REDWOOD TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2012

(Unaudited)

Note 1. Redwood Trust

Redwood Trust, Inc., together with its subsidiaries (Redwood, we, or us), invests in, finances, and manages real estate assets. We invest in residential and commercial loans and in asset-backed securities backed by real estate loans. We seek to invest in assets that have the potential to generate sufficient long-term cash flow returns to support our goal of distributing an attractive level of dividends per share to shareholders over time. For tax purposes, we are structured as a real estate investment trust (REIT).

Redwood was incorporated in the State of Maryland on April 11, 1994, and commenced operations on August 19, 1994. Our executive offices are located at One Belvedere Place, Suite 300, Mill Valley, California 94941.

Note 2. Basis of Presentation

The consolidated financial statements presented herein are at March 31, 2012 and December 31, 2011, and for the three months ended March 31, 2012 and 2011. These consolidated financial statements have been prepared in conformity with generally accepted accounting principles (GAAP) in the United States of America as prescribed by the Financial Accounting Standards Board's (FASB) Accounting Standards Codification (ASC) and using the Securities and Exchange Commission's (SEC) instructions to Form 10-Q.

Organization

Our consolidated financial statements include the accounts of Redwood, its direct and indirect wholly-owned subsidiaries, and other entities in which we have a controlling financial interest. All significant intercompany balances and transactions have been eliminated. Redwood's consolidated subsidiaries include both qualifying REIT subsidiaries and taxable subsidiaries. References to the Redwood REIT include Redwood and its qualifying REIT subsidiaries, excluding taxable subsidiaries.

We sponsor two securitization programs. Our Sequoia program is used for the securitization of residential mortgage loans. References to Sequoia refer collectively to all the consolidated Sequoia securitization entities. Our Acacia program was used for the securitization of mortgage-backed securities and other types of financial assets. References to Acacia refer collectively to all the consolidated Acacia securitization entities.

Principles of Consolidation

We apply FASB guidance to determine whether we must consolidate transferred financial assets and variable interest entities (VIEs) for financial reporting purposes. We currently consolidate the assets and liabilities of the Sequoia and the Acacia securitization entities where we maintain an ongoing involvement, as well as an entity formed in connection with a securitization transaction we engaged in during 2011. Prior to the fourth quarter of 2011, we also consolidated the assets, liabilities, and noncontrolling interests of the Opportunity Fund (Fund) that we managed. Each securitization entity is independent of Redwood and of each other and the assets and liabilities are not owned by and are not legal obligations of Redwood, although we are exposed to certain financial risks associated with our role as the sponsor or manager of these entities.

For financial reporting purposes, the underlying loans and securities owned at the Sequoia, Acacia, and securitization entities are shown under residential and commercial loans and real estate securities on our consolidated balance sheets. The asset-backed securities (ABS) issued to third parties by these entities are shown under ABS issued. In our consolidated statements of income, we record interest income on the loans and securities owned by consolidated Sequoia, Acacia, and securitization entities and interest expense on the ABS issued by these entities. The real estate securities owned at the Fund were shown on our consolidated balance sheets under real estate securities and the portion of the Fund owned by third parties was shown under noncontrolling interest. In our consolidated statements of income, we recorded interest income on the securities owned at the Fund.

See *Note 4* for further discussion on principles of consolidation.

REDWOOD TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2012

(Unaudited)

Note 3. Summary of Significant Accounting Policies

Use of Estimates

The preparation of financial statements requires us to make a number of significant estimates. These include estimates of fair value of certain assets and liabilities, amount and timing of credit losses, prepayment rates, and other estimates that affect the reported amounts of certain assets and liabilities as of the date of the consolidated financial statements and the reported amounts of certain revenues and expenses during the reported period. It is likely that changes in these estimates (e.g., valuation changes due to supply and demand, credit performance, prepayments, interest rates, or other reasons) will occur in the near term. Our estimates are inherently subjective in nature and actual results could differ from our estimates and the differences could be material.

Fair Value Measurements

Our financial statements include assets and liabilities that are measured at their estimated fair values in accordance with GAAP. A fair value measurement represents the price at which an orderly transaction would occur between willing market participants at the measurement date. We develop fair values for financial assets or liabilities based on available inputs and pricing that is observed in the marketplace. Examples of market information that we attempt to obtain include the following:

Quoted prices for the same or similar securities;

Relevant reports issued by analysts and rating agencies;

The current level of interest rates and any directional movements in relevant indices, such as credit risk indices;

Information about the performance of the underlying mortgage loans, such as delinquency and foreclosure rates, loss experience, and prepayment rates;

Indicative prices or yields from broker/dealers; and,

Other relevant observable inputs, including nonperformance risk and liquidity premiums.

After considering all available indications of the appropriate rate of return that market participants would require, we consider the reasonableness of the range indicated by the results to determine an estimate that is most representative of fair value.

The markets for many of the real estate securities that we invest in and issue are generally illiquid. Establishing fair values for illiquid assets and liabilities is inherently subjective and is often dependent upon our estimates and modeling assumptions. If we determine that either the volume and/or level of trading activity for an asset or liability has significantly decreased from normal market conditions, or price quotations or

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

observable inputs are not associated with orderly transactions, the market inputs that we obtain might not be relevant. For example, broker or pricing service quotes might not be relevant if an active market does not exist for the financial asset or liability. The nature of the quote (for example, whether the quote is an indicative price or a binding offer) is also evaluated.

In circumstances where relevant market inputs cannot be obtained, increased analysis and management judgment are required to estimate fair value. This generally requires us to establish the use of our internal assumptions about future cash flows and appropriate risk-adjusted discount rates. Regardless of the valuation inputs we apply, the objective of fair value measurement is unchanged from what it would be if markets were operating at normal activity levels and/or transactions were orderly; that is, to determine the current exit price.

See *Note 5* for further discussion on fair value measurements.

REDWOOD TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2012

(Unaudited)

Note 3. Summary of Significant Accounting Policies (continued)

Fair Value Option

We have the option to measure eligible financial assets, financial liabilities, and commitments at fair value on an instrument-by-instrument basis. This option is available when we first recognize a financial asset or financial liability or enter into a firm commitment. Subsequent changes in the fair value of assets, liabilities, and commitments where we have elected the fair value option are recorded in our consolidated statements of income.

Our decision to apply the fair value option for new financial instruments is generally based upon our funding strategy for the specific financial asset acquired. For example, securities that we anticipate funding with equity will generally be accounted for as available-for-sale (AFS) securities. Securities that we anticipate funding with a combination of debt and equity or those financed through the issuance of asset-backed liabilities will generally be accounted for in a manner consistent with the associated liabilities. Additionally, we may elect to apply the fair value option for financial instruments that may not perform similarly to our traditional real estate investments or are particularly volatile or complex.

See *Note 5* for further discussion on the fair value option.

Residential and Commercial Loans

Residential and Commercial Loans Fair Value

Residential and commercial loans at fair value include loans where we have elected the fair value option. Coupon interest is recognized as revenue when earned and deemed collectible or until a loan becomes more than 90 days past due. Changes in fair value are recurring and are reported through our consolidated statements of income in other market valuation adjustments, net.

Residential and Commercial Loans Held-for-Sale

Residential and commercial loans held-for-sale include loans that we are marketing for sale to third parties, including transfers to securitization entities that we plan to sponsor and expect to be accounted for as sales for financial reporting purposes. These loans are carried at the lower of their cost or fair value, as measured on an individual basis or, in the case of the loans we intend to pool for securitization based upon similar underwriting characteristics, on an aggregate basis. If the fair value of a loan, or pool of loans, held-for-sale is lower than its amortized cost basis, this difference is reported as a negative market valuation adjustment through our consolidated statements of income. Coupon interest for loans held-for-sale is recognized as revenue when earned and deemed collectible or until a loan becomes more than 90 days past due. Gains or losses on the sale of residential or commercial loans are based on the specific identification method for loans measured on an individual basis or in aggregate for those loans measured on a pool basis.

Residential and Commercial Loans Held-for-Investment

Loans held-for-investment include residential loans owned at Sequoia entities and commercial loans owned at Redwood. These loans are carried at their unpaid principal balances adjusted for net unamortized premiums or discounts and net of any allowance for loan losses. Coupon interest is recognized as revenue when earned and deemed collectible or until a loan becomes more than 90 days past due or when a loan has been individually impaired, at which point the loan is placed on nonaccrual status. Interest previously accrued for loans that have become greater than 90 days past due or individually impaired is reserved for in the allowance for loan losses. Residential loans delinquent more than 90 days or in

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

foreclosure are characterized as seriously delinquent. Cash principal and interest that is advanced from servicers subsequent to a loan becoming greater than 90 days past due or individually impaired is used to reduce the outstanding loan principal balance. When a seriously delinquent loan previously placed on nonaccrual status has cured, meaning all delinquent principal and interest have been remitted by the borrower, the loan is placed back on accrual status. Loans that have been individually impaired are placed back on accrual status once the loan is considered reperforming. A loan is considered reperforming when the loan has been current for at least 12 months.

Table of Contents

REDWOOD TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2012

(Unaudited)

Note 3. Summary of Significant Accounting Policies (continued)

We use the interest method to determine an effective yield to amortize the premium or discount on real estate loans held-for-investment. For residential loans acquired prior to July 1, 2004, we use coupon interest rates as they change over time and anticipated principal payments to determine periodic amortization. For loans acquired after July 1, 2004, we use the initial coupon interest rate of the loans (without regard to future changes in the underlying indices) and anticipated principal payments, if any, to determine periodic amortization.

We reclassify loans held-for-investment as loans held-for-sale if we determine that these loans will be sold or transferred to third parties. This may occur, for example, if we exercise our right to call ABS issued by a Sequoia securitization trust and decide to subsequently sell the underlying loans to third parties.

See *Note 6* for further discussion on residential loans. See *Note 7* for further discussion on commercial loans.

Residential Loans Allowance for Loan Losses

For residential loans classified as held-for-investment, we establish and maintain an allowance for loan losses based on our estimate of credit losses inherent in our loan portfolios at the reporting date. To calculate the allowance for loan losses, we assess inherent losses by determining loss factors (defaults, the timing of defaults, and loss severities upon defaults) that can be specifically applied to each loan or pools of loans.

We consider the following factors in evaluating the allowance for loan losses:

Ongoing analyses of loans, including, but not limited to, the age of loans and year of origination, underwriting standards, business climate, economic conditions, and other observable data;

Historical loss rates and past performance of similar loans;

Relevant environmental factors;

Relevant market research and publicly available third-party reference loss rates;

Trends in delinquencies and charge-offs;

Effects and changes in credit concentrations;

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

Information supporting a borrower's ability to meet obligations;

Ongoing evaluations of fair values of collateral using current appraisals and other valuations; and,

Discounted cash flow analyses.

Once we determine the amount of defaults, the timing of the defaults, and severity of losses upon the defaults, we estimate expected losses for each individual loan or pool of loans over its expected life. We then estimate the timing of these losses and the losses probable to occur over an appropriate loss confirmation period. This period is defined as the range of time between the occurrence of a credit loss (such as the initial deterioration of the borrower's financial condition) and the confirmation of that loss (the actual impairment or charge-off of the loan). The losses expected to occur within the estimated loss confirmation period are the basis of our allowance for loan losses, since we believe these losses exist at the reported date of the financial statements. We re-evaluate the adequacy of our allowance for loan losses quarterly.

As part of the loss mitigation efforts undertaken by servicers of residential loans owned by Sequoia securitization entities, a growing number of loan modifications have been completed to help make mortgage loans more affordable for certain borrowers. Loan modifications may include, but are not limited to: (i) conversion of a floating rate mortgage loan into a fixed rate mortgage loan; (ii) reduction in the contractual interest rate of a mortgage loan; (iii) forgiveness of a portion of the contractual interest and/or principal amounts owed on a mortgage loan; and, (iv) extension of the contractual maturity of a mortgage loan. We evaluate all loan modifications performed by servicers to determine if they constitute troubled debt restructurings (TDRs) according to GAAP. If a loan is determined to be a TDR, it is removed from the general loan pools used for calculating

Note 3. Summary of Significant Accounting Policies (continued)

allowances for loan losses and assessed for impairment on an individual basis based upon any adverse change in the expected future cash flows resulting from the modification. This difference is recorded to the provision for loan losses in our consolidated statements of income.

When foreclosed property is received in full satisfaction for a defaulted loan, we estimate the fair value of the property, based on estimated net proceeds from the sale of the property (including accrued but unpaid interest and other costs). To the extent that the fair value of the property is below the recorded investment of the loan, we record a charge against the allowance for loan losses for the difference. Foreclosed property is subsequently recorded as real estate owned (REO), a component of other assets on our consolidated balance sheets. Actual losses incurred on loans liquidated through a short-sale are also charged against the allowance for loan losses.

Repurchase Reserves

We do not currently maintain a loan repurchase reserve and management is not aware of any outstanding repurchase claims against Redwood that would require the establishment of such a reserve. We do not originate residential loans and believe that risk of loss due to loan repurchases (i.e., due to breach of representations and warranties) would generally be a contingency to the companies from whom we acquired the loans and therefore would be covered by our recourse to those companies.

In circumstances where we believe that there is a risk of loss due to a loan repurchase demand (i.e., due to an allegation of a breach of representations and warranties) and we do not believe that full recourse to the company from whom we acquired the loan exists or is enforceable, we will review the need for any loan repurchase reserve in accordance with FASB guidance on accounting for contingencies and establish reserves when, in the opinion of management, it is probable that a matter would result in a liability and the amount of loss, if any, can be reasonably estimated.

See *Note 6* for further discussion on the allowance for loan losses for residential loans.

Commercial Loans Allowance for Loan Losses

For commercial loans classified as held-for-investment, we establish and maintain a general allowance for loan losses inherent in our portfolio at the reporting date and, where appropriate, a specific allowance for loan losses for loans we have determined to be impaired at the reporting date. An individual loan is considered impaired when it is deemed probable that we will not be able to collect all amounts due according to the contractual terms of the loan.

Our methodology for assessing the adequacy the allowance for loan losses begins with a formal review of each commercial loan in the portfolio and the assignment of an internal impairment status. Reviews are performed at least quarterly. We consider the following factors in evaluating each loan:

Loan to value ratios upon origination or acquisition of the loan;

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

The most recent financial information for each loan and associated properties, including net operating income, debt service coverage ratios, occupancy rates, rent rolls, as well as any other loss factors we consider relevant, such as, but not limited to, specific loan trigger events that would indicate an adverse change in expected cash flows or payment delinquency;

Economic trends, both macroeconomic as well as those directly affecting the properties associated with our loans, and the supply and demand of competing projects in the sub-market in which the subject property is located; and,

The loan sponsor or borrowing entity's ability to ensure that properties associated with the loan are managed and operated sufficiently. Loan reviews are completed by asset management and finance personnel and reviewed and approved by senior management.

REDWOOD TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2012

(Unaudited)

Note 3. Summary of Significant Accounting Policies (continued)

Based on the assigned impairment status, a loan is categorized as Pass, Watch List, or Workout. Pass loans are defined as loans that are performing in accordance with the contractual terms of the loan agreement. Watch List loans are defined as performing loans for which the timing of cost recovery is under review. Workout loans are defined as loans that we believe have a credit impairment that may lead to a realized loss. Workout loans are typically assessed for impairment on an individual basis. Where an individual commercial loan is impaired, we record an allowance to reduce the carrying value of the loan to the updated present value of expected future cash flows discounted at the loan's effective rate, with a corresponding charge to our consolidated statement of income.

For all commercial loans that are not individually impaired, we assess the commercial loan portfolio in aggregate for loan losses based on our expectation of credit losses inherent in the portfolio at the reporting date. Our expectation of credit losses is informed by, among other things:

Historical loss rates and past performance of similar loans in our own portfolio, if any;

Publicly available third-party reference loss rates on similar loans; and,

Trends in delinquencies and charge-offs in our own portfolio and among industry participants.

See *Note 7* for further discussion on the allowance for loan losses for commercial loans.

Real Estate Securities, at Fair Value

We classify our real estate securities as trading or available-for-sale securities. We use the prime or non-prime designation to categorize our residential securities based upon the general credit characteristics of the residential loans underlying each security at the time of origination. For example, prime residential loans are generally characterized by lower LTV ratios, and are made to borrowers with higher Fair Isaac Corporation (FICO) scores. Non-prime residential loans are generally characterized by higher LTV ratios and may have been made to borrowers with lower credit scores or impaired credit histories (while exhibiting the ability to repay their loans). Regardless of whether or not the loans backing a mortgage-backed security were designated as prime or non-prime at origination, there is a risk that the borrower may not be able to repay the loan.

Trading Securities

Trading securities include residential, commercial, and collateralized debt obligation (CDO) securities. Trading securities are carried at their estimated fair values. Coupon interest is recognized as interest income when earned and deemed collectible. All changes in fair value are reported through our consolidated statements of income in market valuation adjustments, net.

We primarily denote trading securities as those securities where we have adopted the fair value option. We currently account for certain securities at Redwood and all securities at Acacia entities as trading securities, at fair value.

Available-for-Sale (AFS) Securities

AFS securities include certain residential, commercial, and CDO securities. AFS securities are carried at their estimated fair values with cumulative unrealized gains and losses reported as a component of accumulated other comprehensive income in our consolidated statements of equity. Coupon interest is recognized as interest income when earned and deemed collectible, and the interest method is used to determine an effective yield to amortize purchase premiums, discounts, and fees associated with these securities into income over time. This requires us to project cash flows over the remaining life of each security and make assumptions with regards to interest rates, prepayment rates, the timing and amount of credit losses, and other factors. We review our cash flow projections on an ongoing basis and monitor these projections based on input and analyses received from external sources, internal models, and our own judgment and experience.

Table of Contents

REDWOOD TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2012

(Unaudited)

Note 3. Summary of Significant Accounting Policies (continued)

For an AFS security where its fair value has declined below its amortized cost basis, we evaluate the security for other-than-temporary impairment (OTTI). If we either (i) intend to sell the impaired security; (ii) will more likely than not be required to sell the impaired security before it recovers in value; or, (iii) do not expect to recover the impaired security's amortized cost basis even if we do not intend to sell the security the impairment is deemed an OTTI and we record the entire difference between the security's fair value and its amortized cost in our consolidated statements of income. Conversely, if none of these three conditions is met, we analyze the expected cash flows, or cost recovery of the security, to determine what, if any, OTTI is recognized through our consolidated statements of income. This analysis includes an assessment of any changes in the regulatory and/or economic environment that might affect the performance of the security.

If we conclude through our analysis that there has been no significant adverse change in our cash flow assumptions for the security, then the impairment is deemed temporary in nature and the associated difference between the security's fair value and its amortized cost basis is recorded as an unrealized loss through accumulated other comprehensive income, a component of equity. Alternatively, if we conclude that there has been a significant adverse change in our cash flow assumptions for the security, then the impairment is deemed an OTTI and we perform an additional analysis to determine what portion of OTTI, if any, should be recorded through our consolidated statements of income. This analysis entails discounting the security's cash flows to a present value using the prior period yield for the security to determine an expected recoverable value. The difference between this expected recoverable value and the amortized cost basis of the security is deemed to be the credit component of the OTTI that is recorded in our consolidated statements of income. The amortized cost of the security is then adjusted to the expected recoverable value, and the difference between this expected recoverable value and the fair value is deemed to be the non-credit component of the OTTI that is recorded to accumulated other comprehensive income. Future amortization and accretion for the security is computed based upon the new amortized cost basis.

See *Note 8* for further discussion on real estate securities.

Cash and Cash Equivalents

Cash and cash equivalents include non-restricted cash and highly liquid investments with original maturities of three months or less. At March 31, 2012, we did not have any significant concentrations of credit risk arising from cash deposits as all of our cash and cash equivalents were invested in FDIC-insured bank products.

Restricted Cash

Restricted cash primarily includes principal and interest payments that are collateral for, or payable to, owners of ABS issued by consolidated securitization entities. Restricted cash may also include cash retained in the Acacia or Sequoia securitization entities or in the resecuritization entity prior to the payments on or redemptions of outstanding ABS issued. At March 31, 2012, we did not have any significant concentrations of credit risk arising from restricted cash deposits as all of our restricted cash was held in custodial accounts or FDIC-insured bank products.

Accrued Interest Receivable

Accrued interest receivable includes interest that is due and payable to us. Cash interest is generally received within thirty days of recording the receivable. For financial assets where we have elected the fair value option, the associated accrued interest on these assets is measured at fair value. For financial assets where we have not elected the fair value option, the associated accrued interest carrying values approximate fair values.

Derivative Financial Instruments

Derivative financial instruments we currently utilize include contractual interest rate agreements, financial futures contracts, and To Be Announced (TBA) contracts. All derivative financial instruments are recorded at fair value in our consolidated balance sheets. Derivatives with a positive fair value to us are reported as an asset and derivatives with a negative fair value to us are reported as a liability. We classify each of our derivative financial

Table of Contents

REDWOOD TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2012

(Unaudited)

Note 3. Summary of Significant Accounting Policies (continued)

instruments as either (i) a trading instrument (no specific hedging designation for financial reporting purposes) or (ii) a hedge of a forecasted transaction or of the variability of cash flows to be received or paid related to a recognized asset or liability (cash flow hedge).

Changes in the fair values of derivatives accounted for as trading instruments, including any associated interest income or expense, are recorded in our consolidated statements of income through market valuation adjustments, net. Changes in the fair values of derivatives accounted for as cash flow hedges, to the extent they are effective, are recorded in accumulated other comprehensive income, a component of equity. Interest income or expense, and any ineffectiveness associated with these derivatives, are recorded as a component of net interest income in our consolidated statements of income. We measure the effective portion of cash flow hedges by comparing the change in fair value of the expected future variable cash flows of the derivative hedging instruments with the change in fair value of the expected future variable cash flows of the hedged liability.

We will discontinue cash flow hedge accounting if (i) we determine that the hedging derivative is no longer expected to be effective in offsetting changes in the cash flows of the designated hedged item; (ii) the derivative expires or is sold, terminated, or exercised; (iii) the derivative is de-designated as a cash flow hedge; or, (iv) it is probable that a forecasted transaction associated with the hedged item will not occur by the end of the originally specified time period. To the extent we de-designate a cash flow hedging relationship and the associated hedged item continues to exist, any unrealized gain or loss of the cash flow hedge at the time of de-designation remains in accumulated other comprehensive income and is amortized using the straight-line method through interest expense over the remaining life of the hedged liability.

Interest Rate Agreements

Interest rate agreements that we currently utilize include swaps, swaptions, and caps. Interest rate swaps are agreements in which (i) one counterparty exchanges a stream of fixed interest payments for another counterparty's stream of variable interest cash flows; or, (ii) each counterparty exchanges variable interest cash flows that are referenced to different indices. Interest rate swaptions are agreements that provide the owner the right but not the obligation to enter into an underlying interest rate swap with a counterparty in the future. Interest rate caps are agreements in which the owner receives payments at the end of each period for which the prevailing interest rate exceeds an agreed upon strike price. We enter into interest rate agreements primarily to reduce significant changes in our income or equity caused by interest rate volatility. Certain of these interest rate agreements may be designated as cash flow hedges.

Eurodollar Futures, Treasury Futures, and TBA Contracts

Eurodollar futures are futures contracts on time deposits denominated in U.S. dollars at banks outside the United States. Eurodollar futures, unlike our other derivatives, have maturities of only three months. Therefore, in order to achieve the desired interest rate offset necessary to manage our risk, consecutively maturing contracts are required, resulting in a stated notional amount that is typically higher than our other derivatives. Treasury futures are futures contracts on benchmark U.S. Treasury rates. TBA contracts are forward contracts to purchase mortgage-backed securities that will be issued by a U.S. government sponsored enterprise (GSE) in the future. We purchase or sell these derivatives to offset to varying degrees changes in the values of mortgage products for which we have exposure.

See Note 9 for further discussion on derivative financial instruments.

Deferred Tax Assets

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

Our deferred tax assets are generated by temporary differences in GAAP and taxable income at our taxable subsidiaries. These differences generally reflect differing accounting treatments for tax and GAAP, such as accounting for discount and premium amortization, credit losses, equity awards, asset impairments, and certain valuation estimates. As a result of these differences, we may recognize taxable income in periods prior to when we

Table of Contents

REDWOOD TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2012

(Unaudited)

Note 3. Summary of Significant Accounting Policies (continued)

recognize income for GAAP. When this occurs, we pay the tax liability and establish a deferred tax asset for GAAP. As the income is subsequently realized in future periods under GAAP, the deferred tax asset is reduced. We did not have a deferred tax asset at March 31, 2012 or December 31, 2011.

Deferred Securities Issuance Costs

Securities issuance costs are expenses associated with the issuance of long-term debt, the securitization we engaged in during 2011, and the ABS from the Sequoia securitization entities we sponsor and consolidate for financial reporting purposes. These expenses typically include underwriting, rating agency, legal, accounting, and other fees. ABS issuance costs associated with liabilities accounted for under the fair value option are expensed as incurred. ABS issuance costs associated with liabilities reported at cost are deferred. Deferred ABS issuance costs are reported on our consolidated balance sheets as deferred charges (an asset) and are amortized as an adjustment to interest expense using the interest method, based upon the actual and estimated repayment schedules of the related debt and ABS issued.

Other Assets

Other assets include mortgage servicing rights (MSRs), REO, margin receivable, fixed assets, principal receivable, and other prepaid expenses. REO property acquired through, or in lieu of, loan foreclosure is initially recorded at fair value, and subsequently reported at the lower of carrying amount or fair value (less estimated cost to sell). Changes in the fair value of an REO property that has a fair value at or below its carrying amount are recorded in our consolidated statements of income as a component of market valuation adjustments, net. Margin receivable reflects cash collateral Redwood has posted with various counterparties relating to our derivative and lending agreements with those counterparties, as applicable.

MSRs

We recognize MSRs through the acquisition of servicing rights released by third parties or through the retention of MSRs associated with residential loans which we have acquired and subsequently transferred to third parties. Typically our MSRs are directly acquired from loan originators or created through the transfer of loans to a Sequoia residential securitization sponsored by us that meets the GAAP criteria for sale accounting.

Our MSRs are held and managed at Redwood Residential Acquisition Corporation, a wholly-owned subsidiary of RWT Holdings, Inc., which is a taxable REIT subsidiary of ours. MSRs are initially recognized and carried at their estimated fair values. Changes in the fair value of MSRs are reported in mortgage banking activities, net, a component of our consolidated income statements.

See *Note 10* for further discussion on other assets.

Short-Term Debt

Short-term debt includes borrowings under master repurchase agreements and other forms of borrowings that expire within one year with various counterparties. These facilities may be unsecured or collateralized by cash, loans, or securities.

See *Note 11* for further discussion on short-term debt.

Accrued Interest Payable

Accrued interest payable includes interest that is due and payable to third parties. Interest is generally paid within one to three months of recording the payable, based upon our remittance requirements. For borrowings where we have elected the fair value option, the associated accrued interest on these liabilities is measured at fair value. For financial liabilities where we have not elected the fair value option, the associated accrued interest carrying values approximate fair values.

Table of Contents

REDWOOD TRUST, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2012

(Unaudited)

Note 3. Summary of Significant Accounting Policies (continued)

Asset-Backed Securities Issued

The majority of the liabilities reported on our consolidated balance sheets represents ABS issued by bankruptcy-remote entities sponsored by Redwood. Sequoia, Acacia, and the resecuritization assets are held in the custody of securitization trustees and are not owned by Redwood. These trustees collect principal and interest payments (less servicing and related fees) from the assets and make corresponding principal and interest payments to the ABS investors.

