August 09, 2018

Filed Pursuant to Rule 424(b)(2)

Registration No. 333-221324

The information in this preliminary pricing supplement is not complete and may be changed. This preliminary pricing supplement and the accompanying market measure supplement, prospectus supplement and prospectus are not an offer to sell these securities and we are not soliciting an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.

Subject To Completion, dated August 8, 2018

PRICING SUPPLEMENT No. 105 dated August , 2018

(To Market Measure Supplement dated May 18, 2018,

Prospectus Supplement dated January 24, 2018

and Prospectus dated April 27, 2018)

Wells Fargo & Company

Medium-Term Notes, Series S

ETF Linked Securities
Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF

Unlike ordinary debt securities, the securities do not pay interest, do not repay a fixed amount of principal at maturity and are subject to potential automatic call upon the terms described below. Any return you receive on the securities and whether they are automatically called will depend on the performance of the Fund

Automatic Call. If the fund closing price of the Fund on any call date is greater than or equal to the starting price, we will automatically call the securities for the original offering price plus the call premium applicable to that call date

Call Date	Call Premium*
September 9, 2019	12.75% – 13.75% of the original offering price
September 8, 2020	25.50% - 27.50% of the original offering price
August 30, 2021 (the "final calculation day")	38.25% - 41.25% of the original offering price

* The actual call premium applicable to each call date will be determined on the pricing date

Maturity Payment Amount. If the securities are not automatically called prior to the final calculation day, the maturity payment amount will be based upon the fund closing price of the Fund on the final calculation day and could be greater than, equal to or less than the original offering price per security as follows:

- If the fund closing price of the Fund on the final calculation day is greater than or equal to the starting price, the securities will be automatically called for the original offering price plus the call premium applicable to the final calculation day described above

- If the fund closing price of the Fund on the final calculation day is less than the starting price, but not by more than 25%, you will receive the original offering price of your securities at maturity

- If the fund closing price of the Fund on the final calculation day is less than the starting price by more than 25%, you will have full downside exposure to the decrease in the price of the Fund from the starting price, and you will lose more than 25%, and possibly all, of the original offering price of your securities

Investors may lose some, or all, of the original offering price

Any positive return on the securities will be limited to the applicable call premium, even if the fund closing price of the Fund on the applicable call date significantly exceeds the starting price. You will not participate in any appreciation of the Fund beyond the applicable fixed call premium.

All payments on the securities are subject to the credit risk of Wells Fargo & Company, and you will have no ability to pursue the shares of the Fund or any securities held by the Fund for payment; if Wells Fargo & Company defaults on its obligations, you could lose some or all of your investment

No periodic interest or dividends

No exchange listing; designed to be held to maturity

On the date of this preliminary pricing supplement, the estimated value of the securities is approximately $950.41 per security. While the estimated value of the securities on the pricing date may differ from the estimated value set forth above, we do not expect it to differ significantly absent a material change in market conditions or other relevant factors. In no event will the estimated value of the securities on the pricing date be less than $930.41 per security. The estimated value of the securities was determined for us by Wells Fargo

Securities, LLC using its proprietary pricing models. It is not an indication of actual profit to us or to Wells Fargo Securities, LLC or any of our other affiliates, nor is it an indication of the price, if any, at which Wells Fargo Securities, LLC or any other person may be willing to buy the securities from you at any time after issuance. See "Investment Description" in this pricing supplement.

The securities have complex features and investing in the securities involves risks not associated with an investment in conventional debt securities. See "Risk Factors" herein on page PRS-11.

The securities are unsecured obligations of Wells Fargo & Company, and all payments on the securities are subject to the credit risk of Wells Fargo & Company. If Wells Fargo & Company defaults on its obligations, you could lose some or all of your investment. The securities are not deposits or other obligations of a depository institution and are not insured by the Federal Deposit Insurance Corporation, the Deposit Insurance Fund or any other governmental agency of the United States or any other jurisdiction.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this pricing supplement or the accompanying market measure supplement, prospectus supplement and prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

	Original Offering Price	**Agent Discount(1)**	**Proceeds to Wells Fargo**
Per Security	$1,000.00	$18.25	$981.75
Total			

(1) Wells Fargo Securities, LLC, a wholly owned subsidiary of Wells Fargo & Company, is the agent for the distribution of the securities and is acting as principal. See "Investment Description" in this pricing supplement for further information.

Wells Fargo Securities

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

Terms of the Securities

Issuer:	Wells Fargo & Company ("Wells Fargo").
Market Measure:	SPDR® S&P® Oil & Gas Exploration & Production ETF (the "Fund").
Pricing Date:	August 30, 2018.*
Issue Date:	September 7, 2018.* (T+5)
Original Offering Price:	$1,000 per security. References in this pricing supplement to a "security" are to a security with a face amount of $1,000.
Automatic Call:	If the fund closing price of the Fund on any call date (including the final calculation day) is greater than or equal to the starting price, the securities will be automatically called, and on the related call settlement date you will be entitled to receive a cash payment per security in U.S. dollars equal to the original offering price per security plus the call premium applicable to the relevant call date. The last call date is the final calculation day, and payment upon an automatic call on the final calculation day, if applicable, will be made on the stated maturity date. **Any positive return on the securities will be limited to the applicable call premium, even if the fund closing price of the Fund on the applicable call date significantly exceeds the starting price. You will not participate in any appreciation of the Fund beyond the applicable call premium.** If the securities are automatically called, they will cease to be outstanding on the related call settlement date and you will have no further rights under the securities after such call settlement date. You will not receive any notice from us if the securities are automatically called.

Call Dates and Call Premiums:

Call Date	Call Premium	Payment per Security upon an Automatic Call
September 9, 2019*	12.75% - 13.75% of the original offering price	$1,127.50 - $1,137.50
September 8, 2020*	25.50% - 27.50% of the original offering price	$1,255.00 - $1,275.00
August 30, 2021*	38.25% - 41.25% of the original offering price	$1,382.50 - $1,412.50

The actual call premium and payment per security upon an automatic call that is applicable to each call date will be determined on the pricing date and will be within the ranges specified in the foregoing table.

We refer to August 30, 2021* as the "final calculation day."

	The call dates are subject to postponement for non-trading days and the occurrence of a market disruption event. See "—Postponement of a Calculation Day" below.
Call Settlement Date:	Five business days after the applicable call date (as each such call date may be postponed pursuant to "—Postponement of a Calculation Day" below, if applicable); *provided* that the call settlement date for the last call date is the stated maturity date.
Stated Maturity Date:	September 7, 2021*. If the final calculation day is postponed, the stated maturity date will be the later of (i) September 7, 2021* and (ii) three business days after the final calculation day as postponed. See "—Postponement of a Calculation Day" below. If the stated maturity date is not a business day, the payment to be made on the stated maturity date will be made on the next succeeding business day with the same force and effect as if it had been made on the stated maturity date. The securities are not subject to repayment at the option of any holder of the securities prior to the stated maturity date.

*To the extent that we make any change to the expected pricing date or expected issue date, the call dates and stated maturity date may also be changed in our discretion to ensure that the term of the securities remains the same.

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

Maturity Payment Amount:	If the securities are not automatically called prior to the final calculation day, then on the stated maturity date you will be entitled to receive a cash payment per security in U.S. dollars equal to the maturity payment amount. The "maturity payment amount" will be calculated as follows: • if the ending price is greater than or equal to the starting price: $1,000 *plus* the call premium applicable to the final calculation day as described above under "Call Dates and Call Premiums;" • if the ending price is less than the starting price but greater than or equal to the threshold price: $1,000; or • if the ending price is less than the threshold price: $1,000 *minus*: **If the securities are not automatically called prior to the**

	final calculation day and the ending price is less than the threshold price, you will lose more than 25%, and possibly all, of the original offering price of your securities at maturity.
	All calculations with respect to any payments on the securities (whether upon automatic call or at maturity) will be rounded to the nearest one hundred-thousandth, with five one-millionths rounded upward (e.g., 0.000005 would be rounded to 0.00001); and such payment will be rounded to the nearest cent, with one-half cent rounded upward.
Fund Closing Price:	The "fund closing price" with respect to the Fund on any trading day means the product of (i) the closing price of one share of the Fund (or one unit of any other security for which a fund closing price must be determined) on such trading day and (ii) the adjustment factor applicable to the Fund on such trading day.
Closing Price:	The "closing price" for one share of the Fund (or one unit of any other security for which a closing price must be determined) on any trading day means the official closing

	price on such day published by the principal United States securities exchange registered under the Securities Exchange Act of 1934, as amended, on which the Fund (or any such other security) is listed or admitted to trading.
Adjustment Factor:	The "adjustment factor" means, with respect to a share of the Fund (or one unit of any other security for which a fund closing price must be determined), 1.0, subject to adjustment in the event of certain events affecting the shares of the Fund. See "Additional Terms of the Securities—Anti-dilution Adjustments Relating to the Fund; Alternate Calculation" below.
Starting Price:	$, which is the fund closing price of the Fund on the pricing date.
Ending Price:	The "ending price" will be the fund closing price of the Fund on the final calculation day.
Threshold Price:	$, which is equal to 75% of the starting price.
Postponement of a Calculation Day:	The call dates (including the final calculation day) are each referred to as a "calculation day." If any calculation day is not a trading day (as defined below), such calculation day will be postponed to the next succeeding trading

	day. A calculation day is also subject to postponement due to the occurrence of a market disruption event. See “Additional Terms of the Securities—Market Disruption Events.”
Calculation Agent:	Wells Fargo Securities, LLC
No Listing:	The securities will not be listed on any securities exchange or automated quotation system.
Material Tax Consequences:	For a discussion of the material U.S. federal income and certain estate tax consequences of the ownership and disposition of the securities, see “United States Federal Tax Considerations.”

