Item 7.01 Regulation FD Disclosure

Georgia Gulf Corporation has applied to the Louisiana Department of Environmental Quality for an air permit modification for its Plaquemine, Louisiana vinyl resins facility. The permit modification would allow the Company to modernize the facility by adding a new production line that would provide more efficiency, flexibility and productivity. The project would represent a \$100 million investment in the facility. The Company hopes to receive permit approval by the second quarter of 2006, which it expects would result in completion of the modernization project in early 2008. This project would increase capacity by approximately 450 million pounds annually.
