Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Form 20-F Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1):

Note: Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7):

Indicate by check mark whether by furnishing the information contained in this Form, the registrant is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes No

If Yes is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82-_____

Table of Contents

Contents

Exhibit 1:

On December 5, 2005, Honda Motor Co., Ltd. announced that it has acquired its outstanding company shares of 10,496,353,000 yen at aggregate amount for 1,612,500 shares during the period from November 2, 2005 to November 30, 2005 pursuant to the provisions of Article 211-3, Paragraph 1, Item 2 of the Commercial Code.

Exhibit 2:

On December 12, 2005, Honda Motor de Argentina S.A., a Honda subsidiary in Argentina which imports and sells Honda automobiles, motorcycles, and power products, announced plans to begin motorcycle production in mid-2006 in the city of Florencio Valera, Buenos Aires, Argentina. (Ref. #C05-102)

Exhibit 3:

On December 13, 2005, Honda Motor Co., Ltd. made a new ASIMO humanoid robot debut, which features the ability to pursue key tasks in a real-life environment such as an office and an advanced level of physical capabilities. Compared to the previous model, the new ASIMO achieves the enhanced ability to act in sync with people for example, walking with a person while holding hands. A new function to carry objects using a cart was also added. Further, the development of a total control system enables ASIMO to automatically perform the tasks of a receptionist or information guide and carry out delivery service. In addition, the running capability is dramatically improved, with ASIMO now capable of running at a speed of 6km/hour and of running in a circular pattern. (Ref. #C05-103)

Exhibit 4:

Second quarter report of the three months ended September 30, 2005 (which was mailed to ADR shareholders in December 2005).

Exhibit 5:

On December 14, 2005, Honda Motor Co., Ltd. announced plans to integrate the company's three existing domestic automobile sales channels Primo, Clio and Verno into one Honda channel in March 2006. This integration will enable Honda customers to purchase and service any Honda brand automobile at a single Honda dealer and to maintain a continuous relationship with the same dealer for future sales and service needs as a means to achieve a high level of satisfaction. In addition, Honda announced plans to introduce its premium brand, Acura, in Japan, by fall 2008. The Acura brand will offer distinctive products with a core focus on advanced, leading edge technologies that are always ahead of the times. (Ref. #C05-104)

Exhibit 6:

On December 19, 2005, Honda Motor Co., Ltd. announced its plan to begin mass production in 2007, of an independently developed thin film solar cell composed of non-silicon compound materials, which requires 50% less energy, and thus generate 50% less CO₂, during production compared to a conventional solar cell. A mass production plant with annual capacity of 27.5 megawatts will be established at Honda's Kumamoto factory. (Ref. #C05-106)

Exhibit 7:

Summary of 2005 Year End CEO Speech held on December 20, 2005 and 2005 Honda Sales & Production Forecast (Ref. #C05-109)

Exhibit 8:

On December 22, 2005, Honda Motor Co., Ltd. announced production, domestic sales, and export results for the month of November. Production in North America increased in November compared to the same month a year ago. (Ref. #C05-110)

Exhibit 9:

On December 23, 2005, Honda Motor Co., Ltd. announced that it has decided at a meeting of its Board of Directors held on December 19, 2005, to acquire all the shares of Suzuka Circuitland Co., Ltd. (headquarters: 7992 Ino-cho, Suzuka-shi, Mie Prefecture) by a share exchange, the date of which will be March 10, 2006, and executed the share exchange agreement on the same day.

Exhibit 10:

English summary and translation of semi-annual report (hanki-houkokusho) for the First-Half term (six months ended September 30, 2005) of the 82nd fiscal period

Notice Regarding the Results of Purchase of Company Shares

Tokyo, December 5, 2005 Honda Motor Co., Ltd. today announced that it has acquired its outstanding company shares pursuant to the provisions of Article 211-3, Paragraph 1, Item 2 of the Commercial Code as follows.

(1) Type of shares acquired

Common stock of Honda Motor Co., Ltd.

(2) Period of acquisition

From November 2, 2005 to November 30, 2005

(3) Aggregate number of shares acquired

1,612,500 shares

(4) Aggregate amount of acquisition

10,496,353,000 yen

(5) Method of acquisition

Purchase on the Tokyo Stock Exchange

Reference:

Resolution at the meeting of the Board of Directors held on October 27, 2005.

(1) Type of shares to be acquired

Common stock of Honda Motor Co., Ltd.

(2) Maximum number of shares to be acquired

4,700,000 shares

(3) Maximum amount of acquisition

26 billion yen

(4) Period of acquisition

From November 2, 2005 to January 16, 2006

Aggregate number and amount of company shares acquired as of November 30, 2005, since the date of the resolution at the meeting of the Board of Directors (October 27, 2005).

(1) Aggregate number of shares acquired

1,612,500 shares

(2) Aggregate amount of acquisition

10,496,353,000 yen

Honda to Begin Motorcycle Production in Argentina

Buenos Aires, December 12, 2005 Honda Motor de Argentina S.A., a Honda subsidiary in Argentina which imports and sells Honda automobiles, motorcycles, and power products, today announced plans to begin motorcycle production in mid-2006 in the city of Florencio Valera, Buenos Aires, Argentina.

Investing approximately US\$1 million (approximately 120 million yen), the company will establish a production facility with annual production capacity of 15,000 units and begin production of the C105 Biz, a Cub-type motorcycle, which has been popular in the local market. The company will add 30 associates to begin production.

The motorcycle market in Argentina has been growing rapidly since 2002 (when the market size was approximately 13,000 units). Actual sales results for the entire market from January through November 2005 reached approximately 164,000 units representing an increase of 200% over the total from the same period a year ago, and Honda's sales for the same period also grew to 36,500 units a more than 130% increase from the previous year. For 2005, Honda expects the market to grow to 175,000 units an increase of more than 170% from the previous year and Honda sales are also expected to set an all-time record of approximately 40,000 units up 120% from the previous year. The motorcycle market in Argentina is expected to grow further and become the second largest motorcycle market in South America in the future.

Based on its philosophy to build products close to the customer, Honda decided to begin local production in Argentina because the economy in Argentina is now stabilized and the future growth of the motorcycle market has become more promising. Honda will continue to be committed to meet the needs of this growing market and to provide products which exceed the expectations of customers.

About Honda Motor de Argentina S.A.

Establishment:	April, 1978
Location:	Buenos Aires, Argentina
Capital Investment:	ARS 16.318 million
Capitalization Ratio:	95.4% Honda Motor Co., Ltd. 4.6% Honda Automoveis do Brasil Ltda.
Representative:	Kenzou Yoshino, President
Business:	Import and sales of Honda motorcycles, automobiles, and power products
Employment:	74 associates (as of November 30, 2005)

Honda Debuts New ASIMO

Tokyo, December 13, 2005 Honda Motor Co., Ltd. today debuted a new ASIMO humanoid robot which features the ability to pursue key tasks in a real-life environment such as an office and an advanced level of physical capabilities. Compared to the previous model, the new ASIMO achieves the enhanced ability to act in sync with people for example, walking with a person while holding hands. A new function to carry objects using a cart was also added. Further, the development of a total control system enables ASIMO to automatically perform the tasks of a receptionist or information guide and carry out delivery service. In addition, the running capability is dramatically improved, with ASIMO now capable of running at a speed of 6km/hour and of running in a circular pattern.

Honda has been pursuing research and development of a truly useful humanoid robot which possesses both intelligence and physical capabilities at a high level. With the advancements achieved with this new ASIMO, the initial goal of achieving advanced physical capabilities is accomplished. Honda will continue and even more proactively pursue R&D efforts by shifting the focus to the area of intelligence capabilities, which, for example, will further enable ASIMO to make comprehensive judgments based on various situations.

ASIMO running (6km/h)

Table of Contents

1. New function to perform tasks of a receptionist or information guide automatically in concert with people:

ASIMO is now capable of performing tasks as a receptionist or information guide automatically in concert with the movement of people. This was achieved by providing ASIMO with the ability to recognize the surrounding environment through its visual sensors, floor surface sensor, ultrasonic sensor, and by an IC Tele-interaction Communication Card ^(*), which was developed independently by Honda, and is held by the person with whom ASIMO will interact. Moreover, through the coordinated use of its eye camera in the head and the force (kinesthetic) sensor on its wrists, ASIMO can give and receive an object such as a tray in a timely manner. Further, by using the force (kinesthetic) sensor, ASIMO can hold the hand of the person and move in sync with them.

(*) IC Tele-interaction Communication Card:

By adding an optical communication function to the IC tag, the existence and position of the person or object can be identified. With this card, ASIMO can recognize the location and identity of the person regardless of where the person stands in a 360-degree range from ASIMO.

2. New function to carry objects using a cart

ASIMO is now capable of handling a cart freely while maintaining an appropriate distance from the cart by adjusting the force of its right and left arms to push a cart using the force (kinesthetic) sensor on its wrists. Even when the movement of the cart is disturbed, ASIMO can continue maneuvering by taking flexible actions such as slowing down or changing directions.