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

Agent:	Wells Fargo Securities, LLC, a wholly owned subsidiary of Wells Fargo & Company. The agent may resell the securities to other securities dealers at the original offering price of the securities less a concession not in excess of $17.50 per security. Such securities dealers may include Wells Fargo Advisors (“WFA”) (the trade name of the retail brokerage business of our affiliates, Wells Fargo Clearing Services, LLC and Wells Fargo Advisors

Financial Network, LLC). In addition to the concession allowed to WFA, WFS will pay $0.75 per security of the agent's discount to WFA as a distribution expense fee for each security sold by WFA.

The agent or another affiliate of ours expects to realize hedging profits projected by its proprietary pricing models to the extent it assumes the risks inherent in hedging our obligations under the securities. If any dealer participating in the distribution of the securities or any of its affiliates conducts hedging activities for

	us in connection with the securities, that dealer or its affiliate will expect to realize a profit projected by its proprietary pricing models from such hedging activities. Any such projected profit will be in addition to any discount, concession or distribution expense fee received in connection with the sale of the securities to you.
Denominations:	\$1,000 and any integral multiple of \$1,000.
CUSIP:	95001B6B5

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

Investment Description

The Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021 (the "securities") are senior unsecured debt securities of Wells Fargo that do not pay interest, do not repay a fixed amount of principal at stated maturity and are subject to potential automatic call upon the terms described in this pricing supplement. The return you receive on the securities and whether they are automatically called will depend on the performance of the Fund. The securities provide:

(i) the possibility of an automatic early call of the securities at a fixed call premium if the fund closing price of the Fund on either of the first two call dates is greater than or equal to the starting price; and

(ii) if the securities are not automatically called prior to the final calculation day:

(a) the possibility of a return equal to the call premium applicable to the final calculation day if the fund closing price of the Fund on the final calculation day is greater than or equal to the starting price;

(b) repayment of the original offering price if, **and only if**, the fund closing price of the Fund on the final calculation day is not less than the starting price by more than 25%; and

(c) full exposure to the decrease in the price of the Fund from the starting price if the fund closing price of the Fund on the final calculation day is less than the starting price by more than 25%.

If the fund closing price of the Fund is less than the starting price on each of the three call dates (including the final calculation day), you will not receive any positive return on your investment in the securities. If the fund closing price of the Fund on the final calculation day is less than the starting price by more than 25%, you will lose more than 25%, and possibly all, of the original offering price of your securities at maturity.

Any positive return on the securities will be limited to the applicable call premium, even if the fund closing price of the Fund on the applicable call date exceeds the starting price by more than percentage represented by that call premium. You will not participate in any appreciation of the Fund beyond the applicable fixed call premium.

All payments on the securities are subject to the credit risk of Wells Fargo.

The Fund is an exchange traded fund that seeks to provide investment results that, before fees and expenses, correspond generally to the performance of the S&P® Oil & Gas Exploration & Production Select Industry® Index, an equity index that is intended to measure the performance of the oil & gas exploration & production sub-industry of the S&P® Total Market Index, a benchmark that measures the performance of the United States equity market.

You should read this pricing supplement together with the market measure supplement dated May 18, 2018, the prospectus supplement dated January 24, 2018 and the prospectus dated April 27, 2018 for additional information about the securities. When you read the accompanying prospectus supplement, please note that all references in such supplement to the prospectus dated November 3, 2017, or to any sections therein, should refer instead to the accompanying prospectus dated April 27, 2018 or to the corresponding sections of such prospectus, as applicable. Information included in this pricing supplement supersedes information in the market measure supplement, prospectus supplement and prospectus to the extent it is different from that information. Certain defined terms used but not defined herein have the meanings set forth in the prospectus supplement.

PRS-5

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

The original offering price of each security of $1,000 includes certain costs that are borne by you. Because of these costs, the estimated value of the securities on the pricing date will be less than the original offering price. The costs included in the original offering price relate to selling, structuring, hedging and issuing the securities, as well as to our funding considerations for debt of this type.

The costs related to selling, structuring, hedging and issuing the securities include (i) the agent discount (if any), (ii) the projected profit that our hedge counterparty (which may be one of our affiliates) expects to realize for assuming risks inherent in hedging our obligations under the securities and (iii) hedging and other costs relating to the offering of the securities.

Our funding considerations take into account the higher issuance, operational and ongoing management costs of market-linked debt such as the securities as compared to our conventional debt of the same maturity, as well as our liquidity needs and preferences. Our funding considerations are reflected in the fact that we determine the economic terms of the securities based on an assumed funding rate that is generally lower than the interest rates implied by secondary market prices for our debt obligations and/or by other traded instruments referencing our debt obligations, which we refer to as our "secondary market rates." As discussed below, our secondary market rates are used in determining the estimated value of the securities.

If the costs relating to selling, structuring, hedging and issuing the securities were lower, or if the assumed funding rate we use to determine the economic terms of the securities were higher, the economic terms of the securities would be more favorable to you and the estimated value would be higher. The estimated value of the securities as of the pricing date will be set forth in the final pricing supplement.

Determining the estimated value

Our affiliate, Wells Fargo Securities, LLC ("WFS"), calculated the estimated value of the securities set forth on the cover page of this pricing supplement based on its proprietary pricing models. Based on these pricing models and related market inputs and assumptions referred to in this section below, WFS determined an estimated value for the securities by estimating the value of the combination of hypothetical financial instruments that would replicate the payout on the securities, which combination consists of a non-interest bearing, fixed-income bond (the "debt component") and one or more derivative instruments underlying the economic terms of the securities (the "derivative component”).

The estimated value of the debt component is based on a reference interest rate, determined by WFS as of a recent date, that generally tracks our secondary market rates. Because WFS does not continuously calculate our reference interest rate, the reference interest rate used in the calculation of the estimated value of the debt component may be higher or lower than our secondary market rates at the time of that calculation. As noted above, we determine the economic terms of the securities based upon an assumed funding rate that is generally lower than our secondary market rates. In contrast, in determining the estimated value of the securities, we value the debt component using a reference interest rate that generally tracks our secondary market rates. Because the reference interest rate is generally higher than the assumed funding rate, using the reference interest rate to value the debt component generally results in a lower estimated value for the debt component, which we believe more closely approximates a market valuation of the debt component than if we had used the assumed funding rate.

WFS calculated the estimated value of the derivative component based on a proprietary derivative-pricing model, which generated a theoretical price for the derivative instruments that constitute the derivative component based on various inputs, including the “derivative component factors” identified in “Risk Factors—The Value Of The Securities Prior To Stated Maturity Will Be Affected By Numerous Factors, Some Of Which Are Related In Complex Ways.” These inputs may be market-observable or may be based on assumptions made by WFS in its discretion.

The estimated value of the securities determined by WFS is subject to important limitations. See “Risk Factors—The Estimated Value Of The Securities Is Determined By Our Affiliate’s Pricing Models, Which May Differ From Those Of Other Dealers” and “—Our Economic Interests And Those Of Any Dealer Participating In The Offering Are Potentially Adverse To Your Interests.”

Valuation of the securities after issuance

The estimated value of the securities is not an indication of the price, if any, at which WFS or any other person may be willing to buy the securities from you in the secondary market. The price, if any, at which WFS or any of its affiliates may purchase the securities in the secondary market will be based upon WFS’s proprietary pricing models and will fluctuate over the term of the securities due to changes in market conditions and other relevant factors. However, absent changes in these market conditions and other relevant factors, except as otherwise described in the following paragraph, any secondary market price will be lower than the estimated value on the pricing date because the secondary market price will be reduced by a bid-offer spread, which may vary depending on the aggregate face amount of the securities to be purchased in the secondary market transaction, and the expected cost of unwinding any related hedging transactions. Accordingly, unless market conditions and other relevant factors change significantly in your favor, any secondary market price for the securities is likely to be less than the original offering price.

