EXPLANATORY NOTE

This report combines the quarterly reports on Form 10-Q for the quarter ended September 30, 2015 of Digital Realty Trust, Inc., a Maryland corporation, and Digital Realty Trust, L.P., a Maryland limited partnership, of which Digital Realty Trust, Inc. is the sole general partner. Unless otherwise indicated or unless the context requires otherwise, all references in this report to "we," "us," "our," "our company" or "the company" refer to Digital Realty Trust, Inc. together with its consolidated subsidiaries, including Digital Realty Trust, L.P. Unless otherwise indicated or unless the context requires otherwise, all references to "our operating partnership" or "the operating partnership" refer to Digital Realty Trust, L.P. together with its consolidated subsidiaries.

Digital Realty Trust, Inc. is a real estate investment trust, or REIT, and the sole general partner of Digital Realty Trust, L.P. As of September 30, 2015, Digital Realty Trust, Inc. owned an approximate 98.0% common general partnership interest in Digital Realty Trust, L.P. The remaining approximate 2.0% common limited partnership interests are owned by non-affiliated investors and certain directors and officers of Digital Realty Trust, Inc. As of September 30, 2015, Digital Realty Trust, Inc. owned all of the preferred limited partnership interests of Digital Realty Trust, L.P. As the sole general partner of Digital Realty Trust, L.P., Digital Realty Trust, Inc. has the full, exclusive and complete responsibility for the operating partnership's day-to-day management and control.

We believe combining the quarterly reports on Form 10-Q of Digital Realty Trust, Inc. and Digital Realty Trust, L.P. into this single report results in the following benefits:

- enhancing investors' understanding of our company and our operating partnership by enabling investors to view the business as a whole in the same manner as management views and operates the business;
- eliminating duplicative disclosure and providing a more streamlined and readable presentation since a substantial portion of the disclosure applies to both our company and our operating partnership; and
- creating time and cost efficiencies through the preparation of one combined report instead of two separate reports.

There are a few differences between our company and our operating partnership, which are reflected in the disclosure in this report. We believe it is important to understand the differences between our company and our operating partnership in the context of how we operate as an interrelated consolidated company. Digital Realty Trust, Inc. is a REIT, whose only material asset is its ownership of partnership interests of Digital Realty Trust, L.P. As a result, Digital Realty Trust, Inc. generally does not conduct business itself, other than acting as the sole general partner of Digital Realty Trust, L.P., issuing public securities from time to time and guaranteeing certain unsecured debt of Digital Realty Trust, L.P. and certain of its subsidiaries and affiliates. Digital Realty Trust, Inc. itself has not issued any indebtedness but guarantees the unsecured debt of Digital Realty Trust, L.P. and certain of its subsidiaries, as disclosed in this report. Digital Realty Trust, L.P. holds substantially all the assets of the company and holds the ownership interests in the company's joint ventures. Digital Realty Trust, L.P. conducts the operations of the business and is structured as a partnership with no publicly traded equity. Except for net proceeds from public equity issuances by Digital Realty Trust, Inc., which are generally contributed to Digital Realty Trust, L.P. in exchange for partnership units, Digital Realty Trust, L.P. generally generates the capital required by the company's business primarily through Digital Realty Trust, L.P.'s operations, by Digital Realty Trust, L.P.'s or its affiliates' direct or indirect incurrence of indebtedness or through the issuance of partnership units.

The presentation of noncontrolling interests in operating partnership, stockholders' equity and partners' capital are the main areas of difference between the condensed consolidated financial statements of Digital Realty Trust, Inc. and those of Digital Realty Trust, L.P. The common limited partnership interests held by the limited partners in Digital Realty Trust, L.P. are presented as limited partners' capital within partners' capital in Digital Realty Trust, L.P.'s condensed consolidated financial statements and as noncontrolling interests in operating partnership within equity in Digital Realty Trust, Inc.'s condensed consolidated financial statements. The common and preferred partnership interests held by Digital Realty Trust, Inc. in Digital Realty Trust, L.P. are presented as general partner's capital within

partners' capital in Digital Realty Trust, L.P.'s condensed consolidated financial statements and as preferred stock, common stock, additional paid-in capital and accumulated dividends in excess of earnings within stockholders' equity in Digital Realty Trust, Inc.'s condensed consolidated financial statements. The differences in the presentations between stockholders' equity and partners' capital result from the differences in the equity issued at the Digital Realty Trust, Inc. and the Digital Realty Trust, L.P. levels.

Table of Contents

To help investors understand the significant differences between the company and the operating partnership, this report presents the following separate sections for each of the company and the operating partnership:

- Condensed consolidated financial statements;

- the following notes to the condensed consolidated financial statements:

- "Debt of the Company" and "Debt of the Operating Partnership";

- "Income per Share" and "Income per Unit"; and

- "Equity and Accumulated Other Comprehensive Income, Net" and "Capital and Accumulated Other Comprehensive Income";

- Part I, Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources"; and

- Part II, Item 2. "Unregistered Sales of Equity Securities and Use of Proceeds".

This report also includes separate Item 4. "Controls and Procedures" sections and separate Exhibit 31 and 32 certifications for each of the company and the operating partnership in order to establish that the Chief Executive Officer and the Chief Financial Officer of each entity during the period covered by this report have made the requisite certifications and that the company and the operating partnership are compliant with Rule 13a-15 or Rule 15d-15 of the Securities Exchange Act of 1934 and 18 U.S.C. §1350.

In order to highlight the differences between the company and the operating partnership, the separate sections in this report for the company and the operating partnership specifically refer to the company and the operating partnership. In the sections that combine disclosure of the company and the operating partnership, this report refers to actions or holdings as being actions or holdings of the company. Although the operating partnership is generally the entity that enters into contracts and joint ventures and holds assets and debt, reference to the company is appropriate because the business is one enterprise and the company generally operates the business through the operating partnership.

As general partner with control of the operating partnership, Digital Realty Trust, Inc. consolidates the operating partnership for financial reporting purposes, and it does not have significant assets other than its investment in the operating partnership. Therefore, the assets and liabilities of Digital Realty Trust, Inc. and Digital Realty Trust, L.P. are generally the same on their respective condensed consolidated financial statements. The separate discussions of Digital Realty Trust, Inc. and Digital Realty Trust, L.P. in this report should be read in conjunction with each other to understand the results of the company on a consolidated basis and how management operates the company.

DIGITAL REALTY TRUST, L.P. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2015 and 2014

1. Organization and Description of Business

Digital Realty Trust, Inc. through its controlling interest in Digital Realty Trust, L.P. (the Operating Partnership) and the subsidiaries of the Operating Partnership (collectively, we, our, us or the Company) is engaged in the business of owning, acquiring, developing and managing technology-related real estate. The Company is focused on providing data center and colocation solutions for domestic and international tenants across a variety of industry verticals ranging from financial services, cloud and information technology services, to manufacturing, energy, healthcare, and consumer products. As of September 30, 2015, our portfolio consisted of 132 properties, including eight properties held for sale, 14 properties held as investments in unconsolidated joint ventures and developable land, of which 103 are located throughout North America, 23 are located in Europe, three are located in Australia and three are located in Asia. We are diversified in major metropolitan areas where corporate data center and technology tenants are concentrated, including the Boston, Chicago, Dallas, Los Angeles, New York Metro, Northern Virginia, Phoenix, San Francisco and Silicon Valley metropolitan areas in the United States, the Amsterdam, Dublin, London and Paris metropolitan areas in Europe and the Singapore, Sydney, Melbourne, Hong Kong and Osaka metropolitan areas in the Asia Pacific region. The portfolio consists of Internet gateway and corporate data center properties, technology manufacturing properties and regional or national offices of technology companies.

The Operating Partnership was formed on July 21, 2004 in anticipation of Digital Realty Trust, Inc.'s initial public offering (IPO) on November 3, 2004 and commenced operations on that date. As of September 30, 2015, Digital Realty Trust, Inc. owns a 98.0% common interest and a 100.0% preferred interest in the Operating Partnership. As sole general partner of the Operating Partnership, Digital Realty Trust, Inc. has the full, exclusive and complete responsibility for the Operating Partnership's day-to-day management and control. The limited partners of the Operating Partnership do not have rights to replace Digital Realty Trust, Inc. as the general partner nor do they have participating rights, although they do have certain protective rights.

On October 9, 2015, we completed the acquisition of Telx Holdings, Inc. from private equity firms ABRY Partners and Berkshire Partners. See Note 17 "Subsequent Events" for further discussion of the acquisition.

2. Summary of Significant Accounting Policies

(a) Principles of Consolidation and Basis of Presentation

The accompanying interim condensed consolidated financial statements include all of the accounts of Digital Realty Trust, Inc., the Operating Partnership and the subsidiaries of the Operating Partnership. Intercompany balances and transactions have been eliminated.

The accompanying interim condensed consolidated financial statements are unaudited, but have been prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) for interim financial information and in compliance with the rules and regulations of the United States Securities and Exchange Commission. Accordingly, they do not include all of the disclosures required by U.S. GAAP for complete financial statements. In the opinion of management, all adjustments necessary for a fair presentation have been included. All such adjustments are considered to be of a normal recurring nature, except as otherwise indicated. The results of operations for the interim periods are not necessarily indicative of the results to be obtained for the full fiscal year. These condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and the notes thereto included in our annual report on Form 10-K for the year ended December 31, 2014.

The notes to the condensed consolidated financial statements of Digital Realty Trust, Inc. and the Operating Partnership have been combined to provide the following benefits:

- enhancing investors' understanding of the Company and the Operating Partnership by enabling investors to view the business as a whole in the same manner as management views and operates the business;
- eliminating duplicative disclosure and providing a more streamlined and readable presentation since a substantial portion of the disclosure applies to both the Company and the Operating Partnership; and

- creating time and cost efficiencies through the preparation of one set of notes instead of two separate sets of notes.

There are a few differences between the Company and the Operating Partnership, which are reflected in these condensed consolidated financial statements. We believe it is important to understand the differences between the Company and the Operating Partnership in the context of how we operate as an interrelated consolidated company. Digital Realty Trust, Inc.'s only material asset is its ownership of partnership interests of the Operating Partnership and a $242.7 million intercompany

loan, which was repaid subsequent to the period covered by this report. As a result, Digital Realty Trust, Inc. generally does not conduct business itself, other than acting as the sole general partner of the Operating Partnership, issuing public securities from time to time and guaranteeing certain unsecured debt of the Operating Partnership and certain of its subsidiaries and affiliates. Digital Realty Trust, Inc. itself has not issued any indebtedness but guarantees the unsecured debt of the Operating Partnership and certain of its subsidiaries and affiliates, as disclosed in these notes.

The Operating Partnership holds substantially all the assets of the Company and holds the ownership interests in the Company's joint ventures. The Operating Partnership conducts the operations of the business and is structured as a partnership with no publicly traded equity. Except for net proceeds from public equity issuances by Digital Realty Trust, Inc., which are generally contributed to the Operating Partnership in exchange for partnership units or loaned to Digital Realty Trust, L.P. on a temporary basis prior to contribution in exchange for partnership units, the Operating Partnership generally generates the capital required by the Company's business primarily through the Operating Partnership's operations, by the Operating Partnership's or its affiliates' direct or indirect incurrence of indebtedness or through the issuance of partnership units.

The presentation of noncontrolling interests in operating partnership, stockholders' equity and partners' capital are the main areas of difference between the condensed consolidated financial statements of Digital Realty Trust, Inc. and those of the Operating Partnership. The common limited partnership interests held by the limited partners in the Operating Partnership are presented as limited partners' capital within partners' capital in the Operating Partnership's condensed consolidated financial statements and as noncontrolling interests in operating partnership within equity in Digital Realty Trust, Inc.'s condensed consolidated financial statements. The common and preferred partnership interests held by Digital Realty Trust, Inc. in the Operating Partnership are presented as general partner's capital within partners' capital in the Operating Partnership's condensed consolidated financial statements and as preferred stock, common stock, additional paid-in capital and accumulated dividends in excess of earnings within stockholders' equity in Digital Realty Trust, Inc.'s condensed consolidated financial statements. The differences in the presentations between stockholders' equity and partners' capital result from the differences in the equity issued at the Digital Realty Trust, Inc. and the Operating Partnership levels.

To help investors understand the significant differences between the Company and the Operating Partnership, these consolidated financial statements present the following separate sections for each of the Company and the Operating Partnership:

- condensed consolidated face financial statements; and
- the following notes to the condensed consolidated financial statements:
- "Debt of the Company" and "Debt of the Operating Partnership";
- "Income per Share" and "Income per Unit"; and
- "Equity and Accumulated Other Comprehensive Income, Net" and "Capital and Accumulated Other Comprehensive Income".

In the sections that combine disclosure of Digital Realty Trust, Inc. and the Operating Partnership, these notes refer to actions or holdings as being actions or holdings of the Company. Although the Operating Partnership is generally the entity that enters into contracts and joint ventures and holds assets and debt, reference to the Company is appropriate because the business is one enterprise and the Company generally operates the business through the Operating Partnership.

(b) Cash Equivalents

For the purpose of the condensed consolidated statements of cash flows, we consider short-term investments with original maturities of 90 days or less to be cash equivalents. As of September 30, 2015, cash equivalents consist of

investments in money market instruments.

(c) Investment in Unconsolidated Joint Ventures

The Company's investment in unconsolidated joint ventures is accounted for using the equity method, whereby the investment is increased for capital contributed and our share of the joint ventures' net income and decreased by distributions we receive and our share of any losses of the joint ventures.

We amortize the difference between the cost of our investments in unconsolidated joint ventures and the book value of the underlying equity into equity in earnings from unconsolidated affiliates on a straight-line basis consistent with the lives of the underlying assets.

(d) Capitalization of Costs

Direct and indirect project costs that are clearly associated with the development of properties are capitalized as incurred. Project costs include all costs directly associated with the development of a property, including construction costs, interest, property taxes, insurance, legal fees and costs of personnel working on the project. Indirect costs that do not clearly relate to the projects under development are not capitalized and are charged to expense as incurred.

Capitalization of costs begins when the activities necessary to get the development project ready for its intended use begins, which include costs incurred before the beginning of construction. Capitalization of costs ceases when the development project is substantially complete and ready for its intended use. Determining when a development project commences, and when it is substantially complete and ready for its intended use involves a degree of judgment. We generally consider a development project to be substantially complete and ready for its intended use upon receipt of a certificate of occupancy. If and when development of a property is suspended pursuant to a formal change in the planned use of the property, we will evaluate whether the accumulated costs exceed the estimated value of the project and write off the amount of any such excess accumulated costs. For a development project that is suspended for reasons other than a formal change in the planned use of such property, the accumulated project costs are evaluated for impairment consistent with our impairment policies for long-lived assets. Capitalized costs are allocated to the specific components of a project that are benefited.

We capitalized interest of approximately $2.4 million and $5.4 million during the three months ended September 30, 2015 and 2014, respectively, and $9.9 million and $15.6 million during the nine months ended September 30, 2015 and 2014, respectively. We capitalized amounts relating to compensation and other overhead expense of employees direct and incremental to construction and successful leasing activities of approximately $18.2 million and $14.4 million, during the three months ended September 30, 2015 and 2014, respectively, and $46.6 million and $42.3 million during the nine months ended September 30, 2015 and 2014, respectively. Capitalized leasing costs of approximately $37.8 million and $37.1 million are included in improvements to investments in real estate in cash flows from investing activities in the condensed consolidated statements of cash flows for the nine months ended September 30, 2015 and 2014, respectively.

(e) Share-Based Compensation

The Company measures all share-based compensation awards at fair value on the date they are granted to employees and directors, and recognizes compensation cost, net of forfeitures, over the requisite service period for awards with only a service condition. The estimated fair value of the long-term incentive units and Class D Units (discussed in Note 13 "Incentive Plan") granted by us is being amortized on a straight-line basis over the expected service period. The fair value of share-based compensation awards that contain a market condition is measured using a Monte Carlo simulation method and not adjusted based on actual achievement of the performance goals.

(f) Income Taxes

Digital Realty Trust, Inc. has elected to be treated as a real estate investment trust (a “REIT”) for federal income tax purposes. As a REIT, Digital Realty Trust, Inc. generally is not required to pay federal corporate income tax to the extent taxable income is currently distributed to its stockholders. If Digital Realty Trust, Inc. fails to qualify as a REIT in any taxable year, it will be subject to federal income tax (including any applicable alternative minimum tax) on its taxable income at regular corporate tax rates.

The Company is subject to foreign, state and local income taxes in the jurisdictions in which it conducts business. The Company’s U.S. consolidated taxable REIT subsidiaries are subject to both federal and state income taxes to the extent there is taxable income. Accordingly, the Company recognizes current and deferred income taxes for its taxable REIT subsidiaries, certain states and non-U.S. jurisdictions, as appropriate.

We assess our significant tax positions in accordance with U.S. GAAP for all open tax years and determine whether we have any material unrecognized liabilities from uncertain tax benefits. If a tax position is not considered "more-likely-than-not" to be sustained solely on its technical merits, no benefits of the tax position are to be recognized (for financial statement purposes). As of September 30, 2015 and December 31, 2014, we have no assets or liabilities for uncertain tax positions. We classify interest and penalties from significant uncertain tax positions as interest expense and operating expense, respectively, in our condensed consolidated income statements. For the three and nine months ended September 30, 2015 and 2014, we had no such

interest or penalties. The tax year 2012 and thereafter remain open to examination by the major taxing jurisdictions with which the Company files tax returns.
See Note 10 "Income Taxes" for further discussion on income taxes.

(g) Presentation of Transactional-based Taxes
We account for transactional-based taxes, such as value added tax, or VAT, for our international properties on a net basis.
(h) Fee Income
Occasionally, customers engage the company for certain services. The nature of these services historically involves property management, construction management, and assistance with financing. The proper revenue recognition of these services can be different, depending on whether the arrangements are service revenue or contractor type revenue. Service revenues are typically recognized on an equal monthly basis based on the minimum fee to be earned. The monthly amounts could be adjusted depending on if certain performance milestones are met.
Fee income also includes management fees. These fees arise from contractual agreements with entities in which we have a noncontrolling interest. The management fees are recognized as earned under the respective agreements. Management and other fee income related to partially owned entities are recognized to the extent attributable to the unaffiliated interest.
(i) Assets and Liabilities Measured at Fair Value
Fair value under U.S. GAAP is a market-based measurement, not an entity-specific measurement. Therefore, our fair value measurements are determined based on the assumptions that market participants would use in pricing the asset or liability. As a basis for considering market participant assumptions in fair-value measurements, we use a fair-value hierarchy that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity (observable inputs that are classified within Levels 1 and 2 of the hierarchy) and the reporting entity’s own assumptions about market participant assumptions (unobservable inputs classified within Level 3 of the hierarchy).
Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access. Level 2 inputs are inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs may include quoted prices for similar assets and liabilities in active markets, as well as inputs that are observable for the asset or liability (other than quoted prices), such as interest rates, foreign exchange rates, and yield curves that are observable at commonly quoted intervals. Level 3 inputs are unobservable inputs for the asset or liability which are typically based on an entity’s own assumptions, as there is little, if any, related market activity. In instances where the determination of the fair-value measurement is based on inputs from different levels of the fair-value hierarchy, the lowest level input that is significant would be used to determine the fair-value measurement in its entirety. Our assessment of the significance of a particular input to the fair-value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

(j) Transactions Expense
Transactions expense includes acquisition-related expenses and other business development expenses, which are expensed as incurred. Acquisition-related expenses include closing costs, broker commissions and other professional fees, including legal and accounting fees related to acquisitions and significant transactions.

(k) Gains on Sale of Properties

Gains on sale of properties are recognized using the full accrual or partial sale methods, as applicable, in accordance with U.S. GAAP, provided various criteria relating to the terms of sale and any subsequent involvement with the real estate sold are satisfied.

(l) Management's Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the

date of the condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates made. On an on-going basis, we evaluate our estimates, including those related to the valuation of our real estate properties, contingent consideration, accounts receivable and deferred rent receivable, performance-based equity compensation plans, the completeness of accrued liabilities and Digital Realty Trust, Inc.'s qualification as a REIT. We base our estimates on historical experience, current market conditions, and various other assumptions that are believed to be reasonable under the circumstances. Actual results may vary from those estimates and those estimates could vary under different assumptions or conditions.

(m) Segment and Geographic Information

All of our properties generate similar revenues and expenses related to tenant rent and reimbursements and operating expenses. The delivery of our products is consistent across all properties and although services are provided to a wide range of customers, the types of real estate services provided to them are standardized throughout the portfolio. As such, the properties in our portfolio have similar economic characteristics and the nature of the products and services provided to our customers and the method to distribute such services are consistent throughout the portfolio. Consequently, our properties qualify for aggregation into one reporting segment.

Operating revenues from properties in the United States were $334.5 million and $314.9 million and outside the United States were $101.4 million and $97.3 million for the three months ended September 30, 2015 and 2014, respectively. Operating revenues from properties in the United States were $971.6 million and $915.7 million and outside the United States were $291.3 million and $288.6 million for the nine months ended September 30, 2015 and 2014, respectively. We had long-lived assets located in the United States of $5.4 billion and $5.4 billion and outside the United States of $2.6 billion and $2.7 billion as of September 30, 2015 and December 31, 2014, respectively. Operating revenues from properties located in the United Kingdom were $55.2 million and $55.1 million, or 12.7% and 13.4% of total operating revenues, for the three months ended September 30, 2015 and 2014, respectively. Operating revenues from properties located in the United Kingdom were $160.1 million and $164.5 million, or 12.7% and 13.7% of total operating revenues, for the nine months ended September 30, 2015 and 2014, respectively. No other foreign country comprised more than 10% of total operating revenues for each of these periods. We had long-lived assets located in the United Kingdom of $1.7 billion and $1.7 billion, or 20.9% and 21.3% of total long-lived assets, as of September 30, 2015 and December 31, 2014, respectively. No other foreign country comprised more than 10% of total long-lived assets as of September 30, 2015 and December 31, 2014.

(n) Reclassifications

Certain reclassifications of prior year amounts have been made to conform to the current year presentation. During the three and nine months ended September 30, 2014, $0.1 million and $0.3 million, respectively, were reclassified from rental property operating and maintenance expense to other expense. Additionally, as of December 31, 2014, $6.5 million was reclassified from cash and cash equivalents to restricted cash to correct an immaterial classification error related to certain bank accounts for which certain mortgage lenders have disbursement approval rights.

(o) Recent Accounting Pronouncements

In February 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2015-02, Consolidation (Topic 810): Amendments to the Consolidation Analysis, which provides guidance on the consolidation evaluation for reporting organizations that are required to evaluate whether they should consolidate certain legal entities. In accordance with the guidance, all legal entities are subject to reevaluation under the revised consolidation model. The guidance is effective in the first quarter of 2016, and early adoption is permitted. We are currently evaluating the potential impact of the adoption of ASU 2015-02 on our consolidated financial statements.

On April 1, 2015, the FASB voted to defer the effective date of ASU No. 2014-09, which outlines a single comprehensive model for entities to use in accounting for revenues arising from contracts with customers and notes that lease contracts with customers are a scope exception. Public business entities may elect to adopt the amendments as of the original effective date; however, if the proposed deferral is approved, adoption is required for annual reporting periods beginning after December 15, 2017. We are currently assessing the impact of the guidance on our consolidated financial statements.

DIGITAL REALTY TRUST, INC. AND SUBSIDIARIES
DIGITAL REALTY TRUST, L.P. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)
September 30, 2015 and 2014

On April 17, 2015, the FASB issued ASU No. 2015-03, Simplifying the Presentation of Debt Issuance Costs, which requires debt issuance costs to be presented in the balance sheet as a direct deduction from the associated debt liability. Currently, debt issuance costs are recorded as an asset and amortization of these deferred financing costs is recorded in interest expense. Under the new standard, debt issuance costs will continue to be amortized over the life of the debt instrument and amortization will continue to be recorded in interest expense. The new standard is effective for the Company on January 1, 2016 and will be applied on a retrospective basis. The Company is currently evaluating ASU 2015-03, and anticipates a change in our presentation only since the standard does not alter the accounting for debt issuance costs.

In September 2015, the FASB issued ASU 2015-16, Simplifying the Accounting for Measurement Period Adjustments (Topic 805). ASU 2015-16 requires an acquirer in a business combination to recognize provisional amounts when measurements were incomplete as of the end of a reporting period as an adjustment in the reporting period in which the provisional amount is determined. Prior to this standard, the acquirer was required to adjust such provisional amounts by restating prior period financial statements. ASU 2015-16 is effective for the annual period ending December 31, 2016 and for annual periods and interim periods thereafter with early adoption permitted. The Company elected to early adopt this standard effective with the interim period beginning July 1, 2015 and this standard did not have a material effect on the consolidated financial statements.

