Intertape Polymer Group Reports Improved 2012 Fourth Quarter and Annual Results

2012 Adjusted EBITDA of \$87.9 million increased 37.4% over last year

MONTREAL, QUEBEC and BRADENTON, FLORIDA March 7, 2013 - Intertape Polymer Group Inc. (TSX:ITP) (Intertape or the Company) today released results for the fourth quarter and year ended December 31, 2012. All dollar amounts are US denominated unless otherwise indicated.

Fiscal Year 2012 Highlights:

- Gross margin increased to 18.0% from 14.6% last year
- Adjusted EBITDA increased 37.4% to \$87.9 million
- Cash flows from operating activities before changes in working capital increased 45.3% over last year to \$78.7 million
- Total debt reduced by \$43.0 million during the year
- Introduced 35 new products during the year
- Adjusted fully diluted EPS of \$0.69 compared to \$0.23 last year
- Redeemed \$55.0 million of Senior Subordinated Notes (Notes) in December for a total redemption of \$80.0 million for the year

Other Announcements:

- Initiated \$26 million investment to relocate and modernize South Carolina operations (please refer to press release issued on February 26, 2013 for more details)
- Declared dividend of US\$0.08 per common share

Our focus for the past few years has been on margin improvement by implementing manufacturing cost reductions and driving favourable product mix changes, stated Intertape President and Chief Executive Officer, Greg Yull. For the year, we achieved a gross margin of 18.0% and adjusted EBITDA of \$87.9 million, representing an increase of 37.4% from 2011. Furthermore, during the year, we increased our gross margin goal range to 18% to 20% from 18% to 19%.

During the year, we launched 35 new products. Since ramping up product innovation in 2009, we have introduced more than 135 new products. In 2012, new products introduced over the past five years accounted for over 15% of Intertape's total revenue, up from over 10% in 2011.

We continued to deleverage our balance sheet with debt reduction of \$43.0 million and also considerably reduced the average cost of debt with the redemption of \$80 million of Notes. At the end of 2012, the debt to trailing 12-month adjusted EBITDA ratio was 1.7 compared to 3.0 at the end of 2011.

During 2012, we invested \$21.6 million in projects primarily related to operational efficiencies. This represented an increase of \$8 million from 2011. Even with this increased investment, free cash flows for the year increased to \$62.9 million from \$34.7 million in 2011.

We recently commenced an initiative to invest \$26 million to relocate and modernize our Columbia, South Carolina manufacturing operations. The new facility will include state-of-the-art equipment and annual savings from productivity gains and energy efficiencies are projected to be more than \$13 million starting in the first half of 2015 with the first full year effects in 2016, concluded Mr. Yull.

The Company declared a dividend, in the amount of US\$0.08, under the semi-annual dividend policy adopted in 2012. The dividend will be paid on April 10, 2013 to shareholders of record at the close of business on March 25, 2013. This dividend to be paid by the Company is an eligible dividend as per the *Income Tax Act* (Canada).

Revenue for the year ended December 31, 2012 decreased 0.3% to \$784.4 million compared to \$786.7 million in 2011. After adjusting for the closure of the Brantford facility in the second quarter of 2011, revenue increased 0.3% in 2012 from \$781.7 million in 2011. The adjusted selling prices, including the impact of product mix, increased approximately 3% partially offset by the adjusted sales volume decrease of approximately 3%. An improved pricing environment that began in 2011 as well as the reduction in sales of low-margin products were the primary reasons for the increase in selling prices including the impact of product mix. The decrease in sales volume was primarily due to the progress the Company made toward reducing sales of low-margin products partially offset by an increase in sales of new products.

Fourth quarter revenue increased 3.4% to \$189.3 million, compared to \$183.0 million in 2011 and decreased 4.6% sequentially from \$198.5 million for the third quarter of 2012.

Sales volume for the fourth quarter of 2012 increased approximately 6% compared to the fourth quarter of 2011 primarily due to increased demand for tape products. The decrease in the sales volume of approximately 3% when compared to the third quarter of 2012 largely reflects normal seasonality.

Selling prices, including the impact of product mix, decreased approximately 3% in the fourth quarter of 2012 compared to the fourth quarter of 2011 primarily due to a shift in the mix of products sold. When compared to the third quarter of 2012, selling prices, including the impact of product mix, decreased by approximately 2% primarily due to a shift in the mix of products sold.