Sequoia ABS Issued

Sequoia ABS issued are carried at their unpaid principal balances net of any unamortized discount or premium.

Acacia ABS Issued

Acacia ABS issued are accounted for under the fair value option and carried at their estimated fair values. Changes in fair value (gains or losses) are reported in our consolidated statements of income through other market valuation adjustments, net.

Resecuritization ABS Issued

Resecuritization ABS issued are carried at their unpaid principal balances net of any unamortized discount or premium.

See *Note 12* for further discussion on ABS issued.

Long-Term Debt

Long-term debt includes trust preferred securities and subordinated notes at Redwood and is carried at its unpaid principal balance. Our long-term debt is unsecured with quarterly interest payments determined based upon a floating rate equal to the three-month London Interbank Offered Rate (LIBOR) plus a margin until it is redeemed in whole or matures at a future date.

See *Note 13* for further discussion on long-term debt.

Equity

Accumulated Other Comprehensive Income

Net unrealized gains and losses on real estate securities available-for-sale and interest rate agreements designated as cash flow hedges are reported as components of accumulated other comprehensive income on our consolidated statements of changes in equity and our statements of consolidated comprehensive income. Net unrealized gains and losses on securities and interest rate agreements held by our taxable subsidiaries that are reported in other comprehensive income are adjusted for the effects of taxation and may create deferred tax assets or liabilities.

Noncontrolling Interest

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

Noncontrolling interest represented the aggregate limited partnership interests in the Fund held by third parties and may appear in financial statements for periods prior to the first quarter of 2012. The noncontrolling interest is shown as a component of equity on our consolidated balance sheets, and the portion of income allocable to third parties is shown as net income (loss) attributable to noncontrolling interest in our consolidated statements of income. Equity attributable to noncontrolling interest is disclosed in our consolidated statements of changes in equity and our statements of consolidated comprehensive income.

Table of Contents

REDWOOD TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2012

(Unaudited)

Note 3. Summary of Significant Accounting Policies (continued)

Earnings Per Common Share

Basic earnings per common share (EPS) is computed by dividing net income allocated to common shareholders by the weighted average common shares outstanding. Net income allocated to common shareholders represents net income applicable to common shareholders, less income allocated to participating securities (as described below). Diluted earnings per common share is computed by dividing income allocated to common shareholders by the weighted average common shares outstanding plus amounts representing the dilutive effect of equity awards.

Accounting guidance on EPS defines unvested share-based payment awards containing nonforfeitable rights to dividends as participating securities that are included in computing EPS using the two-class method. The two-class method is an earnings allocation formula under which EPS is calculated for common stock and participating securities according to dividends declared and participating rights in undistributed earnings. Under this method, all earnings (distributed and undistributed) are allocated to participating securities and common shares based on their respective rights to receive dividends.

See Note 15 for further discussion on equity.

Incentive Plans

In May 2010, our shareholders approved an amendment to our previously amended 2002 Redwood Trust, Inc. Incentive Plan (Incentive Plan) for executive officers, employees, and non-employee directors. The amendment provided for an increase in the number of shares available for distribution under the plan. The Incentive Plan authorizes our Board of Directors (or a committee appointed by our Board of Directors) to grant incentive stock options (ISOs), non-qualifying stock options (NQSOs), performance stock units (PSUs), deferred stock units (DSUs), restricted stock, performance shares, performance units (including cash), stock appreciation rights, limited stock appreciation rights (awards), and dividend equivalent rights (DERs) to eligible recipients other than non-employee directors. These awards generally vest over a three- or four-year period. Non-employee directors are also provided annual awards under the Incentive Plan that generally vest immediately.

The cost of equity awards is determined in accordance with share-based payment accounting guidance and amortized over the vesting term using an accelerated method for equity awards granted prior to December 1, 2008. For equity awards granted after December 1, 2008, the cost of the awards is amortized over the vesting period on a straight-line basis. Timing differences between the accelerated and straight-line methods of amortization were determined to not be material to our consolidated financial statements.

Employee Stock Purchase Plan

In May 2009, our stockholders approved an amendment to our 2002 Redwood Trust, Inc. Employee Stock Purchase Plan (ESPP) to increase the number of shares available under the ESPP. The purpose of the ESPP is to give our employees an opportunity to acquire an equity interest in the Company through the purchase of shares of common stock at a discount. The ESPP allows eligible employees to purchase common stock at 85% of its fair value, subject to certain limits. Fair value as defined under the ESPP is the lesser of the closing market price of the common stock on the first day of the calendar year or the first day of the calendar quarter.

Executive Deferred Compensation Plan

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

In May 2002, our Board of Directors approved our 2002 Executive Deferred Compensation Plan (EDCP). The EDCP allows eligible employees and directors to defer portions of current salary and certain other forms of compensation. The Company matches some deferrals. Compensation deferred under the EDCP is recorded as a liability on our consolidated balance sheets. The EDCP allows for the investment of deferrals in either an interest crediting account or DSUs.

Table of Contents

REDWOOD TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2012

(Unaudited)

Note 3. Summary of Significant Accounting Policies (continued)

401(k) Plan

We offer a tax-qualified 401(k) Plan to all employees for retirement savings. Under this Plan, employees are allowed to defer and invest up to 100% of their cash earnings, subject to the maximum 401(k) Plan contribution limit set forth by the Internal Revenue Service. We match some employee contributions to encourage participation and to provide a retirement planning benefit to employees. Vesting of the 401(k) Plan matching contributions is based on the employee's tenure at the Company, and over time, an employee becomes increasingly vested in both prior and new matching contributions.

See *Note 16* for further discussion on equity compensation plans.

Taxes

We have elected to be taxed as a REIT under the Internal Revenue Code and the corresponding provisions of state law. To qualify as a REIT we must distribute at least 90% of our annual REIT taxable income to shareholders (not including taxable income retained in our taxable subsidiaries) within the time frame set forth in the tax code and also meet certain other requirements related to assets, income, and stock ownership. We assess our tax positions for all open tax years and determine whether we have any material unrecognized liabilities in accordance with FASB guidance on accounting for uncertainty in income taxes. We record these liabilities to the extent we deem them incurred. We classify interest and penalties on material uncertain tax positions as interest expense and operating expense, respectively, in our consolidated statements of income.

See *Note 18* for further discussion on taxes.

Recent Accounting Pronouncements

In May 2011, the FASB issued ASU 2011-04, *Fair Value Measurement: Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. This ASU converges fair value measurement and disclosure guidance in U.S. GAAP with the guidance concurrently issued by the International Accounting Standards Board. While the amendments in ASU 2011-04 do not modify the requirements for when fair value measurements apply, they do generally represent clarifications on how to measure and disclose fair value under ASC 820, Fair Value Measurement. This ASU is effective for interim and annual periods beginning after December 15, 2011 and should be applied prospectively. Our adoption of ASU 2011-04 in the first quarter of 2012 increased our disclosures related to fair value measurements, but did not have an effect on our consolidated financial statements.

Note 4. Principles of Consolidation

GAAP requires us to consider whether securitizations and other transfers of financial assets should be treated as sales or financings, as well as whether any variable interest entities (VIEs) – for example, certain legal entities often used in securitization and other structured finance transactions – should be included in our consolidated financial statements. The GAAP principles we apply require us to reassess our requirement to consolidate VIEs each quarter and therefore our determination may change based upon new facts and circumstances pertaining to each VIE. This could result in a material impact to our consolidated financial statements during subsequent reporting periods.

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 4. Principles of Consolidation (continued)***Analysis of Consolidated VIEs*

The VIEs we are required to consolidate include certain Sequoia securitization entities, the Acacia entities, and the entity formed in connection with the resecuritization transaction we engaged in during 2011 (resecuritization). Each of these entities is independent of Redwood and of each other and the assets and liabilities are not owned by and are not legal obligations of ours, although we are exposed to certain financial risks associated with our role as the sponsor or manager of these entities. The following table presents a summary of the assets and liabilities of these VIEs. Intercompany balances have been eliminated for purposes of this presentation.

*Assets and Liabilities of Consolidated VIEs at March 31, 2012***March 31, 2012**

We consolidate the assets and liabilities of certain Sequoia securitization entities issued prior to 2010, as we did not meet the sale criteria at the time we transferred financial assets to these entities. Had we not been the transferor and depositor of these securitizations, we would likely not have consolidated them as we determined that we are not the primary beneficiary of these entities in accordance with ASC 810-10. During 2010 and 2011, we sponsored three residential jumbo mortgage securitizations through our Sequoia program totaling \$908 million. We recorded the assets and liabilities of these entities on our consolidated balance sheets, as we did not meet the sale criteria at the time we transferred financial

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

assets to these entities. Additionally, we determined that we are the primary beneficiary of these VIEs as our ongoing loss mitigation and resolution responsibilities provide us with the power to direct the activities that most significantly impact the economic performance of these entities and our significant investment interests provide us with the obligation to absorb losses or the right to receive benefits that are significant.

We consolidate the assets and liabilities of the Acacia securitization entities, as we did not meet the sale criteria at the time we transferred financial assets to these entities and we are the primary beneficiary of these VIEs. Our ongoing asset management responsibilities and call options provide us with the power to direct the activities that most significantly impact the economic performance of these individual entities, and our equity investments in each entity provide us with the obligation to absorb losses or the right to receive benefits that are significant.

We consolidate the assets and liabilities of the resecuritization as we did not meet the sale criteria at the time the financial assets were transferred to this entity and we are the primary beneficiary. We transferred residential senior residential securities to Credit Suisse First Boston Mortgage Securities Corp., which subsequently sold

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 4. Principles of Consolidation (continued)**

them to CSMC 2011-9R, a resecuritization entity. In connection with this transaction, we acquired certain subordinate securities and variable rate, interest-only senior certificates. We engaged in this resecuritization primarily for the purpose of obtaining permanent non-recourse financing on a portion of our residential securities portfolio. Our credit risk exposure is largely unchanged as a result of engaging in the transaction, as we remain economically exposed to the financed securities through the first loss position in the structure.

During the first quarter of 2012, we sold variable interests in certain Sequoia securitization entities issued between 2001 and 2003 and determined that upon completion of an accounting analysis we should derecognize the associated assets and liabilities of these secured borrowings for financial reporting purposes. We deconsolidated \$307 million of residential loans and other assets and \$307 million of ABS issued and other liabilities, for a realized gain of \$7 million, which was recorded on our consolidated statement of income for the three months ended March 31, 2012. These gains were comprised of both recoveries of excess provisions for loan losses as well as cash raised by selling our interests in these entities. We maintained our intent to hold our economic interests in all remaining consolidated Sequoia entities at March 31, 2012.

Analysis of Unconsolidated VIEs Sponsored by Redwood

In the first quarter of 2012, we transferred residential loans to SEMT 2012-1 and SEMT 2012-2, which are Sequoia securitization entities sponsored by us. These transactions were accounted for as sales for financial reporting purposes as we surrendered control over the transferred assets. We also determined we were not the primary beneficiary of these VIEs as we lacked the power to direct the activities that will have the most significant economic impact on the entities. For the transferred loans where we held the servicing rights prior to the transfer, we recorded MSRs on our consolidated balance sheet at March 31, 2012, and classified those MSRs as Level 3 assets. We also retained senior and subordinate securities in both securitizations that we classified as Level 3 assets.

The following table presents information related to the SEMT 2012-1 and SEMT 2012-2 securitization transactions.

Securitization Activity Related to Unconsolidated VIEs Sponsored by Redwood

(Dollars in Thousands)	SEMT 2012-1 January 2012	SEMT 2012-2 March 2012
Principal balance of loans transferred	\$ 415,728	\$ 327,538
Trading securities retained, at fair value	11,938	9,238
AFS securities retained, at fair value	25,991	13,459
Gain on sale	1,812	5,553
MSRs recognized	570	1,009

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 4. Principles of Consolidation (continued)**

Our continuing involvement in these securitizations is limited to our receipt of the servicing fee income, advancing servicing fees to the securitization trust when a loan becomes delinquent, and the receipt of interest income associated with the securities we retained. The following table presents the cash flows between us and the unconsolidated VIEs sponsored by us for the three months ended March 31, 2012.

Cash Flows Related to Unconsolidated VIEs Sponsored by Redwood

(Dollars in Thousands)	Three Months Ended March 31, 2012	
Cash proceeds	\$	694,804
Servicing fees received		14
Servicing advances		-
Cash flows received on retained securities		1,028

The following table presents the key weighted-average assumptions to measure MSR at the date of securitization.

MSR Assumptions Related to Unconsolidated VIEs Sponsored by Redwood

At Date of Securitization	SEMT 2012-1	SEMT 2012-2
Prepayment speeds	5 - 50 %	5 -50 %
Discount rates	9 %	9 %

(1)

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

Maximum loss exposure from our involvement with unconsolidated VIEs pertains to the carrying value of our securities retained from these VIEs and represents estimated losses that would be incurred under severe, hypothetical circumstances, such as if the value of our interests and any associated collateral declines to zero. This does not include our ongoing exposure to representation and warranty claims associated with our initial transfer of loans into a securitization.

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 4. Principles of Consolidation (continued)**

The following table presents key economic assumptions and the sensitivity of the current fair value to immediate adverse changes in those assumptions at March 31, 2012.

Key Assumptions and Sensitivity Analysis for Unconsolidated VIEs Sponsored by Redwood**March 31, 2012**

(Dollars in Thousands)	Mortgage Servicing Rights	Interest-only Securities	Subordinate Securities
Fair value at March 31, 2012	\$ 1,562	\$ 21,865	\$ 39,718

Decrease in fair value from:			
10% higher losses	N/A	\$ 11	\$ 134
25% higher losses	N/A	30	313

Analysis of Third-Party VIEs

Third-party VIEs are securitization entities in which we maintain an economic interest but do not sponsor. Our economic interest may include several securities from the same third-party VIE, and in those cases, the analysis is performed in consideration of all of our interests. The following table presents a summary of our interest in third-party VIEs at March 31, 2012, grouped by collateral type and ownership interest.

Third-Party VIE Summary**March 31, 2012**

(Dollars in Thousands)

Fair Value Number of VIEs

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

Real estate securities at Redwood			
Residential			
Senior	\$	379,446	48
Re-REMIC		154,661	16
Subordinate		74,700	153
Commercial		5,838	8
CDO		64	6
Total Third-Party Real Estate Securities	\$	614,709	231

We determined that we are not the primary beneficiary of any third-party residential, commercial, or CDO entities, as we do not have the required power to direct the activities that most significantly impact the economic performance of these entities. Specifically, we do not service or manage these entities or otherwise hold decision making powers that are significant. As a result of this assessment, we do not consolidate any of the underlying assets and liabilities of these third-party VIEs we only account for our specific interests in each.

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 4. Principles of Consolidation (continued)**

Our assessments of whether we are required to consolidate a VIE may change in subsequent reporting periods based upon changing facts and circumstances pertaining to each VIE. Any related accounting changes could result in a material impact to our financial statements.

Note 5. Fair Value of Financial Instruments

For financial reporting purposes, we follow a fair value hierarchy established under GAAP that is used to determine the fair value of financial instruments. This hierarchy prioritizes relevant market inputs in order to determine an exit price, or the price at which an asset could be sold or a liability could be transferred in an orderly process that is not a forced liquidation or distressed sale at the date of measurement. Level 1 inputs are observable inputs that reflect quoted prices for identical assets or liabilities in active markets. Level 2 inputs are observable inputs other than quoted prices for an asset or liability that are obtained through corroboration with observable market data. Level 3 inputs are unobservable inputs (e.g., our own data or assumptions) that are used when there is little, if any, relevant market activity for the asset or liability required to be measured at fair value.

In certain cases, inputs used to measure fair value fall into different levels of the fair value hierarchy. In such cases, the level at which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement. Our assessment of the significance of a particular input requires judgment and considers factors specific to the asset or liability being measured.

The following table presents the carrying values and estimated fair values of assets and liabilities that are required to be recorded or disclosed at fair value at March 31, 2012 and December 31, 2011.

(In Thousands)	March 31, 2012		December 31, 2011

A description of the instruments measured at fair value as well as the general classification of such instruments pursuant to the Level 1, Level 2, and Level 3 valuation hierarchy is listed below. With respect to our use of unobservable (Level 3) inputs to determine the fair value of financial instruments on our consolidated balance sheets, a significant increase or decrease in any of these inputs such as anticipated credit losses, prepayment speeds, interest rates, or other valuation assumptions in isolation, would likely result in a significantly lower or higher fair value measurement.

Residential loans

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

Residential loan fair values are determined based on either an exit price to securitization or the whole loan market. For loans priced based on exit to securitization, significant inputs in the valuation analysis are predominantly Level 3 in nature, due to the limited availability of market quotes on new issuance residential mortgage-backed securities (RMBS) and related inputs. Relevant market indicators that are factored into the analyses include third-party RMBS sales, pricing points for secondary sales of our past issued RMBS, Agency issued RMBS yields, indexed swap yields, Rating Agency guidance on expected credit enhancement levels for new issue RMBS transactions, interest rates, and prepayment speeds (Level 3). For loans priced based on exit to the whole loan market, significant inputs in the valuation analysis are predominantly Level 3 in nature. Relevant market indicators that are factored into the analyses include prices on recent sales of our own whole loans, indexed swap yields, interest rates, and prepayment speeds (Level 3).

Commercial loans

Commercial loan fair values are determined by available market quotes and discounted cash flow analyses (Level 3). The availability of market quotes for all of our commercial loans is limited. Any changes in fair value are primarily a result of instrument specific credit risk.

Real estate securities

Real estate securities are residential, commercial, CDO, and other asset-backed securities that are illiquid in nature and trade infrequently. Fair values are determined by discounted cash flow analyses and other valuation techniques using market pricing assumptions that are confirmed by third-party dealer/pricing indications, to the extent available. Significant inputs in the valuation analysis are predominantly Level 3 in nature, due to the lack of readily available market quotes and related inputs. Relevant market indicators that are factored into the analyses include bid/ask spreads,

Table of Contents

REDWOOD TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2012

(Unaudited)

Note 5. Fair Value of Financial Instruments (continued)

credit losses, interest rates, and prepayment speeds. Estimated fair values are based on applying the market indicators to generate discounted cash flows (Level 3).

We request and consider indications of value (marks) from third-party dealers to assist us in our valuation process. For March 31, 2012, we received dealer marks on 74% of our securities. In the aggregate, our internal valuations of the securities on which we received dealer marks were 5% lower (i.e., more conservative) than the aggregate dealer marks.

Derivative assets and liabilities

Our derivative instruments include interest rate agreements, TBAs, and financial futures. Fair values of derivative instruments are determined using quoted prices from active markets when available or valuation models and are verified by valuations provided by dealers active in derivative markets. TBA and financial futures fair values are generally obtained using quoted prices from active markets (Level 1). Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, credit curves, measures of volatility, prepayment rates, and correlations of such inputs. Model inputs for interest rate agreements can generally be verified and model selection does not involve significant management judgment (Level 2). For other derivatives, valuations are based on various factors such as liquidity, bid/offer spreads, and credit considerations for which we rely on available market evidence. In the absence of such evidence, management's best estimate is used (Level 3).

Cash and cash equivalents

Cash and cash equivalents include cash on hand and highly liquid investments with original maturities of three months or less. Fair values equal carrying values.

Restricted cash

Restricted cash primarily includes interest-earning cash balances in ABS entities for the purpose of distribution to bondholders or limited partners, and reinvestment. Due to the short-term nature of the restrictions, fair values approximate carrying values.

Accrued interest receivable and payable

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

Accrued interest receivable and payable includes interest due on our assets and payable on our liabilities. Due to the short-term nature of when these interest payments will be received or paid, fair values approximate carrying values.

Short-term debt

Short-term debt includes our credit facilities that mature within one year. Short-term debt is generally at an adjustable rate. Fair values approximate carrying values.

ABS issued

ABS issued includes asset-backed securities issued through our Sequoia, Acacia, and resecuritization programs. These instruments are illiquid in nature and trade infrequently, if at all. Fair values are determined by discounted cash flow analyses and other valuation techniques using market pricing assumptions that are confirmed by third-party dealer/pricing indications, to the extent available. Significant inputs in the valuation analysis are predominantly Level 3, due to the nature of these instruments and the lack of readily available market quotes. Relevant market indicators factored into the analyses include dealer price indications to the extent available, bid/ask spreads, external spreads, collateral credit losses, interest rates and collateral prepayment speeds. Estimated fair values are based on applying the market indicators to generate discounted cash flows (Level 3).

We request and consider indications of value (marks) from third-party dealers to assist us in our

Table of Contents

REDWOOD TRUST, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2012

(Unaudited)

Note 5. Fair Value of Financial Instruments (continued)

valuation process. For March 31, 2012, we received dealer marks on 95% of our ABS issued. Our internal valuations of our ABS issued on which we received dealer marks were 4% higher (i.e., more conservative) than the aggregate dealer marks.

Long-term debt

Long-term debt includes our subordinated notes and trust preferred securities. Fair values are determined using comparable market indicators of current pricing. Significant inputs in the valuation analysis are predominantly Level 3 due to the nature of these instruments and the lack of readily available market quotes. Estimated fair values are based on applying the market indicators to generate discounted cash flows (Level 3).

MSRs

MSRs include the rights to service mortgage loans for others. Significant inputs in the valuation analysis are predominantly Level 3, due to the nature of these instruments and the lack of readily available market quotes. These inputs include market discount rates, prepayment speeds and default rates of serviced loans, and the market cost of servicing. Changes in the fair value of MSRs occur primarily due to the collection/realization of expected cash flows, as well as changes in valuation inputs and assumptions. Estimated fair values are based on applying the inputs to generate the net present value of estimated servicing income, which is what we believe market participants would use to estimate fair value (Level 3).

REO

REO includes properties owned in satisfaction of foreclosed loans. Fair values are determined using available market quotes, appraisals, broker price opinions, comparable properties, or other indications of value (Level 3).

Margin receivable

Margin receivable reflects cash collateral Redwood has posted with our various derivative and lending counterparties as required to satisfy the minimum margin requirements. Fair values approximate carrying values.

Note 6. Residential Loans

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

We acquire residential loans from third-party originators. During the three months ended March 31, 2012, we purchased \$658 million (principal value) of residential loans primarily in connection with our Sequoia securitization program. The following table summarizes the classifications and carrying value of the residential loans owned at Redwood and at consolidated Sequoia entities at March 31, 2012 and December 31, 2011.

March 31, 2012

(In Thousands)

	Redwood		Sequoia		Total
Held-for-sale	\$ 303,106	\$	-	\$	303,106

December 31, 2011

(In Thousands)

	Redwood		Sequoia		Total
Held-for-sale	\$ 395,237	\$	-	\$	395,237
Held-for-investment	-		3,799,648		3,799,648
Total Residential Loans	\$ 395,237	\$	3,799,648	\$	4,194,885

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 6. Residential Loans (continued)**

We do not currently service any residential loans, although at March, 31, 2012, we did maintain MSRs that provided us with the rights to service \$98 million (principal value) of consolidated loans purchased from third-party originators.

Residential Loans Held-for-Sale

At March 31, 2012, there were 318 residential loans held-for-sale with \$303 million in outstanding principal value and a lower of cost or fair value of \$303 million. During the three months ended March 31, 2012 and 2011, we recorded valuation adjustments for residential loans held-for-sale of \$93 thousand and \$3 thousand, respectively. On December 31, 2011, we reclassified \$393 million (recorded investment) of loans previously classified as held-for-investment to held-for-sale. We did not record a valuation adjustment related to this reclassification. At December 31, 2011, loans held-for-sale had an outstanding principal value of \$395 million and a lower of cost or fair value of \$395 million.

Residential Loans Held-for-Investment

The following table details the carrying value for residential loans held-for-investment at March 31, 2012 and December 31, 2011. These loans are owned at Sequoia securitization entities that we consolidate for financial reporting purposes.

(In Thousands)	March 31, 2012	December 31, 2011
Principal balance	\$ 3,372,830	\$ 3,829,847
Unamortized premium, net	34,277	36,682
Recorded investment	3,407,107	3,866,529
Allowance for loan losses	(59,155)	(66,881)
Carrying Value	\$ 3,347,952	\$ 3,799,648

Of the \$3.3 billion of principal value and \$34 million of unamortized premium on loans held-for-investment at March 31, 2012, \$1.2 billion of principal value and \$21 million of unamortized premium relate to residential loans acquired prior to July 1, 2004. During the first three months of 2012, 2% of these residential loans prepaid and we amortized 3% of the premium based upon the accounting elections we apply. For residential loans acquired after July 1, 2004, the principal value was \$2.2 billion and the unamortized premium was \$13 million. During the first three months of 2012, 5% of these loans prepaid and we amortized 3% of the premium. During the three months ended March 31, 2012, we derecognized \$308 million of loan principal value and \$1 million of unamortized premium related to the deconsolidation of five Sequoia securitization entities.

Of the \$3.8 billion of principal value and \$37 million of unamortized premium on loans held-for-investment at December 31, 2011, \$1.5 billion of principal value and \$23 million of unamortized premium relate to residential loans acquired prior to July 1, 2004. For residential loans acquired after July 1, 2004, the principal value was \$2.3 billion and the unamortized premium was \$14 million.

Credit Characteristics of Residential Loans Held-for-Investment

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

As a percentage of total recorded investment, 99% of residential loans held-for-investment at March 31, 2012 were first lien, predominately prime-quality loans at the time of origination. The remaining 1% of loans were second lien, home equity lines of credit. The weighted average original loan-to-value (LTV) ratio for our residential loans held-for-investment outstanding at March 31, 2012 was 66%. The weighted average FICO score for the borrowers of these loans was 738 at the time the loans were originated.

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 6. Residential Loans (continued)**

We consider the year of origination of our residential loans held-for-investment to be a general indicator of credit performance as loans originated in specific years often had similar product and credit characteristics. The following table displays the recorded investment and year of origination for residential loans held-for-investment at March 31, 2012 and December 31, 2011.

(In Thousands)	March 31, 2012	December 31, 2011
2003 & Earlier	\$ 1,416,662	\$ 1,771,111
2004	1,029,269	1,045,815
2005	128,375	129,163
2006	179,712	181,017
2007	62,151	63,301
2008	-	-
2009	108,819	144,116
2010	308,864	343,278
2011	173,255	188,728
Total Recorded Investment	\$ 3,407,107	\$ 3,866,529

Allowance for Loan Losses on Residential Loans

For residential loans held-for-investment, we establish and maintain an allowance for loan losses. The allowance includes a component for loans collectively evaluated for impairment that includes pools of residential loans owned at Sequoia securitization entities, and a component for loans individually evaluated for impairment that includes modified residential loans at Sequoia entities that have been determined to be troubled debt restructurings.

Activity in the Allowance for Loan Losses on Residential Loans

The following table summarizes the activity in the allowance for loan losses for the three months ended March 31, 2012 and 2011.

(In Thousands)	Three Months Ended March 31,	
	2012	2011
Balance at beginning of period	\$ 66,881	\$ 62,432
Charge-offs, net	(3,148)	(2,317)
Provision for loan losses	-	2,807
Deconsolidation adjustment	(4,578)	-

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

Balance at End of Period	\$	59,155	\$	62,922
---------------------------------	-----------	---------------	-----------	---------------

During the three months ended March 31, 2012 and 2011, there were \$3 million and \$2 million of charge-offs, respectively, of residential loans that reduced our allowance for loan losses. These charge-offs arose from \$10 million and \$8 million of defaulted loan principal, respectively.

