BASF reaches agreements with direct vitamin purchasers
in the United States

BASF Aktiengesellschaft announces that it has reached agreements in principle to settle all remaining pending claims for damages from direct purchasers of vitamins sold in the United States. In total, BASF expects that these agreements and the settlement of claims from indirect customers that are pending in the United States will result in an additional charge on income of about EUR100 million. This amount will be included in the company's third-quarter results. BASF confirms its earlier statement that income from operations before special items for the third quarter of 2002 will be considerably higher than in the same quarter in 2001.