3. Improved running functions

Through proactive control of ASIMO's posture while both feet are off the ground, the running speed was doubled from the previous 3km/hour to 6km/hour. In addition, running in a circular pattern at a high speed was achieved by tilting the center of gravity of ASIMO's body inside of the circle to maintain balance with the amount of centrifugal force experienced.

Honda will begin operating this new ASIMO in spring 2006, at the office in Honda Wako Building. The new ASIMO will also gradually be made available for leasing.

Various technological achievements obtained through the research and development of ASIMO, including posture control technologies, image and voice recognition technologies, and technologies to anticipate and avoid collisions, will be applied to other technological pursuits within Honda, such as automotive safety technology and other areas.

To Our Shareholders

Second Quarter Results

Honda's consolidated net income for the fiscal second quarter ended September 30, 2005 totaled ¥133.7 billion (\$1,181 million), an increase of 5.2% from the corresponding period in 2004. Basic net income per Common Share for the quarter amounted to ¥144.89 (\$1.28), compared to ¥135.70 for the corresponding period in 2004. Two of Honda's American Depositary Shares represent one Common Share.

Consolidated net sales and other operating revenue (herein referred to as revenue) for the quarter amounted to ¥2,337.6 billion (\$20,653 million), an increase of 11.7% over the corresponding period in 2004. Revenue was positively affected by currency translations, which were translations of foreign currency denominated revenue from Honda's overseas subsidiaries into yen. Honda estimates that if the exchange rate of yen had remained unchanged from that in the corresponding period in 2004, revenue for the quarter would have increased approximately 9.6%.

Consolidated operating income for the fiscal second quarter totaled ¥162.6 billion (\$1,437 million), a decrease of 5.9% compared to the corresponding period in 2004. This decrease in operating income was primarily due to the negative impacts of increased selling, general and administrative (SG&A) expenses and research and development (R&D) expenses, which offset the positive currency effects caused by the depreciation of the yen, increased profits from higher revenues and continuing cost reduction effects.

Consolidated income before income taxes for the quarter totaled ¥169.3 billion (\$1,497 million), an increase of 2.3% from the corresponding period in 2004.

Equity in income of affiliates, which is mainly attributable to Asian affiliates accounted for under the equity method, for the quarter amounted to ¥26.0 billion (\$230 million), a decrease of 7.9% from the corresponding period in 2004.

With respect to Honda's sales in the fiscal second quarter by business category, motorcycle unit sales totaled 2,489 thousand units, a decrease of 7.8% from the corresponding period in 2004. Motorcycle unit sales in Japan decreased 5.5%, to 104 thousand units, and overseas unit sales were 2,385 thousand units, which was a decrease of 8.0% from the corresponding period in 2004. This was due mainly to a decrease in unit sales of parts for local production at affiliates in India*, offsetting an increase in unit sales of parts for local production at the Indonesian affiliate. Despite a drop in unit sales, revenue from sales to unaffiliated customers increased 12.4%, to ¥287.7 billion (\$2,542 million), due mainly to positive currency translation effects. Operating income increased 48.1%, to ¥29.6 billion (\$262 million), due mainly to increased profits from higher revenues, an increase in royalty income and the positive currency effects caused by the depreciation of the yen, offsetting the negative impacts of the change in model mix in North America and Europe, and an increase in sales incentive in North America.

Table of Contents

n First Half-Year Results

Honda's consolidated net income for the first six months ended September 30, 2005 totaled ¥244.3 billion (\$2,159 million), an increase of 1.2% from the corresponding period in 2004. Income taxes in the fiscal first half in 2004 included ¥11.7 billion in payments for a transfer pricing assessment, relating to the motorcycle business in Brazil. Basic net income per Common Share for the fiscal first half amounted to ¥264.64 (\$2.34), compared to ¥257.35 for the corresponding period in 2004. Two of Honda's American Depositary Shares represent one Common Share.

Consolidated net sales and other operating revenue (herein referred to as revenue) for the period amounted to ¥4,602.2 billion (\$40,660 million), an increase of 10.5% over the corresponding period in 2004. Revenue was positively affected by currency translations, which were translations of foreign currency denominated revenue from Honda's overseas subsidiaries into yen. Honda estimates that if the exchange rate of yen had remained unchanged from that in the corresponding period in 2004, revenue for the fiscal first half would have increased approximately 9.6%.

Consolidated operating income for the fiscal first half totaled ¥333.0 billion (\$2,943 million), which was approximately the same level as the corresponding period in 2004. This was primarily due to currency effects from the depreciation of the yen, increased profits from higher revenues and continuing cost reduction efforts, which offset the negative impact of increased SG&A and R&D expenses.

Consolidated income before income taxes for the fiscal first half totaled ¥313.7 billion (\$2,771 million), a decrease of 7.6% from the corresponding period in 2004.

Equity in income of affiliates, which is mainly attributable to Asian affiliates accounted for under the equity method, for the fiscal first half amounted to ¥47.2 billion (\$417 million), which was almost the same level of the corresponding period in 2004.

With respect to Honda's sales in the fiscal first half by business category, motorcycle unit sales totaled 5,070 thousand units, a decrease of 4.0% from the corresponding period in 2004. Motorcycle unit sales in Japan decreased 3.9%, to 199 thousand units, and overseas unit sales amounted to 4,871 thousand units, a decrease of 4.0% from the corresponding period in 2004. This was due mainly to a decrease in unit sales of parts for local production at affiliates in India*, offsetting an increase in unit sales of parts for local production at the Indonesian affiliate. Revenue from sales to unaffiliated customers increased 3.9%, to ¥550.9 billion (\$4,867 million), due mainly to the positive currency translation impacts, offsetting the decrease in unit sales. Operating income increased 7.4%, to ¥39.9 billion (\$353 million), due mainly to the positive impacts of the depreciation of the yen, increased profits from the higher revenues and ongoing cost reduction efforts, offsetting the negative impact of the increase in R&D expenses.

* Net sales of Honda-brand motorcycle products that are procured locally 100%, manufactured and sold by overseas affiliates accounted for under the equity method are not included in net sales and other operating revenue, in conformity with U.S. generally accepted accounting principles. Accordingly, these unit sales are not included in the financial results and forecasts.

For the fiscal second quarter, the number of products 100% locally procured, manufactured and sold by affiliates in India and China increased to approximately 550 thousands units.

n The All-New 2006 Honda Civic Brings the Latest Technology Into the Mainstream

The all-new eighth generation 2006 Honda *Civic* debuted in September 2005 with a well equipped and technologically advanced *Civic Sedan* and *Civic Coupe* lineup, highlighted by the environmentally friendly *Civic Hybrid* and the ultra-sporty *Civic Si*.

Totally reinvented, the 2006 *Civic* represents an extreme transformation of design and dynamics and establishes new segment standards with clean and efficient i-VTEC engine technologies and advanced standard safety equipment.

In keeping with Honda's Safety for Everyone initiative, safety systems include Honda's exclusive Advanced Compatibility Engineering (ACE) Body Structure for enhanced vehicle-to-vehicle crash compatibility and collision energy management. In addition, the *Civic* provides a long list of standard safety equipment including side curtain airbags, driver's and front passenger's side airbags, active front seat head restraints and a 4-channel anti-lock braking system (ABS) with Electronic Brake Distribution (EBD). Honda's commitment to safety extends to pedestrians as well as vehicle occupants. To help reduce pedestrian injuries in the event of a collision, the *Civic*'s hood and fender areas are designed to deform if contacted by the head of an adult or child pedestrian.

The *Civic Hybrid* provides clean and efficient technology to deliver the highest fuel economy and lowest emissions of any 2006 *Civic*. Compared to a 2006 *Civic Sedan* with an automatic transmission, it provides a city fuel economy increase of approx. 63% and a highway fuel economy increase of approx. 27%. It achieves an EPA estimated city/highway fuel economy of 49/51 miles per gallon. The *Civic Hybrid* is equipped with Advanced-Technology Partial Zero Emissions Vehicle (AT-PZEV) equipment in all 50 states.

n Honda Completes Development of ASV-3 Advanced Safety Vehicles

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Honda Motor Co., Ltd., has completed development of Honda Advanced Safety Vehicle-3 (ASV-3) vehicles, equipped to exchange positional information with other vehicles using Inter-Vehicle Communication technology. This was a central objective of the five-year (April 2001 - March 2006) ASV Project led by the Ministry of Land, Infrastructure and Transport.

Honda ASV-3: Principal Technologies

Motorcycle and Automobile Communication Technology

- Oncoming Vehicle Information Assistance System

Motorcycle Technologies

- Rear View Assistance System

Automobile Technologies

- Adaptive cruise control system
- Pedestrian detection, Vision-based pedestrian detection system
- Advanced Mayday System

Motorcycle/Automobile, Automobile/Automobile and Vehicle/Pedestrian Communication Systems

Honda participated in ASV verification trials conducted by the Ministry from July 4 to October 28, 2005, and took part in the public demonstrations held in Hokkaido, October 12 - 13, 2005.

Honda ASV-3

n Honda Develops World's First Production Motorcycle Airbag System

Honda Motor Co. has succeeded in developing the world's first production motorcycle airbag system. The new system, which can help lessen the severity of injuries caused by frontal collisions, is to be made available on the new *Gold Wing* motorcycle scheduled for release in late spring of 2006 in the United States.

