Item 1. **Reports to Stockholders.**

Semi-Annual Report
November 30, 2005

(unaudited)

SHAREHOLDER LETTER

November 30, 2005 (unaudited)

To Our Shareholders:

The Clough Global Allocation Fund's closing market price on November 30, 2005 was \$27.50 per share up 21.7% for the six-month period, excluding reinvested dividends. In addition, \$0.69 per share in distributions were paid during the period, so the Fund's total return to shareholders including reinvested dividends, based on market price during the period was 25.38%. Meanwhile the Fund's underlying net asset value has increased from \$20.78 to \$23.10 during the period even after the payment of distributions.

The fiscal midyear point is a good opportunity to revisit the fundamental thinking and a few of the key themes that underlie the Fund's holdings.

The Fund is becoming more diversified globally, as 2006 looks like a year of diverging global economic trends and converging interest rates. While growing household debt and weaker housing will likely slow U.S. and U.K. consumption, strong corporate profits and the buildup of central bank liquidity, particularly in Asia and the developing countries, will support growth elsewhere. Disinflation in manufactured goods and outsourced services combined with weaker housing activity could support declining interest rates in higher yielding economies like the U.S. and U.K., even as they rise in low yielding economies like Japan. That alone could continue to support capital markets around the world.

The antonym of credit is liquidity and the world presently has a lot of it. Bond markets everywhere have been strong in the face of intensive central bank liquidity flows. The makeup of the U.S. corporate sector has changed as more and more manufacturing, and now increasingly low and mid-level services are outsourced, reducing both capital and inventory demands on balance sheets. The only manufacturing components that are inflating are commodities as China and India grow and supplies are restricted. Business cycles are less volatile since inventory cycles become less important. Imports now absorb much of the inventory cycle.

There has been no letup in the deflationary supply of manufactured goods or outsourced services, and so U.S. inflationary pressures have been localized in a narrow group of domestic services and asset markets. Manufacturing capacity could grow in China, Brazil, non-China Asia and even Russia, sustaining global disinflation for years. The amount of capital China can absorb is unlimited given the size of its potential labor force and she will be seeking export markets for a long while. Most inflation measures are declining throughout the world, and global capital markets may be only beginning to discount this.

Corporate restructuring in Japan is a powerful force, and we think many analysts will underestimate its power to create wealth. The simple act of removing bad debt from its banking system dramatically changed that economy. It removed access to easy credit for a near comatose corporate sector and forced managements to remove unproductive capacity. This is hugely profit-supportive; it supports both the buildup of corporate cash and stocks. Now that a credit deflation has turned into modest asset reflation, particularly in the cities, profit recovery is being compounded by the increased value of corporate assets. While the decline in the Yen's foreign exchange value held back the Fund's gains from Japan in 2005, we expect to benefit from both a rising Japanese stock market and a recovering Yen in 2006. The Yen appears to be about as oversold as we have ever seen it.

Edgar Filing: Clough Global Allocation Fund - Form N-CSRS

Emerging market investments, both in the form of ETF's (exchange traded funds) and domestic market listed stocks have increased as a percentage of the portfolio. One dynamic we expect to play out in 2006 is a movement of interest rate levels and P/E ratios in emerging markets closer to developed economy levels as their capital account surpluses

mount. High-yield markets such as Brazil and Mexico appear to offer particularly good returns. Brazil has finally begun reducing its sky-high interest rates. The resource base of many of these economies will continue to support value. Taiwan has been a laggard, and looks like to us a cheap market. Alongside ETFs, we have built positions in individual companies which have demonstrated world class status, such as Embraer, a major manufacturer of regional jet aircraft in Brazil, and ICICI Bank, the largest consumer bank in India.