3. Investments in Real Estate

We acquired the following real estate properties during the nine months ended September 30, 2015:

Location	Metropolitan Area	Date Acquired	Amount (in millions) [1]
Deer Park 3 [2]	Melbourne	April 15, 2015	$1.6
3 Loyang Way [3][4]	Singapore	June 25, 2015	45.0
			$46.6

(1) Purchase price in U.S. dollars and excludes capitalized closing costs on land acquisitions. Purchase prices for acquisitions outside the United States are based on the exchange rate at the date of acquisition.

(2) Represents currently vacant land which is not included in our operating property count.

(3) Represents a development property with an existing shell, which is included in our operating property count. This acquisition lacked key inputs to qualify as a business combination under purchase accounting guidance, and has therefore been accounted for as an asset acquisition, not a business combination.

(4) Property is subject to a ground lease, which expires in February 2024, with a renewal provision of an additional 28 years upon satisfaction of certain requirements.

Dispositions

We sold the following real estate properties during the nine months ended September 30, 2015:

Location	Metropolitan Area	Date Sold	Gross Proceeds (in millions)	Gain on Sale (in millions)
100 Quannapowitt Parkway	Boston	February 5, 2015	$31.1	$10.1
3300 East Birch Street	Los Angeles	March 31, 2015	14.2	7.5
833 Chestnut Street	Philadelphia	April 30, 2015	160.8 [1]	76.7
			$206.1	$94.3

(1) Gross proceeds includes a $9.0 million note receivable, which is expected to be collected by year-end.

We have identified certain non-core investment properties we intend to sell as part of our capital recycling strategy. Our capital recycling program is designed to identify non-strategic and underperforming assets that can be sold to generate proceeds that will support the funding of our core investment activity. We expect our capital recycling initiative will likewise have a meaningfully positive impact on overall return on invested capital. In addition, our

capital recycling program does not represent a strategic shift, as we are not entirely exiting regions or property types. During this process, we are evaluating the carrying value of certain investment properties identified for potential sale to ensure the carrying value is recoverable in light of a potentially shorter holding period. As a result of our evaluation, during the year ended December 31, 2014, we recognized approximately $126.5 million of impairment losses on five properties located in the Central, East and West regions. The fair

value of the five properties were primarily based on discounted cash flow analysis, and in certain cases, we supplemented the analysis by obtaining broker opinions of value. As of September 30, 2015, three of these five properties met the criteria to be classified as held for sale.

As of September 30, 2015, the Company had taken the necessary actions to conclude that an additional five properties (in addition to the three properties referenced above) to be disposed of as part of our capital recycling strategy met the criteria to be classified as held for sale. As of September 30, 2015, these eight properties had an aggregate carrying value of $173.5 million within total assets and $6.9 million within total liabilities and are shown as assets held for sale and obligations associated with assets held for sale on the condensed consolidated balance sheet. The eight properties are not representative of a significant component of our portfolio, nor do the potential sales represent a significant shift in our strategy.

September 30, 2015 and 2014

4. Investment in Unconsolidated Joint Ventures

As of September 30, 2015, our investment in unconsolidated joint ventures consists of effective 50% interests in three joint ventures that own data center properties at 2001 Sixth Avenue in Seattle, Washington, 2020 Fifth Avenue in Seattle, Washington and 33 Chun Choi Street in Hong Kong, and effective 20% interests in two joint ventures, one of which owns 10 data center properties with an investment fund managed by Prudential Real Estate Investors (PREI®), and the other which owns one data center property with an affiliate of Griffin Capital Essential Asset REIT, Inc. (GCEAR). The following tables present summarized financial information for the joint ventures as of September 30, 2015 and December 31, 2014 and for the nine months ended September 30, 2015 and 2014 (unaudited, in thousands):

	As of September 30, 2015					Nine Months Ended September 30, 2015			
2015	Net Investment in Properties	Total Assets	Debt	Total Liabilities	Equity	Revenues	Property Operating Expense	Net Operating Income	Net Income
Total Unconsolidated Joint Ventures	$763,828	$939,481	$460,418	$558,704	$380,777	$96,407	$(26,431)	$69,976	$28,303
Our investment in and share of equity in earnings of unconsolidated joint ventures					$103,703				$12,170

	As of December 31, 2014					Nine Months Ended September 30, 2014			
2014	Net Investment in Properties	Total Assets	Debt	Total Liabilities	Equity	Revenues	Property Operating Expense	Net Operating Income	Net Income
Total Unconsolidated Joint Ventures	$779,752	$942,107	$461,548	$569,895	$372,212	$71,882	$(17,409)	$54,473	$23,350
Our investment in and share of equity in earnings of unconsolidated joint ventures					$94,729				$9,513

Prudential Real Estate Investors (PREI ®) Joint Venture

On March 5, 2014, we contributed the property at 636 Pierce Street in Somerset, New Jersey, which we acquired in December 2013, to our unconsolidated joint venture with the PREI® fund that was formed in September 2013. The property was valued at approximately $40.4 million and subject to $26.1 million in debt, which the joint venture assumed. The PREI® fund contributed approximately $11.4 million in cash for their 80% share of the net asset value of $14.3 million. Subsequent to the closing, the joint venture refinanced the existing debt with $23.0 million drawn from the joint venture's bank facility. Including the refinance costs, the PREI® fund contributed $17.5 million for the

636 Pierce Street property, bringing their contributed capital in the joint venture to $164.8 million.
The transaction produced a $1.9 million gain for the Company representing the difference between the $11.4 million of cash proceeds received by the Company for its 80% share of the net asset less the Company's book value.
Griffin Capital Essential Asset REIT, Inc. (GCEAR) Joint Venture

On September 9, 2014, we formed a joint venture with an affiliate of GCEAR. We contributed to the joint venture the property located at 43915 Devin Shafron Drive (Building A) in Ashburn, Virginia, which is a Turn-Key Flex® data center property valued at approximately $185.5 million (excluding approximately $2.1 million of closing costs). GCEAR contributed cash to the joint venture and holds an 80% interest in the joint venture. We retained a 20% interest in the joint venture. The joint venture agreement provides for a current annual preferred return from cash flow first to GCEAR and then to us, after which a portion of any excess cash flows is shared by the partners based on their respective interests and the remaining portion is paid to us as a promote interest. We perform the day-to-day accounting and property management functions for the joint venture and the property and, as such, earn management fees. Although we are the managing member of the joint venture and manage the day-to-day activities, certain major decisions, including approval of annual budgets, require approval of the GCEAR member.

Table of Contents
DIGITAL REALTY TRUST, INC. AND SUBSIDIARIES
DIGITAL REALTY TRUST, L.P. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)
September 30, 2015 and 2014

Thus, we concluded we do not own a controlling interest and account for our interest in the joint venture as an equity method investment.

The joint venture arranged a $102.0 million five-year secured bank loan at LIBOR plus 225 basis points, representing a loan-to-value ratio of approximately 55%. The joint venture entered into an interest rate swap agreement to effectively fix the interest rate on approximately $51.0 million of borrowings under the loan through September 2019. Two one-year extensions of the maturity date are available under the loan agreement, which the joint venture may exercise if certain conditions are met. Proceeds from this loan offset the initial cash capital contribution amount required from GCEAR and was used to provide us with a special distribution on account of a portion of the contribution value of the property. The transaction generated approximately $167.5 million of net proceeds to us, comprised of our share of the initial draw-down on the bank loan in addition to GCEAR's equity contribution, less our share of closing costs. Accordingly we recognized a gain of approximately $93.5 million on the sale of the 80% interest in the joint venture during the three months ended September 30, 2014.

Differences between the Company's investment in the joint ventures and the amount of the underlying equity in net assets of the joint ventures are due to basis differences resulting from the Company's equity investment recorded at its historical basis versus the fair value of the Company's contributed interest in the joint ventures. Our proportionate share of the earnings or losses related to these unconsolidated joint ventures is reflected as equity in earnings of unconsolidated joint ventures on the accompanying consolidated income statements.

5. Acquired Intangible Assets and Liabilities

The following summarizes our acquired intangible assets (acquired in-place lease value and acquired above-market lease value) and intangible liabilities (acquired below-market lease value) as of September 30, 2015 and December 31, 2014.

(Amounts in thousands)	Balance as of September 30, 2015	December 31, 2014
Acquired in-place lease value:		
Gross amount	$652,629	$680,419
Accumulated amortization	(460,469)	(452,739)
Net	$192,160	$227,680
Acquired above-market leases:		
Gross amount	$118,881	$126,677
Accumulated amortization	(88,264)	(88,072)
Net	$30,617	$38,605
Acquired below-market leases:		
Gross amount	$278,514	$282,670
Accumulated amortization	(189,882)	(178,435)
Net	$88,632	$104,235

Amortization of acquired below-market leases, net of acquired above-market leases, resulted in an increase to rental revenues of $2.2 million and $2.4 million for the three months ended September 30, 2015 and 2014, respectively, and $6.9 million and $7.7 million for the nine months ended September 30, 2015 and 2014, respectively. The expected average remaining lives for acquired below-market leases and acquired above-market leases is 5.6 years and 3.4 years, respectively, as of September 30, 2015. Estimated annual amortization of acquired below-market leases, net of acquired above-market leases, for each of the five succeeding years and thereafter, commencing October 1, 2015 is as

follows:

(Amounts in thousands)	
Remainder of 2015	$1,994
2016	7,554
2017	6,143
2018	4,534
2019	4,610
Thereafter	33,180
Total	$58,015

Amortization of acquired in-place lease value (a component of depreciation and amortization expense) was $10.1 million and $16.5 million for the three months ended September 30, 2015 and 2014, respectively, and $32.2 million and $50.0 million for the nine months ended September 30, 2015 and 2014, respectively. The expected average amortization period for acquired in-place lease value is 6.0 years as of September 30, 2015. The weighted average remaining contractual life for acquired leases excluding renewals or extensions is 4.6 years as of September 30, 2015. Estimated annual amortization of acquired in-place lease value for each of the five succeeding years and thereafter, commencing October 1, 2015 is as follows:

(Amounts in thousands)	
Remainder of 2015	$8,371
2016	31,893
2017	27,367
2018	25,100
2019	22,600
Thereafter	76,829
Total	$192,160

6. Debt of the Company

In this Note 6, the “Company” refers only to Digital Realty Trust, Inc. and not to any of its subsidiaries.

The Company itself does not currently have any indebtedness. All debt is currently held directly or indirectly by the Operating Partnership.

Guarantee of Debt

The Company guarantees the Operating Partnership’s obligations with respect to its 5.875% notes due 2020 (2020 Notes), 5.250% notes due 2021 (2021 Notes), 3.950% notes due 2022 (3.950% 2022 Notes), 3.625% notes due 2022 (3.625% 2022 Notes) and its unsecured senior notes sold to Prudential Investment Management, Inc. and certain of its affiliates pursuant to the Amended and Restated Note Purchase and Private Shelf Agreement, as amended, which we refer to as the Prudential Shelf Facility. The Company and the Operating Partnership guarantee the obligations of Digital Stout Holding, LLC, a wholly owned subsidiary of the Operating Partnership, with respect to its 4.750% notes due 2023 (2023 Notes) and 4.250% notes due 2025 (2025 Notes). Prior to the completion of the Operating Partnership Merger (as defined in Note 7 "Debt of the Operating Partnership"), the Company and the Operating Partnership guaranteed the obligations of Digital Delta Holdings, LLC, a wholly owned subsidiary of Digital Realty Trust, Inc., with respect to its 3.400% Notes due 2020 (3.400% 2020 Notes) and 4.750% Notes due 2025 (4.750% 2025 Notes). Following the completion of the Operating Partnership Merger, the 3.400% 2020 Notes and 4.750% 2025 Notes became the senior unsecured obligations of the Operating Partnership and remain guaranteed by the Company. The Company is also the guarantor of the Operating Partnership’s and its subsidiary borrowers’ obligations under the global revolving credit facility and unsecured term loan.

Total indebtedness			$4,748,579	$4,673,127

(1) The interest rate for borrowings under the global revolving credit facility equals the applicable index plus a margin of 110 basis points, which is based on the current credit ratings of our long-term debt. An annual facility fee of 20 basis points, which is based on the credit ratings of our long-term debt, is due and payable quarterly on the total commitment amount of the facility. Two six-month extensions are available, which we may exercise if certain conditions are met.

(2) Balances as of September 30, 2015 and December 31, 2014 are as follows (balances, in thousands):

Denomination of Draw	Balance as of September 30, 2015	Weighted-average interest rate	Balance as of December 31, 2014	Weighted-average interest rate

September 30, 2015 and 2014

(d) Based on exchange rates of $1.56 to £1.00, $1.21 to €1.00, $0.82 to 1.00 AUD, $0.13 to 1.00 HKD, $0.01 to 1.00 JPY, $0.75 to 1.00 SGD and $0.86 to 1.00 CAD, respectively, as of December 31, 2014.

(3) Interest rates are based on our current senior unsecured debt ratings and are 120 basis points over the applicable index for floating rate advances. Two six-month extensions are available, which we may exercise if certain conditions are met.

(4) Balances as of September 30, 2015 and December 31, 2014 are as follows (balances, in thousands):

Denomination of Draw	Balance as of September 30, 2015		Weighted-average interest rate		Balance as of December 31, 2014		Weighted-average interest rate	
U.S. dollar ($)	$410,905		1.40 %	(b)	$410,905		1.36 %	(d)
Singapore dollar (SGD)	160,659	(a)	2.08 %	(b)	172,426	(c)	1.45 %	(d)
British pound sterling (£)	182,935	(a)	1.78 %		188,365	(c)	1.76 %	
Euro (€)	111,211	(a)	1.20 %		120,375	(c)	1.22 %	
Australian dollar (AUD)	72,566	(a)	3.34 %		84,529	(c)	3.98 %	
Total	$938,276		1.72 %	(b)	$976,600		1.66 %	(d)

(a) Based on exchange rates of $0.70 to 1.00 SGD, $1.51 to £1.00, $1.12 to €1.00 and $0.70 to 1.00 AUD, respectively, as of September 30, 2015.

(b) As of September 30, 2015, the weighted-average interest rate reflecting interest rate swaps was 1.88% (U.S. dollar), 2.16% (Singapore dollar) and 1.94% (Total). See Note 14 "Derivative Instruments" for further discussion on interest rate swaps.

(c) Based on exchange rates of $0.75 to 1.00 SGD, $1.56 to £1.00, $1.21 to €1.00 and $0.82 to 1.00 AUD, respectively, as of December 31, 2014.

(d) As of December 31, 2014, the weighted-average interest rate reflecting interest rate swaps was 1.92% (U.S. dollar), 2.01% (Singapore dollar) and 2.00% (Total). See Note 14 "Derivative Instruments" for further discussion on interest rate swaps.

(5) The respective borrower’s assets and credit are not available to satisfy the debts and other obligations of affiliates or any other person.

(6) We have entered into interest rate swap agreements as a cash flow hedge for interest generated by the U.S. dollar and Singapore dollar tranches of the unsecured term loan. See Note 14 "Derivative Instruments" for further information.

(7) These unsecured senior notes were repaid in full at maturity.

(8) On May 26, 2015, the Operating Partnership redeemed the entire outstanding principal amount of its 4.500% Notes due 2015 (2015 Notes), at a redemption price of 100% of the principal amount of the 2015 Notes plus accrued and unpaid interest thereon up to, but excluding, the redemption date.

(9) On June 23, 2015, the Operating Partnership issued $500.0 million in aggregate principal amount of notes, maturing on July 1, 2022 with an interest rate of 3.950% per annum. The purchase price paid by the initial purchasers was 99.236% of the principal amount.

(10) Based on exchange rate of $1.51 to £1.00 as of September 30, 2015 and $1.56 to £1.00 as of December 31, 2014.

(11) This loan was repaid in full in September 2015.

Global Revolving Credit Facility

On August 15, 2013, the Operating Partnership refinanced its global revolving credit facility, increasing its total borrowing capacity to $2.0 billion from $1.8 billion. The global revolving credit facility has an accordion feature that would enable us to increase the borrowing capacity of the credit facility to $2.55 billion, subject to the receipt of lender commitments and other conditions precedent. The refinanced facility matures on November 3, 2017, with two six-month extension options available. The interest rate for borrowings under the expanded facility equals the applicable index plus a margin which is based on the credit ratings of our long-term debt and is currently 110 basis points. An annual facility fee on the total commitment amount of the facility, based on the credit ratings of our long-term debt, currently 20 basis points, is payable quarterly. Funds may be drawn in U.S., Canadian, Singapore, Australian and Hong Kong dollars, as well as Euro, British pound sterling, Swiss franc, Japanese yen and Mexican peso denominations. As of September 30, 2015, interest rates are based on 1-month LIBOR, 1-month GBP LIBOR, 1-month EURIBOR, 1-month BBR, 1-month HIBOR, 1-month JPY LIBOR, 1-month SOR and 1-month

CDOR plus a margin of 1.10%. The facility also bore a base borrowing rate of 3.35% (USD) which is based on U.S. Prime Rate plus a margin of 0.10%. We have used and intend to use available borrowings under the global revolving credit facility to acquire additional properties, to fund development opportunities and for general working capital and other corporate purposes, including potentially for the repurchase, redemption or retirement of outstanding debt or equity securities. As of September 30, 2015, we have capitalized approximately $18.0 million of financing costs related to the global revolving credit facility. As of September 30, 2015, approximately $689.0 million was drawn under the global revolving credit facility and $5.5 million of letters of credit were issued.

The global revolving credit facility contains various restrictive covenants, including limitations on our ability to incur additional indebtedness, make certain investments or merge with another company, and requirements to maintain financial coverage ratios, including with respect to unencumbered assets. In addition, the global revolving credit facility restricts Digital Realty Trust, Inc. from making distributions to its stockholders, or redeeming or otherwise repurchasing shares of its capital stock, after the occurrence and during the continuance of an event of default, except in limited circumstances including as necessary to enable Digital Realty Trust, Inc. to maintain its qualification as a REIT and to minimize the payment of income or excise tax. As of September 30, 2015, we were in compliance with all of such covenants.

Unsecured Term Loan

On August 15, 2013, we refinanced the senior unsecured multi-currency term loan facility, increasing its total borrowing capacity to $1.0 billion from $750.0 million. Pursuant to the accordion feature, total commitments can be increased to $1.1 billion, subject to the receipt of lender commitments and other conditions precedent. The facility matures on April 16, 2017, with two six-month extension options available. Interest rates are based on our senior unsecured debt ratings and are currently 120 basis points over the applicable index for floating rate advances. Funds may be drawn in U.S., Singapore and Australian dollars, as well as Euro and British pound sterling denominations with the option to add Hong Kong dollars and Japanese yen upon an accordion exercise. Based on exchange rates in effect at September 30, 2015, the balance outstanding is approximately $938.3 million. We have used borrowings under the term loan for acquisitions, repayment of indebtedness, development, working capital and general corporate purposes. The covenants under this loan are consistent with our global revolving credit facility and, as of September 30, 2015, we were in compliance with all of such covenants. As of September 30, 2015, we have capitalized approximately $8.4 million of financing costs related to the unsecured term loan.

3.950% Notes due 2022

On June 23, 2015, the Operating Partnership issued $500.0 million in aggregate principal amount of notes, maturing on July 1, 2022 with an interest rate of 3.950% per annum (the 3.950% 2022 Notes). The public offering price was 99.236% of the principal amount. The 3.950% 2022 Notes are general unsecured senior obligations of the Operating Partnership, rank equally in right of payment with all other senior unsecured indebtedness of the Operating Partnership and are fully and unconditionally guaranteed by Digital Realty Trust, Inc. Interest on the 3.950% 2022 Notes is payable on January 1 and July 1 of each year, beginning on January 1, 2016. The net proceeds from the offering after deducting the original issue discount of approximately $3.8 million and underwriting commissions and expenses of approximately $4.4 million was approximately $491.8 million. The Operating Partnership will use the net proceeds from the offering of the 3.950% 2022 Notes to fund certain eligible green projects, including the development and redevelopment of such projects. Pending such uses, the Operating Partnership temporarily repaid borrowings under its global revolving credit facility. The 3.950% 2022 Notes have been reflected net of discount in the condensed consolidated balance sheet. The indenture governing the 3.950% 2022 Notes contains certain covenants, including (1) a leverage ratio not to exceed 60%, (2) a secured debt leverage ratio not to exceed 40% and (3) an interest coverage ratio of greater than 1.50, and also requires us to maintain total unencumbered assets of not less than 150% of the aggregate principal amount of unsecured debt. At September 30, 2015, we were in compliance

with each of these financial covenants.

3.400% Notes due 2020 and 4.750% Notes due 2025

On October 1, 2015, Digital Delta Holdings, LLC, a Delaware limited liability company and wholly owned subsidiary of Digital Realty Trust, Inc., issued $500.0 million aggregate principal amount of its 3.400% Notes due 2020 (the "3.400% 2020 Notes") and $450.0 million aggregate principal amount of its 4.750% Notes due 2025 (the "4.750% 2025 Notes" and together with the 3.400% 2020 Notes, the "Delta Holdings Notes"), fully and unconditionally guaranteed by Digital Realty Trust, Inc. and Digital Realty Trust, L.P. The terms of the Delta Holdings Notes are governed by an indenture, dated as of October 1, 2015, by and among Digital Delta Holdings, LLC, as issuer, Digital Realty Trust, Inc. and Digital Realty Trust, L.P., as guarantors, and Wells Fargo Bank, National Association, as trustee. The indenture contains various restrictive covenants, including

limitations on the ability of Digital Realty Trust, L.P. and its subsidiaries to incur additional indebtedness and requirements to maintain a pool of unencumbered assets.

Digital Delta Holdings, LLC used the net proceeds from the offering to fund a portion of the aggregate purchase price for the acquisition of Telx Holdings, Inc. (the "Telx Acquisition").

The purchase price paid by the initial purchasers for the 3.400% 2020 Notes and 4.750% 2025 Notes was 99.777% and 100.000% of the principal amount thereof, respectively. The 3.400% 2020 Notes and 4.750% 2025 Notes bear interest at 3.400% and 4.750% per annum, respectively. Interest is payable on April 1 and October 1 of each year, beginning April 1, 2016, until the respective maturity dates of October 1, 2020 and October 1, 2025.

Pursuant to the terms of the indenture, within five business days following the consummation of the Telx Acquisition, Digital Delta Holdings, LLC was required to merge with and into Digital Realty Trust, L.P., with Digital Realty Trust, L.P. surviving the merger (the "Operating Partnership Merger") and to assume Digital Delta Holdings, LLC's obligations under the Delta Holdings Notes and the related indenture and registration rights agreement by operation of law. The Operating Partnership Merger was consummated on October 13, 2015.

Subsequent to the Operating Partnership Merger, the Notes are the Operating Partnership's senior unsecured obligations and rank equally in right of payment with all of the Operating Partnership's other unsecured and unsubordinated indebtedness from time to time outstanding. However, the Delta Holdings Notes are effectively subordinated in right of payment to all of the operating partnership's existing and future secured indebtedness (to the extent of the collateral securing the same) and to all existing and future liabilities and preferred equity of the Operating Partnership's subsidiaries. Prior to the completion of the Operating Partnership Merger, Digital Realty Trust, Inc. and the Operating Partnership guaranteed the obligations of the Delta Holdings Notes. Following the completion of the Operating Partnership Merger, the Delta Holdings Notes became the senior unsecured obligations of the Operating Partnership and remained guaranteed by Digital Realty Trust, Inc.

The Delta Holdings Notes will be redeemable in whole at any time or in part from time to time, at the Operating Partnership's option, at a redemption price equal to the sum of:

- an amount equal to 100% of the principal amount of the Delta Holdings Notes to be redeemed plus accrued and unpaid interest up to, but not including, the redemption date; and
- a make-whole premium calculated in accordance with the indenture.

Notwithstanding the foregoing, if any of the 3.400% 2020 Notes are redeemed on or after September 1, 2020 or if any of the 4.750% 2025 Notes are redeemed on or after July 1, 2025, the redemption price will not include a make-whole premium.

