UNIFIEDONLINE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
DECEMBER 31, 2014

NOTE 1 - NATURE OF BUSINESS

On January 5, 2015, IceWEB, Inc. changed its name to UnifiedOnline, Inc.

UnifiedOnline, Inc. (the “Company”) began trading publicly in April 2002. During the six months ended December 31, 2014 we had three wholly owned operating subsidiaries, Computers & Telecom, Inc. and KCNAP, LLC, (collectively “CTC) and IceWEB Storage Corporation (formerly known as Inline Corporation). CTC provides wireless and fiber broadband service, co-location space and related services and operates a Network Access Point (“NAP”) where customers directly interconnect with a network ecosystem of partners and customers. This access to Internet routes provides CTC customers improved reliability and streamlined connectivity while significantly reducing costs by reaching a critical mass of networks within a centralized physical location. In addition, through our IceWEB Storage Corporation subsidiary we deliver on-line cloud computing application services, other managed services such as Disaster Recovery, Archive Storage, Redundant File Storage, Redundant Broadband Services and Business Continuity Services.

CTC operates a wireless internet service business, providing WIMAX broadband to small and medium size businesses in the metro Kansas-City, Missouri area. In addition CTC offers the following solutions: (i) premium data center co-location, (ii) interconnection and (iii) exchange and outsourced IT infrastructure services.

We leverage our NAP which allows our customers to increase information and application delivery performance while reducing costs. Our platform enables scalable, reliable and cost-effective co-location, interconnection and traffic exchange thus lowering overall cost and increasing flexibility.

NOTE 2 - BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

The accompanying unaudited consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles and include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany transactions and balances have been eliminated in consolidation. These consolidated financial statements should be read in conjunction with the Company’s audited financial statements for the nine month period ended June 30, 2014, contained in the Company’s Annual Report on Form 10-KT filed with the SEC on October 14, 2014. The results of operations for the three and six months ended December 31, 2014, are not necessarily indicative of results to be expected for any other interim period or the fiscal year ending June 30, 2015.

Reclassifications

Certain reclassifications have been made to previously reported amounts to conform to 2015 amounts. The reclassifications had no impact on previously reported results of operations or stockholders’ deficit. The reclassifications were a result of the reverse stock split which occurred on January 5, 2015.

Going Concern

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. The Company had net losses and net cash used in operating activities of \$697,575 and \$519,751, respectively, for the six months ended December 31, 2014. The Company also had an accumulated deficit and stockholder’s deficit of \$53,513,799 and \$4,215,165 respectively at December 31, 2014. These matters raise substantial doubt about the Company’s ability to continue as a going concern. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

Management has established plans intended to increase the sales of our products and services. Management intends to seek new capital from new equity securities offerings to provide funds needed to increase liquidity, fund growth, and implement its business plan. However, no assurances can be given that we will be able to raise any additional funds.

Marketable Securities

UnifiedOnline accounts for the purchase of marketable equity securities in accordance with FASB Accounting Standards Codification (ASC) 320, "Investment – Debt and Equity Securities" with any unrealized gains and losses included as a net amount as a separate component of stockholders' equity. However, those securities may not have the trading volume to support the stock price if the Company were to sell all their shares in the open market at once, so the Company may have a loss on the sale of marketable securities even though they record marketable equity securities at the current market value.

Cash and Cash Equivalents

We consider all highly liquid debt instruments with original maturities of three months or less to be cash equivalents.

UNIFIEDONLINE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
DECEMBER 31, 2014

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the balance sheets and the reported amounts of sales and expenses during the reporting periods. Actual results could differ from those estimates. Significant estimates include the valuation of stock-based compensation, the allowance for doubtful accounts, the useful life of property and equipment, derivative liabilities, and litigation reserves.

Accounts Receivable

Accounts receivable consists of normal trade receivables. We recorded a bad debt allowance of \$5,368 as of December 31, 2014. Management performs ongoing evaluations of its accounts receivable, and believes that all remaining receivables are fully collectable. Bad debt expense amounted to \$545 and \$114,918 for the six months ended December 31, 2014 and 2013, respectively.

Inventory

Inventory is valued at the lower of cost or market, on an average cost basis.

