GOL Concludes Global Share Offering, Reinforcing Cash Position by R\$627.1 Million

With a stronger balance sheet, GOL is now prepared to benefit from the growth of air transport in Brazil and Latin America

São Paulo, October 19, 2009 GOL Linhas Aéreas Inteligentes S.A. (BMF&BOVESPA: GOLL4 e NYSE: GOL), the largest low-cost and low-fare airline in Latin America, hereby announces the conclusion of its global share offering, which increased its cash position by R\$627.1 million.

With an improved cash position that now represents more than 20% of its net revenues recorded during the last twelve months, and with its other competitive advantages: (i) the flight frequency leader between Brazil's main airports, (ii) Leadership in Latin America in low operating cost structure, number of affiliates in its mileage program (6.4 million) and e-commerce sales, and (iii) state-of-the-art corporate governance practices, GOL believes it is well structured to benefit from the growth of air transport in Brazil and Latin America.

The success of the offering has put GOL among the world's most capitalized airlines. This will create shareholder value because it will allow the Company to develop its strategic plan in a flexible manner and with a focus on results, declared Leonardo Pereira, Vice-President and Chief Financial and Investor Relations Officer.

With VoeFácil program (FlyEasy program) and our low-cost structure, we expect to will attract more of the new Brazilian middle-income population, making air transport even more popular in Brazil. In addition, the SMILES program and the high frequency of our flights should allow us to continue attracting more business travelers, while our e-commerce platform, together with GOLLOG, our cargo transport unit, are increasing our ancillary revenues. Constantino de Oliveira Junior, GOL's founder and CEO.

GOL is well positioned to benefit from the growth of air transport in Brazil and Latin America

Our high quality of our operations, backed by a modern and standardized fleet of next generation Boeing 737 aircraft, ensures regular, punctual flights, and has made us achieve the leadership in terms of operating profitability in the Brazilian industry.

The offering comprised 62.2 million common and preferred shares (38.0 million in the primary offering, totaling R\$627,1million) at R\$16.50 per share (US\$ 9.48 per ADS), totaling R\$1,026.1 million.

The difference between the total offering and the primary offering is due to the offering structure designed to comply with Brazilian corporate law, keeping a minimum ratio of 50% between common and preferred shares (including ADSs). Under the offering structure, Fundo ASAS, the Company's controlling shareholder, sold a portion of its preferred shares, while the proceeds were used to buy common shares issued to comply with the regulatory ratio. The structure allowed the Company to achieve its capital increase targets and to comply with the Brazilian Corporate Law.
