Notes to the Condensed Consolidated and Combined Financial Statements

1. Organization and Description of Business

City Office REIT, Inc. (the Company) was organized in the state of Maryland on November 26, 2013. On April 21, 2014, the Company completed its initial public offering (IPO) of shares of the Company's common stock. The Company contributed the net proceeds of the IPO to City Office REIT Operating Partnership, L.P., a Maryland limited partnership (the Operating Partnership), in exchange for common units in the Operating Partnership. Both the Company and the Operating Partnership commenced operations upon completion of the IPO and certain related formation transactions (the Formation Transactions).

The Company's interest in the Operating Partnership entitles the Company to share in distributions from, and allocations of profits and losses of, the Operating Partnership in proportion to the Company's percentage ownership of common units. As the sole general partner of the Operating Partnership, the Company has the exclusive power under the partnership agreement to manage and conduct the Operating Partnership's business, subject to limited approval and voting rights of the limited partners.

City Office REIT, Inc. Predecessor (the Predecessor) represents the combination of the six properties outlined below (the Properties). The Predecessor does not represent a legal entity. The Predecessor and its related assets and liabilities are under common control and were contributed to a newly formed Operating Partnership in connection with the IPO of the Company on April 21, 2014.

Table of Contents

Initial Public Offering and Formation Transactions

The Company's operations are carried on primarily through the Operating Partnership and wholly owned subsidiaries of the Operating Partnership. Both the Company and the Operating Partnership commenced operations upon completion of the IPO and certain related Formation Transactions.

On April 21, 2014, the Company closed the IPO, pursuant to which it sold 5,800,000 shares of common stock to the public at a public offering price of \$12.50 per share. The Company raised \$72.5 million in gross proceeds, resulting in net proceeds to of approximately \$63.4 million after deducting approximately \$5.1 million in underwriting discounts and approximately \$4.0 million in other expenses relating to the IPO. On May 9, 2014, the underwriters of the IPO exercised their overallotment option to purchase an additional 782,150 shares of the Company's common stock at the IPO price of \$12.50 a share resulting in additional gross proceeds of approximately \$9.8 million. The net proceeds to the Company were \$9.1 million after deducting approximately \$0.7 million in underwriting discounts. The Company's common stock began trading on the New York Stock Exchange under the symbol "CIO" on April 15, 2014.

The Company contributed the net proceeds of the IPO to the Operating Partnership in exchange for common units in the Operating Partnership. The Operating Partnership utilized a portion of the net proceeds of the IPO to pay fees in connection with the assumption of the indebtedness, pay expenses incurred in connection with the IPO and Formation Transactions and repay loans that were made to several of the contributing entities by certain investors in such entities. The remaining funds were used for general working capital purposes and to fund acquisitions.

Pursuant to the Formation Transactions, the Operating Partnership acquired a 100% interest in each of the Washington Group Plaza, Cherry Creek and Corporate Parkway properties and acquired an approximate 76% economic interest in the AmberGlen property, 90% interest in the Central Fairwinds property and 95% interest in the City Center property. These initial property interests were contributed in exchange for 3,731,209 common units, 1,858,860 shares of common stock and \$19.4 million of cash. On May 9, 2014, the Company used the \$9.1 million of net proceeds from the exercise of the underwriters' overallotment option to redeem, 479,305 common units and 248,095 common stock from the Second City Group.

In connection with the IPO and Formation Transactions, the Company, through its Operating Partnership, extinguished the loan on the Central Fairwinds property and completed a refinancing of three properties (Cherry Creek, City Center and Corporate Parkway) with a new \$95 million non-recourse mortgage loan and proceeds from the IPO. The loan bears a fixed interest rate of 4.34% and matures on May 6, 2021.

Balances for the three and six months ended June 30, 2014 include those of the Predecessor for the period from April 1, 2014 through April 20, 2014 and January 1, 2014 through April 20, 2014, respectively.

