About Calamos Investments

For over 35 years, we have helped investors like you manage and build wealth to meet their long-term individual objectives by working to capitalize on the opportunities of the evolving global marketplace. We launched our first mutual fund in 1985 and our first closed-end fund in 2002. Today, we manage five closed-end funds. Three are enhanced fixed income offerings, which pursue high current income from income and capital gains. Two are income-oriented total return offerings, which seek current income, with increased emphasis on capital gains potential. Calamos Strategic Total Return Fund (CSQ), falls into this category. Please see page 5 for a more detailed overview of our closed-end offerings.

We are dedicated to helping our clients build and protect wealth. We understand when you entrust us with your assets, you also entrust us with your achievements, goals and aspirations. We believe we best honor this trust by making investment decisions guided by integrity, by discipline, and by our conscientious research.

We believe an active, risk-conscious approach is essential for wealth creation. In the 1970s, we pioneered strategies that seek to participate in equity market upside and mitigate some of the potential risks of equity market volatility. Our investment process seeks to manage risk at multiple levels and draws upon our experience investing through multiple market cycles.

We have a global perspective. We believe globalization offers tremendous opportunities for countries and companies all over the world. In our view, this creates significant opportunities for investors. In our U.S., global and international portfolios, we are seeking to capitalize on the potential growth of the global economy.

We believe there are opportunities in all markets. Our history traces back to the 1970s, a period of significant volatility and economic concerns. We have invested through multiple market cycles, each with its own challenges. Out of this experience comes our belief that the flipside of volatility is opportunity.

Letter to Shareholders

JOHN P. CALAMOS, SR.

CEO and Global Co-CIO

Dear Fellow Shareholder:

Welcome to your annual report for the 12-month period ended October 31, 2013. This report includes commentary from our investment team, as well as a listing of portfolio holdings, financial statements and highlights, and detailed information about the performance and allocation of your Fund. I invite you to read it carefully.

Calamos Strategic Total Return Fund (CSQ) is an income-oriented total return fund. This means we are focused not only on delivering a competitive stream of distributions, but also on total return. We utilize dynamic asset allocation to pursue high current income with a less rate-sensitive approach, while also maintaining a focus on capital gains.

Steady and Competitive Distributions

During the annual period, CSQ provided steady monthly distributions. We believe the Fund s distribution rate, which was 7.95%* on a market price basis as of October 31, 2013, was very competitive, given the low interest rates in many segments of the bond market. In our view, the Fund s distributions illustrate the benefits of a global, multi-asset class approach and flexible allocation strategy.

We understand that many closed-end fund investors seek steady, predictable distributions instead of distributions that fluctuate. Therefore, this Fund has a level rate distribution policy. As part of this policy, we aim to keep distributions consistent from month to month, and at a level that we believe can be sustained over the long term. In setting the Fund s distribution rate, the investment management team and the Fund s Board of Trustees consider the interest rate, market and economic environment. We also factor in our assessment of individual securities and asset classes. (For additional information on our level rate distribution policy, please see The Calamos Closed-End Funds: An Overview on page 5 and Level Rate Distribution Policy on page 38.)

^{*} Current Annualized Distribution Rate is the Fund s most recent distribution, expressed as an annualized percentage of the Fund s current market price per share. The Fund s 10/15/13 distribution was \$0.0700 per share. Based on our current estimates, we anticipate that approximately \$0.0337 is paid from ordinary income and \$0.0363 of the distribution represents a return of capital. Estimates are calculated on a tax basis rather than on a generally accepted accounting principles (GAAP) basis, but should not be used for tax reporting purposes. Distributions are subject to re-characterization for tax purposes after the end of the fiscal year. This information is not legal or tax advice. Consult a professional regarding your specific legal or tax matters. Under the Fund s level rate distribution policy, distributions paid to common shareholders may include net investment income, net realized short-term capital gains and return of capital. In addition, a limited number of distributions per calendar year may include net realized long-term capital gains. Distribution rate may vary.

Letter to Shareholders

Market Environment

The economic recovery continued during the reporting period although volatility persisted driven in large measure by political uncertainties. During the early portion of the period, investors were focused primarily on finding income in a low-rate environment. In the latter part of the period, a greater emphasis on fundamentals emerged, as investors began to put more faith in the slow-growth recovery, turning their attention away from the highest dividend-paying stocks they had used as fixed income surrogates.

