BANCORP OF NEW JERSEY, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Significant Accounting Policies

Basis of Financial Statement Presentation

The accompanying consolidated financial statements include the accounts of Bancorp of New Jersey, Inc. (the Company), and its direct wholly-owned subsidiary, Bank of New Jersey (the Bank) and the Bank s wholly-owned subsidiary, BONJ-New York Corp. All significant inter-company accounts and transactions have been eliminated in consolidation.

The Company was incorporated under the laws of the State of New Jersey to serve as a holding company for the Bank and to acquire all the capital stock of the Bank.

The Company s class of common stock has no par value and the Bank s class of common stock had a par value of \$10 per share. As a result of the holding company reorganization, amounts previously recognized as additional paid in capital on the Bank s financial statements were reclassified into common stock in the Company s consolidated financial statements.

The financial information in this quarterly report has been prepared in accordance with U.S. generally accepted accounting principles (GAAP); these financial statements have not been audited. Certain information and footnote disclosures required under GAAP have been condensed or omitted, as permitted by rules and regulations of the Securities and Exchange Commission.

Certain reclassifications have been made to the prior period financial statements to conform to the June 30, 2011 presentation.

Table of Contents

Organization

The Company is a New Jersey corporation and bank holding company registered with the Board of Governors of the Federal Reserve System (the Federal Reserve Board). The Bank is a community bank which provides a full range of banking services to individuals and corporate customers in New Jersey. Both the Company and the Bank are subject to competition from other financial institutions. The Bank is regulated by state and federal agencies and is subject to periodic examinations by those regulatory authorities. The Bank conducts a traditional commercial banking business, accepting deposits from the general public, including individuals, businesses, non-profit organizations, and governmental units. The Bank makes commercial loans, consumer loans, and both residential and commercial real estate loans. In addition, the Bank provides other customer services and makes investments in securities, as permitted by law. The Bank has sought to offer an alternative, community-oriented style of banking in an area, that is presently dominated by larger, statewide and national institutions. The Bank continues to focus on establishing and retaining customer relationships by offering a broad range of traditional financial services and products, competitively-priced and delivered in a responsive manner to small businesses, professionals and individuals in the local market. As a community bank, the Bank endeavors to provide superior customer service that is highly personalized, efficient and responsive to local needs. To better serve its customers and expand it market reach, the Bank provides for the delivery of certain of its financial products and services to its local customers and to a broader market through the use of mail, telephone and internet banking. The Bank seeks to deliver these products and services with the care and professionalism expected of a community bank and with a special dedication to personalized customer service.

Note 2. Stockholders Equity and Related Transactions

During the six month periods ended June 30, 2011 and June 30, 2010, respectively, the Company issued no shares of common stock.

Note 3. Benefit Plans and Stock-Based Compensation

2006 Stock Option Plan

During 2006, the Bank s stockholders approved the 2006 Stock Option Plan. At the time of the holding company reorganization, the 2006 Stock Option Plan was assumed by the Company. The plan allows directors and employees of the Company to purchase up to 239,984 shares of the Company s common stock. At June 30, 2011, incentive stock options to purchase 209,900 shares have been issued to employees of the Bank, of which options to purchase 187,900 shares were outstanding.

Under the 2006 Stock Option Plan, there were a total of 25,783 unvested options at June 30, 2011 and approximately \$83,000 remains to be recognized in expense over approximately the next two years. Under the 2006 Stock Option Plan, no options were granted, exercised, or forfeited during the first six months of 2011.

2007 Director Plan

During 2007, the Bank s stockholders approved the 2007 Non-Qualified Stock Option Plan for Directors. At the time of the holding company reorganization, the 2007 Non-Qualified Stock Option Plan was assumed by the Company. This plan provides for 480,000 options to purchase shares of the Company s common stock to be issued to non-employee directors of the Company. At June 30,

Table of Contents

2011, non-qualified options to purchase 460,000 shares of the Company s stock have been issued to non-employee directors of the Company and approximately 414,668 were outstanding at June 30, 2011. No options were granted, exercised or forfeited during the first six months of 2011.

Under the 2007 Director Plan, there were a total of approximately 42,495 unvested options at June 30, 2011 and approximately \$137,000 remains to be recognized in expense over approximately two remaining years.

In connection with both the 2006 Stock Option Plan and the 2007 Director Plan, share based compensation totaled \$39,000 and \$74,000 for the three months ended June 30, 2011 and 2010, respectively. For the six months ended June 30, 2011 and 2010, respectively, share based compensation totaled \$78,000 and \$148,000, respectively.

The aggregate intrinsic value of a stock option represents the total pre-tax intrinsic value (the amount by which the current market value of the underlying stock exceeds the exercise price of the option) that would have been received by the option holders had they exercised their options on June 30, 2011. This amount changes based on the changes in the market value in the Company s stock.

The aggregate intrinsic value of options outstanding as of June 30, 2011 under the 2006 Stock Option Plan and the 2007 Director Plan was approximately \$4,000.

The aggregate intrinsic value of options outstanding as of June 30, 2010 under the 2006 Stock Option Plan and the 2007 Director Plan was approximately \$587,000.

9

Note 4. Earnings Per Share

Basic earnings per share is calculated by dividing the net income for a period by the weighted average number of common shares outstanding during that period.

Diluted earnings per share is calculated by dividing the net income for a period by the weighted average number of outstanding common shares and dilutive common share equivalents during that period. Outstanding common share equivalents include options and warrants to purchase the Company's common stock.

The following schedule shows earnings per share for the three month periods presented:

	For the three months ended June 30,							
(In thousands except per share data)	20)11		2010				
Net income applicable to common stock	\$	812	\$	524				
Weighted average number of common shares outstanding - basic		5,207		5,207				
Basic earnings per share	\$	0.16	\$	0.10				
Net income applicable to common stock	\$	812	\$	524				
Weighted average number of common shares outstanding		5,207		5,207				
Effect of dilutive options		6		21				
Weighted average number of common shares and common share								
equivalents-diluted		5,213		5,228				
Diluted earnings per share	\$	0.16	\$	0.10				

Non-qualified options to purchase 414,668 shares of common stock at a weighted average price of \$11.50; and 90,000 incentive stock options at a weighted average price of \$11.50 were not included in the computation of diluted earnings per share for the three months ended June 30, 2011 because they were anti-dilutive. Incentive stock options at a weighted average price of \$9.09 were included in the computation of diluted earnings per share for the three months ended June 30, 2011.

