**SOUTHERN FIRST BANCSHARES, INC. AND SUBSIDIARY  
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS**

**NOTE 1 Nature of Business and Basis of Presentation**

*Business Activity*

**Southern First Bancshares, Inc.** (the "Company") is a South Carolina corporation that owns all of the capital stock of Southern First Bank (the "Bank") and all of the stock of Greenville First Statutory Trust I and II (collectively, the "Trusts"). The Trusts are special purpose non-consolidated entities organized for the sole purpose of issuing trust preferred securities. The Bank's primary federal regulator is the Federal Deposit Insurance Corporation (the "FDIC"). The Bank is also regulated and examined by the South Carolina Board of Financial Institutions. The Bank is primarily engaged in the business of accepting demand deposits and savings deposits insured by the FDIC, and providing commercial, consumer and mortgage loans to the general public.

*Basis of Presentation*

The accompanying consolidated financial statements have been prepared in accordance with generally accepted accounting principles ( GAAP ) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and nine month periods ended September 30, 2015 are not necessarily indicative of the results that may be expected for the year ending December 31, 2015. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014 as filed with the Securities and Exchange Commission on March 3, 2015. The consolidated financial statements include the accounts of the Company and the Bank. In accordance with Financial Accounting Standards Board ( FASB ) Accounting Standards Codification ( ASC ) 810, Consolidation, the financial statements related to the Trusts have not been consolidated.

*Use of Estimates*

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the consolidated financial statements and the reported amount of income and expenses during the reporting periods. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, real estate acquired in the settlement of loans, fair value of financial instruments, evaluating other-than-temporary-impairment of investment securities and valuation of deferred tax assets.

*Reclassifications*

Certain amounts, previously reported, have been reclassified to state all periods on a comparable basis and had no effect on shareholders' equity or net income.

*Subsequent Events*

Subsequent events are events or transactions that occur after the balance sheet date but before financial statements are issued. Recognized subsequent events are events or transactions that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing financial statements. Non-recognized subsequent events are events that provide evidence about conditions that did not exist at the date of the balance sheet but arose after that date. Management performed an evaluation to determine whether there have been any subsequent events since the balance sheet date and determined that no subsequent events occurred requiring accrual or disclosure.

**Table of Contents****NOTE 2 Preferred and Common Stock**

On November 12, 2014, the Company issued 1,380,000 shares of its common stock in a public offering at \$14.40 per share, including 180,000 shares which were sold to the underwriter pursuant to an option to purchase additional shares to cover any over-allotments. The net proceeds from the offering totaled approximately \$18.4 million, after deducting the underwriting discount as well as estimated offering expenses.

Using proceeds from the public offering, on December 12, 2014, the Company completed the repurchase of the remaining 11,242 shares of Series T preferred stock outstanding at \$1,000 par value from third party investors who purchased the shares in July 2012 through a Dutch auction conducted by the U.S. Treasury. As of December 31, 2014, the Company has no shares of preferred stock outstanding.

**NOTE 3 Investment Securities**

The amortized costs and fair value of investment securities are as follows:

| Total investment securities available for sale | \$ 54,566      | 948               | 490    | 55,024     |

During the first quarter of 2015, the Company sold \$5.8 million of its mortgage-backed securities and state and municipal obligations and recorded a net gain on sale of investment securities of \$259,000. During the second quarter of 2015, the Company sold and subsequently reinvested \$4.3 million of investment securities, recording a gain of \$36,000 from the transaction.

Contractual maturities and yields on the Company's investment securities at September 30, 2015 and December 31, 2014 are shown in the following table. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

| (dollars in thousands)           | Less than one year |       | One to five years |       | Five to ten years |       | Over ten years |       | September 30, 2015 |       |

At September 30, 2015, the Company had 15 individual investments with a fair market value of \$19.1 million that were in an unrealized loss position for less than 12 months and six individual investments with a fair market value of \$7.2 million that were in an unrealized loss position for 12 months or longer. The unrealized losses were primarily attributable to changes in interest rates, rather than deterioration in credit quality. The individual securities are each investment grade securities. The Company considers the length of time and extent to which the fair value of available-for-sale debt securities have been less than cost to conclude that such securities are not other-than-temporarily impaired. The Company also considers other factors such as the financial condition of the issuer including credit ratings and specific events affecting the operations of the issuer, volatility of the security, underlying assets that collateralize the debt security, and other industry and macroeconomic conditions. As the Company has no intent to sell securities with unrealized losses and it is not more-likely-than-not that the Company will be required to sell these securities before recovery of amortized cost, the Company has concluded that these securities are not impaired on an other-than-temporary basis.

**Table of Contents**

Other investments are comprised of the following and are recorded at cost which approximates fair value.

| (dollars in thousands)                   | September 30, 2015 | December 31, 2014 |
|--|--------------------|-------------------|
| Federal Home Loan Bank stock             | \$ 5,005           | 6,020             |
| Investment in Trust Preferred securities | 403                | 403               |
| Other investments                        | 124                | 99                |
| Total other investments                  | \$ 5,532           | 6,522             |

The Company has evaluated the Federal Home Loan Bank ( FHLB ) stock for impairment and determined that the investment in the FHLB stock is not other than temporarily impaired as of September 30, 2015 and ultimate recoverability of the par value of this investment is probable. All of the FHLB stock is used to collateralize advances with the FHLB.

At September 30, 2015, \$21.0 million of securities were pledged as collateral for repurchase agreements from brokers, and approximately \$11.2 million of securities were pledged to secure client deposits. At December 31, 2014, \$21.8 million of securities were pledged as collateral for repurchase agreements from brokers, and approximately \$12.9 million of securities were pledged to secure client deposits.

**NOTE 4 Loans and Allowance for Loan Losses**

The following table summarizes the composition of our loan portfolio. Total gross loans are recorded net of deferred loan fees and costs, which totaled \$1.8 million as of September 30, 2015 and December 31, 2014.

| Total loans, net                        | \$ 979,865         |            | \$ 859,694        |            |

*Maturities and Sensitivity of Loans to Changes in Interest Rates*

The information in the following tables summarizes the loan maturity distribution by type and related interest rate characteristics based on the contractual maturities of individual loans, including loans which may be subject to renewal at their contractual maturity. Renewal of such loans is subject to review and credit approval, as well as modification of terms upon maturity. Actual repayments of loans may differ from the maturities reflected below, because borrowers have the right to prepay obligations with or without prepayment penalties.

**Portfolio Segment Methodology***Commercial*

Commercial loans are assessed for estimated losses by grading each loan using various risk factors identified through periodic reviews. The Company applies historic grade-specific loss factors to each loan class. In the development of statistically derived loan grade loss factors, the Company observes historical losses over 20 quarters for each loan grade. These loss estimates are adjusted as appropriate based on additional analysis of external loss data or other risks identified from current economic conditions and credit quality trends. The allowance also includes an amount for the estimated impairment on nonaccrual commercial loans and commercial loans modified in a troubled debt restructuring ( TDR ), whether on accrual or nonaccrual status.

**Table of Contents***Consumer*

For consumer loans, the Company determines the allowance on a collective basis utilizing historical losses over 20 quarters to represent its best estimate of inherent loss. The Company pools loans, generally by loan class with similar risk characteristics. The allowance also includes an amount for the estimated impairment on nonaccrual consumer loans and consumer loans modified in a TDR, whether on accrual or nonaccrual status.

During the third quarter of 2015, the Company began using 20 quarters to measure historical losses rather than a 12 quarter period as used in the past. The Company believes that the longer period used to determine historical losses for both its commercial and consumer loans captures a longer economic cycle, including periods of economic uncertainty which are unlike those the Company has experienced in the past three years. The Company also believes that using 20 quarters to measure historical losses is more indicative of the losses and risks inherent in the portfolio.

**Credit Quality Indicators***Commercial*

The Company manages a consistent process for assessing commercial loan credit quality by monitoring its loan grading trends and past due statistics. All loans are subject to individual risk assessment. The Company's risk categories include Pass, Special Mention, Substandard, and Doubtful, each of which is defined by banking regulatory agencies. Delinquency statistics are also an important indicator of credit quality in the establishment of the Company's allowance for credit losses.

The Company categorizes its loans into risk categories based on relevant information about the ability of the borrower to service their debt such as current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. A description of the general characteristics of the risk grades is as follows:

**Pass** These loans range from minimal credit risk to average however still acceptable credit risk.

**Special mention** A special mention loan has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or the institution's credit position at some future date.

**Substandard** A substandard loan is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified must have a well-defined weakness, or weaknesses, that may jeopardize the liquidation of the debt. A substandard loan is characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected.

**Doubtful** A doubtful loan has all of the weaknesses inherent in one classified as substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of the currently existing facts, conditions and values, highly questionable and improbable.

The tables below provide a breakdown of outstanding commercial loans by risk category.

|                        | September 30, 2015   |                          |              |          |         |

As of September 30, 2015 and December 31, 2014, loans 30 days or more past due represented 0.66% and 0.73% of the Company's total loan portfolio, respectively. Commercial loans 30 days or more past due were 0.57% and 0.64% of the Company's total loan portfolio as of September 30, 2015 and December 31, 2014, respectively.