If WFS or any of its affiliates makes a secondary market in the securities at any time up to the issue date or during the 3-month period following the issue date, the secondary market price offered by WFS or any of its affiliates will be increased by an amount reflecting a portion of the costs associated with selling, structuring, hedging and issuing the securities that are included in the original offering price. Because this portion of the costs is not fully deducted upon issuance, any secondary market price offered by WFS or any of its affiliates during this period will be higher than it would be if it were based solely on WFS's proprietary pricing models less the bid-offer spread and

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

hedging unwind costs described above. The amount of this increase in the secondary market price will decline steadily to zero over this 3-month period. If you hold the securities through an account at WFS or any of its affiliates, we expect that this increase will also be reflected in the value indicated for the securities on your brokerage account statement.

If WFS or any of its affiliates makes a secondary market in the securities, WFS expects to provide those secondary market prices to any unaffiliated broker-dealers through which the securities are held and to commercial pricing vendors. If you hold your securities through an account at a broker-dealer other than WFS or any of its affiliates, that broker-dealer may obtain market prices for the securities from WFS (directly or indirectly), but could also obtain such market prices from other sources, and may be willing to purchase the securities at any given time at a price that differs from the price at which WFS or any of its affiliates is willing to purchase the securities. As a result, if you hold your securities through an account at a broker-dealer other than WFS or any of its affiliates, the value of the securities on your brokerage account statement may be different than if you held your securities at WFS or any of its affiliates.

The securities will not be listed or displayed on any securities exchange or any automated quotation system. Although WFS and/or its affiliates may buy the securities from investors, they are not obligated to do so and are not required to make a market for the securities. There can be no assurance that a secondary market will develop.

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

Investor Considerations

We have designed the securities for investors who:

- believe that the fund closing price of the Fund will be greater than or equal to the starting price on one of the three call dates;
- seek the potential for a fixed return if the Fund has appreciated at all as of any of the three call dates in lieu of full participation in any potential appreciation of the Fund;
- understand that if the fund closing price of the Fund is less than the starting price on each of the three call dates (including the final calculation day), they will not receive any positive return on their investment in the securities, and that if the fund closing price of the Fund on the final calculation day is less than the starting price by more than 25%, they will be fully exposed to the decrease in the Fund from the starting price, and will lose more than 25%, and possibly all, of the original offering price per security at maturity;
- understand that the term of the securities may be as short as approximately one year and that they will not receive a higher call premium payable with respect to a later call date if the securities are called on an earlier call date;
- are willing to forgo interest payments on the securities and dividends on shares of the Fund; and
- are willing to hold the securities until maturity.

The securities are not designed for, and may not be a suitable investment for, investors who:

- seek a liquid investment or are unable or unwilling to hold the securities to maturity;
- require full payment of the original offering price of the securities at stated maturity;
- believe that the fund closing price of the Fund will be less than the starting price on each of the three call dates;

seek a security with a fixed term;

are unwilling to accept the risk that, if the fund closing price of the Fund is less than the starting price on each of the three call dates (including the final calculation day), they will not receive any positive return on their investment in the securities;

are unwilling to accept the risk that the fund closing price of the Fund may decrease by more than 25% from the starting price to the ending price;

are unwilling to purchase securities with an estimated value as of the pricing date that is lower than the original offering price and that may be as low as the lower estimated value set forth on the cover page;

seek current income;

are unwilling to accept the risk of exposure to companies in the oil and gas exploration and production industry in the United States equity market;

seek exposure to the upside performance of the Fund beyond the applicable call premiums;

are unwilling to accept the credit risk of Wells Fargo; or

prefer the lower risk of fixed income investments with comparable maturities issued by companies with comparable credit ratings.

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

Determining Timing and Amount of Payment on the Securities

The timing and amount of the payment you will receive will be determined as follows:

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

Hypothetical Payout Profile

The following profile illustrates the potential payment on the securities for a range of hypothetical percentage changes in the fund closing price of the Fund from the pricing date to the applicable call date (including the final calculation day). The profile is based on a hypothetical call premium of 13.25% for the first call date, 26.50% for the second call date and 39.75% for the final call date (based on the midpoint of the ranges specified for the call premiums) and a threshold price equal to 75% of the starting price. This profile has been prepared for purposes of illustration only. Your actual return will depend on (i) whether the securities are automatically called; (ii) if the securities are automatically called, the actual call premium and the actual call date on which the securities are called; (iii) if the securities are not automatically called, the actual ending price of the Fund; and (iv) whether you hold your securities to maturity or earlier automatic call.

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

Risk Factors

The securities have complex features and investing in the securities will involve risks not associated with an investment in conventional debt securities. You should carefully consider the risk factors set forth below as well as the other information contained in this pricing supplement and the accompanying market measure supplement, prospectus supplement and prospectus, including the documents they incorporate by reference. As described in more detail below, the value of the securities may vary considerably before the stated maturity date due to events that are difficult to predict and are beyond our control. You should reach an investment decision only after you have carefully considered with your advisors the suitability of an investment in the securities in light of your particular circumstances. The index underlying the Fund is sometimes referred to as the "underlying index."

If The Securities Are Not Automatically Called And The Ending Price Is Less Than The Threshold Price, You Will Lose More Than 25%, And Possibly All, Of The Original Offering Price Of Your Securities At Maturity.

We will not repay you a fixed amount on the securities at stated maturity. If the fund closing price of the Fund is less than the starting price on each of the three call dates, the securities will not be automatically called, and you will receive a maturity payment amount that will be equal to or less than the original offering price per security, depending on the ending price (i.e., the fund closing price of the Fund on the final calculation day).

If the ending price is less than the threshold price, the maturity payment amount will be reduced by an amount equal to the decline in the price of the Fund to the extent it is below the starting price (expressed as a percentage of the starting price). The threshold price is 75% of the starting price. For example, if the securities are not automatically called and the Fund has declined by 25.1% from the starting price to the ending price, you will not receive any benefit of the contingent downside protection feature and you will lose 25.1% of the original offering price per security. As a result, you will not receive any protection if the price of the Fund declines significantly and you may lose more than 25%, and possibly all, of the original offering price per security at stated maturity, even if the price of the Fund is greater than or equal to the starting price or the threshold price at certain times during the term of the securities.

If the securities are not automatically called, your return on the securities will be zero or negative, and therefore will be less than the return you would earn if you bought a traditional interest-bearing debt security of Wells Fargo or another issuer with a similar credit rating with the same stated maturity date.

No Periodic Interest Will Be Paid On The Securities.

No periodic payments of interest will be made on the securities. However, if the agreed-upon tax treatment is successfully challenged by the Internal Revenue Service (the "IRS"), you may be required to recognize taxable income over the term of the securities. You should review the section of this pricing supplement entitled "United States Federal Tax Considerations."

The Potential Return On The Securities Is Limited To The Call Premium.

The potential return on the securities is limited to the applicable call premium, regardless of the performance of the Fund. The Fund may appreciate by significantly more than the percentage represented by the applicable call premium from the pricing date through the applicable call date, in which case an investment in the securities will underperform a hypothetical alternative investment providing a 1-to-1 return based on the performance of the Fund. In addition, you will not receive the value of dividends or other distributions paid with respect to the Fund. Furthermore, if the securities are called on an earlier call date, you will receive a lower call premium than if the securities were called on a later call date, and accordingly, if the securities are called on one of the two earlier call dates, you will not receive the highest potential call premium.

You Will Be Subject To Reinvestment Risk.

If your securities are automatically called early, the term of the securities may be reduced to as short as approximately one year. There is no guarantee that you would be able to reinvest the proceeds from an investment in the securities at a comparable return for a similar level of risk in the event the securities are automatically called prior to maturity.

The Securities Are Subject To The Credit Risk Of Wells Fargo.

The securities are our obligations and are not, either directly or indirectly, an obligation of any third party. Any amounts payable under the securities are subject to our creditworthiness, and you will have no ability to pursue the shares of the Fund or any securities held by the Fund for payment. As a result, our actual and perceived creditworthiness may affect the value of the securities and, in the event we were to default on our obligations, you may not receive any amounts owed to you under the terms of the securities.

Holders Of The Securities Have Limited Rights Of Acceleration.

Payment of principal on the securities may be accelerated only in the case of payment defaults that continue for a period of 30 days or certain events of bankruptcy or insolvency, whether voluntary or involuntary. If you purchase the securities, you will have no right to accelerate the payment of principal on the securities if we fail in the performance of any of our obligations under the securities, other than the obligations to pay principal and interest on the securities. See “Description of Notes—Events of Default and Covenant Breaches” in the accompanying prospectus supplement.

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

Holders Of The Securities Could Be At Greater Risk For Being Structurally Subordinated If We Convey, Transfer Or Lease All Or Substantially All Of Our Assets To One Or More Of Our Subsidiaries.

Under the indenture, we may convey, transfer or lease all or substantially all of our assets to one or more of our subsidiaries. In that event, third-party creditors of our subsidiaries would have additional assets from which to recover on their claims while holders of the securities would be structurally subordinated to creditors of our subsidiaries with respect to such assets. See "Description of Notes—Consolidation, Merger or Sale" in the accompanying prospectus supplement.