Residential Loans Collectively Evaluated for Impairment

We collectively evaluate most of our residential loans for impairment. The following table summarizes the balances for loans collectively evaluated for impairment at March 31, 2012 and December 31, 2011.

(In Thousands)	March 31, 2012	December 31, 2011
Principal balance	\$ 3,357,195	\$ 3,815,010
Recorded investment	3,392,281	3,852,455
Related allowance	56,195	64,069

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 6. Residential Loans (continued)**

The following table summarizes the recorded investment and past due status of residential loans collectively evaluated for impairment at March 31, 2012 and December 31, 2011.

(In Thousands)	30-59 Days Past Due	60-89 Days Past Due	90+ Days Past Due	Current	Total Loans
March 31, 2012	\$ 52,988	\$ 9,969	\$ 121,878	\$ 3,207,446	\$ 3,392,281
December 31, 2011	58,954	20,938	135,671	3,636,892	3,852,455

We establish the allowance for residential loan losses based primarily on the characteristics of the loan pools underlying the securitization entities that own the loans, including loan product types, credit characteristics, and origination years. The collective analysis is further divided into two segments. The first segment reflects our estimate of losses on delinquent loans within each loan pool. These loss estimates are determined by applying the loss factors described in *Note 3* to the delinquent loans, including our expectations of the timing of defaults and the loss severities we expect once defaults occur. The second segment relates to our estimate of losses incurred on nondelinquent loans within each loan pool. This estimate is based on losses we expect to realize over a 23-month loss confirmation period, which is based on our historical loss experience as well as consideration of the loss factors described in *Note 3*.

Residential Loans Individually Evaluated for Impairment

If we determine that a loan meets the criteria of a TDR, we remove it from the general loan pools used for determining the allowance for residential loan losses and assess it for impairment on an individual basis. This assessment is based primarily on whether an adverse change in the expected future cash flows resulted from the restructuring. The average recorded investment of loans individually evaluated for impairment for the three months ended March 31, 2012 and 2011, was \$15 million and \$13 million, respectively. For the three months ended March 31, 2012, we recorded \$110 thousand interest income on individually impaired loans. For the three months ended March 31, 2011, we recorded \$41 thousand interest income on individually impaired loans.

The following table summarizes the balances for loans individually evaluated for impairment, all of which had an allowance, at March 31, 2012 and December 31, 2011.

(In Thousands)	March 31, 2012	December 31, 2011
Principal balance	\$ 15,635	\$ 14,837
Recorded investment	14,826	14,074
Related allowance	2,960	2,812

The following table summarizes the recorded investment and past due status of residential loans individually evaluated for impairment at March 31, 2012 and December 31, 2011.

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

<i>Troubled Debt Restructurings</i>					

As part of the loss mitigation efforts undertaken by servicers of residential loans owned at Sequoia securitization entities, an increasing number of loan modifications have been completed to help make mortgage loans more affordable for qualifying borrowers and potentially reduce a future impairment. For the three months ended March 31, 2012 and 2011, all of the loan modifications determined to be TDRs were either: (i) conversions of a floating rate mortgage loan into a fixed rate mortgage loan; or, (ii) reductions in the contractual interest rates of a mortgage loan paired with capitalization of accrued interest.

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 6. Residential Loans (continued)**

Note 7. Commercial Loans

We invest in commercial loans that we originate and service as well as loans that we acquire from third-party originators. Some of these loans are financed through the Acacia entities that we sponsor. The following table summarizes the classifications and carrying value of commercial loans at March 31, 2012 and December 31, 2011.

March 31, 2012			
(In Thousands)	Redwood	Acacia	Total Loans
Fair value	\$ -	\$ 12,103	\$ 12,103
Held-for-investment	178,415	-	178,415
Total Commercial Loans	\$ 178,415	\$ 12,103	\$ 190,518

December 31, 2011			
(In Thousands)	Redwood	Acacia	Total Loans
Fair value	\$ -	\$ 12,129	\$ 12,129
Held-for-investment	157,726	-	157,726
Total Commercial Loans	\$ 157,726	\$ 12,129	\$ 169,855

Commercial Loans at Fair Value

Commercial loans at fair value are owned at the consolidated Acacia securitization entities. At March 31, 2012, there were three commercial loans at fair value with an aggregate outstanding principal value of \$14 million and an aggregate fair value of \$12 million. At December 31, 2011, there were three commercial loans at fair value with an aggregate outstanding principal value of \$14 million and an aggregate fair value of \$12 million.

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 7. Commercial Loans (continued)*****Commercial Loans Held-for-Investment***

Commercial loans held-for-investment includes loans we originate and preferred equity investments we make or, in either case, acquire from third-parties. The loans are typically mezzanine loans that are secured by a borrower's ownership interest in a single purpose entity that owns commercial property, rather than a lien on the commercial property. The preferred equity investments are typically preferred equity interests in a single purpose entity that owns commercial property and are included within, and referred to herein, as commercial loans held-for-investment due to the fact that their risks and payment characteristics are nearly equivalent to commercial mezzanine loans.

The following table provides additional information for our commercial loans held-for-investment at March 31, 2012 and December 31, 2011.

(In Thousands)	March 31, 2012	December 31, 2011
Principal balance	\$ 182,803	\$ 158,847
Unamortized discount, net	(3,506)	(513)
Recorded investment	179,297	158,334
Allowance for loan losses	(882)	(608)
Carrying Value	\$ 178,415	\$ 157,726

At March 31, 2012, there were 19 commercial loans held-for-investment with an outstanding principal value of \$183 million and a carrying value of \$178 million. Of the \$179 million of recorded investment in commercial loans held-for-investment at March 31, 2012, 15% was originated in 2012, 68% was originated in 2011, 17% was originated in 2010, and less than 1% was acquired in 2004. At December 31, 2011, there were 15 commercial loans held-for-investment with an outstanding principal value of \$159 million and a carrying value of \$158 million. Of the \$158 million of recorded investment in commercial loans held-for-investment at December 31, 2011, 81% was originated in 2011, 19% was originated in 2010, and less than 1% was acquired in 2004.

Allowance for Loan Losses on Commercial Loans

For commercial loans classified as held-for-investment, we establish and maintain an allowance for loan losses. The allowance includes a component for loans collectively evaluated for impairment and a component for loans individually evaluated for impairment.

Activity in the Allowance for Loan Losses on Commercial Loans

The following table summarizes the activity in the allowance for commercial loan losses for the three months ended March 31, 2012 and 2011.

(In Thousands)	Three Months Ended March 31,	
	2012	2011
Balance at beginning of period	\$ 608	\$ -
Charge-offs, net	-	-

Balance at End of Period	\$ 882	\$ -

Commercial Loans Collectively Evaluated for Impairment

We recorded an allowance for loan losses based on our estimate of credit losses inherent in our portfolio at the reporting date. Our estimate of credit losses is informed by loss rates and delinquency trends. At March 31, 2012 and December 31, 2011, all of the commercial loans collectively evaluated for impairment were current and were

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 7. Commercial Loans (continued)**

assigned an impairment status of Pass. The following table summarizes the balances for loans collectively evaluated for impairment at March 31, 2012 and December 31, 2011.

(In Thousands)	March 31, 2012	December 31, 2011
Principal balance	\$ 182,803	\$ 158,847
Recorded investment	179,297	158,334
Related allowance	882	608

Commercial Loans Individually Evaluated for Impairment

We did not have any loans individually evaluated for impairment for either of the three months ended March 31, 2012 and 2011.

Note 8. Real Estate Securities

We invest in third-party residential, commercial, and CDO securities. The following table presents the fair values of our real estate securities by collateral type and entity at March 31, 2012 and December 31, 2011.

March 31, 2012 (In Thousands)	Redwood	Acacia	Total Securities
Residential	\$ 1,002,681	\$ 172,022	\$ 1,174,703

Total Real Estate Securities	\$ 750,736	\$ 231,101	\$ 981,837

Senior securities are those interests in a securitization that have the first right to cash flows and are last in line to absorb losses. Re-REMIC securities, as presented herein, were created through the resecuritization of certain senior interests to provide additional credit support to those

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

interests. These re-REMIC securities are therefore subordinate to the remaining senior interest, but senior to any subordinate tranches of the securitization from which they were created. Subordinate securities are all interests below senior and re-REMIC interests.

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 8. Real Estate Securities (continued)*****Trading Securities***

We elected the fair value option for certain securities at Redwood and the Acacia entities, and classify them as trading securities. The unpaid principal balance of these trading securities was \$1.03 billion and \$1.11 billion at March 31, 2012 and December 31, 2011, respectively. The following table presents trading securities by collateral type and ownership entity at March 31, 2012 and December 31, 2011.

Subordinate Securities		
Residential prime	105,788	58,717
Residential non-prime	8,142	11,153
Commercial	5,838	5,445
CDO	50	50
Total Subordinate Securities	119,818	75,365
Total AFS Securities	\$ 966,541	\$ 728,695

Of the senior securities shown above at March 31, 2012 and December 31, 2011, \$181 million and \$175 million, respectively, of prime securities and \$152 million and \$150 million, respectively, of non-prime securities were financed through a non-recourse resecuritization entity, as discussed in *Note 4*.

We often purchase AFS securities at a discount to their outstanding principal values. To the extent we purchase an AFS security that has a likelihood of incurring a loss, we generally do not amortize into income the portion of the purchase discount that we do not expect to collect due to the inherent credit risk of the security. We may also

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 8. Real Estate Securities (continued)**

expense a portion of our investment in the security to the extent we believe that principal losses will exceed the purchase discount. We designate any amount of unpaid principal balance that we do not expect to receive and thus do not expect to earn or recover as a credit reserve on the security. Any remaining net unamortized discounts or premiums on the security are amortized into income over time using the interest method.

At March 31, 2012, there were \$4 million of AFS residential securities that had contractual maturities greater than five years but less than ten years, and the remainder of our real estate securities had contractual maturities greater than ten years.

The following table presents the components of carrying value (which equals fair value) of AFS securities at March 31, 2012 and December 31, 2011.

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 8. Real Estate Securities (continued)*****Credit Characteristics of AFS Securities***

Of the \$236 million of credit reserve on our residential securities at March 31, 2012, \$47 million was related to residential senior securities, \$64 million was related to residential re-REMIC securities, and \$125 million was related to residential subordinate securities. The loans underlying our residential senior securities totaled \$17 billion at March 31, 2012, and consisted of \$11 billion prime and \$6 billion non-prime credit quality at time of origination. Serious delinquencies at March 31, 2012, were 11.30% of outstanding principal balances. The loans underlying all of our residential re-REMIC securities totaled \$8 billion at March 31, 2012, and were all prime credit quality at time of origination. Serious delinquencies at March 31, 2012 were 10.08% of outstanding principal balances. The loans underlying our residential subordinate securities totaled \$21 billion at March 31, 2012, and consisted of \$20 billion prime and \$1 billion non-prime. Serious delinquencies at March 31, 2012, were 5.67% of outstanding principal balances.

The loans underlying our commercial subordinate securities totaled \$8 billion at March 31, 2012, and consist primarily of office (30%), retail (37%), and multifamily (13%) loans. Serious delinquencies (60+ days, in foreclosure or REO) at March 31, 2012 were 5.8% of current principal balances.

AFS Securities with Unrealized Losses

Total Securities	\$ 242,746	\$ (22,014)	\$ 220,732	\$ 76,335	\$ (11,194)	\$ 65,141

At March 31, 2012, after giving effect to purchases, sales, and extinguishments due to credit losses, our consolidated balance sheet included 402 AFS securities, of which 102 were in an unrealized loss position and 27 were in a continuous unrealized loss position for twelve consecutive months or longer. At December 31, 2011, our consolidated balance sheet included 425 AFS securities, of which 139 were in an unrealized loss position and 26 were in a continuous unrealized loss position for twelve consecutive months or longer.

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 8. Real Estate Securities (continued)*****Evaluating AFS Securities for Other-than-Temporary Impairments***

When the fair value of an AFS security is below its cost basis, we evaluate the security for OTTI. Part of this evaluation is based upon adverse changes in the assumptions used to value the security. The table below summarizes the significant valuation assumptions we used for our AFS securities at March 31, 2012.

Significant Valuation Assumptions

March 31, 2012	Range for Securities		
	Prime	Non-prime	Commercial
Prepayment rates	4 - 15 %	3 - 15 %	N/A
Loss severity	17 - 56 %	19 - 61 %	33 - 50 %
Projected losses	0 - 37 %	6 - 41 %	2 - 8 %

The credit component of OTTI is recognized through our consolidated statements of income as a component of other market valuation adjustments, net, while the non-credit component of OTTI is recognized through accumulated other comprehensive income, a component of equity. Total credit OTTI for the three months ended March 31, 2012 and 2011 was less than \$1 million and \$3 million, respectively. Total non-credit OTTI for the three months ended March 31, 2012 and 2011 was less than \$1 million and \$1 million, respectively. The following table details the activity related to the credit component of OTTI (i.e., OTTI in either current earnings or retained earnings) for AFS securities that also had a non-credit component and were still held at March 31, 2012 and 2011.

Activity of Credit Component of Other-than-Temporary Impairments

	Three Months Ended	
	March 31, 2012	2011
(In Thousands)		
Balance at beginning of period	\$ 78,126	\$ 121,016
Additions		
Initial credit impairments	106	14
Subsequent credit impairments	-	181
Reductions		
Securities sold, or expected to sell	-	(12,317)
Securities with no outstanding principal at period end	(4,534)	(7,946)
Balance at End of Period	\$ 73,698	\$ 100,948

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

The credit component is reduced if we sell, intend to sell, or believe we will be required to sell previously credit-impaired debt securities. Additionally, the credit loss component is reduced if we receive or expect to receive cash flows in excess of what we previously expected to receive over the remaining life of the credit-impaired debt security, the security matures, or the security experiences an event (such as full prepayment or principal losses) such that the outstanding principal is reduced to zero.

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 8. Real Estate Securities (continued)****Gross Realized Gains and Losses on AFS Securities**

Gains and losses from the sale of AFS securities are recorded as realized gains, net, in our consolidated statements of income. The following table presents the gross realized gains on sales and calls of AFS securities for the three months ended March 31, 2012 and 2011.

(In Thousands)	Three Months Ended March 31,	
	2012	2011
Gross realized gains - sales	\$ 7,784	\$ 7,313
Gross realized gains - calls	113	132
Gross realized losses - sales	(1,600)	(3,358)
Gross realized losses - calls	-	(223)
Total Realized Gains on Sales and Calls of AFS Securities, net	\$ 6,297	\$ 3,864

Note 9. Derivative Financial Instruments

The following table presents the fair value and notional amount of derivative financial instruments held by Redwood and the consolidated Acacia entities at March 31, 2012 and December 31, 2011. The derivatives held at Acacia entities are not assets or legal obligations of Redwood.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2012

(Unaudited)

Note 9. Derivative Financial Instruments (continued)

Risk Management Derivatives

To offset, to varying degrees, the changes in the value of mortgage products to which we have exposure, we may enter into derivative contracts.

Certain Risks Related to Unsecuritized Residential and Commercial Loans at Redwood

In order to manage certain risks associated with residential loans we own or plan to acquire and securitize and commercial loans we invest in, at March 31, 2012, we were party to interest rate agreements with an aggregate notional amount of \$157 million, TBA contracts sold with a notional amount of \$312 million, and financial futures contracts with an aggregate notional amount of \$288 million. Net market valuation adjustments on these derivatives were negative \$3 million and positive \$2 million for the three months ended March 31, 2012 and 2011, respectively.

Certain Risks Related to Liabilities at Acacia Entities

Net valuation adjustments on interest rate agreements at Acacia were negative \$3 million and negative \$1 million for the three months ended March 31, 2012 and 2011, respectively.

Derivatives Designated as Cash Flow Hedges

To hedge the variability in interest expense related to our long-term debt and certain adjustable-rate securitization entity liabilities that are included in our consolidated balance sheets for financial reporting purposes, we designated interest rate swaps as cash flow hedges during 2010 and during the second quarter of 2011 with an aggregate notional balance of \$165 million. For the three months ended March 31, 2012, these hedges increased in value by \$13 million, which was recorded as an increase to accumulated other comprehensive income, a component of equity. During the first quarter of 2012, we exited swaps with an aggregate notional balance of \$20 million that had been previously designated against certain consolidated liabilities. Accumulated other comprehensive loss of less than \$1 million will be amortized into interest expense, a component of our consolidated income statements, over the remaining life of the hedged liabilities.

For interest rate agreements currently or previously designated as cash flow hedges, our total unrealized loss reported in accumulated other comprehensive income was \$53 million at March 31, 2012 and \$67 million at December 31, 2011. For both the three months ended March 31, 2012 and 2011, we reclassified \$1 million of unrealized losses on derivatives to interest expense. We estimate that we will reclassify \$1 million of unrealized losses to interest expense during each quarter of 2012.

The following table illustrates the impact on interest expense of our interest rate agreements accounted for as cash flow hedges for the three months ended March 31, 2012 and 2011.

Impact on Interest Expense of Our Interest Rate Agreements Accounted for as Cash Flow Hedges

Three Months Ended March 31,

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

(In Thousands)	2012	2011
Net interest expense on cash flow interest rate agreements	\$ (1,516)	\$ (1,538)
Realized net expense due to net ineffective portion of hedges	(39)	(1)
Realized net losses reclassified from other comprehensive income	(1,036)	(1,064)
Total Interest Expense	\$ (2,591)	\$ (2,603)

Derivative Counterparty Credit Risk

We incur credit risk to the extent that counterparties to our derivative financial instruments do not perform their obligations under specified contractual agreements. If a derivative counterparty does not perform, we may not receive the proceeds to which we may be entitled under these agreements. To mitigate this risk, we enter into

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 9. Derivative Financial Instruments (continued)**

agreements that are either a) transacted on a national exchange or b) transacted with counterparties that are either i) designated by the Federal Reserve Bank of New York as a primary government dealer, ii) affiliates of primary government dealers, or iii) rated A or higher by a Nationally Recognized Statistical Rating Organization (NRSRO). We also attempt to transact with several different counterparties in order to reduce our specific counterparty exposure. We consider counterparty risk as part of our fair value assessments of all derivative financial instruments.

At March 31, 2012, Redwood had outstanding derivative agreements with eight bank counterparties and Acacia entities had outstanding derivative agreements with five bank counterparties. At March 31, 2012, Redwood was in compliance with International Swaps and Derivatives Association (ISDA) agreements governing its open derivative positions. At March 31, 2012, all Acacia entities were in compliance with ISDA agreements governing their open derivative positions, with the exception of an early termination event at March 31, 2012, with respect to one ISDA agreement at one Acacia entity due to that entity's failure to make a required swap payment. This liability is not a legal obligation of Redwood.

Note 10. Other Assets

Other assets at March 31, 2012 and December 31, 2011, are summarized in the following table.

Other Assets

(In Thousands)	March 31, 2012	December 31, 2011
REO	\$ 5,498	\$ 5,669
Fixed assets and leasehold improvements	1,104	2,048
Margin posted, net	52,072	71,976
Mortgage servicing rights	1,562	-
Investment receivable	7,478	1,741
Income tax receivables	4,684	4,741
Prepaid expenses	1,179	1,706
Other	2,568	381
Total Other Assets	\$ 76,145	\$ 88,262

REO consists of foreclosed properties received in full satisfaction of defaulted real estate loans. The carrying value of REO at March 31, 2012 was \$5 million, which includes the net effect of \$3 million related to transfers into REO during 2012, offset by \$2 million of REO liquidations, a \$1 million reduction related to the deconsolidation of five Sequoia securitization entities, and less than \$1 million of negative market valuation adjustments. At March 31, 2012, there were 38 REO properties recorded on our consolidated balance sheet, all of which were owned at Sequoia. At December 31, 2011, there were 43 REO properties recorded on our consolidated balance sheet, all of which were owned at Sequoia. Properties located in Ohio, Michigan, Georgia, and California accounted for 75% of our REO properties at March 31, 2012.

Margin posted, net, resulted from margin calls from our swap, master repurchase agreement, and warehouse facility counterparties that required us to post collateral.

Mortgage Servicing Rights

During the first quarter of 2012, we transferred an aggregate of \$743 million (principal balance) of residential loans to two Sequoia securitization entities and accounted for the transfers as sales in accordance with GAAP. In conjunction with these transfers, we recorded \$2 million of MSRs at a taxable REIT subsidiary of ours. These MSRs represent rights we had acquired and retained to service \$208 million original principal balance of loans transferred

Mortgage Banking Activities, Net	\$	4,302

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 11. Short-Term Debt**

We enter into repurchase agreements, bank warehouse agreements, and other forms of collateralized (and generally uncommitted) short-term borrowings with several banks and major investment banking firms. At March 31, 2012, Redwood had outstanding agreements with 10 bank counterparties and we were in compliance with all of the related covenants. The table below summarizes the outstanding balances of short-term debt at March 31, 2012 and December 31, 2011 by the type of collateral securing the debt.

(Dollars in Thousands)	Number of Facilities	Outstanding	March 31, 2012	
			Limit	Maturity
Collateral Type				
Residential loans	2	\$ 136,861	\$ 400,000	11/2012
Real estate securities	8	304,104	-	4/2012 - 2/2013
Secured line of credit	1	-	10,000	8/2012
Total	11	\$ 440,965		

(Dollars in Thousands)	Number of Facilities	Outstanding	December 31, 2011	
			Limit	Maturity
Collateral Type				
Residential loans	2	\$ 307,149	\$ 400,000	11/2012
Real estate securities	4	120,907	-	1/2012 - 2/2012
Secured line of credit	1	-	10,000	8/2012
Total	7	\$ 428,056		

Borrowings under these facilities generally bear interest based on a specified margin over the one-month LIBOR interest rate. They are uncommitted and mature within a year. For the three months ended March 31, 2012, the average balance of short-term debt was \$362 million, with a weighted average interest cost of 2.02%. For the three months ended March 31, 2011, the average balance of short-term debt was \$48 million, with a weighted average interest cost of 1.52%. At both March 31, 2012 and December 31, 2011, accrued interest payable on short-term debt was \$0.6 million.

Characteristics of Short-Term Debt

The table below summarizes short-term debt by weighted average interest rates and by collateral type at March 31, 2012 and December 31, 2011.

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

(In Thousands)	March 31, 2012			December 31, 2011

Total Short-Term Debt	\$ 440,965	1.92%	105	\$ 428,056	1.92%	240

Remaining Maturities of Short-Term Debt

The following table presents the remaining maturities of short-term debt at March 31, 2012 and December 31, 2011.

(In Thousands)	March 31, 2012	December 31, 2011
Within 30 days	\$ 226,960	\$ 105,607
31 to 90 days	65,776	15,300
Over 90 days	148,229	307,149
Total Short-Term Debt	\$ 440,965	\$ 428,056

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 12. Asset-Backed Securities Issued**

The Sequoia and Acacia securitization entities issue ABS to acquire assets from us and from third parties. Each series of ABS issued consists of various classes that pay interest on a monthly or quarterly basis. Substantially all ABS issued pay variable rates of interest, which are indexed to one, three, or six-month LIBOR. Some ABS issued pay fixed rates of interest or pay hybrid rates, which are fixed rates that subsequently adjust to variable rates. ABS issued also include some interest-only classes with coupons set at a fixed rate or a fixed spread to a benchmark rate, or set at a spread to the interest rates earned on the assets less the interest rates paid on the liabilities of a securitization entity.

In 2011, we securitized \$671 million of loans through our Sequoia program and issued \$640 million of ABS to third parties. In July 2011, we transferred \$365 million of residential securities into a resecuritization, with \$245 million of ABS issued to third-parties. The components of ABS issued by consolidated securitization entities we sponsored at March 31, 2012 and December 31, 2011, along with other selected information, are summarized in the following table.

Asset-Backed Securities Issued

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

Range of weighted average interest rates, by series	0.39% to 4.15%	0.76% to 1.94%	2.19%
Stated maturities	2014 - 2047	2039 - 2052	2046
Number of series	39	10	1

The maturity of each class of ABS issued is primarily determined by the rate of principal prepayments on the assets of the issuing entity. Each series is also subject to redemption (call) according to the specific terms of the respective governing documents. As a result, the actual maturity of ABS issued will often occur earlier than its stated maturity. At March 31, 2012, \$3.7 billion of ABS issued (\$6.3 billion principal balance) had contractual maturities of over five years and \$48 million of ABS issued (\$48 million principal balance) had contractual

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 12. Asset-Backed Securities Issued (continued)**

maturities of one to five years. Amortization of the resecuritization and Sequoia deferred ABS issuance costs was less than \$1 million for both the three months ended March 31, 2012 and 2011.

The following table summarizes the accrued interest payable on ABS issued at March 31, 2012 and December 31, 2011. Interest due on Sequoia and resecuritization ABS issued is payable monthly and interest due on Acacia ABS issued is payable quarterly.

Note 13. Long-Term Debt

In 2006, we issued \$100 million of trust preferred securities through Redwood Capital Trust I, a Delaware statutory trust, in a private placement transaction. These trust preferred securities require quarterly distributions at a floating coupon rate equal to three-month LIBOR plus 2.25% until the notes are redeemed, which will be no later than January 30, 2037. The interest expense yield on our trust preferred securities was 2.86% and 2.60% for the three months ended March 31, 2012 and 2011, respectively. Including hedging costs and amortization of deferred securities issuance costs, the interest expense yield on our trust preferred securities was 6.88% and 6.85% for the three months ended March 31, 2012 and 2011, respectively. The earliest optional redemption date without penalty was January 30, 2012. In December 2010, we repurchased \$500 thousand principal amount of these trust preferred securities.

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 13. Long-Term Debt (continued)**

In 2007, we issued an additional \$50 million of subordinated notes. These subordinated notes require quarterly distributions at a floating interest rate equal to three-month LIBOR plus 2.25% until the notes are redeemed, which will be no later than July 30, 2037. The interest expense yield on our subordinated notes was 2.86% and 2.60% for the three months ended March 31, 2012 and 2011, respectively. Including hedging costs and amortization of deferred securities issuance costs, the interest expense yield on our subordinated notes was 6.88% and 6.85% for the three months ended March 31, 2012 and 2011, respectively. The earliest optional redemption date without a penalty is July 30, 2012. In July 2009, we repurchased \$10 million principal amount of this subordinated debt.

At both March 31, 2012 and December 31, 2011, the accrued interest payable balance on long-term debt was less than \$1 million. Under the terms of our long-term debt, we covenant to, among other things, use our best efforts to continue to qualify as a REIT. If an event of default were to occur in respect of our long-term debt, we would generally be restricted under its terms (subject to certain exceptions) from making dividend distributions to stockholders, from repurchasing common stock or repurchasing or redeeming any other then-outstanding equity securities, and from making any other payments in respect of any equity interests in us or in respect of any then-outstanding debt that is *pari passu* or subordinate to our long-term debt.

Note 14. Commitments and Contingencies***Lease Commitments***

At March 31, 2012, we were obligated under non-cancelable operating leases with expiration dates through 2018 for \$10 million. Operating lease expense was less than \$1 million for both the three months ended March 31, 2012 and 2011.

The following table presents our future lease commitments at March 31, 2012.

