Executive Summary

Introduction

The Arbitration Panel's ruling in late 2013 established a clear process to facilitate this consent solicitation

CommonWealth stands on the brink of a new phase in its history in which shareholders can choose who will manage their company, unlock substantial value, and leave behind a history as an underperforming, controlled company rife with conflicts of interest

Corvex and Related will request a record date by February 16; Commonwealth must

Edgar Filing: Commonwealth REIT - Form DFAN14A

establish the record date to be within 10 business days of the record date request and on February 10 conditionally set the record date for February 18; the consent solicitation must be concluded within 30 calendar days of the record date

Corvex and Related are undertaking this consent solicitation to remove the entire Board of Trustees of Commonwealth REIT ( Commonwealth, CWH or the Company ) after a hard-fought battle for shareholders to hold this vote, and to subsequently elect a highly qualified new Board of Trustees led by Sam Zell

CWH's performance record is abysmal by almost any metric over any relevant  
time period, in our view, but all the while the Portnoys have continued with  
impunity to line their pockets

Shareholders can now take back Commonwealth, choose a new, truly  
independent Board, and unlock the substantial value trapped within the  
Portnoys  
conflicted external management structure

6

Executive Summary

The Case for Removal: Corporate Governance Malfeasance

Having deliberately manufactured a highly lucrative and insulated situation for themselves over 28 years, it is not surprising the Portnoys would harbor a deep commitment to retaining control

However, the actions taken over the past year to silence shareholders were unconscionable, in our view, and included, among many others, illegal bylaw amendments (later invalidated) and a secret attempt to manipulate Maryland lawmakers into changing the Maryland Unsolicited Takeover Act

## Edgar Filing: CommonWealth REIT - Form DFAN14A

Independent governance advisory firms such as ISS and Glass Lewis have long issued negative opinions on CWH's governance practices and recommended against re-election of certain Trustees

Conveniently coinciding with a solicitation to allow shareholders to take back their company, the Portnoys are now trumpeting highly misleading governance alterations, that can be unilaterally reversed at any time, and shamelessly asking shareholders to believe that they have experienced an epiphany

We believe the Board's actions over the past year alone, coupled with serial underperformance and atrocious corporate governance practices, warrant removal

Shareholders should not allow a few conveniently timed, reversible governance alterations to erase 28 years of poor governance, let alone the inexcusable actions of the past year

7

Executive Summary

What Are Shareholders Voting On?

The consent solicitation before shareholders is not a vote on a revised set of bylaws, a charter amendment or some other apparatus of governance with which the Portnoys would

like  
to  
distract  
shareholders,  
but  
a  
referendum  
on  
whether  
or  
not  
the  
individuals  
sitting  
on  
the  
current  
Board  
are  
fit  
to  
lead  
this  
company

The consent solicitation also creates an opportunity to elect a highly  
qualified new  
board that will be committed  
to  
good  
governance, focused  
on  
unlocking  
the substantial value embedded in CommonWealth for all  
shareholders,  
and  
led  
by  
Sam  
Zell,  
who  
created  
three  
of  
the  
most  
successful  
REITs in history: Equity Office Properties Trust, Equity Residential, and  
Equity LifeStyle Properties

8  
Executive Summary  
A Vote on Leadership

recent

alterations,  
not  
the  
least

which  
is  
that  
they  
are  
all  
unilaterally  
reversible  
by  
the  
Board

But the obvious flaw in the governance modifications is that they require shareholders to trust the same individuals who deliberately harmed shareholder rights over the past year with actions such as:

Passing illegal bylaw amendments to eviscerate the ability to hold any consent solicitation, a right plainly granted by the Declaration of Trust since 1986

Secretly attempting to manipulate state lawmakers into changing the Maryland Unsolicited Takeover Act to eliminate the right to hold this consent solicitation

Refusing  
to  
eliminate  
bylaws  
that  
require  
2  
Trustees  
be  
employed  
by  
RMR,  
the  
manager  
owned  
100%  
by the Portnoys

