UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON DC, 20549

FORM 10-K

ý ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2015

.. TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to

INNOPHOS HOLDINGS, INC.
(EXACT NAME OF REGISTRANT AS SPECIFIED IN ITS CHARTER)

Delaware (state or other jurisdiction of incorporation) 259 Prospect Plains Road Cranbury, New Jersey 08512 (Address of Principal Executive Officer, including Zip Code) (609) 495-2495 (Registrants' Telephone Number, Including Area Code) Not Applicable (Former name or former address, if changed since last report)	001-33124 (Commission File number)	20-1380758 (IRS Employer Identification No.)
--	---------------------------------------	--

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class Common Stock, par value \$.001 per share	Name of Each Exchange on Which Registered Nasdaq Global Select Market
---	--

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. ý Yes " No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. " Yes ý No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. ý Yes " No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ý No "

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ý

Edgar Filing: Innophos Holdings, Inc. - Form 10-K

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of “accelerated filer,” “large accelerated filer,” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer ☐ Accelerated Filer ☐ Non-accelerated filer ☐ Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). ☐ Yes ☒ No

The aggregate market value of the voting common equity held by non-affiliates of the registrant was approximately \$1.0 billion as of June 30, 2015, the last business day of the Registrant’s most recently completed second quarter (based on the Nasdaq Global Select Market closing price on that date).

As of February 11, 2016, the registrant had 19,288,689 shares of common stock outstanding.

FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains forward-looking statements, within the meaning of the Private Securities Litigation Reform Act of 1995, that involve substantial risks and uncertainties. In some cases, you can identify forward-looking statements by the words “anticipate,” “believe,” “continue,” “could,” “estimate,” “expect,” “intend,” “may,” “objective,” “ongoing,” “plan,” “predict,” “project,” “potential,” “should,” “will,” or “would,” and/or the negative of these terms or comparable terminology intended to identify statements about the future. These statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to be materially different from the information expressed or implied by these forward-looking statements.

Although we believe that we have a reasonable basis for each forward-looking statement contained in this Annual Report on Form 10-K, we caution you that these statements are based on a combination of facts and factors currently known by us and our expectations of the future, about which we cannot be certain.

The forward-looking statements in this Annual Report on Form 10-K may include, among other things, statements about our plans, objectives, goals, strategies, future events, future revenues or performance, capital expenditures, financing needs, plans or intentions relating to acquisitions, the demand for our products and services, the markets in which we compete and other information that is not historical information.

You should refer to “Part I, Item 1A. Risk Factors” of this Annual Report on Form 10-K for a discussion of important factors that may cause our actual results to differ materially from those expressed or implied by our forward-looking statements. As a result of these factors, we cannot assure you that the forward-looking statements in this Annual Report on Form 10-K will prove to be accurate. You should understand that it is not possible to predict or identify all such factors. Consequently, you should not consider any such list to be a complete discussion of all potential risks or uncertainties that may substantially impact our business. Moreover, we operate in a competitive and rapidly changing environment. New factors emerge from time to time and it is not possible to predict the impact of all of these factors on our business, financial condition or results of operations.

Furthermore, if our forward-looking statements prove to be inaccurate, the inaccuracy may be material. In light of the significant uncertainties in these forward-looking statements, you should not regard these statements as a representation or warranty by us or any other person that we will achieve our objectives and plans in any specified time frame or at all. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

You should read this Annual Report on Form 10-K and any documents that we reference in this report completely and with the understanding that our actual future results may be materially different from what we expect. We qualify all of our forward-looking statements by these cautionary statements.

Unless the context otherwise indicates, all references in this Annual Report on Form 10-K to the “Company,” “Innophos,” “we,” “us” or “our” or similar words are to Innophos Holdings, Inc. and its consolidated subsidiaries. Innophos Holdings, Inc. is a Delaware corporation and was incorporated on July 15, 2004.

This Annual Report on Form 10-K includes trademarks, service marks and trade names owned by us or other companies. All trademarks, service marks and trade names included in this Annual Report on Form 10-K are the property of their respective owners.

Table of Contents

PART I

ITEM 1. BUSINESS

Our Company

Innophos commenced operations as an independent company in August 2004 after purchasing its North American specialty phosphates business from affiliates of Rhodia, S.A., or Rhodia, which has been a part of Solvay S.A. since 2011. In November 2006, Innophos completed an initial public offering and listed its common stock for trading on the Nasdaq Global Select Market under the symbol “IPHS”.

Innophos is a leading international producer of performance-critical and nutritional specialty ingredients with applications in food, beverage, dietary supplements, pharmaceutical, oral care and industrial end markets. Innophos combines more than a century of experience in specialty phosphate manufacturing with a growing capability in a broad range of other specialty ingredients to supply a product range produced to stringent regulatory manufacturing standards and the quality demanded by customers worldwide. Many of Innophos’ products are application-specific compounds engineered to meet customer performance requirements and are often critical to the taste, texture, performance or nutritional content of foods, beverages, pharmaceuticals, oral care products and other applications. For example, Innophos products act as flavor enhancers in beverages, electrolytes in sports drinks, texture additives in cheeses, leavening agents in baked goods, pharmaceutical excipients and cleaning agents in toothpaste, and they also provide a wide range of nutritional fortification solutions for food, beverage and nutritional supplement manufacturers.

Innophos' more recent acquisitions, described below under "Strategic Acquisitions," have focused on the bioactive mineral and nutritional ingredients sector. Bioactive mineral ingredients are mineral based ingredients for food, beverage and dietary supplement end markets that are manufactured to be readily digestible. Historically, Innophos has enjoyed a strong position in “macronutrients,” such as calcium, magnesium and potassium that are required in relatively large amounts for a balanced diet. Through its more recent acquisitions, Innophos now also has a strong position in “micronutrients”, such as chromium, selenium, zinc and iron, small quantities of which are also essential to the human diet. One of Innophos' recent acquisitions described below was in the botanical and enzyme based specialty nutritional ingredients sector. As with the bioactive mineral ingredients, botanical and enzyme based specialty nutritional ingredients are important to Innophos' customers for their nutritional value, and mineral, botanical and specialty phosphate ingredients are often formulated together. This acquisition, together with Innophos’ existing strength in specialty phosphates, has created a strong position for Innophos in the attractive and higher growth specialty nutritional ingredients market.

Strategic Acquisitions

In October 2011, Innophos acquired 100% of the stock of KI Acquisition, Inc., the holding company of Kelatron Corporation, or Kelatron. Founded in 1975 and based in Ogden, Utah, Kelatron is a leading producer of technically advanced bioactive mineral ingredients, with a high quality base of customers in the dietary supplement and sports nutrition markets.

In July 2012, Innophos acquired 100% of the equity of AMT Labs, Inc., or AMT, and an affiliated real estate company holding all AMT real property. Located in North Salt Lake, Utah, AMT has been manufacturing high quality bioactive mineral ingredients for the food, beverage, confectionary and dietary supplement industries for more than 20 years.

In December 2012, Innophos purchased all of the assets of Triarco Industries, Inc., or Triarco. Triarco, a privately held company based in New Jersey, has been manufacturing high quality custom ingredients for the food, beverage and dietary supplement industries for more than 30 years. Triarco specializes in botanical and enzyme based ingredients that provide important nutritional benefits and are often formulated with bioactive minerals and specialty phosphates. In October 2013, Innophos purchased all of the assets of Chelated Minerals International, Inc., or CMI. CMI, a privately held company based in Salt Lake City, Utah, has significant know-how in the manufacture and science of chelated minerals supplied to the human nutrition market.

On December 31, 2014, AMT, Triarco and CMI were merged into Kelatron, which is now operating under the name Innophos Nutrition, Inc.

Key Product Lines

We have four principal product lines: (i) Specialty Ingredients; (ii) Food and Technical Grade Purified Phosphoric Acid, or PPA; (iii) Technical Grade Sodium Tripolyphosphate (STPP) & Detergent Grade PPA and (iv) Granular Triple Super Phosphate (GTSP) & Other. The first three product lines comprise our two Specialty Phosphates reporting segments, US & Canada and Mexico, with GTSP & Other reported separately in a third reporting segment.

Page 4 of 84

Table of Contents

Specialty Ingredients

Specialty Ingredients are the most highly engineered products in our portfolio. Specialty ingredients consist of specialty phosphate salts, specialty phosphoric acids and a range of other mineral and botanical based specialty ingredients. They have a wide range of applications such as flavor enhancers in beverages, electrolytes in sports drinks, texture modifiers in cheeses, leavening agents in baked goods, mineral and botanical sources for nutritional supplements, pharmaceutical excipients and abrasives in toothpaste. Specialty phosphoric acids are used in industrial applications such as asphalt modification and petrochemical catalysis.

The table below presents a list of the principal Specialty Ingredients sold by us in 2015:

Product	Description/End-Use Application
Sodium Aluminum Phosphate, Acidic and Basic ("SALP")	Premier leavening agent for baking mixes, cakes, self-rising flours, baking powders, batter and breadings (acidic). Improves melting properties of cheese (basic).
Sodium Acid PyroPhosphate ("SAPP")	Leavening agent for baking powders, doughnuts, and biscuits; inhibits browning in potatoes; provides moisture and color retention in poultry and meat.
Sodium HexaMetaPhosphate ("SHMP")	Water treatment applications; anti-microbial and sequestrant utility in beverages; cheese emulsifier; improves tenderness in meat, seafood and poultry applications.
Monocalcium Phosphate ("MCP")	Leavening agent in double-acting baking powder; acidulant; buffering agent.
Calcium Acid Pyrophosphate ("CAPP")	Calcium based, slow acting, multifunctional leavening acid used in a wide variety of baked goods
Dicalcium Phosphate ("DCP")	Toothpaste abrasive; leavening agent; calcium fortification.
Tricalcium Phosphate ("TCP")	Calcium and phosphorus fortifier in food and beverage applications (e.g., orange juice, cereals, and cheese); flow aid; additive in expandable polystyrene.
Pharma Calcium Phosphates ("A-Tab [®] ", "Di-Tab [®] ", "TriTab [®] ", "Nutra Tab TM ")	Excipients in vitamins, minerals, nutritional supplements and pharmaceuticals.
Ammonium Phosphates ("MAP", "DAP")	High-end fertilizer products for horticultural use; flame retardant; cigarette additives; culture nutrient.
Potassium Phosphates ("TKPP", "DKP", "MKP", "KTPP")	Water treatment; sports drinks; buffering agent; improves tenderness in meat, seafood and poultry applications; horticulture applications.
Specialty Acids (e.g., Polyacid) (including INNOVALT [®])	Additive improving performance properties of asphalt.

Sodium Blends (e.g., Sodium Tripolyphosphate (“STPP” (food grade)))	Ingredient improving yield, tenderness, shelf life, moisture and color retention in meat, seafood and poultry applications.
---	---

Other (Sodium Bicarbonate, Tetrasodium Pyrophosphate (“TSPP”), Mono, Di, & Trisodium Phosphates (“MSP”, “DSP”, “TSP”))	Baking powders; gelling agent in puddings; cheese emulsifiers.
--	--

Organic mineral salts and blends including calcium, chromium, copper, iron, lithium, magnesium, manganese, phosphorous, potassium, selenium, strontium, vanadium, and zinc	Bioactive mineral nutrients used in a wide variety of fortified foods, beverages and dietary supplements.
--	---

Plant based botanical, enzyme and mineral nutrients	Fortification for food, beverage and sports nutrition.
---	--

Each salt or acid derivative typically has a number of different applications and end uses. For example, DCP can be used both as a leavening agent in bakery products and as an abrasive in oral care products. However, several food grade salts are unique to the end user in their particular finished product application. We often work directly with customers to tailor products to their required specifications.

Table of Contents

Our major competitor in the downstream Specialty Ingredients market is Israel Chemicals Limited, or ICL, which is our principal competitor in the specialty phosphates industry. We also compete in the specialty phosphates industry with imports from Germany, Belgium, Israel, Russia, North Africa and China. Our nutrition business faces competition from a number of competitors as the industries in which we compete in connection with our nutrition business are less consolidated than the specialty phosphates industry.

Food and Technical Grade PPA

Food and Technical Grade PPA are high purity forms of PPA, distinct from the agricultural-grade merchant green phosphoric acid, or MGA, used in fertilizer production. PPA is used to manufacture specialty phosphate salts and acids and is also used directly in beverage applications as a flavor enhancer and in water treatment applications. We also sell technical grade PPA in the merchant market to third-party phosphate derivative producers.

Our major PPA competitor is Potash Corporation of Saskatchewan Inc., or PCS, a global fertilizer company for which specialty phosphates represents only a small part of its business. We consume the majority of our PPA production in our downstream operations and sell the remainder on the North American merchant market and to other downstream phosphate derivative producers, where we compete with PCS. To the best of our knowledge, PCS does not have any downstream technical or food grade phosphate derivative production capacity, other than a small potassium phosphate salt unit. We also compete with imports from China, Belgium and Israel.

STPP & Detergent Grade PPA

STPP is a specialty phosphate derived from reacting PPA with a sodium alkali. STPP is a key ingredient in cleaning products, including industrial and institutional cleaners and automatic dishwashing detergents and consumer laundry detergents outside the United States. In addition to its use in cleaning products, STPP is also used in water treatment, clay processing, and copper ore processing. The end use market for STPP is largely derived from consumer product applications. Detergent Grade PPA is a lower grade form of PPA used primarily in the production of STPP.

Our major North American STPP competitor is Mexichem, S.A.B. de C.V., or Mexichem, in Mexico. Currently, Mexichem produces STPP at two manufacturing locations in Mexico. We also compete with imports from North Africa, Europe, Russia and China.

Over the past several decades, there have been efforts to reduce the use of STPP in consumer and institutional cleaners. In the 1980's, STPP use in consumer laundry applications was discontinued in the United States and Canada. STPP use was essentially eliminated in consumer automatic dishwashing applications in the United States and Canada in 2010. The industrial and institutional cleaner market has also reformulated some of its products to reduce STPP content in an effort to market a reduced phosphate content product line.

GTSP & Other

GTSP is a fertilizer product line produced at our Coatzacoalcos facility in Mexico. GTSP is used throughout Latin America for increasing crop yields in a wide range of agricultural sectors. GTSP is made as a co-product of our purified wet acid manufacturing process described further below under "Our Industry".

For financial information about our segments and geographic areas, please see Note 20 (Segment Reporting) of the Notes to Financial Statements in "Part II, Item 8. Financial Statements and Supplemental Data" included elsewhere in this Annual Report on Form 10-K.

Our Industry

Overview

The North American marketplaces for each of our product lines have experienced consolidation to two primary producers and several secondary suppliers, distributors and importers. We consider the two key producers in each product category to be: (i) Innophos and ICL in Specialty Ingredients; (ii) Innophos and PCS in Food and Technical Grade PPA; and (iii) Innophos and Mexichem in Technical Grade STPP. We are not a significant supplier to the GTSP fertilizer market. In addition to consolidation of producers, uneconomic production capacity has been eliminated in North America across all three major product lines constituting our Specialty Phosphate reporting segments since 2000.

The production of specialty phosphates begins with phosphate rock, which can be processed in two alternative ways to produce PPA: (i) the thermal acid method, in which elemental phosphorus is combusted in a furnace and subsequently hydrated to produce PPA; or (ii) the purified wet acid method, or PWA, in which mined phosphate rock is reacted

with a strong acid (most

Page 6 of 84

Table of Contents

often sulfuric acid) to produce MGA, which is then purified through solvent-based extraction into PPA. The conversion of MGA into PPA is a technically complex and a capital-intensive process.

The thermal acid method of production is based on the electrolytic production of elemental phosphorus and is therefore electricity intensive, while PPA made by the purified wet acid process requires the use of significant amounts of sulfuric acid. The relative overall costs of the two methods depend on the availability and cost of their component processes, which are electricity and metallurgical or petroleum coke for the former and sulfur for the latter. PPA is reacted with appropriate mineral salts or inorganic compounds to produce various specialty phosphate salts as required. We currently use PPA manufactured via the wet acid process for all of our Specialty Ingredients manufacturing needs. Other alternative methods of production, such as a kiln-based thermal method, are under research and development which, if implemented, could add to the future capital needs of phosphate producers and change the competitive landscape in the industry.

We also produce a wide range of botanical, enzyme and mineral based ingredients as part of our nutrition business through a variety of customized production processes resulting in an extensive suite of product formulations. The North American botanical, enzyme and mineral industries are less consolidated than the specialty phosphates industry with Albion Minerals, recently acquired by Balchem Corporation, and Jost Chemical Company considered the leading competitors in mineral chelates, and Naturex Inc. and BI Nutraceuticals Inc. considered the leading competitors in botanical ingredients, alongside a number of smaller producers in each of these markets.

Penetration of North American Market from Imports

Over the past several years, we estimate that imports, including domestically located production facilities owned by foreign based organizations, have accounted for approximately 17-22% of the North American specialty phosphate market. This market share has slightly increased over the last three years. In addition, in 2015, we experienced pricing pressure from manufacturing overcapacity outside of North America, including manufacturing overcapacity in China, which we expect to continue for the foreseeable future.

The following are the primary importers of PPA products and derivatives into North America: (i) Prayon SA, or Prayon, and Rotem Amfert Negev Ltd. (a subsidiary of ICL) for PPA, with Prayon primarily supplying acid to its specialty salts manufacturing facility in Augusta, Georgia; and (ii) various European, Chinese, Russian, North African and Israeli specialty phosphate manufacturers, such as Chemische Fabrik Budenheim, Hubei Xingfa, Jiangyin Chengxing, Guangxi Mingli and BK Giulini Chemie GmbH & Co. (a subsidiary of ICL) for specialty ingredients and STPP.

For a discussion of the risks associated with the competition that we face in our markets, see “Part I, Item 1A. Risk Factors-Risks Related to Our Business-Competition-The success of our business depends on our ability to successfully compete in extremely competitive markets.” appearing elsewhere in this Annual Report on Form 10-K.

Our Customers

Our customer base is principally composed of consumer goods manufacturers, distributors and specialty chemical manufacturers. Our customers manufacture products such as soft drinks, sports drinks and juices, various food products, toothpaste and other dental products, petroleum and petrochemical products, and various cleaners and detergents. Our customers include major consumer goods manufacturers with global market recognition in the food, beverage, pharmaceutical and cleaning product markets. We have maintained long-term relationships with the majority of our key customers, with the average customer relationship having lasted over 15 years, and some relationships spanning many decades. Our specialty chemical products are often critical ingredients in the formulation of our customers’ product, and typically represent only a small percentage of their total product costs. As a result, we believe that the risks associated with our customers switching suppliers can in some instances outweigh the potential gains.

For the years ended December 31, 2015, 2014 and 2013, we generated net sales of \$789.1 million, \$839.2 million and \$844.1 million, respectively.

Raw Materials and Energy

We purchase a range of raw materials and energy sources on the open market, including phosphate rock, sulfur and sulfuric acid, MGA, PPA, natural gas and electricity. To help secure supply, we purchase several of our key raw materials under long-term contracts generally providing for fixed or minimum quantities of materials, or purchase of

our full requirements, and predetermined pricing formulae based on various market indices and other factors. We do not engage in any significant futures or other derivative contracts to hedge against fluctuations of raw materials. Although we have acquired a concession in Mexico that could allow future development of our own phosphate reserves, we are not currently integrated vertically back to our sources of supply by ownership interests, joint ventures or affiliated companies, as a result of which raw materials acquisition at economical price levels is an

Page 7 of 84

Table of Contents

important risk of our business. See “Part I, Item 1A. Risk Factors - Raw Materials Availability and Pricing - Significant raw material shortages, supplier concentration, supplier capacity constraints, supplier production disruptions, supplier quality and sourcing issues or price increases could increase our operating costs or curtail our ability to manufacture products and adversely impact the competitive positions of our products.” in this Annual Report on Form 10-K for a discussion of the risks associated with our sourcing raw materials.

Phosphate Rock and MGA. MGA, which is purified to produce PPA, is the main raw material for the creation of our downstream salts and acids. We purchase MGA for processing at our Geismar, Louisiana facility through a long-term agreement with PCS. At our Coatzacoalcos facility in Mexico, we typically purchase phosphate rock in order to produce MGA internally; however, we can also process externally purchased MGA available from various suppliers globally. We have two preferred phosphate rock suppliers on which we intend to rely in 2016 to supply the Coatzacoalcos facility. In addition to these primary sources, we have options for other spot suppliers and will continue to qualify and develop additional sources for potential future supply.

Sulfur and Sulfuric Acid. Sulfur is the key raw material used in the production of sulfuric acid, a key raw material used in the production of MGA by the wet method. We produce the vast majority of the sulfuric acid required to operate our Coatzacoalcos facility. The majority of the sulfuric acid required for the production of MGA by PCS supplied to our Geismar, Louisiana facility is supplied by Solvay. Our U.S. needs for sulfuric acid and our Mexican needs for sulfur are handled through long term contracts with Solvay and Pemex-Gas y Petroquímica Básica, respectively.

Purified Phosphoric Acid. The key raw material input for all of our downstream specialty phosphate salt and specialty phosphoric acid operations is PPA. In addition to purifying MGA to produce PPA internally, we also purchase certain quantities of our PPA supply from third parties to optimize our consumption and net sales, including from PCS with whom we have a long-term supply contract. In 2015, Innophos produced approximately three quarters and purchased approximately one quarter of its total PPA supply.

Natural Gas and Electricity. Natural gas and electricity are used to operate our facilities and generate heat and steam for the various manufacturing processes. We typically purchase natural gas and electricity on the North American open market at so-called “spot rates.” From time to time, we will enter into longer term natural gas and electricity supply contracts in an effort to eliminate some of the volatility in our energy costs. We did not enter into any economic hedges in the past three years. We also seek to increase the energy efficiencies of our facilities and reduce costs through investments and ongoing continuous improvement projects.

Research and Development

Our product engineering and development activities are aimed at developing and enhancing products, processes, applications and technologies to strengthen our position in our markets and with our customers. We focus on:

- developing new or improved application-specific specialty phosphate and other mineral and botanical based specialty ingredients based on our existing product line and identified or anticipated customer needs;

- creating new products to be used in new applications or to serve new markets;

- providing customers with premier technical services as they integrate our ingredients into their products and manufacturing processes;

- ensuring that our products are manufactured in accordance with our stringent regulatory, health and safety policies and objectives;

- developing more efficient and lower cost manufacturing processes; and

- expanding existing, and developing new, relationships with customers to meet their product engineering needs.

Our research expenditures were \$4.5 million, \$4.6 million and \$3.9 million for the years ended December 31, 2015, 2014 and 2013, respectively.

Environmental and Regulatory Compliance

Certain of our operations involve manufacturing and marketing ingredients for use in food, nutritional supplement and pharmaceutical excipient products, and therefore must comply with stringent U.S. Food and Drug Administration, or FDA, or the U.S. Department of Agriculture, or USDA, regulatory controls and similar regulatory controls of foreign jurisdictions where we operate, as well as good manufacturing practices and the quality requirements of our customers. The regulation of, and legal requirements for, the manufacture and sale of our products is a changing

environment, and those changes may require increased operating costs to develop and implement additional product safety measures. Although there is some harmonization among the regulatory requirements of various jurisdictions, each country's specific regulatory requirements apply to products imported and sold in that country. Regulatory systems throughout the world vary in complexity and transparency, as well as the time required to navigate such system in order to enter the subject market. Our growth that involves expansion of new products into current or

Page 8 of 84

Table of Contents

new markets is affected by our ability to obtain necessary regulatory approvals and achieve and maintain compliance with regulatory requirements. In addition, public perception in the United States, Europe and other markets of phosphate products in relation to their safety and other market and legal trends related to “natural” and “clean labeling” in foods also may affect our sales and operations.

