(Mark One)

☒ Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended June 30, 2014

☐ Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from _____ to _____

Commission File Number: 001-34452

Apollo Commercial Real Estate Finance, Inc.
(Exact name of registrant as specified in its charter)

Maryland

(State or other jurisdiction of
incorporation or organization)

Apollo Commercial Real Estate Finance, Inc.

c/o Apollo Global Management, LLC

9 West 57th Street, 43rd Floor,

New York, New York 10019

(Address of registrant's principal executive offices)

(212) 515-3200

(Registrant's telephone number, including area code)

27-0467113

(I.R.S. Employer

Identification Number)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act (check one):

Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☒ Smaller reporting company ☐

Non-accelerated filer ☒ (Do not check if a smaller reporting company) Smaller Reporting Company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practical date.

As of July 30, 2014, there were 46,848,675 shares, par value \$0.01, of the registrant's common stock issued and outstanding.

Apollo Commercial Real Estate Finance Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

(in thousands—except share and per share data)

Note 1 – Organization

Apollo Commercial Real Estate Finance, Inc. (together with its consolidated subsidiaries, is referred to throughout this report as the “Company,” “ARI,” “we,” “us” and “our”) is a real estate investment trust (“REIT”) that primarily originates, acquires, invests in and manages performing commercial first mortgage loans, subordinate financings, commercial mortgage-backed securities (“CMBS”) and other commercial real estate-related debt investments. These asset classes are referred to as the Company’s target assets.

Note 2 – Summary of Significant Accounting Policies

Basis of Presentation

The accompanying consolidated financial statements include the Company’s accounts and those of its consolidated subsidiaries. All intercompany amounts have been eliminated. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (“GAAP”) requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. The Company’s most significant estimates include the fair value of financial instruments and loan loss reserve. Actual results could differ from those estimates.

These unaudited condensed consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and should be read in conjunction with the consolidated financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2013, as filed with the Securities and Exchange Commission (the “SEC”). In the opinion of management, all adjustments (consisting only of normal recurring adjustments) necessary to present fairly the Company’s financial position, results of operations and cash flows have been included.

The Company currently operates in one business segment.

Significant Accounting Policies

Foreign Currency. The Company may enter into transactions not denominated in United States, or U.S., dollars.

Foreign exchange gains and losses arising on such transactions are recorded as a gain or loss in the Company’s consolidated statements of operations. Non-U.S. dollar denominated assets and liabilities are translated to U.S. dollars at the exchange rate prevailing at the reporting date and income, expenses, gains, and losses are translated at the prevailing exchange rate on the dates that they were recorded.

Participations Sold. Participations sold represent interests in certain loans that the Company originated and subsequently sold. In certain instances, the Company presents these participations sold as both assets and non-recourse liabilities because these arrangements do not qualify as sales under GAAP. Generally, participations sold are recorded as assets and liabilities in equal amounts on the Company’s consolidated balance sheets, and an equivalent amount of interest income and interest expense is recorded on the Company’s consolidated statements of operations.

Recent Accounting Pronouncements

In June 2013, the Financial Accounting Standards Board (the “FASB”) issued guidance to change the assessment of whether an entity is an investment company by developing a new two-tiered approach that requires an entity to possess certain fundamental characteristics while allowing judgment in assessing certain typical characteristics. The fundamental characteristics that an investment company is required to have include the following: (1) it obtains funds from one or more investors and provides the investor(s) with investment management services; (2) it commits to its investor(s) that its business purpose and only substantive activities are investing the funds solely for returns from capital appreciation, investment income or both; and (3) it does not obtain returns or benefits from an investee or its affiliates that are not normally attributable to ownership interests. The typical characteristics of an investment company that an entity should consider before concluding whether it is an investment company include the following: (1) it has more than one investment; (2) it has more than one investor; (3) it has investors that are not related parties of the parent or the investment manager; (4) it has ownership interests in the form of equity or partnership interests; and (5) it manages substantially all of its investments on a fair value basis. The new approach requires an entity to assess

all of the characteristics of an investment company and consider its purpose and design to determine whether it is an investment company. The guidance includes disclosure requirements about an entity's status as an investment company and financial support provided or contractually required to be provided by an investment company to its

Table of Contents

investees. The guidance is effective for interim and annual reporting periods in fiscal years beginning after December 15, 2013. Earlier application is prohibited. The Accounting Standards Update ("ASU") prohibits REITs from qualifying for investment company accounting under ASC 946, as such, we have determined that we will not meet the definition of an investment company under this ASU.

In June 2014, the FASB issued guidance which amends the accounting guidance for repurchase-to-maturity transactions and repurchase agreements executed as repurchase financings, and requires additional disclosure about certain transactions by the transferor. The guidance is effective for certain transactions that qualify for sales treatment for the first interim or annual period beginning after December 15, 2014. The new disclosure requirements for repurchase agreements, securities lending transactions and repurchase-to-maturity transactions that qualify for secured borrowing treatment is effective for annual periods beginning after December 15, 2014 and for interim periods beginning after March 15, 2014. The Company currently records repurchase arrangements as secured borrowings and does not anticipate this guidance will have an impact on the Company's consolidated financial statements.

In May 2014, the FASB issued guidance which broadly amends the accounting guidance for revenue recognition. This guidance is effective for the first interim or annual period beginning after December 15, 2016, and is to be applied prospectively. The Company does not anticipate that the adoption of this guidance will have a material impact on the Company's consolidated financial statements.

Note 3 – Fair Value Disclosure

GAAP establishes a hierarchy of valuation techniques based on observable inputs utilized in measuring financial instruments at fair values. Market based or observable inputs are the preferred source of values, followed by valuation models using management assumptions in the absence of market inputs. The three levels of the hierarchy are described below:

Level I — Quoted prices in active markets for identical assets or liabilities.

Level II — Prices are determined using other significant observable inputs. Observable inputs are inputs that other market participants would use in pricing a security. These may include quoted prices for similar securities, interest rates, prepayment speeds, credit risk and others.

Level III — Prices are determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable (for example, when there is little or no market activity for an investment at the end of the period), unobservable inputs may be used.

While the Company anticipates that its valuation methods will be appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. The Company will use inputs that are current as of the measurement date, which may include periods of market dislocation, during which price transparency may be reduced.

The estimated fair value of the CMBS portfolio is determined by reference to market prices provided by certain dealers who make a market in these financial instruments. Broker quotes are only indicative of fair value and may not necessarily represent what the Company would receive in an actual trade for the applicable instrument. Management performs additional analysis on prices received based on broker quotes to validate the prices and adjustments are made as deemed necessary by management to capture current market information. The estimated fair values of the Company's securities are based on observable market parameters and are classified as Level II in the fair value hierarchy.

The estimated fair values of the Company's derivative instruments are determined using a discounted cash flow analysis on the expected cash flows of each derivative. The fair values of interest rate swaps are determined using the market standard methodology of netting the discounted future fixed cash receipts (or payments) and the discounted expected variable cash payments (or receipts). The fair values of interest rate caps are determined using the market standard methodology of discounting the future expected cash receipts that would occur if variable interest rates rise above the strike rate of the caps. The variable interest rates used in the calculation of projected cash flows are based on an expectation of future interest rates derived from observable market interest rate curves and volatilities. The Company's derivative instruments are classified as Level II in the fair value hierarchy.

Table of Contents

The following table summarizes the levels in the fair value hierarchy into which the Company's financial instruments were categorized as of June 30, 2014 and December 31, 2013:

	Fair Value as of June 30, 2014				Fair Value as of December 31, 2013			
	Level I	Level II	Level III	Total	Level I	Level II	Level III	Total
CMBS (Available-for-Sale)	\$—	\$23,281	\$—	\$23,281	\$—	\$33,362	\$—	\$33,362
CMBS (Fair Value Option)	—	324,724	—	324,724	—	158,086	—	158,086
Total	\$—	\$348,005	\$—	\$348,005	\$—	\$191,448	\$—	\$191,448

Note 4 – Debt Securities

At June 30, 2014, all of the Company's CMBS were pledged to secure borrowings under the Company's master repurchase agreements with Wells Fargo Bank, N.A. ("Wells Fargo") (the "Wells Facility"), UBS AG, London Branch ("UBS") (the "UBS Facility") and Deutsche Bank AG ("DB") (the "DB Facility"). (See Note 8 for a description of these facilities).