**Consumer**

The Company manages a consistent process for assessing consumer loan credit quality by monitoring its loan grading trends and past due statistics. All loans are subject to individual risk assessment. The Company's categories include Pass, Special Mention, Substandard, and Doubtful, which are defined above. Delinquency statistics are also an important indicator of credit quality in the establishment of the allowance for loan losses.

The tables below provide a breakdown of outstanding consumer loans by risk category.

|                        | September 30, 2015 |             |              |        |         |

|                      | \$ 146,859        | 95,629      | 39,226       | 14,250 | 295,964 |

As of September 30, 2015 and December 31, 2014, consumer loans 30 days or more past due were 0.09% of total loans.

**Nonperforming assets**

The following table shows the nonperforming assets and the related percentage of nonperforming assets to total assets and gross loans. Generally, a loan is placed on nonaccrual status when it becomes 90 days past due as to principal or interest, or when the Company believes, after considering economic and business conditions and collection efforts, that the borrower's financial condition is such that collection of the contractual principal or interest on the loan is doubtful. A payment of interest on a loan that is classified as nonaccrual is recognized as a reduction in principal when received.

**Table of Contents**

Following is a summary of our nonperforming assets, including nonaccruing TDRs.

**Impaired Loans**

The table below summarizes key information for impaired loans. The Company's impaired loans include loans on nonaccrual status and loans modified in a TDR, whether on accrual or nonaccrual status. These impaired loans may have estimated impairment which is included in the allowance for loan losses. The Company's commercial and consumer impaired loans are evaluated individually to determine the related allowance for loan losses.

**Allowance for Loan Losses**

The allowance for loan loss is management's estimate of credit losses inherent in the loan portfolio. The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance. The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectability of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

The Company has an established process to determine the adequacy of the allowance for loan losses that assesses the losses inherent in the portfolio. While the Company attributes portions of the allowance to specific portfolio segments, the entire allowance is available to absorb credit losses inherent in the total loan portfolio. The Company's process involves procedures to appropriately consider the unique risk characteristics of the commercial and consumer loan portfolio segments. For each portfolio segment, impairment is measured individually for each impaired loan. The Company's allowance levels are influenced by loan volume, loan grade or delinquency status, historic loss experience and other economic conditions.

The following table summarizes the activity related to the allowance for loan losses by commercial and consumer portfolio segments:

| (dollars in thousands)                           | Nine months ended September 30, 2015 |                          |              |          |                |                |              |       |         |

**NOTE 5 Troubled Debt Restructurings**

At September 30, 2015, the Company had 31 loans totaling \$8.1 million compared to 37 loans totaling \$9.7 million at December 31, 2014, which were considered as TDRs. The Company considers a loan to be a TDR when the debtor experiences financial difficulties and the Company grants a concession to the debtor that it would not normally consider. Concessions can relate to the contractual interest rate, maturity date, or payment structure of the note. As part of the workout plan for individual loan relationships, the Company may restructure loan terms to assist borrowers facing financial challenges in the current economic environment. To date, the Company has restored three commercial loans previously classified as TDRs to accrual status.

The following table summarizes the concession at the time of modification and the recorded investment in the Company's TDRs before and after their modification during the nine months ended September 30, 2015 and 2014, respectively.

## **Table of Contents**

### **NOTE 6 Fair Value Accounting**

FASB ASC 820, Fair Value Measurement and Disclosures, defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. FASB ASC 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

#### **Level 1 Quoted market price in active markets**

Quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include certain debt and equity securities that are traded in an active exchange market.

#### **Level 2 Significant other observable inputs**

Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include fixed income securities and mortgage-backed securities that are held in the Company's available-for-sale portfolio and valued by a third-party pricing service, as well as certain impaired loans.

#### **Level 3 Significant unobservable inputs**

Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. These methodologies may result in a significant portion of the fair value being derived from unobservable data.

Following is a description of valuation methodologies used for assets recorded at fair value.

#### *Investment Securities*

Securities available for sale are valued on a recurring basis at quoted market prices where available. If quoted market prices are not available, fair values are based on quoted market prices of comparable securities. Level 1 securities include those traded on an active exchange, such as the New York Stock Exchange or U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets and money market funds. Level 2 securities include mortgage-backed securities and debentures issued by government sponsored entities, municipal bonds and corporate debt securities. In certain cases where there is limited activity or less transparency around inputs to valuations, securities are classified as Level 3 within the valuation hierarchy. Securities held to maturity are valued at quoted market prices or dealer quotes similar to securities available for sale. The carrying value of Other Investments, such as Federal Reserve Bank and FHLB stock, approximates fair value based on their redemption provisions.

#### *Loans Held for Sale*

Loans held for sale include mortgage loans and are carried at the lower of cost or market value. The fair values of mortgage loans held for sale are based on current market rates from investors within the secondary market for loans with similar characteristics. Carrying value approximates fair value.

**Table of Contents***Loans*

The Company does not record loans at fair value on a recurring basis. However, from time to time, a loan may be considered impaired and an allowance for loan losses may be established. Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management measures the impairment in accordance with FASB ASC 310, Receivables. The fair value of impaired loans is estimated using one of several methods, including collateral value, market value of similar debt, enterprise value, liquidation value, and discounted cash flows. Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. At September 30, 2015, a significant portion of the impaired loans were evaluated based on the fair value of the collateral. In accordance with FASB ASC 820, Fair Value Measurement and Disclosures, impaired loans where an allowance is established based on the fair value of collateral require classification in the fair value hierarchy. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company considers the impaired loan as nonrecurring Level 2. The Company's current loan and appraisal policies require the Bank to obtain updated appraisals on an as is basis at renewal, or in the case of an impaired loan, on an annual basis, either through a new external appraisal or an appraisal evaluation. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company considers the impaired loan as nonrecurring Level 3. The fair value of impaired loans may also be estimated using the present value of expected future cash flows to be realized on the loan, which is also considered a Level 3 valuation. These fair value estimates are subject to fluctuations in assumptions about the amount and timing of expected cash flows as well as the choice of discount rate used in the present value calculation.

*Other Real Estate Owned ( OREO )*

OREO, consisting of properties obtained through foreclosure or in satisfaction of loans, is reported at the lower of cost or fair value, determined on the basis of current appraisals, comparable sales, and other estimates of value obtained principally from independent sources, adjusted for estimated selling costs (Level 2). At the time of foreclosure, any excess of the loan balance over the fair value of the real estate held as collateral is treated as a charge against the allowance for loan losses. Gains or losses on sale and generally any subsequent adjustments to the value are recorded as a component of real estate owned activity. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company considers the OREO as nonrecurring Level 3.

*Assets and Liabilities Recorded at Fair Value on a Recurring Basis*

The tables below present the recorded amount of assets and liabilities measured at fair value on a recurring basis as of September 30, 2015 and December 31, 2014.

| (dollars in thousands)                                   | September 30, 2015 |         |         |        |

| Mortgage-backed securities                               | -                 | 24,513  | -       | 24,513 |
| Total assets measured at fair value on a recurring basis | \$ -              | 55,024  | -       | 55,024 |

The Company has no liabilities carried at fair value or measured at fair value on a recurring basis as of September 30, 2015 and December 31, 2014.

**Table of Contents***Assets and Liabilities Recorded at Fair Value on a Nonrecurring Basis*

The Company is predominantly an asset based lender with real estate serving as collateral on more than 80% of loans as of September 30, 2015. Loans which are deemed to be impaired are valued net of the allowance for loan losses, and other real estate owned is valued at the lower of cost or net realizable value of the underlying real estate collateral. Such market values are generally obtained using independent appraisals, which the Company considers to be level 2 inputs. The tables below present the recorded amount of assets and liabilities measured at fair value on a nonrecurring basis as of September 30, 2015 and December 31, 2014.

| (dollars in thousands)                                      | As of September 30, 2015 |         |         |        |
|---|--------------------------|---------|---------|--------|
|   | Level 1                  | Level 2 | Level 3 | Total  |
| <b>Assets</b>   |                          |         |         |        |
| Impaired loans  | \$ -                     | 9,604   | 459     | 10,063 |
| Other real estate owned                                     | -                        | 2,228   | 429     | 2,657  |
| Total assets measured at fair value on a nonrecurring basis | \$ -                     | 11,832  | 888     | 12,720 |

|   | As of December 31, 2014 |         |         |        |
|---|-------------------------|---------|---------|--------|
|   | Level 1                 | Level 2 | Level 3 | Total  |
| <b>Assets</b>   |                         |         |         |        |
| Impaired loans  | \$ -                    | 9,461   | 705     | 10,166 |
| Other real estate owned                                     | -                       | 3,040   | 267     | 3,307  |
| Total assets measured at fair value on a nonrecurring basis | \$ -                    | 12,501  | 972     | 13,473 |

The Company has no liabilities carried at fair value or measured at fair value on a nonrecurring basis as of September 30, 2015 and December 31, 2014.