Energy will likely continue to be an important area of investment for the Fund. Although the stocks have been strong for the past three years, we believe the investment cycle has just begun and measures of drilling and equipment company capitalization are not much higher than they were in 1999 and 2000. The stocks stalled in the final months of 2005, but that is temporary, we think. Oil and gas prices are likely to remain high, and that alone will increase the value of our portfolio holdings over time. High cash flows should increase enterprise value even if commodity prices moderate. Natural gas is the sector's most significant choke point and prices reached into the mid-teens in the wake of hurricane damage to Gulf of Mexico facilities. Prices have corrected but are likely to remain high even in the face of Gulf Coast production recovery since land-based resources continue to decline, imports are limited and substitution is difficult. For comparison, the U.K. natural gas price hovers around \$18 per mcf (1,000 cubic feet of natural gas) and U.S. futures markets are indicating price levels well north of \$10 per mcf twelve months out.

We think the drilling rig business should continue to boom, and the global shortage of quality equipment and personnel should intensify pricing and profitability throughout the industry. As the year ended, Kuwait announced it is close to allowing foreign oil companies to operate in the country as the pressure to increase investment in oil drilling intensifies. A key element holding Saudi Arabia from producing more from its aging fields is the limited supply of rigs.

Our investments in the global insurance industry, particularly in reinsurance are beginning to reflect the value we see in the companies' stocks. This year we will see a dramatic improvement in earnings and cash flows, one we think will continue as the industry becomes a collection of more diversified global enterprises with strong balance sheets, almost an oligopoly. Capital requirements have risen substantially, and reinsurance is a far more critical product. Since growth opportunities are limited, cash is building rapidly in these companies even in the face of hurricane related payments, rate cycles are becoming less volatile, and return on equity is improving. We think scale is ever more important and consolidation is likely.

Finally, if U.S. consumption slows, the price of U.S. interest rate securities could rise substantially in value. At low nominal interest rates, small changes in yield offer substantial change in prices. The present curve reflects 4.75% short term rates in 2007, a level we think is too high for an indebted economy sitting on the top of a great credit inflation. Core inflation measures were falling in late 2005 and are likely to continue doing so in 2006.

The investment risks in 2006 center on central banks overstaying restrictive monetary policies and the threat of credit contraction. Such policies threaten so long as debt-to-GDP ratios are as high as they are. We are becoming a world of economic specialization where developed economies reduce reliance on low-value-added manufacturing and emerging economies take up the slack. In addition, restrictive trade practices would be dangerous and self-defeating, but they remain a constant threat. America's consumption engine may be a vital cog in the global economy and what many look upon as global imbalances may be, in fact,

Edgar Filing: Clough Global Allocation Fund - Form N-CSRS

a critical process in sustaining world growth. Jeremy Siegel, the noted Wharton School academic, believes that the global economy can adjust to the graying of the developed world only by transferring financial assets to emerging economies in return for manufactured goods. We agree with this thesis and many of our portfolio themes will try to capitalize on the investment implications.

We thank you for investing in the Clough Global Allocation Fund and invite you to read updates on our investment thinking on the website, www.cloughglobal.com.

Sincerely

/s/ Charles I. Clough, Jr.

Charles I. Clough, Jr.
Chairman and CEO of Clough Capital Partners, L.P.

Clough Capital Partners, L.P. is a Boston-based investment management firm that has approximately \$1.5 billion under management. For equities, the firm uses a global and theme-based investment approach based on identifying chronic shortages and growth opportunities. For fixed-income, Clough believes changing economic fundamentals help reveal potential global credit market opportunities based primarily on flow of capital into or out of a country. Clough was founded in 2000 by Chuck Clough and partners James Canty and Eric Brock. The three are the portfolio managers for the Clough Global Allocation Fund.