Derivative Liability

The Company issued warrants to purchase the Company's common stock in connection with the issuance of convertible debt, which contain certain ratchet provisions that reduce the exercise price of the warrants or the conversion price in certain circumstances. In accordance with ASC 815 the Company determined that the warrants and/or the conversion features with provisions that reduce the exercise price of the warrants did not qualify for a scope exception under ASC 815 as they were determined not to be indexed to the Company's stock.

Derivatives are required to be recorded on the balance sheet at fair value (see Note 13). These derivatives, including embedded derivatives in the Company's structured borrowings, are separately valued and accounted for on the Company's balance sheet. Fair values for exchange traded securities and derivatives are based on quoted market prices. Where market prices are not readily available, fair values are determined using market based pricing models incorporating readily observable market data and requiring judgment and estimates.

Fair Value Measurements

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The established fair value hierarchy requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Observable inputs such as quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities that are not active; and model-driven valuations whose inputs are observable or whose significant value drivers are observable. Valuations may be obtained from, or corroborated by, third-party pricing services.

Level 3: Unobservable inputs to measure fair value of assets and liabilities for which there is little, if any market activity at the measurement date, using reasonable inputs and assumptions based upon the best information at the time, to the extent that inputs are available without undue cost and effort.

Fair Value of Financial Instruments

The Company's financial instruments, including cash and cash equivalents, receivables, accounts payable and accrued liabilities and notes payable are carried at cost, which approximates their fair value, due to the relatively short maturity of these instruments.

Our derivative financial instruments, consisting of embedded conversion features in our convertible debt and ratchet provisions in our warrants, are required to be measured at fair value on a recurring basis under FASB ASC 815. As of December 31, 2014 our derivatives are measured at fair value, using a Black-Scholes valuation model which approximates a binomial lattice valuation methodology utilizing Level 3 inputs. Level 3 inputs are unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities (see Note 12).

UNIFIEDONLINE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
DECEMBER 31, 2014

Property and Equipment

Property and equipment is stated at cost, net of accumulated depreciation. Depreciation expense is recorded by using the straight-line method over the estimated useful lives of the related assets.

Product Warranties

The Company's products typically carry a warranty for periods of up to three years. We have not had any significant warranty claims on our products.

Software Development Costs

The costs for the development of new software products and substantial enhancements to existing software products are expensed as incurred until technological feasibility has been established, at which time any additional costs would be capitalized in accordance with the accounting guidance for software.

Because our current process for developing software is essentially completed concurrently with the establishment of technological feasibility, which occurs upon the completion of a working model, no costs have been capitalized for any of the periods presented.

Long-lived Assets

In accordance with ASC Topic 360, "Property, Plant, and Equipment", we review the carrying value of intangibles and other long-lived assets for impairment at least annually or whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of long-lived assets is measured by comparison of its carrying amount to the undiscounted cash flows that the asset or asset group is expected to generate. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the property, if any, exceeds its fair market value.

Revenue Recognition

We follow the guidance of ASC Topic 605, "Revenue Recognition" for revenue recognition. In general, we record revenue when persuasive evidence of an arrangement exists, services have been rendered or product delivery has occurred, the sales price to the customer is fixed or determinable, and collectability is reasonably assured.

It is our practice to obtain a signed master sales agreement for recurring revenue sales, and/or a sales order for events and one-time services. Taxes collected from customers and remitted to government authorities are reported on a net basis and are excluded from revenue.

We derive the majority of our revenues from recurring revenue streams, consisting of:

1. Wireless and fiber broadband service;
2. Co-location, which includes the licensing of cabinet and power;
3. Interconnection services, such as cross connects;
4. Managed infrastructure services.

Revenues from recurring revenue streams are generally billed monthly and recognized ratably over the term of the contract, generally one to three years for data center space customers. We generally recognize revenue beginning on the date the customer commences use of our services.

Implementation and set-up fees are recognized at the time those services are completed, unless prior agreement was made for interim billings for work completed.

For services that are billed according to customer usage, revenue is recognized in the month in which the usage is provided.

Professional services are recognized in the period services are provided.

Amounts that have been invoiced are recorded in accounts receivable and revenue.

Our customers generally have the right to cancel their contracts by providing prior written notice to us of their intent to cancel the remainder of the contract term. The customer would be required to pay any charge for early cancellation that their contract specifies. In the event that a customer cancels their contract, they are not entitled to a refund for services already rendered. A customer can continue service on a month-to-month basis after their contract expires.

