CAUTIONARY NOTE REGARDING FORWARD LOOKING STATEMENTS

This Quarterly Report on Form 10-Q, including the sections entitled “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and “Quantitative and Qualitative Disclosure About Market Risk” under Items 2 and 3, respectively, of Part I of this report, and the sections entitled “Legal Proceedings,” “Risk Factors,” and “Unregistered Sales of Equity Securities and Use of Proceeds” under Items 1, 1A and 2, respectively, of Part II of this report, may contain forward-looking statements. These statements may relate to, but are not limited to, expectations of future operating results or financial performance, macroeconomic trends that we expect may influence our business, plans for capital expenditures, expectations regarding the introduction of new products, regulatory compliance and expected changes in the regulatory landscape affecting our business, expected impact of litigation, plans for growth and future operations, effects of acquisitions, as well as assumptions relating to the foregoing. Forward-looking statements are inherently subject to risks and uncertainties, some of which cannot be predicted or quantified. These risks and other factors include, but are not limited to, those listed under the section entitled “Risk Factors” in Item 1A of Part II of this Quarterly Report on Form 10-Q. In some cases, you can identify forward-looking statements by terminology such as “may,” “will,” “should,” “could,” “expect,” “plan,” “anticipate,” “believe,” “estimate,” “predict,” “intend,” “continue,” “seek” or the negative of these terms or other comparable terminology. These statements are only predictions. Actual events and/or results may differ materially.

We believe that it is important to communicate our future expectations to our investors. However, there may be events in the future that we are not able to accurately predict or control and that may cause our actual results to differ materially from the expectations we describe in our forward-looking statements. Except as required by applicable law, including the securities laws of the United States and the rules and regulations of the Securities and Exchange Commission, we do not plan to publicly update or revise any forward-looking statements, whether as a result of any new information, future events or otherwise, other than through the filing of periodic reports in accordance with the Securities Exchange Act of 1934, as amended. Investors and potential investors should not place undue reliance on our forward-looking statements. Before you invest in our common stock, you should be aware that the occurrence of any of the events described in the “Risk Factors” section and elsewhere in this Quarterly Report on Form 10-Q could harm our business, prospects, operating results and financial condition. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements.

COMSCORE, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Organization

comScore, Inc. (the “Company”), a Delaware corporation incorporated in August 1999, provides on-demand digital analytics that enable customers to make well-informed business decisions and implement more effective digital business strategies. More specifically, the Company is an Internet technology company that measures what people do as they navigate the digital world and analyzes that information to provide insights and recommended actions for the Company's customers to maximize the value of their digital investments. The Company's products offer customers deep insights into consumer behavior, including objective, detailed information regarding usage of their online properties and those of their competitors, coupled with information on consumer demographic characteristics, attitudes, lifestyles and offline behavior. The Company provides its products through a scalable, Software-as-a-Service, SaaS, delivery model, which eliminates the need for customers to install and maintain hardware and software in order to use the Company's products.

The Company's digital marketing intelligence platform is comprised of proprietary databases and a computational infrastructure that measures, analyzes and reports on digital activity worldwide. The foundation of the platform is data collected from a panel of more than two million Internet users worldwide who have granted to the Company explicit permission to confidentially measure their Internet usage patterns, online and certain offline buying behavior and other activities. For measuring and reporting online audiences, comScore also supplements panel information with census information obtained from the Company's tagged network of global websites, referred to as the comScore Census Network. This panel information is complemented by a Unified Digital Measurement approach to digital audience measurement. Unified Digital Measurement blends panel and census methodologies into a product that provides a direct linkage and reconciliation between census and panel measurement. By applying advanced statistical methodologies to the panel data, the Company projects consumers' online behavior for the total online population and a wide variety of user categories. In addition to the Company's comScore Census Network products, the Company provides software and other products to the large mobile networks that deliver network analysis focused on the experience of wireless subscribers, as well as network intelligence with respect to performance, capacity and configuration analytics. The Company also provides digital and monetization analytics and innovative video measurement products.

2. Summary of Significant Accounting Policies

Basis of Presentation and Consolidation

The accompanying consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany transactions and accounts have been eliminated upon consolidation. The Company consolidates investments where it has a controlling financial interest. The usual condition for controlling financial interest is ownership of a majority of the voting interest and, therefore, as a general rule, ownership, directly or indirectly, of more than 50% of the outstanding voting shares is a condition indicating consolidation. For investments in variable interest entities, the Company would consolidate when it is determined to be the primary beneficiary of a variable interest entity. The Company does not have any variable interest entities.

Unaudited Interim Financial Information

The consolidated interim financial statements included in this quarterly report on Form 10-Q have been prepared by the Company without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”). Certain information and footnote disclosures normally included in consolidated interim financial statements prepared in accordance with U.S. generally accepted accounting principles (“GAAP”) have been condensed or omitted pursuant to such rules and regulations. However, the Company believes that the disclosures contained in this quarterly report comply with the requirements of Section 13(a) of the Securities Exchange Act of 1934, as amended, for a quarterly report on Form 10-Q and are adequate to make the information presented not misleading. The consolidated interim financial statements included herein, reflect all adjustments (consisting of normal recurring adjustments) which are, in the opinion of management, necessary for a fair presentation of the financial position, results of operations and cash flows for the interim periods presented. These consolidated interim financial statements should be

read in conjunction with the consolidated financial statements and notes thereto contained in the Company's Annual Report on Form 10-K for the year ended December 31, 2012, filed February 20, 2013 with the SEC. The results of operations for the three and six months ended June 30, 2013 are not necessarily indicative of the results to be anticipated for the entire year ending December 31, 2013 or thereafter. All references to June 30, 2013 and 2012 or to the three and six months ended June 30, 2013 and 2012 in the notes to the consolidated interim financial statements are unaudited.

Table of Contents

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the reported amounts of revenue and expense during the reporting periods. Significant estimates and assumptions are inherent in the analysis and the measurement of deferred tax assets, the identification and quantification of income tax liabilities due to

uncertain tax positions, recoverability of intangible assets, other long-lived assets and goodwill, estimates related to outstanding litigation, and the determination of the allowance for doubtful accounts. The Company bases its estimates on historical experience and assumptions that it believes are reasonable. Actual results could differ from those estimates.

Fair Value Measurements

The Company evaluates the fair value of certain assets and liabilities using the fair value hierarchy. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability. As a basis for considering such assumptions, the Company applies the fair value hierarchy which prioritizes the inputs used in measuring fair value as follows:

Level 1 — observable inputs such as quoted prices in active markets;

Level 2 — inputs other than the quoted prices in active markets that are observable either directly or indirectly;

Level 3 — unobservable inputs of which there is little or no market data, which require the Company to develop its own assumptions.

The Company does not currently have any assets or liabilities that are measured at fair value on a recurring basis. However, cash equivalents, accounts receivable, prepaid expenses and other assets, accounts payable, accrued expenses, deferred revenue, deferred rent and capital lease obligations reported in the consolidated balance sheets equal or approximate their respective fair values.

Assets and liabilities that are measured at fair value on a non-recurring basis include fixed assets, intangible assets and goodwill. The Company recognizes these items at fair value when they are considered to be impaired or upon initial recognition. During the first quarter of 2013, certain intangible assets acquired were measured at fair value using significant unobservable inputs (Level 3) as described in Note 3. During the six months ended June 30, 2013, the Company recorded these assets as follows:

Description	March 31, 2013	Fair Value Measurements Using			Total Gains (Losses)
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Long-lived assets held and used	(In thousands) \$1,182			\$1,182	\$—

During the three and six months ended June 30, 2012 certain intangible assets were measured at fair value using significant unobservable inputs (Level 3). The Company recorded an impairment charge of \$3.3 million pertaining to these assets as follows:

June 30, 2012	Fair Value Measurements Using			Total Gains
	Quoted Prices in Active Markets for Identical	Significant Other Observable Inputs	Significant Unobservable Inputs	

Edgar Filing: COMSCORE, INC. - Form 10-Q

Description	(In thousands)	Assets	(Level 2)	(Level 3)	(Losses)
		(Level 1)			
Long-lived assets held and used	\$ 2,500			\$ 2,500	\$(3,349)

9

Table of Contents

Cash and Cash Equivalents and Investments

Cash and cash equivalents consist of highly liquid investments with an original maturity of three months or less at the time of purchase. Cash and cash equivalents consist primarily of bank deposit accounts. The Company maintains cash and cash equivalents at financial institutions. The combined account balances at each institution typically exceed FDIC insurance coverage and, as a result, there is a concentration of credit risk related to amounts on deposit in excess of FDIC insurance coverage. The Company believes the risk is not significant.

Interest income on investments and excess cash balances was a nominal amount for the three and six months ended June 30, 2013 and 2012.

Accounts Receivable

Accounts receivable are recorded at the invoiced amount and are non-interest bearing. The Company generally grants uncollateralized credit terms to its customers and maintains an allowance for doubtful accounts to reserve for potentially uncollectible receivables. Allowances are based on management's judgment, which considers historical experience and specific knowledge of accounts where collectibility may not be probable. The Company makes provisions based on historical bad debt experience, a specific review of all significant outstanding invoices and an assessment of general economic conditions. If the financial condition of a customer deteriorates, resulting in an impairment of its ability to make payments, additional allowances may be required.

Property and Equipment

Property and equipment is stated at cost, net of accumulated depreciation. Property and equipment is depreciated on a straight-line basis over the estimated useful lives of the assets, ranging from three to five years. Assets under capital leases are recorded at their net present value at the inception of the lease and are included in the appropriate asset category. Assets under capital leases and leasehold improvements are amortized over the shorter of the related lease terms or their useful lives. Replacements and major improvements are capitalized; maintenance and repairs are charged to expense as incurred. Amortization of assets under capital leases is included within the expense category in which the asset is deployed.

Business Combinations

The Company recognizes all of the assets acquired, liabilities assumed, contractual contingencies, and contingent consideration at their fair value on the acquisition date. Acquisition-related costs are recognized separately from the acquisition and expensed as incurred. Generally, restructuring costs incurred in periods subsequent to the acquisition date are expensed when incurred. Subsequent changes to the purchase price (i.e., working capital adjustments) or other fair value adjustments determined during the measurement period are recorded as an adjustment to goodwill. All subsequent changes to an income tax valuation allowance or uncertain tax position that relate to the acquired company and existed at the acquisition date that occur both within the measurement period and as a result of facts and circumstances that existed at the acquisition date are recognized as an adjustment to goodwill. All other changes in income tax valuation allowances are recognized as a reduction or increase to income tax expense or as a direct adjustment to additional paid-in capital as required.

Goodwill and Intangible Assets

Goodwill represents the excess of the purchase price over the fair value of identifiable assets acquired and liabilities assumed when a business is acquired. The allocation of the purchase price to intangible assets and goodwill involves the extensive use of management's estimates and assumptions, and the result of the allocation process can have a significant impact on future operating results. The Company estimates the fair value of identifiable intangible assets acquired using various valuation methods, including the excess earnings and relief from royalty methods.

Intangible assets with finite lives are amortized over their useful lives while goodwill is not amortized but is evaluated for potential impairment at least annually by comparing the fair value of a reporting unit to its carrying value including goodwill recorded by the reporting unit. If the carrying value exceeds the fair value, impairment is measured by comparing the implied fair value of the goodwill to its carrying value, and any impairment determined is recorded in the current period. All of the Company's goodwill is associated with its single reporting unit. Accordingly, on an annual basis the Company performs the impairment assessment for goodwill at the enterprise level. The Company completed its annual impairment analysis as of October 1st for 2012 and determined that there was no impairment of goodwill. There have been no indicators of impairment suggesting that an interim assessment was necessary for

goodwill since the October 1, 2012 analysis.

Table of Contents

Intangible assets with finite lives are amortized using the straight-line method over the following useful lives:

	Useful Lives (Years)
Acquired methodologies/technology	3 to 10
Customer relationships	3 to 12
Patent	7
Intellectual property	7 to 13
Trade names	2 to 10
Impairment of Long-Lived Assets	

The Company's long-lived assets primarily consist of property and equipment and intangible assets. The Company evaluates its long-lived assets for impairment whenever events or changes in circumstances indicate the carrying value of such assets may not be recoverable. If an indication of impairment is present, the Company compares the estimated undiscounted future cash flows to be generated by the asset to its carrying amount. Recoverability measurement and estimation of undiscounted cash flows are grouped at the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities. If the undiscounted future cash flows are less than the carrying amount of the asset group, the Company records an impairment loss equal to the excess of the asset group's carrying amount over its fair value. The fair value is determined based on valuation techniques such as a comparison to fair values of similar assets or using a discounted cash flow analysis. Although the Company believes that the carrying values of its long-lived assets are appropriately stated, changes in strategy or market conditions or significant technological developments could significantly impact these judgments and require adjustments to recorded asset balances. There were no impairment charges recognized during the three and six months ended June 30, 2013. During the three and six months ended June 30, 2012, the Company recorded an impairment charge of \$3.3 million related to certain intangible assets.

Leases

The Company leases its facilities and accounts for those leases as operating leases. For facility leases that contain rent escalations or rent concession provisions, the Company records the total rent payable during the lease term on a straight-line basis over the term of the lease. The Company records the difference between the rent paid and the straight-line rent as a deferred rent liability. Leasehold improvements funded by landlord incentives or allowances are recorded as leasehold improvement assets and a deferred rent liability which is amortized as a reduction of rent expense over the term of the lease.

The Company records capital leases as an asset and an obligation at an amount equal to the present value of the minimum lease payments as determined at the beginning of the lease term. Amortization of capitalized leased assets is computed on a straight-line basis over the term of the lease and is included in depreciation and amortization expense.

Foreign Currency

The functional currency of the Company's foreign subsidiaries is the local currency. All assets and liabilities are translated at the current exchange rate as of the end of the period, and revenues and expenses are translated at average exchange rates in effect during the period. The gain or loss resulting from the process of translating foreign currency financial statements into U.S. dollars is reflected as foreign currency cumulative translation adjustment and reported as a component of accumulated other comprehensive income.

The Company incurred a foreign currency transaction gain of \$0.1 million and a loss of \$0.2 million for the three and six months ended June 30, 2013, respectively, and foreign currency transaction losses of \$0.3 million and \$0.6 million for the three and six months ended June 30, 2012, respectively. These gains and losses are the result of transactions denominated in currencies other than the functional currency of the Company's foreign subsidiaries. The majority of the Company's foreign operations are denominated in the euro, the British Pound and various currencies in Latin America.

Revenue Recognition

The Company recognizes revenues when the following fundamental criteria are met: (i) persuasive evidence of an arrangement exists, (ii) delivery has occurred or the services have been rendered, (iii) the fee is fixed or determinable,

and (iv) collection of the resulting receivable is reasonably assured.

11

Table of Contents

The Company generates revenues by providing access to the Company's online database or delivering information obtained from the database, usually in the form of periodic reports. Revenues are typically recognized on a straight-line basis over the period in which access to data or reports is provided, which generally ranges from three to twenty-four months.

Revenues are also generated through survey services under contracts ranging in term from two months to one year. Survey services consist of survey and questionnaire design with subsequent data collection, analysis and reporting. At the outset of an arrangement, total arrangement consideration is allocated between the development of the survey questionnaire and subsequent data collection, analysis and reporting services based on relative selling price. Revenue allocated to the survey questionnaire is recognized when it is delivered and revenue allocated to the data collection, analysis and reporting services is recognized on a straight-line basis over the estimated data collection period once the survey or questionnaire design has been delivered. Any change in the estimated data collection period results in an adjustment to revenues recognized in future periods.

Certain of the Company's arrangements contain multiple elements, consisting of the various services the Company offers. Multiple element arrangements typically consist of either subscriptions to multiple online products or a subscription to the Company's online database combined with customized services.

For these types of arrangements, the Company uses a hierarchy to determine the selling price to be used for allocating arrangement consideration to deliverables: (i) vendor-specific objective evidence of fair value ("VSOE"), (ii) third-party evidence of selling price ("TPE") if VSOE is not available, or (iii) an estimated selling price ("ESP") if neither VSOE nor TPE are available. VSOE generally exists only when the Company sells the deliverable separately and is the price actually charged by the Company for that deliverable on a stand-alone basis. ESP reflects the Company's estimate of what the selling price of a deliverable would be if it was sold regularly on a stand-alone basis.

The Company has concluded it does not have VSOE, for these types of arrangements, and TPE is generally not available because the Company's service offerings are highly differentiated and the Company is unable to obtain reliable information on the products and pricing practices of the Company's competitors. As such, ESP is used to allocate the total arrangement consideration at the arrangement inception based on each element's relative selling price. The Company's process for determining ESP involves management's judgments based on multiple factors that may vary depending upon the unique facts and circumstances related to each product suite and deliverable. The Company determines ESP by considering several external and internal factors including, but not limited to, current pricing practices, pricing concentrations (such as industry, channel, customer class or geography), internal costs and market penetration of a product or service. The total arrangement consideration is allocated to each of the elements based on the relative selling price. If the ESP is determined as a range of selling prices, the mid-point of the range is used in the relative-selling-price method. Once the total arrangement consideration has been allocated to each deliverable based on the relative allocation of the arrangement fee, the Company commences revenue recognition for each deliverable on a stand-alone basis as the data or service is delivered.

Generally, contracts are non-refundable and non-cancelable. In the event a portion of a contract is refundable, revenue recognition is delayed until the refund provisions lapse. A limited number of customers have the right to cancel their contracts by providing a written notice of cancellation. In the event that a customer cancels its contract, the customer is not entitled to a refund for prior services, and will be charged for costs incurred plus services performed up to the cancellation date.

Advance payments are recorded as deferred revenues until services are delivered or obligations are met and revenue can be recognized. Deferred revenues represent the excess of amounts invoiced over amounts recognized as revenues. The Company also generates revenue through software licenses, professional services (including software customization, implementation, training and consulting services), and maintenance and technical support contracts. The Company's arrangements generally contain multiple elements, consisting of the various service offerings. The Company recognizes software license arrangements that include significant modification and customization of the software in accordance with Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 985-605, Software Recognition, and ASC 605-35, Revenue Recognition-Construction-Type and Certain Production-Type Contracts, using either percentage-of-completion or the completed-contract method. Under the percentage-of-completion method, the Company uses the input method to measure progress, which is based on the

ratio of costs incurred to date to total estimated costs at completion. The percentage-of-completion method is used when reliable estimates of progress and completion under the contract can be made. Under the completed-contract method, billings and costs (to the extent they are recoverable) are accumulated on the balance sheet, but no profit or income is recorded before user acceptance of the software license. The completed-contract method is used when reliable estimates cannot be made or other terms under the contract require it. To the extent estimated costs are expected to exceed revenue, the Company accrues for costs immediately.

The Company accounts for nonmonetary transactions under ASC 845, Nonmonetary Transactions. Nonmonetary transactions with commercial substance are recorded at the estimated fair value of assets surrendered including cash, if cash is

Table of Contents

less than 25% of the fair value of the overall exchange, unless the fair value of the assets received is more clearly evident, in which case the fair value of the asset received is used. During the three and six months ended June 30, 2013 the Company recognized \$0.3 million and \$0.7 million in revenue related to nonmonetary transactions. Due to timing differences in the delivery and receipt of the respective nonmonetary assets exchanged, the expense recognized in each period is different from the amount of revenue recognized. As a result, during the three and six months ended June 30, 2013, the Company recognized \$0.4 million and \$0.9 million in expense related to nonmonetary transactions.

Stock-Based Compensation

The Company estimates the fair value of share-based awards on the date of grant. The fair value of stock options with only service conditions is determined using the Black-Scholes option-pricing model. The fair value of market-based stock options and restricted stock units is determined using a Monte Carlo simulation embedded in a lattice model. The fair value of restricted stock awards is based on the closing price of the Company's common stock on the date of grant. The determination of the fair value of the Company's stock option awards and restricted stock awards is based on a variety of factors including, but not limited to, the Company's common stock price, expected stock price volatility over the expected life of awards, and actual and projected exercise behavior. Additionally, the Company has estimated forfeitures for share-based awards at the dates of grant based on historical experience and future expectations. The forfeiture estimate is revised as necessary if actual forfeitures differ from these estimates.