Future Lease Commitments by Year

(In Thousands)	March 31, 2012
2012	\$ 1,393
2013	1,779
2014	1,820
2015	1,776
2016	1,518
2017 and thereafter	2,213
Total	\$ 10,499

In the third quarter of 2011, we entered into a new lease agreement for our executive office. The new lease, which goes into effect in the second quarter of 2012, will recast our existing lease obligations at that time and expire in 2018. The remaining payments required under both the current and new lease will be recognized as office rent expense on a straight-line basis over the respective lease terms. In the fourth quarter of 2011, we also relocated our New York office and entered into a new lease agreement. This lease expires in 2015 and accounts for approximately

ten percent of our future lease obligation.

Leasehold improvements for our offices are amortized into expense over the prior lease term, expiring in 2012. The unamortized leasehold improvement balance was less than \$1 million and \$1 million, respectively, at March 31, 2012 and December 31, 2011. For both the three months ended March 31, 2012 and 2011, we recognized leasehold amortization expense of less than \$1 million.

(Unaudited)

Note 14. Commitments and Contingencies (continued)

Loss Contingencies Litigation

On December 23, 2009, the Federal Home Loan Bank of Seattle (the "FHLB-Seattle") filed a claim in Superior Court for the State of Washington (case number 09-2-46348-4 SEA) against Redwood Trust, Inc., our subsidiary, Sequoia Residential Funding, Inc. ("SRF"), Morgan Stanley & Co., and Morgan Stanley Capital I, Inc. (collectively, the "FHLB-Seattle Defendants"). The FHLB-Seattle alleges claims under the Securities Act of Washington (Section 21.20.005, et seq.) and seeks to rescind the purchase of a mortgage pass-through certificate (or, residential mortgage backed securities, "RMBS") issued through our Sequoia RMBS platform (as part of the Sequoia Mortgage Trust 2005-4 securitization transaction) and purchased by the FHLB-Seattle. The FHLB-Seattle also seeks to collect interest on the original purchase price at the statutory interest rate of 8% per annum from the date of original purchase (net of interest received), as well as attorneys' fees and costs. On June 10, 2010, the FHLB-Seattle filed an amended complaint. Subsequently, on October 18, 2010, the FHLB-Seattle Defendants filed motions to dismiss the FHLB-Seattle's complaint. Redwood Trust, Inc. and SRF additionally moved to dismiss the complaint for lack of personal jurisdiction. The FHLB-Seattle alleges that the FHLB-Seattle Defendants' offering materials for this RMBS contained materially untrue statements and omitted material facts about this RMBS and the loans securitized in this transaction. Among other things, the FHLB-Seattle alleges that the FHLB-Seattle Defendants made untrue statements or omissions regarding the (1) loan-to-value ratios of these mortgage loans and the appraisals of the properties that secured these mortgage loans, (2) occupancy status of those properties, (3) underwriting standards of the originators of these mortgage loans, and (4) ratings assigned to this RMBS. In a series of rulings issued between June 23, 2011 and August 15, 2011, the Washington State Superior Court dismissed the allegations relating to occupancy status and denied other grounds for dismissal. On July 19, 2011, the Court granted Redwood Trust, Inc. and SRF's motion to dismiss for lack of personal jurisdiction and on April 6, 2012, the Court entered final judgment in favor of Redwood Trust, Inc. and SRF based on the lack of personal jurisdiction. Redwood Trust, Inc. does not know whether the FHLB-Seattle will appeal or otherwise contest the dismissal, or file a claim in another jurisdiction. The Sequoia RMBS that is the subject of the FHLB-Seattle's claim was issued with an original principal amount of approximately \$133 million and, at March 31, 2012, had a remaining outstanding principal amount of approximately \$28 million. We believe that this claim is without merit and we intend to defend any action related to it vigorously. In connection with the issuance of the Sequoia RMBS that is the subject of the FHLB-Seattle's claim, Redwood agreed to indemnify the underwriters of this RMBS for certain losses and expenses they might incur as a result of claims made against them relating to this RMBS, including, without limitation, certain legal expenses. The FHLB-Seattle's claims against the underwriters of this RMBS were not dismissed for lack of personal jurisdiction. Regardless of the outcome of this litigation, Redwood could incur a loss as a result of these indemnities.

On August 18, 2010, Redwood Trust, Inc.'s subsidiary, SRF, received service of process with respect to a claim filed on July 15, 2010 in Superior Court for the State of California in San Francisco (case number CGC-10-501610) by The Charles Schwab Corporation ("Schwab"). In the complaint, Schwab is suing SRF and 26 other named defendants (collectively, the "Schwab Defendants") in relation to RMBS sold or issued by the Schwab Defendants. With respect to SRF, Schwab alleges a cause of action of negligent misrepresentation under California state law and seeks unspecified damages and attorneys' fees and costs with respect to a RMBS issued through the Sequoia RMBS platform as part of the Sequoia Mortgage Trust 2005-4 securitization transaction (which is the same transaction at issue in the litigation initiated by the FHLB-Seattle described in the preceding paragraph). Among other things, Schwab alleges that the offering materials for this Sequoia RMBS contained materially untrue statements or omissions regarding this RMBS and the loans securitized in this securitization transaction, including untrue statements or omissions regarding the (1) loan-to-value ratios of these mortgage loans and the appraisals of the properties that secured these mortgage loans, (2) occupancy status of those properties, (3) underwriting standards of the originators of these mortgage loans, and (4) ratings assigned to this RMBS. On September 22, 2011, the Schwab Defendants moved to dismiss the complaint, and on January 27, 2011, the California State Superior Court denied the motion on several grounds, and with respect to certain other grounds gave Schwab the opportunity to amend the complaint. SRF has responded to that Amended Complaint. The Sequoia RMBS that is the subject of Schwab's claim was issued with an original principal amount of approximately \$14.8 million and, at March 31, 2012, had a remaining outstanding principal amount of approximately \$3.1 million. We believe that this case is without merit.

(Unaudited)

Note 14. Commitments and Contingencies (continued)

and we intend to defend the action vigorously. In connection with the issuance of the Sequoia RMBS that is the subject of Schwab's claim, Redwood agreed to indemnify the underwriters of this RMBS for certain losses and expenses they might incur as a result of claims made against them relating to this RMBS, including, without limitation, certain legal expenses. Regardless of the outcome of this litigation, Redwood could incur a loss as a result of these indemnities.

On July 12, 2010, two notices of Election to Void Sale of Securities pursuant to Illinois Securities Law (815 ILCS Section 5/13(A)) were received from the Federal Home Loan Bank of Chicago (FHLB-Chicago). In the notices, the FHLB-Chicago sought to void its purchase of two RMBS that were issued in 2006 by a securitization trust with respect to which Redwood Trust, Inc.'s subsidiary, SRF, was the depositor. Subsequently, on October 15, 2010, the FHLB-Chicago filed a claim in the Circuit Court of Cook County, Illinois (case number 10-CH-45033) against SRF and more than 45 other named defendants (collectively, the FHLB-Chicago Defendants) in relation to RMBS sold or issued by the FHLB-Chicago Defendants or by entities controlled by the FHLB-Chicago Defendants. In an amended complaint filed on March 16, 2011, FHLB-Chicago added as defendants Redwood Trust, Inc. and another one of our subsidiaries, RWT Holdings, Inc. With respect to Redwood Trust, Inc. and SRF, the FHLB-Chicago alleges that the offering materials for two RMBS issued through the Sequoia RMBS platform as part of the Sequoia Mortgage Trust 2006-1 securitization transaction contained untrue and misleading statements and material misrepresentations in violation of Illinois Securities Law (815 ILCS Sections 5/12(F)-(H)) and North Carolina Securities Law (N.C.G.S.A. §78A-8(2) & §78A-56(a)) and also alleges a claim of negligent misrepresentations under Illinois common law. On some of the causes of action, the FHLB-Chicago seeks to rescind the purchase of these RMBS and to collect interest on the original purchase price at the statutory interest rate of 10% per annum from the date of original purchase (net of interest received). On one cause of action, the FHLB-Chicago seeks unspecified damages. The FHLB-Chicago also seeks attorneys' fees and costs. Among other things, the FHLB-Chicago alleges that the offering materials for this RMBS contained materially untrue statements or omissions regarding this RMBS and the loans securitized in this transaction, including untrue statements or omissions regarding the (1) loan-to-value ratios of these mortgage loans and the appraisals of the properties that secured these mortgage loans, (2) occupancy status of those properties, (3) underwriting standards of the originators of these mortgage loans, (4) ratings assigned to these RMBS, and (5) due diligence performed on these mortgage loans. The first of these two Sequoia RMBS was issued with an original principal amount of approximately \$105 million and, at March 31, 2012, had a remaining outstanding principal amount of approximately \$41 million. The second of these two Sequoia RMBS was issued with an original principal amount of approximately \$379 million and, at March 31, 2012, had a remaining outstanding principal balance of approximately \$149 million. On March 27, 2011, the FHLB-Chicago Defendants moved to dismiss the amended complaint, which motions are now pending. We believe that this case is without merit, and we intend to defend the action vigorously. In connection with the issuance of the Sequoia RMBS that is the subject of the FHLB-Chicago's claim, Redwood agreed to indemnify the underwriters of these RMBS for certain losses and expenses they might incur as a result of claims made against them relating to these RMBS, including, without limitation, certain legal expenses. Regardless of the outcome of this litigation, Redwood could incur a loss as a result of these indemnities.

We cannot determine the outcome of any of the above-referenced litigation matters at this time or predict the results with certainty. We cannot be certain that any of these matters will not have a material adverse effect on our results of operations in any future period, and any loss or expense related to any of this litigation could have a material adverse impact on our consolidated financial statements.

In accordance with FASB guidance on accounting for contingencies, we review the need for any loss contingency reserves and establish reserves when, in the opinion of management, it is probable that a matter would result in a liability, and the amount of loss, if any, can be reasonably estimated. Additionally, we record receivables for insurance recoveries relating to litigation-related losses and expenses if and when such amounts are covered by insurance and recovery of such losses or expenses are due. If, with respect to a matter, it is not both probable to result in liability and the amount of loss cannot be reasonably estimated (as is the case for each of the above-referenced litigation matters), FASB guidance on accounting for contingencies provides that an estimate of possible loss or range of loss be disclosed unless such an estimate cannot

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

be made. There are numerous factors that make it difficult to meaningfully estimate possible loss or range of loss at this stage of these litigation matters, including

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 14. Commitments and Contingencies (continued)**

that: the proceedings are in relatively early stages, there are significant factual and legal issues to be resolved, information obtained or rulings made during the lawsuits could affect the methodology for calculation of rescission and the related statutory interest rate, our belief that these litigations are without merit, and our intent to defend these actions vigorously. In addition, with respect to claims where damages are the requested relief, no amount of loss or damages has been specified. We also may have additional rights and/or obligations pursuant to indemnity agreements, representations and warranties, and other contractual provisions with other parties relating to these litigation matters. These rights and obligations could offset or increase our potential losses. We are unable at this time to estimate the potential amount of any such offset or loss.

Note 15. Equity

The following table provides a summary of changes to stockholders' equity for the three months ended March 31, 2012 and 2011.

Stockholders' Equity

(In Thousands)	Three Months Ended March 31,	
	2012	2011
Balance at beginning of period	\$ 892,584	\$ 1,064,753
Net income attributable to Redwood Trust, Inc.	30,463	18,165
Distributions to shareholders	(20,232)	(20,124)
Unrealized gains on securities and derivatives, net	55,007	9,773
Other changes in equity, net	4,435	2,244
Balance at End of Period	\$ 962,257	\$ 1,074,811

Accumulated Other Comprehensive Income

The following table provides a summary of the components of accumulated other comprehensive income (loss) at March 31, 2012 and December 31, 2011.

(In Thousands)	March 31, 2012	December 31, 2011
Net unrealized gains on real estate securities	\$ 94,682	\$ 53,904
Net unrealized losses on interest rate agreements accounted for as cash flow hedges	(52,826)	(67,055)
Total Accumulated Other Comprehensive Income	\$ 41,856	\$ (13,151)

(Unaudited)

Note 15. Equity (continued)

Earnings Per Common Share

The following table provides the basic and diluted earnings per common share computations for the three months ended March 31, 2012 and 2011.

Basic and Diluted Earnings Per Common Share

	Three Months Ended March 31,	
	2012	2011
(In Thousands, Except Share Data)		
Basic Earnings Per Common Share:		
Net income attributable to Redwood	\$ 30,463	\$ 18,165
Less: Dividends and undistributed earnings allocated to participating securities	999	551
Net income allocated to common shareholders	\$ 29,464	\$ 17,614
Basic weighted average common shares outstanding	78,397,359	78,027,840
Basic Earnings Per Common Share	\$ 0.38	\$ 0.23
Diluted Earnings Per Common Share:		
Net income attributable to Redwood	\$ 30,463	\$ 18,165
Less: Dividends and undistributed earnings allocated to participating securities	815	584
Net income allocated to common shareholders	\$ 29,648	\$ 17,581
Basic weighted average common shares outstanding	78,397,359	78,027,840
Net effect of dilutive equity awards	1,494,654	1,343,936
Diluted weighted average common shares outstanding	79,892,013	79,371,776
Diluted Earnings Per Common Share	\$ 0.37	\$ 0.22

For the three months ended March 31, 2012 and 2011, there were 1,494,654 and 1,343,936, respectively, of dilutive equity awards determined under the two-class method. We included participating securities in the calculation of diluted earnings per common share as we determined that the two-class method was more dilutive than the alternative treasury stock method. For the three months ended March 31, 2012 and 2011, the number of outstanding equity awards that were antidilutive totaled 456,242 and 669,229, respectively, under the two-class method. There were no other participating securities during these periods.

Stock Repurchases

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

We announced a stock repurchase authorization in November 2007 for the repurchase of up to 5,000,000 common shares. This plan replaced all previous share repurchase plans and has no expiration date. During the three months ended March 31, 2012, there were no shares acquired under the plan. At March 31, 2012, there remained 4,005,985 shares available for repurchase under this plan.

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 16. Equity Compensation Plans**

At March 31, 2012 and December 31, 2011, 394,404 and 298,634 shares of common stock, respectively, were available for grant under Redwood's Incentive Plan. The unamortized compensation cost under the Incentive Plan and the Employee Stock Purchase Plan totaled \$18 million at March 31, 2012, as shown in the following table.

(In Thousands)	Three Months Ended March 31, 2012					Total
	Stock Options	Restricted Stock	Deferred Stock Units	Performance Stock Units	Employee Stock Purchase Plan	
Unrecognized compensation cost at beginning of period	\$ -	\$ 1,792	\$ 13,563	\$ 5,514	\$ -	\$ 20,869
Equity grants	-	17	246	-	165	428
Equity grant forfeitures	-	-	(794)	(528)	-	(1,322)
Equity compensation expense	-	(176)	(1,535)	(424)	(41)	(2,176)
Unrecognized Compensation Cost at End of Period	\$ -	\$ 1,633	\$ 11,480	\$ 4,562	\$ 124	\$ 17,799

At March 31, 2012, the weighted average amortization period remaining for all of our equity awards was less than two years.

Stock Options

At both March 31, 2012 and December 31, 2011, there were 380,779 fully vested stock options outstanding. There was no aggregate intrinsic value for the options outstanding and exercisable at March 31, 2012. For the three months ended March 31, 2012 and 2011, there were no stock options exercised.

Restricted Stock

At March 31, 2012 and December 31, 2011, there were 151,972 and 184,409 shares, respectively, of restricted stock awards outstanding. Restrictions on these shares lapse through 2016. There were no restricted stock awards granted during the three months ended March 31, 2012.

Deferred Stock Units

At March 31, 2012 and December 31, 2011, there were 2,448,541 and 2,476,171 DSUs outstanding, respectively, of which 1,243,153 and 1,068,283, respectively, had vested. There were 33,792 DSUs granted during the three months ended March 31, 2012. During the three months ended March 31, 2012, there were 61,422 DSUs forfeited related to an employee departure. During the three months ended March 31, 2012, there were no DSUs or cash distributions to participants in the Executive Deferred Compensation Plan (EDCP). Unvested DSUs at March 31, 2012 will vest through 2016.

Performance Stock Units

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

At March 31, 2012 and December 31, 2011, there were 546,714 and 592,479 PSUs outstanding, respectively, none of which had vested. These PSUs cliff vest on the third anniversary of their grant date, with vesting contingent on total stockholder return (defined as the change in our common stock price plus dividends paid on our common stock relative to the per share price of our common stock on the date of the PSU grant) over the three-year vesting period (Three-Year TSR). The number of underlying shares of our common stock that will vest during 2013 and 2014 will vary between 0% (if Three-Year TSR is negative) and 200% (if Three-Year TSR is greater than or equal to 125%) of the number of these PSUs originally granted, adjusted (if vesting is greater than 0%) to reflect the value of dividends paid during the three-year vesting period. During the three months ended March 31, 2012, there were 45,764 PSUs forfeited related to an employee departure.

Table of Contents**REDWOOD TRUST, INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****March 31, 2012****(Unaudited)****Note 16. Equity Compensation Plan (continued)*****Employee Stock Purchase Plan***

The ESPP allows a maximum of 200,000 shares of common stock to be purchased in aggregate for all employees. At March 31, 2012 and December 31, 2011, 162,663 and 152,212 shares have been purchased, respectively, and there remained a negligible amount of uninvested employee contributions in the ESPP.

Note 17. Operating Expenses

Components of our operating expenses for the three months ended March 31, 2012 and 2011 are presented in the following table.

Operating Expenses

(In Thousands)	Three Months Ended March 31,	
	2012	2011
Fixed compensation expense	\$ 5,035	\$ 4,144
Variable compensation expense	2,594	599
Equity compensation expense	2,176	2,060
Total compensation expense	9,805	6,803
Systems	1,181	1,939
Office costs	1,741	1,740
Accounting and legal	1,117	636
Other operating expenses	790	396
Total Operating Expenses	\$ 14,634	\$ 11,514

Note 18. Taxes

For each of the three months ended March 31, 2012 and 2011, we recognized a provision for income taxes of less than \$1 million. The following is a reconciliation of the statutory federal and state tax rates to our projected annual effective rate at March 31, 2012 and 2011.

Reconciliation of Statutory Tax Rate to Effective Tax Rate**Three Months Ended March 31,**

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

	2012	2011
Federal statutory rate	34.0 %	34.0 %
State statutory rate, net of Federal tax effect	7.2 %	7.2 %
Differences in taxable (loss) income from GAAP income	(27.2) %	(41.1) %
Dividends paid deduction	(14.0) %	-
Effective Tax Rate	(0.0) %	0.1 %

We assessed our tax positions for all open tax years (Federal years 2006 to 2011, State years 2007 to 2011) and concluded at March 31, 2012 and December 31, 2011, that we had no material unrecognized tax liabilities.

Note 19. Subsequent Events

At March 31, 2012, we planned to purchase up to \$63 million of residential mortgage loans previously originated by third parties. Of this amount, \$29 million settled as of May 1, 2012. We expect further settlements to occur during the second quarter of 2012, subject to loan availability and delivery. In March 2012, we agreed to sell \$98 million of residential mortgage loans to a third party. These sales are expected to settle in the second quarter.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Introduction

Redwood Trust, Inc., together with its subsidiaries, is a financial institution that seeks to invest in real estate related assets that have the potential to provide attractive cash flows over a long period of time and support our goal of distributing attractive levels of dividends to our stockholders. For tax purposes, we are structured as a real estate investment trust (REIT). We are able to pass through substantially all of our earnings generated at our REIT to our stockholders without paying income tax at the corporate level. We pay income tax on the REIT taxable income we retain and on the income we earn at our taxable subsidiaries. Redwood was incorporated in the State of Maryland on April 11, 1994, and commenced operations on August 19, 1994. Our executive offices are located at One Belvedere Place, Suite 300, Mill Valley, California 94941.

References herein to Redwood, the company, we, us, and our include Redwood Trust, Inc. and its consolidated subsidiaries, unless the context otherwise requires. Financial information concerning our business is set forth in Management's Discussion and Analysis of Financial Condition and Results of Operations, the consolidated financial statements and notes thereto, and the supplemental financial information, which is included in Part I, Items 1 and 2 of this Quarterly Report on Form 10-Q.

Our website can be found at www.redwoodtrust.com. We make available, free of charge through the investor information section of our website, access to our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the U.S. Securities Exchange Act of 1934, as well as proxy statements, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the U.S. Securities and Exchange Commission (SEC). We also make available, free of charge, access to our charters for our Audit Committee, Compensation Committee, and Corporate Governance and Nominating Committee, our Corporate Governance Standards, and our Code of Ethics governing our directors, officers, and employees. Within the time period required by the SEC and the New York Stock Exchange, we will post on our website any amendment to the Code of Ethics and any waiver applicable to any executive officer, director, or senior officer (as defined in the Code). In addition, our website includes information concerning purchases and sales of our equity securities by our executive officers and directors, as well as disclosure relating to certain non-GAAP and financial measures (as defined in the SEC's Regulation G) that we may make public orally, telephonically, by webcast, by broadcast, or by similar means from time to time. Through the commercial section of our website, we also disclose information about our origination or acquisition of new commercial loans and other commercial investments, generally within five business days of origination or acquisition. We believe that this information may be of interest to investors in Redwood, although we may not always disclose on our website each new commercial loan or other new commercial investment we originate or acquire (or we may not disclose them on our website within the five business day period described above) due to, among other reasons, confidentiality obligations to the borrowers of those loans or counterparties to those investments. The information on our website is not part of this Quarterly Report on Form 10-Q.

Our Investor Relations Department can be contacted at One Belvedere Place, Suite 300, Mill Valley, CA 94941, Attn: Investor Relations, telephone (866) 269-4976.

Cautionary Statement

This Quarterly Report on Form 10-Q and the documents incorporated by reference herein contain forward-looking statements within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements involve numerous risks and uncertainties. Our actual results may differ from our beliefs, expectations, estimates, and projections and, consequently, you should not rely on these forward-looking statements as predictions of future events. Forward-looking statements are not historical in nature and can be identified by words such as anticipate, estimate, will, should, expect, believe, intend, seek, plan and similar expressions or their negatives, or by references to strategy, plans, or intentions. These forward-looking statements are subject to risks and uncertainties, including, among other things, those described in Part II, Item 1A of this Quarterly Report on Form 10-Q and those described in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011, under the caption Risk Factors. Other risks, uncertainties, and factors that could cause actual results to differ materially from those projected may be described from time to time in reports we

Table of Contents

file with the SEC, including reports on Forms 10-Q and 8-K. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

Statements regarding the following subjects, among others, are forward-looking by their nature: (i) our statements relating to opportunities to invest in residential securities, our belief that there will continue to be sufficient market liquidity for the types of residential securities investments that we are financing in part with short-term debt, our statement that, as the private mortgage market recovers and private securitization activity increases, we expect our portfolio of residential securities investments will shift back to predominantly unlevered investments in more credit sensitive subordinate securities; and our statements relating to how we might use various types of debt financing to finance residential securities investments in the future; (ii) our statements relating to the activities we engage in that we include in our references to our mortgage banking activities, including our statements relating to our future level of investment in mortgage servicing rights and the profitability of such investments, future sales of whole loans (other than through securitization transactions) and the profitability of such sales, and our expectation that these activities will be an ongoing source of income for us in the future; (iii) any statements relating to our competitive position and our ability to compete in the future, including our ability to effectively compete to acquire residential securities and residential mortgage loans and our ability to compete to originate and acquire commercial debt investments; (iv) our statements relating to our future investment strategy and our ability to find investments with attractive risk return profiles, including, without limitation, statements relating to our efforts to acquire residential mortgage loans, make commercial loans, and make investments in residential securities in the secondary market; (v) our statement that our goal for 2012 is to invest a total of approximately \$400 million of equity capital in third-party residential mortgage-backed securities, new Sequoia residential mortgage-backed securities, and commercial loans; (vi) our statement that we continue to target the purchase of \$2 billion of residential mortgage loans in 2012, our statements relating to acquiring residential mortgage loans that we have identified for purchase or plan to purchase, including the amount of such loans that we planned to purchase or have identified for purchase at March 31, 2012 and April 30, 2012, and our statement that it is our intent to finance our residential mortgage loans held for sale primarily through the use of warehouse lines of credit; (vii) statements relating to future residential loan securitization and sale transactions, the timing of the completion of those future transactions, and the number and size of those transactions we expect to complete in 2012 and future periods, which future transactions may not be completed when planned or at all, and, more generally, statements regarding the likelihood and timing of, and our participation in, future transactions of these types and our ability to finance residential loan acquisitions through the execution of these types of transactions, and the profitability of these transactions; (viii) our statement that we expect to recover an aggregate of \$6 million of negative net assets (or equity) that relate to ten Sequoia securitization entities in future periods upon the retirement or deconsolidation of those entities; (ix) our statements relating to the cash flows we expect to receive from our investments; (x) our statements relating to our estimate of our available investment capacity (including that we estimate our available investment capacity was \$183 million at March 31, 2012) and our statement that we believe this level of investment capacity should be sufficient for investment activity we expect over the next two quarters; (xi) any statements relating to future market and economic conditions and the future volume of transactions in those markets, including, without limitation, future conditions in the residential and commercial real estate markets and related financing markets (e.g., the CMBS market), and the related potential opportunities for our residential and commercial businesses; (xii) our beliefs about, and our outlook for, the future direction of housing market fundamentals, including, without limitation, home prices, household formation and demand for housing, delinquency rates, foreclosure rates, prepayment rates, inventory of homes for sale, and mortgage interest rates and their potential impact on our business and results of operations; (xiii) our beliefs about the future direction of commercial real estate fundamentals and statements regarding the competitive landscape for, and availability of, financing for commercial real estate and our beliefs about whether trends in these areas are positive for our business (including our statements that we believe that mezzanine lending opportunities will continue to drive our commercial investment activity for the next few quarters); (xiv) our statements relating to the future potential competitive advantages of our commercial origination and investment platform, including that this platform could potentially generate fees and other income by originating and distributing senior mortgage loans to a wide network of investors, and our statement that our plan for our commercial platform includes developing appropriate financing sources; (xv) our statements that we expect an increase in our commercial investment activity in the second quarter of 2012, that we believe we are still on pace to originate between \$200 and \$300 million in commercial loans in 2012; (xvi) our statement that part of our plan for the commercial business includes developing appropriate financing alternatives with various counterparties that could take the form of repurchase facilities, warehouse lines, and non-recourse securitized financing; (xvii) our expectations regarding credit reserves, credit losses, the adequacy of credit support, and impairments and their impact on our investments (including as compared to our original expectations and credit reserve levels) and the timing of losses and impairments, and statements that the amount of credit reserves we designate are adequate or may require changes in the future; (xviii) any statements relating to our expectations regarding future interest income and net interest income, future earnings, future earnings volatility, and future trends in operating expenses and the factors that may affect those trends, including that we expect the level of operating expense in the second quarter of 2012 to be similar to the level of operating expense in the first quarter of 2012; (ixx) our expectations and estimates relating to tax accounting and our anticipation of additional credit losses for tax purposes in future periods (and, in particular, our statement that, for tax purposes, we expect an additional \$130 million of credit losses on securities to be realized over time).

