Charter has made a number of claims in its public comments about TWC and the

Charter proposal that we believe reflect a fundamental lack of understanding of our operations and strategy

We will address these claims in due course. However, none of what Charter has claimed changes the simple fact that its proposal is grossly inadequate As such, these materials focus on TWC s value as a one-of-a-kind asset that Tom Rutledge correctly has identified as the biggest and best M&A option available Presentation Context

```
Charter s proposal fails to reflect the significant value of TWC s high quality assets, unique scale, synergy potential, growth opportunities and strong financial position

It is materially below precedent transaction multiples, especially transactions of a
```

similar scale to TWC

The proposal fails to adequately compensate and protect TWC shareholders for the risks of owning Charter s stock

We have engaged with Charter, but Charter is not prepared to pay for a one-of-a-

kind asset and instead chose to go public with another low-ball proposal in an attempt to steal the Company

Charter s Proposal is Grossly Inadequate

The TWC Board of Directors unanimously rejected Charter s

third grossly inadequate proposal

with

Charter and Liberty in an attempt to understand their approach. After numerous meetings in May, June, and July, Charter made a low-ball offer of \$114 per TWC share, which was rejected by our Board
Charter did not re-engage with TWC until late October, when it made another low-ball offer of \$127 per TWC share, which was also rejected by our Board In December, TWC management had numerous conversations with Charter management in order to understand:
On December 27, TWC management made clear to Charter:
TWC Has Engaged With Charter Rather than pursuing this path, Charter has chosen to go public with its third
low-ball offer trying to pressure TWC's Board into selling the Company at a grossly
inadequate price
Charter s proposal and operational plan
Charter s view on synergies and tax attributes

6 Charter s proposal is well below recent cable transactions, especially transactions of a similar scale to TWC

Only true comparable deal from a scale perspective, AT&T Broadband, sold in 2002 for \sim 21x EBITDA, \sim 8x higher than the average trading multiple of public comparable cable companies at the time
