(AMEX/PCX: MSW) reported today that Funds From Operations ("FFO") for the quarter ended June 30, 2003 was \$28,952,000 or \$0.28 per diluted common share (considering the potential effect of all O.P. units being exchanged for shares of the Company's common stock) as compared to \$29,199,000 or \$0.28 per diluted common share for the same period in 2002. INVESTMENT ACTIVITY

On April 1, 2003, the Company obtained a 50% interest in a 60,000 rentable square foot shell building in Morgan Hill, California from the Berg Group under the Berg Land Holdings Option Agreement in connection with its joint venture with TBI. The joint venture financed 100% of the cost of the building. The shell building was sold and the Company recognized a gain of approximately \$1.4 million.

On April 9, 2003, the Company acquired a 36 acre seven building campus style office/R&D project comprised of approximately 625,000 rentable square feet at San Tomas and Central Expressway in Santa Clara, California, which is adjacent to Nvidia Corporation's headquarters campus. The project was acquired for \$110 million from an unrelated third party and financed with a combination of debt and cash reserves. The debt component is comprised of a new short term mortgage note with a commercial bank secured by the assets in the acquisition for the sum of \$80 million at LIBOR plus 200 basis points and matures in April 2004. In addition, the Company utilized approximately \$19.2 million of its operating line of credit with Cupertino National Bank in connection with this acquisition.

Funds From Operations ("FFO") is a non-GAAP financial measurement used by real estate investment trusts to measure and compare operating performance. As defined by NAREIT, FFO represents net income (loss) before minority interest of unit holders (computed in accordance with GAAP, accounting principles generally accepted in the United States of America), excluding gains (or losses) from debt restructuring and sales of property, plus real estate related depreciation and amortization (excluding amortization of deferred financing costs, amortization of commission and depreciation of non-real estate assets) and after adjustments for unconsolidated partnerships and joint ventures. Management considers FFO an appropriate measure of performance of an equity REIT because, along with cash flows from operating activities, financing activities and investing activities, it provides investors with an understanding of our ability to incur and service debt, and make capital expenditures. FFO should not be considered as an alternative for net income as a measure of profitability or is it comparable to cash flows provided by operating activities determined in accordance with GAAP. FFO is not comparable to similarly entitled items reported by other REITs that do not define them exactly as we define FFO.
