

UMPQUA HOLDINGS CORP
Form 10-Q
August 06, 2013

United States
Securities and Exchange Commission
Washington, D.C. 20549

FORM 10-Q

☒ Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
for the quarterly period ended: June 30, 2013

or

☐ Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
for the transition period from _____ to _____.

Commission File Number: 001-34624

Umpqua Holdings Corporation

(Exact Name of Registrant as Specified in Its Charter)

OREGON

93-1261319

(State or Other Jurisdiction
of Incorporation or Organization)

(I.R.S. Employer Identification Number)

One SW Columbia Street, Suite 1200
Portland, Oregon 97258

(Address of Principal Executive Offices)(Zip Code)

(503) 727-4100

(Registrant's Telephone Number, Including Area Code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

☒ Yes ☐ No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

☒ Yes ☐ No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer", "accelerated filer", and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

☒ Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

☐ Yes ☒ No

Indicate the number of shares outstanding for each of the issuer's classes of common stock, as of the latest practical date:

Common stock, no par value: 111,904,138 shares outstanding as of July 31, 2013

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1 – Summary of Significant Accounting Policies

The accounting and financial reporting policies of Umpqua Holdings Corporation (referred to in this report as “we”, “our” or “the Company”) conform to accounting principles generally accepted in the United States of America. The accompanying interim consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, Umpqua Bank (“Bank”), and Umpqua Investments, Inc. (“Umpqua Investments”). All material inter-company balances and transactions have been eliminated. The consolidated financial statements have not been audited. A more detailed description of our accounting policies is included in the 2012 Annual Report filed on Form 10-K. These interim condensed consolidated financial statements should be read in conjunction with the financial statements and related notes contained in the 2012 Annual Report filed on Form 10-K.

In preparing these financial statements, the Company has evaluated events and transactions subsequent to June 30, 2013 for potential recognition or disclosure. In management’s opinion, all accounting adjustments necessary to accurately reflect the financial position and results of operations on the accompanying financial statements have been made. These adjustments include normal and recurring accruals considered necessary for a fair and accurate presentation. The results for interim periods are not necessarily indicative of results for the full year or any other interim period. Certain reclassifications of prior period amounts have been made to conform to current classifications.

Note 2 – Business Combinations

On July 1, 2013, the Bank acquired Financial Pacific Holding Corp. (“FPHC”) based in Federal Way, Washington, and its subsidiary, Financial Pacific Leasing, Inc (“FinPac Leasing”), and its subsidiaries, Financial Pacific Funding, Inc (“FPF”), Financial Pacific Funding II, Inc. (“FPF II”) and Financial Pacific Funding III, Inc. (“FPF III”). As part of the same transaction, the Company acquired two related entities, FPC Leasing Corporation (“FPC”) and Financial Pacific Reinsurance Co, Ltd. (“FPR”). FPHC, FinPac Leasing, FPF, FPF II, FPF III, FPC and FPR are collectively referred to herein as FinPac. FinPac provides business-essential commercial equipment leases to various industries throughout the United States and Canada. It originates leases through its brokers, lessors, and direct marketing programs. The results of FinPac's operations are not included in the consolidated financial statements as of June 30, 2013.

The aggregate consideration for the FinPac purchase was \$158.0 million. Of that amount, \$156.1 is distributed in cash, and \$1.9 million was exchanged for restricted shares of the Company stock. The restricted shares were issued pursuant to employment agreements between the Company and certain executives of FinPac, vest over a period of either two or three years, and will be recognized over that time period within the salaries and employee benefits line item on the Consolidated Statements of Income. The structure of the transaction was as follows:

The Bank acquired all of the outstanding stock of FPHC, a shell holding company, which is the sole shareholder of FinPac Leasing, the primary operating subsidiary of FinPac that engages in equipment leasing and financing activities, and is also the sole shareholder of FPF and FPF III, which are bankruptcy-remote entities that serve as lien holder for certain leases. FinPac Leasing is also the sole shareholder of FPF II, which no longer engages in any activities or holds any assets and is anticipated to be wound up in the near future.

The Company acquired all of the outstanding stock of FPC, a Canadian leasing subsidiary, and FPR, a corporation organized in the Turks & Caicos Islands that reinsures a portion of the liability risk of each insurance policy that is issued by a third party insurance company on leased equipment when the lessee fails to meet its contractual obligations under the lease or financing agreement to obtain insurance on the leased equipment.

The acquisition provides diversification, and a scalable platform that is consistent with expansion initiatives that the Bank has completed over the last three years, including growth in the business banking, agricultural lending and home builder lending groups. The transaction leverages excess capital of the Company and deploys excess liquidity into significantly higher yielding assets, provides growth and diversification, and is anticipated to increase profitability.

The assets acquired and liabilities assumed are not included in the consolidated financial statements, including segment reporting, as of June 30, 2013 as the acquisition occurred on July 1, 2013. There is no tax deductible goodwill. Merger related expenses of \$654,000 and \$796,000 for the three and six months ended June 30, 2013 have been incurred in connection with the acquisition of FinPac and are recognized within the merger related expenses line item on the Consolidated Statements of Income.

A summary of the net assets acquired and the estimated fair value adjustments of FinPac are presented below:

On November 14, 2012, the Company acquired all of the assets and liabilities of Circle Bancorp ("Circle"), which has been accounted for under the acquisition method of accounting for cash consideration of \$24.9 million, including the redemption of all common and preferred shares and outstanding warrants and options. The assets and liabilities, both tangible and intangible, were recorded at their estimated fair values as of the acquisition dates, and are subject to change for up to one year after the closing date of the acquisition. This acquisition was consistent with the Company's overall banking expansion strategy and provided further opportunity to enter growth markets in the San Francisco Bay Area of California. Upon completion of the acquisition, all Circle Bank branches operated under the Umpqua Bank name. The acquisition added Circle Bank's network of six branches in Corte Madera, Novato, Petaluma, San Francisco, San Rafael and Santa Rosa, California to Umpqua Bank's network of locations in California, Oregon, Washington and Nevada. The application of the acquisition method of accounting resulted in the recognition of \$12.6 million of goodwill. There is no tax deductible goodwill or other intangibles.

The operations of Circle are included in our operating results from November 15, 2012, and added revenue of \$4.0 million and \$9.1 million, non-interest expense of \$1.2 million and \$3.9 million, and net gain of \$1.6 million and \$2.9 million net of tax, for the three and six months ended June 30, 2013. Circle's results of operations prior to the acquisition are not included in our operating results. Merger-related expenses of \$58,000 and \$949,000 for the three and six months ended June 30, 2013 have been incurred in connection with the acquisition of Circle and recognized within the merger related expenses line item on the Consolidated Statements of Income.

A summary of the net assets acquired and the estimated fair value adjustments of Circle are presented below:

Table of Contents

(in thousands)

	Circle Bank November 14, 2012

Total temporarily impaired securities	\$—	\$—	\$48	\$7	\$48	\$7

The unrealized losses on investments in U.S. Treasury and agency securities were caused by interest rate increases subsequent to the purchase of these securities. The contractual terms of these investments do not permit the issuer to settle the securities at a price less than par. Because the Bank does not intend to sell the securities in this class and it is not likely that the Bank will be required to sell these securities before recovery of their amortized cost basis, which may include holding each security until contractual maturity, the unrealized losses on these investments are not considered other-than-temporarily impaired.

The unrealized losses on obligations of political subdivisions were caused by changes in market interest rates or the widening of market spreads subsequent to the initial purchase of these securities. Management monitors published credit ratings of these securities and no adverse ratings changes have occurred since the date of purchase of obligations of political subdivisions which are in an unrealized loss position as of June 30, 2013. Because the decline in fair value is attributable to changes in interest rates or widening market spreads and not credit quality, and because the Bank does not intend to sell the securities in this class and it is not likely that the Bank will be required to sell these securities before recovery of their amortized cost basis, which may include holding each security until maturity, the unrealized losses on these investments are not considered other-than-temporarily impaired.

All of the available for sale residential mortgage-backed securities and collateralized mortgage obligations portfolio in an unrealized loss position at June 30, 2013 are issued or guaranteed by governmental agencies. The unrealized losses on residential mortgage-backed securities and collateralized mortgage obligations were caused by changes in market interest rates or the widening of market spreads subsequent to the initial purchase of these securities, and not concerns regarding the underlying credit of the issuers or the underlying collateral. It is expected that these securities will not be settled at a price less than the amortized cost of each investment. Because the decline in fair value is attributable to changes in interest rates or widening market spreads and not credit quality, and because the Bank does not intend to sell the securities in this class and it is not likely that the Bank will be required to sell these securities before recovery of their amortized cost basis, which may include holding each security until contractual maturity, the unrealized losses on these investments are not considered other-than-temporarily impaired.

We review investment securities on an ongoing basis for the presence of other-than-temporary impairment (“OTTI”) or permanent impairment, taking into consideration current market conditions, fair value in relationship to cost, extent and nature of the change in fair value, issuer rating changes and trends, whether we intend to sell a security or if it is likely that we will be required to sell the security before recovery of our amortized cost basis of the investment, which may be maturity, and other factors. For debt securities, if we intend to sell the security or it is likely that we will be

required to sell the security before recovering its cost basis, the entire impairment loss would be recognized in earnings as an OTTI. If we do not intend to sell the security and it is not likely that we will be required to sell the security but we do not expect to recover the entire amortized cost basis of the security, only the portion of the impairment loss representing credit losses would be recognized in earnings. The credit loss on a security is measured as the difference between the amortized cost basis and the present value of the cash flows expected to be collected. Projected cash flows are discounted by the original or current effective interest rate depending on the nature of the security being measured for potential OTTI. The remaining impairment related to all other factors, the difference between the present value of the cash flows expected to be collected and fair value, is recognized as a charge to other comprehensive income (“OCI”). Impairment losses related to all other factors are presented as separate categories within OCI. For investment securities held to maturity, this amount is accreted over the remaining life of the debt security prospectively

Table of Contents

based on the amount and timing of future estimated cash flows. The accretion of the OTTI amount recorded in OCI will increase the carrying value of the investment, and would not affect earnings. If there is an indication of additional credit losses the security is re-evaluated according to the procedures described above.

The following table presents the maturities of investment securities at June 30, 2013:

(in thousands)

	Available For Sale		Held To Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
AMOUNTS MATURING IN:				
Three months or less	\$ 16,890	\$ 16,967	\$—	\$—
Over three months through twelve months	242,894	244,765	—	—
After one year through five years	1,347,825	1,353,712	63	66
After five years through ten years	382,779	376,209	23	24
After ten years	91,879	90,098	3,655	3,800
Other investment securities	1,959	2,004	—	—
	\$2,084,226	\$2,083,755	\$3,741	\$3,890

The amortized cost and fair value of collateralized mortgage obligations and mortgage-backed securities are presented by expected average life, rather than contractual maturity, in the preceding table. Expected maturities may differ from contractual maturities because borrowers have the right to prepay underlying loans without prepayment penalties.

The following table presents the gross realized gains and gross realized losses on the sale of securities available for sale for the three and six months ended June 30, 2013 and 2012:

(in thousands)

The following table presents, as of June 30, 2013, investment securities which were pledged to secure borrowings, public deposits, and repurchase agreements as permitted or required by law:

19

Table of Contents

(in thousands)

	Amortized Cost	Fair Value
To Federal Home Loan Bank to secure borrowings	\$28,945	\$29,565
To state and local governments to secure public deposits	803,949	804,964
Other securities pledged principally to secure repurchase agreements	256,868	254,948
Total pledged securities	\$1,089,762	\$1,089,477

Note 4 – Non-Covered Loans and Leases

The following table presents the major types of non-covered loans recorded in the balance sheets as of June 30, 2013 and December 31, 2012:

(in thousands)

	June 30, 2013	December 31, 2012
Commercial real estate		
Term & multifamily	\$3,930,403	\$3,938,443
Construction & development	226,924	202,118
Residential development	66,750	57,209
Commercial		
Term	770,083	797,802
LOC & other	994,659	923,328
Residential		
Mortgage	508,815	476,579
Home equity loans & lines	258,240	260,797
Consumer & other	42,016	37,327
Total	6,797,890	6,693,603
Deferred loan fees, net	(10,773)	(12,523)
Total	\$6,787,117	\$6,681,080

As of June 30, 2013, loans totaling \$5.4 billion were pledged to secure borrowings and available lines of credit.

At June 30, 2013, non-covered loans accounted for under ASC 310-30 were \$23.7 million. At December 31, 2012, non-covered accounted for under ASC 310-30 were \$19.3 million.

Note 5 – Allowance for Non-Covered Loan Loss and Credit Quality

The Bank has a management Allowance for Loan and Lease Losses (“ALLL”) Committee, which is responsible for, among other things, regularly reviewing the ALLL methodology, including loss factors, and ensuring that it is designed and applied in accordance with generally accepted accounting principles. The ALLL Committee reviews and approves loans and leases recommended for impaired status. The ALLL Committee also approves removing loans and leases from impaired status. The Bank's Audit and Compliance Committee provides board oversight of the ALLL process and reviews and approves the ALLL methodology on a quarterly basis.

Our methodology for assessing the appropriateness of the ALLL consists of three key elements, which include 1) the formula allowance; 2) the specific allowance; and 3) the unallocated allowance. By incorporating these factors into a single allowance requirement analysis, all risk-based activities within the loan portfolio are simultaneously considered.

Formula Allowance

The Bank performs regular credit reviews of the loan and lease portfolio to determine the credit quality and adherence to underwriting standards. When loans and leases are originated, they are assigned a risk rating that is reassessed periodically

Table of Contents

during the term of the loan through the credit review process. The Bank's risk rating methodology assigns risk ratings ranging from 1 to 10, where a higher rating represents higher risk. The 10 risk rating categories are a primary factor in determining an appropriate amount for the formula allowance.

The formula allowance is calculated by applying risk factors to various segments of pools of outstanding loans. Risk factors are assigned to each portfolio segment based on management's evaluation of the losses inherent within each segment. Segments or regions with greater risk of loss will therefore be assigned a higher risk factor.

Base risk – The portfolio is segmented into loan categories, and these categories are assigned a Base Risk factor based on an evaluation of the loss inherent within each segment.

Extra risk – Additional risk factors provide for an additional allocation of ALLL based on the loan risk rating system and loan delinquency, and reflect the increased level of inherent losses associated with more adversely classified loans.

Changes to risk factors – Risk factors are assigned at origination and may be changed periodically based on management's evaluation of the following factors: loss experience; changes in the level of non-performing loans; regulatory exam results; changes in the level of adversely classified loans (positive or negative); improvement or deterioration in local economic conditions; and any other factors deemed relevant.

Specific Allowance

Regular credit reviews of the portfolio also identify loans that are considered potentially impaired. Potentially impaired loans are referred to the ALLL Committee which reviews and approves designated loans as impaired. A loan is considered impaired, when based on current information and events, we determine that we will probably not be able to collect all amounts due according to the loan contract, including scheduled interest payments. When we identify a loan as impaired, we measure the impairment using discounted cash flows, except when the sole remaining source of the repayment for the loan is the liquidation of the collateral. In these cases, we use the current fair value of the collateral, less selling costs, instead of discounted cash flows. If we determine that the value of the impaired loan is less than the recorded investment in the loan, we either recognize an impairment reserve as a specific allowance to be provided for in the allowance for loan and lease losses or charge-off the impaired balance on collateral dependent loans if it is determined that such amount represents a confirmed loss. Loans determined to be impaired with a specific allowance are excluded from the formula allowance so as not to double-count the loss exposure. The non-accrual impaired loans as of period end have already been partially charged off to their estimated net realizable value, and are expected to be resolved over the coming quarters with no additional material loss, absent further decline in market prices.

The combination of the formula allowance component and the specific allowance component represents the allocated allowance for loan and lease losses.

Unallocated Allowance

The Bank may also maintain an unallocated allowance amount to provide for other credit losses inherent in a loan and lease portfolio that may not have been contemplated in the credit loss factors. This unallocated amount generally comprises less than 5% of the allowance, but may be maintained at higher levels during times of deteriorating economic conditions characterized by falling real estate values. The unallocated amount is reviewed quarterly with consideration of factors including, but not limited to:

- Changes in lending policies and procedures, including changes in underwriting standards and collection, charge-off, and recovery practices not considered elsewhere in estimating credit losses;
- Changes in international, national, regional, and local economic and business conditions and developments that affect the collectability of the portfolio, including the condition of various market segments;

- Changes in the nature and volume of the portfolio and in the terms of loans;
- Changes in the experience and ability of lending management and other relevant staff;
- Changes in the volume and severity of past due loans, the volume of nonaccrual loans, and the volume and severity of adversely classified or graded loans;
- Changes in the quality of the institution's loan review system;
- Changes in the value of underlying collateral for collateral-depending loans;
- The existence and effect of any concentrations of credit, and changes in the level of such concentrations; and
- The effect of other external factors such as competition and legal and regulatory requirements on the level of estimated credit losses in the institutions' existing portfolio.

These factors are evaluated through a management survey of the Chief Credit Officer, Chief Lending Officers, Special Assets Manager, and Credit Review Manager. The survey requests responses to evaluate current changes in the nine qualitative

Table of Contents

factors. This information is then incorporated into our understanding of the reasonableness of the formula factors and our evaluation of the unallocated portion of the ALLL.

Management believes that the ALLL was adequate as of June 30, 2013. There is, however, no assurance that future loan losses will not exceed the levels provided for in the ALLL and could possibly result in additional charges to the provision for loan and lease losses. In addition, bank regulatory authorities, as part of their periodic examination of the Bank, may require additional charges to the provision for loan and lease losses in future periods if warranted as a result of their review. Approximately 77% of our loan portfolio is secured by real estate, and a significant decline in real estate market values may require an increase in the allowance for loan and lease losses. The recent U.S. recession, the housing market downturn, and declining real estate values in our markets have negatively impacted aspects of our loan portfolio. A continued deterioration in our markets may adversely affect our loan portfolio and may lead to additional charges to the provision for loan and lease losses.

The reserve for unfunded commitments (“RUC”) is established to absorb inherent losses associated with our commitment to lend funds, such as with a letter or line of credit. The adequacy of the ALLL and RUC are monitored on a regular basis and are based on management's evaluation of numerous factors. For each portfolio segment, these factors include:

- The quality of the current loan portfolio;
- The trend in the loan portfolio's risk ratings;
- Current economic conditions;
- Loan concentrations;
- Loan growth rates;
- Past-due and non-performing trends;
- Evaluation of specific loss estimates for all significant problem loans;
- Historical short (one year), medium (three year), and long-term charge-off rates;
- Recovery experience; and
- Peer comparison loss rates.

There have been no significant changes to the Bank's methodology or policies in the periods presented.

Activity in the Non-Covered Allowance for Loan and Lease Losses

The following table summarizes activity related to the allowance for non-covered loan and lease losses by non-covered loan portfolio segment for three and six months ended June 30, 2013 and 2012, respectively:

(in thousands)

Asset Quality and Non-Performing Loans

We manage asset quality and control credit risk through diversification of the non-covered loan portfolio and the application of policies designed to promote sound underwriting and loan monitoring practices. The Bank's Credit Quality Group is charged with monitoring asset quality, establishing credit policies and procedures and enforcing the consistent application of these policies and procedures across the Bank. Reviews of non-performing, past due non-covered loans and larger credits, designed to identify potential charges to the allowance for loan and lease losses, and to determine the adequacy of the allowance, are conducted on an ongoing basis. These reviews consider such factors as the financial strength of borrowers, the value of the applicable collateral, loan loss experience, estimated loan losses, growth in the loan portfolio, prevailing economic conditions and other factors.

A loan is considered impaired when, based on current information and events, we determine it is probable that we will not be able to collect all amounts due according to the loan contract, including scheduled interest payments.

Generally, when non-covered loans are identified as impaired, they are moved to the Special Assets Division. When we identify a loan as impaired, we measure the loan for potential impairment using discounted cash flows, except when the sole remaining source of the repayment for the loan is the liquidation of the collateral. In these cases, we will use the current fair value of collateral, less selling costs. The starting point for determining the fair value of collateral is through obtaining external appraisals. Generally, external appraisals are updated every six to nine months. We obtain appraisals from a pre-approved list of independent, third party, local appraisal firms. Approval and addition to the list is based on experience, reputation, character, consistency and knowledge of the respective real estate market. At a minimum, it is ascertained that the appraiser is: (a) currently licensed in the state in which the property is located, (b) is experienced in the appraisal of properties similar to the property being appraised, (c) is actively engaged in the appraisal work, (d) has knowledge of current real estate market conditions and financing trends, (e) is reputable, and (f) is not on Freddie Mac's or the Bank's Exclusionary List of appraisers and brokers. In certain cases appraisals will be reviewed by our Real Estate Valuation Services Group to ensure the quality of the appraisal and the expertise and independence of the appraiser. Upon receipt and review, an external appraisal is

utilized to measure a loan for potential impairment. Our impairment analysis documents the date of the appraisal used in the analysis, whether the officer preparing the report deems it current, and, if not, allows for internal valuation adjustments with justification. Typical justified adjustments might include discounts for continued market deterioration subsequent to appraisal date, adjustments for the release of collateral contemplated in the appraisal, or the value of other collateral or consideration not contemplated in the appraisal. An appraisal over one year old in most cases will be considered stale dated and an updated or new appraisal will be required. Any adjustments from appraised value to net realizable value are detailed and justified in the impairment analysis, which is reviewed and approved by senior credit quality officers and the Bank's ALLL Committee. Although an external

Table of Contents

appraisal is the primary source to value collateral dependent loans, we may also utilize values obtained through purchase and sale agreements, negotiated short sales, broker price opinions, or the sales price of the note. These alternative sources of value are used only if deemed to be more representative of value based on updated information regarding collateral resolution. Impairment analyses are updated, reviewed and approved on a quarterly basis at or near the end of each reporting period. Appraisals or other alternative sources of value received subsequent to the reporting period, but prior to our filing of periodic reports, are considered and evaluated to ensure our periodic filings are materially correct and not misleading. Based on these processes, we do not believe there are significant time lapses for the recognition of additional loan loss provisions or charge-offs from the date they become known.

Loans are classified as non-accrual when collection of principal or interest is doubtful—generally if they are past due as to maturity or payment of principal or interest by 90 days or more—unless such loans are well-secured and in the process of collection. Additionally, all loans that are impaired are considered for non-accrual status. Loans placed on non-accrual will typically remain on non-accrual status until all principal and interest payments are brought current and the prospects for future payments in accordance with the loan agreement appear relatively certain.

Loans are reported as restructured when the Bank grants a concession(s) to a borrower experiencing financial difficulties that it would not otherwise consider. Examples of such concessions include a reduction in the loan rate, forgiveness of principal or accrued interest, extending the maturity date or providing a lower interest rate than would be normally available for a transaction of similar risk. As a result of these concessions, restructured loans are impaired as the Bank will not collect all amounts due, both principal and interest, in accordance with the terms of the original loan agreement. Impairment reserves on non-collateral dependent restructured loans are measured by comparing the present value of expected future cash flows on the restructured loans discounted at the interest rate of the original loan agreement to the loan's carrying value. These impairment reserves are recognized as a specific component to be provided for in the allowance for loan and lease losses.