(1) *Total investment return is calculated assuming a purchase of a common share at the opening on the first day and a sale at closing on the last day of each period reported. Dividends and distributions, if any, are assumed for purposes of this calculation to be reinvested at prices obtained under the Trust's dividend reinvestment plan. Total investment returns do not reflect brokerage commissions. Total investment returns for less than a full year are not annualized. Past performance is not a guarantee of future results.*

(2) *Annualized*

- (3) *Ratios do not reflect dividend payments to preferred shareholders.*
- (4) *Calculated by subtracting the Fund's total liabilities (excluding Preferred Shares) from the Fund's total assets and dividing by the number of preferred shares outstanding.*
- (5) *Based on monthly prices.*

NOTES TO FINANCIAL STATEMENTS

November 30, 2005 (unaudited)

1. SIGNIFICANT ACCOUNTING AND OPERATING POLICIES

Clough Global Allocation Fund is a closed-end management investment company (the Fund) that was organized under the laws of the state of Delaware by an Agreement and Declaration of Trust dated April 27, 2004. The Fund is a non-diversified series with an investment objective to provide a high level of total return. The Declaration of Trust provides that the Trustees may authorize separate classes of shares of beneficial interest.

Security Valuation: The net asset value per Share of the Fund is determined no less frequently than daily, on each day that the American Stock Exchange (the Exchange) is open for trading, as of the close of regular trading on the Exchange (normally 4:00 p.m. New York time). Trading may take place in foreign issues held by the Fund at times when the Fund is not open for business. As a result, the Fund's net asset value may change at times when it is not possible to purchase or sell shares of the Fund. Securities held by the fund for which exchange quotations are readily available are valued at the last sale price, or if no sale price or if traded on the over-the-counter market, at the mean of the bid and asked prices on such day. Over-the-counter securities traded on NASDAQ are valued based upon the closing price. Debt securities for which the over-the-counter market is the primary market are normally valued on the basis of prices furnished by one or pricing services at the mean between the latest available bid and asked prices. As authorized by the Trustees, debt securities (other than short-term obligations) may be valued on the basis of valuations furnished by a pricing service which determines valuations based upon market transactions for normal, institutional-size trading units of securities. Short-term obligations maturing within 60 days are valued at amortized cost, which approximates value, unless the Trustees determine that under particular circumstances such method does not result in fair value. Over-the-counter options are valued at the mean between bid and asked prices provided by dealers. Financial futures contracts listed on commodity exchanges and exchange-traded options are valued at closing settlement prices. Securities for which there is no such quotation or valuation and all other assets are valued at fair value in good faith by or at the direction of the Trustees.

Foreign Securities: The Fund may invest a portion of its assets in foreign securities. In the event that the Fund executes a foreign security transaction, the Fund will generally enter into a forward foreign currency contract to settle the foreign security transaction. Foreign securities may carry more risk than U.S. securities, such as political, market and currency risks.

The accounting records of the Fund are maintained in U.S. dollars. Prices of securities denominated in foreign currencies are translated into U.S. dollars at the closing rates of exchange at period end. Amounts related to the purchase and sale of foreign securities and investment income are translated at the rates of exchange prevailing on the respective dates of such transactions.

Edgar Filing: Clough Global Allocation Fund - Form N-CSRS

The effect of changes in foreign currency exchange rates on investments is included with the fluctuations arising from changes in market values of securities held and reported with all other foreign currency gains and losses in the Fund's Statement of Operations.

Options: The Fund may purchase or write (sell) put and call options. One of the risks associated with purchasing an option among others, is that the Fund pays a premium whether or not the option is exercised. Additionally, the Fund bears the risk of loss of premium and change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. The cost of securities acquired through the exercise of call options is increased by premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid.

Edgar Filing: Clough Global Allocation Fund - Form N-CSRS

When the Fund writes an option, an amount equal to the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current value of the option written. Premiums received from writing options that expire unexercised are treated by the Fund on the expiration date as realized gains from investments. The difference between the premium and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or, if the premium is less than the amount paid for the closing purchase transaction, as a realized loss. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security or currency in determining whether the Fund has realized a gain or loss. If a put option is exercised, the premium reduces the cost basis of the securities purchased by the Fund. The Fund, as writer of an option, bears the market risk of an unfavorable change in the price of the security underlying the written option. Written and purchased options are non-income producing securities.