The amortized cost and estimated fair value of the Company's debt securities at June 30, 2014 are summarized as follows:

Security Description	Face Amount	Amortized Cost	Gross Unrealized Gain	Gross Unrealized Loss	Estimated Fair Value
CMBS (Available-for-Sale)	\$23,097	\$24,074	\$—	\$(793)	\$23,281
CMBS (Fair Value Option)	320,499	315,650	9,143	(69)	324,724
Total	\$343,596	\$339,724	\$9,143	\$(862)	\$348,005

The gross unrealized loss related to the available-for-sale securities results from the fair value of the securities falling below the amortized cost basis. The unrealized losses are primarily the result of market factors other than credit impairment and the Company believes the carrying value of the securities are fully recoverable over their expected holding period. Management does not intend to sell or expect to be forced to sell the securities prior to the Company recovering the amortized cost. As such, management does not believe any of the securities are other than temporarily impaired.

The amortized cost and estimated fair value of the Company's debt securities at December 31, 2013 are summarized as follows:

Security Description	Face Amount	Amortized Cost	Gross Unrealized Gain	Gross Unrealized Loss	Estimated Fair Value
CMBS (Available-for-Sale)	\$33,066	\$34,232	\$—	\$(870)	\$33,362
CMBS (Fair Value Option)	155,577	155,946	2,313	(173)	158,086
Total	\$188,643	\$190,178	\$2,313	\$(1,043)	\$191,448

The overall statistics for the Company's CMBS investments calculated on a weighted average basis assuming no early prepayments or defaults as of June 30, 2014 and December 31, 2013 are as follows:

	June 30, 2014	December 31, 2013
Credit Ratings *	AAA - CC	AAA - CCC
Coupon	5.8	% 5.8
Yield	6.3	% 5.3
Weighted Average Life	2.8 years	3.1 years

*Ratings per Fitch Ratings, Moody's Investors Service or Standard & Poor's.

Table of Contents

The percentage vintage, property type and location of the collateral securing the Company's CMBS investments calculated on a weighted average basis as of June 30, 2014 and December 31, 2013 are as follows:

Vintage	June 30, 2014	December 31, 2013
2005	13	% —
2006	15	3

Total/Weighted Average			\$164,000	\$161,600	\$161,099	8.82 %	

(1) This loan includes two one-year extension options subject to certain conditions and the payment of a fee for each extension.

(2) This loan includes a one-year extension option subject to certain conditions and the payment of a fee.

The Company evaluates its loans for possible impairment on a quarterly basis. The Company regularly evaluates the extent and impact of any credit deterioration associated with the performance and/or value of the underlying collateral property as well as the financial and operating capability of the borrower/sponsor on a loan by loan basis. Specifically, a property's operating results and any cash reserves are analyzed and used to assess (i) whether cash from operations are sufficient to cover the debt service requirements currently and into the future, (ii) the ability of the borrower to refinance the loan and/or (iii) the property's liquidation value. The Company also evaluates the financial wherewithal of any loan guarantors as well as the borrower's competency in managing and operating the properties. In addition, the Company considers the overall economic environment, real estate sector and geographic sub-market in which the borrower operates. Such loan loss analyses are completed and reviewed by asset management and finance personnel who utilize various data sources, including (i) periodic financial data such as debt service coverage ratio, property occupancy, tenant profile, rental rates, operating expenses, the borrower's exit plan, and capitalization and discount rates, (ii) site inspections and (iii) current credit spreads and discussions with market participants. An allowance for loan loss is established when it is deemed probable that the Company will not be able to collect all amounts due according to the contractual terms of the loan. The Company has determined that an allowance for loan losses was not necessary at June 30, 2014 and December 31, 2013.

(1) Includes a one-year extension option subject to certain conditions and the payment of an extension fee.

(2) Includes two one-year extension options subject to certain conditions and the payment of a fee for each extension.

(3) Includes a three-month extension option subject to certain conditions and the payment of an extension fee.

(4) Includes a one-year extension option subject to certain conditions and the payment of an extension fee.

(5) Includes three one-year extensions options subject to certain conditions and the payment of a fee for each extension.

During January 2014, the Company received a \$15,000 principal repayment from a subordinate loan secured by a pledge of the equity interests in the owner of a New York City hotel. The Company realized a 14% internal rate of return ("IRR") on this subordinate loan. See below for a description of how the IRR is calculated.

During June 2014, the Company received a \$47,000 principal repayment from a mezzanine loan secured by a pledge of the equity interests in a portfolio of skilled nursing facilities. The Company realized a 12% IRR on this mezzanine loan.

IRR is the annualized effective compounded return rate that accounts for the time-value of money and represents the rate of return on an investment over a holding period expressed as a percentage of the investment. It is the discount rate that makes the net present value of all cash outflows (the costs of investment) equal to the net present value of cash inflows (returns on investment). It is derived from the negative and positive cash flows resulting from or produced by each transaction (or for a transaction involving more than one investment, cash flows resulting from or produced by each of the investments), whether positive, such as investment returns, or negative, such as transaction

expenses or other costs of investment, taking into account the dates on which such cash flows occurred or are expected to occur, and compounding interest accordingly.

Table of Contents

The Company's subordinate loan portfolio was comprised of the following at December 31, 2013:

Description	Date of Investment	Maturity Date	Original Face Amount	Current Face Amount	Carrying Value	Coupon

(1) Includes a one-year extension option subject to certain conditions and the payment of an extension fee.

(2) Includes two one-year extension options subject to certain conditions and the payment of a fee for each extension.

(3) Includes a three-month extension option subject to certain conditions and the payment of an extension fee.

(4) Includes a one-year extension option subject to certain conditions and the payment of an extension fee. As of December 31, 2013, the Company had \$29,106 of unfunded loan commitments related to this loan.

During February 2013, the Company received principal repayment on two mezzanine loans totaling \$50,000 secured by a portfolio of retail shopping centers located throughout the United States. In connection with the repayment, the Company received a yield maintenance payment totaling \$2,500. With the yield maintenance payment, the Company realized a 15% IRR on its mezzanine loan investment.

During June 2013, the Company received the repayment of a \$15,000 mezzanine loan secured by a hotel in New York City. In connection with the repayment, the Company received a yield maintenance payment totaling \$1,233. With the yield maintenance payment, the Company realized a 19% IRR on its mezzanine loan investment.

The Company evaluates its loans for possible impairment on a quarterly basis. See “Note 5 – Commercial Mortgage Loans” for a summary of the metrics reviewed. The Company has determined that an allowance for loan loss was not necessary at June 30, 2014 and December 31, 2013.

Note 7 – Repurchase Agreement

During 2011, the Company funded a \$47,439 investment structured in the form of a repurchase facility secured by a Class A-2 collateralized debt obligation (“CDO”) bond. The \$47,439 of borrowings provided under the facility financed the purchase of a CDO bond with an aggregate face amount of \$68,726, representing an advance rate of 69% on the CDO bond's face amount. The CDO was comprised of 58 senior and subordinate commercial real estate debt positions and commercial real estate securities with the majority of the debt and securities underlying the CDO being first

mortgages.

14

Table of Contents

The repurchase facility had an interest rate of 13.0% (10.0% current pay with a 3.0% accrual) on amounts outstanding and had an initial term of 18 months with three six-month extensions options available to the borrower. Any principal repayments that occurred prior to the 21st month were subject to a make-whole provision at the full 13.0% interest rate.

In January 2013, the repurchase agreement was repaid in full. Upon the repayment, the Company realized a 17% IRR on its investment.

Note 8 – Borrowings Under Repurchase Agreements

At June 30, 2014 and December 31, 2013, the Company had borrowings outstanding under the Company's master repurchase agreement with JPMorgan Chase Bank, N.A. ("JPMorgan") (the "JPMorgan Facility"), the Wells Facility, the UBS Facility and the DB Facility.

At June 30, 2014 and December 31, 2013, the Company's borrowings had the following debt balances, weighted average maturities and interest rates:

	June 30, 2014				December 31, 2013				
	Debt Balance	Weighted Average Remaining Maturity	Weighted Average Rate		Debt Balance	Weighted Average Remaining Maturity	Weighted Average Rate		
Wells Facility borrowings	\$26,774	0.7 years	1.0 %	%	\$47,751	0.2 years	* 1.2 %	%	**
UBS Facility borrowings	133,899	4.2 years	* 2.8 %	%	133,899	4.7 years	2.8 %	%	Fixed
DB Facility borrowings	138,853	3.8 years	3.8 %	%	—	0.0 years	— %	%	***
JPMorgan Facility borrowings	146,698	0.6 years	2.7 %	%	20,383	1.1 years	2.7 %	%	L+250
Total borrowings	\$446,224	2.7 years	2.9 %	%	\$202,033	3.3 years	2.4 %	%	

*Assumes extension options are exercised.

