TF FINANCIAL CORPORATION AND SUBSIDIARIES

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - PRINCIPLES OF CONSOLIDATION

The consolidated financial statements as of June 30, 2010 (unaudited) and December 31, 2009 and for the six month periods ended June 30, 2010 and 2009 (unaudited) include the accounts of TF Financial Corporation (the Company) and its wholly owned subsidiaries Third Federal Bank (the Bank), TF Investments Corporation and Penns Trail Development Corporation. The accompanying consolidated balance sheet at December 31, 2009, has been derived from the audited consolidated balance sheet but does not included all of the information and notes required by U. S. GAAP for complete financial statements. The Company's business is conducted principally through the Bank. All significant intercompany accounts and transactions have been eliminated in consolidation.

NOTE 2 - BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements were prepared in accordance with instructions for Form 10-Q and, therefore, do not include all of the disclosures or footnotes required by accounting principles generally accepted in the United States of America (US GAAP). In the opinion of management, all adjustments, consisting of normal recurring accruals, necessary for fair presentation of the consolidated financial statements have been included. The results of operations for the period ended June 30, 2010 are not necessarily indicative of the results which may be expected for the entire fiscal year or any other period. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2009.

NOTE 3 - CONTINGENCIES

The Company, from time to time, is a party to routine litigation that arises in the normal course of business. In the opinion of management, the resolution of this litigation, if any, would not have a material adverse effect on the Company's consolidated financial position or results of operations.

NOTE 4 - OTHER COMPREHENSIVE INCOME (LOSS)

Comprehensive income (loss) is the change in equity of a business enterprise during a period from transactions and other events and circumstances from non-owner sources. The components of other comprehensive income (loss) are as follows for the three months ended:

June 30, 2010

Edgar Filing: TF FINANCIAL CORP - Form 10-Q

Residential mortgage-backed securities held to maturity	\$ 75,977	\$ 2,483	\$ (262)	\$ 78,198

The Company also holds stock in the Federal Home Loan Bank of Pittsburgh (FHLB) totaling \$9.9 million as of June 30, 2010 and December 31, 2009. The Company is required to maintain a minimum amount of FHLB stock as determined by its borrowing levels and amount of eligible assets. At June 30, 2010 the Company was required to hold \$6.3 million in FHLB stock. FHLB stock can only be repurchased by the FHLB or sold to another member, and all sales must be at par. The Company holds FHLB stock as a long term investment based on the ultimate recoverability of the par value. During the fourth quarter of 2008, the FHLB suspended the repurchase of stock and dividend payments which prompted the Company to give consideration to evaluating the potential impairment of the investment. The Company evaluates potential impairment of its investment in FHLB stock quarterly and considers the following: 1) the magnitude and direction of the change in the net assets of the FHLB as compared to the capital stock amount and the duration of this condition, 2) the ability of the FHLB to make payments required by law or regulation and the level of such payments in relation to the operating performance of the FHLB, 3) the impact of regulatory changes

Edgar Filing: TF FINANCIAL CORP - Form 10-Q

on the FHLB and on its members, and 4) the liquidity position of the FHLB. After evaluating these factors the Company has concluded that the par value of its investment in FHLB stock is recoverable and no impairment has been recorded during the six months ended June 30, 2010 or year ended December 31, 2009.

Edgar Filing: TF FINANCIAL CORP - Form 10-Q

Table of Contents

The table below indicates the length of time individual securities have been in a continuous unrealized loss position at June 30, 2010:

Description of Securities	Number of Securities	Less than 12 months		12 months or longer		Total	
		Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair value	Unrealized Loss
State and political subdivisions	6	\$ 4,326	\$ (43)	\$	\$	\$ 4,326	\$ (43)
Residential mortgage-backed securities issued by quasi-governmental agencies	2	212	(1)	2,285	(73)	2,497	(74)
Residential real estate mortgage-backed securities privately issued	2	5,405	(107)			5,405	(107)
Total temporarily impaired securities	10	\$ 9,943	\$ (151)	\$ 2,285	\$ (73)	\$ 12,228	\$ (224)

The table below indicates the length of time individual securities have been in a continuous unrealized loss position at December 31, 2009:

Description of Securities	Number of Securities	Less than 12 months		12 months or longer		Total	
		Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair value	Unrealized Loss
U.S. Government and federal agencies	1	\$ 2,945	\$ (55)	\$	\$	\$ 2,945	\$ (55)
State and political subdivisions	6	4,086	(109)			4,086	(109)
Residential mortgage-backed securities issued by quasi-governmental agencies	2	4,352	(39)			4,352	(39)
Residential real estate mortgage-backed securities privately issued	4	5,536	(160)	1,511	(63)	7,047	(223)
Total temporarily impaired securities	13	\$ 16,919	\$ (363)	\$ 1,511	\$ (63)	\$ 18,430	\$ (426)

On a quarterly basis, temporarily impaired securities are evaluated to determine whether such impairment is other-than-temporary impairment (OTTI). This evaluation involves consideration of the length of time and the amount, by which the fair value has been lower than amortized cost, the financial condition and credit rating of the issuer, the changes in fair value in relation to the change in market interest rates and other relevant information. In addition, with respect to mortgage-backed securities issued by government and quasi-governmental agencies (i. e. Government National Mortgage Association (GNMA), Federal Home Loan Mortgage Corporation (FHLMC) and Federal National Mortgage Association (FNMA)) the Company considers the ultimate payment of principal and interest as an obligation of the United States Government and thus assured. With respect to mortgage-backed securities issued by private parties, the Company studies delinquencies, loss rates, loss severity and

Edgar Filing: TF FINANCIAL CORP - Form 10-Q

other information related to the underlying loans in order to form an opinion regarding the possibility of a cash flow shortfall. The Company also evaluates its intent to hold, intent to sell or need to sell the securities in light of its investment strategy, cash flow needs, interest rate risk position, prospects for the issuer and all other relevant factors.

With respect to investments in equity securities, if it is determined that the impairment for an individual security is OTTI such impairment would be recognized as a reduction to non-interest income in the consolidated statement of income. With

Table of Contents

respect to debt securities, if it has been determined that the impairment for an individual security is OTTI, but the Company does not intend to sell the security and concludes that it is more likely than not that it will not be required to sell the security before recovering the carrying value, which may be maturity, the OTTI would be separated into the credit and other components. The other component of the OTTI would be included in other comprehensive loss, net of the tax effect, and the credit component of the OTTI would be included as a reduction to non-interest income in the consolidated statement of income. Otherwise, the OTTI impairment of debt securities would be recognized as a reduction to non-interest income in the consolidated statements of income. Accordingly, the Company has performed this evaluation and has determined that the unrealized losses at June 30, 2010 and December 31, 2009, respectively are not considered other-than-temporary and are therefore reflected in other comprehensive income.

