**Item 1. Reports to Stockholders.**

---

**COHEN & STEERS TOTAL RETURN REALTY FUND, INC.**

To Our Shareholders:

We would like to share with you our report for the six months ended June 30, 2009. The net asset value at that date was \$7.82 per common share. The Fund's common stock is traded on the New York Stock Exchange (NYSE) and its share price can differ from its net asset value; at period end, the Fund's closing price on the NYSE was \$7.18. The total returns, including income, for the Fund and the comparative benchmarks were:

	Six Months Ended June 30, 2009
Cohen & Steers Total Return Realty Fund at Market Value <sup>a</sup>	1.91%
Cohen & Steers Total Return Realty Fund at Net Asset Value <sup>a</sup>	3.45%
FTSE NAREIT Equity REIT Index <sup>b</sup>	12.21%
S&P 500 Index <sup>b</sup>	3.16%
Blended benchmark 80% FTSE NAREIT Equity REIT Index, 20% Merrill Lynch REIT Preferred Index <sup>b</sup>	6.85%

*The performance data quoted represent past performance. Past performance is no guarantee of future results. The investment return and the principal value of an investment will fluctuate and shares, if sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted.*

Investment Review

U.S. real estate securities declined in the six-month period, although they were subject to strong swings in sentiment and performance. REITs entered 2009 with positive momentum from December's rally but quickly sold off as concerns about the economy and banking system took a disproportionate toll on the asset class. The new administration's proposed stimulus package failed to ignite markets when details suggested that the spending would occur slowly. Economic news remained negative.

<sup>a</sup> As a closed-end investment company, the price of the Fund's New York Stock Exchange-traded shares will be set by market forces and at times may deviate from the net asset value per share of the Fund.

<sup>b</sup> The FTSE NAREIT Equity REIT Index is an unmanaged, market-capitalization-weighted index of all publicly traded REITs that invest predominantly in the equity ownership of real estate. The index is designed to reflect the performance of all publicly traded equity REITs as a whole. The S&P 500 Index is an unmanaged index of common stocks that is frequently used as a general measure of stock market performance. The Merrill Lynch REIT Preferred Index is an unmanaged index of real estate preferred securities.

**COHEN & STEERS TOTAL RETURN REALTY FUND, INC.**

Property stocks continued their downward trend in February as investors reacted unfavorably to the proposed budget and the lack of specifics on how the government would address the banking crisis. In this environment, real estate securities were positively correlated with troubled financial institutions. Although volatility remained high, conditions for REITs improved in March with greater clarity on the path the U.S. government was taking to improve the equity and liquidity of the financial system. Citigroup jump-started a broad market rally on March 9 when it announced that it expected to be profitable for the first two months of 2009.

*Recapitalization comes to the United States*

In late March, mall owner Simon Property Group and warehouse operator AMB Property recapitalized, raising \$1.2 billion and \$500 million, respectively, in the capital markets to strengthen their balance sheets and meet debt maturities. The capital raisings, which followed the earlier success of Australian and U.K. property companies, reassured investors that REITs would survive the current economic downturn and, in a growing number of instances, thrive. In total, U.S. REITs raised \$16.8 billion between March and June. Cohen & Steers was instrumental in several capital raisings, and was a cornerstone investor in many of them.

The second quarter saw a continued rally in the broad equity markets but with a distinct acceleration and outperformance by real estate securities (REITs rose 28.9% in the quarter, compared with a total return of 15.9% for the S&P 500 Index). Re-equitization lifted property shares and also encouraged the REIT unsecured bond market; spreads tightened and the market reopened as an additional capital source. Investors were undeterred by General Growth Properties' bankruptcy. The former blue-chip REIT filed for Chapter 11 on April 16 and the market rose. The company's plight had been telegraphed for months. We did not have a position in the company during the period.

REIT performance leveled off from April's blistering pace, although the stream of recapitalizations continued. While earlier capital raisings focused on strengthening balance sheets and meeting debt maturities, some of the more recent activity was undertaken with an eye toward distressed acquisition opportunities, notably Simon, which raised an additional \$1.7 billion for that stated purpose.