Table of Contents

Important factors, among others, that may affect our actual results include: general economic trends, the performance of the housing, commercial real estate, mortgage, credit, and broader financial markets, and their effects on the prices of earning assets and the credit status of borrowers; federal and state legislative and regulatory developments, and the actions of governmental authorities, including those affecting the mortgage industry or our business; our exposure to credit risk and the timing of credit losses within our portfolio; the concentration of the credit risks we are exposed to, including due to the structure of assets we hold and the geographical concentration of real estate underlying assets we own; our exposure to adjustable-rate and negative amortization mortgage loans; the efficacy and expense of our efforts to manage or hedge credit risk, interest rate risk, and other financial and operational risks; changes in credit ratings on assets we own and changes in the rating agencies' credit rating methodologies; changes in interest rates; changes in mortgage prepayment rates; the availability of assets for purchase at attractive prices and our ability to reinvest cash we hold; changes in the values of assets we own; changes in liquidity in the market for real estate securities and loans; our ability to finance the acquisition of real estate-related assets with short-term debt; the ability of counterparties to satisfy their obligations to us; our involvement in securitization transactions, the profitability of those transactions, and the risks we are exposed to in engaging in securitization transactions; exposure to claims and litigation, including litigation arising from our involvement in securitization transactions; whether we have sufficient liquid assets to meet short-term needs; our ability to successfully compete and retain or attract key personnel; our ability to adapt our business model and strategies to changing circumstances; changes in our investment, financing, and hedging strategies and new risks we may be exposed to if we expand our business activities; exposure to environmental liabilities and the effects of global climate change; failure to comply with applicable laws and regulations; our failure to maintain appropriate internal controls over financial reporting and disclosure controls and procedures; the impact on our reputation that could result from our actions or omissions or from those of others; changes in accounting principles and tax rules; our ability to maintain our status as a REIT for tax purposes; limitations imposed on our business due to our REIT status and our status as exempt from registration under the Investment Company Act of 1940; decisions about raising, managing, and distributing capital; and other factors not presently identified.

This Quarterly Report on Form 10-Q may contain statistics and other data that in some cases have been obtained from or compiled from information made available by servicers and other third-party service providers.

Redwood invests in, finances, and manages real estate assets. We seek to invest in assets that have the potential to generate sufficient long-term cash flow returns to support our goal of distributing an attractive level of dividends per share to shareholders over time.

We primarily invest in residential mortgage loans, commercial loans and other forms of commercial real estate financing, and in securities collateralized by real estate loans (which are securities issued in securitization transactions and which are also referred to as mortgage-backed securities). Our investments in residential mortgage loans are generally made with a view towards securitizing those loans through a Sequoia securitization entity or selling those loans to third parties. Our investments in commercial loans are generally held for investment and not secured by real property. The mortgage-backed securities we typically invest in include senior securities, which are those interests in a mortgage securitization that generally have the first right to cash flows and are generally last to absorb losses, and subordinate securities, which are those interests in a mortgage securitization that generally have the last right to cash flows and are generally first in line to absorb losses. Some of the securities we invest in are re-REMIC support securities, which are securities that are generally created through the resecuritization of senior mortgage-backed securities. Re-REMIC support securities are subordinate to, and provide credit support for, the senior re-REMIC securities issued in a resecuritization. We also invest in other assets, securities, and instruments that are related to residential and commercial real estate.

Securities collateralized by residential mortgage loans, which we also refer to as residential securities, that we invest in are generally acquired by us from third parties or by retaining mortgage-backed securities issued by Sequoia securitization trusts, which are securitization entities we sponsor. The process of sponsoring a Sequoia securitization includes the acquisition of residential loans, which are originated by third parties and generally funded

Table of Contents

with equity and short-term debt while being accumulated for securitization, the transfer of a pool of those loans to a Sequoia securitization entity, and the structuring and issuance by the Sequoia securitization entity of mortgage-backed securities collateralized by that pool of loans. Senior securities issued by Sequoia securitization entities are generally issued to third parties, while some or all of the subordinate securities issued by these entities are generally retained by us. From time to time we may also invest in senior interest-only (IO) securities issued by a Sequoia securitization entity. These IO securities receive interest payments (but no principal payments) related to securitized residential mortgage loans.

Our investments in commercial loans and other forms of commercial real estate financing generally result from our origination of subordinate financing for commercial real estate. Subordinate financing for commercial real estate can take the form of mezzanine loans or subordinate mortgage loans and can also take the form of preferred equity interests in special purpose entities that own commercial real estate. In addition to directly originating commercial loans and directly providing preferred equity financing, we may invest in commercial loans and financing originated by others (including through ownership of commercial mortgage-backed securities). We refer to our commercial mezzanine loans and preferred equity investments collectively as commercial loans.

Our primary source of income is net interest income from our investments in real-estate related assets of the types described above. This net interest income consists of the interest income we earn from our investments less the interest expenses we incur on borrowed funds and other liabilities. We assume a range of risks in our investments and the level of risk is influenced by the manner in which we finance our purchases of, and derive income from, our investments.

Throughout our history we have sponsored other investment entities that include a private limited partnership fund that we managed, the Redwood Opportunity Fund, LP (the Fund), as well as Acacia securitization entities, certain of which we continue to manage. The Fund was invested in real estate securities and the Acacia entities are primarily invested in a variety of real estate related assets. We are not currently seeking to sponsor other entities like the Fund or the Acacia securitization entities. During the third quarter of 2011, we engaged in a resecuritization transaction (the Resecuritization) primarily for the purpose of obtaining permanent non-recourse financing on a portion of our residential securities portfolio. Many of the entities we have sponsored or managed are currently, or have been historically, recorded on our consolidated balance sheets for financial reporting purposes based upon applicable accounting guidance set forth by Generally Accepted Accounting Principles in the United States (GAAP). However, each of these securitization entities is independent of Redwood and of each other and the assets and liabilities are not owned by and are not legal obligations of ours, although we are exposed to certain financial risks associated with our role as the sponsor or manager of these entities.

For tax purposes, we are structured as a REIT. As a REIT, we are able to pass through substantially all of our earnings to our stockholders without paying income tax at the corporate level. We pay income tax on the REIT taxable income we retain and on the income we earn at our taxable subsidiaries.

Business Update First Quarter 2012

We had a productive first quarter of 2012. For the quarter, we generated attractive economic returns and reported GAAP earnings of \$0.37 per share, some of which was driven by our accounting elections related to our residential business. We paid a first quarter dividend of \$0.25 per share, while REIT taxable income was \$0.13 per share. As discussed in the Cash and Cash Equivalents section of this Management's Discussion and Analysis of Financial Condition and Results of Operations, our cash from loans, securities, and investments of \$74 million in the first quarter of 2012 was in excess of the \$50 million of combined interest on debt, dividends, and cash operating expenses we paid during the quarter.

We invested \$136 million of equity capital during the first quarter of 2012 to acquire \$311 million of investments (and used \$175 million of short-term debt in financing for new investments). Market conditions were generally favorable during the first quarter, allowing us to recover much of the market value declines we saw in our securities portfolio during the fourth quarter of 2011. Operationally, we expanded the scale and capabilities of our residential business. Our commercial business, while continuing to make opportunistic investments, is evolving towards the broader based lending platform we envisioned.

Table of Contents

Our GAAP book value increased to \$12.22 per share in the first quarter of 2012 from \$11.36 per share at the end of the fourth quarter of 2011. The following table displays the changes in GAAP book value per share for the three months ended March 31, 2012 and December 31, 2011.

Table 1 Changes in GAAP Book Value per Share

(In Dollars, per share basis)	Three Months Ended	
	March 31, 2012	December 31, 2011
Beginning book value per share	\$ 11.36	\$ 12.22
Net income (loss)	0.37	(0.03)
Dividends	(0.25)	(0.25)
Unrealized gains (losses) on hedges	0.18	(0.03)
Unrealized gains (losses) on securities	0.52	(0.56)
Other, net	0.04	0.01
Ending Book Value per Share	\$ 12.22	\$ 11.36

Investment and Portfolio Sales Activity

During the first quarter of 2012, we focused much of our efforts on efficiently deploying excess capital at attractive returns while growing our residential and commercial businesses. Highlights of the quarter included investments in two new Sequoia securitizations, four newly originated commercial loans and one commercial loan acquisition, and additional secondary investments in more liquid senior securities that were largely financed through repurchase facilities. The following table summarizes our investment activity for the first quarter of 2012 and the fourth quarter of 2011.

Table 2 Quarterly Investment Activity

(In Millions)	Three Months Ended	
	March 31, 2012	December 31, 2011
Residential investments		
New Sequoia RMBS	\$ 61	\$ -
Third-Party RMBS	223	38
Short-term debt	(175)	(15)
Net residential investments	109	23
Commercial investments	27	60
Net Capital Invested	\$ 136	\$ 83

Our overall investment pace for the first quarter is on pace to meet our objective of investing approximately \$400 million of equity capital in third-party Residential Mortgage-Backed Securities (RMBS), new Sequoia RMBS, and commercial loans during 2012. In addition to new investment acquisition activity, we sold \$53 million of third-party RMBS for GAAP gains of \$6 million.

Residential Loan Business

We continued to make steady progress growing our residential mortgage loan business in the first quarter of 2012, which was highlighted by the two securitizations of residential mortgage loans that we completed; one in January of \$416 million and the other in March of \$328 million. Our GAAP gains on these two securitizations totaled \$7 million, while our economic gains (which take into account our hedging costs) were closer to \$4 million. Contributing to the profitability of the transactions was a combination of tighter credit spreads on the senior securities issued, lower subordination levels, and lower hedging costs.

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

The securitization transaction we completed in March included two important features that are reflective of a more mature, fully functioning securitization market. First, six weeks prior to the transaction, we entered into an agreement with the underwriter of the transaction to sell forward the underlying triple-A securities. This reduced our

Table of Contents

hedging timeframe and costs and enabled us to lock in credit spreads. We are hopeful that we can replicate this type of agreement for future transactions. Second, the underwriter structured the triple-A tranche to create three different time tranching triple-A securities. We believe this refinement tailors cash flows and yields to meet different senior investor needs, thus improving liquidity for triple-A securities. It is also notable that the average mortgage rate charged to prime borrowers in this transaction was only about 50 basis points higher than the mortgage rate a borrower could obtain on a government-backed conforming balance loan. The pre-crisis historical average was a spread of approximately 25 basis points. While we are not yet back to the historical spread levels, the trend is encouraging, especially considering the fact that we are the only repeat RMBS issuer since the financial crisis.

In anticipation of our next securitization, at March 31, 2012, we held \$301 million of residential loans and had identified another \$282 million that we plan to purchase. At April 30, 2012, we held \$331 million and had identified another \$394 million that we plan to purchase. We currently expect our next securitization to occur late in the second quarter or possibly early in the third quarter. While our residential loan business continues to face headwinds from sustained government involvement in mortgage finance and from commercial banks that are flush with liquidity and bidding aggressively for high-quality jumbo loans, we believe we are gaining momentum - adding new sellers each quarter (with 22 active sellers at March 31, 2012 and 28 at April 30, 2012), for an anticipated 30 to 40 active sellers by year end. We continue to target completing four to six securitizations and to purchase \$2 billion of loans in 2012.

Initially, our residential loan business activities were primarily centered on acquiring 15 and 30 year fixed rate loans for sale through private securitization. While we continue to push our securitization efforts, we have broadened our loan products and distribution capabilities to include direct whole loan sales to banks, life companies, or other whole loan buyers. The decision to sell whole loans versus securitizing 100% of the loans that we buy is based on changing market dynamics and continued strong demand for whole loans by commercial banks. Currently, demand has been strong for high quality hybrid adjustable-rate loans, which are a good fit for bank balance sheets. We expect to complete bulk sales of hybrid adjustable rate loans in the second quarter of 2012 and generate modest gains. In addition, we are now in the process of renewing our relationships with the GSEs and intend to add conforming loans to our product menu.

At the end of the first quarter of 2012, we owned the servicing rights to \$304 million of prime-quality jumbo residential loans that were sourced through our residential loan business. We earn fees from these servicing rights, but do not service any loans in-house, nor do we currently plan to do so. Instead, we retain a nationally recognized sub-servicer. The recent decline in the market value of servicing rights - from an historic range of roughly 5 to 6 times the annual servicing fee to approximately 2 to 3 times today - has piqued our interest in an investment in servicing rights. In our opinion, major bank servicers have recently reduced their interest in owning servicing rights in the face of a deluge of existing servicing issues to work through, a refined focus limiting servicing retention to their retail customers, and upcoming capital limitations under Basel III. Whether this decline is a secular or temporary phenomenon has not yet been determined. In any event, we are positioned and stand ready to acquire attractively priced jumbo servicing rights, and potentially GSE conforming servicing rights down the road.

Commercial Loan Business

Progress in our commercial business continued during the first quarter of 2012 as we originated four additional commercial loans totaling \$20 million and acquired one for \$7 million. This increased our investment portfolio to 19 loans totaling \$178 million at March 31, 2012. These loans have been originated and structured in connection with third parties originating over \$1 billion of new commercial mortgages on higher quality, stabilized properties. Additionally, in April 2012, we originated one \$5 million mezzanine loan on a multifamily property. We recently added key personnel with expertise in the multifamily and capital markets segments of commercial investing, coinciding with our increased activity in those sectors. While the pace of our investment activity slowed from the fourth quarter of 2011, we expect an increase in activity later in the second quarter of 2012 based on opportunities that we have identified through April 2012.

We believe that mezzanine lending opportunities will continue to drive commercial investment activity for the next few quarters. Longer term, we are also focused on growing our franchise value through a commercial origination and investment platform that includes originating senior and mezzanine loans together. We believe that offering a one-stop financing solution for our target borrowers will be a strong competitive advantage of our franchise. It could also potentially generate fees and other income by distributing the senior loans through a wide

Table of Contents

network that includes CMBS, banks, life insurance companies, and the GSEs. Ultimately, we hope to help fill a growing capital void in the commercial mortgage market while also leveraging our internal skill set, broad sourcing relationships, and willingness to hold long-term commercial investments on our balance sheet. Part of our plan for the commercial business includes developing appropriate financing alternatives with various counterparties that could take the form of repurchase facilities, warehouse lines, and non-recourse securitized financing.

Looking ahead, we plan to continue originating commercial loans and preferred equity investments and exploring financing options for our commercial portfolio to potentially enhance its return. Currently our portfolio generates a gross yield in excess of 10% and is funded entirely with equity capital. We continue to expect to originate between \$200 million and \$300 million of commercial investments in 2012, and as this dynamic business evolves we will continue to seek the best way to maximize value for shareholders.

Residential Portfolio Business

The first quarter of 2012 - at least until late March - could be characterized by the risk-on tone observed in the broader equity markets. Mortgage related investments followed cues from equities and generally increased in price throughout the quarter as credit spreads narrowed, with many senior RMBS meeting or exceeding the performance of corporate and other fixed income securities. Our securities portfolio in particular largely recovered the \$0.56 per share decline in market value observed in the fourth quarter of 2011, rallying \$0.52 per share in the first quarter as pricing improved.

We took advantage of the relative strength of the RMBS market and sold \$53 million of somewhat illiquid securities during the first quarter of 2012. Our intention is to actively manage our portfolio and these sales were consistent with our efforts to more efficiently invest our capital as we grow our residential and commercial businesses. In April 2012, the market for RMBS and CMBS remained relatively stable, allowing us to invest another \$12 million (net of repo borrowings) of equity capital in third-party RMBS. We remain focused on managing credit-sensitive securities in our portfolio that could be particularly susceptible to adverse performance should the economy begin to slow once again. As always, our decision to sell or hold investments will be primarily focused on prevailing market conditions, any associated credit concerns, and capital allocation decisions.

In the first quarter of 2012, we continued employing what we believe to be prudent amounts of short-term recourse financing against our securities portfolio in order to free up equity capital for additional long-term investments. As to whether this represents a new business strategy or a fundamental shift in our more recent approach to favoring term or permanent financing for investments, in short, the answer is that our use of a combination of short-term debt and equity to finance these investments does not represent a new strategy or fundamental shift in our views on liquidity. We have previously used short-term financing on securities and our current use reflects the investment opportunities that are available at the current time. As the private mortgage market recovers and private securitization activity increases, we expect that our investment portfolio will shift back to predominantly unlevered investments in more credit-sensitive subordinate securities. Most of these RMBS are senior securities that are of the type that have been actively sought by banks, REITs, insurance companies, and hedge funds (an important consideration in taking into account the liquidity risk associated with using short-term debt financing). We believe there will continue to be sufficient market liquidity for these types of RMBS investments.

As we utilize short-term debt to capitalize on what we have described in prior quarters as a diminishing opportunity to source seasoned senior RMBS at attractive levels, we continue to set aside additional capital as part of our management of the liquidity risks associated with recourse financing. To the extent this securities portfolio grows to a sufficient size, we would look to obtain term financing for our investments through the use of a non-recourse structured debt facility, such as the securitization of senior residential securities we completed in July 2011. At March 31, 2012, our residential securities portfolio totaled \$1 billion and was financed with a combination of \$304 million of short-term debt, \$207 million of non-recourse securitization debt, and \$489 million of equity capital.

Table of Contents**Outlook**

We are actively managing and positioning our residential and commercial businesses for growth in an environment where no one knows exactly how the new world of mortgage finance will evolve. We expect it will look very different from the pre-crisis days, and thus have been building residential and commercial business foundations that are not only solid bases for growth, but also provide the optionality to adapt as the mortgage market evolution unfolds. We like our current competitive position, and are focused on maintaining and growing our business relationships and brand through a team with the right skill sets to advance our business strategy.

Summary of Results of Operations**Net Income**

Our reported GAAP net income was \$30 million (\$0.37 per share) for the first quarter of 2012, as compared to \$18 million (\$0.22 per share) for the first quarter of 2011. We declared regular quarterly dividends of \$0.25 per share for both the first quarters of 2012 and 2011.

The following table presents the components of our GAAP net income for the three months ended March 31, 2012 and 2011.

Table 3 Net Income

(In Thousands, Except Share Data)	Three Months Ended March 31,	
	2012	2011
Interest income	\$ 58,740	\$ 54,333
Interest expense	(30,655)	(21,972)
Net interest income	28,085	32,361
Provision for loan losses	(274)	(2,807)
Other market valuation adjustments, net	(628)	(5,740)
Net interest income after provision and other market valuation adjustments	27,183	23,814
Mortgage banking activities, net	4,302	-
Operating expenses	(14,634)	(11,514)
Realized gains, net	13,620	3,864
Provision for income taxes	(8)	(14)
Less: Net loss attributable to noncontrolling interest	-	(2,015)
Net Income	\$ 30,463	\$ 18,165
Diluted weighted average common shares outstanding	79,892,013	79,371,776
Net earnings per share	\$ 0.37	\$ 0.22

The \$12 million increase in net income was primarily a result of improving interest income as we continue to invest in our residential and commercial businesses, positive results from mortgage banking activities that include gains from two residential loan securitizations that offset our hedging costs, lower provision expense at consolidated Sequoia entities, and gains associated with the sale of securities and the deconsolidation of certain Sequoia securitization entities.

The *Results of Operations and Financial Condition* section of this *Management's Discussion and Analysis of Financial Condition and Results of Operations* contains a detailed analysis of the components of our GAAP net income.

Net Interest Income after Provision and Other MVA

Net interest income after provision and Other MVA was \$27 million for the first quarter for 2012, as compared to \$24 million for the first quarter of 2011, an increase of \$3 million. This increase was primarily due to lower other MVA of \$5 million, and lower provision expense of \$2 million, which was partially offset by a decrease in net interest income of \$4 million.

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

As part of our first quarter 2012 assessment of the allowance for loan losses for consolidated Sequoia entities, we observed that delinquencies and defaults appeared to be stabilizing after some seasonal effects in the fourth quarter of 2011, indicating to us that the allowance is currently adequate for expected charge-offs. In addition, we

Table of Contents

are actively assessing certain legacy Sequoia entities for deconsolidation where we have recorded loan loss provisions that meet or exceed our GAAP investment in the entities. This assessment addresses excess GAAP provisions but is grounded in the economics of maintaining our investments in each entity versus selling them. In the first quarter, we deconsolidated five legacy Sequoia entities and realized \$7 million of gains that were comprised of both recoveries of excess provisions as well as cash raised by selling our interests in these entities. To the extent that the economics remain favorable, our bias will be to potentially transfer our interests and possibly deconsolidate additional legacy Sequoia entities that may otherwise require us to record future GAAP provisions in excess of our investments at risk.

The following table details the components of Other MVA for both the three months ended March 31, 2012 and 2011.

Table 4 Components of Other MVA

(In Thousands)	Three Months Ended March 31,	
	2012	2011
Residential loans, held-for-sale	\$ 93	\$ 3
Commercial loans, at fair value	11	219
Trading securities	34,165	19,916
Impairments on AFS securities	(332)	(2,622)
REO	18	(918)
Other derivative instruments, net	(2,529)	1,799
ABS issued - Acacia	(32,053)	(24,137)
Total Other Market Valuation Adjustments, Net	\$ (628)	\$ (5,740)

Other market valuation adjustments, net, were less than negative \$1 million for the first quarter of 2012, as compared to negative \$6 million for the first quarter of 2011, an improvement of \$5 million. This improvement was due to a \$14 million increase in the market value of trading securities, a \$2 million lower impairment expense on securities, and a \$1 million lower REO expense. These increases were partially offset by higher valuations on our ABS issued of \$8 million.

Mortgage Banking Activities, Net

During the first quarter of 2012, we engaged in a number of new activities related to our residential operations that were reported in a new income statement line item titled Mortgage Banking Activities, net. This line reflects what we believe to be the most significant operating activities of our residential loan business, notably the expenses associated with hedging activity associated with this business and any associated gain or loss on the completion of our securitizations accounted for as sales for GAAP. We shifted to a sale accounting framework for Sequoia securitizations completed in the first quarter of 2012 and expect to continue to use this framework for most future securitizations. This had the effect of our recognizing, upon securitization, any gain or loss associated with acquiring and securitizing loans, as opposed to recognizing those amounts through net interest income over the life of the securitization, which is what GAAP requires for securitizations that are accounted for as financings and consolidated on our books. This change had an immediate impact on our first quarter 2012 results, as we were able to offset substantially all of the hedging expenses we had incurred in the fourth quarter of 2011 relating to our January securitization, as the increased price of the securitized loans resulted in a higher gain on sale. Unfortunately, we cannot be sure that future securitizations transactions will occur so soon after hedging expenses are incurred or that they will offset these expenses. Therefore, we will likely continue to experience timing differences, to varying degrees, between the quarterly income and expenses we report relating to our residential loan business.

Also, as a result of completing securitizations accounted for as sales in the first quarter, we recorded mortgage servicing rights assets for the first time and we will also be recording any income, gain, or loss relating to servicing rights in the new Mortgage Banking Activities, net line item. These rights are included with certain loans we have acquired and are recognized as distinct assets to the extent we retain the rights but sell or transfer the associated loans into a securitization accounted for as a sale. Finally, we expect to report income associated with selling whole loans in the second quarter of 2012 and for these and any future whole loan sales, we

Table of Contents

plan to record the related gains or losses through Mortgage Banking Activities, net. We currently expect these residential loan business related activities to become an ongoing source of income for us in the future.

As a result of this new presentation, Realized Gains, net will continue to show nonrecurring amounts for items such as sales of securities, that are not generated by our ongoing business, but are more episodic or opportunistic in nature. We believe this change will help readers of our financial statements better distinguish between the recurring business activities we undertake through our residential and commercial businesses and nonrecurring items that may otherwise make evaluating our financial results difficult.

Realized Gains, Net

Realized gains, net, were \$14 million for the first quarter of 2012, a \$10 million increase from the first quarter of 2011. During the first quarter of 2012, we sold \$52 million of AFS securities for a gain of \$6 million and deconsolidated five previously-issued Sequoia securitizations for a gain of \$7 million. The following table details the components of realized gains, net, for the three months ended March 31, 2012 and 2011.

Table 5 Realized Gains, Net

(In Thousands)	Three Months Ended March 31,	
	2012	2011
Net gains on sales of real estate securities	\$ 6,184	\$ 3,955
Net gains on extinguishment of debt	313	-
Net gains on calls of real estate securities	113	(91)
Gain on deconsolidation	7,010	-
Total Realized Gains, Net	\$ 13,620	\$ 3,864

Operating Expenses

Operating expenses were \$15 million for the first quarter of 2012, as compared to \$12 million for the first quarter of 2011. The increase was primarily due to an increase in employee headcount and compensation costs, as non-compensation expenses remained relatively stable.

Estimated Taxable Income for Federal Tax Purposes

Our estimated total taxable income was \$8.3 million (\$0.11 per share) for the first quarter of 2012, as compared to taxable income of \$5 million (\$0.06 per share) for the first quarter of 2011. Our estimated REIT taxable income was \$10.4 million (\$0.13 per share) for the first quarter of 2012, as compared to REIT taxable income of \$7 million (\$0.09 per share) for the first quarter of 2011. Total realized credit losses on subordinate securities for the first quarters of 2012 and 2011 were \$10.4 million (\$0.13 per share) and \$15 million (\$0.19 per share), respectively.

Our REIT taxable income is that portion of our total taxable income that we earn at Redwood and its qualified REIT subsidiaries and determines the minimum amount of dividends we must distribute to shareholders in order to maintain our tax status as a REIT. The *Results of Operations Taxable Income* section of this *Management's Discussion and Analysis of Financial Condition and Results of Operations* contains a detailed analysis of our tax results and distributions to shareholders.

Table of Contents

Summary of Financial Condition, Capital Resources, and Liquidity

At March 31, 2012, our total capital was \$1.1 billion, including \$962 million in stockholders' equity and \$140 million of long-term debt. At March 31, 2012, our estimate of our available investment capacity was \$183 million. Based on our current expectation for new investment activity, we believe this excess capacity should be sufficient for investment activity we expect over the next two quarters. If and when the time comes to raise capital, our approach will be based on what we believe to be in the best interest of shareholders. Our capital raising efforts could include freeing up additional capital internally, the issuance of corporate debt or preferred equity, or the issuance of common equity.

Components of Book Value

The following supplemental components of book value table presents our assets and liabilities at March 31, 2012, and December 31, 2011. We show our investments in the New Sequoia and Other Consolidated Entities as separate line items, as estimated under GAAP, to highlight our specific ownership interests, as the underlying assets and liabilities of these entities are legally not ours even though we are required to consolidate them for financial reporting purposes. For all other components of book value, the values in the table below equal GAAP values.

Table 6 Components of Book Value

(In Millions, Except per Share Data)	March 31, 2012	December 31, 2011
Cash and cash equivalents	\$ 150	\$ 267
Loans		
Residential	303	395
Commercial	178	158
Total loans at Redwood	481	553
Real estate securities at Redwood		
Residential - Third party ⁽¹⁾	941	744
Residential - Sequoia	62	-
Commercial	6	6
CDO	-	1
Total real estate securities at Redwood	1,009	751
Investments in New Sequoia Entities	47	49
Investments in Other Consolidated Entities	40	42
Other assets	81	91
Total assets	1,808	1,752
Short-term debt	(441)	(428)
Long-term debt	(140)	(140)
Asset-backed securities issued - Resecuritization ⁽¹⁾	(207)	(220)
Other liabilities	(58)	(72)
Stockholders' Equity	\$ 962	\$ 893
Book Value Per Share	\$ 12.22	\$ 11.36

(1) The assets and liabilities of the Resecuritization are included in Real estate securities at Redwood - Residential - Third Party and Asset-backed securities issued - Resecuritization, respectively, although these assets and liabilities are owned by the Resecuritization entity and are legally not ours and we own only the securities and interests that we acquired from the Resecuritization entity. At March 31, 2012, the Resecuritization accounted for \$332 million of real estate securities and \$207 million of asset-backed securities issued and our investment in this Resecuritization is reflected in the difference between these assets and liabilities.

