performing loans. The Written Agreement also requires the submission to the regulators of quarterly progress reports.

In July 2013, the U.S. banking regulators approved a revised regulatory capital framework for U.S. banking organizations (the "Basel III rules") that is based on international regulatory capital requirements adopted by the Basel Committee on Banking Supervision over the past several years. The Basel III rules introduce new minimum capital ratios and capital conservation buffer requirements, change the composition of regulatory capital, require a number of new adjustments to and deductions from regulatory capital, and introduce a new "Standardized Approach" for the calculation of risk-weighted assets. The new minimum regulatory

Supplemental cash flow information is as follows:

capital requirements and the Standardized Approach for the calculation of risk-weighted assets became effective for the Corporation and FirstBank on January 1, 2015. The phase-in period for certain deductions and adjustments to regulatory capital began on January 1, 2015 and will be completed on January 1, 2018. The phase-in period for the capital conservation buffer requirements begins on January1, 2016 and will be completed on January 1, 2019.

The Basel III rules introduce a new and separate ratio of Common Equity Tier 1 capital (“CET1”) to risk-weighted assets. CET1, a narrower subcomponent of total Tier 1 capital, generally consists of common stock and related surplus, retained earnings, accumulated other comprehensive income (“AOCI”), and qualifying minority interests. Certain banking organizations, however, including the Corporation and FirstBank, were allowed to make a one-time permanent election in early 2015 to continue to exclude AOCI items. The Corporation and FirstBank have elected to permanently exclude capital in AOCI in order to avoid significant variations in the level of capital depending upon the impact of interest rate fluctuations on the fair value of the securities portfolio. In addition, the Basel III rules require the Corporation to maintain an additional CET1 capital conservation buffer of 2.5%. The capital conservation buffer must be maintained to avoid limitations on both (i) capital distributions (e.g. repurchases of capital instruments or dividend or interest payments on capital instruments), and (ii) discretionary bonus payments to executive officers and heads of major business lines. Under the fully phased-in rules, the Corporation will be required to maintain: (i) a minimum CET1 to risk-weighted assets ratio of at least 4.5%, plus the 2.5% “capital conservation buffer,” resulting in a required minimum CET1 ratio of at least 7%, (ii) a minimum ratio of total Tier 1 capital to risk-weighted assets of at least 6.0%, plus the 2.5% capital conservation buffer, resulting in a required minimum Tier 1 capital ratio of 8.5%, (iii) a minimum ratio of total Tier 1 plus Tier 2 capital to risk-weighted assets of at least 8.0%, plus the 2.5% capital conservation buffer, resulting in a required minimum total capital ratio of 10.5%, and (iv) a required minimum leverage ratio of 4%, calculated as the ratio of Tier 1 capital to average on-balance sheet (non-risk adjusted) assets. The phase-in of the capital conservation buffer will begin on January 1, 2016 with a first year requirement of 0.625% of additional CET1, which will be progressively increased over a four-year period, increasing by that same percentage amount on each subsequent January 1 until it reaches the fully phased-in 2.5% CET1 requirement on January 1, 2019.

In addition, the Basel III rules require a number of new deductions from and adjustments to CET1, including deductions from CET1 for certain intangible assets, and deferred tax assets dependent upon future taxable income; the four-year phase-in period for these adjustments generally began on January 1, 2015. Mortgage servicing assets and deferred tax assets attributable to temporary differences, among others, are required to be deducted to the extent that any one such category exceeds 10% of CET1 or all such categories in the aggregate exceed 15% of CET1.

In addition, the Federal Reserve Board’s Basel III rules require that certain non-qualifying capital instruments, including cumulative preferred stock and trust preferred securities (“TRuPs”), be excluded from Tier 1 capital. In general, banking organizations such as the Corporation began to phase out TRuPs from Tier 1 capital on January 1, 2015. The Corporation is allowed to include 25% of the $220 million outstanding qualifying TRuPs as Tier 1 capital in 2015 and the TRuPs must be fully phased out from Tier 1 capital by January 1, 2016. However, the Corporation’s TRuPs may continue to be included in Tier 2 capital until the instruments are redeemed or mature.