*REIT preferred securities had gains*

Real estate preferred securities also bounced off multi-year lows in early March, likewise spurred by signs of economic stabilization and recapitalizations. The group finished the period in positive territory, with a total return of +14.8% for the six months, as measured by the Merrill Lynch REIT Preferred Index. REIT preferreds were under heavy selling pressure in late 2008, in part due to tax-related selling, and did not fall as much as REIT common shares in the first quarter of 2009.

**COHEN & STEERS TOTAL RETURN REALTY FUND, INC.**

*Fund performance*

The Fund had a decline in its net asset value in the period, although it outperformed its NAREIT benchmark. The Fund's allocation to REIT preferred securities (which are not included in the NAREIT index) posted strong returns in both absolute terms and compared with the broad REIT preferred market. Our underweight in troubled shopping center REITs (the sector returned -24.2% within the index) also contributed to performance, as did our stock selection in the office/industrial (-0.8%) and health care (-12.6%) sectors.

Factors that detracted from relative performance included our lack of investment in the specialty sector (-1.7%). Stock selection in regional mall REITs also hindered performance, as did our underweight in the hotel sector (+7.9%). The Fund did not fully participate in the share price appreciation of several hotel companies that recapitalized in the second quarter. We had been underweight hotel REITs because their short-term leases are vulnerable to economic downturns and cut-backs in business and leisure travel.

The Fund's market price had a modestly positive return in the period, rising 1.9%. This reflected a general trend of a narrowing in closed-end funds' discounts to their underlying net asset values. Discounts for most funds reached historically wide levels in 2008, but narrowed considerably in the first half of 2009.

*Investment Outlook*

We are closely monitoring the flow of economic data, and it is our view that the economy will surprise to the upside later this year, possibly in the fourth quarter, and follow through into 2010.

REIT capital raisings will likely resume again later this year after June's pause, as companies continue to take advantage of a receptive market. We had expected to see increased instances of distressed selling at this point in the deleveraging cycle, but the greater access to capital has given private property owners and their lenders time to explore alternatives. We continue to believe that phase will come, and that companies with the balance sheet capacity will be in a position to play offense when these buying opportunities present themselves. As such, these companies and those fundamentally positioned for a better-than-expected recovery remain our primary focus.

Although it is our view that REIT preferreds can rise from current levels in six to 12 months, while providing attractive income along the way, we expect to see periods of price volatility as investors react to economic and corporate earnings news. Believing that a full recovery in preferreds could be slow, we favor a high income component in the total return equation.

**COHEN & STEERS TOTAL RETURN REALTY FUND, INC.**

**COHEN & STEERS TOTAL RETURN REALTY FUND, INC.**

NOTES TO FINANCIAL STATEMENTS (Unaudited)

Note 1. Significant Accounting Policies

Cohen & Steers Total Return Realty Fund, Inc. (the Fund) was incorporated under the laws of the State of Maryland on September 4, 1992 and is registered under the Investment Company Act of 1940 as amended, as a nondiversified, closed-end management investment company. The Fund's investment objective is maximum total return.

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The policies are in conformity with accounting principles generally accepted in the United States of America (GAAP). The preparation of the financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

*Portfolio Valuation:* Investments in securities that are listed on the New York Stock Exchange are valued, except as indicated below, at the last sale price reflected at the close of the New York Stock Exchange on the business day as of which such value is being determined. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices for the day or, if no asked price is available, at the bid price. Exchange traded options are valued at their last sale price as of the close of options trading on applicable exchanges. In the absence of a last sale, options are valued at the average of the quoted bid and asked prices as of the close of business. Over-the-counter options quotations are provided by the respective counterparty.

Securities not listed on the New York Stock Exchange but listed on other domestic or foreign securities exchanges or admitted to trading on the National Association of Securities Dealers Automated Quotations, Inc. (Nasdaq) national market system are valued in a similar manner. Securities traded on more than one securities exchange are valued at the last sale price on the business day as of which such value is being determined as reflected on the tape at the close of the exchange representing the principal market for such securities.

