Item 2.02 Results of Operations and Financial Condition.

Included below is a release of financial information mailed to stockholders on August 13, 2007. It reflects the financial condition, in a condensed format, for Kansas City Life Insurance Company as of June 30, 2007, and was previously included in the Company's second quarter Form 10-Q report filed on August 3, 2007.

Message from the President, CEO and Chairman of the Board

Kansas City Life Insurance Company reported a 17% increase in net income for the quarter ended June 30, 2007 relative to the prior year. The Company earned \$11.8 million or \$1.00 of net income per share in the second quarter compared with \$10.1 million or \$0.85 of net income per share in the same period of 2006. Net income for the six months increased 16% to \$20.1 million or \$1.70 per share, compared with \$17.3 million or \$1.45 per share one year earlier.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 8-K

Improvements in the Company's second quarter included an increase in premiums of 2% and a decline in benefits and expenses of 6%. The improvement in net income for the six-month period was primarily the result of an increase in realized investment gains of \$3.5 million and a \$6.1 million reduction in benefits and expenses.

The increase in premiums during the second quarter was primarily due to increased sales of immediate annuities. Sales of life insurance products were mixed, as new universal life deposits increased 11% and 13% for the quarter and six months, respectively, and new individual life insurance premiums declined for both periods.

The improved benefit and expense results were primarily due to mortality experience, interest credited to policyholder account balances and changes to amortization of deferred acquisition costs and value of business acquired. Death benefits, after consideration of reinsurance, declined for both the quarter and six months. Interest credited was reduced in both periods, as interest sensitive account balances declined. Amortization expense declined \$4.5 million for the quarter and \$4.7 million for the six months, as adjustments were made to the schedules for deferred costs associated with sales of policies and the value of business acquired through acquisitions. The adjustments to amortization expense were primarily due to improved mortality and interest margin experience.

We continue to benefit from several initiatives focusing primary growth strategies on our individual life insurance business. The Company has experienced growth in sales from new general agents and third-party marketing agreements. New product development and continued recruiting of general agents in key markets provide promise for continued organic growth.

Additionally, the Kansas City Life Board of Directors approved a quarterly dividend of \$0.27 per share to be paid August 14, 2007, to shareholders of record as of August 9, 2007.

See accompanying Notes to Consolidated Financial Statements.

Notes

Comprehensive loss was \$17.0 million and \$11.6 million for the second quarters and \$1.0 million and \$33.0 million for the six months ended June 30, 2007 and 2006, respectively. This varies from net income largely due to unrealized gains or losses on investments.

Income per common share was based upon the weighted average number of shares outstanding of 11,858,378 and 11,877,907 for the second quarters and 11,856,947 and 11,893,746 for the six months ended June 30, 2007 and 2006, respectively.

These interim financial statements are unaudited but, in management's opinion, include all adjustments necessary for a fair presentation of the results and are included in the Company's Form 10-Q as filed with the Securities and Exchange Commission. Please refer to the Company's Form 10-Q and the Company's Annual Report on Form 10-K at www.kclife.com.

Certain amounts in prior years have been reclassified to conform with the current year presentation.