At June 30, 2010, temporarily impaired securities were all debt securities classified as available for sale. There were no temporarily impaired equity securities. The Company did not intend to sell any of the temporarily impaired securities and has concluded that it will not be required to sell any of the temporarily impaired securities. Upon an evaluation of each individual debt security, the Company determined that the temporary impairment was predominately caused by widening interest rate spreads over the relevant interest rate benchmark in relation to the Company's amortized cost, and not caused by deterioration in credit quality. Thus, the Company considered the impairment of each security to be temporary and not OTTI.

NOTE 7 LOANS RECEIVABLE

Loans receivable are summarized as follows:

	June 30, 2010	December 31, 2009
	(in thousands)	
Held for investment:		
First mortgage loans		
Secured by one-to-four family residences	\$ 269,650	\$ 271,651
Secured by non-residential properties	137,227	134,584
Construction loans	25,536	29,671
Total first mortgage loans	432,413	435,906
Other loans		
Commercial-business, real estate secured	34,421	33,514
Commercial-business, non-real estate secured	874	7,462
Home equity and second mortgage	55,044	54,811
Other consumer	2,643	2,565
Total other loans	92,982	98,352
Total loans	525,395	534,258
Net deferred loan origination costs and unamortized premiums	633	609
Less allowance for loan losses	(6,749)	(5,215)
Total loans receivable	\$ 519,279	\$ 529,652
Held for sale:		
First mortgage loans		
Secured by one-to-four family residences	\$ 919	\$ 1,082

Table of Contents

Activity in the allowance for loan losses is summarized as follows (in thousands):

	Period end June 30, 2010	Period end June 30, 2009
Balance at January 1,	\$ 5,215	\$ 3,855
Provision charged to income	1,561	1,255
Charge-offs:		
Secured by one-to-four family residences		(97)
Secured by non-residential properties		
Construction loans		(48)
Commercial-business, non-real estate secured	(16)	
Other consumer	(14)	(15)
Recoveries:		
Construction loans		
Commercial-business, non-real estate secured		14
Other consumer	3	6
Balance at end of period	\$ 6,749	\$ 4,970

NOTE 8- FAIR VALUE MEASUREMENTS

The following table presents information about the Company's assets and liabilities measured at fair value on a recurring basis as of June 30, 2010. Fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement hierarchy has been established for inputs in valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

The fair value hierarchy levels are summarized below:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 inputs are inputs that are observable for the asset or liability, either directly or indirectly.
- Level 3 inputs are unobservable and contain assumptions of the party fair valuing the asset or liability.

Determination of the appropriate level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement for the instrument or security. Assets and liabilities measured at fair value on a recurring basis segregated by fair value hierarchy

Edgar Filing: TF FINANCIAL CORP - Form 10-Q

level are summarized below (dollars in thousands):

At June 30, 2010	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of June 30, 2010
Assets				
Investment securities available for sale				
U.S. government and federal agencies	\$	\$ 6,089	\$	\$ 6,089
Corporate debt securities		3,596		3,596
State and political subdivisions		39,979		39,979
Equity securities	99			99
Total investment securities available for sale	\$ 99	\$ 49,664	\$	\$ 49,763
Residential mortgage-backed securities issued				
by quasi-governmental agencies	\$	\$ 63,221	\$	\$ 63,221
Residential real estate mortgage - backed securities privately issued		15,436		15,436
Total mortgage-backed securities available for sale	\$	\$ 78,657	\$	\$ 78,657
Liabilities				
Forward loan sales	\$	\$	\$ 17	\$ 17

Table of Contents

At December 31, 2009	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of December 31, 2009
Assets				
Investment securities available for sale				
U. S. Government and federal agencies	\$	\$	2,945	\$ 2,945
Corporate debt securities			3,517	3,517
State and political subdivisions			34,241	34,241
Equity securities		150		150
Total investment securities available for sale	\$	150	\$ 40,703	\$ 40,853
Residential mortgage-backed securities issued by quasi-governmental agencies	\$	\$	71,151	\$ 71,151
Residential real estate mortgage-backed securities privately issued			7,047	7,047
Total mortgage-backed securities available for sale	\$	\$	78,198	\$ 78,198
Forward loan sales	\$	\$	\$ 21	\$ 21

Active listed equities are classified within Level 1 of the fair value hierarchy. Investment securities available for sale and mortgage-backed securities available for sale are valued primarily by a third party pricing agent. U.S. Government and federal agency and corporate debt securities are primarily priced through a multi-dimensional relational model, a Level 2 hierarchy, which incorporates dealer quotes and other market information including, defined sector breakdown, benchmark yields, base spread, yield to maturity, and corporate actions. State and political subdivision securities are also valued within the Level 2 hierarchy using inputs with a series of matrices that reflect benchmark yields, ratings updates, and spread adjustments. Mortgage-backed securities include FHLMC, GNMA, and FNMA certificates and privately issued real estate mortgage investment conduits which are valued under a Level 2 hierarchy using a matrix correlation to benchmark yields, spread analysis, and prepayment speeds.

The fair value of forward loan sales are determined at the time the underlying loan is identified as held for sale with changes in fair value correlated to the change in secondary market loan pricing. The value is adjusted to reflect the Company's historical loan fallout experience which incorporates such factors as changes in market rates, origination channels and loan purpose.

The following table presents additional information about assets measured at fair value on a recurring basis for which the Company has utilized Level 3 inputs to determine fair value (in thousands):

	Forward loan sales

Table of Contents

Assets and liabilities measured at fair value on a nonrecurring basis segregated by fair value hierarchy level are summarized below (dollars in thousands):

At June 30, 2010	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of June 30, 2010
Assets				
Impaired loans	\$	\$	\$ 14,513	\$ 14,513
Real estate acquired through foreclosure	\$	\$	\$ 1,448	\$ 1,448
Mortgage servicing rights	\$	\$ 598	\$	\$ 598

At December 31, 2009	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of December 31, 2009
Impaired loans	\$	\$	\$ 7,744	\$ 7,744
Real estate acquired through foreclosure	\$	\$	\$ 1,279	\$ 1,279
Mortgage servicing rights	\$	\$ 696	\$	\$ 696

Impaired loans are evaluated and valued at the time the loan is identified as impaired, at the lower of the recorded investment in the loan or market value. Impaired loans secured by real estate totaled \$14,453,000 and \$7,744,000 at June 30, 2010 and December 31, 2009, respectively. Real estate acquired through foreclosure is initially valued at the lower of the recorded investment in the loan or market value at foreclosure and subsequently adjusted for further decreases in market value, if necessary. Market value is determined by using the value of the collateral securing the loans and is therefore classified as a Level 3 hierarchy. The value of the real estate securing impaired loans and real estate acquired through foreclosure is based on appraisals prepared by qualified independent licensed appraisers contracted by the Company to perform the assessment.