Loans are reported as past due when installment payments, interest payments, or maturity payments are past due based on contractual terms. All loans determined to be impaired are individually assessed for impairment except for impaired consumer loans which are collectively evaluated for impairment in accordance with FASB ASC 450, Contingencies ("ASC 450"). The specific factors considered in determining that a loan is impaired include borrower financial capacity, current economic, business and market conditions, collection efforts, collateral position and other factors deemed relevant. Generally, impaired loans are placed on non-accrual status and all cash receipts are applied to the principal balance. Continuation of accrual status and recognition of interest income is generally limited to performing restructured loans.

The Bank has written down impaired, non-accrual loans as of June 30, 2013 to their estimated net realizable value, generally based on disposition value, and expects resolution with no additional material loss, absent further decline in market prices.

Loans with no related allowance reported generally represent non-accrual loans. The Bank recognizes the charge-off of impairment reserves on impaired loans in the period it arises for collateral dependent loans. Therefore, the non-accrual loans as of June 30, 2013 have already been written-down to their estimated net realizable value, based on disposition value, and are expected to be resolved with no additional material loss, absent further decline in market prices. The valuation allowance on impaired loans primarily represents the impairment reserves on performing restructured loans, and is measured by comparing the present value of expected future cash flows on the restructured loans discounted at the interest rate of the original loan agreement to the loan's carrying value.

At June 30, 2013 and December 31, 2012, impaired loans of \$73.9 million and \$70.6 million were classified as accruing restructured loans, respectively. The restructurings were granted in response to borrower financial difficulty, and generally provide for a temporary modification of loan repayment terms. The restructured loans on accrual status represent the only impaired loans accruing interest at each respective date. In order for a restructured loan to be considered for accrual status, the loan's collateral coverage generally will be greater than or equal to 100% of the loan

balance, the loan is current on payments,

29

Table of Contents

and the borrower must either prefund an interest reserve or demonstrate the ability to make payments from a verified source of cash flow. The Bank had no obligation to lend additional funds on the restructured loans as of June 30, 2013.

The following table summarizes our average recorded investment and interest income recognized on impaired non-covered loans by loan class for the three and six months ended June 30, 2013 and 2012:

The impaired loans for which these interest income amounts were recognized primarily relate to accruing restructured loans.

Non-Covered Credit Quality Indicators

As previously noted, the Bank's risk rating methodology assigns risk ratings ranging from 1 to 10, where a higher rating represents higher risk. The Bank differentiates its lending portfolios into homogeneous loans (generally consumer loans) and non-homogeneous loans (generally all non-consumer loans). The 10 risk rating categories can be generally described by the following groupings for non-homogeneous loans:

Minimal Risk—A minimal risk loan, risk rated 1, is to a borrower of the highest quality. The borrower has an unquestioned ability to produce consistent profits and service all obligations and can absorb severe market disturbances with little or no difficulty.

Table of Contents

Low Risk—A low risk loan, risk rated 2, is similar in characteristics to a minimal risk loan. Margins may be smaller or protective elements may be subject to greater fluctuation. The borrower will have a strong demonstrated ability to produce profits, provide ample debt service coverage and to absorb market disturbances.

Modest Risk—A modest risk loan, risk rated 3, is a desirable loan with excellent sources of repayment and no currently identifiable risk associated with collection. The borrower exhibits a very strong capacity to repay the credit in accordance with the repayment agreement. The borrower may be susceptible to economic cycles, but will have reserves to weather these cycles.

Average Risk—An average risk loan, risk rated 4, is an attractive loan with sound sources of repayment and no material collection or repayment weakness evident. The borrower has an acceptable capacity to pay in accordance with the agreement. The borrower is susceptible to economic cycles and more efficient competition, but should have modest reserves sufficient to survive all but the most severe downturns or major setbacks.

Acceptable Risk—An acceptable risk loan, risk rated 5, is a loan with lower than average, but still acceptable credit risk. These borrowers may have higher leverage, less certain but viable repayment sources, have limited financial reserves and may possess weaknesses that can be adequately mitigated through collateral, structural or credit enhancement. The borrower is susceptible to economic cycles and is less resilient to negative market forces or financial events. Reserves may be insufficient to survive a modest downturn.

Watch—A watch loan, risk rated 6, is still pass-rated, but represents the lowest level of acceptable risk due to an emerging risk element or declining performance trend. Watch ratings are expected to be temporary, with issues resolved or manifested to the extent that a higher or lower rating would be appropriate. The borrower should have a plausible plan, with reasonable certainty of success, to correct the problems in a short period of time. Borrowers rated Watch are characterized by elements of uncertainty, such as:

- Borrower may be experiencing declining operating trends, strained cash flows or less-than anticipated performance.
- Cash flow should still be adequate to cover debt service, and the negative trends should be identified as being of a short-term or temporary nature.

- The borrower may have experienced a minor, unexpected covenant violation.

- Companies who may be experiencing tight working capital or have a cash cushion deficiency.

A loan may also be a watch if financial information is late, there is a documentation deficiency, the borrower has experienced unexpected management turnover, or if they face industry issues that, when combined with performance factors create uncertainty in their future ability to perform.

- Delinquent payments, increasing and material overdraft activity, request for bulge and/or out-of-formula advances may be an indicator of inadequate working capital and may suggest a lower rating.

- Failure of the intended repayment source to materialize as expected, or renewal of a loan (other than cash/marketable security secured or lines of credit) without reduction are possible indicators of a watch or worse risk rating.

Special Mention—A special mention loan, risk rated 7, has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset or the institutions credit position at some future date. They contain unfavorable characteristics and are generally undesirable. Loans in this category are currently protected but are potentially weak and constitute an undue and unwarranted credit risk, but not to the point of a substandard classification. A special mention loan has potential weaknesses, which if not checked or corrected, weaken the asset or inadequately protect the Bank's position at some future date. Such weaknesses include:

- Performance is poor or significantly less than expected. There may be a temporary debt-servicing deficiency or inadequate working capital as evidenced by a cash cushion deficiency, but not to the extent that repayment is compromised. Material violation of financial covenants is common.

Loans with unresolved material issues that significantly cloud the debt service outlook, even though a debt servicing deficiency does not currently exist.

Modest underperformance or deviation from plan for real estate loans where absorption of rental/sales units is necessary to properly service the debt as structured. Depth of support for interest carry provided by owner/guarantors may mitigate and provide for improved rating.

This rating may be assigned when a loan officer is unable to supervise the credit properly, an inadequate loan agreement, an inability to control collateral, failure to obtain proper documentation, or any other deviation from prudent lending practices.

Unlike a substandard credit, there should be a reasonable expectation that these temporary issues will be corrected within the normal course of business, rather than liquidation of assets, and in a reasonable period of time.

Table of Contents

Substandard—A substandard asset, risk rated 8, is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Assets so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. Loss potential, while existing in the aggregate amount of substandard assets, does not have to exist in individual assets classified substandard. Loans are classified as substandard when they have unsatisfactory characteristics causing unacceptable levels of risk. A substandard loan normally has one or more well-defined weaknesses that could jeopardize repayment of the debt. The likely need to liquidate assets to correct the problem, rather than repayment from successful operations is the key distinction between special mention and substandard. The following are examples of well-defined weaknesses:

- Cash flow deficiencies or trends are of a magnitude to jeopardize current and future payments with no immediate relief. A loss is not presently expected, however the outlook is sufficiently uncertain to preclude ruling out the possibility.
- The borrower has been unable to adjust to prolonged and unfavorable industry or economic trends.
- Material underperformance or deviation from plan for real estate loans where absorption of rental/sales units is necessary to properly service the debt and risk is not mitigated by willingness and capacity of owner/guarantor to support interest payments.
- Management character or honesty has become suspect. This includes instances where the borrower has become uncooperative.
- Due to unprofitable or unsuccessful business operations, some form of restructuring of the business, including liquidation of assets, has become the primary source of loan repayment. Cash flow has deteriorated, or been diverted, to the point that sale of collateral is now the Bank's primary source of repayment (unless this was the original source of repayment). If the collateral is under the Bank's control and is cash or other liquid, highly marketable securities and properly margined, then a more appropriate rating might be special mention or watch.
- The borrower is bankrupt, or for any other reason, future repayment is dependent on court action.
- There is material, uncorrectable faulty documentation or materially suspect financial information.

Doubtful—Loans classified as doubtful, risk rated 9, have all the weaknesses inherent in one classified substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The possibility of loss is extremely high, but because of certain important and reasonably specific pending factors, which may work towards strengthening of the asset, classification as a loss (and immediate charge-off) is deferred until more exact status may be determined.

Pending factors include proposed merger, acquisition, liquidation procedures, capital injection, and perfection of liens on additional collateral and refinancing plans. In certain circumstances, a doubtful rating will be temporary, while the Bank is awaiting an updated collateral valuation. In these cases, once the collateral is valued and appropriate margin applied, the remaining un-collateralized portion will be charged off. The remaining balance, properly margined, may then be upgraded to substandard, however must remain on non-accrual.

Loss—Loans classified as loss, risk rated 10, are considered un-collectible and of such little value that the continuance as an active Bank asset is not warranted. This rating does not mean that the loan has no recovery or salvage value, but rather that the loan should be charged off now, even though partial or full recovery may be possible in the future.

Impaired—Loans are classified as impaired when, based on current information and events, it is probable that the Bank will be unable to collect the scheduled payments of principal and interest when due, in accordance with the terms of the original loan agreement, without unreasonable delay. This generally includes all loans classified as non-accrual and troubled debt restructurings. Impaired loans are risk rated for internal and regulatory rating purposes, but presented separately for clarification.

Homogeneous loans are not risk rated until they are greater than 30 days past due, and risk rating is based primarily on the past due status of the loan. The risk rating categories can be generally described by the following groupings for

commercial and commercial real estate homogeneous loans:

Special Mention—A homogeneous special mention loan, risk rated 7, is 30-59 days past due from the required payment date at month-end.

Substandard—A homogeneous substandard loan, risk rated 8, is 60-119 days past due from the required payment date at month-end.

Doubtful—A homogeneous doubtful loan, risk rated 9, is 120-149 days past due from the required payment date at month-end.

Table of Contents

Loss—A homogeneous loss loan, risk rated 10, is 150 days and more past due from the required payment date. These loans are generally charged-off in the month in which the 150 day time period elapses.

The risk rating categories can be generally described by the following groupings for residential and consumer and other homogeneous loans:

Special Mention—A homogeneous retail special mention loan, risk rated 7, is 30-89 days past due from the required payment date at month-end.

Substandard—A homogeneous retail substandard loan, risk rated 8, is an open-end loan 90-180 days past due from the required payment date at month-end or a closed-end loan 90-120 days past due from the required payment date at month-end.

Loss—A homogeneous retail loss loan, risk rated 10, is a closed-end loan that becomes past due 120 cumulative days or an open-end retail loan that becomes past due 180 cumulative days from the contractual due date. These loans are generally charged-off in the month in which the 120 or 180 day period elapses.

The following table summarizes our internal risk rating by loan class for the non-covered loan portfolio as of June 30, 2013 and December 31, 2012:

Total							\$6,681,080

The percentage of non-covered impaired loans classified as watch, special mention, and substandard was 9.9%, 1.9%, and 88.2%, respectively, as of June 30, 2013. The percentage of non-covered impaired loans classified as watch, special mention, and substandard was 9.0%, 1.7%, and 89.3%, respectively, as of December 31, 2012.

Troubled Debt Restructurings

At June 30, 2013 and December 31, 2012, impaired loans of \$73.9 million and \$70.6 million were classified as accruing restructured loans, respectively. The restructurings were granted in response to borrower financial difficulty, and generally provide for a temporary modification of loan repayment terms. The restructured loans on accrual status represent the only impaired loans accruing interest. In order for a restructured loan to be considered for accrual status, the loan's collateral coverage generally will be greater than or equal to 100% of the loan balance, the loan is current on payments, and the borrower must either prefund an interest reserve or demonstrate the ability to make payments from a verified source of cash flow. Impaired restructured loans carry a specific allowance and the allowance on impaired restructured loans is calculated consistently across the portfolios.

There were no available commitments for troubled debt restructurings outstanding as of June 30, 2013 and none as of December 31, 2012.

The following tables present troubled debt restructurings by accrual versus non-accrual status and by loan class as of June 30, 2013 and December 31, 2012:

The Bank's policy is that loans placed on non-accrual will typically remain on non-accrual status until all principal and interest payments are brought current and the prospect for future payment in accordance with the loan agreement appears relatively certain. The Bank's policy generally refers to six months of payment performance as sufficient to warrant a return to accrual status.

The types of modifications offered can generally be described in the following categories:

Rate Modification—A modification in which the interest rate is modified.

Term Modification —A modification in which the maturity date, timing of payments, or frequency of payments is changed.

Interest Only Modification—A modification in which the loan is converted to interest only payments for a period of time.

Payment Modification—A modification in which the payment amount is changed, other than an interest only modification described above.

Table of Contents

Combination Modification—Any other type of modification, including the use of multiple types of modifications.

Note 6 – Covered Assets and Indemnification Asset

Covered Loans

Loans acquired in a FDIC-assisted acquisition that are subject to a loss-share agreement are referred to as “covered loans” and reported separately in our statements of financial condition. Covered loans are reported exclusive of the cash flow reimbursements expected from the FDIC.

Acquired loans are valued as of acquisition date in accordance with ASC 805. Loans purchased with evidence of credit deterioration since origination for which it is probable that all contractually required payments will not be collected are accounted for under FASB ASC 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality (“ASC 310-30”). Because of the significant fair value discounts associated with the acquired portfolios, the concentration of real estate related loans (to finance or secured by real estate collateral) and the decline in real estate values in the regions serviced, and after considering the underwriting standards of the acquired originating bank, the Company elected to account for all acquired loans under ASC 310-30. Under ASC 805 and ASC 310-30, loans are to be recorded at fair value at acquisition date, factoring in credit losses expected to be incurred over the life of the loan. Accordingly, an allowance for loan losses is not carried over or recorded as of the acquisition date. We have aggregated the acquired loans into various loan pools based on multiple layers of common risk characteristics for the purpose of determining their respective fair values as of their acquisition dates, and for applying the subsequent recognition and measurement provisions for income accretion and impairment testing.

The covered loans acquired are, and will continue to be, subject to the Company’s internal and external credit review and monitoring. To the extent there is experienced or projected credit deterioration on the acquired loan pools subsequent to amounts estimated at the previous remeasurement date, this deterioration will be measured, and a provision for credit losses will be charged to earnings. Additionally, provision for credit losses will be recorded on advances on covered loans subsequent to acquisition date in a manner consistent with the allowance for non-covered loan and lease losses. These provisions will be mostly offset by an increase to the FDIC indemnification asset through

the life of the loss sharing agreement, which is recognized in non-interest income.

Covered Loans

The following table presents the major types of covered loans as of June 30, 2013 and December 31, 2012:

Allowance for covered loans				(18,275)
Total				\$477,078

The outstanding contractual unpaid principal balance, excluding purchase accounting adjustments, at June 30, 2013 was \$115.7 million, \$258.3 million and \$165.9 million, for Evergreen, Rainier, and Nevada Security, respectively, as compared to \$137.7 million, \$297.0 million and \$198.4 million, for Evergreen, Rainier, and Nevada Security, respectively, at December 31, 2012.

In estimating the fair value of the covered loans at the acquisition date, we (a) calculated the contractual amount and timing of undiscounted principal and interest payments and (b) estimated the amount and timing of undiscounted expected principal and interest payments. The difference between these two amounts represents the nonaccretable difference.

On the acquisition date, the amount by which the undiscounted expected cash flows exceed the estimated fair value of the acquired loans is the “accretable yield”. The accretable yield is then measured at each financial reporting date and represents the difference between the remaining undiscounted expected cash flows and the current carrying value of

the loans.

The following table presents the changes in the accretable yield for the three and six months ended June 30, 2013 and 2012 for each respective acquired loan portfolio:

Allowance for covered loans and leases:					
Loans acquired with deteriorated credit quality (1)	\$6,926	\$3,936	\$619	\$261	\$11,742
Collectively evaluated for impairment (2)	535	611	45	44	1,235
Total	\$7,461	\$4,547	\$664	\$305	\$12,977
Covered loans and leases:					
Loans acquired with deteriorated credit quality (1)	\$449,784	\$34,690	\$51,243	\$4,104	\$539,821
Collectively evaluated for impairment (2)	2,905	16,658	4,886	2,670	27,119
Total	\$452,689	\$51,348	\$56,129	\$6,774	\$566,940

(1) In accordance with ASC 310-30, the valuation allowance is netted against the carrying value of the covered loan and lease balance.

(2) The allowance on covered loan and lease losses includes an allowance on covered loan advances on acquired loans subsequent to acquisition.

The valuation allowance on covered loans was reduced by recaptured provision of \$4.1 million and \$5.7 million for the three and six months ended June 30, 2013, and \$2.3 million and \$3.5 million for the three and six months ended June 30, 2012.

Covered Credit Quality Indicators

Covered loans are risk rated in a manner consistent with non-covered loans. As previously noted, the Bank's risk rating methodology assigns risk ratings ranging from 1 to 10, where a higher rating represents higher risk. The 10 risk rating groupings are described fully in Note 5. The following table includes loans acquired with deteriorated credit quality accounted for under ASC 310-30, and advances made subsequent to acquisition on covered loans.

Table of Contents

The following table summarizes our internal risk rating grouping by covered loans, net as of June 30, 2013 and December 31, 2012:

Covered Other Real Estate Owned

All other real estate owned (“OREO”) acquired in FDIC-assisted acquisitions that are subject to a FDIC loss-share agreement are referred to as “covered OREO” and reported separately in our statements of financial position. Covered OREO is reported exclusive of expected reimbursement cash flows from the FDIC. Foreclosed covered loan collateral is transferred into covered OREO at the collateral’s net realizable value, less selling costs.

Covered OREO was initially recorded at its estimated fair value on the acquisition date based on similar market comparable valuations less estimated selling costs. Subsequent to acquisition, loan collateral transferred to OREO is at its net realizable value. Any subsequent valuation adjustments due to declines in fair value will be charged to non-interest expense, and will be mostly offset by non-interest income representing the corresponding increase to the FDIC indemnification asset for the offsetting loss reimbursement amount. Any recoveries of previous valuation

adjustments will be credited to non-interest expense with a corresponding charge to non-interest income for the portion of the recovery that is due to the FDIC.

Table of Contents

The following table summarizes the activity related to the covered OREO for the three and six months ended June 30, 2013 and 2012:

(in thousands)

	Three months ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Balance, beginning of period	\$7,896	\$12,787	\$10,374	\$19,491
Additions to covered OREO	812	562	2,554	1,346
Dispositions of covered OREO	(5,098)	(3,718)	(8,765)	(8,300)
Valuation adjustments in the period	(126)	(440)	(679)	(3,346)
Balance, end of period	\$3,484	\$9,191	\$3,484	\$9,191

FDIC Indemnification Asset

The Company has elected to account for amounts receivable under the loss-share agreement as an indemnification asset in accordance with FASB ASC 805, Business Combinations. The FDIC indemnification asset is initially recorded at fair value, based on the discounted value of expected future cash flows under the loss-share agreement. The difference between the present value and the undiscounted cash flows the Company expects to collect from the FDIC will be accreted into non-interest income over the life of the FDIC indemnification asset.

Subsequent to initial recognition, the FDIC indemnification asset is reviewed quarterly and adjusted for any changes in expected cash flows based on recent performance and expectations for future performance of the covered assets. These adjustments are measured on the same basis as the related covered loans and covered other real estate owned. Any increases in cash flow of the covered assets over those expected will reduce the FDIC indemnification asset and any decreases in cash flow of the covered assets under those expected will increase the FDIC indemnification asset. Increases and decreases to the FDIC indemnification asset are recorded as adjustments to non-interest income. The resulting carrying value of the indemnification asset represents the amounts recoverable from the FDIC for future expected losses, and the amounts due from the FDIC for claims related to covered losses the Company have incurred less amounts due back to the FDIC relating to shared recoveries.

The following table summarizes the activity related to the FDIC indemnification asset for each respective acquired portfolio for the three and six months ended June 30, 2013 and 2012:

(in thousands)

	Three months ended June 30, 2013

Note 7 – Mortgage Servicing Rights

The following table presents the changes in the Company's mortgage servicing rights ("MSR") for the three and six months ended June 30, 2013 and 2012:

(in thousands)

	Three months ended		Six months ended	
	June 30, 2013	2012	June 30, 2013	2012
Balance, beginning of period	\$32,097	\$20,210	\$27,428	\$18,184
Additions for new mortgage servicing rights capitalized	4,708	3,333	11,110	6,281
Changes in fair value:				
Due to changes in model inputs or assumptions ⁽¹⁾	1,858	(969)	) 333	(1,063)
Other ⁽²⁾	(471)	) (61)	) (679)	) (889)
Balance, end of period	\$38,192	\$22,513	\$38,192	\$22,513

(1) Principally reflects changes in discount rates and prepayment speed assumptions, which are primarily affected by changes in interest rates.

(2) Represents changes due to collection/realization of expected cash flows over time.

Information related to our serviced loan portfolio as of June 30, 2013 and December 31, 2012 is as follows:

(dollars in thousands)

	June 30, 2013	December 31, 2012
Balance of loans serviced for others	\$3,911,273	\$3,162,080
MSR as a percentage of serviced loans	0.98	% 0.87

The amount of contractually specified servicing fees, late fees and ancillary fees earned, recorded in mortgage banking revenue on the Condensed Consolidated Statements of Income, was \$2.5 million and \$4.8 million for the three and six months ended June 30, 2013, as compared to \$1.5 million and \$2.9 million for the three and six months ended June 30, 2012.

Table of Contents

Key assumptions used in measuring the fair value of MSR as of June 30, 2013 and December 31, 2012 are as follows:

	June 30, 2013		December 31, 2012	
Constant prepayment rate	18.24	%	21.39	%
Discount rate	8.68	%	8.65	%
Weighted average life (years)	4.9		4.7	

A sensitivity analysis of the current fair value to changes in discount and prepayment speed assumptions as of June 30, 2013 and December 31, 2012 is as follows:

	June 30, 2013		December 31, 2012	
Constant prepayment rate				
Effect on fair value of a 10% adverse change	\$(1,858	)	\$(1,445	)
Effect on fair value of a 20% adverse change	\$(3,544	)	\$(2,754	)
Discount rate				
Effect on fair value of a 100 basis point adverse change	\$(1,185	)	\$(889	)
Effect on fair value of a 200 basis point adverse change	\$(2,300	)	\$(1,720	)

The sensitivity analysis presents the hypothetical effect on fair value of the MSR. The effect of such hypothetical change in assumptions generally cannot be extrapolated because the relationship of the change in an assumption to the change in fair value is not linear. Additionally, in the analysis, the impact of an adverse change in one assumption is calculated independent of any impact on other assumptions. In reality, changes in one assumption may change another assumption.

Note 8 – Non-covered Other Real Estate Owned, Net

The following table presents the changes in non-covered other real estate owned (“OREO”) for the three and six months ended June 30, 2013 and 2012:

(in thousands)

	Three months ended		Six months ended	
	June 30,		June 30,	
	2013	2012	2013	2012

		96,037	102,060				
Total		\$230,061	\$188,219				

Includes purchase accounting adjustments, net of accumulated amortization, for junior subordinated

(1) debentures assumed in connection with previous mergers as well as fair value adjustments related to trusts recorded at fair value.