Non-qualified options to purchase 414,668 shares of common stock at a weighted average price of \$11.50; and incentive stock options to purchase 90,000 shares of common stock at a weighted average price of \$11.50 and 97,900 shares of common stock at a weighted average price of \$9.09 were included in the computation of diluted earnings per share for the three months ended June 30, 2010.

Table of Contents

The following schedule shows earnings per share for the six month periods presented:

	For the six months ended							
(In thousands except per share data)	20	11		2010				
Net income applicable to common stock	\$	1,450	\$	1,038				
Weighted average number of common shares outstanding - basic		5,207		5,207				
Basic earnings per share	\$	0.28	\$	0.20				
Net income applicable to common stock	\$	1,450	\$	1,038				
Weighted average number of common shares outstanding		5,207		5,207				
Effect of dilutive options		10		17				
Weighted average number of common shares and common share								
equivalents-diluted		5,217		5,224				
Diluted earnings per share	\$	0.28	\$	0.20				

Non-qualified options to purchase 414,668 shares of common stock at a weighted average price of \$11.50; and 90,000 incentive stock options at a weighted average price of \$11.50 were not included in the computation of diluted earnings per share for the six months ended June 30, 2011 because they were anti-dilutive. Incentive stock options at a weighted average price of \$9.09 were included in the computation of diluted earnings per share for the six months ended June 30, 2011.

Non-qualified options to purchase 414,668 shares of common stock at a weighted average price of \$11.50; and incentive stock options to purchase 90,000 shares of common stock at a weighted average price of \$11.50 and 97,900 shares of common stock at a weighted average price of \$9.09 were included in the computation of diluted earnings per share for the six months ended June 30, 2010.

Note 5. Comprehensive Income

Accounting principles generally accepted in the United States of America requires the reporting of comprehensive income, which includes net income as well as certain other items, which result in changes to equity during the period. Total comprehensive income is presented for the three month periods and the six month periods ended June 30, 2011 and 2010, respectively, as follows (in thousands):

12

	For the three month 2011), 10	
Comprehensive Income			
Net income	\$ 812	\$	524
Urealized holding gain on securities available for sale, net of taxes of \$200 and \$132 for 2011 and 2010, respectively	300		207
Total comprehensive income	\$ 1,112	\$	731
	For the six months	ended June 30, 201	
Comprehensive Income			
Comprehensive Income Net income	\$		
	\$ 2011	201	0

Note 6. Securities Available for Sale and Investment Securities

A summary of securities held to maturity and securities available for sale at June 30, 2011 and December 31, 2010 is as follows (in thousands):

	1	Gross Amortized Unrealized Cost Gains		Gross Unrealized Losses		Fair Value	
June 30, 2011							
Securities Held to Maturity:							
Obligations of states and political subdivisions	\$	5,238	\$		\$	\$	5,238
Securities Available for Sale:

Total	\$ 5,238	\$	5,238	\$	38,041	\$	38,457				

Management evaluates securities for other-than-temporary-impairment (OTTI) at least on a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation.

In determining OTTI management considers many factors, including: (1) the length of time and the extent to which the fair value has been less than amortized cost; (2) the financial condition and near term prospects of the issuer; (3) whether the market decline was affected by macroeconomic conditions, and (4) whether the Company has the intent to sell the debt security or more likely than not will be required to sell the debt security before its anticipated recovery. The assessment of whether an other-than-temporary-impairment decline exists involves a high degree of subjectivity and judgment and is based on information available to management at a point in time. An OTTI is deemed to have occurred if there has been an adverse change in the remaining expected future cash flows.

When OTTI for debt securities occurs, the amount of the OTTI recognized in earnings depends on whether an entity intends to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis. If an entity intends to sell or more likely than not will be required to sell the security before recovery of its amortized cost basis, the OTTI would be recognized in earnings equal to the entire difference between the investment s amortized cost basis and its fair value at the balance sheet date. If the Company does not intend to sell the security and it is not more likely than not that the entity will be required to sell the security before recovery of its amortized cost basis, the OTTI would be separated into the amount representing the credit loss and the amount related to all other factors. The amount of the total

OTTI related to the credit loss is determined based on the present value of cash flows expected to be collected and is recognized in earnings. The amount of the total OTTI related to other factors would be recognized in other comprehensive income, net of applicable tax benefit. The previous

Table of Contents

amortized cost basis less the OTTI recognized in earnings would become the new amortized cost basis of the investment.

At June 30, 2011, the Company s available for sale securities portfolio consisted of 18 securities, of which 1 was in an unrealized loss position for less than twelve months and none were in a loss position for more than twelve months. No OTTI charges were recorded for the three or six months ended June 30, 2011. The Company does not intend to sell this security and it is not more likely than not that the Company will be required to sell this security. Unrealized losses primarily relate to interest rate fluctuations and not credit concerns.

At June 30, 2011 and December 31, 2010, the Company held no securities held to maturity that have been in a continuous unrealized loss position for twelve months.

Securities with an amortized cost and fair value of \$2.0 million, respectively, were pledged to secure public funds on deposit at June 30, 2011 and December 31, 2010.

15

Note 7. Loans

The components of the loan portfolio at June 30, 2011 and December 31, 2010 are summarized as follows (in thousands):

	June 30, 2011	December 31, 2010
Commercial real estate	\$ 163,837	\$ 142,198
Residential mortgages	53,067	52,407
Commercial	51,399	46,073
Home equity	65,381	60,378
Consumer- other	1,055	1,047
	\$ 334,739	\$ 302,103

The Bank grants commercial, mortgage and installment loans to those New Jersey residents and businesses within its local trading area. Its borrowers abilities to repay their obligations are dependent upon various factors, including the borrowers income and net worth, cash flows generated by the underlying collateral, value of the underlying collateral and priority of the Bank s lien on the property. Such factors are dependent upon various economic conditions and individual circumstances beyond the Bank s control; the Bank is therefore subject to risk of loss. The Bank believes its lending policies and procedures adequately manage the potential exposure to such risks and that an allowance for loan losses is provided for management s best estimate of probable loan losses.