For Level 3 assets and liabilities measured at fair value on a recurring or nonrecurring basis as of September 30, 2015, the significant unobservable inputs used in the fair value measurements were as follows:

|                         | Valuation Technique                   | Significant Unobservable Inputs  | Range of Inputs |
|-------------------------|---------------------------------------|--|-----------------|
| Impaired loans          | Appraised Value/Discounted Cash Flows | Discounts to appraisals or cash flows for estimated holding and/or selling costs or age of appraisal | 0-25%           |
| Other real estate owned | Appraised Value/Comparable Sales      | Discounts to appraisals for estimated holding or selling costs                                       | 0-25%           |

*Fair Value of Financial Instruments*

Financial instruments require disclosure of fair value information, whether or not recognized in the consolidated balance sheets, when it is practical to estimate the fair value. A financial instrument is defined as cash, evidence of an ownership interest in an entity or a contractual obligation which requires the exchange of cash. Certain items are specifically excluded from the disclosure requirements, including the Company's common stock, premises and equipment and other assets and liabilities.

The following is a description of valuation methodologies used to estimate fair value for certain other financial instruments.

Fair value approximates carrying value for the following financial instruments due to the short-term nature of the instrument: cash and due from banks, federal funds sold, federal funds purchased, and securities sold under agreement to repurchase.

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

*Deposits* Fair value for demand deposit accounts and interest-bearing accounts with no fixed maturity date is equal to the carrying value. The fair value of certificate of deposit accounts are estimated by discounting cash flows from expected maturities using current interest rates on similar instruments.

*FHLB Advances and Other Borrowings* Fair value for FHLB advances and other borrowings are estimated by discounting cash flows from expected maturities using current interest rates on similar instruments.

**Table of Contents**

*Junior subordinated debentures* Fair value for junior subordinated debentures are estimated by discounting cash flows from expected maturities using current interest rates on similar instruments.

The Company has used management's best estimate of fair value based on the above assumptions. Thus, the fair values presented may not be the amounts that could be realized in an immediate sale or settlement of the instrument. In addition, any income taxes or other expenses, which would be incurred in an actual sale or settlement, are not taken into consideration in the fair value presented.

The estimated fair values of the Company's financial instruments at September 30, 2015 and December 31, 2014 are as follows:

| (dollars in thousands)         | Carrying<br>Amount | Fair<br>Value | September 30, 2015 |         |         |
|--------------------------------|--------------------|---------------|--------------------|---------|---------|

**Table of Contents****NOTE 7 Earnings Per Common Share**

The following schedule reconciles the numerators and denominators of the basic and diluted earnings per share computations for the three and nine month periods ended September 30, 2015 and 2014. Dilutive common shares arise from the potentially dilutive effect of the Company's stock options that were outstanding at September 30, 2015. The assumed conversion of stock options can create a difference between basic and dilutive net income per common share. At September 30, 2015 and 2014, there were 88,000 and 110,463 options, respectively, that were not considered in computing diluted earnings per common share because they were anti-dilutive.

**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.**

The following discussion reviews our results of operations for the three and nine month periods ended September 30, 2015 as compared to the three and nine month periods ended September 30, 2014 and assesses our financial condition as of September 30, 2015 as compared to December 31, 2014. You should read the following discussion and analysis in conjunction with the accompanying consolidated financial statements and the related notes and the consolidated financial statements and the related notes for the year ended December 31, 2014 included in our Annual Report on Form 10-K for that period. Results for the three and nine month periods ended September 30, 2015 are not necessarily indicative of the results for the year ending December 31, 2015 or any future period.

**Cautionary Warning Regarding Forward-Looking Statements**

This report, including information included or incorporated by reference in this report, contains statements which constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements may relate to our financial condition, results of operations, plans, objectives, or future performance. These statements are based on many assumptions and estimates and are not guarantees of future performance. Our actual results may differ materially from those anticipated in any forward-looking statements, as they will depend on many factors about which we are unsure, including many factors which are beyond our control. The words may, would, could, should, will, expect, anticipate, predict, project, potential, believe, continue, assume, intend, plan, and es expressions, are meant to identify such forward-looking statements. Potential risks and uncertainties that could cause our actual results to differ from those anticipated in any forward-looking statements include, but are not limited to, those described under Item 1A- Risk Factors of our Annual Report on Form 10-K for the year ended December 31, 2014, as well as the following:

Restrictions or conditions imposed by our regulators on our operations;

Increases in competitive pressure in the banking and financial services industries;

Changes in access to funding or increased regulatory requirements with regard to funding;

Changes in deposit flows;

Credit losses as a result of declining real estate values, increasing interest rates, increasing unemployment, changes in payment behavior or other factors;

Credit losses due to loan concentration;

**Table of Contents**

Changes in the amount of our loan portfolio collateralized by real estate and weaknesses in the real estate market;

Our ability to attract and retain key personnel;

Changes in the interest rate environment which could reduce anticipated or actual margins;

Changes in political conditions or the legislative or regulatory environment, including governmental initiatives affecting the financial services industry;

Changes in economic conditions resulting in, among other things, a deterioration in credit quality;

Changes occurring in business conditions and inflation;

Cybersecurity breaches, including potential business disruptions or financial losses;

Changes in technology;

The adequacy of the level of our allowance for loan losses and the amount of loan loss provisions required in future periods;

Examinations by our regulatory authorities, including the possibility that the regulatory authorities may, among other things, require us to increase our allowance for loan losses or write-down assets;

Changes in monetary and tax policies;

The rate of delinquencies and amounts of loans charged-off;

The rate of loan growth in recent years and the lack of seasoning of a portion of our loan portfolio;

Our ability to maintain appropriate levels of capital and to comply with our capital ratio requirements;

Adverse changes in asset quality and resulting credit risk-related losses and expenses;

Changes in accounting policies and practices; and

Other risks and uncertainties detailed in this Quarterly Report on Form 10-Q and, from time to time, in our other filings with the Securities and Exchange Commission (the "SEC").

If any of these risks or uncertainties materialize, or if any of the assumptions underlying such forward-looking statements proves to be incorrect, our results could differ materially from those expressed in, implied or projected by, such forward-looking statements. For information with respect to factors that could cause actual results to differ from the expectations stated in the forward-looking statements, see "Risk Factors" under Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2014. We urge investors to consider all of these factors carefully in evaluating the forward-looking statements contained in this Quarterly Report on Form 10-Q. We make these forward-looking statements as of the date of this document and we do not intend, and assume no obligation, to update the forward-looking statements or to update the reasons why actual results could differ from those expressed in, or implied or projected by, the forward-looking statements.

**OVERVIEW**

Our business model continues to be client-focused, utilizing relationship teams to provide our clients with a specific banker contact and support team responsible for all of their banking needs. The purpose of this structure is to provide a consistent and superior level of professional service, and we believe it provides us with a distinct competitive advantage. We consider exceptional client service to be a critical part of our culture, which we refer to as "ClientFIRST."

At September 30, 2015, we had total assets of \$1.2 billion, a 14.0% increase from total assets of \$1.0 billion at December 31, 2014. The largest components of our total assets are net loans and securities which were \$979.9 million and \$71.9 million, respectively, at September 30, 2015. Comparatively, our net loans and securities totaled \$859.7 million and \$61.5 million, respectively, at December 31, 2014. Our liabilities and shareholders' equity at September 30, 2015 totaled \$1.1 billion and \$91.1 million, respectively, compared to liabilities of \$946.9 million and shareholders' equity of \$83.0 million at December 31, 2014. The principal component of our liabilities is deposits which were \$943.9 million and \$788.9 million at September 30, 2015 and December 31, 2014, respectively.

## **Table of Contents**

Like most community banks, we derive the majority of our income from interest received on our loans and investments. Our primary source of funds for making these loans and investments is our deposits, on which we pay interest. Consequently, one of the key measures of our success is our amount of net interest income, or the difference between the income on our interest-earning assets, such as loans and investments, and the expense on our interest-bearing liabilities, such as deposits and borrowings. Another key measure is the spread between the yield we earn on these interest-earning assets and the rate we pay on our interest-bearing liabilities, which is called our net interest spread. In addition to earning interest on our loans and investments, we earn income through fees and other charges to our clients.

Our net income to common shareholders was \$2.7 million and \$1.6 million for the three months ended September 30, 2015 and 2014, respectively, an increase of \$1.2 million, or 73.4%. Diluted earnings per share ( EPS ) was \$0.41, for the third quarter of 2015 as compared to \$0.31 for the same period in 2014. The increase in net income resulted primarily from increases in net interest income and noninterest income, partially offset by an increase in noninterest expense.

Our net income to common shareholders was \$7.3 million and \$3.9 million for the nine months ended September 30, 2015 and 2014, respectively, an increase of \$3.4 million, or 85.5%. Diluted EPS was \$1.12 for the nine months ended September 30, 2015 as compared to \$0.79 for the same period in 2014. The increase in net income resulted primarily from increases in net interest income and noninterest income, partially offset by an increase in noninterest expense.

