1.

DESCRIPTION OF BUSINESS AND BUSINESS COMBINATION

Tianjin Zhongjin Biology Development Co., Ltd. ("TZBD") was founded in the People's Republic of China on February 10, 2003. TZBD is located in the Tianjin Economic and Technological Development Zone in the People's Republic of China. The business license of TZBD was issued by Tianjin Industrial and Commercial Administration on February 10, 2003. The operating period of the business license is from February 10, 2003 to February 9, 2053. TZBD is primarily engaged in production and sales of Reconstituted Bone Xenograft ("RBX") in the People's Republic of China. All of the customers are hospitals in People's Republic of China. Marketing is either through distributors or through TZBD's sales offices in various cities in China.

On June 17, 2004, TZBD consummated a share purchase agreement with KS E-Media Holdings, Inc. ("KSE"), a Delaware corporation, under which TZBD shareholders sold 100% undivided interest in TZBD to KSE, in exchange for 3,658,375 shares of KSE. As a part of the agreement, KSE cancelled 2,212,500 shares of its issued and outstanding stock owned by its former president. Within ten (10) days from the Closing Date, KS E-Media effectuated a four-for-one forward split of the KS E-Media Common Shares by way of stock dividend. On June 17, 2004, KSE was renamed Genex Pharmaceutical, Inc.

KSE was incorporated in the State of Delaware on February 28, 2002. Through June 17, 2004, KSE was considered a development stage company as defined by Statement of Financial Accounting Standard ("SFAS") No. 7, "Accounting and Reporting by Development Stage Enterprises". KSE was a start-up stage Internet based fulfillment company based in Vancouver, BC, Canada. KSE filed a SB-2 Registration Statement with the United States Securities and Exchange Commission ("SEC") on December 23, 2002 that was declared effective May 7, 2003.

According to the terms of the share exchange agreement, control of the combined companies (the "Company") passed to the former shareholders of TZBD. This type of share exchange has been treated as a capital transaction accompanied by recapitalization of TZBD in substance, rather than a business combination, and is deemed a "reverse acquisition" for accounting purposes.

CHANGE IN REGISTRATION LOCATION:

The Company changed its registration location from Tianjin economic and technological development district to Tianjin Xiqing economic development district. The change in registration took place on March 5, 2004.

2. BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements at and for the six months period ended June 30, 2005 include the accounts of TZBD and its parent company, KSE (legal acquirer), from the date of acquisition. The historical financial statements prior to the date of recapitalization include the accounts of TZBD only. All significant inter-company accounts and transactions have been eliminated in consolidation.

The accompanying unaudited financial statements of the Company have been prepared in accordance with generally accepted accounting principles for interim financial information. Accordingly, they do not include all of the information required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the interim periods are not necessarily indicative of the results for any future period. These statements should be read in conjunction with the Company's audited financial statements and notes thereto for the fiscal year ended December 31, 2004.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the amount of revenues and expenses during the reporting period. Management makes these estimates using the best information available at the time the estimates are made. However, actual results could differ materially from those results.

Accounts receivable and allowance for doubtful accounts

The Company uses the allowance method to account for uncollectible accounts receivable. The Company periodically adjusts the allowance for doubtful accounts based on management's continuing review of accounts receivable. This analysis by management is based on the composition of accounts receivable, analysis of historical bad debts, customer concentrations, customer credit worthiness, an analysis of current economic and business trends as well as changes in customer payment patterns. Terms of the sales vary from COD through a credit term up to 6 to 9 months.

The Company records a full allowance for accounts receivable that have been determined legally to be uncollectible. For accounts receivable that have been outstanding for over 180 days, the Company determines an appropriate allowance based on individual circumstances.

As of June 30, 2005, there is a general allowance of \$28,551 for doubtful and long overdue accounts.

Income taxes

The Company accounts for income tax using Statements of Financial Accounting Standards ("SFAS") No. 109 "Accounting for Income Taxes". SFAS No. 109 requires an asset and liability approach for financial accounting and reporting for income taxes and allows recognition and measurement of deferred tax assets based upon the likelihood of realization of tax benefits in future years. Under the asset and liability approach, deferred taxes are provided for the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. A valuation allowance is provided for deferred tax assets if it is more likely than not that these items will either expire before the Company is able to realize their benefits, or that future deductibility is uncertain. No provision for deferred taxation has been made, as there are no temporary differences at the balance sheet date.