In addition, our operations that involve the use, handling, processing, storage, transportation and disposal of hazardous materials are subject to extensive and frequently changing environmental regulation by federal, state, and local authorities, including, but not limited to, the U.S. Environmental Protection Agency and the U.S. Federal Railroad Administration, or FRA, as well as regulatory authorities with jurisdiction over our operations in Canada, Mexico and China. Our operations also expose us to the risk of claims for environmental remediation and restoration or for exposure to hazardous materials. Our production facilities require operating permits that are subject to renewal or modification. Violations of health and safety and environmental laws, regulations, or permits may result in restrictions being imposed on operating activities, substantial fines, penalties, damages, the rescission of an operating permit, third-party claims for property damage or personal injury, or other costs, any of which could have a material adverse effect on our business, financial condition, results of operations, or cash flows. Due to changes in health and safety and environmental laws and regulations, the time frames when those laws and regulations might be applied, and developments in environmental control technology, we cannot predict with certainty the amount of capital expenditures to be incurred for environmental purposes.

Some environmental laws and regulations impose liability and responsibility on present and former owners, operators or users of facilities, and sites for contamination at such facilities and sites without regard to causation or knowledge of contamination. Many of our sites have an extended history of industrial use. Soil and groundwater contamination have been detected at some of our sites, and additional contamination might occur or be discovered at these sites or other sites in the future (including sites to which we may have sent hazardous waste). We continue to investigate, monitor or cleanup contamination at most of these sites. The potential liability for all these sites will depend on several factors, including the extent of contamination, the method of remediation, future developments and increasingly stringent regulation, the outcome of discussions with regulatory agencies, the liability of third parties, potential natural resource damage and insurance coverage. Liabilities for environmental matters are recorded in the accounting period in which our responsibility is established and the cost can be reasonably estimated. Due to the uncertainties associated with environmental investigations and cleanups and the ongoing nature of the investigations and cleanups at our sites, we are unable to predict precisely the nature, cost and timing of our future remedial obligations with respect to our sites and, as a result, our actual environmental costs and liabilities could significantly exceed our accruals.

Further information, including the current status of significant environmental matters and the financial impact incurred for the remediation of such environmental matters, is included in Note 16 (Commitments and Contingencies) of the Notes to Financial Statements in “Part II, Item 8. Financial Statements and Supplementary Data” and in “Part I, Item 1A. Risk Factors - Regulatory Risks - We are subject to a wide variety of laws, regulations and government policies, including with respect to the environment, which may change in significant ways.” appearing elsewhere in this Annual Report on Form 10-K.

Intellectual Property

We rely on a combination of patent, copyright and trademark laws to protect certain key intellectual aspects of our business. In addition, our pool of proprietary information, consisting of manufacturing know-how, trade secrets and unregistered copyrights relating to the design and operation of our facilities and systems, is considered particularly important and valuable. Accordingly, we seek to protect proprietary information through all legal means practicable. However, monitoring the unauthorized use of our intellectual property is difficult, and the steps we have taken may not prevent all unauthorized use by others.

Insurance

In the normal course of business, we are subject to numerous operating risks, including risks associated with environmental contamination, health and safety while manufacturing, developing and supplying products and potential damage to a customer.

We currently have in force insurance policies covering property, general liability, excess liability, workers' compensation, employer's liability, product liability, product recall, fiduciary and other coverages. We seek to maintain coverages consistent with market practices and required by those with whom we do business. Where appropriate for the protection of our property, we also require others with whom we do business to provide certain coverages for our benefit. We believe that we are appropriately insured for the insurable risks associated with our business.

Employees

As of December 31, 2015, we had 1,387 employees at our facilities worldwide, of whom 774 were unionized hourly wage employees. We currently employ both union and non-union employees at most of our facilities. We believe we have a good working relationship with our employees, which has resulted in high productivity and low turnover in key production positions. We have experienced no work stoppages or strikes at any of our unionized facilities since acquiring them in 2004. We

Table of Contents

are a party to a collective bargaining agreement with the United Steel, Paper and Forestry, Rubber, Manufacturing, Energy, Allied Industrial and Service Workers International Union, Local No. 7-765 through January 16, 2017 at the Chicago Heights facility; International Union of Operating Engineers, Local No. 369 through April 21, 2016 at the Nashville facility; the Health Care, Professional, Technical, Office, Warehouse and Mail Order Employees Union, affiliated with the International Brotherhood of Teamsters, Local 743 through June 17, 2017 at the Chicago (Waterway) facility; the United Steelworkers, Local No. 6304 through April 30, 2017 at the Port Maitland, Ontario facility; and the Sindicato de Trabajadores de la Industria Química, Petroquímica, Carboquímica, Gases, Similares y Conexos de la República Mexicana, at the Mexico facilities. The agreement at the Coatzacoalcos, Mexico facility is for an indefinite period, but wages are reviewed every year and the rest of the agreement is subject to negotiation every two years. The current two-year period will expire in June 2016.

Executive Officers

The following table and biographical material present information about the persons serving as our executive officers:

Name	Age	Position
Kim Ann Mink	56	Chief Executive Officer, President and Director
William Farran	66	Senior Vice President, Chief Legal Officer and Corporate Secretary
Charles Brodheim	52	Vice President, Corporate Controller and Information Technology
Louis Calvarin	52	Senior Vice President, Strategy and Chief Risk Officer
Mark Feuerbach	56	Chief Financial Officer, Senior Vice President, Investor Relations, Treasury, Financial Planning & Analysis
Joseph Golowski	54	Senior Vice President, Specialty Ingredients & Nutrition
Jean Marie Mainente	52	Senior Vice President, Human Resources
Yasef Murat	61	Senior Vice President, Global Manufacturing
Susan Turner	62	Vice President, Quality and Regulatory

Biographical Material

Kim Ann Mink, Ph. D. has been the Chief Executive Officer and President of Innophos since December 2015 and a director of Innophos since February 2016. Prior to joining Innophos, she served as Business President of Elastomers, Electrical and Telecommunications at The Dow Chemical Company, or Dow Chemical, from September 2012 to December 2015. Dr. Mink joined Dow Chemical in April 2009 as Global General Manager, Performance Materials and President and Chief Executive Officer of ANGUS Chemical Co. (then a fully owned subsidiary of Dow Chemical). Prior to joining Dow Chemical, Dr. Mink was Corporate Vice President and Global General Manager, Ion Exchange Resins at the Rohm and Haas Company (now a fully owned subsidiary of Dow Chemical), where she spent more than 20 years serving in numerous senior roles with increasing responsibilities. From September 2012 to December 2015, Dr. Mink served as a member of the Board of Advisors of Catalyst Inc. Since November 2012, she has been a member of the National Board of Trustees of the ALS Association. In addition, in 2014, Dr. Mink was named to STEMconnector's 100 Diverse Corporate Leaders in STEM. Dr. Mink received her B.A. in Chemistry from Hamilton College and a Ph.D. in Analytical Chemistry from Duke University. She is a graduate of the Wharton School of Business Management Program.

William Farran is the Senior Vice President, Chief Legal Officer and Corporate Secretary of Innophos. Mr. Farran joined Rhodia in 1987 as Environmental Counsel and held various positions in the Rhodia Legal Department, including Senior Operations Counsel and Assistant General Counsel, providing and managing a wide range of legal services to various Rhodia North American enterprises. In addition to his legal responsibilities, Mr. Farran also led Rhodia's North American Total Quality Management function and served as Director, Public Affairs and Communications. Prior to joining Rhodia, Mr. Farran was Senior Counsel for UGI Corporation and an associate with Morgan, Lewis & Bockius. Mr. Farran earned his B.S. in Economics from the Wharton School, University of Pennsylvania and his J.D. from Case Western Reserve University. He is a member of the bars of the Supreme Court of Pennsylvania and the Supreme Court of the United States.

Charles Brodheim is the Vice President, Corporate Controller and Information Technology of Innophos.

Mr. Brodheim joined Rhodia in 1988 and held various tax, accounting and business analyst positions within Rhodia.

Mr. Brodheim was the North American Finance Director for Specialty Phosphates from 2000 to 2002. After 2002, Mr. Brodheim was a Finance Director for various Rhodia North American Enterprises, including its Eco-Services enterprise. Mr. Brodheim earned a B.B.A. degree in Finance/Accounting from Temple University and is a certified public accountant.

Page 10 of 84

Table of Contents

Louis Calvarin, Ph.D. is the Senior Vice President, Strategy and Chief Risk Officer of Innophos. Dr. Calvarin joined Rhodia in France in 1986. Prior to his current role, Dr. Calvarin had been Vice President, Operations of Innophos since 2004. Prior to that, Dr. Calvarin held the positions of Director of Manufacturing and Engineering for Specialty Phosphates, Director of Manufacturing for Specialty Phosphates (U.S.), Mineral Chemicals Industrial Operations Manager for Home, Personal Care and Industrial Ingredients, and Projects Director for Paint, Paper and Construction Materials. Dr. Calvarin earned a Ph.D. degree in Chemical Engineering from the Ecole Nationale Supérieure des Mines in France and graduated from Ecole Polytechnique in France.

Mark Feuerbach has served as the Chief Financial Officer of Innophos since December 2015. He has served as the Vice President, Investor Relations, Treasury, Financial Planning & Analysis of Innophos since 2005. He previously served as Chief Financial Officer of Innophos from August 2004 through April 2005, from June through September 2009, and from July 2013 through February 2014. Mr. Feuerbach joined Rhodia in 1989 and was Global Finance Director of Specialty Phosphates from 2000 to 2004, including a two-year assignment in the U.K. immediately following the purchase of the phosphates business of Albright & Wilson. Prior to this assignment, Mr. Feuerbach was the Finance Director of Rhodia's North American phosphates business from 1997 to 2000, and he previously held various finance positions in a number of Rhodia's businesses. Prior to joining Rhodia, Mr. Feuerbach held various accounting and finance positions in both manufacturing and service companies. Mr. Feuerbach earned a B.A. in Business Administration/Accounting from Rutgers College and an M.B.A. in Finance/Information Systems from Rutgers Graduate School of Management.

Joseph Golowski is the Senior Vice President, Specialty Ingredients & Nutrition of Innophos. Joining Rhodia in 1989 in Market Development, Mr. Golowski has since then held progressive roles in Business Development, Sales, Marketing and Management. From 1997 through 2000, Mr. Golowski served as a Global Market Director for Rhodia Rare Earths based in Paris, France. Returning to the U.S., he became the North American Asset Manager for Phosphoric Acid and subsequently the Director of Sales for the Specialty Phosphate Business. He was appointed Vice President of Sales in 2006 and ultimately to his current role. Mr. Golowski earned a B.S. in Ceramic Engineering from Rutgers University, College of Engineering.

Jean Marie Mainente is the Senior Vice President, Chief Human Resources Officer for Innophos. Ms. Mainente joined Innophos in July 2015. Previously, from 2010 to 2015, Ms. Mainente served as Senior Vice President at Hudson Gain, a leadership solutions firm, leading the talent development practice. In her role at Hudson Gain, she partnered with Innophos on various talent initiatives, including succession planning, executive coaching and team development. Prior to joining Hudson Gain, Ms. Mainente held a variety of human resources and marketing roles, including at Bayer Corporation, formerly Sterling Drug, from 1988 to 1998 and again from 2006 to 2010, Avaya Inc. from 2004 to 2005 and Bristol-Myers Squibb from 2000 to 2003. Ms. Mainente earned an M.B.A. in Marketing from Pace University and a B.S. in Management & Organizational Behavior and Industrial Relations from Rider University.

Yasef Murat is the Senior Vice President, Global Manufacturing of Innophos. Mr. Murat joined Innophos in 2009 and has held various positions of increasing responsibility. Prior to joining Innophos, Mr. Murat served as General Manager and Director of the board at each of Nilefos Chemie NV, a mineral company, and Misa Eco NV, a recycling company, from 2005 to 2009, General Manager for Rhodia Chemie NV from 2003 to 2005 and Head of Operations of Rhodia Chemie NV's specialty phosphates business from 2001 to 2003. Mr. Murat has degrees in Chemical Engineering and Electrochemistry from Institut de Chimie de Besançon (in France) and Institut National Polytechnique de Grenoble (in France), respectively, and he holds an MBA from the Vlerick School for Management (in Belgium).

Susan Turner is the Vice President, Quality and Regulatory of Innophos. Ms. Turner joined Stauffer Chemical in 1980 and has since held progressive roles in the areas of Engineering, Manufacturing, Maintenance, Project Management, and Human Resources. From 2009 to 2012, Ms. Turner served as Process Integration Lead for the ERP business systems redesign and then assumed leadership of the project post go-live through the stabilization period. From 2005 to 2009, Ms. Turner served as Plant Manager of the Chicago Heights and Waterway manufacturing facilities. Prior to that, her experience included assignment in Mexico and France. Ms. Turner earned a B.S. in Mechanical Engineering from Utah State University.

Available Information

The Securities and Exchange Commission (SEC) maintains a website that contains reports, proxy and information statements, and other information regarding issuers, including Innophos, that file electronically with the SEC. The public can obtain any documents that the Company files with the SEC at <http://www.sec.gov>. Innophos files annual reports, quarterly reports, proxy statements and other documents with the SEC under the Securities Exchange Act of 1934, as amended (Exchange Act). The public may read and copy any materials that the Company files with the SEC at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330.

Innophos also makes available free of charge through its website (www.innophos.com) its Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and, if applicable, amendments to those reports filed or

Table of Contents

furnished pursuant to the Exchange Act as soon as reasonably practicable after Innophos electronically files such material with, or furnishes it to, the SEC. The information contained on Innophos' website is not included in, or incorporated by reference into, this Annual Report on Form 10-K.

Table of Contents

ITEM 1A. RISK FACTORS

The following discussion of risk factors contains "forward-looking statements," as discussed in the Forward-Looking Statements section of this Annual Report on Form 10-K. Investing in Innophos involves a significant degree of risk. We are providing the following cautionary discussion of risk factors, uncertainties and assumptions that we believe are relevant to our business. These are factors that, individually or in the aggregate, we think could cause our actual results to differ materially from expected and historical results and our forward-looking statements. You should understand that it is not possible to predict or identify all such factors. Consequently, you should not consider this section to be a complete discussion of all potential risks or uncertainties that may substantially impact our business. Moreover, we operate in a competitive and rapidly changing environment. New factors emerge from time to time and it is not possible to predict the impact of all of these factors on our business, financial condition or results of operations.

Risks Related to Our Business Operations

Raw Materials Availability and Pricing - Significant raw material shortages, supplier concentration, supplier capacity constraints, supplier production disruptions, supplier quality and sourcing issues or price increases could increase our operating costs or curtail our ability to manufacture products and adversely impact the competitive positions of our products.

The success of our business depends on our ability to source sufficient amounts of the raw materials used in our products at competitive prices. Our principal raw materials consist of phosphate rock, sulfur and sulfuric acid, MGA, PPA and energy (principally natural gas and electricity). Our raw materials are purchased under supply contracts that vary from long term multi-year supply arrangements to annual agreements. We also rely on spot suppliers. Pricing within contracts is typically set according to predetermined formulae dependent on price indices or market prices with pricing for some shorter term contracts set by negotiation with reference to market conditions. The prices we pay under these contracts will generally lag the underlying market prices of the raw material. Approximately 25% of our supply of these principal raw materials is bought under fixed annual pricing arrangements. Pricing for our remaining supply of raw materials typically adjusts in line with changes in market prices or with approximately a three month lag to market price changes. We cannot be sure that the annual or other periodic contracts we have in place for our raw materials can be renewed at all or on similar terms to the current terms.

Various market conditions can affect the price and supply of our raw materials. The primary demand for both phosphate rock and sulfur, globally, is for fertilizer production. The costs of these materials are heavily influenced by demand conditions in the fertilizer market and freight costs, which historically have been volatile. Prices for both materials escalated rapidly during 2007 and 2008, declined during 2009, began to increase again through 2011, subsequently declined again through 2013, and generally remained steady in 2014 and 2015. Increased raw material pricing may adversely affect our margins if we are not able to offset costs with sales price increases. See "Competition - The success of our business depends on our ability to successfully compete in extremely competitive markets" below. We import phosphate rock for our Coatzacoalcos, Mexico site from multiple global suppliers. We are currently capable of successfully processing industrial scale quantities of phosphate rock from five separate suppliers and, for 2016, we expect the majority of our requirements to be met from two of these suppliers. Although the Coatzacoalcos facility is able to handle alternative grades of rock without adversely affecting operating efficiency, further investment may be required to realize the full benefits of improved process flexibility. Process efficiency issues may arise over longer time periods as the plant processes rock from various sources, necessitating further investment or changes in rock suppliers to maintain and improve our current plant processing capabilities or to meet evolving needs. We cannot be sure that efficiency issues will not arise, or if they do, that our existing or other suppliers would be able to supply sufficient additional quantities or grades to meet our full requirements, which may weaken our ability to maintain our existing levels of operations. Although the diversification of our phosphate rock supply base has reduced our dependence on any one supplier, tight demand conditions overall in the fertilizer market would mean that our purchases could be constrained should any major supplier experience a significant disruption in its ability to supply, for example, as a result of capacity constraints, political unrest, or adverse weather conditions in the areas where that

supplier operates.

Natural gas prices have experienced significant volatility in the past several years. Wide fluctuations in natural gas prices may result from relatively minor changes in supply and demand, market uncertainty, and other factors, both domestic and foreign, that are beyond our control. In addition, natural gas is often a substitute for petroleum-based energy supplies and natural gas prices are positively correlated with petroleum prices. Future increases in the price of petroleum (resulting from increased demand, political instability or other factors) may result in significant additional increases in the price of natural gas. We typically purchase

Page 13 of 84

Table of Contents

natural gas at spot market prices for use at our facilities, which exposes us to that price volatility, except in those instances where, from time to time, we enter into longer term, fixed-price natural gas contracts.

Most of our raw materials are supplied to us by either one or a small number of suppliers. Some of those suppliers rely, in turn, on sole or limited sources of supply for raw materials included in their products. Failure of our suppliers to maintain sufficient capability to meet changes in demand or quality, or to overcome unanticipated interruptions in their own sources of supply due to their own supplier's performance failures or force majeure conditions, such as disaster or political unrest, may prevent them from continuing to supply raw materials as we require them, or at all. Our inability to obtain sufficient quantities of sole or limited source raw materials or to develop alternative sources on a timely basis if required could result in increased costs, which may be material, in our operations or our inability to properly maintain our existing level of operations.

Competition - The success of our business depends on our ability to successfully compete in extremely competitive markets.

We face significant competition in each of our markets. In some markets, our products are subject to price pressure due to factors such as competition from low-cost producers, import competition and regulation, transaction risks associated with foreign currency exchange fluctuations, excess industry capacity and consolidation among our customers and competitors. These developments, and particularly future expansions by one or more competitors, have had and are expected to continue to have a negative effect on our pricing abilities. Our operations are subject to currency fluctuation transaction risks. We may from time to time be at a competitive disadvantage as a result of the strengthening of the U.S. Dollar, which can place us at a competitive disadvantage with respect to our foreign competitors selling competing products into the markets to which we sell our products. We believe that the strength of the U.S. Dollar in 2015 had a negative impact our competitive position and our revenues, and we believe that a strong U.S. Dollar will continue to have a negative impact our competitive position and revenues. In addition, in the specialty chemicals industry, price competition is also based upon a number of other considerations, including product differentiation and innovation, product quality, technical service, and supply reliability. Thus, new products or technologies developed by competitors may also have an adverse impact on our pricing capability. Our competitors continue to seek to develop improvements to the purified wet acid method to produce PPA, the method utilized by Innophos, which, if developed, may hurt our competitive position. In addition, new technologies are being developed to attempt to produce PPA at a cheaper cost than the thermal acid method or the purified wet acid method, including a kiln-based thermal method. Any such new or improved technology that is developed would be expected to reduce the barriers to entry and/or significantly increase competition in the markets in which we compete, all of which would be expected to harm our competitive position and our business. Although we have a number of product quality improvement and product enhancement initiatives underway, we cannot assure that our efforts in maintaining differentiation will be successful.

From time to time, including throughout 2015, we have experienced pricing pressure, particularly from significant customers. In addition, in 2015, we experienced pricing pressure resulting from manufacturing overcapacity outside of North America, including manufacturing overcapacity in China, which we expect to continue for the foreseeable future. We have also faced increased pricing pressure as a result of the Chinese government continuing to encourage export activity by rolling over its low export tariff on solid fertilizers and eliminating its export tariff on phosphoric acid, which pressure is expected to continue for the foreseeable future. In the past, we have taken steps to reduce costs, focus on higher margin products and resist possible price reductions by structuring our contracts and developing strong "value-oriented" non-price related customer service relationships. However, price reductions in the past, including in 2015, have adversely affected our sales and margins, including the mix between our high margin and low margin products. If we are not able to offset price pressure when it arises through improved operating efficiencies, reduced expenditures, improved product margin mix and other means, we may be subject to those same effects in the future.

We have experienced and are continuing to experience more intense pricing pressures in markets, and for applications, where competing producers, particularly those located in China, have similar product offerings, established supply relationships, and potential cost advantages. Historically, this pricing pressure has occurred most frequently in markets such as South America where we do not have local production capability and for less specialized products such as

detergent grade STPP. Chinese phosphate producers generally utilize the “thermal” method, a process more heavily dependent on energy that may be cost advantaged compared to “wet” method producers (such as Innophos) during periods of low energy prices, although several producers have arisen in China using the wet process. Both North African and some Chinese producers are integrated back to phosphate rock, which also may provide cost advantages to them depending on the markets in which they choose to compete. The relative competitiveness of Chinese, Russian and North African producers increased in 2015. If the relative competitiveness of competing producers continues to increase, or they are successful in extending their product lines to more specialized product applications, pricing pressure on Innophos could continue to increase significantly, which would negatively impact our sales and margins.

Regulatory Risks - We are subject to a wide variety of laws, regulations and government policies, including with respect to the environment, which may change in significant ways.

Table of Contents

Our business is subject to regulation under a wide variety of U.S. federal and state and non-U.S. laws, regulations and policies. There can be no assurance that laws, regulations and policies will not be changed in ways that will require us to modify our business models and objectives or affect our returns on investments by restricting existing activities and products, subjecting them to escalating costs or prohibiting them outright. Inability to comply with these regulations could adversely affect our status in these projects and adversely affect our results of operations, financial position and cash flows.

Our operations involve the use, handling, processing, storage, transportation and disposal of hazardous materials, and some of our products are ingredients in foods, nutritional supplements or pharmaceutical excipients that are used in finished products consumed or used by humans or animals. As a result, we are subject to extensive and frequently changing environmental and other regulatory requirements and periodic inspection by federal, state, and local authorities with jurisdiction over our operations and product markets, including, but not limited to the U.S.