We believe our active approach and rigorous research are particularly well suited for this environment.

Volatility persisted as a major theme throughout the year, however, with myriad political uncertainties promising more of the same going forward. Nevertheless, the markets ultimately looked past the uncertainty. As the economic recovery in the U.S. continued, stocks rallied to near-record double-digit gains, with the S&P 500 Index¹ returning an impressive 27.18% for the period. Growth stocks fared even better, coming on strong in the second half of the period to post a gain of 29.16% in the Russell 3000 Growth Index².

Economic recovery and equity market gains benefited the convertible securities market. We saw encouraging new issuance trends as well as strong performance. Participating in the equity market s upside trajectory, the BofA Merrill Lynch All U.S. Convertible IndeXreturned 23.82%. High yield issuance remained compelling, and the Credit Suisse High Yield Index⁴ returned 8.88%. However, in light of concerns over a potential rate hike, the lower-yielding U.S. bond market barely advanced during the first half of the 12-month period before eventually turning negative during the rest of the fiscal year, resulting in a loss of 1.08% for the Barclays Capital U.S. Aggregate Bond Index⁵.

Outlook: Continued Cautious Optimism

We continue to believe the keys to long-term investing success are the active management and diversification that this Fund offers. We believe the U.S. seems poised to continue on its respectable pace and lead the global recovery, with corporate balance sheets in good health and record corporate cash levels at the ready to potentially fund new job growth and capital expenditures. Incoming data continues to show the needle pointing upward for manufacturing, and earnings still appear to be on the rise as we head toward 2014. Just as significantly, improved personal balance sheets, a stronger housing market and equity market gains should help support consumer activity.

We continue to believe the keys to long-term investing success are the active management and diversification that this Fund offers.

U.S. equities look to be in the mid-cycle of a secular bull market, but we believe valuations have still more room to expand. In our view, valuations are attractive at current levels, especially looking at earnings yields

Letter to Shareholders

versus Treasury yields, and we see particularly pronounced opportunities among growth stocks. Valuations for growth stocks remain attractive versus value stocks, and are especially compelling against the backdrop of sustained economic recovery, an eventual tapering of the Fed s quantitative easing activities and increased investor interest in growth fundamentals. Within equities, our team is identifying solid secular and cyclical growth opportunities that may benefit as the global economy continues to improve. Our focus remains on companies with strong growth fundamentals and accelerating returns on invested capital that are selling at attractive valuations. We have maintained conviction in technology as a long-term growth opportunity, and have also found much potential within consumer discretionary, in companies positioned to benefit from improving U.S. consumer balance sheets and the up-and-coming consumer class in developing markets.

We are also encouraged by recent new issuance trends in the U.S. convertible market, and believe the combination of ongoing economic recovery and a more normal interest-rate environment may provide added incentives for companies to issue convertibles.

Our Use of Leverage*

We have the flexibility to utilize leverage in this Fund. Over the long term, we believe the judicious use of leverage provides us with opportunities to enhance total return and support the Fund s distribution rate. Leverage strategies typically entail borrowing at short-term interest rates and investing the proceeds at higher rates of return. During the reporting period, we believed the prudent use of leverage would be advantageous given the economic environment, specifically the low borrowing costs we were able to secure. Overall, our use of leverage contributed favorably to the returns of the Fund, as the performance of the Fund s holdings exceeded the costs of our borrowing activities.

Consistent with our focus on risk management, we have employed techniques to hedge against a rise in interest rates. We have used interest rate swaps to manage the borrowing costs associated with our leverage activities. Interest rate swaps allow us to lock down an interest rate we believe to be attractive. Although rates are at historically low levels across much of the fixed income market, history has taught us that rates can rise quickly, in some cases, in a matter of months. We believe that the Fund s use of interest rate swaps is beneficial because it provides a degree of protection should a rise in rates occur.

Well Positioned for the Long Term

Over the past years, the U.S. economy has demonstrated its resilience, and we expect the recovery to move forward at a measured pace. Still, as we discussed, we expect volatility to continue. We encourage investors to

* Leverage creates risks that may adversely affect return, including the likelihood of greater volatility of net asset value and market price of common shares, and fluctuations in the variable rates of the leverage financing.

Letter to Shareholders

maintain a long-term focus, global perspective and a commitment to diversified asset allocation, and we believe that our experience, proprietary research and active approach position us well to help our clients in this regard.