The Company initially recognizes and measures servicing assets based on the fair value of the servicing right at the time the loan is sold. The Company uses the amortized cost method for subsequent measurement of its servicing assets and evaluates the recorded value for impairment quarterly. The Company retains a qualified valuation service to calculate the amortized cost and to determine the fair value of the mortgage servicing rights. The valuation service utilizes discounted cash flow analyses adjusted for prepayment speeds, market discount rates and conditions existing in the secondary servicing market. Hence, the fair value of mortgage servicing rights is deemed a Level 2 hierarchy. At June 30, 2010, the amortized cost basis of the Company's mortgage servicing rights was \$828,000 and the fair value of \$598,000 was included in other assets in the consolidated balance sheets.

NOTE 9- FAIR VALUE OF FINANCIAL INSTRUMENTS

For the Bank, as for most financial institutions, the majority of its assets and liabilities are considered financial instruments. However, many such instruments lack an available trading market as characterized by a willing buyer and willing seller engaging in an exchange transaction. Also, it is the Company's general practice and intent to hold its financial instruments to maturity or available for sale and to not engage in trading or significant sales activities. For fair value disclosure purposes, the Company substantially utilized the fair value measurement criteria as explained in Note 8- Fair Value Measurements. Additionally, the Company used significant estimations and present value calculations to prepare this disclosure.

Changes in the assumptions or methodologies used to estimate fair values may materially affect the estimated amounts. In addition, there may not be reasonable comparability between institutions due to the wide range of permitted assumptions and

Table of Contents

methodologies in the absence of active markets. This lack of uniformity gives rise to a high degree of subjectivity in estimating financial instrument fair values.

Fair values have been estimated using data which management considered the best available, as generally provided by estimation methodologies deemed suitable for the pertinent category of financial instrument. The estimation methodologies, resulting fair values and recorded carrying amounts are as follows:

The fair value of cash and cash equivalents equals historical book value. The fair value of investment and mortgage backed securities is described and presented under fair value measurement guidelines as amended.

	June 30, 2010		December 31, 2009	
	Fair value	Carrying value	Fair value	Carrying value
	(in thousands)			
Cash and cash equivalents	\$ 19,965	\$ 19,965	\$ 12,801	\$ 12,801
Investment securities	49,763	49,763	40,853	40,853
Mortgage-backed securities	82,526	82,169	82,231	81,931

The fair value of the loans receivable, net has been estimated using the present value of cash flows, discounted at the approximate current market rates, and giving consideration to estimated prepayment risk but not adjusted for credit risk. Fair value of loans with floating interest rates is generally presumed to approximate the recorded carrying amounts.

	June 30, 2010		December 31, 2009	
	Fair value	Carrying value	Fair value	Carrying value
	(in thousands)			
Loans receivable, net	\$ 543,771	\$ 520,198	\$ 539,670	\$ 530,734

The fair value of deposits and borrowings with stated maturities has been estimated using the present value of cash flows, discounted at rates approximating current market rates for similar assets and liabilities. Fair value of deposits and borrowings with floating interest rates is generally presumed to approximate the recorded carrying amounts.

	June 30, 2010		December 31, 2009	
	Fair value	Carrying value	Fair value	Carrying value
	(in thousands)			
Liabilities				
Deposits with stated maturities	\$ 216,536	\$ 213,146	\$ 228,676	\$ 225,093
Borrowings with stated maturities	\$ 82,489	\$ 79,929	\$ 82,947	\$ 80,241

Edgar Filing: TF FINANCIAL CORP - Form 10-Q

The fair value of deposits and borrowings with no stated maturities is generally presumed to approximate the carrying amount (the amount payable on demand). Fair value deposits and borrowings with floating interest rates are generally presumed to approximate the recorded carrying amounts.

	June 30, 2010		December 31, 2009	
	Fair value	Carrying value	Fair value	Carrying value
	(in thousands)			
Deposits with no stated maturities	\$ 346,244	\$ 346,244	\$ 327,623	\$ 327,623

The Bank's remaining assets and liabilities are not considered financial instruments. No disclosure of the relationship value of the Bank's deposits is required.

Table of Contents**NOTE 10- STOCK BASED COMPENSATION**

The Company has stock benefit plans that allow the Company to grant options and restricted stock to employees and directors. The awards, which have a term of up to 10 years when issued, vest over a three to five year period. The exercise price of each award equals the market price of the Company's stock on the date of the grant. At June 30, 2010, there was \$111,000 of total unrecognized compensation cost, net of estimated forfeitures, related to non-vested awards under the Plan. That cost is expected to be recognized over a weighted average period of 19.6 months. Option activity under the Company's stock option plan as of June 30, 2010 was as follows:

		2010			
	Number of shares	Weighted average exercise price per share	Weighted average remaining contractual term (in years)	Aggregate intrinsic value (\$ 000)	
Outstanding at January 1, 2010	271,646	\$ 26.23			
Options granted					
Options exercised	(12,845)	13.76			
Options forfeited					
Options expired					
Outstanding at June 30, 2010	258,801	\$ 26.84	2.02	\$ 79	
Options exercisable at June 30, 2010	219,207	\$ 27.79	1.49	\$ 40	

The aggregate intrinsic value in the table above represents the total pre-tax intrinsic value (the difference between the Company's closing stock price on the last trading day of the second quarter and the exercise price, multiplied by the number of in-the-money options).

The aggregate intrinsic value of options exercised during the six months ended June 30, 2010 and 2009 was \$76,000 and \$16,000, respectively. Exercise of stock options during the six months ended June 30, 2010 and 2009 resulted in cash receipts of \$177,000 and \$105,000, respectively.

Stock-based compensation expense included in net income related to stock options was \$13,000 and \$14,000 for the three months ended June 30, 2010 and 2009, respectively, resulting in a tax benefit of \$5,000 for each of the periods. Stock-based compensation expense included in net income related to stock options was \$26,000 and \$28,000 for the six months ended June 30, 2010 and 2009, respectively, resulting in a tax benefit of \$9,000 and \$10,000 for each of the periods.