The following tables present the activity in the allowance for loan losses during the periods indicated (in thousands):

	J	Three month	ded June 30, 2010

Doubtful									
Total	\$ 163,837	\$ 53,067	\$ 51,399	\$	65,381	\$	1,055	\$	334,739

As of June 30, 2011 the Bank had twelve non-accrual loans totaling approximately \$6.6 million, of which three loans totaling approximately \$922 thousand had specific reserves of \$390 thousand and nine loans totaling approximately \$5.7 million had no specific reserve. If interest had been accrued, such income would have been approximately \$62 thousand and \$113 thousand, respectively, for the three and six month periods ended June 30, 2011. Within its non-accrual loans at June 30, 2011, the Bank had two residential mortgage loans that met the definition of a troubled debt restructuring (TDR) loan. TDRs are loans where the contractual terms of the loan have been modified for a borrower experiencing financial difficulties. These modifications could include a reduction in the interest rate of the loan, payment extensions, forgiveness of principal or other actions to maximize collection. At June 30, 2011, these TDR loans had an outstanding balance of \$565 thousand, had no specific reserves connected with them and are performing in accordance with their modified terms.

Table of Contents

Non-accrual loans and related amounts recorded in the allowance for loan losses are summarized as follows (in thousands):

	ne 30, 2011	December 31, 2010
Non-accrual loans without a specific valuation allowance	\$ 5,672 \$	1,329
Non-accrual loans with a specific valuation allowance	922	1,363
	\$ 6,594 \$	2,692
Valuation allowance related to non-accrual loans	\$ 390 \$	288

A loan is considered impaired, in accordance with the impairment accounting guidance (FASB ASC 310-10-35-16), when based on current information and events, it is probable that the Company will be unable to collect all amounts due from the borrower in accordance with the contractual terms of the loan. Included in the Bank s non-accrual loans at June 30, 2011, are twelve impaired loans. Of these impaired loans, three loans totaling \$922 thousand had specific reserves of \$390 thousand and nine loans totaling approximately \$5.7 million had no specific reserve.

Impaired loans and related amounts recorded in the allowance for loan losses are summarized as follows (in thousands):

	_	ne 30, 2011	December 31, 2010
Impaired loans without a specific valuation allowance	\$	5,672 \$	1,329
Impaired loans with a specific valuation allowance		922	1,363
	\$	6,594 \$	2,692
Valuation allowance related to impaired loans	\$	390 \$	288

The following table provides information in regards to non-accrual loans by portfolio class at June 30, 2011 (in thousands):

	Recorded Investment	Unpaid Principal Balance	Related Allowance	Average Recorded Investment		Recorded Income	
Non-accrual loans with specific reserves:							
Commercial real estate	\$ 532	\$ 922	\$ 390	\$	541	\$

Total impaired loans	\$ 6,594	\$ 6,204	\$ 390	\$ 4,043	\$ 68

Note 8. Guarantees

The Company does not issue any guarantees that would require liability recognition or disclosure, other than the Bank standby letters of credit. Standby letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. Generally, all letters of credit, when issued have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as those that are involved in extending loan facilities to customers. The Bank generally holds collateral and/or personal guarantees supporting these commitments. As of June 30, 2011, the Bank had \$2.1 million of commercial and similar letters of credit. Management believes that the proceeds obtained through a liquidation of collateral and the enforcement of guarantees would be sufficient to cover the potential amount of future payment required under the corresponding guarantees. Management believes that the current amount of the liability as of June 30, 2011 for guarantees under standby letters of credit issued is not material.

Note 9. Fair Value Measurements

Under ASC Topic 820, Fair Value Measurement and Disclosures , fair value measurements are not adjusted for transaction costs. ASC Topic 820 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described below:

- Level 1 Inputs Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.
- Level 2 Inputs Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, for substantially the full term of the asset or liability.
- Level 3 Inputs Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (that is, supported with little or no market activity).

The level of an asset or liability within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement of that asset or liability.

Management uses its best judgment in estimating the fair value of the Company s financial instruments, however, there are inherent weaknesses in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates herein are not necessarily indicative of the amounts the Company could have realized in sales transaction on the dates indicated. The estimated fair value amounts have been measured as of their respective period end and have not been re-evaluated or updated for purposes of these financial statements subsequent to those respective dates. As such, the estimated fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported at the respective reporting dates.

For financial assets measured at fair value on a recurring basis, the fair value measurements by level within the fair value hierarchy used at June 30, 2011 and December 31, 2010, respectively, are as follows (in thousands):

Description	Inn	e 30, 2011	P	(Level 1) Quoted Prices in Active Markets for Identical Assets	(Level 2) Significant Other Observable Inputs	(Level 3) Significant Unobservable Inputs
Description	Jui	e 50, 2011		Idelitical Assets	Observable illputs	Ollobsel vable lilputs

Total impaired loans and other real				
estate owned	\$ 3,013	\$	\$	\$ 3,013

The following information should not be interpreted as an estimate of the fair value of the entire Company since a fair value calculation is only provided for a limited portion of the Company s assets and liabilities. Due to a wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparisons between the Company s disclosures and those of other companies may not be meaningful. The following methods and assumptions were used to estimate the fair values of the Company s financial instruments at June 30, 2011 and December 31, 2010:

Cash and Cash Equivalents (Carried at cost)

The carrying amounts reported in the balance sheet for cash and cash equivalents approximate those assets fair values.

Securities

The fair value of securities available for sale (carried at fair value) and held to maturity (carried at amortized cost) are determined by obtaining market prices on nationally recognized securities exchanges (level 1), or matrix pricing (Level 2), which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted market prices for the specific securities but rather by relying on the securities relationship to other benchmark quoted prices. For certain securities which are not traded in active markets or are subject to transfer restrictions, valuations are adjusted to reflect illiquiditiy and/or non-transferability, and such adjustments are generally based on available market evidence (Level 3). In the absence of such evidence, management s best estimate is used. Management s best estimate consists of both internal and external support on certain Level 3 investments. Internal cash flow models using a present value formula that includes assumptions market participants would use along with indicative exit pricing obtained from broker/dealers (where available) were used to support fair values of certain Level 3 investments.

Restricted Investment in Bank Stock (Carried at Cost)

The carrying amount of restricted investment in bank stock approximates fair value, and considers the limited marketability of such securities.