(2) Contractual interest rate of junior subordinated debentures.

(3) Effective interest rate based upon the carrying value as of June 30, 2013.

- (4) Rate based on LIBOR plus 3.35%, adjusted quarterly.
- (5) Rate based on LIBOR plus 3.45%, adjusted quarterly.
- (6) Rate based on LIBOR plus 2.85%, adjusted quarterly.
- (7) Rate based on LIBOR plus 1.35%, adjusted quarterly.
- (8) Rate based on LIBOR plus 2.75%, adjusted quarterly.
- (9) Rate based on LIBOR plus 3.60%, adjusted quarterly.
- (10) Rate based on LIBOR plus 2.95%, adjusted quarterly.
- (11) Rate based on LIBOR plus 3.58%, adjusted quarterly.
- (12) Rate based on LIBOR plus 2.90%, adjusted quarterly.

The Trusts are reflected as junior subordinated debentures in the Condensed Consolidated Balance Sheets. The common stock issued by the Trusts is recorded in other assets in the Condensed Consolidated Balance Sheets, and totaled \$7.1 million at June 30, 2013 and \$7.2 million at December 31, 2012.

On January 1, 2007, the Company selected the fair value measurement option for certain pre-existing junior subordinated debentures (the Umpqua Statutory Trusts). The remaining junior subordinated debentures as of the adoption date were acquired through business combinations and were measured at fair value at the time of acquisition. In 2007, the Company issued two series of trust preferred securities and elected to measure each instrument at fair value. Accounting for the junior subordinated

Table of Contents

debentures originally issued by the Company at fair value enables us to more closely align our financial performance with the economic value of those liabilities. Additionally, we believe it improves our ability to manage the market and interest rate risks associated with the junior subordinated debentures. The junior subordinated debentures measured at fair value and amortized cost are presented as separate line items on the balance sheet. The ending carrying (fair) value of the junior subordinated debentures measured at fair value represents the estimated amount that would be paid to transfer these liabilities in an orderly transaction amongst market participants under current market conditions as of the measurement date.

The significant inputs utilized in the estimation of fair value of these instruments are the credit risk adjusted spread and three month LIBOR. The credit risk adjusted spread represents the nonperformance risk of the liability, contemplating the inherent risk of the obligation. Generally, an increase in the credit risk adjusted spread and/or a decrease in the three month LIBOR will result in positive fair value adjustments. Conversely, a decrease in the credit risk adjusted spread and/or an increase in the three month LIBOR will result in negative fair value adjustments.

Through the first quarter of 2010 we obtained valuations from a third-party pricing service to assist with the estimation and determination of fair value of these liabilities. In these valuations, the credit risk adjusted interest spread for potential new issuances through the primary market and implied spreads of these instruments when traded as assets on the secondary market, were estimated to be significantly higher than the contractual spread of our junior subordinated debentures measured at fair value. The difference between these spreads has resulted in the cumulative gain in fair value, reducing the carrying value of these instruments as reported on our Consolidated Balance Sheets. In July 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") was signed into law which, among other things, limits the ability of certain bank holding companies to treat trust preferred security debt issuances as Tier 1 capital. This law may require many banks to raise new Tier 1 capital and has effectively closed the trust-preferred securities markets from offering new issuances in the future. As a result of this legislation, our third-party pricing service noted that they were no longer able to provide reliable fair value estimates related to these liabilities given the absence of observable or comparable transactions in the market place in recent history or as anticipated into the future.

Due to inactivity in the junior subordinated debenture market and the inability to obtain observable quotes of our, or similar, junior subordinated debenture liabilities or the related trust preferred securities when traded as assets, we utilize an income approach valuation technique to determine the fair value of these liabilities using our estimation of market discount rate assumptions. The Company monitors activity in the trust preferred and related markets, to the extent available, changes related to the current and anticipated future interest rate environment, and considers our entity-specific creditworthiness, to validate the reasonableness of the credit risk adjusted spread and effective yield utilized in our discounted cash flow model. Regarding the activity in and condition of the junior subordinated debt market, we noted no observable changes in the current period as it relates to companies comparable to our size and condition, in either the primary or secondary markets. Relating to the interest rate environment, we considered the change in slope and shape of the forward LIBOR swap curve in the current period, the effects of which did not result in a significant change in the fair value of these liabilities.

The Company's specific credit risk is implicit in the credit risk adjusted spread used to determine the fair value of our junior subordinated debentures. As our Company is not specifically rated by any credit agency, it is difficult to specifically attribute changes in our estimate of the applicable credit risk adjusted spread to specific changes in our own creditworthiness versus changes in the market's required return from similar companies. As a result, these considerations must be largely based off of qualitative considerations as we do not have a credit rating and we do not regularly issue senior or subordinated debt that would provide us an independent measure of the changes in how the market quantifies our perceived default risk.

On a quarterly basis we assess entity-specific qualitative considerations that if not mitigated or represents a material change from the prior reporting period may result in a change to the perceived creditworthiness and ultimately the estimated credit risk adjusted spread utilized to value these liabilities. Entity-specific considerations that positively impact our creditworthiness include: our strong capital position resulting from our successful public stock offerings in 2009 and 2010 that offers us flexibility to pursue business opportunities such as mergers and acquisitions, or expand our footprint and product offerings; having significant levels of on and off-balance sheet liquidity; being profitable (after excluding the one-time goodwill impairment charge recognized in 2009); and, having an experienced management team. However, these positive considerations are mitigated by significant risks and uncertainties that impact our creditworthiness and ability to maintain capital adequacy in the future. Specific risks and concerns include: given our concentration of loans secured by real estate in our loan portfolio, a continued and sustained deterioration of the real estate market may result in declines in the value of the underlying collateral and increased delinquencies that could result in an increase of charge-offs; despite recent improvement, our credit quality metrics remain negatively elevated since 2007 relative to historical standards; the continuation of current economic downturn that has been particularly severe in our primary markets could adversely affect our business; recent increased regulation facing our industry, such as the Emergency Economic Stabilization Act of 2008, the American Recovery and Reinvestment Act of 2009 and the Dodd-Frank Act, will increase the cost of compliance and restrict our ability to conduct business consistent with

Table of Contents

historical practices, require that we hold additional capital and could negatively impact profitability; we have a significant amount of goodwill and other intangible assets that dilute our available tangible common equity; and the carrying value of certain material, recently recorded assets on our balance sheet, such as the FDIC loss-sharing indemnification asset, are highly reliant on management estimates, such as the timing or amount of losses that are estimated to be covered, and the assumed continued compliance with the provisions of the applicable loss-share agreement. To the extent assumptions ultimately prove incorrect or should we consciously forego or unknowingly violate the guidelines of the agreement, an impairment of the asset may result which would reduce capital.

Additionally, the Company periodically utilizes an external valuation firm to determine or validate the reasonableness of the assessments of inputs and factors that ultimately determines the estimated fair value of these liabilities. The extent we involve or engage these external third parties correlates to management's assessment of the current subordinated debt market, how the current environment and market compares to the preceding quarter, and perceived changes in the Company's own creditworthiness during the quarter. In periods of potential significant valuation changes and at year-end reporting periods we typically engage third parties to perform a full independent valuation of these liabilities. For periods where management has assessed the market and other factors impacting the underlying valuation assumptions of these liabilities, and has determined significant changes to the valuation of these liabilities in the current period are remote, the scope of the valuation specialist's review is limited to a review the reasonableness of management's assessment of inputs. Based on the procedures and methodology as described above, the Company has determined that the underlying inputs and assumptions have not materially changed since that last third-party independent valuation prepared in the fourth quarter of 2012.

Absent changes to the significant inputs utilized in the discounted cash flow model used to measure the fair value of these instruments at each reporting period, the cumulative discount for each junior subordinated debenture will reverse over time, ultimately returning the carrying values of these instruments to their notional values at their expected redemption dates, in a manner similar to the effective yield method as if these instruments were accounted for under the amortized cost method. This will result in recognizing losses on junior subordinated debentures carried at fair value on a quarterly basis within non-interest income. For the three and six months ended June 30, 2013, we recorded a loss of \$547,000 and \$1.1 million and for the three and six months ended June 30, 2012, we recorded a loss of \$547,000 and \$1.1 million resulting from the change in fair value of the junior subordinated debentures recorded at fair value. Observable activity in the junior subordinated debenture and related markets in future periods may change the effective rate used to discount these liabilities, and could result in additional fair value adjustments (gains or losses on junior subordinated debentures measured at fair value) outside the expected periodic change in fair value had the fair value assumptions remained unchanged.

On July 2, 2013, the federal banking regulators approved the final proposed rules that revise the regulatory capital rules to incorporate certain revisions by the Basel Committee on Banking Supervision to the Basel capital framework ("Basel III"). Under the original proposed rule, trust preferred security debt issuances would have been phased out of Tier 1 capital into Tier 2 capital over a 10 year period. Under the final rule, consistent with Section 171 of the Dodd-Frank Act, bank holding companies with less than \$15 billion assets as of December 31, 2009 will be grandfathered and may continue to include these instruments in Tier 1 capital, subject to certain restrictions. However, if an institution grows above \$15 billion as a result of an acquisition, or organically grows above \$15 billion and then makes an acquisition, the combined trust preferred issuances would be phased out of Tier 1 and into Tier 2 capital (75% in 2015 and 100% in 2016 and later). As the Company had less than \$15 billion in assets at December 31, 2009, the Company will be able to continue to include its existing trust preferred securities, less the common stock of the Trusts, in the Company's Tier 1 capital. If the Company breaches \$15 billion in consolidated assets other than in an organic manner and these instruments no longer qualify as Tier 1 capital, it is possible the Company may accelerate redemption of the existing junior subordinated debentures. This could result in adjustments to the fair value of these instruments including the acceleration of losses on junior subordinated debentures carried at fair value within non-interest income. At June 30, 2013, the Company's restricted core capital elements were 17.5% of total core

capital, net of goodwill and any associated deferred tax liability.

Note 10 – Commitments and Contingencies

Lease Commitments — The Bank leases 158 sites under non-cancelable operating leases. The leases contain various provisions for increases in rental rates, based either on changes in the published Consumer Price Index or a predetermined escalation schedule. Substantially all of the leases provide the Company with the option to extend the lease term one or more times following expiration of the initial term.

Rent expense for the three and six months ended June 30, 2013 was \$4.7 million and \$9.3 million and for the three and six months ended June 30, 2012 was \$4.3 million and \$8.6 million. Rent expense was offset by rent income for the three and six months ended June 30, 2013 of \$192,000 and \$448,000 and for the three and six months ended June 30, 2012 of \$304,000 and \$608,000.

Table of Contents

Financial Instruments with Off-Balance-Sheet Risk — The Company's financial statements do not reflect various commitments and contingent liabilities that arise in the normal course of the Bank's business and involve elements of credit, liquidity, and interest rate risk.

The following table presents a summary of the Bank's commitments and contingent liabilities:

(in thousands)

	As of June 30, 2013
Commitments to extend credit	\$1,528,811
Commitments to extend overdrafts	\$219,798
Forward sales commitments	\$272,980
Commitments to originate loans held for sale	\$181,837
Standby letters of credit	\$54,696

The Bank is a party to financial instruments with off-balance-sheet credit risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby letters of credit and financial guarantees. Those instruments involve elements of credit and interest-rate risk similar to the risk involved in on-balance sheet items recognized in the Condensed Consolidated Balance Sheets. The contract or notional amounts of those instruments reflect the extent of the Bank's involvement in particular classes of financial instruments.

The Bank's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit, and financial guarantees written, is represented by the contractual notional amount of those instruments. The Bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any covenant or condition established in the applicable contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. While most standby letters of credit are not utilized, a significant portion of such utilization is on an immediate payment basis. The Bank evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if it is deemed necessary by the Bank upon extension of credit, is based on management's credit evaluation of the counterparty. Collateral varies but may include cash, accounts receivable, inventory, premises and equipment and income-producing commercial properties.

Standby letters of credit and financial guarantees written are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. These guarantees are primarily issued to support public and private borrowing arrangements, including international trade finance, commercial paper, bond financing and similar transactions. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Bank holds cash, marketable securities, or real estate as collateral supporting those commitments for which collateral is deemed necessary. The Bank was not required to perform on any financial guarantees and incurred none and \$79,000 in losses in connection with standby letters of credit during the three and six months ended June 30, 2013. The Bank was not required to perform on any financial guarantees and incurred no losses in connection with standby letters of credit during the three and six months ended June 30, 2012. At June 30, 2013, approximately \$42.3 million of standby letters of credit expire within one year, and \$12.4 million expire thereafter. Upon issuance, the Bank recognizes a liability equivalent to the amount of fees received from the customer for these standby letter of credit commitments. Fees are recognized ratably over the term of the standby letter of

credit. The estimated fair value of guarantees associated with standby letters of credit was \$226,000 as of June 30, 2013.

Mortgage loans sold to investors may be sold with servicing rights retained, for which the Bank makes only standard legal representations and warranties as to meeting certain underwriting and collateral documentation standards. In the past two years, the Bank has had to repurchase fewer than 20 loans due to deficiencies in underwriting or loan documentation and has not realized significant losses related to these repurchases. Management believes that any liabilities that may result from such recourse provisions are not significant.

Legal Proceedings—The Bank owns 468,659 shares of Class B common stock of Visa Inc. which are convertible into Class A common stock at a conversion ratio of 0.4206 per Class A share. As of June 30, 2013, the value of the Class A shares was

Table of Contents

\$182.75 per share. Utilizing the conversion ratio, the value of unredeemed Class A equivalent shares owned by the Bank was \$36.0 million as of June 30, 2013, and has not been reflected in the accompanying financial statements. The shares of Visa Class B common stock are restricted and may not be transferred. Visa member banks are required to fund an escrow account to cover settlements, resolution of pending litigation and related claims. If the funds in the escrow account are insufficient to settle all the covered litigation, Visa may sell additional Class A shares and use the proceeds to settle litigation, thereby reducing the conversion ratio. If funds remain in the escrow account after all litigation is settled, the Class B conversion ratio will be increased to reflect that surplus.

On July 13, 2012, Visa, Inc. announced that it had entered into a memorandum of understanding obligating it to enter into a settlement agreement to resolve the multi-district interchange litigation brought by the class plaintiffs in the matter styled *In re Payment Card Interchange Fee and Merchant Discount Antitrust Litigation*, Case No. 5-MD-1720 (JG) (JO) pending in the U.S. District Court for the Eastern District of New York. The claims originally were brought by a class of U.S. retailers in 2005. The proposed settlement is subject to court approval and Visa's share of the settlement to be paid is estimated to be approximately \$4.4 billion. However, certain trade associations and merchants are actively opposing the proposed settlement and it is unknown when or if the proposed settlement will be approved. A fairness hearing is currently set for September 12, 2013 to determine if the settlement will be finally approved. The effect of this proposed settlement on the value of the Bank's Class B common stock is unknown at this time.

In the ordinary course of business, various claims and lawsuits are brought by and against the Company and its subsidiaries, including the Bank and Umpqua Investments. In the opinion of management, there is no pending or threatened proceeding in which an adverse decision could result in a material adverse change in the Company's consolidated financial condition or results of operations.

Concentrations of Credit Risk— The Bank grants real estate mortgage, real estate construction, commercial, agricultural and installment loans and leases to customers throughout Oregon, Washington, California, and Nevada. In management's judgment, a concentration exists in real estate-related loans, which represented approximately 77% and 79% of the Bank's non-covered loan and lease portfolio at June 30, 2013 and December 31, 2012. Commercial real estate concentrations are managed to assure wide geographic and business diversity. Although management believes such concentrations have no more than the normal risk of collectability, a substantial decline in the economy in general, material increases in interest rates, changes in tax policies, tightening credit or refinancing markets, or a decline in real estate values in the Bank's primary market areas in particular, such as has been seen with the deterioration in the residential development market since 2007, could have an adverse impact on the repayment of these loans. Personal and business incomes, proceeds from the sale of real property, or proceeds from refinancing, represent the primary sources of repayment for a majority of these loans.

The Bank recognizes the credit risks inherent in dealing with other depository institutions. Accordingly, to prevent excessive exposure to any single correspondent, the Bank has established general standards for selecting correspondent banks as well as internal limits for allowable exposure to any single correspondent. In addition, the Bank has an investment policy that sets forth limitations that apply to all investments with respect to credit rating and concentrations with an issuer.

Note 11 – Derivatives

The Bank may use derivatives to hedge the risk of changes in the fair values of interest rate lock commitments, residential mortgage loans held for sale, and mortgage servicing rights. None of the Company's derivatives are designated as hedging instruments. Rather, they are accounted for as free-standing derivatives, or economic hedges, with changes in the fair value of the derivatives reported in income. The Company primarily utilizes forward interest rate contracts in its derivative risk management strategy.

The Bank enters into forward delivery contracts to sell residential mortgage loans or mortgage-backed securities to broker/dealers at specific prices and dates in order to hedge the interest rate risk in its portfolio of mortgage loans held for sale and its residential mortgage loan commitments. Credit risk associated with forward contracts is limited to the replacement cost of those forward contracts in a gain position. There were no counterparty default losses on forward contracts in the three and six months ended June 30, 2013 and 2012. Market risk with respect to forward contracts arises principally from changes in the value of contractual positions due to changes in interest rates. The Bank limits its exposure to market risk by monitoring differences between commitments to customers and forward contracts with broker/dealers. In the event the Company has forward delivery contract commitments in excess of available mortgage loans, the Company completes the transaction by either paying or receiving a fee to or from the broker/dealer equal to the increase or decrease in the market value of the forward contract. At June 30, 2013, the Bank had commitments to originate mortgage loans held for sale totaling \$181.8 million and forward sales commitments of \$273.0 million.

Table of Contents

The Bank's mortgage banking derivative instruments do not have specific credit risk-related contingent features. The forward sales commitments do have contingent features that may require transferring collateral to the broker/dealers upon their request. However, this amount would be limited to the net unsecured loss exposure at such point in time and would not materially affect the Company's liquidity or results of operations.

The Bank executes interest rate swaps with commercial banking customers to facilitate their respective risk management strategies. Those interest rate swaps are simultaneously hedged by offsetting the interest rate swaps that the Bank executes with a third party, such that the Bank minimizes its net risk exposure. As of June 30, 2013, the Bank had 208 interest rate swaps with an aggregate notional amount of \$1.0 billion related to this program.

In connection with the interest rate swap program with commercial customers, the Bank has agreements with its derivative counterparties that contain a provision where if the Bank defaults on any of its indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then the Bank could also be declared in default on its derivative obligations. The Bank also has agreements with its derivative counterparties that contain a provision where if the Bank fails to maintain its status as a well/adequately capitalized institution, then the counterparty could terminate the derivative positions and the Bank would be required to settle its obligations under the agreements. Similarly, the Bank could be required to settle its obligations under certain of its agreements if specific regulatory events occur, such as if the Bank were issued a prompt corrective action directive or a cease and desist order, or if certain regulatory ratios fall below specified levels.

As of June 30, 2013, the termination value of derivatives in a net liability position, which includes accrued interest but excludes any adjustment for nonperformance risk, related to these agreements was \$8.4 million. The Bank has minimum collateral posting thresholds with certain of its derivative counterparties, and has been required to post collateral against its obligations under these agreements of \$4.1 million as of June 30, 2013. If the Bank had breached any of these provisions at June 30, 2013, it could have been required to settle its obligations under the agreements at the termination value.

The fair value of the interest rate swaps is determined using the market standard methodology of netting the discounted future fixed cash receipts (or payments) and the discounted expected variable cash payments (or receipts). The variable cash payments (or receipts) are based on the expectation of future interest rates (forward curves) derived from observed market interest rate curves. In addition, to comply with the provisions of ASC 820, the Bank incorporates credit valuation adjustments ("CVA") to appropriately reflect nonperformance risk in the fair value measurements of its derivatives. The CVA is calculated by determining the total expected exposure of the derivatives (which incorporates both the current and potential future exposure) and then applying the counterparties' credit spreads to the exposure. For derivatives with two-way exposure, specifically, the Bank's interest rate swaps, the counterparty's credit spread is applied to the Bank's exposure to the counterparty, and the Bank's own credit spread is applied to the counterparty's exposure to the Bank, and the net CVA is reflected in the Bank's derivative valuations. The total expected exposure of a derivative is derived using market-observable inputs, such as yield curves and volatilities. For the Bank's own credit spread and for counterparties having publicly available credit information, the credit spreads over LIBOR used in the calculations represent implied credit default swap spreads obtained from a third party credit data provider. For counterparties without publicly available credit information, which are primarily commercial banking customers, the credit spreads over LIBOR used in the calculations are estimated by the Bank based on current market conditions, including consideration of current borrowing spreads for similar customers and transactions, review of existing collateralization or other credit enhancements, and changes in credit sector and entity-specific credit information. In adjusting the fair value of its derivative contracts for the effect of nonperformance risk, the Bank has considered the impact of netting and any applicable credit enhancements. Effective January 1, 2012, the Company made an accounting policy election to use the exception commonly referred to as the "portfolio exception" with respect to measuring counterparty credit risk for its interest rate swap derivative instruments that are subject to master netting

agreements with commercial banking customers that are hedged with offsetting interest rate swaps with third parties.

As of January 1, 2013, the Bank changed its valuation methodology for interest rate swap derivatives to discount cash flows based on Overnight Index Swap ("OIS") rates. Fully collateralized trades are discounted using OIS with no additional economic adjustments to arrive at fair value. Uncollateralized or partially-collateralized trades are also discounted at OIS, but include appropriate economic adjustments for funding costs (e.g., a LIBOR-OIS basis adjustment to approximate uncollateralized cost of funds) and credit risk. The Company is making the changes to better align its inputs, assumptions, and pricing methodologies with those used in its principal market by most dealers and major market participants. The changes in valuation methodology are applied prospectively as a change in accounting estimate and are immaterial to the Company's financial statements.

As of June 30, 2013, the net CVA increased the settlement values of the Bank's net derivative assets by \$1.9 million. During the three and six months ended June 30, 2013, the Bank recognized a gain of \$1.8 million and \$1.8 million, and during the three and

Table of Contents

six months ended June 30, 2012, the Bank recognized a loss of \$700,000 and \$116,000, respectively related to credit valuation adjustments on nonhedge derivative instruments, which is included in noninterest income. Various factors impact changes in the CVA over time, including changes in the credit spreads of the parties to the contracts, as well as changes in market rates and volatilities, which affect the total expected exposure of the derivative instruments.