The Estimated Value Of The Securities On The Pricing Date, Based On WFS's Proprietary Pricing Models, Will Be Less Than The Original Offering Price.

The original offering price of the securities includes certain costs that are borne by you. Because of these costs, the estimated value of the securities on the pricing date will be less than the original offering price. The costs included in the original offering price relate to selling, structuring, hedging and issuing the securities, as well as to our funding considerations for debt of this type. The costs related to selling, structuring, hedging and issuing the securities include (i) the agent discount (if any), (ii) the projected profit that our hedge counterparty (which may be one of our affiliates) expects to realize for assuming risks inherent in hedging our obligations under the securities and (iii) hedging and other costs relating to the offering of the securities. Our funding considerations are reflected in the fact that we determine the economic terms of the securities based on an assumed funding rate that is generally lower than our secondary market rates. If the costs relating to selling, structuring, hedging and issuing the securities were lower, or if the assumed funding rate we use to determine the economic terms of the securities were higher, the economic terms of the securities would be more favorable to you and the estimated value would be higher.

The Estimated Value Of The Securities Is Determined By Our Affiliate's Pricing Models, Which May Differ From Those Of Other Dealers.

The estimated value of the securities was determined for us by WFS using its proprietary pricing models and related market inputs and assumptions referred to above under "Investment Description—Determining the estimated value." Certain inputs to these models may be determined by WFS in its discretion. WFS's views on these inputs may differ from other dealers' views, and WFS's estimated value of the securities may be higher, and perhaps materially higher, than the estimated value of the securities that would be determined by other dealers in the market. WFS's models and its inputs and related assumptions may prove to be wrong and therefore not an accurate reflection of the value of the securities.

The Estimated Value Of The Securities Is Not An Indication Of The Price, If Any, At Which WFS Or Any Other Person May Be Willing To Buy The Securities From You In The Secondary Market.

The price, if any, at which WFS or any of its affiliates may purchase the securities in the secondary market will be based on WFS's proprietary pricing models and will fluctuate over the term of the securities as a result of changes in the market and other factors described in the next risk factor. Any such secondary market price for the securities will also be reduced by a bid-offer spread, which may vary depending on the aggregate face amount of the securities to be purchased in the secondary market transaction, and the expected cost of unwinding any related hedging transactions. Unless the factors described in the next risk factor change significantly in your favor, any such secondary market price for the securities is likely to be less than the original offering price.

If WFS or any of its affiliates makes a secondary market in the securities at any time up to the issue date or during the 3-month period following the issue date, the secondary market price offered by WFS or any of its affiliates will be increased by an amount reflecting a portion of the costs associated with selling, structuring, hedging and issuing the securities that are included in the original offering price. Because this portion of the costs is not fully deducted upon issuance, any secondary market price offered by WFS or any of its affiliates during this period will be higher than it would be if it were based solely on WFS's proprietary pricing models less the bid-offer spread and hedging unwind costs described above. The amount of this increase in the secondary market price will decline steadily to zero over this 3-month period. If you hold the securities through an account at WFS or any of its affiliates, we expect that this increase will also be reflected in the value indicated for the securities on your brokerage account statement. If you hold your securities through an account at a broker-dealer other than WFS or any of its affiliates, the value of the securities on your brokerage account statement may be different than if you held your securities at WFS or any of its affiliates, as discussed above under "Investment Description—Valuation of the securities after issuance."

The Value Of The Securities Prior To Stated Maturity Will Be Affected By Numerous Factors, Some Of Which Are Related In Complex Ways.

The value of the securities prior to stated maturity will be affected by the then-current price of the Fund, interest rates at that time and a number of other factors, some of which are interrelated in complex ways. The effect of any one factor may be offset or magnified by the effect of another factor. The following factors, which we refer to as the "derivative component factors," are expected to affect the value of the securities. When we refer to the "value" of your security, we mean the value you could receive for your security if you are able to sell it in the open market before the stated maturity date.

Fund Performance. The value of the securities prior to maturity will depend substantially on the then-current price of the Fund. The price at which you may be able to sell the securities before stated maturity may be at a discount, which could be substantial, from their original offering price, if the price of the Fund at such time is less than, equal to or not sufficiently above the starting price or threshold price.

Interest Rates. The value of the securities may be affected by changes in the interest rates in the U.S. markets.

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

Volatility Of The Fund. Volatility is the term used to describe the size and frequency of market fluctuations. The value of the securities may be affected if the volatility of the Fund changes.

Time Remaining To Maturity. The value of the securities at any given time prior to maturity will likely be different from that which would be expected based on the then-current price of the Fund. This difference will most likely reflect a discount due to expectations and uncertainty concerning the price of the Fund during the period of time still remaining to the stated maturity date. In general, as the time remaining to maturity decreases, the value of the securities will approach the amount that would be payable at maturity based on the then-current price of the Fund.

Dividend Yields On Securities Included In The Fund. The value of the securities may be affected by the dividend yields on securities held by the Fund (the amount of such dividends may influence the closing price of the shares of the Fund).

In addition to the derivative component factors, the value of the securities will be affected by actual or anticipated changes in our creditworthiness, as reflected in our secondary market rates. The value of the securities will also be limited by the automatic call feature because if the securities are automatically called, the return will not be greater than the applicable call premium. You should understand that the impact of one of the factors specified above, such as a change in interest rates, may offset some or all of any change in the value of the securities attributable to another factor, such as a change in the price of the Fund. Because numerous factors are expected to affect the value of the securities, changes in the price of the Fund may not result in a comparable change in the value of the securities.

The Securities Will Not Be Listed On Any Securities Exchange And We Do Not Expect A Trading Market For The Securities To Develop.

The securities will not be listed or displayed on any securities exchange or any automated quotation system. Although the agent and/or its affiliates may purchase the securities from holders, they are not obligated to do so and are not required to make a market for the securities. There can be no assurance that a secondary market will develop. Because we do not expect that any market makers will participate in a secondary market for the securities, the price at which you may be able to sell your securities is likely to depend on the price, if any, at which the agent is willing to buy your securities.

If a secondary market does exist, it may be limited. Accordingly, there may be a limited number of buyers if you decide to sell your securities prior to stated maturity. This may affect the price you receive upon such sale. Consequently, you should be willing to hold the securities to stated maturity.

Historical Prices Of The Fund Or The Securities Included In The Fund Should Not Be Taken As An Indication Of The Future Performance Of The Fund During The Term Of The Securities.

The trading price of the shares of the Fund will determine the closing price of the Fund and, therefore, whether the securities will be automatically called on any of the call dates (including the final calculation day) or the amount payable to you at maturity. As a result, it is impossible to predict whether the fund closing price of the Fund will fall or rise compared to the starting price. The trading price of the shares of the Fund will be influenced by complex and interrelated political, economic, financial and other factors that can affect the markets in which the Fund and the securities comprising the Fund are traded and the values of the Fund and such securities. Accordingly, any historical prices of the Fund do not provide an indication of the future performance of the Fund.

An Investment In The Securities Is Subject To Risks Associated With Investing In Stocks In The Oil And Gas Exploration And Production Industry.

The Fund, because it is concentrated in the oil and gas exploration and production industry, may be adversely affected not only by the performance of the companies in the oil and gas exploration and production industry in which it invests but also may be more susceptible to any single economic, market, political or regulatory occurrence affecting the oil and gas exploration and production industry. Oil and gas companies develop and produce crude oil and natural gas and provide drilling and other energy resources production and distribution related services. Stock prices for these types of companies are affected by supply and demand both for their specific product or service and for energy products in general. The price of oil and gas, exploration and production spending, government regulation, world events and economic conditions will likewise affect the performance of these companies. Correspondingly, securities of companies in the energy field are subject to swift price and supply fluctuations caused by events relating to international politics, energy conservation, the success of exploration projects, and tax and other governmental regulatory policies. Weak demand for the companies' products or services or for energy products and services in general, as well as negative developments in these other areas, would adversely impact the Fund's performance. Oil and gas exploration and production can be significantly affected by natural disasters as well as changes in exchange rates, interest rates, government regulation, world events and economic conditions. These companies may be at risk for environmental damage claims.

In addition, the Fund is classified as "non-diversified." A non-diversified fund generally may invest a larger percentage of its assets in the securities of a smaller number of issuers. As a result, the Fund may be more susceptible to the risks associated with these particular companies, or to a single economic, political or regulatory occurrence affecting these companies.

The Fund May Not Be Representative Of An Investment In The Oil And Gas Exploration And Production Industry.

The Fund does not represent a direct investment in the oil and gas exploration and production industry. The Fund consists of securities of companies whose primary lines of business are directly associated with the oil and gas exploration and production industry. As a result, the fund closing price of the Fund will be influenced by a variety of economic, financial and other factors affecting those companies, some of which may be unrelated to the market or other conditions applicable to the oil and gas exploration and production industry. As a result, the Fund may not perfectly correlate with the performance of the oil and gas exploration and production industry and the fund closing price of the Fund could decrease even if the performance of the oil and gas exploration and production industry as a whole increases.