The Basel III rules also revise the “prompt corrective action” (“PCA”) regulations that apply to depository institutions, including FirstBank, pursuant to Section 38 of the Federal Deposit Insurance Act by (i) introducing a separate CET1 ratio requirement for each PCA capital category (other than critically undercapitalized) with the required CET1 ratio being 6.5% for well-capitalized status; (ii) increasing the minimum Tier 1 capital ratio requirement for each PCA capital category with the minimum Tier 1 capital ratio for well-capitalized status being 8% (as compared to the previous 6%); and (iii) eliminating the provision that allowed a bank with a composite supervisory rating of 1 to have a 3% leverage ratio and still be adequately capitalized and maintaining the minimum leverage ratio for well-capitalized status at 5%. The Basel III rules do not change the total risk-based capital requirement (10% for well-capitalized status) for any PCA capital category. The new PCA requirements became effective on January 1, 2015.

The Corporation and FirstBank compute risk weighted assets using the Standardized Approach required by the Basel III rules. The Standardized Approach for risk-weightings has expanded the risk-weighting categories from the four major risk-weighting categories under the previous regulatory capital rules (0%, 20%, 50%, and 100%) to a much larger and more risk-sensitive number of categories, depending on the nature of the assets. In a number of cases, the Standardized Approach results in higher risk weights for a variety of asset categories. Specific changes to the risk-weightings of assets include, among other things: (i) applying a 150% risk weight instead of a 100% risk weight for certain high volatility commercial real estate acquisition, development and construction loans, (ii) assigning a 150% risk weight to exposures that are 90 days past due (other than qualifying residential mortgage exposures, which remain at an assigned risk-weighting of 100%), (iii) establishing a 20% credit conversion factor for the unused portion of a commitment with an original maturity of one year or less that is not unconditionally cancellable, in contrast to the 0% risk-weighting under the prior rules and (iv) requiring capital to be maintained against on-balance-sheet and off-balance-sheet exposures that result from certain cleared transactions, guarantees and credit derivatives, and collateralized transactions (such as repurchase agreement transactions).

The Corporation's and its banking subsidiary's regulatory capital positions as of June 30, 2015 and December 31, 2014 were as follows:

The Corporation enters into financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments may include commitments to extend credit and commitments to sell mortgage loans at fair value. As of June 30, 2015, commitments to extend credit amounted to approximately $1.1 billion, of which $647.1 million relates to credit card loans. Commercial and Financial standby letters of credit amounted to approximately $50.2 million. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any conditions established in the contract. Commitments generally have fixed expiration dates or other termination clauses. Since certain commitments are expected to expire without being drawn upon, the total commitment amount does not necessarily represent future cash requirements. For most of the commercial lines of credit, the Corporation has the option to reevaluate the agreement prior to additional disbursements. In the case of credit cards and personal lines of credit, the Corporation can cancel the unused credit facility at any time and without cause. Generally, the Corporation's mortgage banking activities do not enter into interest rate lock agreements with prospective borrowers.

As of June 30, 2015, First BanCorp. and its subsidiaries were defendants in various legal proceedings arising in the ordinary course of business. Management believes that the final disposition of these matters, to the extent not previously provided for, will not have a material adverse effect, individually or in the aggregate, on the Corporation's financial position, results of operations or cash flows.

Supplemental cash flow information is as follows:

NOTE 25 – FIRST BANCORP. (HOLDING COMPANY ONLY) FINANCIAL INFORMATION

The following condensed financial information presents the financial position of the Holding Company only as of June 30, 2015 and December 31, 2014 and the results of its operations for the quarters and six-month periods ended June 30, 2015 and 2014.

(1) Non-GAAP measure. Refer to "Capital" below for additional information about the components and a reconciliation of these measures.

(2) On a tax-equivalent basis and excluding the changes in fair value of derivative instruments (see "Net Interest Income" below for a reconciliation of these non-GAAP measures).

(3) Non-interest expense to the sum of net interest income and non-interest income. The denominator includes non-recurring income and changes in the fair value of derivative instruments.