Gross profit totalled \$141.0 million for 2012, an increase of 23.2% from 2011. Gross margin was 18.0% in 2012 and 14.6% in 2011. The increase in gross profit in 2012 compared to 2011 was primarily due to an improved pricing environment, manufacturing cost reductions, increase in sales of higher margin products and the closure of the Brantford, Ontario manufacturing facility in 2011 partially offset by lower sales volumes. The increase in gross margin in 2012 compared to 2011 was primarily due to manufacturing cost reductions, an increase in sales of higher margin products, an improved pricing environment and the progress made toward reducing sales of low-margin products.

Gross profit totalled \$35.3 million in the fourth quarter of 2012, an increase of 28.0% from \$27.6 million in the fourth quarter of 2011 and a decrease of 2.3% from \$36.2 million in the third quarter of 2012. Gross margin was 18.7%, 15.1% and 18.2% in the fourth quarter of 2012, the fourth quarter of 2011 and the third quarter of 2012, respectively.

As compared to the fourth quarter of 2011, gross profit and gross margin increased primarily due to an improved pricing environment and manufacturing cost reductions. Compared to the third quarter of 2012, gross profit decreased slightly due to lower revenue partially offset by higher gross margin.

Selling, general and administrative expenses (SG&A) for the year ended December 31, 2012 was \$79.1 million compared to \$77.0 million for 2011. As a percentage of revenue, SG&A was 10.1% and 9.8% for 2012 and 2011, respectively. The increase of \$2.2 million in 2012 compared to 2011 was primarily the result of higher variable compensation expense related to higher profitability, higher stock-based compensation expense and increased professional fees, partially offset by the non-recurrence of the settlement of a lawsuit.

SG&A totalled \$20.8 million for the fourth quarter of 2012 compared to \$18.4 million for the fourth quarter of 2011 and \$19.3 million for the third quarter of 2012. As a percentage of revenue, SG&A was 11.0%, 10.1% and 9.7% for the fourth quarter of 2012, the fourth quarter of 2011 and the third quarter of 2012, respectively. SG&A was \$2.4 million greater in the fourth quarter of 2012 compared to the fourth quarter of 2011 primarily due to higher stock-based compensation, severance and professional fees related to managerial reporting enhancements. Compared to the third quarter of 2012, SG&A increased \$1.6 million primarily due to increased severance and higher professional fees.

Adjusted EBITDA totalled \$87.9 million for the year ended December 31, 2012 compared to an adjusted EBITDA of \$64.0 million for 2011. Adjusted EBITDA was \$23.9 million or 37.4% higher compared to 2011 primarily due to increased gross margin, as discussed above.

Adjusted EBITDA was \$21.5 million for the fourth quarter of 2012 as compared to an adjusted EBITDA of \$15.5 million for the fourth quarter of 2011 and an adjusted EBITDA of \$23.5 million for the third quarter of 2012. The \$5.9 million adjusted EBITDA increase compared to the fourth quarter of 2011 is primarily due to higher revenue and gross margin in the fourth quarter of 2012. Compared to the third quarter of 2012, the \$2.1 million decrease in adjusted EBITDA was primarily due to lower revenue and higher SG&A partially offset by higher gross margin.

Net earnings for the year ended December 31, 2012 totalled \$22.5 million compared to net earnings of \$9.0 million for 2011. The increase in net earnings from 2011 to 2012 was primarily due to an increase in gross profit partially offset by an increase in manufacturing facility closure costs, restructuring and other related charges previously discussed.

Adjusted net earnings were \$41.7 million for the year ended December 31, 2012 compared to adjusted net earnings of \$13.6 million for 2011. Adjusted net earnings were \$28.1 million higher in 2012 compared to 2011 primarily due to higher gross profit, lower finance costs and lower income tax expense.

Adjusted net earnings were \$10.0 million for the fourth quarter of 2012 as compared to adjusted net earnings of \$2.9 million for the fourth quarter of 2011 and to adjusted net earnings of \$13.0 million for the third quarter of 2012. The increase in adjusted net earnings of \$7.1 million compared to the fourth quarter of 2011 was primarily due to higher revenue, increased gross profit and reduced interest expense. The decrease in adjusted net earnings of \$2.9 million compared to the third quarter of 2012 was primarily due to lower revenue, gross profit and increased SG&A.