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

Changes That Affect The Fund Or The Underlying Index May Adversely Affect The Value Of The Securities And The Amount You Will Receive At Stated Maturity.

The policies of the sponsor of the Fund (the "fund sponsor") concerning the calculation of the Fund's net asset value, additions, deletions or substitutions of securities in the Fund and the manner in which changes in the underlying index are reflected in the Fund, and changes in those policies, could affect the closing price of the shares of the Fund and, therefore, may affect the value of the securities, the likelihood of the occurrence of an automatic call and the amount payable at stated maturity. Similarly, the policies of the sponsor of the underlying index (the "underlying index sponsor") concerning the calculation of the underlying index and the addition, deletion or substitution of securities comprising the underlying index and the manner in which the underlying index sponsor takes account of certain changes affecting such securities may affect the level of the underlying index and the closing price of the shares of the Fund and, therefore, may affect the value of the securities, the likelihood of the occurrence of an automatic call and the amount payable at stated maturity. The underlying index sponsor could also discontinue or suspend calculation or dissemination of the underlying index or materially alter the methodology by which it calculates the underlying index. Any such actions could adversely affect the value of the securities.

We Cannot Control Actions By Any Of The Unaffiliated Companies Whose Securities Are Included In The Fund Or The Underlying Index.

Actions by any company whose securities are included in the Fund or in the underlying index may have an adverse effect on the price of its security, the closing price of the Fund on any call date (including the final calculation day) and the value of the securities. We are not affiliated with any company whose security is represented in the Fund or the underlying index. These companies will not be involved in the offering of the securities and will have no obligations with respect to the securities, including any obligation to take our or your interests into consideration for any reason. These companies will not receive any of the proceeds of the offering of the securities and will not be responsible for, and will not have participated in, the determination of the timing of, prices for, or quantities of, the securities to be issued. These companies will not be involved with the administration, marketing or trading of the securities and will have no obligations with respect to any amounts to be paid to you on the securities.

We And Our Affiliates Have No Affiliation With The Fund Sponsor Or The Underlying Index Sponsor And Have Not Independently Verified Their Public Disclosure Of Information.

We and our affiliates are not affiliated in any way with the fund sponsor or the underlying index sponsor (collectively, the "sponsors") and have no ability to control or predict their actions, including any errors in or discontinuation of disclosure regarding their methods or policies relating to the management or calculation of the Fund or the underlying index. We have derived the information about the sponsors, the Fund and the underlying index contained in this pricing supplement and the accompanying market measure supplement from publicly available information, without independent verification. You, as an investor in the securities, should make your own investigation into the Fund, the underlying index and the sponsors. The sponsors are not involved in the offering of the securities made hereby in any way and have no obligation to consider your interests as an owner of the securities in taking any actions that might affect the value of the securities.

An Investment Linked To The Shares Of The Fund Is Different From An Investment Linked To The Underlying Index.

The performance of the shares of the Fund may not exactly replicate the performance of the underlying index because the Fund may not invest in all of the securities included in the underlying index and because the Fund will reflect transaction costs and fees that are not included in the calculation of the underlying index. The Fund may also hold securities or derivative financial instruments not included in the underlying index. It is also possible that the Fund may not fully replicate the performance of the underlying index due to the temporary unavailability of certain securities in the secondary market or due to other extraordinary circumstances. In addition, because the shares of the Fund are traded on a securities exchange and are subject to market supply and investor demand, the value of a share of the Fund may differ from the net asset value per share of the Fund. As a result, the performance of the Fund may not correlate perfectly with the performance of the underlying index, and the return on the securities based on the performance of the Fund will not be the same as the return on securities based on the performance of the underlying index.

There Are Risks Associated With The Fund.

Although the shares of the Fund are listed for trading on NYSE Arca, Inc. (the "NYSE Arca") and a number of similar products have been traded on the NYSE Arca or other securities exchanges for varying periods of time, there is no assurance that an active trading market will continue for the shares of the Fund or that there will be liquidity in the trading market.

In addition, the Fund is subject to management risk, which is the risk that the fund sponsor's investment strategy, the implementation of which is subject to a number of constraints, may not produce the intended results. For example, the fund sponsor may elect to invest certain Fund assets in shares of equity securities that are not included in the underlying index. The Fund is also not actively managed and may be affected by a general decline in market segments relating to the underlying index. Further, the fund sponsor invests in securities included in, or representative of, the underlying index regardless of their investment merits, and the fund sponsor does not attempt to take defensive positions in declining markets.

Further, under continuous listing standards adopted by the NYSE Arca, the Fund will be required to confirm on an ongoing basis that the securities included in the underlying index satisfy the applicable listing requirements. In the event that the underlying index does not comply with the applicable listing requirements, the Fund would be required to rectify such non-compliance by requesting that the underlying index sponsor modify such underlying index, transitioning to a new underlying index or obtaining relief from the SEC. There can be no assurance that the underlying index sponsor would modify the underlying index or that relief would be obtained from the SEC and, therefore, non-compliance with the continuous listing standards may result in the Fund being delisted by the NYSE Arca. If the Fund

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

were delisted by the NYSE Arca, the calculation agent would select a successor fund or, if no successor fund is available, would determine the fund closing price of the Fund on any date of determination.

These risks may adversely affect the price of the shares of the Fund and, consequently, the value of the securities.

You Will Not Have Any Shareholder Rights With Respect To The Shares Of The Fund.

You will not become a holder of shares of the Fund or a holder of securities included in the underlying index as a result of owning a security. You will not have any voting rights, any right to receive dividends or other distributions or any other rights with respect to such shares or securities. You will have no right to receive delivery of any shares or securities at stated maturity or upon automatic call.

Anti-dilution Adjustments Relating To The Shares Of The Fund Do Not Address Every Event That Could Affect Such Shares.

An adjustment factor, as described herein, will be used to determine the fund closing price of the Fund. The adjustment factor will be adjusted by the calculation agent for certain events affecting the shares of the Fund. However, the calculation agent will not make an adjustment for every event that could affect such shares. If an event occurs that does not require the calculation agent to adjust the adjustment factor, the value of the securities may be adversely affected.

A Call Settlement Date And The Stated Maturity Date May Be Postponed If A Calculation Day Is Postponed.

A calculation day (including the final calculation day) will be postponed if the applicable originally scheduled calculation day is not a trading day or if the calculation agent determines that a market disruption event has occurred or is continuing on that calculation day. If such a postponement occurs with respect to a calculation day other than the final calculation day, then the related call settlement date will be postponed. If such a postponement occurs with respect to the final calculation day, the stated maturity date will be the later of (i) the initial stated maturity date and (ii) three business days after the final calculation day as postponed.

Our Economic Interests And Those Of Any Dealer Participating In The Offering Are Potentially Adverse To Your Interests.

You should be aware of the following ways in which our economic interests and those of any dealer participating in the distribution of the securities, which we refer to as a "participating dealer," are potentially adverse to your interests as an investor in the securities. In engaging in certain of the activities described below, our affiliates or any participating dealer or its affiliates may take actions that may adversely affect the value of and your return on the securities, and in so doing they will have no obligation to consider your interests as an investor in the securities. Our affiliates or any participating dealer or its affiliates may realize a profit from these activities even if investors do not receive a favorable investment return on the securities.

The calculation agent is our affiliate and may be required to make discretionary judgments that affect the return you receive on the securities. WFS, which is our affiliate, will be the calculation agent for the securities. As calculation agent, WFS will determine the fund closing price of the Fund on each calculation day and whether the securities are automatically called, and may be required to make other determinations that affect the return you receive on the securities. In making these determinations, the calculation agent may be required to make discretionary judgments, including determining whether a market disruption event has occurred on a scheduled calculation day, which may result in postponement of that calculation day; determining the fund closing price of the Fund if a calculation day is postponed to the last day to which it may be postponed and a market disruption event occurs on that day; adjusting the adjustment factor and other terms of the securities in certain circumstances; if the Fund undergoes a liquidation event, selecting a successor fund or, if no successor fund is available, determining the fund closing price of the Fund on the applicable calculation day; and determining whether to adjust the fund closing price of the Fund on a calculation day in the event of certain changes in or modifications to the Fund or the underlying index. In making these discretionary judgments, the fact that WFS is our affiliate may cause it to have economic interests that are adverse to your interests as an investor in the securities, and WFS's determinations as calculation agent may adversely affect your return on the securities.

The estimated value of the securities was calculated by our affiliate and is therefore not an independent third-party valuation. WFS calculated the estimated value of the securities set forth on the cover page of this pricing supplement, which involved discretionary judgments by WFS, as described under "Risk Factors—The Estimated Value Of The Securities Is Determined By Our Affiliate's Pricing Models, Which May Differ From Those Of Other Dealers" above. Accordingly, the estimated value of the securities set forth on the cover page of this pricing supplement is not an independent third-party valuation.