Environmental Protection Agency, or EPA, U.S. Food and Drug Administration, or FDA, the U.S. Department of Agriculture, U.S. Customs, the Occupational Safety & Health Administration, or OSHA, foreign counterparts to each of the foregoing agencies, and other U.S. and foreign regulatory authorities. Worldwide regulatory trends towards increasing regulation of food safety factors to reduce risks, adoption of increased food defense measures and prevention of economic adulteration of food particular through supply chain management may increase our operating costs.

Moreover, as we increase operations in foreign jurisdictions, such as China where a new facility was completed in 2012, and export new product into markets where they have not previously been sold, we are subject to a variety of regulatory requirements in jurisdictions that may have unique challenges, or slow processes.

Additional laws or regulations focused on phosphate-based products may be implemented in the future. Public perception in the United States, Europe and other markets, which may be driven by public opinions and publications concerning phosphate products in relation to their safety, may affect our sales and operations. Regulators in the United States and other jurisdictions may choose to change recommended daily intake levels for total phosphate in the diet or added phosphates in food. Regulators in the United States and other jurisdictions may choose to no longer allow phosphates as a synthetic ingredient in products labeled with “organic” claims. In addition, U.S. class action trends related to “natural” and “clean labeling” in foods also may affect our sales and operations. Public interest organization spotlighting, through public awareness and publications, regarding the contribution of meat-based diets to phosphate life cycle concerns in the environment may also affect our sales in Europe and other jurisdictions. Additional demand restrictions may arise from producers reformulating to reduce or eliminate phosphate content, as was announced in early 2014 by a major consumer packaged goods manufacturer and in 2015 by several major food chains.

A number of states within the United States, and Canada (countrywide), have effectively banned the use of phosphate-based products in consumer automatic dishwashing detergents. The trade association that includes major manufacturers of consumer automatic dishwashing detergents has actively supported these efforts in the United States and Canada, with non-phosphate legislation becoming effective in Canada and many states in the United States in July 2010. In addition, the European Union enacted legislation to effectively ban phosphates in consumer detergents with a first phase beginning 2013, and in Australia an industry-led voluntary phosphate ban took effect in 2014. These trends and related changes in consumer preferences have already reduced our requirements for automatic dish markets and we have responded with a shift in our capabilities to serve other food and industrial applications. Furthermore, although phosphates are still permitted for consumer detergent applications in many Latin American countries and other parts of the world, we cannot be sure that similar bans may not be implemented in some or all of these markets in the future or that additional customers will not reformulate their products to reduce STPP content in an effort to market a reduced phosphate content product line. We expect some detergent grade STPP reformulation in 2016, which will adversely effect our financial results.

Additional laws, regulations or distribution policies focused on reduced use of other phosphate-based products could occur in the future. For example, some jurisdictions have increased restrictions or banned the use of polyphosphoric acid in asphalt road construction while others have eased restrictions or are in the process of allowing its use. During 2008, such restrictions were implemented in New York State, while in 2009 restrictions were reversed in Wyoming and Colorado allowing the use of polyphosphoric acid in asphalt road construction on an exception basis; since then

Colorado has reinstituted the restrictions, but approval for use is under review after the completion of multi-year trials. Georgia (2012), South Carolina (2014) and Nebraska (2015) have approved the use of polyphosphoric acid in asphalt road construction and other states are evaluating its allowance. If restrictions are instituted in multiple jurisdictions or throughout the United States and Canada, a significant impact on our business could occur.

Changes in composition or permitted-use regulations in domestic or export countries may affect the regulatory status of our finished products and our ability to sell these products into some markets. Such changes may in turn require us to reformulate or establish alternative raw material sourcing, potentially incurring additional cost. If these measures are not successful, the available markets for our products may be limited.

Table of Contents

We, our representatives, and the industries in which we operate are subject to continuing scrutiny by regulators and other governmental authorities, which may, in certain circumstances, lead to enforcement actions, fines and penalties or the assertion of private litigation claims and damages. Maintaining compliance with health and safety and environmental laws and regulations has resulted in ongoing costs for us. Currently, we are involved in several compliance and remediation efforts and agency inspections concerning health, safety and environmental matters. Although we believe that we have adopted appropriate risk management and compliance programs, legal and compliance risks will continue to exist and additional legal proceedings and other contingencies, the outcome of which cannot be predicted with certainty, may arise from time to time.

Our operations also expose us to the risk of claims for environmental remediation and restoration or for exposure to hazardous materials. Our production facilities require various operating permits that are subject to renewal or modification. Violations of environmental laws, regulations, or permits may result in restrictions being imposed on operating activities, substantial fines, penalties, damages, the rescission or denial of operating permits, third-party claims for property damage or personal injury, or other costs.

Some existing environmental laws and regulations impose liability and responsibility on present and former owners, operators or users of facilities and sites for contamination at those locations without regard to causation or knowledge of contamination. Many of our sites have an extended history of industrial use, which may expose us to liability. Soil and groundwater contamination have been detected at some of our sites, and additional contamination might occur or be discovered at these sites or other sites (including sites which we might acquire or to which we may have sent hazardous waste) in the future, which could expose us to liability. For example, future environmental spending is probable at our site in Nashville, Tennessee, as discussed further in Note 16 (Commitments and Contingencies) of the audited financial statements appearing elsewhere in this Annual Report on Form 10-K. In addition, we are continuing our ongoing negotiations with federal and Louisiana authorities with respect to alleged non-compliance at our Geismar, Louisiana facility, as discussed further in Note 16 (Commitments and Contingencies) of the audited financial statements appearing elsewhere in this Annual Report on Form 10-K. We continue to investigate, monitor or clean-up contamination at most of these sites. Due to the uncertainties associated with environmental investigations and clean-ups and the ongoing nature of the investigations and clean-ups at our sites, we cannot predict precisely the nature, cost, and timing of our future remedial obligations with respect to our sites.

International Operations - We are subject to a variety of risks with respect to our foreign operations.

We have significant production operations in Mexico and Canada, and in 2012 we completed construction of our blending operation for food ingredients at a new facility in China which became operational in 2013. We continually evaluate business opportunities that may expand our operations to other areas beyond our current operations. We believe that revenue from sales outside the United States will continue to account for a material portion of our total revenue for the foreseeable future. There are inherent risks in international operations, the most notable being currency fluctuations and devaluations, economic and business conditions that differ from U.S. cycles, divergent social and political conditions that may become unsettled or even disruptive, communication and translation delays and errors due to cultural and language barriers and less predictable outcomes from differing legal and judicial systems. Until we gain familiarity with the risk environment on an ongoing basis, our risks in those regards are likely to be greatest as we continue to implement our new business startup in China. Among the additional risks potentially affecting our Mexican operations are changes in local economic conditions, currency devaluations, potential disruption from socio-political violence in that country, and difficulty in contract enforcement due to differences in the Mexican legal and regulatory regimes compared to those of the United States. Risks to our Canadian operations include a differing federal and provincial regulatory environment from that in the United States and currency fluctuations and devaluations. In the event that we establish operations in additional regions, our exposures to risks from the noted causes and from other as yet unknown causes may increase.

In addition, we are required to comply with the laws of each jurisdiction in which we have operations or sell our products, including safety and quality laws, marketing laws, antitrust laws and import and export control laws. The laws of these jurisdictions vary significantly, and we have limited experience in complying with the laws of certain such jurisdictions, including China. Violations of such laws may result in restrictions being imposed on our operating activities, substantial fines, civil or criminal penalties, damages, the rescission of operating permits, third-party claims

for property damage or personal injury, or other costs.

Our overall success as a multinational business depends, in part, upon our ability to succeed in differing economic, social and political conditions. Among other things, we are faced with potential difficulties in building and starting up local facilities, staffing and managing local workforces, and designing and effecting solutions to manage commercial risks posed by local customers and distributors. We may not continue to succeed in developing and implementing policies and strategies that are effective in each location where we do business. These risks are not limited to only those countries where we actually operate facilities, but may extend to areas and regions that supply and service our facilities or are supplied and serviced by them.

As a U.S. corporation, we are subject to the regulations imposed by the Foreign Corrupt Practices Act, or FCPA, which generally prohibit U.S. companies, their subsidiaries and their intermediaries from making improper payments to foreign officials

Page 16 of 84

Table of Contents

for the purpose of obtaining or keeping business. We are also subject to the comparable anti-corruption laws of other countries in which we operate. We sell many of our products in developing countries through sales agents and distributors whose personnel are not subject to our disciplinary procedures. Although we and our subsidiaries are committed to conducting business in a legal and ethical manner wherever we operate, and we communicate and seek to monitor compliance with our policies by all who do business with us, we cannot be sure that all our third party distributors or agents remain in full compliance with the FCPA or comparable foreign regulations at all times.

Violations of the FCPA or similar anti-corruption laws may result in severe criminal or civil sanctions, could disrupt our business, and could adversely affect our reputation.

Product Liability Exposure - We may be subject to costly product liability claims with respect to our products. Many of our products are functional or fortification additives used in the food and beverage, consumer product, nutritional supplement and pharmaceutical industries. The sale of these additives and our customers' products that include them involve the risk of product liability and personal injury claims, which may be brought by our customers or end-users of our customers' products. Although we endeavor to adhere to stringent quality standards in the course of their production, storage and transportation, our products could be subject to adverse effects from foreign matter such as moisture, dust, odors, insects, mold or other substances, or from excessive temperature variations. Our products may also be susceptible to non-conformance resulting from our raw materials or other products supplied to us by third parties that we resell. In addition, we could be subject to claims by end-users of our customers' products that incorporate our products that our customers have mislabeled or misrepresented the benefits of their products sold to such end-users. Historically, we have not been subject to material product liability claims, and no material claims are outstanding. However, because our products are used in manufacturing a wide variety of our customers' products, including those ingested by humans, and we have concentrated the recent growth of our business in those areas, we cannot be sure we will not be subject to material product liability or recall claims in the future. Any product liability claim brought against us, with or without merit, could result in: decreased demand for our products; regulatory investigations that could require costly recalls or product modifications; loss of revenues; substantial costs of litigation; liabilities that substantially exceed our product liability insurance, which we would then be required to pay ourselves; an increase in our product liability insurance rates; and damage to our reputation and the reputation of our products.

Production Facility Operating Hazards - We may be subject to liability with respect to the operations of our production facilities.

Our production facilities are subject to hazards associated with the manufacturing, handling, storage, and transportation of chemical substances and products, including failure of pipeline integrity, explosions, fires, inclement weather and natural disasters, terrorist attacks, mechanical failures, unscheduled downtime, transportation or utility interruptions, remedial complications, chemical spills, discharges or releases of toxic or hazardous substances, storage tank leaks and other environmental risks. Although we have implemented and installed various management systems and engineering controls and procedures at all our production facilities to enhance safety and minimize these risks and we insure our facilities to protect against a range of risks, these potential hazards continue to exist and could cause personal injury and loss of life, severe damage to or destruction of property and equipment, and environmental and natural resource damage, and may result in a suspension of operations (or extended shutdowns) and the imposition of civil or criminal penalties, whose nature, timing, severity and non-insured exposures are unknown.

Intellectual Property Rights - If we are unable to protect our intellectual property rights, our position in the market may be materially and adversely affected.

We rely on a combination of contractual provisions, confidentiality procedures and agreements, and patent, trademark, copyright, unfair competition, trade secrecy, and other intellectual property laws to protect our intellectual property and other proprietary rights on a worldwide basis. Nonetheless, we cannot be sure that any pending patent application or trademark application will result in an issued patent or registered trademark, that any issued or registered patents or trademarks will not be challenged, invalidated, circumvented or rendered unenforceable or that our confidentiality procedures will maintain the confidentiality of our confidential information. The use of our intellectual property by others could reduce any competitive advantage we have developed or otherwise harm our business. Moreover, we cannot be sure that our intellectual property rights can be asserted in all cases, particularly in an international context,

or that we can defend ourselves successfully or cost-effectively against the assertion of rights by others.

Contingency Planning - We may face operational challenges that could have a material adverse effect on our business. We operate a number of manufacturing facilities in the United States, Mexico, Canada and China, and we coordinate company activities, including our sales, customer service, information technology systems and administrative services and the like, through headquarters operated in those countries.

Our sites and those of others who provide services to them are subject to varying risks of disaster and follow on consequences, both manmade and natural, that could degrade or render inoperable one or more of our facilities for an extended period of time.

Page 17 of 84

Table of Contents

Such disaster related risks and effects are not predictable with certainty and, although they can be mitigated, they cannot be completely prevented. Although we have reviewed and analyzed a broad range of risks applicable to our business, the ones that actually affect us may not be those we have concluded most likely to occur. Furthermore, although our reviews have led to more systematic contingency planning, our plans are in varying stages of development and execution, such that they may not be adequate at the time of occurrence for the magnitude of any particular disaster event that befalls us.

We depend on our information technology systems for the efficient functioning of our business, including accounting, data storage, compliance, purchasing and inventory management. Although we attempt to mitigate interruptions, we may experience difficulties in implementing certain upgrades, which would impact our business operations, or experience difficulties in operating our business during the upgrade, either of which could disrupt our operations, including our ability to timely ship and track product orders, project inventory requirements, manage our supply chain and otherwise adequately service our customers. In the event that we experience significant disruptions as a result of the implementation of our information technology systems, we may not be able to repair our systems in an efficient and timely manner. Accordingly, such events may disrupt or reduce the efficiency of our entire operation.

Increased global cybersecurity vulnerabilities, threats and more sophisticated and targeted cyber-related attacks pose a risk to the security of Innophos' and our customers', partners', suppliers' and third-party service providers' respective products, systems and networks and the confidentiality, availability and integrity of our and our customers' data.

Although we attempt to mitigate these risks by employing a number of measures, we remain potentially vulnerable to additional known or unknown threats. We may have access to sensitive, confidential or personal data or information that is subject to privacy and security laws, regulations and customer-imposed controls. Despite our efforts to protect sensitive, confidential or personal data or information, we may be vulnerable to material security breaches, theft, misplaced or lost data, programming errors, employee errors and/or malfeasance that could potentially lead to the compromising of sensitive, confidential or personal data or information, improper use of our systems, software solutions or networks, unauthorized access, use, disclosure, modification or destruction of information, defective products, production downtimes and operational disruptions. In addition, a cyber-related attack could result in other negative consequences, including damage to our reputation or competitiveness, remediation or increased protection costs, litigation or regulatory action.

Acquisition Risks - Any acquisitions or divestitures we make could disrupt our business and not produce the expected benefits of such transaction.

We will continue from time to time to consider certain acquisitions or divestitures. Acquisitions and divestitures involve numerous risks, including identifying attractive target acquisitions, undisclosed risks affecting the target, difficulties integrating acquired businesses, the assumption of unknown liabilities, potential adverse effects on existing business relationships with current customers and suppliers, the diversion of our management's attention from other business concerns, and decreased geographic diversification.

We cannot provide assurance that any acquisitions or divestitures will perform as planned or prove to be beneficial to our operations and cash flow, or that we will be able to successfully integrate any acquisitions that we undertake. Any such failure could seriously harm our financial condition, results of operations and cash flows.

Certain Financial Risks

Contingencies Affecting Dividends - Our ability to pay dividends in the future may be compromised.

After our common stock became publicly traded in 2006, our Board of Directors initiated a policy of paying regular quarterly cash dividends, subject to the availability of funds, legal and contractual restrictions and prudent needs of our business. We have maintained that policy and paid dividends continuously since that time, making payments that we believed were prudent and promoted stockholder value. However, we are a holding company that does not conduct any business operations of our own. As a result, we are normally dependent upon cash dividends, distributions and other transfers from our subsidiaries, most directly Innophos, Inc., our primary operating subsidiary, and its intermediate parent, to make dividend payments on our common stock. The amounts available to us to pay cash dividends are restricted by provisions of Delaware law and historically, and we expect for the future, also by limitations in our debt facilities. As allowed by existing debt instruments, we may incur additional indebtedness that may restrict to an even greater degree, or prohibit, the payment of dividends on stock. We cannot be sure the level of

our operations or agreements governing our current or future indebtedness will permit us to adhere to our current dividend policy, increase dividends, or pay any dividends at all, or that continued payment of dividends will remain prudent for our business in the future judgment of our Board of Directors.

Credit Facility Risks - Our credit facility restricts our current and future operations.

Page 18 of 84

Table of Contents

In 2010, we entered into a credit agreement with a group of lenders to establish a credit facility, which agreement was amended and restated in 2012. This credit facility imposes significant operating and financial restrictions on us, including affirmative and negative covenants that prohibit or limit a variety of actions by Innophos generally without the lenders' approval. These include covenants that affect our ability, among other things, to: incur or guarantee indebtedness; create liens; enter into mergers, recapitalizations or assets purchases or sales; change names; make certain changes to our business; make restricted payments that include dividends, purchases and redemptions of equity; make advances, investments or loans; effect sales and leasebacks; enter into transactions with affiliates; allow negative pledges or limitations on the repayment abilities of subsidiaries; or amend subordinated debt. In addition to these restrictions and covenants, our credit facility requires us to comply with specified financial maintenance covenants. We cannot guarantee that we will be able to maintain compliance with these covenants. In addition, any of these restrictions or covenants could limit our ability to plan for or react to market conditions or meet certain capital needs and could otherwise restrict our corporate activities. For example, our results of operations may limit our borrowing base to a level below that which we seek to establish. Any such limitation could harm our business.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our headquarters are located in Cranbury, New Jersey, with manufacturing facilities strategically located throughout the United States, Canada, Mexico and China. We do not own and are not responsible for any closed U.S. or Canadian elemental phosphorus or phosphate production sites. All of our properties located in the United States, Canada, China and Brazil are utilized in our Specialty Phosphates US & Canada and GTSP & Other reporting segments. All of our properties located in Mexico are utilized in our Specialty Phosphates Mexico and GTSP & Other reporting segments.

ITEM MARKET FOR COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER

5. PURCHASES OF EQUITY SECURITIES

Certain Market Data

Our common stock has been listed and traded since November 2006 on the Nasdaq Global Select Market under the symbol "IPHS."

Stock price comparisons:

Quarter	2015		Dividends Paid Per Share	2014		Dividends Paid Per Share
	High	Low		High	Low	
First	\$62.62	\$53.92	\$0.48	\$56.70	\$44.69	\$0.40
Second	59.55	49.54	0.48	57.82	51.33	0.40
Third	53.84	39.53	0.48	61.48	53.61	0.48
Fourth	44.17	28.98	0.48	59.59	52.83	0.48

The Company declared a \$0.48 per share dividend in the first quarter of 2016.

The number of holders of record of our common stock at February 11, 2016 was 13,785.

Dividends

Consistent with the determination our Board of Directors made in December 2006, we continue to declare and pay quarterly dividends. Prior to 2011, the quarterly dividend was \$0.17 per share of common stock which increased to \$0.25 per share of common stock in 2011. Subsequently, the quarterly dividend was increased to \$0.27 per share of common stock starting with the first quarter of 2012, \$0.35 per share in October 2012, \$0.40 per share in October 2013 and \$0.48 per share in August 2014. Subject to action by the Board of Directors, management's present policy is to recommend dividends be continued, reflecting its judgment at the present time that stockholders are better served if we distribute to them, as quarterly dividends payable at the discretion of the Board of Directors, a portion of the cash generated by our business in excess of our expected cash needs rather than retaining or using the cash for other purposes. Our expected cash needs include operating expenses and working capital requirements, interest and principal payments on our indebtedness, capital expenditures, costs associated with being a public company, taxes and other costs. If our financial needs change, management's recommendations concerning dividends may also change. We are not required to pay dividends, and our stockholders will not be guaranteed, or have contractual or other rights, to receive dividends. Our Board of Directors may decide, in its discretion at any time, to decrease or increase the amount of dividends, otherwise modify or repeal the dividend policy or discontinue entirely the payment of dividends. In addition to prudent business considerations, our ability to pay dividends is restricted by the laws of Delaware, our state of incorporation, and certain restrictions in the credit agreement governing our credit facility.

Because we are a holding company, substantially all assets shown on our consolidated balance sheet are held by our subsidiaries. Accordingly, our earnings and cash flow and our ability to pay dividends are largely dependent upon the earnings and cash flows of our subsidiaries and the distribution or other payment of such earnings to us in the form of dividends. Our ability to pay dividends on our common stock is limited by restrictions in our indebtedness affecting the ability to pay dividends. See Note 9 of Notes to Consolidated Financial Statements in "Part II, Item 8. Financial Statements and Supplementary Data" and Part I, Item 1A. Risk Factors - Certain Financial Risks - Credit Facility Risks - Our credit facility restricts our current and future operations." appearing elsewhere in this Annual Report on Form 10-K.

Table of Contents

Issuer Purchases of Equity Securities

The Board of Directors authorized a stock repurchase program, commencing January 1, 2015, pursuant to which Innophos was authorized to acquire for cash in open market or private transactions from time to time up to \$125 million of its common stock over the ensuing 12 months. The timing of repurchases and the exact number of shares of common stock to be purchased were dependent upon market conditions and other factors. The repurchase program was funded through existing liquidity, including borrowings from Innophos' credit facility, and cash from operations. Treasury stock was recognized at the cost to reacquire the shares. The share repurchase program was completed in the third quarter of 2015 and no purchases took place in the fourth quarter of 2015. Previously, the 2011 repurchase program in which up to \$50 million of the Company's common stock could be repurchased from time to time at management's discretion was terminated on December 31, 2014. During the fourth quarter of 2013, the Company repurchased 150,000 shares of its common stock on the open market at an average price of \$47.45 per share or \$7.1 million. During the second quarter of 2014, the Company repurchased 112,002 shares of its common stock on the open market at an average price of \$55.16 per share or \$6.2 million. During the third quarter of 2014, the Company repurchased 137,781 shares of its common stock on the open market at an average price of \$58.09 per share or \$8.0 million. During the fourth quarter of 2014, the Company repurchased 278,578 shares of its common stock on the open market at an average price of \$54.92 per share or \$15.3 million. During the first quarter of 2015, the Company repurchased 582,462 shares of its common stock on the open market at an average price of 58.24 per share or \$33.9 million. During the second quarter of 2015, the Company repurchased 973,264 shares of its common stock on the open market at an average price of 53.35 per share or \$51.9 million. During the third quarter of 2015, the Company repurchased 762,994 shares of its common stock on the open market at an average price of \$51.31 per share or \$39.2 million.

Below is a summary by month of the 2015 stock repurchase activity, all of which were purchased as part of our publicly announced program described above:

Month	Number of Shares Repurchased	Average Price per Share
January	160,718	\$59.98
February	163,097	\$59.77
March	258,647	\$56.19
April	208,101	\$57.81
May	446,334	\$51.23
June	318,829	\$53.42
July	529,517	\$51.13
August	233,477	\$51.74

Items included in the preceding tables which had a significant impact on results are summarized as follows:

2015 included management transition expenses and restructuring costs of approximately \$20.4 million before tax (\$3.3 million in cost of goods sold and \$17.1 million in selling, general and administrative expense) and the Company's stock repurchase program which increased financing activities by \$125 million, which was partially offset by increased borrowings; 2013 included the acquisition of CMI, increasing investing activities by approximately \$5.0 million and an after tax benefit of \$5.4 million (\$7.2 million before tax) for the settlement of the CNA Fresh Water Claims. 2012 included the acquisitions of AMT and Triarco, increasing investing activities by approximately \$72 million and an after tax benefit of \$7.2 million (\$7.1 million before tax) for the settlement with Rhodia on their liability for the charges to be paid the CNA for the Fresh Water Claims. 2011 included the acquisition of Kelatron, increasing investing activities by approximately \$21 million.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This discussion contains forward-looking statements about our markets, the demand for our products and services and our future results. We based these statements on assumptions that we consider reasonable. Actual results may differ materially from those suggested by our forward-looking statements for various reasons including those discussed in the "Risk Factors" and "Forward-Looking Statements" sections of this Annual Report on Form 10-K.