By conducting extensive crash tests at its omni-directional Real World Crash Test Facility, applying advanced computer simulation technology, and leading the way with the introduction of motorcycle rider test dummies, Honda has gathered and analyzed a wide array of data on the behavior of motorcycles during collisions. Honda has also taken full advantage of the experience of its automobile operations in the development of airbags, applying its expertise in the development of the Motorcycle Airbag System.

n Honda Announces Future Motorcycle Business Plan in Asia Oceania Region

Honda Motor Co., Ltd. announced future plans for its motorcycle business in the Asia Oceania region excluding China, an important market accounting for approximately 70% of Honda's global motorcycle sales. Honda sold 8 million motorcycles in the Asia Oceania region last fiscal year and aims to achieve annual sales of approximately 12 million units in this region by the year ending March 31, 2008. Toward this end, Honda is committed to passing the joy of mobility on to the next generation, and to proactive adoption of environmental and safety technologies that enhance safety. In addition, Honda will further strengthen its activities to promote traffic safety with its dealers and through other opportunities.

Expansion of Production Capacity

The motorcycle market in the Asia Oceania region is growing rapidly. Honda will expand production capacity in each country. Honda's annual motorcycle production capacity in Asia Oceania reached approx. 8 million units in 2004, and will be expanded to approx. 14 million units by 2007.

Strengthening Local Development

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Honda will further strengthen collaboration among its R&D facilities in the region in order to more quickly develop products that meet the needs of customers in the rapidly changing ASEAN market.

Expanding Product Lineup

Beginning in 2006, Honda is planning to introduce an all-new commuter model equipped with a compact water-cooled engine and an automatic transmission. Moreover, Honda plans to introduce a family type model equipped with a super-low-friction engine to improve fuel economy by 13% (vs. 2005 level). Further in the future, Honda plans to introduce a more casual and easy-to-ride commuter model to cultivate new market demand.

Strengthening Dealer Networks

Honda will establish a comprehensive support system that provides the existing 4S (Sales, Service, Spare parts and Safety) as well as the other S (Secondhand [used] business) in Thailand. In Indonesia, Honda will establish a network of 4,000 dealers and service shops to strengthen sales and after sales service to better serve customers in an ever growing market.

Environmental Initiatives

By 2007, Honda plans to introduce a total of ten PGM-FI (Honda Programmed Fuel Injection) equipped models. These models achieve improved fuel economy and cleaner emissions as well as excellent start-up capabilities in Thailand, Indonesia, the Philippines and India.

Safety Initiatives

As part of an effort to strengthen activities to promote safety, Honda will open another traffic education center in Indonesia in 2006, in addition to the existing centers in the Philippines, Vietnam, Thailand, Singapore, Australia and India. Moreover, Honda has a plan to establish the Safety Riding School across the nation in Thailand.

The third plant in Indonesia

Production start: September 30, 2005

Annual capacity: Approx. 1 million units

Explanatory note:

In the previous fiscal fourth quarter, Honda reclassified certain finance subsidiaries receivables to trade receivables, including those of non-current portion to other assets, in the consolidated balance sheets divided into non-financial services businesses and finance subsidiaries (unaudited). Reclassifications have been made to consolidated financial statements in prior year's fiscal first half and fiscal year to conform to the presentation used for the year ended March 31, 2005.

Free cash flow of Non-financial services businesses excluding the decrease in loans to Finance subsidiaries (Note)	82,828	
Cash flows from financing activities:		
*Increase (decrease) in short-term debt	(62,889)	17,163
*Proceeds from long-term debt	7,620	507,819
*Repayment of long-term debt	(7,221)	(311,071)
Proceeds from issuance of common stock	(22,252)	
Acquisition of treasury stock	(34,234)	
Cash dividends paid		
(Decrease) in commercial paper classified as long-term debt		(59)

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Net cash provided by (used in) financing activities	(118,976)	213,852
Effect of exchange rate changes on cash and cash equivalents	22,187	544
Net change in cash and cash equivalents	(41,471)	(868)
Cash and cash equivalents at beginning of period	757,894	15,644
Cash and cash equivalents at end of period	¥ 716,423	¥ 14,776

Explanatory notes:

1. The cash flows derived from non-financial services businesses loans to finance subsidiaries were included in the items of Decrease (increase) in investments and advances of Non-financial services businesses, and Increase (decrease) in short-term debt, Proceeds from long-term debt and Repayment of long-term debt of Finance subsidiaries (marked by*). Free cash flow of Non-financial services businesses excluding the decrease in loans to finance subsidiaries are stated for the readers information. Loans from Non-financial services businesses to Finance subsidiaries increased by 77,741 million yen for the fiscal first half ended September 30, 2004, and increased by 27,510 million yen for the corresponding period in 2005.
2. In the current fiscal year, Honda reclassified and restated its cash flow related to the finance subsidiaries receivables which relate to sales of inventory as cash flows from operating activities instead of cash flows from investing activities in the consolidated statements of cash flows divided into non-financial services businesses and finance subsidiaries (unaudited). Due to this reclassification, the figures for the fiscal first half ended September 30, 2004 have been also reclassified and restated to conform to the presentation of the fiscal first half ended September 30, 2005.
3. Decrease (increase) in trade accounts and notes receivable for finance subsidiaries is due to the reclassification of finance subsidiaries receivables which relate to sales of inventory in the unaudited consolidated statements of cash flows presented above.

Honda Announces New Automobile Sales Channel Strategy and Introduction of Acura^(*) Brand to Japan

Focus will be on maximizing customer joy and satisfaction and creating new value

December 14, 2005 Honda Motor Co., Ltd. today announced plans to integrate the company's three existing domestic automobile sales channels Primo, Clio and Verno into one Honda channel in March 2006. This integration will enable Honda customers to purchase and service any Honda brand automobile at a single Honda dealer and to maintain a continuous relationship with the same dealer for future sales and service needs as a means to achieve a high level of satisfaction. In addition, Honda announced plans to introduce its luxury brand, Acura, in Japan, by fall 2008. The Acura brand will offer distinctive products with a core focus on advanced, leading edge technologies that are always ahead of the times.

The goals of the new sales channel strategy are to maintain Honda's ability to respond to changes in society and the automobile market and to continue to provide the diverse values desired by customers and meet increasingly sophisticated customer needs. In turn, this will enable Honda to maximize the joy and satisfaction of existing customers earned through the three channel structure (with the cumulative number of Honda vehicles in Japan now standing at approximately 9 million units). Further, Honda aims to restructure and strengthen its domestic automobile dealer network by creating new value for the customer through Acura brand products.

Integration of Honda channels to maximize customer joy and satisfaction

Honda established the current three-channel structure by creating Verno in 1978, Clio in 1984, and Primo in 1985, offering Honda products for customers with different lifestyles. Supported by growing automobile demand at that time, Honda continued to enhance its product line-up and increased sales and the number of dealers. At the same time, Honda began conducting the CSI (Customer Satisfaction Index) survey in 1984, and strengthened initiatives which always put customer satisfaction at the core. Through these efforts, Honda steadily increased the number of Honda customers and made significant progress in achieving the autonomy of its dealers.

The Japanese automobile market has now entered a stage of increasing maturity, and the surrounding society and marketplace are in a transition stage as well. In this increasingly competitive environment, the most important factor is to always continue improving the lifetime satisfaction level for the customers who have already chosen the Honda brand.

Based on this concept, Honda decided to integrate its existing channels into one Honda channel where customers will be able to purchase and service any Honda brand automobile and to continue receiving high quality sales and service from the same dealer for future needs whether that be replacing their current vehicle or adding another one. Honda also aims to build a dealer network that places the Honda brand at the forefront by maximizing use of existing facilities and manpower and by optimizing the location of sales facilities.

Table of Contents

Introducing Acura to create new value for the customer and to continue to achieve further growth and to take a big step forward in Japan

Recently, the values desired by the customer have become even more diverse and customer needs are becoming increasingly sophisticated in the automobile market. Honda will proactively respond to these changes by creating new value for the customer with the introduction of Acura, a luxury brand that will offer a distinctive driving experience and other unique characteristics. The Acura brand will start in fall 2008, with approximately 100 dealers in Japan. This also will enable Honda to achieve further growth and take a big step forward in its home market of Japan.

With this new sales channel strategy, Honda will accelerate its effort to maximize customer joy and satisfaction, and by challenging in this new area Honda will pursue the goal of consistently achieving annual sales of more than 800,000 units.

(*1) Acura is a luxury brand Honda first introduced in the U.S. in 1986.

Honda to Mass Produce Next-Generation Thin Film Solar Cell

Tokyo, December 19, 2005 Honda Motor Co., Ltd. today announced its plan to begin mass production in 2007, of an independently developed thin film solar cell composed of non-silicon compound materials, which requires 50% less energy, and thus generate 50% less CO₂, during production compared to a conventional solar cell. A mass production plant with annual capacity of 27.5 megawatts will be established at Honda's Kumamoto factory.

Honda will produce and sell solar panels in a limited area, starting from 2006 fall, using assembly line within Honda Engineering Co., Ltd., the production engineering subsidiary of Honda.