Research reports by our affiliates or any participating dealer or its affiliates may be inconsistent with an investment in the securities and may adversely affect the price of the Fund. Our affiliates or any participating dealer in the offering of the securities or its affiliates may, at present or in the future, publish research reports on the Fund or the underlying index or the companies whose securities are included in the Fund or the underlying index. This research is modified from time to time without notice and may, at present or in the future, express opinions or provide recommendations that are inconsistent with purchasing or holding the securities. Any research reports on the Fund or the underlying index or the companies whose securities are included in the Fund or the underlying index could adversely affect the price of the Fund and, therefore, adversely affect the value of and your return on the securities. You are encouraged to derive information concerning the Fund from multiple sources and should not rely on the views expressed by us or our affiliates or any participating dealer or its affiliates. In addition, any research reports on the Fund or the

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

underlying index or the companies whose securities are included in the Fund or the underlying index published on or prior to the pricing date could result in an increase in the price of the Fund on the pricing date, which would adversely affect investors in the securities by increasing the price at which the Fund must close on a calculation day in order for investors in the securities to receive a favorable return.

Business activities of our affiliates or any participating dealer or its affiliates with the companies whose securities are included in the Fund may adversely affect the price of the Fund. Our affiliates or any participating dealer or its affiliates may, at present or in the future, engage in business with the companies whose securities are included in the Fund or the underlying index, including making loans to those companies (including exercising creditors' remedies with respect to such loans), making equity investments in those companies or providing investment banking, asset management or other advisory services to those companies. These business activities could adversely affect the price of the Fund and, therefore, adversely affect the value of and your return on the securities. In addition, in the course of these business activities, our affiliates or any participating dealer or its affiliates may acquire non-public information about one or more of the companies whose securities are included in the Fund or the underlying index. If our affiliates or any participating dealer or its affiliates do acquire such non-public information, we and they are not obligated to disclose such non-public information to you.

Hedging activities by our affiliates or any participating dealer or its affiliates may adversely affect the price of the Fund. We expect to hedge our obligations under the securities through one or more hedge counterparties, which may include our affiliates or any participating dealer or its affiliates. Pursuant to such hedging activities, our hedge counterparties may acquire shares of the Fund, securities included in the Fund or the underlying index or listed or over-the-counter derivative or synthetic instruments related to the Fund or such securities. Depending on, among other things, future market conditions, the aggregate amount and the composition of such positions are likely to vary over time. To the extent that our hedge counterparties have a long hedge position in shares of the Fund or any of the securities included in the Fund or the underlying index, or derivative or synthetic instruments related to the Fund or such securities, they may liquidate a portion of such holdings at or about the time of a calculation day or at or about the time of a change in the securities included in the Fund or the underlying index. These hedging activities could potentially adversely affect the price of the shares of the Fund and, therefore, adversely affect the value of and your return on the securities.

Trading activities by our affiliates or any participating dealer or its affiliates may adversely affect the price of the Fund. Our affiliates or any participating dealer or its affiliates may engage in trading in the shares of the Fund or the securities included in the Fund or the underlying index and other instruments relating to the Fund or such securities on a regular basis as part of their general broker-dealer and other businesses. Any of these trading activities could potentially adversely affect the price of the shares of the Fund and, therefore, adversely affect the value of and your return on the securities.

A participating dealer or its affiliates may realize hedging profits projected by its proprietary pricing models in addition to any selling concession and/or distribution expense fee, creating a further incentive for the participating dealer to sell the securities to you. If any participating dealer or any of its affiliates conducts hedging activities for us in connection with the securities, that participating dealer or its affiliates will expect to realize a projected profit from such hedging activities. If a participating dealer receives a concession and/or distribution expense fee for the sale of the securities to you, this projected hedging profit will be in addition to the concession and/or distribution expense fee, creating a further incentive for the participating dealer to sell the securities to you.

The U.S. Federal Tax Consequences Of An Investment In The Securities Are Unclear.

There is no direct legal authority regarding the proper U.S. federal tax treatment of the securities, and we do not plan to request a ruling from the IRS. Consequently, significant aspects of the tax treatment of the securities are uncertain, and the IRS or a court might not agree with the treatment of the securities as prepaid derivative contracts that are "open transactions" for U.S. federal income tax purposes. If the IRS were successful in asserting an alternative treatment of the securities, the tax consequences of the ownership and disposition of the securities might be materially and adversely affected. Even if the treatment of the securities as prepaid derivative contracts that are "open transactions" is respected, a security may be treated as a "constructive ownership transaction," with potentially adverse consequences described below under "United States Federal Tax Considerations."

Furthermore, Section 871(m) of the Internal Revenue Code of 1986, as amended (the "Code"), imposes a withholding tax of up to 30% on "dividend equivalents" paid or deemed paid to non-U.S. investors in respect of certain financial instruments linked to U.S. equities. In light of Treasury regulations, as modified by an IRS notice, that provide a general exemption for financial instruments issued in 2018 that do not have a "delta" of one, as of the date of this preliminary pricing supplement the securities should not be subject to withholding under Section 871(m). However, information about the application of Section 871(m) to the securities will be updated in the final pricing supplement. Moreover, the IRS could challenge a conclusion that the securities should not be subject to withholding under Section 871(m). If withholding applies to the securities, we will not be required to pay any additional amounts with respect to amounts withheld.

In addition, in 2007 the U.S. Treasury Department and the IRS released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of "prepaid forward contracts" and similar instruments. Any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, including the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. persons should be subject to withholding tax, possibly with retroactive effect. You should read carefully the discussion under "United States Federal Tax Considerations" in this pricing supplement. You should also consult your tax adviser regarding the U.S. federal tax consequences of an investment in the securities, as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

Hypothetical Returns
If the securities are automatically called:

Assuming that the securities are automatically called, the following table illustrates, for each hypothetical call date on which the securities are automatically called:

the hypothetical payment per security on the related call settlement date, assuming that the call premiums are equal to the midpoints of their specified ranges;

the hypothetical pre-tax total rate of return; and

the hypothetical pre-tax annualized rate of return.

Hypothetical call date on which securities are automatically called	Hypothetical payment per security on related call settlement date	Hypothetical pre-tax total rate of return	Hypothetical pre-tax annualized rate of return(1)
1st call date	$1,132.50	13.25%	12.52%
2nd call date	$1,265.00	26.50%	11.95%
3rd call date	$1,397.50	39.75%	11.46%

(1) The annualized rates of return are calculated with compounding on a semi-annual basis.

If the securities are not automatically called:

Assuming that the securities are not automatically called, the following table illustrates, for a range of hypothetical ending prices of the Fund:

the hypothetical percentage change from the hypothetical starting price to the hypothetical ending price, assuming a hypothetical starting price of $100.00. The hypothetical starting price of $100.00 has been chosen for illustrative purposes only and does not represent the actual starting price. The actual starting price will be determined on the pricing date and will be set forth under "Terms of the Securities" above. For historical data regarding the actual closing prices of the Fund, see the historical information provided herein;

the hypothetical maturity payment amount per security;

the hypothetical pre-tax total rate of return; and

the hypothetical pre-tax annualized rate of return.

Hypothetical ending price	**Hypothetical percentage change from the hypothetical starting price to the hypothetical ending price**	**Hypothetical maturity payment amount per security**	**Hypothetical pre-tax total rate of return**	**Hypothetical pre-tax annualized rate of return[(1)]**
$90.00	-10.00%	$1,000.00	0.00%	0.00%
$80.00	-20.00%	$1,000.00	0.00%	0.00%
$75.00	-25.00%	$1,000.00	0.00%	0.00%
$74.00	-26.00%	$740.00	-26.00%	-9.78%
$60.00	-40.00%	$600.00	-40.00%	-16.31%
$50.00	-50.00%	$500.00	-50.00%	-21.80%

(1) The annualized rates of return are calculated with compounding on a semi-annual basis.

The above figures are for purposes of illustration only and may have been rounded for ease of analysis. The actual amount you will receive upon an automatic call or at stated maturity and the resulting pre-tax rate of return will depend on (i) whether the securities are automatically called; (ii) if the securities are automatically called, the actual call premium and the actual call date on which the securities are called; and (iii) if the securities are not automatically called, the actual starting price and actual ending price.

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

Hypothetical Payment at Maturity

If the fund closing price of the Fund is less than the starting price on each of the first two call dates, the securities will not be automatically called prior to the final calculation day, and you will receive a maturity payment amount that will be greater than, equal to or less than the original offering price per security, depending on the ending price (i.e., the fund closing price of the Fund on the final calculation day). Set forth below are three examples of calculations of the maturity payment amount, assuming that the securities have not been automatically called on either of the first two call dates, reflecting a hypothetical call premium applicable to the final calculation day of 39.75% (the midpoint of the specified range for the call premium applicable to the final calculation day) and assuming the hypothetical starting price, threshold price and ending prices indicated in the examples. The terms used for purposes of these hypothetical examples do not represent the actual starting price or threshold price. The hypothetical starting price of $100.00 has been chosen for illustrative purposes only and does not represent the actual starting price. The actual starting price and threshold price will be determined on the pricing date and will be set forth under "Terms of the Securities" above. For historical data regarding the actual closing prices of the Fund, see the historical information provided herein. These examples are for purposes of illustration only and the values used in the examples may have been rounded for ease of analysis.

