Note 2 - Summary of Significant Accounting Policies (continued)

b) Period

These consolidated financial statements have been prepared as of March 31, 2005 and 2004 and for the years then ended.

c) Reporting currency and monetary correction

The financial statements of the Company are prepared in U.S. dollars. As a significant portion of the Company's operations are transacted in U.S. dollars, the U.S. dollar is considered the currency of the primary economic environment in which the Company operates.

The Parent Company and those subsidiaries which maintain their accounting records in U.S. dollars are not required, or permitted, to restate the historical dollar amounts for the effects of inflation.

The financial statements of domestic subsidiaries, which maintain their accounting records in Chilean pesos have been restated to reflect the effects of variations in the purchasing power of Chilean pesos during the year. For this purpose, and in accordance with Chilean regulations, non-monetary assets and liabilities, equity and income statement accounts have been restated in terms of year-end constant pesos based on the change in the consumer price index during the year (-0.8% and -0.5% in 2005 and 2004, respectively). The resulting net charge or credit to income arises as a result of the gain or loss in purchasing power from the holding of non-U.S. dollar denominated monetary assets and liabilities exposed to the effects of inflation.

Prior period financial statements presented for comparative purposes have not been restated to reflect the change in the purchasing power of the Chilean pesos during the most recent year-end. In accordance with Chilean GAAP, amounts expressed in U.S. dollars, including amounts included in the consolidated financial statements as determined in prior years from the translation of financial statements of those Chilean subsidiaries which maintain their accounting records in Chilean pesos, are not adjusted for price-level changes.

d) Foreign currency

i) Foreign currency transactions

Monetary assets and liabilities denominated in Chilean pesos and other currencies have been translated to U.S. dollars at the observed exchange rates determined by the Central Bank of Chile in effect at each year-end of Ch\$585.93 per US\$1 at March 31, 2005 and Ch\$616.41 per US\$1 at March 31, 2004.

ii) Translation of non-U.S. dollar financial statements

In accordance with Chilean GAAP, the financial statements of foreign and domestic subsidiaries that do not maintain their accounting records in U.S. dollars are translated from the respective local currencies to U.S. dollars in accordance with Technical Bulletin No. 64 and 72 of the Chilean Association of Accountants (BT 64-BT 72) as follows:

a) For those subsidiaries and affiliates located in Chile which keep their accounting records in price-level adjusted Chilean pesos:

- Balance sheet accounts are translated to U.S. dollars at the year-end exchange rate without eliminating the effects of price-level restatement.
- Income statement accounts are translated to U.S. dollars at the average exchange rate each month. The monetary correction account on the income statement, which is generated by the inclusion of price-level restatement on the non-monetary assets and liabilities and shareholders' equity, is translated to U.S. dollars at the average exchange rate for each month.
- Translation gains and losses, as well as the price-level restatement to the balance sheet mentioned above, are included as an adjustment in shareholders' equity, in conformity with Circular No. 1,697 of the SVS.

- b) The financial statements of those foreign subsidiaries that keep their accounting records in currencies other than the U.S. dollar have been translated at historical exchange rates as follows:

- Monetary assets and liabilities are translated at year-end exchange rates between the US dollar and the local currency.
- All non-monetary assets and liabilities and shareholders' equity are translated at historical exchange rates between the US dollar and the local currency.
- Income and expense accounts are translated at average exchange rates between the US dollar and the local currency.
- Any exchange differences are included in the results of operations for the period.

d) Foreign currency (continued)

Foreign exchange differences for the period ended March 31, 2005 and 2004 generated net earnings (loss) of ThUS\$ 780 and ThUS\$ (566), respectively, which have been charged to the consolidated statements of income in each respective period.