By using thin film made from a compound of copper, indium, gallium and selenium (CIGS), Honda's next-generation solar cell achieved a major reduction in energy consumed during the manufacturing process to approximately 50% of the amount required by conventional crystal silicon solar cells. Thus, this new solar cell is more environmentally-friendly by reducing the amount of CO₂ even from the production stage. Further, this next-generation solar cell has achieved the highest level of photoelectric transfer efficiency for a thin film solar cell (almost equivalent to the conventional crystal silicon solar cell).

Since spring 2002, Honda has been using and monitoring the performance of this solar cell, first at the Outboard Engine Plant in Hosoe, and then also at 12 other Honda facilities including Honda Engineering headquarters and the Honda Wako Building in Japan and 3 overseas sites such as the U.S. and Thailand.

Achieving lower costs and higher photoelectric transfer efficiency is required in order to expand use of solar cells which will help protect the global environment. This non-silicon thin film solar cell has been attracting significant attention as a potential solution to these challenges. The only remaining challenges were the stabilization of performance and development of mass production technologies. The mass production of Honda's next-generation solar cell became possible with a new mass production process for thin film solar cells developed independently by Honda Engineering—a production engineering company that has long developed production equipment and technologies for Honda's motorcycle, automobile, engine, electric motor for hybrid vehicles and other items.

In addition to its effort to lower environmental load through achieving reduced emissions and higher fuel efficiency, as the first automaker to enter into solar cell business, Honda will contribute to the effort to prevent global warming through production and sales of a clean energy source which does not use fossil fuels. In its vision for 2010, Honda has committed itself to take on new challenges in new areas and to develop environmentally-friendly and sustainable energy technologies. Honda's entrance into the solar cell business with independently developed technologies is an example of the realization of Honda's 2010 vision.

About New Mass Production Line

Location: Within the current site of Honda Motor Co., Ltd. Kumamoto Factory
Establishment: The line will become operational in latter half of 2007
Facility size: Approximately 12,000 square meter
Production capacity: 27.5 megawatts annually, (Equivalent amount of electricity to power approximately 8,000 houses when calculated at 3.5kw per house)
Product/Use: Solar cell panel for individual residential use and public industrial use

Summary of 2005 Year End CEO Speech

Review of the year 2005

With the all-new Civic, Honda received various awards in Japan and the U.S. (e.g. RJC Technology of the Year; Car of the Year Japan Special Achievement Award Most Advanced Technology Award; Japan Automobile Hall of Fame Car of the Year; the U.S.-based Motor Trend Magazine Car of the Year, etc.) At the beginning of 2006, Honda will launch an all-new Civic hatch-back in Europe, which was developed especially for the market. Honda has established a flexible production/development system which enables Honda to introduce the most appropriate models for each market with a short lead time.

The all-new ASIMO achieved a dramatic improvement of its physical capabilities. Honda will now focus more on improvement of intelligence capabilities. Honda will also pursue the mutual exchange and leveraging of technologies developed separately by Honda engineers for ASIMO and automobiles, while continuing the challenge to contribute to society through commercialization of ASIMO as an unprecedented mobility product.

Estimated 2005 worldwide sales:	(All time record in each product area)
Motorcycles:	12.5 million units (up 16% from 2004)
Automobiles:	3.35 million units (up 5% from 2004)
Power Products:	5.60 million units (up 6% from 2004)

Initiatives for 2006 and beyond:

Motorcycle

Asia

In 2006, the new plants in the Philippines (+200,000 units), Pakistan (+150,000 units) and India (+450,000 units) will become operational. The overall annual motorcycle production capacity in Asia Oceania is estimated to reach 11 million units in 2006, and 14 million units in 2007.

Table of Contents

Honda will introduce a new commuter model equipped with a compact water-cooled engine designed especially for Asian markets and an automatic transmission, as well as a high fuel-efficiency model equipped with a super-low-friction engine. Moreover, Honda plans to introduce a total of 10 fuel injection equipped models in the Asia Oceania region.

China

A new plant of Wuyang-Honda, currently in the process of being relocated, will become operational at the new site in spring 2006. (Annual production capacity will be expanded from the current 600,000 units to 800,000 units.)

North America

Following the introduction of a navigation-system equipped type in September 2005, the Gold Wing equipped with the world's first motorcycle airbag will be introduced to the market in summer 2006. Honda will lead the industry in adopting the most advanced features for motorcycle products.

Europe

For Europe, Honda will remodel the CBF1000, an Italy-made 4-cylinder touring sports model, as well as Deauville, a Spain-made 680cc V-twin touring model, which were both displayed at the Tokyo Motor Show. Along with Japan-made new models including CBR1000RR and Silverwing 400, the new product line-up will meet the demands of our customers in Europe.

South America

Business in Brazil grew well, and the cumulative production at the Honda plant in Brazil reached 8 million units at the end of November. In addition, the rapidly-recovering Argentina market has the potential to grow into the second largest motorcycle market in South America. Honda will begin local motorcycle production in Argentina in mid-2006.

Table of Contents

Japan

Honda's best selling lightweight category motorcycle, Forza, increased in 2005 by approximately 50% compared to the previous year. A new Forza will be introduced to the market in 2006 with a Honda S-Matic transmission that is advanced from the current 6-speed to 7-speed, and with an improved styling. In addition, DN-01, a HFT-equipped automatic sports cruiser, which we introduced at the Tokyo Motor Show, will be further advanced for introduction to the market in the near future. This motorcycle will offer the new value of fun riding with improved comfort.

Power Products

- The electric 4-wheel wheelchair, Monpal, will undergo a full model change (spring 2006). It will be the first product applied with the visibility improvement method that was also applied to ASV3.
- Tokyo Gas Co., Ltd. will begin sales of Ecowill, Honda's cogeneration system, in January 2006
- In fall 2006, sales of household cogeneration system units will begin in the U.S., where Honda has already begun monitor testing.

Automobile

North America

- 2005 U.S. sales forecast: 1.45 million units (Up 4% from 2004)
- Introducing Fit in the entry level category in spring 2006. Strengthen lineup with excellent fuel economy and environmental performance, while cultivating new customer segments.
- As for light trucks, the Acura brand will be strengthened by the launch of the Acura RD-X, which is a small-size SUV that achieves both advanced performance and fuel efficiency.

Europe

- 2005 sales forecast: 285,000 units (Up 11% from 2004)
- The all-new Civic 5-door especially developed for Europe will be on sale at the beginning of 2006.
- Honda will reveal the Civic Type R Concept, which will achieve advanced Fun-to-Drive values at the Geneva Auto Show at the end of February 2006.

Table of Contents

Asia Oceania Region

- 2005 sales forecast: 310,000 units (Up 10% from 2004)
- In India, expansion of annual production capacity to 50,000 units was completed in November. The plan is to double capacity to 100,000 units by 2010. In addition to the Accord and City models currently being manufactured, production of Civic will begin in 2006.
- In Vietnam, the first automobile plant will begin production of Civic in summer 2006.
- In Thailand, an automobile R&D center is being established and a new design center has begun operations. Honda will enhance sales and production to meet rapidly growing demand in the region, while establishing core R&D functions which enable Honda to accurately identify the needs of each local market.

South America

- 2005 sales forecast: 70,000 units (Up 17% from 2004)
- Honda expects to achieve all-time record sales again in 2005 for the third consecutive year. Sales of Civic and Fit remained strong. To continue responding to growing demand, the production capacity of the plant in Brazil will be increased through expansion of the plant facility. The annual production capacity of the plant will be expanded from the current 55,000 units to more than 80,000 units by the beginning of 2007, and to 100,000 units by 2008.

China

- 2005 sales forecast: 260,000 units (Up 19% from 2004)
- 2005 production plan: 270,000 units (including exports)
- Dongfeng Honda will expand its annual production capacity to 120,000 units from 2006 and begin production of one of Honda's core models - Civic.
- Combined with added capacity at the second plant of Guangzhou Honda, overall production capacity in China will be 530,000 units annually.
- Honda will also strengthen local powertrain production, including local production of dies, to establish the foundation for local production and then grow steadily.
- As for sales, the Acura brand will be launched in China, the first region outside North America to introduce the brand. In addition to RL, the U.S. made Acura TL will also be introduced to the market.

Table of Contents

Japan

- 2005 sales forecast: 720,000 units (Decreased by 3.1% from 2004)

- Strengthening sales

Honda will innovate the domestic sales channel structure. The existing three channels Primo Clio, Verno will be integrated and strengthened as one Honda channel beginning in 2006. By pushing the core Honda brand to the forefront, Honda will establish a dealer network which is easy for our customers to understand.

Moreover, the Acura brand, which started in America in 1986 as the first Japanese luxury brand in North America, will be introduced to Japan in fall 2008, the third region to adopt the brand after North America and China.

Including NSX, the Acura brand has grown by offering a performance-oriented product line-up based on advanced technology that is always ahead of the times. Acura has grown into a luxury brand which now sells more than 200,000 units annually with six models including two locally developed models TL and MDX. Currently, 70% of the Acura product lineup is built in North America, therefore we can say that Acura is a luxury brand which is deeply rooted in North America

With the successor model of NSX to be equipped with a V10 engine at the top of the line-up, each Acura model will have distinctive technologies including the outstanding advanced technology of SH-AWD which was introduced with RL. We will further grow Acura as a global luxury brand focused on advanced technology ahead of the times.