According to the Provisional Regulations of the People's Republic of China on Income Tax, the document of Reductions and Exemptions of Income Tax for the Company has been approved by the local tax bureau and the Management Regulation of Tianjin Economic and Technological Development Zone. The Company is exempted from income tax in its first two years of operations from June 2003 to May 2005. The Company's subsidiary will be subject to Enterprise Income Tax in the PRC at a rate of 33% on net income upon the expiry of the tax holiday. However, the local tax bureau has continued to exempt TZBD from Enterprise Income Tax though no official notice has been issued. Management considered that the Company would be liable to pay Enterprise Income Tax of \$22,912 approximately if there is no tax exemption granted to the Company's subsidiary.

Foreign currency translation

Assets and liabilities in foreign currency at the balance sheet date are translated at the exchange rate prevailing at that date. Revenue and expenses are translated at the average exchange rate, which approximates the actual rate prevailing on the date of the transaction. Transaction gains and losses are reflected in the income statement. Gains and losses arising from translation of foreign currency financial statements are reflected as a component of the equity section of the balance sheet. Such items, along with net income, are components of comprehensive income. The functional currency of the Company is the Chinese Renminbi. The unit of Renminbi is in Yuan. Translation gains and losses were insignificant for the six months periods ended June 30, 2005 and 2004.

On July 22, 2005, the PRC government revalued Renminbi and announced a change in its currency policy to allow Renminbi to float against a basket of currencies. However, it does not imply free convertibility of Renminbi to other foreign currencies. All foreign exchange transactions continue to take place either through the Bank of China or other banks authorized to buy and sell foreign currencies at the exchange rate quoted by the People's Bank of China. Approval of foreign currency payments by the Bank of China or other institutions require submitting a payment application form together with invoices, shipping documents and signed contracts.

Revenue recognition

The Company's revenue recognition policies are in compliance with Staff Accounting Bulletin (SAB) 104. Revenue is recognized at the date of shipment to customers when a formal arrangement exists, the price is fixed or determinable, the delivery is completed, no other significant obligations of the Company exist and collectibility is reasonably assured. Payments received before all of the relevant criteria for revenue recognition are met as unearned revenue.

Stock based compensation

In October 1995, the FASB issued FFAS No. 123, "Accounting for Stock-Based Compensation". SFAS No. 123 prescribes accounting and reporting standards for all stock-based compensation plans, including employee stock options, restricted stock, employee stock purchase plans and stock appreciation rights. SFAS No. 123 requires compensation expense to be recorded (i) using the new fair value method or (ii) using the existing accounting rules prescribed by Accounting Principles Board Opinion No. 25, "Accounting for stock issued to employees" (APB25) and related interpretations with proforma disclosure of what net income and earnings per share would have been had we adopted the new fair value method. Through June 30, 2005, the Company has not granted any stock options.

Recent accounting pronouncements

In December 2004, the FASB issued FASB Statement No. 123R, "Share-Based Payment, an Amendment of FASB Statement No. 123" ("FAS No. 123R"). FAS No. 123R requires companies to recognize in the statement of operations the grant-date fair value of stock options and other equity-based compensation issued to employees. FAS No. 123R is effective beginning in the Company's second quarter of fiscal 2006. The Company believes that the adoption of this standard will have no material impact on its financial statements.

In December 2004, the FASB issued SFAS Statement No. 153, "Exchanges of Non-monetary Assets." The Statement is an amendment of APB Opinion No. 29 to eliminate the exception for non-monetary exchanges of similar productive assets and replaces it with a general exception for exchanges of non-monetary assets that do not have commercial substance. The Company believes that the adoption of this standard will have no material impact on its financial statements.

In May 2005, the FASB issued FASB Statement No. 154, "Accounting Changes and Error Corrections - a replacement of APB Opinion No. 20 and FASB Statement No. 3". This statement replaces APB Opinion No. 20, "Accounting Changes", and FASB Statement No. 3, "Reporting Accounting Changes in Interim Financial Statements", and changes the requirements for the accounting for and reporting of a change in accounting principle. This statement applies to all voluntary changes in accounting principle. It also applies to changes required by an accounting pronouncement in the unusual instance that the pronouncement does not include specific transition provisions. This statement is effective for accounting changes and correction of errors made in fiscal years beginning after December 15, 2005. Management believes the adoption of this pronouncement will not have a material effect on our consolidated financial statements.

