Exhibit 99.1

**Greene County Bancorp, Inc.
Announces Earnings**

Catskill, N.Y. -- (BUSINESS WIRE) - May 1, 2006-- Greene County Bancorp, Inc. (the "Company") (NASDAQ: GCBC), the holding company for The Bank of Greene County, today reported net income for the nine months and quarter ended March 31, 2006. Net income for the nine months ended March 31, 2006 amounted to \$1.8 million or \$0.43 per basic and \$0.42 per diluted share as compared to \$2.3 million or \$0.56 per basic and \$0.54 per diluted share for the nine months ended March 31, 2005, a decrease of \$534,000 or \$0.13 per basic and \$0.12 per diluted share. Net income for the quarter ended March 31, 2006 amounted to \$574,000 or \$0.14 per basic and diluted share as compared to \$682,000 or \$0.17 per basic and \$0.16 per diluted share for the quarter ended March 31, 2005, a decrease of \$108,000 or \$0.03 per basic and \$0.02 per diluted share. Several factors contributed to the decline in net income, including narrowing net interest spread and margin, expenses associated with the implementation of a new deposit and loan processing system, replacement of two branches and higher compensation expense, as well as a loss on the sale of the old Cairo branch.

Net interest income decreased to \$8.0 million for the nine months ended March 31, 2006 as compared to \$8.1 million for the nine months ended March 31, 2005, a decrease of \$110,000 or 1.4%. Net interest income amounted to \$2.7 million for the quarters ended March 31, 2006 and 2005. Net interest spread decreased 16 basis points to 3.78% for the nine months ended March 31, 2006 as compared to 3.94% for the nine months ended March 31, 2005. Net interest margin decreased 14 basis points to 3.87% for the nine months ended March 31, 2006 as compared to 4.01% for the nine months ended March 31, 2005. Net interest spread decreased 16 basis points to 3.76% for the quarter ended March 31, 2006 as compared to 3.92% for the quarter ended March 31, 2005. Net interest margin decreased 14 basis points to 3.85% for the quarter ended March 31, 2006 as compared to 3.99% for the quarter ended March 31, 2005. The declines in net interest spread and margin were attributable to the rising short-term interest rate environment. The Company's interest-bearing liabilities are generally more sensitive to changes in short-term interest rates than are its interest-earning assets. Accordingly, during both the three and nine months ended March 31, 2006, the average cost of interest-bearing liabilities increased to a greater degree than the yield on interest-earning assets.

The balance of average loans outstanding increased to \$172.1 million at an average yield of 6.47% for the nine months ended March 31, 2006 as compared to \$153.4 million at an average yield of 6.48% for the nine months ended March 31, 2005, an increase in average balance of \$18.7 million and a decline in average yield of one basis point. The balance of average loans outstanding for the quarter ended March 31, 2006, increased to \$178.0 million at an average yield of 6.47% as compared to \$155.3 million at an average yield of 6.42% for the quarter ended March 31, 2005, an increase in average balance of \$22.7 million and an increase in average yield of five basis points. Funding loan growth were investment securities repayments and maturities as well as growth in deposits. The average balance of investment securities decreased to \$90.9 million at an average yield of 3.23% for the nine months ended March 31, 2006 as compared to \$103.4 million at an average yield of 3.67% for the nine months ended March 31, 2005, a decrease in average balance of \$12.5 million and a decrease in average yield of 44 basis points. The average balance of investment securities decreased to \$87.7 million at an average yield of 3.35% for the quarter ended March 31, 2006 as compared to \$104.3 million at an average yield of 3.56% for the quarter ended March 31, 2005, a decrease in average balance of \$16.6 million and a decrease in average yield of 21 basis points. Maturing high-yield corporate securities were replaced with lower-yielding tax free securities and mortgage-backed investments during the nine months and quarter ended March 31, 2006. During the nine months ended March 31, 2006, mortgage-backed investments that were repaid were accompanied by large premium write-downs, further decreasing the overall yield on investment securities. Short-term investments, consisting of federal funds sold and interest-earning deposits at other financial institutions, averaged \$10.7 million and \$11.6 million during the three and nine months ended March 31, 2006, respectively, as compared to \$9.8 million and \$11.5 million, respectively, for the same prior year periods, while