Due to Parent Company

On August 24, 2015, Digital Realty Trust, Inc. completed an underwritten public offering of 10,000,000 shares of 6.350% Series I Cumulative Redeemable Preferred Stock (the "Series I Preferred Stock"), for net proceeds of approximately $242.7 million after deducting the underwriting discount. Digital Realty Trust, Inc. used the net proceeds from the offering to fund a portion of the aggregate purchase price for the Telx Acquisition. Pending the closing of the Telx Acquisition, Digital Realty Trust, Inc. loaned the net proceeds from the Series I Preferred Stock offering of approximately $242.7 million to the Operating Partnership. The intercompany note was scheduled to mature on January 11, 2016 with an interest rate of 4.50% per annum. As of September 30, 2015, the full amount of the intercompany note was outstanding and approximately $1.2 million of accrued interest was recorded during the three months ended September 30, 2015. On October 8, 2015, the Operating Partnership repaid the intercompany note in full, with accrued interest, in the amount of $244.1 million. On October 13, 2015, in connection with the consummation of the Operating Partnership Merger, the Operating Partnership issued to Digital Realty Trust, Inc. 10,000,000 series I cumulative redeemable preferred units with substantially identical terms as the Series I Preferred

Stock.

9. Income per Unit

The following is a summary of basic and diluted income per unit (in thousands, except unit and per unit amounts):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Net income available to common unitholders	$38,116	$111,586	$261,302	$188,848
Weighted average units outstanding—basic	138,467,947	138,308,130	138,481,046	135,381,624
Potentially dilutive common units:				
Stock options	19,983	52,629	20,629	46,649
Unvested incentive units	86,190	129,024	65,752	61,122
Market performance-based awards	618,078	272,262	483,538	109,301
Weighted average units outstanding—diluted	139,192,198	138,762,045	139,050,965	135,598,696
Income per unit:				
Basic	$0.28	$0.81	$1.89	$1.39
Diluted	$0.27	$0.80	$1.88	$1.39

We have excluded the following potentially dilutive securities in the calculations above as they would be antidilutive or not dilutive:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)
September 30, 2015 and 2014

10. Income Taxes

Digital Realty Trust, Inc. has elected to be treated and believes that it has been organized and has operated in a manner that has enabled it to qualify as a REIT for federal income tax purposes. As a REIT, Digital Realty Trust, Inc. is generally not subject to corporate level federal income taxes on earnings distributed currently to its stockholders. Since inception, Digital Realty Trust, Inc. has distributed at least 100% of its taxable income annually and intends to do so for the tax year ending December 31, 2015. As such, no provision for federal income taxes has been included in the accompanying condensed consolidated financial statements for the three and nine months ended September 30, 2015 and 2014.

The Operating Partnership is a partnership and is not required to pay federal income tax. Instead, taxable income is allocated to its partners, who include such amounts on their federal income tax returns. As such, no provision for federal income taxes has been included in the Operating Partnership's accompanying condensed consolidated financial statements.

We have elected taxable REIT subsidiary ("TRS") status for some of our consolidated subsidiaries. In general, a TRS may provide services that would otherwise be considered impermissible for REITs to provide and may hold assets that REITs cannot hold directly. Income taxes for TRS entities were accrued, as necessary, for the three and nine months ended September 30, 2015 and 2014.

For our TRS entities and foreign subsidiaries that are subject to U.S. federal, state and foreign income taxes, deferred tax assets and liabilities are established for temporary differences between the financial reporting basis and the tax basis of assets and liabilities at the enacted tax rates expected to be in effect when the temporary differences reverse. A valuation allowance for deferred tax assets is provided if we believe it is more likely than not that the deferred tax asset may not be realized, based on available evidence at the time the determination is made. An increase or decrease in the valuation allowance that results from the change in circumstances that causes a change in our judgment about the realizability of the related deferred tax asset is included in the income statement. Deferred tax assets (net of valuation allowance) and liabilities for our TRS entities and foreign subsidiaries were accrued, as necessary, for the three and nine months ended September 30, 2015 and 2014. As of September 30, 2015, we had deferred tax liabilities, net of deferred tax assets, of approximately $135.4 million primarily related to our foreign properties. The majority of our net deferred tax liability relates to differences between tax basis and book basis of the assets acquired in the Sentrum Portfolio acquisition during 2012.

11. Equity and Accumulated Other Comprehensive Income, Net

(a) Equity Distribution Agreements

Digital Realty Trust, Inc. entered into equity distribution agreements in June 2011, which we refer to as the 2011 Equity Distribution Agreements, with each of Merrill Lynch, Pierce, Fenner & Smith Incorporated, Citigroup Global Markets Inc., Credit Suisse Securities (USA) LLC, Deutsche Bank Securities Inc. and Morgan Stanley & Co. LLC, or the Agents, under which it can issue and sell shares of its common stock having an aggregate offering price of up to $400.0 million from time to time through, at its discretion, any of the Agents as its sales agents. The sales of common stock made under the 2011 Equity Distribution Agreements will be made in "at the market" offerings as defined in Rule 415 of the Securities Act. Cumulatively through September 30, 2015, Digital Realty Trust, Inc. has generated net proceeds of approximately $342.7 million from the issuance of approximately 5.7 million common shares under the 2011 Equity Distribution Agreements at an average price of $60.35 per share after payment of approximately $3.5 million of commissions to the sales agents and before offering expenses. No sales were made under the program during the nine months ended September 30, 2015 and 2014. As of September 30, 2015, shares of common stock having an aggregate offering price of $53.8 million remained available for offer and sale under the program.

(b) Forward Equity Sale

On July 20, 2015, Digital Realty Trust, Inc. completed an underwritten public offering of 10,500,000 shares of its common stock, all of which were offered in connection with forward sale agreements it entered into with certain financial institutions acting as forward purchasers. The forward purchasers borrowed and sold 10,500,000 shares of Digital Realty Trust, Inc.'s common stock in the public offering.

Digital Realty Trust, Inc. did not receive any proceeds from the sale of our common stock by the forward purchasers in the public offering. On October 8, 2015, Digital Realty Trust, Inc. physically settled in full the forward sale agreements by issuing an aggregate of 10,500,000 shares of its common stock to the forward counterparties in exchange for net proceeds of

approximately $674.1 million. Digital Realty Trust, Inc. used the net proceeds from the physical settlement of the forward sale agreements to fund a portion of the Telx Acquisition.

(c) Redeemable Preferred Stock

6.350% Series I Cumulative Redeemable Preferred Stock

On August 24, 2015, Digital Realty Trust, Inc. issued 10,000,000 shares of its 6.350% series I cumulative redeemable preferred stock (the "Series I Preferred Stock") for net proceeds of approximately $241.7 million. We used the net proceeds from the offering to fund a portion of the aggregate purchase price for the Telx Acquisition. Prior to the closing of the Telx Acquisition, we loaned the net proceeds from the offering to the Operating Partnership. Dividends are cumulative on the Series I Preferred Stock from the date of original issuance in the amount of $1.5875 per share each year, which is equivalent to 6.350% of the $25.00 liquidation preference per share. Dividends on the Series I Preferred Stock are payable quarterly in arrears. The first dividend payable on the Series I Preferred Stock on December 31, 2015 will be a pro rata dividend from and including the original issue date to and including December 31, 2015 in the amount of $0.56003 per share. The Series I Preferred Stock does not have a stated maturity date and is not subject to any sinking fund or mandatory redemption provisions. Upon liquidation, dissolution or winding up, the Series I Preferred Stock will rank senior to Digital Realty Trust, Inc. common stock and rank on parity with Digital Realty Trust, Inc.’s series E cumulative redeemable preferred stock, series F cumulative redeemable preferred stock, series G cumulative redeemable preferred stock and series H cumulative redeemable preferred stock with respect to the payment of distributions and other amounts. Digital Realty Trust, Inc. is not allowed to redeem the Series I Preferred Stock before August 24, 2020, except in limited circumstances to preserve its status as a REIT. On or after August 24, 2020, Digital Realty Trust, Inc. may, at its option, redeem the Series I Preferred Stock, in whole or in part, at any time or from time to time, for cash at a redemption price of $25.00 per share, plus all accrued and unpaid dividends on such Series I Preferred Stock up to but excluding the redemption date. Holders of the Series I Preferred Stock generally have no voting rights except for limited voting rights if Digital Realty Trust, Inc. fails to pay dividends for six or more quarterly periods (whether or not consecutive) and in certain other circumstances. Upon the occurrence of specified changes of control, as a result of which neither Digital Realty Trust, Inc.’s common stock nor the common securities of the acquiring or surviving entity (or American Depositary Receipts representing such securities) is listed on the New York Stock Exchange, the NYSE MKT, LLC or the NASDAQ Stock Market or listed or quoted on a successor exchange or quotation system, each holder of Series I Preferred Stock will have the right (unless, prior to the change of control conversion date specified in the Articles Supplementary governing the Series I Preferred Stock, Digital Realty Trust, Inc. has provided or provides notice of its election to redeem the Series I Preferred Stock) to convert some or all of the Series I Preferred Stock held by it into a number of shares of Digital Realty Trust, Inc.’s common stock per share of Series I Preferred Stock to be converted equal to the lesser of:

> the quotient obtained by dividing (i) the sum of the $25.00 liquidation preference plus the amount of any accrued and unpaid dividends to, but not including, the change of control conversion date (unless the change of control conversion date is after a record date for a Series I Preferred Stock dividend payment and prior to the corresponding Series I Preferred Stock dividend payment date, in which case no additional amount for such accrued and unpaid dividend will be included in this sum) by (ii) the common stock price specified in the Articles Supplementary governing the Series I Preferred Stock; and 0.76231, or the share cap, subject to certain adjustments;

subject, in each case, to provisions for the receipt of alternative consideration as described in the Articles Supplementary governing the Series I Preferred Stock. Except in connection with specified change of control transactions, the Series I Preferred Stock is not convertible into or exchangeable for any other property or securities of

Digital Realty Trust, Inc.

(d) Noncontrolling Interests in Operating Partnership

Noncontrolling interests in the Operating Partnership relate to the interests that are not owned by Digital Realty Trust, Inc. The following table shows the ownership interests in the Operating Partnership as of September 30, 2015 and December 31, 2014:

Table of Contents
DIGITAL REALTY TRUST, INC. AND SUBSIDIARIES
DIGITAL REALTY TRUST, L.P. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)
September 30, 2015 and 2014

	September 30, 2015		December 31, 2014	
	Number of units	Percentage of total	Number of units	Percentage of total
Digital Realty Trust, Inc.	135,843,684	98.0 %	135,626,255	97.8 %
Noncontrolling interests consist of:				
Common units held by third parties	1,421,314	1.0	1,463,814	1.1
Incentive units held by employees and directors (see Note 13)	1,414,299	1.0	1,549,847	1.1
	138,679,297	100.0 %	138,639,916	100.0 %

Limited partners have the right to require the Operating Partnership to redeem part or all of their common units for cash based on the fair market value of an equivalent number of shares of Digital Realty Trust, Inc. common stock at the time of redemption. Alternatively, Digital Realty Trust, Inc. may elect to acquire those common units in exchange for shares of Digital Realty Trust, Inc. common stock on a one-for-one basis, subject to adjustment in the event of stock splits, stock dividends, issuance of stock rights, specified extraordinary distributions and similar events. Pursuant to authoritative accounting guidance, Digital Realty Trust, Inc. evaluated whether it controls the actions or events necessary to issue the maximum number of shares that could be required to be delivered under the share settlement of the noncontrolling Operating Partnership common and incentive units. Based on the results of this analysis, we concluded that the common and incentive Operating Partnership units met the criteria to be classified within equity.

The redemption value of the noncontrolling Operating Partnership common units and the vested incentive units was approximately $170.5 million and $179.0 million based on the closing market price of Digital Realty Trust, Inc. common stock on September 30, 2015 and December 31, 2014, respectively.

The following table shows activity for the noncontrolling interests in the Operating Partnership for the nine months ended September 30, 2015:

	Common Units	Incentive Units	Total
As of December 31, 2014	1,463,814	1,549,847	3,013,661
Redemption of common units for shares of Digital Realty Trust, Inc. common stock (1)	(42,500)	—	(42,500)
Conversion of incentive units held by employees and directors for shares of Digital Realty Trust, Inc. common stock (1)	—	(76,087)	(76,087)
Cancellation of incentive units held by employees and directors	—	(150,140)	(150,140)
Grant of incentive units to employees and directors	—	90,679	90,679
As of September 30, 2015	1,421,314	1,414,299	2,835,613

(1) This redemption was recorded as a reduction to noncontrolling interests in the Operating Partnership and an increase to common stock and additional paid in capital based on the book value per unit in the accompanying condensed consolidated balance sheet of Digital Realty Trust, Inc.

(e) Dividends

We have declared and paid the following dividends on our common and preferred stock for the nine months ended September 30, 2015 (in thousands, except per share data):

Date dividend declared	Dividend payment date	Series E Preferred Stock	Series F Preferred Stock	Series G Preferred Stock	Series H Preferred Stock	Common Stock
February 25, 2015	March 31, 2015	$5,031	$3,023	$3,672	$6,730	$115,419

May 12, 2015	June 30, 2015	5,031	3,023	3,672	6,730	115,458
August 11, 2015	September 30, 2015	5,031	3,023	3,672	6,730	115,454
		$15,093	$9,069	$11,016	$20,190	$346,331
Annual rate of dividend per share		$1.750	$1.656	$1.469	$1.844	$3.400

Table of Contents
DIGITAL REALTY TRUST, INC. AND SUBSIDIARIES
DIGITAL REALTY TRUST, L.P. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)
September 30, 2015 and 2014

Distributions out of Digital Realty Trust, Inc.'s current or accumulated earnings and profits are generally classified as dividends whereas distributions in excess of its current and accumulated earnings and profits, to the extent of a stockholder's U.S. federal income tax basis in Digital Realty Trust, Inc.'s stock, are generally classified as a return of capital. Distributions in excess of a stockholder's U.S. federal income tax basis in Digital Realty Trust, Inc.'s stock are generally characterized as capital gain. Cash provided by operating activities has generally been sufficient to fund all distributions; however, in the future we may also need to utilize borrowings under the global revolving credit facility to fund all or a portion of distributions.

(f) Accumulated Other Comprehensive Income, Net

The accumulated balances for each item within other comprehensive income, net are as follows (in thousands):

	Foreign currency translation adjustments	Cash flow hedge adjustments	Accumulated other comprehensive income (loss), net
Balance as of December 31, 2014	$(39,567)	$(5,479)	$ (45,046)
Net current period change	(40,688)[1]	(4,290)	(44,978)
Reclassification to interest expense from interest rate swaps	—	2,036	2,036
Balance as of September 30, 2015	$(80,255)	$(7,733)	$ (87,988)

(1) During the first nine months of 2015, the U.S. dollar was generally stronger against the other currencies in which we transacted business, primarily the Euro and British pound sterling.

12. Capital and Accumulated Other Comprehensive Income

(a) Allocations of Net Income and Net Losses to Partners

Except for special allocations to holders of profits interest units described below in Note 13 "Incentive Plan—Long-Term Incentive Units," the Operating Partnership's net income will generally be allocated to the General Partner to the extent of the accrued preferred return on its preferred units, and then to the General Partner and the Operating Partnership's limited partners in accordance with the respective percentage interests in the common units issued by the Operating Partnership. Net loss will generally be allocated to the General Partner and the Operating Partnership's limited partners in accordance with the respective common percentage interests in the Operating Partnership until the limited partner's capital is reduced to zero and any remaining net loss would be allocated to the General Partner. However, in some cases, losses may be disproportionately allocated to partners who have guaranteed our debt. The allocations described above are subject to special allocations relating to depreciation deductions and to compliance with the provisions of Sections 704(b) and 704(c) of the Code, and the associated Treasury Regulations.

(b) Partnership Units

Limited partners have the right to require the Operating Partnership to redeem part or all of their common units for cash based on the fair market value of an equivalent number of shares of the General Partner's common stock at the time of redemption. Alternatively, the General Partner may elect to acquire those common units in exchange for shares of the General Partner's common stock on a one-for-one basis, subject to adjustment in the event of stock splits, stock dividends, issuance of stock rights, specified extraordinary distributions and similar events. Pursuant to authoritative accounting guidance, the Operating Partnership evaluated whether it controls the actions or events necessary to issue the maximum number of shares that could be required to be delivered under the share settlement of the limited partners' common units and the vested incentive units. Based on the results of this analysis, the Operating

Partnership concluded that the common and vested incentive Operating Partnership units met the criteria to be classified within capital.

The redemption value of the limited partners' common units and the vested incentive units was approximately $170.5 million and $179.0 million based on the closing market price of Digital Realty Trust, Inc.'s common stock on September 30, 2015 and December 31, 2014, respectively.

(c) Distributions

All distributions on the Operating Partnership's units are at the discretion of Digital Realty Trust, Inc.'s board of directors. The Operating Partnership has declared and paid the following distributions on its common and preferred units for the nine months ended September 30, 2015 (in thousands, except for per unit data):

Date distribution declared	Distribution payment date	Series E Preferred Units	Series F Preferred Units	Series G Preferred Units	Series H Preferred Units	Common Units
February 25, 2015	March 31, 2015	$5,031	$3,023	$3,672	$6,730	$117,896
May 12, 2015	June 30, 2015	5,031	3,023	3,672	6,730	117,938
August 11, 2015	September 30, 2015	5,031	3,023	3,672	6,730	117,962
		$15,093	$9,069	$11,016	$20,190	$353,796
Annual rate of distribution per unit		$1.750	$1.656	$1.469	$1.844	$3.400

(d) Accumulated Other Comprehensive Income

The accumulated balances for each item within other comprehensive income are as follows (in thousands):

	Foreign currency translation adjustments	Cash flow hedge adjustments	Accumulated other comprehensive loss
Balance as of December 31, 2014	$(42,138)	$(6,295)	$(48,433)
Net current period change	(41,480)[1]	(4,374)	(45,854)
Reclassification to interest expense from interest rate swaps	—	2,077	2,077
Balance as of September 30, 2015	$(83,618)	$(8,592)	$(92,210)

(1) During the first nine months of 2015, the U.S. dollar was generally stronger against the other currencies in which we transacted business, primarily the Euro and British pound sterling.

13. Incentive Plan

Our Amended and Restated 2004 Incentive Award Plan (as defined below) previously provided for the grant of incentive awards to employees, directors and consultants. Awards issuable under the Amended and Restated 2004 Incentive Award Plan included stock options, restricted stock, dividend equivalents, stock appreciation rights, long-term incentive units, cash performance bonuses and other incentive awards. Only employees were eligible to receive incentive stock options under the Amended and Restated 2004 Incentive Award Plan. Initially, we had reserved a total of 4,474,102 shares of common stock for issuance pursuant to the Digital Realty Trust, Inc., Digital Services, Inc. and Digital Realty Trust, L.P. 2004 Incentive Award Plan (the 2004 Incentive Award Plan), subject to certain adjustments set forth in the 2004 Incentive Award Plan. On May 2, 2007, Digital Realty Trust, Inc.'s stockholders approved the First Amended and Restated Digital Realty Trust, Inc., Digital Services, Inc. and Digital Realty Trust, L.P. 2004 Incentive Award Plan (as amended, the Amended and Restated 2004 Incentive Award Plan). The Amended and Restated 2004 Incentive Award Plan increased the aggregate number of shares of stock which could have been issued or transferred under the plan by 5,000,000 shares to a total of 9,474,102 shares, and provided that the maximum number of shares of stock with respect to awards granted to any one participant during a calendar

year was 1,500,000 shares and the maximum amount that could have been paid in cash during any calendar year with respect to any performance-based award not denominated in stock or otherwise for which the foregoing limitation would not be an effective limitation for purposes of Section 162(m) of the Code was $10.0 million.

On April 28, 2014, Digital Realty Trust, Inc. held its 2014 Annual Meeting of Stockholders, or the 2014 Annual Meeting, at which the Company's stockholders approved the Digital Realty Trust, Inc., Digital Services, Inc., and Digital Realty Trust, L.P. 2014 Incentive Award Plan (as amended, the 2014 Incentive Award Plan), which had been previously adopted by the Board of Directors and recommended to the stockholders for approval by the Company's Board of Directors. The 2014 Incentive Award

Table of Contents
DIGITAL REALTY TRUST, INC. AND SUBSIDIARIES
DIGITAL REALTY TRUST, L.P. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)
September 30, 2015 and 2014

Plan became effective and replaced the Amended and Restated 2004 Incentive Award Plan as of the date of such stockholder approval. The material features of the 2014 Incentive Award Plan are described in our definitive Proxy Statement filed on March 19, 2014 in connection with the 2014 Annual Meeting, which description is incorporated herein by reference.

As of September 30, 2015, 4,775,319 shares of common stock or awards convertible into or exchangeable for common stock remained available for future issuance under the 2014 Incentive Award Plan. Each long-term incentive unit and Class D Unit issued under the 2014 Incentive Award Plan counts as one share of common stock for purposes of calculating the limit on shares that may be issued under the 2014 Incentive Award Plan and the individual award limits set forth therein.

(a) Long-Term Incentive Units

Long-term incentive units, which are also referred to as profits interest units, may be issued to eligible participants for the performance of services to or for the benefit of the Operating Partnership. Long-term incentive units (other than Class D Units), whether vested or not, will receive the same quarterly per unit distributions as Operating Partnership common units, which equal per share distributions on Digital Realty Trust, Inc. common stock. Initially, long-term incentive units do not have full parity with common units with respect to liquidating distributions. If such parity is reached, vested long-term incentive units may be converted into an equal number of common units of the Operating Partnership at any time, and thereafter enjoy all the rights of common units of the Operating Partnership, including redemption rights. For a discussion of how long-term incentive units reach parity with common units, see note 13(a) to our consolidated financial statements for the fiscal year ended December 31, 2014, included in our Annual Report on 10-K for the year ended December 31, 2014.

Below is a summary of our long-term incentive unit activity for the nine months ended September 30, 2015.

Unvested Long-term Incentive Units	Units	Weighted-Average Grant Date Fair Value
Unvested, beginning of period	314,415	$ 59.34
Granted	90,679	64.79
Vested	(157,300)	60.25
Cancelled or expired	(22,496)	58.13
Unvested, end of period	225,298	61.03

The grant date fair values, which equal the market price of Digital Realty Trust, Inc. common stock on the grant date, are being expensed on a straight-line basis for service awards over four years, the current vesting period of the long-term incentive units.

Excluding the impact of our former Chief Executive Officer's equity acceleration in 2014 and subsequent cancellation in 2015, the expense recorded for the three months ended September 30, 2015 and 2014 related to long-term incentive units was approximately $1.5 million and $1.5 million, respectively, and approximately $4.6 million and $5.2 million for the nine months ended September 30, 2015 and 2014, respectively. We capitalized amounts relating to compensation expense of employees direct and incremental to construction and successful leasing activities of approximately $0.0 million and $0.3 million for the three months ended September 30, 2015 and 2014, respectively, and approximately $1.1 million and $1.1 million for the nine months ended September 30, 2015 and 2014, respectively. Unearned compensation representing the unvested portion of the long-term incentive units totaled $8.7 million and $9.3 million as of September 30, 2015 and December 31, 2014, respectively. We expect to recognize this unearned compensation over the next 2.3 years on a weighted-average basis.

(b) Market Performance-Based Awards

During the nine months ended September 30, 2015 and 2014, the Compensation Committee of the Board of Directors of the Company approved the grant of market performance-based Class D Units of the Operating Partnership and market performance-based restricted stock units, or RSUs, covering shares of the Company's common stock (collectively, the "awards"), under the Amended and Restated 2004 Incentive Award Plan and 2014 Incentive Plan, respectively, to officers and employees of the Company.

The awards, which were determined to contain a market condition, utilize total shareholder return, or TSR, over a three-year measurement period as the market performance metric. Awards will vest based on the Company's TSR relative to the MSCI US REIT Index, or RMS, over a three-year market performance period, or the Market Performance Period, commencing in January 2014 or January 2015, as applicable (or, if earlier, ending on the date on which a change in control of the Company occurs),

subject to continued services. Vesting with respect to the market condition is measured based on the difference between the Company's TSR percentage and the TSR percentage of the RMS, or the RMS Relative Market Performance. In the event that the RMS Relative Market Performance during the Market Performance Period is achieved at the "threshold," "target" or "high" level as set forth below, the awards will become vested as to the market condition with respect to the percentage of Class D units or RSUs, as applicable, set forth below:

Level	RMS Relative Market Performance (2014 Awards)	RMS Relative Market Performance (2015 Awards)	Market Performance Vesting Percentage	
Below Threshold Level	< 0 basis points	< -300 basis points	0	%
Threshold Level	0 basis points	-300 basis points	25	%
Target Level	325 basis points	100 basis points	50	%
High Level	> 650 basis points	> 500 basis points	100	%

If the RMS Relative Market Performance falls between the levels specified above, the percentage of the award that will vest with respect to the market condition will be determined using straight-line linear interpolation between such levels.

Following the completion of the Market Performance Period, the 2014 awards that have satisfied the market condition, if any, will vest 50% on February 27, 2017 and 50% on February 27, 2018, subject to continued employment through each applicable vesting date. Following the completion of the Market Performance Period, the 2015 awards that have satisfied the market condition, if any, will vest 50% on February 27, 2018 and 50% on February 27, 2019, subject to continued employment through each applicable vesting date.