Background

Innophos is a leading international producer of performance-critical and nutritional specialty ingredients, with applications in food, beverage, dietary supplements, pharmaceutical, oral care and industrial end markets. Innophos combines more than a century of experience in specialty phosphate manufacturing with a growing capability in a broad range of other specialty ingredients to supply a product range produced to stringent regulatory manufacturing standards and the quality demanded by customers worldwide. Many of Innophos' products are application-specific compounds engineered to meet customer performance requirements and are often critical to the taste, texture and performance of foods, beverages, pharmaceuticals, oral care products and other applications. For example, Innophos products act as flavor enhancers in beverages, electrolytes in sports drinks, texture additives in cheeses, leavening agents in baked goods, pharmaceutical excipients and cleaning agents in toothpaste, and they also provide a wide range of nutritional fortification solutions for food, beverage and nutritional supplement manufacturers.

Table of Contents

2015 Overview

Our financial performance in 2015 was highlighted by:

- Net sales of \$789.1 million compared to \$839.2 million for 2014, a decrease of \$50.1 million mostly attributable to: Selling Price decreases of \$21.5 million driven by foreign competition, mostly from European competitors due to the strength of the U.S. Dollar and Chinese-based competitors with respect to PPA and products for the specialty horticulture markets; and

- Volumes decreases of \$28.6 million primarily due to weak fertilizer market demand for GTSP but also weaker demand overall for Specialty Ingredients. PPA volumes increased in 2015 due to PPA supply issues that were experienced during the second half of 2014.

- Total restructuring and management transition charges of \$20.4 million recorded in the second half of 2015; realized savings in the fourth quarter of \$1.6 million attributable to restructuring activities;

- Net income of \$26.3 million, or \$1.29 per share (diluted);

- Capital expenditures of \$31.7 million with approximately 75% spent on plant maintenance and 25% spent on strategic initiatives;

- Quarterly dividend of \$0.48 per share leading to total year dividends of \$1.92 per share paid on the common stock in 2015, an increase of 9% over the \$1.76 per share total year dividend paid in 2014;

- Repurchase of 2,318,720 shares of common stock for an aggregate purchase price of \$125.0 million, completing the 2015 stock repurchase program;

- Advanced \$72 million of foreign cash to the U.S. and distributed \$266 million of certain foreign earnings in the form of an intercompany note to Innophos, Inc.; this distribution resulted in an overall net tax benefit of approximately \$0.6 million.

Recent Trends and Outlook

Cost improvements from the restructuring program implemented in the third quarter 2015 were in line with expectations, with fourth quarter manufacturing and operating expenses \$1.6 million lower sequentially. However, this benefit could not compensate for a significant decline in sales, plus fourth quarter cost variances (further described below in the fourth paragraph), which resulted in total Company operating income, excluding management transition expenses, to fall to \$8 million, considerably below the \$21 million (excluding restructuring charges) recorded in each of the first three quarters of 2015. Sales in the fourth quarter 2015 declined 12% from the comparable 2014 quarter due to lower average selling prices from unfavorable customer mix and very weak demand, particularly in the export, food, nutrition, asphalt and fertilizer markets.

Specialty Phosphates volumes decreased 2% in the fourth quarter 2015 compared to the prior year period. A 7% increase in PPA volumes, primarily due to previous year U.S. supply issues, was offset by an 8% volume decline in technical grade STPP and a 4% volume decline in Specialty Ingredients. Export sales were 18% lower than the fourth quarter 2014, primarily due to weak demand in Latin American markets.

Specialty Phosphates full year 2015 volumes declined 1% compared to 2014, with a 9% increase in PPA volumes offset by declines of 6% in technical grade STPP and 3% in Specialty Ingredients. Specialty Phosphates volumes are expected to decline by 1-2% for full year 2016 compared to 2015 primarily due to some detergent grade STPP reformulation that is expected to affect the Mexico Specialty Phosphates segment. Market demand in 2016 is expected to remain challenging in the United States and Canada home markets due to continued pressures on packaged foods. Specialty Phosphates operating income margins were 5% for the fourth quarter 2015 and 10% for full year 2015, both short of the 11% margin expectation. This was due to low fourth quarter sales, driven primarily by lower average selling prices, and cost variances of \$3 million for increased Specialty Phosphates obsolescence and net realizable value inventory reserves, due to deteriorating demand and selling price market conditions, and \$2 million for a supplier revision of 2014 costs.

Selling price pressures are expected to continue through 2016 given the strength of the U.S. Dollar and the Chinese government continuing to encourage export activity by rolling over their low export tariff on solid fertilizers and eliminating their export tariff on phosphoric acid (equates to approximately 4% of current PPA market selling prices). Full year 2016 Specialty Phosphates operating margins are expected to be in the 11-12% range as benefits from lower raw material costs and lower fixed costs from restructuring are expected to exceed the selling price and volume

headwinds. The first quarter operating margin is expected to be the weakest quarter of 2016 because lower raw material purchase prices will not be realized in the P&L until the second quarter due to the inventory lag. Management expects a \$4 million cost decrease on the

Page 25 of 84

Table of Contents

one annual PPA supply contract that reset on January 1, 2016, essentially recouping two-thirds of the increase experienced in 2015 compared to 2014, and expects lower year-over-year costs on other key supply contracts due to lower market prices for rock and sulfur.

Fertilizer market demand was very weak in the fourth quarter 2015 and this trend has continued through February 2016. Reported fertilizer market prices have declined during this period as a result, with current prices 15-20% below end of third quarter 2015 levels. Market phosphate rock prices were stable sequentially in the fourth quarter 2015 but have declined approximately 12% in the first quarter 2016. Sulfur market prices decreased 20% sequentially in the fourth quarter 2015 and settled another 14% lower for the first quarter 2016 given the weak fertilizer market demand. Excluding \$12 million of management transition expenses recorded in "Other", fourth quarter 2015 operating income was break-even for GTSP & Other, meeting expectations despite a \$1 million lower of cost or market reserve posted in the quarter due to deteriorating fertilizer market prices. Given the current weak demand and pricing in fertilizer markets, the Company expects an operating loss between \$1-2 million for the first quarter 2016.

Net debt (total long-term debt (including any current portion) less cash and cash equivalents) decreased sequentially by \$5 million in the fourth quarter 2015, to \$195 million, and gross debt decreased by \$73 million during the quarter primarily due to advanced payments from foreign entities in conjunction with the implementation of a cash repatriation program optimizing foreign tax credits and enabling \$266 million of future cash returns to the United States.

Results of Operations

The following table sets forth a summary of the Company's operations and their percentages of total revenue for the periods indicated (dollars in millions):

	Year Ended December 31,					
	2015		2014		2013	
	Amount	%	Amount	%	Amount	%
Net sales	\$789.1	100.0	839.2	100.0	844.1	100.0

Year Ended December 31, 2015 compared to the Year Ended December 31, 2014

Net Sales

Net sales represent the selling price of the products, net of any customer-related rebates, plus freight and any other items invoiced to customers. Net sales for the year ended December 31, 2015 were \$789.1 million, a decrease of \$50.1 million, or 6.0%, as compared to \$839.2 million for 2014. Specialty Phosphates sales were down 3.8%, or \$29.1 million, with selling prices lower by 2.8%, or \$21.1 million, and volumes lower by 1.0%, or \$8.0 million. The price decrease was seen across all product lines with increased selling price pressures, largely from foreign competitors. Decreased Specialty Ingredients and STPP & Detergent Grade PPA volumes were partially offset by increased Food & Tech Grade PPA volumes that recovered from U.S. PPA supply issues experienced in the fourth quarter of 2014. GTSP & Other sales were down 27.1%, or \$21.0 million, with volumes lower by 26.5% , or \$20.6 million, due to weak fertilizer market demand, and prices lower by 0.6%, or \$0.4 million.

Table of Contents

The Company calculates pure selling price dollar variances as the selling price for the current year period minus the selling price for the prior year period, and then multiplies the resulting selling price difference by the prior year period volume. Volume variance is calculated as the total sales variance minus the selling price variance and refers to the revenue effect of changes in tons sold at the relative prices applicable to the variation in tons, otherwise known as volume/mix. The following table illustrates for the year ended December 31, 2015 the percentage changes in net sales by reportable segment compared with the prior year, including the effect of price and volume/mix changes upon revenue:

	Price		Volume/Mix		Total	
Specialty Phosphates US & Canada	(2.9)%	(1.5)%	(4.4)%
Specialty Phosphates Mexico	(2.4)%	0.6	%	(1.8)%
Total Specialty Phosphates	(2.8)%	(1.0)%	(3.8)%
GTSP & Other	(0.6)%	(26.5)%	(27.1)%
Total	(2.6)%	(3.4)%	(6.0)%

The following table illustrates for the year ended December 31, 2015 the percentage changes for net sales by Specialty Phosphates product lines compared with the prior year, including the effect of price and volume/mix changes:

	Price		Volume/Mix		Total	
Specialty Ingredients	(2.9)%	(3.0)%	(5.9)%
Food & Technical Grade PPA	(3.2)%	9.3	%	6.1	%
STPP & Detergent Grade PPA	(0.7)%	(6.3)%	(7.0)%

Gross Profit

Gross profit represents net sales less cost of goods sold. Gross profit for the year ended December 31, 2015 was \$143.3 million, a decrease of \$44.2 million, or 23.6%, as compared to \$187.5 million for 2014. Gross profit percentage decreased to 18.2% for the year ended December 31, 2015 versus 22.3% for 2014. Gross profit in 2015 was adversely affected by \$21.5 million lower selling prices, \$10.7 million increased cost of goods sold due to changes in fixed costs in inventory, \$7.2 million higher manufacturing costs, \$5.1 million higher raw material costs, mainly PPA and MGA, \$3.4 million increase in inventory reserves, \$3.3 million restructuring and management transition costs recorded in the period, \$2.7 million higher depreciation, \$2.0 million due to a supplier revision of their 2014 costs, \$0.9 million for a GTSP lower of cost or market reserve, and a combined net \$0.9 million increase in planned maintenance outage expense at our Coatzacoalcos, Mexico, Geismar, Louisiana, and Waterway, Illinois manufacturing facilities. These unfavorable effects were partially offset by \$9.0 million favorable exchange rate from Mexican peso and Canadian dollar based costs, and \$3.6 million favorable sales volume effects. Included in 2014 was \$0.9 million for the accrual of Geismar, Louisiana plant contingent liabilities.

Operating Expenses and Research and Development

Operating expenses consist primarily of selling, general and administrative and research and development expenses. Operating expenses for the year ended December 31, 2015 were \$91.8 million, an increase of \$11.1 million, or 13.8%, as compared to \$80.7 million for 2014. The increase was primarily due to \$11.3 million management transition costs and \$5.8 million restructuring costs, partially offset by \$4.6 million lower employee related expenses for short-term incentive and stock compensation, \$1.7 million favorable exchange rate from Mexican peso based costs, and \$0.9 million lower expenses in China.

Operating Income

Operating income for the year ended December 31, 2015 was \$51.5 million, a decrease of \$55.3 million, or 51.8%, as compared to \$106.8 million for 2014. Operating income percentages decreased to 6.5% for 2015 from 12.7% for 2014.

Interest Expense, net

Net interest expense, including deferred financing amortization expense, for the year ended December 31, 2015 was \$7.5 million, an increase of \$3.1 million, or 70.5% as compared to \$4.4 million for 2014. The increase was primarily

due to higher average debt levels, largely driven by the share repurchase program, and a \$1.2 million interest charge in 2015 related to the anticipated filing of amended U.S. federal and state tax returns to claim foreign tax credits.

Page 27 of 84

Table of Contents

Foreign Exchange

Foreign exchange for the year ended December 31, 2015 was a loss of \$3.9 million as compared to a loss of \$5.0 million for 2014. The U.S. Dollar is the functional currency of our Mexican and Canadian operations. The Company has greater foreign denominated asset balances (largely Mexican Peso and Canadian Dollar), such as VAT receivables and prepaid income taxes in foreign jurisdictions, than offsetting foreign denominated liability balances. As the U.S. Dollar strengthened throughout 2015 versus the Mexican Peso and the Canadian Dollar, the remeasurement of the net foreign asset denominated balances contributed to a net foreign exchange loss for 2015. Consequently, foreign exchange gain or loss is recorded on remeasurement of non-U.S. Dollar denominated monetary assets and liabilities. Such gains and losses fluctuate from period to period as the foreign currencies strengthen or weaken against the U.S. Dollar and the amount of non-U.S. Dollar denominated assets and liabilities increases or decreases.

Provision for Income Taxes

The income tax rate was 34% for the year ended December 31, 2015 compared to 34% for 2014. The more significant variances in the effective tax rate include a change in the Mexican de-consolidation deferred tax liability adjustment which increased the tax rate by 3%, additional uncertain tax position reserves which increased the tax rate by 2%, benefits related to the repatriation of foreign earnings which decreased the tax rate by 2% and increased income, including non-taxable interest income, in lower tax rate jurisdictions which decreased the tax rate by 3%.

Net Income

Net income for the year ended December 31, 2015 was \$26.3 million, a decrease of \$38.2 million as compared to \$64.5 million for 2014, due to the factors described above.

Year Ended December 31, 2014 compared to the Year Ended December 31, 2013

Net Sales

Net sales represent the selling price of the products, net of any customer-related rebates, plus freight and any other items invoiced to customers. Net sales for the year ended December 31, 2014 were \$839.2 million, a decrease of \$4.9 million, or 0.6%, as compared to \$844.1 million for 2013. Specialty Phosphates sales were down 2.0% or \$15.6 million with prices lower by 1.6% or \$12.2 million and volumes lower by 0.4% or \$3.4 million. The price decrease was due to increased competition in the Latin American export markets and the increased attractiveness of the U.S. market because of the strong U.S. Dollar which increased Europe and Chinese competition, and was seen across all product lines but most meaningfully on a relative basis in Food & Technical Grade PPA. Volumes were relatively flat for the current period compared to the same period last year on weak market demand, with declines in STPP & Detergent Grade PPA and Food & Technical Grade PPA, primarily the result of second half supply issues in the U.S., being mostly offset by an increase in Specialty Ingredients. GTSP & Other sales were up 15.9% or \$10.6 million with volumes higher by 21.7% or \$14.5 million but prices lower 5.8% or \$3.9 million.

The Company calculates pure selling price dollar variances as the selling price for the current year to date period minus the selling price for the prior year to date period, and then multiplies the resulting selling price difference by the prior year to date period volume. Volume variance is calculated as the total sales variance minus the selling price variance and refers to the revenue effect of changes in tons sold at the relative prices applicable to the variation in tons, otherwise known as volume/mix. The following table illustrates for the year ended December 31, 2014 the percentage changes in net sales by reportable segment compared with the prior year, including the effect of price and volume/mix changes upon revenue:

	Price		Volume/Mix		Total	
Specialty Phosphates US & Canada	(1.3)%	(0.9)%	(2.2)%
Specialty Phosphates Mexico	(2.6)%	1.2	%	(1.4)%
Total Specialty Phosphates	(1.6)%	(0.4)%	(2.0)%
GTSP & Other	(5.8)%	21.7	%	15.9	%
Total	(1.9)%	1.3	%	(0.6)%

Table of Contents

The following table illustrates for the year ended December 31, 2014 the percentage changes for net sales by Specialty Phosphates product lines compared with the prior year, including the effect of price and volume/mix changes:

	Price		Volume/Mix		Total	
Specialty Ingredients	(1.5)%	0.1	%	(1.4)%
Food & Technical Grade PPA	(2.3)%	(1.2)%	(3.5)%
STPP & Detergent Grade PPA	(0.7)%	(3.0)%	(3.7)%

Gross Profit

Gross profit represents net sales less cost of goods sold. Gross profit for the year ended December 31, 2014 was \$187.5 million, an increase of \$29.2 million, or 18.4%, as compared to \$158.3 million for 2013. Gross profit percentage increased to 22.3% for the year ended December 31, 2014 versus 18.8% for 2013. Gross profit in 2014 was favorably affected by \$33.5 million lower raw material costs, primarily phosphate rock, a net \$3.3 million decrease in planned maintenance outage expense mainly at our Coatzacoalcos, Mexico manufacturing facility, \$3.9 million favorable sales volume effects, \$2.5 million favorable exchange rate from Mexican peso and Canadian dollar based costs, and \$0.3 million lower depreciation. These favorable effects were partially offset by \$16.1 million lower selling prices, \$7.1 million higher manufacturing costs, and \$0.9 million for the accrual of Geismar, LA contingent liabilities. Included in 2013 were \$15.4 million in elevated cost of goods sold, of which \$7.9 million related to Mexico manufacturing issues, \$2.4 million related to demurrage on raw material purchases and other inventory related costs, \$2.3 million related to an out of period adjustment on a long term supply agreement, \$2.1 million related to a revision of estimates for phosphate rock inventories in Mexico and \$0.7 million related to acquisition accounting expenses. Also included in 2013 was a benefit of \$7.2 million for settlement of historical water duty claims by the Mexican authorities and expense of \$1.6 million for a lower of cost or market reserve recorded in GTSP.

Operating Expenses and Research and Development

Operating expenses consist primarily of selling, general and administrative and research and development expenses. Operating expenses for the year ended December 31, 2014 were \$80.7 million, an increase of \$6.3 million, or 8.5%, as compared to \$74.4 million for 2013. The increase is due to \$4.7 million higher employee related expenses for short-term incentive and stock compensation, \$1.0 million higher professional service fees, and a \$0.6 million increase in all other costs.

Operating Income

Operating income for the year ended December 31, 2014 was \$106.8 million, an increase of \$22.9 million, or 27.3%, as compared to \$83.9 million for 2013. Operating income percentages increased to 12.7% for 2014 from 9.9% for 2013.

Interest Expense, net

Net interest expense, including deferred financing amortization expense, for the year ended December 31, 2014 was \$4.4 million, unchanged from \$4.4 million for 2013.

Foreign Exchange

Foreign exchange for the year ended December 31, 2014 was a loss of \$5.0 million as compared to a loss of \$3.3 million for 2013. The U.S. Dollar is the functional currency of our Mexican and Canadian operations. The Company has greater foreign denominated asset balances (largely Mexican Peso and Canadian Dollar), such as VAT receivables and prepaid income taxes in foreign jurisdictions, than offsetting foreign denominated liability balances. As the U.S. Dollar strengthened throughout 2014 versus the Mexican Peso and the Canadian Dollar, the remeasurement of the net foreign asset denominated balances contributed to a net foreign exchange loss for 2014. Consequently, foreign exchange gain or loss is recorded on remeasurement of non-U.S. dollar denominated monetary assets and liabilities. Such gains and losses fluctuate from period to period as the foreign currencies strengthen or weaken against the U.S. dollar and the amount of non-U.S. dollar denominated assets and liabilities increases or decreases.

Provision for Income Taxes

The income tax rate was 34% for the year ended December 31, 2014 compared to 35% for 2013. The variance in the effective tax rate is primarily due to increased taxable income in lower tax rate jurisdictions, changes in uncertain income tax position benefits which decreased the effective tax rate by 2% from the prior year and proposed civil

penalties related to environmental matters at our Geismar facility which increased the effective tax rate by 1%.

Page 29 of 84

Table of Contents

Net Income

Net income for the year ended December 31, 2014 was \$64.5 million, an increase of \$15.0 million as compared to \$49.5 million for 2013, due to the factors described above.

Segment Reporting

The Company reports its core Specialty Phosphates business separately from GTSP & Other. Specialty Phosphates consists of three products lines: Specialty Ingredients; Food & Technical Grade PPA; and STPP & Detergent Grade PPA. Innophos Nutrition, Inc. is included in the Specialty Phosphates US & Canada segment and in the Specialty Ingredients product line. GTSP & Other includes fertilizer co-product GTSP and other non-Specialty Phosphate products. The primary performance indicators for the chief operating decision maker are sales and operating income. The following table sets forth the historical results of these indicators by segment for the years ended December 31, 2015, 2014 and 2013:

	2015	2014	2013		
Segment Net Sales					
Specialty Phosphates US & Canada	\$568,332	\$594,446	\$607,578		
Specialty Phosphates Mexico	164,489	167,423	169,851		
Total Specialty Phosphates	732,821	761,869	777,429		
GTSP & Other	56,326	77,317	66,700		
Total	\$789,147	\$839,186	\$844,129

(a) The year ended December 31, 2015 includes a \$11.8 million charge to earnings for management transition expenses and \$8.6 million charge to earnings for restructuring reserves.

(b) The year ended December 31, 2013, includes a \$7.2 million benefit to earnings for the settlement of the Mexican CNA Water Tax Claims and a \$2.3 million charge to earnings for out of period costs in the US.

Table of Contents

Segment Net Sales:

Specialty Phosphates US & Canada net sales decreased 4.4% for the year ended December 31, 2015 when compared with the same period in 2014. Average selling prices decreased by 2.9%, mainly due to increased competitive pressures from European and Chinese competitors following the strengthening of the U.S. dollar in late 2014. Overall volumes decreased 1.5%, with decreases in Specialty Ingredients partially offset by increased Food & Technical Grade PPA volumes which recovered from weak 2014 levels. In 2014, net sales decreased 2.2% for the year ended December 31, 2014 when compared with 2013. Average selling prices decreased by 1.3%, primarily in Food & Technical Grade PPA early in 2014 and Specialty ingredients later in 2014 when the U.S. dollar strengthened considerably against the euro. Volumes decreased 0.9% primarily due to weak demand, second half PPA supply issues that limited availability for Food & Technical Grade PPA sales and some further reformulation in STPP & Detergent Grade PPA. These volume declines were partially offset by increases in Specialty Ingredients volumes due to a strong recovery in the INNOVALT® asphalt business which grew 24% in 2014 compared to 2013.

Specialty Phosphates Mexico net sales decreased 1.8% for the year ended December 31, 2015 when compared with the same period in 2014. Selling prices decreased 2.4%, primarily due to increased Chinese competitive pricing pressures in part due to reductions in governmental export tariffs on solid fertilizers. Overall volumes increased 0.6%, with increases in Food & Technical Grade PPA volumes partially offset by decreases in Specialty Ingredients and STPP & Detergent Grade PPA volumes. In 2014, net sales decreased 1.4% for the year ended December 31, 2014 when compared with 2013. Selling prices decreased 2.6% primarily due to increased competition in the Latin American export markets. Volumes increased 1.2%, primarily in Food & Technical Grade PPA, as a result of improved operations and production output.

GTSP & Other net sales decreased 27.1% for the year ended December 31, 2015 when compared with the same period in 2014. Volumes decreased 26.5% due to very weak market demand, particularly in the fourth quarter 2015, and selling prices decreased 0.6%. In 2014, net sales increased 15.9% for the year ended December 31, 2014 when compared with 2013. Volumes increased 21.7% while selling prices decreased 5.8% due to higher fertilizer market prices in the first half of 2013.