(4) Loans used in the denominator in calculating each of these ratios include purchased credit-impaired ("PCI") loans. However, the Corporation separately tracks and reports PCI loans and excludes these from non-performing loan and non-performing asset statistics.

(5) The ratio of net charge-offs to average loans, excluding charge-offs associated with the bulk sale of assets, was 0.75% and 1.01% for the quarter and six-month period ended June 30, 2015, respectively.

(6) The ratio of net-charge-offs to average loans excluding the impact associated with the acquisition of mortgage loans from Doral in the second quarter of 2014, was 1.90% and 2.01% for the quarter and six-month period ended June 30, 2014, respectively.

(7) The ratio of the provision for loan and lease losses to net charge-offs, excluding the impact of the bulk sale of assets,was 157.21% and 129.16% for the quarter and six-month period ended June 30, 2015, respectively.

(8) The ratio of the provision for loan and lease losses to net charge-offs, excluding the impact associated with the acquisition of mortgage loans from Doral in the second quarter of 2014, was 55.72% and 59.35% for the quarter and six month period ended June 30, 2014, respectively.

The following Management's Discussion and Analysis of Financial Condition and Results of Operations relates to the accompanying unaudited consolidated financial statements of First BanCorp. (the "Corporation" or "First BanCorp.") and should be read in conjunction with such financial statements and the notes thereto.

EXECUTIVE SUMMARY

First BanCorp. is a diversified financial holding company headquartered in San Juan, Puerto Rico offering a full range of financial products to consumers and commercial customers through various subsidiaries. First BanCorp. is the holding company of FirstBank Puerto Rico ("FirstBank" or the "Bank") and FirstBank Insurance Agency. Through its wholly-owned subsidiaries, the Corporation operates offices in Puerto Rico, the United States Virgin Islands and British Virgin Islands, and the State of Florida (USA), concentrating on commercial banking, residential mortgage loan originations, finance leases, credit cards, personal loans, small loans, auto loans, and insurance agency and broker-dealer activities.

RECENT SIGNIFICANT EVENTS

Bulk Sale of Assets

On June 5, 2015, the Corporation completed the sale of commercial and construction loans with a book value of $147.5 million (principal balance of $196.5 million), comprised mostly of non-performing and adversely classified loans, as well as other real estate owned ("OREO") with a book value of $2.9 million in a cash transaction. The sale price of this bulk sale was $87.3 million. Approximately $15.3 million of reserves had been allocated to the loans. This transaction resulted in total charge-offs of $61.4 million and an incremental pre-tax loss of $48.7 million, including $0.9 million in professional service fees directly attributable to this bulk sale.

The inclusion of the $61.4 million of charge-offs from the bulk sale in the historical loss rates had an impact of approximately $15.5 million on the general reserve for loan losses determined for loans collectively evaluated for impairment.

Doral Bank Transaction

During the second quarter of 2015, the Corporation successfully completed the system conversion of loan and deposit accounts acquired from Doral Bank ("Doral") to the FirstBank systems and recorded approximately $4.6 million of pre-tax conversion costs in the first half of 2015 ($2.6 million in the second quarter and $2.0 million in the first quarter). In addition, the Corporation incurred approximately $3.6 million in interim servicing costs in the first half of 2015 ($2.4 million in the second quarter and $1.2 million in the first quarter). As discussed in Note 2, Business Combination, to the consolidated unaudited financial statements, on February 27, 2015, FirstBank acquired 10 Puerto Rico branches of Doral Bank, assumed $522.7 million in deposits related to such branches, acquired approximately $324.8 million in principal balance of loans, primarily residential mortgage loans, acquired $5.5 million of property, plant and equipment and received $217.7 million of cash, through an alliance with other co-bidders on the failed Doral Bank (the "Doral Bank transaction"). The Corporation recorded in the first quarter of 2015 a $13.4 million pre-tax bargain purchase gain in connection with the assets acquired and liabilities assumed from Doral.