Service-based vesting will be accelerated, in full or on a pro rata basis, in the event of a change in control, termination of employment by the Company without cause, or termination of employment by the award recipient for good reason, death, disability or retirement, in any case prior to the completion of the Market Performance Period. However, vesting with respect to the market condition will continue to be measured based on RMS Relative Market Performance during the three-year Market Performance Period (or, in the case of a change in control, shortened Market Performance Period).

The fair values of the 2014 awards and 2015 awards were measured using a Monte Carlo simulation to estimate the probability of the market vesting condition being satisfied. The Company's achievement of the market vesting condition is contingent on its TSR over a three-year market performance period, relative to the total shareholder return of the RMS. The Monte Carlo simulation is a probabilistic technique based on the underlying theory of the Black-Scholes formula, which was run for 100,000 trials to determine the fair value of the awards. For each trial, the payoff to an award is calculated at the settlement date and is then discounted to the grant date at a risk-free interest rate. The total expected value of the awards on the grant date was determined by multiplying the average value per award over all trials by the number of awards granted. Assumptions used in the 2014 valuation include expected stock price volatility of 33 percent and a risk-free interest rate of 0.67 percent. Assumptions used in the 2015 valuation include expected stock price volatility of 24 percent and a risk-free interest rate of 1.00 percent. The valuations were performed in a risk-neutral framework, so no assumption was made with respect to an equity risk premium.

As of September 30, 2015, 1,148,991 Class D Units and 368,878 market performance-based RSUs had been awarded to our executive officers and other employees. The number of units granted reflects the maximum number of Class D units or market performance-based RSUs, as applicable, which will become vested assuming the achievement of the highest level of RMS Relative Market Performance under the awards and, in the case of the Class D units, also includes dividend equivalent units. The fair value of these awards of approximately $34.3 million will be recognized

as compensation expense on a straight-line basis over the expected service period of approximately four years. The unearned compensation as of September 30, 2015 and December 31, 2014 was $18.9 million and $9.5 million, respectively, net of cancellations. As of September 30, 2015, none of the above awards had vested. We recognized compensation expense related to these awards of approximately $2.1 million and $0.8 million in the three months ended September 30, 2015 and 2014, respectively, and approximately $5.4 million and $2.2 million in the nine months ended September 30, 2015 and 2014, respectively. We capitalized amounts relating to compensation expense of employees directly engaged in construction and leasing activities of approximately $2.5 million and $0.4 million for the three months ended September 30, 2015 and 2014, respectively, and approximately $3.6 million and $1.0 million for the

September 30, 2015 and 2014

nine months ended September 30, 2015 and 2014, respectively. If the market conditions are not met, at the end of the applicable performance periods, the unamortized amount will be recognized as an expense at that time.

(c) Stock Options

The following table summarizes the Amended and Restated 2004 Incentive Award Plan's stock option activity for the nine-month period ended September 30, 2015:

	Period Ended September 30, 2015	
	Shares	Weighted average exercise price
Options outstanding, beginning of period	80,933	$ 37.25
Exercised	(26,961)	29.61
Options outstanding, end of period	53,972	$ 41.07
Exercisable, end of period	53,972	$ 41.07

The following table summarizes information about stock options outstanding and exercisable as of September 30, 2015:

Options outstanding and exercisable

Exercise price	Number outstanding	Weighted-average remaining contractual life (years)	Weighted-average exercise price	Aggregate intrinsic value
$33.18	4,175	1.09	33.18	$134,185
$41.73	49,797	1.59	41.73	1,174,711
Total / Weighted-average	53,972	1.55	$41.07	$1,308,896

(d) Restricted Stock

Below is a summary of our restricted stock activity for the nine months ended September 30, 2015.

Unvested Restricted Stock	Shares	Weighted-Average Grant Date Fair Value
Unvested, beginning of period	302,298	$57.10
Granted	105,165	66.65
Vested	(90,871)	59.48
Cancelled or expired	(33,284)	57.16
Unvested, end of period	283,308	61.25

The grant date fair values, which equal the market price of Digital Realty Trust, Inc. common stock on the grant date, are being expensed on a straight-line basis for service awards over the vesting period of the restricted stock, which ranges from three to four years.

The expense recorded for the three months ended September 30, 2015 and 2014 related to grants of restricted stock was approximately $0.7 million and $0.4 million, respectively, and approximately $1.8 million and $1.9 million for the nine months ended September 30, 2015 and 2014, respectively. We capitalized amounts relating to compensation expense of employees direct and incremental to construction and successful leasing activities of approximately $0.6 million and $0.4 million for the three months ended September 30, 2015 and 2014, respectively, and approximately

$2.1 million and $2.0 million for the nine months ended September 30, 2015 and 2014, respectively. Unearned compensation representing the unvested portion of the restricted stock totaled $11.9 million and $10.4 million as of September 30, 2015 and December 31, 2014, respectively. We expect to recognize this unearned compensation over the next 2.6 years on a weighted-average basis.

14. Derivative Instruments

Table of Contents
DIGITAL REALTY TRUST, INC. AND SUBSIDIARIES
DIGITAL REALTY TRUST, L.P. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)
September 30, 2015 and 2014

Currently, we use interest rate swaps to manage our interest rate risk. The valuation of these instruments is determined using widely accepted valuation techniques including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs, including interest rate curves. The fair values of interest rate swaps are determined using the market standard methodology of netting the discounted future fixed cash receipts (or payments) and the discounted expected variable cash payments (or receipts). The variable cash payments (or receipts) are based on an expectation of future interest rates (forward curves) derived from observable market interest rate curves.

To comply with the provisions of fair value accounting guidance, we incorporate credit valuation adjustments to appropriately reflect both our own nonperformance risk and the respective counterparty's nonperformance risk in the fair value measurements. In adjusting the fair value of our derivative contracts for the effect of nonperformance risk, we have considered the impact of netting and any applicable credit enhancements, such as collateral postings, thresholds, mutual puts, and guarantees.

Although we have determined that the majority of the inputs used to value our derivatives fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with our derivatives utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by us and our counterparties. However, as of September 30, 2015, we have assessed the significance of the impact of the credit valuation adjustments on the overall valuation of our derivative positions and have determined that the credit valuation adjustments are not significant to the overall valuation of our derivatives. As a result, we have determined that our derivative valuations in their entirety are classified in Level 2 of the fair value hierarchy. We do not have any fair value measurements on a recurring basis using significant unobservable inputs (Level 3) as of September 30, 2015 or December 31, 2014.

As of September 30, 2015 and December 31, 2014, we had the following outstanding interest rate derivatives that were designated as effective cash flow hedges of interest rate risk (in thousands):

Notional Amount						Fair Value at Significant Other Observable Inputs (Level 2)	
As of September 30, 2015	As of December 31, 2014	Type of Derivative	Strike Rate	Effective Date	Expiration Date	As of September 30, 2015	As of December 31, 2014
Currently-paying contracts							
$335,905	(1) $410,905	(1) Swap	0.717	Various	Various	$(1,502)	$(241)
133,237	(2) 142,965	(2) Swap	0.925	July 17, 2012	April 18, 2017	1,435	669
469,142	553,870					(67)	428
Forward-starting contracts							
—	(3) 150,000	Forward-starting Swap	2.091	July 15, 2014	July 15, 2019	—	(2,837)
Total $469,142	$703,870					$(67)	$(2,409)

(1) Represents the U.S. dollar tranche of the unsecured term loan.

(2) Represents a portion of the Singapore dollar tranche of the unsecured term loan. Translation to U.S. dollars is based on exchange rate of $0.70 to 1.00 SGD as of September 30, 2015 and $0.75 to 1.00 SGD as of December 31, 2014.

(3) In January 2014, we entered into a forward-starting five-year swap contract to protect against adverse fluctuations in interest rates by reducing our exposure to variability in cash flows relating to interest payments on a forecasted issuance of debt. The accrual period of the swap contract was designed to match the tenor of the planned debt issuance. In the fourth quarter of 2014, changes in the forecasted transaction resulted in the discontinuation of cash flow hedge accounting. As such, changes in the fair value of the forward starting swap were recognized in earnings, within the other income (expense) line item. During the three months ended March 31, 2015, the total net loss recognized on the forward starting swap was approximately $1.6 million, and on January 13, 2015, we cash settled the forward starting swap for approximately $5.7 million, including accrued interest.

DIGITAL REALTY TRUST, INC. AND SUBSIDIARIES
DIGITAL REALTY TRUST, L.P. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)
September 30, 2015 and 2014

As of September 30, 2015, we estimate that an additional $1.9 million will be reclassified as an increase to interest expense during the twelve months ended September 30, 2016, when the hedged forecasted transactions impact earnings.

15. Fair Value of Instruments

We disclose fair value information about all financial instruments, whether or not recognized in the condensed consolidated balance sheets, for which it is practicable to estimate fair value. Current accounting guidance requires the Company to disclose fair value information about all financial instruments, whether or not recognized in the balance sheets, for which it is practicable to estimate fair value.

The Company's disclosures of estimated fair value of financial instruments at September 30, 2015 and December 31, 2014 were determined using available market information and appropriate valuation methods. Considerable judgment is necessary to interpret market data and develop estimated fair value. The use of different market assumptions or estimation methods may have a material effect on the estimated fair value amounts.

The carrying amounts for cash and cash equivalents, restricted cash, accounts and other receivables, accounts payable and other accrued liabilities, accrued dividends and distributions, security deposits and prepaid rents approximate fair value because of the short-term nature of these instruments. As described in Note 14 "Derivative Instruments", the interest rate swaps are recorded at fair value.

We calculate the fair value of our mortgage loans, unsecured term loan, unsecured senior notes and exchangeable senior debentures based on currently available market rates assuming the loans are outstanding through maturity and considering the collateral and other loan terms. In determining the current market rate for fixed rate debt, a market spread is added to the quoted yields on federal government treasury securities with similar maturity dates to our debt. The carrying value of our global revolving credit facility approximates fair value, due to the variability of interest rates.

As of September 30, 2015 and December 31, 2014, the aggregate estimated fair value and carrying value of our global revolving credit facility, unsecured term loan, unsecured senior notes and mortgage loans were as follows (in thousands):

	Categorization under the fair value hierarchy	As of September 30, 2015		As of December 31, 2014	
		Estimated Fair Value	Carrying Value	Estimated Fair Value	Carrying Value
Global revolving credit facility [1]	Level 2	$688,957	$688,957	$525,951	$ 525,951
Unsecured term loan [2]	Level 2	938,276	938,276	976,600	976,600
Unsecured senior notes [3][4]	Level 2	2,963,204	2,816,359	2,968,073	2,791,758
Mortgage loans [3]	Level 2	319,222	304,987	399,569	378,818
		$4,909,659	$4,748,579	$4,870,193	$ 4,673,127

(1) The carrying value of our global revolving credit facility approximates estimated fair value, due to the variability of interest rates and the stability of our credit ratings.

(2) The carrying value of our unsecured term loan approximates estimated fair value, due to the variability of interest rates and the stability of our credit ratings.

(3) Valuations for our unsecured senior notes and mortgage loans are determined based on the expected future payments discounted at risk-adjusted rates. The 2020 Notes, 2021 Notes, 3.950% 2022 Notes, 3.625% 2022 Notes, 2023 Notes and 2025 Notes are valued based on quoted market prices.

(4)

The carrying value of the 2020 Notes, 2021 Notes, 3.625% 2022 Notes, 3.950% 2022 Notes, 2023 Notes and 2025 Notes are net of discount of $17,601 and $15,632 in the aggregate as of September 30, 2015 and December 31, 2014, respectively.

16. Commitments and Contingencies

(a) Contingent liabilities

As part of the acquisition of 29A International Business Park, an asset acquisition in 2010, the seller could earn additional consideration based on future net operating income growth in excess of certain performance targets, as defined in the agreements for the acquisition. As of December 31, 2014, certain leases executed subsequent to the acquisition caused an amount to become probable of payment and therefore approximately $12.4 million had been accrued in accounts payable and accrued liabilities and capitalized to buildings and improvements in the condensed consolidated balance sheet as of December 31, 2014 and an earnout payment was made during the three months ended June 30, 2015 in the amount of $17.5 million SGD (or approximately $13.0 million based on the exchange rate on the date of payment). As of September 30, 2015, $18.9 million had been accrued and capitalized for additional earnout payments. The second and third tranches of the earnout payments are forecasted to be made in 2016 and 2020, respectively. The maximum amount that could be earned by the seller is $50.0 million SGD (or approximately $35.2 million based on the exchange rate as of September 30, 2015). The earnout contingency expires in November 2020.

One of the tenants at our Convergence Business Park property has an option to expand as part of their lease agreement, which expires in April 2017. As part of this option, development activities were not permitted on specifically identified expansion space within the property until April 2014. From April 2014 through April 2017, the tenant has the right of first refusal on any third party's bona fide offer to buy the adjacent land. If the tenant exercises their option, we may either construct and lease to the tenant an additional shell building on the expansion space at a stipulated rate of return on cost or sell the existing building and the expansion space to the tenant for a price of approximately $24.0 million and $225,000 per square acre, respectively, plus additional adjustments as provided in the lease.

As part of the acquisition of the Sentrum Portfolio in July 2012, the seller could earn additional consideration based on future net returns on vacant space to be developed, but not currently leased, as defined in the purchase agreement for the acquisition. The initial estimate of fair value of contingent consideration was approximately £56.5 million (or approximately $87.6 million based on the exchange rate as of July 11, 2012, the acquisition date). We have adjusted the contingent consideration to fair value at each reporting date with changes in fair value recognized in operating income. During the nine months ended September 30, 2015, we reduced the fair value by approximately £30.3 million. The adjustment was the result of an evaluation by management that no additional leases would be executed for vacant space by July 11, 2015, the contingency expiration date. The final payment on the earnout was made in August 2015. We made earnout payments of approximately £6.2 million (or approximately $10.3 million based on the exchange rates as of the date of each payment) during the nine months ended September 30, 2014. We made earnout payments of approximately £0.7 million (or approximately $1.1 million based on the exchange rates as of the date of each payment) during the nine months ended September 30, 2015. The change in fair value of contingent consideration for Sentrum was recorded as an increase to operating expense of approximately $0 and $1.5 million for the three months ended September 30, 2015 and 2014, respectively. The change in fair value of contingent consideration for Sentrum was recorded as a reduction to operating expense of approximately $43.0 million and $4.1 million for the nine months ended September 30, 2015 and 2014, respectively.

(b) Construction Commitments

Our properties require periodic investments of capital for tenant-related capital expenditures and for general capital improvements. From time to time in the normal course of our business, we enter into various construction contracts with third parties that may obligate us to make payments. At September 30, 2015, we had open commitments related to construction contracts of approximately $135.6 million.

(c) Legal Proceedings

Although the Company is involved in legal proceedings arising in the ordinary course of business, as of September 30, 2015, the Company is not currently a party to any legal proceedings nor, to its knowledge, is any legal proceeding threatened against it that it believes would have a material adverse effect on its financial position, results of operations or liquidity.

17. Subsequent Events

On October 9, 2015, the Company completed the Telx Acquisition, pursuant to an Agreement and Plan of Merger (the "Merger Agreement"), dated as of July 13, 2015, by and among the Company, Digital Delta, Inc., a Delaware corporation and wholly owned subsidiary of the Company, Telx Holdings, Inc. and BSR LLC, as representative of the sellers. The purchase price for the Telx Acquisition was approximately $1.886 billion (subject to certain adjustments contemplated by the Merger Agreement). The purchase price was paid in cash and was funded with the net proceeds from the (i) public offering of 10,000,000 shares of the Company's 6.350% series I cumulative redeemable preferred stock, par value $0.01 per share, with a liquidation preference of $25.00 per share, completed on August 24, 2015, (ii) private placement by Digital Delta Holdings, LLC, a Delaware limited liability company and then-wholly owned subsidiary of the Company, of $500 million aggregate principal amount of its 3.400% Notes due 2020 and $450 million aggregate principal amount of its 4.750% Notes due 2025 completed on October 1, 2015, and (iii) sale of 10,500,000 shares of the Company's common stock on October 8, 2015 for net proceeds of approximately $674.1 million pursuant to certain forward sale agreements entered into in connection with the underwritten public offering of the Company's common stock completed on July 20, 2015.

On October 13, 2015, the Company, as sole general partner of the Operating Partnership executed the Fourteenth Amended and Restated Agreement of Limited Partnership of the Operating Partnership in connection with the Operating Partnership's issuance to the Company of 10,000,000 of its 6.350% series I cumulative redeemable preferred units of partnership interests, or the series I preferred units, as partial consideration for the Operating Partnership Merger. The series I preferred units have substantially similar rights, preferences and other privileges as the series I preferred stock.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with the condensed consolidated financial statements and notes thereto appearing elsewhere in this report. This report contains forward-looking statements within the meaning of the federal securities laws. In particular, statements pertaining to our capital resources, expected use of proceeds from our equity distribution program and other securities offerings, expected use of borrowings under our credit facility, portfolio performance, leverage policy, acquisition and capital expenditure plans, capital recycling program, returns on invested capital, supply and demand for data center space, capitalization rates, rents to be received in future periods and expected rental rates on new or renewed data center space, as well as our discussion of "Factors Which May Influence Future Results of Operations," contain forward-looking statements. Likewise, all of our statements regarding anticipated market conditions, demographics and results of operations are forward-looking statements. You can identify forward-looking statements by the use of forward-looking terminology such as "believes," "expects," "may," "will," "should," "seeks," "approximately," "intends," "plans," "pro forma," "estimates" or "anticipates" or the negative of thes and phrases or similar words or phrases which are predictions of or indicate future events or trends and discussions which do not relate solely to historical matters. You can also identify forward-looking statements by discussions of strategy, plans or intentions. Forward-looking statements involve numerous risks and uncertainties and you should not rely on them as predictions of future events. Forward-looking statements depend on assumptions, data or methods that may be incorrect or imprecise and that we may not be able to realize. We do not guarantee that the transactions and events described will happen as described or that they will happen at all. The following factors, among others, could cause actual results and future events to differ materially from those set forth or contemplated in the forward-looking statements: the impact of current global economic, credit and market conditions; current local economic conditions in our metropolitan areas; decreases in information technology spending, including as a result of economic slowdowns or recession; adverse economic or real estate developments in our industry or the industry sectors that we sell to (including risks relating to decreasing real estate valuations and impairment charges); our dependence upon significant tenants; bankruptcy or insolvency of a major tenant or a significant number of smaller tenants; defaults on or non-renewal of leases by tenants; our failure to obtain necessary debt and equity financing; risks associated with using debt to fund our business activities, including re-financing and interest rate risks, our failure to repay debt when due, adverse changes in our credit ratings or our breach of covenants or other terms contained in our loan facilities and agreements; financial market fluctuations; changes in foreign currency exchange rates; our inability to manage our growth effectively; difficulty acquiring or operating properties in foreign jurisdictions; the suitability of our properties and data center infrastructure, delays or disruptions in connectivity, failure of our physical infrastructure or services or availability of power; our failure to successfully integrate and operate acquired or developed properties or businesses, including Telx; risks related to joint venture investments, including as a result of our lack of control of such investments; delays or unexpected costs in development of properties; decreased rental rates, increased operating costs or increased vacancy rates; increased competition or available supply of data center space; our inability to successfully develop and lease new properties and development space; difficulties in identifying properties to acquire and completing acquisitions; our inability to acquire off-market properties; our inability to comply with the rules and regulations applicable to reporting companies; Digital Realty Trust, Inc.'s failure to maintain its status as a REIT for federal income tax purposes; possible adverse changes to tax laws; restrictions on our ability to engage in certain business activities; environmental uncertainties and risks related to natural disasters; losses in excess of our insurance coverage; changes in foreign laws and regulations, including those related to taxation and real estate ownership and operation; and changes in local, state and federal regulatory requirements, including changes in real estate and zoning laws and increases in real property tax rates.

While forward-looking statements reflect our good faith beliefs, they are not guarantees of future performance. We disclaim any obligation to publicly update or revise any forward-looking statement to reflect changes in underlying assumptions or factors, new information, data or methods, future events or other changes.

The risks included here are not exhaustive, and additional factors could adversely affect our business and financial performance, including factors and risks included in other sections of this report, including under Part II, Item 1A,

Risk Factors. Moreover, we operate in a very competitive and rapidly changing environment. New risk factors emerge from time to time and it is not possible for management to predict all such risk factors, nor can we assess the impact of all such risk factors on the business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. Given these risks and uncertainties, you should not place undue reliance on forward-looking statements as a prediction of actual results. Occupancy percentages included in the following discussion, for some of our properties, are calculated based on factors in addition to contractually leased square feet, including available power, required support space and common area.

Table of Contents

Overview

Our company. Digital Realty Trust, Inc. completed its initial public offering of common stock, or our IPO, on November 3, 2004. We believe that we have operated in a manner that has enabled us to qualify, and have elected to be treated, as a REIT under Sections 856 through 860 of the Code. Our company was formed on March 9, 2004. During the period from our formation until we commenced operations in connection with the completion of our IPO, we did not have any corporate activity other than the issuance of shares of Digital Realty Trust, Inc. common stock in connection with the initial capitalization of the company. Our operating partnership was formed on July 21, 2004.

Business and strategy. Our primary business objectives are to maximize: (i) sustainable long-term growth in earnings and funds from operations per share and unit, (ii) cash flow and returns to our stockholders and our operating partnership's unitholders through the payment of distributions and (iii) return on invested capital. We expect to achieve our objectives by focusing on our core business of investing in and developing technology-related real estate. A significant component of our current and future internal growth is anticipated through the development of our existing space held for development and acquisition of new properties. We target high quality, strategically located properties containing applications and operations critical to the day-to-day operations of corporate enterprise data center and technology industry tenants and properties that may be developed for such use. Most of our properties contain fully redundant electrical supply systems, multiple power feeds, above-standard cooling systems, raised floor areas, extensive in-building communications cabling and high-level security systems. We focus solely on technology-related real estate because we believe that the growth in corporate data center adoption and the technology-related real estate industry generally will continue to be superior to that of the overall economy.

As of September 30, 2015, we owned an aggregate of 132 properties, including eight properties held-for-sale and 14 properties held as investments in unconsolidated joint ventures, with approximately 24.6 million rentable square feet including approximately 1.4 million square feet of space under active development and approximately 1.3 million square feet of space held for future development. The 14 properties held as investments in unconsolidated joint ventures have an aggregate of approximately 1.9 million rentable square feet. The 14 parcels of developable land we own comprised approximately 167 acres. At September 30, 2015, approximately 1.4 million square feet was under construction for Turn-Key Flex®, Powered Base Building® and Custom Solutions products, all of which are expected to be income producing on or after completion, in three U.S. domestic metropolitan areas, two European metropolitan areas, one Canadian metropolitan area, one Australian metropolitan area and one Singapore metropolitan area, consisting of approximately 0.8 million square feet of base building construction and 0.6 million square feet of data center construction.

We have developed detailed, standardized procedures for evaluating new real estate investments to ensure that they meet our financial, technical and other criteria. We expect to continue to acquire additional assets as part of our growth strategy. We intend to aggressively manage and lease our assets to increase their cash flow. We may continue to build out our development portfolio when justified by anticipated returns.

We may acquire properties subject to existing mortgage financing and other indebtedness or we may incur new indebtedness in connection with acquiring or refinancing these properties. Debt service on such indebtedness will have a priority over any cash dividends with respect to Digital Realty Trust, Inc.'s common stock and preferred stock. We currently intend to limit our indebtedness to 60% of our total enterprise value and, based on the closing price of Digital Realty Trust, Inc. common stock on September 30, 2015 of $65.32, our ratio of debt to total enterprise value was approximately 31%. Our total enterprise value is defined as the sum of the market value of Digital Realty Trust, Inc.'s outstanding common stock (which may decrease, thereby increasing our debt to total enterprise value ratio), excluding options issued under our company's incentive award plan, plus the liquidation value of Digital Realty Trust, Inc.'s preferred stock, plus the aggregate value of our operating partnership's units not held by Digital Realty Trust, Inc. (with the per unit value equal to the market value of one share of Digital Realty Trust, Inc. common stock and excluding long-term incentive units, Class C units and Class D units), plus the book value of our total consolidated indebtedness.