Example 1. Ending price is greater than the starting price, the securities are automatically called on the final calculation day and the maturity payment amount is equal to the original offering price plus the applicable call premium:

Hypothetical starting price: $100.00

Hypothetical ending price: $150.00

Since the hypothetical ending price is greater than the hypothetical starting price, the securities are automatically called on the final calculation day and you will receive the original offering price of your securities plus a call premium of 39.75% of the original offering price per security. Even though the Fund appreciated by 50.00% from its starting price to its ending price in this example, your return is limited to the call premium of 39.75% that is applicable to the final calculation day.

On the stated maturity date, you would receive $1,397.50 per security.

Example 2. Ending price is less than the starting price but greater than the threshold price and the maturity payment amount is equal to the original offering price:

Hypothetical starting price: $100.00

Hypothetical ending price: $90.00

Hypothetical threshold price: $75.00, which is 75% of the hypothetical starting price

Since the hypothetical ending price is less than the hypothetical starting price, but not by more than 25%, you would be repaid the original offering price of your securities at maturity.

On the stated maturity date, you would receive $1,000.00 per security.

Example 3. Ending price is less than the threshold price and the maturity payment amount is less than the original offering price:

Hypothetical starting price: $100.00

Hypothetical ending price: $50.00

Hypothetical threshold price: $75.00, which is 75% of the hypothetical starting price

Since the hypothetical ending price is less than the hypothetical starting price by more than 25%, you would lose a portion of the original offering price of your securities and receive a maturity payment amount equal to $500.00 per security, calculated as follows:

On the stated maturity date, you would receive $500.00 per security, resulting in a loss of 50.00%.

To the extent that the starting price, threshold price and ending price differ from the values assumed above, the results indicated above would be different.

Market Linked Securities—Auto-Callable with Contingent Downside

Additional Terms of the Securities

Wells Fargo will issue the securities as part of a series of senior unsecured debt securities entitled "Medium-Term Notes, Series S," which is more fully described in the prospectus supplement. Information included in this pricing supplement supersedes information in the market measure supplement, prospectus supplement and prospectus to the extent that it is different from that information.

Certain Definitions

A "trading day" means a day, as determined by the calculation agent, on which the relevant stock exchange and each related futures or options exchange with respect to the Fund or any successor thereto, if applicable, are scheduled to be open for trading for their respective regular trading sessions.

The "relevant stock exchange" for the Fund means the primary exchange or quotation system on which shares (or other applicable securities) of the Fund are traded, as determined by the calculation agent.

The "related futures or options exchange" for the Fund means each exchange or quotation system where trading has a material effect (as determined by the calculation agent) on the overall market for futures or options contracts relating to the Fund.

Calculation Agent

Wells Fargo Securities, LLC, one of our subsidiaries, will act as calculation agent for the securities and may appoint agents to assist it in the performance of its duties. Pursuant to a calculation agent agreement, we may appoint a different calculation agent without your consent and without notifying you.

The calculation agent will determine whether the securities are automatically called on any of the call dates and the amount of the payment you receive upon automatic call or at stated maturity. In addition, the calculation agent will, among other things:

- determine whether a market disruption event has occurred;
- determine if adjustments are required to the fund closing price of the Fund under various circumstances; and
- if the Fund undergoes a liquidation event, select a successor fund (as defined below) or, if no successor fund is available, determine the fund closing price.

All determinations made by the calculation agent will be at the sole discretion of the calculation agent and, in the absence of manifest error, will be conclusive for all purposes and binding on us and you. The calculation agent will have no liability for its determinations.

Market Disruption Events

A "market disruption event" means any of the following events as determined by the calculation agent in its sole discretion:

(A) The occurrence or existence of a material suspension of or limitation imposed on trading by the relevant stock exchange or otherwise relating to the shares (or other applicable securities) of the Fund or any successor fund on the relevant stock exchange at any time during the one-hour period that ends at the close of trading on such day, whether by reason of movements in price exceeding limits permitted by such relevant stock exchange or otherwise.

(B) The occurrence or existence of a material suspension of or limitation imposed on trading by any related futures or options exchange or otherwise in futures or options contracts relating to the shares (or other applicable securities) of the Fund or any successor fund on any related futures or options exchange at any time during the one-hour period that ends at the close of trading on that day, whether by reason of movements in price exceeding limits permitted by the related futures or options exchange or otherwise.

(C) The occurrence or existence of any event, other than an early closure, that materially disrupts or impairs the ability of market participants in general to effect transactions in, or obtain market values for, shares (or other applicable securities) of the Fund or any successor fund on the relevant stock exchange at any time during the one-hour period that ends at the close of trading on that day.

(D) The occurrence or existence of any event, other than an early closure, that materially disrupts or impairs the ability of market participants in general to effect transactions in, or obtain market values for, futures or options contracts relating to shares (or other applicable securities) of the Fund or any successor fund on any related futures or options exchange at any time during the one-hour period that ends at the close of trading on that day.

(E) The closure of the relevant stock exchange or any related futures or options exchange with respect to the Fund or any successor fund prior to its scheduled closing time unless the earlier closing time is announced by the relevant stock exchange or related futures or options exchange, as applicable, at least one hour prior to the earlier of (1) the actual closing time for the regular trading session on such relevant stock exchange or related futures or options exchange, as applicable, and (2) the submission deadline for orders to be entered into the relevant stock exchange or related futures or options exchange, as applicable, system for execution at the close of trading on that day.

(F) The relevant stock exchange or any related futures or options exchange with respect to the Fund or any successor fund fails to open for trading during its regular trading session.

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

For purposes of determining whether a market disruption event has occurred:

(1) "close of trading" means the scheduled closing time of the relevant stock exchange with respect to the Fund or any successor fund; and

(2) the "scheduled closing time" of the relevant stock exchange or any related futures or options exchange on any trading day for the Fund or any successor fund means the scheduled weekday closing time of such relevant stock exchange or related futures or options exchange on such trading day, without regard to after hours or any other trading outside the regular trading session hours.

If a market disruption event occurs or is continuing on any calculation day, then such calculation day will be postponed to the first succeeding trading day on which a market disruption event has not occurred and is not continuing; however, if such first succeeding trading day has not occurred as of the eighth trading day after the originally scheduled calculation day, that eighth trading day shall be deemed to be the calculation day. If the calculation day has been postponed eight trading days after the originally scheduled calculation day and a market disruption event occurs or is continuing with respect to the Fund on such eighth trading day, the calculation agent will determine the closing price of the Fund on such eighth trading day based on its good faith estimate of the value of the shares (or other applicable securities) of the Fund as of the close of trading on such eighth trading day.

Anti-dilution Adjustments Relating to the Fund; Alternate Calculation

Anti-dilution Adjustments

The calculation agent will adjust the adjustment factor as specified below if any of the events specified below occurs with respect to the Fund and the effective date or ex-dividend date, as applicable, for such event is after the pricing date and on or prior to the final calculation day.

The adjustments specified below do not cover all events that could affect the Fund, and there may be other events that could affect the Fund for which the calculation agent will not make any such adjustments, including, without limitation, an ordinary cash dividend. Nevertheless, the calculation agent may, in its sole discretion, make additional adjustments to any terms of the securities upon the occurrence of other events that affect or could potentially affect the market price of, or shareholder rights in, the Fund, with a view to offsetting, to the extent practical, any such change, and preserving the relative investment risks of the securities. In addition, the calculation agent may, in its sole discretion, make adjustments or a series of adjustments that differ from those described herein if the calculation agent determines that such adjustments do not properly reflect the economic consequences of the events specified in this pricing supplement or would not preserve the relative investment risks of the securities. All determinations made by the calculation agent in making any adjustments to the terms of the securities, including adjustments that are in addition to, or that differ from, those described in this pricing supplement, will be made in good faith and a commercially reasonable manner, with the aim of ensuring an equitable result. In determining whether to make any adjustment to the terms of the securities, the calculation agent may consider any adjustment made by the Options Clearing Corporation or any other equity derivatives clearing organization on options contracts on the Fund.

For any event described below, the calculation agent will not be required to adjust the adjustment factor unless the adjustment would result in a change to the adjustment factor then in effect of at least 0.10%. The adjustment factor resulting from any adjustment will be rounded up or down, as appropriate, to the nearest one-hundred thousandth.

(A) *Stock Splits and Reverse Stock Splits*

If a stock split or reverse stock split has occurred, then once such split has become effective, the adjustment factor will be adjusted to equal the *product* of the prior adjustment factor and the number of securities which a holder of one share (or other applicable security) of the Fund before the effective date of such stock split or reverse stock split would have owned or been entitled to receive immediately following the applicable effective date.