2. Summary of Significant Accounting Policies

Basis of Preparation and Summary of Significant Accounting Policies

The accompanying unaudited condensed consolidated and combined financial statements have been prepared by the Company in accordance with Securities and Exchange Commission rules and regulations and generally accepted accounting principles in the United States of America ("US GAAP") and in the opinion of management contain all adjustments (including normal recurring adjustments) necessary to present fairly the financial position, results of operations and cash flows for the periods presented. The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. These interim consolidated financial statements should be read in conjunction

with the consolidated financial statements and related notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

The Predecessor represents a combination of certain entities holding interests in real estate that were commonly controlled prior to the Formation Transactions. Due to their common control, the financial statements of the separate entities which own the properties are presented on a combined basis in the Predecessor financial statements.

Table of Contents***New Accounting Pronouncements***

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers, which creates a new Topic Accounting Standards Codification (Topic 606). The standard is principle-based and provides a five-step model to determine when and how revenue is recognized. The core principle is that a company should recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. This standard is effective for interim or annual periods beginning after December 15, 2017, and allows for either full retrospective or modified retrospective adoption. We are not permitted to adopt the standard earlier than January 1, 2017. We are currently evaluating the impact the adoption of Topic 606 will have on our financial statements.

In January 2015, the FASB issued ASU No. 2015-01, Income Statement Extraordinary and Unusual Items. ASU 2015-01 eliminates the concept of extraordinary items. However, the presentation and disclosure requirements for items that are either unusual or in nature or infrequent in occurrence remain and will be expanded to include items that are both unusual in nature and infrequent in occurrence. ASU 2015-01 is effective for periods beginning after December 15, 2015. We are currently evaluating the impact of adopting this new accounting standard on our financial statements.

In February 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2015-02, Consolidation (Topic 810) Amendments to the Consolidation Analysis, which amends the criteria for determining which entities are considered variable interest entities (VIE), amends the criteria for determining if a service provider possesses a variable interest in a VIE and ends the deferral granted to investment companies for application of the VIE consolidation model. ASU 2015-02 is effective for annual periods, and interim periods therein, beginning after December 15, 2015. We are currently evaluating the impact the adoption of Topic 810 will have on our financial statements.

At June 30, 2015, the Revolving Credit Facility is cross-collateralized by Central Fairwinds, Logan Tower and Superior Pointe. On July 14, 2015, the Company entered into a first Amendment and Joinder to its Amended and Restated Credit Agreement which increased the authorized borrowing capacity under the Credit Agreement from \$35 million to \$75 million.

Mortgage Loan

On June 25, 2015, the Company closed on a \$17 million loan secured by a first mortgage lien on the Plaza 25 property in Denver. The loan matures in June 2025 and provides for monthly payments of principal and interest. Interest is payable at a fixed rate of 4.1% per annum. Monthly payments are initially interest only.

Secured Credit Facility

On July 14, 2015, the Company entered into an Amendment and Joinder to its Amended and Restated Credit Agreement which increased the authorized borrowing capacity under the Credit Agreement from \$35 million to \$75 million.

6. Fair Value of Financial Instruments

Fair value measurements are based on assumptions that market participants would use in pricing an asset or a liability. The hierarchy for inputs used in measuring fair value is as follows:

Level 1 Inputs quoted prices in active markets for identical assets or liabilities

Level 2 Inputs observable inputs other than quoted prices in active markets for identical assets and liabilities

Level 3 Inputs unobservable inputs

Earn-Out Liability

The fair value of the Central Fairwinds earn-out (note 9) was derived by making assumptions on the timing of the lease up of vacant space and the gross effective rents of those new leases and then applying an 8% discount rate to the resulting cash-flows to obtain a present value. The earn-out valuation assumes that approximately 4,000 square feet of additional leasing is completed between the date of the valuation and the end of the calculation period which would take the earn-out occupancy from 71% signed and committed at June 30, 2015 to 85% by July 2016 and stabilized at that level thereafter. The average gross effective rent and incremental operating costs per square foot is assumed to be \$22 and \$3, respectively.

As of June 30, 2015, the 70% earn-out occupancy and net operating income thresholds had been met. This triggers a payment of approximately \$3.2 million to be made in August 2015. The estimated fair value of the earn-out liability was \$8.6 million as of June 30, 2015 and \$8.0 million as of December 31, 2014. The fair value increased by \$0.6 million for the three and six months ended June 30, 2015.