Economic conditions, competition, and the monetary and fiscal policies of the Federal government significantly affect most financial institutions, including the Bank. Lending and deposit activities and fee income generation are influenced by levels of business spending and investment, consumer income, consumer spending and savings, capital market activities, and competition among financial institutions, as well as customer preferences, interest rate conditions and prevailing market rates on competing products in our market areas.

## **Effect of Economic Trends**

While the United States economy as a whole has steadily improved since 2009, the weaker economic conditions are expected to continue through the remainder of 2015. Financial institutions recently experienced credit losses above historical levels and elevated levels of non-performing assets, charge-offs and foreclosures. In light of these conditions, financial institutions continue to face heightened levels of scrutiny from federal and state regulators. These factors negatively influenced, and likely will continue to negatively influence, earning asset yields at a time when the market for deposits is intensely competitive. As a result, financial institutions experienced, and may continue to experience, pressure on loan yields, deposit and other borrowing costs, liquidity, and capital.

## **RESULTS OF OPERATIONS**

### *Net Interest Income and Margin*

Our level of net interest income is determined by the level of earning assets and the management of our net interest margin. Our net interest income was \$9.8 million for the three month period ended September 30, 2015, a 15.9% increase over net interest income of \$8.5 million for the same period in 2014. In comparison, our average earning assets increased 16.9%, or \$157.1 million, during the third quarter of 2015 compared to the third quarter of 2014, while our interest-bearing liabilities increased by \$104.6 million during the same period. The increase in average earning assets is primarily related to an increase in average loans, while the increase in average interest-bearing liabilities is primarily a result of an increase in interest-bearing deposits.

We have included a number of tables to assist in our description of various measures of our financial performance. For example, the Average Balances, Income and Expenses, Yields and Rates table reflects the average balance of each category of our assets and liabilities as well as the yield we earned or the rate we paid with respect to each category during the three and nine month periods ended September 30, 2015 and 2014. A review of this table shows that our loans typically provide higher interest yields than do other types of interest-earning assets, which is why we direct a substantial percentage of our earning assets into our loan portfolio. Similarly, the Rate/Volume Analysis table demonstrates the effect of changing interest rates and changing volume of assets and liabilities on our financial condition during the periods shown. We also track the sensitivity of our various categories of assets and liabilities to changes in interest rates, and we have included tables to illustrate our interest rate sensitivity with respect to interest-earning accounts and interest-bearing accounts.

**Table of Contents**

The following tables set forth information related to our average balance sheets, average yields on assets, and average costs of liabilities. We derived these yields by dividing income or expense by the average balance of the corresponding assets or liabilities. We derived average balances from the daily balances throughout the periods indicated. During the same periods, we had no securities purchased with agreements to resell. All investments owned have an original maturity of over one year. Nonaccrual loans are included in the following tables. Loan yields have been reduced to reflect the negative impact on our earnings of loans on nonaccrual status. The net of capitalized loan costs and fees are amortized into interest income on loans.

(1) Annualized for the three month period.

(2) The tax-equivalent adjustment to net interest income adjusts the yield for assets earning tax-exempt income to a comparable yield on a taxable basis.

(3) Includes loans held for sale.

Our net interest margin, on a tax-equivalent basis, was 3.62% for the three months ended September 30, 2015 compared to 3.66% for the third quarter of 2014. The decrease in net interest margin as compared to the same period in 2014, was driven primarily by an eight basis point reduction in the yield on our interest-earning assets, partially offset by a three basis point decrease in the cost of our interest-bearing liabilities.

Our average interest-earning assets increased by \$157.1 million as compared to the same quarter in 2014, while the yield on these assets decreased by eight basis points. The increase in average interest-earning assets was driven by a \$150.1 million increase in our average loan balances for the third quarter of 2015, compared to the same period in 2014; however, our loan yield decreased by ten basis points during the same period. The decline in yield on our loan portfolio was driven primarily by loans being originated or renewed at market rates which are lower than those in the past.

**Table of Contents**

In addition, our average interest-bearing liabilities increased by \$104.6 million during the third quarter of 2015 as compared to the third quarter of 2014, while the cost of our interest-bearing liabilities declined by three basis points during the same period. The reduction in the cost of our interest-bearing liabilities during the 2015 period resulted primarily from a \$114.3 million increase in our interest-bearing deposits which have a lower cost than our other interest-bearing liabilities. We do not anticipate further significant reductions in the rates on our interest-bearing deposits or FHLB advances and other borrowings in the future as these rates are currently at historically low rates.

Our net interest spread was 3.45% for the three months ended September 30, 2015 compared to 3.50% for the same period in 2014. The net interest spread is the difference between the yield we earn on our interest-earning assets and the rate we pay on our interest-bearing liabilities. The eight basis point reduction in yield on our interest-earning assets, partially offset by the three basis point decrease in rate on our interest-bearing liabilities, resulted in a five basis point decrease in our net interest spread for the 2015 period.

(1) Annualized for the nine month period.

(2) The tax-equivalent adjustment to net interest income adjusts the yield for assets earning tax-exempt income to a comparable yield on a taxable basis.

(3) Includes loans held for sale.

Our net interest margin, on a tax-equivalent basis, was 3.69% for the nine months ended September 30, 2015 compared to 3.67% for the nine months ended September 30, 2014. The two basis point increase in net interest margin during the nine months ended September 30, 2015 was driven primarily by a six basis point reduction in the cost of our interest bearing liabilities, partially offset by a four basis point reduction in the yield on our interest-earning assets compared to the same period in 2014.

During the first nine months of 2015, our average interest-earning assets increased by \$144.5 million as compared to the same period in 2014; however, the yield on our interest-earning assets declined by four basis points during 2015. The increase in interest-earning assets was driven by a \$149.2 million increase in average loans, partially offset by an \$11.3 million decrease in average investment securities, while the decline in yield on interest earning assets was driven primarily by a seven basis point reduction in yield on our loan portfolio.

**Table of Contents**

In addition, our average interest-bearing liabilities increased by \$94.8 million during the nine month period ended September 30, 2015 as compared to the same period in 2014, while the cost of our interest-bearing liabilities declined by six basis points. The reduction in cost of our interest-bearing liabilities was driven by a \$101.2 million increase in interest-bearing deposits which are at lower rates than our other interest-bearing liabilities.

Our net interest spread was 3.53% for the nine months ended September 30, 2015 compared to 3.51% for the same period in 2014. The six basis point reduction in cost on our interest-bearing liabilities, partially offset by a four basis point decline in yield on our earning assets, resulted in the two basis point increase in our net interest spread for the 2015 period.

*Rate/Volume Analysis*

Net interest income can be analyzed in terms of the impact of changing interest rates and changing volume. The following table sets forth the effect which the varying levels of interest-earning assets and interest-bearing liabilities and the applicable rates have had on changes in net interest income for the periods presented.

| (dollars in thousands)             | September 30, 2015 vs. 2014 |       |        |       | September 30, 2014 vs. 2013 |       |        |       | Three Months Ended |

Net interest income, the largest component of our income, was \$9.8 million for the three month period ended September 30, 2015 and \$8.5 million for the three months ended September 30, 2014, a \$1.3 million, or 15.9% increase during the third quarter of 2015. The increase in net interest income is due to a \$1.5 million increase in interest income, partially offset by a \$166,000 increase in interest expense. During the third quarter of 2015, the primary driver of the increase in net interest income was the \$157.1 million increase in our average interest-earning assets as compared to the third quarter of 2014.

## Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

Net interest income for the nine months ended September 30, 2015 was \$28.4 million compared to \$24.2 million for the first nine months ended September 30, 2014, a \$4.2 million, or 17.3% increase during the first nine months of 2015 compared to the same period in 2014. The increase in net interest income is due to a \$4.5 million increase in interest income, offset in part by a \$303,000 increase in interest expense. The \$144.5 million increase in average earning assets during the nine months ended September 30, 2015 as compared to nine months ended September 30, 2014 was the primary driver of the increase in net interest income during the 2015 period.

**Table of Contents***Provision for Loan Losses*

We have established an allowance for loan losses through a provision for loan losses charged as an expense on our consolidated statements of income. We review our loan portfolio periodically to evaluate our outstanding loans and to measure both the performance of the portfolio and the adequacy of the allowance for loan losses. Please see the discussion below under *Balance Sheet Review Allowance for Loan Losses* for a description of the factors we consider in determining the amount of the provision we expense each period to maintain this allowance.

For the three months ended September 30, 2015 and 2014, we incurred a noncash expense related to the provision for loan losses of \$875,000 and \$1.3 million, respectively, resulting in an allowance for loan losses of \$13.4 million and \$11.3 million for the 2015 and 2014 periods, respectively. For the nine months ended September 30, 2015 and 2014, our provision for loan losses was \$2.5 million and \$3.3 million, respectively. The \$13.4 million allowance represented 1.35% of gross loans at September 30, 2015 while the \$11.3 million allowance was 1.36% of gross loans at September 30, 2014. During the past 12 months, our loan balances increased by \$160.5 million, while the amount of our nonperforming loans and classified loans declined. Factors such as these are also considered in determining the amount of loan loss provision necessary to maintain our allowance for loan losses at an adequate level.