Puerto Rico Economic Environment and Exposure to Puerto Rico Government

A significant portion of our financial activities and credit exposure is concentrated in the Commonwealth of Puerto Rico, which has been in an economic recession essentially since 2006. Based on the first six months of calendar year 2015, the main economic indicators suggest that the Puerto Rico economy remains weak. For fiscal year 2015, the Puerto Rico Planning Board projects a continued economic contraction in the Commonwealth's real gross national product ("GNP") of 0.7%. The seasonally adjusted labor force measure continued its declining trend in June 2015, reflecting a reduction of 0.6% compared to June 2014. This continued reduction has partially resulted in a reduced seasonally adjusted unemployment rate in Puerto Rico, which decreased to 12.6% in June 2015, compared to 13.5% in June 2014. The seasonally adjusted payroll non-farm employment slightly increased 0.3% in June 2015, compared to June 2014.

Based on information published by the Puerto Rico Government, preliminary General Fund net revenues for fiscal year ended June 30, 2015 were $8.961 billion, a decrease of $76.0 million when compared to the prior fiscal year and $604.1 million less than the original estimate for the year. The Government's most recent projection is that it will close fiscal year 2015 with a budget deficit in the range of $531 million to $566 million, an amount that, when adjusted for actual tax refunds paid in this fiscal year in excess of the reserve included in the budget for fiscal year 2015, increases the deficit to a range of $705 million to $740 million.

On June 28, 2015, the Governor of Puerto Rico and the Government Development Bank for Puerto Rico ("GDB") released a report by former World Bank Chief Economist and former Deputy Director of the International Monetary Fund, Dr. Anne Krueger, and economists Dr. Ranjit Teja and Dr. Andrew Wolfe (the "Krueger Report") that analyzes the full extent of the Commonwealth's fiscal condition including revenues, expenditures, deficits, and current and future obligations. It also makes recommendations for a five-year fiscal

---

adjustment plan. The Krueger Report states that Puerto Rico faces an acute crisis in the face of faltering economic activity, fiscal solvency and debt sustainability, and institutional credibility.

On June 29, 2015, the Governor of Puerto Rico announced that the Government will seek alternatives to ensure that the aggregate debt burden of the Commonwealth is adjusted so it can be repaid on sustainable terms, while ensuring pension obligations are honored over the long term and essential services for the people of Puerto Rico are maintained, and issued an Executive Order to create the Puerto Rico Fiscal and Economic Recovery Working Group (the "Working Group"). The Working Group was created to consider necessary measures, including the measures recommended in the Krueger Report, to address the fiscal crisis of the Commonwealth and will be responsible for developing and recommending to the Governor of Puerto Rico the Puerto Rico Fiscal and Economic Adjustment Plan (the "Plan"). The Plan must contain the administrative and legislative measures necessary to address the short, medium and long-term fiscal and economic challenges facing Puerto Rico, including measures to: (i) address the financing gaps and the debt load on the public sector, (ii) achieve the execution of its budgets, (iii) achieve greater transparency with respect to statistics and the government's financial information, and (iv) carry out the structural reforms necessary to promote the economic growth and competitiveness of the Commonwealth.

After the announcement, the top three credit rating agencies, Moody's, S&P and Fitch downgraded the Puerto Rico issued bonds deeper into non-investment grade status.

On July 31, 2015, GDB confirmed it make the debt service payment of $169.6 million on outstanding GDB notes due on August 1, 2015. Nonetheless, another payment, due the same day, of $57.9 million related to a debt obligation of the Public Finance Corporation was not made.

During the second quarter of 2015, the Corporation recorded a $12.9 million other-than-temporary impairment ("OTTI") on three Puerto Rico Government debt securities held by the Corporation as part of its available-for-sale securities portfolio, specifically bonds of the GDB and the Puerto Rico Public Buildings Authority. The credit-related impairment loss estimate is based on the probability of default and loss severity in the event of default in consideration of the debt securities credit ratings and the latest available information about the Puerto Rico Government's financial condition, including the Puerto Rico Government's intentions to restructure its outstanding bond obligations. Given the significant uncertainty of a debt restructuring process, the Corporation cannot be certain that future impairment charges will not be required against these securities. As of June 30, 2015, the Corporation owns Puerto Rico Government debt securities in the aggregate amount of $52.7 million (net of the $12.9 million OTTI), carried on its books at a fair value of $34.6 million.