The Company issues restricted stock awards where restrictions lapse upon the passage of time (service vesting), achieving performance targets, or some combination of these restrictions. For those restricted stock awards with only service conditions, the Company recognizes compensation cost on a straight-line basis over the explicit service period. For awards with both performance and service conditions, the Company starts recognizing compensation cost over the remaining service period, when it is probable the performance condition will be met. For stock awards that contain performance or market vesting conditions, the Company excludes these awards from diluted earnings per share computations until the contingency is met as of the end of that reporting period.

Income Taxes

Income taxes are accounted for using the asset and liability method. Deferred income taxes are provided for temporary differences in recognizing certain income, expense and credit items for financial reporting purposes and tax reporting purposes. Such deferred income taxes primarily relate to the difference between the tax bases of assets and liabilities and their financial reporting amounts. Deferred tax assets and liabilities are measured by applying enacted statutory tax rates applicable to the future years in which deferred tax assets or liabilities are expected to be settled or realized. The Company records a valuation allowance when it determines, based on available positive and negative evidence, that it is more-likely-than-not that some portion or all of its deferred tax assets will not be realized. The Company determines the realizability of its deferred tax assets primarily based on the reversal of existing taxable temporary differences and projections of future taxable income (exclusive of reversing temporary differences and carryforwards). In evaluating such projections, the Company considers its history of profitability, the competitive environment, the overall outlook for the online marketing industry and general economic conditions. In addition, the Company considers the timeframe over which it would take to utilize the deferred tax assets prior to their expiration.

For certain tax positions, the Company uses a more-likely-than-not threshold based on the technical merits of the tax position taken. Tax positions that meet the more-likely-than-not recognition threshold are measured at the largest amount of tax benefits determined on a cumulative probability basis, which are more-likely-than-not to be realized upon ultimate settlement in the financial statements. The Company's policy is to recognize interest and penalties related to income tax matters in income tax expense.

Earnings Per Share

Basic net loss per common share excludes dilution for potential common stock issuances and is computed by dividing net loss by the weighted-average number of common shares outstanding for the period. Diluted net loss per common share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. Diluted earnings per share assumes the exercise of stock options and warrants using the treasury stock method.

On June 3, 2013 the Company announced that its board of directors had approved the repurchase of up to \$50 million of the Company's common stock. Such repurchases may be made from time to time subject to pre-determined price

and volume guidelines established by the Company's board of directors. The weighted-average shares outstanding-common stock has been adjusted downward for share repurchases made during the three months ended June 30, 2013. See Footnote 10 for more information pertaining to the Company's share repurchases.

Table of Contents

The following table provides a reconciliation of the numerators and denominators used in computing basic and diluted net loss per common share:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
	(In thousands, except share and per share data)			
Net loss	\$(398) \$(6,587) \$(2,421) \$(7,058
Net loss per share - common stock:				
Basic	\$(0.01) \$(0.20) \$(0.07) \$(0.21
Diluted	\$(0.01) \$(0.20) \$(0.07) \$(0.21
Weighted-average shares outstanding-common stock, basic and dilutive	34,414,301	33,189,994	34,317,569	32,991,299

The following is a summary of common stock equivalents for the securities outstanding during the respective periods that have been excluded from the earnings per share calculations as their impact was anti-dilutive.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Stock options and restricted stock	1,057,468	1,846,906	1,309,432	1,460,557
Common stock warrants	—	—	—	6,003

Recent Pronouncements

In February 2013, FASB issued Accounting standards update 2013-02, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified out of Accumulated Other Comprehensive Income. This update requires an entity to provide information about the amount reclassified out of accumulated other comprehensive income by component. The entity is also required to disclose significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amount reclassified is required under U.S. GAAP to be reclassified to net income in its entirety in the same reporting periods. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures required under U.S. GAAP that provide additional detail about those amounts. The objective in this update is to improve the reporting of reclassifications out of accumulated other comprehensive income. The amendments in this update should be applied prospectively for reporting periods beginning after December 15, 2012. This standard did not have a material impact on the Company's financial statements.

3. Asset Disposition

On March 18, 2013, the Company and its wholly-owned subsidiary RSC The Quality Measurement Company (also known as ARSgroup), sold certain assets related to its ARS Non-Health Copy-Testing and Equity Tracking business to MSW.ARS LLC, a Delaware limited liability company ("Buyer").

In connection with the disposition, the Company will receive total proceeds of \$1.0 million in cash, with \$0.25 million received at closing on March 18, 2013, net of advisory fees, and \$0.75 million placed in escrow, which will be received in three equal quarterly payments beginning June 30, 2013 and ending on December 31, 2013. The first payment scheduled for June 30, 2013 has been received. In addition, the Company entered into a license agreement in which it will retain the right to use the necessary intellectual property to continue to provide the ARS Copy-Testing and Equity Tracking services to its Health related customers and recorded an intangible asset of \$1.2 million based on the estimated fair value of the licensed intellectual property. In determining the fair value of the intangible asset, the Company prepared a discounted cash flow ("DCF") analysis. In preparing the DCF analysis, the Company used a combination of income approaches including the relief from royalty approach and the excess earnings approach. Determining fair value requires the exercise of significant judgment, including judgments about appropriate discount

rates, terminal growth rates, royalty rates and the amount and timing of expected future cash flows. The cash flows employed in the DCF analysis were based on the Company's most recent budgets, forecasts and business plans as well as growth rate assumptions for years beyond the current business plan period. Significant assumptions used include a discount rate of 18.5%, which is based on an assessment of the risk inherent in the future revenue streams and

Table of Contents

cash flows associated with the health related customers of ARS, as well as a royalty rate of 3.0%, which is based on an analysis of royalty rates in similar, market transactions. This intangible asset will be amortized on a straight-line basis over its estimated useful life of 3 years beginning April 1, 2013. The assets disposed of included computer equipment, furniture and fixtures, intellectual property and the intangible assets associated with the ARSgroup. Due to the fact that the Company will continue to provide the ARS Copy-Testing and Equity Tracking services to its Health related customers and has therefore not eliminated the operations and cash flows of the ARSgroup, management has concluded that the disposition does not qualify for presentation as discontinued operations.

As a result of the disposition, during the three months ended March 31, 2013, the Company recorded a gain on the Disposition of \$0.2 million, determined as follows (in thousands):

Cash proceeds received at closing, net	\$ 160	
Proceeds receivable (placed in escrow)	750	
Fair value of licensed intellectual property	1,182	
	2,092	
Carrying value of assets disposed	(1,436)
Goodwill allocated to disposition	(289)
Fair value of accelerated equity awards	(157)
Gain on disposition	\$210	

4. Goodwill and Intangible Assets

The change in the carrying value of goodwill for the six months ended June 30, 2013 is as follows (in thousands):

Balance as of December 31, 2012	\$ 102,900	
Goodwill allocated to ARS disposition	(289)
Translation adjustments	(453)
Balance as of June 30, 2013	\$ 102,158	

Certain of the Company's intangible assets are recorded in euros, British Pounds and the local currencies of the Company's South American subsidiaries, and therefore, the gross carrying amount and accumulated amortization are subject to foreign currency translation adjustments. The carrying values of the Company's amortizable acquired intangible assets are as follows (in thousands):

	June 30, 2013			December 31, 2012		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Acquired methodologies/technology	\$7,617	\$(4,651)	\$2,966	\$8,412	\$(4,372)	\$4,040
Customer relationships	34,808	(12,723)	22,085	35,766	(11,230)	24,536
Patent	1,606	(1,167)	439	1,639	(1,073)	566
Intellectual property	13,558	(3,220)	10,338	13,571	(2,459)	11,112
Trade names	2,819	(2,418)	401	4,153	(3,648)	505
	\$60,408	\$(24,179)	\$36,229	\$63,541	\$(22,782)	\$40,759

Amortization expense related to intangible assets was approximately \$1.9 million and \$4.1 million for the three and six months ended June 30, 2013, respectively, and \$2.3 million and \$4.6 million for the three and six months ended June 30, 2012, respectively.

Table of Contents

The weighted average remaining amortization period by major asset class as of June 30, 2013, is as follows:

	(In years)
Acquired methodologies/technology	2.3
Customer relationships	6.4
Patent	1.9
Intellectual property	7.9
Trade names	2.0

The estimated future amortization of acquired intangible assets as of June 30, 2013 is as follows:

	(In thousands)
2013	\$3,825
2014	7,535
2015	6,539
2016	5,258
2017	4,227
Thereafter	8,845
	\$36,229

5. Accrued Expenses

Accrued expenses consist of the following:

	June 30, 2013	December 31, 2012
	(In thousands)	
Payroll and related	\$8,006	\$5,556
Income, sales and other taxes	2,790	2,733
Cost of revenues	5,817	4,892
Professional fees	1,577	1,333
Stock-based compensation	3,285	6,652
Other	4,101	3,243
	\$25,576	\$24,409

Table of Contents

6. Long-term Debt and Other Financing Arrangement

Capital Leases

The Company has a lease financing arrangement with Banc of America Leasing & Capital, LLC in the amount of \$10.0 million, of which the Company can utilize approximately \$10.0 million as of June 30, 2013 for future capital leases. This arrangement allows the Company to lease new software, hardware and other computer equipment as it expands its technology infrastructure in support of its business growth. Under this arrangement, the Company may enter into new capital leases prior to February 26, 2014. The amounts the Company has utilized to date under this arrangement have not lowered the amount available for future capital leases, because those amounts have been assigned by Banc of America Leasing & Capital, LLC under separate third-party arrangements. In addition, the Company enters into capital leases under non-committed arrangements, typically directly with equipment manufacturers. Future minimum payments under capital leases with initial terms of one year or more are as follows:

	(In thousands)
2013	\$5,338
2014	7,268
2015	5,164
2016	1,400
2017	36
Total minimum lease payments	19,206
Less amount representing interest	(1,049)
Present value of net minimum lease payments	18,157
Less current portion	8,583
Capital lease obligations, long-term	\$9,574

During the six months ended June 30, 2013 and 2012, the Company acquired \$7.8 million and \$2.4 million, respectively, in computer equipment through the issuance of capital leases. This non-cash investing activity has been excluded from the consolidated statement of cash flows.

Secured Revolving Credit Facility

On June 30, 2011, the Company entered into a secured credit and security agreement (the "Credit Agreement") with Bank of America, N.A. ("Bank of America") for a two-year, \$50.0 million secured revolving credit facility (the "Revolving Credit Facility"). The agreement includes a maximum \$7.0 million sublimit for a euro loan facility and a \$10.0 million sublimit for the issuance of letters of credit. The maturity date of the Revolving Credit Facility has been extended to September 30, 2013. Borrowings under the Revolving Credit Facility shall be used towards working capital and other general corporate purposes as well as for the issuance of letters of credit. Loans made under the Revolving Credit Facility will bear interest at a fluctuating rate based on the London Interbank Offered Rate ("LIBOR") plus an applicable margin, which will range from 1.75% to 2.75%, based on the Company's funded debt ratio. The Company and each of the Company's material, wholly-owned subsidiaries entered into a Security Agreement in favor of Bank of America (the "Security Agreement"). Pursuant to the Security Agreement, the obligations under the Revolving Credit Facility are secured by a security interest in substantially all of the Company's assets.

Under the terms of the Revolving Credit Facility, the Company is restricted from paying dividends and incurring certain indebtedness, among other restrictive covenants. The Company continues to be in full compliance with all covenants contained in the Revolving Credit Facility.

As of June 30, 2013, €1.5 million (or approximately \$2.0 million) is outstanding under the terms of the Company's Revolving Credit Facility.

The Company maintains letters of credit in lieu of security deposits with respect to certain office leases as well as to satisfy performance guarantees under certain contracts. As of June 30, 2013, \$3.6 million in letters of credit were outstanding, leaving \$6.4 million available for additional letters of credit. These letters of credit may be reduced periodically provided the Company meets the conditional criteria of each related lease agreement.

Table of Contents

7. Commitments and Contingencies

Leases

In addition to equipment financed through capital leases, the Company is obligated under various noncancelable operating leases for office facilities and equipment. These leases generally provide for renewal options and escalation increases. Future minimum payments under noncancelable lease agreements with initial terms of one year or more are as follows:

	(In thousands)
2013	\$4,554
2014	9,543
2015	9,654
2016	9,748
2017	9,584
Thereafter	36,771
Total minimum lease payments	\$79,854

Total rent expense, under non-cancellable operating leases, was \$2.2 million and \$4.4 million for the three and six months ended June 30, 2013, respectively, and \$2.1 million and \$3.9 million for the three and six months ended June 30, 2012, respectively.

Contingencies

During the three months ended June 30, 2013 the Company settled certain patent litigation lawsuits that we initiated against certain third-parties. The Company recognized a net gain of \$1.2 million during the three months ended June 30, 2013 related to these settlements.

On August 23, 2011, the Company received notice that Mike Harris and Jeff Dunstan, individually and on behalf of a class of similarly situated individuals, filed a lawsuit against the Company in the United States District Court for the Northern District of Illinois, Eastern Division, alleging, among other things, violations by the Company of the Stored Communications Act, the Electronic Communications Privacy Act, Computer Fraud and Abuse Act and the Illinois Consumer Fraud and Deceptive Practices Act as well as unjust enrichment. The complaint seeks unspecified damages, including statutory damages per violation and punitive damages, injunctive relief and reasonable attorneys' fees of the plaintiffs. In October 2012, the plaintiffs filed an amended complaint which, among other things, removed the claim relating to alleged violations of the Illinois Consumer Fraud and Deceptive Practices Act. On April 2, 2013, the District Court issued an order certifying a class for only three of the four claims, refusing to certify a class for unjust enrichment. Merits based discovery is underway and expected to continue through calendar year 2013. Based on examination of the remaining claims, the Company believes that they are without merit. The Company continues to investigate the claims and intends to vigorously protect and defend itself. It is not possible for the Company to estimate a potential range of loss at this time.

From time to time, the Company is exposed to asserted and unasserted potential claims encountered in the normal course of business. Although the outcome of any legal proceeding cannot be predicted with certainty, management believes that the final outcome and resolution of these matters will not materially affect the Company's consolidated financial position or results of operations.

8. Income Taxes

The Company's income tax provision for interim periods is calculated by applying its estimated annual effective tax rate on ordinary income before taxes to year-to-date ordinary book income before taxes. The income tax effects of any extraordinary, significant unusual or infrequent items not included in ordinary book income are determined separately and recognized in the period in which the items arise.

During the three and six months ended June 30, 2013, the Company recorded an income tax provisions of \$1.3 million and \$3.5 million resulting in a effective tax rates of 143.4% and 325.4%, respectively. During the three and six months ended June 30, 2012, the Company recorded income tax provisions of \$0.1 million and \$1.2 million resulting in effective tax rates of 2.4% and 21.2%, respectively. These effective tax rates differ from the Federal statutory rate

of 35% primarily due to the effects of valuation allowances associated with foreign losses, state income taxes, foreign income taxes, nondeductible expenses such as certain stock compensation and meals and entertainment, unrecognized tax benefits and changes in statutory tax rates which took effect during the year.

Table of Contents

The exercise of certain stock options and the vesting of certain restricted stock awards during the three and six months ended June 30, 2013 and 2012, generated income tax deductions equal to the excess of the fair market value over the exercise price or grant date fair value, as applicable. The Company will not recognize a deferred tax asset with respect to the excess of tax over book stock compensation deductions until the tax deductions actually reduce its current taxes payable. As such, the Company has not recorded a deferred tax asset in the accompanying consolidated financial statements related to the additional net operating losses generated from the windfall tax deductions associated with the exercise of these stock options and the vesting of restricted stock awards. If and when the Company utilizes these net operating losses to reduce income taxes payable, the tax benefit will be recorded as an increase in additional paid-in capital.

During the three and six months ended June 30, 2013, certain stock options were exercised and certain shares related to restricted stock awards vested at times when the Company's stock price was substantially lower than the fair value of those shares at the time of grant. As a result, the income tax deduction related to such shares is less than the expense previously recognized for book purposes. Such shortfalls reduce additional paid-in capital to the extent windfall tax benefits have been previously recognized. As of December 31, 2012, the Company did not have additional paid-in capital related to windfall tax benefits. As such, shortfalls of \$0.1 million and \$1.0 million have been included in income tax expense for the three and six months ended June 30, 2013, respectively. During the three and six months ended June 30, 2012, \$0.0 million and \$0.1 million of shortfalls reduced additional paid-in capital and \$0.1 million and \$0.3 million of the shortfalls was included in income tax expense.

As of June 30, 2013 and December 31, 2012, the Company had a valuation allowance related to the deferred tax assets of certain foreign subsidiaries (primarily net operating loss carryforwards) that are either loss companies or are in their start-up phases, the U.S. capital loss carryforwards and certain state net operating loss carryforwards. Management will continue to evaluate the Company's deferred tax position of its U.S. and foreign companies throughout 2013 to determine the appropriate level of valuation allowance required against its deferred tax assets.

As of June 30, 2013 and December 31, 2012, the Company had unrecognized tax benefits of approximately \$1.4 million. The Company recognizes accrued interest and penalties related to unrecognized tax benefits in income tax expense. As of June 30, 2013 and December 31, 2012, the amount of accrued interest and penalties on unrecognized tax benefits was approximately \$0.7 million.

The Company or one of its subsidiaries files income tax returns in the U.S. Federal jurisdiction and various state and foreign jurisdictions. For income tax returns filed by the Company, the Company is no longer subject to U.S. Federal examinations by tax authorities for years before 2009 or state and local examinations by tax authorities for years before 2008 although tax attribute carryforwards generated prior to these years may still be adjusted upon examination by tax authorities.

9. Stockholders' Equity

1999 Stock Option Plan and 2007 Equity Incentive Plan

Prior to the effective date of the registration statement for the Company's initial public offering ("IPO") on June 26, 2007, eligible employees and non-employees were awarded options to purchase shares of the Company's common stock, restricted stock or restricted stock units pursuant to the Company's 1999 Stock Plan (the "1999 Plan"). Upon the effective date of the registration statement of the Company's IPO, the Company ceased using the 1999 Plan for the issuance of new equity awards. Upon the closing of the Company's IPO on July 2, 2007, the Company established its 2007 Equity Incentive Plan, as amended (the "2007 Plan" and together with the 1999 Plan, the "Plans"). The 1999 Plan will continue to govern the terms and conditions of outstanding awards granted thereunder, but no further shares are authorized for new awards under the 1999 Plan. As of June 30, 2013 and December 31, 2012, the Plans provided for the issuance of a maximum of approximately 9.9 million shares and 8.5 million shares, respectively, of common stock. In addition, the 2007 Plan provides for annual increases in the number of shares available for issuance thereunder on the first day of each fiscal year beginning with the 2008 fiscal year, equal to the lesser of: (i) 4% of the outstanding shares of the Company's common stock on the last day of the immediately preceding fiscal year; (ii) 1,800,000 shares; or (iii) such other amount as the Company's Board of Directors may determine. The vesting

period of options granted under the Plans is determined by the Board of Directors, although, for service-based options the vesting has historically been generally ratable over a four-year period. Options generally expire 10 years from the date of the grant. Effective January 1, 2013, the shares available for grant increased by 1,427,177 pursuant to the automatic share reserve increase provision under the Plans. Accordingly, as of June 30, 2013, a total of 3,218,714 shares were available for future grant under the 2007 Plan.

The Company estimates the fair value of stock option awards using the Black-Scholes option-pricing formula and a single option award approach. The Company then amortizes the fair value of awards expected to vest on a ratable straight-line

Table of Contents

basis over the requisite service periods of the awards, which is generally the period from the grant date to the end of the vesting period.

