Item 2.02. Results of Operations and Financial Condition

On March 6th 2007, Mr. B.A. "Bill" Berilgen, President and Chief Executive Officer of Rosetta Resources Inc. ("Rosetta"), will present information on Rosetta at the Nasdaq Oil and Gas Conference in London, as described below in Item 7.01. Certain of the information to be provided at the conference, although estimates prepared by management, may be deemed to be results of operations and therefore are presented below. Based on estimates of production costs, Rosetta estimates the following for fiscal year 2006:

**2006 Estimated
Actual**

Average Realized Price/Mcfe	\$8.13
n Operating Costs/Mcfe	
w Direct LO	\$0.65
w Ad-Valorem Tax	0.20
w Work over	0.19
w Insurance	0.04
n Total Lifting Costs	\$1.08
w Production Tax	0.19
w TG&M	0.15
w G&A	0.82
w Interest (net)	0.39
Total Cash Costs per Mcfe	\$2.63
n CASH FROM OPERATIONS/MCFE	\$5.50

(1) Includes costs of SOX implementation and Calpine related transaction costs.

The CASH OPERATIONS / Mcfe included in this presentation is a non-GAAP measure, which can be reconciled to the GAAP measure “Net cash provided by operating activities” by making the following adjustments: (i) CASH OPERATIONS / Mcfe is first multiplied by total company production for the period as measured in Mcfe, (ii) then reduced by current federal and state income taxes, and then (iii) adjusted (either positive or negative as the case may be) for the “Change in operating assets and liabilities” for the period presented. These steps will result in reconciliation to “Net cash provided by operating activities”.