As of June 30, 2015, the Corporation had $340.0 million of credit facilities, excluding investment securities, granted to the Puerto Rico Government, its municipalities and public corporations, of which $326.7 million was outstanding (book value of $325.8 million). Approximately $204.3 million of the granted credit facilities outstanding consisted of loans to municipalities in Puerto Rico for which, in most cases, the good faith, credit and unlimited taxing power of the applicable municipality have been pledged to their repayment. Approximately $23.3 million consisted of loans to units of the central government, and approximately $99.0 million ($98.1 million book value) consisted of loans to public corporations, including the direct exposure to the Puerto Rico Electric Power Authority ("PREPA") with a book value of $74.1 million as of June 30, 2015.

Furthermore, as of June 30, 2015, the Corporation had $131.0 million outstanding in financings to the hotel industry in Puerto Rico where the borrower and underlying collateral are the primary sources of repayment and the Puerto Rico Tourism Development Fund (“TDF”) provides a secondary guarantee for payment performance. The TDF is a subsidiary of the GDB that works with private-sector financial institutions to structure financings for new hospitality projects. The Corporation has been receiving payments from the TDF to cover scheduled payments on these financings since late 2012, including collections of interest and principal of approximately $4.6 million in 2015 and $8.6 million in 2014.

In addition, the Corporation had $124 million in indirect exposure to residential mortgage loans that are guaranteed by the Puerto Rico Housing Authority. Mortgage loans guaranteed by the Puerto Rico Housing Authority are secured by the underlying properties and the guarantees serve to cover shortfalls in collateral in the event of a borrower default.

As of June 30, 2015, the Corporation had $326.9 million of public sector deposits in Puerto Rico. Approximately 54% came from municipalities in Puerto Rico and 46% came from public corporations and the central government and agencies.

NON-GAAP RECONCILIATION

The following table shows a reconciliation with respect to certain non-GAAP financial measures ("adjusted net charge-offs," "adjusted provision for loan and lease losses," "adjusted non-interest income," "adjusted non-interest expenses," and "adjusted pre-tax income"), which reflect the exclusion of the realized loss on the bulk sale of assets, the OTTI charge on Puerto Rico Government debt securities, system conversion costs related to the Doral Bank transaction and the bargain purchase gain, with the corresponding measures calculated and presented in accordance with GAAP.

OVERVIEW OF RESULTS OF OPERATIONS

First BanCorp.'s results of operations depend primarily on its net interest income, which is the difference between the interest income earned on its interest-earning assets, including investment securities and loans, and the interest expense incurred on its interest-bearing liabilities, including deposits and borrowings. Net interest income is affected by various factors, including: the interest rate scenario; the volumes, mix and composition of interest-earning assets and interest-bearing liabilities; and the re-pricing characteristics of these assets and liabilities. The Corporation's results of operations also depend on the provision for loan and lease losses, non-interest expenses (such as personnel, occupancy, deposit insurance premium and other costs), non-interest income (mainly service charges and fees on deposits, insurance income and revenues from broker-dealer operations), gains (losses) on sales of investments, gains (losses) on mortgage banking activities, and income taxes.

The Corporation had a net loss of $34.1 million, or $0.16 per diluted common share, for the quarter ended June 30, 2015, compared to a net income of $21.2 million, or $0.11 per diluted common share, for the same period in 2014. The Corporation’s financial results for the second quarter of 2015 were impacted by three significant items: (i) a $48.7 million pre-tax loss on a bulk sale of assets, mostly comprised of non-performing and adversely classified commercial loans, including transaction expenses, (ii) a $12.9 million OTTI charge on Puerto Rico Government debt securities, and (iii) a pre-tax cost of approximately $2.6 million related to the conversion of loan and deposit accounts acquired from Doral Bank to the FirstBank systems completed in the second quarter.