In effect, the Portnoys are asking to be judged solely on the misleading modifications of the past two months, rather than their 28-year history of poor governance, not to mention the inexcusable actions of the past year

When a board deliberately harms shareholder rights through unconscionable tactics to protect their own interests, accepting flawed governance alterations while leaving the same board in place simply invites more of the same

We believe that given a choice between the Portnoys and their record of value destruction and Sam Zell's record of value creation for shareholders, the choice is clear

History of Underperformance

The Fundamental Cause of Underperformance

We continue to believe that the fundamental cause of underperformance at CWH is the absence of accountability, and more specifically the inability of shareholders to choose their own manager

Ironically,

the

severe

conflicts

in  
the  
external  
management  
structure  
demand  
rigorous  
accountability  
and  
superior  
governance,

but  
in  
our  
view  
none  
exists

In a structure where the manager is incentivized to act without regard to shareholder interests and still avoid being terminated, severe underperformance is inevitable, as evidenced by the years of data establishing CWH underperformance

The severe conflict of interest at CWH has been well-documented: the Portnoys effectively control CWH despite owning virtually no stock

How  
can  
there  
be  
accountability  
when  
an  
employee  
controls  
its  
own  
employer ?

RMR, a Delaware private company, is owned by Barry Portnoy and his son Adam Portnoy

All  
executive officers of CWH are also officers of RMR

Given  
these  
inherent  
and  
widely  
recognized  
problems,  
CWH  
and

CWH trails its core office REIT peers by 234 bps and 359 bps on same store rental growth and NOI growth, respectively

We believe YTD 2013 results below overstate CWH's performance, as the Company has placed 112 buildings (47 properties) into discontinuing operations beginning in Q4 2012. Despite its greater scale, CWH's cost structure results in the lowest same store NOI margins of its peers.

CWH's total rental and NOI growth is dependent upon its outsized acquisition activity.

Independent Parties Agreed With Us

Consistently poor corporate governance has not gone unnoticed by independent, highly-respected parties

ISS annual reports consistently reported Shareholder Rights were of High Concern

In lieu of further subjugation of shareholder rights, we believe the Dissident's consent solicitation offers the much more attractive prospect of meaningful change for CWH and its owners.

The father and son duo who head Commonwealth Barry and Adam Portnoy and Commonwealth's counsel at Skadden Arps showed little regard for shareholder rights, doing everything in their power to prevent Corvex Management and the Related Companies from removing the Portnoys. The Portnoys banked on Commonwealth's unique requirement that shareholders arbitrate all disputes with the company to stymie the two hedge funds. It didn't work, and the arbitration panel ruled against Commonwealth, clearing the way for the funds to begin a campaign to unseat them. The Portnoys receive an F.

Unilaterally amend the bylaws (while shareholders cannot) to effectively cripple shareholder action

Unilaterally stagger the Board under MUTA, without shareholder approval

Reinstate hand-picked Trustees who fail to be re-elected by shareholders

Further, there is no way to repeal the "Silent Bylaw" : Shareholders must spend exorbitant sums in litigation to strike down illegal, unilaterally-passed bylaw amendments simply to exercise their fundamental right to vote

But the obvious flaw in the alterations is that they require shareholders to trust the same individuals who deliberately harmed shareholder rights over the past year with actions that we believe suggest total disdain for shareholder rights

Why It's All Smoke and Mirrors

Reality

Annual Elections

Bylaws still require two Managing Trustees to be employees of RMR, making the promise of having

2/3 of the Board up for annual elections in 2015  
highly misleading

We publicly asked the Board to clarify this  
obvious contradiction but they have refused  
to respond

Section 3-803 of the Maryland Unsolicited Takeover  
Act allows Portnoys to unilaterally re-classify CWH  
Board at any time regardless of contrary provisions  
in governing documents, without a shareholder vote

CWH has not permanently opted out of  
Section 3-803

Charter amendment to de-classify Board requires a  
vote of holders of 75% of outstanding shares at  
2014 annual meeting

Last year s quorum was only 67%

Can shareholders expect the Portnoys and  
CWH to rock the vote  
at the 2014 meeting  
to de-classify Board, or could they allow the  
proposal to languish?