If you would like any additional information about this Fund or our other closed-end offerings, please contact your financial advisor or our client services team at 800.582.6959 (Monday through Friday from 8:00 a.m. to 6:00 p.m., Central Time), or visit us at www.calamos.com. We thank you for your continued trust.

Sincerely,

John P. Calamos, Sr.

CEO and Global Co-CIO,

Calamos Advisors LLC

Before investing, carefully consider a fund s investment objectives, risks, charges and expenses. Please see the prospectus containing this and other information or call 800.582.6959. Please read the prospectus carefully. Performance data represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance quoted.

1 The S&P 500 Index is an unmanaged index generally considered representative of the U.S. stock market. Source: Lipper, Inc.

2 The Russell 3000 Growth Index measures the performance of those Russell 3000 Index companies with higher price-to-book ratios and higher forecasted growth values.

3 The BofA Merrill Lynch All U.S. Convertibles Ex-Mandatory Index represents the U.S. convertible securities market excluding mandatory convertibles.

4 The Credit Suisse High Yield Index is an unmanaged index of approximately 1,600 issues with an average maturity range of seven to ten years with a minimum capitalization of \$75 million. The Index is considered generally representative of the U.S. market for high yield bonds.

5 The Barclays U.S. Aggregate Bond Index is considered generally representative of the investment-grade bond market. Source: Lipper, Inc. Unmanaged index returns assume reinvestment of any and all distributions and, unlike fund returns, do not reflect fees, expenses or sales charges. Investors cannot invest directly in an index. Investments in overseas markets pose special risks, including currency fluctuation and political risks. These risks are generally intensified for investments in emerging markets. Countries, regions, and sectors mentioned are presented to illustrate countries, regions, and sectors in which a fund may invest. Fund holdings are subject to change daily. The Funds are actively managed. The information contained herein, while not guaranteed as to the accuracy or completeness, has been obtained from sources we believe to be reliable. There are certain risks involved with investing in convertible securities in addition to market risk, such as call risk, dividend risk, liquidity risk and default risk, that should be carefully considered prior to investing. This information is being provided for informational purposes only and should not be considered investment advice or an offer to buy or sell any security in the portfolio.

This report is intended for informational purposes only and should not be considered investment advice.

The Calamos Closed-End Funds: An Overview

In our closed-end funds, we draw upon decades of investment experience, including a long history of opportunistically blending asset classes in an attempt to capture upside potential while managing downside risk. We launched our first closed-end fund in 2002.

Closed-end funds are long-term investments. Most focus on providing monthly distributions, but there are important differences among individual closed-end funds. Calamos closed-end funds can be grouped into multiple categories that seek to produce income while offering exposure to various asset classes and sectors.

Our Level Rate Distribution Policy

Closed-end fund investors often look for a steady stream of income. Recognizing this, Calamos closed-end funds have a level rate distribution policy in which we aim to keep monthly income consistent through the disbursement of net investment income, net realized short-term capital gains and, if necessary, return of capital. We set distributions at levels that we believe are sustainable for the long term. Our team is focused on delivering an attractive monthly distribution, while maintaining a long-term focus on risk management. The level of the funds distributions can be greatly influenced by market conditions, including the interest rate environment. The funds distributions will depend on the individual performance of positions the funds hold, our view of the benefits of retaining leverage, fund tax considerations, and maintaining regulatory requirements.

For more information about any of these funds, we encourage you to contact your financial advisor or Calamos Investments at 800.582.6959 (Monday through Friday from 8:00 a.m. to 6:00 p.m., Central Time). You can also visit us at www.calamos.com.

For more information on our level rate distribution policy, please see page 38.

STRATEGIC TOTAL RETURN FUND (CSQ)

INVESTMENT TEAM DISCUSSION

Please discuss the Fund s strategy and role within an asset allocation.

Calamos Strategic Total Return Fund (CSQ) is a total return-oriented offering that seeks to provide a steady stream of income paid out on a monthly basis. We invest in a diversified portfolio of equities, convertible securities and high yield securities. The allocation to each asset class is dynamic, and reflects our view of the economic landscape as well as the potential of individual securities. By combining these asset classes, we believe the Fund is well positioned over the long term to generate capital gains as well as income. This broader range of security types also provides us with increased opportunities to manage the risk and reward characteristics of the Fund over full market cycles. Through this approach, we seek to offer investors an attractive monthly distribution, as well as equity participation.

