AMARIN CORPORATION SELLS AMARIN DEVELOPMENT TO WATSON
PHARMACEUTICALS, INC.

LONDON, United Kingdom, October 28, 2003 Amarin Corporation plc (NASDAQ: AMRN) today announced the sale of Gacell Holdings AB, the Swedish holding company of Amarin Development AB (ADAB), its Swedish drug development subsidiary, to Watson Pharmaceuticals, Inc. ("Watson") (NYSE: WPI). Under the terms of the sale agreement Watson agreed to pay approximately \$15 million in cash to settle inter-company debts and acquire the stock of ADAB.

Edgar Filing: AMARIN CORP PLC\UK - Form 6-K

ADAB develops technically challenging products utilising advanced, proprietary product development technologies. ADAB was responsible for developing Watson's generic formulations of glipizide extended release tablets for which Watson received Food and Drug Administration approval of the 5mg strength on September 8, 2003.

"The sale of Amarin Development allows us to increase our focus in the field of neurology, specifically in Parkinson's and Huntington's disease. The proceeds will contribute significantly to the reduction in financial obligations to Elan and will provide ongoing working capital" commented Rick Stewart, Chief Executive Officer of Amarin.

Amarin will apply ninety percent of the net sale proceeds of ADAB toward repayment of its financial obligations to Elan Corporation, plc and certain of its affiliates (together "Elan"). Amarin recently announced a restructuring of its financial obligations to Elan. On payment of \$30 million to Elan prior to December 31, 2003, Amarin will have no further financial obligations to Elan.

Amarin Corporation, plc is a specialty pharmaceutical company focused on neurology. The Company plans to become a leader in these therapeutic categories by providing innovative products and solutions that address significant unmet medical needs. Amarin has nine pharmaceutical products on the US market along with a development pipeline that includes two late-stage candidates: Zelapar 'TM' (selegiline orally disintegrating tablets), for Parkinson's disease, and LAX-101, a proprietary compound for Huntington's Disease.

Statements in this press release that are not historical facts are forward-looking statements that involve risks and uncertainties which may cause the Company's actual results in future periods to be materially different from any performance suggested herein. Such risks and uncertainties include, without limitation, risks associated with the inherent uncertainty of pharmaceutical research, product development and commercialisation, the impact of competitive products and patents, as well as other risks and uncertainties detailed from time to time in periodic reports. For more information, please refer to Amarin Corporation's Annual Report for 2002 on Form 20-F and its Form 6-Ks as filed with the U.S. Securities and Exchange Commission. The company assumes no obligation to update information on its expectations.