Why would the new Trustees be any more

Are shareholders expected to believe

The Portnoys' True Intentions Revealed

On January 21, 2014, we sent the Board a public letter, providing them an opportunity to address the gaping loopholes in their governance alterations and commit to permanent, true governance reform

The Board's response? Silence.

Coupled with the unconscionable actions taken over the last year, what else do you need to know?

We asked if the Portnoy Board will:

Eliminate  
the  
requirement  
that  
at  
least  
2  
Trustees  
be  
affiliated  
with  
RMR?

Amend the charter to ensure that the Board cannot opt back into Section 3-803 of the Maryland General Corporation Law which allows them to unilaterally re-stagger the Board?

Amend governance documents to commit that if Barry Portnoy is not elected as a Trustee at the 2014 Annual Meeting, he cannot be unilaterally reinstated as Joseph Morea was after receiving the vote of only 14% of the outstanding shares?

Amend the charter and bylaws to ensure the new provisions that make the annual meeting and nomination process less offensive reversible only with a shareholder vote?

Amend the charter and bylaws to replicate the Arbitration Panel's procedural guidelines for any future consent solicitation?

Post online the entire un-redacted transcript of the October 2013 hearing before the Arbitration Panel so that shareholders can understand management's testimony about, among other things, their fiduciary duties to RMR vs. shareholders and how the RMR contract is negotiated every year?

Work with Corvex/Related and the Arbitration Panel to implement obvious solutions that address the Board's professed concerns regarding the transition to a new Board?

We are fully supportive of Corvex and Related's efforts to maximize value at Commonwealth for all shareholders. We see an attractive opportunity at Commonwealth uniquely suited to our expertise in leading public real estate companies and in turning around underperforming assets. We created three of the most successful REITs in the U.S., including Equity Office, which at the time of its \$39 billion sale in 2007, owned nearly 100 million square feet of space in over 500 office buildings across the country.

One of our core operating principals is the alignment of interests between company leadership and

Edgar Filing: Commonwealth REIT - Form DFAN14A

shareholders. We are concerned about any attempts to preclude shareholder rights, and our companies are free of such impediments. We believe the shareholders of our REITs have clearly benefited from having an accountable, properly aligned board overseeing an effective, internalized management team with the sole goal of increasing shareholder value.

These REITs clearly demonstrate, in our view, the value to shareholders of having an accountable, properly aligned board overseeing an effective, internalized management team with the sole goal of increasing shareholder value

In stark contrast, CWH has been operated by an underperforming, external manager focused on increasing its fee stream at the expense of shareholders, while erecting barriers to shareholder action

Not surprisingly, the long-suffering shareholders of CWH have had the opposite experience of Mr. Zell's shareholders, as clearly depicted on the following page

Sam Zell is recognized as a founding father of today's public real estate industry after creating three of the most successful REITs in history:

Equity Office Properties Trust, Equity Residential, and Equity LifeStyle Properties

Corvex/Related s Turnaround and Governance Plan

Peaceful Transition of Authority

Plan A

To eliminate the already miniscule risks, the Board members could implement the following to protect Commonwealth and its shareholders:

While we wholeheartedly dismiss the scare tactics employed by the Portnoys

that

a

removal

of  
Trustees  
will  
cause  
the  
business  
material  
harm

we  
point  
out

that ironically the sitting Board members could easily preclude any of their  
imagined disruptions from occurring by acting responsibly in advance of a  
consent solicitation

We have asked the Board to work with Corvex/Related and the Arbitration Panel  
to implement obvious solutions that address the Board's professed concerns ,  
but the Board refuses to respond