Barter Transactions

Barter activity is accounted for in accordance with ASC 845, Nonmonetary Transactions. Barter revenue relates to the exchange of wireless bandwidth and internet connectivity provided by CTC to business customers in exchange primarily for roof rights for antennae, advertising and other products and services that CTC would otherwise be required to buy for cash. Barter expenses reflect the expense offset to barter revenue. The amount of barter revenue and expense is recorded at the estimated fair value of the services received or the services provided, whichever is more objectively determinable, in the month the services are exchanged. For the six months ended December 31, 2014, the Company recorded barter revenue of \$15,428 and barter expense of \$12,950 and for the three months ended December 31, 2014, the Company recorded barter revenue of \$7,714 and barter expense of \$12,950.

UNIFIEDONLINE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
DECEMBER 31, 2014

Prepaid expenses

Prepaid expenses are comprised primarily of prepaid costs related to the installation of new customers, prepaid advertising costs which are expensed when used, and deferred financing costs which are amortized over the life of the related financing.

Deferred Revenue

Amounts billed in advance of services being provided are recorded as deferred revenue and are recognized in the consolidated statement of operations as services are provided.

Deferred Financing Costs

Debt issuance costs incurred in connection with the issuance of debt are capitalized and amortized to interest expense based on the related debt agreements on a straight-line basis, which approximates the effective interest method. Unamortized amounts are included in prepaid expenses in the accompanying unaudited consolidated balance sheets.

Earnings per Share

We compute earnings per share in accordance with ASC Topic 260, "Earnings Per Share" Under the provisions of ASC Topic 260, basic earnings per share is computed by dividing the net income (loss) for the period by the weighted average number of common shares outstanding during the period. Diluted earnings per share is computed by dividing the net income (loss) for the period by the weighted average number of common and potentially dilutive common shares outstanding during the period. Potentially dilutive common shares consist of the common shares issuable upon the exercise of stock options and warrants (using the treasury stock method) and upon the conversion of convertible notes and preferred stock (using the if-converted method). Potentially dilutive common shares are excluded from the calculation if their effect is antidilutive. At December 31, 2014, there were options and warrants to purchase 64,443,980 shares of common stock, there was \$60,000 of convertible debt outstanding, which, if converted on December 31, 2014 would amount to 250,000,000 shares, and 626,667 shares issuable upon conversion of Series B preferred stock outstanding which could potentially dilute future earnings per share. Additionally, on or after May 15, 2014, to the extent sufficient shares of Common Stock are authorized, the shares of Series AA Preferred Stock shall be convertible into shares of the Company's fully diluted Common Stock to provide the holders ninety percent of all shares of Common Stock of the Company.

Stock-Based Compensation

As more fully described in Note 16, we have two stock option plans that provide for non-qualified options to be issued to directors, officers, employees and consultants (the 2012 Equity Compensation Plan and the 2013 Equity Plan (the "Plans")).

Cost of Sales

Cost of sales consists primarily of the costs of providing wireless and fiber bandwidth and colocation services.

RECENTLY ADOPTED ACCOUNTING PRONOUNCEMENTS

Recently Adopted and Recently Issued Accounting Standards

In the first quarter of Fiscal 2013, the Company adopted Accounting Standards Update No. 2011-05, "Comprehensive Income (Topic 200) – Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05". The adoption of these amended standards impacted the presentation of other comprehensive income, as the Company elected to

present two separate but consecutive statements, but did not impact our financial position or results of operation.

In July 2013, the FASB issued ASU 2013-11, "Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists." This standard requires that an unrecognized tax benefit, or a portion of an unrecognized tax benefit be presented on a reduction to a deferred tax asset for an NOL carryforward, a similar tax loss, or a tax credit carryforward with certain exceptions to this rule. If certain exception conditions exists, an entity should present an unrecognized tax benefit in the financial statements as a liability and should not net the unrecognized tax benefit with a deferred tax asset. This standard is effective for fiscal years and interim periods within those years beginning after December 15, 2013. The Company does not expect the adoption of the new provisions to have a material impact on our financial condition or results of operations.

Various accounting standards that have been issued or proposed by FASB that do not require adoption until a future date are not expected to have a material impact on the consolidated financial statements upon adoption.