Stock-based compensation expense included in net income related to stock grants was \$4,000 for both three month periods ended June 30, 2010 and 2009, respectively. Stock-based compensation expense included in net income related to the Company's employee stock ownership plan totaled \$49,000 and \$43,000 for the three months ended June 30, 2010 and 2009, respectively. Stock-based compensation expense included in net income related to stock grants was \$8,000 for both of the six month periods ended June 30, 2010 and 2009. Stock-based compensation expense included in net income related to the Company's employee stock ownership plan totaled \$94,000 and \$83,000 for the six months ended June 30, 2010 and 2009, respectively.

Table of Contents**NOTE 11- EMPLOYEE BENEFIT PLANS**

Net periodic defined benefit pension cost included the following (in thousands):

	Three months ended June 30,		
	2010		2009
Components of net periodic benefit cost			
Service cost	\$	133	\$ 118
Interest cost		74	62
Expected return on plan assets		(136)	(93)
Recognized net actuarial loss		42	46
Net periodic benefit cost	\$	113	\$ 133

	Six months ended June 30,		
	2010		2009
Components of net periodic benefit cost			
Service cost	\$	276	\$ 236
Interest cost		148	124
Expected return on plan assets		(272)	(185)
Amortization of prior service cost		1	
Recognized net actuarial loss		74	91
Net periodic benefit cost	\$	227	\$ 266

There was no employer contribution for the six months ended June 30, 2010 and 2009.

NOTE 12 ACCOUNTING STANDARDS UPDATE

In January 2010, the FASB added new requirements for disclosures of fair value measurements. The new requirements include disclosure about transfers in and out of Levels 1 and 2 and separate disclosures about purchases, sales, issuances and settlements relating to Level 3 measurements. The guidance includes new disclosures and changes to clarify existing disclosure requirements. The guidance is effective for the first reporting period (including interim periods) beginning after December 15, 2009, except for the requirement to provide Level 3 activity of purchases, sales, issuances, and settlements on a gross basis, which will be effective for fiscal years beginning after December 15, 2010, and for interim periods within those years. Early adoption is permitted. The required additional disclosures are contained in Note 8-Fair Value Measurements.

Edgar Filing: TF FINANCIAL CORP - Form 10-Q

In April 2010, the FASB issued guidance on the treatment for a modified loan that was acquired as part of a pool of assets. The guidance establishes that entities should not evaluate whether a modification of loans that are part of a pool meets the criteria for a troubled debt restructuring. In addition, modified loans should not be removed from the pool unless certain criteria are met. The amendment will be effective for loans that are part of an asset pool and are modified during financial reporting periods that end July 15, 2010 or later. The Company does not anticipate that the adoption of this guidance will have a significant impact on the Company's financial statements.

In July, 2010 FASB issued an amendment which will require disclosures about the credit quality of financing receivables and the allowance for credit losses. The amendment will improve the transparency in financial reporting by public and non public companies that hold financing receivables which include loans, lease receivables and other long-term receivables. The additional disclosures will include aging of past due receivables, credit quality indicators and modifications of financing receivables. The disclosures should also included information on the development of the credit loss allowance and the management of credit exposures. The amendment will be effective for financial reporting periods ending after December 15, 2010. The Company does not anticipate that the adoption of this guidance will have a significant impact on the Company's financial statements.

Table of Contents

TF FINANCIAL CORPORATION AND SUBSIDIARIES

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL POSITION AND RESULTS OF OPERATIONS

GENERAL

The Company may from time to time make written or oral forward-looking statements, including statements contained in the Company's filings with the Securities and Exchange Commission (including this Quarterly Report on Form 10-Q and the exhibits thereto), in its reports to stockholders and in other communications by the Company, which are made in good faith by the Company pursuant to the Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995.

These forward-looking statements involve risks and uncertainties, such as statements of the Company's plans, objectives, expectations, estimates and intentions that are subject to change based on various important factors (some of which are beyond the Company's control). The following factors, among others, could cause the Company's financial performance to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements: the strength of the United States economy in general and the strength of the local economies in which the Company conducts operations; the effects of, and changes in, trade, monetary and fiscal policies and laws, including interest rate policies of the Board of Governors of the Federal Reserve System, inflation, interest rate, market and monetary fluctuations; the timely development of and acceptance of new products and services of the Company and the perceived overall value of these products and services by users, including the features, pricing and quality compared to competitors' products and services; the willingness of users to substitute competitors' products and services for the Company's products and services; the success of the Company in gaining regulatory approval of its products and services, when required; the impact of changes in financial services laws and regulations (including laws concerning taxes, banking, securities and insurance); technological changes, acquisitions; changes in consumer spending and saving habits; and the success of the Company at managing the risks involved in the foregoing.

The Company cautions that the foregoing list of important factors is not exclusive. The Company does not undertake to update any forward-looking statement, whether written or oral, that may be made from time to time by or on behalf of the Company.

Financial Position

The Company's total assets at June 30, 2010 and December 31, 2009 were \$720.8 million and \$714.1 million, respectively, representing an increase of \$6.7 million, or 0.9% during the six-month period. Investment securities available for sale increased \$8.9 million due to purchases of municipal and federal agency bonds of \$8.5 million as well as a \$0.5 million increase in the fair value of the securities. Cash and cash equivalents increased by \$7.2 million due to continued high deposit levels combined with decreases in loan balances as discussed herein. Mortgage-backed securities available for sale increased by \$0.5 million due to purchases of \$14.0 million and an increase in the fair value of the securities of \$0.1 million offset by principal repayments received of \$13.6 million. Mortgage-backed securities held to maturity decreased by \$0.2 million mainly as a result of principal repayments. Loans receivable, net decreased by \$10.4 million during the first six months of 2010. Principal repayments of loans receivable totaled \$40.9 million and the Company transferred \$1.1 million from loans to real estate acquired through foreclosure. The Company increased the allowance for loan losses by \$1.6 million. Originations of consumer and single-family residential mortgage loans were \$25.5 million and commercial loans were \$7.8 million. Loans receivable held for sale decreased by \$0.2 million,

Edgar Filing: TF FINANCIAL CORP - Form 10-Q

mainly the net result of \$11.5 million in proceeds from the sale of loans in the secondary market offset by loans originated for sale of \$11.3 million.

Total liabilities increased by \$5.2 million during the first six months of 2010. Deposits grew by \$6.7 million due to an increase in money market, interest checking, non-interest checking and savings accounts of \$18.6 million offset by a decrease in retail certificates of deposit of \$11.9 million. Advances from the Federal Home Loan Bank decreased by \$0.3 million, the net result of scheduled amortization and maturities of \$13.2 million offset by a \$12.9 million increase in long-term borrowings.