Readily marketable securities traded in the over-the-counter market, including listed securities whose primary market is believed by Cohen & Steers Capital Management, Inc. (the advisor) to be over-the-counter, are valued at the official closing prices as reported by Nasdaq, the Pink Sheets, or such other comparable sources as the Board of Directors deem appropriate to reflect their fair market value. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices for the day, or if no asked price is available, at the bid price. However, certain fixed-income securities may be valued on the basis of prices provided by a pricing service when such prices are believed by the Board of Directors to reflect the fair market value of such securities. Where securities are traded on more than one exchange and also over-the-counter, the securities will generally be valued using the quotations the Board of Directors believes most closely reflect the value of such securities.

Portfolio securities primarily traded on foreign markets are generally valued at the closing values of such securities on their respective exchanges or if after the close of the foreign markets, but prior to the close of business

**COHEN & STEERS TOTAL RETURN REALTY FUND, INC.**

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

on the day the securities are being valued, market conditions change significantly, certain foreign securities may be fair valued pursuant to procedures established by the Board of Directors.

Securities for which market prices are unavailable, or securities for which the advisor determines that bid and/or asked price does not reflect market value, will be valued at fair value pursuant to procedures approved by the Fund's Board of Directors. Circumstances in which market prices may be unavailable include, but are not limited to, when trading in a security is suspended, the exchange on which the security is traded is subject to an unscheduled close or disruption or material events occur after the close of the exchange on which the security is principally traded. In these circumstances, the Fund determines fair value in a manner that fairly reflects the market value of the security on the valuation date based on consideration of any information or factors it deems appropriate. These may include recent transactions in comparable securities, information relating to the specific security and developments in the markets.

The Fund's use of fair value pricing may cause the net asset value of Fund shares to differ from the net asset value that would be calculated using market quotations. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security may be materially different than the value that could be realized upon the sale of that security.

Short-term debt securities, which have a maturity date of 60 days or less, are valued at amortized cost, which approximates value.

The Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, "Fair Value Measurements" ("FAS 157"), effective January 1, 2008. In accordance with FAS 157, fair value is defined as the price that the Fund would receive to sell an investment or pay to transfer a liability in an orderly transaction with an independent buyer in the principal market, or in the absence of a principal market the most advantageous market for the investment or liability. FAS 157 establishes a single definition of fair value, creates a three-tier hierarchy as a framework for measuring fair value based on inputs used to value the Fund's investments, and requires additional disclosure about fair value. The hierarchy of inputs is summarized below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards Staff Position No. 157-4 "Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly" ("FSP 157-4"), effective June 15, 2009. FSP 157-4 provides additional guidance for estimating fair value in accordance with FAS 157, when the volume and

**COHEN & STEERS TOTAL RETURN REALTY FUND, INC.**

## NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

level of activity for the asset or liability have significantly decreased as well as guidance on identifying circumstances that indicate a transaction is not orderly.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of June 30, 2009 in valuing the Fund's investments carried at value:

	Total	Fair Value Measurements at June 30, 2009 Using		
		Quoted Prices In Active Market for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Common Stock	\$ 53,991,439	\$ 53,991,439	\$	
Preferred Securities \$25 Par Value				
Shopping Center	3,976,654	3,628,634	348,020	
Preferred Securities \$25 Par Value				
Other Industries	9,633,784	9,633,784		
Preferred Securities Capital Securities	2,166,381		2,166,381	
Corporate Bonds	1,129,433		1,129,433	
Money Market Funds	1,785,122		1,785,122	
Total Investments	\$ 72,682,813	\$ 67,253,857	\$ 5,428,956	

Included in the table above are \$694,410 of corporate bonds which were fair valued pursuant to the Fund's fair value procedures. The fair value price considered current day transaction prices, transaction volume and comparability of transaction. The volume and level of activity had not decreased significantly and therefore, the transactions were deemed to be orderly.