22

Table of Contents
Loans Receivable (Carried at Cost)
The fair value of loans are estimated using discounted cash flow analyses, using market rates at the balance sheet date that reflect the credit and the interest rate-risk inherent in the loans. Projected future cash flows are calculated based upon contractual maturity or call dates, projected repayments and prepayments of principal. Generally, for variable rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values.
Impaired loans
Impaired loans are those that are accounted for under ASC Sub-topic 310-40, Troubled Debt Restructurings by Creditors, in which the Company has measured impairment generally based on the fair value of the loan s collateral. Fair value is generally deteremined based upon independent third-party appraisals of the properties, or discounted cash flows based upon the expected proceeds. These assets are included as Level 3 fair values, based upon the lowest level of input that is significant to the fair value measurements.
Accrued Interest Receivable and Payable (Carried at Cost)
The carrying amount of accrued interest receivable and accrued interest payable approximates fair value.
Other real estate owned
Other real estate owned assets are adjusted to fair value less estimated selling costs upon transfer of the loans to other real estate owned. Subsequently, other real estate owned assets are carried at the lower of carrying value or fair value. Fair value is based upon independent market prices, appraised values of the collateral or management s estimation of the value of the collateral. These assets are included as Level 3 fair values.
Deposits (Carried at Cost)
The fair values disclosed for demand deposits (for example, interest and noninterest checking, passbook savings and money market accounts) are, by definition, equal to the amount payable on demand at the reporting date (that is, their carrying amounts). Fair values for fixed rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered in the market on certificates to a schedule of aggregated expected monthly maturities of time deposits.

Fair value estimates and assumptions are set forth below for the Company s financial instruments at June 30, 2011 and December 31, 2010 (in thousands):

	Jur	ne 30, 2011	Decem	nber 31, 2010
	Carrying amount	Estimated Fair Value	Carrying amount	Estimated Fair Value
Financial assets:				
Cash and cash equivalents	\$ 14,477	\$ 14,477	\$ 23,204	\$ 23,204
Interest bearing time deposits	250	250		
Securities available for sale	38,457	38,457	27,923	27,923
Securities held to maturity	5,238	5,238	3,728	3,724
Restricted investment in bank				
stock	549	549	491	491
Net loans	330,354	331,935	298,354	301,922
Accrued interest receivable	1,692	1,692	1,285	1,285
Financial liabilities:				
Deposits	349,905	345,730	318,421	313,888
Accrued interest payable	518	518	438	438

Limitation

The preceding fair value estimates were made at June 30, 2011 and December 31, 2010 based on pertinent market data and relevant information on the financial instrument. These estimates do not include any premium or discount that could result from an offer to sell at one time the Company s entire holdings of a particular financial instrument or category thereof. Since no market exists for a substantial portion of the Company s financial instruments, fair value estimates were necessarily based on judgments regarding future expected loss experience, current economic conditions, risk assessment of various financial instruments, and other factors. Given the innately subjective nature of these estimates, the uncertainties surrounding them and the matter of significant judgment that must be applied, these fair value estimates cannot be calculated with precision. Modifications in such assumptions could meaningfully alter these estimates.

Since these fair value approximations were made solely for on- and off-balance-sheet financial instruments at June 30, 2011 and December 31, 2010, no attempt was made to estimate the value of anticipated future business. Furthermore, certain tax implications related to the realization of the unrealized gains and losses could have a substantial impact on these fair value estimates and have not been incorporated into the estimates.

Note 10. Recent Accounting Pronouncements

ASU 2011-02 (A Creditor's Determination of Whether a Restructuring Is a Troubled Debt Restructuring)

The FASB has issued this ASU to clarify the accounting principles applied to loan modifications, as defined by FASB ASC Subtopic 310-40, Receivables Troubled Debt Restructurings by Creditors. The ASU clarifies guidance on a creditor s evaluation of whether or not a concession has been granted, with an emphasis on evaluating all aspects of the modification rather than a focus on specific criteria, such as the effective interest rate test, to determine a concession. The ASU goes on to provide guidance on specific types of modifications such as changes in the interest rate of the borrowing, and insignificant delays in payments, as well as guidance on the creditor s evaluation of whether or not a debtor is

experiencing financial difficulties. For public entities, the amendments in the ASU are effective for the first interim or annual periods beginning on or after June 15, 2011, and should be applied retrospectively to the beginning of the annual period of adoption. The entity should also disclose information required by ASU 2010-20,

Table of Contents

Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses, which had previously been deferred by ASU 2011-01, Deferral of the Effective Date of Disclosures about Troubled Debt Restructurings in ASU No. 2010-20, for interim and annual periods beginning on or after June 15, 2011. Nonpublic entities are required to adopt the amendments in this ASU for annual periods ending on or after December 15, 2012. Early adoption is permitted. The Company has not completed evaluating the impact of ASU 2011-02 on its consolidated financial statements.

ASU 2011-03 (Reconsideration of Effective Control for Repurchase Agreements)

The FASB has issued this ASU to clarify the accounting principles applied to repurchase agreements, as set forth by FASB ASC Topic 860, Transfers and Servicing. This ASU, entitled Reconsideration of Effective Control for Repurchase Agreements, amends one of three criteria used to determine whether or not a transfer of assets may be treated as a sale by the transferor. Under Topic 860, the transferor may not maintain effective control over the transferred assets in order to qualify as a sale. This ASU eliminates the criteria under which the transferor must retain collateral sufficient to repurchase or redeem the collateral on substantially agreed upon terms as a method of maintaining effective control. This ASU is effective for both public and nonpublic entities for interim and annual reporting periods beginning on or after December 31, 2011, and requires prospective application to transactions or modifications of transactions which occur on or after the effective date. Early adoption is not permitted. We do not expect the adoption of this standard to have a material effect on our financial position or results of operations.