**At December 31, 2013, borrowings outstanding under the Wells Facility bore interest at LIBOR plus 105 basis points. At June 30, 2014, borrowings outstanding under the Wells Facility bore interest at LIBOR plus 80 basis points.

*** Advances under the DB Facility accrue interest at a per annum pricing rate based on the rate implied by the fixed rate bid under a fixed for floating interest rate swap for the receipt of payments indexed to three-month U.S. dollar LIBOR, plus a financing spread ranging from 1.80% to 2.32% based on the rating of the collateral pledged.

At June 30, 2014, the Company's borrowings had the following remaining maturities:

	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years	Total
Wells Facility borrowings	\$26,774	\$—	\$—	\$—	\$26,774
UBS Facility borrowings *	—	55,046	78,853	—	133,899
DB Facility borrowings	—	90,790	48,063	—	138,853
JPMorgan Facility borrowings	146,698	—	—	—	146,698
Total	\$173,472	\$145,836	\$126,916	\$—	\$446,224

*Assumes extension option is exercised.

At June 30, 2014, the Company's collateralized financings were comprised of borrowings outstanding under the Wells Facility, the UBS Facility, the DB Facility and the JPMorgan Facility. The table below summarizes the outstanding balances at June 30, 2014, as well as the maximum and average balances for the six months ended June 30, 2014.

	Balance at June 30, 2014	For the six months ended June 30, 2014 Maximum Month-End Balance	Average Month-End Balance
Wells Facility borrowings	\$26,774	\$47,751	\$ 34,322
UBS Facility borrowings	133,899	133,899	133,899

Edgar Filing: Apollo Commercial Real Estate Finance, Inc. - Form 10-Q

DB Facility borrowings	138,853	138,853	50,512
JPMorgan Facility borrowings	146,698	146,741	65,635
Total	\$446,224		

15

Table of Contents

DB Facility. During April 2014, the Company through an indirect wholly-owned subsidiary entered into the DB Facility with DB pursuant to which the Company may borrow up to \$100,000 in order to finance the acquisition of CMBS. The DB Facility was amended in May 2014 to permit the Company to borrow up to \$200,000, which maximum may be increased one further time at the Company's request by \$100,000. The DB Facility has a term of four years, subject to certain restrictions. Advances under the DB Facility accrue interest at a per annum pricing rate based on the rate implied by the fixed rate bid under a fixed for floating interest rate swap for the receipt of payments indexed to three-month U.S. dollar LIBOR, plus a financing spread ranging from 1.80% to 2.32% based on the rating of the collateral pledged. The Company borrows an amount equal to the product of the estimated fair value of the collateral pledged divided by a margin ratio ranging from 125.00% to 181.82% depending on the collateral pledged. Additionally, beginning on August 1, 2014 and depending on the utilization rate of the facility, a portion of the undrawn amount may be subject to non-use fees. The DB Facility contains customary terms and conditions for repurchase facilities of this type and financial covenants to be met by the Company, including minimum shareholder's equity of 50% of the gross capital proceeds of its initial public offering and any subsequent public or private offerings.

JPMorgan Facility. On April 25, 2014, the Company, through two subsidiaries (the "Funding Subsidiaries"), entered into a letter agreement to temporarily waive, for a period of up to 30 days, compliance with the minimum liquidity covenant under the JPMorgan Facility that requires the Company to maintain minimum liquidity of the greater of 10% of total consolidated recourse indebtedness and \$12,500.

On May 9, 2014, the Company and the Funding Subsidiaries entered into an amendment letter to temporarily increase the maximum permitted borrowing under the JPMorgan Facility from \$100,000 to approximately \$146,814 and amends the terms of the JPMorgan Facility in order to finance the acquisition of certain mezzanine real estate loans. This letter expired on May 23, 2014.

On May 22, 2014, the Company and the Funding Subsidiaries entered into an amendment letter to extend, until June 6, 2014, (i) the temporary increase of the maximum permitted borrowing under the JPMorgan Facility from \$100,000 to approximately \$146,814 and (ii) the waiver of compliance with the minimum liquidity covenant under the JPMorgan Facility that was previously granted on April 25, 2014.

On June 6, 2014, the Company and the Funding Subsidiaries entered into amendment letters to extend, as applicable, (i) until June 12, 2014, the temporary increase of the maximum permitted borrowing under the JPMorgan Facility from \$100,000 to approximately \$146,814, and (ii) until July 1, 2014, the waiver of compliance with the minimum liquidity covenant under the JPMorgan Facility that was previously granted on April 25, 2014.

On June 12, 2014, the Company and the Funding Subsidiaries entered into a third amendment and restatement of the JP Morgan Facility (the "Third Amendment and Restatement") with JPMorgan. The Third Amendment and Restatement amended the JPMorgan Facility to facilitate the financing of mezzanine loans under the JPMorgan Facility and increased the maximum permitted borrowing to \$175,000. In connection with the Third Amendment and Restatement, the guarantee provided by the Company for the obligations of the Funding Subsidiaries was also amended to require the Company to hold minimum liquidity equal to the greater of 5% of its total recourse indebtedness and \$15,000. The Third Amendment and Restatement contains affirmative and negative covenants and provisions regarding events of default that are customary for similar repurchase facilities. The Third Amendment and Restatement expires in January 2015.

Wells Facility. In February 2014, the maturity date of the Wells Facility was extended to March 2015. In addition, the Company reduced the interest rate to LIBOR plus 80 basis points from LIBOR plus 105 basis points.

The Company was in compliance with the financial covenants under its repurchase agreements at June 30, 2014 and December 31, 2013.

Note 9 – Convertible Senior Notes

On March 17, 2014, the Company issued \$143,750 aggregate principal amount of 5.50% Convertible Senior Notes due 2019 (the "2019 Notes"), for which the Company received net proceeds, after deducting the underwriting discount and estimated offering expense payable by the Company of approximately \$139,037. At June 30, 2014, the 2019 Notes have a carrying value of \$139,362 and an unamortized discount of \$4,388. The following table summarizes the terms of the 2019 Notes.

Table of Contents

	Principal Amount	Coupon Rate	Effective Rate (1)	Conversion Rate (2)	Maturity Date	Remaining Period of Amortization
2019 Notes	\$143,750	5.50	%6.25	%55.3649	3/15/2019	4.76 years

(1) Effective rate includes the effect of the adjustment for the conversion option, the value of which reduced the initial liability and was recorded in additional paid-in-capital.

The Company has the option to settle any conversions in cash, shares of common stock or a combination thereof.

The conversion rate represents the number of shares of common stock issuable per \$1,000 principal amount of (2)2019 Notes converted. The if-converted value of the 2019 Notes does not exceed their principal amount at June 30, 2014 since the closing market price of the Company's common stock of \$16.63 per share does not exceed the implicit conversion prices of \$18.06 for the 2019 Notes.

GAAP requires the liability and equity components of convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement) to be separately accounted for in a manner that reflects the issuer's nonconvertible debt borrowing rate. ASC 470-20 requires that the initial proceeds from the sale of the 2019 Notes be allocated between a liability component and an equity component in a manner that reflects interest expense at the interest rate of similar nonconvertible debt that could have been issued by the Company at such time. The Company measured the fair value of the debt components of the 2019 Notes as of their issuance date based on effective interest rates of 6.25%. As a result, the Company attributed approximately \$4,617 of the proceeds to the equity component of the 2019 Notes, which represents the excess proceeds received over the fair value of the liability component of the 2019 Notes at the date of issuance. The equity component of the 2019 Notes have been reflected within additional paid-in capital in the condensed consolidated balance sheet and has a value of \$4,388 as of June 30, 2014. The resulting debt discount is being amortized over the period during which the 2019 Notes are expected to be outstanding (the maturity date) as additional non-cash interest expense. The additional non-cash interest expense attributable to each of the 2019 Notes will increase in subsequent reporting periods through the maturity date as the 2019 Notes accrete to their par value over the same period. The aggregate contractual interest expense was approximately \$1,977 and \$2,284 for the three and six months ended June 30, 2014, respectively. With respect to the amortization of the discount on the liability component of the 2019 Notes as well as the amortization of deferred financing costs, the Company reported additional non-cash interest expense of approximately \$199 and \$230 for the three and six months ended June 30, 2014.