*Security Transactions and Investment Income:* Security transactions are recorded on trade date. Realized gains and losses on investments sold are recorded on the basis of identified cost. Interest income is recorded on the accrual basis. Discounts are accreted and premiums are amortized over the life of the respective securities. Dividend income is recorded on the ex-dividend date except for certain dividends on foreign securities, which are recorded as soon as the Fund is informed after the ex-dividend date. The Fund records distributions received in excess of income from underlying investments as a reduction of cost of investments and/or realized gain. Such amounts are based on estimates if actual amounts are not available, and actual amounts of income, realized gain and return of capital may differ from the estimated amounts. The Fund adjusts the estimated amounts of the components of distributions (and consequently its net investment income) as an increase to unrealized

**COHEN & STEERS TOTAL RETURN REALTY FUND, INC.**

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

appreciation/(depreciation) and realized gain/(loss) on investments as necessary once the issuers provide information about the actual composition of the distributions.

*Options:* The Fund may write covered call options on an index or a security with the intention of earning option premiums. Option premiums generate current income and may help increase distributable income. When a Fund writes (sells) an option, an amount equal to the premium received by the Fund is recorded in the Statement of Assets and Liabilities as a liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. When an option expires, the Fund realizes a gain or loss on the option to the extent of the premiums received. Premiums received from writing options which are exercised or are closed, are added to or offset against the proceeds or amount paid on the transaction to determine the realized gain or loss. The Fund, as writer of an option, bears the market risk of an unfavorable change in the price of the underlying index or security. Other risks include the possibility of an illiquid options market or the inability of the counterparties to fulfill their obligations under the contract.

*Foreign Currency Translations:* The books and records of the Fund are maintained in U.S. dollars as follows: (1) the foreign currency market value of investment securities, other assets and liabilities and foreign currency contracts are translated at the exchange rates prevailing at the end of the period; and (2) purchases, sales, income and expenses are translated at the exchange rates prevailing on the respective dates of such transactions. The resultant exchange gains and losses are recorded as realized and unrealized gain/loss on foreign exchange transactions. Pursuant to U.S. federal income tax regulations, certain foreign exchange gains/losses included in realized and unrealized gain/loss are included in or are a reduction of ordinary income for federal income tax purposes. The Fund does not isolate that portion of the results of operations arising as a result of changes in the foreign exchange rates from the changes in the market prices of the securities.

*Foreign Securities:* The Fund may directly purchase securities of foreign issuers. Investing in securities of foreign issuers involves special risks not typically associated with investing in securities of U.S. issuers. The risks include possible revaluation of currencies, the ability to repatriate funds, less complete financial information about companies and possible future adverse political and economic developments. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than those of securities of comparable U.S. issuers.

*Dividends and Distributions to Shareholders:* Dividends from net investment income and capital gain distributions are determined in accordance with U.S. federal income tax regulations, which may differ from GAAP. Dividends from net investment income are declared and paid quarterly. Net realized capital gains, unless offset by any available capital loss carryforward, are typically distributed to shareholders at least annually. Dividends and distributions to shareholders are recorded on the ex-dividend date and are automatically reinvested in full and fractional shares of the Fund unless the shareholder has elected to have them paid in cash.

**COHEN & STEERS TOTAL RETURN REALTY FUND, INC.**

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

Distributions paid by the Fund are subject to recharacterization for tax purposes. Based upon the results of operations for the six months ended June 30, 2009, the advisor considers it likely that a portion of the dividends will be reclassified to return of capital upon the final determination of the Fund's taxable income for the year.

*Income Taxes:* It is the policy of the Fund to continue to qualify as a regulated investment company, if such qualification is in the best interest of the shareholders, by complying with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies, and by distributing substantially all of its taxable earnings to its shareholders. Accordingly, no provision for federal income or excise tax is necessary. The Fund has adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). FIN 48 clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position must meet before being recognized in the financial statements. An assessment of the Fund's tax positions has been made and it has been determined that there is no impact to the Fund's financial statements. Each of the Fund's federal tax returns for the prior three fiscal years remains subject to examination by the Internal Revenue Service.

*Borrowings and Leverage:* The Fund may borrow for leveraging purposes when an investment opportunity arises but the advisor believes that it is not appropriate to liquidate any existing investments. The Fund will only borrow when the advisor believes that the cost of borrowing to carry the assets to be acquired through leverage will be lower than the return earned by the Fund on its longer-term portfolio investments. Should the differential between interest rates on borrowed Funds and the return from investment assets purchased with such Funds narrow, the Fund would realize less of a positive return, with the additional risk that, during periods of adverse market conditions, the market value of the Fund's entire portfolio holdings (including those acquired through leverage) may decline far in excess of incremental returns the Fund may have achieved in the interim. The Fund had no borrowings during the six months ended June 30, 2009.