- Strengthening R&D

In the area of R&D, the structure of Honda R&D Co., Ltd. will be strengthened. Due to the growth and expansion of Honda's business, the specific responsibilities of individual engineers tend to become marginalized.

In order to enhance the creativity of each individual, and to maintain a high level of initiative, Honda R&D will strengthen the flat and less-layered structure and make the responsibility of each section to focus on individuals more concrete.

Table of Contents

As the level and variety of technological elements applied to automobiles, e.g. advanced safety features, electronic devices, or new materials, are becoming more advanced and complex, the role of technology development is becoming ever more important. We will enhance technology development by clarifying the responsibility of this role from that of product development.

In the area of product development, Honda R&D will strengthen its structure to increase its capability to develop products that continuously advance brand growth, e.g. strengthening the individual development of Acura products and Honda products.

- Strengthening engineering/production

Honda will further advance its powertrain production system in order to achieve mass production of extremely sophisticated next generation engines, such as VTEC that we discussed at the mid-year conference, the V10 engine that will be installed to the successor model of NSX, and to increase production of hybrid engines to meet growing demand.

As a part of this challenge, and to advance the production technology to the next level, Honda has begun planning to further reform production facility in Japan that is responsible to roll out new powertrain technologies and units to the world. The key to address environmental issues the most important challenge for automakers in the future is advancement of the powertrain. Honda will pursue to advance the mass production technologies for the next-generation powertrain.

Through all of these measures described above, we will strengthen the core elements that make Honda unique in all areas of sales, R&D, and engineering/production.

Motor Sports

Suzuka Circuitland Co., Ltd. and Twin Ring Motegi Co., Ltd will merge their operations in 2006. Suzuka Circuitland has the experience of hosting Formula One racing for almost 20 years. Twin Ring Motegi owns an oval course the only one of its kind in Asia. These two companies will be merged to increase the efficiency of operation and to contribute to the advancement of mobility and motor sports cultures in Japan.

Table of Contents

WGP : In October, Honda achieved the cumulative total of 600 WGP wins. Daniel Pedrosa who earned the 600th win for Honda will move up from GP250 to MOTOGP and compete for the top racing series together with Nicky Hayden in the Repsol Honda team. Marco Melandri also showed a great talent by winning the last two races of the 2005 season. Honda will work harder to regain the titles with the next-generation teams which employ these talented young riders.

Indy: In 2005, Honda won the three major titles Manufacturers Title, Drivers Championship, and Rookie of the Year. From next year, Honda will be the sole engine supplier. Honda will continue racing in IRL, the top open wheel racing series in North America, even beyond 2007 to continue contributing to the racing culture of the U.S.

F1: The new-born Honda Racing F1 Team will begin a new challenge for victory as a 100% Honda works team. Honda will also strongly support the Super AGURI Formula One team by providing V8 engines.

Honda will begin sales in the latter half of 2006, of Honda's unique solar cell panel which features thin-film formed by a compound made of copper, indium, gallium and selenium (CIGS), a product of Honda Engineering.

In 2007, Honda will establish a production line in the Kumamoto Plant with annual capacity of 27.5 megawatts.

As the first automaker to enter into solar cell business, Honda will further contribute to the effort to prevent global warming through production and sales of a clean energy source which does not use fossil fuels.

The Power of Dreams Honda will continue our challenges to create new value for our customers.

Honda Increases Production in the North America due to Strong Sales

December 22, 2005 Honda Motor Co., Ltd. today announced production, domestic sales, and export results for the month of November.

<Production>

Domestic production for the month of November increased 4.8% compared to the same month a year ago due to an increase in production of both domestic and export models. This is the first time in five months, since June 2005, that domestic production exceeded the total from the same month a year ago.

Overseas production in November increased 8.2%, due largely to production increases in North America, where the second line of the Alabama plant, which produces light truck models including Odyssey and Pilot, added a second shift earlier this year, reaching full capacity in October. Increased production in Asia also contributed to the rise in overseas production. It is the fourth consecutive month, since August 2005, for an increase in overseas production compared to the same month a year ago.

Worldwide production in November increased 6.9% due to the increased domestic and overseas production. It is the fourth consecutive month for an increase over the same month a year ago.

<Japan Domestic Sales>

Total domestic sales, including imported cars, was 57,394 units for the month of November, a 2.8% decline compared to the same month a year ago, due to decreased sales of mini vehicles. It is the first time in three months, since August 2005, for domestic sales to decline compared to the same month a year ago. On the other hand, sales of passenger cars and light trucks (including import models) exceeded the same month a year ago for the third consecutive month. It is the first time in two months for sales of mini-vehicles to decline compared to the same month a year ago.

In the passenger car and light truck category, Fit was Honda's best selling vehicle (10,180 units, the third best selling car in the market) for the month of November. The all-new StepWGN (7,093 units, the seventh best selling car in the market), which underwent a full model change in May, and the Odyssey (4,691 units, the 15th best selling car in the market), which received a minor model change in October, were the second and third best selling vehicle for the month. In the mini-vehicle category, Life (10,001 units, the 3rd best selling mini vehicle in the market) was Honda's best-selling vehicle for the month.

<Exports from Japan>

Total exports in November of 38,306 units, were down 21.0% compared to the same month a year ago the fourth consecutive monthly decline compared to the same month a year ago. The decrease was due primarily to the fact that exports to North America in November last year experienced a large increase following the full model change of the Acura RL (known as Legend in Japan) in October and production of Accord and Civic has gradually switched to local production. In addition, exports to Europe declined for the fifth consecutive month with the June 2005 startup of exports of Jazz (known as Fit in Japan) from a new Honda plant in China.

Notice for Summary Share Exchange

Tokyo, December 23, 2005 Honda Motor Co., Ltd. decided at a meeting of its Board of Directors held on December 19, 2005, to acquire all the shares of Suzuka Circuitland Co., Ltd. (headquarters: 7992 Ino-cho, Suzuka-shi, Mie Prefecture) by a share exchange, the date of which will be March 10, 2006, and executed the share exchange agreement on the same day.

The share exchange will be carried out under Article 358, Paragraph 1, of the Commercial Code without obtaining the approval of shareholders at a shareholders meeting, as is otherwise required based on Article 353, Paragraph 1, of the Commercial Code. Therefore, any shareholders who are opposed to this share exchange are requested to notify the Company in writing of their opposition on or after December 24, 2005, but no later than January 6, 2006.

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

For the six months ended September 30, 2004 and 2005 and the year ended March 31, 2005

(1) General and Summary of Significant Accounting Policies

(a) Financial Statements

The accompanying consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles. In the opinion of management, all adjustments which are necessary for a fair presentation have been included. The results for interim periods are not necessarily indicative of results which may be expected for any other interim period or for the year. For further information, refer to the March 31, 2005 consolidated financial statements and notes thereto included in Honda Motor Co., Ltd. and Subsidiaries Annual Report for the year ended March 31, 2005. Consolidated financial statements ended March 31, 2005 are derived from the audited consolidated financial statements, while consolidated financial statements ended September 30, 2004 and 2005 are unaudited.

(b) Description of Business

Honda Motor Co., Ltd. (the Company) and its subsidiaries (collectively Honda) develop, manufacture, distribute and provide financing for the sale of its motorcycles, automobiles and power products. Honda's manufacturing operations are principally conducted in 30 separate factories, 4 of which are located in Japan. Principal overseas manufacturing facilities are located in the United States of America, Canada, Mexico, the United Kingdom, France, Italy, Spain, India, Indonesia, Malaysia, Pakistan, the Philippines, Taiwan, Thailand, Vietnam, Brazil and Turkey.

Net sales and other operating revenue by category of activity for the six months ended September 30, 2005 were derived from: motorcycle business 12.0%, automobile business 81.2%, financial services 3.1%, and power products and other businesses 3.7%. Operating income by category of activity for the six months ended September 30, 2005 was derived from: motorcycle business 12.0%, automobile business 70.3%, financial services 13.4%, and power products and other businesses 4.3%. The total assets at September 30, 2005 were attributable to: motorcycle business 9.0%, automobile business 43.9%, financial services 48.0%, power products and other businesses 2.5%, and corporate assets (net of company-wide accounts eliminated in consolidation) (3.4%).

Honda sells motorcycles, automobiles and power products in most countries in the world. For the six months ended September 30, 2005, 78.1% of net sales and other operating revenue (¥3,592,064 million) was derived from subsidiaries operating outside Japan (September 30, 2004: ¥3,185,096 million). Net sales and other operating revenue for the six months ended September 30, 2005 was geographically broken down based on the location of customers as follows: Japan 18.5%, North America 53.1%, Europe 10.6%, Asia 11.4% and others 6.4%. For the six months ended September 30, 2005, 65.6% of operating income (¥218,657 million) was generated from foreign subsidiaries, disregarding the effect of elimination of unrealized profits between domestic operations and foreign operations (September 30, 2004: ¥246,549 million). Also, 72.2% of

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Honda's assets at September 30, 2005 (¥7,133,712 million) was identified with foreign operations (September 30, 2004: ¥6,257,345 million).