The key drivers of the Corporation’s financial results for the quarter ended June 30, 2015, compared to the same period in 2014, include the following:

- Net interest income decreased $3.4 million to $126.5 million for the quarter ended June 30, 2015 compared to the same period in 2014. The decrease in net interest income was primarily driven by: (i) a $7.8 million decrease in interest income on commercial loans, including a decrease of approximately $6.9 million attributable to a $656.5 million decline in the average volume of commercial loans and the adverse impact of $0.9 million in interest payments received in the second quarter of 2015 from the credit facility to PREPA, a government public corporation, accounted for on a cost-recovery basis, (ii) a $3.0 million decrease in interest income on mortgage-backed securities (“MBS”), including a decrease of approximately $1.4 million attributable to a $208.9 million decline in the average volume of MBS and a $1.6 million decrease related to lower yields reflecting, among other things, an acceleration of prepayment speeds and the gradual reinvestment of MBS prepayments in lower-yielding investments given the low interest rate environment, (iii) a $3.9 million decrease in interest income on consumer loans, other than credit cards, primarily related to a $147.1 million decrease in the average volume of such loans, and (iv) a $2.0 million decrease in the interest income on credit card loans mainly due to the fact that the remaining discount related to the credit card portfolio acquired in 2012 was fully accreted into income during the second quarter of 2014.

These variances were partially offset by: (i) a $9.7 million increase in the interest income on residential mortgage loans primarily related to the acquisition of several loan portfolios from Doral completed after the end of the first quarter of 2014, including the most recent acquisition in February 2015, (ii) a $2.5 million decrease in interest expense on deposits reflecting both a $686.9 million decrease in the average volume of brokered CDs and lower rates paid on certain of the Bank's savings and interest-bearing checking accounts. The net interest margin, excluding fair value adjustments, remained relatively flat showing a decrease of 2 basis points to 4.18% for the second quarter of 2015 compared to the same period in 2014. For a definition and reconciliation of this non-GAAP measure, refer to "Net Interest Income" discussion below.

- The provision for loan and lease losses increased $47.5 million to $74.3 million for the second quarter of 2015 compared to $26.7 million for the same period in 2014. The provision for loan and lease losses in the second quarter of 2015 includes a charge of $46.9 million associated with the bulk sale of assets. Excluding the impact of the bulk sale of assets, the provision for loan and lease losses increased by $0.6 million in the second quarter of 2015 compared to the same period in 2014 reflecting, among other things, the incorporation of the $61.4 million of net charge-offs from the bulk sale in the historical loss rates used to estimate inherent losses for non-impaired loans that resulted in a $15.5 million increase to the general reserve, partially offset by a $13.1 million decrease in the provision for consumer loans that reflects improvements in charge-off rates, declining loss severity rates on auto loans and the overall decline in the size of this portfolio.

Net charge-offs totaled $78.8 million for the second quarter of 2015, or 3.35% of average loans on an annualized basis, compared to $52.3 million, or 2.19% of average loans for the same period in 2014. The bulk sale of assets in 2015 added $61.4 million in net charge-offs in the second quarter of 2015 and the acquisition in the second quarter of 2014 of mortgage loans from Doral in full satisfaction of secured borrowings owed by Doral to FirstBank added $6.9 million in net charge-offs in the second quarter of 2014. Adjusted net charge-offs, excluding the impact of the bulk sale of assets in 2015 and the acquisition of mortgage loans from Doral in 2014, amounted to $17.4 million in the second quarter of 2015, or an annualized 0.75% of average loans, a decrease of $28.0 million compared to the same period in 2014 reflecting decreases in all major loan categories. Refer to the discussions under "Provision for loan and lease losses" and "Risk Management" below for an analysis of the allowance for loan and lease losses and non-performing assets and related ratios.

- The Corporation recorded non-interest income of $6.7 million for the quarter ended June 30, 2015, compared to $15.9 million for the same period in 2014, a decrease of $9.2 million. The decrease was mainly related to the $12.9 million OTTI charge on Puerto Rico Government debt securities, partially offset by the $1.7 million in service charges on deposits and other fees associated with deposits assumed from Doral in late February 2015 and a $1.7 million increase in revenues from the mortgage banking business. Refer to "Non-Interest Income" below for additional information.