*Noninterest Income*

The following table sets forth information related to our noninterest income.

| (dollars in thousands)                | Three months ended<br>September 30, |       | Nine months<br>ended<br>September 30, |       |

| Other income                          | 299                                 | 286   | 878                                   | 815   |
| Total noninterest income              | \$ 2,124                            | 1,560 | 6,380                                 | 4,048 |

Noninterest income increased \$564,000, or 36.2%, for the third quarter of 2015 as compared to the same period in 2014. The increase in total noninterest income during this 2015 period resulted primarily from the following:

Loan and mortgage fee income increased \$565,000, or 65.6%, resulting primarily from an increase in mortgage fee income which was driven by an expansion of our mortgage operations. Mortgage origination fee income increased from \$820,000 for the three months ended September 30, 2014 to \$1.3 million for the three months ended September 30, 2015.

Other income increased \$13,000, or 4.5%, driven by increased ATM and debit card exchange income.

The increase in noninterest income was partially offset by a \$14,000, or 5.7%, decrease in service fees on deposit accounts which was primarily related to an \$15,000 decrease in non-sufficient funds ( NSF ) fee income.

Noninterest income increased \$2.3 million, or 57.6%, during the nine months ended September 30, 2015 as compared to the same period in 2014. The increase in total noninterest income during the nine months ended September 30, 2015 resulted primarily from a \$1.7 million increase in loan fee income, a \$67,000 increase in gain on sale of investment securities, and a \$63,000 increase in other income which consists primarily of income from ATM and debit card transactions, wire transfer fees and rent income from tenants at our Columbia, South Carolina office.

**Table of Contents**

In accordance with the requirement set forth under the Dodd-Frank Act, in June 2011, the Federal Reserve approved a final rule which caps an issuer's base interchange fee at 21 cents per transaction and allows an additional 5 basis point charge per transaction to help cover fraud losses. Although the rule does not apply to institutions with less than \$10 billion in assets, such as our Bank, there is concern that the price controls may harm community banks, which could be pressured by the marketplace to lower their own interchange rates. Our ATM/Debit card fee income is included in other noninterest income and was \$201,000 and \$176,000 for the three months ended September 30, 2015 and 2014, respectively, and \$573,000 and \$488,000 for the nine months ended September 30, 2015 and 2014, respectively, the majority of which related to interchange fee income.

*Noninterest expenses*

The following table sets forth information related to our noninterest expenses.

| (dollars in thousands)            | Three months ended<br>September 30, |       | Nine months ended<br>September 30, |        |

| Marketing                         | 217                                 | 207   | 677                                | 724    |
| Other                             | 365                                 | 525   | 1,155                              | 1,676  |
| Total noninterest expense         | \$ 6,871                            | 6,066 | 20,977                             | 18,151 |

Noninterest expense was \$6.9 million for the three months ended September 30, 2015, an \$805,000, or 13.3%, increase from noninterest expense of \$6.1 million for the three months ended September 30, 2014. The increase in total noninterest expenses resulted primarily from the following:

Compensation and benefits expense increased \$854,000, or 24.7%, relating primarily to increases in base compensation, incentive compensation and benefits expenses. Base compensation increased by \$547,000 driven by the cost of 13 additional employees, five of which were hired in relation to the expansion of our mortgage operations, and the remainder of which were hired to support our loan and deposit growth, combined with annual company-wide salary increases. The increases in incentive compensation and benefits expenses are primarily related to the additional number of employees at September 30, 2015.

Occupancy expenses increased by \$68,000, or 8.8%, driven by increased rent expense and maintenance costs on the properties we own.

Real estate owned expenses increased \$77,000, due primarily to expenses associated with one commercial property.

Partially offsetting these increases in noninterest expenses were decreases in data processing and related costs, professional fees, and other noninterest expense. The \$160,000 decrease in other noninterest expense related primarily to a reduction in collection costs during the three months ended September 30, 2015.

Our efficiency ratio was 57.4% for the third quarter of 2015 compared to 60.4% for the same period in 2014. The efficiency ratio represents the percentage of one dollar of expense required to be incurred to earn a full dollar of revenue and is computed by dividing noninterest expense by the sum of net interest income and noninterest income. The improved efficiency ratio for 2015 was driven primarily by an increase in net interest income and noninterest income during the three months ended September 30, 2015, as compared to the same period in 2014.

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

Noninterest expense for the nine months ended September 30, 2015 increased 15.6%, or \$2.8 million, as compared to the nine months ended September 30, 2014. The increase relates primarily to the \$2.3 million increase in compensation and benefits expense, \$189,000 in occupancy expense, \$907,000 in real estate owned expenses and \$55,000 in professional fees. Partially offsetting the increases in noninterest expense was a decrease of \$94,000 in data processing and related costs, \$47,000 in marketing expenses, and \$521,000 in other noninterest expenses.

## **Table of Contents**

We incurred income tax expense of \$1.5 million for the three months ended September 30, 2015 as compared to \$834,000 during the same period in 2014. Income tax expense for the nine months ended September 30, 2015 was \$4.0 million as compared to \$2.2 million for the same period of 2014. Our effective tax rate was 35.3% and 32.0% for the nine months ended September 30, 2015 and 2014, respectively. The increase in the effective tax rate during the 2015 period is primarily a result of the lesser impact of tax-exempt income.

## **Balance Sheet Review**

### *Investment Securities*

At September 30, 2015, the \$71.9 million in our investment securities portfolio represented approximately 6.1% of our total assets. Our available for sale investment portfolio included US government agency securities, SBA securities, state and political subdivisions, and mortgage-backed securities with a fair value of \$66.3 million and an amortized cost of \$65.9 million resulting in an unrealized gain of \$433,000. At December 31, 2014, the \$61.5 million in our investment securities portfolio represented approximately 6.0% of our total assets. At December 31, 2014, we held investment securities available for sale with a fair value of \$55.0 million and an amortized cost of \$54.6 million for an unrealized gain of \$458,000.

### *Loans*

Since loans typically provide higher interest yields than other types of interest earning assets, a substantial percentage of our earning assets are invested in our loan portfolio. Average loans, excluding loans held for sale, for the nine months ended September 30, 2015 and 2014 were \$931.6 million and \$788.7 million, respectively. Before the allowance for loan losses, total loans outstanding at September 30, 2015 and December 31, 2014 were \$993.2 million and \$871.4 million, respectively.

The principal component of our loan portfolio is loans secured by real estate mortgages. As of September 30, 2015, our loan portfolio included \$807.9 million, or 81.4%, of real estate loans. As of December 31, 2014, real estate loans made up 81.2% of our loan portfolio and totaled \$707.2 million. Most of our real estate loans are secured by residential or commercial property. We obtain a security interest in real estate, in addition to any other available collateral. This collateral is taken to increase the likelihood of the ultimate repayment of the loan. Generally, we limit the loan-to-value ratio on loans to coincide with the appropriate regulatory guidelines. We attempt to maintain a relatively diversified loan portfolio to help reduce the risk inherent in concentration in certain types of collateral and business types. We do not generally originate traditional long term residential mortgages to hold in our loan portfolio, but we do issue traditional second mortgage residential real estate loans and home equity lines of credit. Home equity lines of credit totaled \$111.8 million as of September 30, 2015, of which approximately 32% were in a first lien position, while the remaining balance was second liens, compared to \$95.6 million as of December 31, 2014, with approximately 35% in first lien positions and the remaining balance was in second liens. The average loan had a balance of approximately \$91,000 and a loan to value of 70% as of September 30, 2015, compared to an average loan balance of \$87,000 and a loan to value of approximately 72% as of December 31, 2014. Further, 0.6% and 0.3% of our total home equity lines of credit were over 30 days past due as of September 30, 2015 and December 31, 2014, respectively.

Following is a summary of our loan composition at September 30, 2015 and December 31, 2014. During the first nine months of 2015, our loan portfolio increased by \$121.8 million, or 14.0%. Our commercial and consumer loan portfolios experienced similar growth during the nine months ended September 30, 2015 with a 13.6% increase in commercial loans and a 14.7% increase in consumer loans during the period. Of the \$121.8 million in loan growth during the first nine months of 2015, \$36.8 million was originated in the Greenville market, \$29.8 million was originated in the Columbia market, and \$55.2 million was originated in the Charleston market. In addition, \$100.7 million of the increase was in loans secured by real estate, and \$20.1 million in commercial business loans. The \$22.0 million increase in consumer real estate loans is related to our focus to continue to originate high quality 1-4 family consumer real estate loans. Our average consumer real estate loan currently has a principal balance of \$296,000, a term of eight years, and an average rate of 4.43%.