The monetary assets and liabilities of foreign subsidiaries were translated into US dollars at the exchange rates per US dollar prevailing at March 31, as follows:

Brazilian Real	2.67	2.92

Note 2 - Summary of Significant Accounting Policies (continued)

e) Cash and cash equivalents

The Company considers all highly liquid investments with a remaining maturity of less than 90 days as of the closing date of the financial statements to be cash equivalents.

f) Time Deposits

Time deposits are recorded at cost plus accrued interest.

g) Marketable securities

Marketable securities are recorded at the lower of cost plus accrued interest or market value.

h) Allowance for doubtful accounts

The Company records an allowance for doubtful accounts based on estimated probable losses.

i) Inventories and materials

Inventories of finished products and work in process are valued at average production cost. Raw materials and products acquired from third parties are stated at average cost and materials-in-transit are valued at cost. All such values do not exceed net realizable values.

Inventories of non-critical spare parts and supplies are classified as other current assets, except for those items which the Company estimates to have a turnover period of one year or more, which are classified as other long-term assets.

j) Income taxes and deferred income taxes

Prior to 2000, income taxes were charged to results in the same period in which the income and expenses were recorded and were calculated in accordance with the enacted tax laws in Chile and the other jurisdictions in which the Company operated.

Note 2 - Summary of Significant Accounting Policies (continued)

j) Income and deferred taxes (continued)

Under Chilean law, the Parent Company and its subsidiaries are required to file separate tax declarations.

Beginning January 1, 2000, the Company records deferred income taxes in accordance with Technical Bulletin Nos. 60, 69, 71 and 73 of the Chilean Association of Accountants, and with Circular No. 1466 issued on January 27, 2000 by the SVS, recognizing the deferred tax effects of temporary differences between the financial and tax values of assets and liabilities, using the liability method. The effect of the temporary differences at March 31, 1999 were recorded in complementary asset and liability accounts, which are recognized in the statement of operations over the estimated period in which they reverse.

k) Property, plant and equipment

Property, plant, equipment and property rights are recorded at acquisition cost, considering in general an average residual value of 5%, except for certain assets that were restated in accordance with a technical appraisal in 1989. Depreciation expense has been calculated using the straight-line method based on the estimated useful lives of the assets and is charged directly to expenses.

Property, plant and equipment acquired through financial lease agreements are accounted for at the present value of the minimum lease payments plus the purchase option based on the interest rate included in each contract. The Company does not legally own these assets and therefore cannot freely dispose of them.

In conformity with Technical Bulletin No. 31 and 33 of the Chilean Association of Accountants, the Company capitalizes interest cost associated with the financing of new assets during the construction period of such assets.

Maintenance costs of plant and equipment are charged to expenses as incurred.

The Company obtains property rights and mining concessions from the Chilean state. Other than minor filing fees, the property rights are usually obtained without initial cost, and once obtained, are retained by the Company as long as the annual fees are paid. Such fees, which are paid annually in March, are recorded as prepaid assets to be amortized over the following twelve months. Values attributable to these original mining concessions are recorded in property, plant and.

l) Investments in related companies

Investments in related companies over which the Company has significant influence, are included in other assets and are recorded using the equity method of accounting, in accordance with SVS Circulars Nos. 368 and 1,697 and Technical Bulletins Nos. 64 and 72 issued by the Chilean Association of Accountants. Accordingly, the Company's proportional share in the net income or loss of each investee is recognized in the non-operating income and expense classification in the consolidated statements of income on an accrual basis, after eliminating any unrealized profits from transactions with the related companies.

The translation adjustment to U.S. dollars of investments in domestic subsidiaries that maintain their accounting records and are controlled in Chilean pesos is recognized in other reserves within shareholders' equity. Direct and indirect investments in foreign subsidiaries or affiliates are controlled in U.S. dollars.