Segment Operating Income Percentage of Net Sales:

The 530 basis point decrease in Specialty Phosphates US & Canada for the year ended December 31, 2015 compared with 2014 was due to lower average selling prices which decreased margins by 260 basis points, increased raw material costs, primarily PPA and MGA, which decreased margins 100 basis points, low production rates in late 2014 that caused higher cost to be recorded in 2015 which decreased margins by 100 basis points, higher inventory reserves which decreased margins by 60 basis points, higher manufacturing cost which decreased margins by 90 basis points, increased cost due to timing on fixed cost in inventory which decreased margins by 50 basis points, and higher depreciation which decreased margins by 40 basis points. This decrease was partially offset by lower operating expenses which increased margins by 100 basis points, higher sales volume/mix which increased margins by 40 basis points, favorable exchange rate effects which increased margins by 20 basis points, and lower turnaround costs which increased margins by 10 basis points. The 120 basis point increase in Specialty Phosphates US & Canada operating income margins for the year ended December 31, 2014 compared with the same period in 2013 is due to decreased raw material costs, primarily PPA and MGA, which increased margins 320 basis points and lower depreciation which increased margins by 40 basis points. This was partially offset by higher manufacturing and operating cost, including currency exchange, which decreased margins by 210 basis points, lower average selling prices which decreased margins by 110 basis points, and higher planned maintenance outage expenses which decreased margins by 10 basis points. Included in 2013 were elevated cost of goods sold for previously noted items which had a favorable effect on 2014 margins of 90 basis points when compared to the prior year period.

The 340 point decrease in Specialty Phosphates Mexico for the year ended December 31, 2015 compared with the same period in 2014 is due to higher manufacturing and operating cost which decreased margins by 400 basis points, lower average selling prices which decreased margins by 200 basis points, higher raw material costs, primarily sulfur, which decreased margins by 110 basis points, higher turnaround costs which decreased margins by 80 basis points, and higher depreciation which decreased margins by 10 basis points. This decrease was partially offset by favorable exchange rate effects which increased margins by 420 basis points and higher sales volume/mix which increased

margins by 40 basis points. The 1,040 basis point increase in Specialty Phosphates Mexico operating income margins for the year ended December 31, 2014 compared with 2013 is due to lower raw material costs such as phosphate rock, which increased margins by 530 basis points, lower planned maintenance outage expenses which increased margins by 180 basis points, lower manufacturing and operating cost, including favorable currency exchange, which increased margins by 240 basis points, and increased sales volume/mix which increased margins by 40 basis points. This increase was partially offset by lower average selling prices which decreased margins by 250 basis points and higher depreciation which decreased margins by 130 basis points. Included in 2013 were elevated cost of goods sold due to manufacturing inefficiencies and maintenance expenses stemming from premature

Page 31 of 84

Table of Contents

equipment failures and a revision of estimates for phosphate rock inventories which had a total favorable impact on 2014 margins of 430 basis points when compared to the prior year period.

The 2,990 basis point decrease in GTSP & Other for the year ended December 31, 2015 compared with the same period in 2014 is due to restructuring/management transition costs recorded in the period which decreased margins by 2,640 basis points, lower sales volume/mix which decreased margins by 730 basis points, increased cost due to changes in inventory which decreased margins by 290 basis points, a lower of cost or market reserve which decreased margins by 120 basis points, higher depreciation which decreased margins by 100 basis points, lower selling prices which decreased margins 60 basis points, and higher turnaround costs which decreased margins by 50 basis points. This decrease was partially offset by lower manufacturing and operating costs which increased margins 580 basis points and favorable exchange rate effect which increased margins by 300 basis points. Included in 2014 was the accrual of Geismar, Louisiana plant contingent liabilities which increased margins by 120 basis points in 2015. The 190 basis point increase in GTSP & Other operating income margins for the year ended December 31, 2014 compared with 2013 is due to lower raw material cost of phosphate rock, which increased margins by 760 basis points, higher sales volume/mix which increased margins by 760 basis points, lower planned maintenance outage expenses which increased margins by 150 basis points, a favorable exchange rate effect which increased margins by 70 basis points, and lower operating expenses which increased margins by 10 basis points. This increase was partially offset by lower selling prices which decreased margins 660 basis points, higher manufacturing costs which lowered margins 320 basis points, the accrual of Geismar, Louisiana contingent liabilities which lowered margins by 130 basis points, and higher depreciation which decreased margins by 10 basis points. Included in 2013 were elevated cost of goods sold due to manufacturing inefficiencies and maintenance expenses stemming from premature equipment failures and a revision of estimates for phosphate rock inventories which had a total favorable impact on 2014 margins when compared to 2013 of 400 basis points and expense for a lower cost or market reserve which had a favorable impact on 2014 margins when compared to 2013 of 240 basis points. Also included in 2013 was a benefit of \$7.2 million due to progress made in reducing the amount required to be paid to settle historical water duty claims by the Mexican authorities which had an unfavorable impact on 2014 margins when compared to 2013 of 1,080 basis points.

Liquidity and Capital Resources

Cash Flow Summary

The following table sets forth a summary of the Company's cash flows for the periods indicated.

(Dollars in millions)	Year Ended December 31,		
	2015	2014	2013
Operating Activities	\$98.9	\$126.8	\$91.7
Investing Activities	(31.7)	(29.4)	(37.8)
Financing Activities	(86.0)	(94.0)	(47.5)
Effect of foreign exchange rate changes	0.5	0.1	(0.4)

Year Ended December 31, 2015 compared to the Year Ended December 31, 2014

Net cash provided by operating activities was \$98.9 million for the year ended December 31, 2015 as compared to \$126.8 million for 2014, a decrease of \$27.9 million. The decrease in operating activities cash resulted from unfavorable changes of \$38.1 million in net income as described earlier and \$33.0 million in non-cash adjustments to income, primarily due to a change in deferred income tax provision for timing differences for immediate recognition of revenue for U.S. income tax purposes versus deferred revenue for U.S. GAAP purposes of \$27.7 million, partially offset by favorable changes of \$36.6 million in working capital, primarily due to increased current income taxes of \$22.3 million, and \$6.6 million in other long term assets and liabilities.

The favorable change in working capital is derived from it being a source of cash of \$57.6 million in 2015 compared to a source in 2014 of \$21.0 million, an increase in cash of \$36.6 million. The favorable change in working capital was due to favorable changes in other current liabilities of \$27.7 million, primarily driven by a change in current income taxes payable in the U.S. of \$27.7 million for the immediate recognition of income for U.S. income tax

purposes, inventory of \$15.1 million, due to increases in inventory reserves and lower PPA on hand for year-end 2015, accounts receivable of \$12.9 million, and other current assets of \$11.5 million as a result of VAT collections and reduction in prepaid income taxes in Mexico, partially offset by an unfavorable change in accounts payable of \$30.6 million due to larger than usual vendor payables at year end 2014 which were paid in the first quarter of 2015. Accounts receivable as a percent of quarterly sales,

Page 32 of 84

Table of Contents

when adjusted for GTSP open accounts receivable of \$0.3 million, \$0.9 million, \$0.9 million, \$0.8 million, and \$0.9 million as of December 31 2015, September 30, 2015, June 30, 2015, March 31, 2015, and December 31, 2014, respectively, was consistent with the last four quarters' average.

Total inventories as of December 31, 2015 decreased \$12.0 million from December 31, 2014 levels resulting in days of inventory on hand decreasing to 98 days as of December 31, 2015. The following chart shows its historical performance:

	2015	2014	2013
Inventory Days on Hand	98	103	96

Net cash used for investing activities was \$31.7 million for the year ended December 31, 2015, compared to \$29.4 million for 2014, an increase in spending of \$2.3 million.

Approximately 75% of the 2015 capital spending was for plant maintenance projects and the remaining 25% was for strategic growth initiatives. The majority of the strategic growth investments were focused on improving the capacity and capability of our Coatzacoalcos, Mexico facility and automating packaging at our Port Maitland, Canada facility. Net cash from financing activities for the year ended December 31, 2015, was a use of \$86.0 million, compared to a use of \$94.0 million in 2014, an increase in cash of \$8.0 million. This increase in cash was largely due to \$150.0 million increased loan borrowings partially offset by \$46.0 million increased loan repayments and \$95.7 million increased stock repurchases. The loan borrowings were largely used to fund the share repurchases.

Year Ended December 31, 2014 compared to the Year Ended December 31, 2013

Net cash provided by operating activities was \$126.8 million for the year ended December 31, 2014 as compared to \$91.7 million for 2013, an increase of \$35.1 million. The increase in operating activities cash resulted primarily from favorable changes of \$15.0 million in net income as described earlier, \$16.0 million from reduced working capital, \$1.7 million in other long term assets and liabilities and \$2.4 million in non-cash adjustments to income.

The favorable change in working capital is derived from it being a source of cash of \$21.0 million in 2014 compared to a source in 2013 of \$5.0 million, an increase in cash of \$16.0 million. Favorable changes in other current liabilities of \$11.8 million, of which \$6.3 million related to a 2013 reduction in the CNA water tax claim payable, \$15.3 million in inventory, primarily due to a significant build in 2013 inventory levels, and \$11.9 million in accounts payable were partially offset by unfavorable changes of \$15.0 million in other current assets, mainly due to refunds of value added tax last year by our Mexican subsidiaries, and \$8.0 million in accounts receivable. Accounts receivable as a percent of quarterly sales, when adjusted for GTSP open accounts receivable of \$0.9 million, \$2.2 million, \$11.0 million, \$0.2 million, and \$1.3 million as of December 31, 2014, September 30, 2014, June 30, 2014, March 31, 2014, and December 31, 2013, respectively, was consistent with the last four quarters' average.

Total inventories as of December 31, 2014 increased \$3.2 million from December 31, 2013 levels resulting in days of inventory on hand increasing to 103 days as of December 31, 2014. The following chart shows its historical performance:

	2014	2013	2012
Inventory Days on Hand	103	96	86

Net cash used for investing activities was \$29.4 million for the year ended December 31, 2014, compared to \$37.8 million for 2013, a decrease in spending of \$8.4 million. The change is mainly due to \$9.4 million lower capital spending at our Coatzacoalcos, Mexico manufacturing facility as we were making substantial investments in 2013 to improve the reliability of that operation after suffering from premature equipment failures during the first half of 2013, and \$4.4 million due to the acquisition of CMI in 2013. This was partially offset by \$2.9 million increased capital spending at our Nashville, TN facility and \$2.4 million for the migration of the Nutrition businesses acquired since November 2011 onto our IT systems.

Approximately 70% of the 2014 capital spending was for maintenance and the remaining 30% was for strategic growth initiatives. The majority of the strategic growth investments were focused on capacity expansions at Nashville, as well as on improving capabilities, yields and capacity at Coatzacoalcos.

Page 33 of 84

Table of Contents

Net cash from financing activities for the year ended December 31, 2014, was a use of \$94.0 million, compared to a use of \$47.5 million in 2013, an increase in the use of cash of \$46.5 million. This was largely due to \$54.0 million decreased loan borrowings, \$22.5 million increased stock repurchases, \$6.5 million higher dividend payments, \$1.8 million lower excess tax benefits from the exercise of stock options, and \$1.5 million lower stock option exercises partially offset by \$40.0 million decreased loan repayments.

Liquidity

Indebtedness

Total debt was \$213.0 million as of December 31, 2015. Short term and long term debt net of cash was \$195.1 million as of December 31, 2015, an increase of \$95.3 million, or 95.5% from the December 31, 2014 level.

In August, 2010, Innophos entered into a Credit Agreement, as amended and restated, the Credit Agreement, with a group of lenders, or the Lenders. This agreement was amended and restated on December 21, 2012 increasing the Company's borrowing capacity, reducing interest rates and extending the maturity to December 21, 2017. The Credit Agreement provides Innophos with a term loan of \$100.0 million and a revolving line of credit from the Lenders of up to \$225.0 million, including a \$20.0 million letter of credit sub-facility, all maturing on December 21, 2017.

Prepayments of the term loan are required at the rate of 1% of original principal amount per quarter beginning on March 31, 2013. Refer to Note 9 of Notes to Consolidated Financial Statements in "Item 8. Financial Statements and Supplementary Data".

Simultaneously with updating the credit facility, Innophos entered into an interest rate swap with a swap start date of December 31, 2012, swapping the LIBOR exposure on \$100.0 million of floating rate debt under the credit facility to a fixed rate to maturity obligation of 0.9475% plus the applicable margin on the debt expiring on December 21, 2017. The fair value of this interest rate swap is an asset of approximately \$0.1 million as of December 31, 2015.

In 2014, Innophos amended its existing Credit Agreement to remove restricted payments from the definition of the fixed charge coverage ratio. In 2015, Innophos again amended the Credit Agreement removing the senior leverage ratio. The two amendments provided enhanced capacity for higher levels of share buybacks expected under the \$125 million share repurchase program for 2015.

Although it had no outstanding debt for the applicable period except attributable to its senior bank credit facilities, Innophos and its subsidiaries and affiliates may from time to time seek to acquire or otherwise retire outstanding debt through public or privately negotiated transactions, exchanges or otherwise. Debt repurchases or exchanges, if any, will depend on prevailing market conditions, Company liquidity requirements, restrictive financial covenants and other factors applicable at the time. The amounts involved may be material.

Capital Expenditures

Capital expenditures were \$32 million for 2015. Approximately 75% of the full year spending was for maintenance and the remaining 25% was for strategic growth initiatives. The majority of the strategic growth investments were focused on automating packaging at Pt. Maitland, increasing capacity at Nashville and improving capabilities at Coatzacoalcos. Management expects 2016 capital expenditures to approximate \$40 million due to additional requirements to support the manufacturing portion of the restructuring program and continued investment in the capability of Coatzacoalcos.

Other Liquidity Matters

As indicated elsewhere, the Company increased the quarterly dividend on its common stock to an annual rate of \$1.92 per share starting with the third quarter 2014 payment. That policy may change and is subject to numerous conditions and variables. See the section entitled "Dividends" in Item 5 of this Form 10-K and "Risk Factors - Certain Financial Risks - Credit Facility Risks - Our credit facility restricts our current and future operations."

On December 31, 2015, the Company had cash and cash equivalents outside the United States of \$16.4 million, or 92% of the Company's balance. The foreign cash amounts are not restricted by law to be used in other countries. In connection with a review of the Company's overall cash position and anticipated cash needs, during the fourth quarter of 2015, we made a \$266 million distribution of certain foreign earnings in the form of an intercompany note. This distribution resulted in an overall net tax benefit of approximately \$0.6 million. The benefit is primarily due to the recognition of foreign tax credits in the United States which exceeded the taxes due on the distribution of foreign

earnings. Our current operating plan does not include any other repatriation of any additional cash and cash equivalents held outside the United States to fund the United States operations. However, in the event we do repatriate cash and cash equivalents held outside of the

Page 34 of 84

Table of Contents

United States in addition to the \$266 million, we may be required to accrue and pay United States taxes to repatriate these funds.

The Company's available financial resources allow for the continuation of dividend payments, pursuit of acquisition projects and further geographic expansion initiatives. We further believe that on-hand cash combined with cash generated from operations, including our Mexican operations, and availability under our revolving line of credit, will be sufficient to meet our obligations such as debt service, tax payments, capital expenditures and working capital requirements for at least the next twelve months. We expect to fund all these obligations through our existing cash and our future operating cash flows. However, future operating performance for the Company is subject to prevailing economic and competitive conditions and various other factors that are uncertain. If the cash flows and other capital resources available to the Company, such as its revolving loan facility, are insufficient to fund our debt and other liquidity needs, the Company may have to take alternative actions that differ from current operating plans.

Given the 2015 margin compression that the Company is experiencing, management evaluated several initiatives to improve the overall operating efficiency of the organization. As a result of this evaluation which was conducted during the third quarter of 2015, the Company launched an initiative to reduce its cost structure by implementing various staff reduction actions. In addition, during the fourth quarter of 2015, the Company experienced a management transition of certain high-level positions, most notably the Chief Executive Officer and the Chief Financial Officer.

The Company has incurred costs associated with involuntary termination benefits associated with its corporate-related initiatives, as well as the management transition. During the third and fourth quarters of 2015, the Company incurred restructuring and management transition costs of \$8.6 million and \$11.8 million, respectively. The amounts recorded within selling, general and administrative expenses in the statements of operations were \$17.1 million and cost of goods sold were \$3.3 million. The Company expects to make \$9.3 million of payments associated with these actions within the next twelve months.

Off-Balance Sheet Arrangements

We do not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as "structured finance or special purpose entities", which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

Contractual Obligations and Commercial Commitments

The following table sets forth our long-term contractual cash obligations as of December 31, 2015 (dollars in thousands):

Contractual Obligations	Years ending December 31,						
	Total	2016	2017	2018	2019	2020	Thereafter
Term loan and revolver borrowings (1)	\$213,000	\$4,000	\$209,000	\$—	\$—	\$—	\$—
Future Service Pension Benefits	10,973	763	855	976	1,042	1,098	6,239
Other (2)	208,919	92,373	58,273	58,273	—	—	—
Operating Leases	27,222	5,475	4,624	3,920	3,400	2,464	7,339
Total contractual cash obligations	\$460,114	\$102,611	\$272,752	\$63,169	\$4,442	\$3,562	\$13,578

(1) Amounts exclude interest payments. Interest on the \$213.0 million current balance of the term loan and revolver borrowings at current rates would be approximately \$5.6 million annually.

(2) Represents minimum annual purchase commitments to buy raw materials from suppliers.

Table of Contents

Critical Accounting Estimates and Policies

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with United States generally accepted accounting principles. The preparation of our financial statements requires us to make estimates, assumptions and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosures. On an ongoing basis, we evaluate our estimates, including those related to allowance for bad debts, distributor incentives and rebates, the recoverability of long-lived assets, including amortizable intangible assets, goodwill, depreciation and amortization periods, income taxes and commitments and contingencies. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. We believe that the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements.

Claims and Legal Proceedings

The categories of asserted or unasserted claims for which the Company has estimated a probable liability and for which amounts are estimable are critical accounting estimates. Please refer to Part I, Item 3. "Legal Proceedings" and the section entitled "Commitments and Contingencies" in Note 16 of Notes to Consolidated Financial Statements in "Part II, Item 8. Financial Statements and Supplementary Data" for additional information about such estimates.

Deferred Taxes

Deferred taxes are accounted for by recognizing deferred tax assets and liabilities for the expected future tax consequences of events that have been recognized in the financial statements. Accordingly, deferred tax assets and liabilities are determined based on the differences between the financial statement and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse.

Deferred tax assets are assessed for recoverability and a valuation allowance is considered necessary if it is more likely than not that some portion or all of the net deferred tax assets will not be realized. We continue to analyze our current and future profitability and probability of the realization of our net deferred tax assets in future periods. Please refer to the section entitled "Income Taxes" (contained in Note 15) of Notes to Consolidated Financial Statements in "Part II, Item 8. Financial Statements and Supplementary Data" for additional information regarding deferred taxes.

Goodwill

Goodwill represents the excess of the acquisition cost over the fair value of net assets of the businesses acquired. Accounting Standards Codification (ASC) 350, "Intangibles-Goodwill and Other," requires periodic tests of the impairment of goodwill. ASC 350 requires a comparison, at least annually, of the net book value of the assets and liabilities associated with a reporting unit, including goodwill, with the fair value of the reporting unit, which corresponds to the discounted cash flows of the reporting unit, in the absence of an active market. When this comparison indicates that impairment must be recorded, the impairment recognized is the amount by which the carrying amount of the assets exceeds the fair value of these assets. The annual goodwill impairment review is conducted during the fourth quarter of each year. Fair values for goodwill testing are estimated using a discounted cash flow approach. Significant estimates in the discounted cash flow approach include the cash flow forecasts for each of our reporting units, the discount rate and the terminal value. The five year cash flow forecasts of the Company's reporting units is based upon management's estimate at the date of the assessment, which incorporates managements long-term view of selling prices, sales volumes for Innophos' products, key raw materials and energy costs, and our operating cost structure. The aggregated fair value of our reporting units was reconciled to our market capitalization at the date of the assessment, plus a suitable control premium. The terminal value was determined by applying business growth factors for each reporting unit which are in-line with longer term historical growth rates, to the latest year for which a forecast exists.

Our market capitalization during fourth quarter of 2015 exceeded the book value of our equity.

Our reporting units for goodwill purposes are Specialty Phosphates United States, Specialty Phosphates Canada, Specialty Phosphates Mexico, Innophos Nutrition and GTSP & Other. As of December 31, 2015, the fair values of our

reporting units, excluding GTSP & Other, were substantially greater than their carrying values.

Page 36 of 84

Table of Contents

Solely for the purpose of goodwill valuation for our GTSP & Other reporting unit, the 2015 goodwill impairment analysis considered selling price estimates consistent with the 2014 and 2015 pricing levels. Projected GTSP volumes are consistent with historical levels for goodwill impairment testing analysis. We further applied minimum growth rates to calculate the terminal value for the GTSP & Other reporting unit. We used an 11.25% discount rate, which is above our weighted average cost of capital and which includes a country risk premium. Based on this valuation, we determined that the fair value of the GTSP & Other reporting unit exceeded its carrying values by approximately 15%. However, if GTSP market softness continues as we have experienced late in the fourth quarter of 2015 and early first quarter of 2016, and if GTSP pricing does not return to historical levels, this reporting unit may incur a goodwill impairment charge in the future. As of December 31, 2015, the GTSP & Other reporting unit has an allocated goodwill value of \$3.3 million. In addition, if we were to decrease the long-term growth rate by 1% or increase the discount rate used in the calculation by 2%, assuming all other variables constant, there would be a goodwill impairment for the GTSP & Other reporting unit.

Long-lived assets

Under ASC 360, "Property, Plant, and Equipment," long-lived assets including property, plant and equipment and amortized intangible assets are evaluated and reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset or asset group may not be recoverable. The review of these long-lived assets is performed at the individual asset level, asset group level, or the product group level depending on the lowest level for which identifiable cash flows are largely independent. The Company's asset groupings or product groupings vary based on the interrelationship of the long-lived assets and the identifiable cash flows. For example, in certain instances, multiple manufacturing units may work with one another to produce the lowest identifiable cash flows or in other instances a stand-alone unit may produce the lowest level of identifiable cash flows. There are other instances where a stand-alone unit may produce multiple products and the lowest level of identifiable cash flows is at the product group level. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of the assets to the undiscounted future cash flows expected to be generated by the asset, asset group or product group. When this comparison indicates that impairment must be recorded, the impairment recognized is the amount by which the carrying amount of the assets exceeds the fair value of the assets.

The determination of whether or not assets are impaired and the corresponding useful lives of these long-lived assets requires significant judgment. The development of future cash flow projections requires management estimates related to forecasted sales and expected costs trends. To the extent that changes in business conditions occur or other management decisions are made that result in adjusted management projections or alternative use of the assets, impairment losses or accelerated depreciation may occur in future periods.

Stock-Based Compensation Expense

Our compensation programs can include share-based payments. The primary share-based awards and their general terms and conditions currently in effect are as follows:

Stock options, which entitle the holder to purchase, after the end of a vesting term, a specified number of shares of Innophos common stock at an exercise price per share set equal to the market price of Innophos common stock on the date of grant.

- Restricted stock grants, which entitle the holder to receive, at the end of each vesting term, a specified number of shares of Innophos common stock, and which also entitle the holder to receive dividends paid on such grants throughout the vesting period.