*Nonperforming assets*

Nonperforming assets include real estate acquired through foreclosure or deed taken in lieu of foreclosure and loans on nonaccrual status. Generally, a loan is placed on nonaccrual status when it becomes 90 days past due as to principal or interest, or when we believe, after considering economic and business conditions and collection efforts, that the borrower's financial condition is such that collection of the contractual principal or interest on the loan is doubtful. A payment of interest on a loan that is classified as nonaccrual is recognized as a reduction in principal when received. Our policy with respect to nonperforming loans requires the borrower to make a minimum of six consecutive payments in accordance with the loan terms and to show capacity to continue performing into the future before that loan can be placed back on accrual status. As of September 30, 2015 and December 31, 2014, we had no loans 90 days past due and still accruing.

Following is a summary of our nonperforming assets, including nonaccruing TDRs.

| (dollars in thousands)                   | September 30, 2015 | December 31, 2014 |
|--|--------------------|-------------------|
| Commercial                               | \$ 6,047           | 4,857             |
| Consumer                                 | 251                | 646               |
| Nonaccruing troubled debt restructurings | 887                | 1,147             |
| Total nonaccrual loans                   | 7,185              | 6,650             |
| Other real estate owned                  | 2,657              | 3,307             |
| Total nonperforming assets               | \$ 9,842           | 9,957             |

At September 30, 2015, nonperforming assets were \$9.8 million, or 0.84% of total assets and 0.99% of gross loans. Comparatively, nonperforming assets were \$10.0 million, or 0.97% of total assets and 1.14% of gross loans at December 31, 2014. Nonaccrual loans were \$7.2 million at September 30, 2015, a \$535,000 increase from December 31, 2014, primarily related to one commercial credit. Nonaccrual loans at September 30, 2015 include nine loans which were put on nonaccrual status during the first nine months of 2015. In addition, during the first nine months of 2015, one nonaccrual loan was returned to accrual status, two loans were transferred to other real estate owned and six nonaccrual loans were either paid or charged-off. The amount of foregone interest income on the nonaccrual loans in the first nine months of 2015 and 2014 was approximately \$286,000 and \$326,000, respectively.

Edgar Filing: SOUTHERN FIRST BANCSHARES INC - Form 10-Q

Nonperforming assets include other real estate owned which decreased by \$650,000 from December 31, 2014 due primarily to a write-down on one commercial property. The balance at September 30, 2015 includes seven commercial properties totaling \$2.1 million and three residential properties totaling \$539,000. All of these properties are located in the Upstate of South Carolina. We believe that these properties are appropriately valued at the lower of cost or market as of September 30, 2015.

## **Table of Contents**

At September 30, 2015 and 2014, the allowance for loan losses represented 186.0% and 142.0% of the total amount of nonperforming loans, respectively. A significant portion, or 96%, of nonperforming loans at September 30, 2015 is secured by real estate. Our nonperforming loans have been written down to approximately 64% of their original nonperforming balance. We have evaluated the underlying collateral on these loans and believe that the collateral on these loans is sufficient to minimize future losses. Based on the level of coverage on nonperforming loans and analysis of our loan portfolio, we believe the allowance for loan losses of \$13.4 million as of September 30, 2015 to be adequate.

As a general practice, most of our loans are originated with relatively short maturities of less than 10 years. As a result, when a loan reaches its maturity we frequently renew the loan and thus extend its maturity using the same credit standards as those used when the loan was first originated. Due to these loan practices, we may, at times, renew loans which are classified as nonperforming after evaluating the loan's collateral value and financial strength of its guarantors. Nonperforming loans are renewed at terms generally consistent with the ultimate source of repayment and rarely at reduced rates. In these cases the Company will seek additional credit enhancements, such as additional collateral or additional guarantees to further protect the loan. When a loan is no longer performing in accordance with its stated terms, the Company will typically seek performance under the guarantee.

In addition, at September 30, 2015, 81.4% of our loans are collateralized by real estate and 86.8% of our impaired loans are secured by real estate. The Company utilizes third party appraisers to determine the fair value of collateral dependent loans. Our current loan and appraisal policies require the Company to obtain updated appraisals on an annual basis, either through a new external appraisal or an appraisal evaluation. Impaired loans are individually reviewed on a quarterly basis to determine the level of impairment. As of September 30, 2015, we do not have any impaired real estate loans carried at a value in excess of the appraised value. We typically charge-off a portion or create a specific reserve for impaired loans when we do not expect repayment to occur as agreed upon under the original terms of the loan agreement.

At September 30, 2015, impaired loans totaled \$14.4 million for which \$9.6 million of these loans have a reserve of approximately \$4.4 million allocated in the allowance. During the first nine months of 2015, the average recorded investment in impaired loans was approximately \$14.8 million. Comparatively, impaired loans totaled \$15.2 million at December 31, 2014, and \$10.6 million of these loans had a reserve of approximately \$5.0 million allocated in the allowance. During 2014, the average recorded investment in impaired loans was approximately \$16.4 million.

We consider a loan to be a TDR when the debtor experiences financial difficulties and we provide concessions such that we will not collect all principal and interest in accordance with the original terms of the loan agreement. Concessions can relate to the contractual interest rate, maturity date, or payment structure of the note. As part of our workout plan for individual loan relationships, we may restructure loan terms to assist borrowers facing challenges in the current economic environment. As of September 30, 2015, we determined that we had loans totaling \$8.1 million, that we considered TDRs. As of December 31, 2014, we had loans totaling \$9.7 million, that we considered TDRs.

### *Allowance for Loan Losses*

The allowance for loan losses was \$13.4 million and \$11.3 million at September 30, 2015 and 2014, respectively, or 1.35% and 1.36% of outstanding loans, respectively. At December 31, 2014, our allowance for loan losses was \$11.8 million, or 1.35% of outstanding loans, and we had net loans charged-off of \$2.6 million for the year ended December 31, 2014.

During the nine months ended September 30, 2015, we charged-off \$1.0 million of loans and recorded \$156,000 of recoveries on loans previously charged-off, for net charge-offs of \$884,000, or 0.13% of average loans, annualized. Comparatively, we charged-off \$2.3 million of loans and recorded \$120,000 of recoveries on loans previously charged-off, resulting in net charge-offs of \$2.2 million, or 0.37% of average loans, annualized, for the first nine months of 2014.

**Table of Contents**

Following is a summary of the activity in the allowance for loan losses.

| (dollars in thousands)              | Nine months ended |                       | Year ended<br>December 31, 2014 |

| <b>Balance, end of period</b>       | \$ 13,368         | 11,305                | 11,752                          |

*Deposits and Other Interest-Bearing Liabilities*

Our primary source of funds for loans and investments is our deposits, advances from the FHLB, and structured repurchase agreements. In the past, we have chosen to obtain a portion of our certificates of deposits from areas outside of our market in order to obtain longer term deposits than are readily available in our local market. We have adopted guidelines regarding our use of brokered CDs that limit our brokered CDs to 25% of total deposits and dictate that our current interest rate risk profile determines the terms. In addition, we do not obtain time deposits of \$100,000 or more through the Internet. These guidelines allow us to take advantage of the attractive terms that wholesale funding can offer while mitigating the related inherent risk.

Our retail deposits represented \$869.9 million, or 92.2% of total deposits at September 30, 2015, while our out-of-market, or brokered, deposits represented \$74.1 million, or 7.8% of our total deposits at September 30, 2015. At December 31, 2014, retail deposits represented 729.0 million, or 92.4% of our total deposits, and brokered CDs were \$60.0 million, representing 7.6% of our total deposits. Of the \$140.9 million increase in retail deposits during the first nine months of 2015, \$40.3 million is related to the Greenville market, \$58.1 million is related to the Columbia market, and \$42.5 million is related to the Charleston market. Our loan-to-deposit ratio was 105% at September 30, 2015 and 110% at December 31, 2014.

The following is a detail of our deposit accounts:

| (dollars in thousands)                              | September<br>30,<br>2015 | December 31,<br>2014 |
|---|--------------------------|----------------------|
| Non-interest bearing                                | \$ 173,602               | 139,902              |
| Interest bearing:                                   |                          |                      |
| NOW accounts  | 174,743                  | 149,137              |
| Money market accounts                               | 294,471                  | 224,733              |
| Savings   | 9,654                    | 8,664                |
| Time, less than \$100,000                           | 60,986                   | 62,646               |
| Time and out-of-market deposits, \$100,000 and over | 230,462                  | 203,825              |
| Total deposits                                      | \$ 943,918               | 788,907              |

During the past 12 months, we continued our focus on increasing core deposits, which exclude out-of-market deposits and time deposits of \$100,000 or more, in order to provide a relatively stable funding source for our loan portfolio and other earning assets. Our core deposits were \$713.5 million and \$585.1 million at September 30, 2015 and December 31, 2014, respectively. In addition, included in time deposits of \$100,000 or more at September 30, 2015 is \$63.0 million of wholesale CDs scheduled to mature within the next 12 months at a weighted average rate of 0.62%.