The Company recognized a loss on the extinguishment of debt of \$768,463 in the six months ended December 31, 2013 as a result of this transaction.

As part of the agreement, within five days SHF was required to file UCC-3 financing statements to release its security interest in our assets which were pledged as collateral under the debenture. The agreement also contains mutual general releases. As a result of this transaction, at December 31, 2013, the principal amount due under the Financing Agreement amounted to \$0.

IWEB Growth Fund, LLC

On November 2, 2012 the Company entered into a Loan Agreement with IWEB Growth Fund, LLC, a Virginia limited liability company ("IWEB Growth Fund") established by Messrs. Compton, Bush, Carosi, Pirtle and Stavish and General Soyster, our former independent directors. Under the terms of the Loan Agreement, IWEB Growth Fund agreed to make one or more loans to us up to the total principal amount of \$1.5 million. The lending of any amounts under the Loan Agreement is conditioned upon the negotiation of notes and related loan documents which contain terms and conditions that are acceptable to the lender to be determined at the time of the loans. We agreed to grant IWEB Growth Fund a security interest in our assets as collateral for these loans. In the event we should default under the terms of the Loan Agreement, IWEB Growth Fund is entitled to declare all amounts advanced under the various notes immediately due and payable. An event of default includes a breach by us of any covenant, representation or warranty in the Loan Agreement or a default under any note entered into with the lender.

Between November 9, 2012 and July 11, 2013, IWEB Growth Fund lent us an aggregate of \$186,000 under the terms of 9 separate Confession of Judgment Promissory Notes. These notes, which are identical in their terms other than the dates and principal amounts, are for a one year term and bear interest at 12% per annum payable at maturity. Embodied in each of the notes is a confession of judgment which means that should we default upon the payment of the note, we have agreed to permit IWEB Growth Fund to enter a judgment against us in the appropriate court in Virginia before filing suit against us for collection of the amounts. Pursuant to the terms of the Loan Agreement, we paid IWEB Growth Fund's expenses of \$1,500 for the preparation of the Loan Agreement and related documents. We used the net proceeds from these initial loans for general working capital. The Company is currently in default on these loans. There is no guarantee that IWEB Growth Fund will not enter a judgment against the Company.

Accordingly, the gain or loss on extinguishment should be measured by the difference between the carrying amount of the old debt and the fair value of the new debt. Additionally, Topic ASC 470-50-40-17 states if the exchange or modification is to be accounted for in the same manner as a debt extinguishment and the new debt instrument is initially recorded at fair value, then the fees paid or received shall be associated with the extinguishment of the old debt instrument and included in determining the debt extinguishment gain or loss to be recognized. The fair value of the new debt was determined to be \$1,983,164 and the carrying amount of the old debt of principal and accrued interest totaling \$1,717,853 resulted in a total loss on the extinguishment of debt of \$265,311 at June 30, 2014.

NOTE 9 – FAIR VALUE MEASUREMENTS

The Company follows ASC 820, which, among other things, defines fair value, establishes a consistent framework for measuring fair value and expands disclosure for each major asset and liability category measured at fair value on

either a recurring or nonrecurring basis. The Company did not adopt the ASC 820 fair value framework for nonfinancial assets and liabilities, except for items that are recognized or disclosed at fair value in the financial statements at least annually. ASC 820 clarifies that fair value is an exit price, representing the amount that would either be received to sell an asset or be paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability. As a basis for considering such assumptions, ASC 820 establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows:

Level 1. Observable inputs such as quoted prices in active markets for identical assets or liabilities;

Level 2. Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and

UNIFIEDONLINE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
DECEMBER 31, 2014

Level 3. Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

Investments Measured at Fair Value on a Recurring Basis:

Under the guidance of ASC 320, "Investments", we periodically evaluate other-than-temporary impairment (OTTI) of securities to determine whether a decline in their value is other than temporary. Management utilizes criteria such as the magnitude and duration of the decline, in addition to the reasons underlying the decline, to determine whether the loss in value is other than temporary. The term "other-than-temporary" is not intended to indicate that the decline is permanent. It indicates that the prospects for a near term recovery of value are not necessarily favorable, or that there is a lack of evidence to support fair values equal to, or greater than, the carrying value of the investment. Once a decline in value is determined to be other than temporary, the value of the security is reduced and a corresponding impairment charge to earnings is recognized. In the assessment of OTTI for various securities at December 31, 2014 the guidance in ASC 320, "the Investment-Debt and Equity Securities," is carefully followed.