(B) *Stock Dividends*

If a dividend or distribution of shares (or other applicable securities) to which the securities are linked has been made by the Fund ratably to all holders of record of such shares (or other applicable security), then the adjustment factor will be adjusted on the ex-dividend date to equal the prior adjustment factor plus the *product* of the prior adjustment factor and the number of shares (or other applicable security) of the Fund which a holder of one share (or other applicable security) of the Fund before the ex-dividend date would have owned or been entitled to receive immediately following that date; provided, however, that no adjustment will be made for a distribution for which the number of securities of the Fund paid or distributed is based on a fixed cash equivalent value.

(C) *Extraordinary Dividends*

If an extraordinary dividend (as defined below) has occurred, then the adjustment factor will be adjusted on the ex-dividend date to equal the *product* of the prior adjustment factor and a fraction, the numerator of which is the closing price per share (or other applicable security) of the Fund on the trading day preceding the ex-dividend date, and the denominator of which is the amount by which the closing price per share (or other applicable security) of the Fund on the trading day preceding the ex-dividend date exceeds the extraordinary dividend amount (as defined below).

For purposes of determining whether an extraordinary dividend has occurred:

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

(1) "extraordinary dividend" means any cash dividend or distribution (or portion thereof) that the calculation agent determines, in its sole discretion, is extraordinary or special; and

(2) "extraordinary dividend amount" with respect to an extraordinary dividend for the securities of the Fund will equal the amount per share (or other applicable security) of the Fund of the applicable cash dividend or distribution that is attributable to the extraordinary dividend, as determined by the calculation agent in its sole discretion.

A distribution on the securities of the Fund described below under the section entitled "—Reorganization Events" below that also constitutes an extraordinary dividend will only cause an adjustment pursuant to that "—Reorganization Events" section.

(D) *Other Distributions*

If the Fund declares or makes a distribution to all holders of the shares (or other applicable security) of the Fund of any non-cash assets, excluding dividends or distributions described under the section entitled "—Stock Dividends" above, then the calculation agent may, in its sole discretion, make such adjustment (if any) to the adjustment factor as it deems appropriate in the circumstances. If the calculation agent determines to make an adjustment pursuant to this paragraph, it will do so with a view to offsetting, to the extent practical, any change in the economic position of a holder of the securities that results solely from the applicable event.

(E) *Reorganization Events*

If the Fund, or any successor fund, is subject to a merger, combination, consolidation or statutory exchange of securities with another exchange traded fund, and the Fund is not the surviving entity (a "reorganization event"), then, on or after the date of such event, the calculation agent shall, in its sole discretion, make an adjustment to the adjustment factor or the method of determining the maturity payment amount, whether the securities are automatically called on any of the call dates or any other terms of the securities as the calculation agent determines appropriate to account for the economic effect on the securities of such event, and determine the effective date of that adjustment. If the calculation agent determines that no adjustment that it could make will produce a commercially reasonable result, then the calculation agent may deem such event a liquidation event (as defined below).

Liquidation Events

If the Fund is de-listed, liquidated or otherwise terminated (a "liquidation event"), and a successor or substitute exchange traded fund exists that the calculation agent determines, in its sole discretion, to be comparable to the Fund, then, upon the calculation agent's notification of that determination to the trustee and Wells Fargo, any subsequent fund closing price for the Fund will be determined by reference to the fund closing price of such successor or substitute exchange traded fund (such exchange traded fund being referred to herein as a "successor fund"), with such adjustments as the calculation agent determines are appropriate to account for the economic effect of such substitution on holders of the securities.

If the Fund undergoes a liquidation event prior to, and such liquidation event is continuing on, the date that any fund closing price of the Fund is to be determined and the calculation agent determines that no successor fund is available at such time, then the calculation agent will, in its discretion, calculate the fund closing price for the Fund on such date by a computation methodology that the calculation agent determines will as closely as reasonably possible replicate the Fund, provided that if the calculation agent determines in its discretion that it is not practicable to replicate the Fund (including but not limited to the instance in which the underlying index sponsor discontinues publication of the underlying index), then the calculation agent will calculate the fund closing price for the Fund in accordance with the formula last used to calculate such fund closing price before such liquidation event, but using only those securities that were held by the Fund immediately prior to such liquidation event without any rebalancing or substitution of such securities following such liquidation event.

If a successor fund is selected or the calculation agent calculates the fund closing price as a substitute for the Fund, such successor fund or fund closing price will be used as a substitute for the Fund for all purposes, including for purposes of determining whether a market disruption event exists. Notwithstanding these alternative arrangements, a liquidation event with respect to the Fund may adversely affect the value of the securities.

If any event is both a reorganization event and a liquidation event, such event will be treated as a reorganization event for purposes of the securities unless the calculation agent makes the determination referenced in the last sentence of the section entitled "—Anti-dilution Adjustments—Reorganization Events" above.

Alternate Calculation

If at any time the method of calculating the Fund or a successor fund, or the underlying index, is changed in a material respect, or if the Fund or a successor fund is in any other way modified so that the Fund does not, in the opinion of the calculation agent, fairly represent the price of the securities of the Fund or such successor fund had such changes or modifications not been made, then the calculation agent may, at the close of business in New York City on the date that any fund closing price is to be determined, make such calculations and adjustments as, in the good faith judgment of the calculation agent, may be necessary in order to arrive at a closing price of the Fund comparable to the Fund or such successor fund, as the case may be, as if such changes or modifications had not been made, and calculate the fund closing price and the maturity payment amount and determine whether the securities are automatically called on any call date with reference to such adjusted closing price of the Fund or such successor fund, as applicable.

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

Events of Default and Acceleration

If an event of default with respect to the securities has occurred and is continuing, the amount payable to a holder of a security upon any acceleration permitted by the securities, with respect to each security, will be equal to the maturity payment amount, calculated as provided herein, as though the date of acceleration were the final calculation day; provided that if the fund closing price of the Fund on the date of acceleration is equal to or greater than the starting price, then the maturity payment amount will be calculated using a call premium that is prorated to the date of acceleration.

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

The SPDR® S&P® Oil & Gas Exploration & Production ETF

The SPDR S&P Oil & Gas Exploration & Production ETF is an exchange traded fund that seeks to provide investment results that, before fees and expenses, correspond generally to the performance of the S&P® Oil & Gas Exploration & Production Select Industry® Index, an equity index that is intended to measure the performance of the oil & gas exploration & production sub-industry of the S&P® Total Market Index, a benchmark that measures the performance of the United States equity market. See "Description of Exchange Traded Funds—The SPDR® S&P® Oil & Gas Exploration & Production ETF" in the accompanying market measure supplement for additional information about the SPDR S&P Oil & Gas Exploration & Production ETF.

In addition, information about the SPDR S&P Oil & Gas Exploration & Production ETF may be obtained from other sources, including, but not limited to, the fund sponsor's website (including information regarding (a) the Fund's top ten constituents and their weightings; (b) returns of the Fund and underlying index for certain periods; and (c) the fees paid to the fund sponsor). We are not incorporating by reference into this pricing supplement the website or any material it includes. Neither we nor the agent makes any representation that such publicly available information regarding the SPDR S&P Oil & Gas Exploration & Production ETF is accurate or complete.

Historical Information

We obtained the closing prices listed below from Bloomberg Financial Markets, without independent verification.

The following graph sets forth daily closing prices of the Fund for the period from January 1, 2008 to August 6, 2018. The closing price on August 6, 2018 was $42.28. The historical performance of the Fund should not be taken as an indication of the future performance of the Fund during the term of the securities.

Market Linked Securities—Auto-Callable with Contingent Downside

Principal at Risk Securities Linked to the SPDR® S&P® Oil & Gas Exploration & Production ETF due September 7, 2021

The following table sets forth the quarterly high and low closing prices, as well as end-of-period closing prices, of the Fund in the period from January 1, 2008 through August 6, 2018.

	High	Low	Last
2008			
First Quarter	$55.83	$44.79	$53.73
Second Quarter	$71.31	$54.44	$70.15
Third Quarter	$70.93	$42.68	$44.83
Fourth Quarter	$43.38	$22.97	$29.64
2009			
First Quarter	$33.48	$23.41	$26.60
Second Quarter	$38.25	$27.54	$31.72
Third Quarter	$39.61	$28.51	$38.62
Fourth Quarter	$43.36	$36.91	$41.21
2010			
First Quarter	$44.07	$39.22	$42.13
Second Quarter	$45.82	$38.57	$38.99
Third Quarter	$42.85	$38.05	$42.26
Fourth Quarter	$52.71	$42.18	$52.69
2011			
First Quarter	$64.50	$52.75	$64.50
Second Quarter	$64.97	$54.71	$58.78
Third Quarter	$65.24	$42.80	$42.80
Fourth Quarter	$57.56	$39.99	$52.69
2012			
First Quarter	$61.34	$52.67	$56.91
Second Quarter	$57.85	$45.20	$50.40
Third Quarter	$59.35	$48.73	$55.69
Fourth Quarter	$57.38	$50.69	$54.07