While we invest primarily in securities of U.S. issuers, we favor those companies that are actively participating in globalization with geographically diversified revenue streams and global business strategies. We emphasize companies that we believe offer reliable debt servicing, respectable balance sheets and good prospects for sustainable growth. We continue to remain cautiously optimistic with respect to the U.S. equity market and look forward to continued growth through economic improvement.

How did the Fund perform over the reporting period?

The Fund gained 21.83% on a net asset value (NAV) basis and 11.75% on a market price basis for the 12-month period ended October 31, 2013. For the same period, the S&P 500 Index gained 27.18% and the Credit Suisse High Yield Index returned 8.88%.

At the end of the reporting period, the Fund s shares traded at a 10.96% discount to net asset value.

How do NAV and market price return differ?

Closed-end funds trade on exchanges, where the price of shares may be driven by factors other than the value of the underlying securities. The price of a share

SINCE INCEPTION MARKET PRICE AND NAV HISTORY THROUGH 10/31/13

Performance data quoted represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance quoted. The principal value of an investment will fluctuate so that your shares, when sold, may be worth more or less than their original cost. Returns at NAV reflect the deduction of the Fund s management fee, debt leverage costs and all other applicable fees and expenses. You can obtain performance data current to the most recent month end by visiting www.calamos.com.

Investment Team Discussion

in the market is called market value. Market price may be influenced by factors unrelated to the performance of the fund s holdings, such as general market sentiment or future expectation. A fund s NAV return measures the actual return of the individual securities in the portfolio, less fund expenses. It also measures how a manager was able to capitalize on market opportunities. Because we believe closed-end Funds are best utilized as long-term holdings within asset allocations, we believe that NAV return is the better measure of a fund s performance. However, when managing the fund, we strongly consider actions and policies that we believe will optimize its overall price performance and returns based on market value.

Please discuss the Fund s distributions during the annual period.

We employ a level rate distribution policy within this Fund with the goal of providing shareholders with a consistent distribution stream. The Fund provided a steady distribution stream over the period. Monthly distributions were \$0.07 during the fiscal year, and the Fund s annual distribution rate was 7.95% of market price as of October 31, 2013.

We believe that both the Fund s distribution rate and level remained attractive and competitive, as low interest rates limited yield opportunities in much of the marketplace. For example, as of October 31, 2013, the dividend yield of S&P 500 Index stocks averaged 2.02%. Yields also remained low within the U.S. government bond market, with 10-year U.S. Treasury and 30-year U.S. Treasury yielding 2.57% and 3.63%, respectively.

What factors influenced performance over the reporting period?

The Fund enjoys a broad investment mandate that allows it to take advantage of opportunities around the world through a variety of different investment vehicles. Given this flexibility, the Fund was able to capitalize on the strong performance of the equity markets during the period by increasing its exposure to convertible and equity assets to a combined total of over 78% as of October 31, 2013. Both convertibles and bonds provided income to the portfolio during the period, while convertibles and equities provided solid capital appreciation to boost net asset value.

In terms of specific sector performance, the Fund s underweight positions in low-growth sectors such as utilities and consumer staples proved beneficial during the period, as these sectors lagged the broader market gains fueled by investors increasing interest in company fundamentals and growth prospects.

Although Fund holdings in the consumer discretionary and health care sectors posted positive absolute returns, they lagged their sector peers in the S&P 500 Index. We maintain a cautiously optimistic outlook for these two sectors going forward. In consumer discretionary, the U.S consumer has continued to shop despite heated fiscal and political maneuvering, supported by a wealth effect of rising equity markets and a strengthening housing market. We also continue to find opportunities within the health care sector, particularly in companies involved in new technologies or product cycles, such as health care consumerism and genome-based diagnostics.

How is the Fund positioned?

The Fund s positioning reflects our constructive market outlook. We are emphasizing higher-growth businesses, focusing on companies with strong growth fundamentals

ASSET ALLOCATION AS OF 10/31/13

Investment Team Discussion

and increasing returns on invested capital that are selling at attractive valuations. We seek out businesses with sustainable competitive advantages, strong revenue growth and secular tailwinds, such as those related to consumer demand for technology and a growing global consumer class. Reflecting these criteria, we have found particularly compelling opportunities in sectors including information technology, consumer discretionary, financials, industrials and health care.