There were no impairment charges on investments in publicly traded equity securities for the three or six months ended December 31, 2014 or the three or six months ended December 31, 2013.

The Company has evaluated its publicly traded equity securities as of December 31, 2014, and has determined that there were no unrealized losses that indicate an other-than-temporary impairment. This determination was based on several factors, which include the length of time and extent to which fair value has been less than the cost basis and the financial condition and near-term prospects of the issuer, and the Company's intent and ability to hold the publicly traded equity securities for a period of time sufficient to allow for any anticipated recovery in market value.

NOTE 10 - COMPREHENSIVE LOSS

Comprehensive loss is comprised of net income (loss) and other comprehensive income or loss. Other comprehensive income or loss refers to revenue, expenses, gains and losses that under accounting principles generally accepted in the United States are included in comprehensive income but excluded from net income as these amounts are recorded directly as an adjustment to stockholders' equity.

The Company's accumulated other comprehensive loss consists of unrealized loss on marketable securities available for sale of \$80,997 at December 31, 2014 and \$80,997 at June 30, 2014.

NOTE 11 – ACQUISITION

On October 1, 2013 (the “Closing Date”), the Company entered into a share exchange agreement (the “Exchange Agreement”) by and among the Company, Computers and Tele-Comm., Inc., a Missouri corporation (“CTCI”), KC NAP, LLC (“KC NAP”), the stockholders of CTCI, and Streamside Partners, LLC, pursuant to which the Company purchased all of the outstanding common stock of CTCI and the outstanding membership interests in KC NAP, in exchange for 9,568,400 shares of our \$0.001 par value common stock. Concurrently, and as part of the share exchange agreement, the Company issued shares to retire an outstanding debt owing by CTCI to Streamside Partners, LLC, which totaled \$155,000, and other debts of CTCI totaling \$267,823, in exchange for 13,485,798 shares of our \$0.001 par value common stock (such transactions taken together are sometimes referred to herein as the “Share Exchange”). On the Closing Date, pursuant to the Exchange Agreement, the shareholders of CTCI exchanged 250,000 shares of common stock of CTCI, representing 100% of the issued and outstanding stock of CTCI, for 9,568,400 newly issued shares of \$0.001 par value common stock, which represents 2.2% of the Company's issued and outstanding common stock, immediately following the Share Exchange. In addition, we issued 13,485,798 shares of the Company's common stock to pay a debt owing by CTCI to Streamside Partners, LLC, and other liabilities of CTCI which together totaled \$422,823, at an effective exchange rate of \$0.0314 per share.

On October 1, 2013, in conjunction with the acquisition, we entered into a lease agreement with Agility Ventures, LLC in the principal amount of \$1,678,531 which is secured by all of the assets of the Company. The note has a term of 36 months and bears interest at 15% per annum. Fair Value of common stock issued to seller valued at quoted market price	\$234,426
Fair Value of common stock issued in exchange for debt valued at quoted market price	330,402
	\$564,828

Notes payable	(1,764,784)
	\$564,828

In conjunction with the acquisition of CTCI, we recorded goodwill in the amount of \$2,084,710. We subsequently performed an impairment test on goodwill which requires an analysis based on estimates of future cash flows and an impairment loss is recognized for the difference between the carrying amount and the implied fair value of the asset. Based on this analysis we recorded an impairment expense of \$2,084,710 for the nine months ended June 30, 2014.

The Company accounted for its warrants with price protection in accordance with FASB ASC Topic 815.

Accounting for Derivative Warrant Liability

The Company's derivative warrant instruments have been measured at fair value at December 31, 2014 using the Black-Scholes model. The Company recognizes all of its warrants with price protection in its consolidated balance sheet as liabilities. The liability is revalued at each reporting period and changes in fair value are recognized currently in the consolidated statements of operations. The initial recognition and subsequent changes in fair value of the derivative warrant liability have no effect on the Company's cash flows.

The derivative warrants outstanding at December 31, 2014 are all currently exercisable with a weighted-average remaining life of 2 years.