A summary of the Plans is presented below:

	Number of Shares	Weighted- Average Exercise Price	Weighted Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in thousands)
Options outstanding at December 31, 2012	90,552	\$4.38	2.99	851
Options granted	—	\$—		
Options exercised	(22,161)) \$4.12		311
Options forfeited	—	\$—		
Options expired	(255)) \$9.73		
Options outstanding and exercisable at June 30, 2013	68,136	\$4.45	2.48	1,359

The intrinsic value of exercised stock options is calculated based on the difference between the exercise price and the quoted market price of the Company's common stock as of the close of the exercise date. The aggregate intrinsic value for options outstanding and exercisable is calculated as the difference between the exercise price of the underlying stock option awards and the quoted market price of the Company's common stock at June 30, 2013. As of June 30, 2013, there is no unrecognized compensation expense related to non-vested stock options granted prior to that date. The Company's nonvested stock awards are comprised of restricted stock and restricted stock units. The Company has a right of repurchase on such shares that lapse at a rate of twenty-five percent (25)% of the total shares awarded at each successive anniversary of the initial award date, provided that the employee continues to provide services to the Company. In the event that an employee terminates their employment with the Company, any shares that remain unvested and consequently subject to the right of repurchase shall be automatically reacquired by the Company at the original purchase price paid by the employee. During the three months ended June 30, 2013, 21,920 forfeited shares of restricted stock have been repurchased by the Company at no cost.

A summary of the status for nonvested stock awards as of June 30, 2013 is presented as follows:

Nonvested Stock Awards	Restricted Stock	Restricted Stock Units	Total Number of Shares Underlying Awards	Weighted Average Grant-Date Fair Value
Nonvested at December 31, 2012	1,969,710	466,824	2,436,534	\$20.82
Granted	404,923	887,671	1,292,594	18.66
Vested	(979,752)) (157,101)) (1,136,853)) 17.64
Forfeited	(174,746)) (123,969)) (298,715)) 21.19
Nonvested at June 30, 2013	1,220,135	1,073,425	2,293,560	\$21.13

The aggregate intrinsic value for all non-vested shares of restricted stock and restricted stock units outstanding as of June 30, 2013 was \$55.9 million.

As of June 30, 2013, total unrecognized compensation expense related to non-vested restricted stock and restricted stock units was \$32.4 million, which the Company expects to recognize over a weighted-average period of approximately 1.29 years. Total unrecognized compensation expense may be increased or decreased in future periods for subsequent grants or forfeitures.

Of the 57,712 shares of the Company's restricted stock and restricted stock units vesting during the three months ended June 30, 2013, the Company repurchased 20,799 shares at an aggregate purchase price of approximately \$0.4 million pursuant to the stockholder's right under the Plans to elect to use common stock to satisfy tax withholding obligations.

Table of Contents

Shares Reserved for Issuance

At June 30, 2013, the Company had reserved for future issuance the following shares of common stock upon the exercise of options:

Common stock available for future issuances under the Plans	3,218,714
Common stock reserved for outstanding options and restricted stock units	1,141,561
	4,360,275

10. Share Repurchases

On June 3, 2013 the Company announced that its board of directors had approved the repurchase of up to \$50 million of the Company's common stock. Such repurchases may be made from time to time subject to pre-determined price and volume guidelines established by the Company's board of directors.

As part of the share repurchase program, shares may be purchased in open market transactions or pursuant to any trading plan that may be adopted in accordance with Rule 10b5-1 of the Exchange Act. The timing, manner, price and amount of any repurchases will be determined at the Company's discretion, and the share repurchase program may be suspended, terminated or modified at any time for any reason. Shares repurchased are classified as Treasury Stock and presented as a deduction from Stockholder's Equity. Cash paid for share repurchases for the three months ended June 30, 2013, under the recently announced share repurchase program, was as follows:

	Three Months Ended June 30, 2013
(Amounts in millions, except share and per share data)	
Total number of shares repurchased	23,437
Average price paid per share	\$21.11
Total share repurchases	\$0.5

11. Geographic Information

The Company attributes revenues to customers based on the location of the customer. The composition of the Company's sales to unaffiliated customers between those in the United States and those in other locations for the three and six months ended June 30, 2013 and 2012 is set forth below:

	Three months ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
	(In thousands)			
United States	\$49,456	\$42,446	\$98,015	\$88,528
Europe	11,658	10,589	23,922	20,912
Canada	3,156	2,819	6,359	5,507
Other	5,641	4,437	10,463	7,619
Total Revenues	\$69,911	\$60,291	\$138,759	\$122,566

Table of Contents

The composition of the Company's property and equipment between those in the United States and those in other countries as of the end of each period is set forth below:

	June 30, 2013	December 31, 2012
	(In thousands)	
United States	\$27,751	\$24,810
Europe	4,869	5,477
Canada	288	291
Other	788	840
Total	\$33,696	\$31,418

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our consolidated financial statements and the related notes to those statements included elsewhere in this Quarterly Report on Form 10-Q. In addition to historical financial information, the following discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. Our actual results and timing of selected events may differ materially from those anticipated in these forward-looking statements as a result of many factors, including those discussed under "Risk factors" and elsewhere in this document. See also "Cautionary Note Concerning Forward-Looking Statements" at the beginning of this Quarterly Report on Form 10-Q.

Overview

We provide leading, on-demand digital analytics that enable our customers to make well-informed, data-driven decisions and implement more effective digital business strategies. More specifically, we are an Internet technology company that measures what people do as they navigate the digital world, and we turn that information into insights and actions for our clients to maximize the value of their digital investments. One of the key elements of our products is our ability to effectively combine our proprietary comScore data (which we obtain via our global panel and census network) with our clients' own data. Our products provide our customers with deep insight into consumer behavior, including objective, detailed information regarding usage of their online properties and those of their competitors, coupled with information on consumer demographic characteristics, attitudes, lifestyles and offline behavior. In addition, we offer mobile operator analytics products that provide comprehensive marketing and customer care insight to the various mobile carriers worldwide. During the three months ended June 30, 2013, we provided services to over 2,200 customers worldwide with our broad geographic base of employees located in 32 locations in 23 countries.

We deliver our products on-demand using our digital measurement and analytics platforms, which are comprised of proprietary databases, internally developed software, and a computational infrastructure that measures, analyzes and reports on digital activity. Our scalable, Software-as-a-Service, or SaaS, delivery model, eliminates the need for our customers to install and maintain hardware and software in order to use our products. Our products are hosted and maintained by us, which significantly reduces the cost and complexity for our customers relative to traditional software products and provides significant operating efficiencies. We can quickly deploy or update our products with minimal to no lead time, which significantly enhances our customers' productivity. We offer our products as a subscription-based service for which our customers pay a recurring fee during the subscription term.

Our digital media measurement and analytics platforms are comprised of proprietary databases and a computational infrastructure that measures, analyzes and reports on digital activity worldwide. The foundation of our platform is data collected from our comScore panel of approximately two million Internet users worldwide who have granted us explicit permission to confidentially measure their Internet usage patterns, online and certain offline buying behavior and other activities. By applying advanced statistical methodologies to our panel data, we project consumers' online behavior for the total online population and a wide variety of user categories. This panel information is complemented by our Unified Digital Measurement™ methodology which enables us to more accurately measure digital audiences. Our Unified Digital Measurement approach blends panel and census methodologies into products that provide a direct linkage and reconciliation between census and panel measurement. Our tagged network of global websites and apps is referred to as the comScore Census Network™, which has been built with a substantial infrastructure and technology that processes over 1.6 trillion events per month worldwide. We also provide products to the large mobile networks that deliver network analysis focused on the experience of wireless subscribers, as well as network intelligence with respect to performance, capacity and configuration analytics. We also provide digital (web, apps, video, gaming, and other digital assets) and monetization analytics and innovative video measurement products.

We deliver our Analytics for a Digital World™ through a wide array of products organized around the following four major suites: audience analytics, advertising analytics, digital business analytics and mobile operator analytics. Our audience analytics products deliver digital media intelligence by providing an independent, third-party measurement of the size, behavior and characteristics of Internet users on multiple devices, such as TVs, PCs, smartphones and tablets as well as insight into the effectiveness of online advertising. Our core product offerings are built around our Media Metrix™ product, but also include Video Metrix™, Mobile Metrix™, Plan Metrix™ and Ad Metrix™. As the Internet evolves, we are continually creating new solutions, such as Social Essentials, which provides insight into the audience

size, composition, behavior and brand engagement of consumers reached by brands on Facebook. We typically deliver our audience analytics products electronically in the form of weekly, monthly or quarterly subscription based reports. Customers can access current and historical data and analyze this data anytime online.

Table of Contents

Our advertising analytics products combine the proprietary information gathered from our comScore Census Network with the vertical industry expertise of comScore analysts to deliver digital marketing intelligence, including the measurement of online advertising effectiveness, customized for specific industries. Our advertising analytics products include the AdEffx,™ Suite Media Planner 2.0™ and validated Campaign Essentials™, which provide a solution for developing, executing and evaluating online advertising campaigns across multiple platforms, including TV, Web (Display and Video) and Mobile (Smartphones and Tablets). In August 2011, we acquired AdXpose, which provides advertisers and publishers with greater transparency in the quality, safety, and performance of their digital advertising campaigns by allowing them to verify and optimize billions of campaign data points captured in real-time. The combination of AdXpose with our Campaign Essentials product has enabled us to develop a new product we refer to as validated Campaign Essentials, or vCE, which provides intelligence regarding validated impressions, ads that are actually seen, shown in safe content and delivered to the right target audience. Our advertising analytics products are typically delivered on a monthly, quarterly or ad hoc basis.

Our digital business analytics products help organizations optimize the customer experience on their digital assets (websites, apps, video, etc.) and maximize return on digital media investments by allowing marketers to collect, view and distribute information tailored to their specific business requirements. Our digital business analytics platform is designed to integrate data from multiple sources including web, mobile, video and social media interactions. Our digital business analytics services are provided primarily through Digital Analytix™ Our SaaS based product that enables our customers to have access to all of their proprietary click stream data. Our digital business analytics platform is further enhanced by data obtained as part of our audience measurement efforts, and viewable on a quick turnaround basis. Customers can access our digital business analytics data sets and reports anytime online.

Our mobile operator analytics products suite connects mobile behavior, content merchandising, and device capabilities to provide comprehensive mobile market intelligence to mobile carriers worldwide. Our core software product, Subscriber Analytix™, powered by XPLORE™, provides mobile carriers with information on network optimization and capacity planning, customer experience, and market intelligence. Our mobile operator analytics platform is designed to integrate data from multiple sources including web and mobile interactions as well as customer relationship management, call center and back office systems. Customers can access our mobile and network data sets and reports anytime online via our software-based delivery platform.

Brief Company History

Our company was founded in August 1999. In 2007, we completed our initial public offering. We have complemented our internal development initiatives with targeted acquisitions. In February 2010, we acquired the outstanding stock of ARSgroup, Inc. to expand our ability to provide our customers with actionable information to improve their creative and strategic messaging targeted to specific audiences. In July 2010, we acquired the outstanding stock of Nexus, Inc., a provider of software products to the large mobile networks that deliver network analysis focused on the experience of wireless subscribers, as well as network intelligence with respect to performance, capacity and configuration analytics. In August 2010, we acquired the outstanding stock of Nedstat B.V., a provider of web analytics and innovative video measurement products based in Amsterdam, Netherlands. In August 2011, we acquired all of the outstanding equity of AdXpose, Inc., a provider of digital advertising analytics products based in Seattle, Washington. In the first quarter of 2013 we sold certain assets related to the ARS Non-Health Copy-Testing and Equity Tracking business.

Since our initial public offering in 2007, our revenues and expenses have grown significantly. We attribute the growth in our revenue and expenses primarily to:

- increased sales to existing customers, as a result of our efforts to deepen our relationships with these customers by increasing their awareness of, and confidence in, the value of our digital marketing intelligence platform;
- growth in our customer base through the addition of new customers and from acquired businesses;
- the sales of new products to existing and new customers; and
- growth in sales outside of the U.S., as a result of entering into new international markets.

As a result of economic events such as the global financial crisis in the credit markets, softness in the housing markets, difficulties in the financial services sector, political uncertainty in the Middle East, and concerns regarding the eurozone, the direction and relative strength of the U.S. and global economies have become somewhat uncertain in

recent periods. During 2011 and 2012, a limited number of our current and potential customers ceased, delayed or reduced renewals of existing subscriptions and purchases of new or additional services and products, presumably due to the economic downturn. Further, certain of our existing customers exited the market due to industry consolidation and bankruptcy in connection with these challenging economic conditions. Since these negative economic events began in 2008, we continued to add net new customers each year and our existing customers renewed their subscriptions at a rate of over 90% based on dollars renewed each year.

Table of Contents

Notwithstanding our performance during these macroeconomic trends, if economic recovery slows or economic conditions deteriorate, our operating results could be adversely affected in coming periods.

Our Revenues

We derive our revenues primarily from the fees that we charge for subscription-based products, customized projects, and software licenses. We define subscription-based revenues as revenues that we generate from products that we deliver to a customer on a recurring basis, as well as arrangements where a customer is committing up-front to purchase a series of deliverables over time, which includes revenue from software licenses as further discussed below. We define project revenues as revenues that we generate from customized projects that are performed for a specific customer on a non-recurring basis. A significant characteristic of our SaaS-based business model is our large percentage of subscription-based contracts. Subscription-based revenues accounted for 86% and 85% of total revenues in the six months ended June 30, 2013 and the full year 2012, respectively. Many of our customers who initially purchased a customized project have subsequently purchased one of our subscription-based products. Similarly, many of our subscription-based customers have subsequently purchased additional customized projects.

Historically, we have generated most of our revenues from the sale and delivery of our products to companies and organizations located within the United States. We intend to expand our international revenues by selling our products and deploying our direct sales force model in additional international markets in the future. For the year ended December 31, 2012, our international revenues were \$71.8 million, an increase of \$11.8 million, or 20% over international revenues of \$60.0 million for the year ended December 31, 2011. For the six months ended June 30, 2013, our international revenues were \$40.8 million, an increase of \$6.7 million, or 20% over international revenues of \$34.1 million for the six months ended June 30, 2012. International revenues comprised approximately 29%, 28% and 26% of our total revenues for the six months ended June 30, 2013 and for the fiscal years ended December 31, 2012 and 2011, respectively.

We anticipate that revenues from our U.S. customers will continue to constitute a substantial portion of our revenues in coming periods, but we expect that revenues from customers outside of the U.S. will increase as a percentage of total revenues as we build greater international recognition of our brand and expand our sales operations globally.

Subscription Revenues

We generate a significant portion of our subscription-based revenues from our Media Metrix product suite. Products within the Media Metrix suite include Media Metrix 360, Media Metrix, Plan Metrix, World Metrix, Video Metrix and Ad Metrix. These product offerings provide subscribers with intelligence on digital media usage, audience characteristics, audience demographics and online and offline purchasing behavior. Customers who subscribe to our Media Metrix products are provided with login IDs to our web site, have access to our database and can generate reports anytime.

We also generate subscription-based revenues from certain reports and analyses provided through our customer research products, if that work is procured by customers on a recurring basis. Through our customer research products, we deliver digital marketing intelligence relating to specific industries, such as automotive, consumer packaged goods, entertainment, financial services, media, pharmaceutical, retail, technology, telecommunications and travel. This marketing intelligence leverages our global consumer panel and extensive database to deliver information unique to a particular customer's needs on a recurring schedule, as well as on a continual-access basis. Our Marketing Solutions customer agreements typically include a fixed fee with an initial term of at least one year. We also provide these products on a non-subscription basis as described under "Project Revenues" below.

In addition, we generate subscription-based revenues from survey products that we sell to our customers. In conducting our surveys, we generally use our global Internet user panel. After questionnaires are distributed to the panel members and completed, we compile their responses and then deliver our findings to the customer, who also has ongoing access to the survey response data as they are compiled and updated over time. This data includes responses and information collected from the actual survey questionnaires and can also include behavioral information that we passively collect from our panelists. If a customer has a history of purchasing survey products in each of the last four quarters, we believe this indicates the surveys are being conducted on a recurring basis, and we classify the revenues generated from such survey products as subscription-based revenues. Our contracts for survey services typically include a fixed fee with terms that range from two months to one year.

Our acquisition of Nedstat resulted in additional revenue sources, including software subscriptions, server calls, and professional services (including training and consulting). Our arrangements generally contain multiple elements, consisting of the various service offerings. Our acquisition of AdXpose, resulted in additional revenue sources, including fees for the use of the AdXpose platform. Fees for the use of the AdXpose platform are generally a fixed fee for each impression that is generated using the AdXpose technology. Revenue is recognized on a usage basis when the impression is delivered and reported via the AdXpose service portal.

Table of Contents

Project Revenues

We generate project revenues by providing customized information reports to our customers on a nonrecurring basis through comScore Marketing Solutions. For example, a customer in the media industry might request a custom report that profiles the behavior of the customer's active online users and contrasts their market share and loyalty with similar metrics for a competitor's online user base. If this customer continues to request the report beyond an initial project term of at least nine months and enters into an agreement to purchase the report on a recurring basis, we begin to classify these future revenues as subscription-based.

Software Licenses

We generate subscription revenue through software licenses, professional services (including software customization, implementation, training and consulting services), and maintenance and technical support contracts. We recognize software license arrangements that include significant modification and customization of the software in accordance with FASB Accounting Standards Codification ("ASC") 985-605, Software Recognition, and ASC 605-35, Revenue Recognition-Construction-Type and Certain Production-Type Contracts, using either percentage-of-completion or the completed-contract method. Under the percentage-of-completion method, the Company uses the input method to measure progress, which is based on the ratio of costs incurred to date to total estimated costs at completion. The percentage-of-completion method is used when reliable estimates of progress and completion under the contract can be made. Under the completed-contract method, billings and costs (to the extent they are recoverable) are accumulated on the balance sheet, but no profit or income is recorded before user acceptance of the software license. The completed-contract method is used when reliable estimates cannot be made or other terms under the contract require it. To the extent estimated costs are expected to exceed revenue, the Company accrues for costs immediately.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations are based on our consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these financial statements requires us to make estimates, assumptions and judgments that affect the amounts reported in our consolidated financial statements and the accompanying notes. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. Actual results may differ from these estimates.

Management considers an accounting policy to be critical if it is important to our financial condition and results of operations, and if it requires significant judgment and estimates on the part of management in its application. The development and selection of these critical accounting policies have been determined by our management. Due to the significant judgment involved in selecting certain of the assumptions used in these areas, it is possible that different parties could choose different assumptions and reach different conclusions. Our critical accounting policies relates to: (a) revenue recognition; (b) fair value measurements; (c) business combinations; (d) goodwill and intangible assets; (e) long-lived assets; (f) allowance for doubtful accounts; (g) income taxes; and (h) stock-based compensation.

Our significant accounting policies are described in more detail in the notes to our consolidated financial statements included in Item 1 of this Quarterly Report on Form 10-Q and in Item 8 of our Annual Report on Form 10-K for the year ended December 31, 2012. For a discussion of our critical accounting policies and estimates, see "Critical Accounting Policies and Estimates" included in our Annual Report on Form 10-K for the year ended December 31, 2012 under the caption Management's Discussion and Analysis of Financial Condition and Results of Operations.

Seasonality

Historically, a slightly higher percentage of our customers have renewed their subscription products with us during the fourth quarter than in other quarters.

Table of Contents

Results of Operations

The following table sets forth selected consolidated statements of operations data as a percentage of total revenues for each of the periods indicated.

	Three Months Ended June 30,		Six Months Ended June 30,		
	2013	2012	2013	2012	%
Revenues	100.0	% 100.0	% 100.0	% 100.0

Income tax (provision) benefit	(1.9) (0.3) (2.5) (1.0)
Net income (loss) attributable to common stockholders	(0.6)% (11.0)% (1.7)% (5.9)%

Three and Six Months period ended June 30, 2013 Compared to the Three and Six Months period ended June 30, 2012

Revenues

	Three Months Ended June 30,		Change			Six Months Ended June 30,		Change		
	2013	2012	\$	%		2013	2012	\$	%	
(In thousands)										
Revenues	\$69,911	\$60,291	\$9,620	16.0	%	\$138,759	\$122,566	\$16,193	13.2	%

Total revenues increased by approximately \$9.6 million, or approximately 16.0%, during the three months ended June 30, 2013 as compared to the three months ended June 30, 2012. We attribute the revenue growth to increased sales to our existing customer base coupled with a slight increase in revenue from new customers. Revenue from existing customers increased \$8.8 million from \$53.7 million for the three months ended June 30, 2012 to \$62.5 million for the three months ended June 30, 2013, while revenue from new customers increased \$0.8 million from \$6.6 million for the three months ended June 30, 2012 to \$7.4 million for the three months ended June 30, 2013.