ASU 2011-04 (Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs)

This ASU amends FASB ASC Topic 820, Fair Value Measurements, to bring U.S. GAAP for fair value measurements in line with International Accounting Standards. The ASU clarifies existing guidance for items such as: the application of the highest and best use concept to non-financial assets and liabilities; the application of fair value measurement to financial instruments classified in a reporting entity s stockholder s equity; and disclosure requirements regarding quantitative information about unobservable inputs used in the fair value measurements of level 3 assets. The ASU also creates an exception to Topic 820 for entities which carry financial instruments within a portfolio or group, under which the entity is now permitted to base the price used for fair valuation upon a price that would be received to sell the net asset position or transfer a net liability position in an orderly transaction. The ASU also allows for the application of premiums and discounts in a fair value measurement if the financial instrument is categorized in level 2 or 3 of the fair value hierarchy. Lastly, the ASU contains new disclosure requirements regarding fair value amounts categorized as level 3 in the fair value hierarchy such as: disclosure of the valuation process used; effects of and relationships between unobservable inputs; usage of nonfinancial assets for purposes other than their highest and best use when that is the basis of the disclosed fair value; and categorization by level of items disclosed at fair value, but not measured at fair value for financial statement purposes. For public entities, this ASU is effective for interim and annual periods beginning after December 15, 2011. For nonpublic entities, the ASU is effective for annual periods beginning after December 15, 2011. Early adoption is not permitted. We do not expect the adoption of this standard to have a material effect on our financial position or results of operations.

ASU 2011-05 (Presentation of Comprehensive Income)

The provisions of this ASU amend FASB ASC Topic 220, Comprehensive Income, to facilitate the continued alignment of U.S. GAAP with International Accounting Standards. The ASU prohibits the presentation of the components of comprehensive income in the statement of stockholder s equity. Reporting entities are allowed to present either: a statement of comprehensive income, which reports both net income and other comprehensive income; or separate, but consecutive, statements of net income and other comprehensive income. Under previous GAAP, all 3 presentations were acceptable. Regardless of the presentation selected, the Reporting Entity is required to present all reclassifications between other comprehensive and net income on the face of the new statement or statements. The provisions of this ASU

Table of Contents

are effective for fiscal years and interim periods beginning after December 31, 2011 for public entities. For nonpublic entities, the provisions are effective for fiscal years ending after December 31, 2012, and for interim and annual periods thereafter. As the two remaining options for presentation existed prior to the issuance of this ASU, early adoption is permitted. We do not expect the adoption of this standard to have a material effect on our financial position or results of operations.

ITEM 2

Management s Discussion and Analysis of

Financial Condition and Results of Operations

You should read this discussion and analysis in conjunction with the consolidated unaudited interim financial statements contained in Part I, Item 1 of this Quarterly Report on Form 10-Q, and with our audited consolidated financial statements for the year ended December 31, 2010 and Management s Discussion and Analysis of Financial Condition and Results of Operations presented in our Annual Report on Form 10-K for the year ended December 31, 2010, as filed with the Securities and Exchange Commission.

Statements Regarding Forward Looking Information

This document contains forward-looking statements, in addition to historical information. Forward looking statements are typically identified by words or phrases such as believe, expect, anticipate, intend, estimate, project, and variations of such words and similar expressions, or fur conditional verbs such as will, would, should, could, may, or similar expressions. The U.S. Private Securities Litigation Reform Act of 1995 provides a safe harbor in regard to the inclusion of forward-looking statements in this document and documents incorporated by reference.

You should note that many factors, some of which are discussed elsewhere in this document and in the documents that are incorporated by reference, could affect the future financial results of Bancorp of New Jersey, Inc. and its direct and indirect subsidiaries and could cause those results to differ materially from those expressed in the forward-looking statements contained or incorporated by reference in this document. These factors include, but are not limited, to the following:

- General economic conditions, either nationally or in our market area;
- Volatility in interest rates and shape of the yield curve;
- Increased credit risk and risks associated with the real estate market;
- Operating, legal and regulatory risk;
- Economic, political and competitive forces affecting the Company s business; and
- That management s analysis of these risks and factors could be incorrect, and/or that the strategies developed to address them could be unsuccessful.

Bancorp of New Jersey, Inc., referred to as we or the Company, cautions that these forward-looking statements are subject to numerous assumptions, risks and uncertainties, all of which change over time, and we assume no duty to update forward-looking statements, except as may be required by applicable law or regulation, we do not undertake, and specifically disclaim any obligation, to publicly release any revisions to any forward-looking statements to reflect the occurrence of anticipated or unanticipated events or circumstances after the date of such statements. We caution readers not to place undue reliance on any forward-looking statements. These statements speak only as of the date made,

and we advise readers that various factors, including those described above, could affect our financial performance and could cause actual results or circumstances for future periods to differ materially from those anticipated or projected.

Critical Accounting Policies, Judgments and Estimates

The financial statements have been prepared in conformity with U.S. generally accepted accounting principles. In preparing the financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the statement of financial condition and revenues and expenses for the period indicated. Actual results could differ significantly from those estimates. Management believes the following critical accounting policies

Table of Contents

encompass the more significant judgments and estimates used in the preparation of the consolidated financial statements.

Allowance for Loan Losses

The allowance for loan losses (ALLL) represents our best estimate of losses known and inherent in our loan portfolio that are both probable and reasonable to estimate. In determining the amount of the ALLL, we consider the losses inherent in our loan portfolio and changes in the nature and volume of our loan activities, along with general economic and real estate market conditions. We utilize a segmented approach which identifies: (1) impaired loans for which specific reserves are established; (2) classified loans for which a higher allowance is established; and (3) performing loans for which a general valuation allowance is established. We maintain a loan review system which provides for a systematic review of the loan portfolios and the early identification of impaired loans. The review of residential real estate and home equity consumer loans, as well as other more complex loans, is triggered by identified evaluation factors, including delinquency status, size of loan, type of collateral and the financial condition of the borrower. All commercial loans are evaluated individually for impairment. Specific loan loss allowances are established for impaired loans based on a review of such information and/or appraisals of the underlying collateral. General loan loss allowances are based upon a combination of factors including, but not limited to, actual loan loss experience, composition of the loan portfolio, current economic conditions and management s judgment.

Although specific and general loan loss allowances are established in accordance with management s best estimates, actual losses are dependent upon future events, and as such, further provisions for loan losses may be necessary in order to increase the level of the allowance for loan losses. For example, our evaluation of the allowance includes consideration of current economic conditions, and a change in economic conditions could reduce the ability of borrowers to make timely repayments of their loans. This could result in increased delinquencies and increased non-performing loans, and thus a need to make increased provisions to the allowance for loan losses. Any such increase in provisions would result in a reduction to our earnings. A change in economic conditions could also adversely affect the value of properties collateralizing real estate loans, resulting in increased charges against the allowance and reduced recoveries, and require increased provisions to the allowance for loan losses. Furthermore, a change in the composition, or growth, of our loan portfolio could result in the need for additional provisions.