yields earned thereon, reflecting the increasing short-term interest rate environment, increased to 4.18% and 3.73%, respectively, during the three and nine months ended March 31, 2006, as compared to 2.67% and 2.07% for the same prior year periods. Overall, the yield earned on interest-earning assets increased during the three and nine months ended March 31, 2006, over the prior comparable period, by 22 basis points to 5.39% and 8 basis points to 5.28%, respectively. Such increases were primarily due to increasing short-term interest rates and a shift in assets from investment securities into higher-yielding loans. Savings and money market accounts average balance grew to \$134.8 million with an average rate of 1.43% for the nine months ended March 31, 2006 as compared to \$133.4 million with an average rate of 1.14% for the nine months ended March 31, 2005, an increase of \$1.4 million in average balance and an increase in average rate of 29 basis points. Savings and money market accounts' average balance was \$133.0 million with an average rate of 1.61% for the quarter ended March 31, 2006 as compared to \$135.3 million with an average rate of 1.14% for the quarter ended March 31, 2005, a decrease of \$2.3 million in average balance and an increase in average rate of 47 basis points. Certificates of deposit average balance amounted to \$55.8 million with an average rate of 2.76% for the nine months ended March 31, 2006 as compared to \$56.3 million with an average rate of 2.12% for the nine months ended March 31, 2005, a decrease of \$0.5 million in average balance and an increase in average rate of 64 basis points. Certificates of deposit average balance was \$57.0 million with an average rate of 2.92% for the quarter ended March 31, 2006 as compared to \$55.5 million with an average rate of 2.15% for the quarter ended March 31, 2005, an increase of \$1.5 million in average balance and an increase in average rate of 77 basis points. Overall, the average cost of interest-bearing liabilities increased during the three and nine months ended March 31, 2006, over the prior comparable period, by 38 basis points to 1.63% and 24 basis points to 1.50%, respectively. Such increases were primarily due to increasing short-term interest rates.

The provision for loan losses for the nine months ended March 31, 2006 increased to \$100,000 as compared to \$71,000 for the nine months ended March 31, 2005. The provision for loan losses for the quarter ended March 31, 2006 increased to \$40,000 as compared to no provision for the quarter ended March 31, 2005. The provision for loan losses for the nine months and quarter ended March 31, 2006, was driven by the ratio of allowance for loan loss to net loans, which declined to 0.71% at March 31, 2006 from 0.79% at March 31, 2005. Management believes, given the current low levels of non-performance and improving economic conditions, that the allowance for loan losses is appropriate.

Noninterest income increased to \$2.3 million for the nine months ended March 31, 2006 as compared to \$2.0 million for the nine months ended March 31, 2005, an increase of \$323,000 or 16.1%. Noninterest income increased to \$762,000 for the quarter ended March 31, 2006 as compared to \$612,000 for the quarter ended March 31, 2005, an increase of \$150,000 or 24.5%. Service charges on deposit accounts increased \$70,000 and \$40,000, respectively for the nine months and quarter ended March 31, 2006 as compared to the nine months and quarter ended March 31, 2005 due primarily to higher levels of insufficient funds charges. The Company continues to grow income from higher volumes of activity in debit cards, E-commerce and services performed through Essex Corp's "Investors MarketPlace," an alternative investment resource.

Noninterest expense amounted to \$7.8 million and \$6.8 million for the nine months ended March 31, 2006 and 2005, respectively, an increase of \$974,000, or 14.3%. Noninterest expense amounted to \$2.6 million and \$2.3 million for the quarters ended March 31, 2006 and 2005, respectively, an increase of \$272,000 million or 11.7%. The most significant items contributing to the overall increases in noninterest expense were higher salary and employee benefits. Salary and employee benefits amounted to \$4.3 million and \$3.8 million for the nine months ended March 31, 2006 and 2005, respectively. Salary and employee benefits amounted to \$1.5 million and \$1.3 million for the quarters ended March 31, 2006 and 2005, respectively. Salaries and employee benefits costs increased \$532,000 and \$136,000 when comparing the nine months and quarters ended March 31, 2006 and 2005, respectively. Additional staffing, including business development and marketing personnel, a Controller and several branch personnel contributed to the higher expense as well as retirement expense, which increased approximately \$91,000 for the nine months ended March 31, 2006 as compared to 2005 as a result of more staff eligible to participate in the retirement plans and lower investment earnings in the plan. Commissions are paid to staff employed under the Investors MarketPlace program, which will increase salary as the program brings in more earnings, further contributing to the