Performance share awards which entitle the holder to receive, at the end of a performance cycle, a number of shares of Innophos common stock, within a range of shares from zero to a specified maximum (generally 200%), calculated using a combination of performance indicators as defined solely by reference to the Company's own activities. Amounts equivalent to dividends will accrue over the performance period and are paid on performance share awards when vested and distributed.

Annual stock retainer grants, which entitle independent members of the Board of Directors to receive a number of shares of the Company's common stock equal to a fixed retainer value.

Table of Contents

The fair value of the options granted during 2015, 2014 and 2013 was determined using the Black-Scholes option-pricing model. The assumptions used in the Black-Scholes option-pricing model were as follows:

	Year Ended December 31, 2015	Year Ended December 31, 2014	Year Ended December 31, 2013	
Non-qualified stock options				
Expected volatility	40.8	% 50.1	% 50.4	%
Dividend yield	4.3	% 3.2	% 2.8	%
Risk-free interest rate	1.7	% 2.0	% 1.0	%
Expected term	6 years	6 years	6 years	
Weighted average grant date fair value of stock options	12.14	\$20.15	\$19.99	

The expected volatility and the expected term are based on the Company's historical data. The dividend yield is the expected annual dividend payments divided by the average stock price up to the date of grant. The risk-free interest rates are derived from the U.S. Treasury securities in effect on the date of grant whose maturity period equals the options expected term. The Company applies an expected forfeiture rate to stock-based compensation expense. The estimate of the forfeiture rate is based primarily upon historical experience of employee turnover. As actual forfeitures become known, stock-based compensation expense is adjusted accordingly.

Pension and Post-Retirement Costs / Post-Employment Plan

The Company maintains both defined contribution plans and noncontributory defined benefit pension plans that together cover all U.S. and Canadian employees.

In the United States, salaried and hourly employees are covered by a defined contribution plan with a 401(k) feature.

The plan provides for employee contributions, company matching contributions, and an age-weighted annual company contribution to eligible employees. Union-represented hourly employees at our Nashville site are covered by a traditional defined benefit plan providing benefits based on years of service and final average pay whose benefit accruals were frozen as of August 1, 2007, after which the Nashville union employees began participating in the Company's existing noncontributory defined contribution benefit plan. All plans were established by Innophos in 2004.

In Canada, salaried employees are covered by defined contribution plans which provide for company contributions as a percent of pay, employee contributions, and company matching contributions. Union-represented hourly employees are covered by a defined benefit plan providing benefits based on a negotiated benefit level and years of service.

Our pension and postretirement benefit costs are developed from actuarial valuations. Inherent in these valuations are key assumptions, including the discount rate and the expected long-term rate on plan assets. These assumptions require significant judgment and material changes in our pension and postretirement benefit costs may occur in the future due to changes in these assumptions, changes in levels of benefits provided, and changes in asset levels. Such assumptions are based on benchmarks obtained from third party sources.

As a sensitivity measure, the effect of a 25 basis-point decrease in our discount rate assumption would increase our net periodic benefit cost for our pension and post-retirement plans by approximately \$73 thousand. A 1% decrease in our expected rate of return on plan assets would increase our pension plan expense by \$155 thousand.

Recently Issued Accounting Standards

New accounting standards effective in 2015 are described in the Recent Accounting Pronouncements section in Note 1 of Notes to Consolidated Financial Statements in "Part II, Item 8. Financial Statements and Supplementary Data."

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to certain market risks as part of our ongoing business operations. Primary exposures include changes in interest rates, as borrowings under our Credit Agreement will bear interest at floating rates based on LIBOR plus an applicable borrowing margin. We manage our interest rate risk by balancing the amount of fixed-rate and floating-rate debt to the extent practicable consistent with our credit status. For fixed-rate debt, interest rate changes do not affect earnings or cash flows. Conversely, for floating-rate debt, interest rate changes generally affect our earnings and cash flows, assuming other factors are held constant.

At December 31, 2015, we had \$88.0 million principal amount of term loan debt and a \$225.0 million revolving credit facility, of which \$125.0 million was outstanding, both of which approximate fair value (determined using level 2 inputs within

Page 38 of 84

Table of Contents

the fair value hierarchy), under the credit facility established by our Credit Agreement. Total remaining availability was \$99.1 million, taking into account \$0.9 million in face amount of letters of credit issued under the sub-facility. Simultaneously with updating the credit facility in December of 2012, we entered into an interest rate swap, swapping the LIBOR exposure on \$100 million of floating rate debt under the credit facility to a fixed rate to maturity obligation of 0.9475% expiring in December 2017. The fair value of this interest rate swap is an asset of approximately \$0.1 million as of December 31, 2015.

Changes in economic conditions could result in higher interest rates, thereby increasing our interest expense on our revolving line of credit. Changes in economic conditions may also result in lower operating income, reducing our funds available for capital investment, operations or other purposes. In addition, a substantial portion of our cash flow has been used to service debt and fund working capital needs, which may affect our ability to make future acquisitions or capital expenditures. We may from time to time use interest rate protection agreements to minimize our exposure to interest rate fluctuation. Regardless of hedges, we may experience economic loss and a negative impact on earnings or net assets as a result of interest rate fluctuations. Based on \$113.0 million outstanding borrowings as floating rate debt (not included in the swap) under our credit facility, an immediate increase of one percentage point would cause an increase to interest expense of approximately \$1.1 million per year.

From time to time, we will enter into longer term natural gas and electricity supply contracts in an effort to eliminate some of the volatility in our energy costs. We did not enter into any economic hedges in the past three years.

We do not currently, but may from time to time, hedge our currency rate risks.

We believe that our concentration of credit risk related to trade accounts receivable is limited since these receivables are spread among a number of customers and are geographically dispersed. No customer accounted for more than 10% of our sales in the last 3 years.

Foreign Currency Exchange Rates

The U.S. Dollar is the functional currency of the Canadian and Mexican operations. Accordingly, these operations' monetary assets and liabilities are remeasured at current exchange rates, non-monetary assets and liabilities are remeasured at historical exchange rates, and revenue and expenses are remeasured at average exchange rates and at historical exchange rates for the related revenue and expenses of non-monetary assets and liabilities. All transaction gains and losses are included in net income.

Our principal source of exchange rate exposure in our foreign operations consists of expenses, such as labor expenses, which are denominated in the foreign currency of the country in which we operate. A decline in the value of the U.S. Dollar relative to the local currency would generally cause our operational expenses (particularly labor costs) to increase (conversely, a decline in the value of the foreign currency relative to the U.S. Dollar would cause these expenses to decrease). We believe that normal exchange rate fluctuations consistent with recent historical trends would have a modest impact on our expenses, and would not materially affect our financial condition or results of operations. Nearly all of our sales are denominated in U.S. Dollars and our exchange rate exposure in terms of sales revenues is minimal.

Inflation and changing prices

Our costs and expenses will be subject to inflation and price fluctuations. Significant price fluctuations in raw materials, freight, and energy costs, if not compensated for by cost savings from production efficiencies or price increases passed on to customers could have a material effect on our financial condition and results of operations. Refer to "Part I, Item 1A. Risk Factors" contained in this Annual Report on Form 10-K for further information on raw materials availability and pricing.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Innophos Holdings, Inc:

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of comprehensive income, of stockholders' equity and of cash flows present fairly, in all material respects, the financial position of Innophos Holdings, Inc. and its subsidiaries at December 31, 2015 and 2014, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2015 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2015, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As discussed in Note 1 to the consolidated financial statements, the Company changed the manner in which it classifies deferred taxes in 2015.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

(Dollars in thousands, except per share amounts, the number of shares or where otherwise noted)

1. Basis of Statement Presentation:

Summary of Significant Accounting Policies

Fiscal Year

Our fiscal year end is December 31.

Description of Business and Principles of Consolidation

Innophos is a leading international producer of performance-critical and nutritional specialty ingredients with applications in food, beverage, dietary supplements, pharmaceutical, oral care and industrial end markets. Innophos combines more than a century of experience in specialty phosphate manufacturing with a growing capability in a broad range of other specialty ingredients to supply a product range produced to stringent regulatory manufacturing standards and the quality demanded by customers worldwide. Many of Innophos' products are application-specific compounds engineered to meet customer performance requirements and are often critical to the taste, texture, performance or nutritional content of foods, beverages, pharmaceuticals, oral care products and other applications. For example, Innophos products act as flavor enhancers in beverages, electrolytes in sports drinks, texture additives in cheeses, leavening agents in baked goods, pharmaceutical excipients and cleaning agents in toothpaste, and they also provide a wide range of nutritional fortification solutions for food, beverage and nutritional supplement manufacturers.

Innophos commenced operations as an independent company in August 2004 after purchasing its North American specialty phosphates business from affiliates of Rhodia, S.A., or Rhodia, which has been a part of Solvay S.A. since 2011. In November 2006, Innophos completed an initial public offering and listed its common stock for trading on the Nasdaq Global Select Market under the symbol "IPHS".

Innophos' more recent acquisitions, described below, have focused on the bioactive mineral and nutritional ingredients sector. Bioactive mineral ingredients are mineral based ingredients for food, beverage and dietary supplement end markets that are manufactured to be readily digestible. Historically, Innophos has enjoyed a strong position in "macronutrients," such as calcium, magnesium and potassium that are required in relatively large amounts for a balanced diet. Through its more recent acquisitions, Innophos now also has a strong position in "micronutrients" such as chromium, selenium, zinc and iron, small quantities of which are also essential to the human diet. One of Innophos' recent acquisitions described below was in the botanical and enzyme based specialty nutritional ingredients sector. As with the bioactive mineral ingredients, botanical and enzyme based specialty nutritional ingredients are important to Innophos' customers for their nutritional value, and mineral, botanical and specialty phosphate ingredients are often formulated together. This acquisition, together with Innophos' existing strength in specialty phosphates, has created a strong position for Innophos in the attractive and high growth specialty nutritional ingredients market.

In October 2011, Innophos acquired 100% of the stock of KI Acquisition, Inc., the holding company of Kelatron Corporation, or Kelatron. Founded in 1975 and based in Ogden, Utah, Kelatron is a leading producer of technically advanced bioactive mineral ingredients, with a high quality base of customers in the supplement and sports nutrition markets. Bioactive mineral ingredients are manufactured to enhance the digestive system's ability to absorb these essential minerals.

In July 2012, Innophos acquired 100% of the equity of AMT Labs, Inc., or AMT, and an affiliated real estate company holding all AMT real property. Located in North Salt Lake, Utah, AMT has been manufacturing bioactive mineral ingredients for the food, beverage, confectionary and dietary supplement industries for more than 20 years. In December 2012, Innophos purchased all of Triarco Industries, Inc., or "Tiarco". Tiarco, a privately held company based in New Jersey, has been manufacturing high quality custom ingredients for the food, beverage, dietary supplement and nutraceutical industries for more than 30 years. Tiarco specializes in botanical and enzyme based ingredients that provide important nutritional benefits and are often formulated with bioactive minerals and specialty phosphates.

•

In October 2013, Innophos purchased all of the assets of Chelated Minerals International, Inc., or CMI. CMI, a privately held company based in Salt Lake City, Utah, has significant know-how in the manufacture and science of chelated minerals supplied to the human nutrition market.

On December 31, 2014, AMT, Triarco and CMI were merged into Kelatron, which is now operating under the name Innophos Nutrition, Inc.

INNOPHOS HOLDINGS, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Dollars in thousands, except per share amounts, share amounts or where otherwise noted)

Innophos Holdings, Inc. is the parent of Innophos Investments Holdings, Inc., which owns 100% of Innophos, Inc; all are incorporated under the laws of the State of Delaware. All intercompany transactions are eliminated in consolidation.

Out of Period Adjustments

During the first quarter of fiscal 2013, we identified an adjustment necessary for a long-term supply contract. We corrected this item during the first quarter of fiscal 2013, which had the effect of increasing cost of goods sold by \$2.3 million, and decreasing net income by \$1.6 million.

These prior period adjustments are not material to the financial results of the previously issued annual financial statements or the current financial statements.

Certain prior year balances have been reclassified to conform to current year presentation.

Use of Estimates

The preparation of financial statements in conformity with United States generally accepted accounting principles requires the use of judgments and estimates made by management. Actual results could differ from those estimates. Some of the more significant estimates pertaining to the Company include accruals for contingencies, distributor incentives and rebates, the valuation of inventories, the allowance for doubtful accounts, income tax valuation allowances, the recoverability of long-lived assets and goodwill impairment testing analysis and cash flows and assumptions used in the recognition and measurement of assets acquired in business combinations. Management routinely reviews its estimates and assumptions utilizing currently available information, changes in facts and circumstances, and historical experience.

Cash Equivalents

All highly liquid investments with original maturities of three months or less are considered to be cash equivalents.

Accounts Receivable and Allowances for Doubtful Accounts

Trade accounts receivable are recorded at the invoiced amount and does not bear interest. The collectability of accounts receivable is evaluated based on a combination of factors. Allowances for doubtful accounts are recorded based on the length of time the receivables are past due and historical experience. In circumstances when it is probable that a specific customer is unable to meet its financial obligations, an allowance is recorded against amounts due to reduce the receivable to the amount that is reasonably expected to be collected.

Inventories

Inventories are valued at the lower of cost or market. Cost is determined on the basis of the first-in, first-out method. These costs include raw materials, direct labor, manufacturing overhead and depreciation. Spare parts are included in inventory and are initially recorded at cost.

Inventories, including spare parts, are evaluated for excess quantities, obsolescence or shelf-life expiration. This evaluation includes an analysis of historical sales levels by product and projections of future demand. To the extent management determines there are excess, obsolete or expired inventory quantities, valuation reserves are recorded against all or a portion of the value of the related products with the appropriate charge to cost of goods sold.

Property, Plant and Equipment

Property, plant and equipment are stated at cost less accumulated depreciation. Major renewals and improvements are capitalized. Maintenance, repairs and minor renewals are expensed as incurred. The cost and related accumulated depreciation of all property, plant and equipment retired or otherwise disposed of are eliminated from the accounts and any resulting gain or loss is reflected in net income. Interest is capitalized in connection with the construction of major renewals and improvements. Capitalized interest is recorded as part of the asset to which it relates and is amortized over the asset's estimated useful life. Depreciation is calculated on the straight-line basis over the estimated useful lives of the related assets, typically ranging from ten to forty years for buildings and improvements, three to twenty years for machinery and equipment, and three to seven years for capitalized software. Leasehold improvements are amortized over the lease term or the estimated useful life of the improvement, whichever is less.

Table of Contents

INNPHOS HOLDINGS, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Dollars in thousands, except per share amounts, share amounts or where otherwise noted)

External direct costs in developing or obtaining internal use computer software and payroll, and payroll-related costs for employees dedicated solely to the project, to the extent of the time spent directly on the project and which they meet the requirements of ASC 350-40, are capitalized.

Long-Lived Assets

Under ASC 360, "Property, Plant, and Equipment," long-lived assets including property, plant and equipment and amortizable intangible assets are evaluated and reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset or asset group may not be recoverable. The review of these long-lived assets is performed at the individual asset level, asset group level, or the product group level depending on the lowest level for which identifiable cash flows are largely independent. The Company's asset groupings or product groupings vary based on the interrelationship of the long-lived assets and the identifiable cash flows. For example, in certain instances, multiple manufacturing units may work with one another to produce the lowest identifiable cash flows or in other instances a stand-alone unit may produce the lowest level of identifiable cash flows. There are other instances where a stand-alone unit may produce multiple products and the lowest level of identifiable cash flows is at the product group level. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of the assets to the undiscounted future cash flows expected to be generated by the asset, asset group or product group. When this comparison indicates that impairment must be recorded, the impairment recognized is the amount by which the carrying amount of the assets exceeds the fair value of the assets.

The determination of whether or not assets are impaired and the corresponding useful lives of these long-lived assets requires significant judgment. The development of future cash flow projections requires management estimates related to forecasted sales and expected costs trends. To the extent that changes in business conditions occur or other management decisions are made that result in adjusted management projections or alternative use of the assets, impairment losses or accelerated depreciation may occur in future periods.

Goodwill

Goodwill represents the excess of the acquisition cost over the fair value of net assets of the businesses acquired. ASC 350, "Intangibles—Goodwill and Other," requires periodic tests of the impairment of goodwill. ASC 350 requires a comparison, at least annually, of the net book value of the assets and liabilities associated with a reporting unit, including goodwill, with the fair value of the reporting unit, which corresponds to the discounted cash flows of the reporting unit, in the absence of an active market. If the entity determines that it's more likely than not that the fair value of a reporting unit exceeds the carrying amount, then performing the traditional two-step impairment test is unnecessary. If a company determines otherwise, then it is required to perform the first step of the two-step impairment test. When this comparison indicates that impairment must be recorded, the impairment recognized is the amount by which the carrying amount of the assets exceeds the fair value of these assets. The annual goodwill impairment review is conducted during the fourth quarter of each year.

Other Intangible Assets

Other intangible assets, which consist of developed technology, customer relationships, trade names, a non-compete agreement, patents, licenses and software, are amortized on a straight-line basis over their estimated useful lives which can be up to twenty years.

Revenue Recognition

Revenue from sales of our products to our customers is recognized when title and risk of loss passes to the customer, which occurs either upon shipment or delivery, depending upon the agreed sales terms with customers. In the United States and Canada, the Company records estimated reductions to revenue for distributor incentives and customer incentives such as rebates, at the time of the initial sale. Distributor and customer incentives in Mexico are immaterial to the financial statements. The estimated reductions are based on the sales terms, historical experience and trend analysis. Accruals for distributor incentives are reflected as a direct reduction to accounts receivable and accruals for rebates are recorded as accrued expenses. This analysis requires a significant amount of judgment from management. Changes in the assumptions used to calculate these estimates or changes resulting from actual results are recorded

against revenue in the period in which the change occurs.

Shipping and Handling Fees and Costs and Advertising Expenses

Shipping and handling fees and costs invoiced to customers are included in Net sales. Shipping and handling fees and costs incurred by the Company are included in Cost of goods sold. Advertising expenses, which are not significant, are expensed as incurred.

Page 48 of 84

Table of Contents

INNOPHOS HOLDINGS, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Dollars in thousands, except per share amounts, share amounts or where otherwise noted)

Foreign Currency Translation

The U.S. dollar is the functional currency of the Canadian and Mexican operations. Accordingly, these operations monetary assets and liabilities are remeasured at current exchange rates, non-monetary assets and liabilities are remeasured at historical exchange rates. Revenue and expenses related to monetary assets and liabilities are remeasured at average exchange rates and at historical exchange rates for the related revenue and expenses of non-monetary assets and liabilities. All translation gains and losses are included in net income.

Research and Development Expenses

Research and development expenditures, including expenditures relating to the development of new products and processes and significant improvements and refinements to existing products, are expensed as incurred.

Employee Termination Benefits

The Company does not have a written severance plan for its Mexican operations, nor does it offer similar termination benefits to affected employees in all Mexican restructuring initiatives. However, Mexican law requires payment of certain minimum termination benefits. Accordingly, in situations where minimum statutory termination benefits must be paid to the affected employees, the Company records employee severance costs associated with these activities in accordance with ASC 712, Compensation – Nonretirement Post Employment Benefits. The Company does have a written severance plan which is in accordance with ASC 712 for its U.S. and Canadian operations. The Company has an accrued obligation for post-employment benefits for U.S. and Canadian operations when the amounts are probable and reasonably estimated. In all other situations where the Company pays out termination benefits, including supplemental benefits paid in excess of statutory minimum amounts and benefits offered to affected employees based on management's discretion, the Company records these termination costs in accordance with ASC 420, Exit or Disposal Cost Obligations.

The timing of the recognition of charges for employee severance costs depends on whether the affected employees are required to render service beyond their legal notification period in order to receive the benefits. If affected employees are required to render service beyond their legal notification period, charges are recognized ratably over the future service period. Otherwise, charges are recognized when a specific plan has been confirmed by management and required employee communication requirements have been met.

Legal Costs

The Company expenses legal costs as incurred, including those legal costs which may be incurred in connection with a loss contingency.

Income Taxes

The Company's significant subsidiaries are the Company's United States subsidiaries which file a consolidated U.S. tax return, the Company's Mexican subsidiaries which filed consolidated Mexico tax returns from 2011 through 2015, but will change to filing separate tax returns in 2016 and the Company's Canadian subsidiary which files a separate Canadian tax return. The Company accounts for income taxes in accordance with ASC 740, Income Taxes. Under ASC 740, deferred tax assets and liabilities are determined based on the differences between the financial statement and tax bases using enacted tax rates applied to those differences.

Deferred tax assets are assessed for realizability and a valuation allowance is provided if a portion of the associated tax benefit is not expected to be realized.

If any material uncertain tax positions arise, the Company's policy is to accrue associated penalties in selling, general and administrative expenses and to accrue interest as part of net interest expense. Other than the assessments disclosed in Note 15, Income Taxes, as of December 31, 2015, no significant adjustments have been proposed to the Company's tax positions and the Company currently does not anticipate any adjustments that would result in a material change to its financial position during the next twelve months.

Environmental Costs

Environmental liabilities are recorded undiscounted when it is probable that these liabilities have been incurred and the amounts can be reasonably estimated. These liabilities are estimated based on an assessment of many factors,

including the

Page 49 of 84

Table of Contents

INNPHOS HOLDINGS, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Dollars in thousands, except per share amounts, share amounts or where otherwise noted)

amount of remediation costs, the timing and extent of remediation actions required by the applicable governmental authorities, and the amount of the Company's liability after considering the liability and financial resources of other potentially responsible parties. Generally, the recording of these accruals coincides with the assertion of a claim or litigation, completion of a feasibility study or a commitment to a formal plan of action. Anticipated recoveries from third parties are recorded as a reduction of expense only when such amounts are realized. Any insurance receivables would be recorded gross of the estimated liability.

Comprehensive Income (Loss)

Comprehensive income (loss) is composed of net income (loss), adjusted for changes in comprehensive income items such as changes in defined benefit pension plan funded status.

Share-based Compensation

The Company recognizes compensation expense for its Long-Term Incentive Plans (LTIP). Under applicable accounting standards, the fair value of share-based compensation is determined at the grant date and the recognition of the related expense is recorded over the period in which the share-based compensation vests. Refer to Note 11 for additional information.

Business Combinations

An acquired business is included in the consolidated financial statements upon obtaining control of the acquired assets. Assets acquired and liabilities assumed are recognized at the date of acquisition at their respective fair values. Any excess of the purchase price over the estimated fair values of the net assets acquired is recognized as goodwill.

Recently Issued Accounting Standards

Adopted

In November 2015, the FASB issued Accounting Standards Update No. 2015-17, Balance Sheet Classification of Deferred Taxes (Topic 740). This guidance requires entities with a classified balance sheet to present all deferred tax assets and liabilities as noncurrent. The guidance is effective for the interim and annual periods beginning on or after December 15, 2018, and early adoption is permitted. We have adopted this new accounting pronouncement prospectively as of December 2015.