Note 2. Investment Advisory Fees and Other Transactions with Affiliates

*Investment Advisory Fees:* The advisor serves as the Fund's investment advisor pursuant to an investment advisory agreement (the investment advisory agreement). Under the terms of the investment advisory agreement, the advisor provides the Fund with day-to-day investment decisions and generally manages the Fund's investments in accordance with the stated policies of the Fund, subject to the supervision of the Board of Directors.

For the services under the investment advisory agreement, the Fund pays the advisor an investment advisory fee, accrued daily and paid monthly, at an annual rate of 0.70% of the Fund's average daily net assets.

*Directors' and Officers' Fees:* Certain directors and officers of the Fund are also directors, officers, and/or employees of the advisor. The Fund does not pay compensation to any affiliated directors and officers except for the Chief Compliance Officer, who received \$588 from the Fund for the six months ended June 30, 2009.

**COHEN & STEERS TOTAL RETURN REALTY FUND, INC.**

## NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

## Note 3. Purchases and Sales of Securities

Purchases and sales of securities, excluding short-term investments, for the six months ended June 30, 2009, totaled \$33,329,287 and \$34,622,887, respectively.

Transactions in options written during the six months ended June 30, 2009, were as follows:

	Number of Contracts	Premium
Options outstanding at December 31, 2008		\$
Options written	113,370	240,483
Options expired	(112,355)	(127,343)
Options terminated in closing transactions	(800)	(99,200)
Options exercised	(215)	(13,940)
Options outstanding at June 30, 2009		\$

## Note 4. Income Tax Information

As of June 30, 2009, the federal tax cost and net unrealized depreciation on securities were as follows:

Gross unrealized appreciation	\$ 7,227,094
Gross unrealized depreciation	(12,411,750)
Net unrealized depreciation	\$ (5,184,656)
Cost for federal income tax purposes	\$ 77,867,469

## Note 5. Capital Stock

The Fund is authorized to issue 100 million shares of common stock at a par value of \$0.001 per share. During the six months ended June 30, 2009 and the year ended December 31, 2008, the Fund issued 15,726 and 109,294 shares of common stock, respectively, for the reinvestment of dividends.

On June 12, 2008, the Board of Directors approved the delegation of its authority to management to effect repurchases, pursuant to management's discretion and subject to market conditions and investment considerations, of up to 10% of the Fund's shares outstanding ("Share Repurchase Program") through the fiscal year ended December 31, 2008. On December 17, 2008, the Board of Directors authorized the continuation of the Share Repurchase Program through fiscal year ending December 31, 2009. During the six months ended June 30, 2009 and the year ended December 31, 2008, the Fund did not effect any repurchases.

**COHEN & STEERS TOTAL RETURN REALTY FUND, INC.**

NOTES TO FINANCIAL STATEMENTS (Unaudited) (Continued)

Note 6. Other

In the normal course of business, the Fund enters into contracts that provide general indemnifications. The Fund's maximum exposure under these arrangements is dependent on claims that may be made against the Fund in the future and, therefore, cannot be estimated; however, based on experience, the risk of material loss from such claims is considered remote.

Note 7. Derivative Investments

The Fund has adopted the provisions of Statement of Financial Accounting Standards No. 161, *Disclosures about Derivative Instruments and Hedging Activities* (FAS 161). This new standard requires funds to disclose information intended to enable financial statement users to understand how and why the fund uses derivative instruments, how derivative instruments are accounted for under FAS 133 and how derivative instruments affect the company's financial position, results of operations, and cash flows. All changes to disclosure have been made in accordance with FAS 161 and incorporated for the current period as part of the Notes to Financial Statements.