Deferred Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply in the period in which the deferred tax asset or liability is expected to be settled or realized. The effect on deferred taxes of a change in tax rates is recognized in income in the period in which the change occurs. Deferred tax assets are reduced, through a valuation allowance, if necessary, by the amount of such benefits that are not expected to be realized based on current available evidence.

Table of Contents

Results of Operations

Three Months Ended June 30, 2011 and 2010 and Six Months Ended June 30, 2011 and 2010

Our results of operations depend primarily on net interest income, which is the difference between interest income on interest-earning assets and interest expense on interest-bearing liabilities. Interest-earning assets consist principally of loans and investment securities, while interest-bearing liabilities consist primarily of deposits and borrowings. Net income is also affected by the provision for loan losses and the level of non-interest income as well as by non-interest expenses, including salaries and employee benefits, occupancy and equipment expense, and other expenses.

Net Income

Net income for the second quarter of 2011 was \$812 thousand compared to net income of \$524 thousand for the second quarter of 2010, an increase of \$288 thousand, or 55%. This increase was due in most part to an increase in net interest income of approximately \$653 thousand, or 21%, and a decrease in the provision for loan losses of \$172 thousand, offset somewhat by an increase in non-interest expenses of approximately \$355 thousand. Income tax expense increased by \$152 thousand, or 41%, from \$371 thousand to \$523 thousand, as a result of the increase in pre-tax income.

Net income for the six months ended June 30, 2011 was approximately \$1.4 million compared to net income of approximately \$1.0 million for the six months ended June 30, 2010, an increase of \$412 thousand, or 40%. Similar to the quarterly growth, the increase was attributable to an increase in net interest income of \$1.2 million, or 20%, from \$6.1 million to \$7.4 million. This increase was offset somewhat by increases in non-interest expenses and income tax expense of \$436 thousand and \$257 thousand, respectively, as well as a loss on the sale of other real estate owned, or OREO, of \$203 thousand as compared to no loss in the same period of the prior year.

On a per share basis, basic and diluted earnings per share were \$0.16 for the second quarter of 2011 as compared to basic and diluted earnings per share of \$0.10 for the second quarter of 2010. Basic and diluted earnings per share were \$0.28 for the six months ended June 30, 2011 as compared to basic and diluted earnings per share of \$0.20 for the six months ended June 30, 2010.

Net Interest Income

Net interest income represents the difference between income on interest-earning assets and expense on interest-bearing liabilities. Net interest income depends upon the volume of interest-earning assets and interest-bearing liabilities and the interest rate earned or paid on them. For both the three month period and the six month period, the growth in net interest income has been, primarily, driven by increased interest income from loans, including fees, combined with the Company s ability to attract lower cost deposits during the current interest rate environment. During the second quarter of 2011, net interest income reached \$3.8 million from \$3.1 million, an increase of 23% during the second quarter of 2010 primarily as a result of loan growth during the period and the lower cost of deposits. The Company s average rate paid on interest bearing deposits decreased to 1.45% for the three months ended June 30, 2011, from 1.70% for the three months ended June 30, 2010.

During the six months ended June 30, 2011, net interest income reached \$7.4 million compared to \$6.1 million for the six months ended June 30, 2010, an increase of \$1.2 million, or 20%. This increase is attributable to the increase in interest income from loans, including fees and is due in most part to the increase in loans. Interest income from loans, including fees, securities and federal funds sold reached \$9.6 million for the six months ended June 30, 2011 from \$8.3 million for the six months ended June 30,

Table of Contents

2010, an increase of \$1.3 million, or 16%. At the same time, interest expense increased from \$2.1 million for the six months ended June 30, 2010 to \$2.2 million for the six months ended June 30, 2011, an increase of approximately \$100 thousand, or 5%. The Company s average rate paid on interest bearing deposits decreased to 1.47% for the six months ended June 30, 2011, from 1.73% for the six months ended June 30, 2010.

Provision for Loan Losses

The provision for loan losses is a recorded expense determined by management that adjusts the allowance for loan losses to a level, which, in management is best estimate, is necessary to absorb probable losses within the existing loan portfolio,. The provision for loan losses reflects loan quality trends, including, among other factors, the levels of and trends related to nonaccrual loans, past due loans, potential problem loans, criticized loans, net charge-offs or recoveries and growth in the loan portfolio. Accordingly, the amount of the provision reflects both the necessary increases in the allowance for loan losses related to newly identified criticized loans, as well as the actions taken related to other loans including, among other things, any necessary increases or decreases in required allowances for specific loans or loan pools. The provision for loan losses was \$212 thousand for the three months ended June 30, 2011 as compared to \$384 thousand for the three months ended June 30, 2010, a decrease of \$172 thousand, or 45%. During the six months ended June 30, 2011, the provision for loan losses was \$598 thousand as compared to \$654 thousand during the six months ended June 30, 2010, a decrease of \$56 thousand, or 9%. At June 30, 2011, the Company had approximately \$4.3 million in the ALLL, an increase of \$878 thousand from the June 30, 2010 total of approximately \$3.4 million, representing an increase of 26%. At June 30, 2011, the ALLL is 1.29% of total loans, up from the June 30, 2010 ratio of 1.24%. At June 30, 2011, the Bank had non-accruing loans of \$6.6 million as compared to \$4.1 million at June 30, 2010.

Non-interest Income (Loss)

Non-interest income consists primarily of fees and service charges and a loss on the sale of OREO. For the three months ended June 30, 2011, non-interest income totaled \$30 thousand, a decrease of \$30 thousand, or 50% as compared to \$60 thousand for the same period in the previous year. For the six months ended June 30, 2011, the non-interest loss was \$89 thousand, a decrease of \$188 thousand from the six months ended June 30, 2010 income total of \$98 thousand. Both of the period decreases were due to the loss on the sale of the Company s only OREO property in the second quarter of 2011.