Level 3 sensitivity analysis:

The Company applies judgment in determining unobservable inputs used to calculate the fair value of Level 3 instruments. Level 3 instruments held by the Company include the earn-out. The unobservable inputs used in the valuation of the earn-out primarily include the net effective rent assumptions. A sensitivity analysis has been performed to determine the potential gain or loss by varying the significant unobservable inputs by increasing or decreasing them by 10%. The impact of applying these other reasonably possible inputs is a potential loss of \$0.1 million and a potential gain of \$0.1 million. This potential gain or loss would be recorded through profit and loss.

Cash Equivalents, Restricted Cash, Accounts Receivable, Accounts Payable and Accrued Liabilities

The Company estimates that the fair value approximates carrying value due to the relatively short-term nature of these instruments.

Table of Contents

Fair Value of Financial Instruments Not Carried at Fair Value

With the exception of fixed rate mortgage loans payable, the carrying amounts of the Company's financial instruments approximate their fair value. The Company determines the fair value of its fixed rate mortgage loan payable based on a discounted cash flow analysis using a discount rate that approximates the current borrowing rates for instruments of similar maturities. Based on this, the Company has determined that the fair value of these instruments was \$208,000,000 and \$192,500,000 as of June 30, 2015 and December 31, 2014, respectively. Although the Company has determined the majority of the inputs used to value its fixed rate debt fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with its fixed rate debt utilize Level 3 inputs, such as estimates of current credit spreads. Accordingly, mortgage loans payable have been classified as Level 3 fair value measurements.

7. Related Party Transactions

Formation and Equity Transactions

The Formation Transactions were completed on April 21, 2014 through the contribution of the initial properties by Second City Capital Partners II, Limited Partnership, Second City General Partner II, Limited Partnership, Gibralt US, Inc., GCC Amberglen Investments Limited Partnership and Daniel Rapaport (collectively, the Second City Group). The Second City Group received as consideration for its contribution approximately \$19.4 million in cash in accordance with the terms of its contribution agreement to acquire various non-controlling interests and eliminate economic incentives in the initial properties. Additional payments to the Second City Group included \$4.9 million for reimbursement of IPO costs and \$1.8 million for working capital. On May 9, 2014, subsequent to the underwriters exercise of the overallotment option, the Company used the \$9.1 million of net proceeds from the underwriters exercise of the overallotment option to redeem 479,305 common units and 248,095 shares of common stock from the Second City Group.

On December 23, 2014, the underwriters of the secondary public offering exercised their overallotment option to purchase an additional 512,664 shares of the Company's common stock at the offering price of \$12.50 a share resulting in additional net proceeds to the Company of \$6.1 million after deducting underwriting discounts. The Company used the \$6.1 million of net proceeds from exercise of the overallotment option to redeem 336,195 common units and 176,469 shares of common stock from the Second City Group.

Property Management Fees

Three of the Company's properties (City Center, Central Fairwinds and AmberGlen) engaged related parties to perform asset and property management services for a fee ranging from 3.0% to 3.5% of gross revenue.

Advisory and Transaction Fees

During the three and six month period ended June 30, 2015, the Company incurred \$0.9 million and \$1.4 million, respectively, in advisory and transaction fees payable to the Advisor.

8. Future Minimum Rent Schedule

Future minimum lease payments to be received as of June 30, 2015 under noncancellable operating leases for the next five years and thereafter are as follows (in thousands):

Edgar Filing: City Office REIT, Inc. - Form 10-Q

2015	\$ 22,649
2016	38,703
2017	34,487
2018	28,091
2019	22,477
Thereafter	86,223
	\$ 232,630

Table of Contents

The above minimum lease payments to be received do not include reimbursements from tenants for certain operating expenses and real estate taxes and do not include early termination payments provided for in certain leases.

Two state government tenants currently have the exercisable right to terminate their lease if the state does not appropriate rent in its annual budgets. The Company has determined that the occurrence of the government tenant not appropriating the rent in its annual budget is a remote contingency and accordingly recognizes lease revenue on a straight-line basis over the respective lease term. These tenants represent approximately 28.50% of the Company's total future minimum lease payments as of June 30, 2015.