Fair Values of Derivative Instruments as of June 30, 2009

Statement of Operations

Derivatives	Location	Realized Gain/(Loss)	Change in Unrealized Appreciation/ (Depreciation)
Written Options	Net Realized and Unrealized Gain (Loss)	\$ 170,163	

Note 8. Subsequent Events

In May 2009, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 165, *Subsequent Events* (FAS 165), effective for interim or annual periods ending after June 15, 2009. The FASB has established general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued.

With regard to the Fund's financial statements, subsequent to June 30, 2009 and through August 18, 2009, there have been no recognized subsequent events (subsequent events that provide additional evidence about conditions that existed at the date of the balance sheet) nor have there been any nonrecognized subsequent events (subsequent events that provide evidence about conditions that did not exist at the date of the balance sheet but arose after the balance sheet but before the financial statements are issued or are available to be issued).

PROXY RESULTS (Unaudited)

Cohen & Steers Total Return Realty Fund shareholders voted on the following proposals at the annual meeting held on April 30, 2009. The description of each proposal and number of shares voted are as follows:

Common Shares

	Shares Voted For	Authority Withheld
To elect Directors		
George Grossman	7,250,304	674,259
Robert H. Steers	7,293,165	631,398
C. Edward Ward, Jr.	7,283,273	641,291

**COHEN & STEERS TOTAL RETURN REALTY FUND, INC.**

AVERAGE ANNUAL TOTAL RETURNS

(Periods ended June 30, 2009) (Unaudited)

Based on Net Asset Value				Based on Market Value			
One Year	Five Years	Ten Years	Since Inception (09/27/93)	One Year	Five Years	Ten Years	Since Inception (09/27/93)
32.55%	2.65%	5.53%	6.83%	43.72%	4.20%	4.16%	5.77%

*The performance data quoted represent past performance. Past performance is no guarantee of future results. The investment return will vary and the principal value of an investment will fluctuate and shares, if sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted.*

REINVESTMENT PLAN

We urge shareholders who want to take advantage of this plan and whose shares are held in 'Street Name' to consult your broker as soon as possible to determine if you must change registration into your own name to participate.

OTHER INFORMATION

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities is available (i) without charge, upon request, by calling 800-330-7348, (ii) on our Web site at [cohenandsteers.com](http://cohenandsteers.com) or (iii) on the Securities and Exchange Commission's Web site at <http://www.sec.gov>. In addition, the Fund's proxy voting record for the most recent 12-month period ended June 30 is available (i) without charge, upon request, by calling 800-330-7348 or (ii) on the SEC's Web site at <http://www.sec.gov>.

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Fund's Forms N-Q are available (i) without charge, upon request by calling 800-330-7348, or (ii) on the SEC's Web site at <http://www.sec.gov>. In addition, the Forms N-Q may be reviewed and copied at the SEC's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling 800-SEC-0330.

Please note that the distributions paid by the Fund to shareholders are subject to recharacterization for tax purposes. The Fund may also pay distributions in excess of the Fund's net investment company taxable income and this excess would be a tax-free return of capital distributed from the Fund's assets. To the extent this occurs, the Fund's shareholders of record will be notified of the estimated amount of capital returned to shareholders for each such distribution and this information will also be available at [cohenandsteers.com](http://cohenandsteers.com). The final tax treatment of all distributions is reported to shareholders on their 1099-DIV forms, which are mailed after the close of each calendar year. Distributions of capital decrease the Fund's total assets and, therefore, could have the effect of increasing the Fund's expense ratio. In addition, in order to make these distributions, the Fund may have to sell portfolio securities at a less than opportune time.

**COHEN & STEERS TOTAL RETURN REALTY FUND, INC.**

The Board of Directors, at its June 9-10, 2009 meeting, approved that the Fund may, but is not required to, use, without limit, various strategic transactions described below to seek to generate return, facilitate portfolio management and mitigate risks. Although the investment advisor may seek to use these kinds of transactions to further the Fund's investment objectives, no assurance can be given that they will achieve this result. The Fund may enter into exchange-listed and over-the-counter put and call options on securities (including securities of investment companies and baskets of securities), indexes, and other financial instruments; purchase and sell financial futures contracts and options thereon; enter into various interest rate transactions, such as swaps, caps, floors or collars or credit transactions; equity index, total return and credit default swaps; forward contracts; and structured investments. In addition, the Fund may enter into various currency transactions, such as forward currency contracts, currency futures contracts, currency swaps or options on currency or currency futures. The Fund also may purchase and sell derivative instruments that combine features of these instruments. The Fund may invest in other types of derivatives, structured and similar instruments which are not currently available but which may be developed in the future. Collectively, all of the above are referred to as "Derivatives Transactions."