Written option activity for the six months ended November 30, 2005 was as follows:

Written Put Options	Contracts	Premiums
Outstanding, May 31, 2005	6,200	\$ 1,104,985
Positions opened	12,200	1,047,191
Expired	(6,950)	(1,105,420)
Closed	(2,000)	(127,995)
Split	750	
Outstanding, November 30, 2005	10,200	\$ 918,761
Market Value, November 30, 2005		\$ (132,250)

Short Sales: The Fund may sell a security it does not own in anticipation of a decline in the fair value of that security. When the Fund sells a security short, it must borrow the security sold short and deliver it to the broker-dealer through which it made the short sale. A gain, limited to the price at which the Fund sold the security short, or a loss, unlimited in size, will be recognized upon the termination of the short sale.

Income Taxes: The Fund's policy is to comply with the provisions of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

Distributions to Shareholders: The Fund intends to make a level dividend distribution each quarter to Common Shareholders after payment of interest on any outstanding borrowings or dividends on any outstanding preferred shares. The level dividend rate may be modified by the Board of Trustees from time to time. Any net capital gains earned by the Fund are distributed at least annually to the extent necessary to avoid federal income and excise taxes. Distributions to shareholders are recorded by the Fund on the ex-dividend date. The Fund has applied to the Securities and Exchange Commission for an exemption from Section 19(b) of the 1940 Act and Rule 19b-1 thereunder permitting the Fund to make periodic distributions of long-term capital gains, provided that the distribution policy of the Fund with respect to its Common Shares calls for periodic (e.g., quarterly/monthly) distributions in an amount equal to a fixed percentage of the Fund's average net asset value over a specified period of time or market price per common share at or about the time of distribution or pay-out of a level dollar amount.

Securities Transactions and Investment Income: Investment security transactions are accounted for as of trade date. Dividend income is recorded on the ex-dividend date. Interest income, which includes amortization of premium and accretion of discount, is accrued as earned. Realized gains and losses from securities transactions and unrealized appreciation and depreciation of securities are determined using the highest cost basis for both financial reporting and income tax purposes.

Use of Estimates: The Fund's financial statements are prepared in accordance with accounting principles generally accepted in the United States of America. This requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from these estimates.

2. TAXES

The primary difference between book and tax net unrealized appreciation is wash sale loss deferrals.

Net unrealized appreciation/depreciation of investments based on federal tax cost as of November 30, 2005, were as follows:

Gross appreciation (excess of value over tax cost)		34,470,713
Gross depreciation (excess of tax cost over value)		(3,872,393)
Net unrealized appreciation		30,598,320
Cost of investments for income tax purpose	\$	299,842,635

3. CAPITAL TRANSACTIONS

Common Shares: There are an unlimited number of no par value common shares of beneficial interest authorized. Of the 10,002,118 common shares outstanding on November 30, 2005, ALPS Mutual Funds Services, Inc. owned 5,236 shares.

Transactions in common shares were as follows:

	For the Six Months Ended November 30, 2005	For the Period Ended May 31, 2005
Common shares outstanding - beginning of period	9,877,834	5,236

Edgar Filing: Clough Global Allocation Fund - Form N-CSRS

Common shares issued in connection with initial public offering		8,750,000
Common shares issued from underwriters' over-allotment option exercised		920,000
Common shares issued as reinvestment of dividends	124,284	202,598
Common shares outstanding - end of period	10,002,118	9,877,834

Preferred Shares: On September 15, 2004, the Fund's Board of Trustees authorized the issuance of an unlimited number of no par value preferred shares, in addition to the existing common shares, as part of the Fund's leverage strategy. Preferred shares issued by the Fund have seniority over the common shares.

The Fund is subject to certain limitations and restrictions while preferred shares are outstanding. Failure to comply with these limitations and restrictions could preclude the Fund from declaring any dividends or distributions to common shareholders or repurchasing common shares and/or could trigger the mandatory redemption of Preferred Shares at their liquidation value. Specifically, the Fund is required under the Investment Company Act of 1940 to maintain an asset coverage with respect to the outstanding preferred shares of 200% or greater.