Revenue base. As of September 30, 2015, we owned 132 properties through our operating partnership, including 14 properties held as investments in unconsolidated joint ventures and developable land. These properties are mainly

located throughout the U.S., with 23 properties located in Europe, three properties in Australia, three properties in Asia and two properties in Canada. We, through our predecessor, acquired our first portfolio property in January 2002 and have added properties through acquisition and development activities as follows:

Table of Contents

Year Ended December 31:	Operating Properties Acquired (1)		Net Rentable Square Feet(2)	Square Feet of Space Under Active Development as of September 30, 2015 (3)	Square Feet of Space Held for Future Development as of September 30, 2015 (4)
2002	4		1,093,250	—	46,530
2003	5	(5)	1,005,855	—	—
2004	10	(5)	2,375,410	—	108,445
2005	19	(5)	2,822,831	—	145,122
2006	18	(5)	2,851,131	—	30,926
2007	13	(5)(6)	1,742,398	—	84,268

2013	8		1,107,045	92,358	123,329
2014	—		—	—	—
2015	1		—	177,000	—
Operating properties owned as of September 30, 2015	132		21,907,914	1,385,315	1,325,282

(1) Excludes properties sold: 833 Chestnut Street (April 2015), 3300 East Birch Street (March 2015), 100 Quannapowitt (February 2015), 6 Braham Street (April 2014), 100 Technology Center Drive (March 2007), 4055 Valley View Lane (March 2007) and 7979 East Tufts Avenue (July 2006). In addition, also excludes 701 & 717 Leonard Street, a parking garage located adjacent to our internet gateway data center located at 2323 Bryan Street and not considered a separate property. Also excludes a leasehold interest acquired in March 2007 related to an acquisition made in 2006. Excludes 13 developable land parcels. Includes 12 properties held in our managed portfolio of unconsolidated joint ventures consisting of 4650 Old Ironsides Drive (Silicon Valley), 2950 Zanker Road (Silicon Valley), 4700 Old Ironsides Drive (Silicon Valley), 444 Toyama Drive (Silicon Valley), 43790 Devin Shafron Drive (Northern Virginia), 21551 Beaumeade Circle (Northern Virginia), 7505 Mason King Court (Northern Virginia), 14901 FAA Boulevard (Dallas), 900 Dorothy Drive (Dallas), 636 Pierce Street (New York Metro), 43915 Devin Shafron Drive (Northern Virginia) and 33 Chun Choi Street (Hong Kong); and two properties held in our non-managed unconsolidated joint ventures consisting of 2001 Sixth Avenue (Seattle) and 2020 Fifth Avenue (Seattle).

(2) Current net rentable square feet as of September 30, 2015, which represents the current square feet under lease as specified in the applicable lease agreements plus management's estimate of space available for lease based on engineering drawings. Includes tenants' proportional share of common areas but excludes space held for development.

(3) Space under active development includes current base building and data center projects in progress.

(4) Space held for future development includes space held for future data center development, and excludes space under active development.

(5) As of September 30, 2015, there were eight properties held for sale; one was acquired in 2003, two in 2004, two in 2005, one in 2006 and two in 2007.

(6) Includes three developed buildings (43915 Devin Shafron Drive, 43830 Devin Shafron Drive and 43790 Devin Shafron Drive) placed into service in 2010 and 2011 that are being included with a property (Devin Shafron buildings) that was acquired in 2007.

(7) Includes a developed building (21551 Beaumeade Circle) placed into service in 2011 that is being included with a property (Beaumeade Circle Portfolio) that was acquired in 2009.

(8) Includes four developed buildings (43940 Digital Loudoun Plaza in Northern Virginia, 3825 NW Aloclek Place in Portland, Oregon, 98 Radnor Drive in Melbourne, Australia and 1-23 Templar Road in Sydney, Australia) placed into service in 2012 and 2013, in which the land parcels were acquired in 2011.

(9) 43790 Devin Shafron Drive and 21551 Beaumeade Circle, which were previously included as part of the Devin Shafron buildings and Beaumeade Circle Portfolio, respectively, are now each separately included in the property count because they were separately contributed to an unconsolidated joint venture in September 2013.

(10) 43915 Devin Shafron Drive, which was previously included as part of the Devin Shafron buildings, is now separately included in the property count because it was separately contributed to an unconsolidated joint venture in September 2014.

Table of Contents

As of September 30, 2015, the properties in our portfolio, including the 14 properties held as investments in unconsolidated joint ventures, were approximately 93.0% leased excluding approximately 1.4 million square feet of space under active development and approximately 1.3 million square feet of space held for future development. Due to the capital-intensive and long-term nature of the operations being supported, our lease terms are generally longer than standard commercial leases. As of September 30, 2015, our average lease term at signing is approximately 12.0 years, with an average of approximately 6.2 years remaining. Our scheduled lease expirations through December 31, 2016 are 7.4% of rentable square feet excluding month-to-month leases, space under active development and space held for future development as of September 30, 2015.

On February 5, 2015, the operating partnership sold the 100 Quannapowitt property for approximately $31 million. The transaction after costs resulted in net proceeds of approximately $29 million and a net gain of approximately $10 million. The property was identified as held for sale as of December 31, 2014. 100 Quannapowitt was not a significant component of our U.S. portfolio nor does the sale represent a significant shift in our strategy.

On March 31, 2015, the operating partnership sold the 3300 East Birch Street property for approximately $14 million. The transaction after costs resulted in net proceeds of approximately $14 million and a net gain of approximately $8 million. The property was identified as held for sale as of December 31, 2014. 3300 East Birch Street was not a significant component of our U.S. portfolio nor does the sale represent a significant shift in our strategy.

On April 30, 2015, the operating partnership sold the 833 Chestnut Street property for approximately $161 million. The transaction after costs and buyer credits resulted in net proceeds of approximately $159 million, including a $9 million note receivable, and a net gain of approximately $77 million. The property was identified as held for sale as of March 31, 2015. 833 Chestnut Street was not a significant component of our U.S. portfolio nor does the sale represent a significant shift in our strategy.

Factors Which May Influence Future Results of Operations

Global market and economic conditions. United States and international market and economic conditions in recent years have been unprecedented and challenging with tighter credit conditions and slower economic growth in many metropolitan areas in which we own properties and conduct our operations. The U.S. and global economies have experienced a recession and face continued concerns about the systemic impact of adverse economic conditions, such as geopolitical issues, the availability and cost of credit, unstable global financial and mortgage markets, high corporate, consumer and governmental debt levels, ongoing sovereign debt and economic issues in European countries, and high unemployment. The European debt crisis has raised concerns regarding the debt burden of certain countries using the euro as their currency and their ability to meet future financial obligations. While recent economic trends across the eurozone have been largely positive, concerns remain regarding the creditworthiness of certain European countries, which could lead to the re-introduction of individual currencies in one or more Eurozone countries. These potential developments, or market perceptions concerning these and related issues, could adversely affect our leasing and financing activities, rents we receive, potential acquisitions and development projects in Europe. As a result of these conditions, general economic conditions and the cost and availability of capital have been and may again be adversely affected in some or all of the metropolitan areas in which we own properties and conduct our operations. Renewed or increased turbulence in the U.S., European, Asia Pacific and other international financial markets and economies may adversely affect our ability, and the ability of our tenants, to replace or renew maturing liabilities on a timely basis, access the capital markets to meet liquidity and capital expenditure requirements and may result in adverse effects on our, and our tenants', financial condition and results of operations.

In addition, our access to funds under our global revolving credit facility depends on the ability of the lenders that are parties to such facilities to meet their funding commitments to us. We cannot assure you that long-term disruptions in the global economy and the return of tighter credit conditions among, and potential failures or nationalizations of, third party financial institutions as a result of such disruptions will not have an adverse effect on our lenders. If our lenders are not able to meet their funding commitments to us, our business, results of operations, cash flows and financial condition could be adversely affected.

If we do not have sufficient cash flow to continue operating our business and are unable to borrow additional funds, access our existing lines of credit or raise equity or debt capital, we may need to source alternative ways to increase our liquidity. Such alternatives may include, without limitation, curtailing development activity, disposing of one or more of our properties possibly on disadvantageous terms or entering into or renewing leases on less favorable terms than we otherwise would.

Foreign currency exchange risk. For the nine months ended September 30, 2015 and 2014, we had foreign operations in the United Kingdom, Ireland, France, The Netherlands, Switzerland, Canada, Singapore, Australia, Japan and Hong Kong, and, as such, are subject to risk from the effects of exchange rate movements of foreign currencies, which may affect future costs and cash flows. Our foreign operations are conducted in the British pound sterling, Euro, Swiss franc, Canadian dollar, Singapore

Table of Contents

dollar, Australian dollar, Japanese Yen and the Hong Kong dollar. Our primary currency exposures are to the British pound sterling, the Euro and the Singapore dollar. We attempt to mitigate a portion of the risk of currency fluctuation by financing our investments in the local currency denominations, although there can be no assurance that this will be effective. As a result, changes in the relation of any such foreign currency to U.S. dollars may affect our revenues, operating margins and distributions and may also affect the book value of our assets and the amount of stockholders' equity.

Rental income. The amount of rental income generated by the properties in our portfolio depends on several factors, including our ability to maintain or improve the occupancy rates of currently leased space and to lease currently available space and space available from lease terminations. Excluding approximately 1.4 million square feet of space under active development and approximately 1.3 million square feet of space held for future development as of September 30, 2015, the occupancy rate of the properties in our portfolio, including the 14 properties held as investments in unconsolidated joint ventures, was approximately 93.0% of our net rentable square feet.

As of September 30, 2015, we had over 650 tenants in our portfolio, including the 12 properties held in our managed portfolio of unconsolidated joint ventures. As of September 30, 2015, approximately 91% of our leases (on a rentable square footage basis) contained base rent escalations that were either fixed (generally ranging from 2% to 4%) or indexed based on a consumer price index or other similar inflation related index. We cannot assure you that these escalations will cover any increases in our costs or will otherwise keep rental rates at or above market rates.

The amount of rental income generated by us also depends on maintaining or increasing rental rates at our properties, which in turn depends on several factors, including supply and demand and market rates for data center space. Included in our approximately 20.3 million net rentable square feet, excluding space under active development and space held for future development and 14 properties held as investments in unconsolidated joint ventures, at September 30, 2015 is approximately 0.6 million square feet of data center space with extensive installed tenant improvements available for lease. Since our IPO, we have leased approximately 4.6 million square feet of similar space, including Turn-Key Flex® space. Our Turn-Key Flex® product is an effective solution for tenants who prefer to utilize a partner with the expertise or capital budget to provide extensive data center infrastructure and security. Our expertise in data center construction and operations enables us to lease space to these tenants at a premium over other uses. In addition, as of September 30, 2015, we had approximately 1.4 million square feet of space under active development and approximately 1.3 million square feet of space held for future development, or approximately 12% of the total rentable space in our portfolio, including one vacant property comprising approximately 0.1 million square feet and the 14 properties held as investments in unconsolidated joint ventures. Our ability to grow earnings depends in part on our ability to develop space and lease development space at favorable rates, which we may not be able to obtain. Development space requires significant capital investment in order to develop data center facilities that are ready for use and, in addition, we may require additional time or encounter delays in securing tenants for development space. We may purchase additional vacant properties and properties with vacant development space in the future. We will require additional capital to finance our development activities, which may not be available or may not be available on terms acceptable to us, including as a result of the conditions described above under "Global market and economic conditions."

In addition, the timing between when we sign a new lease with a tenant and when that lease commences and we begin to generate rental income may be significant and may not be easily predictable. Certain leases may provide for staggered commencement dates for additional space, the timing of which may be delayed significantly.

Economic downturns, including as a result of the conditions described above under "Global market and economic conditions," or regional downturns affecting our markets or downturns in the technology-related real estate industry that impair our ability to lease or renew or re-lease space, or otherwise reduce returns on our investments or the ability of our tenants to fulfill their lease commitments, as in the case of tenant bankruptcies, could adversely affect our ability to maintain or increase rental rates at our properties.

Scheduled lease expirations. Our ability to re-lease expiring space at rental rates equal to or in excess of current rental rates will impact our results of operations. In addition to approximately 1.5 million square feet of available space in our portfolio, which excludes approximately 1.4 million square feet of space under active development and approximately 1.3 million square feet of space held for future development as of September 30, 2015 and the two

properties held as investments in our non-managed unconsolidated joint ventures, leases representing approximately 2.4% and 5.0% of the net rentable square footage of our portfolio are scheduled to expire during the three months ending December 31, 2015 and the year ending December 31, 2016, respectively.

During the nine months ended September 30, 2015, we signed new leases totaling approximately 0.6 million square feet of space and renewal leases totaling approximately 1.0 million square feet of space. The following table summarizes our leasing activity in the nine months ended September 30, 2015:

Table of Contents

	Rentable Square Feet [1]	Expiring Rates [2]	New Rates [2]	Rental Rate Changes	TI's/Lease Commissions Per Square Foot	Weighted Average Lease Terms (years)
Leasing Activity [3][4]						
Renewals Signed						
Turn-Key Flex ®	236,829	$133.39	$137.69	3.2 %	$ 4.50	3.4
Powered Base Building ®	455,765	$19.32	$23.90	23.7 %	$ 2.77	5.5
Colocation	43,998	$187.79	$211.10	12.4 %	$ 6.52	1.9
Non-technical	276,909	$17.58	$18.57	5.6 %	$ 7.62	9.6
New Leases Signed [5]						
Turn-Key Flex ®	511,235	—	$156.23	—	$ 31.86	5.8
Colocation	44,452	—	$232.81	—	$ 65.85	4.2
Non-technical	19,009	—	$30.05	—	$ 7.74	5.8
Leasing Activity Summary						
Turn-Key Flex ®	748,064	—	$150.36	—	—	
Powered Base Building ®	455,765	—	$23.90	—	—	
Colocation	88,450	—	$222.01	—	—	
Non-technical	295,918	—	$19.31	—	—	

(1) For some of our properties, we calculate square footage based on factors in addition to contractually leased square feet, including power, required support space and common area.

(2) Rental rates represent annual estimated cash rent per rentable square foot adjusted for straight-line rents in accordance with GAAP. GAAP rental rates are inclusive of tenant concessions, if any.

(3) Excludes short-term leases.

(4) Commencement dates for the leases signed range from 2015 to 2016.

(5) Includes leases signed for new and re-leased space.

Our ability to re-lease or renew expiring space at rental rates equal to or in excess of current rental rates will impact our results of operations. We continue to see strong demand in most of our key markets for data center space and, subject to the supply of available data center space in these markets, expect the rental rates we are likely to achieve on any new, re-leased or renewed data center space leases for 2015 expirations on an average aggregate basis will generally be higher than the rates currently being paid for the same space on a GAAP basis and flat on a cash basis. For the nine months ended September 30, 2015, rents on renewed space increased by an average of 3.2% on a GAAP basis on our Turn-Key Flex® space compared to the expiring rents and increased by an average of 23.7% on a GAAP basis on our Powered Base Building® space compared to the expiring rents. Our past performance may not be indicative of future results, and we cannot assure you that leases will be renewed or that our properties will be re-leased at all or at rental rates equal to or above the current average rental rates. Further, re-leased/renewed rental rates in a particular market may not be consistent with rental rates across our portfolio as a whole and may fluctuate from one period to another due to a number of factors, including local real estate conditions, local supply and demand for data center space, competition from other data center developers or operators, the condition of the property and whether the property, or space within the property, has been developed.

Metropolitan area concentration. We depend on the market for technology-based real estate in specific geographic regions and significant changes in these regional metropolitan areas can impact our future results. As of September 30, 2015, our portfolio, including the 14 properties held as investments in unconsolidated joint ventures, was geographically concentrated in the following metropolitan areas.

Table of Contents

Metropolitan Market	Percentage of September 30, 2015 total annualized rent (1)	
Northern Virginia	11.9	%
London, England	11.3	%
Dallas	10.2	%
Silicon Valley	9.9	%
New York Metro	8.6	%
Chicago	7.8	%
Phoenix	6.5	%
San Francisco	5.3	%
Singapore	3.8	%
Boston	3.7	%
Seattle	3.1	%
Los Angeles	2.9	%
Paris, France	1.8	%
Other	13.2	%
Total	100.0	%

(1) Annualized rent is monthly contractual rent (defined as cash base rent before abatements) under existing leases as of September 30, 2015 multiplied by 12. The aggregate amount of abatements for the nine months ended September 30, 2015 was approximately $20.1 million.

Operating expenses. Our operating expenses generally consist of utilities, property and ad valorem taxes, property management fees, insurance and site maintenance costs, as well as rental expenses on our ground and building leases. In particular, our buildings require significant power to support the data center operations contained in them. Many of our leases contain provisions under which the tenants reimburse us for a portion of property operating expenses and real estate taxes incurred by us. However, we generally are not entitled to reimbursement of property operating expenses, other than utility expense, and real estate taxes under our leases for Turn-Key Flex® facilities. We also incur general and administrative expenses, including expenses relating to our asset management function, as well as significant legal, accounting and other expenses related to corporate governance, SEC reporting and compliance with the various provisions of the Sarbanes-Oxley Act. Increases or decreases in such operating expenses will impact our overall performance. We expect to incur additional operating expenses as we continue to expand.

Climate change legislation. In June 2009, the U.S. House of Representatives approved comprehensive clean energy and climate change legislation intended to cut greenhouse gas, or GHG, emissions, via a cap-and-trade program. The U.S. Senate did not subsequently pass similar legislation. New climate change legislation was introduced in the U.S. Senate in 2013, but significant opposition to federal climate change legislation exists. As a result, near-term action to reduce GHG emissions likely will be focused on regulatory agencies, primarily the U.S. Environmental Protection Agency, or EPA, and state actions. The EPA has been moving aggressively to regulate GHG emissions from automobiles and large stationary sources, including electricity producers, using its own authority under the Clean Air Act. The EPA made an endangerment finding in 2009 that allows it to create regulations imposing emission reporting, permitting, control technology installation, and monitoring requirements applicable to certain emitters of GHGs, including facilities that provide electricity to our data centers, although the materiality of the impacts will not be fully known until all regulations are finalized and legal challenges are resolved.

As of September 30, 2015, the EPA has finalized rules imposing permitting and control technology requirements upon certain newly-constructed or modified facilities which emit GHGs under the Clean Air Act New Source Review Prevention of Significant Deterioration, or NSR PSD, and Title V permitting programs. As a result, newly-issued NSR PSD and Title V permits for new or modified electricity generating units (EGUs) and other facilities may need to address GHG emissions, including by requiring the installation of “Best Available Control Technology.” Following a multiyear rulemaking period, the EPA announced in August 2015 final rules that are set to become effective in

December 2015 regulating carbon dioxide (CO2) emissions from new and existing coal-fired and natural gas EGUs. Existing EGUs are subject to statewide CO2 emission reduction targets, an effort designed to achieve a thirty-two percent reduction in nationwide existing EGU CO2 emissions by 2030 (in comparison to 2005 levels). New, modified, and reconstructed EGUs are subject to “New Source Performance Standards” that include both technological requirements and numeric emission limits. Certain of the rules finalized in August 2015 have been challenged in federal court by twenty-four states and a number of industry groups. Separately, the EPA’s GHG

Table of Contents

"reporting rule" requires that certain emitters, including electricity generators, monitor and report GHG emissions. At the state level, California implemented a GHG cap-and-trade program that began imposing compliance obligations on industrial sectors, including electricity generators and importers, in January 2013. In addition, since 2005 the European Union (including the United Kingdom) has been operating under a cap-and-trade program, which directly affects the largest emitters of GHGs, including electricity producers from whom we purchase power.

The cost of electric power comprises a significant component of our operating expenses. Any additional taxation or regulation of energy use, including as a result of (i) new legislation that Congress may pass, (ii) the regulations that the EPA has proposed or finalized, (iii) regulations under legislation that states have passed or may pass, or (iv) any further reductions in the EU program could significantly increase our costs, and we may not be able to effectively pass all of these costs on to our tenants. These matters could adversely impact our business, results of operations, or financial condition.

Interest rates. As of September 30, 2015, we had approximately $469.1 million of variable rate debt subject to interest rate swap agreements on certain tranches of our unsecured term loan, along with $689.0 million and $469.1 million of variable rate debt that was outstanding on the global revolving credit facility and the unswapped portion of the unsecured term loan, respectively. The availability of debt and equity capital may decrease as a result of the circumstances described above under "Global market and economic conditions." The effects on commercial real estate mortgages, if available, include, but may not be limited to: higher loan spreads, tightened loan covenants, reduced loan to value ratios resulting in lower borrower proceeds and higher principal payments. Potential future increases in interest rates and credit spreads may increase our interest expense and fixed charges and negatively affect our financial condition and results of operations, potentially impacting our future access to the debt and equity capital markets. Increased interest rates may also increase the risk that the counterparties to our swap agreements will default on their obligations, which could further increase our interest expense. If we cannot obtain capital from third party sources, we may not be able to acquire or develop properties when strategic opportunities exist, satisfy our debt service obligations or pay the cash dividends to Digital Realty Trust, Inc.'s stockholders necessary to maintain its qualification as a REIT.

Demand for data center space. Our portfolio of properties consists primarily of technology-related real estate and data center real estate in particular. A decrease in the demand for, or increase in supply of, data center space, Internet gateway facilities or other technology-related real estate would have a greater adverse effect on our business and financial condition than if we owned a portfolio with a more diversified tenant base or less specialized use. We have invested in building out additional inventory primarily in what we anticipate will be our active major metropolitan areas prior to having executed leases with respect to this space. We believe that demand continues to exceed supply in most metropolitan areas in which we operate, particularly in Dallas, Northern Virginia and Singapore. However, until this inventory is leased up, which will depend on a number of factors, including available data center space in these metropolitan areas, our return on invested capital is negatively impacted. Our development activities make us particularly susceptible to general economic slowdowns, including recessions and the other circumstances described above under "Global market and economic conditions," as well as adverse developments in the corporate data center, Internet and data communications and broader technology industries. Any such slowdown or adverse development could lead to reduced corporate IT spending or reduced demand for data center space. Reduced demand could also result from business relocations, including to metropolitan areas that we do not currently serve. Changes in industry practice or in technology, such as virtualization technology, more efficient computing or networking devices, or devices that require higher power densities than today's devices, could also reduce demand for the physical data center space we provide or make the tenant improvements in our facilities obsolete or in need of significant upgrades to remain viable. In addition, the development of new technologies, the adoption of new industry standards or other factors could render many of our tenants' current products and services obsolete or unmarketable and contribute to a downturn in their businesses, thereby increasing the likelihood that they default under their leases, become insolvent or file for bankruptcy. In addition, demand for data center space in our properties, or the rates at which we lease space, may be adversely impacted either across our portfolio or in specific metropolitan areas as a result of an increase in the number of competitors, or the amount of space being offered in our metropolitan areas and other metropolitan areas by our competitors.

Telx Acquisition. We believe that the Telx Acquisition will provide a number of strategic and financial benefits, including providing us a leading colocation and interconnection platform, a premium connectivity infrastructure and enhanced growth potential in attractive locations. However, there can be no assurance that we will realize the intended benefits of the Telx Acquisition and it may disrupt our plans and operations. In addition, we may be subject to unknown or contingent liabilities related to Telx for which we may have no or limited recourse against the sellers.

Table of Contents

Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon our condensed consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles, or GAAP. The preparation of these financial statements in conformity with GAAP requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses in the reporting period. Our actual results may differ from these estimates. We have provided a summary of our significant accounting policies in Item 1, Note 2 “Summary of Significant Accounting Policies” in the Notes to Condensed Consolidated Financial Statements. We describe below those accounting policies that require material subjective or complex judgments and that have the most significant impact on our financial condition and consolidated results of operations. Our management evaluates these estimates on an ongoing basis, based upon information currently available and on various assumptions management believes are reasonable as of the date on the front cover of this report.

Investments in Real Estate

Acquisition of real estate. The price that we pay to acquire a property is impacted by many factors including the condition of the property and improvements, the occupancy of the building, the term and rate of in-place leases, the creditworthiness of the tenants, favorable or unfavorable financing, above or below-market ground leases and numerous other factors.

Accordingly, we are required to make subjective assessments to allocate the purchase price paid to acquire investments in real estate among the identifiable assets including intangibles and liabilities assumed based on our estimate of the fair value of such assets and liabilities. This includes determining the value of the property and improvements, land, ground leases, if any, and tenant improvements. Additionally, we evaluate the value of in-place leases on occupancy and market rent, the value of the tenant relationships, the value (or negative value) of above (or below) market leases, any debt or deferred taxes assumed from the seller or loans made by the seller to us and any building leases assumed from the seller. Each of these estimates requires a great deal of judgment and some of the estimates involve complex calculations. These allocation assessments have a direct impact on our results of operations. For example, if we were to allocate more value to land, there would be no depreciation with respect to such amount. If we were to allocate more value to the property as opposed to allocating to the value of in-place tenant leases, this amount would be recognized as an expense over a much longer period of time. This potential effect occurs because the amounts allocated to property are depreciated over the estimated lives of the property whereas amounts allocated to in-place tenant leases are amortized over the estimated term (including renewal and extension assumptions) of the leases. Additionally, the amortization of the value (or negative value) assigned to above (or below) market rate leases is recorded as an adjustment to rental revenue as compared to amortization of the value of in-place tenant leases and tenant relationships, which is included in depreciation and amortization in our condensed consolidated income statements.