Total consolidated stockholders' equity of the Company was \$73.3 million or 10.2% of total assets at June 30, 2010. During the first six months of 2010, the Company issued 12,845 shares of common stock as a result of stock option exercises. At June 30, 2010, there were approximately 102,000 shares available for repurchase under the previously announced share repurchase plan.

Table of Contents**Asset Quality**

Non-performing loans include impaired loans and loan balances past due over 90 days for which the accrual of interest has been discontinued. The following table sets forth information regarding the Company's asset quality:

	June 30, 2010	December 31, 2009 (in thousands)	June 30, 2009
Non-performing loans with a related allowance			
Construction loans	\$ 3,886	\$ 2,389	\$ 1,841
Commercial-business, non-real estate secured	112		
Non-performing loans without a related allowance			
Secured by one-to-four family residences(1)	4,544	1,120	461
Secured by non-residential properties(2)	910	2,506	606
Construction loans	354	2,167	
Commercial-business, real estate secured	5,867		
Commercial-business, non-real estate secured			
Home equity and second mortgage	151	99	131
Other consumer	4	4	
Total non-performing loans	\$ 15,828	\$ 8,285	\$ 3,039
Total loans past due 90 days as to interest or principal and accruing interest	\$	\$	\$
Ratio of non-performing loans to gross loans	3.00%	1.55%	0.56%
Ratio of non-performing loans to total assets	2.20%	1.16%	0.42%
Real estate owned	\$ 1,448	\$ 1,279	\$ 1,130
Ratio of total non-performing assets to total assets	2.40%	1.34%	0.58%
Ratio of allowance for loan losses to total loans	1.28%	0.91%	0.91%
Ratio of allowance for loan losses to non-performing loans	42.64%	62.95%	163.54%
Loans delinquent 30-89 days(3)	\$ 1,034	\$ 934	\$ 1,290

(1) Included in this category of non-performing loans at June 30, 2010 and December 31, 2010 are three trouble debt restructurings with combined balances of \$843,000 and \$844,000, respectively. There were no trouble debt restructurings at June 30, 2009.

(2) Included in this category of non-performing loans at June 30, 2010 and December 31, 2010 is one trouble debt restructuring with a loan balance of \$560,000. There were no trouble debt restructurings at June 30, 2009.

(3) Loans delinquent 30-89 days are performing assets and continue to accrue interest.

Non-performing loans included a construction loan with a balance of \$2.4 million, secured by a largely completed and partially occupied commercial office building, and the personal guarantee of the borrowers. At June 30, 2010, this loan was impaired and the Bank had allocated to this loan \$666,000 of the allowance for loan losses, equal to the difference between the loan balance plus other acquisition costs and the fair value based upon a recent appraisal less estimated costs to sell. The Bank has initiated foreclosure proceedings.

Edgar Filing: TF FINANCIAL CORP - Form 10-Q

Non-performing loans also included a construction loan with a balance of \$1.5 million secured by two contiguous parcels of commercial real estate and a contested first-position lien on the guarantor's personal residence. At June 30, 2010, this loan was impaired and the Bank had allocated to this loan \$592,000 of the allowance for loan losses, equal to the difference between the loan balance plus other acquisition costs and the fair value based upon a recent appraisal less estimated costs to sell. The Bank is in the midst of foreclosure proceedings and the borrower has filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy Code.

Non-performing loans included two loans with a combined balance of \$5.9 million to a single borrower, secured by undeveloped commercial real estate and personal guarantees of several individuals. The Bank has initiated foreclosure proceedings. A recent appraisal of the property indicated the appraised value plus other acquisitions costs less estimated costs to sell are in excess of the loan balances.

Not included in non-performing loans were six loans to a single borrower, with a combined balance of \$4.4 million, secured by three separate parcels of commercial property each completed and available for sale or lease, a parcel of vacant land approved for townhome development, two separately deeded commercial parking spaces, and an owner-occupied single family residence. Subsequent to June 30, 2010 the borrower requested a meeting with the Bank, at which time the borrower indicated that they would be unable to continue making all of the principal and interest payments on some or all of these loans. The Bank is working with the borrower in order to resolve this matter.

Table of Contents

With respect to each of the remaining non-performing loans, all of which are real estate secured, the Bank is taking appropriate steps to resolve the individual situations.

Foreclosed property at June 30, 2010 comprised four parcels of real estate with a combined carrying value of \$1.4 million whereas foreclosed property at June 30, 2009 consisted of three parcels of real estate with a combined carrying value of \$1.3 million. Foreclosed real estate is included in other assets in the consolidated balance sheet.

Allowance for Loan Losses

The Bank provides valuation allowances for estimated losses from uncollectible loans. The allowance is increased by provisions charged to expense and reduced by net charge-offs. On a quarterly basis, the Company prepares an allowance for loan losses (ALLL) analysis. In the analysis, the loan portfolio is segmented into groups of homogeneous loans that share similar risk characteristics: commercial real estate, commercial construction, commercial business, single family residential, and consumer which is predominately real estate secured junior liens and home equity lines of credit. Each segment is assigned reserve factors based on quantitative and qualitative measurements. In addition, the Bank reviews its internally classified loans, its loans classified for regulatory purposes, delinquent loans, and other relevant information in order to isolate loans for further scrutiny as potentially impaired loans.

Quantitative factors include an actual expected loss factor based on historical loss experience over a relevant look-back period. Quantitative factors also include the Bank's actual risk ratings for the commercial loan segments as determined in accordance with loan review and loan grading policies and procedures, and additional factors as determined by management to be representative of additional risk due to the loan's geographic location, type, and other attributes. These quantitative factors are adjusted if necessary, up or down, based on actual experience and an evaluation of the qualitative factors.

Qualitative factors are based upon: (1) changes in lending policies and procedures, including but not limited to changes in underwriting standards and collection, charge-off, and recovery practices not considered elsewhere in estimating credit losses; (2) changes in international, national, regional, and local economic and business conditions and developments that affect the collectability of the portfolio, including the condition of various market segments; (3) changes in the nature and volume of the portfolio and in the terms of loans; (4) changes in the experience, ability, and depth of lending management and other relevant staff; (5) changes in the volume and severity of past due loans, the volume of nonaccrual loans, and the volume and severity of adversely classified or graded loans; (6) changes in the quality of the loan review system; (7) changes in the value of underlying collateral for collateral dependent loans; (8) the existence and effect of any concentration of credit, and changes in the level of such concentrations; and (9) the effect of other external factors such as competition and legal and regulatory requirements on the level of estimated credit losses in the existing loan portfolio.