- Non-interest expenses increased by $4.7 million to $102.8 million for the second quarter of 2015 compared to the same period in 2014. Excluding the $1.2 million of expenses and losses related to the bulk sale of assets and the $2.6 million of conversion costs related to the Doral Bank transaction incurred in the second quarter of 2015, non-interest expenses increased by $0.9 million mainly reflecting: (i) $2.4 million of interim servicing costs related to loan and deposit accounts acquired from Doral, (ii) $1.3 million of professional service fees related to special projects as well as strategic, stress testing and capital planning matters, (iii) a $3.0 million increase in employees' compensation and benefits mainly associated with salary merit increases that became effective early in the second quarter of 2015, personnel costs related to branches acquired from Doral and a higher stock-based compensation expense, (iv) a $1.1 million increase in collections, appraisals, and other credit-related professional service fees related to troubled loan resolution efforts, and (v) a $0.8 million increase in occupancy and equipment costs primarily related to rental, depreciation and maintenance expenses associated with the acquired Doral branches.

These increases were partially offset by: (i) a $4.2 million decrease in the FDIC deposit insurance premium expense reflecting, among other things, the decrease in brokered CDs, a strengthened capital position and an improved earnings to assets average ratio, (ii) a $1.9 million decrease in OREO related expenses, and (iii) a $1.4 million decrease in taxes, other than income taxes, reflecting the elimination of Puerto Rico's national gross receipts tax in 2015. Refer to "Non-Interest Expenses" below for additional information.

- For the second quarter of 2015, the Corporation recorded an income tax benefit of $9.8 million, compared to an income tax benefit of $0.3 million for the same period in 2014. As a result of the partial reversal of the deferred tax assets valuation allowance recorded in the fourth quarter of 2014, the Corporation is now required to estimate and record a provision/benefit for income taxes for interim periods. The Corporation's effective tax rate for the first six months of 2015 was 18%, (30% when excluding entities for which a tax benefit from ordinary losses cannot be recognized). As of June 30, 2015, the Corporation had a net deferred tax asset of $310.4 million (net of a valuation allowance of $204.0 million). Refer to "Income Taxes" below for additional information.

- As of June 30, 2015, total assets were $12.6 billion, a decrease of $149.0 million from December 31, 2014. The decrease reflects a $113.7 million decrease in cash and cash equivalents primarily related to funds used for a $200 million reverse repurchase agreement entered into in April 2015 under a master netting arrangement. This agreement qualifies for offsetting accounting, thus, the reverse repurchase agreement was netted against repurchase agreements in the consolidated statement of financial condition. Also, total loans (net of allowance) decreased by $40.8 million primarily due to a $284.2 million decrease in commercial and construction loans, reflecting the $147.5 million of loans included in the bulk sale of assets and an additional $136.6 million decrease that included the sale of a $20

million participation in a loan and certain large repayments in Puerto Rico. In addition, the consumer loan portfolio decreased by $83.3 million. These variances were partially offset by a $325.8 million increase in residential mortgage loans mainly attributable to loans acquired from Doral in late February 2015. Refer to "Financial Condition and Operating Data" below for additional information.

- As of June 30, 2015, total liabilities were $10.9 billion, a decrease of $145.5 million, from December 31, 2014. The decrease was mainly related to a $556.2 million decrease in brokered CDs and the netting of the $200 million reverse repurchase agreement against repurchase agreements. These variances were partially offset by a $576.9 million increase in non-brokered deposits, including an organic growth of approximately $114.7 million and approximately $462.2 million related to deposits assumed from Doral as of June 30, 2015. Refer to "Risk Management – Liquidity and Capital Adequacy" below for additional information about the Corporation's funding sources.

- As of June 30, 2015, the Corporation's stockholders' equity was $1.7 billion, a decrease of $3.5 million from December 31, 2014. The decrease was mainly driven by the net loss of $8.4 million reported for the first six months of 2015 and a $3.0 million decrease in other comprehensive income mainly attributable to the decrease in the fair value of U.S. agency MBS, partially offset by the exchange of $5.3 million of trust preferred securities for shares of the Corporation's common stock.