As of June 30, 2014 potential shares of common stock contingently issuable upon the conversion of the 2019 Notes were excluded from the calculation of diluted income per share because it is management's intent and ability to settle the obligation in cash.

Note 10 – Participations Sold

During May 2014, the Company closed a \$155,000 floating-rate whole loan secured by the first mortgage and equity interests in an entity that owns a resort hotel in Aruba. During June 2014, the Company syndicated a \$90,000 senior participation in the loan and retained a \$65,000 junior participation in the loan.

Participations sold represent the interest in the Aruba loan the Company originated and subsequently sold. The Company presents the participation sold as both assets and non-recourse liabilities because the participation does not qualify as a sale according to GAAP. At June 30, 2014, the Company had one such participation sold with a face amount of \$90,000 and a carrying amount of \$89,182. The participation sold has a cash coupon of LIBOR plus 440 basis points. The income earned on the participation sold is recorded as interest income and an identical amount is recorded as interest expense on the Company's consolidated statements of operations.

Note 11 – Derivative Instruments

The Company used interest rate swaps and caps to manage exposure to variable cash flows on portions of its borrowings under repurchase agreements. Interest rate swap and cap agreements allow the Company to receive a variable rate cash flow based on LIBOR and pay a fixed rate cash flow, mitigating the impact of this exposure. All of the Company's interest rate swaps and caps matured during the third quarter of 2013.

During April 2014, the Company entered into a forward contract whereby it agreed to sell £34,389 in exchange for \$57,631 in January 2015. The forward contract was executed to economically fix the U.S. dollar amounts of foreign

denominated cash flows expected to be received related to a foreign denominated loan investment which closed in the second quarter of 2014.

The Company has not designated any of its derivative instruments as hedges under GAAP and therefore, changes in the fair value of the Company's derivatives are recorded directly in earnings. The following table summarizes the amounts

17

Table of Contents

recognized on the consolidated statements of operations related to the Company's derivatives for the three and six months ended June 30, 2014 and 2013.

	Location of Loss Recognized in Income	Three months ended June 30,		Six months ended June 30,	
		2014	2013	2014	2013
Interest rate swaps	Loss on derivative instruments – realized *	\$—	\$(59)	\$—	\$(133)
Interest rate swaps	Gain on derivative instruments – unrealized	—	58	—	131
Forward currency contract	Loss on derivative instruments - unrealized	(1,093)	—	(1,093)	—
Interest rate caps	Loss on derivative instruments - unrealized	—	(1)	—	(1)
Total		\$(1,093)	\$(2)	\$(1,093)	\$(3)

*Realized losses represent net amounts accrued for the Company's derivative instruments during the period.

Note 12 – Related Party Transactions

Management Agreement

In connection with the Company's initial public offering in September 2009, the Company entered into a management agreement (the "Management Agreement") with ACREFI Management, LLC (the "Manager"), which describes the services to be provided by the Manager and its compensation for those services. The Manager is responsible for managing the Company's day-to-day operations, subject to the direction and oversight of the Company's board of directors.

Pursuant to the terms of the Management Agreement, the Manager is paid a base management fee equal to 1.5% per annum of the Company's stockholders' equity (as defined in the Management Agreement), calculated and payable (in cash) quarterly in arrears.

The current term of the Management Agreement expires on September 29, 2014 and shall be automatically renewed for successive one-year terms on each anniversary thereafter. The Management Agreement may be terminated upon expiration of the one-year extension term only upon the affirmative vote of at least two-thirds of the Company's independent directors, based upon (1) unsatisfactory performance by the Manager that is materially detrimental to the Company or (2) a determination that the management fee payable to the Manager is not fair, subject to the Manager's right to prevent such a termination based on unfair fees by accepting a mutually acceptable reduction of management fees agreed to by at least two-thirds of the Company's independent directors. The Manager must be provided with written notice of any such termination at least 180 days prior to the expiration of the then existing term and will be paid a termination fee equal to three times the sum of the average annual base management fee during the 24-month period immediately preceding the date of termination, calculated as of the end of the most recently completed fiscal quarter prior to the date of termination. Following a meeting by the Company's independent directors in February 2014, which included a discussion of the Manager's performance and the level of the management fees thereunder, the Company determined not to seek termination of the Management Agreement.

For the three and six months ended June 30, 2014, respectively, the Company incurred approximately \$2,966 and \$5,531 in base management fees. For the three and six months ended June 30, 2013, respectively, the Company incurred approximately \$2,600 and \$4,759 in base management fees. In addition to the base management fee, the Company is also responsible for reimbursing the Manager for certain expenses paid by the Manager on behalf of the Company or for certain services provided by the Manager to the Company. For the three and six months ended June 30, 2014, respectively, the Company recorded expenses totaling \$185 and \$292 related to reimbursements for certain expenses paid by the Manager on behalf of the Company. For the three and six months ended June 30, 2013, respectively, the Company recorded expenses totaling \$108 and \$334 related to reimbursements for certain expenses paid by the Manager on behalf of the Company. Expenses incurred by the Manager and reimbursed by the Company are reflected in the respective consolidated statement of operations expense category or the consolidated balance sheet based on the nature of the item.

Included in payable to related party on the consolidated balance sheet at June 30, 2014 and December 31, 2013, respectively is approximately \$2,966 and \$2,628 for base management fees incurred but not yet paid.

Note 13 – Share-Based Payments

On September 23, 2009, the Company's board of directors approved the Apollo Commercial Real Estate Finance, Inc., 2009 Equity Incentive Plan (the "LTIP"). The LTIP provides for grants of restricted common stock, restricted stock units ("RSUs") and other equity-based awards up to an aggregate of 7.5% of the issued and outstanding shares of the Company's

Table of Contents

common stock (on a fully diluted basis). The LTIP is administered by the compensation committee of the Company's board of directors (the "Compensation Committee") and all grants under the LTIP must be approved by the Compensation Committee.

The Company recognized stock-based compensation expense of \$362 and \$788 for the three and six months ended June 30, 2014, respectively, related to restricted stock and RSU vesting. The Company recognized stock-based compensation expense of \$428 and \$1,311 for the three and six months ended June 30, 2013, respectively, related to restricted stock and RSU vesting. The following table summarizes the grants, exchanges and forfeitures of restricted common stock and RSUs during the six months ended June 30, 2014:

Type	Date	Restricted Stock	RSUs	Estimate Fair Value on Grant Date	Initial Vesting	Final Vesting
Outstanding at December 31, 2013		208,416	503,750			
Canceled upon delivery	January 2014	—	(288,750)	n/a	n/a	n/a
Grant	April 2014	13,931	—	\$235	July 2014	April 2017
Canceled upon delivery	April 2014	—	(5,000)	n/a	n/a	n/a
Grant	June 2014	—	10,254	\$169	December 2014	December 2016
Outstanding at June 30, 2014		222,347	220,254			

Below is a summary of expected restricted common stock and RSU vesting dates as of June 30, 2014.

Vesting Date	Shares Vesting	RSU Vesting	Total Awards
July 2014	3,317	—	3,317
July 2014	500	—	500
October 2014	3,313	—	3,313
December 2014	6,668	66,750	73,418
January 2015	3,320	—	3,320
March 2015	—	6,667	6,667
April 2015	3,321	—	3,321
July 2015	2,522	—	2,522
July 2015	500	—	500
October 2015	2,522	—	2,522
December 2015	6,668	66,759	73,427
January 2016	2,521	—	2,521
April 2016	2,522	—	2,522
July 2016	1,578	—	1,578
October 2016	1,577	—	1,577
December 2016	—	3,418	3,418
January 2017	1,161	—	1,161
April 2017	1,164	—	1,164
	43,174	143,594	186,768

At June 30, 2014, the Company had unrecognized compensation expense of approximately \$630 and \$1,996, respectively, related to the vesting of restricted stock awards and RSUs noted in the table above.

RSU Deliveries

During the three months ended June 30, 2014, the Company delivered 240,277 shares of common stock for 283,750 vested RSUs. The Company allows RSU participants to settle their tax liabilities with a reduction of their share delivery from the originally granted and vested RSUs. The amount, when agreed to by the participant, results in a cash payment to the Manager related to this tax liability and a corresponding adjustment to additional paid in capital on the consolidated statement of changes in stockholders' equity. The adjustment was \$876 for six months ended June 30, 2014, and is included as a

Table of Contents

component of the capital decrease related to the Company's equity incentive plan in the consolidated statement of changes in stockholders' equity.