Adjusted fully diluted earnings per share for the year ended December 31, 2012 was \$0.69 (\$0.37 unadjusted) compared to adjusted fully diluted earnings per share of \$0.23 (\$0.15 unadjusted) for 2011.

Adjusted fully diluted earnings per share for the fourth quarter of 2012 was \$0.16 (\$0.09 unadjusted) compared to adjusted fully diluted earnings per share of \$0.05 (\$0.04 unadjusted) for the fourth quarter of 2011 and adjusted fully diluted earnings per share of \$0.21 (\$0.20 unadjusted) for the third quarter of 2012.

For a reconciliation of non-GAAP financial measures to their most directly comparable GAAP financial measures, see the Non-GAAP Financial Measures section below.

Cash flows from operations before changes in working capital items increased in 2012 by \$24.5 million to \$78.7 million from \$54.2 million in 2011. The 2012 increase was primarily due to increased gross profit partially offset by an increase in SG&A.

Cash flows from operations before changes in working capital items increased in the fourth quarter of 2012 by \$4.5 million to \$19.4 million from \$14.9 million in the fourth quarter of 2011. The increase in cash flows from operations before changes in working capital for the fourth quarter of 2012 compared to the fourth quarter of 2011 was primarily due to increased gross profit derived from higher revenue partially offset by an increase in cash costs associated with manufacturing facility closures, restructuring and other related charges.

The Company had total cash and loan availability under its Asset-Based Loan (ABL) facility totalling \$54.7 million as of December 31, 2012. Cash flows from operations combined with two new financing arrangements and the extension of the ABL facility allowed the Company to fund the redemptions of the Notes at par value in the aggregate amount of \$80.0 million. The Company had cash and loan availability under its ABL facility exceeding \$71 million as of March 6, 2013.

Outlook

The Company will continue to focus on developing and selling higher margin products, reducing variable manufacturing costs, executing manufacturing plant rationalization initiatives and optimizing its debt structure. As a result, the Company anticipates the following:

Revenue for the first quarter of 2013 is expected to be greater than the fourth quarter of 2012, which is reflective of normal seasonality. Revenue is expected to be approximately the same or slightly lower than the first quarter of 2012 due to fewer shipping days;

Gross margin for the first quarter of 2013 is expected to be similar to the fourth quarter of 2012;

Adjusted EBITDA for the first quarter of 2013 is expected to be greater than both the fourth quarter of 2012 and the first quarter of 2012;

Cash flows from operations in the first quarter of 2013 are expected to be lower than the fourth quarter of 2012 primarily due to changes in working capital requirements related to:

Higher trade receivables resulting from the expected return to a more typical distribution of shipments within the quarter and higher revenue; and

Payments of amounts expensed in 2012.

Total debt at March 31, 2013 is expected to be greater than at December 31, 2012, which is consistent with typical seasonal working capital requirements;

Cash income taxes paid in 2013 are expected to be less than \$2 million. The effective income tax rate may vary significantly from historical rates due to the accounting for tax assets in conjunction with the impact of restructuring charges and other adjustments. Such potential variations in rate would, therefore, not necessarily be indicative of future income tax payments;

Capital expenditures for 2013, excluding any real estate purchases, are expected to be \$33 to \$39 million, reflecting planned replacements of machinery and equipment to achieve improved manufacturing efficiencies. Capital expenditures are expected to return to a lower level of \$17 to \$21 million in 2014;

The remaining \$38.7 million Notes outstanding are expected to be redeemed in 2013. In order to retire the Notes and finance capital expenditures, the Company expects to increase borrowings under both its ABL facility and secured debt equipment finance agreement. Furthermore, any real estate purchases are expected to be financed through mortgages;

Manufacturing cost reductions are expected to total \$16 to \$20 million in 2013, which includes \$5 million of expected savings related to:

Closure of the Richmond, Kentucky manufacturing facility; and

Consolidation of shrink film production from Truro, Nova Scotia to Tremonton, Utah.