The following tables summarize the types of derivatives, separately by assets and liabilities, their locations on the Condensed Consolidated Balance Sheets, and the fair values of such derivatives as of June 30, 2013 and December 31, 2012:

(in thousands)

Derivatives not designated as hedging instrument	Balance Sheet Location	Asset Derivatives		Liability Derivatives	
		June 30, 2013	December 31, 2012	June 30, 2013	December 31, 2012
Interest rate lock commitments	Other assets/Other liabilities	\$638	\$1,496	\$—	\$18
Interest rate forward sales commitments	Other assets/Other liabilities	10,347	133	108	905
Interest rate swaps	Other assets/Other liabilities	10,898	22,213	8,893	22,048
Total		\$21,883	\$23,842	\$9,001	\$22,971

The following table summarizes the types of derivatives, their locations within the Condensed Consolidated Statements of Income, and the gains (losses) recorded during the three and six months ended June 30, 2013 and 2012:

(in thousands)

Derivatives not designated as hedging instrument	Income Statement Location	Three months ended June 30,		Six months ended June 30,	
		2013	2012	2013	2012
Interest rate lock commitments	Mortgage banking revenue	\$(3,307)	\$834	\$(840)	\$537

Stock-Based Compensation

The compensation cost related to stock options, restricted stock and restricted stock units (included in salaries and employee benefits) was \$1.0 million and \$2.2 million for the three and six months ended June 30, 2013 as compared to \$1.0 million and \$1.9 million for the three and six months ended June 30, 2012. The total income tax benefit recognized related to stock-based compensation was \$415,000 and \$889,000 for the three and six months ended June 30, 2013 as compared to \$410,000 and \$777,000 for the three and six months ended June 30, 2012.

The following table summarizes information about stock option activity for the six months ended June 30, 2013:

(in thousands, except per share data)

	Six months ended June 30, 2013			
	Options Outstanding	Weighted-Avg Exercise Price	Weighted-Avg Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Balance, beginning of period	1,850	\$ 15.37		
Exercised	(74)	) \$ 11.43		
Forfeited/expired	(338)	) \$ 17.36		
Balance, end of period	1,438	\$ 15.11	5.02	\$3,202
Options exercisable, end of period	1,042	\$ 16.49	4.18	\$1,802

The total intrinsic value (which is the amount by which the stock price exceeded the exercise price on the date of exercise) of options exercised during the three and six months ended June 30, 2013 was \$130,000 and \$137,000 as compared to three and six months ended June 30, 2012 of \$9,000 and \$17,000. During the three and six months ended June 30, 2013, the amount of cash received from the exercise of stock options was \$813,000 and \$847,000 as compared to the three and six months ended June 30, 2012 of \$58,000 and \$78,000.

The fair value of each option grant is estimated as of the grant date using the Black-Scholes option-pricing model. There were no stock options granted in the three and six months ended June 30, 2013 and 2012.

The Company grants restricted stock periodically for the benefit of employees and directors. Restricted shares issued prior to 2011 generally vest on an annual basis over five years. Restricted shares issued since 2011 generally vest over a three year period, subject to time or time plus performance vesting conditions. The following table summarizes information about nonvested restricted share activity for the six months ended June 30, 2013:

(in thousands, except per share data)

	Six months ended June 30, 2013	
	Restricted Shares Outstanding	Weighted Average Grant Date Fair Value
Balance, beginning of period	763	\$ 12.39
Granted	331	\$ 12.15
Released	(143)	) \$ 12.19
Forfeited/expired	(79)	) \$ 11.72
Balance, end of period	872	\$ 12.40

The total fair value of restricted shares vested and released during the three and six months ended June 30, 2013 was \$514,000 and \$1.8 million as compared to the three and six months ended June 30, 2012 of \$142,000 and \$1.7 million.

The Company granted restricted stock units as a part of the 2007 Long Term Incentive Plan for the benefit of certain executive officers. Restricted stock unit grants are subject to performance-based vesting as well as other approved vesting

Table of Contents

conditions. The total number of restricted stock units granted represents the maximum number of restricted stock units eligible to vest based upon the performance and service conditions set forth in the grant agreements. There were no restricted stock units vested and released and there were 35,000 restricted stock units forfeited during the three and six months ended June 30, 2013, and 95,000 restricted stock units with a weighted average grant date fair value of \$10.41 remain outstanding at June 30, 2013.

As of June 30, 2013, there was \$1.1 million of total unrecognized compensation cost related to nonvested stock options which is expected to be recognized over a weighted-average period of 1.2 years. As of June 30, 2013, there was \$6.6 million of total unrecognized compensation cost related to nonvested restricted stock which is expected to be recognized over a weighted-average period of 1.8 years. As of June 30, 2013, there was \$336,000 of total unrecognized compensation cost related to nonvested restricted stock units which is expected to be recognized over a weighted-average period of 0.9 years, assuming expected performance conditions are met.

For the three and six months ended June 30, 2013, the Company received income tax benefits of \$257,000 and \$775,000, respectively, as compared to the three and six months ended June 30, 2012 of \$60,000 and \$685,000 related to the exercise of non-qualified employee stock options, disqualifying dispositions on the exercise of incentive stock options, the vesting of restricted shares and the vesting of restricted stock units. In the six months ended June 30, 2013, the Company had net tax deficiencies (tax deficiency resulting from tax deductions less than the compensation cost recognized) of \$33,000, compared to \$45,000 of net tax deficiencies (tax deficiency resulting from tax deductions less than the compensation cost recognized) for the six months ended June 30, 2012. Only cash flows from gross excess tax benefits are classified as financing cash flows.

At the annual meeting on April 16, 2013, shareholders approved the Company's 2013 Incentive Plan (the "2013 Plan"), which, among other things, authorizes the issuance of equity awards to directors and employees and reserves 4,000,000 shares of the Company's common stock for issuance under the plan. With the adoption of the 2013 Plan, no additional awards will be issued from the 2003 Stock Incentive Plan or the 2007 Long Term Incentive Plan.

Note 13 – Income Taxes

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction, as well as the Oregon and California state jurisdictions. The Company is no longer subject to U.S. federal or Oregon state tax authority examinations for years before 2009 and California state tax authority examinations for years before 2004. During 2010, the Internal Revenue Service concluded an examination of the Company's U.S. income tax returns through 2008. The results of these examinations had no significant impact on the Company's financial statements.

The Company had gross unrecognized tax benefits relating to California tax incentives of \$598,000 recorded as of June 30, 2013. If recognized, the unrecognized tax benefit would reduce the 2013 annual effective tax rate by 0.3%. During the six months ended June 30, 2013, the Company recognized an expense of \$11,000 in interest relating to its liability for unrecognized tax benefits during the same period. Interest expense is reported by the Company as a component of tax expense. As of June 30, 2013, the accrued interest related to unrecognized tax benefits is \$180,000.

Note 14 – Earnings Per Common Share

Nonvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents are participating securities and are included in the computation of earnings per share pursuant to the two-class method. The two-class method is an earnings allocation formula that determines earnings per share for each class of common stock and participating security according to dividends declared (or accumulated) and participation rights in undistributed earnings. Certain of the Company's nonvested restricted stock awards qualify as participating securities.

Net earnings, less any preferred dividends accumulated for the period (whether or not declared), is allocated between the common stock and participating securities pursuant to the two-class method. Basic earnings per common share is computed by dividing net earnings available to common shareholders by the weighted average number of common shares outstanding during the period, excluding participating nonvested restricted shares.

Diluted earnings per common share is computed in a similar manner, except that first the denominator is increased to include the number of additional common shares that would have been outstanding if potentially dilutive common shares, excluding the participating securities, were issued using the treasury stock method. For all periods presented, stock options, certain restricted stock awards and restricted stock units are the only potentially dilutive non-participating instruments issued by the Company. Next, we determine and include in diluted earnings per common share calculation the more dilutive effect of the participating securities using the treasury stock method or the two-class method. Undistributed losses are not allocated to the

Table of Contents

nonvested share-based payment awards (the participating securities) under the two-class method as the holders are not contractually obligated to share in the losses of the Company.

The following is a computation of basic and diluted earnings per common share for the three and six months ended June 30, 2013 and 2012:

(in thousands, except per share data)

	Three months ended June 30, 2013		Six months ended June 30, 2013	
	2012		2012	
NUMERATORS:				
Net income	\$26,253	\$23,277	\$49,614	\$48,780
Less:				
Dividends and undistributed earnings allocated to participating securities (1)	197	162	380	329
Net earnings available to common shareholders	\$26,056	\$23,115	\$49,234	\$48,451
DENOMINATORS:				
Weighted average number of common shares outstanding - basic	111,954	111,897	111,946	111,943
Effect of potentially dilutive common shares (2)	191	181	187	177
Weighted average number of common shares outstanding - diluted	112,145	112,078	112,133	112,120
EARNINGS PER COMMON SHARE:				
Basic	\$0.23	\$0.21	\$0.44	\$0.43
Diluted	\$0.23	\$0.21	\$0.44	\$0.43

(1) Represents dividends paid and undistributed earnings allocated to nonvested restricted stock awards.

(2) Represents the effect of the assumed exercise of stock options, vesting of non-participating restricted shares, and vesting of restricted stock units, based on the treasury stock method.

The following table presents the weighted average outstanding securities that were not included in the computation of diluted earnings per common share because their effect would be anti-dilutive for the three and six months ended June 30, 2013 and 2012.

(in thousands)

	Three months ended June 30, 2013		Six months ended June 30, 2013	
	2012		2012

Note 15 – Segment Information

The Company operates three primary segments: Community Banking, Home Lending and Wealth Management. The Community Banking segment's principal business focus is the offering of loan and deposit products to business and retail customers in its primary market areas. As of June 30, 2013, the Community Banking segment operated 205 locations throughout Oregon, California, Washington, and Nevada.

The Home Lending segment, which operates as a division of the Bank, originates, sells and services residential mortgage loans.

The Wealth Management segment consists of the operations of Umpqua Investments, which offers a full range of retail brokerage services and products to its clients who consist primarily of individual investors, and Umpqua Private Bank, which serves high net worth individuals with liquid investable assets and provides customized financial solutions and offerings. The Company accounts for intercompany fees and services between Umpqua Investments and the Bank at estimated fair value

Table of Contents

according to regulatory requirements for services provided. Intercompany items relate primarily to management services, referral fees and deposit rebates.

Summarized financial information concerning the Company's reportable segments and the reconciliation to the consolidated financial results is shown in the following tables:

(1) Principally represents U.S. Treasury and agencies or residential mortgage-backed securities issued or guaranteed by governmental agencies.

The following methods were used to estimate the fair value of each class of financial instrument above:

Cash and Cash Equivalents—For short-term instruments, including cash and due from banks, and interest bearing deposits with banks, the carrying amount is a reasonable estimate of fair value.

Securities—Fair values for investment securities are based on quoted market prices when available or through the use of alternative approaches, such as matrix or model pricing, or broker indicative bids, when market quotes are not readily accessible or available.

Loans Held for Sale—Fair value is determined based on quoted secondary market prices for similar loans, including the implicit fair value of embedded servicing rights.

Non-covered Loans and Leases - Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type, including commercial, real estate and consumer loans. Each loan category is further segregated by fixed and variable rate. For variable rate loans, carrying value approximates fair value. The fair value of fixed rate loans is calculated by discounting contractual cash flows at rates which similar loans are currently being made. These amounts are discounted further by embedded probable losses expected to be realized in the portfolio.

Covered Loans and Leases – Covered loans are initially measured at their estimated fair value on their date of acquisition as described in Note 6. Subsequent to acquisition, the fair value of covered loans is measured using the same methodology as that of non-covered loans.

Table of Contents

Restricted Equity Securities – The carrying value of restricted equity securities approximates fair value as the shares can only be redeemed by the issuing institution at par.

Mortgage Servicing Rights - The fair value of mortgage servicing rights is estimated using a discounted cash flow model. Assumptions used include market discount rates, anticipated prepayment speeds, delinquency and foreclosure rates, and ancillary fee income. This model is periodically validated by an independent external model validation group. The model assumptions and the MSR fair value estimates are also compared to observable trades of similar portfolios as well as to MSR broker valuations and industry surveys, as available. Management believes the significant inputs utilized are indicative of those that would be used by market participants.

Bank Owned Life Insurance Assets – Fair values of insurance policies owned are based on the insurance contract's cash surrender value.

FDIC Indemnification Asset - The FDIC indemnification asset is calculated as the expected future cash flows under the loss-share agreement discounted by a rate reflective of the creditworthiness of the FDIC as would be required from the market.

Visa Class B Common Stock - The fair value of Visa Class B common stock is estimated by applying a 5% discount to the value of the unredeemed Class A equivalent shares. The discount primarily represents the risk related to the further potential reduction of the conversion ratio between Class B and Class A shares and a liquidity risk premium.

Deposits—The fair value of deposits with no stated maturity, such as non-interest bearing deposits, savings and interest checking accounts, and money market accounts, is equal to the amount payable on demand. The fair value of certificates of deposit is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities.

Securities Sold under Agreements to Repurchase and Federal Funds Purchased - For short-term instruments, including securities sold under agreements to repurchase and federal funds purchased, the carrying amount is a reasonable estimate of fair value.

Term Debt—The fair value of medium term notes is calculated based on the discounted value of the contractual cash flows using current rates at which such borrowings can currently be obtained.

Junior Subordinated Debentures - The fair value of junior subordinated debentures is estimated using an income approach valuation technique. The ending carrying (fair) value of the junior subordinated debentures measured at fair value represents the estimated amount that would be paid to transfer these liabilities in an orderly transaction amongst market participants. Due to credit concerns in the capital markets and inactivity in the trust preferred markets that have limited the observability of market spreads, we have classified this as a Level 3 fair value measure. For further discussion of the valuation technique and inputs, see Note 9.

Derivative Instruments - The fair value of the interest rate lock commitments and forward sales commitments are estimated using quoted or published market prices for similar instruments, adjusted for factors such as pull-through rate assumptions based on historical information, where appropriate. The pull-through rate assumptions are considered Level 3 valuation inputs and are significant to the interest rate lock commitment valuation; as such, the interest rate lock commitment derivatives are classified as Level 3. The fair value of the interest rate swaps is determined using a discounted cash flow technique incorporating credit valuation adjustments to reflect nonperformance risk in the measurement of fair value. Although the Bank has determined that the majority of the inputs used to value its interest rate swap derivatives fall within Level 2 of the fair value hierarchy, the CVA

associated with its derivatives utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by itself and its counterparties. However, as of June 30, 2013, the Bank has assessed the significance of the impact of the CVA on the overall valuation of its interest rate swap positions and has determined that the CVA are not significant to the overall valuation of its interest rate swap derivatives. As a result, the Bank has classified its interest rate swap derivative valuations in Level 2 of the fair value hierarchy.

Assets and Liabilities Measured at Fair Value Using Significant Unobservable Inputs (Level 3)

Table of Contents

The following table provides a description of the valuation technique, unobservable input, and qualitative information about the unobservable inputs for the Company's assets and liabilities classified as Level 3 and measured at fair value on a recurring basis at June 30, 2013:

(in thousands)

Financial Instrument	Valuation Technique	Unobservable Input	Weighted Average (Range)
Mortgage servicing rights	Discounted cash flow	Constant Prepayment Rate	18.24%
		Discount Rate	8.68%
Interest rate lock commitment	Internal Pricing Model	Pull-through rate	82.0%
Junior subordinated debentures	Discounted cash flow	Credit Spread	6.21%

Generally, any significant increases in the constant prepayment rate and discount rate utilized in the fair value measurement of the mortgage servicing rights will result in negative fair value adjustments (and a decrease in the fair value measurement). Conversely, a decrease in the constant prepayment rate and discount rate will result in a positive fair value adjustment (and increase in the fair value measurement).

An increase in the pull-through rate utilized in the fair value measurement of the interest rate lock commitment derivative will result in positive fair value adjustments (and an increase in the fair value measurement.) Conversely, a decrease in the pull-through rate will result in a negative fair value adjustment (and a decrease in the fair value measurement.)

Management believes that the credit risk adjusted spread utilized in the fair value measurement of the junior subordinated debentures carried at fair value is indicative of the nonperformance risk premium a willing market participant would require under current market conditions, that is, the inactive market. Management attributes the change in fair value of the junior subordinated debentures during the period to market changes in the nonperformance expectations and pricing of this type of debt, and not as a result of changes to our entity-specific credit risk. The widening of the credit risk adjusted spread above the Company's contractual spreads has primarily contributed to the positive fair value adjustments. Future contractions in the credit risk adjusted spread relative to the spread currently utilized to measure the Company's junior subordinated debentures at fair value as of June 30, 2013, or the passage of time, will result in negative fair value adjustments. Generally, an increase in the credit risk adjusted spread and/or a decrease in the three month LIBOR swap curve will result in positive fair value adjustments (and decrease the fair value measurement). Conversely, a decrease in the credit risk adjusted spread and/or an increase in the three month LIBOR swap curve will result in negative fair value adjustments (and increase the fair value measurement).

The following table provides a reconciliation of assets and liabilities measured at fair value using significant unobservable inputs (Level 3) on a recurring basis during the three and six months ended June 30, 2013 and 2012.

(in thousands)

Three months ended June 30,	Beginning Balance	Change included in earnings	Purchases and issuances	Sales and settlements	Ending Balance	Net change in unrealized gains or (losses) relating to items held at end of period
2013						

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Mortgage servicing rights	\$32,097	\$1,387	\$4,708	\$—	\$38,192	\$2,544	
Interest rate lock commitment	3,946	(3,946	) 21,656	(21,018	) 638	638	
Junior subordinated debentures	85,616	1,519	—	(976	) 86,159	1,519

Table of Contents

(in thousands)

Six months ended June 30,	Beginning Balance	Change included in earnings	Purchases and issuances	Sales and settlements	Ending Balance	Net change in unrealized gains or (losses) relating to items held at end of period
2013						
Mortgage servicing rights	\$27,428	\$(346)	) \$11,110	\$—	\$38,192	\$(344)
Interest rate lock commitment	1,478	(1,478)	) 35,135	(34,497)	) 638	638
Junior subordinated debentures	85,081	3,030	—	(1,952)	) 86,159	3,030
2012						
Mortgage servicing rights	\$18,184	\$(1,952)	) \$6,281	\$—	\$22,513	\$(197)
Interest rate lock commitment	1,749	(1,749)	) 35,597	(33,311)	) 2,286	2,286
Junior subordinated debentures	82,905	3,188	—	(2,100)	) 83,993	3,188

Losses on mortgage servicing rights carried at fair value are recorded in mortgage banking revenue within other non-interest income. Gains (losses) on interest rate lock commitments carried at fair value are recorded in mortgage banking revenue within other non-interest income. Gains (losses) on junior subordinated debentures carried at fair value are recorded within other non-interest income. The contractual interest expense on the junior subordinated debentures is recorded on an accrual basis as interest on junior subordinated debentures within interest expense. Settlements related to the junior subordinated debentures represent the payment of accrued interest that is embedded in the fair value of these liabilities.

Additionally, from time to time, certain assets are measured at fair value on a nonrecurring basis. These adjustments to fair value generally result from the application of lower-of-cost-or-market accounting or write-downs of individual assets due to impairment.

Fair Value of Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

The following table presents information about the Company's assets and liabilities measured at fair value on a nonrecurring basis for which a nonrecurring change in fair value has been recorded during the reporting period. The amounts disclosed below represent the fair values at the time the nonrecurring fair value measurements were made, and not necessarily the fair value as of the dates reported upon.

	\$48,067	\$—	\$—	\$48,067

The following table presents the losses resulting from nonrecurring fair value adjustments for the three and six months ended June 30, 2013 and 2012:

(in thousands)

	Three months ended		Six months ended	
	June 30,		June 30,	
	2013	2012	2013	2012
Non-covered loans and leases	\$3,878	\$11,047	\$12,157	\$22,841
Non-covered other real estate owned	68	1,196	437	4,719
Covered other real estate owned	126	440	680	3,346
Total loss from nonrecurring measurements	\$4,072	\$12,683	\$13,274	\$30,906

The investment securities held to maturity above relate to non-agency collateralized mortgage obligations where OTTI has been identified and the investments have been adjusted to fair value. The fair value of these investments securities were obtained from third-party pricing services using matrix or model pricing methodologies and were corroborated by broker indicative bids. While we do not expect to recover the entire amortized cost basis of these securities, as we do not intend to sell these securities and it is not likely that we will be required to sell these securities before maturity, only the credit loss component of the impairment is recognized in earnings. The credit loss on a security is measured as the difference between the amortized cost basis and the present value of the cash flows expected to be collected. The remaining impairment loss related to all other factors, the difference between the present value of the cash flows expected to be collected and fair value, is recognized as a charge to a separate component of OCI. We estimate the cash flows of the underlying collateral within each security considering credit, interest and prepayment risk models that incorporate management's estimate of projected key assumptions including prepayment rates, collateral default rates and loss severity. Assumptions utilized vary from security to security, and are influenced by factors such as loan interest rates, geographic location, borrower characteristics and vintage, and historical experience. We then use a third party to obtain information about the structure of each security, including subordination and other credit enhancements, in order to determine how the underlying collateral cash flows will be distributed to each security issued in the structure. These cash flows are then discounted at the interest rate used to recognize interest income on each security.

The non-covered loans and leases amount above represents impaired, collateral dependent loans that have been adjusted to fair value. When we identify a collateral dependent loan as impaired, we measure the impairment using the current fair value of the collateral, less selling costs. Depending on the characteristics of a loan, the fair value of collateral is generally estimated by obtaining external appraisals. If we determine that the value of the impaired loan is less than the recorded investment in the loan, we recognize this impairment and adjust the carrying value of the loan to fair value through the allowance for loan and lease losses. The loss represents charge-offs or impairments on collateral dependent loans for fair value adjustments based on the fair value of collateral. The carrying value of loans fully charged-off is zero.

The non-covered and covered other real estate owned amount above represents impaired real estate that has been adjusted to fair value. Non-covered other real estate owned represents real estate which the Bank has taken control of in partial or full satisfaction of loans. At the time of foreclosure, other real estate owned is recorded at the lower of the carrying amount of the loan or fair value less costs to sell, which becomes the property's new basis. Any write-downs based on the asset's fair value at the date of acquisition are charged to the allowance for loan and lease losses. After foreclosure, management periodically performs valuations such that the real estate is carried at the lower of its new cost basis or fair value, net of estimated costs to

Table of Contents

sell. Fair value adjustments on other real estate owned are recognized within net loss on real estate owned. The loss represents impairments on non-covered other real estate owned for fair value adjustments based on the fair value of the real estate.

Fair Value Option

The following table presents the difference between the aggregate fair value and the aggregate unpaid principal balance of loans held for sale accounted for under the fair value option as of June 30, 2013 and December 31, 2012:

(in thousands)

	June 30, 2013			December 31, 2012		
	Fair Value	Aggregate Unpaid Principal Balance	Fair Value Less Aggregate Unpaid Principal Balance	Fair Value	Aggregate Unpaid Principal Balance	Fair Value Less Aggregate Unpaid Principal Balance
Loans held for sale	\$173,994	\$173,423	\$571	\$320,132	\$302,760	\$17,372

Loans held for sale accounted for under the fair value option are measured initially at fair value with subsequent changes in fair value recognized in earnings. Gains and losses from such changes in fair value are reported as a component of mortgage banking revenue, net in the Consolidated Statements of Income. For the three and six months ended June 30, 2013 the Company recorded a net decrease of \$6.0 million and \$16.8 million, and for the three and six months ended June 30, 2012, the Company recorded a net increase of \$5.8 million and \$6.0 million, respectively, representing the change in fair value reflected in earnings.