9. Commitments and Contingencies

Earn-Out

As part of the Formation Transactions and contribution agreement with respect to the Central Fairwinds property, the Company is obligated to make additional payments to Second City (each, an Earn-Out Payment). Earn-Out Payments are contingent on the property reaching certain specified occupancy levels through new leases to qualified tenants and exceeding a net operating income threshold, which grows annually. Second City will be entitled to receive an Earn-Out Payment (net of the associated leasing costs and inclusive of leasing commissions and tenant improvements/allowances and free rent) as and when the occupancy of Central Fairwinds reaches each of 70%, 80% and 90% (each, an Earn-Out Threshold) based on the incremental cash flow generated by new leases and a 7.75% stabilized capitalization rate. The Company will make any additional Earn-Out Payment within 30 days of the end of the Earn-Out Term based on new qualified leases entered into since the achievement of the last Earn-Out Threshold. Earn-Out Payments will be subject to a claw-back if a qualified tenant defaults in the payment of rent and is not replaced with another qualified tenant (see note 6).

As of June 30, 2015, the 70% earn-out occupancy and net operating income thresholds had been met. This triggers a payment of approximately \$3.2 million to be made in August 2015. The estimated fair value of the earn-out liability was \$8.6 million as of June 30, 2015 and \$8.0 million as of December 31, 2014. The fair value increased by \$0.6 million for the three and six months ended June 30, 2015.

Other

The Company is obligated under certain tenant leases to fund tenant improvements and the expansion of the underlying leased properties.

Under various federal, state and local laws, ordinances and regulations relating to the protection of the environment, a current or previous owner or operator of real estate may be liable for the cost of removal or remediation of certain hazardous or toxic substances disposed, stored, generated, released, manufactured or discharged from, on, at, under, or in a property. As such, the Company may be potentially liable for costs associated with any potential environmental remediation at any of its formerly or currently owned properties.

The Company believes that it is in compliance in all material respects with all federal, state and local ordinances and regulations regarding hazardous or toxic substances. Management is not aware of any environmental liability that it believes would have a material adverse impact on the Company's financial position or results of operations. Management is unaware of any instances in which the Company would incur significant environmental costs if any or all properties were sold, disposed of or abandoned. However, there can be no assurance that any such non-compliance, liability, claim or expenditure will not arise in the future.

The Company is involved from time to time in lawsuits and other disputes which arise in the ordinary course of business. As of June 30, 2015 management believes that these matters will not have a material adverse effect, individually or in the aggregate, on the Company's financial position or results of operations.

10. Stockholder's Equity

The Company issued 5,800,000 shares in the IPO resulting in net proceeds of \$63.4 million after deducting the underwriters' discount and offering expenses. The underwriters of the IPO exercised their overallotment option to purchase an additional 782,150 shares of the Company's common stock resulting in additional net proceeds of \$9.1 million after deducting underwriting discounts.

Table of Contents

On December 10, 2014, the Company completed a follow-on public offering pursuant to which the Company sold 3,750,000 shares of our common stock at a price of \$12.50 per share. The Company raised \$46.9 million in gross proceeds, resulting in net proceeds to the Company of approximately \$43.7 million after deducting approximately \$2.6 million in underwriting discounts and approximately \$0.6 million in other expenses relating to the offering. On December 23, 2014, the underwriters of the offering exercised their overallotment option to purchase an additional 512,664 shares of our common stock at the offering price of \$12.50 a share for additional gross proceeds to the Company of approximately \$6.4 million resulting in net proceeds to the Company of \$6.1 million after deducting approximately \$0.3 million in underwriting discounts. All net proceeds from the underwriters' exercise of the overallotment option were used to redeem 336,195 common units and 176,469 common stock held by the Second City Group.