Fair Value Assumptions Used in Accounting for Derivative Liability

The Company has determined its derivative liability to be a Level 3 fair value measurement and has used the Black-Scholes pricing model to calculate the fair value as of December 31, 2014. The Black-Scholes model requires six basic data inputs: the exercise or strike price, time to expiration, the risk free interest rate, the current stock price, the estimated volatility of the stock price in the future, and the dividend rate. The key inputs used in the December 31, 2014 fair value calculations were as follows:

	December 31, 2014
Current exercise price	\$ 0.024 - \$60

Time to expiration		.75 to 1.9 years
Risk-free interest rate		1.10 %
Estimated volatility		1087.63 %
Dividend	\$	0
Stock price on December 31, 2014	\$	0.04000

NOTE 15 – STOCKHOLDERS’ DEFICIT

Common Stock

As disclosed in our definitive Information Statement on Schedule 14C as filed with the Securities and Exchange Commission on December 15, 2014, and as disclosed in our 8-K as filed with the Securities and Exchange Commission on January 5, 2015, the board of directors and majority stockholder of our company approved a Certificate of Amendment to our Certificate of Incorporation to:

change our company’s name from "IceWEB, Inc." to “UnifiedOnline, Inc.”;
increase the number of authorized shares of our common stock from 5,000,000,000 to 6,000,000,000 shares; and
effect a reverse stock split of our outstanding common stock on the basis of one for four hundred (1:400).

The effective date of these actions was January 5, 2015. Our common stock will be quoted on the OTC Bulletin Board on a post-split basis beginning on January 6, 2015. Our CUSIP number will change to 90470W101. Our common stock will be quoted under the symbol “IWEBD” for 20 business days, after which time the symbol will change to UOIP to reflect our new name.

As a result of the reverse stock split, each 400 shares of our common stock issued and outstanding, or held as treasury shares, immediately prior to the effective date of the reverse stock split becomes one share of our common stock on the effective date of the reverse stock split. No fractional shares of common stock will be issued to any shareholder in connection with the reverse stock split and all fractional shares which might otherwise be issuable as a result of the reverse stock split will be rounded up to the nearest whole share.

After the effective date of the reverse stock split, each certificate representing shares of pre-reverse stock split common stock will be deemed to represent 1/400th of a share of our post-reverse stock split common stock, subject to rounding for fractional shares, and the records of our transfer agent, Olde Monmouth Stock Transfer Co., Inc., will be adjusted to give effect to the reverse stock split. Following the effective date of the reverse stock split, the share certificates representing the pre-reverse stock split common stock in our former name will continue to be valid for the appropriate number of shares of post-reverse stock split common stock, adjusted for rounding, in our new name. Certificates representing shares of the post-reverse stock split under our new name will be issued in due course as certificates for pre-reverse stock split common shares are tendered for exchange or transfer to our transfer agent.

Accordingly, we have adjusted all issued and outstanding warrants and employee stock options to reflect the reverse stock split. Additionally, we have retroactively adjusted all share and per share data for all periods presented.

NOTE 16 - STOCK OPTION PLAN

In August 2012, the Board of Directors adopted the 2012 Equity Compensation Plan (the "Plan") for directors, officers and employees that provides for non-qualified and incentive stock options to be issued enabling holders thereof to purchase common shares of the Company at exercise prices determined by the Company's Board of Directors.

The purpose of the Plan is to advance the Company's interests and those of its stockholders by providing a means of attracting and retaining key employees, directors and consultants. In order to serve this purpose, the Company believes the Plan encourages and enables key employees, directors and consultants to participate in its future prosperity and growth by providing them with incentives and compensation based on its performance, development and financial success. Participants in the Plan may include the Company's officers, directors, other key employees and consultants who have responsibilities affecting our management, development or financial success.

Awards may be made under the Plan in the form of Plan options, shares of the Company's common stock subject to a vesting schedule based upon certain performance objectives ("Performance Shares") and shares subject to a vesting schedule based on the recipient's continued employment ("restricted shares"). Plan options may either be options qualifying as incentive stock options under Section 422 of the Internal Revenue Code of 1986, as amended or options that do not so qualify. Any incentive stock option granted under the Plan must provide for an exercise price of not less than 100% of the fair market value of the underlying shares on the date of such grant, but the exercise price of any incentive option granted to an eligible employee owning more than 10% of our common stock must be at least 110% of such fair market value as determined on the date of the grant. Only persons who are officers or other key employees are eligible to receive incentive stock options and performance share grants. Any non-qualified stock option granted under the Plan must provide for an exercise price of not less than 50% of the fair market value of the underlying shares on the date of such grant.

