Questions & Answers with Phillip Clendenin

[Phillip]: Back in the mid-80s, only 15% of surgeries were performed in an outpatient setting, 85% of them were performed in the hospitals. Today, we see over three-quarters of surgeries performed in an outpatient setting, either in an outpatient surgery center, or a hospital outpatient department. Hi, I'm Phillip Clendenin, and I'm President of the Ambulatory Services division at AMSURG.

WHAT DO YOU LIKE ABOUT WORKING IN THE HEALTHCARE INDUSTRY?

[Phillip]: You know, it's just the excitement and the challenges that come with healthcare, day in and day out. There's always a puzzle. And the great thing about the culture at AMSURG is, everybody here likes to solve puzzles. We get to do that every day. I care deeply about physicians, about those who care for patients, and ultimately about patients. And it really was taking the business background coupled with the healthcare master's degree, and then through experience, really focusing on what can I do to help make a difference in a patient's life. What can I do to make a difference in that physician's life, so that they can focus on healthcare and we can focus on the business side?

CAN YOU TELL US ABOUT AMSURG'S AMBULATORY SURGERY CENTER PRACTICE?

[Phillip]: AMSURG is the leading provider of Ambulatory Surgery Centers in the country. And, our key differentiation has been, we partner with physicians. We've grown from an idea on a back of a napkin, with the beginning of five ambulatory surgery centers, to now approximately 258 surgery centers in 35 states, plus the District of Columbia.

WHAT IS AN AMBULATORY SURGERY CENTER?

[Phillip]: An Ambulatory Surgery Center is essentially an O.R. outside of the hospital setting, so, we'll see the full gamut of outpatient surgery. With the addition of new technology, the focus on patient safety, and the fact that free-standing ASCs have a much lower infection rate, gives us an opportunity and a great runway to grow.

Ambulatory Surgery Centers Overview

[Voiceover]: Ambulatory surgery centers, also known as ASCs, outpatient surgery centers or same day surgery centers, are healthcare facilities where procedures not requiring an overnight hospital stay are performed.

[Voiceover]: Today, more than three quarters of all surgeries are performed in an outpatient setting and AMSURG is the leading provider of ASC services in the country.

[Voiceover]: More than one-point-seven million procedures a year are performed in AMSURG surgery centers.

[Voiceover]: The most common types of procedures performed at AMSURG s more than 250 centers are gastroenterology, ophthalmology and orthopedics.

[Voiceover]: Through its partnerships with more than two-thousand physicians, AMSURG builds solutions to improve patient outcomes, reduce costs and enhance clinical quality, utilizing data-driven best practices, process improvement and lean strategies so that the physicians and center staff can focus on patient care.

[Voiceover]: AMSURG s national patient awareness campaigns: Stop Colon Cancer Now, More Than Heartburn, Your Sight Matters and Your Ortho Solution are dedicated to eradicating colon cancer, restoring sight and providing care to patients limited by chronic or acute injury.

[Voiceover]: As an example, the dedication of AMSURG s gastroenterology centers to increase access to colonoscopies has helped reduce the rate of colon cancer deaths by 65 percent.

[Voiceover]: AMSURG surgery centers are the venue for high quality, high value, same-day surgical service with a superior patient experience.

[Voiceover]: Through its strong partnerships with physicians, built on trust, communication and collaboration, AMSURG has strengthened the overall quality of health care delivery by providing superior and comprehensive resources to optimize each surgery center, providing health care value, improving the patient experience and saving lives.