From time to time, we will receive offers for sale of our properties, either solicited or unsolicited. For those offers that are accepted, the prospective buyer will usually require a due diligence period before consummation of the transaction. It is not unusual for matters to arise that result in the withdrawal or rejection of the offer during this process. We classify real estate as “held for sale” when all criteria under the GAAP guidance has been met.

Capitalization of costs. Direct and indirect project costs that are clearly associated with the development of properties are capitalized as incurred. Project costs include all costs directly associated with the development of a property, including construction costs, interest, property taxes, insurance, legal fees and costs of personnel working on the project. Indirect costs that do not clearly relate to the projects under development are not capitalized and are charged to expense as incurred.

Capitalization of costs begins when the activities necessary to get the development project ready for its intended use begin, which include costs incurred before the beginning of construction. Capitalization of costs ceases when the development project is substantially complete and ready for its intended use. Determining when a development project commences, and when it is substantially complete and ready for its intended use involves a degree of judgment. We generally consider a development project to be substantially complete and ready for its intended use upon receipt of a certificate of occupancy. If and when development of a property is suspended pursuant to a formal change in the

planned use of the property, we will evaluate whether the accumulated costs exceed the estimated value of the project and write off the amount of any such excess accumulated costs. For a development project that is suspended for reasons other than a formal change in the planned use of such property, the accumulated project costs are evaluated for impairment consistent with our impairment policies for long-lived assets. Capitalized costs are allocated to the specific components of a project that are benefited.

Useful lives of assets. We are required to make subjective assessments as to the useful lives of our properties for purposes of determining the amount of depreciation to record on an annual basis with respect to our investments in real estate. These assessments have a direct impact on our net income because if we were to shorten the expected useful lives of our investments in real estate we would depreciate such investments over fewer years, resulting in more depreciation expense and lower net income on an annual basis.

Table of Contents

Asset impairment evaluation. We review each of our properties for indicators that its carrying amount may not be recoverable. Examples of such indicators may include a significant decrease in the market price of the property, a change in the expected holding period for the property, a significant adverse change in the extent or manner in which the property is being used in its physical condition or expected to be used based on the underwriting at the time of acquisition, an accumulation of costs significantly in excess of the amount originally expected for the acquisition or development of the property, or a history of operating or cash flow losses of the property. When such impairment indicators exist, we review an estimate of the future undiscounted net cash flows (excluding interest charges) expected to result from the real estate investment's use and eventual disposition and compare that estimate to the carrying value of the property. We consider factors such as future operating income, trends and prospects, as well as the effects of leasing demand, competition and other factors. If our future undiscounted net cash flow evaluation indicates that we are unable to recover the carrying value of a real estate investment, an impairment loss is recorded to the extent that the carrying value exceeds the estimated fair value of the property. These losses have a direct impact on our net income because recording an impairment loss results in an immediate negative adjustment to net income. The evaluation of anticipated cash flows is highly subjective and is based in part on assumptions regarding future occupancy, rental rates and capital requirements that could differ materially from actual results in future periods. Since cash flows on properties considered to be long-lived assets to be held and used are considered on an undiscounted basis to determine whether the carrying value of a property is recoverable, our strategy of holding properties over the long-term directly decreases the likelihood of their carrying values not being recoverable and therefore requiring the recording of an impairment loss. If our strategy changes or market conditions otherwise dictate an earlier sale date, an impairment loss may be recognized and such loss could be material. If we determine that the asset fails the recoverability test, the affected assets must be reduced to their fair value.

We generally estimate the fair value of rental properties utilizing a discounted cash flow analysis that includes projections of future revenues, expenses and capital improvement costs that a market participant would use based on the highest and best use of the asset, which is similar to the income approach that is commonly utilized by appraisers. In certain cases, we may supplement this analysis by obtaining outside broker opinions of value.

Revenue Recognition

Rental revenue is recognized using the straight-line method over the terms of the tenant leases. Deferred rents included in our condensed consolidated balance sheets represent the aggregate excess of rental revenue recognized to date on a straight-line basis versus the contractual rental payments under the terms of the leases. Many of our leases contain provisions under which the tenants reimburse us for a portion of property operating expenses and real estate taxes incurred by us. However, we generally are not entitled to reimbursement of property operating expenses, other than utility expense, and real estate taxes under our leases for Turn-Key Flex® facilities. Such reimbursements are recognized in the period that the expenses are incurred. Lease termination fees are recognized over the remaining term of the lease, effective as of the date the lease modification is finalized, assuming collection is not considered doubtful. As discussed above, we recognize amortization of the value of acquired above or below-market tenant leases as a reduction of rental revenue in the case of above-market leases or an increase to rental revenue in the case of below-market leases.

We must make subjective estimates as to when our revenue is earned and the collectability of our accounts receivable related to minimum rent, deferred rent, expense reimbursements, lease termination fees and other income. We specifically analyze accounts receivable and historical bad debts, tenant concentrations, tenant creditworthiness and current economic trends when evaluating the adequacy of the allowance for bad debts. These estimates have a direct impact on our net revenue because a higher bad debt allowance would result in lower net revenue, and recognizing rental revenue as earned in one period versus another would result in higher or lower net revenue for a particular period.

Share-Based Awards

We recognize compensation expense related to share-based awards. We generally amortize this compensation expense over the vesting period of the award. The calculation of the fair value of share-based awards is subjective and requires several assumptions over such items as expected stock volatility, dividend payments and future company results. These assumptions have a direct impact on our net income because a higher share-based awards amount would result

in lower net income for a particular period.

Recently Issued Accounting Pronouncements

In February 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2015-02, Consolidation (Topic 810): Amendments to the Consolidation Analysis, which provides guidance on the consolidation evaluation for reporting organizations that are required to evaluate whether they should consolidate certain legal entities. In accordance with the guidance, all legal entities are subject to reevaluation under the revised consolidation model. The guidance is effective in the first quarter of 2016, and early adoption is permitted. We are currently evaluating the potential impact of the adoption of ASU 2015-02 on our consolidated financial statements.

On April 1, 2015, the FASB voted to defer the effective date of ASU No. 2014-09, which outlines a single comprehensive model for entities to use in accounting for revenues arising from contracts with customers and notes that lease contracts with customers are a scope exception. Public business entities may elect to adopt the amendments as of the original effective date; however, if the proposed deferral is approved, adoption is required for annual reporting periods beginning after December 15, 2017. We are currently assessing the impact of the guidance on our consolidated financial statements.

On April 17, 2015, the FASB issued ASU No. 2015-03, Simplifying the Presentation of Debt Issuance Costs, which requires debt issuance costs to be presented in the balance sheet as a direct deduction from the associated debt liability. Currently, debt issuance costs are recorded as an asset and amortization of these deferred financing costs is recorded in interest expense. Under the new standard, debt issuance costs will continue to be amortized over the life of the debt instrument and amortization will continue to be recorded in interest expense. The new standard is effective for us on January 1, 2016 and will be applied on a retrospective basis. We are currently evaluating ASU 2015-03, and anticipate a change in our presentation only since the standard does not alter the accounting for debt issuance costs.

In September 2015, the FASB issued ASU 2015-16, Simplifying the Accounting for Measurement Period Adjustments (Topic 805). ASU 2015-16 requires an acquirer in a business combination to recognize provisional amounts when measurements were incomplete as of the end of a reporting period as an adjustment in the reporting period in which the provisional amount is determined. Prior to this standard, the acquirer was required to adjust such provisional amounts by restating prior period financial statements. ASU 2015-16 is effective for the annual period ending December 31, 2016 and for annual periods and interim periods thereafter with early adoption permitted. We have elected to early adopt this standard effective with the interim period beginning July 1, 2015 and this standard did not have a material effect on the consolidated financial statements.

Results of Operations

The discussion below relates to our financial condition and results of operations for the three and nine months ended September 30, 2015 and 2014. A summary of our operating results for the three and nine months ended September 30, 2015 and 2014 is as follows (in thousands).

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Income Statement Data:				
Total operating revenues	$435,989	$412,186	$1,262,893	$1,204,222
Total operating expenses	(331,859)	(329,814)	(902,392)	(939,390)
Operating income	104,130	82,372	360,501	264,832
Other income (expenses), net	(46,288)	47,789	(42,337)	(26,622)
Net income	$57,842	$130,161	$318,164	$238,210

Our property portfolio has experienced consistent and significant growth since the first property acquisition in January 2002. As a result of this growth, our period-to-period comparison of our financial performance focuses on the impact on our revenues and expenses on a stabilized portfolio basis. Our stabilized portfolio includes properties owned as of December 31, 2013 with less than 5% of total rentable square feet under development and excludes properties that were undergoing, or were expected to undergo, development activities in 2014-2015 and properties sold or contributed to joint ventures.

We acquired the following real estate properties during the nine months ended September 30, 2015:

Location	Metropolitan Area	Date Acquired	Amount (in millions) [1]
Deer Park 3 [2]	Melbourne	April 15, 2015	$1.6
3 Loyang Way [3][4]	Singapore	June 25, 2015	45.0
			$46.6

(1) Purchase price in U.S. dollars and excludes capitalized closing costs on land acquisitions. Purchase prices for acquisitions outside the United States are based on the exchange rate at the date of acquisition.

(2) Represents currently vacant land which is not included in our operating property count.

(3) Represents a development property with an existing shell, which is included in our operating property count. This acquisition lacked key inputs to qualify as a business combination under purchase accounting guidance, and has therefore been accounted for as an asset acquisition, not a business combination.

(4) Property is subject to a ground lease, which expires in February 2024, with a renewal provision of an additional 28 years upon satisfaction of certain requirements.

Comparison of the Three and Nine Months Ended September 30, 2015 to the Three and Nine Months Ended September 30, 2014

Portfolio

As of September 30, 2015, our portfolio consisted of 132 properties, including 14 properties held as investments in unconsolidated joint ventures and developable land, with an aggregate of 24.6 million rentable square feet including 1.4 million square feet of space under active development and 1.3 million square feet of space held for future development compared to a portfolio consisting of 132 properties, including 14 properties held as investments in unconsolidated joint ventures and developable land, with an aggregate of 24.5 million rentable square feet including 1.3 million square feet of space under active development and 1.2 million square feet of space held for future development as of September 30, 2014. The changes in our portfolio reflect the acquisition of one property (in addition, two properties were placed into service in 2015 developed on land parcels which were acquired prior to January 1, 2014) and the sale of three properties during the twelve months ended September 30, 2015.

Table of Contents

Revenues

Total operating revenues for the three and nine months ended September 30, 2015 and 2014 were as follows (in thousands):

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2015	2014	Change	2015	2014	Change
Rental	$338,330	$317,064	$21,266	$988,172	$936,270	$51,902
Tenant reimbursements	95,484	92,209	3,275	268,885	261,517	7,368
Fee income	1,595	2,748	(1,153)	4,758	5,397	(639)
Other	580	165	415	1,078	1,038	40
Total operating revenues	$435,989	$412,186	$23,803	$1,262,893	$1,204,222	$58,671

The following table shows revenues for the three and nine months ended September 30, 2015 and 2014 for stabilized properties and pre-stabilized properties (all other properties) (in thousands).

	Stabilized			Pre-Stabilized		
	Three Months Ended September 30,			Three Months Ended September 30,		
	2015	2014	Change	2015	2014	Change
Rental	$195,624	$197,819	$(2,195)	$142,706	$119,245	$23,461
Tenant reimbursements	56,410	56,981	(571)	39,074	35,228	3,846
Fee income	855	1,229	(374)	740	1,519	(779)
Other	580	65	515	—	100	(100)
Total operating revenues	$253,469	$256,094	$(2,625)	$182,520	$156,092	$26,428

	Stabilized			Pre-stabilized		
	Nine Months Ended September 30,			Nine Months Ended September 30,		
	2015	2014	Change	2015	2014	Change
Rental	$586,241	$592,295	$(6,054)	$401,931	$343,975	$57,956
Tenant reimbursements	162,203	166,482	(4,279)	106,682	95,035	11,647
Fee income	2,598	3,306	(708)	2,160	2,091	69
Other	1,078	65	1,013	—	973	(973)
Total operating revenues	$752,120	$762,148	$(10,028)	$510,773	$442,074	$68,699

Stabilized rental revenues and tenant reimbursement revenues decreased for the three and nine months ended September 30, 2015 compared to the same periods in 2014 primarily as a result of newly vacant space at certain properties along with the British pound sterling and Euro weakening against the U.S. dollar.

Pre-stabilized revenue increases were a result of new leases at our properties during the twelve months ended September 30, 2015, primarily leases of completed development space, the largest of which were for space at 44060 Digital Loudoun Plaza, 43940 Digital Loudoun Plaza, 29A International Business Park, Principal Park (Crawley) and 9355 Grand Avenue.

Table of Contents

Operating Expenses and Interest Expense

Operating expenses and interest expense during the three and nine months ended September 30, 2015 and 2014 were as follows (in thousands):

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2015	2014	Change	2015	2014	Change
Rental property operating and maintenance	$140,538	$130,894	$9,644	$394,640	$375,586	$19,054
Property taxes	19,953	25,765	(5,812)	64,116	68,485	(4,369)
Insurance	2,140	2,145	(5)	6,449	6,463	(14)
Change in fair value of contingent consideration	(1,594)	(1,465)	(129)	(44,276)	(4,102)	(40,174)
Depreciation and amortization	136,974	137,474	(500)	397,571	405,186	(7,615)
General and administrative	22,755	20,709	2,046	69,562	71,708	(2,146)
Transactions	11,042	144	10,898	14,301	980	13,321
Impairment of investments in real estate	—	12,500	(12,500)	—	12,500	(12,500)
Other	51	1,648	(1,597)	29	2,584	(2,555)
Total operating expenses	$331,859	$329,814	$2,045	$902,392	$939,390	$(36,998)
Interest expense	$48,138	$48,169	$(31)	$139,718	$144,689	$(4,971)

The following table shows expenses for the three and nine months ended September 30, 2015 and 2014 for stabilized properties and pre-stabilized properties (all other properties) (in thousands).

	Stabilized			Pre-stabilized		
	Three Months Ended September 30,			Three Months Ended September 30,		
	2015	2014	Change	2015	2014	Change
Rental property operating and maintenance	$79,298	$75,706	$3,592	$61,240	$55,188	$6,052
Property taxes	10,712	15,611	(4,899)	9,241	10,154	(913)
Insurance	1,434	1,453	(19)	706	692	14
Change in fair value of contingent consideration	—	—	—	(1,594)	(1,465)	(129)

Other	81	(26)	107	(30)	1,674	(1,704)
Total operating expenses	$189,214	$193,567	$(4,353)	$142,645	$136,247	$6,398
Interest expense (3)	$28,883	$27,678	$1,205	$19,255	$20,491	$(1,236)

Table of Contents

	Stabilized			Pre-stabilized		
	Nine Months Ended September 30,			Nine Months Ended September 30,		
	2015	2014	Change	2015	2014	Change
Rental property operating and maintenance	$223,965	$224,406	$(441)	$170,675	$151,180	$19,495
Property taxes	37,790	43,361	(5,571)	26,326	25,124	1,202
Insurance	4,327	4,366	(39)	2,122	2,097	25
Change in fair value of contingent consideration	—	—	—	(44,276)	(4,102)	(40,174)
Depreciation and amortization	224,782	238,148	(13,366)	172,789	167,038	5,751
General and administrative (1)	69,562	71,708	(2,146)	—	—	—
Transactions (2)	—	—	—	14,301	980	13,321
Impairment of investments in real estate	—	—	—	—	12,500	(12,500)
Other	85	261	(176)	(56)	2,323	(2,379)
Total operating expenses	$560,511	$582,250	$(21,739)	$341,881	$357,140	$(15,259)
Interest expense (3)	$82,996	$90,967	$(7,971)	$56,722	$53,722	$3,000

(1) General and administrative expenses are included in stabilized properties as they are not allocable to specific properties.

(2) Transaction expenses are included entirely in pre-stabilized properties as they are not allocable to stabilized properties.

(3) Interest expense on our global revolving credit facility and unsecured term loan is recorded on a specific property basis.

Stabilized rental property operating and maintenance expenses increased approximately $3.6 million and decreased approximately $0.4 million in the three and nine months ended September 30, 2015, respectively, compared to the same periods in 2014 primarily as a result of a successful legal settlement in 2014 partially offset by the British pound sterling and Euro weakening against the U.S. dollar.

Stabilized property taxes decreased by approximately $4.9 million and $5.6 million in the three and nine months ended September 30, 2015, respectively, compared to the same periods in 2014, primarily as a result of successful appeals for taxes at two properties in Texas and one property in California within the stabilized pool.

Stabilized depreciation and amortization expense decreased approximately $5.2 million and $13.4 million in the three and nine months ended September 30, 2015, respectively, compared to the same periods in 2014, principally because of assets at certain properties being fully amortized during 2014 along with depreciation and amortization adjustments made in 2014.

General and administrative expenses increased by approximately $2.0 million in the three months ended September 30, 2015 compared to the same period in 2014 primarily due to the growth of our company, with an increase in headcount from 2014 to 2015, resulting in additional compensation, along with higher professional fees and marketing expenses. General and administrative expenses decreased by approximately $2.1 million in the nine months ended September 30, 2015 compared to the same period in 2014 primarily due to the $12.7 million severance related to the departure of our former Chief Executive Officer, Michael Foust, recorded in the nine months ended September 30, 2014 along with the reversal of excess severance expense of approximately $4.6 million in the three months ending September 30, 2015 upon settlement with Mr. Foust, partially offset by higher expenses in 2015 due to the growth of our company, with an increase in headcount from 2014 to 2015, resulting in additional compensation, along with higher professional fees and marketing expenses.

Stabilized interest expense increased approximately $1.2 million and decreased approximately $8.0 million for the three and nine months ended September 30, 2015, respectively, as compared to the same periods in 2014. The increase for the three-month periods was primarily a result of the issuance of the 2022 Notes in June 2015. The decrease for the nine-month periods was primarily a result of the redemption of the 2015 Notes in May 2015 and the redemption of the 2029 Debentures in April 2014 partially offset by the issuance of the 2022 Notes in June 2015.

Pre-stabilized rental property operating and maintenance expenses increased by approximately $6.1 million and $19.5 million in the three and nine months ended September 30, 2015, respectively, compared to the same periods in 2014 primarily as a result of higher consumption and utility rates in several of our properties along with development projects being placed into service leading to higher utility expense in 2015 along with general maintenance increases from completed inventory.

Table of Contents

Pre-stabilized property tax expense decreased approximately $0.9 million and increased approximately $1.2 million in the three and nine months ended September 30, 2015, respectively, compared to the same periods in 2014. The decrease for the three-month periods was primarily a result of successful appeals for taxes at one property in Texas and one property in Connecticut within the pre-stabilized pool. The increase for the nine-month periods was principally a result of reassessed value increases at five properties within the pre-stabilized pool.

Pre-stabilized depreciation and amortization expense increased approximately $4.7 million and $5.8 million in the three and nine months ended September 30, 2015, respectively, compared to the same periods in 2014, principally because of depreciation of development projects that were placed into service in late 2014 and during 2015.

Pre-stabilized interest expense decreased approximately $1.2 million for the three months ended September 30, 2015 as compared to the same period in 2014 primarily as a result of lower average outstanding debt balances due to the paydown of secured term debt in September 2014. Pre-stabilized interest expense increased approximately $3.0 million for the nine months ended September 30, 2015 as compared to the same period in 2014 primarily as a result of interest expense on our 2023 Notes, which were issued in April 2014.

Impairment of Investments in Real Estate

We have identified certain non-core investment properties we intend to sell as part of our capital recycling strategy. Our capital recycling program was designed to identify non-strategic and underperforming assets that can be sold to generate proceeds that will support the funding of our core investment activity. We expect our capital recycling initiative will likewise have a positive impact on overall return on invested capital. During this process, we evaluated the carrying value of certain investment properties identified for potential sale to ensure the carrying value is recoverable in light of a potentially shorter holding period. As a result of our evaluation, during the year ended December 31, 2014, we recognized $126.5 million of impairment losses on five properties located in the Central, East and West regions. As of September 30, 2015, three of these properties met the criteria to be classified as held for sale. During the nine months ended September 30, 2015, no additional impairment losses have been recognized.

Other income (expense)

Gain on Sale of Properties

During the nine months ended September 30, 2015, we recognized a gain on sale of properties of $94.3 million related to the dispositions of 100 Quannapowitt, which sold for $31.1 million in February 2015, 3300 East Birch Street, which sold for $14.2 million in March 2015 and 833 Chestnut Street, which sold for $160.8 million in April 2015.

Gain on Contribution of Properties to Unconsolidated Joint Ventures

During the three and nine months ended September 30, 2014, we recognized gains of $93.5 million and $95.4 million, respectively, related to the contribution of two properties to two unconsolidated joint ventures. The transactions generated net proceeds of approximately $178.9 million and we retained a 20% interest in each of the joint ventures.

Liquidity and Capital Resources of the Parent Company

In this “Liquidity and Capital Resources of the Parent Company” section and in the “Liquidity and Capital Resources of the Operating Partnership” section below, the term, our “parent company”, refers to Digital Realty Trust, Inc. on an unconsolidated basis, excluding our operating partnership.

Analysis of Liquidity and Capital Resources

Our parent company’s business is operated primarily through our operating partnership of which our parent company is the sole general partner and which it consolidates for financial reporting purposes. Because our parent company operates on a consolidated basis with our operating partnership, the section entitled “Liquidity and Capital Resources of the Operating Partnership” should be read in conjunction with this section to understand the liquidity and capital resources of our parent company on a consolidated basis and how our company is operated as a whole.

Our parent company issues public equity from time to time, but generally does not otherwise generate any capital itself or conduct any business itself, other than incurring certain expenses in operating as a public company which are fully reimbursed by the operating partnership. Our parent company itself does not hold any indebtedness other than guarantees of the indebtedness of our operating partnership and certain of its subsidiaries, and its only material asset is

its ownership of partnership interests of our operating partnership. Therefore, the consolidated assets and liabilities and the consolidated

Table of Contents

revenues and expenses of our parent company and our operating partnership are the same on their respective financial statements, except for immaterial differences related to cash, other assets and accrued liabilities that arise from public company expenses paid by our parent company and an intercompany loan. However, all debt, other than the intercompany loan, is held directly or indirectly at the operating partnership level. Our parent company's principal funding requirement is the payment of dividends on its common and preferred stock. Our parent company's principal source of funding for its dividend payments is distributions it receives from our operating partnership.

As the sole general partner of our operating partnership, our parent company has the full, exclusive and complete responsibility for our operating partnership's day-to-day management and control. Our parent company causes our operating partnership to distribute such portion of its available cash as our parent company may in its discretion determine, in the manner provided in our operating partnership's partnership agreement. Our parent company receives proceeds from its equity issuances from time to time, but is generally required by our operating partnership's partnership agreement to contribute the proceeds from its equity issuances to our operating partnership in exchange for partnership units of our operating partnership.

Our parent company is a well-known seasoned issuer with an effective shelf registration statement filed on April 20, 2015, which allows our parent company to register an unspecified amount of various classes of equity securities. As circumstances warrant, our parent company may issue equity from time to time on an opportunistic basis, dependent upon market conditions and available pricing. Any proceeds from such equity issuances would be generally contributed to our operating partnership in exchange for additional equity interests in our operating partnership. Our operating partnership may use the proceeds to acquire additional properties, to fund development opportunities and for general working capital purposes, including potentially for the repurchase, redemption or retirement of outstanding debt or equity securities.

The liquidity of our parent company is dependent on our operating partnership's ability to make sufficient distributions to our parent company. The primary cash requirement of our parent company is its payment of dividends to its stockholders. Our parent company also guarantees our operating partnership's, as well as certain of its subsidiaries' and affiliates', unsecured debt. If our operating partnership or such subsidiaries fail to fulfill their debt requirements, which trigger parent company guarantee obligations, then our parent company will be required to fulfill its cash payment commitments under such guarantees. However, our parent company's only material asset is its investment in our operating partnership.

We believe our operating partnership's sources of working capital, specifically its cash flow from operations, and funds available under its global revolving credit facility are adequate for it to make its distribution payments to our parent company and, in turn, for our parent company to make its dividend payments to its stockholders. However, we cannot assure you that our operating partnership's sources of capital will continue to be available at all or in amounts sufficient to meet its needs, including making distribution payments to our parent company. The lack of availability of capital could adversely affect our operating partnership's ability to pay its distributions to our parent company, which would in turn, adversely affect our parent company's ability to pay cash dividends to its stockholders.