increase in overall salary expense. Occupancy expense increased \$98,000 and \$40,000 when comparing the nine-month and quarterly periods ended March 31, 2006 and 2005, primarily due to higher depreciation expense associated with the replacement of the Cairo and Coxsackie branches as well as higher utilities costs and maintenance. Furniture and equipment expenses increased \$131,000 and \$61,000 when comparing the nine-month and quarterly periods ended March 31, 2006 and 2005, primarily due to higher depreciation expense associated with computer equipment upgrades, the new data processing system and furniture for the new branches. Service and data processing fees have decreased approximately \$68,000 and \$34,000 when comparing the nine-month and quarterly periods ended March 31, 2006 and 2005, primarily due to the discontinuance of an out-sourced data processing solution. Other noninterest expenses increased \$285,000 and \$72,000 when comparing the nine-month and quarterly periods ended March 31, 2006 and 2005, primarily due to expenses associated with the data processing system conversion such as de-conversion expenses, training costs, computer supplies and licensing fees, and professional fees. Also, contributing to the higher noninterest expense during the nine months and quarter ended March 31, 2006 was a loss of approximately \$66,000 on the sale of the old Cairo branch.

The effective tax rate decreased to 28.3% for the nine months ended March 31, 2006 as compared to 29.3% for the nine months ended March 31, 2005. The effective tax rate decreased to 27.2% for the quarter ended March 31, 2006 as compared to 30.8% for the quarter ended March 31, 2005, the result in both periods of tax-free income representing a higher level of the overall income.

Total assets of the Company were \$299.2 million at March 31, 2006 as compared to \$294.7 million at June 30, 2005, an increase of \$4.5 million, or 1.5%. The most significant growth occurred in net loans, which increased \$18.5 million, or 11.3%, to \$182.8 million at March 31, 2006 as compared to \$164.3 million at June 30, 2005. This growth was primarily funded by investment maturities and repayments. The overall investment portfolio decreased \$13.0 million, or 13.1%, to \$85.9 million at March 31, 2006 as compared to \$98.9 million at June 30, 2005. Premises and equipment amounted to \$9.4 million at March 31, 2006 as compared to \$7.8 million at June 30, 2006, an increase of \$1.6 million, primarily due to the relocation of the Cairo and Coxsackie branches during the nine-month time frame. Planning has also begun on opening more new branches in the near future, including one in the Catskill Commons site currently under development on Catskill's West side.

Total deposits increased \$6.7 million or 2.6%, to \$259.9 million at March 31, 2006 as compared to \$253.2 million at June 30, 2005. The increase in deposits was used to fund the repayment of \$2.5 million of borrowings during October 2005.

Shareholders' equity increased to \$33.6 million at March 31, 2006 from \$32.8 million at June 30, 2005, an increase of \$884,000 or 2.7%. Net income of \$1.8 million was partially offset by dividends paid of \$823,000. Accumulated other comprehensive income decreased \$298,000 as a result of the unrealized losses in the available-for-sale investment portfolio, net of tax. Other changes in equity were the result of activities associated with the various stock based compensation plans of the Company, including the 2000 Stock Option Plan and ESOP Plan.

Headquartered in Catskill, New York, the Company provides full-service community-based banking in its seven branch offices located in Catskill, Cairo, Coxsackie, Greenville, Hudson, Tannersville, and Westerlo, New York. Customers are offered 24-hour services through ATM network systems, an automated telephone banking system and Internet Banking through its web site at <http://www.thebankofgreeneconomy.com>.

This press release contains statements about future events that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Actual results could differ materially from those projected in the forward-looking statements. Factors that might cause such a difference include, but are not limited to, general economic conditions, changes in interest rates, regulatory considerations, competition, technological developments, retention and recruitment of qualified personnel, and market acceptance of the Company's pricing, products and services.