We experienced continued growth in subscription revenues, which increased by approximately \$7.7 million during the three months ended June 30, 2013, from \$51.8 million in the prior year period. We also experienced growth in our project revenues, which increased by approximately \$1.9 million during the three months ended June 30, 2013, from \$8.5 million in the prior year period.

Revenues from U.S. customers were \$49.4 million for the three months ended June 30, 2013, or approximately 71% of total revenues, while revenues from customers outside of the U.S. was \$20.5 million for the three months ended June 30, 2013, or approximately 29% of total revenues. Our focus on organic growth efforts in international markets resulted in a \$2.7 million increase in international revenues during the three months ended June 30, 2013 as compared to the prior year period, comprised primarily of increases of \$1.1 million in Europe, \$0.7 million in Asia, \$0.3 million in Canada and \$0.5 million in Latin America.

Total revenues increased by approximately \$16.2 million, or approximately 13.2%, during the six months ended June 30, 2013 as compared to the six months ended June 30, 2012. We attribute the revenue growth to increased sales to our existing

Table of Contents

customer base coupled with a slight increase in revenue from new customers. Revenue from existing customers increased \$13.4 million from \$109.9 million for the six months ended June 30, 2012 to \$123.3 million for the six months ended June 30, 2013, while revenue from new customers increased \$2.8 million from \$12.7 million for the six months ended June 30, 2012 to \$15.5 million for the six months ended June 30, 2013.

We experienced continued growth in subscription revenues, which increased by approximately \$14.8 million during the six months ended June 30, 2013, from \$104.2 million in the prior year period. We also experienced growth in our project revenues, which increased by approximately \$1.4 million during the six months ended June 30, 2013, from \$18.4 million in the prior year period.

Revenues from U.S customers were \$98.0 million for the six months ended June 30, 2013, or approximately 71% of total revenues, while revenues from customers outside of the U.S. was \$40.8 million for the six months ended June 30, 2013, or approximately 29% of total revenues. Our focus on organic growth efforts in international markets resulted in a \$6.7 million increase in international revenues during the six months ended June 30, 2013 as compared to the prior year period, comprised primarily of increases of \$3.0 million in Europe, \$1.6 million in Asia, \$0.9 million in Canada and \$1.0 million in Latin America.

Operating Expenses

The majority of our operating expenses consist of employee salaries and related benefits, stock compensation expense, professional fees, rent and other facility related costs, depreciation expense, and amortization and impairment of acquired intangible assets. Our single largest operating expense relates to our people. In order to effectively motivate our employees and to provide them with proper long-term incentives, we pay the vast majority of our annual bonus arrangements using our common stock. In addition, three of our most senior executives, including our Chief Executive Officer, have agreed to receive shares of our common stock instead of a cash salary.

Our total operating expenses increased by approximately \$2.7 million, or approximately 4%, during the three months ended June 30, 2013 as compared to the three months ended June 30, 2012. This increase is primarily attributable to increased expenditures for employee salaries, benefits and related costs of \$2.5 million associated with our increased headcount, increased commissions of \$1.9 million associated with our increased level of bookings, increased professional fees of \$1.1 million, an increase of \$0.8 million related to the usage of third-party providers for support related to our data collection efforts and increased stock compensation of \$0.8 million. The increases were partially offset by a net gain related to the settlements of certain patent litigation lawsuits of \$1.2 million, decrease in amortization expense of \$0.4 million and a decrease related to an impairment charge of \$3.3 million that was recorded in 2012.

Our total operating expenses increased by approximately \$9.6 million, or approximately 8%, during the six months ended June 30, 2013 as compared to the six months ended June 30, 2012. This increase is primarily attributable to increased expenditures for employee salaries, benefits and related costs of \$6.8 million associated with our increased headcount, increased commissions of \$2.4 million associated with our increased level of bookings, increased rent and other facility or facility related costs and depreciation expense of \$1.2 million, increased professional fees of \$1.5 million, increased panel recruitment costs of \$0.7 million associated with new panels in the UK and Spain, an increase of \$1.0 million related to the usage of third-party providers for support related to our data collection efforts and increased stock compensation of \$0.7 million. The increases were partially offset by a gain related to the settlements of certain patent litigation lawsuits of \$1.2 million, decrease in amortization expense of \$0.5 million and a decrease related to an impairment charge of \$3.3 million that was recorded in 2012.

Cost of Revenues

	Three Months Ended		Change			Six Months Ended		Change		
	June 30,					June 30,				
	2013	2012	\$	%		2013	2012	\$	%	
	(In thousands)									
Cost of revenues	\$21,610	\$20,371	\$1,239	6.1	%	\$44,164	\$40,772	\$3,392	8.3	%
As a percentage of revenues	30.9	% 33.8	%			31.8	% 33.3	%		

Cost of revenues consists primarily of expenses related to operating our network infrastructure, producing our products, and the recruitment, maintenance and support of our consumer panels. Expenses associated with these areas include the salaries, stock-based compensation, and related personnel expenses of network operations, survey operations, custom analytics and technical support, all of which are expensed as they are incurred. Cost of revenues also includes data collection costs for

Table of Contents

our products, operational costs associated with our data centers, including depreciation expense associated with computer equipment that supports our panel and systems, and allocated overhead, which is comprised of rent and other facilities related costs, and depreciation expense generated by general purpose equipment and software. Cost of revenues increased by approximately \$1.2 million during the three months ended June 30, 2013 compared to the three months ended June 30, 2012. This increase is primarily attributable to an increase of \$0.8 million related to the usage of third-party providers for support related to our data collection efforts and increased rent and other facility or facility related costs and depreciation expense of \$0.3 million.

Cost of revenues increased by approximately \$3.4 million during the six months ended June 30, 2013 compared to the six months ended June 30, 2012. This increase is primarily attributable to an increase of \$1.0 million related to the usage of third-party providers for support related to our data collection efforts, increased expenditures for employee salaries, benefits and related costs of \$0.6 million associated with our increased headcount, increased panel recruitment costs of \$0.7 million associated with new panels in the UK and Spain, increased stock compensation of \$0.3 million and severance costs of \$0.2 million.

Cost of revenues decreased as a percentage of revenues during the three and six months ended June 30, 2013 as compared to the same periods in 2012, due to increased operating leverage.

Selling and Marketing Expenses

	Three Months Ended June 30, 2013				Change		Six Months Ended June 30, 2013				Change	
	2012		\$	%			2012		\$	%		
	(In thousands)											
Selling and marketing	\$25,491	\$22,235	\$3,256	14.6	%	\$49,949	\$43,580	\$6,369	14.6	%		
As a percentage of revenues	36.5	%	36.9	%		36.0	%	35.6	%			

Selling and marketing expenses consist primarily of salaries, benefits, commissions, bonuses, and stock-based compensation paid to our direct sales force and industry analysts, as well as costs related to online and offline advertising, industry conferences, promotional materials, public relations, other sales and marketing programs, and allocated overhead, which is comprised of rent and other facilities related costs, and depreciation expense generated by general purpose equipment and software. All selling and marketing costs are expensed as they are incurred. Commission plans are developed for our account managers with criteria and size of sales quotas that vary depending upon the individual's role. Commissions are expensed as selling and marketing costs when a sales contract is executed by both the customer and us. Selling and marketing expenses have increased because we have been recruiting for additional salespeople in order to support international growth, especially in our DAX and vCE product offerings. Selling and marketing expenses increased by \$3.3 million during the three months ended June 30, 2013 compared to the three months ended June 30, 2012. This increase is primarily attributable to increased commissions of \$1.9 million associated with our increased level of bookings and increases in employee salaries, benefits and related costs of \$1.0 million.

Selling and marketing expenses increased by \$6.4 million during the six months ended June 30, 2013 compared to the six months ended June 30, 2012. This increase is primarily attributable to increased employee salaries, benefits and related costs of \$2.8 million associated with our increased salesforce, increased commissions of \$2.4 million associated with our increased level of bookings and increased stock-based compensation of \$0.8 million.

Selling and marketing expenses remained relatively constant as a percentage of revenues during the three and six months ended June 30, 2013 as compared to the same period in 2012.

Research and Development Expenses

Table of Contents

Research and development expenses include new product development costs, consisting primarily of salaries, benefits, stock-based compensation and related costs for personnel associated with research and development activities, fees paid to third parties to develop new products and allocated overhead, which is comprised of rent and other facilities related costs, and depreciation expense generated by general purpose equipment and software.

Research and development expenses increased \$1.5 million during the three months ended June 30, 2013 compared to the three months ended June 30, 2012. This increase is primarily attributable to increased employee salaries, benefits and related costs of \$1.2 million associated with a reallocation of resources to focus on the development of new products.

Research and development expenses increased \$3.7 million during the six months ended June 30, 2013 compared to the six months ended June 30, 2012. This increase is primarily attributable to increased employee salaries, benefits and related costs of \$2.6 million associated with a reallocation of resources to focus on the development of new products.

Research and development expenses increased slightly as a percentage of revenues for the three and six months ended June 30, 2013 as compared to the same periods in 2012, due to the increase in the allocation of resources to research and development activities.

General and Administrative Expenses

	Three Months Ended June 30,				Change	Six Months Ended June 30,				Change
	2013	2012	\$	%		2013	2012	\$	%	
	(In thousands)									
General and administrative	\$11,238	\$9,725	\$1,513	15.6	%	\$20,250	\$18,831	\$1,419	7.5	%
As a percentage of revenues	16.1	% 16.1	%			14.6	% 15.4	%		

General and administrative expenses consist primarily of salaries, benefits, stock-based compensation, and related expenses for executive management, finance, accounting, human capital, legal and other administrative functions, as well as professional fees, overhead, including allocated overhead, which is comprised of rent and other facilities related costs, and depreciation expense generated by general purpose equipment and software, and expenses incurred for other general corporate purposes.

General and administrative expenses increased by \$1.5 million during the three months ended June 30, 2013 as compared to the three months ended June 30, 2012. This increase is primarily attributable to increased professional fees of \$1.1 million and an increase in employee salaries, benefits and related costs of \$0.3 million.

General and administrative expenses increased by \$1.4 million during the six months ended June 30, 2013 as compared to the six months ended June 30, 2012. This increase is primarily attributable to increased professional fees of \$1.5 million.

General and administrative expenses remained constant as a percentage of revenues during the three months ended June 30, 2013 as compared to the same period in 2012. General and administrative expenses decreased during the six months ended June 30, 2013 as compared to the same period in 2012, due to the accelerated revenue growth and increased operating leverage.

Amortization Expense

	Three Months Ended June 30,				Change	Six Months Ended June 30,				Change
	2013	2012	\$	%		2013	2012	\$	%	
	(In thousands)									
Amortization expense	\$1,936	\$2,302	\$(366)	(15.9))%	\$4,087	\$4,622	\$(535)	(11.6))%
As a percentage of revenues	2.8	% 3.8	%			2.9	% 3.8	%		

Amortization expense consists of charges related to the amortization of intangible assets associated with acquisitions. Amortization expense decreased \$0.4 million and \$0.5 million during the three and six months ended June 30, 2013, respectively, as compared to the three and six months ended June 30, 2012 due principally to the sale of certain intangible assets associated with the ARS Non-Health Copy-Testing and Equity Tracking business.

Table of Contents

Gain on Asset Disposition

During the three months ended March 31, 2013, we completed the sale of certain assets related to our ARS Non-Health Copy-Testing and Equity Tracking business. In connection with the disposition, we will receive total proceeds of \$1.0 million in cash, with \$0.25 million received at closing on March 18, 2013 and \$0.75 million placed in escrow, scheduled to be received in three equal quarterly payments beginning June 30, 2013 and ending on December 31, 2013. The first payment scheduled for June 30, 2013 has been received. In addition, we entered into a license agreement in which we will retain the right to use the necessary intellectual property to continue to provide the ARS Copy-Testing and Equity Tracking services to our Health related customers and recorded an intangible asset of \$1.2 million based on the estimated fair value of the licensed intellectual property. In determining the fair value of the intangible asset, the Company prepared a discounted cash flow ("DCF") analysis using a combination of income approaches including the relief from royalty approach and the excess earnings approach. Determining fair value requires the exercise of significant judgment, including judgments about appropriate discount rates, terminal growth rates, royalty rates and the amount and timing of expected future cash flows. The cash flows employed in the DCF analysis were based on the Company's most recent budgets, forecasts and business plans as well as growth rate assumptions for years beyond the current business plan period. Significant assumptions used include a discount rate of 18.5%, which is based on an assessment of the risk inherent in the future revenue streams and cash flows associated with the health related customers of ARS, as well as a royalty rate of 3.0%, which is based on an analysis of royalty rates in similar, market transactions. This intangible asset will be amortized on a straight-line basis over its estimated useful life of 3 years beginning April 1, 2013. The assets disposed of included computer equipment, furniture and fixtures, intellectual property and the intangible assets associated with the ARSgroup. Due to the fact that we will continue to provide the ARS Copy-Testing and Equity Tracking services to its Health related customers and have therefore not eliminated the operations and cash flows of the ARSgroup, we have concluded that the disposition does not qualify for presentation as discontinued operations. In connection with this transaction we recorded a gain on the disposition of \$0.2 million.

Settlement of Litigation

During the three months ended June 30, 2013, we settled patent litigation lawsuits that we initiated against certain third-parties. In aggregate, the settlement of these lawsuits resulted in the recognition of a net gain of approximately \$1.2 million during the three months ended June 30, 2013.

Interest and Other Income (Expense), Net

Interest and other income/expense, net, consists of interest income, interest expense and gains or losses on disposals of fixed assets.

Interest income consists of interest earned from our cash and cash equivalent balances. Interest expense is incurred due to capital leases pursuant to several equipment loan and security agreements to finance the lease of various hardware and other equipment purchases and our revolving credit facility. Our capital lease obligations are secured by a senior security interest in eligible equipment.

Interest and other income (expense), net for the three and six months ended June 30, 2013 resulted in net expense of \$0.2 million and \$0.3 million, respectively, as compared to \$0.2 million and \$0.4 million of net interest expense for the three and six months ended June 30, 2012, respectively.

Loss From Foreign Currency

The functional currency of our foreign subsidiaries is the local currency. All assets and liabilities are translated at the current exchange rates as of the end of the period, and revenues and expenses are translated at average rates in effect during the period. The gain or loss resulting from the process of translating the foreign currency financial statements into U.S. dollars is included as a component of other comprehensive (loss) income.

We recorded a transaction gain of \$0.1 million and a transaction loss of \$0.2 million during the three and six months ended June 30, 2013, respectively, as compared to transaction losses of \$0.3 million and \$0.6 million during the three and six months ended June 30, 2012, respectively, due to our continued international presence in Europe and Latin America. Our foreign currency transactions are recorded primarily as a result of fluctuations in the exchange rate between the U.S. dollar and the British Pound, Euro, and the functional currencies of our Latin America entities.

Provision for Income Taxes

During the three and six months ended June 30, 2013, we recorded income tax provisions of \$1.3 million and \$3.5 million, respectively, as compared to income tax provisions of \$0.1 million and \$1.2 million during the comparable periods of 2012, respectively. The tax provisions for the three and six months ended June 30, 2013 were attributable to current tax expense

Table of Contents

of \$0.4 million and \$0.8 million, respectively, and deferred tax expense of \$0.9 million and \$2.7 million, respectively. These amounts include \$0.0 million and \$1.0 million of current and deferred tax expense for discrete items such as stock compensation, statutory rate changes and changes in uncertain tax positions recorded during the three and six months ended June 30, 2013, respectively. Also, included in the tax provision for six months ended June 30, 2013 is \$0.1 million of tax expense related to the gain on the sale of certain assets related to our ARS Non-Health Copy-Testing and Equity Tracking business.

The tax provisions for the three and six months ended June 30, 2012 were attributable to current tax benefits of \$7.2 million and \$7.0 million, respectively, and deferred tax expense of \$7.3 million and \$8.2 million, respectively. These amounts included \$2.7 million and \$2.9 million of current and deferred tax expense for discrete items such as stock compensation, statutory rate changes and changes in uncertain tax positions recorded during the three and six months ended June 30, 2012, respectively. Included within these amounts is deferred tax expense of \$2.5 million associated with the write-off of a deferred tax asset related to certain market-based stock awards that will never be realized due to the expiration of the stock awards prior to vesting.

Recent Accounting Pronouncements

Recent accounting pronouncements are detailed in Note 2 to our Consolidated Financial Statements included in Item 1 of this Quarterly Report on Form 10-Q.

Liquidity and Capital Resources

The following table summarizes our cash flows:

	Six Months Ended June 30, 2013		2012
	(In thousands)		
Consolidated Cash Flow Data			
Net cash provided by operating activities	\$36,982		\$24,257
Net cash used in investing activities	(2,155) (3,027)
Net cash used in financing activities	(10,107) (9,243)
Effect of exchange rate changes on cash	(714) 238	
Net increase in cash and cash equivalents	\$24,006		\$12,225

Our principal uses of cash historically have consisted of cash paid for business acquisitions, payroll and other operating expenses and payments related to the investments in equipment primarily to support our consumer panel and technical infrastructure required to support our customer base. As of June 30, 2013, our principal sources of liquidity consisted of \$85.8 million in cash, the majority of which represents cash generated from operating activities. During the six months ended June 30, 2013, we also borrowed approximately \$3.9 million under our revolving credit facility. In addition, we repaid approximately \$2.0 million under our revolving credit facility for the six months ended June 30, 2013. As of June 30, 2013, \$10.2 million of the \$85.8 million in cash on hand is held by foreign subsidiaries that would be subject to tax withholding payments if it is repatriated to the U.S. It is management's current intention that all foreign earnings will be indefinitely reinvested in these foreign countries and will not be repatriated to the U.S. However, if we were to repatriate these funds to the U.S., they would be subject to income tax payments ranging from 5% to 15% of the amount repatriated.

On June 30, 2011, we entered into a secured credit and security agreement (the "Credit Agreement") with Bank of America, N.A. ("Bank of America") for a two-year, \$50.0 million secured revolving credit facility (the "Revolving Credit Facility"). The agreement includes a maximum \$7.0 million sublimit for a euro loan facility and a \$10.0 million sublimit for the issuance of letters of credit. The maturity date of the Revolving Credit Facility has been extended to September 30, 2013. Borrowings under the Revolving Credit Facility shall be used towards working capital and other general corporate purposes as well as for the issuance of letters of credit. Loans made under the Revolving Credit Facility will bear interest at a fluctuating rate based on the London Interbank Offered Rate ("LIBOR") plus an applicable margin, which will range from 1.75% to 2.75%, based on our funded debt ratio. We and each of our material, wholly-owned subsidiaries entered into a Security Agreement in favor of Bank of America (the "Security

Agreement”). Pursuant to the Security Agreement, the obligations under the Revolving Credit Facility are secured by a security interest in substantially all of our assets.

Table of Contents

Under the terms of the Revolving Credit Facility, we are restricted from paying dividends and incurring certain indebtedness, among other restrictive covenants. We continue to be in full compliance with all covenants contained in the Revolving Credit Facility.

As of June 30, 2013 €1.5 million (or approximately \$2.0 million) is outstanding under the terms of our Revolving Credit Facility. We borrowed these funds to pay down certain short-term intercompany loans in order to minimize the potential impact of foreign exchange rate fluctuations. We anticipate repaying this borrowing later in 2013 from cash provided by operating cash flows.