Changes in Book Value and Estimated Non-GAAP Economic Value

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

During the first quarter of 2012, our GAAP book value increased by \$0.86 per share to \$12.22 per share. The net increase resulted from a \$0.37 per share increase from reported earnings, a \$0.52 per share increase in net positive valuation increases on securities not reflected in earnings, and a \$0.18 per share increase in value of derivative

Table of Contents

hedges related to long-term debt not reflected in earnings, and \$0.04 per share increase from other net positive items, less \$0.25 per share from dividends paid to shareholders

At March 31, 2012, our estimate of non-GAAP economic value was \$13.18 per share, or \$0.96 per share higher than our reported GAAP book value. Approximately \$0.93 of this per share difference relates to an economic valuation of our long-term debt of \$67 million, which was \$73 million below the unamortized cost basis used to determine GAAP book value. An additional \$0.10 per share relates to an economic valuation of our net investment in Sequoia of \$95 million, which was \$8 million above the unamortized cost basis used to determine GAAP book value. These amounts were offset by \$0.07 per share relating to an economic valuation of our net investment in the resecuritization we engaged in during the third quarter of 2011 that was \$5 million above the unamortized cost basis used to determine GAAP book value. A further discussion of our estimate of non-GAAP economic value is set forth below under *Investments in Securitization Entities* and *Factors Affecting Management's Estimate of Economic Book Value*.

Cash and Cash Equivalents

At March 31, 2012, we had \$150 million in cash and cash equivalents, as compared to \$267 million at December 31, 2011, a decrease of \$117 million. The decrease was primarily attributable to acquisition of residential mortgage loans and securities, originations of commercial loans, and repayments of warehouse debt, offset by cash raised from two Sequoia securitizations and an increase in short-term debt, net.

Table of Contents

As a supplement to the Consolidated Statements of Cash Flows included in this Quarterly Report on Form 10-Q, the following table details our sources and uses of cash for the three months ended March 31, 2012 and December 31, 2011, in a manner consistent with the way management analyzes them. This table illustrates our cash balances at March 31, 2012, December 31, 2011, and September 30, 2011 (each a GAAP amount), and organizes the components of sources and uses of cash (non-GAAP amounts) by aggregating and netting all items within our GAAP Consolidated Statements of Cash Flows that were attributable to the periods presented.

Table 7 Sources and Uses of Cash

(In Millions)	Three Months Ended	
	March 31, 2012	December 31, 2011
Beginning Cash Balance	\$ 267	\$ 133
Business cash flow ⁽¹⁾		
Loans, securities, and investments ⁽²⁾	74	60

Share repurchase	-	(4)
Changes in working capital	(3)	4
Net financing and other cash flow	773	410
Ending Cash Balance	\$ 150	\$ 267

- (1) Cash flow from loans, securities, and investments can be volatile from quarter to quarter depending on the level of invested capital, the timing of credit losses, acquisitions, sales, and changes in prepayments and interest rates. Therefore, (i) cash flow generated by these investments in a given period is not necessarily reflective of the long-term economic return we will earn on the investments and (ii) it is difficult to determine what portion of the cash received from an investment is a return of principal and what portion is a return on principal in a given period. This table excludes cash flow generated by our investments in the Sequoia and Acacia entities and the Fund (cash flow that is not available to Redwood), but does include the cash flow distributed to Redwood as a result of our investments in these entities.

(2)

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

Sources of cash from loans, securities, and investments includes the gross cash flow received from the securities that were included in the Resecuritization, and Resecuritization interest expense reflects payments in respect of ABS issued in that Resecuritization.

- (3) During the fourth quarter of 2011, we made two dividend payments due to our decision to change the payment date to coincide with the quarter in which the dividends are declared.
- (4) Total sales of securities in the first quarter of 2012 were \$61 million. Securities sales of \$6 million made in the first quarter of 2012 that settled in April are not reflected in Acquisitions of securities, net. Total acquisitions of securities in the first

Table of Contents

quarter of 2012 were \$223 million. Securities acquisitions of \$1 million made in the first quarter that settled in April are not reflected in Acquisitions of securities, net. There were no unsettled trades at December 31, 2011.

Real Estate Securities at Redwood

The following table presents the components of fair value (which equals GAAP carrying value) for real estate securities at Redwood at March 31, 2012. We categorize our securities by portfolio vintage (the year(s) the securities were issued), by priority of cash flows – senior, re-REMIC, and subordinate – and, for residential, by quality of underlying loans – prime and non-prime.

Table 8 Securities at Redwood by Vintage and as a Percentage of Total Securities**March 31, 2012**

(In Millions)	2004 & Earlier	2005	2006 - 2008	2012	Total	% of Total Securities
Residential						
Senior						
Prime	\$ 45	\$ 183	\$ 209	\$ 22	\$ 459	45 %
Non-prime	105	164	6	-	275	27 %
Total Senior	150	347	215	22	734	72 %
Re-REMIC prime	3	56	96	-	155	15 %
Subordinate						
Prime	57	6	3	40	106	11 %
Non-prime	8	-	-	-	8	1 %
Total Subordinate	65	6	3	40	114	12 %
Total Residential	218	409	314	62	1,003	99 %
Commercial	5	1	-	-	6	1 %
CDO	-	-	-	-	-	-
Total Securities at Redwood	\$ 223	\$ 410	\$ 314	\$ 62	\$ 1,009	100 %

During the first quarter of 2012, our securities portfolio increased \$258 million to \$1.01 billion. This increase is attributable to a \$41 million increase in value of our securities, \$284 million of acquisitions, partially offset by \$47 million of sales and \$20 million from the effect of principal repayments. Our first quarter acquisitions included \$194 million of prime senior securities, \$45 million of prime subordinate securities, \$19 million of non-prime senior securities, and \$26 million of re-REMIC securities. Through April 30, 2012, we acquired an additional \$70 million and sold \$27 million of securities at Redwood.

Table of Contents**Derivatives at Redwood**

At March 31, 2012, we had net derivative liabilities of \$43 million, as compared with net derivative liabilities of \$65 million at December 31, 2011. The following table presents the aggregate fair value derivative financial instruments held at Redwood at March 31, 2012 and December 31, 2011.

Table 9 Derivatives at Redwood

(In Thousands)	March 31, 2012	December 31, 2011
Assets - Risk Management Derivatives		
TBA's	\$ 963	\$ -
Futures	-	47
Swaptions	293	-
Total Derivative Assets	1,256	47
Liabilities - Cash Flow Hedges		
Interest rate swaps	(40,557)	(54,353)
Liabilities - Risk Management Derivatives		
Interest rate swaps	(3,130)	(5,270)
TBA's	(236)	(5,060)
Futures	(200)	(186)
Total Derivative Liabilities	(44,123)	(64,869)
Total Derivative Financial Instruments, Net	\$ (42,867)	\$ (64,822)

We are party to interest rate swaps, interest rate swaptions, To Be Announced (TBA) contracts sold, net, and financial futures that are generally utilized to (i) manage risks associated with residential loans we own or plan to acquire and securitize; (ii) manage risks associated with commercial loans we invest in; and, (iii) fix the interest expense related to our long-term debt and other liabilities.

Unrealized Gains and Losses on Real Estate Securities and Derivatives

At March 31, 2012, we had net unrealized gains of \$42 million recorded to accumulated other comprehensive income, a component of stockholders' equity, a \$55 million increase from the net unrealized losses of \$13 million at December 31, 2011. The following table presents the activity related to unrealized gains and losses on securities and derivatives for the three months ended March 31, 2012.

Table 10 Accumulated Other Comprehensive Income

(In Millions)	Senior Residential	Re-REMIC Residential	Residential	Subordinate Commercial	CDO	Derivatives	Total
December 31, 2011	\$ 21	\$ 37	\$ (6)	\$ 2	\$ -	\$ (67)	\$ (13)

Net unrealized gain on real estate securities	24	10	7	-	-	-	41
Net unrealized gain on interest rate agreements	-	-	-	-	-	13	13
Reclassification:							
OTTI to net income	-	-	-	-	-	-	-
Unrealized loss on interest rate agreements to net income	-	-	-	-	-	1	1

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

Accumulated Income (Loss) Recognized

in Stockholders' Equity at March 31,

2012	\$	45	\$	47	\$	1	\$	2	\$	-	\$	(53)	\$	42
------	----	----	----	----	----	---	----	---	----	---	----	------	----	----

A significant aspect of our ongoing risk management activities entails managing the interest-rate exposure brought about by long-term liabilities, primarily our \$140 million of long-term debt. Changes in the values of derivatives designated as cash flow hedges used to offset changes in future payment obligations currently flow to the extent effective through our consolidated balance sheet and not our consolidated income statement. The increase in benchmark interest rates during the first quarter of 2012 caused a \$13 million increase in the value of these derivatives.

Table of Contents

During the first quarter of 2012, \$41 million of fair value increases on securities were recognized in net unrealized gains and \$1 million of unrealized losses on interest rate agreements were reclassified into income.

Investments in Securitization Entities

The estimated carrying value of our investments in the Sequoia and Acacia securitization entities totaled \$87 million, or 9% of our equity at March 31, 2012. The carrying value reflects the estimated book value of our retained investments in these entities, based on the difference between the consolidated assets and liabilities of the entities in the aggregate according to their GAAP carrying amounts. During the first quarter of 2012, cash flow generated by our investments in these entities totaled \$9 million.

Our investments in New Sequoia Entities and Other Consolidated Entities, as reported for GAAP, totaled \$87 million at March 31, 2012 and consisted of IOs and subordinate securities. Management's estimate of the non-GAAP economic value of our investments in these entities was \$95 million. Of this amount, \$49 million consisted of IOs and \$46 million consisted of subordinate securities at New Sequoia Entities and Other Consolidated Entities.

Factors Affecting Management's Estimate of Economic Book Value

In reviewing our non-GAAP estimate of economic value, there are a number of important factors and limitations to consider. The estimated economic value of our stockholders' equity is calculated as of a particular point in time based on our existing assets and liabilities or, in certain cases, our estimate of economic value of our existing assets and liabilities, and does not incorporate other factors that may have a significant impact on that value, most notably the impact of future business activities and cash flows. As a result, the estimated economic value of our stockholders' equity does not necessarily represent an estimate of our net realizable value, liquidation value, or our market value as a whole. Amounts we ultimately realize from the disposition of assets or settlement of liabilities may vary significantly from the estimated economic values of those assets and liabilities. Because temporary changes in market conditions can substantially affect our estimate of the economic value of our stockholders' equity, we do not believe that short-term fluctuations in the economic value of our assets and liabilities are necessarily representative of the effectiveness of our investment strategy or the long-term underlying value of our business.

Our estimated non-GAAP economic value is calculated using bid-side asset marks (or estimated bid-side values) and offer-side marks for our financial liabilities (or estimated offered-side values), when available, to determine fair value under GAAP. When quoted market prices or observable market data are not available to estimate fair value, we rely on Level 3 inputs. Because assets and liabilities classified as Level 3 are generally based on unobservable inputs, the process of calculating economic value is generally subjective and involves a high degree of management judgment and assumptions. These assumptions may have a significant effect on our estimates of economic value, and the use of different assumptions as well as changes in market conditions could have a material effect on our results of operations or financial condition.

For GAAP, we report as a liability the \$140 million outstanding principal amount of our long-term debt. We calculated the \$67 million estimate of non-GAAP economic value of our long-term debt based on its stated interest rate using the same valuation process used to fair value our other financial assets and liabilities. The differences between the GAAP carrying value of our investments in Sequoia entities and management's estimate of the non-GAAP economic value of those investments is set forth above under *Investments in Securitization Entities*.

Table of Contents**Results of Operations and Financial Condition**

The following tables present the results of Redwood (Parent), New Sequoia Entities (Sequoia securitization entities consolidated and issued in 2010 and subsequent periods), and Other Consolidated Entities in order to supplement our consolidated GAAP results for the three months ended March 31, 2012 and 2011. The interest income and expense related to the resecuritization we engaged in during the third quarter of 2011 (the Resecuritization) are included at Redwood (Parent). Additionally, these tables present the New Sequoia Entities separately from Other Consolidated Entities to highlight our creation of residential credit investments since the beginning of 2010 through our Sequoia securitization platform. Other Consolidated Entities include Sequoia entities issued prior to 2010, Acacia entities, and the Fund.

Table of Contents

At March 31, 2012, 68% of our consolidated assets and 81% of our consolidated liabilities were owned at consolidated Sequoia and Acacia entities. Although we consolidate these assets and liabilities for financial reporting purposes, they are bankruptcy-remote from us. That is, they are structured so that Redwood's obligations are not liabilities of the consolidated entities and the liabilities of the consolidated entities are not legal obligations of Redwood.

The following table presents the components of our non-GAAP consolidating balance sheets at March 31, 2012.

Table 12 Consolidating Balance Sheet

March 31, 2012

- (1) The consolidating balance sheet presents the assets and liabilities of the Resecuritization under Redwood (Parent), although these assets and liabilities are owned by the Resecuritization entity and are legally not ours and we own only the securities and interests that we acquired from the Resecuritization entity. At March 31, 2012, the Resecuritization accounted for \$332 million of available-for-sale securities and \$207 million of asset-backed securities issued and our investment in this Resecuritization equals the difference between these assets and liabilities.

Table of Contents**Results of Operations Redwood (Parent)*****Net Interest Income after Provision and Other MVA at Redwood (Parent)***

Net interest income after provision and other MVA at Redwood was \$26 million in both the first quarter of 2012 and 2011. The interest income and interest expense related to the Resecuritization are included in Redwood (Parent). The following table presents the components of net interest income after provision and other MVA at Redwood for the three months ended March 31, 2012 and 2011.

Table 13 Net Interest Income after Provision and Other MVA at Redwood (Parent)

Provision for loan losses	(274)			-		
Other MVA, net	(378)			874		
Net Interest Income After Provision and Other MVA	\$ 25,568			\$ 26,410		

(1) Interest rate agreement expense relates to cash-flow hedges on long-term debt. The combined expense yield on our hedged long-term debt was 6.88% and 6.85% for the three months ended March 31, 2012 and 2011, respectively.

Net interest income after provision and other MVA was \$26 million for the first quarter of 2012, a slight decrease from the first quarter of 2011. This decrease was primarily a result of a \$1 million increase in negative market valuation adjustments. This decrease was partially offset by a modest increase in net interest income as interest income increased by \$4 million due to higher average earning assets and was partially offset by \$3 million in higher interest expense related to financing these assets.

Table of Contents

Net Interest Income at Redwood (Parent)

Interest income on AFS securities at Redwood was \$21 million and \$23 million for the three months ended March 31, 2012 and 2011, respectively. The following tables present the components of the interest income we earned on AFS securities for the three months ended March 31, 2012 and 2011.

(1) Cash flow from many of our subordinate securities can be volatile and in certain cases (e.g., when the fair values of certain securities are close to zero) any interest income earned can result in unusually high reported yields that are not sustainable and not necessarily meaningful.

Interest income from available-for-sale securities at Redwood was \$21 million in the first quarter of 2012, as compared to \$23 million in the first quarter of 2011, a decline of \$2 million. This decline was primarily due to declining yields on our portfolio as higher yielding, more credit sensitive investments paid down and were replaced with lower yielding, less credit sensitive investments.

Interest income from trading securities at Redwood was \$3 million and \$2 million for the three months ended March 31, 2012 and 2011, respectively. The \$1 million increase in interest income was due to the increase in average balance of these securities, as we added three interest-only securities related to the Sequoia securitizations we sponsored during the first quarter of 2012. The increase in income from average

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

balances was offset by a decline in yield as the value of these securities has appreciated over the past several quarters. Over time, changes in value of these securities will be recorded as other market valuation adjustments, net and the yields on this portfolio will be affected by changes in market value and variations in cashflows caused by changing prepayments.

Table of Contents***Other MVA at Redwood (Parent)***

The following table shows the impact of other market valuation adjustments and impairments (including those of the Resecuritization) on our consolidated statements of income for the three months ended March 31, 2012 and 2011.

Risk management derivatives	103	2,500
REO	-	(5)
Total Other MVA, Net	\$ (378)	\$ 874

Trading Securities and Derivatives

Market valuation adjustments on trading securities and derivatives were less than negative \$1 million for the first quarter of 2012, as compared to net positive \$2 million in the first quarter of 2011. Valuation changes of negative \$3 million related to derivatives used to manage certain risks associated with the residential loans we own or plan to acquire and securitize are excluded from other market valuation adjustments and included in mortgage banking activities on our consolidated statements of income.

Impairment on AFS securities

We classify most securities at Redwood as AFS and report any unrealized gains and losses, as well as any OTTI not related to credit factors, as components of equity in our consolidated balance sheets. Any OTTI on AFS securities that is related to adverse credit factors is recorded through our consolidated statements of income. Similarly, any unrealized losses on AFS securities that we no longer intend to hold at the date of the financial statements are recorded as OTTI through our consolidated statements of income.

During the first quarter of 2012, we recognized an aggregate of less than \$1 million of OTTI on AFS securities at Redwood. Of this amount, less than \$1 million was related to credit factors and recognized in our consolidated statements of income, and less than \$1 million was recognized as a reduction in stockholders' equity. During the first quarter of 2011, we recognized an aggregate of \$2 million of OTTI on AFS securities at Redwood. Of this amount, \$1 million was related to credit factors and recognized in our consolidated statements of income, and the remaining \$1 million was recognized as a reduction in equity.

Mortgage Banking Activities

Mortgage banking activities include the components of the contribution to net income from our residential loan business activities. The following tables present the components of mortgage banking activities for the three months ended March 31, 2012.

Net gains on mortgage loan securitizations		7,365
Total Mortgage Banking Activities, Net	\$	4,302

Table of Contents

Mortgage Servicing Rights

Mortgage banking activities, net includes the net servicing income earned from, and valuation increases related to, MSRs we have recognized on our consolidated balance sheet. Our MSRs are held and managed at a taxable REIT subsidiary of ours and, typically, are directly acquired from loan originators or created through the transfer of the loans to a Sequoia residential securitization sponsored by us that meets the GAAP criteria for sale. In the first quarter of 2012, we earned a net \$10 thousand from these MSRs and at March 31, 2012, the fair value of these MSRs was \$1.6 million. Although Redwood retains the rights to service certain loans we securitize or sell, we utilize a sub-servicer to perform these activities.

Hedging Market Valuation Adjustments Related to Mortgage Banking Activities

Net valuation losses from economic hedges include the changes in fair value of our risk management derivatives. As part of our ongoing risk management activities, we attempt to manage the risk of changes in the value of fixed-rate and hybrid loans awaiting sale or securitization that would result primarily from a change in benchmark interest rates. We are exposed to this risk between the time a mortgage interest rate is established for each loan we plan to acquire, through the time the loan is sold or securitized through our Sequoia program. Under normal market conditions and assuming we have hedged well, we would expect our risk management activities including the use of interest rate and other derivatives to reduce our risk exposure to changing interest rates so that the gain or loss in the value of our derivatives would to varying degrees offset a loss or gain in the value of these loans, and ultimately the loss or gain of those loans at the time they are sold.

Gains Related to Mortgage Banking Activities

Net gains on mortgage loan securitizations during the first quarter of 2012 include the realized gain on the sale of loans to two Sequoia securitization entities we sponsor. Realized gains or losses on securitization include the net benefit of the gross proceeds from the sale of the loans, less the carrying value of the loans and any related issuance costs. Going forward, we expect our mortgage banking activities to include the gain or loss from the sale of loans, in addition to the gain or loss on securitization.

Impact of Mortgage Banking Activities on Redwood's Operations

Excluded from the activities above is the net interest income that we earn from the loans we acquire for future sale or securitization. The net income from these loans is included as part of the interest income from residential loans at Redwood and the interest expense associated with the related borrowing costs from our warehouse facilities is included as part of the short-term debt expense at Redwood.

Table of Contents**Earning Assets Redwood (Parent)****Residential Loans at Redwood (Parent)**

During 2011 and 2012, we continued to purchase newly originated residential loans through our residential loan business. On December 31, 2011, we reclassified \$393 million (recorded investment) of loans previously classified as held-for-investment to held-for-sale, as we intend to transfer these loans to Sequoia securitization entities and account for these transfers as sales for financial reporting purposes. At March 31, 2012, residential loans held-for-sale at Redwood had an outstanding principal balance and carrying value of \$303 million. There were no residential loans held-for-investment at March 31, 2012. The following table provides the activity of residential loans at Redwood during the three months ended March 31, 2012.

Commercial Loans Held-for-Investment at Redwood (Parent)

At March 31, 2012, there were nineteen commercial loans held-for-investment with an outstanding principal balance of \$183 million and a carrying value of \$178 million. At March 31, 2012, our allowance for estimated loan losses inherent in our commercial loan portfolio totaled \$0.9 million. On average, these loans have a maturity of over five years, unlevered yield in excess of 10% per annum before credit costs, a loan-to-value ratio of 72% at origination, and a debt service coverage ratio at origination of 1.17X based on our underwritten cash flows.

Derivative Financial Instruments at Redwood (Parent)**Risks Related to Unsecuritized Residential and Commercial Loans**

In order to manage certain risks associated with residential loans we own or plan to acquire and securitize and commercial loans we invest in, at March 31, 2012, we were party to interest rate agreements with an aggregate notional amount of \$157 million, TBA contracts sold with an aggregate notional amount of \$312 million, and financial futures with an aggregate notional amount of \$288 million. Net market valuation adjustments on these derivatives were negative \$3 million and positive \$2 million for the three months ended March 31, 2012 and 2011, respectively.

Derivatives Designated as Cash Flow Hedges

To hedge the variability in interest expense we entered into interest rate swaps during 2010 and during the second quarter of 2011 with an aggregate notional balance of \$145 million at March 31, 2012, of which \$140 million is designated against our long-term debt and \$5 million is designated against certain adjustable-rate securitization entity liabilities. We designated these derivatives as cash flow hedges. For the three months ended March 31, 2012 and 2011, these hedges increased in value by \$13 million and \$4 million, respectively, which was recorded to accumulated other comprehensive income, a component of equity.

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

At March 31, 2012, interest rate agreements previously or currently accounted for as cash flow hedges had an unrealized loss of \$53 million, a \$14 million increase from the net unrealized loss of \$67 million at December 31, 2011. During the first quarter of 2012, \$1 million of net unrealized losses on interest rate agreements related to derivatives previously designated as cash flow hedges were reclassified to earnings, and \$13 million of valuation increases associated with derivatives accounted for as cash flow hedges were recognized in other comprehensive income.

Table of Contents

While changes in the value of derivatives designated as cash flow hedges affect reported book value from quarter to quarter, we have a long-term view on these hedges. For instance, the derivative hedges closely match the terms of our long-term debt, which has a remaining life of approximately 26 years. At some point during this time frame, interest rates may rise, increasing the value of these hedges.

Securities at Redwood (Parent)

We classify most senior, re-REMIC, and subordinate securities as AFS securities. Senior securities are those interests in a securitization that have the first right to cash flows and are last in line to absorb losses. Of the senior securities owned at Redwood at March 31, 2012, \$181 million of prime securities and \$152 million of non-prime securities were financed through the Resecuritization. Re-REMIC securities, as presented herein, were created through the res securitization of certain senior interests to provide additional credit support to those interests. These re-REMIC securities are therefore subordinate to the remaining senior interest, but senior to any subordinate tranches of the securitization from which they were created. Subordinate securities are all interests below senior and re-REMIC interests. The commercial and CDO securities that we own are subordinate securities.

The following table provides real estate securities activity at Redwood for the three months ended March 31, 2012.

Table 21 Real Estate Securities Activity at Redwood (Parent)**Three Months Ended March 31, 2012**

Table of Contents

Senior Securities

The fair value of our senior AFS securities was equal to 84% of their principal balance at March 31, 2012, while our amortized cost was equal to 79% of the principal balance. The fair value of our senior securities accounted for as trading securities was \$42 million. Volatility in income recognition for these securities is most affected by changes in prepayment rates and, to a lesser extent, credit results and interest rates.

The loans underlying all of our residential senior securities totaled \$17 billion at March 31, 2012, consisting of \$11 billion prime and \$6 billion non-prime. These loans are located nationwide with a large concentration in California (44%). Serious delinquencies (90+ days, in foreclosure or REO) at March 31, 2012 were 11.30% of current balances. Serious delinquencies were 9.27% of current balances for loans in prime pools and 14.79% of current balances for loans in non-prime pools at March 31, 2012.

Re-REMIC Securities

Our re-REMIC portfolio consists of prime residential senior securities that were pooled and re-securitized in 2009 and 2010 by third parties to create two-tranche structures; we own support (or subordinate) securities within those structures. There were less than \$1 thousand of credit losses in our re-REMIC portfolio during the first quarter of 2012. We anticipate losses, which were included in our acquisition assumptions, and have provided for \$64 million of credit reserves on the \$253 million principal balance of those securities.

The fair value of our re-REMIC AFS securities was equal to 61% of the principal balance of the portfolio at March 31, 2012, while our amortized cost was equal to 42% of the principal balance. The loans underlying all of our residential re-REMIC securities totaled \$8 billion at March 31, 2012, and were all prime credit quality at time of origination. These loans are located nationwide with a large concentration in California (44%). Serious delinquencies (90+ days, in foreclosure or REO) at March 31, 2012 were 10.08% of current balances.

Subordinate Securities

The fair value of our subordinate AFS securities was equal to 42% of the principal balance at March 31, 2012, while our amortized cost was equal to 42% of the principal balance. Credit losses totaled \$14 million in our residential subordinate portfolio during the first quarter of 2012, as compared to \$22 million of losses during the first quarter of 2011. We expect future losses will extinguish a large percentage of the outstanding principal of these securities, as reflected by the \$125 million of credit reserves we have provided for on the \$270 million principal balance of those securities.

The loans underlying all of our residential subordinate securities totaled \$21 billion at March 31, 2012, consisting of \$20 billion prime and \$1 billion non-prime (at origination). These loans are located nationwide with a large concentration in California (41%). Serious delinquencies (90+ days, in foreclosure or REO) at March 31, 2012 were 5.67% of current balances. Serious delinquencies were 5.24% of current balances for loans in prime pools and 13.12% of current balances for loans in non-prime pools at March 31, 2012.

Commercial Securities

At March 31, 2012, all of our commercial securities at Redwood were subordinate securities predominantly issued in 2004 and 2005. The fair value of these securities totaled \$6 million at both March 31, 2012 and December 31, 2011. These securities provided credit enhancement on \$8 billion of underlying loans on office, retail, multifamily, industrial, and other income-producing properties nationwide. Seriously delinquent loans (60+ days delinquent, in foreclosure or REO) underlying commercial subordinate securities were \$488 million at March 31, 2012. Our credit reserve of \$34 million on the current principal balance of \$43 million at March 31, 2012, reflects our expectation that we will only receive a small amount of principal over the remaining life of these securities. Credit losses in excess of our investments in each securitization will be borne by senior securities once losses extinguish our subordinate investments. Accordingly, most of the remaining expected cash flow from commercial securities will come from coupon interest payments. Realized credit losses on our commercial securities were \$7 million and \$9 million in the three months ended March 31, 2012 and 2011, respectively, and were charged against our designated credit reserve.