Non-controlling Interests

Non-controlling interests in the Company represent common units of the Operating Partnership held by the Predecessor's prior investors. Non-controlling interests consisted of 2,903,209 Operating Partnership common units and represented an approximately 18.9% interest in the Operating Partnership as of June 30, 2015. Operating Partnership units and shares of common stock have essentially the same economic characteristics, as they share equally in the total net income or loss distributions of the Operating Partnership. Beginning on or after the date which is 12 months after the later of the completion of the initial public offering or the date on which a person first became a holder of common units, each limited partner and assignees of limited partners will have the right, subject to the terms and conditions set forth in the partnership agreement, to require the Operating Partnership to redeem all or a portion of the common units held by such limited partner or assignee in exchange for a cash amount per common unit equal to the value of one share of common stock, determined in accordance with and subject to adjustment under the partnership agreement. The Company has the sole option at its discretion to redeem the common units by issuing common stock on a one-for-one basis. The Operating Partnership unitholders are entitled to share in cash distributions from the Operating Partnership in proportion to its percentage ownership of common units.

During the three months ended June 30, 2015, 12,500 Operating Partnership units were converted to common stock.

Common Stock and Common Unit Distributions

On June 15, 2015, the Company's board of directors declared a cash dividend distribution of \$0.235 per share for the quarterly period ended June 30, 2015. The dividend was payable on July 17, 2015 to stockholders and common unitholders of record on July 3, 2015. Subsequent to June 30, 2015, \$2.9 million in dividends was paid to stockholders and \$0.7 million to common unitholders, totaling \$3.6 million.

Restricted Stock Units

The Company has an equity incentive plan (Equity Incentive Plan) for certain officers, directors, advisors and personnel, and, with approval of the board of directors, for subsidiaries, the Advisor and their respective affiliates. The Equity Incentive Plan provides for grants of restricted common stock, restricted stock units, phantom shares, stock options, dividend equivalent rights and other equity-based awards (including LTIP Units), subject to the total number of shares available for issuance under the plan. The Equity Incentive Plan is administered by the compensation committee of the board of directors (the plan administrator).

The maximum number of shares of common stock that may be issued under the Equity Incentive Plan is 1,263,580 shares. To the extent an award granted under the Equity Incentive Plan expires or terminates, the shares subject to any portion of the award that expires or terminates without having been exercised or paid, as the case may

be, will again become available for the issuance of additional awards.

Table of Contents

During the three months ended June 30, 2015, 7,966 restricted stock units (RSUs) were granted to directors and non-executive employees of the Advisor with a fair value of \$0.1 million. The awards will vest in three equal, annual installments on each of the first three anniversaries of the date of grant. For the three months ended June 30, 2015, 125,620 RSUs vested and the Company recognized net compensation expense of \$0.5 million related to the RSUs.

A RSU award represents the right to receive shares of the Company s common stock in the future, after the applicable vesting criteria, determined by the plan administrator, has been satisfied. The holder of an award of RSU has no rights as a stockholder until shares of common stock are issued in settlement of vested RSUs. The plan administrator may provide for a grant of dividend equivalent rights in connection with the grant of RSU; provided, however, that if the RSUs do not vest solely upon satisfaction of continued employment or service, any payment in respect to the related dividend equivalent rights will be held by the Company and paid when, and only to the extent that, the related RSU vest.

11. Subsequent Events

On July 29, 2015, the Company, through the Operating Partnership, entered into an Agreement of Purchase and Sale to acquire a property in Dallas, Texas for \$54.4 million.

Overview

Company

We were formed as a Maryland corporation on November 26, 2013. On April 21, 2014, we completed our initial public offering (IPO) of shares of common stock. We contributed the net proceeds of the IPO to our Operating Partnership in exchange for common units in our Operating Partnership. Both we and our Operating Partnership commenced operations upon completion of the IPO and certain related formation transactions (the Formation Transactions).

Upon completion of the Formation Transactions we entered into the Advisory Agreement with our Advisor pursuant to which the Advisor will provide management and advisory services to us. The Advisory Agreement requires our Advisor to manage our business affairs in conformity with policies and investment guidelines that are approved and monitored by our board of directors.

Our interest in our Operating Partnership entitles us to share in distributions from, and allocations of profits and losses of, our Operating Partnership in proportion to our percentage ownership of common units. As the sole general partner of our Operating Partnership, we have the exclusive power under the partnership agreement to manage and conduct our Operating Partnership's business, subject to limited approval and voting rights of the limited partners.

