In preparing its consolidated financial information, ORIX Corporation (the Company) and its subsidiaries have complied with generally accepted accounting principles in the United States of America.

These documents may contain forward-looking statements about expected future events and financial results that involve risks and uncertainties. Such statements are based on our current expectations and are subject to uncertainties and risks that could cause actual results to differ materially from those described in the forward-looking statements. Factors that could cause such a difference include, but are not limited to, those described under Risk Factors in the Company's annual report on Form 20-F filed with the United States Securities and Exchange Commission.

The Company believes that it may have been a passive foreign investment company for U.S. federal income tax purposes in the year to which these consolidated financial results relate by reason of the composition of its assets and the nature of its income. In addition, the Company may be a PFIC for the foreseeable future. Assuming that the Company is a PFIC, a U.S. holder of the shares or ADSs of the Company will be subject to special rules generally intended to eliminate any benefits from the deferral of U.S. federal income tax that a holder could derive from investing in a foreign corporation that does not distribute all of its earnings on a current basis. Investors should consult their tax advisors with respect to such rules, which are summarized in the Company's annual report.

The U.S. economy has continued to recover with improvements in employment and income environment; other regions have also experienced moderate recovery. Although interest rates remain low worldwide, the scaling back of quantitative easing policies are likely in advanced nations. The asset management industry is expected to increase assets under management due to the increase in pension assets and the high-income class population over the mid- and long-term. The aviation industry is expected to continue to expand its market size against the backdrop of increasing passenger demand mainly in emerging countries. In addition, there are political and geopolitical tensions in certain regions that need to be monitored carefully.