Potentially impaired loans selected for individual evaluation are reviewed in accordance with US GAAP which governs the accounting for impaired assets, and consideration of regulatory guidance regarding treatment of troubled, collateral dependent loans. Each potentially impaired loan is evaluated using all available information such as recent appraisals, whether the loan is currently on accrual or non-accrual status, discounted cash flow analyses, guarantor financial strength, the value of additional collateral, and the loan's and borrower's past performance to determine whether in management's best judgment it is probable that the Bank will be unable to collect all contractual interest and principal in accordance with the loan's terms. Loans deemed impaired are generally assigned a reserve derived from the value of the underlying collateral. Loans deemed not to be impaired are assigned a reserve factor based upon the segment from which they were selected.

Edgar Filing: TF FINANCIAL CORP - Form 10-Q

The ALLL needed as a result of the foregoing evaluations is compared with the unadjusted amount, and an adjustment is made by means of a provision charged to expense for loan losses. Recognizing the inherently imprecise nature of the loss estimates and the large number of assumptions needed in order to perform the analysis, the required reserve may be less than the actual level of reserves at the end of any evaluation period, and thus there may be an unallocated portion of the ALLL. Management adjusts the unallocated portion to an amount which management considers reasonable under the circumstances.

Table of Contents

The following table sets forth the allocation of the loan loss allowance by loan category for the periods indicated:

	June 30, 2010	December 31, 2009 (in thousands)	June 30, 2009
Impaired loans:			
Construction loans	\$ 1,259	\$ 540	\$ 840
Commercial-business, non-real estate secured	56		
Total	1,315	540	840
Unimpaired loans:			
Secured by one-to-four family residences	1,037	962	1,404
Secured by non-residential properties	1,751	1,275	1,048
Construction loans	960	1,126	587
Commercial-business, real estate secured	669	757	325
Commercial-business, non-real estate secured	16	168	9
Home equity and second mortgage	321	303	302
Other consumer	15	14	15
Total	4,769	4,605	3,690
Unallocated	665	70	440
Allowance for loan loss	\$ 6,749	\$ 5,215	\$ 4,970

Table of Contents**RESULTS OF OPERATIONS FOR THE THREE MONTHS ENDED JUNE 30, 2010 AND 2009**

Net Income. The Company recorded net income of \$967,000, or \$0.38 per diluted share, for the three months ended June 30, 2010 as compared to net income of \$1.2 million, or \$0.48 per diluted share, for the three months ended June 30, 2009.

Average Balance Sheet

The following table sets forth information (dollars in thousands) relating to the Company's average balance sheet and reflects the average yield on assets and average cost of liabilities for the periods indicated. Yield and cost are computed by dividing income or expense by the average daily balance of interest-earning assets or interest-bearing liabilities, respectively, for the three-month periods indicated.

	2010		Three Months Ended June 30,		2009

Table of Contents

-
- (1) Nonaccrual loans have been included in the appropriate average loan balance category, but interest on nonaccrual loans has not been included for purposes of determining interest income.
- (2) Tax equivalent adjustments to interest on investment securities were \$140,000 and \$103,000 for the quarter ended June 30, 2010 and 2009, respectively. Tax equivalent interest income is based upon a marginal effective tax rate of 34%.
- (3) Includes interest-bearing deposits in other banks.
- (4) Interest rate spread represents the difference between the average yield on interest-earning assets and the average cost of interest-bearing liabilities.
- (5) Net yield on interest-earning assets represents net interest income as a percentage of average interest-earning assets.
- * Is less than \$500 for period indicated

Rate/Volume Analysis

The following table presents, for the periods indicated, the change in interest income and interest expense (in thousands) attributed to (i) changes in volume (changes in the weighted average balance of the total interest earning asset and interest bearing liability portfolios multiplied by the prior year rate), and (ii) changes in rate (changes in rate multiplied by prior year volume). Changes attributable to the combined impact of volume and rate have been allocated proportionately based on the absolute value of changes due to volume and changes due to rate.

	Three months ended June 30 2010 vs 2009			
	Volume	Increase (decrease) due to Rate		Net
Interest income:				
Loans receivable, net	\$ (281)	\$ (227)		\$ (508)
Mortgage-backed securities	(278)	(87)		(365)
Investment securities (1)	203			203
Other interest-earning assets		1		1
Total interest-earning assets	(356)	(313)		(669)
Interest expense:				
Deposits	1,050	(1,650)		(600)
Borrowings from the FHLB and other borrowings	(964)	549		(415)
Total interest-bearing liabilities	86	(1,101)		(1,015)
Net change in net interest income	\$ (442)	\$ 788		\$ 346

-
- (1) Tax equivalent adjustments to interest on investment securities were \$140,000 and \$103,000 for the quarters ended June 30, 2010 and 2009, respectively. Tax equivalent interest income is based upon a marginal effective tax rate of 34%.

Total Interest Income. Total interest income, on a taxable equivalent basis, decreased by \$669,000 or 7.2% to \$8.7 million for the quarter ended June 30, 2010 compared with the second quarter of 2009. Interest income from loans receivable decreased by \$508,000, the result of a \$20.3 million decrease in the average balance of loans outstanding plus a decrease in the average yield on loans of 17 basis points. The decrease in the yield was caused by an increase in non-performing loans between the periods which reduced interest income from loans by \$293,000. Interest income from mortgage-backed securities was lower in the second quarter of 2010 in comparison to the same period of 2009 mainly because principal repayments of \$30.4 million exceeded purchases of \$20.0 million during the intervening period. Mortgage-backed securities purchased during the second quarter of 2010 totaled \$11.0 million. Interest income from investment securities was higher as a result of purchases of \$16.5 million of investments during the intervening period.

Total Interest Expense. Total interest expense decreased by \$1.0 million to \$2.6 million during the three-month period ended June 30, 2010 as compared with the second quarter of 2009. Although the average balance of deposits increased by \$38.8 million between the two quarters, the interest rates paid on the Bank's deposits were 56 basis points lower in 2010 due to the maturity of certificates of deposit with higher interest rates than current market rates offered on the products into which the maturing CDs were renewed or reinvested. In addition, the Bank lowered the interest rates paid on certain non-CD products. Interest expense associated with borrowings from the Federal Home Loan Bank and the Federal Reserve Bank decreased \$415,000 between the second quarter of 2010 and 2009. During the intervening period, the Bank reduced its average outstanding borrowings by \$50.2 million, mainly by reducing low cost short-term advances. Thus, the remaining fixed rate, term advances outstanding during the second quarter of 2010 have a higher rate than those that were combined with the short-term borrowings available through the Federal Reserve Bank and Federal Home Loan Bank accessed in the second quarter of 2009.