On April 21, 2014, we closed the IPO, pursuant to which we sold 5,800,000 shares of common stock to the public at a public offering price of \$12.50 per share. We raised \$72.5 million in gross proceeds, resulting in net proceeds to us of approximately \$63.4 million after deducting approximately \$5.1 million in underwriting discounts and approximately \$4.0 million in other expenses relating to the IPO. On May 9, 2014, the underwriters of the IPO partially exercised their overallotment option with respect to an additional 782,150 shares of our common stock at the IPO price of \$12.50 a share resulting in additional gross proceeds of approximately \$9.8 million. The net proceeds to us were \$9.1 million after deducting approximately \$0.7 million in underwriting discounts. Our common stock began trading on the NYSE under the symbol CIO on April 15, 2014.

Pursuant to the Formation Transactions and exercise of the underwriters' over-allotment option, our Operating Partnership acquired a 100% interest in each of the Washington Group Plaza, Cherry Creek and Corporate Parkway properties and acquired an approximate 76% economic interest in the AmberGlen property, 90% interest in the Central Fairwinds property and 95% interest in the City Center property. These initial property interests were contributed in exchange for 3,731,209 common units, 1,858,860 shares of our common stock and \$19.4 million of cash. On May 9, 2014, we used all of the net proceeds from the exercise of the underwriters' over-allotment option to redeem 479,305 common units and 248,095 common stock from the Second City Group for \$9.1 million in cash.

On December 10, 2014, we completed a public offering pursuant to which we sold 3,750,000 of our common stock to the public at a price of \$12.50 per share. We raised \$46.9 million in gross proceeds, resulting in net proceeds to us of approximately \$43.7 million after deducting approximately \$2.6 million in underwriting discounts and approximately \$0.6 million in other expenses relating to the offering. On December 23, 2014, the underwriters of the offering exercised their overallotment option to purchase an additional 512,664 shares of our common stock at the offering price of \$12.50 a share resulting in additional gross proceeds to us of approximately \$6.4 million resulting in net proceeds to us of \$6.1 million after deducting approximately \$0.3 million in underwriting discounts. We used all of

the net proceeds from the exercise of the underwriters' overallotment option to redeem 336,195 common units and 176,469 common stock from the Second City Group for \$6.1 million cash.

Table of Contents

We intend to elect to be taxed and to continue to operate in a manner that will allow us to qualify as a REIT commencing with our taxable year ended December 31, 2014. So long as we qualify as a REIT, we will be permitted to deduct distributions paid to our stockholders, eliminating the U.S. federal taxation of income represented by such distributions at the company level. REITs are subject to a number of organizational and operational requirements. If we fail to qualify as a REIT in any taxable year, we will be subject to U.S. federal income tax (including any applicable alternative minimum tax) on our taxable income at regular corporate tax rates.

Indebtedness

In connection with the IPO and the related Formation Transactions, we repaid in full the mortgage loan secured by the Central Fairwinds property and completed a mortgage refinancing of three properties (Cherry Creek, City Center and Corporate Parkway) with a new \$95 million non-recourse mortgage loan and proceeds from the IPO. On April 29, 2014, we completed a \$25.4 million mortgage refinancing of the AmberGlen property. Following the Formation Transactions, the Washington Group Plaza property remained subject to the existing mortgage loan.

For additional information regarding these mortgage loans and the Secured Credit Facility, please refer to *Liquidity and Capital Resources* below.

Revenue Base

As of June 30, 2015, we owned 12 properties comprised of 25 office buildings with a total of approximately 2.7 million square feet of net rentable area (NRA). As of June 30, 2015, our properties were approximately 94% leased.

Office Leases

Historically, most leases for our properties were on a full-service gross or net lease basis, and we expect to continue to use such leases in the future. A full-service gross lease generally has a base year expense stop, whereby we pay a stated amount of expenses as part of the rent payment while future increases (above the base year stop) in property operating expenses are billed to the tenant based on such tenant's proportionate square footage in the property. The property operating expenses are reflected in operating expenses; however, only the increased property operating expenses above the base year stop recovered from tenants are reflected as tenant recoveries in our statements of operations. In a net lease, the tenant is typically responsible for all property taxes and operating expenses. As such, the base rent payment does not include any operating expenses, but rather all such expenses are billed to or paid by the tenant. The full amount of the expenses for this lease type is reflected in operating expenses, and the reimbursement is reflected in tenant recoveries. The tenants in the Corporate Parkway property and the Lake Vista Pointe property have net leases. We are also a lessor for a fee simple ground lease at the AmberGlen property. All of our remaining leases are full-service gross leases.