This is primarily due to the increases in audit fees of \$8,791, professional fees of \$10,000 and depreciation expenses of \$759 for the three months period ended June 30, 2005.

The gross profit margin for sales of products alone was 88.41% for the six months ended June 30, 2004. EXCHANGE RATE

Fluctuations of currency exchange rates between Renminbi and United States dollar could adversely affect our business since we conduct our business primarily in the PRC, and the sale of our products to corporations in the PRC are settled in Renminbi. The Chinese government controls its foreign reserves through restrictions on imports and conversion of Renminbi into foreign currency. Although the Renminbi to United States dollar exchange rate has been stable since January 1, 1994 and the Chinese government has stated its intention to maintain the stability of the value of Renminbi, there can be no assurance that exchange rates will remain stable. On July 22, 2005, the Chinese government revalued Renminbi and announced a change in its currency policy to allow Renminbi to float against a basket of currencies. However, it does not imply free convertibility of Renminbi to other foreign currencies. The Renminbi could appreciate against the United States dollar. Exchange rate fluctuations may adversely affect our revenue arising from the sales of products in the PRC and denominated in Renminbi and our financial performance when measured in United States dollar.

RECENT ACCOUNTING PRONOUNCEMENTS

In November 2004, the Financial Accounting Standards Board ("FASB") issued SFAS No. 151, Inventory Costs - an amendment of ARB No. 43, Chapter 4. This Statement amends the guidance in ARB No. 43, Chapter 4, "Inventory Pricing," to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs, and wasted material (spoilage). Paragraph 5 of ARB 43, Chapter 4, previously stated that "under some circumstances, items such as idle facility expense, excessive spoilage, double freight, and rehandling costs may be so abnormal as to require treatment as current period charges". This Statement requires that those items be recognized as current-period charges regardless of whether they meet the criterion of "so abnormal". In addition, this Statement requires that allocation of fixed production overheads to the costs of conversion be based on the normal capacity of the production facilities. This Statement is effective for inventory costs incurred during fiscal years beginning after June 15, 2005. Management does not believe the adoption of this Statement will have any immediate material impact on the Company.

On December 16, 2004, the FASB published Statement of Financial Accounting Standards No. 123 (Revised 2004), "Share-Based Payment" ("SFAS 123R"). SFAS No. 123R requires that compensation cost related to share-based payment transactions be recognized in the financial statements. Share-based payment transactions within the scope of SFAS No. 123R include stock options, restricted stock plans, performance-based awards, stock appreciation rights, and employee share purchase plans. The provisions of SFAS No. 123R are effective as of the first interim period that begins after June 15, 2005. Accordingly, the Company will implement the revised standard in the third quarter of fiscal year 2005. Currently, the Company accounts for its share-based payment transactions under the provisions of APB 25, which does not necessarily require the recognition of compensation cost in the financial statements. Management does not anticipate that the implementation of this standard will have a material impact on the Company's consolidated financial statements.

On December 16, 2004, FASB issued Statement of Financial Accounting Standards No. 153, Exchanges of Nonmonetary Assets, an amendment of APB Opinion No. 29, Accounting for Nonmonetary Transactions ("SFAS No. 153"). This statement amends APB Opinion 29 to eliminate the exception for nonmonetary exchanges of similar productive assets and replaces it with a general exception for exchanges of nonmonetary assets that do not have commercial substance. Under SFAS No. 153, if a nonmonetary exchange of similar productive assets meets a commercial-substance criterion and fair value is determinable, the transaction must be accounted for at fair value resulting in recognition of any gain or loss. SFAS No. 153 is effective for nonmonetary transactions in fiscal periods that begin after June 15, 2005. The Company does not anticipate that the implementation of this standard will have a material impact on its financial position, results of operations or cash flows.

In March 2005, the FASB issued Interpretation No. ("FIN") 47, "Accounting for Conditional Asset Retirement Obligations - an interpretation of FASB Statement No. 143". FIN 47 clarifies that SFAS No. 143, "Accounting for Asset Retirement Obligations," requires that an entity recognize a liability for the fair value of a conditional asset retirement obligation when incurred if the liability's fair value can be reasonably estimated. FIN 47 is effective no later than the end of fiscal years ending after December 15, 2005. The Company does not expect the adoption of FIN 47 to have a material impact on its results of operations or financial position.