Consistent with prior years, the Company anticipates that some of these cost savings will be offset by other manufacturing costs that are expected to increase, such as labor and energy; and

Over the next two years, the Company plans to relocate and modernize its Columbia, South Carolina manufacturing operations with state-of-the-art equipment in a new facility. A letter of intent has been entered into for the purchase of a manufacturing facility in Blythewood, South Carolina, which is in close proximity to Columbia. This plan, which reflects the Company's largest single facility improvement in many years, is expected to result in the following:

Total annual cash savings in excess of \$13 million starting in the first half of 2015 with the first full year effects in 2016;

Total charge of \$32 to \$38 million between 2013 and 2015, with \$28 to \$32 million expected to be recorded in the first quarter of 2013;

Of the total charge recorded in the first quarter of 2013, \$25 to \$27 million relates to non-cash impairment of property, plant and equipment with the remaining \$3 to \$5 million relating to cash items that will be disbursed over the next two years;

Subsequent to the first quarter of 2013, \$4 to \$6 million of expenses are expected to be recorded and paid over the next two years;

Total capital expenditures for equipment related to this project are expected to be \$26 million, of which \$2.7 million was paid for in the fourth quarter of 2012, \$15 to \$17 million expected to be paid in 2013 and the remainder to be incurred in periods subsequent to 2013. These capital expenditure amounts do not include any real estate investments. This capital expenditure of \$15 to \$17 million in 2013 is included in the \$33 to \$39 million total capital expenditures discussed above; and

Total cost of the new building and facility improvements is expected to be approximately \$13.5 million.

Assuming stable or improving macro-economic conditions, the Company expects to achieve quarterly gross margin in the range of 18% to 20% during 2013.

Non-GAAP Financial Measures

EBITDA, adjusted EBITDA, free cash flows, adjusted net earnings (loss) and adjusted earnings (loss) per share are not generally accepted accounting principle (GAAP) measures. The non-GAAP

financial measures do not have any standardized meanings prescribed by GAAP and are therefore unlikely to be comparable to similar measures presented by other issuers. Whenever Intertape uses such non-GAAP financial measures, it provides reconciliations to the most directly comparable GAAP financial measures. Investors and other readers are encouraged to review the GAAP financial measures and the reconciliation of non-GAAP financial measures to their most directly comparable GAAP measures set forth below and should consider non-GAAP financial measures only as a supplement to, not as a substitute for or as a superior measure to, measures of financial performance prepared in accordance with GAAP. The Company has included these non-GAAP financial measures because it believes that it permits investors to make a more meaningful comparison of the Company's performance between periods presented. In addition, EBITDA and adjusted EBITDA are used by Management and the Company's lenders in evaluating the Company's performance.

EBITDA

A reconciliation of the Company's EBITDA, a non-GAAP financial measure, to GAAP net earnings (loss) is set out in the EBITDA reconciliation table below. EBITDA should not be construed as earnings (loss) before income taxes, net earnings (loss) or cash flows from operating activities as determined by GAAP. The Company defines EBITDA as net earnings (loss) before (i) interest and other (income) expense; (ii) income tax expense (benefit); (iii) refinancing expense, net of amortization; (iv) amortization of debt issue expenses; (v) amortization of intangible assets; and (vi) depreciation of property, plant and equipment. Adjusted EBITDA is defined as EBITDA before (i) manufacturing facility closures, restructuring and other related charges; (ii) stock-based compensation expense; (iii) impairment of goodwill; (iv) impairment of long-lived assets and other assets; (v) write-down on assets classified as held-for-sale; and (vi) other items as disclosed

Adjusted Net Earnings

A reconciliation of the Company's adjusted net earnings (loss), a non-GAAP financial measure, to GAAP net earnings (loss) is set out in the adjusted net earnings (loss) reconciliation table below. Adjusted net earnings (loss) should not be construed as net earnings (loss) as determined by GAAP. The Company defines adjusted net earnings (loss) as net earnings (loss) before (i) manufacturing facility closures, restructuring, and other related charges; (ii) stock-based compensation expense; (iii) impairment of goodwill; (iv) impairment of long-lived assets and other assets; (v) write-down on assets classified as held-for-sale; (vi) other items as disclosed; and (vii) income tax effect of these items.

Adjusted earnings (loss) per share is also presented in the following table and is a non-GAAP financial measure. The Company defines adjusted earnings (loss) per share as adjusted net earnings (loss) divided by the weighted average number of common shares outstanding, both basic and diluted.