Interest Rate Contracts

As of June 30, 2015, we did not have any interest rate contracts.

Factors That May Influence Our Operating Results and Financial Condition

Business and Strategy

We focus on owning and acquiring office properties in our target markets. Our target markets generally possess what we believe are favorable economic growth trends, growing populations with above-average employment growth forecasts, a large number of government offices, large international, national and regional employers across diversified industries, are generally low-cost centers for business operations, and exhibit favorable occupancy trends. We utilize our Advisor's market-specific knowledge and relationships as well as the expertise of local real estate operators and our investment partners to identify acquisition opportunities that we believe will offer cash flow stability and long-term value appreciation. Our target markets are attractive, among other reasons, because we believe that ownership is often concentrated among local real estate operators that typically do not benefit from the same access to capital as public REITs and there is a relatively low level of participation of large institutional investors. We believe that these factors result in attractive pricing levels and risk-adjusted returns.

Rental Revenue and Tenant Recoveries

The amount of net rental revenue generated by our properties will depend principally on our ability to maintain the occupancy rates of currently leased space and to lease currently available space and space that becomes available from lease terminations. As of June 30, 2015, our properties were approximately 94% leased. The amount of rental revenue generated also depends on our ability to maintain or increase rental rates at our properties. We believe that the average rental rates for our portfolio of properties are generally in-line or slightly below the current average quoted market rates. Negative trends in one or more of these factors could adversely affect our rental revenue in future periods. Future economic downturns or regional downturns affecting our markets or submarkets or downturns in our tenants industries that impair our ability to renew or re-let space and the ability of our tenants to fulfill their lease commitments, as in the case of tenant bankruptcies, could adversely affect our ability to maintain or increase rental rates at our properties. In addition, growth in rental revenue will also partially depend on our ability to acquire additional properties that meet our investment criteria.

Operating Expenses

Our operating expenses generally consist of utilities, property and ad valorem taxes, insurance and site maintenance costs. Increases in these expenses over tenants' base years (until the base year is reset at expiration) are generally passed along to tenants in our full-service gross leased properties and are generally paid in full by tenants in our net leased properties.

Conditions in Our Markets

Positive or negative changes in economic or other conditions in the markets we operate in, including state budgetary shortfalls, employment rates, natural hazards and other factors, may impact our overall performance.

Table of Contents**Liquidity and Capital Resources***Analysis of Liquidity and Capital Resources*

We had approximately \$11.3 million of cash and cash equivalents and \$10.1 million of restricted cash as of June 30, 2015. In addition, we had drawn \$35 million from the Revolving Credit Facility. On July 14, 2015, the authorized borrowing capacity increased from \$35 million to \$75 million.

Our short-term liquidity requirements primarily consist of operating expenses and other expenditures associated with our properties, distributions to our limited partners and distributions to our stockholders required to qualify for REIT status, capital expenditures and, potentially, acquisitions. We expect to meet our short-term liquidity requirements through net cash provided by operations, reserves established from existing cash and borrowings under our Secured Credit Facility.

Our long-term liquidity needs consist primarily of funds necessary for the repayment of debt at maturity, property acquisitions and non-recurring capital improvements. We expect to meet our long-term liquidity requirements with net cash from operations, long-term secured and unsecured indebtedness and the issuance of equity and debt securities. We also may fund property acquisitions and non-recurring capital improvements using our Secured Credit Facility pending longer term financing.

We believe we have access to multiple sources of capital to fund our long-term liquidity requirements, including the incurrence of additional debt and the issuance of additional equity securities. However, we cannot assure you that this is or will continue to be the case. Our ability to incur additional debt is dependent on a number of factors, including our degree of leverage, the value of our unencumbered assets and borrowing restrictions that may be imposed by lenders. Our ability to access the equity capital markets is dependent on a number of factors as well, including general market conditions for REITs and market perceptions about us.