**Table of Contents**

The following table shows the average balance amounts and the average rates paid on deposits.

| (dollars in thousands)               | 2015       |       | Nine months ended<br>September 30,<br>2014 |       |
|--------------------------------------|------------|-------|--|-------|

| Noninterest bearing demand deposits  | \$ 155,921 | -%    | 119,303                                    | -%    |
| Interest bearing demand deposits     | 168,080    | 0.17% | 146,657                                    | 0.15% |
| Money market accounts                | 244,787    | 0.40% | 178,909                                    | 0.32% |
| Savings accounts                     | 8,880      | 0.07% | 7,735                                      | 0.09% |
| Time deposits less than \$100,000    | 61,564     | 0.76% | 67,082                                     | 0.71% |
| Time deposits greater than \$100,000 | 223,647    | 0.75% | 205,343                                    | 0.73% |
| Total deposits                       | \$ 862,879 | 0.40% | 725,029                                    | 0.39% |

During the nine months ended September 30, 2015, our average transaction account balances increased by \$125.1 million, or 27.6%, from the nine months ended September 30, 2014, while our average time deposit balances increased by \$12.8 million during the 2015 period. In addition, during the past 12 months, we have continued to reduce the rates we pay on our interest-bearing deposits, as these deposits repriced; however, we do not anticipate a significant reduction in our deposit costs in the future.

All of our time deposits are certificates of deposits. The maturity distribution of our time deposits of \$100,000 or more at September 30, 2015 was as follows:

| (dollars in thousands)         | September 30,<br>2015 |
|--------------------------------|-----------------------|
| Three months or less           | \$ 35,493             |
| Over three through six months  | 44,430                |
| Over six through twelve months | 62,906                |
| Over twelve months             | 87,633                |
| Total                          | \$ 230,462            |

Time deposits that meet or exceed the FDIC insurance limit of \$250,000 at September 30, 2015 and December 31, 2014 were \$149.7 million and \$121.8 million, respectively.

**Liquidity and Capital Resources**

Liquidity represents the ability of a company to convert assets into cash or cash equivalents without significant loss, and the ability to raise additional funds by increasing liabilities. Liquidity management involves monitoring our sources and uses of funds in order to meet our day-to-day cash flow requirements while maximizing profits. Liquidity management is made more complicated because different balance sheet components are subject to varying degrees of management control. For example, the timing of maturities of our investment portfolio is fairly predictable and subject to a high degree of control at the time investment decisions are made. However, net deposit inflows and outflows are far less predictable and are not subject to the same degree of control.

At September 30, 2015 and December 31, 2014, our liquid assets, consisting of cash and due from banks and federal funds sold, amounted to \$50.3 million and \$41.3 million, or 4.3% and 4.0% of total assets, respectively. Our investment securities at September 30, 2015 and December 31, 2014 amounted to \$71.9 million and \$61.5 million, or 6.1% and 6.0% of total assets, respectively. Investment securities traditionally provide a secondary source of liquidity since they can be converted into cash in a timely manner. However, approximately 49% of these securities are pledged against outstanding debt. Therefore, the related debt would need to be repaid prior to the securities being sold in order for these securities to be converted to cash. In addition, approximately 17% of our investment securities are pledged to secure client deposits.

**Table of Contents**

Our ability to maintain and expand our deposit base and borrowing capabilities serves as our primary source of liquidity. We plan to meet our future cash needs through the liquidation of temporary investments, the generation of deposits, loan payoffs, and from additional borrowings. In addition, we will receive cash upon the maturity and sale of loans and the maturity of investment securities. We maintain three federal funds purchased lines of credit with correspondent banks totaling \$45.0 million for which there were no borrowings against the lines of credit at September 30, 2015.

We are also a member of the FHLB, from which applications for borrowings can be made. The FHLB requires that securities, qualifying mortgage loans, and stock of the FHLB owned by the Bank be pledged to secure any advances from the FHLB. The unused borrowing capacity currently available from the FHLB at September 30, 2015 was \$77.9 million, based on the Bank's \$5.0 million investment in FHLB stock, as well as qualifying mortgages available to secure any future borrowings. However, we are able to pledge additional securities to the FHLB in order to increase our available borrowing capacity. In addition, at September 30, 2015 and December 31, 2014 we had \$104.8 million and \$35.2 million, respectively, of letters of credit outstanding with the FHLB to secure client deposits.

We also have a line of credit with another financial institution for \$10 million, which was unused at September 30, 2015. The line of credit bears interest at LIBOR plus 2.90% with a floor of 3.25% and a ceiling of 5.15%, and matures on June 6, 2017.

We believe that our existing stable base of core deposits, borrowings from the FHLB, and short-term repurchase agreements will enable us to successfully meet our long-term liquidity needs. However, as short-term liquidity needs arise, we have the ability to sell a portion of our investment securities portfolio to meet those needs.

Total shareholders' equity at September 30, 2015 was \$91.1 million. At December 31, 2014, total shareholders' equity was \$83.0 million. The \$8.1 million increase from December 31, 2014 is primarily related to net income of \$7.3 million during the first nine months of 2015.

The following table shows the return on average assets (net income divided by average total assets), return on average equity (net income divided by average equity), and equity to assets ratio (average equity divided by average assets) annualized for the nine months ended September 30, 2015 and the year ended December 31, 2014. Since our inception, we have not paid cash dividends.

|  | <b>September 30, 2015</b> | <b>December 31, 2014</b> |
|--|---------------------------|--------------------------|
| Return on average assets               | 0.90%                     | 0.69%                    |
| Return on average equity               | 11.16%                    | 8.92%                    |
| Return on average common equity        | 11.16%                    | 12.03%                   |
| Average equity to average assets ratio | 8.03%                     | 7.76%                    |
| Tangible common equity to assets ratio | 7.76%                     | 8.06%                    |

At both the holding company and Bank level, we are subject to various regulatory capital requirements administered by the federal banking agencies. Under the capital adequacy guidelines and the regulatory framework for prompt corrective action, we must meet specific capital guidelines that involve quantitative measures of assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. Our capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors, and the regulators can lower classifications in certain cases. Failure to meet various capital requirements can initiate regulatory action that could have a direct material effect on the financial statements.

**Table of Contents**

In July 2013, the Federal Reserve and the FDIC approved the final rules to implement the Basel III regulatory capital reforms among other changes required by the Dodd-Frank Act. Under the final rules, which began to take effect for us in January 2015 and are subject to a phase-in period through January 1, 2019, minimum requirements will increase for both the quantity and quality of capital held by the Company and the Bank, which acts as a financial cushion to absorb losses, taking into account the impact of risk. The approved rule includes a new minimum ratio of common equity Tier 1 capital to risk-weighted assets ( CET1 ) of 4.5% and a capital conservation buffer of 2.5% of risk-weighted assets, which when fully phased-in, effectively results in a minimum CET1 ratio of 7.0%. Additionally, CET1 includes accumulated other comprehensive income (which includes all unrealized gains and losses on available for sale debt and equity securities), subject to a transition period and a one-time opt-out election. The Company and the Bank elected to opt-out of this provision. As such, accumulated comprehensive income is not included in our Tier 1 capital. Basel III also raises the minimum ratio of Tier 1 capital to risk-weighted assets from 4.0% to 6.0% (which, with the capital conservation buffer, effectively results in a minimum Tier 1 capital ratio of 8.5% when fully phased-in), effectively results in a minimum total capital to risk-weighted assets ratio of 10.5% (with the capital conservation buffer fully phased-in), and requires a minimum leverage ratio of 4.0%. Basel III also makes changes to the risk weights for certain assets and off-balance sheet exposures. Management expects that the capital ratios for the Company and Bank under Basel III will continue to exceed the well-capitalized minimum capital requirements.

The following table summarizes the capital amounts and ratios of the Bank and the regulatory minimum requirements.

| (dollars in thousands)                                 | Actual     |        | For capital adequacy purposes minimum |       | September 30, 2015<br>To be well capitalized under prompt corrective action provisions minimum |        |
|--|------------|--------|---------------------------------------|-------|--|--------|
|  | Amount     | Ratio  | Amount                                | Ratio | Amount   | Ratio  |
|  |            |        |                                       |       |  |        |
| Total Capital (to risk weighted assets)                | \$ 112,506 | 11.58% | 77,725                                | 8.00% | 97,156   | 10.00% |

The ability of the Company to pay cash dividends is dependent upon receiving cash in the form of dividends from the Bank. The dividends that may be paid by the Bank to the Company are subject to legal limitations and regulatory capital requirements.

**EFFECT OF INFLATION AND CHANGING PRICES**

The effect of relative purchasing power over time due to inflation has not been taken into account in our consolidated financial statements. Rather, our financial statements have been prepared on an historical cost basis in accordance with generally accepted accounting principles.

Unlike most industrial companies, our assets and liabilities are primarily monetary in nature. Therefore, the effect of changes in interest rates will have a more significant impact on our performance than will the effect of changing prices and inflation in general. In addition, interest rates may generally increase as the rate of inflation increases, although not necessarily in the same magnitude. As discussed previously, we seek to manage the relationships between interest sensitive assets and liabilities in order to protect against wide rate fluctuations, including those resulting from inflation.