Table of Contents

Non-interest income. Total non-interest income was \$597,000 for the second quarter of 2010 compared with \$1.4 million for the same period in 2009. During the second quarter of 2009, gain on sale of foreclosed real estate totaled \$303,000 and gain on the sale of investment securities was \$116,000 while there was only a gain of \$7,000 from security sales in 2010. During 2010, the gain on sale of loans held for sale decreased by \$201,000 as residential loan sales activity was lower in the second quarter of 2010. Income from mortgage servicing decreased \$176,000 in the second quarter of 2010 mainly due to a \$165,000 non-cash charge for impairment of mortgage servicing rights. Additionally, overdraft fees were \$40,000 lower during the second quarter of 2010, due to increased consumer awareness and recent legislation which is drawing attention to such fees.

Non-interest expense. Total non-interest expense decreased by \$185,000 to \$4.6 million for the three months ended June 30, 2010 compared to the same period in 2009. FDIC insurance premiums decreased by \$252,000 between the two quarters. FDIC premium expense in 2009 included a special assessment of \$330,000; whereas the FDIC insurance premium in the second quarter of 2010 reflects an increased deposit base and an increased assessment rate. Other operating expense decreased \$47,000 due to a renegotiated ATM contract that reduced the expense by \$50,000 in the second quarter of 2010. Professional fees increased between the two periods as a result of an increase in legal costs of \$120,000 which were associated with non-performing loans and foreclosures during the second quarter of 2010. Audit and tax expenses were lower by \$38,000. Employee compensation and benefits increased between quarters due to rising insurance premiums of employer- provided medical benefits that totaled \$49,000.

Income tax expense. The Company's effective tax rate was 25.3% for the quarter ended June 30, 2010 compared to 26.0% for the quarter ended June 30, 2009. These effective tax rates are lower than the Company's marginal tax rate of 34% largely due to the tax-exempt income associated with the Company's investments in tax-exempt municipal bonds and bank-owned life insurance. Income tax expense includes federal as well as state income tax which increased \$62,000 as a state tax loss carry-forward credit expired.

Table of Contents**RESULTS OF OPERATIONS FOR THE SIX MONTHS ENDED JUNE 30, 2010 AND 2009**

Net Income. The Company recorded net income of \$1.7 million, or \$0.66 per diluted share, for the six months ended June 30, 2010 as compared to net income of \$2.2 million, or \$0.89 per diluted share, for the six months ended June 30, 2009.

Average Balance Sheet

The following table sets forth information (dollars in thousands) relating to the Company's average balance sheet and reflects the average yield on assets and average cost of liabilities for the periods indicated. Yield and cost are computed by dividing income or expense by the average daily balance of interest-earning assets or interest-bearing liabilities, respectively, for the six-month periods indicated.

Borrowings from the FHLB and other borrowings	(1,853)	1,001		(852)
Total interest-bearing liabilities	(723)	(1,247)		(1,970)
Net change in net interest income	\$ (35)	\$ 727		\$ 692

-
- (1) Tax equivalent adjustments to interest on investment securities were \$276,000 and \$206,000 for the six months ended June 30, 2010 and 2009, respectively. Tax equivalent interest income is based upon a marginal effective tax rate of 34%.

Total Interest Income. Total interest income, on a taxable equivalent basis, decreased by \$1,278,000 or 6.8% to \$17.5 million for the six months ended June 30, 2010 compared with the first six months of 2009. Interest income from loans receivable decreased by \$861,000, the result of a \$17.8 million decrease in the average balance of loans outstanding, plus a decrease in the yield on loans of 13 basis points. The decrease in the yield was caused by an increase in non-performing loans which reduced interest income from loans by \$349,000 between the periods. Interest income from mortgage-backed securities was lower during 2010 mainly because repayments of \$30.4 million exceeded purchases of \$20.0 million during the intervening period. Interest income from investment securities was higher as a result of purchases of \$16.5 million of investments during the intervening period.

Total Interest Expense. Total interest expense decreased by \$1,970,000 to \$5.5 million during the six-month period ended June 30, 2010 as compared with the same period in 2009. Although the average balance of deposits increased by \$46.5 million between the two periods, the interest rates paid on the Bank's deposits were 58 basis points lower in 2010 due to the maturity of certificates of deposit with higher interest rates than current market rates offered on the products into which the maturing CDs were renewed or reinvested. In addition, the Bank lowered the interest rates paid on certain non-CD products. Interest expense associated with borrowings from the Federal Home Loan Bank and the Federal Reserve Bank decreased \$852,000 between the six-months of 2010 and 2009. During the intervening period, the Bank reduced its average outstanding borrowings by \$62.7 million, mainly by reducing low cost short-term advances. Thus, the remaining fixed rate, term advances outstanding during the six months of 2010 have a higher rate than those that were combined with the short-term borrowings available through the Federal Reserve Bank and Federal Home Loan Bank accessed in 2009.

Table of Contents

Non-interest income. Total non-interest income was \$1.2 million for the first six months of 2010 compared with \$2.4 million for the same period in 2009. Gain on sale of foreclosed real estate totaled \$303,000 in 2009 as compared to a loss from foreclosed real estate was \$137,000 in 2010. Gain on the sale of investment securities was \$306,000 during the first six months of 2009 while there was only a gain of \$7,000 from security sales in 2010. During 2010, the gain on sale of loans held for sale decreased by \$289,000 as residential loan sales activity was lower in the first six months of 2010. Income from mortgage servicing decreased \$76,000 in 2010 mainly due to a \$138,000 non-cash charge for impairment of mortgage servicing rights. Additionally, overdraft fees were \$54,000 lower during 2010, due to increased consumer awareness and recent legislation which is drawing attention to such fees.

Non-interest expense. Total non-interest expense decreased by \$17,000 to \$9.2 million for the six months ended June 30, 2010 compared to the same period in 2009. FDIC insurance premiums decreased by \$79,000 as 2009 included a special assessment of \$330,000; whereas the FDIC insurance premium in 2010 reflects an increased deposit base and an increased assessment rate. Other operating expense decreased \$57,000 due to a renegotiated ATM contract that reduced the expense by \$58,000 in 2010. Also, robbery and deposit-related losses of \$50,000 were included in other operating expense in 2009 and there were no such losses in 2010. Partially, offsetting the decrease in other operating expense were increased costs of \$33,000 associated with maintenance of real estate acquired through foreclosure. Occupancy and equipment costs increased \$64,000 mainly due to higher costs associated with the Company's banking software and increased snow removal costs in 2010. Professional fees increased between the two periods as legal costs associated with non-performing loans and foreclosures during 2010 increased \$131,000. In contrast, the Company's professional fees related to audit and tax services decreased \$81,000 in 2010. Employee compensation and benefits increased between the periods; the result of rising insurance premiums of employer-provided medical benefits of \$62,000. Costs associated with the Company's defined benefit plan were \$49,000 lower in 2010.