The Plan, as amended permits the grant of options and shares for up to 80,000,000 shares of our common stock. The Plan terminates 10 years from the date of the Plan's adoption by our stockholders.

UNIFIEDONLINE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
DECEMBER 31, 2014

The term of each Plan option and the manner in which it may be exercised is determined by the Board of Directors, provided that no Plan option may be exercisable more than three years after the date of its grant and, in the case of an incentive option granted to an eligible employee owning more than 10% of the Company's common stock, no more than five years after the date of the grant. The exercise price of the stock options may be paid in either cash, or delivery of unrestricted shares of common stock having a fair market value on the date of delivery equal to the exercise price, or surrender of shares of common stock subject to the stock option which has a fair market value equal to the total exercise price at the time of exercise, or a combination of the foregoing methods.

The fair value of stock options granted was estimated at the date of grant using the Black-Scholes options pricing model. The Company used the following assumptions for determining the fair value of options granted under the Black-Scholes option pricing model:

	Six Months Ended December 31,			
	2014		2013	
Expected volatility	13% - 278	%	13% - 278	%
Expected term	1 -3 Years		1 -3 Years	
Risk-free interest rate	0.01% -		0.01% -	
Forfeiture rate	0.34	%	0.34	%
Expected dividend yield	0.00	%	0.00	%

The expected volatility was determined with reference to the historical volatility of the Company's stock. The Company uses historical data to estimate option exercise and employee termination within the valuation model. The expected term of options granted represents the period of time that options granted are expected to be outstanding. The risk-free interest rate for periods within the contractual life of the option is based on the U.S. Treasury rate in effect at the time of grant.

For the three and six months ended December 31, 2014 and 2013, total stock-based compensation charged to operations for option-based arrangements amounted to \$12,415 and \$24,830 and \$144,523 and \$340,515, respectively. At December 31, 2014, there was approximately \$33,158 of total unrecognized compensation expense related to non-vested option-based compensation arrangements under the Plan.

A summary of the status of the Company's outstanding stock options as of December 31, 2014 and changes during the period ending on that date is as follows:

Use of Estimates - Management's Discussion and Analysis or Plan of Operations is based upon our unaudited consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these consolidated financial statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues, and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, management evaluates these estimates, including those related to allowances for doubtful accounts receivable, the carrying value of property and equipment and long-lived assets, the value of derivatives, and the value of stock-option based compensation. Management bases these estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis of making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We account for stock based compensation under ASC Topic 718, “Compensation – Stock Compensation. ASC Topic 718 establishes the financial accounting and reporting standards for stock-based compensation plans. Six Month Period ended December 31, 2014

Revenues

For the six months ended December 31, 2014, we reported revenues of \$461,520 as compared to revenues of \$322,665 for the six months ended December 31, 2013, an increase of \$138,855 or approximately 43%. The increase in sales is primarily due to a shift in the business' focus to the data center operations related to our acquisition of CTC in October 2013.

Cost of Sales

Our cost of sales consists primarily of the costs of providing wireless and fiber bandwidth and colocation services. For the six months ended December 31, 2014 cost of sales was \$266,494 or approximately 58% of revenues, compared to \$176,954, or approximately 55% of revenues, for the six months ended December 31, 2013. The increase in costs of sales as a percentage of revenue and the corresponding decrease in our gross profit margin for the six months ended December 31, 2014 as compared to the six months ended December 31, 2013 was due to the change in focus of the business and increased broadband costs. We anticipate that our gross profit margins will remain between 40% and 45% through the balance of fiscal 2015.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity is the ability of a company to generate funds to support its current and future operations, satisfy its obligations and otherwise operate on an ongoing basis.

In summary, our cash flows are as follows:

	Six Months Ended December 31,	
	2014	2013
Net cash used in operating activities	\$(519,751)	\$(1,261,853)
Net cash used in investing activities	(10,947)	(23,319)
Net cash provided by financing activities	485,034	1,277,439
Net decrease in cash	\$(45,664)	\$(7,733)

Net cash used by operating activities was \$519,751 for the six months ended December 31, 2014 as compared to net cash used by operating activities of \$1,261,853 for the six months ended December 31, 2013, a decrease of \$742,102.