There were no nonaccrual mortgage loans held for sale or mortgage loans held for sale 90 days or more past due and still accruing interest as of June 30, 2013 and December 31, 2012, respectively.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This Report contains certain forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, which are intended to be covered by the safe harbor for “forward-looking statements” provided by the Private Securities Litigation Reform Act of 1995. These statements may include statements that expressly or implicitly predict future results, performance or events. Statements other than statements of historical fact are forward-looking statements. You can find many of these statements by looking for words such as “anticipates,” “expects,” “believes,” “estimates” and “intends” and words or phrases of similar meaning. We make forward-looking statements regarding projected sources of funds, use of proceeds, availability of acquisition and growth opportunities, dividends, adequacy of our allowance for loan and lease losses, reserve for unfunded commitments and provision for loan and lease losses, performance of troubled debt restructurings, our commercial real estate portfolio and subsequent charge-offs, and our covered loan portfolio and the FDIC indemnification asset. Forward-looking statements involve substantial risks and uncertainties, many of which are difficult to predict and are generally beyond our control. There are many factors that could cause actual results to differ materially from those contemplated by these forward-looking statements. Risks and uncertainties include those set forth in our filings with the Securities and Exchange Commission (the “SEC”) and the following factors that might cause actual results to differ materially from those presented:

- our ability to attract new deposits and loans and leases;
- demand for financial services in our market areas;
- competitive market pricing factors;
- deterioration in economic conditions that could result in increased loan and lease losses;
- risks associated with concentrations in real estate related loans;
- market interest rate volatility;
- compression of our net interest margin;
- stability of funding sources and continued availability of borrowings;
- changes in legal or regulatory requirements or the results of regulatory examinations that could restrict growth;
- our ability to recruit and retain key management and staff;
- availability of, and competition for acquisition opportunities;
- risks associated with merger and acquisition integration;
- significant decline in the market value of the Company that could result in an impairment of goodwill;
- our ability to raise capital or incur debt on reasonable terms;
- regulatory limits on the Bank’s ability to pay dividends to the Company;
- the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank Act”) and related rules and regulations on the Company’s business operations and competitiveness, including the impact of executive compensation restrictions, which may affect the Company’s ability to retain and recruit executives in competition with firms in other industries who do not operate under those restrictions;
- the impact of the Dodd-Frank Act on the Company’s interest expense, FDIC deposit insurance assessments, regulatory compliance expenses, and interchange fee revenue, which includes a maximum permissible interchange fee that an issuer may receive for an electronic debit transaction, resulting in a decrease in interchange revenue on an average transaction; and
- the impact of “Basel III” capital rules that could require the Company to adjust the fair value, including the acceleration of losses, of the trust preferred securities.

There are many factors that could cause actual results to differ materially from those contemplated by these forward-looking statements. Forward-looking statements are made as of the date of this Form 10-Q. We do not intend to update these forward-looking statements. Readers should consider any forward-looking statements in light of this explanation, and we caution readers about relying on forward-looking statements.

General

Table of Contents

Umpqua Holdings Corporation (referred to in this report as “we,” “our,” “Umpqua,” and “the Company”), an Oregon corporation, is a financial holding company with two principal operating subsidiaries, Umpqua Bank (the “Bank”) and Umpqua Investments, Inc. (“Umpqua Investments”).

Headquartered in Roseburg, Oregon, the Bank is considered one of the most innovative community banks in the United States and has implemented a variety of retail marketing strategies to increase revenue and differentiate the company from its competition. The Bank combines a high touch customer experience with the sophisticated products and expertise of a commercial bank. The Bank provides a wide range of banking, wealth management, mortgage and other financial services to corporate, institutional and individual customers.

Along with its subsidiaries, the Company is subject to the regulations of state and federal agencies and undergoes periodic examinations by these regulatory agencies.

Umpqua Investments is a registered broker-dealer and investment advisor with offices in Portland, Lake Oswego, and Medford, Oregon, and Santa Rosa, California, and also offers products and services through certain Bank stores. The firm is one of the oldest investment companies in the Northwest and is actively engaged in the communities it serves. Umpqua Investments offers a full range of investment products and services including: stocks, fixed income securities (municipal, corporate, and government bonds, certificates of deposit, and money market instruments), mutual funds, annuities, options, retirement planning, money management services and life insurance.

Executive Overview

Significant items for the three and six months ended June 30, 2013 were as follows:

Net earnings available to common shareholders per diluted common share were \$0.23 and \$0.44 for the three and six months ended June 30, 2013, as compared to \$0.21 and \$0.43 for the three and six months ended June 30, 2012. Operating earnings per diluted common share, defined as earnings available to common shareholders before net gains or losses on junior subordinated debentures carried at fair value, net of tax and merger related expenses, net of tax, divided by the same diluted share total used in determining diluted earnings per common share, were \$0.24 and \$0.46 for the three and six months ended June 30, 2013, as compared to operating income per diluted common share of \$0.21 and \$0.44 for the three and six months ended June 30, 2012. Operating income per diluted share is considered a “non-GAAP” financial measure. More information regarding this measurement and reconciliation to the comparable GAAP measurement is provided under the heading Results of Operations - Overview below.

Net interest margin, on a tax equivalent basis, decreased to 3.73% and 3.75% for the three and six months ended June 30, 2013, compared to 4.06% and 4.07% for the three and six months ended June 30, 2012. The decrease in net interest margin resulted from the decline in non-covered loan yields, the decline in investment yields, an increase in interest bearing cash, the decrease in average investment balances and in average covered loan balances, partially offset by the increase in average non-covered loans outstanding, the increase in loan disposal gains from the covered loan portfolio, and the decrease in the cost of interest bearing deposits. Excluding the impact of loan disposal gains from the covered loan portfolio and interest and fee reversals on non-accrual loans, our adjusted net interest margin was 3.57% and 3.63% for the three and six months ended June 30, 2013, as compared to adjusted net interest margin of 3.96% and 3.98% for the three and six months ended June 30, 2012. Adjusted net interest margin is considered a “non-GAAP” financial measure. More information regarding this measurement and reconciliation to the comparable GAAP measurement is provided under the heading Results of Operations - Overview below.

•The provision for non-covered loan and lease losses was \$3.0 million and \$10.0 million for the three and six months ended June 30, 2013, as compared to the \$6.6 million and \$9.8 million recognized for the three and six months ended June 30, 2012. This resulted primarily from a decrease in net charge-offs as a result of resolution of non-performing

loans.

Mortgage banking revenue was \$24.3 million and \$47.9 million for the three and six months ended June 30, 2013, compared to \$15.6 million and \$28.7 million for the three and six months ended June 30, 2012. Closed mortgage volume increased 24% in the current year to date over the prior year same period due to ongoing increased purchase and refinancing activity relating to historically low interest rates.

70

Table of Contents

Total gross non-covered loans and leases were \$6.8 billion as of June 30, 2013, an increase of \$106.0 million, or 1.6%, as compared to December 31, 2012. This increase is principally attributable to commercial lines of credit production and utilization.

Total deposits were \$9.0 billion as of June 30, 2013, a decrease of \$423.0 million, or 4.5%, as compared to December 31, 2012. The decline resulted primarily from timing differences on normal recurring deposit inflows and the transfer of balances to securities sold under agreements to repurchase and from anticipated run-off of higher priced money market, time and public deposits.

Total consolidated assets were \$11.4 billion as of June 30, 2013, compared to \$11.8 billion at December 31, 2012.

Non-covered, non-performing assets decreased to \$68.1 million, or 0.60% of total assets, as of June 30, 2013, as compared to \$88.1 million, or 0.75% of total assets, as of December 31, 2012. Non-covered, non-performing loans decreased to \$54.9 million, or 0.81% of total non-covered loans, as of June 30, 2013, as compared to \$71.0 million, or 1.06% of total non-covered loans as of December 31, 2012. Non-accrual loans have been written-down to their estimated net realizable values.

Net charge-offs on non-covered loans were \$1.8 million for the three months ended June 30, 2013, or 0.11% of average non-covered loans and leases (annualized), as compared to net charge-offs of \$9.7 million, or 0.64% of average non-covered loans and leases (annualized), for the three months ended June 30, 2012. Net charge-offs on non-covered loans were \$9.5 million for the six months ended June 30, 2013, or 0.29% of average non-covered loans and leases (annualized), as compared to net charge-offs of \$19.2 million, or 0.64% of average non-covered loans and leases (annualized), for the six months ended June 30, 2012.

Total risk based capital increased to 16.7% as of June 30, 2013, compared to 16.5% as of December 31, 2012, due to the decrease in risk-weighted assets as compared to December 31, 2012.

Cash dividends declared in the second quarter of 2013 were \$0.20 per common share, compared to cash dividends declared in the second quarter of 2012 of \$0.09 per common share. A special cash dividend of \$0.05 per common share was declared and paid during the second quarter of 2013.

Summary of Critical Accounting Policies

Our significant accounting policies are described in Note 1 to the Consolidated Financial Statements for the year ended December 31, 2012 included in the Form 10-K filed with the SEC on February 15, 2013. Not all of these critical accounting policies require management to make difficult, subjective or complex judgments or estimates. Management believes that the following policies would be considered critical under the SEC's definition.

Allowance for Loan and Lease Losses and Reserve for Unfunded Commitments

The Bank performs regular credit reviews of the loan and lease portfolio to determine the credit quality and adherence to underwriting standards. When loans and leases are originated, they are assigned a risk rating that is reassessed periodically during the term of the loan through the credit review process. The Bank's risk rating methodology assigns risk ratings ranging from 1 to 10, where a higher rating represents higher risk. The 10 risk rating categories are a primary factor in determining an appropriate amount for the allowance for loan and lease losses. The Bank has a management Allowance for Loan and Lease Losses ("ALLL") Committee, which is responsible for, among other things, regularly reviewing the ALLL methodology, including loss factors, and ensuring that it is designed and applied in accordance with generally accepted accounting principles. The ALLL Committee reviews and approves loans and leases recommended for impaired status. The ALLL Committee also approves removing loans and leases from

impaired status. The Bank's Audit and Compliance Committee provides board oversight of the ALLL process and reviews and approves the ALLL methodology on a quarterly basis.

Each risk rating is assessed an inherent credit loss factor that determines the amount of the allowance for loan and lease losses provided for that group of loans and leases with similar risk rating. Credit loss factors may vary by region based on management's belief that there may ultimately be different credit loss rates experienced in each region.

Regular credit reviews of the portfolio also identify loans that are considered potentially impaired. Potentially impaired loans are referred to the ALLL Committee which reviews and approves designated loans as impaired. A loan is considered impaired when based on current information and events, we determine that we will probably not be able to collect all amounts due according to the loan contract, including scheduled interest payments. When we identify a loan as impaired, we measure the

Table of Contents

impairment using discounted cash flows, except when the sole remaining source of the repayment for the loan is the liquidation of the collateral. In these cases, we use the current fair value of the collateral, less selling costs, instead of discounted cash flows. If we determine that the value of the impaired loan is less than the recorded investment in the loan, we either recognize an impairment reserve as a specific component to be provided for in the allowance for loan and lease losses or charge-off the impaired balance on collateral dependent loans if it is determined that such amount represents a confirmed loss. The combination of the risk rating-based allowance component and the impairment reserve allowance component lead to an allocated allowance for loan and lease losses.

The Bank may also maintain an unallocated allowance amount to provide for other credit losses inherent in a loan and lease portfolio that may not have been contemplated in the credit loss factors. This unallocated amount generally comprises less than 5% of the allowance, but may be maintained at higher levels during times of economic conditions characterized by falling real estate values. The unallocated amount is reviewed periodically based on trends in credit losses, the results of credit reviews and overall economic trends.

The reserve for unfunded commitments (“RUC”) is established to absorb inherent losses associated with our commitment to lend funds, such as with a letter or line of credit. The adequacy of the ALLL and RUC are monitored on a regular basis and are based on management's evaluation of numerous factors. These factors include the quality of the current loan portfolio; the trend in the loan portfolio's risk ratings; current economic conditions; loan concentrations; loan growth rates; past-due and non-performing trends; evaluation of specific loss estimates for all significant problem loans; historical charge-off and recovery experience; and other pertinent information.

Management believes that the ALLL was adequate as of June 30, 2013. There is, however, no assurance that future loan losses will not exceed the levels provided for in the ALLL and could possibly result in additional charges to the provision for loan and lease losses. In addition, bank regulatory authorities, as part of their periodic examination of the Bank, may require additional charges to the provision for loan and lease losses in future periods if warranted as a result of their review. Approximately 77% of our loan portfolio is secured by real estate, and a significant decline in real estate market values may require an increase in the allowance for loan and lease losses.

Covered Loans and FDIC Indemnification Asset

Loans acquired in a FDIC-assisted acquisition that are subject to a loss-share agreement are referred to as “covered loans” and reported separately in our statements of financial condition. Acquired loans were aggregated into pools based on individually evaluated common risk characteristics and aggregate expected cash flows were estimated for each pool. A pool is accounted for as a single asset with a single interest rate, cumulative loss rate and cash flow expectation. The cash flows expected to be received over the life of the pool were estimated by management with the assistance of a third party valuation specialist. These cash flows were input into a FASB ASC 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality (“ASC 310-30”), compliant accounting loan system which calculates the carrying values of the pools and underlying loans, book yields, effective interest income and impairment, if any, based on actual and projected events. Default rates, loss severity, and prepayment speeds assumptions are periodically reassessed and updated within the accounting model to update our expectation of future cash flows. The excess of the cash flows expected to be collected over a pool's carrying value is considered to be the accretable yield and is recognized as interest income over the estimated life of the loan or pool using the effective yield method. The accretable yield may change due to changes in the timing and amounts of expected cash flows. Changes in the accretable yield are disclosed quarterly.

The Company has elected to account for amounts receivable under the loss-share agreement as an indemnification asset in accordance with FASB ASC 805, Business Combinations (“ASC 805”). The FDIC indemnification asset is initially recorded at fair value, based on the discounted value of expected future cash flows under the loss-share agreement. The difference between the carrying value and the undiscounted cash flows the Company expects to

collect from the FDIC will be accreted or amortized into non-interest income over the life of the FDIC indemnification asset, which is maintained at the loan pool level.

Mortgage Servicing Rights (“MSR”)

The Company determines its classes of servicing assets based on the asset type being serviced along with the methods used to manage the risk inherent in the servicing assets, which includes the market inputs used to value the servicing assets. The Company measures its residential mortgage servicing assets at fair value and reports changes in fair value through earnings. Fair value adjustments encompass market-driven valuation changes and the runoff in value that occurs from the passage of time, which are separately reported. Under the fair value method, the MSR is carried in the balance sheet at fair value and the changes in fair value are reported in earnings under the caption mortgage banking revenue in the period in which the change occurs.

Table of Contents

Retained mortgage servicing rights are measured at fair values as of the date of sale. We use quoted market prices when available. Subsequent fair value measurements are determined using a discounted cash flow model. In order to determine the fair value of the MSR, the present value of expected future cash flows is estimated. Assumptions used include market discount rates, anticipated prepayment speeds, delinquency and foreclosure rates, and ancillary fee income. This model is periodically validated by an independent external model validation group. The model assumptions and the MSR fair value estimates are also compared to observable trades of similar portfolios as well as to MSR broker valuations and industry surveys, as available.

The expected life of the loan can vary from management's estimates due to prepayments by borrowers, especially when rates fall. Prepayments in excess of management's estimates would negatively impact the recorded value of the mortgage servicing rights. The value of the mortgage servicing rights is also dependent upon the discount rate used in the model, which we base on current market rates. Management reviews this rate on an ongoing basis based on current market rates. A significant increase in the discount rate would reduce the value of mortgage servicing rights. Additional information is included in Note 7 of the Notes to Consolidated Financial Statements.

Valuation of Goodwill and Intangible Assets

At June 30, 2013, we had \$683.0 million in goodwill and other intangible assets as a result of business combinations. Goodwill and other intangible assets with indefinite lives are not amortized but instead are periodically tested for impairment. Management performs an impairment analysis for the intangible assets with indefinite lives on an annual basis as of December 31. Additionally, goodwill and other intangible assets with indefinite lives are evaluated on an interim basis when events or circumstance indicate impairment potentially exists. The impairment analysis requires management to make subjective judgments. Events and factors that may significantly affect the estimates include, among others, competitive forces, customer behaviors and attrition, changes in revenue growth trends, cost structures, technology, changes in discount rates and specific industry and market conditions. There can be no assurance that changes in circumstances, estimates or assumption may result in additional impairment of all, or some portion of, goodwill.

Stock-based Compensation

In accordance with FASB ASC 718, Stock Compensation, we recognize expense in the income statement for the grant-date fair value of stock options and other equity-based forms of compensation issued to employees over the employees' requisite service period (generally the vesting period). The requisite service period may be subject to performance conditions. The fair value of each grant is estimated as of the grant date using the Black-Scholes option-pricing model or a Monte Carlo simulation pricing model. Management assumptions utilized at the time of grant impact the fair value of the option calculated under the pricing model, and ultimately, the expense that will be recognized over the life of the option. Additional information is included in Note 12 of the Notes to Consolidated Financial Statements.

Fair Value

FASB ASC 820, Fair Value Measurements and Disclosures, establishes a hierarchical disclosure framework associated with the level of pricing observability utilized in measuring financial instruments at fair value. The degree of judgment utilized in measuring the fair value of financial instruments generally correlates to the level of pricing observability. Financial instruments with readily available active quoted prices or for which fair value can be measured from actively quoted prices generally will have a higher degree of pricing observability and a lesser degree of judgment utilized in measuring fair value. Conversely, financial instruments rarely traded or not quoted will generally have little or no pricing observability and a higher degree of judgment utilized in measuring fair value.

Pricing observability is impacted by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established and the characteristics specific to the transaction. See Note 16 of the Notes to Consolidated Financial Statements for additional information about the level of pricing transparency associated with financial instruments carried at fair value.

Recent Accounting Pronouncements

In December 2011, the Financial Accounting Standards Board (the "FASB") issued ASU No. 2011-11, Disclosures about Offsetting Assets and Liabilities. ASU 2011-11 requires an entity to offset, and present as a single net amount, a recognized eligible asset and a recognized eligible liability when it has an unconditional and legally enforceable right of setoff and intends either to settle the asset and liability on a net basis or to realize the asset and settle the liability simultaneously. ASU No. 2011-11 further requires an entity to disclose information about offsetting and related arrangements to enable users of its financial statements to understand the effect of those arrangements on its financial position. The amendments are effective for

Table of Contents

annual and interim reporting periods beginning on or after January 1, 2013. The adoption of ASU No. 2011-11 did not have a material impact on the Company's consolidated financial statements.

In July 2012, the FASB issued ASU No. 2012-02, Testing Indefinite-Lived Intangible Assets for Impairment. Under ASU No. 2012-02, a company testing indefinite-lived intangibles for impairment now has the option to assess qualitative factors to determine whether the existence of events and circumstances indicates that it is more likely than not that the indefinite-lived intangible asset is impaired. If, after assessing the totality of events and circumstances, an entity concludes that it is not more likely than not that the indefinite-lived intangible asset is impaired, then the entity is not required to take further action. However, if an entity concludes otherwise, then it is required to determine the fair value of the indefinite-lived intangible asset and perform the quantitative impairment test by comparing the fair value with the carrying amount in accordance with current guidance. An entity also has the option to bypass the qualitative assessment for any indefinite-lived intangible asset in any period and proceed directly to performing the quantitative impairment test. An entity will be able to resume performing the qualitative assessment in any subsequent period. The amendments are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after September 15, 2012. The adoption of ASU No. 2012-02 did not have a material impact on the Company's consolidated financial statements.

In October 2012, the FASB issued ASU No. 2012-06, Subsequent Accounting for an Indemnification Asset Recognized at the Acquisition Date as a Result of a Government-Assisted Acquisition of a Financial Institution. ASU No. 2012-06 clarifies that when an entity recognizes an indemnification asset as a result of a government-assisted acquisition of a financial institution and subsequently, a change in the cash flows expected to be collected on the indemnification asset occurs, as a result of a change in cash flows expected to be collected on the assets subject to indemnification, the reporting entity should subsequently account for the change in the measurement of the indemnification asset on the same basis as the change in the assets subject to indemnification. Any amortization of changes in value should be limited to the contractual term of the indemnification agreement. The amendments are effective for annual and interim reporting periods beginning on or after December 15, 2012. The adoption of ASU No. 2012-06 did not have a material impact on the Company's consolidated financial statements.

In January 2013, the FASB issued ASU No. 2013-01, Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities. ASU No. 2013-01 clarifies that ASU No. 2011-11 applies only to derivatives, including bifurcated embedded derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending transactions that are either offset or subject to an enforceable master netting arrangement or similar agreement. Entities with other types of financial assets and financial liabilities subject to a master netting arrangement or similar agreement are no longer subject to the disclosure requirements in ASU No. 2011-11. The amendments are effective for annual and interim reporting periods beginning on or after January 1, 2013. The adoption of ASU No. 2013-01 did not have a material impact on the Company's consolidated financial statements.

In February 2013, the FASB issued ASU No. 2013-02, Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. ASU No. 2013-02 requires an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component and to present either on the face of the statement where net income is presented, or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income, but only if the amount reclassified is required to be reclassified to net income in its entirety in the same reporting period. The amendments are effective for annual and interim reporting periods beginning on or after December 15, 2012. The adoption of ASU No. 2013-02 did not have a material impact on the Company's consolidated financial statements.

In July 2013, the FASB issued ASU No. 2013-10, Inclusion of the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate) as a Benchmark Interest Rate for Hedge Accounting Purposes. ASU No. 2013-10 permits the use of the Fed Funds Effective Swap Rate (OIS) to be used as a U.S. benchmark interest rate for hedge account purposes. The amendment is effective prospectively for qualifying new or redesignated hedging relationships entered into on or after July 17, 2013. The adoption of ASU No. 2013-10 is not expected to have a material impact on the Company's

consolidated financial statements.

74

Table of Contents

In July 2013, the FASB issued ASU No. 2013-11, Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists. ASU No. 2013-11 requires an entity to present an unrecognized tax benefit, or a portion of an unrecognized tax benefit, as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, except to the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. No new recurring disclosures are required. The amendments are effective for annual and interim reporting periods beginning on or after December 15, 2013 and are to be applied prospectively to all unrecognized tax benefits that exist at the effective date. Retrospective application is permitted. The adoption of ASU No. 2013-11 is not expected to have a material impact on the Company's consolidated financial statements.

Results of Operations

Overview

For the three months ended June 30, 2013, net earnings available to common shareholders were \$26.1 million, or \$0.23 per diluted common share, as compared to net earnings available to common shareholders of \$23.1 million, or \$0.21 per diluted common share for the three months ended June 30, 2012. For the six months ended June 30, 2013, net earnings available to common shareholders were \$49.2 million, or \$0.44 per diluted common share, as compared to net earnings available to common shareholders of \$48.5 million, or \$0.43 per diluted common share for the six months ended June 30, 2012. The increase in net earnings for the three and six months ended June 30, 2013 compared to the same periods of the prior year is principally attributable to increased non-interest income and decreased provision for loan losses, partially offset by decreased net interest income.

