## **PETROBRAS ENERGÍA PARTICIPACIONES S.A.**

### **PETROBRAS ENERGIA SIGNED AN ASSOCIATION AGREEMENT TO PERFORM EXPLORATION ACTIVITIES IN THE ARGENTINE SEA**

Buenos Aires, May 5, 2006 Petrobras Energía Participaciones S.A. (Buenos Aires: PBE, NYSE: PZE) announces that Petrobras Energía S.A. (Buenos Aires: PESA) has signed an Association Agreement with Energía Argentina S.A. (Enarsa), YPF S.A. and Petrouuguay S.A., whereby a consortium was created for the exploration, development, production and marketing of hydrocarbons from two offshore areas called ENARSA 1 (E1) and CCM2. These areas are located approximately 250 km east of the city of Mar del Plata, at the Colorado Marina basin, in deep waters on the Argentine continental shelf.

Petrobras Energía S.A. has a 25% interest in the consortium while Enarsa, YPF S.A. and Petrouuguay S.A. hold a 35%, 35%, and 5% interest, respectively.

Petrobras Energía S.A., YPF S.A. and Petrouuguay S.A. are responsible, in proportion to their interest, to contribute the funds necessary to finance the investment corresponding to Enarsa during the exploration stage. In the event a commercial discovery is made, Enarsa will reimburse Petrobras Energía S.A., YPF S.A. and Petrouuguay S.A. the funds received.

During 2006 the Consortium is planning to perform 3D seismic works, with investments amounting to about US\$20 million and the application of state-of-the-art technology. According to the seismic survey results, drilling of exploratory wells may require investments of approximately US\$ 30 to 50 million per well. This project implies a challenge for the Consortium both in technical and economic terms and offers a great opportunity for Argentina to increase hydrocarbon reserves.

Petrobras Energía S.A. applies the technology and know-how developed by Petrobras, a world leader in offshore exploration and a pioneer in deep and ultra-deep water operations. Petrobras' renowned leadership in this field represents a major support for this project. Petrobras operates the world's largest number of offshore oil and gas production systems.