The Fund has one series of Auction Market Preferred Shares (AMPS), W28. On December 1, 2004, the Fund issued 3,800 shares of AMPS with a net asset and liquidation value of \$25,000 per share plus accrued dividends. Dividends on the AMPS are cumulative and are paid based on an annual rate set through auction procedures. Distributions of net realized capital gains, if any, are paid annually. As of November 30, 2005, the annualized dividend rate for the AMPS was 4.00%. The dividend rate, as set by the auction process, is generally expected to vary with short-term interest rates. The rate may vary in a manner unrelated to the income received on the Fund's assets, which could have either a beneficial or detrimental impact on net investment income and gains available to Common Shareholders. Preferred Shares, which are entitled to one vote per share, generally vote with the Common Shares but vote separately as a class to elect two Trustees and on any matters affecting the rights of the Preferred Shares.

4. PORTFOLIO SECURITIES

Purchases and sales of investment securities, other than short-term securities, for the six months ended November 30, 2005 aggregated \$366,514,041 and \$385,956,166, respectively. Purchase and sales of U.S. government and agency securities, other than short-term securities, for the six months ended November 30, 2005 aggregated \$114,753,808 and \$127,869,013, respectively.

5. INVESTMENT ADVISORY AND ADMINISTRATION AGREEMENTS

Clough Capital Partners L.P. (Clough) serves as the Fund's investment adviser pursuant to an Investment Advisory Agreement with the Fund. As compensation for its services to the Fund, Clough receives an annual investment advisory fee of 0.70% based on the Fund's average daily total assets, computed daily and payable monthly.

ALPS Mutual Funds Services, Inc. (ALPS) serves as the Fund's administrator pursuant to an Administration, Bookkeeping and Pricing Services Agreement with the Fund. As compensation for its services to the Fund, ALPS receives an annual administration fee of 0.285% based on the Fund's average daily total assets, computed daily and payable monthly. ALPS will pay all expenses incurred by the Fund, with the exception of advisory fees, trustees' fees, portfolio transaction expenses, litigation expenses, taxes, cost of preferred shares, expenses of conducting repurchase offers for the purpose of repurchasing fund shares, and extraordinary expenses.

6. OTHER

The Independent Trustees of the Fund receive a quarterly retainer of \$3,500 and an additional \$1,500 for each meeting attended.

DIVIDEND REINVESTMENT PLAN

November 30, 2005 (unaudited)

Unless the registered owner of Common Shares elects to receive cash by contacting The Bank of New York (the Plan Administrator or BONY), all dividends declared on Common Shares will be automatically reinvested by the Plan Administrator for shareholders in the Fund's Dividend Reinvestment Plan (the Plan), in additional Common Shares. Shareholders who elect not to participate in the Plan will receive all dividends and other distributions in cash paid by check mailed directly to the shareholder of record (or, if the Common Shares are held in street or other nominee name, then to such nominee) by BONY as dividend disbursing agent. You may elect not to participate in the Plan and to receive all dividends in cash by contacting BONY, as dividend disbursing agent, at the address set forth below. Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by notice if received and processed by the Plan Administrator prior to the dividend record date; otherwise such termination or resumption will be effective with respect to any subsequently declared dividend or other distribution. Some brokers may automatically elect to receive cash on your behalf and may re-invest that cash in additional Common Shares for you. If you wish for all dividends declared on your Common Shares to be automatically reinvested pursuant to the Plan, please contact your broker.