Note 14 – Stockholders' Equity

Common Stock Offering. During the second quarter of 2014, the Company completed a follow-on public offering of 9,706,000 shares of its common stock, including the partial exercise of the underwriters' option to purchase additional shares, at a price of \$16.35 per share. The aggregate net proceeds from the offering, including proceeds from the sale of the additional shares, were approximately \$158,398 after deducting estimated offering expenses payable by the Company.

Dividends. For 2014, the Company declared the following dividends on its common stock:

Declaration Date	Record Date	Payment Date	Amount
February 26, 2014	March 31, 2014	April 15, 2014	\$0.40
April 29, 2014	June 30, 2014	July 15, 2014	\$0.40

For 2014, the Company declared the following dividends on its 8.625% Series A Cumulative Redeemable Perpetual Preferred Stock (the "Series A Preferred Stock"):

Declaration Date	Record Date	Payment Date	Amount
March 17, 2014	March 31, 2014	April 15, 2014	\$0.5391
June 9, 2014	June 30, 2014	July 15, 2014	\$0.5391

Note 15 – Commitments and Contingencies

KBC Bank Deutschland AG. In September 2013, the Company, together with other affiliates of Apollo, reached an agreement to make an investment in an entity that has agreed to acquire a minority participation in KBC Bank Deutschland AG

("KBCD"). The Company committed to invest up to approximately \$50,000 (€38,000), representing approximately 21% of the ownership in KBCD. The acquisition is subject to regulatory approval, which is expected to conclude during the second half of 2014. Consequently, there is no assurance that the acquisition will close.

Loan Commitments. As described in Note 5, at June 30, 2014, the Company had \$100,100 of unfunded loan commitments.

Note 16 – Fair Value of Financial Instruments

The following table presents the carrying value and estimated fair value of the Company's financial instruments not carried at fair value on the consolidated balance sheet at June 30, 2014 and December 31, 2013:

	June 30, 2014		December 31, 2013	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
Cash and cash equivalents	\$63,335	\$63,335	\$20,096	\$20,096
Restricted cash	30,127	30,127	30,127	30,127
Commercial first mortgage loans	343,810	348,043	161,099	164,405
Subordinate loans	748,227	664,661	497,484	503,267
Borrowings under repurchase agreements	(446,224)	(444,975)	(202,033)	(202,148)
Convertible senior notes, net	(139,362)	(151,218)	—	—
Participations sold	(89,182)	(89,974)	—	—

To determine estimated fair values of the financial instruments listed above, market rates of interest, which include credit assumptions, are used to discount contractual cash flows. The estimated fair values are not necessarily indicative of the amount the Company could realize on disposition of the financial instruments. The use of different market assumptions or estimation methodologies could have a material effect on the estimated fair value amounts. The Company's commercial first mortgage loans, subordinate loans and repurchase agreements are carried at amortized cost on the condensed consolidated financial statements and are classified as Level III in the fair value hierarchy.

Table of Contents

Note 17 – Net Income per Share

GAAP requires use of the two-class method of computing earnings per share for all periods presented for each class of common stock and participating security as if all earnings for the period had been distributed. Under the two-class method, during periods of net income, the net income is first reduced for dividends declared on all classes of securities to arrive at undistributed earnings. During periods of net losses, the net loss is reduced for dividends declared on participating securities only if the security has the right to participate in the earnings of the entity and an objectively determinable contractual obligation to share in net losses of the entity.

The remaining earnings are allocated to common stockholders and participating securities to the extent that each security shares in earnings as if all of the earnings for the period had been distributed. Each total is then divided by the applicable number of shares to arrive at basic earnings per share. For the diluted earnings, the denominator includes all outstanding shares of common stock and all potential shares of common stock assumed issued if they are dilutive. The numerator is adjusted for any changes in income or loss that would result from the assumed conversion of these potential shares of common stock.

The table below presents basic and diluted net (loss) income per share of common stock using the two-class method for the three and six months ended June 30, 2014 and 2013:

	For the three months ended June 30,		For the six months ended June 30,	
	2014	2013	2014	2013
Numerator:				
Net income	\$23,958	\$11,789	\$41,539	\$23,721
Preferred dividends	(1,860)	(1,860)	(3,720)	(3,720)
Net income available to common stockholders	22,098	9,929	37,819	20,001
Dividends declared on common stock	(18,739)	(14,752)	(33,590)	(29,500)
Dividends on participating securities	(88)	(200)	(174)	(395)
Net income (loss) attributable to common stockholders	\$3,271	\$(5,023)	\$4,055	\$(9,894)
Denominator:				
Basic weighted average shares of common stock outstanding	42,888,747	36,880,410	40,021,722	33,511,889
Diluted weighted average shares of common stock outstanding	43,099,354	37,373,885	40,236,109	33,946,329
Basic and diluted net income per weighted average share of common stock				
Distributable Earnings	\$0.44	\$0.40	\$0.84	\$0.88
Undistributed income (loss)	\$0.07	\$(0.13)	\$0.10	\$(0.29)
Basic and diluted net income per share of common stock	\$0.51	\$0.27	\$0.94	\$0.59

Note 18 – Subsequent Events

Dividends. On July 28, 2014, the Company declared a dividend of \$0.40 per share of common stock, which is payable on October 15, 2014 to common stockholders of record on September 30, 2014.

Investment Activity. During July 2014, the Company closed a \$20,000 floating-rate mezzanine loan secured by the equity interest in a 280-key hotel in the Chelsea neighborhood of New York City. The mezzanine loan has a two-year initial term and three one-year extension options and an appraised loan-to-value ("LTV") of 61%. The mezzanine loan was underwritten to generate an IRR of approximately 12%.

During July 2014, the Company closed a \$34,500 (\$30,000 of which was funded at closing) floating-rate, first mortgage loan secured by a newly constructed, Class-A, 63-unit multifamily property located in Brooklyn, New York, which also includes approximately 7,300 square feet of retail space and 31 parking spaces. The first mortgage loan has a two-year initial term with three one-year extension options and an appraised LTV of 70% on a fully funded basis.

The Company anticipates financing the loan, and on a levered basis, the loan was underwritten to generate an IRR of

approximately 12%.

During the third quarter of 2014, the Company deployed \$6,369 of equity to acquire legacy CMBS with an aggregate purchase price of \$31,844. The Company financed the CMBS utilizing \$25,475 of borrowings under the DB Facility. The CMBS have a weighted average life of 2.1 years and have been underwritten to generate an IRR of 16%.

ITEM 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

FORWARD-LOOKING INFORMATION

The Company makes forward-looking statements herein and will make forward-looking statements in future filings with the SEC, press releases or other written or oral communications within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). For these statements, the Company claims the protections of the safe harbor for forward-looking statements contained in such Section. Forward-looking statements are subject to substantial risks and uncertainties, many of which are difficult to predict and are generally beyond the Company’s control. These forward-looking statements include information about possible or assumed future results of the Company’s business, financial condition, liquidity, results of operations, plans and objectives. When the Company uses the words “believe,” “expect,” “anticipate,” “estimate,” “plan,” “continue,” “intend,” “should,” “may” or similar expressions, it intends to identify forward-looking statements. Statements regarding the following subjects, among others, may be forward-looking: market trends in the Company’s industry, interest rates, real estate values, the debt securities markets or the general economy or the demand for commercial real estate loans; the Company’s business and investment strategy; the Company’s operating results; actions and initiatives of the U.S. government and changes to U.S. government policies and the execution and impact of these actions, initiatives and policies; the state of the U.S. economy generally or in specific geographic regions; economic trends and economic recoveries; the Company’s ability to obtain and maintain financing arrangements, including securitizations; the anticipated shortfall of debt financing from traditional lenders; the volume of short-term loan extensions; the demand for new capital to replace maturing loans; expected leverage; general volatility of the securities markets in which the Company participates; changes in the value of the Company’s assets; the scope of the Company’s target assets; interest rate mismatches between the Company’s target assets and any borrowings used to fund such assets; changes in interest rates and the market value of the Company’s target assets; changes in prepayment rates on the Company’s target assets; effects of hedging instruments on the Company’s target assets; rates of default or decreased recovery rates on the Company’s target assets; the degree to which hedging strategies may or may not protect the Company from interest rate volatility; impact of and changes in governmental regulations, tax law and rates, accounting guidance and similar matters; the Company’s ability to maintain its qualification as a REIT for U.S. federal income tax purposes; the Company’s ability to remain excluded from registration under the Investment Company Act of 1940, as amended; the availability of opportunities to acquire commercial mortgage-related, real estate-related and other securities; the availability of qualified personnel; estimates relating to the Company’s ability to make distributions to its stockholders in the future; the Company’s understanding of its competition; and the closing of the Company’s investment in KBCD.