We maintain letters of credit in lieu of security deposits with respect to certain office leases as well as to satisfy performance guarantees under certain contracts. As of June 30, 2013, \$3.6 million in letters of credit were outstanding, leaving \$6.4 million available for additional letters of credit under the Credit Facility. These letters of credit may be reduced periodically provided that we meet the conditional criteria of each related lease agreement.

Operating Activities

Our cash flows from operating activities are significantly influenced by our investments in personnel and infrastructure to support the anticipated growth in our business, increases in the number of customers using our products and the amount and timing of payments made by these customers.

We generated approximately \$37.0 million of net cash from operating activities during the six months ended June 30, 2013. Our cash flows from operations were driven by our net loss of \$2.4 million, offset by \$27.5 million in non-cash items such as depreciation, amortization, provision for bad debts, stock-based compensation, and a non-cash deferred tax benefit. In addition, our operating cash flows were positively impacted by a \$6.2 million decrease in accounts receivable associated with enhanced collection activities, a \$1.6 million increase in deferred rent and by a \$2.9 million increase in accounts payable, accrued expense and other liabilities associated with the timing of payments associated with annual bonuses and professional fees accrued as of December 31, 2012.

We generated approximately \$24.3 million of net cash from operating activities during the six months ended June 30, 2012. Our cash flows from operations were driven by our net loss of \$7.1 million, offset by \$35.7 million in non-cash items such as depreciation, impairment of intangible assets, amortization, provision for bad debts, stock-based compensation, and a non-cash deferred tax benefit. In addition, our operating cash flows were positively impacted by a \$3.7 million net increase in amounts collected from customers in advance of when we recognize revenue due to increases in sales to existing customers and a \$6.5 million decrease in accounts receivable associated with enhanced collection activities. Cash flows from operations were negatively impacted by a \$6.3 million decrease in accounts payable, accrued expense and other liabilities associated with the timing of payments related to annual bonuses paid in the first quarter of the year and professional fees accrued as of December 31, 2011, and an \$8.2 million increase in prepaid expenses and other current assets.

Investing Activities

Our primary regularly recurring investing activities have consisted of purchases of computer network equipment to support our Internet user panel and maintenance of our database, furniture and equipment to support our operations, purchases and sales of marketable securities, and payments related to the acquisition of several companies. As our customer base continues to expand, we expect purchases of technical infrastructure equipment to grow in absolute dollars. The extent of these investments will be affected by our ability to expand relationships with existing customers, grow our customer base, introduce new digital formats and increase our international presence.

We used \$2.2 million of net cash in investing activities during the six months ended June 30, 2013. Our cash used for investing activities was driven by the use of \$2.3 million of net cash associated with the purchase of property and equipment to maintain and expand our technology infrastructure, offset slightly by \$0.2 million in proceeds from the disposition of the ARS Non-Health Copy-Testing and Equity Tracking business.

We used \$3.0 million of net cash in investing activities during the six months ended June 30, 2012, associated with the purchase of property and equipment to maintain and expand our technology infrastructure.

We expect to achieve greater economies of scale and operating leverage as we expand our customer base and utilize our Internet user panel and technical infrastructure more efficiently. While we anticipate that it will be necessary for us to continue to invest in our Internet user panel, technical infrastructure and technical personnel to support the combination of an increased customer base, new products, international expansion and new digital market intelligence

formats, we believe that these investment requirements will be less than the revenue growth generated by these actions. This should result in a lower rate of

Table of Contents

growth in our capital expenditures to support our technical infrastructure. In any given period, the timing of our incremental capital expenditure requirements could impact our cost of revenues, both in absolute dollars and as a percentage of revenues.

Financing Activities

We used \$10.1 million of cash during the six months ended June 30, 2013 for financing activities. This included \$7.0 million for shares we repurchased pursuant to the exercise by stock incentive plan participants of their right to elect to use common stock to satisfy their tax withholding obligations. We also used \$0.5 million to repurchase shares under our share repurchase program. In addition we used \$4.6 million to make payments on our capital lease obligations. During the six months ended June 30, 2013, we received \$3.9 million in cash related to borrowings under our revolving credit facility and we repaid \$2.0 million under our revolving credit facility. We borrowed these funds to pay down certain short-term intercompany loans in order to minimize the potential impact of foreign exchange rate fluctuations. We anticipate repaying this borrowing later in 2013 from cash provided by operating cash flows.

We used \$9.2 million of cash during the six months ended June 30, 2012 for financing activities. This included \$6.0 million for shares we repurchased pursuant to the exercise by stock incentive plan participants of their right to elect to use common stock to satisfy their tax withholding obligations. In addition we used \$3.3 million to make payments on our capital lease obligations offset by \$0.1 million in proceeds from the exercise of our common stock options.

We do not have any special purpose entities and we do not engage in off-balance sheet financing arrangements.

Contractual Obligations and Known Future Cash Requirements

Our principal lease commitments consist of obligations under leases for office space and computer and telecommunications equipment. In prior and current periods, we financed the purchase of some of our computer equipment under capital lease arrangements over a period of either 36 or 42 months. Our purchase obligations relate to outstanding orders to purchase computer equipment, are typically small and they do not materially impact our overall liquidity.

During the three months ended March 31, 2013, we entered into a \$10.0 million lease financing arrangement with Banc of America Leasing & Capital, LLC. The funds the Company has utilized to date under this arrangement have not lowered the amount available for future capital leases, because those amounts have been assigned by Banc of America Leasing & Capital, LLC under separate third-party arrangements. This arrangement has been established to allow us to finance the purchase of new software, hardware and other computer equipment as we expand our technology infrastructure in support of our business growth. As of June 30, 2013, we have total outstanding amounts under this arrangement and other arrangements with Banc of America of approximately \$13.4 million. These leases bear an interest rate of approximately 5% per annum. The base terms for these leases range from three years to three and a half years and include a nominal charge in the event of prepayment. Lease payments under the combined arrangements are approximately \$7.0 million per year as of June 30, 2013. Assets acquired under the equipment lease secure the obligations. In addition to our leasing arrangement with Banc of America, we have also entered into a number of capital lease arrangements with various equipment vendors. As of June 30, 2013, we have total borrowings under these arrangements of \$4.7 million.

As of June 30, 2013, \$3.6 million in letters of credit were outstanding, leaving \$6.4 million available for additional letters of credit under the Credit Facility. These letters of credit may be reduced periodically provided we meet the conditional criteria of each related lease agreement.

As noted in the liquidity and capital resources section, in June 2011, we entered into a \$50.0 million revolving credit agreement with Bank of America, N.A. The revolving credit agreement has been extended to September 30, 2013. As of June 30, 2013 €1.5 million (or approximately \$2.0 million) is outstanding under the terms of our revolving credit facility.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements (as defined in Item 303 of Regulation S-K).

Item 3. Quantitative and Qualitative Disclosure about Market Risk

Market risk represents the risk of loss that may impact our financial position due to adverse changes in financial market prices and rates. We do not hold or issue financial instruments for trading purposes or have any derivative financial instruments. As of June 30, 2013, our cash reserves were maintained primarily in bank deposit accounts

totaling \$85.8 million.

34

Table of Contents

Foreign Currency Risk

A portion of our revenues and expenses from business operations in foreign countries are derived from transactions denominated in currencies other than the functional currency of our operations in those countries. As such, we have exposure to adverse changes in exchange rates associated with revenues and operating expenses of our foreign operations, but we believe this exposure to not be significant at this time. As such, we do not currently engage in any transactions that hedge foreign currency exchange rate risk. In addition, because we have operations outside of the U.S., the reported amounts of revenues, expenses, assets and liabilities may fluctuate due to movements in foreign currency exchange rates and the resulting foreign currency translation adjustments. As we grow our international operations, our exposure to foreign currency risk could become more significant.

Interest Rate Sensitivity

As of June 30, 2013, our principal sources of liquidity consisted of cash and cash equivalents of \$85.8 million. These amounts were invested primarily in bank deposit accounts. The cash and cash equivalents are held for working capital purposes. We do not enter into investments for trading or speculative purposes. We believe that we do not have any material exposure to changes in the fair value as a result of changes in interest rates. Changes in interest rates, however, will change future investment income. If overall interest rates changed by 1% during the six months ended June 30, 2013, our interest exposure would have been less than \$0.1 million, assuming consistent investment levels.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our Chief Executive Officer and our Chief Financial Officer, after evaluating the effectiveness of our disclosure controls and procedures (as defined in Securities Exchange Act of 1934 (the “Exchange Act”) Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this report (the “Evaluation Date”), have concluded that as of the Evaluation Date, our disclosure controls and procedures are effective, in all material respects, to ensure that information required to be disclosed in the reports that we file and submit under the Exchange Act (i) is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission’s rule and forms and (ii) is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during the period covered by this Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, we are involved in various legal proceedings arising from the normal course of business activities. Except as described below, we are not presently a party to any pending legal proceedings the outcome of which we believe, if determined adversely to us, would individually or in the aggregate have a material adverse impact on our consolidated results of operations, cash flows or financial position.

Privacy Class Action Litigation

On August 23, 2011, we received notice that Mike Harris and Jeff Dunstan, individually and on behalf of a class of similarly situated individuals, filed a lawsuit against us in the United States District Court for the Northern District of Illinois, Eastern Division, alleging, among other things, violations by us of the Stored Communications Act, the Electronic Communications Privacy Act, Computer Fraud and Abuse Act and the Illinois Consumer Fraud and Deceptive Practices Act as well as unjust enrichment. The complaint seeks unspecified damages, including statutory damages per violation and punitive damages, injunctive relief and reasonable attorneys' fees of the plaintiffs. In October 2012, the plaintiffs filed an amended complaint which, among other things, removed the claim relating to alleged violations of the Illinois Consumer Fraud and Deceptive Practices Act. On April 2, 2013, the District Court issued an order certifying a class for only three of the four claims, refusing to certify a class for unjust enrichment. Discovery is underway and expected to continue through 2013. Based on examination of the remaining claims, we believe that they are without merit, and we intend to vigorously protect and defend ourselves. There can be no assurance, however, that we will prevail in this matter, and any adverse ruling may have a significant impact on our business and results of operation. In addition, if this matter proceeds to trial, we may incur significant legal fees until this matter is resolved.

ITEM 1A. RISK FACTORS

An investment in our common stock involves a substantial risk of loss. You should carefully consider these risk factors, together with all of the other information included herewith, before you decide to purchase shares of our common stock. The occurrence of any of the following risks could materially adversely affect our business, financial condition or operating results. In that case, the trading price of our common stock could decline, and you may lose part or all of your investment.

Risks Related to Our Business and Our Technologies

We derive a significant portion of our revenues from sales of our subscription-based digital marketing intelligence products. If our customers terminate or fail to renew their subscriptions, our business could suffer.

We currently derive a significant portion of our revenues from our subscription-based digital marketing intelligence products. Subscription-based products accounted for 86% and 85% of our revenues during the six months ended June 30, 2013 and the full year 2012, respectively. Uncertain economic conditions or other factors, such as the failure or consolidation of large financial institutions, may cause certain customers to terminate or reduce their subscriptions. If our customers terminate their subscriptions for our products, do not renew their subscriptions, delay renewals of their subscriptions or renew on terms less favorable to us, our revenues could decline and our business could suffer.

Our customers have no obligation to renew after the expiration of their initial subscription period, which is typically one year, and we cannot be assured that current subscriptions will be renewed at the same or higher dollar amounts, if at all. Some of our customers have elected not to renew their subscription agreements with us in the past. If we experience a change of control, as defined in such agreements, some of our customers also have the right to terminate their subscriptions. Moreover, some of our major customers have the right to cancel their subscription agreements without cause at any time. Given the current unpredictable economic conditions as well as our limited historical data with respect to rates of customer subscription renewals, we may have difficulty accurately predicting future customer renewal rates. Our customer renewal rates may decline or fluctuate as a result of a number of factors, including customer satisfaction or dissatisfaction with our products, the costs or functionality of our products, the prices or functionality of products offered by our competitors, mergers and acquisitions affecting our customer base, general economic conditions or reductions in our customers' spending levels. In this regard, we have seen a number of customers with weaker balance sheets choosing not to renew subscriptions with us during economic downturns.

Table of Contents

Our quarterly results of operations may fluctuate in the future. As a result, we may fail to meet or exceed the expectations of securities analysts or investors, which could cause our stock price to decline.

Our quarterly results of operations may fluctuate as a result of a variety of factors, many of which are outside of our control. If our quarterly revenues or results of operations do not meet or exceed the expectations of securities analysts or investors, the price of our common stock could decline substantially. In addition to the other risk factors set forth in this “Risk Factors” section, factors that may cause fluctuations in our quarterly revenues or results of operations include:

- our ability to increase sales to existing customers and attract new customers;
- our failure to accurately estimate or control costs — including those incurred as a result of acquisitions, investments, other business development initiatives and litigation;
- the timing of contract renewals, delivery of products and duration of contracts and the corresponding timing of revenue recognition as well as the effects of revenue derived from new lines of business and recently-acquired companies;
- the uncertainties associated with the integration of acquired new lines of business, and operations in countries in which we may have little or no previous experience;
- the mix of subscription-based versus project-based revenues;
- changes in our customers’ subscription renewal behaviors and spending on projects;
- our ability to estimate revenues and cash flows associated with new lines of business and business operations acquired by us;
- the impact on our contract renewal rates, for both our subscription and project-based products, caused by our customers’ budgetary constraints, competition, customer dissatisfaction, customer corporate restructuring or change in control, or our customers’ actual or perceived lack of need for our products;
- the potential loss of significant customers;
- the effect of revenues generated from significant one-time projects or the loss of such projects;
- the impact of our decision to discontinue certain products;
- the amount and timing of capital expenditures and operating costs related to the maintenance and expansion of our operations and infrastructure;
- the timing and success of new product introductions by us or our competitors;
- variations in the demand for our products and the implementation cycles of our products by our customers;
- changes in our pricing and discounting policies or those of our competitors;
- service outages, other technical difficulties or security breaches;
- limitations relating to the capacity of our networks, systems and processes;
- maintaining appropriate staffing levels and capabilities relative to projected growth, or retaining key personnel as a result of the integration of recent acquisitions;
- adverse judgments or settlements in legal disputes;
- the cost and timing of organizational restructuring, in particular in international jurisdictions;
- the extent to which certain expenses are more or less deductible for tax purposes, such as share-based compensation that fluctuates based on the timing of vesting and our stock price;
- the timing of any additional reversal of our deferred tax valuation allowance;
- adoption of new accounting pronouncements; and
- general economic, political, industry and market conditions and those conditions specific to Internet usage and online businesses.

We believe that our quarterly revenues and results of operations on a year-over-year and sequential quarter-over-quarter basis may vary significantly in the future and that period-to-period comparisons of our operating results may not be meaningful. Investors are cautioned not to rely on the results of prior quarters as an indication of future performance.

Our business may be harmed if we deliver, or are perceived to deliver, inaccurate information to our customers, to the media or to the public generally.

If the information that we provide to our customers, to the media, or to the public is inaccurate, or perceived to be inaccurate, our brand may be harmed. The information that we collect or that is included in our databases and the

statistical projections that we provide to our customers, to the media or to the public may contain or be perceived to contain inaccuracies. These projections may be viewed as an important measure for the success of certain businesses, especially those businesses

Table of Contents

with a large online presence. Any inaccuracy or perceived inaccuracy in the data reported by us about such businesses may potentially affect the market perception of such businesses and result in claims or litigation around the accuracy of our data, or the appropriateness of our methodology, may encourage aggressive action on the part of our competitors, and could harm our brand. Any dissatisfaction by our customers or the media with our digital marketing intelligence, measurement or data collection and statistical projection methodologies, whether as a result of inaccuracies, perceived inaccuracies, or otherwise, could have an adverse effect on our ability to retain existing customers and attract new customers and could harm our brand. Additionally, we could be contractually required to pay damages, which could be substantial, to certain of our customers if the information we provide to them is found to be inaccurate. Any liability that we incur or any harm to our brand that we suffer because of actual or perceived irregularities or inaccuracies in the data we deliver to our customers could harm our business.

Material defects or errors in our data collection and analysis systems could damage our reputation, result in significant costs to us and impair our ability to sell our products.

Our data collection and analysis systems are complex and may contain material defects or errors. In addition, the large amount of data that we collect may make our data collection and analysis systems more susceptible to defects or errors. The companies that we have acquired also rely on data collection and analysis software and systems to service enterprise customers. Any defect in our panelist data collection software, our census collection systems, our enterprise focused software and systems, network systems, statistical projections or other methodologies could lead to consequences that could adversely impact operating results, including:

- loss of customers;
- damage to our brand;
- lost or delayed market acceptance and sales of our products;
- interruptions in the availability of our products;
- the incurrence of substantial costs to correct any material defect or error;
- sales credits, refunds or liability to our customers;
- diversion of development resources; and
- increased warranty and insurance costs.

We may lose customers or be liable to certain customers if we provide poor service or if our products do not comply with our customer agreements.

Errors in our systems resulting from the large amount of data that we collect, store and manage could cause the information that we collect to be incomplete or to contain inaccuracies that our customers regard as significant. The failure or inability of our systems, networks and processes to adequately handle the data in a high quality and consistent manner could result in the loss of customers. In addition, we may be liable to certain of our customers for damages they may incur resulting from these events, such as loss of business, loss of future revenues, breach of contract or loss of goodwill to their business.

Our insurance policies may not cover any claim against us for loss of data, unauthorized use of data, improper access to data, inaccuracies in data or other indirect or consequential damages and defending a lawsuit, regardless of its merit, could be costly and divert management's attention. Adequate insurance coverage may not be available in the future on acceptable terms, or at all. Any such developments could adversely affect our business and results of operations.

Our business may be harmed if we change our methodologies or the scope of information we collect.

We have in the past and may in the future change our methodologies, the methodologies of companies we acquire, or the scope of information we collect. Such changes may result from identified deficiencies in current methodologies, development of more advanced methodologies, changes in our business plans, changes in technology used by websites, browsers, applications, servers, or media we measure, integration of acquired companies or expressed or perceived needs of our customers or potential customers. Any such changes or perceived changes, or our inability to accurately or adequately communicate to our customers and the media such changes and the potential implications of such changes on the data we have published or will publish in the future, may result in customer dissatisfaction, particularly if certain information is no longer collected or information collected in future periods is not comparable

with information collected in prior periods. For example, in 2009, we adopted new methodology that would integrate server-based web beacon information with our existing panel-based data. In 2009, we also acquired and entered into a strategic alliance with web analytics companies in order to enhance the scope of our server-based web beacon information. As a result of future methodology changes, some of our existing customers or customers of acquired entities may refuse to participate, or participate only in a limited fashion, and other customers may become dissatisfied as a result of changes in our methodology and decide not to continue purchasing their subscriptions or may decide to discontinue providing us with their web beacon or other server-side information. Such customers may elect to

Table of Contents

publicly air their dissatisfaction with the methodological changes made by us, thereby damaging our brand and harming our reputation. Additionally, we expect that we will need to further integrate new capabilities with our existing methodologies if we develop or acquire additional products or lines of business in the future. The resulting future changes to our methodologies, the information we collect, or the strategy we implement to collect and analyze information, such as the movement away from pure panel-centric measurement to a hybrid of panel- and site-centric measurement, may cause additional customer dissatisfaction and result in loss of customers.

If we are not able to maintain panels of sufficient size and scope, or if the costs of maintaining our panels materially increase, our business could be harmed.