Investments in which the Company has less than 20% participation and the capacity to exert significant influence or control over the investment, because SQM forms part of its Board of Directors, have been valued using the equity method.

m) Goodwill and negative goodwill

Goodwill is calculated as the excess of the purchase price of companies acquired over their net book value, whereas negative goodwill occurs when the net book value exceeds the purchase price of companies acquired. Note 26 Environmental Projects (continued)

Processes where sodium nitrate is used as a raw material are carried out in geographical areas such as the desert with favorable weather conditions for drying solid materials and evaporating liquids used in solar energy. The extraction of minerals in open pit mines, given their low waste-to-mineral ratio, gives rise to waste deposits that have little impact on the environment. The extraction process and ore crushing produce particles that are consistent with the industry of operation.

On August 10, 1993, the Ministry of Health published a resolution under the Sanitary Code that established that the levels of breathable particles present at Maria Elena Plant exceeded the level allowed for air quality and, consequently, affected the nearby city of Maria Elena. Particles mainly come from dust that results from processing the sodium nitrate, particularly at the crushing process prior to leaching. The Company has implemented a series of measures that have shown notable improvement in air quality at María Elena. A new decontamination plan for this area, released on March 13, 2004, is intended to meet air quality standards by April 1, 2006. On December 30, 2004, the Company submitted a proposal entitled Technological Change at María Elena, which intends to reduce particle emission, to the government's Environmental Impact Evaluation System. This proposal is presently pending evaluation by the environmental regulators, whose decision should be made public during the first semester of 2005.

Ore treatment operations, as they are controlled processes, produce solid residual materials that are the non-soluble by product and a certain degree of moisture.

SQM entered into a contract with the National Forestry Corporation (CONAF) aimed at researching the activities of flamingo groups that live in the Atacama Salt Mine lagoons. Such research includes a population count of the birds and wildlife, breeding research, additional behavior research and the climate phenomena of the area.

Consistent with the Company's ongoing commitment with the environmental authorities, the Company actively participates in the Joint Monitoring Research project for the Atacama Salt Mine watershed along with other mining companies that make use of the water resources that supply the Atacama Salt Mine. To perform this study, SQM has involved diverse scientists from prestigious research institutions such as Dictuc of Pontificia Universidad Católica, the University of Nevada, Cornell University and the University of Binghamton in New York.

Upon approval of the aforementioned proposal at the next Ordinary Shareholders' Meeting that will be held on April 29, 2004, the amount of the final dividend to be distributed will be increased from 50% to 65% of net income and implies the partial modification of the Dividend Policy for the 2004 commercial year, which was communicated at the General Ordinary Shareholders' Meeting held on April 30, 2004.

Note 28 Subsequent Events

The director Mr. José Antonio Silva B. consulted with the Chilean Superintendency of Securities and Insurance ("SVS") as to the applicability of the concept of "limitation of related persons" to Article 31 of the by-laws of SQM S.A. and as equal to this concept already existing in Article 31 Bis of the aforementioned by-laws- and also in respect to the quorum required to modify the percentage of "37.5%" referred to in Article 31. The SVS, through Ordinary Official Communication N002622 dated March 16, 2005, asked the Company's opinion in this respect and the Company, through its management informed the Board of Directors that the concept of "limitation of related persons" does not exist in Article 31 and that the history of both articles plus the interpretation of these articles at the different Shareholders' meetings held throughout the years and the different objectives of these articles, among other aspects, allow concluding that this concept is not applicable to article 31 and that; in addition, the amendment of the percentage requires the vote by absolute majority of shares issued with voting rights present at the Shareholders' meeting that analyze this amendment. Four directors agreed with the opinion provided by the management of SQM S.A. and two directors disagreed with this opinion and this was informed to the SVS. The SVS confirmed the opinion provided by the management of SQM S.A. based on matter of law of fact considerations explained in Ordinary Official Communication N003821 dated April 19, 2005.

Inversiones El Boldo Limitada, owner of more than 10% of voting right shares issued of SQM S.A. and related to Potash Corporation of Saskatchewan Inc., on April 25, 2005 has requested from the Board of