Off-Balance Sheet Arrangements

As of June 30, 2015, we did not have any off-balance sheet arrangements.

Inflation

Substantially all of our office leases provide for real estate tax and operating expense escalations. In addition, most of the leases provide for fixed annual rent increases. We believe that inflationary increases may be at least partially offset by these contractual rent increases and expense escalations.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Our future income, cash flows and fair values relevant to financial instruments are dependent upon prevailing market interest rates. Market risk refers to the risk of loss from adverse changes in market prices and interest rates. We have used, and will use, derivative financial instruments to manage or hedge interest rate risks related to borrowings. We do not use derivatives for trading or speculative purposes and only enter into contracts with major financial institutions based upon their credit rating and other factors. We have entered, and we will only enter into, contracts with major financial institutions based on their credit rating and other factors. As of June 30, 2015 and December 31, 2014, our Company did not have any outstanding derivatives.

As of June 30, 2015, approximately \$206.4 million, or 85.6%, of our debt had fixed interest rates and approximately \$34.7 million, or 14.4%, had variable interest rates. The variable rate indebtedness relates to borrowings under the

Secured Credit Facility.

The variable rate component of our consolidated indebtedness is LIBOR-based. Assuming no increase in the amount of our variable rate debt as of June 30, 2015, if LIBOR were to increase by 100 basis points, the increase in interest expense on our variable rate debt would decrease our future earnings and cash flows by approximately \$0.4 million annually. If LIBOR were to decrease by 100 basis points, interest expense on our variable rate debt would decrease by approximately \$0.4 million annually.

Table of Contents

The primary market risk to which we are exposed is interest rate risk. Our primary interest rate exposure is LIBOR. We primarily use fixed interest rate financing to manage our exposure to fluctuations in interest rates.

Item 4. Controls and Procedures

We maintain disclosure controls and procedures (as such term is defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)), that are designed to ensure that information required to be disclosed in our reports under the Exchange Act is processed, recorded, summarized and reported within the time periods specified in the rules and regulations of the SEC and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

We have carried out an evaluation, under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, regarding the effectiveness of our disclosure controls and procedures as of June 30, 2015, the end of the period covered by this report. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer have concluded, as of June 30, 2015, that our disclosure controls and procedures were effective in ensuring that information required to be disclosed by us in reports filed or submitted under the Exchange Act (i) is processed, recorded, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate to allow for timely decisions regarding required disclosure.

No changes to our internal control over financial reporting were identified in connection with the evaluation referenced above that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

This quarterly report does not include a report of management's assessment regarding internal control over financial reporting or an attestation report of the Company's registered public accounting firm due to a transition period established by the rules of the Securities and Exchange Commission for newly public companies.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

We and our subsidiaries are, from time to time, parties to litigation arising from the ordinary course of their business. Our management does not believe that any such litigation will materially affect our financial position or operations.

Item 1A. Risk Factors

A covenant in our Amended and Restated Credit Agreement may cause us to fail to qualify as a REIT.

In order to maintain our qualification as a REIT, we are generally required under the Internal Revenue Code of 1986, as amended, to distribute annually at least 90% of our net taxable income, determined without regard to the dividends paid deduction and excluding any net capital gain. In addition, we will be subject to income tax at regular corporate rates to the extent that we distribute less than 100% of our net taxable income, including any net capital gains. Under our Amended and Restated Credit Agreement, we are generally prohibited from making distributions in excess of 100% of Core Funds From Operations, as defined in the Amended and Restated Credit Agreement. If Core Funds From Operations is less than 90% of our net taxable income, we will not be able to make sufficient distributions to maintain our REIT status. In addition, if Core Funds From Operations are greater than 90% of our net taxable income but less than 100% of our net taxable income, we will be required to pay income tax at regular corporate rates on any net taxable income we are prohibited from distributing as a result of this covenant. Furthermore, if we fail to distribute at least the sum of 85% of our REIT ordinary income for the year, 95% of our REIT capital gain for the year and any undistributed taxable income from prior years, we will incur a 4% nondeductible excise tax on the excess of such required distribution over the amount we actually distribute.