## **Table of Contents**

### **OFF-BALANCE SHEET RISK**

Commitments to extend credit are agreements to lend money to a client as long as the client has not violated any material condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require the payment of a fee. At September 30, 2015, unfunded commitments to extend credit were \$193.4 million, of which \$64.8 million was at fixed rates and \$128.6 million was at variable rates. At December 31, 2014, unfunded commitments to extend credit were \$167.3 million, of which approximately \$52.2 million was at fixed rates and \$115.1 million was at variable rates. A significant portion of the unfunded commitments related to consumer equity lines of credit. Based on historical experience, we anticipate that a significant portion of these lines of credit will not be funded. We evaluate each client's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by us upon extension of credit, is based on our credit evaluation of the borrower. The type of collateral varies but may include accounts receivable, inventory, property, plant and equipment, and commercial and residential real estate.

At September 30, 2015 and December 31, 2014, there were commitments under letters of credit for \$4.2 million and \$2.6 million, respectively. The credit risk and collateral involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. Since most of the letters of credit are expected to expire without being drawn upon, they do not necessarily represent future cash requirements.

A portion of our business is to originate mortgage loans that will be sold in the secondary market to investors. Loan types that we originate include conventional loans, jumbo loans and other governmental agency loan products. We adhere to the legal lending limits and guidelines as set forth by the various governmental agencies and investors to whom we sell loans. Under a best efforts selling procedure, we make our best effort to process, fund, and deliver the loan to a particular investor. If the loan fails to fund, there is no immediate cost to us, as the market risk has been transferred to the investor. In the event of a customer loan default, we may be required to reimburse the investor.

Except as disclosed in this report, we are not involved in off-balance sheet contractual relationships, unconsolidated related entities that have off-balance sheet arrangements or transactions that could result in liquidity needs or other commitments that significantly impact earnings.

### **MARKET RISK AND INTEREST RATE SENSITIVITY**

Market risk is the risk of loss from adverse changes in market prices and rates, which principally arises from interest rate risk inherent in our lending, investing, deposit gathering, and borrowing activities. Other types of market risks, such as foreign currency exchange rate risk and commodity price risk, do not generally arise in the normal course of our business.

We actively monitor and manage our interest rate risk exposure in order to control the mix and maturities of our assets and liabilities utilizing a process we call asset/liability management. The essential purposes of asset/liability management are to ensure adequate liquidity and to maintain an appropriate balance between interest sensitive assets and liabilities in order to minimize potentially adverse impacts on earnings from changes in market interest rates. Our asset/liability management committee (ALCO) monitors and considers methods of managing exposure to interest rate risk. We have both an internal ALCO consisting of senior management that meets at various times during each month and a board ALCO that meets monthly. The ALCOs are responsible for maintaining the level of interest rate sensitivity of our interest sensitive assets and liabilities within board-approved limits.

As of September 30, 2015, the following table summarizes the forecasted impact on net interest income using a base case scenario given upward and downward movements in interest rates of 100, 200, and 300 basis points based on forecasted assumptions of prepayment speeds, nominal interest rates and loan and deposit repricing rates. Estimates are based on current economic conditions, historical interest rate cycles and other factors deemed to be relevant. However, underlying assumptions may be impacted in future periods which were not known to management at the time of the issuance of the Consolidated Financial Statements. Therefore, management's assumptions may or may not prove valid. No assurance can be given that changing economic conditions and other relevant factors impacting our net interest income will not cause actual occurrences to differ from underlying assumptions. In addition, this analysis does not consider any strategic changes to our balance sheet which management may consider as a result of changes in market conditions.

**Table of Contents**

| Interest rate scenario | Change in net<br>interest<br>income from base |
|------------------------|---|
| Up 300 basis points    | 16.13%  |
| Up 200 basis points    | 9.79%   |
| Up 100 basis points    | 4.40%   |
| Base                   | -   |
| Down 100 basis points  | (4.54)%                                       |
| Down 200 basis points  | (9.50)%                                       |
| Down 300 basis points  | (13.15)%                                      |

**CRITICAL ACCOUNTING POLICIES**

We have adopted various accounting policies that govern the application of accounting principles generally accepted in the United States and with general practices within the banking industry in the preparation of our financial statements. Our significant accounting policies are described in the footnotes to our audited consolidated financial statements as of December 31, 2014, as filed in our Annual Report on Form 10-K.

Certain accounting policies involve significant judgments and assumptions by us that have a material impact on the carrying value of certain assets and liabilities. We consider these accounting policies to be critical accounting policies. The judgment and assumptions we use are based on historical experience and other factors, which we believe to be reasonable under the circumstances. Our Critical Accounting Policies are the allowance for loan losses, fair value of financial instruments, other-than-temporary impairment analysis, other real estate owned, and income taxes. Because of the nature of the judgment and assumptions we make, actual results could differ from these judgments and estimates that could have a material impact on the carrying values of our assets and liabilities and our results of operations.

**ACCOUNTING, REPORTING, AND REGULATORY MATTERS***Recently Issued Accounting Standards*

The following is a summary of recent authoritative pronouncements that could affect accounting, reporting, and disclosure of financial information by us:

In January 2014, the FASB amended Receivables topic of the Accounting Standards Codification. The amendments are intended to resolve diversity in practice with respect to when a creditor should reclassify a collateralized consumer mortgage loan to other real estate owned ( OREO ). In addition, the amendments require a creditor to reclassify a collateralized consumer mortgage loan to OREO upon obtaining legal title to the real estate collateral, or the borrower voluntarily conveying all interest in the real estate property to the lender to satisfy the loan through a deed in lieu of foreclosure or similar legal agreement. The amendments will be effective for the Company for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. In implementing this guidance, assets that are reclassified from real estate to loans are measured at the carrying value of the real estate at the date of adoption. Assets reclassified from loans to real estate are measured at the lower of the net amount of the loan receivable or the fair value of the real estate less costs to sell at the date of adoption. The Company will apply the amendments prospectively and does not expect these amendments to have a material effect on its financial statements.

In May 2014, the FASB issued guidance to change the recognition of revenue from contracts with customers. The core principle of the new guidance is that an entity should recognize revenue to reflect the transfer of goods and services to customers in an amount equal to the consideration the entity receives or expects to receive. In August 2015, the FASB deferred the effective date of ASU 2014-09, Revenue from Contracts with Customers. As a result of the deferral, the guidance in ASU 2014-09 will be effective for the Company for reporting periods beginning after December 15, 2017. The Company does not expect these amendments to have a material effect on its financial statements.

**Table of Contents**

In June 2014, the FASB issued guidance which makes limited amendments to the guidance on accounting for certain repurchase agreements. The new guidance (1) requires entities to account for repurchase-to-maturity transactions as secured borrowings (rather than as sales with forward repurchase agreements), (2) eliminates accounting guidance on linked repurchase financing transactions, and (3) expands disclosure requirements related to certain transfers of financial assets that are accounted for as sales and certain transfers (specifically, repos, securities lending transactions, and repurchase-to-maturity transactions) accounted for as secured borrowings. The amendments will be effective for the Company for the first interim or annual period beginning after December 15, 2014. The Company does not expect these amendments to have a material effect on its financial statements.

In January 2015, the FASB issued guidance to eliminate from U.S. GAAP the concept of an extraordinary item, which is an event or transaction that is both (1) unusual in nature and (2) infrequently occurring. Under the new guidance, an entity will no longer (1) segregate an extraordinary item from the results of ordinary operations; (2) separately present an extraordinary item on its income statement, net of tax, after income from continuing operations; or (3) disclose income taxes and earnings-per-share data applicable to an extraordinary item. The amendments will be effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015, with early adoption permitted provided that the guidance is applied from the beginning of the fiscal year of adoption. The Company does not expect these amendments to have a material effect on its financial statements.

In February 2015, the FASB issued guidance which amends the consolidation requirements and significantly changes the consolidation analysis required under U.S. GAAP. Although the amendments are expected to result in the deconsolidation of many entities, the Company will need to reevaluate all its previous consolidation conclusions. The amendments will be effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015, with early adoption permitted (including during an interim period), provided that the guidance is applied as of the beginning of the annual period containing the adoption date. The Company does not expect these amendments to have a material effect on its financial statements.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on the consolidated financial statements upon adoption.

**Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.**

See Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Market Risk and Interest Rate Sensitivity and Liquidity Risk.

**Item 4. CONTROLS AND PROCEDURES.**

*Evaluation of Disclosure Controls and Procedures*

Management, including our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this report. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective to ensure that information required to be disclosed in the reports we file and submit under the Exchange Act is (i) recorded, processed, summarized and reported as and when required and (ii) accumulated and communicated to our management, including our Chief Executive Officer and the Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

*Changes in Internal Control over Financial Reporting*

There has been no change in the Company's internal control over financial reporting during the three months ended September 30, 2015, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

**PART II. OTHER INFORMATION**

**Item 1. LEGAL PROCEEDINGS.**

We are a party to claims and lawsuits arising in the course of normal business activities. Management is not aware of any material pending legal proceedings against the Company which, if determined adversely, would have a material adverse impact on the company's financial position, results of operations or cash flows.