Income tax expense. The Company's effective tax rate was 23.1% for the six months ended June 30, 2010 compared to 25.7% for the same period in 2009. These effective tax rates are lower than the Company's marginal tax rate of 34% largely due to the tax-exempt income associated with the Company's investments in tax-exempt municipal bonds and bank-owned life insurance. Income tax expense includes federal as well as state income tax which increased \$102,000 as a state tax loss carry-forward credit expired.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity

The Bank's liquidity is a measure of its ability to fund loans, pay withdrawals of deposits, and other cash outflows in an efficient, cost-effective manner. The Bank's short-term sources of liquidity include maturity, repayment and sales of assets, excess cash and cash equivalents, new deposits, broker deposits, other borrowings, and new borrowings from the Federal Home Loan Bank and the Federal Reserve Bank. There has been no material adverse change during the six-month period ended June 30, 2010 in the ability of the Bank and its subsidiaries to fund their operations.

At June 30, 2010, the Bank had commitments outstanding under letters of credit of \$1.1 million, commitments to originate loans of \$20.4 million, and commitments to fund undisbursed balances of closed loans and unused lines of credit of \$48.3 million. At June 30, 2010, the Bank had \$6.0 million in outstanding commitments to sell loans. There has been no material change during the six months ended June 30, 2010 in any of the Bank's other contractual obligations or commitments to make future payments.

Edgar Filing: TF FINANCIAL CORP - Form 10-Q

The Company's primary sources of liquidity are dividends from the Bank, principal and interest payments received from the Employee Stock Ownership Plan, and tax benefits arising from the use of the Company's tax deductions by other members of its consolidated group pursuant to a tax sharing agreement. The Company is dependent upon these sources and cash on hand which totaled approximately \$1.9 million at June 30, 2010 in order to fund its operations and pay the dividend to its shareholders. There has been no material adverse change in the ability of the Company to fund its operations during the six-month period ended June 30, 2010.

Capital Requirements

The Bank was in compliance with all of its capital requirements as of June 30, 2010.

Table of Contents

CRITICAL ACCOUNTING POLICIES

Certain critical accounting policies of the Company require the use of significant judgment and accounting estimates in the preparation of the consolidated financial statements and related data of the Company. These accounting estimates require management to make assumptions about matters that are highly uncertain at the time the accounting estimate is made. Management believes that the most critical accounting policy requiring the use of accounting estimates and judgment is the determination of the allowance for loan losses. If the financial position of a significant amount of debtors should deteriorate more than the Company has estimated, the present allowance for loan losses may be insufficient and additional provisions for loan losses may be required. The allowance for loan losses was approximately \$6.7 million at June 30, 2010.

RECENT LEGISLATION

On July 21, 2010, the President signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) which will significantly change the current bank regulatory structure and affect the lending, investment, trading and operating activities of financial institutions and their holding companies. The Dodd-Frank Act will eliminate our current primary federal regulator, the Office of Thrift Supervision. The Dodd-Frank Act also authorizes the Board of Governors of the Federal Reserve System to supervise and regulate all savings and loan holding companies like the Company, in addition to bank holding companies which it currently regulates. As a result, the Federal Reserve Board's current regulations applicable to bank holding companies, including holding company capital requirements, will apply to savings and loan holding companies like the Company. These capital requirements are substantially similar to the capital requirements currently applicable to the Bank. The Dodd-Frank Act also requires the Federal Reserve Board to set minimum capital levels for bank holding companies that are as stringent as those required for the insured depository subsidiaries, and the components of Tier 1 capital would be restricted to capital instruments that are currently considered to be Tier 1 capital for insured depository institutions. Bank holding companies with assets of less than \$500 million are exempt from these capital requirements. Under the Dodd-Frank Act, the proceeds of trust preferred securities are excluded from Tier 1 capital unless such securities were issued prior to May 19, 2010 by bank or savings and loan holding companies with less than \$15 billion of assets. The legislation also establishes a floor for capital of insured depository institutions that cannot be lower than the standards in effect today, and directs the federal banking regulators to implement new leverage and capital requirements within 18 months that take into account off-balance sheet activities and other risks, including risks relating to securitized products and derivatives.

The Dodd-Frank Act also creates a new Consumer Financial Protection Bureau with broad powers to supervise and enforce consumer protection laws. The Consumer Financial Protection Bureau has broad rule-making authority for a wide range of consumer protection laws that apply to all banks and savings institutions such as the Bank, including the authority to prohibit unfair, deceptive or abusive acts and practices. The Consumer Financial Protection Bureau has examination and enforcement authority over all banks and savings institutions with more than \$10 billion in assets. Banks and savings institutions with \$10 billion or less in assets will be examined by their applicable bank regulators. The new legislation also weakens the federal preemption available for national banks and federal savings associations, and gives state attorneys general the ability to enforce applicable federal consumer protection laws.

The legislation also broadens the base for Federal Deposit Insurance Corporation insurance assessments. Assessments will now be based on the average consolidated total assets less tangible equity capital of a financial institution. The Dodd-Frank Act also permanently increases the maximum amount of deposit insurance for banks, savings institutions and credit unions to \$250,000 per depositor, retroactive to January 1, 2009, and non-interest bearing transaction accounts have unlimited deposit insurance through December 31, 2013. Lastly, the Dodd-Frank Act will increase stockholder influence over boards of directors by requiring companies to give stockholders a non-binding vote on executive compensation and so-called golden parachute payments, and authorizing the Securities and Exchange Commission to promulgate rules that would allow stockholders to nominate their own candidates using a company's proxy materials. The legislation also directs the Federal Reserve Board to promulgate rules prohibiting excessive compensation paid to bank holding company executives, regardless of whether the company is publicly traded or not.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As a smaller reporting company as defined by Item 10 of Regulation S-K, the Company is not required to provide the information required by this item.

ITEM 4T. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Based on their evaluation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) under the Securities Exchange Act of 1934 (the Exchange Act)), the Company's principal executive officer and principal financial officer have concluded that as of the end of the period covered by this Quarterly Report on Form 10-Q such disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in the reports it files and submits pursuant to the rules and forms of the SEC is accumulated and communicated to the Company's management including the principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosures.

Changes in Internal Controls over Financial Reporting

During the quarter under report, there was no change in the Company's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.