The forward-looking statements are based on the Company’s beliefs, assumptions and expectations of its future performance, taking into account all information currently available to it. Forward-looking statements are not predictions of future events. These beliefs, assumptions and expectations can change as a result of many possible events or factors, not all of which are known to the Company. See “Item 1A - Risk Factors” of the Company’s Annual Report on Form 10-K for the year ended December 31, 2013. These and other risks, uncertainties and factors, including those described in the annual, quarterly and current reports that the Company files with the SEC, could cause its actual results to differ materially from those included in any forward-looking statements the Company makes. All forward-looking statements speak only as of the date they are made. New risks and uncertainties arise over time and it is not possible to predict those events or how they may affect us. Except as required by law, the Company is not obligated to, and does not intend to, update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Overview

The Company is a REIT that primarily originates, acquires, invests in and manages performing commercial first mortgage loans, subordinate financings, CMBS and other commercial real estate-related debt investments. These asset classes are referred to as the Company’s target assets.

The Company is externally managed and advised by the Manager, an indirect subsidiary of Apollo Global Management, LLC (together with its subsidiaries, “Apollo”), a leading global alternative investment manager with a contrarian and value oriented investment approach in private equity, credit and real estate with assets under

management of approximately \$159.3 billion as of March 31, 2014.

The Manager is led by an experienced team of senior real estate professionals who have significant expertise in underwriting and structuring commercial real estate financing transactions. The Company benefits from Apollo's global infrastructure and operating platform, through which the Company is able to source, evaluate and manage potential investments in the Company's target assets.

Table of Contents

Market Overview

The commercial real estate market has largely recovered from the downturn experienced as part of the correction in the global financial markets which began in mid-2007. Property values in many markets and property types have recovered and the lending market is functioning with both established and new entrants. Based on the current market dynamics, including increasing real estate transaction activity and over \$1 trillion of commercial real estate debt scheduled to mature through 2017, there remains a compelling opportunity for the Company to source and originate investments in its target assets at attractive risk adjusted returns. The Company will continue to focus on underlying real estate value, and transactions that benefit from the Company's ability to execute complex and sophisticated transactions.

During and immediately following the financial crisis, due to the prevalence of lenders granting extensions across the commercial mortgage loan industry, the demand for new capital to refinance maturing commercial mortgage debt was somewhat tempered. This trend has abated to a certain extent in more recent periods as many borrowers have refinanced legacy loans and pursued new acquisitions. While the frequency of extensions and modifications had a meaningful impact on the timing of loan maturities, the Company believes the next phase will involve rising volumes of commercial mortgage lending activity which should allow lenders to capitalize on the impending maturity wall. Additionally, as the European senior lending market continues to expand and strengthen, we expect to see an increase in the number and availability of target opportunities.

With the continued tapering of its bond purchases, the Federal Reserve has demonstrated a desire to slowly reduce the amount of stimulus in the economy. While the Federal Reserve has decreased the pace of its bond purchases, the low interest rate environment is expected to persist, remain attractive to borrowers and is projected to continue to drive significant refinancing activity across all property types during 2014.

After seeing substantial growth in 2012 and 2013, new-issue CMBS volume in the first half of 2014 was approximately \$43 billion, equal to approximately 82% of the volume during the same period in the prior year. In 2013, approximately \$86 billion of CMBS were issued in the United States, an increase of approximately 78% over 2012 and an increase of 163% over 2011. We believe the volume of originations in the CMBS market is evidence that the lending market for commercial real estate has largely stabilized since the financial crisis.

However, current volumes of CMBS issuance are still moderate relative to the peak of the market, which saw more than \$229 billion in CMBS issuance in 2007. We perceive that lenders still appear to be focused on stabilized cash flowing assets with loan-to-value ratios lower than peak. As a result, we expect to continue to see opportunities to originate mezzanine and first mortgage financings in transactions which benefit from the Company's ability to source, structure and execute complex transactions.

Critical Accounting Policies

A summary of the Company's accounting policies is set forth in its Annual Report on Form 10-K for the year ended December 31, 2013 under "Item 7 – Management's Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies and Use of Estimates."

Significant Accounting Policies

Foreign Currency. The Company may enter into transactions not denominated in U.S. dollars. Foreign exchange gains and losses arising on such transactions are recorded as a gain or loss in the Company's consolidated statements of operations. Non-U.S. dollar denominated assets and liabilities are translated to U.S. dollars at the exchange rate prevailing at the reporting date and income, expenses, gains, and losses are translated at the prevailing exchange rate on the dates that they were recorded.

Participations Sold. Participations sold represent interests in certain loans that the Company originated and subsequently sold. In certain instances, the Company presents these participations sold as both assets and non-recourse liabilities because these arrangements do not qualify as sales under GAAP. Generally, participations sold are recorded as assets and liabilities in equal amounts on the Company's consolidated balance sheets, and an equivalent amount of interest income and interest expense is recorded on the Company's consolidated statements of operations.

Financial Condition and Results of Operations

(in thousands—except share and per share data)

Investments

The following table sets forth certain information regarding the Company's investments at June 30, 2014:

Table of Contents

Description	Face Amount	Amortized Cost	Weighted Average Yield	Remaining Weighted Average Life (years)	Remaining Debt	Cost of Funds	Remaining Debt Term (years) (1)	Equity at cost (2)	Current Weighted Average Underwritten IRR (3) (4)	Levered Weighted Average Underwritten IRR (3) (4)
First mortgages	\$346,485	\$343,810	8.4 %	3.0	\$146,698	2.7 %	0.6	\$197,112	15.0 %	16.4 %
Subordinate loans (5)	661,668	659,045	11.9	3.5	—	—	—	659,045	12.8	12.8
CMBS	343,596	339,724	6.3	2.8	299,526	3.1	3.7	70,325	15.4	15.5
Total/Weighted Average	\$1,351,749	\$1,342,579	9.6 %	3.2	\$446,224	2.9 %	2.7	\$926,482	13.6 %	13.9 %

(1) Assumes extension options are exercised. See “—Liquidity and Capital Resources - Borrowings Under Various Financing Arrangements” below for a discussion of the Company's repurchase agreements.

(2) Includes \$30,127 of restricted cash related to the UBS Facility.

The underwritten IRR for the investments shown in the above table reflect the returns underwritten by the Manager, calculated on a weighted average basis assuming no dispositions, early prepayments or defaults but assuming that extension options are exercised and that the cost of borrowings under the Wells Facility remains constant over the remaining term. With respect to certain loans, the underwritten IRR calculation assumes certain estimates with respect to the timing and magnitude of future fundings for the remaining commitments and associated loan repayments, and assumes no defaults. IRR is the annualized effective compounded return rate that accounts for the time-value of money and represents the rate of return on an investment over a holding period expressed as a percentage of the investment. It is the discount rate that makes the net present value of all cash outflows (the costs of investment) equal to the net present value of cash inflows (returns on investment). It is

(3) derived from the negative and positive cash flows resulting from or produced by each transaction (or for a transaction involving more than one investment, cash flows resulting from or produced by each of the investments), whether positive, such as investment returns, or negative, such as transaction expenses or other costs of investment, taking into account the dates on which such cash flows occurred or are expected to occur, and compounding interest accordingly. There can be no assurance that the actual IRRs will equal the underwritten IRRs shown in the table. See “Item 1A-Risk Factors-The Company may not achieve its underwritten internal rate of return on its investments which may lead to future returns that may be significantly lower than anticipated” included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2013 for a discussion of some of the factors that could adversely impact the returns received by the Company from the investments shown in the table or elsewhere in this quarterly report over time.

The Company’s ability to achieve its underwritten levered weighted average IRR with regard to its portfolio of first mortgage loans is dependent upon the Company borrowing approximately \$28,302 under the JPMorgan Facility or any replacement facility. Without such reborrowing, the levered weighted average underwritten IRRs will be as indicated in the current weighted average underwritten IRR column above.