Umpqua recognizes gains or losses on our junior subordinated debentures carried at fair value resulting from the estimated market credit risk adjusted spread and changes in interest rates that do not directly correlate with the Company's operating performance. Also, Umpqua incurs significant expenses related to the completion and integration of mergers and acquisitions. Additionally, we may recognize goodwill impairment losses that have no direct effect on the Company's or the Bank's cash balances, liquidity, or regulatory capital ratios. Lastly, Umpqua may recognize one-time bargain purchase gains on certain FDIC-assisted acquisitions that are not reflective of the Umpqua's on-going earnings power. Accordingly, management believes that our operating results are best measured on a comparative basis excluding the impact of gains or losses on junior subordinated debentures measured at fair value, net of tax, merger-related expenses, net of tax, and other charges related to business combinations such as goodwill impairment charges or bargain purchase gains, net of tax. We define operating earnings as earnings available to common shareholders before gains or losses on junior subordinated debentures carried at fair value, net of tax, bargain purchase gains on acquisitions, net of tax, merger related expenses, net of tax, and goodwill impairment, and we calculate operating earnings per diluted share by dividing operating earnings by the same diluted share total used in determining diluted earnings per common share.

The following table provides the reconciliation of earnings available to common shareholders (GAAP) to operating earnings (non-GAAP), and earnings per diluted common share (GAAP) to operating earnings per diluted share (non-GAAP) for the three and six months ended June 30, 2013 and 2012:

Reconciliation of Net Earnings Available to Common Shareholders to Operating Earnings

Table of Contents

(in thousands, except per share data)

	Three months ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Net earnings available to common shareholders	\$26,056	\$23,115	\$49,234	\$48,451
Adjustments:				
Net loss on junior subordinated debentures carried at fair value, net of tax	328	328	653	657

Merger-related expenses, net of tax	0.01	—	0.01	—
Operating earnings	\$0.24	\$0.21	\$0.46	\$0.44

Management believes adjusted net interest income and adjusted net interest margin are useful financial measures because they enable investors to evaluate the underlying growth or compression in these values excluding interest income adjustments related to credit quality. Management uses these measures to evaluate adjusted net interest income operating results exclusive of credit costs, in order to monitor our effectiveness in growing higher interest yielding assets and managing our cost of interest bearing liabilities over time. Adjusted net interest income is calculated as net interest income, adjusting tax exempt interest income to its taxable equivalent, adding back interest and fee reversals related to new non-accrual loans during the period, and deducting the interest income gains recognized from loan disposition activities within covered loan pools. Adjusted net interest margin is calculated by dividing annualized adjusted net interest income by a period's average interest earning assets. Adjusted net interest income and adjusted net interest margin are considered "non-GAAP" financial measures. Although we believe the presentation of non-GAAP financial measures provides a better indication of our operating performance, readers of this report are urged to review the GAAP results as presented in the Financial Statements (unaudited) in Item 1.

The following table presents a reconciliation of net interest income to adjusted net interest income and net interest margin to adjusted net interest margin for the three and six months ended June 30, 2013 and 2012:

Reconciliation of Net Interest Income to Adjusted Net Interest Income and Net Interest Margin to Adjusted Net Interest Margin

(in thousands, except per share data)

	Three months ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Net interest income - tax equivalent basis (1)	\$95,046	\$102,165	\$190,405	\$205,671
Adjustments:				
Interest and fee reversals on non-accrual loans	33	317	1,118	963
Covered loan disposal gains	(4,237)	(2,926)	(7,391)	(5,713)
Adjusted net interest income - tax equivalent basis (1)	\$90,842	\$99,556	\$184,132	\$200,921
Average interest earning assets	\$10,218,611	\$10,118,420	\$10,234,539	\$10,157,875
Net interest margin - consolidated (1)	3.73	% 4.06	% 3.75	% 4.07

Adjusted net interest margin - consolidated (1)	3.57	% 3.96	% 3.63	% 3.98	%
---	------	--------	--------	--------	---

(1) Tax-exempt income has been adjusted to a tax equivalent basis at a 35% tax rate. The amount of such adjustment was an addition to recorded income of approximately \$1.2 million and \$1.2 million for the three months ended June 30, 2013 and 2012, respectively, and \$2.3 million and \$2.3 million for the six months ended June 30, 2013 and 2012, respectively.

Table of Contents

The following table presents the returns on average assets, average common shareholders' equity and average tangible common shareholders' equity for the three and six months ended June 30, 2013 and 2012. For each of the periods presented, the table includes the calculated ratios based on reported net earnings available to common shareholders and operating income as shown in the table above. Our return on average common shareholders' equity is negatively impacted as the result of capital required to support goodwill. To the extent this performance metric is used to compare our performance with other financial institutions that do not have merger and acquisition-related intangible assets, we believe it beneficial to also consider the return on average tangible common shareholders' equity. The return on average tangible common shareholders' equity is calculated by dividing net earnings available to common shareholders by average shareholders' common equity less average goodwill and intangible assets, net (excluding MSRs). The return on average tangible common shareholders' equity is considered a non-GAAP financial measure and should be viewed in conjunction with the return on average common shareholders' equity.

Return on Average Assets, Common Shareholders' Equity and Tangible Common Shareholders' Equity

(dollars in thousands)

	Three months ended June 30,		Six months ended June 30,		
	2013	2012	2013	2012	
Returns on average assets:					
Net earnings available to common shareholders	0.91	% 0.82	% 0.87	% 0.85	%
Operating earnings	0.94	% 0.83	% 0.90	% 0.87	%
Returns on average common shareholders' equity:					
Net earnings available to common shareholders	6.04	% 5.48	% 5.74	% 5.77	%
Operating earnings	6.23	% 5.58	% 5.98	% 5.87	%
Returns on average tangible common shareholders' equity:					
Net earnings available to common shareholders	10.00	% 9.12	% 9.50	% 9.63	%
Operating earnings	10.31	% 9.28	% 9.89	% 9.79	%
Calculation of average common tangible shareholders' equity:					
Average common shareholders' equity	\$1,728,354	\$1,695,157	\$1,729,440	\$1,687,345	
Less: average goodwill and other intangible assets, net	(683,446)	(675,312)	(684,035)	(675,912)	
Average tangible common shareholders' equity	\$1,044,908	\$1,019,845	\$1,045,405	\$1,011,433	

Additionally, management believes tangible common equity and the tangible common equity ratio are meaningful measures of capital adequacy. Umpqua believes the exclusion of certain intangible assets in the computation of tangible common equity and tangible common equity ratio provides a meaningful base for period-to-period and company-to-company comparisons, which management believes will assist investors in analyzing the operating results and capital of the Company. Tangible common equity is calculated as total shareholders' equity less goodwill and other intangible assets, net (excluding MSRs). In addition, tangible assets are total assets less goodwill and other intangible assets, net (excluding MSRs). The tangible common equity ratio is calculated as tangible common shareholders' equity divided by tangible assets. The tangible common equity and tangible common equity ratio is considered a non-GAAP financial measure and should be viewed in conjunction with the total shareholders' equity and the total shareholders' equity ratio. The following table provides a reconciliation of ending shareholders' equity

(GAAP) to ending tangible common equity (non-GAAP), and ending assets (GAAP) to ending tangible assets (non-GAAP) as of June 30, 2013 and December 31, 2012:

Reconciliations of Total Shareholders' Equity to Tangible Common Shareholders' Equity and Total Assets to Tangible Assets

(dollars in thousands)

Tangible assets	\$10,709,237	\$11,110,112	
Tangible common equity ratio	9.64	% 9.35	%

Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied, and are not audited. Although we believe these non-GAAP financial measure are frequently used by stakeholders in the evaluation of a company, they have limitations as analytical tools, and should not be considered in isolation or as a substitute for analyses of results as reported under GAAP.

Net Interest Income

Net interest income is the largest source of our operating income. Net interest income for the three months ended June 30, 2013 was \$93.9 million, a decrease of \$7.1 million or 7.0% compared to the same period in 2012. Net interest income for the six months ended June 30, 2013 was \$188.1 million, a decrease of \$15.3 million or 7.5% compared to the same period in 2012. The results for the three and six months ended June 30, 2013 as compared to the same periods in 2012 are attributable to a decrease in outstanding average covered loans and investment securities, and a decrease in net interest margin, partially offset by an increase in average non-covered loans and leases and a decrease in average interest-bearing liabilities.

The net interest margin (net interest income as a percentage of average interest-earning assets) on a fully tax equivalent basis was 3.73% for the three months ended June 30, 2013, a decrease of 33 basis points as compared to the same period in 2012. The net interest margin on a fully tax equivalent basis was 3.75% for the six months ended June 30, 2013, a decrease of 32 basis points as compared to the same period in 2012. The decrease in net interest margin for the three and six months ended June 30, 2013 as compared to the same period in the prior year primarily resulted from a decline in non-covered loan yields, the decrease in average covered loans outstanding, a decline in investment yields, and an increase in average interest bearing cash, partially offset by an increase in average non-covered loans outstanding, an increase in loan disposal gains from the covered loan portfolio, a decline in the cost of interest-bearing deposits, and a decrease in average interest-bearing liabilities.

Loan disposal related activities within the covered loan portfolio, either through loans being paid off in full or transferred to other real estate owned ("OREO"), result in gains within covered loan interest income to the extent assets received in satisfaction of debt (such as cash or the net realizable value of OREO received) exceeds the allocated carrying value of the loan disposed of from the pool. Loan disposal activities contributed \$4.2 million of interest income for the three months ended June 30, 2013 compared to \$2.9 million of interest income during the three months ended June 30, 2012. Loan disposal activities contributed \$7.4 million of interest income for the six months ended June 30, 2013 compared to \$5.7 million of interest income during the six months ended June 30, 2012.

Net interest income for the three and six months ended June 30, 2013 was negatively impacted by the \$33,000 and \$1.1 million reversal of interest and fee income on non-covered, non-accrual loans, as compared to the \$0.3 million and \$1.0 million reversal of interest and fee income during the three and six months ended June 30, 2012. Excluding the impact of covered loan disposal gains and interest and fee income reversals on non-covered, non-accrual loans, tax

equivalent net interest margin would have been 3.57% and 3.63% for the three and six months ended June 30, 2013 and 3.96% and 3.98% for the three and six months ended June 30, 2012.

Partially offsetting the decrease in net interest margin in the current quarter as compared to the same period of the prior year is the continued reduction in the cost of interest-bearing liabilities, specifically interest-bearing deposits. The total cost of interest-bearing deposits for the three and six months ended June 30, 2013 was 0.35% and 0.34%, representing a 12 and 14 basis point decrease compared to the three and six months ended June 30, 2012.

Table of Contents

Our net interest income is affected by changes in the amount and mix of interest-earning assets and interest-bearing liabilities, as well as changes in the yields earned on interest-earning assets and rates paid on deposits and borrowed funds. The following tables present condensed average balance sheet information, together with interest income and yields on average interest-earning assets, and interest expense and rates paid on average interest-bearing liabilities for the three and six months ended June 30, 2013 and 2012:

NET INTEREST INCOME TO EARNING ASSETS OR NET INTEREST MARGIN (1), (2)			3.75 %				4.07 %	

(1) Non-covered non-accrual loans, leases, and mortgage loans held for sale are included in the average balance.

Tax-exempt income has been adjusted to a tax equivalent basis at a 35% tax rate. The amount of such adjustment (2) was an addition to recorded income of approximately \$2.3 million and \$2.3 million for the six months ended June 30, 2013 and 2012, respectively.

The following tables sets forth a summary of the changes in tax equivalent net interest income due to changes in average asset and liability balances (volume) and changes in average rates (rate) for the three and six months ended June 30, 2013 as compared to the same periods in 2012. Changes in tax equivalent interest income and expense, which

are not attributable specifically to either volume or rate, are allocated proportionately between both variances.

Table of Contents

Provision for Loan and Lease Losses

The provision for non-covered loan and lease losses was \$3.0 million and \$10.0 million and for the three and six months ended June 30, 2013, as compared to \$6.6 million and \$9.8 million for the same periods in 2012. As an annualized percentage of average outstanding loans, the provision for loan and lease losses recorded for the three and six months ended June 30, 2013 was 0.18% and 0.30% as compared to 0.44% and 0.33% in the same periods in 2012.

The decrease in the provision for loan and lease losses in the three and six months ended June 30, 2013 as compared to the same periods in 2012 is principally attributable to a decrease in net charge-offs as a result of the resolution of non-performing loans.

The Company recognizes the charge-off of impairment reserves on impaired loans in the period they arise for collateral dependent loans. Therefore, the non-covered, non-accrual loans of \$48.9 million as of June 30, 2013 have already been written-down to their estimated fair value, less estimated costs to sell, and are expected to be resolved with no additional material loss, absent further decline in market prices. Depending on the characteristics of a loan, the fair value of collateral is estimated by obtaining external appraisals.

The provision for non-covered loan and lease losses is based on management's evaluation of inherent risks in the loan portfolio and a corresponding analysis of the allowance for non-covered loan and lease losses. Additional discussion on loan quality and the allowance for non-covered loan and lease losses is provided under the heading Asset Quality and Non-Performing Assets below.

The recapture of provision for covered loan and lease losses was \$3.1 million and \$2.8 million for the three and six months ended June 30, 2013, as compared to the provision for covered loan and lease losses of \$1.4 million and \$1.4 million for the same periods in 2012. Provisions for covered loan and leases are recognized subsequent to acquisition to the extent it is probable we will be unable to collect all cash flows expected at acquisition plus additional cash flows expected to be collected arising from changes in estimates after acquisition, considering both the timing and amount of those expected cash flows. Provisions may be required when determined losses of unpaid principal incurred exceed previous loss expectations to-date, or future cash flows previously expected to be collectible are no longer probable of collection. Provisions for covered loan and lease losses, including amounts advanced subsequent to acquisition, are not reflected in the allowance for non-covered loan and lease losses, rather as a valuation allowance netted against the carrying value of the covered loan and lease balance accounted for under ASC 310-30, in accordance with applicable guidance.

Non-Interest Income

Non-interest income for the three months ended June 30, 2013 was \$34.5 million, an increase of \$5.6 million, or 19.3%, as compared to the same period in 2012. Non-interest income for the six months ended June 30, 2013 was \$68.5 million, an increase of \$12.3 million, or 22%, as compared to the same period in 2012. The following table presents the key components of non-interest income for the three and six months ended June 30, 2013 and 2012:

Table of Contents

Non-Interest Income

(in thousands)

	Three months ended June 30,					Six months ended June 30,				
	2013	2012	Change Amount	Change Percent		2013	2012	Change Amount	Change Percent	
Service charges on deposit accounts	\$7,478	\$7,190	\$288	4	%	\$14,470	\$13,856	\$614	4	%

Gain on investment securities, net	8	1,030	(1,022)	(99)	%	15	1,178	(1,163)	(99)	%
Loss on junior subordinated debentures carried at fair value	(547)	(547)	—	—	%	(1,089)	(1,095)	6	(1)	%
Change in FDIC indemnification asset	(8,294)	(4,040)	(4,254)	105	%	(13,367)	(5,885)	(7,482)	127	%
Other income	7,901	6,120	1,781	29	%	13,328	12,910	418	3	%
Total	\$34,497	\$28,926	\$5,571	19	%	\$68,512	\$56,163	\$12,349	22	%

The increase in deposit service charges in the three and six months ended June 30, 2013 compared to the same periods in 2012 is primarily the result of the acquisition of Circle Bank ("Circle") in the fourth quarter of 2012.

Mortgage banking revenue for the three and six months ended June 30, 2013 increased due to an increase in purchase and refinancing activity, compared to the same periods of the prior year. Closed mortgage volume for the three and six months ended June 30, 2013 was \$599.3 million and \$1.1 billion representing a 22.6% and 24.3% increase compared to the same periods of the prior year.

For the three and six months ended June 30, 2013 we recorded a loss of \$547,000 and \$1.1 million, as compared to the loss of \$547,000 and \$1.1 million for the three and six months ended June 30, 2012, in the change of fair value on the junior subordinated debentures recorded at fair value. Additional information on the junior subordinated debentures carried at fair value is included in Note 9 of the Notes to Condensed Consolidated Financial Statements and under the heading Junior Subordinated Debentures.

The change in FDIC indemnification asset represents a change in cash flows expected to be recoverable under the loss-share agreements entered into with the FDIC in connection with FDIC-assisted acquisitions.

Other income for the three months ended June 30, 2013 compared to the same period in the prior year changed primarily due to gain on sale of loans of \$2.0 million. Other income for the six months ended June 30, 2013 compared to the same period in the prior year changed primarily due to gain on sale of loans of \$2.7 million partially offset by a reduction in debt capital market revenue (related to an interest rate swap program with commercial banking customers to facilitate their risk management strategies) of \$1.4 million.

Non-Interest Expense

Non-interest expense for the three months ended June 30, 2013 was \$87.9 million, an increase of \$1.0 million, or 1.1%, as compared to the same period in 2012. Non-interest expense for the six months ended June 30, 2013 was \$173.7 million, a decrease of \$0.9 million, or 1.1%, as compared to the same period in 2012. The following table presents the key elements of non-interest expense for the three and six months ended June 30, 2013 and 2012:

Table of Contents

Non-Interest Expense

(in thousands)

	Three months ended June 30,					Six months ended June 30,

Other expenses	6,542	7,188	(646)	(9)	%	10,849	14,613	(3,764)	(26)	%
Total	\$87,931	\$86,936	\$995	1	%	\$173,693	\$174,632	\$(939)	(1)	%

Salaries and employee benefits costs increased \$2.1 million in the three months ended June 30, 2013, as compared to the same period prior year. Salaries and employee benefits costs increased \$6.5 million in the six months ended June 30, 2013, as compared to the same period prior year. For both periods, the increase relates to an increase of 41 full-time equivalent employees, including 39 employees associated with the Circle acquisition, in addition to an increase in variable compensation costs related to the Home Lending group.

Net occupancy and equipment expense increased \$1.5 million for the three months ended June 30, 2013, and \$2.7 million for the six months ended June 30, 2013 as compared to the same periods in the prior year as a result of the addition of 12 stores, compared to the same period prior year, including 6 new locations from the Circle acquisition.

FDIC assessments decreased for the three and six months ended June 30, 2013 as compared to the same periods of the prior year primarily as a result of a decrease in the assessment rate, partially offset by an increase in the assessment base.

In the three and six months ended June 30, 2013, the Company recognized a net gain (which includes gains on sale and valuation adjustments) on non-covered other real estate owned ("OREO") properties of \$146,000 and \$276,000, as compared to a net loss (which includes loss on sale and valuation adjustments) on non-covered OREO properties of \$0.9 million and \$4.1 million in the same periods a year ago. Included within the results for the three and six months ended June 30, 2013, the Company recognized a net gain (which includes gains on sale and valuation adjustments) on covered OREO properties of \$62,000 and a net loss of \$222,000 as compared to net losses (which includes gains on sale and valuation adjustments) on covered OREO properties of \$169,000 and \$2.6 million in the same periods a year ago. This is primarily the result of an increase in real estate values, allowing for better realization of market values of

existing OREO properties.

We incur significant expenses in connection with the completion and integration of bank acquisitions that are not capitalizable. The merger-related expense incurred in 2013 related primarily to the acquisition of Circle in the fourth quarter of 2012, the acquisition of FinPac on July 1, 2013, and other merger and acquisition related activities. Classification of expenses as merger-related is done in accordance with the provisions of a written policy approved by our Board of Directors.

Table of Contents

Other expenses decreased \$0.6 million and \$3.8 million for the three and six months ended June 30, 2013 as compared to the same periods in the prior year primarily as a result of a decrease in loan and OREO workout related costs, partially offset by an increase in state and local taxes and an FDIC loss sharing claw back liability expense recorded due to better than expected performance of the Evergreen FDIC assisted acquisition.

Income Taxes

Our consolidated effective tax rate as a percentage of pre-tax income for the three and six months ended June 30, 2013 was 35.2% and 34.5% as compared to 33.4% and 33.8% for the three and six months ended June 30, 2012. The effective tax rates differed from the federal statutory rate of 35% and the apportioned state rate of 4.7% (net of the federal tax benefit) principally because of non-taxable income arising from bank-owned life insurance, income on tax-exempt investment securities and tax credits arising from low income housing investments.

FINANCIAL CONDITION

Investment Securities

Trading securities consist of securities held in inventory by Umpqua Investments for sale to its clients and securities invested in trust for the benefit of certain executives or former employees of acquired institutions as required by agreements. Trading securities were \$3.9 million at June 30, 2013, as compared to \$3.7 million at December 31, 2012. This increase is principally attributable to an increase in Umpqua Investments' inventory of trading securities.

Investment securities available for sale were \$2.1 billion as of June 30, 2013 compared to \$2.6 billion at December 31, 2012. Paydowns of \$530.9 million, amortization of net purchase price premiums of \$20.5 million and a decrease in fair value of investments securities available for sale of \$41.2 million were partially offset by purchases of \$51.2 million of investment securities available for sale.

Investment securities held to maturity were \$3.7 million as of June 30, 2013 as compared to holdings of \$4.5 million at December 31, 2012. The change primarily relates to paydowns and maturities of investment securities held to maturity of \$0.9 million.

The following table presents the available for sale and held to maturity investment securities portfolio by major type as of June 30, 2013 and December 31, 2012:

Investment Securities Composition

(dollars in thousands)

	Investment Securities Available for Sale					
	June 30, 2013		December 31, 2012			
	Fair Value	%	Fair Value	%		%
U.S. Treasury and agencies	\$285	—	% \$45,820	2		%

Residential mortgage-backed securities and collateralized mortgage obligations	1,839,028	88	% 2,313,376	88		%
Other debt securities	238	—	222	—		
Investments in mutual funds and other equity securities	2,004	—	2,086	—		
Total	\$2,083,755	100	% \$2,625,229	100		%

Table of Contents

	Investment Securities Held to Maturity					
	June 30, 2013			December 31, 2012		
	Amortized			Amortized		
	Cost	%		Cost	%	
Obligations of states and political subdivisions	\$—	—		% \$595	13	%
Residential mortgage-backed securities and collateralized mortgage obligations	3,741	100		% 3,946	87	%
Total	\$3,741	100		% \$4,541	100	%

We review investment securities on an ongoing basis for the presence of other-than-temporary impairment (“OTTI”) or permanent impairment, taking into consideration current market conditions, fair value in relationship to cost, extent and nature of the change in fair value, issuer rating changes and trends, whether we intend to sell a security or if it is likely that we will be required to sell the security before recovery of our amortized cost basis of the investment, which may be maturity, and other factors.

For debt securities, if we intend to sell the security or it is likely that we will be required to sell the security before recovering its cost basis, the entire impairment loss would be recognized in earnings as an OTTI. If we do not intend to sell the security and it is not likely that we will be required to sell the security but we do not expect to recover the entire amortized cost basis of the security, only the portion of the impairment loss representing credit losses would be recognized in earnings. The credit loss on a security is measured as the difference between the amortized cost basis and the present value of the cash flows expected to be collected. Projected cash flows are discounted by the original or current effective interest rate depending on the nature of the security being measured for potential OTTI.

The remaining impairment related to all other factors, the difference between the present value of the cash flows expected to be collected and fair value, is recognized as a charge to other comprehensive income (“OCI”). Impairment losses related to all other factors are presented as separate categories within OCI. For investment securities held to maturity, this amount is accreted over the remaining life of the debt security prospectively based on the amount and timing of future estimated cash flows. The accretion of the OTTI amount recorded in OCI will increase the carrying value of the investment, and would not affect earnings. If there is an indication of additional credit losses the security is reevaluated according to the procedures described above.