While our macroeconomic view is one of cautious optimism, we believe global political uncertainties will likely spur volatility in the U.S. equity markets. Consequently, we are maintaining a strong focus on risk management in regard to the individual companies we select, as well as the portfolio s construction on the whole.

During the period, we increased the Fund's allocation to U.S. equities and convertibles, consistent with our overall position on the growth prospects for the equity market. Given recent positive issuance trends, we have been adding to the Fund's convertible allocation, and we are excited about the opportunities that lie ahead in that asset class. In light of these adjustments, the Fund's allocation to bonds was slightly reduced during the period.

The average credit quality of the portfolio is higher than that of the index, as our credit process tends to guide us away from the most speculative corporate securities. We continue to hold higher allocations in the BB credit tier, as we believe this exposure offers investors a better risk/return dynamic while continuing to provide regular income. We currently view the lowest credit tiers of the market as less attractive given their pricing and our outlook for a slower-growth global economy, although we do selectively invest in lower-credit securities when we believe the risk/return dynamics are favorable.

The Fund is currently employing leverage at approximately 27%, borrowing through floating-rate bank debt. Given the low borrowing rates at present, this has been beneficial to the performance of the Fund. In addition, 46% of our floating-rate debt is hedged through interest rate swaps, a defensive strategy that mitigates the Fund s overall exposure to a quick rise in short-term interest rates.

Do you have any closing thoughts for Fund shareholders?

We believe the Fund s multi-asset, income-oriented total return approach continues to provide shareholders with a good opportunity for growth and current income.

In our view, the case for U.S. equities remains strong. Stocks are attractively priced versus historic levels as well as relative to government bonds, with growth stocks particularly attractive relative to value stocks. Although the stock market has performed very well over recent months, we believe that the U.S. equity market has more room to advance, and that we are in the middle of a secular bull market. As we apply an active approach to uncovering growth opportunities, we believe our team has positioned the Fund appropriately for the slow-but-steady economic recovery.

We are also finding growing opportunities among convertible securities and we believe convertibles remain a good choice for income, as well as equity upside participation. Supported by global economic growth, new issuance trends have been encouraging both globally and within the U.S., and our team is finding attractively valued issues offering the balance of equity and fixed income characteristics that we prefer for the Fund.

Investment Team Discussion

Finally, we continue to find compelling opportunities that meet our criteria in the mid-grade credit space. Many companies have taken advantage of lower interest rates to refinance their debt, allowing them to push their debt obligations out and reduce overall borrowing costs. Moreover, many issuers may be well positioned against a backdrop of U.S. and global economic recovery. Even so, we believe that not all companies will fare equally well. We believe the Calamos investment team is well positioned to identify opportunities among higher-income corporate bonds, due to our extensive experience with credit analysis, as well as our focus on balancing risk, return and income considerations. We believe this Fund s focus on mid-grade credits, issued by companies with good records of reliable debt servicing, makes this portfolio an attractive choice for investors seeking higher income from a risk-managed approach to corporate bonds.

Schedule of Investments October 31, 2013

NOTES TO SCHEDULE OF INVESTMENTS

- ^ Security, or portion of security, is on loan.
- m Security, or portion of security, is held in a segregated account as collateral for note payable aggregating a total value of \$1,225,949,739. \$327,840,780 of the collateral has been re-registered by one of the counterparties (see Note 7 Borrowings).
- * Securities issued and sold pursuant to a Rule 144A transaction are excepted from the registration requirement of the Securities Act of 1933, as amended. These securities may only be sold to qualified institutional buyers (QIBs), such as the fund. Any resale of these securities must generally be effected through a sale that is registered under the Act or otherwise exempted from such registration requirements.
- § Securities exchangeable or convertible into securities of one or more entities that are different than the issuer. Each entity is identified in the parenthetical.

Variable rate or step bond security. The rate shown is the rate in effect at October 31, 2013.

- ~ Security, or portion of security, is segregated as collateral for swaps. The aggregate value of such securities is \$5,711,987.
- The synthetic convertible securities strategy combines separate securities that together possess the economic characteristics similar to a convertible security.

Non-income producing security.FOREIGN CURRENCY ABBREVIATIONS

CHFSwiss FrancEUREuropean Monetary UnitTWDNew Taiwan Dollar

Note: Value for securities denominated in foreign currencies is shown in U.S. dollars. The principal amount for such securities is shown in the respective foreign currency. The date on options represents the expiration date of the option contract. The option contract may be exercised at any date on or before the date shown.