Table of Contents

6

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(c) Basis of Presenting Consolidated Financial Statements

The Company and its domestic subsidiaries maintain their books of account in conformity with financial accounting standards of Japan, and its foreign subsidiaries generally maintain their books of account in conformity with those of the countries of their domicile.

The consolidated financial statements presented herein have been prepared in a manner and reflect the adjustments which are necessary to conform them with U.S. generally accepted accounting principles.

(d) Consolidation Policy

The consolidated financial statements include the accounts of the Company, its subsidiaries and those variable interest entities where the Company is the primary beneficiary under FASB Interpretation No. 46 (revised December 2003), Consolidation of Variable Interest Entities. All significant intercompany balances and transactions have been eliminated in consolidation.

Investments in 20% to 50% owned affiliates in which the Company has the ability to exercise significant influence over their operating and financial policies, but where the Company does not have a controlling financial interest are accounted for using the equity method.

Minority interests in net assets and income are not significant and, accordingly, are not presented separately in the accompanying consolidated balance sheets and statements of income.

(e) Use of Estimates

Management of Honda has made a number of estimates and assumptions relating to the reporting of assets, liabilities, revenues and expenses, and the disclosure of contingent assets and liabilities to prepare these consolidated financial statements in conformity with U.S. generally accepted accounting principles. Significant items subject to such estimates and assumptions include, but are not limited to, allowance for credit losses, allowance for losses on lease residual values, valuation allowance for inventories and deferred tax assets, impairment of long-lived assets, product warranty, and assets and obligations related to employee benefits. Actual results could differ from those estimates.

(f) Revenue Recognition

Sales of manufactured products are recognized when persuasive evidence of an arrangement exists, delivery has occurred, title and risk of loss have passed to the customers, the sales price is fixed or determinable, and collectibility is probable.

Honda provides dealer incentives passed on to the end customers generally in the form of below-market interest rate loans or lease programs. The amount of interest or lease subsidies paid is the difference between the amount offered to retail customers and a market-based interest or lease rate. Honda also provides dealer incentives retained by the dealer, which generally represent discounts provided by Honda to the dealers. These incentives are classified as a reduction of sales revenue as the consideration is paid in cash and Honda does not receive an identifiable benefit in exchange for this consideration. The estimated costs are accrued at the time the product is sold to the dealer.

Table of Contents

7

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

Interest income from finance receivables is recognized using the interest method. Finance receivable origination fees and certain direct origination costs are deferred, and the net fee or cost is amortized using the interest method over the contractual life of the finance receivables.

Finance subsidiaries of the Company periodically sell finance receivables. Gain or loss is recognized equal to the difference between the cash proceeds received and the carrying value of the receivables sold and is recorded in the period in which the sale occurs. Honda allocates the recorded investment in finance receivables between the portion(s) of the receivables sold and portion(s) retained based on the relative fair values of those portions on the date the receivables are sold. Honda recognizes gains or losses attributable to the change in the fair value of the retained interests, which are recorded at estimated fair value and accounted for as trading securities. Honda determines the fair value of the retained interests by discounting the future cash flows. Those cash flows are estimated based on prepayments, credit losses and other information as available and are discounted at a rate which Honda believes is commensurate with the risk free rate plus a risk premium. A servicing asset or liability is amortized in proportion to and over the period of estimated net servicing income. Servicing assets and servicing liabilities at September 30, 2004 and 2005 and March 31, 2005 were not significant.

(g) Cash Equivalents

Honda considers all highly liquid debt instruments with an original maturity of three months or less to be cash equivalents.

(h) Inventories

Inventories are stated at the lower of cost, determined principally by the first-in, first-out method, or market.

(i) Investments in Securities

Honda classifies its debt and equity securities in one of three categories: available-for-sale, trading, or held-to-maturity. Debt securities that are classified as held-to-maturity securities are reported at amortized cost. Debt and equity securities classified as trading securities are reported at fair value, with unrealized gains and losses included in earnings. Other debt and equity securities are classified as available-for-sale securities and are reported at fair value, with unrealized gains or losses, net of deferred taxes included in accumulated other comprehensive income (loss) in the stockholders' equity section of the consolidated balance sheets. Honda did not hold any trading securities at September 30, 2004 or 2005 or March 31, 2005, except for retained interests in the sold pools of finance receivables, which are accounted for as trading securities and included in finance subsidiaries-receivables.

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Honda periodically reviews the fair value of investment securities. If the fair value of investment securities has declined below our cost basis and such decline is judged to be other-than-temporary, Honda recognizes the impairment of the investment securities and the carrying value is reduced to its fair value through a charge to income. The determination of other-than-temporary impairment is based upon an assessment of the facts and circumstances related to each investment security. In determining the nature and extent of impairment, Honda considers such factors as financial and operating conditions of the issuer, the industry in which the issuer operates, degree and period of the decline in fair value and other relevant factors.

Table of Contents

8

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(j) Goodwill

Goodwill is not amortized but instead is tested for impairment at least annually. Goodwill is considered impaired if its estimated fair value is less than the carrying value. Honda completed its annual test effective March 31, 2004 and 2005 and concluded no impairment needed to be recognized. The carrying amount of goodwill at September 30, 2004 and 2005 and March 31, 2005 was ¥17,942 million, ¥19,104 million and ¥17,887 million, respectively.

(k) Depreciation

Depreciation of property, plant and equipment is calculated principally by the declining-balance method based on estimated useful lives and salvage values of the respective assets.

The estimated useful lives used in computing depreciation of property, plant and equipment are as follows:

<u>Asset</u>	<u>Life</u>
Buildings	Up to 50 years
Machinery and equipment	2 to 20 years

(l) Impairment of Long-Lived Assets and Long-Lived Assets to Be Disposed Of

Honda's long-lived assets and certain identifiable intangibles having finite useful lives are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net cash flows (undiscounted and without interest charges) expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the estimated fair value of the assets. Assets to be disposed of by sale are reported at the lower of the carrying amount or estimated fair value less costs to sell.

(m) Income Taxes

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in earnings in the period that includes the enactment date.

(n) Product-Related Expenses

Advertising and sales promotion costs are expensed as incurred. Provisions for estimated costs related to product warranty are made at the time the products are sold to customers or new warranty programs are initiated. Estimated warranty expenses are provided based on historical warranty claim experience with consideration given to the expected level of future warranty costs as well as current information on repair costs. Included in warranty expenses accruals are costs for general warranties on vehicles Honda sells, product recalls and service actions outside the general warranties.

Table of Contents

9

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(o) Basic Net Income per Common Share

Basic net income per common share has been computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding during each period. The weighted average number of common shares outstanding during the six months ended September 30, 2004 and 2005 and for the year ended March 31, 2005 was 937,976,314, 923,414,030 and 933,767,978, respectively. There were no potentially dilutive shares outstanding during the six months ended September 30, 2004 or 2005 or for the year ended March 31, 2005.

(p) Foreign Currency Translation

Foreign currency financial statement amounts are translated into Japanese yen on the basis of the period-end rate for all assets and liabilities and the weighted average rate for the period for all income and expense amounts. Translation adjustments resulting therefrom are included in accumulated other comprehensive income (loss) in the stockholders' equity section of the consolidated balance sheets.

Foreign currency receivables and payables are translated at the applicable current rates on the balance sheet date. All revenues and expenses associated with foreign currencies are converted at the rates of exchange prevailing when such transactions occur. The resulting exchange gains or losses are reflected in other income (expense) in the consolidated statements of income.

(q) Derivative Financial Instruments

Honda has entered into foreign exchange agreements and interest rate agreements to manage currency and interest rate exposures. These instruments include foreign currency forward contracts, currency swap agreements, currency option contracts and interest rate swap agreements.

Honda recognizes the fair value of all derivative financial instruments in its consolidated balance sheet. As Honda does not apply hedge accounting, the changes in the fair value of its derivative financial instruments are recognized in earnings in the period of the change. The amount recognized in earnings included in other income (expenses) other during the six months ended September 30, 2004 and 2005 and for the year ended March 31, 2005, were ¥11,027 million gain, ¥23,131 million loss and ¥44,905 million gain, respectively. In relation to this, the Company included gains and losses on translation of debts of finance subsidiaries denominated in foreign currencies intended to be hedged of ¥21,054 million gain, ¥28,789 million gain and ¥10,667 million gain in other income(expenses) other during the six months ended September 30, 2004 and 2005 and the years ended March 31, 2005, respectively. In addition, net realized gains and losses on interest rate swap contracts not designated as accounting hedges by finance subsidiaries of ¥19,707 million loss, ¥2,757 million loss and ¥28,000 million loss are included in other income (expenses) other during the six months ended September 30, 2004 and 2005 and the years ended March 31, 2005, respectively. These gains and losses are presented on a net basis.

(r) Shipping and Handling Costs

Shipping and handling costs are included in selling, general and administrative expenses, and are charged to earnings as incurred.