- The Corporation's Total Capital, Common equity Tier 1 Capital, Tier 1 Capital and Leverage ratios calculated under the Basel III rules were 19.44%, 16.37%, 16.37%, and 11.94%, respectively, as of June 30, 2015. The Corporation's tangible common equity ratio increased to 12.61% as of June 30, 2015, from 12.51% as of December 31, 2014. Refer to "Risk Management – Capital" below for additional information including further information about the implementation of the Basel III rules in 2015.

- Total loan production, including purchases, refinancings, renewals and draws from existing revolving and non-revolving commitments, was $767.0 million for the quarter ended June 30, 2015, excluding the utilization activity on outstanding credit cards, compared to $781.3 million for the same period in 2014. The decrease in loan production was mainly related to lower borrowings under credit facilities granted to government entities in Puerto Rico and a decrease in auto loan originations.

- Total non-performing assets were $644.4 million as of June 30, 2015, a decrease of $72.3 million from December 31, 2014. The decrease was driven by the bulk sale of assets that included $91.9 million of non-performing commercial and construction loans, partially offset by the inflow to non-performing status in the first quarter of the $75.0 million credit facility with PREPA. The remainder of the decrease reflects charge-offs, commercial loans brought current, and cash collections. Refer to "Risk Management - Non-accruing and Non-performing Assets" below for additional information.

- Adversely classified commercial and construction loans held for investment decreased by $146.6 million to $411.0 million, or 26%, from December 31, 2014, also driven by the bulk sale of assets and improvements in repayment prospects on a $48 million commercial mortgage loan, partially offset by the migration of approximately $44.4 million of syndicated commercial loan participations to adverse classification categories.

Critical Accounting Policies and Practices

The accounting principles of the Corporation and the methods of applying these principles conform to generally accepted accounting principles in the United States ("GAAP"). The Corporation's critical accounting policies relate to: 1) the allowance for loan and lease losses; 2) other-than-temporary impairments ("OTTIs"); 3) income taxes; 4) the classification and values of investment securities; 5) the valuation of financial instruments; 6) income recognition on loans; 7) fair values and the accounting for loans acquired, 8) loans held for sale; 9) accounting for business combinations; and 10) until 2014, equity method of accounting for investment in unconsolidated entity. These critical accounting policies involve judgments, estimates and assumptions made by management that affect the amounts recorded for assets, liabilities and contingent liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from estimates, if different assumptions or conditions prevail. Certain determinations inherently require greater reliance on the use of estimates, assumptions, and judgments and, as such, have a greater possibility of producing results that could be materially different than those originally reported.

The Corporation's critical accounting policies are described in Management's Discussion and Analysis of Financial Condition and Results of Operations included in First BanCorp.'s 2014 Annual Report on Form 10-K. There have not been any material changes in the Corporation's critical accounting policies since December 31, 2014.

RESULTS OF OPERATIONS

Net Interest Income

Net interest income is the excess of interest earned by First BanCorp. on its interest-earning assets over the interest incurred on its interest-bearing liabilities. First BanCorp.'s net interest income is subject to interest rate risk due to the repricing and maturity mismatch of the Corporation's assets and liabilities. Net interest income for the quarter and six-month period ended June 30, 2015 was $126.5 million and $252.1 million, respectively, compared to $129.9 million and $261.2 million for the comparable periods in 2014. On a tax-equivalent basis, and excluding the changes in the fair value of derivative instruments, net interest income for the quarter and six-month period ended June 30, 2015 was $131.1 million and $260.8 million, respectively, compared to $134.7 million and $270.9 million for the comparable periods in 2014.

The following tables include a detailed analysis of net interest income. Part I presents average volumes and rates on an adjusted tax-equivalent basis and Part II presents, also on an adjusted tax-equivalent basis, the extent to which changes in interest rates and changes in volume of interest-related assets and liabilities have affected the Corporation's net interest income. For each category of interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to (i) changes in volume (changes in volume multiplied by prior period rates), and (ii) changes in rate (changes in rate multiplied by prior period volumes). Rate-volume variances (changes in rate multiplied by changes in volume) have been allocated to the changes in volume and rate based upon their respective percentage of the combined totals.

The net interest income is computed on an adjusted tax-equivalent basis and excluding the change in the fair value of derivative instruments. For a definition and reconciliation of this non-GAAP measure, refer to the discussions below.