Subordinate loans are net of a participation sold during June 2014. The Company presents the participation sold as both assets and non-recourse liabilities because the participation does not qualify as a sale according to GAAP. At (5) June 30, 2014, the Company had one such participation sold with a face amount of \$90,000 and a carrying amount of \$89,182.

Investment Activity

Investment activity. During February 2014, the Company provided a \$80,000, floating rate first mortgage loan (\$25,000 of which was funded at closing) for the development of a 50-unit luxury residential condominium in Montgomery County, Maryland. The Company’s loan is expected to fund the first phase of a two-phase development and has a 30-month term with a 6-month extension option. On a fully funded basis, the Company expects that the first mortgage loan will represent an underwritten loan-to-net sellout of approximately 68% and has been underwritten to

generate a 15% IRR. See “—Investments” below for a discussion of IRR.

During April 2014, the Company closed a \$210,000 fixed-rate, five-year first mortgage loan secured by a portfolio of 229 single-family and condominium homes located across North and Central America, the Caribbean and England. Simultaneous with closing, the Company syndicated \$104,000 of the loan to other funds managed by affiliates of Apollo Global Management, LLC and retained \$106,000. The first mortgage loan has an appraised loan-to-value of approximately 49% and was underwritten to generate an IRR of approximately 8.2% on an unlevered basis. The Company anticipates financing the investment and on a levered basis, the investment was underwritten to generate an IRR of approximately 15%.

During April 2014, the Company closed a \$53,954 (£32,100) fixed rate, nine-month mezzanine loan in connection with the purchase of an existing commercial building that is expected to be re-developed into a 173,000 salable square foot residential condominium in Central London. The mezzanine loan is part of a \$126,060 (£75,000) pre-development loan comprised of a \$72,106 (£42,900) first mortgage and the Company's \$53,954 (£32,100) mezzanine loan. The Company will

Table of Contents

have the option, but not the obligation, to participate in the development financing. The Company's loan basis represents a 78% appraised loan-to-value and the mezzanine loan has been underwritten to generate an IRR of approximately 12%.

During May 2014, the Company closed a \$155,000 floating-rate whole loan secured by the first mortgage and equity interests in an entity that owns a resort hotel in Aruba. The property consists of 442 hotels rooms, 114 timeshare units, two casinos and approximately 131,500 square feet of retail space. During June 2014, the Company syndicated a \$90,000 senior participation in the loan and retained a \$65,000 junior participation in the loan. The whole loan has a three-year term with two one-year extension options and an appraised LTV of 60%. The junior participation was underwritten to generate an IRR of approximately 14%.

During May 2014, the Company closed a \$34,000 floating-rate first mortgage loan for the acquisition of a newly renovated 301-key hotel located in downtown Philadelphia. The first mortgage has a three-year term with two one-year extension options and an underwritten loan-to-cost of 58%. The first mortgage loan was underwritten to generate an IRR of approximately 13% on a levered basis.

During June 2014, the Company closed a \$65,100 floating-rate first mortgage loan (\$20,000 of which was funded at closing) for the development of a 40-unit luxury residential condominium in downtown Bethesda, Maryland. The Company's loan has a 30-month term with a six-month extension option. On a fully funded basis, the first mortgage loan has a projected appraised loan-to-net sellout of approximately 67% and has been underwritten to generate an IRR of approximately 14%.

During June 2014, the Company closed a \$28,250 fixed-rate mezzanine loan secured by the equity interest in a 795-key full-service hotel and 226,000 square foot office and retail condominium in the Times Square neighborhood of New York City. The mezzanine loan has a remaining six months term and an underwritten LTV of 67%. The mezzanine loan was underwritten to generate an IRR of approximately 8%.

During June 2014, the Company closed a \$50,000 floating-rate mezzanine loan secured by the equity interest in a portfolio of 167 wholly owned skilled nursing facilities located across 19 states. The mezzanine loan was issued in connection with the refinancing of the portfolio and paid off the existing \$47,000 mezzanine loan acquired in 2013. The new mezzanine loan has a two-year initial term with three one-year extension options and an underwritten LTV of 62%. The mezzanine loan was underwritten to generate an IRR of approximately 12%.

During the second quarter of 2014, the Company deployed \$34,713 of equity to acquire legacy CMBS originally rated AAA with an aggregate purchase price of \$173,567. The Company financed the CMBS utilizing \$138,853 of borrowings under the DB Facility. The CMBS have a weighted average life of 2.8 years and have been underwritten to generate an IRR of 17%.

Repayments. During January 2014, the Company received a \$15,000 principal repayment from a subordinate loan secured by a pledge of the equity interests in the owner of a New York City hotel. The Company realized a 14% IRR on this subordinate loan.

During June 2014, the Company received a \$47,000 principal repayment from a mezzanine loan secured by a pledge of the equity interests in a portfolio of skilled nursing facilities. The Company realized a 12% IRR on this mezzanine loan.

Table of Contents**Net Income Available to Common Stockholders**

For the three and six months ended June 30, 2014, respectively, the Company's net income available to common stockholders was \$22,098, or \$0.51 per share, and \$37,819, or \$0.94 per share. For the three and six months ended June 30, 2013, respectively, the Company's net income available to common stockholders was \$9,929, or \$0.27 per share, and \$20,001, or \$0.59 per share.

Net Interest Income

The following table sets forth certain information regarding the Company's net investment income for the three and six months ended June 30, 2014 and 2013:

	Three months ended June 30,					Six months ended June 30,				
	2014	2013	Change (amount)	Change (%)		2014	2013	Change (amount)	Change (%)	
Interest income from:										
Securities	\$4,366	\$3,014	\$1,352	44.9	%	\$6,785	\$6,101	\$684	11.2	%
Commercial mortgage loans	6,438	3,676	2,762	75.1	%	10,449	7,268	3,181	43.8	%
Subordinate loans	18,238	11,498	6,740	58.6	%	32,968	22,953	10,015	43.6	%
Repurchase agreements	—	—	—	—	%	—	2	(2)	(100.0)	%
Interest expense	(5,258)	(955)	(4,303)	450.6	%	(7,015)	(2,024)	(4,991)	246.6	%
Net interest income	\$23,784	\$17,233	\$6,551	38.0	%	\$43,187	\$34,300	\$8,887	25.9	%

Net interest income for the three and six months ended June 30, 2014, respectively, increased \$6,551, or 38.0%, and \$8,887, or 25.9%, from the same periods in 2013. The increase was primarily the result of additional interest income from commercial mortgage loans and subordinate loans which was offset by an increase in interest expense.

Interest income related to securities for the three and six months ended June 30, 2014, respectively, increased \$1,352, or 44.9%, and \$684, or 11.2%, from the same periods in 2013. The increase is attributable to the purchase of \$173,969 of CMBS during the first six months of 2014. This increase was partially offset by the repayment of \$23,978 CMBS during the first six months of 2014.

The increase in interest income related to commercial mortgage loans for the three and six months ended June 30, 2014, respectively, of \$2,762, or 75.1%, and \$3,181, or 43.8%, from the same periods in 2013, is primarily attributable to the funding of \$181,590 of commercial mortgage loans net of repayments of \$452 during 2014.

The increase in interest income related to subordinate loans for the three and six months ended June 30, 2014, respectively, of \$6,740, or 58.6%, and \$10,015, or 43.6%, from the same periods in 2013 is primarily attributable to the funding of \$318,922 of subordinate loans net of repayments of \$71,434 during 2014. The increase in interest income was offset by a one-time \$2,500 prepayment penalty received upon the repayment of two mezzanine loans in February 2013.

The decrease in interest related to repurchase agreements for the six months ended June 30, 2014 of \$(2), or (100.0)%, from the same period in 2013 is attributable to the final repayment of the repurchase facility in January 2013.

Interest expense for the three and six months ended June 30, 2014, respectively, increased \$4,303, or 450.6%, and \$4,991, or 246.6%, from the same periods in 2013. In addition to the Company's issuance of the 2019 Notes in March 2014, the increase is primarily due to the increase in the weighted average cost of funds from 1.4% at June 30, 2013 to 2.9% at June 30, 2014. This increase was primarily related to the Company's borrowings under the UBS Facility and DB Facility. This increase was also due to the increase in the average balance of the Company's borrowings under repurchase agreements from \$210,291 for the six months ended June 30, 2013 to \$284,368 for the six months ended June 30, 2014.