Digital Realty Trust, Inc. entered into equity distribution agreements in June 2011, which we refer to as the 2011 Equity Distribution Agreements, with each of Merrill Lynch, Pierce, Fenner & Smith Incorporated, Citigroup Global Markets Inc., Credit Suisse Securities (USA) LLC, Deutsche Bank Securities Inc. and Morgan Stanley & Co. LLC, or the Agents, under which it can issue and sell shares of its common stock having an aggregate offering price of up to $400.0 million from time to time through, at its discretion, any of the Agents as its sales agents. The sales of common stock made under the 2011 Equity Distribution Agreements will be made in "at the market" offerings as defined in Rule 415 of the Securities Act. Cumulatively through September 30, 2015, Digital Realty Trust, Inc. has generated net proceeds of approximately $342.7 million from the issuance of approximately 5.7 million common shares under the 2011 Equity Distribution Agreements at an average price of $60.35 per share after payment of approximately $3.5 million of commissions to the sales agents and before offering expenses. No sales were made under the program during the nine months ended September 30, 2015 and 2014. As of September 30, 2015, shares of common stock having an aggregate offering price of $53.8 million remained available for offer and sale under the program.

On January 20, 2015, the operating partnership repaid $50.0 million of 4.57% Series D unsecured notes under the Prudential shelf facility at maturity.
On February 3, 2015, the operating partnership repaid $17.0 million of 4.50% Series F unsecured notes under the Prudential shelf facility at maturity.

Table of Contents

Telx Acquisition Financing

On July 20, 2015, our parent company completed an underwritten public offering of 10,500,000 shares of its common stock, all of which were offered in connection with forward sale agreements it entered into with certain financial institutions acting as forward purchasers. The forward purchasers borrowed and sold 10,500,000 shares of our parent company's common stock in the public offering. We did not receive any proceeds from the sale of our common stock by the forward purchasers in the public offering. On October 8, 2015, our parent company physically settled in full the forward sale agreements by issuing an aggregate of 10,500,000 shares of its common stock to the forward counterparties in exchange for net proceeds of approximately $674.1 million. Our parent company used the net proceeds from the physical settlement of the forward sale agreements to fund a portion of the Telx Acquisition.

On August 24, 2015, our parent company issued an aggregate of 10,000,000 shares of its 6.350% Series I Cumulative Redeemable Preferred Stock for total net proceeds, after underwriting discounts and estimated offering expenses, of $241.7 million. Our parent company temporarily loaned the net proceeds from the offering to the operating partnership prior to using the net proceeds from the offering to fund a portion of the Telx Acquisition.

On October 1, 2015, Digital Delta Holdings, LLC, a Delaware limited liability company and then wholly owned subsidiary of Digital Realty Trust, Inc., issued $500.0 million aggregate principal amount of its 3.400% Notes due 2020 (the "3.400% 2020 Notes") and $450.0 million aggregate principal amount of its 4.750% Notes due 2025 (the "4.750% 2025 Notes" and together with the 3.400% 2020 Notes, the "Delta Holdings Notes"), fully and unconditionally guaranteed by Digital Realty Trust, Inc. and Digital Realty Trust, L.P. The 3.400% 2020 Notes and 4.750% 2025 Notes bear interest at 3.400% and 4.750% per annum, respectively. Interest is payable on April 1 and October 1 of each year, beginning April 1, 2016, until the respective maturity dates of October 1, 2020 and October 1, 2025. Prior to the completion of the Operating Partnership Merger, the obligations under the Delta Holdings Notes were fully and unconditionally guaranteed by Digital Realty Trust, Inc. and the Operating Partnership. Upon the completion of the Operating Partnership Merger on October 13, 2015, Digital Realty Trust, L.P. became the direct obligor on the Delta Holdings Notes by operation of law. The net proceeds from the offering were used to fund a portion of the Telx Acquisition.

Future Uses of Cash

Our parent company may from time to time seek to retire, redeem or repurchase its equity or the debt securities of our operating partnership through cash purchases and/or exchanges for equity securities in open market purchases, privately negotiated transactions or otherwise. Such repurchases, redemptions or exchanges, if any, will depend on prevailing market conditions, our liquidity requirements, contractual restrictions or other factors. The amounts involved may be material.

We are also subject to the commitments discussed below under "Dividends and Distributions."

Dividends and Distributions

Our parent company is required to distribute 90% of its taxable income (excluding capital gains) on an annual basis in order for it to continue to qualify as a REIT for federal income tax purposes. Accordingly, our parent company intends to make, but is not contractually bound to make, regular quarterly distributions to its common stockholders from cash flow from our operating partnership's operating activities. While historically our parent company has satisfied this distribution requirement by making cash distributions to its stockholders, it may choose to satisfy this requirement by making distributions of cash or other property. All such distributions are at the discretion of our parent company's board of directors. Our parent company considers market factors and our operating partnership's performance in addition to REIT requirements in determining distribution levels. Our parent company has distributed at least 100% of its taxable income annually since inception to minimize corporate level federal income taxes. Amounts accumulated for distribution to stockholders are invested primarily in interest-bearing accounts and short-term interest-bearing securities, which are consistent with our intention to maintain our parent company's status as a REIT.

As a result of this distribution requirement, our operating partnership cannot rely on retained earnings to fund its on-going operations to the same extent that other companies whose parent companies are not REITs can. Our parent company may need to continue to raise capital in the debt and equity markets to fund our operating partnership's working capital needs, as well as potential developments at new or existing properties, acquisitions or investments in

existing or newly created joint ventures. In addition, our parent company may be required to use borrowings under our operating partnership's global revolving credit facility, if necessary, to meet REIT distribution requirements and maintain our parent company's REIT status.

Our parent company has declared and paid the following dividends on its common and preferred stock for the nine months ended September 30, 2015 (in thousands, except per share amounts):

Table of Contents

Date dividend declared	Dividend payment date	Series E Preferred Stock	Series F Preferred Stock	Series G Preferred Stock	Series H Preferred Stock	Common Stock
February 25, 2015	March 31, 2015	$5,031	$3,023	$3,672	$6,730	$115,419
May 12, 2015	June 30, 2015	5,031	3,023	3,672	6,730	115,458
August 11, 2015	September 30, 2015	5,031	3,023	3,672	6,730	115,454
		$15,093	$9,069	$11,016	$20,190	$346,331
Annual rate of dividend per share		$1.750	$1.656	$1.469	$1.844	$3.400

Distributions out of our parent company's current or accumulated earnings and profits are generally classified as dividends whereas distributions in excess of our company's current and accumulated earnings and profits, to the extent of a stockholder's U.S. federal income tax basis in our parent company's stock, are generally classified as a return of capital. Distributions in excess of a stockholder's U.S. federal income tax basis in our parent company's stock are generally characterized as capital gain. Cash provided by operating activities has been generally sufficient to fund distributions on an annual basis; however, we may also need to utilize borrowings under the global revolving credit facility to fund distributions.

Liquidity and Capital Resources of the Operating Partnership

In this "Liquidity and Capital Resources of the Operating Partnership" section, the terms "we", "our" and "us" refer to our operating partnership together with its consolidated subsidiaries or our operating partnership and our parent company together with their consolidated subsidiaries, as the context requires.

Analysis of Liquidity and Capital Resources

Our parent company is our sole general partner and consolidates our results of operations for financial reporting purposes. Because we operate on a consolidated basis with our parent company, the section entitled "Liquidity and Capital Resources of the Parent Company" should be read in conjunction with this section to understand our liquidity and capital resources on a consolidated basis.

As of September 30, 2015, we had $23.0 million of cash and cash equivalents, excluding $12.5 million of restricted cash. Restricted cash primarily consists of interest-bearing cash deposits required by the terms of several of our mortgage loans for a variety of purposes, including real estate taxes, insurance, anticipated or contractually obligated tenant improvements, as well as capital expenditures.

Our short-term liquidity requirements primarily consist of operating expenses, development costs and other expenditures associated with our properties, distributions to our parent company in order for it to make dividend payments on its preferred stock, distributions to our parent company in order for it to make dividend payments to its stockholders required to maintain its REIT status, distributions to the unitholders in our operating partnership, capital expenditures, debt service on our loans and, potentially, acquisitions. We expect to meet our short-term liquidity requirements through net cash provided by operations, restricted cash accounts established for certain future payments and by drawing upon our global revolving credit facility.

On August 15, 2013, we refinanced our global revolving credit facility, increasing the total borrowing capacity to $2.0 billion from $1.8 billion. The global revolving credit facility has an accordion feature that would enable us to increase the borrowing capacity of the credit facility to $2.55 billion, subject to the receipt of lender commitments and other conditions precedent. The refinanced facility matures on November 3, 2017, with two six-month extension options available. The interest rate for borrowings under the expanded facility equals the applicable index plus a margin which is based on the credit ratings of our long-term debt and is currently 110 basis points. An annual facility fee on the total commitment amount of the facility, based on the credit rating of our long-term debt and currently 20 basis points, is payable quarterly. Funds may be drawn in U.S., Canadian, Singapore, Australian and Hong Kong dollars, as well as Euro, British pound sterling, Swiss franc, Japanese yen and Mexican peso denominations. As of September 30, 2015,

borrowings under the global revolving credit facility bore interest at an overall blended rate of 1.63% comprised of 1.29% (U.S. dollars), 1.62% (British pound sterling), 1.00% (Euros), 3.15% (Australian dollars), 1.36% (Hong Kong dollars), 1.13% (Japanese yen), 2.42% (Singapore dollar) and 1.86% (Canadian dollars). The interest rates are based on 1-month LIBOR, 1-month GBP LIBOR, 1-month EURIBOR, 1-month BBR, 1-month HIBOR, 1-month JPY LIBOR, 1-month SOR and 1-month CDOR, respectively, plus a margin of 1.10%. The facility also bore a base borrowing rate of 3.35% (USD) which is based on U.S. Prime Rate plus a margin of 0.10%. We have used and intend to

Table of Contents

use borrowings under the global revolving credit facility to acquire additional properties, fund development opportunities and to provide for working capital and other corporate purposes, including potentially for the repurchase, redemption or retirement of outstanding debt or equity securities. As of September 30, 2015, we have capitalized approximately $18.0 million of financing costs related to the global revolving credit facility. As of September 30, 2015, approximately $689.0 million was drawn under this facility and $5.5 million of letters of credit were issued, leaving approximately $1.2 billion available for use.

On August 15, 2013, we refinanced the senior unsecured multi-currency term loan facility, increasing its total borrowing capacity to $1.0 billion from $750.0 million. Pursuant to the accordion feature total commitments can be increased to $1.1 billion, subject to the receipt of lender commitments and other conditions precedent. The facility matures on April 16, 2017, with two six-month extension options available. Interest rates are based on our senior unsecured debt ratings and are currently 120 basis points over the applicable index for floating rate advances. Funds may be drawn in U.S., Singapore and Australian dollars, as well as Euro and British pound sterling denominations with the option to add Hong Kong dollars and Japanese yen upon an accordion exercise. Based on exchange rates in effect at September 30, 2015, the balance outstanding is approximately $938.3 million. We have used borrowings under the term loan for acquisitions, repayment of indebtedness, development, working capital and general corporate purposes. As of September 30, 2015, we have capitalized approximately $8.4 million of financing costs related to the unsecured term loan.

For a discussion of the potential impact of current global economic and market conditions on our liquidity and capital resources, see "—Factors Which May Influence Future Results of Operations—Global market and economic conditions" above.

Our parent company commenced its At-the-Market equity distribution program in June 2011, which is discussed under "Liquidity and Capital Resources of the Parent Company" above. To date, our parent company has generated net proceeds of approximately $342.7 million from the issuance of approximately 5.7 million shares of common stock under the program at an average price of $60.35 per share after payment of approximately $3.5 million of commissions to the sales agents before offering expenses. The proceeds from the issuances were contributed to us in exchange for the issuance of approximately 5.7 million common units to our parent company. No sales were made under the program during the nine months ended September 30, 2015 and 2014. As of September 30, 2015, shares of common stock having an aggregate offering price of $53.8 million remained available for offer and sale under the program.

On February 5, 2015, the operating partnership sold the 100 Quannapowitt property for approximately $31 million. The transaction after costs resulted in net proceeds of approximately $29 million and a net gain of approximately $10 million. The property was identified as held for sale as of December 31, 2014. 100 Quannapowitt was not a significant component of our U.S. portfolio nor does the sale represent a significant shift in our strategy.

On March 31, 2015, the operating partnership sold the 3300 East Birch Street property for approximately $14 million. The transaction after costs resulted in net proceeds of approximately $14 million and a net gain of approximately $8 million. The property was identified as held for sale as of December 31, 2014. 3300 East Birch Street was not a significant component of our U.S. portfolio nor does the sale represent a significant shift in our strategy.

On April 30, 2015, the operating partnership sold the 833 Chestnut Street property for approximately $161 million. The transaction after costs and buyer credits resulted in net proceeds of approximately $159 million, including a $9 million note receivable, and a net gain of approximately $77 million. The property was identified as held for sale as of March 31, 2015. 833 Chestnut Street was not a significant component of our U.S. portfolio nor does the sale represent a significant shift in our strategy.

On May 26, 2015, the operating partnership redeemed $375.0 million, the entire outstanding principal amount, of its 2015 Notes, at a redemption price of 100% of the principal amount of the 2015 Notes plus accrued and unpaid interest thereon up to, but excluding, the redemption date.

On June 23, 2015, the operating partnership issued $500.0 million in aggregate principal amount of notes, maturing on July 1, 2022 with an interest rate of 3.950% per annum. The public offering price was 99.236% of the principal amount. The 3.950% 2022 Notes are general unsecured senior obligations of the operating partnership, rank equally in right of payment with all other senior unsecured indebtedness of the operating partnership and are fully and

unconditionally guaranteed by Digital Realty Trust, Inc. Interest on the 3.950% 2022 Notes is payable on January 1 and July 1 of each year, beginning on January 1, 2016. The net proceeds from the offering after deducting the original issue discount of approximately $3.8 million and underwriting commissions and expenses of approximately $4.4 million was approximately $491.8 million. The operating partnership will use the net proceeds from the offering of the notes to fund certain eligible green projects, including the development and redevelopment of such projects. Pending such uses, the operating partnership temporarily repaid borrowings under its global revolving credit facility. On October 13, 2015, upon the consummation of the Operating Partnership Merger, our operating partnership became the direct obligor on the $950.0 million in aggregate principal amount of Delta Holdings Notes by operation of law.

Table of Contents

The growing acceptance by private institutional investors of the data center asset class has generally pushed capitalization rates lower; as such private investors typically have lower return expectations than us. As a result, we anticipate that near-term acquisitions activity will comprise a smaller percentage of our growth until seller price expectations realign with our return requirements.

Construction

The table below summarizes our construction in progress (included in investments in real estate) as of September 30, 2015 and December 31, 2014:

(dollars in thousands)	As of September 30, 2015				As of December 31, 2014			
	Net Rentable Square Feet	Current Investment(2)	Future Investment(3)	Total Cost	Net Rentable Square Feet	Current Investment(4)	Future Investment(3)	Total Cost

(1) Represents approximately 167 acres as of September 30, 2015 and approximately 178 acres as of December 31, 2014.

(2) Represents balances incurred through September 30, 2015 and included in building and improvements in the condensed consolidated balance sheets.

(3) Represents estimated cost to complete specific scope of work pursuant to contract, budget or approved capital plan.

(4) Represents balances incurred through December 31, 2014 and included in building and improvements in the condensed consolidated balance sheets.

Land inventory and space held for development reflect cumulative cost spent pending future development. Base building construction consists of ongoing improvements to building infrastructure in preparation for future datacenter fit-out. Datacenter construction includes 0.6 million square feet of Turn Key Flex®, Powered Base Building®, and Custom Solutions product with a cost to date of approximately $206.4 million. Generally, we expect to deliver the

space within 12 months; however, lease commencement dates may significantly impact final delivery schedules. Equipment pool and other inventory represent the value of long-lead equipment and materials required for timely deployment and delivery of datacenter construction fit-out. Campus, tenant improvements and other costs include the value of development work which benefits space recently converted to our operating portfolio and is composed primarily of shared infrastructure projects and first-generation tenant improvements.

Future Uses of Cash

Our properties require periodic investments of capital for tenant-related capital expenditures and for general capital improvements. As of September 30, 2015, we had approximately 1.4 million square feet of space under active development and approximately 1.3 million square feet of space held for future development and we also owned approximately 0.6 million net rentable square feet of datacenter space with extensive installed tenant improvements. Turn-Key Flex® space is move-in-ready space for the placement of computer and network equipment required to provide a datacenter environment. Depending on demand for additional Turn-Key Flex® space, we expect to incur significant tenant improvement costs to build out and develop these types of spaces. At September 30, 2015, the approximate 1.4 million square feet of space under active development was under construction for Turn-Key Flex®, Powered Base Building® and Custom Solutions products, all of which are expected to be income producing on or after completion, in three U.S. domestic metropolitan areas, two European metropolitan areas, one Canadian metropolitan area, one Australian metropolitan area and one Singapore metropolitan area, consisting of

Table of Contents

approximately 0.8 million square feet of base building construction and 0.6 million square feet of data center construction. At September 30, 2015, we had commitments under construction contracts for approximately $135.6 million. We currently expect to incur approximately $150.0 million to $200.0 million of capital expenditures for our development programs during the three months ending December 31, 2015, although this amount may increase or decrease, potentially materially, based on numerous factors, including changes in demand, leasing results and availability of debt or equity capital.

Historical Capital Expenditures (Cash Basis)

The table below summarizes our capital expenditure activity for the nine months September 30, 2015 and 2014 (in thousands):

	Nine Months Ended September 30,	
	2015	2014
Development projects [1]	$384,726	$517,368
Enhancement and improvements [1]	10,181	48,144
Recurring capital expenditures [1]	56,490	31,521
Total capital expenditures (excluding indirect costs)	$451,397	$597,033

(1) Beginning in the first quarter of 2015, we changed the presentation of certain capital expenditures. Infrequent expenditures for capitalized replacements and upgrades are now categorized as recurring capital expenditures (categorized as enhancements and improvements in 2014). First-generation leasing costs are now classified as part of development projects (categorized as recurring capital expenditures in 2014).

For the nine months ended September 30, 2015, total capital expenditures decreased $145.6 million to approximately $451.4 million from $597.0 million for the same period in 2014. Capital expenditures on our development projects plus our enhancement and improvements projects for the nine months ended September 30, 2015 were approximately $394.9 million, which reflects a decrease of approximately 30% from the same period in 2014. This decrease was primarily due to completion of and decreased spending for ground-up Custom Solutions projects, Turn-Key Flex and base building improvements. Our development capital expenditures are generally funded by our available cash and equity and debt capital.

Indirect costs, including capitalized interest, capitalized in the nine months ended September 30, 2015 and 2014 were $49.7 million and $52.8 million, respectively. Capitalized interest comprised approximately $9.9 million and $15.6 million, respectively, of the total indirect costs capitalized for the nine months ended September 30, 2015 and 2014. Capitalized interest in the nine months ended September 30, 2015 decreased compared to the same period in 2014 due to a reduction in qualifying activities. Excluding capitalized interest, the increase in indirect costs in the nine months ended September 30, 2015 compared to the same period in 2014 was primarily due to capitalized amounts relating to compensation expense of employees directly engaged in construction and leasing activities. See “—Future Uses of Cash” above for a discussion of the amount of capital expenditures we expect to incur during the year ending December 31, 2015.

The environmental cleanup work required at the 47700 Kato Road and 1055 Page Avenue property resulting from a prior tenant’s activities has been substantially completed. The prior tenant of these buildings completed most of the remaining required environmental cleanup work. We intend to seek recovery of past costs incurred for previous environmental cleanup work, as well as other damages. We cannot at this time estimate the likelihood of recovery or the impact on our financial condition and results of operations, however, the amounts are not expected to be material. We are also subject to the commitments discussed below under “Commitments and Contingencies,” “Off-Balance Sheet Arrangements” and “Distributions.”

Consistent with our growth strategy, we actively pursue opportunities for potential acquisitions, with due diligence and negotiations often at different stages at different times. The dollar value of acquisitions for the year ending December 31, 2015 will be based on numerous factors, including tenant demand, leasing results, availability of debt or

equity capital and acquisition opportunities.

We may from time to time seek to retire or repurchase our outstanding debt or the equity of our parent company through cash purchases and/or exchanges for equity securities of our parent company in open market purchases, privately negotiated transactions or otherwise. Such repurchases or exchanges, if any, will depend on prevailing market conditions, our liquidity requirements, contractual restrictions or other factors. The amounts involved may be material.

Table of Contents

We expect to meet our short- and long-term liquidity requirements, including to pay for scheduled debt maturities and to fund property acquisitions and non-recurring capital improvements, with net cash from operations, future long-term secured and unsecured indebtedness and the issuance of equity and debt securities and the proceeds of equity issuances by our parent company. We also may fund future short- and long-term liquidity requirements, including property acquisitions and non-recurring capital improvements, using our global revolving credit facility pending permanent financing. If we are not able to obtain additional financing on terms attractive to us, or at all, including as a result of the circumstances described above under “Factors Which May Influence Future Results of Operations—Global market and economic conditions”, we may be required to reduce our acquisition or capital expenditure plans, which could have a material adverse effect upon our business and results of operations.

Distributions

All distributions on our units are at the discretion of our parent company’s board of directors. During the nine months ended September 30, 2015, our operating partnership declared and paid the following distributions (in thousands, except per unit amounts):

Date distribution declared	Distribution payment date	Series E Preferred Units	Series F Preferred Units	Series G Preferred Units	Series H Preferred Units	Common Units
February 25, 2015	March 31, 2015	$5,031	$3,023	$3,672	$6,730	$117,896
May 12, 2015	June 30, 2015	5,031	3,023	3,672	6,730	117,938
August 11, 2015	September 30, 2015	5,031	3,023	3,672	6,730	117,962
		$15,093	$9,069	$11,016	$20,190	$353,796
Annual rate of distribution per unit		$1.750	$1.656	$1.469	$1.844	$3.400

Commitments and Contingencies

As part of the acquisition of 29A International Business Park, an asset acquisition in 2010, the seller could earn additional consideration based on future net operating income growth in excess of certain performance targets, as defined in the agreements for the acquisition. As of December 31, 2014, certain leases executed subsequent to the acquisition caused an amount to become probable of payment and therefore approximately $12.4 million had been accrued in accounts payable and accrued liabilities and capitalized to buildings and improvements in the condensed consolidated balance sheet as of December 31, 2014 and an earnout payment was made during the three months ended June 30, 2015 in the amount of $17.5 million SGD (or approximately $13.0 million based on the exchange rate on the date of payment). As of September 30, 2015, $18.9 million had been accrued and capitalized for additional earnout payments. The second and third tranches of the earnout payments are forecasted to be made in 2016 and 2020, respectively. The maximum amount that could be earned by the seller is $50.0 million SGD (or approximately $35.2 million based on the exchange rate as of September 30, 2015). The earnout contingency expires in November 2020.

One of the tenants at our Convergence Business Park property has an option to expand as part of their lease agreement, which expires in April 2017. As part of this option, development activities were not permitted on specifically identified expansion space within the property until April 2014. From April 2014 through April 2017, the tenant has the right of first refusal on any third party’s bona fide offer to buy the adjacent land. If the tenant exercises their option, we may either construct and lease to the tenant an additional shell building on the expansion space at a stipulated rate of return on cost or sell the existing building and the expansion space to the tenant for a price of approximately $24.0 million and $225,000 per square acre, respectively, plus additional adjustments as provided in the lease.

As part of the acquisition of the Sentrum Portfolio in July 2012, the seller could earn additional consideration based on future net returns on vacant space to be developed, but not currently leased, as defined in the purchase agreement for the acquisition. The initial estimate of fair value of contingent consideration was approximately £56.5 million (or approximately $87.6 million based on the exchange rate as of July 11, 2012, the acquisition date). We have adjusted the contingent consideration to fair value at each reporting date with changes in fair value recognized in operating

income. During the nine months ended September 30, 2015, we reduced the fair value by approximately £30.3 million. The adjustment was the result of an evaluation by management that no additional leases would be executed for vacant space by July 11, 2015, the contingency expiration date. The final payment on the earnout was made in August 2015. We made earnout payments of approximately £6.2 million (or approximately $10.3 million based on the exchange rates as of the date of each payment) during the nine months ended September 30, 2014. We made earnout payments of approximately £0.7 million (or approximately $1.1 million based on the exchange rates as of the date of each payment) during the nine months ended September 30, 2015. The change in fair value of

Table of Contents

contingent consideration for Sentrum was recorded as an increase to operating expense of approximately $0 and $1.5 million for the three months ended September 30, 2015 and 2014, respectively. The change in fair value of contingent consideration for Sentrum was recorded as a reduction to operating expense of approximately $43.0 million and $4.1 million for the nine months ended September 30, 2015 and 2014, respectively.