Table of Contents

10

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(s) New Accounting Pronouncements Not Yet Adopted

In November 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 151, Inventory Costs, an amendment of Accounting Research Bulletin (ARB) No. 43, Chapter 4. SFAS No. 151 amends the guidance in ARB No.43, Inventory Pricing, for abnormal amounts of idle facility expense, freight, handling costs, and wasted material (spoilage) requiring that those items be recognized as current-period expenses regardless of whether they meet the criterion of so abnormal, as described in ARB No. 43. This statement also requires that allocation of fixed production overheads to the costs of conversion be based on the normal capacity of the production facilities. The statement is effective for inventory costs incurred during the fiscal years beginning after June 15, 2005. Management does not expect this statement to have a material impact on Honda's consolidated financial position or results of operations.

(t) Reclassifications

Certain reclassifications have been made to the prior periods' consolidated financial statements to conform to the presentation used for the six months ended September 30, 2005.

(2) Presentation of finance subsidiaries-receivables in the consolidated statements of cash flows and the consolidated balance sheets

In the six months ended September 30, 2004, Honda reported the effects of all finance subsidiaries-receivables as investing activities for purposes of presentation in the consolidated statements of cash flows. This policy, when applied to wholesale receivables related to sales of inventory to outside dealers, had the effect of presenting an investing cash outflow and an operating cash inflow even though there was no cash flow on a consolidated basis.

In the year ended March 31, 2005, based on concerns raised by the staff of the Securities and Exchange Commission (SEC), management has decided to report the cash flow related effects of those finance subsidiaries-receivables which relate to sales of inventory as operating activities in the consolidated statements of cash flows and also reclassify related finance subsidiaries-receivables to trade receivables in the consolidated balance sheets. This presentation results in the elimination of the intercompany activities and proper classification of cash receipts from the settlement of wholesale receivables related to the sale of inventory as operating activities.

Certain finance subsidiaries provide retail finance to customers who purchased inventory from the consolidated dealers. The cash flows generated from these retail finance were reported as investing cash flows in the six months ended September 30, 2004. In the year ended March 31, 2005, based on concerns raised by the staff of the SEC, management has decided to report the cash flow related effects of those finance subsidiaries-receivables which relate to sales of inventory as operating activities in the consolidated statements of cash flows and also reclassify related finance subsidiaries- receivables to trade receivables, including those of non-current portion to other assets, in the consolidated

balance sheets.

Consequently, management had revised the presentation in the consolidated statements of cash flows during the six months ended September 30, 2004 and the consolidated balance sheet at September 30, 2004 to achieve a comparable presentation for all periods presented herein.

The cash flow related effects of finance subsidiaries-receivable from retail, direct finance leases, wholesale and term loans to dealer which are unrelated to the sales of inventory continue to be reported as investing activities in the consolidated statements of cash flows.

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(3) Finance Subsidiaries-Receivables

Finance subsidiaries-receivables represent finance receivables generated by finance subsidiaries.

Certain finance receivables related to sales of inventory are reclassified to trade receivables and other assets in the consolidated balance sheets. Finance receivables include wholesale financing to dealers and retail financing and direct financing leases to consumers.

The allowance for credit losses is maintained at an amount management deems adequate to cover estimated losses on finance receivables. The allowance is based on management's evaluation of many factors, including current economic trends, industry experience, inherent risks in the portfolio and the borrower's ability to pay.

Finance subsidiaries of the Company purchase insurance to cover a substantial amount of the estimated residual value of vehicles leased to customers. The allowance for losses on lease residual values is maintained at an amount management deems adequate to cover estimated losses on the uninsured portion of the vehicles' lease residual values. The allowance is also based on management's evaluation of many factors, including current economic conditions, industry experience and the finance subsidiaries' historical experience with residual value losses.

Finance subsidiaries-receivables, net, consisted of the following at September 30, 2004 and 2005 and March 31, 2005:

The estimated fair value amounts have been determined using relevant market information and appropriate valuation methodologies. However, these estimates are subjective in nature and involve uncertainties and matters of significant judgement and, therefore, cannot be determined with precision. The effect of using different assumptions and/or estimation methodologies may be significant to the estimated fair value amounts.

The methodologies and assumptions used to estimate the fair values of financial instruments are as follows:

Cash and cash equivalents, trade receivables and trade payables

The carrying amounts approximate fair values because of the short maturity of these instruments.

Finance subsidiaries-receivables

The fair values of retail receivables and term loans to dealers were estimated by discounting future cash flows using the current rates for these instruments of similar remaining maturities. Given the short maturities of wholesale receivables, the carrying amount of such receivables approximates fair value.

Marketable equity securities

The fair value of marketable equity securities was estimated using quoted market prices.

Held-to-maturity securities

The fair value of held-to-maturity securities was estimated using quoted market prices.

Table of Contents

20

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

Convertible Notes and Convertible Preferred Stock Investment

Honda investments in convertible instruments are bifurcated into two investments for accounting purposes. The note and preferred stock portions of these convertible instruments are treated as available-for-sale and are marked-to-market through other comprehensive income (loss). The fair value is determined based on an analysis of interest rate movements and an assessment of credit worthiness. The embedded derivative is marked-to-market through the statement of income and fair value is estimated using a trinomial convertible bond pricing model.

Debt

The fair values of bonds and notes were estimated based on the quoted market prices for the same or similar issues. The fair value of long-term loans was estimated by discounting future cash flows using rates currently available for loans of similar terms and remaining maturities. The carrying amounts of short-term bank loans and commercial paper approximate fair values because of the short maturity of these instruments.

Foreign exchange and interest rate instruments

The fair values of foreign currency forward contracts and foreign currency option contracts were estimated by obtaining quotes from banks. The fair values of currency swap agreements and interest rate swap agreements were estimated by discounting future cash flows using rates currently available for these instruments of similar terms and remaining maturities.

(11) *Risk Management Activities and Derivative Financial Instruments*

Honda is a party to derivative financial instruments in the normal course of business to reduce their exposure to fluctuations in foreign exchange rates and interest rates. Currency swap agreements are used to convert long-term debt denominated in a certain currency to long-term debt denominated in other currencies. Foreign currency forward contracts and purchased option contracts are normally used to hedge sale commitments denominated in foreign currencies (principally U.S. dollars). Foreign currency written option contracts are entered into in combination with purchased option contracts to offset premium amounts to be paid for purchased option contracts. Interest rate swap agreements are mainly used to convert floating rate financing, such as commercial paper, to (normally three-five years) fixed rate financing in order to match financing costs with income from finance receivables. These instruments involve, to varying degrees, elements of credit, exchange rate and interest rate risks in excess of the amount recognized in the consolidated balance sheets.

The aforementioned instruments contain an element of risk in the event the counterparties are unable to meet the terms of the agreements. However, Honda minimizes the risk exposure by limiting the counterparties to major international banks and financial institutions meeting established credit guidelines. Management of Honda does not expect any counterparty to default on its obligations and, therefore, does not expect to incur any losses due to counterparty default. Honda generally does not require or place collateral for these financial instruments.

Foreign currency forward contracts and currency swap agreements are agreements to exchange different currencies at a specified rate on a specific future date. Foreign currency option contracts are contracts that allow the holder of the option the right but not the obligation to exchange different currencies at a specified rate on a specific future date. Foreign currency forward contracts, foreign currency option contracts and currency swap agreements outstanding at September 30, 2004 were ¥604,790 million, ¥81,801 million and ¥486,980 million, respectively and totaled ¥1,173,571 million. At September 30, 2005, foreign currency forward contracts, foreign currency option contracts and currency swap agreements outstanding were ¥771,666 million, ¥136,945 million and ¥485,975 million, respectively and totaled ¥1,394,586 million. At March 31, 2005, foreign currency forward contracts, foreign currency option contracts and currency swap agreements outstanding were ¥692,841 million, ¥214,211 million and ¥505,272 million, respectively and totaled ¥1,412,324 million.

Interest rate swap agreements generally involve the exchange of fixed and floating rate interest payment obligations without the exchange of the underlying principal amount. At September 30, 2004 and 2005 and March 31, 2005, the notional principal amounts of interest rate swap agreements were ¥3,062,511 million, ¥3,579,687 million and ¥3,227,405 million, respectively.

Table of Contents

21

HONDA MOTOR CO., LTD. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(12) Commitments and Contingent Liabilities

At September 30, 2005, Honda had commitments for purchases of property, plant and equipment of approximately ¥55,782 million.

Honda has entered into various guarantee and indemnification agreements. At September 30, 2004 and 2005 and March 31, 2005, Honda has guaranteed approximately ¥73,312 million, ¥50,689 million, and ¥69,574 million of bank loan of employees for their housing costs, respectively. If an employee defaults on his/her loan payments, Honda is required to perform under the guarantee. The undiscounted maximum amount of Honda's obligation to make future payments in the event of defaults is ¥73,312 million, ¥50,689 million and ¥69,574 million, respectively. As of September 30, 2005, no amount has been accrued for any estimated losses under the obligations, as it is probable that the employees will be able to make all scheduled payments.

Honda warrants its vehicles for specific periods of time. Product warranties vary depending upon the nature of the product, the geographic location of its sale and other factors.