Issued but not yet adopted

In May 2014, the Financial Accounting Standard Board (FASB) issued guidance on revenue from contracts with customers that will supersede most current revenue recognition guidance, including industry-specific guidance. The underlying principle is that an entity will recognize revenue to depict the transfer of goods or services to customers at an amount that the entity expects to be entitled to in exchange for those goods or services. The guidance provides a five-step analysis of transactions to determine when and how revenue is recognized. Other major provisions include capitalization of certain contract costs, consideration of time value of money in the transaction price, and allowing estimates of variable consideration to be recognized before contingencies are resolved in certain circumstances. The guidance also requires enhanced disclosures regarding the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers. The guidance is effective for the interim and annual periods beginning on or after December 15, 2017 (early adoption is permitted to the interim periods within the year of adoption). In July 2015 the FASB deferred the effective date by one year. The guidance permits the use of either a retrospective or cumulative effect transition method. We have not yet selected a transition method and are currently evaluating the impact of the amended guidance on our consolidated financial position, results of operations and related disclosures.

In June 2014, the FASB issued guidance which requires that a performance target that affects vesting, and that could be achieved after the requisite service period, be treated as a performance condition. As such, the performance target should not be reflected in estimating the grant date fair value of the award. This update further clarifies that compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period(s) for which the requisite service has already been rendered. The guidance is effective for the interim and annual periods beginning on or after December

15, 2015; early adoption is permitted. We do not anticipate that the adoption of this standard will have a material impact on our financial position, results of operations and related disclosures.

In August 2014, the FASB issued guidance which establishes management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern or to provide related footnote disclosures. The

Page 50 of 84

Table of Contents

INNPHOS HOLDINGS, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Dollars in thousands, except per share amounts, share amounts or where otherwise noted)

amendments require management to assess an entity's ability to continue as a going concern by incorporating and expanding upon certain principles in U.S. auditing standards. Specifically, ASU 2014-15 provides a definition of the term substantial doubt and requires an assessment for a period of one year after the date that the financial statements are issued or available to be issued. It also requires certain disclosures when substantial doubt is alleviated as a result of consideration of management's plans and requires an express statement and other disclosures when substantial doubt is not alleviated. The guidance is effective for the interim and annual periods beginning on or after December 15, 2016; early adoption is permitted. We do not anticipate that the adoption of this standard will have a material impact on our financial position, results of operations and related disclosures.

In January 2015, the FASB issued new accounting rules which remove the concept of extraordinary items from U.S. GAAP. Under the existing guidance, an entity is required to separately disclose extraordinary items, net of tax, in the income statement after income from continuing operations if an event or transaction is of an unusual nature and occurs infrequently. This separate, net-of-tax presentation (and corresponding earnings per share impact) will no longer be allowed. The new rules will be effective for us in the first quarter of 2016. We do not anticipate the adoption of the new accounting rules will have a material impact on our financial position, results of operations and related disclosures.

In February 2015, the FASB issued amendments to the criteria for determining which entities are considered variable interest entities (VIEs) and to the criteria for determining if a service provider possesses a variable interest in a VIE and ends the deferral granted to investment companies for application of the VIE consolidation model. This guidance is effective for annual and interim reporting periods of public entities beginning after December 15, 2015 and early adoption is permitted. We do not anticipate the adoption of the new accounting rules will have a material impact on our financial position, results of operations and related disclosures.

In April 2015, the FASB issued ASU No. 2015-03, Interest - Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs. The amendments in this ASU require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. This guidance is effective for annual and interim reporting periods of public entities beginning after December 15, 2015, and early adoption is permitted. We do not anticipate the adoption of the new accounting rules will have a material impact on our financial position, results of operations and related disclosures, although it will change the financial statement classification of our debt issuance costs. As of December 31, 2015, we have \$1.3 million of net deferred financing costs that would be reclassified from a long-term asset to a reduction in the carrying amount of our debt.

In July 2015, the FASB issued guidance which requires entities to measure most inventory "at the lower of cost and net realizable value ("NRV")," thereby simplifying the current guidance under which an entity must measure inventory at the lower of cost or market. Under the new guidance, inventory is "measured at the lower of cost and net realizable value," which eliminates the need to determine replacement cost and evaluate whether it is above the ceiling (NRV) or below the floor (NRV less a normal profit margin). The guidance defines NRV as the "estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation." The guidance is effective for annual periods beginning after December 15, 2016, and interim periods therein. Early application is permitted. We do not anticipate the adoption of the new accounting rules will have a material impact on our financial position, results of operations and related disclosures.

In September 2015, the FASB issued guidance which eliminates the requirement to retrospectively adjust the financial statements for measurement-period adjustments that occur in periods after a business combination is consummated. Measurement period adjustments are calculated as if they were known at the acquisition date, but are recognized in the reporting period in which they are determined. Additional disclosures are required about the impact on current-period income statement line items of adjustments that would have been recognized in prior periods if prior-period information had been revised. The guidance is effective for annual periods beginning after December 15, 2015 and is to be applied prospectively to adjustments of provisional amounts that occur after the effective date. Early application

is permitted. We do not anticipate the adoption of the new accounting rules will have a material impact on our financial position, results of operations and related disclosures.

(Dollars in thousands, except per share amounts, share amounts or where otherwise noted)

2. Restructuring and Management Transition Costs:

Given the 2015 margin compression that the Company is experiencing, management evaluated several initiatives to improve the overall operating efficiency of the organization. As a result of this evaluation which was conducted during the third quarter of 2015, we launched an initiative to reduce our cost structure by implementing various staff reduction actions.

In accordance with the applicable guidance for non-retirement post-employment benefits, we accounted for the related termination benefits and recognized liabilities when the loss was considered probable that employees were entitled to benefits and the amounts are reasonably estimated.

In addition, during the fourth quarter of 2015, the Company experienced a management transition of certain high-level positions, most notably the Chief Executive Officer and the Chief Financial Officer.

We have incurred costs associated with involuntary termination benefits associated with our corporate-related initiatives, as well as the management transition. During the third and fourth quarters of 2015, we incurred restructuring and management transition costs of \$8.6 million and \$11.8 million, respectively. The amounts recorded within selling, general and administrative expenses in the statements of operations were \$17.1 million and cost of goods sold were \$3.3 million. The Company expects to make \$9.3 million of payments associated with these actions within the next twelve months.

The following table summarizes the activities related to severance and benefits:

	Restructuring and Management Transition Costs
Balance at December 31, 2014	\$—
Total expense recorded	20,410
Accelerated share-based compensation expense (a)	(4,194)
Payments made	(2,827)
Balance at December 31, 2015	\$13,389

(a) Accelerated stock-based compensation expense due to management transition.

3. Inventories:

Inventories consist of the following:

	2015	2014
Raw materials	\$44,391	\$60,697
Finished products	115,305	111,600
Spare parts	12,971	12,324
	\$172,667	\$184,621

Inventory reserves for excess quantities, obsolescence or shelf-life expiration as of December 31, 2015 and December 31, 2014 were \$16,946 and \$12,626, respectively. As a result of current deteriorating market conditions, including demand and price erosion, in 2015 the Company has increased its obsolescence and net realizable value reserves by approximately \$3,033 for Specialty Phosphate products and \$1,280 for GTSP.

7. Intangibles and Other Assets, net:

Intangibles and other assets consist of the following:

	Useful life (years)	2015	2014
Developed technology and application patents, net of accumulated amortization of \$24,840 for 2015 and \$21,894 for 2014	7-20	21,435	24,381
Customer relationships, net of accumulated amortization of \$15,812 for 2015 and \$13,054 for 2014	5-15	23,000	25,758
Trade names and license agreements, net of accumulated amortization of \$8,944 for 2015 and \$7,573 for 2014	5-20	8,717	10,088
Non-compete agreement, net of accumulated amortization of \$1,112 for 2015 and \$954 for 2014	3-10	221	379
Total intangibles		\$ 53,373	\$ 60,606
Deferred income taxes		28,842	—
Deferred financing costs, net of accumulated amortization of \$2,793 for 2015 and \$2,178 for 2014 (see note 9)		\$ 1,335	\$ 1,673
Other tax assets		6,014	7,013
Other assets		2,293	4,244
Total other assets		\$ 38,484	\$ 12,930
		\$ 91,857	\$ 73,536

Amortization expense for intangibles was \$7,233, \$7,171 and \$6,987 in 2015, 2014 and 2013, respectively.

Anticipated amortization expense for the next five years related to intangibles is as follows:

	2016	2017	2018	2019	2020
Intangible amortization expense	\$ 7,223	\$ 7,008	\$ 6,865	\$ 6,325	\$ 5,707

The preceding expected amortization expense is an estimate. Actual amounts of amortization expense may differ from estimated amounts due to additional intangible asset acquisitions, impairment of intangible assets, accelerated amortization of intangible assets and other events.

9. Short-term Borrowings, Long-Term Debt, and Interest Expense:

Short-term borrowings and long-term debt consist of the following:

	2015	2014
Term loan due 2017	\$88,000	\$92,000
Revolver borrowings under the credit facility due 2017	125,000	44,000
Capital leases	2	5
Total borrowings	\$213,002	\$136,005
Less current portion	4,002	4,003
Long-term debt	\$209,000	\$132,002

In August 2010, Innophos entered into a Credit Agreement, Credit Agreement, with a group of lenders, or the Lenders. This Credit Agreement was amended and restated on December 21, 2012 increasing the Company's borrowing capacity, reducing interest rates extending the maturity to December 21, 2017. The Credit Agreement was also amended in 2014 and then again in the third quarter of 2015. The 2014 amendment deletes the requirement that Restricted Payments (as defined in the Credit Agreement) be deducted from the Consolidated EBITDA for purposes of determining the Fixed Charge Coverage Ratio (as defined in the Credit Agreement). The 2015 amendment removed the senior leverage ratio. The 2014 and 2015 amendments provide the Companies with additional flexibility to make certain Restricted Payments (as defined in the Credit Agreement), including the repurchase by the Registrant of its stock, provided that the Companies satisfy certain financial requirements.

The Credit Agreement provides Innophos with a term loan of \$100.0 million and a revolving line of credit from the Lenders of up to \$225.0 million, including a \$20.0 million letter of credit sub-facility, all maturing on December 21, 2017. Prepayments of term loan are required at the rate of 1% of original principal amount per quarter beginning on March 31, 2013. Interest accruing on amounts borrowed under the term loan and revolving line is based on an applicable margin over LIBOR (London Interbank Offered Rate) or bank base rate, ranging from 125 to 225 basis points for LIBOR and 25 to 125 basis points for base rate loans, in each case with loan period and interest alternative as chosen by the Company, which margin is adjusted quarterly depending on a total leverage ratio (as computed under the Credit Agreement) for the period in question. Commitment fees on the unused revolving line range from 15 to 37.5 basis points, depending on total leverage ratio (as computed under the Credit Agreement) for the period in question. The current applicable margin for LIBOR based loans, base rate loans and the commitment fee are 150, 50 and 20 basis points, respectively.

The Credit Agreement also provides for possible additional revolving indebtedness under an incremental facility of up to \$50.0 million (i.e. an aggregate of revolving capacity up to \$275.0 million) upon future request by the Company to existing Lenders (and depending on their consent) or from other willing financial institutions invited by the Company and reasonably acceptable to the administrative agent to join in the Credit Agreement. This revolving credit facility increase, if implemented, may provide for higher applicable margins to either the increased portion or possibly the entire revolving credit facility, with limitations, for interest rates than those in effect for the original revolving commitments under the Credit Agreement.

Page 55 of 84

Table of Contents

INNPHOS HOLDINGS, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Dollars in thousands, except per share amounts, share amounts or where otherwise noted)

The obligations of the Company under the Credit Agreement are secured by first priority liens on substantially all the United States assets of the Company, as well as a pledge of 65% of the voting equity of entities holding the Companies' foreign subsidiaries.

The Credit Agreement contains representations given to the Lenders about the nature and status of the Companies' business that serve as conditions to future borrowings, and affirmative, as well as negative, covenants typical of credit facilities of this kind that prohibit or limit a variety of actions by the Companies and their subsidiaries generally without the Lenders' approval. These include covenants that affect the ability of those entities, among other things, to (a) incur or guarantee indebtedness, (b) create liens, (c) enter into mergers, recapitalizations or assets purchases or sales, (d) change names, (e) make certain changes to their business, (f) make restricted payments that include dividends, purchases and redemptions of equity (g) make advances, investments or loans, (h) effect sales and leasebacks or (i) enter into transactions with affiliates, (j) allow negative pledges or limitations on the repayment abilities of subsidiaries or (k) amend subordinated debt. However, subject to continued compliance with the overall leverage restrictions described in more detail below, the Companies retain flexibility under the Credit Agreement to develop their business and achieve strategic goals by, among other things, being permitted to take on additional debt, pay dividends (as long as the Total Leverage Ratio shall be .25 less than the then applicable level described below), re-acquire equity and make domestic acquisitions. Foreign acquisitions and investments are also permitted up to a fixed limit which is set initially at \$100.0 million and can increase with ongoing cash generation up to as high as \$300.0 million.

Among its affirmative covenants, the Credit Agreement requires the Companies to maintain the following consolidated ratios (as defined and calculated according to the Credit Agreement) as of the end of each fiscal quarter:

(a) "Total Leverage Ratio" less than or equal to 3.00 to 1.00.

(b) "Fixed Charge Coverage Ratio" greater than or equal to 1.25 to 1.00.

As of December 31, 2015, the Accessible Borrowing Availability was 99.1 million and the Total Leverage Ratio and Fixed Charge Coverage Ratio calculated in accordance with the agreement were 2.27 and 2.53, respectively.

As of December 31, 2015, the Company was in full compliance with all debt covenant requirements.

The Credit Agreement provides for "Events of Default" that, unless waived, can or will lead to acceleration of obligations upon the occurrence, continuation and/or notice, as applicable, of specified events typical of credit facilities of this kind. These include (a) failures to pay interest or principal on loans, (b) misrepresentations, (c) failures to observe covenants, (d) cross defaults of other indebtedness in excess of \$20.0 million, (e) uninsured and unsatisfied judgments in excess of \$20.0 million or certain orders or injunctions, (f) bankruptcy and insolvency events, (g) events leading to aggregate liability under the Employee Retirement Income Security Act of 1974 (ERISA) in excess of \$20.0 million, (h) changes of control, (i) invalidity of credit support /security agreements, and (i) certain disadvantageous changes in Credit Agreement debt compared to subordinated debt.

Fees and expenses incurred in 2014 with the amendment were approximately \$0.2 million. Additional fees and expenses incurred in 2015 with the latest amendment were approximately \$0.3 million. The amounts above were recorded as deferred financing costs and are being amortized over the term of the Credit Agreement using the effective interest method.

As of December 31, 2015, \$88.0 million was outstanding under the Term Loan and \$125.0 million was outstanding under the revolving line of credit, both of which approximate fair value because they have a floating interest rate, Level 2 input within the fair value hierarchy, with total availability at 99.1 million, taking into account \$0.9 million in face amount of letters of credit issued under the sub-facility. The current weighted average interest rate for all debt is 2.6%.

Simultaneously with the term of the credit facility, Innophos entered into an interest rate swap, swapping the LIBOR exposure on \$100.0 million adjusting quarterly consistent with the term loan, with a fixed rate of 0.9475% plus the applicable margin on the debt expiring in December 2017. This interest rate swap has been designated as a cashflow hedge (Level 2) with the changes in value recorded through other comprehensive income. The fair value of this

interest rate swap is an asset of approximately \$0.1 million as of December 31, 2015.

We manage our interest rate risk by balancing the amount of fixed-rate and floating-rate debt to the extent practicable consistent with our credit status.

Innophos and its subsidiaries and affiliates may from time to time seek to acquire or otherwise retire outstanding debt through public or privately negotiated transactions, exchanges or otherwise. Debt repurchases or exchanges, if any, will depend

Page 56 of 84

Table of Contents

INNPHOS HOLDINGS, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Dollars in thousands, except per share amounts, share amounts or where otherwise noted)

on prevailing market conditions, Company liquidity requirements, restrictive financial covenants and other factors applicable at the time. The amounts involved may be material.

Total interest paid by the Company for all indebtedness for 2015, 2014 and 2013 was \$5.9 million, \$4.1 million and \$4.6 million.

Interest expense, net consists of the following:

	Year Ended December 31,		
	2015	2014	2013
Interest expense	\$7,079	\$3,977	\$5,271
Deferred financing cost	615	526	559
Interest income	(65)	(40)	(1,049)
Less: amount capitalized for capital projects	(111)	(109)	(355)
Total interest expense, net	\$7,518	\$4,354	\$4,426

10. Other Long-Term Liabilities:

Other long-term liabilities consist of the following:

	2015	2014
Deferred income taxes	\$2,135	\$24,400
Pension and post retirement liabilities	9,612	10,714
Restructuring reserve	4,054	—
Uncertain tax positions	2,416	2,798
Environmental liabilities	1,100	1,100
Other liabilities	3,872	2,444
	\$23,189	\$41,456

11. Stockholders' Equity / Stock-Based Compensation:

Our compensation programs include share-based payments. The primary share-based awards and their general terms and conditions currently in effect are as follows:

Restricted stock grants, which entitle the holder to receive, at the end of each vesting term, a specified number of shares of the Company's common stock, and which also entitle the holder to receive dividends paid on such grants throughout the vesting period. Compensation expense is amortized on a straight-line basis over the requisite vesting period, generally three years, and accelerated for those employees that are retirement eligible during the vesting period.

Stock options, which entitle the holder to purchase, after the end of a vesting term, a specified number of shares of the Company's common stock at an exercise price per share set equal to the market price of the Company's common stock on the date of grant. The stock options generally vest annually over three years with a ten year term from date of grant.

Performance share awards which entitle the holder to receive, at the end of a performance cycle, a number of shares of the Company's common stock, within a range of shares from zero to a specified maximum (generally 200%), calculated using a combination of performance indicators as defined solely by reference to the Company's own activities. The performance shares generally vest at the end of a three year performance cycle and the number of shares distributable depends on the extent to which the Company attains pre-established performance goals. Amounts equivalent to dividends will accrue over the performance period and are paid on performance share awards when

vested and distributed.

- Annual stock retainer grants, which entitle independent members of the Board of Directors to receive a number of shares of the Company's common stock, which immediately vest, equal to a fixed retainer value.

The fair value of the options granted during 2015, 2014 and 2013 was determined using the Black-Scholes option-pricing model. The assumptions used in the Black-Scholes option-pricing model were as follows:

	Year Ended December 31, 2015		Year Ended December 31, 2014		Year Ended December 31, 2013	
Non-qualified stock options						
Expected volatility	40.8	%	50.1	%	50.4	%
Dividend yield	4.3	%	3.2	%	2.8	%
Risk-free interest rate	1.7	%	2.0	%	1.0	%
Expected term	6		6		6	
Weighted average grant date fair value of stock options	\$12.14		\$20.15		\$19.99	

The expected volatility and the expected term are based on the Company's historical data. The dividend yield is the expected annual dividend payments divided by the average stock price up to the date of grant. The risk-free interest rates are derived from the U.S. Treasury securities in effect on the date of grant whose maturity period equals the options expected term. The Company applies an expected forfeiture rate to stock-based compensation expense. The estimate of the forfeiture rate is based primarily upon historical experience of employee turnover. As actual forfeitures become known, stock-based compensation expense is adjusted accordingly.

(Dollars in thousands, except per share amounts, share amounts or where otherwise noted)

A summary of performance share activity is presented below:

	Number of Shares	Weighted Average Grant Date Fair Value
Outstanding at January 1, 2013	—	—
Granted (at targeted return on invested capital and contribution margin growth)	43,091	54.59
Forfeited	(4,854)) 54.59
Vested	—	—
Adjustment to estimate of shares to be earned	(25,848)) 54.59
Outstanding at December 31, 2013	12,389	\$54.59
Outstanding at January 1, 2014	12,389	\$54.59
Granted (at targeted return on invested capital and contribution margin growth)	44,698	55.49
Forfeited	—	—
Vested	—	—
Adjustment to estimate of shares to be earned	(12,389)) 54.59
Outstanding at December 31, 2014	44,698	\$55.49
Outstanding at January 1, 2015	44,698	\$55.49
Granted (at targeted return on invested capital and contribution margin growth)	62,225	42.31
Forfeited	—	—
Vested	(37,835)) 53.05
Adjustment to estimate of shares to be earned	(36,671)) 51.48
Outstanding at December 31, 2015	32,417	\$37.58

The total intrinsic value of options exercised and stock grants during 2015, 2014 and 2013 was \$4.9 million, \$5.2 million and \$4.7 million, respectively. The aggregate intrinsic value of stock options outstanding and exercisable at December 31, 2015 was \$3.0 million and \$3.0 million, respectively. The total remaining unrecognized compensation expense related to share-based payments is as follows:

Unrecognized Compensation Expense	Restricted Stock	Stock Options	Performance Based
Amount	\$3,339	\$1,819	\$1,386
Weighted-average years to be recognized	1.3	1.5	1.8

The Board of Directors authorized a stock repurchase program, commencing January 1, 2015, pursuant to which the Registrant was authorized to acquire for cash in open market or private transactions from time to time up to \$125 million of its common stock over the ensuing 12 months. The timing of repurchases and the exact number of shares of common stock to be purchased depended upon market conditions and other factors. The repurchase program was funded through existing liquidity, including borrowings from the Senior Credit Facility, and cash from operations. Treasury stock was recognized at the cost to reacquire the shares. During 2015, the Company repurchased 2,318,720 shares of its common stock on the open market at an average price of \$53.91 per share or \$125.0 million.

INNPHOS HOLDINGS, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Dollars in thousands, except per share amounts, share amounts or where otherwise noted)

12. Earnings per share (EPS)

The Company accounts for earnings per share in accordance with ASC 260 and related guidance, which requires two calculations of earnings per share (EPS) to be disclosed: basic EPS and diluted EPS. Under ASC Subtopic 260-10-45, as of January 1, 2009 unvested awards of share-based payments with rights to receive dividends or dividend equivalents, such as our restricted stock, are considered participating securities for purposes of calculating EPS. Under the two-class method, a portion of net income is allocated to these participating securities and therefore is excluded from the calculation of EPS allocated to common stock, as shown in the table below.

The numerator for basic and diluted earnings per share is net earnings attributable to shareholders reduced by dividends attributable to unvested shares. The denominator for basic earnings per share is the weighted average number of common stock outstanding during the period. The denominator for diluted earnings per share is weighted average shares outstanding adjusted for the effect of dilutive outstanding stock options, performance share awards and restricted stock awards.

The following is a reconciliation of the weighted average basic number of common shares outstanding to the diluted number of common and common stock equivalent shares outstanding and the calculation of earnings per share using the two-class method:

	Year Ended December 31,		
	2015	2014	2013
Net income	26,346	64,461	49,506
Less: earnings attributable to unvested shares	(72)) (137) (64
Net income available to common shareholders	\$26,274	\$64,324	\$49,442
Weighted average number of common and potential common shares outstanding:			
Basic number of common shares outstanding	20,032,300	21,753,270	21,933,843
Dilutive effect of stock equivalents	291,085	368,633	412,137
Diluted number of weighted average common shares outstanding	20,323,385	22,121,903	22,345,980
Earnings per common share:			
Earnings per common share—Basic	\$1.31	\$2.96	\$2.25
Earnings per common share—Diluted	\$1.29	\$2.91	\$2.21

Total outstanding options, performance share awards and unvested restricted stock not included in the calculation of diluted earnings per share as the effect would be anti-dilutive are 444,334, 313,794 and 330,420 for the years ended 2015, 2014 and 2013, respectively.

We are a holding company that does not conduct any business operations of our own. As a result, we are dependent upon cash dividends, distributions and other transfers from our subsidiaries, most directly Innophos, Inc., our primary operating subsidiary, and Innophos Investments Holdings, Inc., its parent, to make dividend payments on our common stock.