We believe that the quality, size and scope of our Internet, mobile and cross-media user panels are critical to our business. There can be no assurance, however, that we will be able to maintain panels of sufficient size and scope to provide the quality of marketing intelligence that our customers demand from our products. If we fail to maintain a panel of sufficient size and scope, including coverage of international markets, customers might decline to purchase our products or renew their subscriptions, our reputation could be damaged and our business could be materially and adversely affected. We expect that our panel costs may increase and may comprise a greater portion of our cost of revenues in the future. The costs associated with maintaining and improving the quality, size and scope of our panel are dependent on many factors, many of which are beyond our control, including the participation rate of potential panel members, the turnover among existing panel members and requirements for active participation of panel members, such as completing survey questionnaires. Concerns over the potential unauthorized disclosure of personal information or the classification of our software as “spyware” or “adware” may cause existing panel members to uninstall our software or may discourage potential panel members from installing our software. To the extent we experience greater turnover, or churn, in our panel than we have historically experienced, these costs would increase more rapidly. We also have terminated and may in the future terminate relationships with service providers whose practices we believe may not comply with our privacy policies, and have removed and may in the future remove panel members obtained through such service providers. Such actions may result in increased costs for recruiting additional panel members. In addition, publishing content on the Internet and purchasing advertising space on Web sites may become more expensive or restrictive in the future, which could decrease the availability and increase the cost of advertising the incentives we offer to panel members. To the extent that such additional expenses are not accompanied by increased revenues, our operating margins may be reduced and our financial results could be adversely affected. Finally, we are currently subject to privacy and data security related claims by certain panel members in a pending class action lawsuit, and we may be so again in the future. The outcome of this litigation or the negative public reaction to the details of the litigation may make it difficult for us to attract and retain panel members.

Difficulties entering into arrangements with website owners, wireless communications operators and other entities supporting server- and census-based methodologies may negatively affect our methodologies and harm our business. We believe that our methodologies are enhanced by the ability to collect information using server-based web beacon information and other census-level approaches. There can be no assurance, however, that we will be able to maintain relationships with a sufficient number and scope of websites in order to provide the quality of marketing intelligence that our customers demand from our products. If we fail to continue to expand the scope of our server-based data collection approaches, customers might decline to purchase our products or renew their subscriptions, our reputation could be damaged and our business could be adversely affected.

Concern over spyware and privacy, including any violations of privacy laws, perceived misuse of personal information, or failure to adhere to the privacy commitments that we make, could cause public relations problems, regulatory scrutiny, and potential class action lawsuits and could impair our ability to recruit panelists or maintain panels of sufficient size and scope, which in turn could adversely affect our ability to provide our products.

Any perception of our practices as an invasion of privacy, whether legal or illegal, may subject us to public criticism, regulatory scrutiny, and potential class action lawsuits. Media coverage and public discourse initiated by lawmakers and regulators have increased the sensitivity of consumers to the collection or use of personal information and online usage information, especially through the use of third party cookies or similar persistent identifiers, and the possibility of an unauthorized use or disclosure of this information may create negative public reaction related to our business practices. A shift in public acceptance of measurement technologies such as third party cookies may have a chilling

effect on businesses that collect or use online usage information generally or substantially increase the cost of maintaining a business that collects or uses online usage information, increase regulatory scrutiny and increase the potential of class action lawsuits. In response to marketplace concerns about the usage of third party cookies and web beacons to track user behaviors, the major browsers have enabled features that allow the user to limit the collection of certain data. We actively seek to prevent the inclusion of our cookies and beacons on the lists of companies whose activities are automatically blocked without prior individual review of those cookies and beacons by the end user; however such automatic browser activity can negatively impact the scope and

Table of Contents

quality of the data that we are able to collect for our research products. Additionally, public concern has grown regarding certain kinds of downloadable software known as “spyware” and “adware.” These concerns might cause users to refrain from downloading software from the Internet, including our proprietary technology, if they inaccurately believe our software is “spyware” or “adware.” This could make it difficult to recruit additional panelists or maintain a panel of sufficient size and scope to provide meaningful marketing intelligence. In response to general spyware and adware concerns in the marketplace, numerous programs are available, many of which are available for free, and that claim to identify, remove or block such software or activity. Some anti-spyware programs have in the past identified, and may in the future identify, our software as spyware or potential spyware applications. We actively seek to prevent the inclusion of our software on lists of spyware applications or potential spyware applications and apply best industry practices for obtaining appropriate consent from panelists, protect the privacy and confidentiality of our panelist data, and comply with existing privacy laws. However, to the extent that we are not successful, and anti-spyware programs classify our software as spyware or a potential spyware application, or third party service providers fail to comply with our privacy or data security requirements, our brand may be harmed and users may refrain from downloading these programs, uninstall our software or pursue actions against us for damages. For example, we are currently named as defendant in a class-action lawsuit filed in the United States District Court for the Northern District of Illinois, Eastern Division, alleging among other things, violations by us of the Stored Communications Act, the Electronic Communications Privacy Act and Computer Fraud and Abuse Act. The complaint seeks unspecified damages, including statutory damages per violation and punitive damages, injunctive relief and reasonable attorneys’ fees of the plaintiffs. Based on our review of these claims, we believe that these claims are without merit, and we intend to vigorously protect and defend ourselves. There can be no assurance, however, that we will prevail in this matter, and any adverse ruling may have a significant impact on our business and results of operation. In addition, if this matter proceeds to trial, we may incur significant legal fees until this matter is resolved. In addition, any resulting reputational harm, potential or actual claims asserted against us or decrease in the size or scope of our panel could reduce the demand for our products, increase the cost of recruiting panelists, adversely affect our ability to provide our products to our customers or result in additional costs in the form of settlement, judgments, restrictions on our business or diversion of resources to address and defend the claims. Any of these adverse effects could harm our business and our operating results.

Domestic or foreign laws, regulations or enforcement actions may limit our ability to collect and use information about Internet users or restrict or prohibit our product offerings, causing a decrease in the value of our products and an adverse impact on the sales of our products.

Our business could be adversely impacted by existing or future laws or regulations of, or actions by, domestic or foreign regulatory agencies. For example, privacy concerns could lead to legislative, judicial and regulatory limitations on our ability to collect, maintain and use information about Internet users in the United States and abroad. Various state legislatures have enacted legislation designed to protect Internet users’ privacy, for example, by prohibiting spyware. In recent years, similar legislation has been proposed in other states and at the federal level and has been enacted in foreign countries, most notably by the European Union, which adopted a privacy directive regulating the collection of personally identifiable information online and more recently, restricting the use of cookies without opt-in consent by the user. Recently, the U.S. Congress and regulators have expressed concern over the collection of Internet usage information, which started as part of a larger initiative to regulate online behavioral advertising, but which has expanded in scope to a general concern over online tracking. A similar concern has been raised by regulatory agencies in Europe. In addition, U.S. and European lawmakers and regulators have expressed concern over the use of third party cookies or web beacons to understand Internet usage. Additionally, the European Commission has issued a new directive requiring the regulation of cookies throughout the European Union, which will likely lead to the introduction of additional regulations that may vary from country to country. Moreover, on July 1, 2013, revised rules by the Federal Trade Commission, relating to children's online privacy, became effective that might have an impact on our business. These laws and regulations, if drafted or interpreted broadly, could be deemed to apply to the technology we use, and could restrict our information collection methods, and the collection methods of third parties from whom we may obtain data, or decrease the amount and utility of the information that we would be permitted to collect. Even if such laws and regulations are not enacted, lawmakers and regulators may publicly call

into question the collection and use of Internet or mobile usage data and may affect vendors and customers' willingness to do business with us. In addition, our ability to conduct business in certain foreign jurisdictions, including China, is restricted by the laws, regulations and agency actions of those jurisdictions. The costs of compliance with, and the other burdens imposed by, these and other laws or regulatory actions may prevent us from selling our products or increase the costs associated with selling our products, and may affect our ability to invest in or jointly develop products in the United States and in foreign jurisdictions.

In addition, failure to comply with these and other laws and regulations may result in, among other things, administrative enforcement actions and fines, class action lawsuits and civil and criminal liability. State attorneys general, governmental and non-governmental entities and private persons may bring legal actions asserting that our methods of collecting, using and distributing Web site visitor information are illegal or improper, which could require us to spend significant time and resources defending these claims. For example, some companies that collect, use and distribute Web site visitor information have been

Table of Contents

the subject of governmental investigations and class-action lawsuits. Any such regulatory or civil action that is brought against us, even if unsuccessful, may distract our management's attention, divert our resources, negatively affect our public image or reputation among our panelists and customers and harm our business.

The impact of any of these current or future laws or regulations could make it more difficult or expensive to attract or maintain panelists, particularly in affected jurisdictions, and could adversely affect our business and results of operations.

Any unauthorized disclosure or theft of private information we gather could harm our business.

Unauthorized disclosure of personally identifiable information regarding Web site visitors, whether through breach of our secure network by an unauthorized party, employee theft or misuse, or otherwise, could harm our business. If there were an inadvertent disclosure of personally identifiable information, or customer confidential information, or if a third party were to gain unauthorized access to the personally identifiable or customer confidential information we possess, our operations could be seriously disrupted and we could be subject to claims or litigation arising from damages suffered by panel members or pursuant to the agreements with our customers. In addition, we could incur significant costs in complying with the multitude of state, federal and foreign laws regarding the unauthorized disclosure of personal information. Finally, any perceived or actual unauthorized disclosure of the information we collect could harm our reputation, substantially impair our ability to attract and retain panelists and have an adverse impact on our business.

The success of our business depends in large part on our ability to protect and enforce our intellectual property rights. We rely on a combination of patent, copyright, service mark, trademark and trade secret laws, as well as confidentiality procedures and contractual restrictions, to establish and protect our proprietary rights, all of which provide only limited protection. In addition, where we determine necessary, we pursue enforcement of our intellectual property rights. Such enforcement action may cause us to incur costs, distract the attention of management, and result in unfavorable public opinion or outcomes that are not in our favor, each of which could adversely affect our brand, business and results of operations. While we have filed a number of patent applications and own approximately 50 issued patents worldwide, we cannot assure you that any additional patents will be issued with respect to any of our pending or future patent applications, nor can we assure you that any patent issued to us will provide adequate protection, or that any patents issued to us will not be challenged, invalidated, circumvented, or held to be unenforceable in actions against alleged infringers. Also, we cannot assure you that any future trademark or service mark registrations will be issued with respect to pending or future applications or that any of our registered trademarks and service marks will be enforceable or provide adequate protection of our proprietary rights. Furthermore, adequate (or any) patent, trademark, service mark, copyright and trade secret protection may not be available in every country in which our services are available.

We endeavor to enter into agreements with our employees and contractors and with parties with whom we do business in order to limit access to and disclosure of our proprietary information. We cannot be certain that the steps we have taken will prevent unauthorized use of our technology or the reverse engineering of our technology. Moreover, third parties might independently develop technologies that are competitive to ours or that infringe upon our intellectual property. In addition, the legal standards relating to the validity, enforceability and scope of protection of intellectual property rights in Internet-related industries are uncertain and still evolving, both in the United States and in other countries. The protection of our intellectual property rights may depend on our legal actions against any infringers being successful. Although, we have been successful in certain actions in the past, we cannot be sure any such actions will be successful, and any such action may be expensive and divert considerable attention of our management team from the normal operation of our business.

An assertion from a third party that we are infringing its intellectual property, whether such assertions are valid or not, could subject us to costly and time-consuming litigation or expensive licenses.

The Internet, mobile media, software and technology industries are characterized by the existence of a large number of patents, copyrights, trademarks and trade secrets and by frequent litigation based on allegations of infringement or other violations of intellectual property rights, domestically or internationally. As we grow and face increasing competition, the probability that one or more third parties will make intellectual property rights claims against us increases. In such cases, our technologies may be found to infringe on the intellectual property rights of others.

Additionally, many of our subscription agreements may require us to indemnify our customers for third-party intellectual property infringement claims, which would increase our costs if we have to defend such claims and may require that we pay damages and provide alternative services if there were an adverse ruling in any such claims. Intellectual property claims could harm our relationships with our customers, deter future customers from subscribing to our products or expose us to litigation, which could be expensive and divert considerable attention of our management team from the normal operation of our business. Even if we are not a party to any litigation between a customer and a third party, an adverse outcome in any such litigation could make it more difficult for us to

Table of Contents

defend against intellectual property claims by the third party in any subsequent litigation in which we are a named party. Any of these results could adversely affect our brand, business and results of operations.

With respect to any intellectual property rights claim against us or our customers, we may have to pay damages or stop using technology found to be in violation of a third party's rights. We may have to seek a license for the technology, which may not be available on reasonable terms or at all, may significantly increase our operating expenses or may significantly restrict our business activities in one or more respects. We may also be required to develop alternative non-infringing technology, which could require significant effort and expense. Any of these outcomes could adversely affect our business and results of operations. Even if we prove successful in defending ourselves against such claims, we may incur substantial expenses and the active defense of such claims may divert considerable attention of our management team from the normal operation of our business.

The market for digital marketing intelligence is developing, and if it does not develop, or develops more slowly than expected, our business will be harmed.

The market for digital marketing intelligence products is still developing, and it is uncertain whether these products will maintain high levels of demand and increased market acceptance. Our success will depend to a substantial extent on the willingness of companies to increase their use of such products and to continue use of such products on a long-term basis. Factors that may affect market acceptance include:

- the reliability of digital marketing intelligence products;
- public concern regarding privacy and data security;
- decisions of our customers and potential customers to develop digital marketing intelligence capabilities internally rather than purchasing such products from third-party suppliers like us;
- decisions by industry associations in the United States or in other countries that result in association-directed awards, on behalf of their members, of digital measurement contracts to one or a limited number of competitive vendors;
- the ability to maintain high levels of customer satisfaction; and
- the rate of growth in eCommerce, online advertising and digital media.

The market for our products may not develop further, or may develop more slowly than we expect or may even contract, all of which could adversely affect our business and operating results.

Because our long-term success depends, in part, on our ability to expand the sales of our products to customers located outside of the United States, our business will become increasingly susceptible to risks associated with international operations.

In recent years, we acquired various businesses with substantial presence or clientele in multiple Latin American, European and Middle Eastern countries. Prior to these acquisitions, we otherwise had limited experience operating in markets outside of the United States. Our inexperience in operating our business outside of the United States may increase the risk that the international expansion efforts in which we are engaged will not be successful. In addition, conducting international operations subjects us to risks that we have not generally faced in the United States. These risks include:

- recruitment and maintenance of a sufficiently large and representative panel both globally and in certain countries;
- expanding the adoption of our server- or census-based web beacon data collection in international countries;
- different customer needs and buying behavior than we are accustomed to in the United States;
- difficulties and expenses associated with tailoring our products to local markets, including their translation into foreign languages;
- difficulties in staffing and managing international operations — including complex and costly hiring, disciplinary, and termination requirements;
- longer accounts receivable payment cycles and difficulties in collecting accounts receivable;
- potentially adverse tax consequences, including the complexities of foreign value-added taxes and restrictions on the repatriation of earnings;
- reduced or varied protection for intellectual property rights in some countries;
- the burdens of complying with a wide variety of foreign laws and regulations;
- fluctuations in currency exchange rates;
- increased accounting and reporting burdens and complexities; and

political, social and economic instability abroad, terrorist attacks and security concerns.

Table of Contents

Additionally, operating in international markets requires significant management attention and financial resources. We cannot be certain that the investments and additional resources required to establish and maintain operations in other countries will hold their value or produce desired levels of revenues or profitability. We cannot be certain that we will be able to maintain and increase the size of the Internet user panel that we currently have in various countries, that we will be able to recruit a representative sample for our audience measurement products, or that we will be able to enter into arrangements with a sufficient number of website owners to allow us to collect server-based information for inclusion in our digital marketing intelligence products. In addition, there can be no assurance that Internet usage and eCommerce will continue to grow in international markets. In addition, governmental authorities in various countries have different views regarding regulatory oversight of the Internet. For example, the Chinese government has taken steps in the past to restrict the content available to Internet users in China.

The impact of any one or more of these risks could negatively affect or delay our plans to expand our international business and, consequently, our future operating results.

If the Internet advertising and eCommerce markets develop more slowly than we expect, our business will suffer. Our future success will depend on continued growth in the use of the Internet, including mobile Internet, as an advertising medium, a continued increase in eCommerce spending and the proliferation of the Internet as a platform for a wide variety of consumer activities. These markets are evolving rapidly, and it is not certain that their current growth trends will continue.

The adoption of Internet advertising, particularly by advertisers that have historically relied on traditional offline media, requires the acceptance of new approaches to conducting business and a willingness to invest in such new approaches in light of a difficult economic environment. Advertisers may perceive Internet advertising to be less effective than traditional advertising for marketing their products. They may also be unwilling to pay premium rates for online advertising that is targeted at specific segments of users based on their demographic profile or Internet behavior. The online advertising and eCommerce markets may also be adversely affected by privacy issues relating to such targeted advertising, including that which makes use of personalized information, or online behavioral information. Furthermore, online merchants may not be able to establish online commerce models that are cost effective and may not learn how to effectively compete with other Web sites or offline merchants. In addition, consumers may not continue to shift their spending on goods and services from offline outlets to the Internet. As a result, growth in the use of the Internet for eCommerce may not continue at a rapid rate, or the Internet may not be adopted as a medium of commerce by a broad base of customers or companies worldwide. Moreover, the adoption of advertising through mobile media may slow as a result of uncertain economic conditions or other factors. Because of the foregoing factors, among others, the market for Internet advertising and eCommerce, including commerce through mobile media, may not continue to grow at significant rates. If these markets do not continue to develop, or if they develop more slowly than expected, our business may suffer.

Our growth depends upon our ability to retain existing large customers and add new large customers; however, to the extent we are not successful in doing so, our ability to maintain profitability and positive cash flow may be impaired. Our success depends in part on our ability to sell our products to large customers and on the renewal of the subscriptions of those customers in subsequent years. For the six months ended June 30, 2013 and the years ended December 31, 2012 and 2011, we derived approximately 23%, 22% and 26%, respectively, of our total revenues from our top 10 customers. Uncertain economic conditions or other factors, such as the failure or consolidation of large customer companies, or internal reorganization or changes in focus, may cause certain large customers to terminate or reduce their subscriptions. Moreover, certain recently acquired companies have revenues highly concentrated in a few large customers. The loss of any one or more of those customers could decrease our revenues and harm our current and future operating results. The addition of new large customers or increases in sales to existing large customers may require particularly long implementation periods and other significant upfront costs, which may adversely affect our profitability. To compete effectively, we have in the past been, and may in the future be, forced to offer significant discounts to maintain existing customers or acquire other large customers. In addition, we may be forced to reduce or withdraw from our relationships with certain existing customers or refrain from acquiring certain new customers in order to acquire or maintain relationships with important large customers. As a result, new large customers or increased usage of our products by large customers may cause our profits to decline and our ability to sell our

products to other customers could be adversely affected.

We derive a significant portion of our revenues from a single customer, Microsoft Corporation. For the six months ended June 30, 2013 and the years ended December 31, 2012 and 2011, we derived approximately 8%, 8% and 10%, respectively, of our total revenues from Microsoft. If Microsoft were to cease or substantially reduce its use of our products, our revenues and earnings might decline.

Table of Contents

As our international operations grow, changes in foreign currencies could have an increased effect on our operating results.

A portion of our revenues and expenses from business operations in foreign countries are derived from transactions denominated in currencies other than the functional currency of our operations in those countries. As such, we have exposure to adverse changes in exchange rates associated with revenues and operating expenses of our foreign operations, but we do not currently enter into any hedging instruments that hedge foreign currency exchange rate risk. As we grow our international operations, and acquire companies with established business in international regions, our exposure to foreign currency risk could become more significant. During the six months ended June 30, 2013, the average U.S. Dollar to euro exchange rate was approximately \$1.0 to €0.76. There can be no guarantee that exchange rates will remain constant over the long-term.

We may expand through investments in, acquisitions of, or the development of new products with assistance from other companies, any of which may not be successful and may divert our management's attention.

In recent years, we acquired M:Metrics, the Certifica group of companies located in Latin America, ARSgroup, Nexius, Nedstat and AdXpose. We also expect to continue to evaluate and enter into discussions regarding a wide array of potential strategic transactions, including acquiring complementary products, technologies or businesses. We also may enter into relationships with other businesses in order to expand our product offerings, which could involve preferred or exclusive licenses, discount pricing or investments in other businesses, or to expand our sales capabilities. These transactions could be material to our financial condition and results of operations. Although these transactions may provide additional benefits, they may not be profitable immediately or in the long term. Negotiating any such transactions could be time-consuming, difficult and expensive, and our ability to close these transactions may be subject to regulatory or other approvals and other conditions that are beyond our control. Consequently, we can make no assurances that any such transactions, if undertaken and announced, would be completed.