With respect to product liability, personal injury claims or lawsuits, Honda believes that any judgment that may be recovered by any plaintiff for general and special damages and court costs will be adequately covered by Honda's insurance and reserves. Punitive damages are claimed in certain of these lawsuits. Honda is also subject to potential liability under other various lawsuits and claims. After consultation with legal counsel, and taking into account all known factors pertaining to existing lawsuits and claims, Honda believes that the overall results of such lawsuits and pending claims should not result in liability to Honda that would be likely to have an adverse material effect on its consolidated financial position and results of operations.

(13) Leases

Honda has several operating leases, primarily for office and other facilities, and certain office equipment.

Future minimum lease payments under noncancelable operating leases that have initial or remaining lease terms in excess of one year at September 30, 2005 are as follows:

Yen

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

	<u>(millions)</u>
Within one year	¥ 23,486
Over one year	91,986
	<u> </u>
Total minimum lease payments	¥ 115,472

Rental expenses under operating leases for the six months ended September 30, 2004 and 2005 and for the year ended March 31, 2005 were ¥23,816 million, ¥22,796 million and ¥44,619 million, respectively.

(14) Subsequent Event

On October 17, 2005, Honda announced a plan to establish Honda Auto Parts Manufacturing Co. Ltd., in Guangdong Province, China, which will be wholly owned by another Honda subsidiary in China and have a shared capital of US\$90 million. This new subsidiary will manufacture automobile powertrain components, such as transmissions, drive shafts and engine parts, which will be supplied to other Honda automobile manufacturing subsidiaries and affiliates in China. US\$98 million will be invested in the manufacturing facilities which is expected to be in operation starting from the spring of 2007 and have an initial production capacity of 240,000 transmissions units per year.

A meeting of the Board of Directors was held on October 27, 2005 and it was resolved that the acquisition of outstanding company stock (common stock) in accordance with Article 211-3, Paragraph 1, Item 2 of Japanese Commercial Code was approved. The main purpose for the acquisition is to improve capital efficiency.

(1) Method of acquisition

Open market

(2) Maximum number of shares to be acquired

4,700,000 shares

(Ratio to the total number of shares of common stock issued: 0.51%)

(3) Maximum amount of the acquisition

Japanese Yen 26,000,000,000

(4) Period of stock purchase

From November 2, 2005 to January 16, 2006

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

In accordance with Article 211-3, Paragraph 1, Item 2 of Japanese Commercial Code, Articles of Incorporation of the company authorizes the Board of Directors to purchase its own shares with its resolutions.

Explanatory note:

In the previous fiscal fourth quarter, Honda reclassified certain finance subsidiaries-receivables to trade receivables, including those of non-current portion to other assets, in the consolidated balance sheets divided into non-financial services businesses and finance subsidiaries (unaudited). Reclassifications have been made to consolidated financial statements in prior year's fiscal first half and fiscal year to conform to the presentation used for the year ended March 31, 2005.

Explanatory notes:

1. The cash flows derived from non-financial services businesses loans to finance subsidiaries were included in the items of Decrease(increase) in investments and advances of Non financial services businesses, and Increase (decrease) in short-term debt , Proceeds from long-term debt and Repayment of long-term debt of Finance subsidiaries (marked by *). Free cash flow of Non financial services businesses excluding the decrease in loans to finance subsidiaries are stated for the readers information.

Loans from non-financial services businesses to finance subsidiaries increased by 77,741 million yen for the fiscal first half ended September 30, 2004, and increased by 27,510 millions yen for the corresponding period in 2005.

2. In the current fiscal year, Honda reclassified and restated its cash flow related to the finance subsidiaries-receivables which relate to sales of inventory as cash flows from operating activities instead of cash flows from investing activities in the consolidated statements of cash flows divided into non-financial services businesses and finance subsidiaries (unaudited). Due to this reclassification, the figures for the fiscal first half ended September 30, 2004 have been also reclassified and restated to conform to the presentation of the fiscal first half ended September 30, 2005.
3. Decrease (increase) in trade accounts and notes receivable for finance subsidiaries is due to the reclassification of finance subsidiaries-receivables which relate to sales of inventory in the unaudited consolidated statements of cash flows presented above.

Table of Contents

Significant Basic Information for Preparation of the unconsolidated Financial Statements

1. Basis of accounting for assets and method of cost determination

(1) Securities

Held to maturity debt securities

Debt securities that are classified as held-to-maturity securities are reported at amortized cost.

Investments in subsidiaries and affiliates

Investments in subsidiaries and affiliates are stated at cost, which is determined by the moving average method.

Other securities

Marketable securities

Marketable securities classified as other securities are stated at fair value based on market prices at the closing date of the semi-annual period and similar. Any changes in unrealized holding gains or losses, net of applicable income taxes, are included directly in shareholders' equity and the cost of securities sold is determined using the moving average method.

Non-marketable securities

Non-marketable securities classified as other securities are stated at cost, which is determined by the moving average method.

(2) Inventories

Finished goods, auto parts for sale, raw materials, work in process and supplies are stated at the lower of the last purchase cost or market.

(3) Derivative financial instruments

Derivative financial instruments are stated at fair value.

Table of Contents

2. Method of depreciation of fixed assets

- (1) Depreciation of tangible fixed assets is computed using the declining-balance method.
- (2) Amortization of intangible assets is computed using the straight-line method. In addition, amortization of software intended for internal use is based on an estimated useful life of 5 years.

3. Basis of accounting for provisions and reserves

(1) Allowance for doubtful accounts

The allowance for doubtful accounts is provided for possible bad debts at an amount determined based on the historical experience of bad debts for normal receivables, in addition, an estimate of uncollectible amounts is made by reference to specific doubtful receivables from customers which are experiencing financial difficulties.

(2) Accrued product warranty

Accrued product warranty has been provided as a total of the following:

- i) an estimate of warranty costs to be incurred during the remaining warranty periods based on historical warranty claim experiences and an estimate of the probability of future warranty costs; and
- ii) an estimate of future warranty claims mainly associated with regulatory reporting and similar.

(3) Accrued bonuses

Accrued bonuses are provided for payments of bonuses to employees based on the amount of the estimated bonus payments which is attributable to the semi-annual period.

Table of Contents

(4) Accrued employees' retirement benefits

Accrued employees' retirement benefits are provided for payments of retirement benefits at an estimated amount incurred during the half year calculated based on the retirement benefit obligation and the fair value of the pension plan assets at year-end.

The net retirement benefit obligation at transition is amortized by the straight-line method over 15 years.

Prior service costs are amortized by the straight-line method over the average remaining years of service of the employees.

Actuarial gains or losses are amortized in the years following the year in which the gain or loss is recognized by the straight-line method over the average remaining years of service of the employees.

(Additional Information)

As stipulated in the Japanese Welfare Pension Insurance Law, the Honda Employees' Pension Fund (Confederated Welfare Pension Fund), the Fund, of which the Company is a member, has obtained an approval from the Ministry of Health, Labor and Welfare for exemption from benefits obligations related to future employee service in respect of the substitutional portion of the Fund on April 1, 2004. On July 1, 2005, Ministry of Health, Labor and Welfare also approved the transfer of the past service liabilities of the Fund to the Japanese government.

Accordingly, Honda Employees' Pension Fund was newly changed to the Honda Corporate Pension Fund.

Upon obtaining these approvals, the Company applied Implementation guidance on accounting standards for post-employment benefits, Article 44-2, issued by the Japanese Institute of Certified Public Accountants, and recognized a ¥91 billion gain on the transfer of the benefit obligation of the substitutional portion of the Fund to the Japanese government as an extraordinary gain for the semi-annual period.

(5) Accrued officers' retirement benefits

Accrued officers' retirement benefits are provided for the payment of retirement benefits to directors and statutory auditors at the amount which would be required to be paid if all directors and statutory auditors retired at the end of the semi-annual period in accordance with the Company policies.

Table of Contents

(6) Accrued operating officers' retirement benefits

Accrued operating officers' retirement benefits are provided for the payment of retirement benefits to operating officers at the amount which would be required to be paid if all operating officers retired at the end of the semi-annual period in accordance with the Company policies.

4. Leases

Finance lease transactions except for those under which the ownership of leased assets is transferred to the lessee, are accounted for as operating leases.

5. Other significant basic information for preparing the semi-annual financial statements

(1) Accounting for consumption tax

Transactions subject to consumption taxes are recorded at amounts exclusive of consumption taxes.

Consumption tax refund receivable is included in other current assets.

(2) Application of consolidated regulatory tax rules and regulations

The consolidated regulatory tax rules and regulations were applied in the semi-annual period.

Table of Contents

Changes to the Significant Basic Information for Preparation of the unconsolidated Financial Statements

Accounting standard for impairment of fixed assets

The Company applied Accounting standard for impairment of fixed assets issued by the Business Accounting Deliberation Council and Implementation guidance on accounting for impairment of fixed assets issued by the Accounting Standards Board of Japan. The adoption of this accounting standard did not have a material effect on the Company's statement of profit and losses during the semi-annual period.

Accumulated impairment losses are directly reduced from the related fixed assets in accordance with the revised rules and regulations of semi-annual financial statements.