14. Pension Plans and Postretirement Benefits:

Innophos maintains both defined contribution plans and noncontributory defined benefit pension plans that together cover substantially all U.S. and Canadian employees.

In the United States, salaried and hourly employees are covered by a defined contribution plan with a 401(k) feature. The plan provides for employee contributions, company matching contributions, and an age-weighted annual company contribution to eligible employees. Union-represented hourly employees, at our Nashville site, are covered by a traditional defined benefit plan providing benefits based on years of service and final average pay. On April 26, 2007, the Company and the Union for the hourly employees at our Nashville facility agreed that it would freeze its defined benefit pension plan (the “Plan”) as of August 1, 2007. The accrual of additional benefits or increase in the current level of benefits under the Plan ceased as of August 1, 2007, after which the Nashville union employees now participate in the Company’s existing non-contributory defined contribution benefit plan. All plans were established by Innophos in 2004.

In Canada, salaried employees are covered by defined contribution plans which provide for company contributions as a percent of pay, employee contributions, and company matching contributions. Union-represented hourly employees are covered by a defined benefit plan providing benefits based on a negotiated benefit level and years of service. The defined contribution plans were established by the Company in 2004; the defined benefit plan for union-represented hourly employees is a continuation of the Rhodia Canada Inc.'s pension plan for its Port Maitland union employees, which was included in the acquisition of the Phosphates Business from Rhodia on August 13, 2004.

Innophos also has other postretirement benefit plans covering substantially all of its U.S. and Canadian employees. Certain employee groups covered under the plans do not receive benefits post-age 65. In the United States, the health care plans

Table of Contents

INNPHOS HOLDINGS, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Dollars in thousands, except per share amounts, share amounts or where otherwise noted)

are contributory with participants' contributions adjusted annually, and limits on the Company's share of the costs; the life insurance plans are noncontributory. The effects of the Medicare Prescription Drug, Improvement and Modernization Act of 2003, or the Act, are not significant. In Canada, the plans are non-contributory.

Innophos uses a December 31 measurement date for all of its plans. For the purposes of the following schedules, beginning of the year is January 1.

The weighted average discount rate at the measurement dates for the Company's defined benefit pension plans and the post-retirement benefit plans is developed using a spot interest yield curve based upon a broad population of corporate bonds rated AA or higher, adjusted to match the duration of each plan's projected benefit payment stream.

The expected return is based on a specific asset mix, active management, rebalancing among diversified asset classes within the portfolio, and a consistent underlying inflation assumption to calculate the appropriate long-term expected investment return.

As a sensitivity measure, the effect of a 25 basis-point decrease in our discount rate assumption would increase our net periodic benefit cost for our pension and post-retirement plans by approximately \$73. A 1% decrease in our expected rate of return on plan assets would increase our pension plan expense by \$155.

The amounts in accumulated other comprehensive income (loss), or AOCI, for all plans that are expected to be amortized as components of net periodic benefit cost (benefit) during 2016 are as follows:

	Pension	Other Benefits	Total
Prior service cost	\$101	\$—	\$101
Net actuarial loss (gain)	207	(52)	155
Transition obligation	—	22	22

The changes in benefit obligations recognized in other comprehensive loss during 2015 and 2014 are as follows:

	Pension Benefits		Other Benefits		Total	
	2015	2014	2015	2014	2015	2014
Change in accumulated other comprehensive income

Innophos expects to contribute approximately \$0.1 million to its U.S. defined benefit pension plan in 2015.

The estimated actuarial loss, prior service cost, and transition obligation (asset) for the defined benefit pension plans that will be amortized from accumulated other comprehensive income into net periodic benefit cost during the 2016 fiscal year are \$8, \$0 and \$0, respectively.

The estimated actuarial gain, prior service cost, and transition obligation (asset) for the postretirement plan that will be amortized from accumulated other comprehensive income into net periodic benefit cost during the 2016 fiscal year are \$52, \$0 and \$0, respectively.

Assumed health care cost trend rates on the U.S. plans do not have a significant effect on the amounts reported for the health care plans as a result of limits on the Company's share of the cost.

Plan Assets

The investment policy for the Company's U.S. defined benefit pension plan is designed to achieve long-term objectives of return, while mitigating against downside risk and considering expected cash flow. Investment managers appointed by the Plan are directed to achieve a satisfactory return through a diversified portfolio consistent with acceptable risks and prudent management. In accordance with the investment and risk philosophy of the Committee, a target asset mix of 90% equities and 10% fixed income instruments has been established. Investment weightings and results are tested regularly against appropriate benchmark portfolios.

Innophos, Inc.'s defined benefit pension plan invests in mutual funds and commercial paper and the weighted-average asset allocations at December 31, 2015 and 2014 by asset category are as follows:

Asset Category	Plan Assets at December 31			
	2015		2014	
Equity securities	90.6	%	89.9	%
Fixed income securities	9.4		10.1	
Total	100.0	%	100.0	%

The fair values of Innophos, Inc.'s pension plan assets at December 31, 2015 by asset category are as follows:

	Total	Level 1	Level 2	Level 3
Equity securities	\$1,925	\$1,925	\$—	\$—
Fixed income securities	199	199	—	—
	\$2,124	\$2,124	\$—	\$—

Defined Contribution Plan—U.S.

Innophos Inc.'s expense for the defined contribution plan was \$3.5 million, \$3.0 million and \$3.2 million for 2015, 2014 and 2013, respectively.

Plan Assets

Innophos Canada Inc.'s pension plan invests in mutual funds and the weighted-average asset allocations at December 31, 2015 and 2014 by asset category are as follows:

	2015	2014		
Asset Category				
Equity securities	53.8	% 49.3		%
Debt securities	46.2	50.7		
Total	100.0	% 100.0		%

The fair values of Innophos Canada, Inc.'s pension plan assets at December 31, 2015 by asset category are as follows:

	Total	Level 1	Level 2	Level 3
Equity securities	\$7,455	\$7,455	\$—	\$—
Fixed income securities	6,409	—	6,409	—
	\$13,864	\$7,455	\$6,409	\$—

The Pension Committee has promulgated a Statement of Investment Policies and Procedures based on the “prudent person portfolio approach” to ensure investment and administration of the assets of the Plan within the parameters set out in the Ontario Pension Benefits Act and the Regulations hereunder. Investment managers appointed by the Plan are directed to achieve a satisfactory return through a diversified portfolio consistent with acceptable risks and prudent management. In accordance with the investment and risk philosophy of the Committee, a target asset mix of 50% equities and 50% fixed income instruments has been established. Investment weightings and results are tested regularly against appropriate benchmark portfolios.

Cash Flows

Contributions

Innophos Canada, Inc. contributed \$0.6 million to its pension plan in 2015.

Estimated Future Benefit Payments

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid:

Estimated Future Benefit Payments	Pension Benefits	Other Benefits
Fiscal 2016	\$401	\$55
Fiscal 2017	426	49
Fiscal 2018	473	63
Fiscal 2019	503	60
Fiscal 2020	557	70

Net deferred tax balances were reflected on the consolidated balance sheets as follows:

	Year Ended December 31,	
	2015	2014
Net current deferred tax assets	\$—	\$12,647
Net noncurrent deferred tax assets	28,842	—
Net current deferred tax liabilities	—	—
Net noncurrent deferred tax liabilities	(2,135)	(24,400)
Net deferred tax assets (liabilities)	\$26,707	\$(11,753)

The components of the Company's deferred tax assets/ (liabilities) were as follows:

	Year Ended December 31,	
	2015	2014
Deferred tax assets:		
Inventories	\$6,386	\$4,306
Accrued liabilities	17,742	12,097
Prepaid inventory	28,630	—
Tax credits	2,845	—
Tax losses	4,140	5,278
Total deferred tax assets	59,743	21,681
Deferred tax liabilities:		
Gain on bond retirement	(809)	(1,072)
Intangibles	(10,670)	(11,400)
Fixed assets	(12,927)	(15,814)
Total deferred tax liabilities	(24,406)	(28,286)
Total valuation allowances	(8,630)	(5,148)
Net deferred tax assets (liabilities)	\$26,707	\$(11,753)

A reconciliation of the beginning and ending amount of gross unrecognized tax benefits is as follows:

	Year Ended December 31,		
	2015	2014	2013
Gross unrecognized tax benefits at January 1	\$2,798	\$2,635	\$1,100
Additions for tax positions of prior years	470	1,401	1,535
Reductions for tax positions of prior years	(147)	(832)	—
Reductions due to settlements	—	(406)	—
Reductions due to lapse of applicable statute of limitations	—	—	—
Gross unrecognized tax benefits at December 31	3,121	2,798	2,635
Net uncertain tax benefits, that if recognized would impact the effective tax rate, at December 31	\$1,311	\$1,042	\$2,116

The U.S. operations do not have any federal tax loss carry forwards as of December 31, 2015. The Company realized tax benefits of \$975 and \$1,071 from stock options exercised in 2015 and 2014, respectively.

The Company maintains full valuation allowances of \$8.6 million and \$5.1 million at December 31, 2015 and 2014, respectively, on its foreign tax credits carryforward, capital loss on note redemptions and foreign net operating loss carryforwards as it is more likely than not that these tax benefits will not be realized. The increase in valuation allowances

Page 71 of 84

Table of Contents

INNPHOS HOLDINGS, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Dollars in thousands, except per share amounts, share amounts or where otherwise noted)

recognized in 2015 are primarily a result of foreign tax credits recorded in 2015 that will more than likely expire before they can be utilized in the United States, as well as foreign tax attributes recorded in 2015 that will more than likely not be able to be utilized on our foreign tax returns. Certain of these foreign tax attributes, approximately \$2.6 million, do not expire. The remaining tax attributes will expire in the years 2016 through 2034.

As of December 31, 2015, taxes have not been provided on approximately \$17.0 million of accumulated foreign unremitted earnings that are expected to remain invested indefinitely. Due to complexities in the tax laws and the assumptions that would have to be made, it is not practicable to estimate the amounts of income taxes that would have to be provided.

In connection with a review of the Company's overall cash position and anticipated cash needs, we made a \$266.0 million distribution of foreign earnings mainly from the Mexico and Canadian subsidiaries during the fourth quarter of 2015. This distribution resulted in an overall net tax benefit of approximately \$0.6 million. The net tax benefit is primarily due to the recognition of United States foreign tax credits which exceeded the taxes due on the distribution of foreign earnings.

The Company's Mexican subsidiaries will be de-consolidating for Mexican income tax reporting purposes effective for the 2016 tax year. As such, the Company has a deferred tax liability of \$1.5 million attributable to the de-consolidation which is payable over the next five years.

Business is conducted in various countries throughout the world and is subject to tax in numerous jurisdictions. A significant number of tax returns are filed and subject to examination by various federal, state and local tax authorities. Tax examinations are often complex, as tax authorities may disagree with the treatment of items reported requiring several years to resolve. As such, the Company maintains liabilities for possible assessments by tax authorities resulting from known tax exposures for uncertain income tax positions. The Company's policy is to accrue associated penalties in selling, general and administrative expenses and to accrue interest in net interest expense.

Currently, the Company is under examination, or has been contacted for examination on income tax returns for the years 2007 through 2013. In addition, Innophos Canada, Inc. was assessed approximately \$4.0 million at current exchange rates for the tax years 2007, and 2008 by the Canadian tax authorities. After lengthy discussions, the Canadian tax authorities have reassessed these amounts in August 2014 and the Company filed a Notice of Objection with the Canada Revenue Agency Appeals Board in November 2014. The Company believes that its tax position is more likely than not to be sustained. Also, certain state income tax assessments are under protest and the Company believes its financial position is sustainable. The Company estimates the liability for unrecognized tax benefits may decrease by approximately \$0.7 million during the next twelve months as a result of possible settlements of income tax authority examinations. The Company has recorded \$0.1 million of interest and penalties in the statement of financial position. Other than the items mentioned above, as of December 31, 2015, no significant adjustments have been proposed to the Company's tax positions and the Company currently does not anticipate any adjustments that would result in a material change to its financial position during the next twelve months.

Income taxes paid (net of refunds) were \$17.0 million, \$30.3 million and \$9.4 million for 2015, 2014 and 2013, respectively.

16. Commitments and Contingencies:

Leases

Under agreements expiring through 2020, the Company leases railcars and other equipment under various operating leases. Rental expense for 2015, 2014 and 2013 was \$6,858, \$6,670 and \$6,324, respectively. Minimum annual rentals for all operating leases are:

Year Ending	Lease Payments
2016	\$5,475
2017	4,624

2018	3,920
2019	3,400
2020	2,464
Thereafter	7,339

Table of Contents

INNPHOS HOLDINGS, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Dollars in thousands, except per share amounts, share amounts or where otherwise noted)

Purchase Commitments and Supplier Concentration

The Company has multiple raw material supply contracts which prices are established annually based on a formula. The minimum annual purchase obligation for several of these raw material supply contracts, at current prices, approximates \$92.4 million for 2016.

Our business activities depend on long-term or renewable contracts to supply materials or products. In particular, we rely to a significant degree on single-source supply contracts and some of these contractual relationships may be with a relatively limited number of suppliers. Although most of our supplier relationships are typically the result of multiple contractual arrangements of varying terms, in any given year, one or more of these contracts may come up for renewal. In addition, from time to time, we enter into toll manufacturing agreements or other arrangements to produce minimum quantities of product for a certain duration. If we experience delays in delivering contracted production, we may be subject to contractual liabilities to the buyers to whom we have promised the products.

Environmental

The Company's operations are subject to extensive and changing federal and state environmental laws and regulations. The Company's manufacturing sites have an extended history of industrial use, and soil and groundwater contamination have or may have occurred in the past and might occur or be discovered in the future.

Environmental efforts are difficult to assess for numerous reasons, including the discovery of new remedial sites, discovery of new information and scarcity of reliable information pertaining to certain sites, improvements in technology, changes in environmental laws and regulations, numerous possible remedial techniques and solutions, difficulty in assessing the involvement of and the financial capability of other potentially responsible parties and the extended time periods over which remediation occurs. Other than the items listed below, the Company is not aware of material environmental liabilities which are probable and estimable. As the Company's environmental contingencies are more clearly determined, it is reasonably possible that amounts may need to be accrued. However, management does not believe, based on current information, that environmental remediation requirements will have a material impact on the Company's results of operations, financial position or cash flows.

Future environmental spending is probable at our site in Nashville, TN, the eastern portion of which had been used historically as a landfill, and a western parcel previously acquired from a third party, which reportedly had housed, but no longer does, a fertilizer and pesticide manufacturing facility. We have an estimated liability with a range of \$0.9 million-\$1.3 million. The remedial action plan for that site has yet to be finalized, and as such, the Company has recorded a liability, which represents the Company's best estimate, of \$1.1 million as of December 31, 2015.

Litigation

2008 RCRA Civil Enforcement - Geismar, Louisiana plant

Following several inspections by the Environmental Protection Agency, or EPA, at our Geismar, Louisiana purified phosphoric acid, or PPA, plant and related submissions we made to support claimed exemptions from the federal Resource, Conservation and Recovery Act, or RCRA, in March 2008, EPA referred our case to the Department of Justice, or DOJ, for civil enforcement. Although no citations were ever issued or formal proceedings instituted, the agencies claim we violate RCRA by failing to manage appropriately two materials that DOJ/EPA alleges are hazardous wastes. Those materials are: (i) Filter Material from an enclosed intermediate filtration step to further process green phosphoric acid we receive as raw material via pipeline from the adjacent site operated by an affiliate of Potash Corporation of Saskatchewan, or PCS; and (ii) Raffinate, a co-product we return to PCS under a long-term contract we have with PCS.

Since referral of the case to DOJ, we and PCS have engaged in periodic discussions with DOJ/EPA and the Louisiana Department of Environmental Quality, or LDEQ, or collectively the Government Parties, in order to resolve the matter. In addition to asserting that the two materials in question are not hazardous wastes, we have also sought to demonstrate that both the nature and character of the materials as well as their use, handling and disposition were detailed in a solid waste permit amendment application filed in 1989 by PCS's predecessor, when our plant was first constructed, and approved by the LDEQ under the state RCRA program.

In the course of discussions with the Government Parties, the DOJ/EPA has required that we undertake, as an interim measure, the construction of a new filter unit to replace the enclosed system and allow the removal and separate handling of the Filter Material. We built that unit, which has been operating since 2012.

Page 73 of 84

Table of Contents

INNOPHOS HOLDINGS, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Dollars in thousands, except per share amounts, share amounts or where otherwise noted)

In an attempt to address the remaining concerns of the Government Parties, we and PCS undertook joint efforts to explore possible technical solutions to the issue of Raffinate treatment. Based upon work so far, there appears to be at least one technically viable approach, namely that of “deep well injection,” which we believe is acceptable to regulators as part of a negotiated solution among the parties.

Although we cannot give assurances as to the future course or ultimate outcome of ongoing negotiations, including whether litigation may ultimately ensue, we believe, based on our appreciation of the current state of the proceedings, that deep well injection is likely to be employed as the technologically acceptable approach for Raffinate and that we will not be asked to contribute substantially to the cost of the deep well to be specified by the Government Parties in an anticipated consent decree for settlement of this enforcement matter. PCS has applied to the relevant government agencies for a deep well permit. We have also applied for our own deep well permit for future business reasons. In negotiated settlements leading to consent decrees with the Governmental Parties, it is also common for penalties relating to previous “non-compliance” to be assessed and, in that connection, we have been advised by the Governmental Parties that they expect to seek penalties against both PCS and us in this case. Although we have argued and made submissions to the effect that for purposes of settlement penalties there is no basis for any substantial penalty to be levied against us, nevertheless, we can give no assurance as to that outcome, or if a penalty is initially assessed as to its amount, or whether it will be necessary for us to oppose or seek indemnity for the assessment by further litigation. Based upon our receipt of a draft consent decree from the Government Parties in June 2014 and subsequent discussions with them, we have established an accrual of \$0.9 million for settlement of civil penalties. However, further discussions among all parties will be necessary to determine if the matter can be resolved by settlement.

Other Legal Matters

In March 2008, Sudamfos S.A., or Sudamfos, an Argentine phosphate producer, filed an arbitration before the ICC International Court of Arbitration, Paris, France, concerning an alleged agreement for our Mexicana subsidiary, or Mexicana, to sell it 12,500 metric tons of phosphoric acid, but subsequently withdrew the proceeding. In October 2008, Mexicana filed suit in Mexico against Sudamfos to collect approximately \$1.2 million representing the contract price for prior deliveries of phosphoric acid for which Sudamfos had refused to pay. In October 2009, Sudamfos answered the suit and counterclaimed for \$3.0 million based upon the agreement originally alleged in the arbitration. In subsequent proceedings including available appeals, Mexicana's claim was sustained and Sudamfos' counterclaim was denied. In November 2015, Sudamfos and Mexicana executed an agreement under which Sudamfos will pay \$1.4 million through an immediate payment of \$0.1 million and the remaining \$1.3 million over three years, secured by a lien on Sudamfos' operating plant site.

In July 2013, Innophos, Inc. was assessed approximately \$1.2 million of sales and use taxes by the State of Louisiana and Ascension Parish. This tax assessment covers certain raw materials used in the production of Phosphoric Acid. The Company is contesting both tax assessments. This assessment covers periods 2004 to 2010 for the Parish and 2007 to 2010 for the State. We have concluded that the contingent liability arising from this matter is neither remote nor probable, but reasonably possible.

In addition, we are party to legal proceedings and contractual disputes that arise in the ordinary course of our business. Except as to the matters specifically discussed, management believes that these matters represent remote liabilities. However, these matters cannot be predicted with certainty and an unfavorable resolution of one or more of them could have a material adverse effect on our business, results of operations, financial condition, and/or cash flows.

Table of Contents

18. Financial Instruments and Concentration of Credit Risks:

The Company believes that its concentration of credit risk related to trade accounts receivable is limited since these receivables are spread among a number of customers and are geographically dispersed. The ten largest customers accounted for 33%, 29% and 30%, respectively, of net sales for 2015, 2014 and 2013. No customer accounted for more than 10% of our sales in the last three years.

19. Valuation Allowances:

Valuation allowances as of December 31, 2015, 2014 and 2013, and the changes in the valuation allowances for the year ended December 31, 2015, 2014 and 2013 are as follows:

	Balance, January 1, 2015	Charged/ (credited) to costs and expenses	Deductions (Bad debts)	(Credited) to Goodwill	Balance, December 31, 2015

	Balance, January 1, 2013	Charged/ (credited) to costs and	Deductions (Bad debts)	(Credited) to Goodwill	Balance, December 31, 2013

		expenses			
Deferred taxes valuation allowances	\$4,031	\$555	\$—	\$—	\$4,586

20. Segment Reporting:

The Company discloses certain financial and supplementary information about its reportable segments, revenue by products and revenues by geographic area. Operating segments are defined as components of an enterprise about which separate discrete financial information is evaluated regularly by the chief operating decision maker, in order to decide how to allocate resources and assess performance. The primary performance indicators for the chief operating decision maker are sales and operating income, with sales on a ship-from basis. All references to sales in this Form 10-K, either on a ship-from or ship-to

Table of Contents

(Dollars in thousands, except per share amounts, share amounts or where otherwise noted)

basis, are on the same basis of revenue recognition and are recognized when title and risk of loss passes to the customer, which occurs either upon shipment or delivery, depending upon the agreed sales terms with customers. The Company's reportable segments reflect the core businesses in which Innophos operates and how it is managed. The Company reports its core specialty phosphates business separately from granular triple super-phosphate, or GTSP, and other non-specialty phosphate products (GTSP & Other). Innophos Nutrition, Inc. is included in the Specialty Phosphates US & Canada segment and in the Specialty Ingredients product line. Specialty Phosphates consists of three products lines: Specialty Ingredients; Food & Technical Grade PPA; and STPP & Detergent Grade PPA. GTSP & Other includes fertilizer co-product GTSP and other non-specialty phosphate products.

ITEM CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND
9. FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Control and Procedures

The Company maintains disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934) that are designed to provide reasonable assurance that information required to be reported in the Company's consolidated financial statements and filings is recorded, processed, summarized and reported within the periods specified in the rules and forms of the SEC and that such information is accumulated and communicated to the Company's management, including its principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. The Principal Executive Officer and Principal Financial Officer, with the participation of management, concluded that the Company's disclosure controls and procedures are effective at the reasonable assurance level as of December 31, 2015.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control framework and processes are designed to provide reasonable assurance to management and the Board of Directors regarding the reliability of financial reporting and the preparation of the Company's consolidated financial statements in accordance with United States generally accepted accounting principles. As of December 31, 2015, management conducted an assessment of the Company's internal control over financial reporting based on the framework established by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control — Integrated Framework (2013). Based on the assessment, management concluded that, as of December 31, 2015, the Company's internal control over financial reporting is effective at the reasonable assurance level.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

PricewaterhouseCoopers LLP, an independent registered public accounting firm, has audited the Company's financial statements included in this Annual Report on Form 10-K and issued its report on the effectiveness of the Company's internal control over financial reporting as of December 31, 2015, which is included in "Part II, Item 8. Financial Statements and Supplementary Data".

Changes in Internal Control Over Financial Reporting

There have been no changes in the Company's internal control over financial reporting during or with respect to the fourth quarter of 2015 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 9B. OTHER INFORMATION