Non-interest Expense

Non-interest expense increased by \$355 thousand, or 19% during the second quarter of 2011, to \$2.3 million from \$1.9 million for the second quarter of 2010. The increase was due in most part to increases in salaries and employee benefits and professional fees of \$123 thousand and \$102 thousand, respectively. During the six months ended June 30, 2011, non-interest expense reached approximately \$4.2 million from approximately \$3.8 million for the six months ended June 30, 2010, an increase of \$436 thousand, or 11%. This increase reflected increases in salaries and employee benefits, professional fees and FDIC premiums and related expenses of \$164 thousand, \$82 thousand and \$68 thousand, respectively. The increases related to salaries and employee benefits for both periods is due in most part to the Company s overall growth and also to a lesser extent to annual increases to salaries. Professional fees increased from \$118 thousand to \$220 thousand for the three months ended June 30, 2010 and June 30, 2011, respectively, a change of \$102 thousand, or 86%, and from \$246 thousand to \$328 thousand for the three months ended June 30, 2010 and June 30, 2011, respectively. The increase was principally due to an increase in legal fees in both periods.

Income Tax Expense

The income tax provision reached \$523 thousand for the quarter ended June 30, 2011 as compared to \$371 thousand for the quarter ended June 30, 2010, representing an increase of \$152 thousand, or 41%. For the

30

Table of Contents

six months ended June 30, 2011, income tax expense reached \$979 thousand as compared to \$722 thousand for the six months ended June 30, 2010, representing an increase of \$257 thousand, or 36%. The income tax provision is reflective of our pre-tax income and the effect of permanent differences between financial and tax reporting. These permanent tax differences include the recognition of non-deductible stock option expense as required under FASB ASC 718. The effective tax rate for the three and six month periods ended June 30, 2011, were 39.2% and 40.3%, respectively, compared to 41.5% and 41.0%, respectively, for the same periods in 2010.

FINANCIAL CONDITION

Total consolidated assets increased \$33.0 million, or approximately 8.9%, from \$370.3 million at December 31, 2010 to \$403.3 million at June 30, 2011. Total deposits increased from \$318.4 million at December 31, 2010 to \$349.9 million at June 30, 2011, an increase of \$31.5 million, or approximately 9.9%. Loans receivable, or total loans, increased from \$302.1 million at December 31, 2010 to \$334.7 million at June 30, 2011, an increase of \$32.6 million, or approximately 10.8%.

Loans

Our loan portfolio is the primary component of our assets. Total loans, which exclude net deferred fees and costs and the allowance for loan losses, increased by 10.8% to reach \$334.7 million at June 30, 2011 from \$302.1 million at December 31 2010. This growth in the loan portfolio continues to be primarily attributable to recommendations and referrals from members of our board of directors, our shareholders, our executive officers, and selective marketing by our management and staff. We believe that we will continue to have opportunities for loan growth within the Bergen County market of northern New Jersey, due in part, to our customer service, and competitive rate structures. We believe that it is not cost-efficient for large institutions, many of which are headquartered out of state, to provide the level of personal service to small business borrowers that these customers seek and that we endeavor to provide.

Our loan portfolio consists of commercial loans, real estate loans, consumer loans and home equity loans. Commercial loans are made for the purpose of providing working capital, financing the purchase of equipment or inventory, as well as for other business purposes. Real estate loans consist of loans secured by commercial or residential real property and loans for the construction of commercial or residential property. Consumer loans and home equity loans, are made for the purpose of financing the purchase of consumer goods, home improvements, and other personal needs, and are generally secured by the personal property being owned or being purchased.

Our loans are primarily to businesses and individuals located in Bergen County, New Jersey. We have not made loans to borrowers outside of the United States. We have not made any sub-prime loans. Commercial lending activities are focused primarily on lending to small business borrowers. We believe that our strategy of customer service, competitive rate structures, and selective marketing have enabled us to gain market entry to local loans. Furthermore, we believe that bank mergers and lending restrictions at larger financial institutions with which we compete have also contributed to the success of our efforts to attract borrowers. Additionally, during this current economic climate, our capital position and safety has also become important to potential borrowers.

For more information on the loan portfolio, see Note 7 in Notes to the Financial Statements in this Quarterly Report on Form 10-Q.

Table of Contents

Loan Quality

As mentioned above, our principal assets are our loans. Inherent in the lending function is the risk of the borrower s inability to repay a loan under its existing terms. Risk elements include non-accrual loans, past due and restructured loans, potential problem loans, loan concentrations, and other real estate owned.

Non-performing assets include loans that are not accruing interest (non-accrual loans) as a result of principal or interest being in default for a period of 90 days or more and accruing loans that are 90 days past due, troubled debt restructuring loans and foreclosed assets. When a loan is classified as non-accrual, interest accruals discontinue and all past due interest, including interest applicable to prior years, is reversed and recorded in the Allowance for Loan Loss. Until the loan becomes current, any payments received from the borrower are applied to outstanding principal until such time as management determines that the financial condition of the borrower and other factors merit recognition of such payments of interest.

We attempt to manage overall credit risk through loan diversification and our loan underwriting and approval procedures. Due diligence begins at the time we begin to discuss the origination of a loan with a borrower. Documentation, including a borrower s credit history, materials establishing the value and liquidity of potential collateral, the purpose of the loan, the source and timing of the repayment of the loan, and other factors are analyzed before a loan is submitted for approval. Loans made are also subject to periodic audit and review.

As of June 30, 2011 the Bank had twelve non-accrual loans totaling approximately \$6.6 million, of which three loans totaling approximately \$922 thousand had specific reserves of \$390 thousand and nine loans totaling approximately \$5.7 million had no specific reserve. If interest had been accrued, such income would have been approximately \$62 thousand and \$113 thousand, respectively, for the three and six month periods ended June 30, 2011. Within its non-accrual loans at June 30, 2011, the Bank had two residential mortgage loan that met the definition of a troubled debt restructuring (TDR) loan. TDRs are loans where the contractual terms of the loan have been modified for a borrower experiencing financial difficulties. These modifications could include a reduction in the interest rate of the loan, payment extensions, forgiveness of principal or other actions to maximize collection. At June 30, 2011, these TDR loans had an outstanding balance of \$565 thousand, had no specific reserves connected with them and are performing in accordance with their modified terms.