For the six month period ended December 31, 2014, our cash used in operations of \$519,751 consisted of a net loss of \$697,575 offset by non-cash items totaling \$71,051 including items such as depreciation of \$272,150, amortization of debt discount of \$137,538, change in fair value of derivative liability of \$406,903 and other non-cash items of \$68,266. Additionally, during the six month period ended December 31, 2014, we had a decrease in operating liabilities offset by a decrease in operating assets which decreased our net loss. For the six months ended December 31, 2013, our cash used in operations of \$1.3 million consisted of a net loss of \$5.9 million offset by non-cash items totaling \$4.6 million including a decrease in derivative liability of \$71,499, offset by changes in assets and liabilities of \$11,206. During the six months ended December 31, 2013, we experienced an increase in accounts receivable of \$9,470, and a decrease in accounts payable and accrued liabilities during the period of \$206,614.

Net cash used in investing activities for the six months ended December 31, 2014 was \$10,947 as compared to net cash used in investing activities for the six months ended December 31, 2013 of \$23,319 for property and equipment purchases.

Net cash provided by financing activities for the six months ended December 31, 2014 was \$485,034 as compared to net cash provided of \$1.3 million for the six months ended December 31, 2013. For the six months ended December 31, 2014, net cash provided by financing activities related to proceeds from a related party note of \$760,489 offset by repayments on notes payable of \$275,455. For the six months ended December 31, 2013, net cash provided by financing activities related to proceeds from convertible notes and notes payable of \$372,750 and proceeds from the exercise of common stock options of \$718,415, offset by repayments on notes payable of \$12,206.

At December 31, 2014 we had a working capital deficit of \$3.6 million and an accumulated deficit of \$53.5 million. The report from our independent registered public accounting firm on our audited financial statements for the nine month transition period ended June 30, 2014 contained an explanatory paragraph regarding doubt as to our ability to continue as a going concern as a result of our net losses in operations. Our sales were not sufficient to pay our operating expenses. We reported a net loss of \$697,575 for the six months ended December 31, 2014. There are no assurances that we will report income from operations in any future periods.

Historically, our revenues have not been sufficient to fund our operations and we have relied on capital provided through the sale of equity securities, and various financing arrangements and loans from related parties. At December 31, 2014 we had cash on hand of \$11,163.

We do not have any commitments for capital expenditures. Our working capital needs in future periods are dependent primarily on the rate at which we can increase our revenues while controlling our expenses and decreasing the use of cash to fund operations. Additional capital may be needed to fund acquisitions of additional companies or assets, although we are not a party to any pending agreements at this time and, accordingly, cannot estimate the amount of capital which may be necessary, if any, for acquisitions.

As long as our cash flow from operations remains insufficient to completely fund operations, we will continue depleting our financial resources and seeking additional capital through equity and/or debt financing.

There can be no assurance that acceptable financing can be obtained on suitable terms, if at all. Our ability to continue our existing operations and to continue growth strategy could suffer if we are unable to raise the additional funds on acceptable terms which will have the effect of adversely affecting our ongoing operations and limiting our ability to increase our revenues and maintain profitable operations in the future. If we are unable to secure the necessary additional working capital as needed, we may be forced to curtail some or all of our operations.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Not applicable to a smaller reporting company.

Item 4. Controls and Procedures

Evaluation of disclosure controls and procedures. Our Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”) have evaluated the effectiveness of our disclosure controls and procedures (as defined in the Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by the Quarterly Report (the “evaluation date”). They have concluded that, as of the evaluation date, these disclosure controls and procedures were effective to provide reasonable assurance that material information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and

forms.

Changes in internal control over financial reporting. There have been no changes in our internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Rules 13a-15 or 15d-15 under the Exchange Act that occurred during the Registrant's last fiscal quarter, except as noted below, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting. The Company has addressed the deficiencies that existed in the design or operation of our internal control over the calculation of share-based expenses that adversely affected our internal controls and that may be considered to be a material weakness. Management believes that the correction of the material weaknesses of our disclosure controls and procedures did not have an effect on our company's financial results.