Gross unrealized losses in the available for sale investment portfolio was \$22.7 million at June 30, 2013. This consisted primarily of unrealized losses on residential mortgage-backed securities and collateralized mortgage obligations of \$19.3 million. The unrealized losses were primarily caused by interest rate increases subsequent to the purchase of the securities, and not credit quality. In the opinion of management, these securities are considered only temporarily impaired due to changes in market interest rates or the widening of market spreads subsequent to the initial purchase of the securities, and not due to concerns regarding the underlying credit of the issuers or the underlying collateral. Additional information about the investment portfolio is provided in Note 3 of the Notes to Condensed Consolidated Financial Statements.

Restricted Equity Securities

Restricted equity securities were \$32.1 million at June 30, 2013 and \$33.4 million at December 31, 2012. The decrease of \$1.3 million is attributable to stock redemptions by the Federal Home Loan Banks (“FHLB”) of San Francisco and Seattle during the period. Of the \$32.1 million at June 30, 2013, \$30.8 million represent the Bank’s investment in the FHLBs of Seattle and San Francisco. The remaining restricted equity securities represent investments in Pacific Coast Bankers’ Bancshares stock. FHLB stock is carried at par and does not have a readily determinable fair value. Ownership of FHLB stock is restricted to the FHLB and member institutions, and can only be

purchased and redeemed at par.

In September 2012, the FHLB of Seattle was notified by the Federal Housing Finance Agency (“Finance Agency”) that it is now classified as “adequately capitalized” as compared to the prior classification of “undercapitalized.” Under Finance Agency regulations, the FHLB of Seattle may repurchase excess capital stock under certain conditions; however it may not redeem stock or pay a dividend without Finance Agency approval.

Management periodically evaluates FHLB stock for other-than-temporary or permanent impairment. Management’s determination of whether these investments are impaired is based on its assessment of the ultimate recoverability of cost rather than by recognizing temporary declines in value. The Company has determined there is not an other-than-temporary impairment on the FHLB stock investment as of June 30, 2013.

Table of Contents

Loans and Leases

Non-Covered Loans and Leases

Total non-covered loans and leases outstanding at June 30, 2013 were \$6.8 billion, an increase of \$106.0 million as compared to year-end 2012. This increase is principally attributable to net loan originations of \$160.3 million and covered loans transferred to non-covered loans of \$10.6 million, partially offset by charge-offs of \$13.3 million, transfers to other real estate owned of \$7.0 million, and non-covered loans sold of \$53.3 million during the period. The following table presents the concentration distribution of our non-covered loan portfolio at June 30, 2013 and December 31, 2012.

Non-Covered Loan Concentrations

Covered Loans and Leases

Total covered loans and leases outstanding at June 30, 2013 were \$419.1 million, a decrease of \$58.0 million as compared to year-end 2012. This decrease is principally attributable to net loan paydowns and maturities of \$47.7 million and transfers of covered loans to non-covered loans of \$10.6 million. The following table presents the concentration distribution of our covered loan portfolio at June 30, 2013 and December 31, 2012.

The covered loans are subject to loss-sharing agreements with the Federal Deposit Insurance Corporation (the "FDIC"). Under the terms of the Evergreen Bank ("Evergreen") acquisition loss-sharing agreement, the FDIC will cover a substantial portion of any future losses on loans, related unfunded loan commitments, OREO and accrued interest on loans for up to 90 days. The FDIC will absorb 80% of losses and share in 80% of loss recoveries on the first \$90.0 million on covered assets and absorb 95% of losses and share in 95% of loss recoveries exceeding \$90.0 million, except for the Bank will incur losses up to \$30.2 million before the loss-sharing will commence. As of June 30, 2013, losses have exceeded \$30.2 million. The loss-sharing arrangements for non-single family residential and single family residential loans are in effect for 5 years and 10 years, respectively, and the loss recovery provisions are in effect for 8 years and 10 years, respectively, from the acquisition dates.

Under the terms of the Rainier Pacific Bank loss-sharing agreement, the FDIC will cover a substantial portion of any future losses on loans, related unfunded loan commitments, OREO and accrued interest on loans for up to 90 days. The FDIC will absorb 80% of losses and share in 80% of loss recoveries on the first \$95.0 million of losses on covered assets and absorb 95% of losses and share in 95% of loss recoveries exceeding \$95.0 million. The loss-sharing arrangements for non-single family residential and single family residential loans are in effect for 5 years and 10 years, respectively, and the loss recovery provisions are in effect for 8 years and 10 years, respectively, from the acquisition dates.

Under the terms of the Nevada Security Bank loss-sharing agreement, the FDIC will cover a substantial portion of any future losses on loans, related unfunded loan commitments, OREO and accrued interest on loans for up to 90 days. The FDIC will absorb 80% of losses and share in 80% of loss recoveries on all covered assets. The loss-sharing arrangements for non-single family residential and single family residential loans are in effect for 5 years and 10 years, respectively, and the loss recovery provisions are in effect for 8 years and 10 years, respectively, from the acquisition dates.

Discussion of and tables related to the covered loan segment is provided under the heading Asset Quality and Non-Performing Assets.

Asset Quality and Non-Performing Assets

Non-Covered Loans and Leases

Non-covered, non-performing loans, which include non-covered, non-accrual loans and non-covered accruing loans past due over 90 days, totaled \$54.9 million or 0.81% of total non-covered loans as of June 30, 2013, as compared to \$71.0 million, or 1.06% of total non-covered loans, at December 31, 2012. Non-covered, non-performing assets, which include non-covered, non-performing loans and non-covered, foreclosed real estate i.e. OREO, totaled \$68.1 million, or 0.60% of total assets as of June 30, 2013 compared with \$88.1 million, or 0.75% of total assets as of December 31, 2012. The decrease in non-performing assets in 2013 is attributable to the improving economic environment, an improvement in real estate values in our markets and the resulting impact on our commercial real estate and commercial construction portfolio.

Table of Contents

A loan is considered impaired when, based on current information and events, we determine it is probable that we will not be able to collect all amounts due according to the loan contract, including scheduled interest payments.

Generally, when non-covered loans are identified as impaired they are moved to our Special Assets Division. When we identify a loan as impaired, we measure the loan for potential impairment using discount cash flows, except when the sole remaining source of the repayment for the loan is the liquidation of the collateral. In these cases, we will use the current fair value of collateral, less selling costs. The starting point for determining the fair value of collateral is through obtaining external appraisals. Generally, external appraisals are updated every six to nine months. We obtain appraisals from a pre-approved list of independent, third party, local appraisal firms. Approval and addition to the list is based on experience, reputation, character, consistency and knowledge of the respective real estate market. At a minimum, it is ascertained that the appraiser is: (a) currently licensed in the state in which the property is located, (b) is experienced in the appraisal of properties similar to the property being appraised, (c) is actively engaged in the appraisal work, (d) has knowledge of current real estate market conditions and financing trends, (e) is reputable, and (f) is not on Freddie Mac's or the Bank's Exclusionary List of appraisers and brokers. In certain cases appraisals will be reviewed by our Real Estate Valuation Services Group to ensure the quality of the appraisal and the expertise and independence of the appraiser. Upon receipt and review, an external appraisal is utilized to measure a loan for potential impairment. Our impairment analysis documents the date of the appraisal used in the analysis, whether the officer preparing the report deems it current, and, if not, allows for internal valuation adjustments with justification. Typical justified adjustments might include discounts for continued market deterioration subsequent to appraisal date, adjustments for the release of collateral contemplated in the appraisal, or the value of other collateral or consideration not contemplated in the appraisal. An appraisal over one year old in most cases will be considered stale dated and an updated or new appraisal will be required. Any adjustments from appraised value to net realizable value are detailed and justified in the impairment analysis, which is reviewed and approved by senior credit quality officers and the Bank's ALLL Committee. Although an external appraisal is the primary source to value collateral dependent loans, we may also utilize values obtained through purchase and sale agreements, negotiated short sales, broker price opinions, or the sales price of the note. These alternative sources of value are used only if deemed to be more representative of value based on updated information regarding collateral resolution. Impairment analyses are updated, reviewed and approved on a quarterly basis at or near the end of each reporting period. Appraisals or other alternative sources of value received subsequent to the reporting period, but prior to our filing of periodic reports, are considered and evaluated to ensure our periodic filings are materially correct and not misleading. Based on these processes, we do not believe there are significant time lapses for the recognition of additional loan loss provisions or charge-offs from the date they become known.

Non-covered loans are classified as non-accrual when collection of principal or interest is doubtful—generally if they are past due as to maturity or payment of principal or interest by 90 days or more—unless such non-covered loans are well-secured and in the process of collection. Additionally, all loans that are impaired are considered for non-accrual status. Non-covered loans placed on non-accrual will typically remain on non-accrual status until all principal and interest payments are brought current and the prospects for future payments in accordance with the loan agreement appear relatively certain.

Upon acquisition of real estate collateral, typically through the foreclosure process, we promptly begin to market the property for sale. If we do not begin to receive offers or indications of interest we will analyze the price and review market conditions to assess whether a lower price reflects the market value of the property and would enable us to sell the property. In addition, we update appraisals on other real estate owned property six to 12 months after the most recent appraisal. Increases in valuation adjustments recorded in a period are primarily based on a) updated appraisals received during the period, or b) management's authorization to reduce the selling price of the property during the period. Unless a current appraisal is available, an appraisal will be ordered prior to a loan moving to other real estate owned. Foreclosed properties held as other real estate owned are recorded at the lower of the recorded investment in the loan or market value of the property less expected selling costs. Non-covered other real estate owned at June 30, 2013 totaled \$13.2 million and consisted of 25 properties.

Non-covered loans are reported as restructured when the Bank grants a concession(s) to a borrower experiencing financial difficulties that it would not otherwise consider. Examples of such concessions include a reduction in the loan rate, forgiveness of principal or accrued interest, extending the maturity date(s) or providing a lower interest rate than would be normally available for a transaction of similar risk. As a result of these concessions, restructured loans are impaired as the Bank will not collect all amounts due, both principal and interest, in accordance with the terms of the original loan agreement. Impairment reserves on non-collateral dependent restructured loans are measured by comparing the present value of expected future cash flows on the restructured loans discounted at the interest rate of the original loan agreement to the loan's carrying value. These impairment reserves are recognized as a specific component to be provided for in the allowance for loan and lease losses.

The Bank has written down impaired, non-covered non-accrual loans as of June 30, 2013 to their estimated net realizable value, based on disposition value, and expects resolution with no additional material loss, absent further decline in market prices.

Table of Contents

The following table summarizes our non-covered non-performing assets and restructured loans as of June 30, 2013 and December 31, 2012:

Non-Covered Non-Performing Assets

(in thousands)

	June 30, 2013	December 31, 2012		
Non-covered loans on non-accrual status	\$48,855	\$66,736

Table of Contents

As of June 30, 2013, the non-covered non-performing assets of \$68.1 million have been written down by 27%, or \$25.2 million, from their original balance of \$93.3 million.

The Company is continually performing extensive reviews of our permanent commercial real estate portfolio, including stress testing. These reviews were performed on both our non-owner and owner occupied credits. These reviews were completed to verify leasing status, to ensure the accuracy of risk ratings, and to develop proactive action plans with borrowers on projects where debt service coverage has dropped below the Bank's benchmark. The stress testing has been performed to determine the effect of rising cap rates, interest rates and vacancy rates, on this portfolio. Based on our analysis, the Bank believes lending teams are effectively managing the risks in this portfolio. There can be no assurance that any further declines in economic conditions, such as potential increases in retail or office vacancy rates, will exceed the projected assumptions utilized in the stress testing and may result in additional non-covered, non-performing loans in the future.

Non-Covered Restructured Loans

At June 30, 2013 and December 31, 2012, non-covered impaired loans of \$73.9 million and \$70.6 million were classified as non-covered performing restructured loans, respectively. The restructurings were granted in response to borrower financial difficulty, and generally provide for a temporary modification of loan repayment terms. The non-covered performing restructured loans on accrual status represent principally the only impaired loans accruing interest at June 30, 2013. In order for a restructured loan to be considered performing and on accrual status, the loan's collateral coverage generally will be greater than or equal to 100% of the loan balance, the loan must be current on payments, and the borrower must either prefund an interest reserve or demonstrate the ability to make payments from a verified source of cash flow. The Bank had no obligation to lend additional funds on the restructured loans as of June 30, 2013.

Residential Modification Program

The Bank's modification program is designed to enable the Bank to work with its customers experiencing financial difficulty to maximize repayment. While the Bank has designed guidelines similar to the government sponsored Home Affordable Refinance Program and Home Affordable Modification Program, the bank participates in the programs only in the capacity as servicer on behalf of investor loans that have been sold.

A and B Note Workout Structures

The Bank performs A note/B note workout structures as a subset of the Bank's troubled debt restructuring strategy. The amount of loans restructured using this structure was \$7.9 million and \$12.6 million as of June 30, 2013 and December 31, 2012, respectively.

Under an A note/B note workout structure, a new A note is underwritten in accordance with customary troubled debt restructuring underwriting standards and is reasonably assured of full repayment while the corresponding B note is not. The B note is immediately charged off upon restructuring.

If the loan was on accrual prior to the troubled debt restructuring being documented with the loan legally bifurcated into an A note fully supporting accrual status and a B note or amount fully contractually forgiven and charged off, the A note may remain on accrual status. If the loan was on nonaccrual at the time the troubled debt restructuring was documented with the loan legally bifurcated into an A note fully supporting accrual status and a B note or amount contractually forgiven and fully charged off, the A note may be returned to accrual status, and risk rated accordingly, after a reasonable period of performance under the troubled debt restructuring terms. Six months of payment performance is generally required to return these loans to accrual status.

The A note will continue to be classified as a troubled debt restructuring and only may be removed from impaired status in years after the restructuring if (a) the restructuring agreement specifies an interest rate equal to or greater than the rate that the Bank was willing to accept at the time of the restructuring for a new loan with comparable risk and (b) the loan is not impaired based on the terms specified by the restructuring agreement.

The following tables summarize our performing non-covered restructured loans by loan type and region as of June 30, 2013 and December 31, 2012:

The following table presents a distribution of our performing non-covered restructured loans by year of maturity, according to the restructured terms, as of June 30, 2013:

Table of Contents

(in thousands)

Year	Amount
2013	\$46,867
2014	660
2015	9,856
2016	9,239
2017	2,475
Thereafter	4,787
Total	\$73,884

The Bank has had varying degrees of success with different types of concessions. The following table presents the percentage of troubled debt restructurings, by type of concession, at June 30, 2013 that have performed and are expected to perform according to the troubled debt restructuring agreement:

	June 30, 2013
Rate	98%
Interest Only	100%
Payment	100%
Combination	80%

A further decline in the economic conditions in our general market areas or other factors could adversely impact individual borrowers or the loan portfolio in general. Accordingly, there can be no assurance that loans will not become 90 days or more past due, become impaired or placed on non-accrual status, restructured or transferred to other real estate owned in the future. Additional information about the loan portfolio is provided in Note 5 of the Notes to Condensed Consolidated Financial Statements.

Covered Non-Performing Assets

Covered non-performing assets totaled \$3.5 million, or 0.03% of total assets at June 30, 2013 as compared to \$10.4 million, or 0.09% of total assets at December 31, 2012. These covered nonperforming assets are subject to shared-loss agreements with the FDIC. Allowance for Non-Covered Loan and Lease Losses and Reserve for Unfunded Commitments

The ALLL totaled \$85.8 million at June 30, 2013, an increase of \$0.4 million from the \$85.4 million at December 31, 2012. The increase in the ALLL from the prior year-end results is principally attributable to non-covered loan growth. The following table shows the activity in the ALLL for the three and six months ended June 30, 2013 and 2012:

Balance, end of period	\$85,836	\$83,618	\$85,836	\$83,618
As a percentage of average non-covered loans and leases (annualized):				
Net charge-offs	0.11	% 0.64	% 0.29	% 0.64
Provision for non-covered loan and lease losses	0.18	% 0.44	% 0.30	% 0.33
Recoveries as a percentage of charge-offs	59.84	% 16.48	% 28.46	% 21.15

The increase in the non-covered allowance for loan and lease losses as of June 30, 2013 in relation to the same period of the prior year is primarily a result of continued non-covered loan growth. Additional discussion on the change in provision for loan and lease losses is provided under the heading Provision for Loan and Lease Losses above.

All impaired loans are individually evaluated for impairment. If the measurement of each impaired loans' value is less than the recorded investment in the loan, we recognize this impairment and adjust the carrying value of the loan to fair value through the allowance for loan and lease losses. This can be accomplished by charging-off the impaired portion of the loan or establishing a specific component within the allowance for loan and lease losses. If in management's assessment the sources of repayment will not result in a reasonable probability that the carrying value of a loan can be recovered, the amount of a loan's specific impairment is charged-off against the allowance for loan and lease losses. The Company recognizes the charge-off of impairment reserves on impaired loans in the period they arise for collateral dependent loans. Impairment reserves on non-collateral dependent restructured loans are measured by comparing the present value of expected future cash flows on the restructured loans discounted at the interest rate of the original loan agreement to the loan's carrying value. These impairment reserves are recognized as a specific component to be provided for in the allowance for loan and lease losses.

The following table sets forth the allocation of the allowance for non-covered loan and lease losses and percent of loans in each category to total loans (excluding deferred loan fees) as of June 30, 2013 and December 31, 2012:

Table of Contents

(dollars in thousands)

	June 30, 2013		December 31, 2012			
	Amount	%	Amount	%		%
Commercial real estate	\$55,249	62.3	% \$54,909	62.7		%
Commercial	21,587	26.0	% 22,925	25.7		%
Residential	8,250	11.3	% 6,925	11.0		%
Consumer & other	750	0.6	% 632	0.6		%
Unallocated	—		—			
Allowance for non-covered loan and lease losses	\$85,836		\$85,391			

At June 30, 2013, the recorded investment in non-covered loans classified as impaired totaled \$127.3 million, with a corresponding valuation allowance (included in the allowance for loan and lease losses) of \$1.9 million. The valuation allowance on impaired loans represents the impairment reserves on performing current and former non-covered restructured loans and nonaccrual loans. At December 31, 2012, the total recorded investment in non-covered impaired loans was \$142.4 million, with a corresponding valuation allowance (included in the allowance for loan and lease losses) of \$1.4 million. The valuation allowance on impaired loans represents the impairment reserves on performing current and former non-covered restructured loans and nonaccrual loans at December 31, 2012.

The following table presents a summary of activity in the reserve for unfunded commitments (“RUC”):

Summary of Reserve for Unfunded Commitments Activity

(in thousands)

	Three months ended		Six months ended	
	June 30,		June 30,	
	2013	2012	2013	2012
Balance, beginning of period	\$ 1,269	\$ 1,102	\$ 1,223	\$ 940
Net change to other expense:				
Commercial real estate	37	10	24	48
Commercial	5	12	48	157
Residential	18	(1	) 27	(23
Consumer & other	(2	) 3	5	4
Total change to other expense	58	24	104	186
Balance, end of period	\$ 1,327	\$ 1,126	\$ 1,327	\$ 1,126

We believe that the ALLL and RUC at June 30, 2013 are sufficient to absorb losses inherent in the loan portfolio and credit commitments outstanding as of that date based on the best information available. This assessment, based in part on historical levels of net charge-offs, loan growth, and a detailed review of the quality of the loan portfolio, involves uncertainty and judgment. Therefore, the adequacy of the ALLL and RUC cannot be determined with precision and may be subject to change in future periods. In addition, bank regulatory authorities, as part of their periodic examination of the Bank, may require additional charges to the provision for loan and lease losses in future periods if warranted as a result of their review.

Allowance for Covered Loan and lease Losses

The covered ALLL totaled \$14.4 million at June 30, 2013, a decrease of \$3.9 million from the \$18.3 million at December 31, 2012. The decrease in the covered ALLL from the prior year end results from improvements in the amount and the timing of expected cash flows on the acquired loans compared to those previously estimated and

charge-offs of unpaid principal balance against previously established allowance, as measured on a pool basis. The following table summarizes activity related to the allowance for covered loan and lease losses by covered loan portfolio segment for the three and six months ended June 30, 2013 and 2012, respectively:

Due to changes in model inputs or assumptions(1)	1,858	(969)	333	(1,063)
Other(2)	(471)	(61)	(679)	(889)
Balance, end of period	\$38,192	\$22,513	\$38,192	\$22,513

(1) Principally reflects changes in discount rates and prepayment speed assumptions, which are primarily affected by changes in interest rates.

(2) Represents changes due to collection/realization of expected cash flows over time.

Information related to our serviced loan portfolio as of June 30, 2013 and December 31, 2012 was as follows:

(dollars in thousands)

	June 30, 2013	December 31, 2012
Balance of loans serviced for others	\$3,911,273	\$3,162,080
MSR as a percentage of serviced loans	0.98	% 0.87 %

Mortgage servicing rights are adjusted to fair value quarterly with the change recorded in mortgage banking revenue.

Goodwill and Other Intangible Assets

At June 30, 2013, we had goodwill and other intangible assets of \$683.0 million, as compared to \$685.3 million at December 31, 2012. The goodwill recorded in connection with acquisitions represents the excess of the purchase price over the estimated fair value of the net assets acquired. Goodwill and other intangible assets with indefinite lives are not amortized but instead are periodically tested for impairment. Management evaluates intangible assets with indefinite lives on an annual basis as of December 31. Additionally, we perform impairment evaluations on an interim basis when events or circumstances indicate impairment potentially exists. A significant amount of judgment is involved in determining if an indicator of impairment has occurred. Such indicators may include, among others, a significant decline in our expected future cash flows; a sustained, significant decline in our stock price and market capitalization; a significant adverse change in legal factors or in the business climate; adverse action or assessment by a regulator; and unanticipated competition.

The Company has the option to perform a qualitative assessment before completing the goodwill impairment test two-step process. The first step compares the fair value of a reporting unit to its carrying value. If the reporting unit's fair value is less than its carrying value, the Company would be required to proceed to the second step. In the second step the Company calculates the implied fair value of the reporting unit's goodwill. The implied fair value of goodwill is determined in the same manner as goodwill recognized in a business combination. The estimated fair value of the Company is allocated to all of the Company's assets and liabilities, including any unrecognized identifiable intangible assets, as if the Company had been acquired in a business combination and the estimated fair value of the reporting unit is the price paid to acquire it. The allocation process is performed only for purposes of determining the amount of goodwill impairment. No assets or liabilities are written up or down, nor are any additional unrecognized identifiable

intangible assets recorded as a part of this process. Any excess of the estimated purchase price over the fair value of the reporting unit's net assets represents the implied fair value of goodwill. If the carrying amount of the goodwill is greater than the implied fair value of that goodwill, an impairment loss would be recognized as a charge to earnings in an amount equal to that excess. The Company performs the first step on an annual basis and in between if certain events or circumstances indicate goodwill may be impaired. No goodwill impairment losses have been recognized in the periods presented.

Table of Contents

At June 30, 2013, we had other intangible assets of \$14.8 million, as compared to \$17.1 million at December 31, 2012. Intangible assets with definite useful lives are amortized to their estimated residual values over their respective estimated useful lives, and are also reviewed for impairment. We amortize other intangible assets on an accelerated or straight-line basis over an estimated ten to fifteen year life. No impairment losses separate from the scheduled amortization have been recognized in the periods presented.

Deposits

Total deposits were \$9.0 billion at June 30, 2013, a decrease of \$423.0 million, or 4.5%, as compared to year-end 2012. The decline primarily resulted from timing differences on normal recurring deposit inflows and the transfer of balances to securities sold under agreements to repurchase and from anticipated run-off of higher priced money market, time and public deposits.