Table of Contents**Results of Operations and Earning Assets New Sequoia Entities**

Net interest income at New Sequoia Entities was \$1.1 million and \$0.4 million for the three months ended March 31, 2012 and 2011, respectively. The following table presents the net interest income after provision at New Sequoia Entities for the three months ended March 31, 2012 and 2011.

Table 24 Net Interest Income After Provision at New Sequoia Entities

(Dollars in Thousands)	Three Months Ended March 31,					
	Interest Income/ (Expense)	2012 Average Amortized Cost	Yield	Interest Income/ (Expense)	2011 Average Amortized Cost	Yield

Provision for loan losses	-			(6)		
Net Interest Income After Provision	\$ 1,140			\$ 379		

Net Interest Income at New Sequoia Entities

During 2011, we transferred \$671 million of fixed rate, first-lien, residential mortgage loans originated between 2009 and 2011 into two Sequoia securitization entities that we sponsored and consolidated for financial reporting purposes. At March 31, 2012, the weighted average current loan balance on these loans was \$825,108. The weighted average FICO score for those securitized loans still outstanding at March 31, 2012, was 773 at origination and the weighted average original LTV ratio was 60%.

Voluntary prepayments of loans at the Sequoia entity issued in 2010 have been high due to an increase in borrower refinancing activity, largely as a result of declining interest rates since the middle of 2010. At March 31, 2012, \$178 million of outstanding principal had prepaid since issuance and the constant prepayment rate (CPR) was 49% for the three months ended March 31, 2012. The annualized prepayment rate for the Sequoia entity issued in the first quarter of 2011 was 27% CPR in the first quarter of 2012, and 26% CPR for the Sequoia entity issued in the third quarter of 2011. At March 31, 2012, the current outstanding principal balance of loans at New Sequoia Entities totaled \$590 million.

The following table provides details of residential loans activity at New Sequoia Entities during the three months ended March 31, 2012.

Results of Operations Other Consolidated Entities

The following table presents the net interest income (loss) after provision and other MVA at other consolidated entities for the three months ended March 31, 2012 and 2011. These entities include all consolidated Sequoia entities issued prior to 2010, the Acacia entities, and the Fund. Net interest income at other consolidated entities will vary

Table of Contents

from period to period and depend primarily on the net effect of changes in the market values of trading securities, risk management derivatives and ABS issued at Acacia, changes in the levels of delinquencies and loss severities for loans held-for-investment, and changes in the rates of principal repayments or the investments held at these entities.

Table 26 Net Interest Income (Loss) After Provision and Other MVA at Other Consolidated Entities

Net Interest (Loss) Income After Provision and Other MVA	\$ 475			\$ (2,975)		

Net Interest Income at Other Consolidated Entities

Net interest income at Other Consolidated Entities was \$1 million in the first quarter of 2012, as compared to \$6 million in the first quarter of 2011. The \$5 million decline in net interest income is primarily the result of principal repayments or credit losses on the securities and loans at these entities as we have not acquired or otherwise added to our assets and liabilities at Other Consolidated Entities since 2008. The decline is also due to the sales of securities from the Fund during 2011. The decline in reported yield on trading securities is a result of the net appreciation in value of these assets since early 2010. This decline will be partially offset by a decline in other market valuation adjustments, net.

Other MVA at Other Consolidated Entities

We apply the fair value option provided under GAAP to account for the assets (e.g., loans and securities) and liabilities (e.g., ABS issued) at the consolidated Acacia entities. This option requires that changes in the fair value of these assets and liabilities be recorded in the consolidated statements of income each reporting period. Derivative assets and liabilities at Acacia securitization entities are accounted for as trading instruments with all changes in the fair value of these assets and liabilities recorded as other market valuation adjustments through our consolidated statements of income.

Table of Contents

The following table shows the impact of other MVA and impairments at our other consolidated entities for the three months ended March 31, 2012 and 2011.

Table 27 Other MVA at Other Consolidated Entities

REO	18	(913)
Total Other MVA, Net	\$ (250)	\$ (6,614)

For the three months ended March 31, 2012, there were \$1 million of net negative market valuation adjustments on the assets and liabilities at the Acacia entities. For the three months ended March 31, 2011, there were \$4 million of net negative market valuation adjustments on the assets and liabilities at the Acacia entities; \$2 million of impairments at the Fund; and \$1 million of net negative market valuation adjustments on REO properties at the legacy Sequoia entities.

Loan Loss Provision at Legacy Sequoia Entities

Each quarter we utilize a loan loss reserving methodology that has been established to provide management with a reasonable and adequate estimate of loan loss reserving needs. This methodology is disclosed in *Note 3* and *Note 6* included in Part I, Item I of this Quarterly Report on Form 10-Q.

During the first quarter of 2012, we sold variable interests in five Sequoia securitizations issued between 2001 and 2003 and determined that upon completion of an accounting analysis we should derecognize the associated assets and liabilities of these securitizations for financial reporting purposes. We deconsolidated \$307 million of real estate loans and other assets and \$307 million of ABS issued and other liabilities. The net effect of these transactions associated with this deconsolidation was a \$7 million increase in realized gains, net, which was recorded to our consolidated statement of income for three months ended March 31, 2012. These gains were comprised of both recoveries of excess provisions as well as cash raised by selling our interests in these entities. We maintained our intent to hold our economic interests in all remaining consolidated Sequoia entities at March 31, 2012.

We did not record a provision for loan losses at legacy Sequoia entities (Sequoia securitizations issued prior to 2009 that we consolidate for financial reporting purposes) for the three months ended March 31, 2012, as compared to a provision of \$3 million recorded for the three months ended March 31, 2011. The decrease in the provision was primarily attributable to the improved performance of our delinquent loan population. Net charge-offs were \$3 million (or 0.11% of outstanding loan balances) for the three months ended March 31, 2012, as compared to \$2 million (or 0.07% of outstanding loan balances) for the three months ended March 31, 2011. This resulted in a decrease of \$3 million and an increase of \$1 million in our allowance for loan losses for the three months ended March 31, 2012 and 2011, respectively. Charge-offs were generated by \$10 million and \$8 million of defaulted loan principal during the three months ended March 31, 2012 and 2011, respectively, for average implied loss severities of 33% and 29%, respectively.

The allowance for loan losses decreased to \$59 million (or 2.12% of outstanding loan balances) at March 31, 2012, from \$67 million (or 2.11% of outstanding loan balances) at December 31, 2011. Of the \$8 million decrease in the allowance, \$5 million of the decrease was associated with the deconsolidation of five Sequoia securitization entities and the remaining decrease of \$3 million was directly attributable to charge-offs. Serious delinquencies on loans held at consolidated Sequoia entities (90+ days delinquent) decreased to \$123 million (or 4.41% of outstanding loan balances) at March 31, 2012, from \$137 million (or 4.34% of outstanding loan balances) at December 31, 2011. Of the \$14 million decrease in the serious delinquent loan balance, \$10 million of the decrease was attributable to the deconsolidation of loan assets and the remaining \$4 million was directly attributable to a decrease in delinquencies in our remaining Sequoia securitization entities. While loans originated in Florida, Pennsylvania, Ohio, and Rhode Island accounted for 21% of total loans held by Sequoia entities, loans in these states made up 39% of the serious delinquent loan balance at March 31, 2012.

Table of Contents

At March 31, 2012, we estimate that there were ten Sequoia entities that we consolidated for which the carrying value of the liabilities at each entity exceeded the corresponding carrying value of the entity's assets. This is primarily attributable to the continued building of loan loss allowances in accordance with GAAP, resulting in lower asset carrying values. The aggregate estimated net assets (or equity) at these ten consolidated entities was negative \$6 million at March 31, 2012, an amount we expect to reverse through positive adjustments to earnings in future periods as the entities are retired or deconsolidated for financial reporting purposes.

Earning Assets Other Consolidated Entities**Real Estate Loans at Legacy Sequoia Entities**

The following table provides details of residential loans activity at the legacy Sequoia securitization entities for the three months ended March 31, 2012.

Provision for loan losses	-
Balance at End of Period	\$ 2,757,218

Loan Characteristics

The following table highlights principal balances for consolidated loans at legacy Sequoia entities by product type. First lien adjustable rate mortgage (ARM) loans comprise 95% of this portion of our consolidated Sequoia loan portfolio. Of the \$118 million of hybrid loans held at Sequoia securitization entities at March 31, 2012, \$55 million (or 47%) had reset as of March 31, 2012, and now act as ARM loans.

Table 29 Loan Characteristics at Legacy Sequoia Entities**March 31, 2012**

(Dollars In Thousands)	Principal Value	Percent of Total
First Lien		
ARM	\$ 2,630,205	94.52%
Hybrid (years to reset)		
Reset	55,361	1.99%
0-4	48,685	1.75%
5-8	14,390	0.52%
Second Lien		
ARM	34,005	1.22%
Total Outstanding Principal	\$ 2,782,646	100.00%

At March 31, 2012, \$2.54 billion of legacy Sequoia loans (91% of outstanding principal balances) were originated in 2005 or prior and have many years of demonstrated payment histories. At March 31, 2012, the weighted average FICO score (at origination) for our legacy Sequoia

loans outstanding was 730 and the weighted average original LTV ratio was 67%.

Table of Contents

The following chart presents the weighted average prepayment speeds of loans held at these Sequoia securitization entities over the past four years.

Prepayment speeds on ARM loans held at legacy Sequoia entities remained relatively low during the first three months of 2012 as one-month and six-month LIBOR rates remained low relative to historical averages. At March 31, 2012, LIBOR ARM loans at legacy Sequoia entities had a weighted average coupon of 1.77%, and hybrid loans at legacy Sequoia entities had a weighted average coupon of 3.86%.

Loan Repurchase Risk

Subsidiaries of Redwood have purchased residential mortgage loans and either deposited those loans into Sequoia securitization trusts sponsored by RWT Holdings, Inc., a Redwood subsidiary, or sold those loans to third parties. The Sequoia trusts have subsequently issued residential mortgage backed securities, some of which are not currently consolidated on our balance sheet for financial reporting purposes. In connection with these securitizations and loan sales, these subsidiaries of Redwood made certain representations and warranties related to these loans that could result in an obligation to repurchase these loans to the extent a violation of these representations and warranties occurred. We do not originate residential loans and believe that risk of loss due to loan repurchases (i.e., due to a breach of representations and warranties) would generally be a contingency to the third-party entity from whom we acquired the loans. However, in some cases, where loans were acquired from entities that have since become insolvent, repurchase claims would not be a contingency to a third party and may result in repurchase claims made against us. As of March 31, 2012, there have been no loan-level repurchase claims made to Redwood by Sequoia investors or third party loan purchasers where the entity that originated the loans in question was insolvent. As a result, while it is possible that we may receive repurchase claims related to these securitizations in the future, we cannot make a reasonable estimate of potential future liabilities based on historical experience to date.

We do not currently maintain a loan repurchase reserve and management is not aware of any outstanding repurchase claims against Redwood that would require the establishment of such a reserve. In circumstances where we believe that there is a risk of loss due to a specific loan repurchase demand (i.e., due to an allegation of a breach of representations and warranties), we will review the need for any loan repurchase reserve in accordance with FASB guidance on accounting for contingencies and establish reserves when, in the opinion of management, it is probable that a matter would result in a liability and the amount of loss, if any, can be reasonably estimated.

In addition, with respect to residential mortgage-backed securities issued by Sequoia securitization trusts prior to 2008, we believe that investors seeking recovery for any losses they incur on investments in these securities may be more likely to pursue remedies through securities-related litigation rather than through specific loan repurchase claims. We separately evaluate our exposure to such litigation when assessing whether the establishment of a litigation reserve is necessary under GAAP. For further discussion on litigation related contingencies see *Note 14* to the financial statements included in Part I, Item I of this Quarterly Report on Form 10-Q.

Table of Contents**Real Estate Securities at Other Consolidated Entities**

The following table provides information on the activity at the other consolidated entities for the three months ended March 31, 2012.

Table 30 Securities at Other Consolidated Entities Activity**Three Months Ended March 31, 2012**

(In Thousands)	Residential		Commercial	CDO	Total
	Senior	Subordinate			
Beginning fair value	\$ 91,299	\$ 83,763	\$ 37,923	\$ 18,116	\$ 231,101
Transfers between portfolios	-	27	-	-	27
Effect of principal payments	(2,013)	(3,536)	(288)	(244)	(6,081)
Change in fair value, net	1,139	1,343	25,976	68	28,526
Ending Fair Value	\$ 90,425	\$ 81,597	\$ 63,611	\$ 17,940	\$ 253,573

In addition to the \$254 million of real estate securities included in the table above, consolidated Acacia securitization entities owned \$14 million of ABS issued by Sequoia securitization entities, and \$12 million in commercial loans at March 31, 2012.

Derivative Financial Instruments at Acacia Securitization Entities

At March 31, 2012, consolidated Acacia securitization entities were party to interest rate agreements with a notional value of \$1.26 billion and a net aggregate fair value of negative \$58 million. Derivative obligations of Acacia entities are payable solely from the assets of those Acacia entities that have entered into the corresponding derivative contracts and are not legal obligations of Redwood. These derivatives are accounted for as trading instruments with all changes in value and any net payments and receipts recognized through other market valuation adjustments, net, in our consolidated statements of income.

At March 31, 2012, all Acacia entities were in compliance with ISDA agreements governing their open derivative positions, with the exception of an early termination event at March 31, 2012, with respect to one ISDA agreement at one Acacia entity due to that entity's failure to make a required swap payment. This liability is not a legal obligation of Redwood. Subsequent to March 31, 2012, there was an early termination event with respect to an ISDA agreement at an additional Acacia entity due to that additional Acacia entity's failure to make a required swap payment.

Capital Resources and Liquidity

Set forth below is a discussion of our short- and long-term debt and contractual obligations and commitments, as well as a discussion of asset-backed securities issued. For additional discussion of our capital resources and liquidity see *Summary of Financial Condition, Capital Resources, and Liquidity* above.

Debt at Redwood

At March 31, 2012, we had \$441 million of short-term debt outstanding. For the three months ended March 31, 2012, the average balance of short-term debt outstanding was \$362 million, with a weighted average interest rate of 1.92%. For the three months ended March 31, 2012, the highest balance of our short-term debt outstanding was \$510 million. In the ordinary course of our business, we may utilize short-term recourse debt through several different types of borrowing facilities and use cash borrowings under these facilities to, among other things, fund the acquisition of residential loans we acquire in anticipation of securitization, fund the origination of commercial loans, finance investments in securities and other investments, and otherwise fund our business and operations. At March 31, 2012, we had two residential loan warehouse facilities with a total outstanding debt balance of \$137 million (secured by residential loans with an aggregate value in excess of the outstanding debt) and a total borrowing limit of \$400 million. Each residential loan financed under one of our residential loan warehouse facilities can only be financed for a maximum number of days (generally less than 12 months), after which the financing expires and must be repaid. We generally intend to repay the short-term financing of a loan under one of

Table of Contents

those facilities at or prior to the expiration of that financing with the proceeds of a securitization or other sale of that loan, through the proceeds of other short-term borrowings, or with other equity or long-term debt capital.

In addition, at March 31, 2012, we had an aggregate outstanding short-term debt balance of \$304 million under eight securities repurchase facilities (secured by securities with a fair market value of \$422 million). The financing for each security financed under one of our securities repurchase facilities is limited in its initial duration to a maximum number of days (generally 90 days or less). We generally intend to repay the short-term financing of a security under one of these facilities through a renewal of that financing with the same counterparty, through a sale of the security, or with other equity or long-term debt capital. At March 31, 2012, we also had one secured line of credit with no outstanding debt balance and a total borrowing limit of \$10 million (secured by securities with a fair market value in excess of \$10 million). At December 31, 2011, we had \$428 million of short-term debt outstanding. Of this \$428 million, our residential warehouse lines provided for \$307 million and our securities repurchase facilities provided for \$121 million. At December 31, 2011, we also had one secured line of credit with no outstanding debt balance and a total borrowing limit of \$10 million (secured by securities with a fair market value in excess of \$10 million).

In 2006 and 2007, we issued a total of \$100 million and \$50 million of long-term debt, respectively. This debt requires quarterly distributions at a floating rate equal to three-month LIBOR plus 2.25% until the notes are redeemed in whole. Beginning in the first quarter of 2010, we entered into interest rate swaps with aggregate notional values currently totaling \$140 million to hedge the variability in our long-term debt interest expense, fixing our gross interest expense yield at 6.75%. These swaps are accounted for as cash flow hedges with all interest income recorded as a component of net interest income and other valuation changes recorded as a component of equity.

Asset-Backed Securities Issued at the Resecuritization Entity

In July 2011, Redwood transferred \$365 million of residential securities into a resecuritization trust, with \$245 million of ABS issued to third parties. At March 31, 2012, there were \$332 million of securities owned at the resecuritization, which were funded with \$207 million of ABS issued. Since resecuritization, the ABS issued has paid down \$38 million.

Asset-Backed Securities Issued at Securitization Entities

At March 31, 2012, there were \$3.35 billion of loans owned at Sequoia securitization entities, which were funded with \$3.26 billion of ABS issued at Sequoia entities. These loans and ABS issued are reported at their unpaid principal balances net of any unamortized premium or discount. To date, credit losses have not yet been incurred on any of the senior securities issued by consolidated Sequoia securitization entities, although we expect that some of these senior securities may incur losses in the future, depending on the magnitude and timing of additional credit losses incurred on the underlying loans. At March 31, 2012, there were \$254 million of securities owned by Acacia securitization entities and reported at fair value, which were funded with \$237 million of ABS issued by Acacia entities that were also reported at fair value.

Table of Contents

The following table provides detail on the activity for asset-backed securities issued by the Sequoia and Acacia securitization entities we consolidate for financial reporting purposes for the three months ended March 31, 2012.

Table 31 ABS Issued Activity – Securitization Entities**Three Months Ended March 31, 2012**

(In Thousands)	New Sequoia	Legacy Sequoia	Acacia	Total

Anticipated interest payments on ABS ⁽²⁾	93	225	219	1,262	1,799
Accrued interest payable	6	-	-	-	6
Total obligations of Securitization Entities	99	273	219	7,594	8,185
Total Consolidated Obligations and Commitments	\$ 547	\$ 285	\$ 234	\$ 7,899	\$ 8,965

(1) All consolidated ABS issued are collateralized by real estate loans and securities. Although the stated maturity is as shown, the ABS obligations will pay down as the principal balances of these real estate loans or securities pay down. The amount shown is the principal

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

balance of the ABS issued and not necessarily the value reported in our consolidated financial statements.

- (2) The anticipated interest payments on consolidated ABS issued is calculated based on the contractual maturity of the ABS and therefore assumes no prepayments of the principal outstanding at March 31, 2012.

Table of Contents

Potential GAAP Earnings Volatility

We expect quarter-to-quarter GAAP earnings volatility from our business activities. This volatility can occur for a variety of reasons, including the timing and amount of purchases, sales, calls, and repayment of consolidated assets, changes in the fair values of consolidated assets and liabilities, and certain non-recurring events. In addition, the amount or timing of our reported earnings may be impacted by technical accounting issues, some of which are described below.

Changes in Premium Amortization for Loans

The net unamortized premium for loans owned at Sequoia Entities and at Redwood was \$31 million at March 31, 2012. The amount of periodic premium amortization expense we recognize is volatile and dependent on a number of factors, including credit performance of the underlying loans, changes in prepayment speeds, and changes in short-term interest rates. Loan premium amortization was \$1 million and \$2 million for the three months ended March 31, 2012 and 2011, respectively.

Changes in Allowance for Loan Losses

For real estate loans classified as held-for-investment, we establish and maintain an allowance for loan losses based on our estimate of credit losses inherent in our loan portfolios at the reporting date. To calculate the allowance for loan losses, we assess inherent losses by determining loss factors (defaults, loss severities on default liquidations, and the timing of default liquidations) that can be specifically applied to each of the consolidated loans or pools of loans.

Changes in actual defaults or our expectations on loss severities and default timing can have a significant effect on periodic income.

Changes in the Fair Value of Residential and Commercial Loans Classified as Held-for-Sale

The majority of unsecuritized residential loans on our consolidated balance sheets is being held for future securitizations and is expected to be sold to non-consolidated entities. At the time of purchase, we may elect the fair value option for these loans or classify them as held-for-sale. For loans for which we have elected the fair value option, changes in fair values are recorded in other market valuation adjustments through the consolidated statements of income in the period in which the valuation change occurs. Periodic fluctuations in the values of these investments are inherently volatile and thus can lead to significant period-to-period GAAP earnings volatility.

Loans classified as held-for-sale are carried at the lower of their cost basis or fair value. If the fair value of loans classified as held-for-sale is lower than their cost basis, the difference is reported as a negative market valuation adjustment through mortgage banking activities, net on our consolidated statements of income.

The fair value of loans is affected by, among other things, changes in interest rates, credit performance, prepayments, and market liquidity. To the extent interest rates change or market liquidity and or credit conditions materially change, the value of these loans could decline below their cost basis, which could have a material effect on reported earnings.

Changes in Yields for Securities

The yields we project on real estate securities can have a significant effect on the periodic interest income we recognize for financial reporting purposes. Yields can vary as a function of credit results, prepayment rates, and interest rates. If estimated future credit losses are less than our prior estimate, credit losses occur later than expected, or prepayment rates are faster than expected (meaning the present value of projected cash flows is greater than previously expected for assets acquired at a discount to principal balance), the yield over the remaining life of the security may be adjusted upwards. If estimated future credit losses exceed our prior expectations, credit losses occur more quickly than expected, or prepayments occur more slowly than expected (meaning the present value of projected cash flows is less than previously expected for assets acquired at a discount to principal balance), the yield over the remaining life of the security may be adjusted downward.

Changes in the actual maturities of real estate securities may also affect their yields to maturity. Actual maturities are affected by the contractual lives of the associated mortgage collateral, periodic payments of principal,

Table of Contents

and prepayments of principal. Therefore, actual maturities of AFS securities are generally shorter than stated contractual maturities. Stated contractual maturities are generally greater than ten years. There is no assurance that our assumptions used to estimate future cash flows or the current period's yield for each asset will not change in the near term, and any change could be material.

Changes in Fair Values of Securities

All securities owned at Redwood and consolidated entities are classified as either trading or AFS securities, and in both cases are carried on our consolidated balance sheets at their estimated fair values. For trading securities, changes in fair values are recorded in the consolidated statements of income. Periodic fluctuations in the values of these investments are inherently volatile and thus can lead to significant GAAP earnings volatility each quarter.

For AFS securities, cumulative unrealized gains and losses are recorded as a component of accumulated other comprehensive income in our consolidated statements of changes in equity. Unrealized gains and losses are not charged against current earnings to the extent they are temporary in nature. Certain factors may require us, however, to recognize these amounts as other-than-temporary impairments and record them through our current earnings. Factors that determine other-than-temporary-impairment include a change in our ability or intent to hold assets, adverse changes to projected cash flows of assets, or the likelihood that declines in the fair values of assets would not return to their previous levels within a reasonable time. Impairments can lead to significant GAAP earnings volatility each quarter.

Changes in Fair Values of Derivative Financial Instruments

We can experience significant earnings volatility from our use of derivatives. We generally use derivatives to manage risks associated with residential loans we own or plan to acquire and securitize, commercial loans we own, variability in interest expense indexed to adjustable rates, and cash flows on assets and liabilities that have different coupon rates (fixed rates versus floating rates, or floating rates based on different indices). The nature of the instruments we use and the accounting treatment for the specific assets, liabilities, and derivatives may therefore lead to volatility in our periodic earnings, even when we are meeting our hedging objectives.

Some of our derivatives are accounted for as trading instruments with all associated changes in value recorded through our consolidated statements of income. Changes in value of the assets and liabilities we manage by using derivatives may not be accounted for similarly. This could lead to reported income and book values in specific periods that do not necessarily reflect the economics of our risk management strategy. Even when the assets and liabilities are similarly accounted for as trading instruments, periodic changes in their values may not coincide as other market factors (e.g., supply and demand) may affect certain instruments and not others at any given time.

Changes in Loss Contingency Reserves

We may be exposed to various loss contingencies, including, without limitation, those described in *Note 14* to the financial statements included in Part I, Item I of this Quarterly Report on Form 10-Q. In accordance with FASB guidance on accounting for contingencies, we review the need for any loss contingency reserves and establish them when, in the opinion of management, it is probable that a matter would result in a liability, and the amount of loss, if any, can be reasonably estimated. The establishment of a loss contingency reserve, the subsequent increase in a reserve or release of reserves previously established, or the recognition of a loss in excess of previously established reserves, can occur as a result of various factors and events that affect management's opinion of whether the standard for establishing, increasing, or continuing to maintain, a reserve has been met. Changes in the loss contingency reserves can lead to significant GAAP earnings volatility each quarter.

Table of Contents**Results of Operations Taxable Income**

The following table summarizes our taxable income and distributions to shareholders for the three months ended March 31, 2012 and 2011. For each of these periods, we had no undistributed REIT taxable income.

Table 33 Taxable Income

(In Thousands)	Three Months Ended March 31,	
	2012 ⁽¹⁾	2011 ⁽¹⁾
REIT estimated taxable income	\$ 10,361	\$ 7,489
Estimated taxable REIT subsidiary loss	(2,051)	(2,560)
Total Estimated Taxable Income	\$ 8,310	\$ 4,929
 Distributions to shareholders	 \$ 19,636	 \$ 19,535

(1) Our tax results for the three months ended March 31, 2012 and 2011 are estimates until we file tax returns for these years.

Our estimated total taxable income for the three months ended March 31, 2012, was \$8 million (\$0.11 per share) and included \$10 million in realized credit losses on investments. This compared to total taxable income for the three months ended March 31, 2011, of \$5 million (\$0.06 per share) that included \$15 million in credit losses.

Differences between Estimated Taxable Income and GAAP Income

Differences between estimated taxable income and GAAP income are largely due to the following: (i) we cannot establish loss reserves for future anticipated events for tax but can for GAAP as realized credit losses are expensed when incurred for tax and these losses are anticipated through lower yields on assets or through loss provisions for GAAP; (ii) the timing, and possibly the amount, of some expenses (e.g., compensation expenses) are different for tax than for GAAP; (iii) since amortization and impairments differ for tax and GAAP, the tax and GAAP gains and losses on sales may differ, resulting in differences in realized gains on sale; (iv) for tax, realized capital gains on sales may be offset by prior capital losses; (v) unrealized gains and losses on market valuation adjustments of securities and derivatives are not recognized for tax until the instrument is sold or extinguished; and, (vi) for tax, we do not consolidate noncontrolling interests or securitization entities as we do under GAAP. As a result of these differences in accounting, our estimated taxable income can vary significantly from our GAAP income during certain reporting periods.

Table of Contents

The tables below reconcile our estimated taxable income to our GAAP income for the three months ended March 31, 2012 and 2011.

Table 34 Differences between Estimated Taxable Income and GAAP Net Income

(In Thousands, Except per Share Data)	Three Months Ended March 31, 2012		
	Tax est.	GAAP	Differences
Interest income	\$ 38,027	\$ 58,740	\$ (20,713)

Potential Taxable Income Volatility			

We expect period-to-period estimated taxable income volatility for a variety of reasons, including those described below.