An acquisition, investment or business relationship may result in unforeseen operating difficulties and expenditures. In particular, we may encounter difficulties assimilating or integrating the businesses, technologies, products, personnel or operations of the acquired companies, particularly if the key personnel of the acquired company choose not to be employed by us, and we may have difficulty retaining the customers of any acquired business due to changes in management and ownership. Acquisitions may also disrupt our ongoing business, divert our resources and require significant management attention that would otherwise be available for ongoing development of our business. Moreover, we cannot assure you that the anticipated benefits of any acquisition, investment or business relationship would be realized or that we would not be exposed to unknown liabilities. In connection with any such transaction, we may:

- encounter difficulties retaining key employees of the acquired company or integrating diverse business cultures;
- issue additional equity securities that would dilute the common stock held by existing stockholders;
- incur large charges or substantial liabilities, including without limitation, liabilities associated with products or technologies accused or found to infringe third party intellectual property;
- become subject to adverse tax consequences, substantial depreciation or deferred compensation charges;
- use cash that we may need in the future to operate our business;
- enter new geographic markets that subject us to different laws and regulations that may have an adverse impact on our business;
- experience difficulties effectively utilizing acquired assets;
- encounter difficulties integrating the information and financial reporting systems of acquired foreign businesses, particularly those that operated under accounting principles other than those generally accepted in the United States prior to the acquisition by us; and
- incur debt on terms unfavorable to us or that we are unable to repay.

The impact of any one or more of these factors could adversely affect our business or results of operations or cause the price of our common stock to decline substantially.

Following an acquisition of another business, we may also be required to defer the recognition of revenue that we receive from the sale of products that we acquired, or from the sale of bundles products that include products that we acquired. For instance, if we acquire a software company and are not able to establish vendor specific objective

evidence, or VSOE, for any undelivered elements in the arrangement, we may be required to defer substantial portions of revenue. If we are unable to establish VSOE for transactions related to acquired products and services in future periods, we may be required to delay the recognition of current and future revenue sources. This may result in fluctuations in our operating results and may adversely affect both revenues and operating margins in a given period or periods.

Future acquisitions or dispositions could also result in dilutive issuances of our equity securities, the incurrence of debt, contingent liabilities, amortization expenses, or write-offs of goodwill, any of which could harm our financial condition. In

Table of Contents

addition, acquisitions will generally result in us recognizing significant amounts of intangible assets. If we experience significant declines in operating results associated with past, or future, acquisitions, and the anticipated benefits of an acquisition is not expected to materialize, we may be required to perform impairment testing of our long-lived assets, and ultimately may be required to record an impairment charge. For example, we recorded an impairment charge of \$3.3 million during the year ended December 31, 2012 relating to value of intangible assets associated with the 2010 acquisition of ARS.

Conditions and changes in the national and global economic environment may adversely affect our business and financial results.

Adverse economic conditions in markets in which we operate can harm our business. If the economies of the United States and other countries continue to experience prolonged uncertainty, customers may delay or reduce their purchases of digital marketing intelligence products and services. In recent years, economic conditions in the countries in which we operate and sell products have been negative, and global financial markets have experienced significant volatility stemming from a multitude of factors, including adverse credit conditions impacted by concerns about the credit worthiness of U.S. treasury securities, slower economic activity, inflation and deflation, decreased consumer confidence, increased unemployment, reduced corporate profits and capital spending, adverse business conditions, liquidity and other factors. Notwithstanding certain signs of economic recovery in recent periods, economic growth slowed in the middle of 2012 and may continue to be slow through the remainder of 2013 in the U.S. and internationally, particularly in view of recent economic turmoil in Europe, increasing energy costs, Federal government budget uncertainties in the United States anticipated and increased concerns about economic slowdown in Asia, particularly in China. During challenging economic times, and in tight credit markets, many customers have and may continue to delay or reduce spending. Additionally, some of our customers may be unable to fully pay for purchases or may discontinue their businesses, resulting in the incurrence of uncollectible receivables for us. This could result in reductions in our sales, longer sales cycles, difficulties in collection of accounts receivable, slower adoption of new technologies and increased price competition. This downturn may also impact our available resources for financing new and existing operations. If global economic and market conditions, or economic conditions in the United States or other key markets further deteriorate, we may experience a material and adverse impact on our business, results of operations and financial condition.

Changes and instability in the national and global political environments may adversely affect our business and financial results.

Recent turmoil in the political environment in many parts of the world, such as the Middle East, including terrorist activities, military actions, political unrest and increases in energy costs due to instability in oil-producing regions may continue to put pressure on global economic conditions. If global economic and market conditions, or economic conditions in the United States or other key markets further deteriorate, we may experience material impacts on our business, operating results, and financial condition.

If we fail to respond to technological developments, our products may become obsolete or less competitive.

Our future success will depend in part on our ability to modify or enhance our products to meet customer needs, to add functionality and to address technological advancements. For example, if certain handheld devices become the primary mode

of receiving content and conducting transactions on the Internet, and we are unable to adapt to collect information from such devices, then we would not be able to report on online activity. To remain competitive, we will need to develop new products that address these evolving technologies and standards across the universe of digital media — including television, Internet and mobile usage. However, we may be unsuccessful in identifying new product opportunities or in developing or marketing new products in a timely or cost-effective manner. In addition, our product innovations may not achieve the market penetration or price levels necessary for profitability. If we are unable to develop enhancements to, and new features for, our existing methodologies or products or if we are unable to develop new products that keep pace with rapid technological developments or changing industry standards, our products may become obsolete, less marketable and less competitive, and our business will be harmed.

The market for digital marketing intelligence is highly competitive, and if we cannot compete effectively, our revenues will decline and our business will be harmed.

The market for digital marketing intelligence is highly competitive and is evolving rapidly. We compete primarily with providers of digital media intelligence and related analytical products and services. We also compete with providers of marketing services and solutions, with full-service survey providers and with internal solutions developed by customers and potential customers. Our principal competitors include: large and small companies that provide data and analysis of consumers' online behavior, including Effective Measures, Gemius, Compete Inc. (owned by WPP), Google, Inc., Hitwise (owned by Experian), Quantcast, Visible Measures and Nielsen;

Table of Contents

online advertising companies that provide measurement of online ad effectiveness, including DoubleClick (owned by Google), Kantar (owned by WPP), ValueClick and WPP;

companies that provide audience ratings for TV, radio and other media that have extended or may extend their current services, particularly in certain international markets, to the measurement of digital media, including Arbitron, Nielsen and Taylor Nelson Sofres (owned by WPP);

analytical services companies that provide customers with detailed information of behavior on their own Web sites, including Omniture (owned by Adobe), Coremetrics (owned by IBM), and WebTrends;

full-service market research firms and survey providers that may measure online behavior and attitudes, including Harris Interactive, Ipsos, Synnovate, GFK, Kantar (owned by WPP) and Nielsen;

companies that provide behavioral, attitudinal and qualitative advertising effectiveness, including Toluna/Nurago, Click Forensics, Datran's Aperture, Ipsos OTX, Dynamic Logic, Insight Express and Marketing Evolution; and

specialty information providers for certain industries that we serve, including IMS Health (healthcare) and Techtronix (telecommunications).

Some of our current competitors have longer operating histories, access to larger customer bases and substantially greater resources than we do. As a result, these competitors may be able to devote greater resources to marketing and promotional campaigns, panel retention, panel development or development of systems and technologies than we can. In addition, some of our competitors may adopt more aggressive pricing policies or have started to provide some services at no cost. Furthermore, our competitors may merge with each other, or large software companies, Internet portals and database management companies may enter our market or enhance their current offerings, either by developing competing services, or by acquiring or entering into strategic alliances with our competitors, and could leverage their significant resources and pre-existing relationships with our current and potential customers.

If we are unable to compete successfully against our current and future competitors, we may not be able to retain and acquire customers, and we may consequently experience a decline in revenues, reduced operating margins, loss of market share and diminished value from our products.

We may encounter difficulties managing our growth and costs, which could adversely affect our results of operations. We have experienced significant growth over the past several years in the U.S. and internationally. We have substantially expanded our overall business, customer base, headcount, data collection and processing infrastructure and operating procedures as our business has grown through both organic growth and acquisitions. We increased our total number of full time employees to 1,092 employees as of June 30, 2013 from 588 employees as of December 31, 2008. As a result of downward adjustments to compensation and reductions in our workforce made in recent periods, however, we may encounter decreased employee morale and increased employee turnover. Moreover, as a result of acquisition integration initiatives, we may reduce the workforce of an acquired company or reassign personnel. Such actions may expose us to disruption by dissatisfied employees or employee-related claims, including without limitation, claims by terminated employees that believe they are owed more compensation than we believe these employees are due under our compensation and benefit plans, or claims maintained internationally in jurisdictions whose laws and procedures differ from those in the United States. In addition, during this same period, we made substantial investments in our network infrastructure operations as a result of our growth and the growth of our panel, and we have also undertaken certain strategic acquisitions.

We believe that we will need to continue to effectively manage and expand our organization, operations and facilities in order to accommodate potential future growth or acquisitions and to successfully integrate acquired businesses. If we continue to grow, either organically or through acquired businesses, our current systems and facilities may not be adequate. Our need to effectively manage our operations and cost structure requires that we continue to assess and improve our operational, financial and management controls, reporting systems and procedures. For example, we may be required to enter into leases for additional facilities or commit to significant investments in the build out of current or new facilities to support our growth. If we are unable to effectively forecast our facilities needs or if we are unable to sublease or terminate leases for unused space, we may experience increased unexpected costs. If we are not able to efficiently and effectively manage our cost structure or are unable to find appropriate space to support our needs, our business may be impaired.

Failure to effectively expand our sales and marketing capabilities could harm our ability to increase our customer base and achieve broader market acceptance of our products.

Increasing our customer base and achieving broader market acceptance of our products will depend to a significant extent on our ability to expand our sales and marketing operations. We expect to continue to rely on our direct sales force to obtain new customers. We may expand or enhance our direct sales force both domestically and internationally. We believe that there is significant competition for direct sales personnel with the sales skills and technical knowledge that we require. Our ability to

Table of Contents

achieve significant growth in revenues in the future will depend, in large part, on our success in recruiting, training and retaining sufficient numbers of direct sales personnel, and our ability to cross train our existing sales force with the sales forces of acquired businesses so that the sales personnel have the necessary information and ability to sell or develop sales prospects for both our products and the products of recently-acquired companies. In general, new hires require significant training and substantial experience before becoming productive. Our recent hires and planned hires may not become as productive as we require, and we may be unable to hire or retain sufficient numbers of qualified individuals in the future in the markets where we currently operate or where we seek to conduct business. Our business will be seriously harmed if the efforts to expand our sales and marketing capabilities are not successful or if they do not generate a sufficient increase in revenues.

If we fail to develop our brand, our business may suffer.

We believe that building and maintaining awareness of comScore and our portfolio of products in a cost-effective manner is critical to achieving widespread acceptance of our current and future products and is an important element in attracting new customers. We will also need to carefully manage the brands used by recently acquired businesses as we integrate such businesses into our own. We rely on our relationships with the media and the exposure we receive from numerous citations of our data by media outlets to build brand awareness and credibility among our customers and the marketplace. Furthermore, we believe that brand recognition will become more important for us as competition in our market increases. Our brand's success will depend on the effectiveness of our marketing efforts and on our ability to provide reliable and valuable products to our customers at competitive prices. Our brand marketing activities may not yield increased revenues, and even if they do, any increased revenues may not offset the expenses we incur in attempting to build our brand. If we fail to successfully market our brand, we may fail to attract new customers, retain existing customers or attract media coverage to the extent necessary to realize a sufficient return on our brand-building efforts, and our business and results of operations could suffer.

We have a history of significant net losses, may incur significant net losses in the future and may not maintain profitability.

Although we have generated profits in prior periods, we incurred a net loss of \$11.8 million for the year ended December 31, 2012. As such we cannot assure you that we will be able to achieve, sustain or increase profitability in the future, particularly if we engage in additional acquisition activity as we did in 2011 and 2010. For the six months ended June 30, 2013, we incurred a net loss of \$2.4 million. As of June 30, 2013, we had an accumulated deficit of \$83.3 million. Because a large portion of our costs are fixed, we may not be able to reduce or maintain our expenses in response to any decrease in our revenues, which would adversely affect our operating results. In addition, we expect operating expenses to increase as we implement certain growth initiatives, which include, among other things, the development of new products, expansion of our infrastructure, plans for international expansion and general and administrative expenses associated with being a public company. If our revenues do not increase to offset these expected increases in costs and operating expenses, our operating results would be materially and adversely affected. If we continue to incur significant net losses, we may not be able to realize certain deferred tax assets associated with our net operating loss carryforwards. As of June 30, 2013, we estimate our federal and state net operating loss carryforwards for tax purposes are approximately \$38.5 million and \$35.9 million, respectively. You should not consider our revenue growth in recent periods as indicative of our future performance, as our operating results for future periods are subject to numerous uncertainties.

We have limited experience with respect to our pricing model, and if the fees we charge for our products are unacceptable to our customers, our revenues and operating results will be harmed.

We have limited experience in determining the fees that our existing and potential customers will find acceptable for our products, the products of companies that we recently acquired, and any potential products that are developed as a result of the

integration of our company with acquired companies. The majority of our customers purchase specifically tailored subscription packages that are priced in the aggregate. Due to the level of customization of such subscription packages, the pricing of contracts or individual product components of such packages may not be readily comparable across customers or periods. Existing and potential customers may have difficulty assessing the value of our products and services when comparing it to competing products and services. As the market for our products matures, or as

new competitors introduce new products or services that compete with ours, we may be unable to renew our agreements with existing customers or attract new customers with the fees we have historically charged. As a result, it is possible that future competitive dynamics in our market as well as global economic pressures may require us to reduce our fees, which could have an adverse effect on our revenues, profitability and operating results.

Table of Contents

We cannot assure you that our stock repurchase program will actually result in repurchases of our common stock or enhance long-term stockholder value, and repurchases, if any, could affect our stock price and increase its volatility and will diminish our cash reserves.

On May 30, 2013, our board of directors approved a program authorizing the repurchase of up to \$50 million of shares of our common stock until May 29, 2014. Under the program, we are authorized to repurchase shares of our common stock in open market transactions or pursuant to any trading plan that may be adopted in accordance with Rule 10b5-1 of the Securities Exchange Act of 1934, as amended. The timing and actual number of shares repurchased, if any, will depend on a variety of factors, including the price and availability of our shares, trading volume and general market conditions.

Repurchases pursuant our stock repurchase program could affect our stock price and increase its volatility and will reduce the market liquidity for our stock. Additionally, repurchases under stock repurchase program will diminish our cash reserves, which could impact our ability to pursue possible future strategic opportunities and acquisitions and would result in lower overall returns on our cash balances. There can be no assurance that any stock repurchases will, in fact, occur, or, if they occur, that they will enhance stockholder value because the market price of our common stock may decline below the levels at which we repurchased shares of stock. Although our stock repurchase program is intended to enhance long-term stockholder value, short-term stock price fluctuations could reduce the effectiveness of these repurchases.

If we are unable to sell additional products to our existing customers or attract new customers, our revenue growth will be adversely affected.

To increase our revenues, we believe we must sell additional products to existing customers, including existing customers of acquired businesses, and regularly add new customers. If our existing and prospective customers do not perceive our products to be of sufficient value and quality, we may not be able to increase sales to existing customers and attract new customers, or we may have difficulty retaining existing customers, and our operating results will be adversely affected.

We depend on third parties for data that is critical to our business, and our business could suffer if we cannot continue to obtain data from these suppliers.

We rely on third-party data sources for information regarding certain digital activities such as television viewing and mobile usage, as well as for information about offline activities of and demographic information regarding our panelists. The availability and accuracy of these data is important to the continuation and development of our cross-media products, products that use server- or census-based information as part of the research methodology, and products that link online and offline activity. If this information is not available to us at commercially reasonable terms, or is found to be inaccurate, it could harm our reputation, business and financial performance.

System failures or delays in the operation of our computer and communications systems may harm our business. Our success depends on the efficient and uninterrupted operation of our computer and communications systems and the third-party data centers we use. Our ability to collect and report accurate data may be interrupted by a number of factors, including our inability to access the Internet, the failure of our network or software systems, computer viruses, security breaches or variability in user traffic on customer Web sites. A failure of our network or data gathering procedures could impede the processing of data, cause the corruption or loss of data or prevent the timely delivery of our products.

In the future, we may need to expand our network and systems at a more rapid pace than we have in the past. Our network or systems may not be capable of meeting the demand for increased capacity, or we may incur additional unanticipated expenses to accommodate these capacity demands. In addition, we may lose valuable data, be unable to obtain or provide data on a timely basis or our network may temporarily shut down if we fail to adequately expand or maintain our network capabilities to meet future requirements. Any lapse in our ability to collect or transmit data may decrease the value of our products and prevent us from providing the data requested by our customers. Any disruption in our network processing or loss of Internet user data may damage our reputation and result in the loss of customers, and our business and results of operations could be adversely affected.

We rely on a small number of third-party service providers to host and deliver our products, and any interruptions or delays in services from these third parties could impair the delivery of our products and harm our business.

We host our products and serve all of our customers from data center facilities located throughout the United States and Europe. While we operate our equipment inside these facilities, we do not control the operation of these facilities, and, depending on service level requirements, we may not continue to operate or maintain redundant data center facilities for all of our products or for all of our data, which could increase our vulnerability. These facilities are vulnerable to damage or interruption from earthquakes, hurricanes, floods, fires, power loss, telecommunications failures and similar events. They are

Table of Contents

also subject to break-ins, computer viruses, sabotage, intentional acts of vandalism and other misconduct. A natural disaster or an act of terrorism, a decision to close the facilities without adequate notice or other unanticipated problems could result in lengthy interruptions in availability of our products. We may also encounter capacity limitations at our third-party data centers. Additionally, our data center facility agreements are of limited durations, and our data center facilities have no obligation to renew their agreements with us on commercially reasonable terms, if at all. Our agreements for our various data center facilities expire at various dates through March 2018. We believe that we have good relationships with our data center facility vendors and believe that we will be able to renew, or find alternative data center facilities, at commercially reasonable terms. Although we are not substantially dependent on our data center facilities because of planned redundancies, and although we currently are able to migrate to alternative data centers, such a migration may result in an interruption or delay in service. If we are unable to renew our agreements with the owners of the facilities on commercially reasonable terms, or if we migrate to a new data center, we may experience delays in delivering our products until an agreement with another data center facility can be arranged or the migration to a new facility is completed.

We currently leverage a large content delivery network, or CDN, to provide services that allow us to offer a more efficient tagging methodology for our Media Metrix 360 product offerings. If that service faced unplanned outage or the service became immediately unavailable, an alternate CDN provider or additional capacity in our data centers would need to be established to support the large volume of tag requests that we currently manage which would either require additional investments in equipment and facilities or a transition plan. This could unexpectedly raise the costs and could contribute to delays or losses in tag data that could affect the quality and reputation of our Media Metrix 360 data products.

Further, we depend on access to the Internet through third-party bandwidth providers to operate our business. If we lose the services of one or more of our bandwidth providers for any reason, we could experience disruption in the delivery of our products or be required to retain the services of a replacement bandwidth provider. It may be difficult for us to replace any lost bandwidth on commercially reasonable terms, or at all, due to the large amount of bandwidth our operations require.