A loan is considered impaired, in accordance with the impairment accounting guidance (FASB ASC 310-10-35-16), when based on current information and events, it is probable that the Company will be unable to collect all amounts due from the borrower in accordance with the contractual terms of the loan. Included in the Bank s non-accrual loans at June 30, 2011, are twelve impaired loans. Of these impaired loans, three loans totaling \$922 thousand had specific reserves of \$390 thousand and nine loans totaling approximately \$5.7 million had no specific reserve.

As a community bank, our market area is concentrated in Bergen County, New Jersey, and as a result we have a concentration of loans collateralized by real estate, primarily in our market area at June 30, 2011 and December 31, 2010. The Bank s loan portfolio has no foreign loans and no sub-prime loans.

Investment Securities

Securities held as available for sale (AFS) were approximately \$38.5 million at June 30, 2011 compared to \$27.9 million at December 31, 2010. This increase in the AFS category represented the purchase of securities during the period with funds in excess of federal funds sold. Securities held to maturity increased \$1.5 million to \$5.2 million at June 30, 2011 from \$3.7 million at December 31, 2010.

Т	ab	le	of	Cor	itents

Deposits

Deposits remain our primary source of funds. Total deposits increased to \$349.9 million at June 30, 2011 from \$318.4 million at December 31, 2010, an increase of \$31.5 million, or 9.9%. Time deposits, savings and interest bearing checking accounts, and noninterest-bearing checking accounts grew \$19.5 million, \$6.8 million and \$5.2 million, respectively. We believe this increase is due, in part, to the public perception of our safety and soundness. During this interest rate environment, our attractive time deposit products have allowed the Bank to increase its overall deposits while still being able to reduce its overall cost of deposits and thereby increasing its net interest income. The increase is also attributable to the continued referrals of our board of directors, stockholders, management, and staff. The Company has no foreign deposits, nor are there any material concentrations of deposits.

Liquidity

Our liquidity is a measure of our ability to fund loans, withdrawals or maturities of deposits, and other cash outflows in a cost-effective manner. Our principal sources of funds are deposits, scheduled amortization and prepayments of loan principal, maturities of investment securities, and funds provided by operations. While scheduled loan payments and maturing investments are relatively predictable sources of funds, deposit flow and loan prepayments are greatly influenced by general interest rates, economic conditions, and competition. In addition, if warranted, we would be able to borrow funds.

Our total deposits equaled \$349.9 million and \$318.4 million, respectively, at June 30, 2011 and December 31, 2010. The growth in funds provided by deposit inflows during this period, coupled with our cash position during the quarter ended June 30, 2011, has been sufficient to provide for our loan demand.

Through the investment portfolio, we have generally sought to obtain a safe, yet slightly higher yield than would have been available to us as a net seller of overnight federal funds, while maintaining liquidity. Through our investment portfolio, we also attempt to manage our maturity gap, by seeking maturities of investments which coincide with maturities of deposits. The investment portfolio also includes securities available for sale to provide liquidity for anticipated loan demand and other liquidity needs.

As of June 30, 2011, we have a \$12 million overnight line of credit with First Tennessee Bank and a \$10 million overnight line of credit with Atlantic Central Bankers Bank for the purchase of federal funds in the event that temporary liquidity needs arise. There were no amounts outstanding under either facility at June 30, 2011. We are an approved member of the Federal Home Loan Bank of New York, or FHLBNY. The FHLBNY relationship could provide additional sources of liquidity, if required.

We believe that our current sources of funds provide adequate liquidity for our current cash flow needs.

Table of Contents

Capital Resources

A significant measure of the strength of a financial institution is its capital base. Our federal regulators have classified and defined our capital into the following components: (1) Tier 1 Capital, which includes tangible shareholders—equity for common stock and qualifying preferred stock, and (2) Tier 2 Capital, which includes a portion of the allowance for loan losses, certain qualifying long-term debt, and preferred stock which does not qualify for Tier 1 Capital. Minimum capital levels are regulated by risk-based capital adequacy guidelines, which require certain capital as a percent of our assets and certain off-balance sheet items, adjusted for predefined credit risk factors, referred to as—risk-adjusted assets.

Pursuant to federal regulation we are required to maintain, at a minimum, Tier 1 Capital as a percentage of risk-adjusted assets of 4.0% and combined Tier 1 and Tier 2 Capital, or Total Capital, as a percentage of risk-adjusted assets of 8.0%.

In addition to the risk-based guidelines, our regulators require that an institution which meets the regulator s highest performance and operation standards maintain a minimum leverage ratio (Tier 1 Capital as a percentage of tangible assets) of 3.0%. For those institutions with higher levels of risk or that are experiencing or anticipating significant growth, the minimum leverage ratio will be evaluated through the ongoing regulatory examination process. We are currently required to maintain a leverage ratio of 4.0%.

The following table summarizes the Bank s risk-based capital and leverage ratios at June 30, 2011, as well as the applicable minimum ratios:

	June 30, 2011	Minimum Regulatory Requirements
Risk-Based Capital:		•
Tier 1 Capital Ratio	15.53%	4.00%
Total Capital Ratio	16.78%	8.00%
Leverage Ratio	12.76%	4.00%

The capital levels detailed above reflect the success of our initial stock offering as well as our results of operations. As we continue to employ our capital and grow our operations, we expect that our capital levels will decrease, but that we will remain a well-capitalized institution.

The Company is subject to similar regulatory capital requirements, and its capital ratios are similar to the Bank s capital ratios as presented in the table above.

ITEM 3. Quantitative and Qualitative Disclosures about Market/Interest Risk

As a smaller reporting company, the Company is not required to provide the information otherwise required by this Item.

ITEM 4. Controls and Procedures

Evaluation of disclosure controls and procedures.

As of June 30, 2011, the Company s management including the Chief Executive Officer (our Principal Executive Officer) and President and Chief Operating Officer (our Principal Financial Officer), evaluated the Company s disclosure controls and procedures related to the recording, processing, summarization, and reporting of information in the Company s periodic reports that the Company files with the Securities and Exchange Commission.

Based on their evaluation as of December 31, 2010, the Company s Chief Executive Officer and Chief Operating Officer have concluded that the Company s disclosure controls and procedures are effective to ensure that the information required to be disclosed by the Company in the reports that the Company files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms.

Changes in internal controls over financial reporting.

There was no change in our internal control over financial reporting identified during the quarter ended June 30, 2011 that has materially affected, or is reasonably likely to materially affect, the Company s internal control over financial reporting.