Credit Losses on Securities and Loans

To determine estimated taxable income, we are generally not permitted to anticipate, or reserve for, credit losses on investments which are generally purchased at a discount. For tax purposes, we accrue the entire purchase discount on a security into taxable income over the expected life of the security. Estimated taxable income is reduced when actual credit losses occur. For GAAP purposes, we establish a credit reserve and only accrete a portion of the purchase discount, if any, into income and write-down securities that become impaired. Our income recognition is therefore faster for tax as compared to GAAP, especially in the early years of owning a security (when there are generally few credit losses). At

Edgar Filing: REDWOOD TRUST INC - Form 10-Q

March 31, 2012, the cumulative difference between the GAAP and tax amortized cost basis of our residential, commercial, and CDO subordinate securities (excluding our investments in our securitization entities) was \$108 million.

Table of Contents

As we have no credit reserves or allowances for tax, any future credit losses on securities or loans will have a more significant impact on tax earnings than on GAAP earnings and may create significant taxable income volatility to the extent the level of credit losses fluctuates during reporting periods. During the three months ended March 31, 2012 and 2011, we realized \$10 million and \$15 million, respectively, of credit losses on securities for tax that we had previously provisioned for under GAAP. We anticipate that credit losses will continue to be a significant factor for determining 2012 taxable income. Credit losses are based on our tax basis, which differs materially from our basis for GAAP purposes. We anticipate an additional \$130 million of credit losses for tax on securities, based on our projection of principal balance losses and assuming a similar tax basis as we have recently experienced, although the timing of actual losses is difficult to accurately project. At March 31, 2012, for GAAP we had a designated credit reserve of \$276 million on our securities, and an allowance for loan losses of \$60 million for our consolidated residential and commercial loans.

Recognition of Gains and Losses on Sale

Since amortization and impairments on assets differ for tax and GAAP, the tax and GAAP basis on assets sold or called may differ, resulting in differences in gains and losses on sale or call. In addition, gains realized for tax may be offset by prior capital losses and, thus, not affect taxable income. At March 31, 2012, the REIT had an estimated \$100 million in capital loss carry-forwards (\$1.27 per share) that can be used to offset future capital gains over the next three to five years. Since our intention is to generally invest in assets for the long-term, it is difficult to anticipate when sales may occur and, thus, when or whether we might exhaust these capital loss carry-forwards.

Prepayments on Securities

As part of our investment in Sequoia securitization entities, we have retained IOs at the time they are issued. Our current tax basis in these securities is \$23 million. The return on IOs is sensitive to prepayments and, to the extent prepayments vary period to period, income from these IOs will vary. Typically, fast prepayments reduce yields and slow prepayments increase yields. We are not permitted to recognize a negative yield under tax accounting rules, so during periods of fast prepayments our periodic premium expense for tax purposes can be relatively low and the tax cost basis for these securities may not be significantly reduced. In periods prior to 2008, we did experience fast prepayments on the loans underlying our IOs. More recently, prepayments on Sequoia entities issued prior to 2010 have been slowing, and our tax basis is now below the fair values for these IOs in the aggregate. Most of our Sequoia securitizations are callable or will become callable over the next two years, although we do not currently anticipate calling any Sequoia securitizations in the foreseeable future. If we do call a Sequoia securitization, the remaining tax basis in the IO is written off, creating an ordinary loss at the call date.

Prepayments also affect the taxable income recognition on other securities we own. We are required to use particular prepayment assumptions for the remaining lives of each security. As actual prepayment speeds vary, the yield we recognize for tax purposes will be adjusted accordingly. Thus, to the extent prepayments differ from our long-term assumptions or vary from period to period, the yield recognized will also vary and this difference could be material for a specific security.

Compensation Expense

The total tax expense for equity award compensation is dependent upon varying factors such as the timing of payments of dividend equivalent rights, the exercise of stock options, the distribution of deferred stock units and preferred stock units, and the cash deferrals to and withdrawals from our Executive Deferred Compensation Plan. For GAAP, the total expense associated with an equity award is determined at the award date and is recognized over the vesting period. For tax, the total expense is recognized at the date of distribution or exercise, not the award date. In addition, some compensation may not be deductible for tax if it exceeds certain levels and is not performance-based. Thus, the total amount of compensation expense, as well as the timing, could be significantly different for tax than for GAAP.

As an example, for GAAP we expense the grant date fair value of PSUs granted over the vesting term of those PSUs (regardless of the degree to which the performance conditions for vesting are ultimately satisfied, if at all), whereas for tax the value of the PSUs that actually vest in accordance with the performance conditions of those awards and are subsequently distributed to the award recipient is recorded as an expense on the date of distribution. If no PSUs under a particular grant ultimately vest, due to the failure to satisfy the performance conditions, no tax

Table of Contents

expense will be recorded for those PSUs, even though we would have already recorded expense for GAAP equal to the grant date fair value of the PSU awards. Conversely, if performance is such that a number of shares of common stock equal to 200% of the PSU award ultimately vest and are delivered to the award recipient, expense for tax will equal the common stock value on the date of distribution of 200% of the number of PSUs originally granted. This expense for tax could significantly exceed the recorded expense for GAAP.

In addition, since the decision to exercise options or distribute deferred stock units, preferred stock units, or cash out of the Executive Deferred Compensation Plan is an employee's, it can be difficult to project when the tax expense will occur.

Critical Accounting Policies

See the *Critical Accounting Policies* section in *Management's Discussion and Analysis of Financial Condition and Results of Operations*, as well as *Note 3* to the consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2011, for a detailed discussion of the Company's critical accounting policies.

Since the issuance of our Annual Report on Form 10-K for the year ended December 31, 2011, any changes to our critical accounting policies or the methodologies or assumptions we apply under them are noted in *Note 3* to the consolidated financial statements presented in this Quarterly Report on Form 10-Q. We also describe in *Note 3* certain recent accounting pronouncements that will amend the critical accounting policies we apply in future periods.

Market Risks

We assume risks that are inherent to our business including, but not limited to, credit risk, interest rate risk, prepayment risk, liquidity risk, and fair value risk. We seek to manage such risks in a prudent manner designed to enhance our earnings and dividends while maintaining capital levels consistent with these risks. This section presents a general overview of market risks. Additional information concerning the risks we manage, how these risks change over time, and potential GAAP earnings and taxable income volatility we may experience as a result of these risks, is further discussed above in this *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

Credit Risk

Integral to our core business is assuming credit risk through our ownership of residential and commercial loans and securities as well as through our reliance on business counterparties. We believe the securities and loans we purchase are priced to generate an expected return that compensates us for the underlying credit risk associated with these investments. Nevertheless, there may be significant credit losses associated with these investments should they perform worse than we expect on a credit basis.

We manage our credit risks by analyzing the extent of the risk we are taking and reviewing whether we believe the appropriate underwriting criteria are met, and we utilize systems and staff to monitor the ongoing credit performance of each loan and security. To the extent we find the credit risks on specific assets are changing adversely, we may be able to take actions, such as selling the affected investments, to mitigate potential losses. However, we may not always be successful in analyzing risks, reviewing underwriting criteria, foreseeing adverse changes in credit performance or in effectively mitigating future credit losses and the ability to sell an asset may be limited due to the structure of the asset or the absence of a liquid market for the asset.

Residential Loans and Securities

Our residential loans and securities backed by residential loans are generally secured by real property. We believe that many of the residential loans we own and those underlying our securities are above-average in credit quality as compared to U.S. real estate loans in general, although there may nevertheless be significant credit losses related to these loans. Credit losses on real estate loans and securities can occur for many reasons, including: poor origination practices; fraud; faulty appraisals; documentation errors; poor underwriting; legal errors; poor servicing practices; weak economic conditions; decline in the value of homes, businesses, or commercial properties; special hazards; earthquakes and other natural events; over-leveraging of the borrower or on the property; reduction in market rents and occupancies and poor property management practices; changes in legal protections for lenders; reduction in personal incomes; job loss; and personal events such as divorce or health problems. In addition, if the U.S. economy or the housing market weakens further than we have anticipated, credit losses could increase beyond levels that we have anticipated.

With respect to most of the loans securitized by securitization entities sponsored by us and for a portion of the loans underlying residential loan securities we have acquired from securitizations sponsored by others, the interest rate is adjustable. Accordingly, when short-term interest rates rise, required monthly payments from homeowners may rise under the terms of these loans, and this may increase borrowers' delinquencies and defaults that can lead to additional credit losses.

Table of Contents

We also own securities backed by negative amortization adjustable-rate loans made to residential borrowers, some of which are prime-quality loans and many of which are Alt-A quality loans (and a few are subprime loans). We invest in these riskier loan types with the expectation of significantly higher delinquencies and losses as compared to regular amortization loans, but believe these securities offer us the opportunity to generate attractive risk-adjusted returns as a result of attractive pricing and the manner in which these securitizations are structured. Nevertheless, there remains substantial uncertainty about the future performance of these assets. We also own securities backed by subprime and Alt-A residential loans that have substantially higher credit risk characteristics than prime-quality loans. Consequently, we can expect these lower-quality loans to have higher rates of delinquency and loss, and if such losses differ from our assumptions, we could incur credit losses.

Commercial Loans and Securities

The commercial loans we invest in are typically fixed-rate loans, the majority of which are interest-only loans that are generally subordinate to senior lien holders and are backed by a transaction sponsor or borrowing entity and not real property. The commercial securities we invest in are typically subordinate securities backed by first-lien commercial loans that credit enhance more senior securities backed by the same loans and may thus expose us to a more concentrated credit risk than other investors. In general, the loans we invest in or the loans backing securities that we credit enhance require balloon payments at maturity. Consequently, we could be exposed to credit losses at the maturity of these loans if the borrower is unable to repay or refinance the borrowing with another third-party lender. The ability of the borrower to pay us back at maturity is a function of the cash flows generated on the commercial property, as well as the general level of interest rates. If interest rates rise to an extent that the cash flows on the property are insufficient to cover a new loan that is sufficient to pay off our loan, we would be subject to credit losses at maturity.

Counterparties

In addition to residential and commercial subordinate securities, we own senior and other securities issued by securitization entities that are sponsored by others. A risk we face with respect to these securities is that we do not generally control or influence the underwriting, servicing, management, or loss mitigation with respect to these underlying loans.

We are also exposed to credit risk with respect to our business counterparties. For example, counterparties we acquire loans from, lend to, or invest in, make representations and warranties and covenants to us, and may also indemnify us against certain losses. To the extent we have suffered a loss and are entitled to enforce those agreements to recover damages, if our counterparties are insolvent or unable or unwilling to comply with these agreements we would suffer a loss due to the credit risk associated with our counterparties. As an example, under short-term borrowing facilities and swap and other derivative agreements, we sometimes transfer assets as collateral to our counterparties. To the extent a counterparty is not able to return this collateral to us if and when we are entitled to its return, we could suffer a loss due to the credit risk associated with that counterparty.

Interest Rate Risk

Changes in interest rates and the shape of the yield curve can affect the cash flows and fair values of our assets, liabilities, and derivative financial instruments and, consequently, affect our earnings and reported equity. Our general strategy with respect to interest rates is to maintain an asset/liability posture (including hedges) on a consolidated basis that assumes some interest rate risks but not to such a degree that the achievement of our long-term goals would likely be adversely affected by changes in interest rates. Accordingly, we are willing to accept short-term volatility of earnings and changes in our reported equity in order to accomplish our goal of achieving attractive long-term returns.

To implement our interest rate risk strategy, we may use derivative financial instruments in an effort to maintain a close match between pledged assets and debt, as well as between the interest rate characteristics of the assets in the securitization entities and the corresponding ABS issued. However, we generally do not attempt to completely hedge changes in interest rates, and at times, we may be subject to more interest rate risk than we generally desire in the long term. Changes in interest rates will have an impact on the values and cash flows of our assets and corresponding liabilities.

Table of Contents

Prepayment Risk

Prepayment risks exist in the assets and associated liabilities consolidated on our balance sheets. In general, discount securities benefit from faster prepayment rates on the underlying real estate loans while premium securities (such as IOs) benefit from slower prepayments on the underlying loans. We note that changes in residential loan prepayment rates could result in GAAP and tax earnings volatility.

We caution that prepayment rates are difficult to predict or anticipate, and variations in prepayment rates can materially affect our earnings and dividend distribution requirements. ARM prepayment rates, for example, are driven by many factors, one of which is the steepness of the yield curve. As the yield curve flattens (short-term interest rates rise relative to longer-term interest rates), ARM prepayments typically increase. However, for borrowers who have impaired credit or who otherwise do not meet loan underwriting criteria, the ability to refinance (i.e., prepay) a loan even when interest rates decline may be limited.

Inflation Risk

Virtually all of our consolidated assets and liabilities are financial in nature. As a result, changes in interest rates and other factors drive our performance more directly than does inflation. Changes in interest rates do not necessarily correlate with inflation rates or changes in inflation rates. Separately, inflation or deflation in home prices can affect our credit risk.

Our financial statements are prepared in accordance with GAAP. Our activities and balance sheets are measured with reference to historical cost or fair value without considering inflation.

Fair Value and Liquidity Risks

To fund our assets we may use a variety of debt alternatives in addition to equity capital that present us with fair value and liquidity risks. We manage these risks by maintaining what we believe to be adequate capital levels under our internal risk-adjusted capital and risk management policies and by ensuring we have a variety of financing facilities available to fund each of our assets.

Most residential loans we invest in are accumulated and sold to Sequoia securitization entities and thus, changes in the fair value of the loans, once securitized do not have an impact on our liquidity. However, changes in fair values during the accumulation period (while these loans are funded with short-term debt before they are sold to a Sequoia entity) may have a short-term effect on our liquidity. We may also own some real estate loans accounted for as held-for-sale and adverse changes in their value may be recognized through our income statement and may have an impact on our ability to obtain financing for them.

Most of the securities we invest in are funded with a combination of equity capital, secured financing or short-term debt facilities. To the extent we use equity capital or secured financing, we can significantly reduce our liquidity risks, however, we would still be exposed to adverse changes in fair value of these securities as a result of changes in overall market liquidity. For the securities we acquire with a combination of equity capital and short-term debt, we would be exposed to liquidity risk to the extent the values of these investments decline and/or the counterparties we use to finance these investments adversely change our borrowing requirements. We attempt to mitigate our liquidity risk from short-term financing facilities by among other things setting aside adequate capital and ensuring we have a variety of financing facilities available to fund these securities.

Under short-term borrowing facilities, swap and other derivatives agreements, we pledge assets as security for our payment obligations and make various representations and warranties and agree to certain covenants, events of default, and other terms. In addition, our short-term borrowing facilities are generally uncommitted, meaning that each time we request a new borrowing under a facility the lender has the option to decline to extend credit to us. The terms of these facilities and agreements typically include financial covenants (such as covenants to maintain a minimum amount of tangible net worth or stockholders' equity and/or a minimum amount of liquid assets), margin requirements (which typically require us to pledge additional collateral if and when the value of previously pledged collateral declines), operating covenants (such as covenants to conduct our business in accordance with applicable laws and regulations and covenants to provide notice of certain events to creditors), representations and warranties (such as representations and warranties relating to characteristics of pledged collateral, our exposure to litigation and/or regulatory enforcement actions and the absence of material adverse changes to our financial condition, our

Table of Contents

operations, or our business prospects), and events of default (such as a breach of covenant or representation/warranty and cross-defaults, under which an event of default is triggered under a credit facility if an event of default or similar event occurs under another credit facility).

Other Risks

In addition to the market and other risks described above, our business and results of operations are subject to a variety of types of risks and uncertainties, including, among other things, those described our Annual Report on Form 10-K for the fiscal year ended December 31, 2011, under the caption Risk Factors.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Information concerning market risk is incorporated herein by reference to Item 7A of our Annual Report on Form 10-K for the year ended December 31, 2011, as supplemented by the information under *Management's Discussion and Analysis of Financial Condition and Results of Operations - Market Risks* within Item 2 above. Other than the developments described thereunder, including changes in the fair values of our assets, there have been no other material changes in our quantitative or qualitative exposure to market risk since December 31, 2011.

Item 4. Controls and Procedures

We have adopted and maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed on our reports under the Securities Exchange Act of 1934, as amended (the Exchange Act) is recorded, processed, summarized, and reported within the time periods specified in the U.S. Securities and Exchange Commission's rules and forms and that the information is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

As required by Rule 13a-15(b) of the Exchange Act, we have carried out an evaluation, under the supervision and with the participation of management, including our chief executive officer and chief financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the quarter covered by this report. Based on the foregoing, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures were effective at a reasonable assurance level.

There have been no changes in our internal control over financial reporting during the first quarter of 2012 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II. OTHER INFORMATION****Item 1. Legal Proceedings**

On December 23, 2009, the Federal Home Loan Bank of Seattle (the "FHLB-Seattle") filed a claim in Superior Court for the State of Washington (case number 09-2-46348-4 SEA) against Redwood Trust, Inc., our subsidiary, Sequoia Residential Funding, Inc. ("SRF"), Morgan Stanley & Co., and Morgan Stanley Capital I, Inc. (collectively, the "FHLB-Seattle Defendants"). The FHLB-Seattle alleges claims under the Securities Act of Washington (Section 21.20.005, et seq.) and seeks to rescind the purchase of a mortgage pass-through certificate (or, residential mortgage backed securities, "RMBS") issued through our Sequoia RMBS platform (as part of the Sequoia Mortgage Trust 2005-4 securitization transaction) and purchased by the FHLB-Seattle. The FHLB-Seattle also seeks to collect interest on the original purchase price at the statutory interest rate of 8% per annum from the date of original purchase (net of interest received), as well as attorneys' fees and costs. On June 10, 2010, the FHLB-Seattle filed an amended complaint. Subsequently, on October 18, 2010, the FHLB-Seattle Defendants filed motions to dismiss the FHLB-Seattle's complaint. Redwood Trust, Inc. and SRF additionally moved to dismiss the complaint for lack of personal jurisdiction. The FHLB-Seattle alleges that the FHLB-Seattle Defendants' offering materials for this RMBS contained materially untrue statements and omitted material facts about this RMBS and the loans securitized in this transaction. Among other things, the FHLB-Seattle alleges that the FHLB-Seattle Defendants made untrue statements or omissions regarding the (1) loan-to-value ratios of these mortgage loans and the appraisals of the properties that secured these mortgage loans, (2) occupancy status of those properties, (3) underwriting standards of the originators of these mortgage loans, and (4) ratings assigned to this RMBS. In a series of rulings issued between June 23, 2011 and August 15, 2011, the Washington State Superior Court dismissed the allegations relating to occupancy status and denied other grounds for dismissal. On July 19, 2011, the Court granted Redwood Trust, Inc. and SRF's motion to dismiss for lack of personal jurisdiction and on April 6, 2012, the Court entered final judgment in favor of Redwood Trust, Inc. and SRF based on the lack of personal jurisdiction. Redwood Trust, Inc. does not know whether the FHLB-Seattle will appeal or otherwise contest the dismissal, or file a claim in another jurisdiction. The Sequoia RMBS that is the subject of the FHLB-Seattle's claim was issued with an original principal amount of approximately \$133 million and, at March 31, 2012, had a remaining outstanding principal amount of approximately \$28 million. We believe that this claim is without merit and we intend to defend any action related to it vigorously. In connection with the issuance of the Sequoia RMBS that is the subject of the FHLB-Seattle's claim, Redwood agreed to indemnify the underwriters of this RMBS for certain losses and expenses they might incur as a result of claims made against them relating to this RMBS, including, without limitation, certain legal expenses. The FHLB-Seattle's claims against the underwriters of this RMBS were not dismissed for lack of personal jurisdiction. Regardless of the outcome of this litigation, Redwood could incur a loss as a result of these indemnities.

On August 18, 2010, Redwood Trust, Inc.'s subsidiary, SRF, received service of process with respect to a claim filed on July 15, 2010 in Superior Court for the State of California in San Francisco (case number CGC-10-501610) by The Charles Schwab Corporation ("Schwab"). In the complaint, Schwab is suing SRF and 26 other named defendants (collectively, the "Schwab Defendants") in relation to RMBS sold or issued by the Schwab Defendants. With respect to SRF, Schwab alleges a cause of action of negligent misrepresentation under California state law and seeks unspecified damages and attorneys' fees and costs with respect to a RMBS issued through the Sequoia RMBS platform as part of the Sequoia Mortgage Trust 2005-4 securitization transaction (which is the same transaction at issue in the litigation initiated by the FHLB-Seattle described in the preceding paragraph). Among other things, Schwab alleges that the offering materials for this Sequoia RMBS contained materially untrue statements or omissions regarding this RMBS and the loans securitized in this securitization transaction, including untrue statements or omissions regarding the (1) loan-to-value ratios of these mortgage loans and the appraisals of the properties that secured these mortgage loans, (2) occupancy status of those properties, (3) underwriting standards of the originators of these mortgage loans, and (4) ratings assigned to this RMBS. On September 22, 2011, the Schwab Defendants moved to dismiss the complaint, and on January 27, 2011, the California State Superior Court denied the motion on several grounds, and with respect to certain other grounds gave Schwab the opportunity to amend the complaint. SRF has responded to that Amended Complaint. The Sequoia RMBS that is the subject of Schwab's claim was issued with an original principal amount of approximately \$14.8 million and, at March 31, 2012, had a remaining outstanding principal amount of approximately \$3.1 million. We believe that this case is without merit and we intend to defend the action vigorously. In connection with the issuance of the Sequoia RMBS that is the subject of Schwab's claim, Redwood agreed to indemnify the underwriters of this RMBS for certain losses and

Table of Contents

expenses they might incur as a result of claims made against them relating to this RMBS, including, without limitation, certain legal expenses. Regardless of the outcome of this litigation, Redwood could incur a loss as a result of these indemnities.

On July 12, 2010, two notices of Election to Void Sale of Securities pursuant to Illinois Securities Law (815 ILCS Section 5/13(A)) were received from the Federal Home Loan Bank of Chicago (FHLB-Chicago). In the notices, the FHLB-Chicago sought to void its purchase of two RMBS that were issued in 2006 by a securitization trust with respect to which Redwood Trust, Inc. s subsidiary, SRF, was the depositor. Subsequently, on October 15, 2010, the FHLB-Chicago filed a claim in the Circuit Court of Cook County, Illinois (case number 10-CH-45033) against SRF and more than 45 other named defendants (collectively, the FHLB-Chicago Defendants) in relation to RMBS sold or issued by the FHLB-Chicago Defendants or by entities controlled by the FHLB-Chicago Defendants. In an amended complaint filed on March 16, 2011, FHLB-Chicago added as defendants Redwood Trust, Inc. and another one of our subsidiaries, RWT Holdings, Inc. With respect to Redwood Trust, Inc. and SRF, the FHLB-Chicago alleges that the offering materials for two RMBS issued through the Sequoia RMBS platform as part of the Sequoia Mortgage Trust 2006-1 securitization transaction contained untrue and misleading statements and material misrepresentations in violation of Illinois Securities Law (815 ILCS Sections 5/12(F)-(H)) and North Carolina Securities Law (N.C.G.S.A. §78A-8(2) & §78A-56(a)) and also alleges a claim of negligent misrepresentations under Illinois common law. On some of the causes of action, the FHLB-Chicago seeks to rescind the purchase of these RMBS and to collect interest on the original purchase price at the statutory interest rate of 10% per annum from the date of original purchase (net of interest received). On one cause of action, the FHLB-Chicago seeks unspecified damages. The FHLB-Chicago also seeks attorneys fees and costs. Among other things, the FHLB-Chicago alleges that the offering materials for this RMBS contained materially untrue statements or omissions regarding this RMBS and the loans securitized in this transaction, including untrue statements or omissions regarding the (1) loan-to-value ratios of these mortgage loans and the appraisals of the properties that secured these mortgage loans, (2) occupancy status of those properties, (3) underwriting standards of the originators of these mortgage loans, (4) ratings assigned to these RMBS, and (5) due diligence performed on these mortgage loans. The first of these two Sequoia RMBS was issued with an original principal amount of approximately \$105 million and, at March 31, 2012, had a remaining outstanding principal amount of approximately \$41 million. The second of these two Sequoia RMBS was issued with an original principal amount of approximately \$379 million and, at March 31, 2012, had a remaining outstanding principal balance of approximately \$149 million. On March 27, 2011, the FHLB-Chicago Defendants moved to dismiss the amended complaint, which motions are now pending. We believe that this case is without merit, and we intend to defend the action vigorously. In connection with the issuance of the Sequoia RMBS that is the subject of the FHLB-Chicago s claim, Redwood agreed to indemnify the underwriters of these RMBS for certain losses and expenses they might incur as a result of claims made against them relating to these RMBS, including, without limitation, certain legal expenses. Regardless of the outcome of this litigation, Redwood could incur a loss as a result of these indemnities.

In May 2010, we received an Order from the SEC, pursuant to Section 21(a)(1) of the Securities Exchange Act of 1934. The SEC s Order required us to provide information regarding, among other things, our trading practices and valuation policies relating to our business of sponsoring and managing collateralized debt obligation issuers. We have responded to the Order. The Order from the SEC indicates that it should not be construed as an indication by the SEC or its staff that any violations of law have occurred. The SEC could, however, as a result of our response to this Order or otherwise, allege that we violated applicable law or regulation in the conduct of our collateralized debt obligation business.

In November 2009, we received a subpoena from the National Credit Union Administration (NCUA), which is the federal agency that charters and supervises federal credit unions, as part of its investigation of the circumstances relating to the U.S. Central Federal Credit Union being placed into conservatorship in March 2009, including the U.S. Central Federal Credit Union s investment in various RMBS. The NCUA requested information relating to, among other things, two RMBS (i) issued by a securitization trust with respect to which SRF was the depositor and (ii) purchased at the time of issuance by the U.S. Central Federal Credit Union. We have responded to the subpoena. The subpoena from the NCUA states that it should not be construed as an indication by the NCUA or its staff that any violation of law has occurred. The NCUA could, however, as a result of our response to this subpoena or otherwise, allege that we did violate applicable law or regulation in the conduct of our securitization business.

Table of Contents

Other than as disclosed in the preceding paragraphs of this Item 1, there are no material pending legal proceedings, or material changes with respect to pending legal proceedings, in each case, to which we or any of our subsidiaries is a party or of which our property is the subject.

Item 1A. Risk Factors

Our risk factors are discussed under Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2011.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

During the three months ended March 31, 2012, we did not sell any equity securities that were not registered under the Securities Act of 1933, as amended. We announced a stock repurchase plan on November 5, 2007 for the repurchase of up to a total of 5,000,000 shares. This plan replaced all previous share repurchase plans and has no expiration date. We did not repurchase any shares under this plan during the three months ended March 31, 2012. At March 31, 2012, 4,005,985 shares remained available for repurchase under our stock repurchase plan.

The following table contains information on the shares of our common stock that we purchased or otherwise acquired during the three months ended March 31, 2012.

		Total Number of Shares Purchased	Average Price per Share Paid	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs
January 1, 2012	January 31, 2012	11,226 ⁽¹⁾	\$ 10.18	-	4,005,985
February 1, 2012	February 28, 2012	-	-	-	4,005,985
March 1, 2012	March 31, 2012	-	-	-	4,005,985
Total		11,226	\$ 10.18	-	4,005,985

(1) The 11,226 shares repurchased during January 2012 represent shares acquired to satisfy tax withholding requirements on the vesting of restricted shares.