Derivatives Transactions can be highly volatile and involve various types and degrees of risk, depending upon the characteristics of the particular derivative, including the imperfect correlation between the value of such instruments and the underlying assets, the possible default of the other party to the transaction and illiquidity of the derivative instruments. Derivatives Transactions may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in derivatives could have a large potential impact on the Fund's performance, effecting a form of investment leverage on the Fund's portfolio. In certain types of Derivatives Transactions the Fund could lose the entire amount of its investment; in other types of Derivatives Transactions the potential loss is theoretically unlimited.

The market for many derivatives is, or suddenly can become, illiquid. Changes in liquidity may result in significant, rapid and unpredictable changes in the prices for Derivatives Transactions. The Fund could experience losses if it were unable to liquidate its position because of an illiquid secondary market. Successful use of Derivatives Transactions also is subject to the ability of the investment advisor to predict correctly movements in the direction of the relevant market and, to the extent the transaction is entered into for hedging purposes, to ascertain the appropriate correlation between the transaction being hedged and the price movements of the derivatives. Derivatives Transactions entered into to seek to manage the risks of the Fund's portfolio of securities may have the effect of limiting gains from otherwise favorable market movements. The use of Derivatives Transactions may result in losses greater than if they had not been used (and a loss on a Derivatives Transaction position may be larger than the gain in a portfolio position being hedged), may require the Fund to sell or purchase portfolio securities at inopportune times or for prices other than current market values, may limit the amount of appreciation the Fund can realize on an investment, or may cause the Fund to hold a security that it might otherwise sell. Amounts paid by the Fund as premiums and cash or other assets held as collateral with respect to Derivatives Transactions may not otherwise be available to the Fund for investment purposes.

**COHEN & STEERS TOTAL RETURN REALTY FUND, INC.**

The use of currency transactions can result in the Fund incurring losses as a result of the imposition of exchange controls, political developments, government intervention or failure to intervene, suspension of settlements or the inability of the Fund to deliver or receive a specified currency.

Structured notes and other related instruments carry risks similar to those of more traditional derivatives such as futures, forward and option contracts. However, structured instruments may entail a greater degree of market risk and volatility than other types of debt obligations.

The Fund will be subject to credit risk with respect to the counterparties to certain Derivatives Transactions entered into by the Fund. Derivatives may be purchased on established exchanges or through privately negotiated transactions referred to as over-the-counter ("OTC") derivatives. Exchange-traded derivatives generally are guaranteed by the clearing agency which is the issuer or counterparty to such derivatives. However, many futures exchanges and boards of trade limit the amount of fluctuation permitted in futures contract prices during a single trading day and once the daily limit has been reached in a particular contract no trades may be made that day at a price beyond that limit or trading may be suspended. There also is no assurance that sufficient trading interest to create a liquid secondary market on an exchange will exist at any particular time and no such secondary market may exist or may cease to exist. Each party to an OTC derivative bears the risk that the counterparty will default. OTC derivatives are less liquid than exchange-traded derivatives because the other party to the transaction may be the only investor with sufficient understanding of the derivative to be interested in bidding for it. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivative contract due to financial difficulties, the Fund may experience significant delays in obtaining any recovery under the derivative contract in bankruptcy or other reorganization proceeding. The Fund may obtain only a limited recovery or may obtain no recovery in such circumstances.

The Fund will not be a commodity pool (*i.e.*, a pooled investment vehicle which trades in commodity futures contracts and options thereon and the operator of which is registered with the Commodity Futures Trading Commission). In addition, the Fund has claimed an exclusion from the definition of commodity pool operator and, therefore, is not subject to registration or regulation as a pool operator under the Commodity Exchange Act.