Our operations also rely heavily on the availability of electrical power and cooling capacity, which are also supplied by third-party providers. If we or the third-party data center operators that we use to deliver our products were to experience a major power outage or if the cost of electrical power increases significantly, our operations and profitability would be harmed. If we or the third-party data centers that we use were to experience a major power outage, we would have to rely on back-up generators, which may not function properly, and their supply may be inadequate. Such a power outage could result in the disruption of our business. Additionally, if our current facilities fail to have sufficient cooling capacity or availability of electrical power, we would need to find alternative facilities. Any errors, defects, disruptions or other performance problems with our products caused by third parties could harm our reputation and may damage our business. Interruptions in the availability of our products may reduce our revenues due to increased turnaround time to complete projects, cause us to issue credits to customers, cause customers to terminate their subscription and project agreements or adversely affect our renewal rates. Our business would be harmed if our customers or potential customers believe our products are unreliable.

Laws related to the regulation of the Internet could adversely affect our business.

Laws and regulations that apply to communications and commerce over the Internet are becoming more prevalent. In particular, the growth and development of the market for eCommerce has prompted calls for more stringent tax, consumer protection and privacy laws in the United States and abroad that may impose additional burdens on companies conducting business online. The adoption, modification or interpretation of laws or regulations relating to the Internet or our customers' digital operations could negatively affect the businesses of our customers and reduce their demand for our products. Even if such laws and regulations are not enacted, lawmakers and regulators may publicly call into question the collection and use of Internet or mobile usage data and may affect vendors and customers' willingness to do business with us.

Taxing authorities may successfully assert that we should have collected or in the future should collect sales and use, value added or similar taxes, and we could be subject to liability with respect to past or future sales, which could adversely affect our results of operations.

We do not collect sales and use, value added and similar taxes in all jurisdictions in which we have sales. Sales and use, value added and similar tax laws and rates vary greatly by jurisdiction. Certain jurisdictions in which we do not collect such taxes may assert that such taxes are applicable, which could result in tax assessments, penalties and interest, and we may be required to collect such taxes in the future. Such tax assessments, penalties and interest or future requirements may adversely affect the results of our operations.

Table of Contents

If we fail to respond to evolving industry standards, our products may become obsolete or less competitive. The market for our products is characterized by rapid technological advances, changes in customer requirements, changes in protocols and evolving industry standards. For example, industry associations such as the Advertising Research Foundation, the Council of American Survey Research Organizations, the Internet Advertising Bureau, or IAB, and the Media Rating Council have independently initiated efforts to either review online market research methodologies or to develop minimum standards for online market research. In April 2011, comScore Direct was accredited by the Media Rating Council. Any standards adopted by U.S or internationally based industry associations may lead to costly changes to our procedures and methodologies. As a result, the cost of developing our digital marketing intelligence products could increase. If we do not adhere to standards prescribed by the IAB or other industry associations, our customers could choose to purchase products from competing companies that meet such standards. Furthermore, industry associations based in countries outside of the United States often endorse certain vendors or methodologies. If our methodologies fail to receive an endorsement from an important industry association located in a foreign country, advertising agencies, media companies and advertisers in that country may not purchase our products. As a result, our efforts to further expand internationally could be adversely affected.

The success of our business depends on the continued growth of the Internet as a medium for commerce, content, advertising and communications.

Expansion in the sales of our products depends on the continued acceptance of the Internet as a platform for commerce, content, advertising and communications. The use of the Internet as a medium for commerce, content, advertising and communications could be adversely impacted by delays in the development or adoption of new standards and protocols to handle increased demands of Internet activity, security, reliability, cost, ease-of-use, accessibility and quality-of-service. The performance of the Internet and its acceptance as a medium for commerce, content, advertising and communications has been harmed by viruses, worms, and similar malicious programs, and the Internet has experienced a variety of outages and other delays as a result of damage to portions of its infrastructure. If for any reason the Internet does not remain a medium for widespread commerce, content, advertising and communications, the demand for our products would be significantly reduced, which would harm our business.

We rely on our management team and may need additional personnel to grow our business; the loss of one or more key employees or the inability to attract and retain qualified personnel could harm our business.

Our success and future growth depends to a significant degree on the skills and continued services of our management team, including our founders, Magid M. Abraham, Ph.D. and Gian M. Fulgoni. Our future success also depends on our ability to retain, attract and motivate highly skilled technical, managerial, marketing and customer service personnel, including members of our management team. All of our employees work for us on an at-will basis. We plan to hire additional personnel in all areas of our business, particularly for our sales, marketing and technology development areas, both domestically and internationally, which will likely increase our recruiting and hiring costs. Competition for these types of personnel is intense, particularly in the Internet and software industries. As a result, we may be unable to successfully attract or retain qualified personnel. Our inability to retain and attract the necessary personnel could adversely affect our business.

Changes in, or interpretations of, accounting rules and regulations, could result in unfavorable accounting charges. Accounting methods and policies, including policies governing revenue recognition, expenses and accounting for stock options are continually subject to review, interpretation, and guidance from relevant accounting authorities, including the Financial Accounting Standards Board, or FASB, and the SEC. Changes to, or interpretations of, accounting methods or policies in the future may require us to reclassify, restate or otherwise change or revise our financial statements.

Investors could lose confidence in our financial reports, and our business and stock price may be adversely affected, if our internal control over financial reporting is found by management or by our independent registered public accounting firm not to be adequate or if we disclose significant existing or potential deficiencies or material weaknesses in those controls.

Section 404 of the Sarbanes-Oxley Act of 2002 requires us to include a report on our internal control over financial reporting in our Annual Report on Form 10-K. That report includes management's assessment of the effectiveness of our internal control over financial reporting as of the end the fiscal year. Additionally, our independent registered

public accounting firm is required to issue a report on their evaluation of the operating effectiveness of our internal control over financial reporting.

We continue to evaluate our existing internal controls against the standards adopted by the Public Company Accounting Oversight Board, or PCAOB. During the course of our ongoing evaluation of our internal controls, we have in the past identified, and may in the future identify, areas requiring improvement, and may have to design enhanced processes and controls to address issues identified through this review. Remedying any significant deficiencies or material weaknesses that we

Table of Contents

or our independent registered public accounting firm may identify could require us to incur significant costs and expend significant time and management resources. We cannot assure you that any of the measures we may implement to remedy any such deficiencies will effectively mitigate or remedy such deficiencies. Further, if we are not able to complete the assessment under Section 404 in a timely manner or to remedy any identified material weaknesses, we and our independent registered public accounting firm would be unable to conclude that our internal control over financial reporting is effective at the required reporting deadlines. If our internal control over financial reporting is found by management or by our independent registered public accountant to not be adequate or if we disclose significant existing or potential deficiencies or material weaknesses in those controls, investors could lose confidence in our financial reports, we could be subject to sanctions or investigations by The NASDAQ Global Market, the Securities and Exchange Commission or other regulatory authorities and our stock price could be adversely affected.

In future periods, we may upgrade our financial reporting systems and implement new information technology systems to better manage our business, streamline our financial reporting and enhance our existing internal controls. We may experience difficulties if we transition to new or upgraded systems, including loss of data and decreases in productivity as our personnel become familiar with new systems. In addition, we expect that our existing management information systems may require modification and refinement as we grow and our business needs change. Any modifications could prolong difficulties we experience with systems transitions, and we may not always employ the most efficient or effective systems for our purposes. If upgrades cost more or take longer than we anticipate, our operating results could be adversely affected. Moreover, if we experience difficulties in implementing new or upgraded information systems or experience system failures, or if we are unable to successfully modify our management information systems to respond to changes in our business needs, our ability to timely and effectively process analyze and prepare financial statements could be adversely affected. A determination that there is a significant deficiency or material weakness in the effectiveness of our internal control over financial reporting could also reduce our ability to obtain financing or could increase the cost of any financing we obtain and require additional expenditures to comply with applicable requirements. Our net operating loss carryforwards may expire unutilized or underutilized, which could prevent us from offsetting future taxable income.

We have previously experienced “changes in control” that have triggered the limitations of Section 382 of the Internal Revenue Code on a portion of our net operating loss carryforwards. As a result, we may be limited in the amount of net operating loss carryforwards that we can use in the future to offset taxable income for U.S. Federal income tax purposes.

As of June 30, 2013, we estimate our federal and state net operating loss carryforwards for tax purposes are approximately \$38.5 million and \$35.9 million, respectively. These net operating loss carryforwards will begin to expire in 2022 for federal income tax reporting purposes and in 2014 for state income tax reporting purposes. In addition, as of June 30, 2013 we estimate our aggregate net operating loss carryforwards for tax purposes related to our foreign subsidiaries are \$32.5 million, which will begin to expire in 2013.

We apply a valuation allowance to certain deferred tax assets when management does not believe that it is more-likely-than-not that they will be realized. In assessing the need for any valuation allowances, we consider the reversal of existing temporary differences associated with deferred tax assets and liabilities, future taxable income, tax planning strategies and historical and future pre-tax book income (as adjusted for permanent differences between financial and tax accounting items) in order to determine if it is more likely than not that the deferred tax asset will be realized.

As of June 30, 2013, we had a valuation allowance related to the deferred tax assets of the foreign subsidiaries (primarily net operating loss carryforwards) that are either loss companies or are in their start-up phases, including entities in Mexico, Spain, Australia, the Czech Republic and the Netherlands and the deferred tax asset related to certain state net operating loss carryforwards. Management will continue to evaluate the deferred tax position of our U.S. and foreign companies to determine the appropriate level of valuation allowance required against our deferred tax assets.

Restrictive Covenants in the Agreements Governing Our Current and Future Indebtedness Could Restrict Our Operating Flexibility.

The agreements governing our existing debt, and debt we may incur in the future, contain, or may contain, affirmative and negative covenants that materially limit our ability to take certain actions, including our ability to incur debt, pay dividends and repurchase stock, make certain investments and other payments, enter into certain mergers and consolidations, and encumber and dispose of assets. Credit market turmoil, adverse events affecting our business or industry, the tightening of lending standards or other factors could negatively impact our ability to obtain future financing or to refinance our outstanding indebtedness on terms acceptable to us or at all.

Table of Contents

Our Ability To Draw On Our Loan Facility May Be Adversely Affected by Conditions in the U.S. and International Capital Markets.

If financial institutions that have extended credit to us are adversely affected by the conditions of the U.S. and international capital and credit markets, they may be unable to fund borrowings under credit commitments to us. For example, we currently have a \$50.0 million revolving line of credit, with a \$10.0 million sublimit for standby letters of credit, from Bank of America. As of June 30, 2013 €1.5 million (or approximately \$2.0 million) is outstanding under the terms of the Company's Revolving Credit Facility. If Bank of America is adversely affected by capital and credit market conditions and are unable to make loans to us when requested, there could be a corresponding adverse impact on our financial condition and our ability to borrow additional funds, if needed, for working capital and general corporate purposes.

We may require additional capital to support business growth, and this capital may not be available on acceptable terms or at all.

We intend to continue to make investments to support our business growth and may require additional funds to respond to business challenges, including the need to develop new products or enhance our existing products, enhance our operating infrastructure and acquire complementary businesses and technologies.

Accordingly, we may need to engage in equity or debt financings to secure additional funds. If we raise additional funds through further issuances of equity or convertible debt securities, our existing stockholders could suffer significant dilution, and any new equity securities we issue could have rights, preferences and privileges superior to those of holders of our common stock. Any debt financing secured by us in the future could include restrictive covenants relating to our capital raising activities and other financial and operational matters, which may make it more difficult for us to obtain additional capital and to pursue business opportunities, including potential acquisitions. In addition, we may not be able to obtain additional financing on terms favorable to us or at all. If we are unable to obtain adequate financing or financing on terms satisfactory to us when we require it, our ability to continue to support our business growth and to respond to business challenges could be significantly limited. In addition, the terms of any additional equity or debt issuances may adversely affect the value and price of our common stock.

Risks Related to the Securities Market and Ownership of our Common Stock

The trading price of our common stock may be subject to significant fluctuations and volatility, and our new stockholders may be unable to resell their shares at a profit.

The stock markets, in general, and the markets for technology stocks in particular, have experienced high levels of volatility. The market for technology stocks has been extremely volatile and frequently reaches levels that bear no relationship to the past or present operating performance of those companies. These broad market fluctuations may adversely affect the trading price of our common stock. In addition, the trading price of our common stock has been subject to significant fluctuations and may continue to fluctuate or decline.

The price of our common stock in the market may be higher or lower than the price you pay, depending on many factors, some of which are beyond our control and may not be related to our operating performance. It is possible that, in future quarters, our operating results may be below the expectations of analysts or investors. As a result of these and other factors, the price of our common stock may decline, possibly materially. These fluctuations could cause you to lose all or part of your investment in our common stock. Factors that could cause fluctuations in the trading price of our common stock include the following:

- price and volume fluctuations in the overall stock market from time to time;
- volatility in the market price and trading volume of technology companies and of companies in our industry;
- actual or anticipated changes or fluctuations in our operating results;
- actual or anticipated changes in expectations regarding our performance by investors or securities analysts;
- the failure of securities analysts to cover our common stock or changes in financial estimates by analysts;
- actual or anticipated developments in our competitors' businesses or the competitive landscape;
- actual or perceived inaccuracies in, or dissatisfaction with, information we provide to our customers or the media;
- litigation involving us, our industry or both;
- regulatory developments;
- privacy and security concerns, including public perception of our practices as an invasion of privacy;

general economic conditions and trends;
major catastrophic events;
sales of large blocks of our stock;

52

Table of Contents

the timing and success of new product introductions or upgrades by us or our competitors;
changes in our pricing policies or payment terms or those of our competitors;
concerns relating to the security of our network and systems;
our ability to expand our operations, domestically and internationally, and the amount and timing of expenditures related to this expansion; or
departures of key personnel.

In the past, following periods of volatility in the market price of a company's securities, securities class action litigation has often been brought against that company. If our stock price is volatile, we may become the target of securities litigation, which could result in substantial costs and divert our management's attention and resources from our business. In addition, volatility, lack of positive performance in our stock price or changes to our overall compensation program, including our equity incentive program, may adversely affect our ability to retain key employees.

We cannot assure you that a market will continue to develop or exist for our common stock or what the market price of our common stock will be.

We cannot assure you that a public trading market for our common stock will continue to develop or be sustained. If a market is not sustained, it may be difficult for you to sell your shares of common stock at an attractive price or at all.

We cannot predict the prices at which our common stock will trade.

If securities or industry analysts do not publish research or reports about our business or if they issue an adverse or misleading opinion regarding our stock, our stock price and trading volume could decline.

The trading market for our common stock will be influenced by the research and reports that industry or securities analysts publish about us or our business. If any of the analysts who cover us issue an adverse or misleading opinion regarding our stock, our stock price would likely decline. If one or more of these analysts cease coverage of our company or fail to publish reports on us regularly, we could lose visibility in the financial markets, which in turn could cause our stock price or trading volume to decline.

Future sales of shares by existing stockholders or new issuances of securities by us could cause our stock price to decline.

If we or our existing stockholders sell, or indicate an intention to sell, substantial amounts of our common stock or other securities in the public market, the trading price of our common stock could decline. Sales of substantial amounts of shares of our common stock or other securities by us or our existing stockholders could lower the market price of our common stock and impair our ability to raise capital through the sale of new securities in the future at a time and price that we deem appropriate.

We have incurred and will continue to incur increased costs and demands upon management as a result of complying with the laws and regulations affecting a public company, which could adversely affect our operating results.

As a public company, we have incurred and will continue to incur significant legal, accounting and other expenses that we would not otherwise incur if we were a private company. In addition, the Sarbanes-Oxley Act of 2002 and the Dodd-Frank Wall Street Reform and Consumer Protection Act, as well as rules implemented by the Securities and Exchange Commission and The NASDAQ Stock Market, requires certain corporate governance practices for public companies. Our management and other personnel devote a substantial amount of time to public reporting requirements and corporate governance. These rules and regulations have significantly increased our legal and financial compliance costs and made some activities more time-consuming and costly. We also have incurred additional costs associated with our public company reporting requirements. If these costs do not continue to be offset by increased revenues and improved financial performance, our operating results would be adversely affected. These rules and regulations also make it more difficult and more expensive for us to obtain director and officer liability insurance, and we may be required to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage if these costs continue to rise. As a result, it may be more difficult for us to attract and retain qualified people to serve on our board of directors or as executive officers.

Provisions in our certificate of incorporation and bylaws and under Delaware law might discourage, delay or prevent a change of control of our company or changes in our management and, therefore, depress the trading price of our common stock.

Our certificate of incorporation and bylaws contain provisions that could depress the trading price of our common stock by acting to discourage, delay or prevent a change of control of our company or changes in our management that the stockholders of our company may deem advantageous. These provisions:

provide for a classified board of directors so that not all members of our board of directors are elected at one time;

Table of Contents

• authorize “blank check” preferred stock that our board of directors could issue to increase the number of outstanding shares to discourage a takeover attempt;

• prohibit stockholder action by written consent, which means that all stockholder actions must be taken at a meeting of our stockholders;

• prohibit stockholders from calling a special meeting of our stockholders;

• provide that the board of directors is expressly authorized to make, alter or repeal our bylaws; and

- provide for advance notice requirements for nominations for elections to our board of directors or for proposing matters that can be acted upon by stockholders at stockholder meetings.

Additionally, we are subject to Section 203 of the Delaware General Corporation Law, which prohibits a Delaware corporation from engaging in any of a broad range of business combinations with any “interested” stockholder for a period of three years following the date on which the stockholder became an “interested” stockholder and which may discourage, delay or prevent a change of control of our company.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On June 3, 2013 the Company announced that its board of directors had approved the repurchase of up to \$50 million of the Company's common stock. Such repurchases may be made from time to time subject to pre-determined price and volume guidelines established by the Company's board of directors.

Share repurchase activity under our share repurchase program for each of the three months ended June 30, 2013, was as follows:

Fiscal Period	Total Number of Shares Purchased	Average Price Per Share (or Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs (in millions)
April 1 - April 30, 2013	—	—	—	—
May 1 - May 31, 2013	—	—	—	—
June 1 - June 30, 2013	23,437	21.11	23,437	\$49.5
Total	23,437		23,437	\$49.5

(a) Unregistered Sales of Equity Securities during the Three Months Ended June 30, 2013

None.

(b) Use of Proceeds from Sale of Registered Equity Securities

None.

(c) Purchases of Equity Securities by the Issuer and Affiliated Purchasers

During the three months ended June 30, 2013, we repurchased the following shares of common stock in connection with certain restricted stock and restricted stock unit awards issued under our Equity Incentive Plans:

	Total Number of Shares (or Units) Purchased (1)	Average Price Per Share (or Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans of Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
April 1 - April 30, 2013	14,348	\$11.48	—	—
May 1 - May 31, 2013	21,529	\$9.36	—	—
June 1 - June 30, 2013	6,842	\$—	—	—
Total	42,719		—	—

The shares included in the table above were repurchased either in connection with (i) our exercise of the repurchase right afforded to us in connection with certain employee restricted stock awards or (ii) the forfeiture of shares by an employee as payment of the minimum statutory withholding taxes due upon the vesting of certain employee restricted stock and restricted stock unit awards.

Table of Contents

(i) For the three months ended June 30, 2013, the shares repurchased in connection with our exercise of the repurchase right afforded to us upon the cessation of employment consisted of the following:

	Total Number of Shares Purchased	Average Price Per Share
April 1 - April 30, 2013	3,976	\$—
May 1 - May 31, 2013	11,102	\$—
June 1 - June 30, 2013	6,842	\$—
Total	21,920	

(ii) The shares we repurchased in connection with the payment of minimum statutory withholding taxes due upon the vesting of certain restricted stock and restricted stock unit awards were repurchased at the then current fair market value of the shares. For the three months ended June 30, 2013, these shares consisted of the following:

	Total Number of Shares Purchased	Average Price Per Share
April 1 - April 30, 2013	10,372	\$15.88
May 1 - May 31, 2013	10,427	\$19.33
June 1 - June 30, 2013	—	\$—
Total	20,799	

Item 3. Defaults Upon Senior Securities
None.

Item 4. Mine Safety Disclosures
Not Applicable.

Item 5. Other Information

None.

Item 6. Exhibits

The exhibits listed on the Exhibit Index attached hereto are filed or incorporated by reference (as stated therein) as part of this Quarterly Report on Form 10-Q.