Agree to allow for the election of replacement Trustees concurrently with the removal of  
existing Trustees

We also point out that the Arbitration Panel will remain available for resolving disputes  
even

after  
the  
removal  
of  
the  
Trustees  
and  
during  
the  
transition

to  
a  
newly  
elected  
Board

Request waivers under existing financing agreements regarding a change in control or arrange  
for replacement facilities

RMR could remove language or simply agree not to immediately terminate its management of the  
assets in the event of a change in control

57

Corvex/Related s Turnaround and Governance Plan

Disruptive Transition of Authority

Plan B

In the event the Trustees are not cooperative in transitioning authority, Related and Corvex have a plan to protect the Company

Shareholders should not be coerced into voting for the current Board out of fear that

the

existing

Trustees  
will  
burn

Related and Corvex have agreed to purchase up to 51% of the bank  
debt in order to prevent  
acceleration of the Company's debt

(1)  
Mr. Lozier is providing consulting services to Related in connection with Related's investment in CWH.

(2)  
CBRE will perform management and leasing services on customary terms to be agreed to in the event CWH's management agrees

away

from RMR-managed properties because of a lack of attention from RMR personnel  
RMR often fails to execute simple asset and property management functions, such as  
responding to tenant work requests, and challenging real estate tax assessments

Blake Schreck, president and economic development director for the Lenexa Chamber of  
Commerce, didn't sound unhappy about Southlake Technology Park changing hands. He  
echoed multiple local commercial real estate brokers, who indicated that Commonwealth's  
slow response to requests for lease proposals from prospective tenants had likely cost the

It appears that the leasing staff is too small, resources are spread too thin, and a true asset  
management department is non-existent

The majority of, if not all, leases from CWH, SIR, HPT, SNH and GOV are processed  
through the CWH's headquarters office for review, approval and negotiation

There appears to be little delegation to local RMR representatives, creating a substantial  
bottleneck that leads to very slow response times

It appears that staffing is maintained at deficient levels in order to maximize profit margins for  
RMR at the expense of CWH shareholders

Clearly, assets that are suffering from such poor management should only be sold after first

Significant Operational Upside

We are confident that misaligned incentives at the corporate level have translated into underperforming run rate NOI

In our opinion, properties can achieve our estimate of stabilized NOI within 24-36 months of installing an effective management team whose incentives are aligned with shareholders

Furthermore, we believe that measurable progress can begin within several months of initiating a repositioning program with progress reports communicated to shareholders in real time

The cost to shareholders of a severely conflicted external management structure was self-evident during our work in the field

Portfolio Concentration

Top 10 Markets

The Top 10 markets, by concluded value, account for over 50% of the value of the entire portfolio

(1)

(1)

Excludes Australia and land in Austin.

Our weighted average cap rate for the Top 10 markets in CWH's portfolio is 6.8% while the

Edgar Filing: Commonwealth REIT - Form DFAN14A

average implied cap rate of the public peers is 6.7%

Given that the portfolio of assets in CWH's Top 10 markets are comparable or superior to the full portfolios of the average public peer, we believe our weighted average cap rate compares favorably

Portfolio Concentration

Top 20/Top 50 Assets

CWH's entire portfolio has approximately 305 properties but only 50 of these assets account for almost 80% of total portfolio value

(1)

Based on Company Filings.

Top 20 Assets

The Top 20 assets, by concluded

value, account for over 55% of the value of the portfolio, or over 60% if assets held in discontinued operations are excluded

Top 50 Assets

The Top 50 assets, by concluded value, account for nearly 80% of the value of the portfolio, or nearly 90% if assets held in discontinued operations are excluded

We believe CWH's Top 20 assets represent a portfolio of comparable or superior quality relative to the full portfolios of CWH's public peers yet we value CWH's Top 20 assets at a weighted average cap rate of 7.1% while the average public peer trades at an implied cap rate of 6.7%