The Plan Administrator will open an account for each Common Shareholder under the Plan in the same name in which such Common Shareholder's Common Shares are registered. Whenever the Fund declares a dividend or other distribution (together, a Dividend) payable in cash, non-participants in the Plan will receive cash and participants in the Plan will receive the equivalent in Common Shares. The Common Shares will be acquired by the Plan Administrator for the participants' accounts, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized Common Shares from the Fund (Newly Issued Common Shares) or (ii) by purchase of outstanding Common Shares on the open market (Open-Market Purchases) on the American Stock Exchange or elsewhere. If, on the payment date for any Dividend, the closing market price plus estimated brokerage commissions per Common Share is equal to or greater than the net asset value per Common Share, the Plan Administrator will invest the Dividend amount in Newly Issued Common Shares on behalf of the participants. The number of Newly Issued Common Shares to be credited to each participant's account will be determined by dividing the dollar amount of the Dividend by the net asset value per Common Share on the payment date; provided that, if the net asset value is less than or equal to 95% of the closing market value on the payment date, the dollar amount of the Dividend will be divided by 95% of the closing market price per Common Share on the payment date. If, on the payment date for any Dividend, the net asset value per Common Share is greater than the closing market value plus estimated brokerage commissions, the Plan Administrator will invest the Dividend amount in Common Shares acquired on behalf of the participants in Open-Market Purchases. In the event of a market discount on the payment date for any Dividend, the Plan Administrator will have until the last business day before the next date on which the Common Shares trade on an ex-dividend basis or 30 days after the payment date for such Dividend, whichever is sooner (the Last Purchase Date), to invest the Dividend amount in Common Shares acquired in Open-Market Purchases. If, before the Plan Administrator has completed its Open-Market Purchases, the market price per Common

Share exceeds the net asset value per Common Share, the average per Common Share purchase price paid by the Plan Administrator may exceed the net asset value of the Common Shares, resulting in the acquisition of fewer Common Shares than if the Dividend had been paid in Newly Issued Common Shares on the Dividend payment date. Because of the foregoing difficulty with respect to Open-Market Purchases, the Plan provides that if the Plan Administrator is unable to invest the full Dividend amount in Open-Market Purchases during the purchase period or if the market discount shifts to a market premium during the purchase period, the Plan Administrator may cease making Open-Market Purchases and may invest the uninvested portion of the Dividend amount in Newly Issued Common Shares at the net asset value per Common Share at the close of business on the Last Purchase Date provided that, if the net asset value is less than or equal to 95% of the then current market price per Common Share; the dollar amount of the Dividend will be divided by 95% of the market price on the payment date.

The Plan Administrator maintains all shareholders' accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Common Shares in the account of each Plan participant will be held by the Plan Administrator on behalf of the Plan participant, and each shareholder proxy will include those shares purchased or received pursuant to the Plan. The Plan Administrator will forward all proxy solicitation materials to participants and vote proxies for shares held under the Plan in accordance with the instructions of the participants. In the case of Common Shareholders such as banks, brokers or nominees which hold shares for others who are the beneficial owners, the Plan Administrator will administer the Plan on the basis of the number of Common Shares certified from time to time by the record shareholder's name and held for the account of beneficial owners who participate in the Plan.

There will be no brokerage charges with respect to Common Shares issued directly by the Fund. However, each participant will pay a pro rata share of brokerage commissions incurred in connection with Open-Market Purchases. The automatic reinvestment of Dividends will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such Dividends. Participants that request a sale of Common Shares through the Plan Administrator are subject to brokerage commissions. The Fund reserves the right to amend or terminate the Plan. There is no direct service charge to participants with regard to purchases in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants.

All correspondence or questions concerning the Plan should be directed to the Plan Administrator, The Bank of New York, 101 Barclay Street, New York, New York 10286, 20th Floor, Transfer Agent Services, (800) 433-8191.

FUND PROXY VOTING POLICIES & PROCEDURES

November 30, 2005 (unaudited)

Fund policies and procedures used in determining how to vote proxies relating to portfolio securities and a summary of proxies voted by the Fund for the period ended June 30, 2005 are available without a charge, upon request, by contacting the Fund at 1-877-256-8445 and on the Commission's website at <http://www.sec.gov>.

PORTFOLIO HOLDINGS

November 30, 2005 (unaudited)

The Fund files its complete schedule of portfolio holdings with the Commission for the first and third quarters of each fiscal year on Form N-Q within 60 days after the end of the period. Copies of the Fund's Forms N-Q are available upon request, by contacting the Fund at 1-877-256-8445 and on the Commission's website at <http://www.sec.gov>. You may also review and copy form N-Q at the Commission's Public Reference Room in Washington, D.C. For more information about the operation of the Public Reference Room, please call the Commission at 1-800-SEC-0330.