The following table presents the deposit balances by major category as of June 30, 2013 and December 31, 2012:

Deposits

(dollars in thousands)

	June 30, 2013		December 31, 2012			
	Amount	Percentage	Amount	Percentage

The Bank has an agreement with Promontory Interfinancial Network LLC (“Promontory”) that makes it possible to provide FDIC deposit insurance to balances in excess of current deposit insurance limits. Promontory’s Certificate of Deposit Account Registry Service (“CDARS”) uses a deposit-matching program to exchange Bank deposits in excess of the current deposit insurance limits for excess balances at other participating banks, on a dollar-for-dollar basis, that would be fully insured at the Bank. This product is designed to enhance our ability to attract and retain customers and increase deposits, by providing additional FDIC coverage to customers. CDARS deposits can be reciprocal or one-way. All of the Bank’s CDARS deposits are reciprocal. At June 30, 2013 and December 31, 2012, the Company’s CDARS balances totaled \$123.6 million and \$154.1 million, respectively. Of these totals, at June 30, 2013 and December 31, 2012, \$111.3 million and \$146.1 million, respectively, represented time deposits equal to or greater than \$100,000 but were fully insured under current deposit insurance limits.

The Dodd-Frank Act provided for unlimited deposit insurance for non-interest bearing transactions accounts, excluding NOW (interest bearing deposit accounts) and including all IOLTAs (lawyers' trust accounts), beginning December 31, 2010 for a period of two years. The program expired December 31, 2012. The Dodd-Frank Act permanently raised the current standard maximum federal deposit insurance amount from \$100,000 to \$250,000 per qualified account.

Borrowings

At June 30, 2013, the Bank had outstanding \$176.4 million of securities sold under agreements to repurchase and no outstanding federal funds purchased balances. The Bank had outstanding term debt of \$252.5 million at June 30, 2013. Term debt outstanding as of June 30, 2013 decreased \$1.1 million since December 31, 2012 as a result of accretion of purchase accounting adjustments. Advances from the FHLB amounted to \$245.0 million of the total term debt and are secured by investment securities and loans secured by real estate. The FHLB advances have fixed interest rates ranging from 4.46% to 4.72% and mature in 2016 and 2017.

Junior Subordinated Debentures

103

Table of Contents

We had junior subordinated debentures with carrying values of \$188.2 million and \$196.1 million at June 30, 2013 and December 31, 2012, respectively. The decrease is primarily due to the redemption of \$8.8 million in junior subordinated debentures during the first quarter.

At June 30, 2013, approximately \$219.6 million, or 95% of the total issued amount, had interest rates that are adjustable on a quarterly basis based on a spread over three month LIBOR. Interest expense for junior subordinated debentures decreased for the three and six months ended June 30, 2013, compared to the same period in 2012, primarily resulting from decreases in three month LIBOR. Although increases in three month LIBOR will increase the interest expense for junior subordinated debentures, we believe that other attributes of our balance sheet will serve to mitigate the impact to net interest income on a consolidated basis.

On January 1, 2007, the Company elected the fair value measurement option for certain pre-existing junior subordinated debentures of \$97.9 million (the Umpqua Statutory Trusts). The remaining junior subordinated debentures as of the adoption date were acquired through business combinations and were measured at fair value at the time of acquisition. In 2007, the Company issued two series of trust preferred securities and elected to measure each instrument at fair value. Accounting for junior subordinated debentures originally issued by the Company at fair value enables us to more closely align our financial performance with the economic value of those liabilities. Additionally, we believe it improves our ability to manage the market and interest rate risks associated with the junior subordinated debentures. The junior subordinated debentures measured at fair value and amortized cost have been presented as separate line items on the balance sheet. The ending carrying (fair) value of the junior subordinated debentures measured at fair value represents the estimated amount that would be paid to transfer these liabilities in an orderly transaction amongst market participants under current market conditions as of the measurement date.

The significant inputs utilized in the estimation of fair value of these instruments are the credit risk adjusted spread and three month LIBOR. The credit risk adjusted spread represents the nonperformance risk of the liability, contemplating the inherent risk of the obligation. Generally, an increase in the credit risk adjusted spread and/or a decrease in the three month LIBOR will result in positive fair value adjustments. Conversely, a decrease in the credit risk adjusted spread and/or an increase in the three month LIBOR will result in negative fair value adjustments.

Through the first quarter of 2010 we obtained valuations from a third-party pricing service to assist with the estimation and determination of fair value of these liabilities. In these valuations, the credit risk adjusted interest spread for potential new issuances through the primary market and implied spreads of these instruments when traded as assets on the secondary market, were estimated to be significantly higher than the contractual spread of our junior subordinated debentures measured at fair value. The difference between these spreads has resulted in the cumulative gain in fair value, reducing the carrying value of these instruments as reported on our Condensed Consolidated Balance Sheets. In July 2010, the Dodd-Frank Act was signed into law which, among other things, limits the ability of certain bank holding companies to treat trust preferred security debt issuances as Tier 1 capital. This law may require many banks to raise new Tier 1 capital and is expected to effectively close the trust-preferred securities markets from offering new issuances in the future. As a result of this legislation, our third-party pricing service noted that they were no longer able to provide reliable fair value estimates related to these liabilities given the absence of observable or comparable transactions in the market place in recent history or as anticipated into the future.

Due to inactivity in the junior subordinated debenture market and the inability to obtain observable quotes of our, or similar, junior subordinated debenture liabilities or the related trust preferred securities when traded as assets, we utilize an income approach valuation technique to determine the fair value of these liabilities using our estimation of market discount rate assumptions. The Company monitors activity in the trust preferred and related markets, to the extent available, changes related to the current and anticipated future interest rate environment, and considers our entity-specific creditworthiness, to validate the reasonableness of the credit risk adjusted spread and effective yield utilized in our discounted cash flow model. Regarding the activity in and condition of the junior subordinated debt

market, we noted no observable changes in the current period as it relates to companies comparable to our size and condition, in either the primary or secondary markets. Relating to the interest rate environment, we considered the change in slope and shape of the forward LIBOR swap curve in the current period, the affects of which did not result in a significant change in the fair value of these liabilities.

The Company's specific credit risk is implicit in the credit risk adjusted spread used to determine the fair value of our junior subordinated debentures. As our Company is not specifically rated by any credit agency, it is difficult to specifically attribute changes in our estimate of the applicable credit risk adjusted spread to specific changes in our own creditworthiness versus changes in the market's required return from similar companies. As a result, these considerations must be largely based off of qualitative considerations as we do not have a credit rating and we do not regularly issue senior or subordinated debt that would provide us an independent measure of the changes in how the market quantifies our perceived default risk.

Table of Contents

On a quarterly basis we assess entity-specific qualitative considerations that if not mitigated or represents a material change from the prior reporting period may result in a change to the perceived creditworthiness and ultimately the estimated credit risk adjusted spread utilized to value these liabilities. Entity-specific considerations that positively impact our creditworthiness include: our strong capital position resulting from our successful public stock offerings in 2009 and 2010, that offers us flexibility to pursue business opportunities such as mergers and acquisitions, or expand our footprint and product offerings; having significant levels of on and off-balance sheet liquidity; being profitable; and, having an experienced management team. However, these positive considerations are mitigated by significant risks and uncertainties that impact our creditworthiness and ability to maintain capital adequacy in the future. Specific risks and concerns include: given our concentration of loans secured by real estate in our loan portfolio, a continued and sustained deterioration of the real estate market may result in declines in the value of the underlying collateral and increased delinquencies that could result in an increased of charge-offs; despite recent improvement, our credit quality metrics remain negatively elevated since 2007 relative to historical standards; the continuation of current economic downturn that has been particularly severe in our primary markets could adversely affect our business; recent increased regulation facing our industry, such as the Dodd-Frank Act, will increase the cost of compliance and restrict our ability to conduct business consistent with historical practices, and could negatively impact profitability; we have a significant amount of goodwill and other intangible assets that dilute our available tangible common equity; and the carrying value of certain material, recently recorded assets on our balance sheet, such as the FDIC loss-sharing indemnification asset, are highly reliant on management estimates, such as the timing or amount of losses that are estimated to be covered, and the assumed continued compliance with the provisions of the loss-share agreement. To the extent assumptions ultimately prove incorrect or should we consciously forego or unknowingly violate the guidelines of the agreement, an impairment of the asset may result which would reduce capital.

Additionally, the Company periodically utilizes an external valuation firm to determine or validate the reasonableness of the assessments of inputs and factors that ultimately determines the estimate fair value of these liabilities. The extent we involve or engage these external third parties correlates to management's assessment of the current subordinate debt market, how the current environment and market compares to the preceding quarter, and perceived changes in the Company's own creditworthiness during the quarter. In periods of potential significant valuation changes and at year-end reporting periods we typically engage third parties to perform a full independent valuation of these liabilities. For periods where management has assessed the market and other factors impacting the underlying valuation assumptions of these liabilities, and has determined significant changes to the valuation of these liabilities in the current period are remote, the scope of the valuation specialist's review is limited to a review the reasonableness of management's assessment of inputs. In the fourth quarter of 2012, the Company engaged an external valuation firm to prepare an independent valuation of our junior subordinated debentures measured at fair value and the results were consistent with the Company's valuation.

Absent changes to the significant inputs utilized in the discounted cash flow model used to measure the fair value of these instruments at each reporting period, the cumulative discount for each junior subordinated debenture will reverse over time, ultimately returning the carrying values of these instruments to their notional values at their expected redemption dates, in a manner similar to the effective yield method as if these instruments were accounted for under the amortized cost method. For the three and six months ended June 30, 2013 and 2012, we recorded a loss of \$547,000 and \$1.1 million as compared to loss of \$547,000 and \$1.1 million, respectively, resulting from the change in fair value of the junior subordinated debentures recorded at fair value. Observable activity in the junior subordinated debenture and related markets in future periods may change the effective rate used to discount these liabilities, and could result in additional fair value adjustments (gains or losses on junior subordinated debentures measured at fair value) outside the expected periodic change in fair value had the fair value assumptions remained unchanged.

On July 2, 2013, the federal banking regulators approved the final proposed rules that revise the regulatory capital rules to incorporate certain revisions by the Basel Committee on Banking Supervision to the Basel capital framework

("Basel III"). Under the original proposed rule, trust preferred security debt issuances would have been phased out of Tier 1 capital into Tier 2 capital over a 10 year period. Under the final rule, consistent with Section 171 of the Dodd-Frank Wall Street Reform and Consumer Protection Act, bank holding companies with less than \$15 billion assets as of December 31, 2009 will be grandfathered and may continue to include these instruments in Tier 1 capital, subject to certain restrictions. However, if an institution grows above \$15 billion as a result of an acquisition, or organically grows above \$15 billion and then makes an acquisition, the combined trust preferred issuances would be phased out of Tier 1 and into Tier 2 capital (75% in 2015 and 100% in 2016). As the Company had less than \$15 billion in assets at December 31, 2009, the Company will be able to continue to include its existing trust preferred securities, less the common stock of the Trusts, in the Company's Tier 1 capital. If the Company breaches \$15 billion in consolidated assets other than in an organic manner and these instruments no longer qualify as Tier 1 capital, it is possible the Company may accelerate redemption of the existing junior subordinated debentures. This could result in adjustments to the fair value of these instruments including the acceleration of losses on junior subordinated debentures carried at fair value within non-interest income. At June 30, 2013, the Company's restricted core capital elements were 17.5% of total core capital, net of goodwill and any associated deferred tax liability.

Table of Contents

Additional information regarding junior subordinated debentures measured at fair value is included in Note 16 of the Notes to Condensed Consolidated Financial Statements.

All of the debentures issued to the Trusts, less the common stock of the Trusts, qualified as Tier 1 capital as of June 30, 2013, under guidance issued by the Board of Governors of the Federal Reserve System. Additional information regarding the terms of the junior subordinated debentures, including maturity/redemption dates, interest rates and the fair value election, is included in Note 9 of the Notes to Condensed Consolidated Financial Statements.

Liquidity and Cash Flow

The principal objective of our liquidity management program is to maintain the Bank's ability to meet the day-to-day cash flow requirements of our customers who either wish to withdraw funds or to draw upon credit facilities to meet their cash needs.

We monitor the sources and uses of funds on a daily basis to maintain an acceptable liquidity position. One source of funds includes public deposits. Individual state laws require banks to collateralize public deposits, typically as a percentage of their public deposit balance in excess of FDIC insurance. Public deposits represent 10.6% of total deposits at June 30, 2013 and 10.6% of total deposits at December 31, 2012. The amount of collateral required varies by state and may also vary by institution within each state, depending on the individual state's risk assessment of depository institutions. Changes in the pledging requirements for uninsured public deposits may require pledging additional collateral to secure these deposits, drawing on other sources of funds to finance the purchase of assets that would be available to be pledged to satisfy a pledging requirement, or could lead to the withdrawal of certain public deposits from the Bank. In addition to liquidity from core deposits and the repayments and maturities of loans and investment securities, the Bank can utilize established uncommitted federal funds lines of credit, sell securities under agreements to repurchase, borrow on a secured basis from the FHLB or issue brokered certificates of deposit.

The Bank had available lines of credit with the FHLB totaling \$2.1 billion at June 30, 2013 subject to certain collateral requirements, namely the amount of pledged loans and investment securities. The Bank had available lines of credit with the Federal Reserve totaling \$447.2 million subject to certain collateral requirements, namely the amount of certain pledged loans. The Bank had uncommitted federal funds line of credit agreements with additional financial institutions totaling \$185.0 million at June 30, 2013. Availability of lines is subject to federal funds balances available for loan and continued borrower eligibility. These lines are intended to support short-term liquidity needs, and the agreements may restrict consecutive day usage.

The Company is a separate entity from the Bank and must provide for its own liquidity. Substantially all of the Company's revenues are obtained from dividends declared and paid by the Bank. There were \$25.0 million of dividends paid by the Bank to the Company in the six months ended June 30, 2013. There are statutory and regulatory provisions that could limit the ability of the Bank to pay dividends to the Company. We believe that such restrictions will not have an adverse impact on the ability of the Company to fund its quarterly cash dividend distributions to common shareholders and meet its ongoing cash obligations, which consist principally of debt service on the \$230.1 million (issued amount) of outstanding junior subordinated debentures. As of June 30, 2013, the Company did not have any borrowing arrangements of its own.

As disclosed in the Consolidated Statements of Cash Flows, net cash provided by operating activities was \$243.0 million during the six months ended June 30, 2013, with the difference between cash provided by operating activities and net income largely consisted of originations of loans held for sale of \$1.0 billion offset by proceeds from the sale of loans held for sale of \$1.2 billion. This compares to net cash used by operating activities of \$2.3 million during the six months ended June 30, 2012, with the difference between cash used by operating activities and net income largely

consisted of originations of loans held for sale of \$786.7 million, offset by proceeds from the sale of loans held for sale of \$686.9 million, amortization of investment premiums, net, of \$21.8 million, and provision for non-covered loan and lease losses of \$9.8 million.

Net cash of \$429.2 million provided by investing activities during the six months ended June 30, 2013 consisted principally of proceeds from investment securities available for sale of \$530.9 million, proceeds from sale of non-covered loans of \$53.3 million, and net covered loan paydowns of \$47.7 million, partially offset by \$160.3 million of net noncovered loan and lease originations, \$51.2 million of purchases of investment securities available for sale, and purchases of premises and equipment of \$16.5 million. This compares to net cash of \$167.8 million provided by investing activities during the six months ended June 30, 2012, which consisted principally of proceeds from investment securities available for sale of \$727.8 million, net covered loan paydowns of \$56.5 million, net proceeds from the FDIC indemnification asset of \$21.4 million, proceeds from the sale of non-covered other real estate owned of \$12.2 million, and proceeds from the sale of covered other real estate owned of \$8.7 million, partially offset by \$419.1 million of purchases of investment securities available for sale, net non-covered loan originations of \$239.3 million and purchases of premises and equipment of \$12.2 million.

Table of Contents

Net cash of \$411.0 million used by financing activities during the six months ended June 30, 2013 primarily consisted of \$422.7 million decrease in net deposits, dividends paid on common stock of \$16.9 million, and \$8.8 million of repayment of junior subordinated debentures, partially offset by \$39.4 million increase in net securities sold under agreements to repurchase. This compares to net cash of \$100.5 million used by financing activities during the six months ended June 30, 2012, which consisted primarily of \$104.3 million decrease in net deposits, \$15.8 million of dividends paid on common stock, and \$5.2 million of common stock repurchased, partially offset by \$24.7 million increase in net securities sold under agreements to repurchase.

Although we expect the Bank's and the Company's liquidity positions to remain satisfactory during 2013, it is possible that our deposit growth for 2013 not be maintained at previous levels due to pricing pressure or, in order to generate deposit growth, our pricing may need to be adjusted in a manner that results in increased interest expense on deposits.

Off-balance-Sheet Arrangements

Information regarding Off-Balance-Sheet Arrangements is included in Note 10 of the Notes to Condensed Consolidated Financial Statements.

Concentrations of Credit Risk

Information regarding Concentrations of Credit Risk is included in Note 10 of the Notes to Condensed Consolidated Financial Statements.

Capital Resources

Shareholders' equity at June 30, 2013 was \$1.7 billion, a decrease of \$8.7 million from December 31, 2012. The decrease in shareholders' equity during the six months ended June 30, 2013 was principally due to other comprehensive loss, net of tax, of \$24.7 million and common stock dividends declared of \$33.8 million, offset by net income of \$49.6 million.

The following table shows the Company's consolidated and the Bank's capital adequacy ratios, as calculated under regulatory guidelines, compared to the regulatory minimum capital ratio and the regulatory minimum capital ratio needed to qualify as a "well-capitalized" institution at June 30, 2013 and December 31, 2012:

(dollars in thousands)

Table of Contents

	Actual Amount	Ratio		For Capital Adequacy purposes Amount	Ratio		To be Well Capitalized Amount	Ratio	
As of June 30, 2013

Umpqua Bank	\$1,131,373	10.32	%	\$438,517	4.00	%	\$548,146	5.00	%

Basel III, among other things, introduces a new capital measure called “Common Equity Tier 1” (“CET1”) and provides for a number of deductions from and adjustments to CET1. These include, for example, the requirement that mortgage servicing rights, deferred tax assets dependent upon future taxable income and significant investments in non-consolidated financial entities be deducted from CET1 to the extent that any one such category exceeds 10% of CET1 or all such categories in the aggregate exceed 15% of CET1. Under current capital standards, the effects of accumulated other comprehensive income items included in capital are excluded for the purposes of determining regulatory capital ratios. Under the Basel III Capital Rules, the effects of certain accumulated other comprehensive items are not excluded; however, non-advanced approaches banking organizations, including the Company and the Bank, may make a one-time permanent election to continue to exclude these items. The Company and Bank expect to make this election in order to avoid significant variations in the level of capital depending upon the impact of interest rate fluctuations on the fair value of the Corporation's securities portfolio.

The Company's share repurchase plan, which was first approved by the Company's Board of Directors and announced in August 2003, was amended on September 29, 2011 to increase the number of common shares available for repurchase under the plan to 15 million shares. In April 2013, the repurchase program was extended to run through June 2015. As of June 30, 2013, a total of 12.0 million shares remained available for repurchase. The timing and amount of future repurchases will depend upon the market price for our common stock, securities laws restricting repurchases, asset growth, earnings, and our capital plan. In addition, our stock plans provide that option and award holders may pay for the exercise price and tax withholdings in part or whole by tendering previously held shares.

The Company's dividend policy considers, among other things, earnings, regulatory capital levels, the overall payout ratio and expected asset growth to determine the amount of dividends declared, if any, on a quarterly basis. There is no assurance that

108

Table of Contents

future cash dividends on common shares will be declared or increased. The following table presents cash dividends declared and dividend payout ratios (dividends declared per common share divided by basic earnings per common share) for the three and six months ended June 30, 2013 and 2012:

Cash Dividends and Payout Ratios per Common Share

	Three months ended June 30,		Six months ended June 30,		
	2013	2012	2013	2012	
Dividend declared per common share	\$0.20	\$0.09	\$0.30	\$0.16	
Dividend payout ratio	87	% 43	% 68	% 37	%

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Our assessment of market risk as of June 30, 2013 indicates there are no material changes in the quantitative and qualitative disclosures from those in our Annual Report on Form 10-K for the year ended December 31, 2012.

Item 4. Controls and Procedures

Our management, including our Chief Executive Officer, Chief Financial Officer and Principal Accounting Officer, has concluded that our disclosure controls and procedures are effective in timely alerting them to information relating to us that is required to be included in our periodic filings with the Securities and Exchange Commission. The disclosure controls and procedures were last evaluated by management as of June 30, 2013.

There have been no changes in our internal controls or in other factors that have materially affected or are likely to materially affect our internal controls over financial reporting subsequent to the date of the evaluation.

Part II. OTHER INFORMATION

Item 1. Legal Proceedings

Due to the nature of our business, we are involved in legal proceedings that arise in the ordinary course of our business. While the outcome of these matters is currently not determinable, we do not expect that the ultimate costs to resolve these matters will have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

In our Form 10-K for the period ending December 31, 2011, we initially reported on a class action lawsuit filed in the U.S. District Court for the Northern District of California against the Bank by Amber Hawthorne relating to overdraft fees and the posting order of point of sale and ACH items. There have been no material developments in the case since it was filed.

See Note 10 of the Notes to the Condensed Consolidated Financial Statements for a discussion of the Company's involvement in litigation pertaining to Visa Inc.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed under "Part I--Item 1A--Risk Factors" in our Form 10-K for the year ended December 31, 2012. These factors could materially and adversely affect our business, financial condition, liquidity, results of operations and capital position, and could cause our actual results to differ materially from our historical results or the results contemplated by the forward-looking statements contained in this report.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) Not applicable

(b) Not applicable

(c) The following table provides information about repurchases of common stock by the Company during the quarter ended June 30, 2013:

Period	Total number of Common Shares Purchased (1)	Average Price Paid per Common Share	Total Number of Shares Purchased as Part of Publicly Announced Plan (2)	Maximum Number of Remaining Shares that May be Purchased at Period End under the Plan
4/1/13 - 4/30/13	11,066	\$12.00	—	12,111,456
5/1/13 - 5/31/13	53,412	\$12.98	—	12,111,456
6/1/13 - 6/30/13	11,955	\$14.47	98,027	12,013,429
Total for quarter	76,433	\$13.07	98,027	

Common shares repurchased by the Company during the quarter consist of cancellation of 12,659 restricted stock awards and no restricted stock units to pay withholding taxes. During the three months ended June 30, 2013, (1) 63,774 common shares were repurchased in connection with option exercises and 98,027 shares were repurchased pursuant to the Company's publicly announced corporate stock repurchase plan described in (2) below.

(2) The Company's share repurchase plan, which was first approved by its Board of Directors and announced in August 2003, was amended on September 29, 2011 to increase the number of common shares available for repurchase under the plan to 15 million shares. The repurchase program was extended in April 2013 to run through June 2015. As of June 30, 2013, a total of 12.0 million shares remained available for repurchase. The timing and amount of future repurchases will depend upon the market price for our common stock, securities laws restricting repurchases, asset growth, earnings, and our capital plan.