On July 22, 2015, we entered into a settlement agreement with former Chief Executive Officer Michael Foust, pursuant to which the parties acknowledged the cancellation of 127,644 profits interest units in the operating partnership held by Mr. Foust, and we agreed to pay Mr. Foust $8.0 million in full satisfaction of any and all amounts owing to Mr. Foust as a result of his employment with the company and the termination thereof. In connection with the settlement, Mr. Foust and the company agreed to dismiss with prejudice the litigation between the parties relating to Mr. Foust's employment and termination of employment, and each party released claims against the other party. We previously recorded an expense of approximately $12.7 million in connection with Mr. Foust's severance payments and reversed the excess expense of approximately $4.6 million in the three months ending September 30, 2015 as a reduction to general and administrative expense in the condensed and consolidated income statement.

As of September 30, 2015, we were a party to interest rate swap agreements which hedge variability in cash flows related the U.S. LIBOR and SGD-SOR based tranches of the unsecured term loan. Under these swaps, we pay variable-rate amounts in exchange for fixed-rate payments over the life of the agreements without exchange of the underlying principal amounts. See Item 3. "Quantitative and Qualitative Disclosures about Market Risk."

Outstanding Consolidated Indebtedness

The table below summarizes our debt, as of September 30, 2015 (in millions):

Debt Summary:		
Fixed rate	$3,121.4	
Variable rate debt subject to interest rate swaps	469.1	
Total fixed rate debt (including interest rate swaps)	3,590.5	
Variable rate—unhedged	1,158.1	
Total	$4,748.6	
Percent of Total Debt:		
Fixed rate (including swapped debt)	75.6	%
Variable rate	24.4	%
Total	100.0	%
Effective Interest Rate as of September 30, 2015(1):		
Fixed rate (including hedged variable rate debt)	4.46	%
Variable rate	1.76	%
Effective interest rate	3.80	%

(1) Excludes impact of deferred financing cost amortization.

As of September 30, 2015, we had approximately $4.7 billion of outstanding consolidated long-term debt as set forth in the table above. Our ratio of debt to total enterprise value was approximately 31% (based on the closing price of Digital Realty Trust, Inc.'s common stock on September 30, 2015 of $65.32). For this purpose, our total enterprise value is defined as the sum of the market value of Digital Realty Trust, Inc.'s outstanding common stock (which may decrease, thereby increasing our debt to total enterprise value ratio), excluding options issued under our incentive award plan, plus the liquidation value of Digital Realty Trust, Inc.'s preferred stock, plus the aggregate value of our operating partnership's units not held by Digital Realty Trust, Inc. (with the per unit value equal to the market value of one share of Digital Realty Trust, Inc.'s common stock and excluding long-term incentive units, Class C Units and Class D Units), plus the book value of our total consolidated indebtedness.

The variable rate debt shown above bears interest at interest rates based on various one-month LIBOR, EURIBOR, GBP LIBOR, SOR, BBR, HIBOR, JPY LIBOR, CDOR and U.S. Prime rates, depending on the respective agreement governing the debt, including our global revolving credit facility and unsecured term loan. As of September 30, 2015, our debt had a weighted average term to initial maturity of approximately 4.7 years (or approximately 5.0 years

assuming exercise of extension options).

Off-Balance Sheet Arrangements

As of September 30, 2015, we were party to interest rate swap agreements related to $469.1 million of outstanding principal on our variable rate debt. See Item 3. “Quantitative and Qualitative Disclosures about Market Risk.”

As of September 30, 2015, our pro-rata share of debt of unconsolidated joint ventures was approximately $137.2 million, of which $54.5 million is subject to interest rate swap agreements.

Table of Contents

Cash Flows

The following summary discussion of our cash flows is based on the condensed consolidated statements of cash flows and is not meant to be an all-inclusive discussion of the changes in our cash flows for the periods presented below.

Comparison of Nine Months Ended September 30, 2015 to Nine Months Ended September 30, 2014

The following table shows cash flows and ending cash and cash equivalent balances for the nine months ended September 30, 2015 and 2014 (in thousands).

	Nine Months Ended September 30,		
	2015	2014	Change
Net cash provided by operating activities	$539,207	$472,567	$66,640
Net cash used in investing activities	(425,241)	(464,886)	39,645
Net cash used in financing activities	(125,782)	(26,834)	(98,948)
Net decrease in cash and cash equivalents	$(11,816)	$(19,153)	$7,337

The increase in net cash provided by operating activities was due to increased cash flows from new leasing at our stabilized properties and completed and leased development space, which was partially offset by increased operating and interest expenses.

Net cash used in investing activities decreased for the nine months ended September 30, 2015, primarily as a result of a decrease in cash paid for capital expenditures for the nine months ended September 30, 2015 ($535.1 million) as compared to the same period in 2014 ($644.6 million) along with an increase in net proceeds from the sale of properties for the nine months ended September 30, 2015 ($185.6 million) as compared to the same period in 2014 ($37.9 million) offset by cash paid for acquisitions for the nine months ended September 30, 2015 ($48.4 million).

Net cash flows provided by financing activities for the company consisted of the following amounts (in thousands).

	Nine Months Ended September 30,		
	2015	2014	Change
Repayment of borrowings, net of proceeds	$(330,436)	$(374,934)	$44,498
Net proceeds from issuance of common and preferred stock, including exercise of stock options	244,864	353,316	(108,452)
Net proceeds from 2023 Notes	—	495,872	(495,872)
Net proceeds from 2022 Notes	496,190	—	496,190
Dividend and distribution payments	(524,180)	(490,745)	(33,435)
Other	(12,220)	(10,343)	(1,877)
Net cash used in financing activities	$(125,782)	$(26,834)	$(98,948)

The increase in net cash used in financing activities was primarily due to the issuance of our series H preferred stock (net proceeds of $353.3 million) in March and April 2014 and the issuance of our 2023 Notes (net proceeds of $495.9 million) in April 2014 partially offset by lower net repayments during the nine months ended September 30, 2015 (net repayments of $330.4 million) as compared to the nine months ended September 30, 2014 (net repayments of $374.9 million) along with the issuance of our 2022 Notes (net proceeds of $496.2 million) in June 2015. The increase in dividend and distribution payments for the nine months ended September 30, 2015 as compared to the same period in 2014 was due to an increase in the number of shares outstanding and dividend amount per share of common stock in 2015 as compared to 2014 and the payment of dividends on our series H preferred stock during the nine months ended September 30, 2015, whereas this series of preferred stock was not outstanding for the entire portion of the nine months ended September 30, 2014.

Table of Contents

Net cash flows provided by financing activities for the operating partnership consisted of the following amounts (in thousands).

	Nine Months Ended September 30,		
	2015	2014	Change
Repayment of borrowings, net of proceeds	$(330,436)	$(374,934)	$44,498
General partner contributions, net	2,175	353,316	(351,141)
Due to Parent	242,689	—	242,689
Net proceeds from 2023 Notes	—	495,872	(495,872)
Net proceeds from 2022 Notes	496,190	—	496,190
Distribution payments	(524,180)	(490,745)	(33,435)
Other	(12,220)	(10,343)	(1,877)
Net cash used in financing activities	$(125,782)	$(26,834)	$(98,948)

The increase in net cash used in financing activities was primarily due to the higher general partner contributions in 2014 in connection with Digital Realty Trust, Inc.'s series H preferred stock offering in March and April 2014 (net proceeds of $353.3 million) along with the issuance of our 2023 Notes (net proceeds of $495.9 million) in April 2014 partially offset by lower net repayments during the nine months ended September 30, 2015 (net repayments of $330.4 million) as compared to the nine months ended September 30, 2014 (net repayments of $374.9 million) along with the issuance of our 2022 Notes (net proceeds of $496.2 million) in June 2015. The increase in distribution payments for the nine months ended September 30, 2015 as compared to the same period in 2014 was due to an increase in the number of units outstanding and distribution amount per common unit in 2015 as compared to 2014 and the payment of distributions on our series H preferred units during the nine months ended September 30, 2015, whereas this series of preferred units was not outstanding for the entire portion of the nine months ended September 30, 2014.

Noncontrolling Interests in Operating Partnership

Noncontrolling interests relate to the common units in our operating partnership that are not owned by Digital Realty Trust, Inc., which, as of September 30, 2015, amounted to 2.0% of our operating partnership common units. In conjunction with our formation, our operating partnership issued common units to third party sellers in connection with our acquisition of real estate interests from such third parties.

Limited partners who acquired common units in connection with our formation have the right to require our operating partnership to redeem part or all of their common units for cash based upon the fair market value of an equivalent number of shares of Digital Realty Trust, Inc. common stock at the time of the redemption. Alternatively, we may elect to acquire those common units in exchange for shares of Digital Realty Trust, Inc. common stock on a one-for-one basis, subject to adjustment in the event of stock splits, stock dividends, issuance of stock rights, specified extraordinary distributions and similar events. Pursuant to registration rights agreements we entered into with third party contributors, we filed a shelf registration statement covering the issuance of the shares of our common stock issuable upon redemption of the common units, and the resale of those shares of common stock by the holders.

Inflation

Many of our leases provide for separate real estate tax and operating expense escalations. In addition, many of the leases provide for fixed base rent increases. We believe that inflationary increases may be at least partially offset by the contractual rent increases and expense escalations described above.

Funds from Operations

We calculate Funds from Operations, or FFO, in accordance with the standards established by the National Association of Real Estate Investment Trusts, or NAREIT. FFO represents net income (loss) available to common stockholders (computed in accordance with U.S. GAAP), excluding gains (or losses) from sales of property, impairment charges, real estate related depreciation and amortization (excluding amortization of deferred financing costs) and after adjustments for unconsolidated partnerships and joint ventures. Management uses FFO as a supplemental performance measure because, in excluding real estate related depreciation and amortization and gains and losses from property dispositions, it provides a performance measure that, when compared year over year, captures trends in occupancy rates, rental rates and operating costs. We also believe that, as a widely recognized

measure of the performance of REITs, FFO will be used by investors as a basis to compare our operating performance with that of other REITs. However, because FFO excludes depreciation and amortization and captures neither the changes in the value of our properties that result from use or market conditions, nor the level of capital expenditures and leasing commissions necessary to maintain the operating performance of our properties, all of which have real economic

Table of Contents

effect and could materially impact our financial condition and results from operations, the utility of FFO as a measure of our performance is limited. Other REITs may not calculate FFO in accordance with the NAREIT definition and, accordingly, our FFO may not be comparable to such other REITs' FFO. Accordingly, FFO should be considered only as a supplement to net income computed in accordance with GAAP as a measure of our performance.

Reconciliation of Net Income Available to Common Stockholders to Funds From Operations (FFO)
(unaudited, in thousands, except per share data)

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Net income available to common stockholders	$38,522	$109,314	$257,305	$185,010
Adjustments:				
Noncontrolling interests in operating partnership	747	2,272	5,150	3,838
Real estate related depreciation and amortization (1)	135,613	136,289	393,634	401,723
Real estate related depreciation and amortization related to investment in unconsolidated joint ventures	2,760	1,934	8,551	5,364
Impairment of investments in real estate	—	12,500	—	12,500
Gain on sale of properties	207	—	(94,282)	(15,945)
Gain on contribution of properties to unconsolidated joint ventures	—	(93,498)	—	(95,404)
FFO available to common stockholders and unitholders (2)	$177,849	$168,811	$570,358	$497,086
Basic FFO per share and unit	$1.28	$1.22	$4.12	$3.67
Diluted FFO per share and unit (2)	$1.28	$1.22	$4.10	$3.63
Weighted average common stock and units outstanding				
Basic	138,468	138,308	138,481	135,382
Diluted (2)	139,192	138,762	139,051	138,217
(1) Real estate related depreciation and amortization was computed as follows:				
Depreciation and amortization per income statement	136,974	137,474	397,571	405,186
Non-real estate depreciation	(1,361)	(1,185)	(3,937)	(3,463)
	$135,613	$136,289	$393,634	$401,723

(2) For all periods presented, we have excluded the effect of dilutive series E, series F, series G and series H preferred stock, as applicable, that may be converted upon the occurrence of specified change in control transactions as described in the articles supplementary governing the series E, series F, series G and series H preferred stock, as applicable, which we consider highly improbable. In addition, the 5.50% exchangeable senior debentures due 2029 were exchangeable for 0 and 2,618 common shares on a weighted average basis for the three and nine months ended September 30, 2014, respectively. See below for calculations of diluted FFO available to common stockholders and unitholders and weighted average common stock and units outstanding.

Table of Contents

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
FFO available to common stockholders and unitholders	$177,849	$168,811	$570,358	$497,086
Add: 5.50% exchangeable senior debentures interest expense	—	—	—	4,725

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our future income, cash flows and fair values relevant to financial instruments depend upon prevalent market interest rates. Market risk refers to the risk of loss from adverse changes in market prices and interest rates. We do not use derivatives for trading or speculative purposes and only enter into contracts with major financial institutions based on their credit rating and other factors.

Analysis of Debt between Fixed and Variable Rate

We use interest rate swap agreements and fixed rate debt to reduce our exposure to interest rate movements. As of September 30, 2015, our consolidated debt was as follows (in millions):

	Carrying Value	Estimated Fair Value
Fixed rate debt	$3,121.4	$3,282.5
Variable rate debt subject to interest rate swaps	469.1	469.1
Total fixed rate debt (including interest rate swaps)	3,590.5	3,751.6
Variable rate debt	1,158.1	1,158.1
Total outstanding debt	$4,748.6	$4,909.7

Interest rate derivatives included in this table and their fair values as of September 30, 2015 and December 31, 2014 were as follows (in thousands):

Notional Amount							Fair Value at Significant Other Observable Inputs (Level 2)	
As of September 30, 2015	As of December 31, 2014	Type of Derivative	Strike Rate	Effective Date	Expiration Date		As of September 30, 2015	As of December 31, 2014
Currently-paying contracts								
$335,905	(1) $ 410,905	(1) Swap	0.717	Various	Various		$ (1,502)	$ (241)
133,237	(2) 142,965	(2) Swap	0.925	July 17, 2012	April 18, 2017		1,435	669
469,142	553,870						(67)	428
Forward-starting contracts								
—	(3) 150,000	Forward-starting Swap	2.091	July 15, 2014	July 15, 2019		—	(2,837)
Total $469,142	$ 703,870						$ (67)	$ (2,409)

(1) Represents the U.S. dollar tranche of the unsecured term loan.

(2) Represents a portion of the Singapore dollar tranche of the unsecured term loan. Translation to U.S. dollars is based on exchange rate of $0.70 to 1.00 SGD as of September 30, 2015 and $0.75 to 1.00 SGD as of December 31, 2014.

(3) In January 2014, we entered into a forward-starting five-year swap contract to protect against adverse fluctuations in interest rates by reducing our exposure to variability in cash flows relating to interest payments on a forecasted issuance of debt. The accrual period of the swap contract was designed to match the tenor of the planned debt issuance. In the fourth quarter of 2014, changes in the forecasted transaction resulted in the discontinuation of cash flow hedge accounting. As such, changes in the fair value of the forward starting swap were recognized in earnings, within the other income (expense) line item. During the three months ended March 31, 2015, the total net loss recognized on the forward starting swap was approximately $1.6 million, and on January 13, 2015, we cash settled the forward starting swap for approximately $5.7 million, including accrued interest.

77

Table of Contents

Sensitivity to Changes in Interest Rates

The following table shows the effect if assumed changes in interest rates occurred, based on fair values and interest expense as of September 30, 2015:

Assumed event	Interest rate change (basis points)	Change ($ millions)
Increase in fair value of interest rate swaps following an assumed 10% increase in interest rates	9	$ 0.7
Decrease in fair value of interest rate swaps following an assumed 10% decrease in interest rates	(9)	(0.7)
Increase in annual interest expense on our debt that is variable rate and not subject to swapped interest following a 10% increase in interest rates	9	1.1
Decrease in annual interest expense on our debt that is variable rate and not subject to swapped interest following a 10% decrease in interest rates	(9)	(1.1)
Increase in fair value of fixed rate debt following a 10% decrease in interest rates	(9)	20.4
Decrease in fair value of fixed rate debt following a 10% increase in interest rates	9	(18.4)

Interest risk amounts were determined by considering the impact of hypothetical interest rates on our financial instruments. These analyses do not consider the effect of any change in overall economic activity that could occur in that environment. Further, in the event of a change of that magnitude, we may take actions to further mitigate our exposure to the change. However, due to the uncertainty of the specific actions that would be taken and their possible effects, these analyses assume no changes in our financial structure.

Foreign Currency Exchange Risk

For the nine months ended September 30, 2015 and 2014, we had foreign operations in the United Kingdom, Ireland, France, The Netherlands, Switzerland, Canada, Singapore, Australia, Hong Kong and Japan, and, as such, are subject to risk from the effects of exchange rate movements of foreign currencies, which may affect future costs and cash flows. Our foreign operations are conducted in the British pound sterling, Euro, Swiss franc, Canadian dollar, Singapore dollar, Australian dollar, Hong Kong dollar and the Japanese yen. Our primary currency exposures are to the British pound sterling, Euro and the Singapore dollar. We attempt to mitigate a portion of the risk of currency fluctuation by financing our investments in the local currency, although there can be no assurance that this will be effective. As a result, changes in the relation of any such foreign currency to U.S. dollars may affect our revenues, operating margins and distributions and may also affect the book value of our assets and the amount of stockholders' equity. For the three months ended September 30, 2015 and 2014, operating revenues from properties outside the United States contributed $101.4 million and $97.3 million, respectively, which represented 23.3% and 23.6% of our total operating revenues, respectively. For the nine months ended September 30, 2015 and 2014, operating revenues from properties outside the United States contributed $291.3 million and $288.6 million, respectively, which represented 23.1% and 24.0% of our total operating revenues, respectively. Net investment in properties outside the United States was $2.6 billion and $2.7 billion as of September 30, 2015 and December 31, 2014, respectively. Net assets in foreign operations were approximately $0.6 billion and $0.7 billion as of September 30, 2015 and December 31, 2014, respectively.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures (Digital Realty Trust, Inc.)

The company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in its reports filed under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the U.S. Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to its management, including its chief

executive officer and chief financial officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, the company's management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and its management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Also, the company has investments in certain unconsolidated entities, which are accounted for using the equity method of accounting. As the company does not control or manage these entities, its disclosure controls and procedures with respect to such entities may be substantially more limited than those it maintains with respect to its consolidated subsidiaries.

Table of Contents

As required by Rule 13a-15(b) or Rule 15d-15(b) of the Securities Exchange Act of 1934, as amended, management of the company carried out an evaluation, under the supervision and with participation of its chief executive officer and chief financial officer, of the effectiveness of the design and operation of its disclosure controls and procedures that were in effect as of the end of the quarter covered by this report. Based on the foregoing, the company's chief executive officer and chief financial officer concluded that its disclosure controls and procedures were effective at the reasonable assurance level.

There have been no changes in the company's internal control over financial reporting during its most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

On May 14, 2013, the Committee of Sponsoring Organizations of the Treadway Commission (COSO) issued an updated version of its Internal Control — Integrated Framework (2013 Framework). Originally issued in 1992 (1992 Framework), the framework helps organizations design, implement and evaluate the effectiveness of internal control concepts and simplify their use and application. The 1992 Framework remains available during the transition period, which extends to December 15, 2014, after which time COSO will consider it as superseded by the 2013 Framework. As of September 30, 2015, the company continues to utilize the 1992 Framework during the transition to the 2013 Framework by the end of 2015. We expect that management's assessment of the overall effectiveness of our internal controls over financial reporting for the year ending December 31, 2015 will be based on the 2013 Framework and that the change will not be significant to our overall control structure over financial reporting.

Evaluation of Disclosure Controls and Procedures (Digital Realty Trust, L.P.)

The operating partnership maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in its reports filed under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the U.S. Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to its management, including the chief executive officer and chief financial officer of its general partner, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, the operating partnership's management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and its management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Also, the operating partnership has investments in certain unconsolidated entities, which are accounted for using the equity method of accounting. As the operating partnership does not control or manage these entities, its disclosure controls and procedures with respect to such entities may be substantially more limited than those it maintains with respect to its consolidated subsidiaries.

As required by Rule 13a-15(b) or Rule 15d-15(b) of the Securities Exchange Act of 1934, as amended, management of the operating partnership carried out an evaluation, under the supervision and with participation of the chief executive officer and chief financial officer of its general partner, of the effectiveness of the design and operation of its disclosure controls and procedures that were in effect as of the end of the quarter covered by this report. Based on the foregoing, the chief executive officer and chief financial officer of the operating partnership's general partner concluded that its disclosure controls and procedures were effective at the reasonable assurance level.

There have been no changes in the operating partnership's internal control over financial reporting during its most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

On May 14, 2013, the Committee of Sponsoring Organizations of the Treadway Commission (COSO) issued an updated version of its Internal Control — Integrated Framework (2013 Framework). Originally issued in 1992 (1992 Framework), the framework helps organizations design, implement and evaluate the effectiveness of internal control concepts and simplify their use and application. The 1992 Framework remains available during the transition period, which extends to December 15, 2014, after which time COSO will consider it as superseded by the 2013 Framework. As of September 30, 2015, the operating partnership continues to utilize the 1992 Framework during the transition to

the 2013 Framework by the end of 2015. We expect that management's assessment of the overall effectiveness of our internal controls over financial reporting for the year ending December 31, 2015 will be based on the 2013 Framework and that the change will not be significant to our overall control structure over financial reporting.

PART II—OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

None.

ITEM 1A. RISK FACTORS.

The risk factors discussed under the heading “Risk Factors” and elsewhere in the company’s and the operating partnership’s Annual Report on Form 10-K for the year ended December 31, 2014 continue to apply to our business and should be supplemented with the following risk factor:

Tax Liabilities and Attributes Inherited in Connection with Acquisitions.

From time to time we may acquire other corporations or entities and, in connection with such acquisitions, we may succeed to the historic tax attributes and liabilities of such entities. For example, if we acquire a C corporation and subsequently dispose of its assets within ten years of the acquisition, we could be required to pay tax on any built-in gain attributable to such assets determined as of the date on which we acquired the assets. In addition, in order to qualify as a REIT, at the end of any taxable year, we must not have any earnings and profits accumulated in a non-REIT year. As a result, if we acquire a C corporation, we must distribute the corporation’s earnings and profits accumulated prior to the acquisition before the end of the taxable year in which we acquire the corporation. We also could be required to pay the acquired entity’s unpaid taxes even though such liabilities arose prior to the time we acquired the entity. Telx was a C corporation at the time of the Telx Acquisition, and the Telx Acquisition raises each of these issues.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

Digital Realty Trust, Inc.

None.

Digital Realty Trust, L.P.

During the three months ended September 30, 2015, our operating partnership issued partnership units in private placements in reliance on the exemption from registration provided by Section 4(2) of the Securities Act, in the amounts and for the consideration set forth below:

During the three months ended September 30, 2015, Digital Realty Trust, Inc. issued an aggregate of 15,000 shares of its common stock upon the exercise of stock options. Digital Realty Trust, Inc. contributed the proceeds from the option exercises of approximately $0.3 million to our operating partnership in exchange for an aggregate of 15,000 common units, as required by our operating partnership’s partnership agreement.

During the three months ended September 30, 2015, Digital Realty Trust, Inc. issued an aggregate of 3,938 shares of its common stock in connection with restricted stock awards for no cash consideration. For each share of common stock issued by Digital Realty Trust, Inc. in connection with such an award, our operating partnership issued a restricted common unit to Digital Realty Trust, Inc. During the three months ended September 30, 2015, our operating partnership issued an aggregate of 3,938 common units to Digital Realty Trust, Inc., as required by our operating partnership’s partnership agreement. During the three months ended September 30, 2015, an aggregate of 11,746 shares of its common stock were forfeited to Digital Realty Trust, Inc. in connection with restricted stock awards for a net forfeiture of 7,808 shares of common stock.

For these issuances of common units to Digital Realty Trust, Inc., our operating partnership relied on Digital Realty Trust, Inc.’s status as a publicly traded NYSE-listed company with approximately $9.5 billion in total consolidated assets and as our operating partnership’s majority owner and general partner as the basis for the exemption under Section 4(2) of the Securities Act.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.