Operating Expenses

The following table sets forth the Company's operating expenses for the three and six months ended June 30, 2014 and 2013:

Table of Contents

	Three months ended June 30,					Six months ended June 30,				
	2014	2013	Change (amount)	Change (%)		2014	2013	Change (amount)	Change (%)	
General and administrative expense	\$1,117	\$1,009	\$108	10.7	%	\$2,133	\$2,022	\$111	5.5	%
Stock-based compensation expense	362	428	(66)	(15.4)	%	788	1,311	(523)	(39.9)	%
Management fee expense	2,966	2,600	366	14.1	%	5,531	4,759	772	16.2	%
Total operating expense	\$4,445	\$4,037	\$408	10.1	%	\$8,452	\$8,092	\$360	4.4	%

General and administrative expense for the three and six months ended June 30, 2014, respectively, increased \$108, or 10.7%, and \$111, or 5.5%, from the same periods in 2013. Stock-based compensation expense for the three and six months ended June 30, 2014, respectively, decreased \$66, or 15.4%, and \$523, or 39.9%, from the same periods in 2013. The decrease is primarily attributable to final vesting of 288,750 RSUs on January 1, 2014. Share-based payments are discussed further in the accompanying consolidated financial statements, “Note 12—Share-Based Payments.”

Management fee expense for the three and six months ended June 30, 2014, respectively, increased \$366, or 14.1%, and \$772, or 16.2%, from the same periods in 2013. The increase is primarily attributable to increases in the Company’s stockholders’ equity (as defined in the Management Agreement) as a result of the Company’s follow-on common equity offering completed in March 2013 and, to a lesser extent, the Company’s follow-on common equity offering completed during the second quarter of 2014. Management fees and the relationship between the Company and the Manager are discussed further in the accompanying consolidated financial statements, “Note 11—Related Party Transactions.”

Realized and unrealized gain/loss

The following amounts related to realized and unrealized gains (losses) on the Company’s CMBS, non U.S. dollar denominated loans and derivative instruments are included in the Company’s consolidated statement of operations for the three and six months ended June 30, 2014 and 2013:

		Three months ended June 30,		Six months ended June 30,	
	Location of Gain (Loss) Recognized in Income	2014	2013	2014	2013
Securities	Unrealized gain (loss) on securities	4,749	(1,421)	6,934	(2,500)
Foreign currency	Foreign currency gain - unrealized	959	—	959	—
Interest rate swaps	Loss on derivative instruments – realized *	—	(59)	—	(133)
Interest rate swaps	Gain on derivative instruments – unrealized	—	58	—	131
Forward currency contract	Loss on derivative instruments - unrealized	\$(1,093)	\$—	\$(1,093)	\$—
Interest rate caps	Loss on derivative instruments - unrealized	\$—	\$(1)	\$—	\$(1)
Total		\$4,615	\$(1,423)	\$6,800	\$(2,503)

* Realized losses represent net amounts expensed related to the exchange of fixed and floating rate cash flows for the Company’s derivative instruments during the period.

The Company used interest rate swaps and caps to manage exposure to variable cash flows on portions of its borrowings under repurchase agreements. Interest rate swap and cap agreements allow the Company to receive a variable rate cash flow based on LIBOR and pay a fixed rate cash flow, mitigating the impact of this exposure. All of the Company’s interest rate swaps and caps matured during the third quarter of 2013.

During April 2014, the Company entered into a forward contract whereby it agreed to sell £34,389 in exchange for \$57,631 in January 2015. The forward contract was executed to economically fix the U.S. dollar amounts of foreign denominated cash flows expected to be received related to a foreign denominated loan investment which closed in the second quarter of 2014.

The Company has not designated any of its derivative instruments as hedges under GAAP and therefore, changes in the fair value of the Company's derivatives are recorded directly in earnings.

For the three and six months ended June 30, 2014, respectively, the Company recognized an unrealized gain (loss) on securities of \$4,749 and \$6,934. For the three and six months ended June 30, 2013, respectively, the Company recognized an

Table of Contents

unrealized gain (loss) on securities of \$(1,421) and \$(2,500). These gains (losses) resulted from mark-to-market adjustments related to those securities for which the fair value option has been elected.

Dividends

Dividends. For 2014, the Company declared the following dividends on its common stock:

Declaration Date	Record Date	Payment Date	Amount
February 26, 2014	March 31, 2014	April 15, 2014	\$0.40
April 29, 2014	June 30, 2014	July 15, 2014	\$0.40

For 2014, the Company declared the following dividends on its Series A Preferred Stock:

Declaration Date	Record Date	Payment Date	Amount
March 17, 2014	March 31, 2014	April 15, 2014	\$0.5391
June 9, 2014	June 30, 2014	July 15, 2014	\$0.5391

Subsequent Events

Dividends. On July 28, 2014, the Company declared a dividend of \$0.40 per share of common stock, which is payable on October 15, 2014 to common stockholders of record on September 30, 2014.

Investment Activity. During July 2014, the Company closed a \$20,000 floating-rate mezzanine loan secured by the equity interest in a 280-key hotel in the Chelsea neighborhood of New York City. The mezzanine loan has a two-year initial term and three one-year extension options and an appraised LTV of 61%. The mezzanine loan was underwritten to generate an IRR of approximately 12%.

During July 2014, the Company closed a \$34,500 (\$30,000 of which was funded at closing) floating-rate, first mortgage loan secured by a newly constructed, Class-A, 63-unit multifamily property located in Brooklyn, New York, which also includes approximately 7,300 square feet of retail space and 31 parking spaces. The first mortgage loan has a two-year initial term with three one-year extension options and an appraised LTV of 70% on a fully funded basis. The Company anticipates financing the loan, and on a levered basis, the loan was underwritten to generate an IRR of approximately 12%.

During the third quarter of 2014, the Company deployed \$6,369 of equity to acquire legacy CMBS with an aggregate purchase price of \$31,844. The Company financed the CMBS utilizing \$25,475 of borrowings under the DB Facility. The CMBS have a weighted average life of 2.1 years and have been underwritten to generate an IRR of 16%.

Liquidity and Capital Resources

Liquidity is a measure of the Company's ability to meet potential cash requirements, including ongoing commitments to repay borrowings, fund and maintain its assets and operations, make distributions to its stockholders and other general business needs. The Company's cash is used to purchase or originate target assets, repay principal and interest on borrowings, make distributions to stockholders and fund operations. The Company's liquidity position is closely monitored and the Company believes it has sufficient current liquidity and access to additional liquidity to meet financial obligations for at least the next 12 months. The Company's primary sources of liquidity are as follows:

Cash Generated from Operations

Cash from operations is generally comprised of interest income from the Company's investments, net of any associated financing expense, principal repayments from the Company's investments, net of associated financing repayments, proceeds from the sale of investments and changes in working capital balances. See "—Financial Condition and Results of Operations—Investments" above for a summary of interest rates and weighted average lives related to the Company's investment portfolio at June 30, 2014. While there are no contractual paydowns related to the Company's CMBS, periodic paydowns do occur. Repayments on the debt secured by the Company's CMBS occur in conjunction with the paydowns on the collateral pledged.

Borrowings Under Various Financing Arrangements

JPMorgan Facility

Table of Contents

In January 2010, the Company entered into the JPMorgan Facility, pursuant to which the Company may borrow up to \$100,000 in order to finance the origination and acquisition of commercial first mortgage loans and AAA-rated CMBS. Per the terms of the original agreement, amounts borrowed under the JPMorgan Facility bore interest at a spread of 3.00% over one-month LIBOR with no floor. During April 2012, the Company amended the JPMorgan Facility to reduce the interest rate spread by 50 basis points to LIBOR+2.50%. Advance rates under the JPMorgan Facility typically range from 65%-90% on the estimated fair value of the pledged collateral depending on its loan-to-value. Margin calls will occur any time the outstanding loan balance exceeds the lender's required advance in accordance with agreed upon advance rates by more than \$250. In February 2013, the Company, through two of the Company's subsidiaries, amended and restated the JPMorgan Facility to extend the maturity date to January 31, 2014, which was subsequently extended for an additional 364 days pursuant to the exercise of the extension option during January 2014. The Company paid JPMorgan an upfront structuring fee of 0.50% of the facility amount for the first year of the term and an extension fee of 0.25% for the January 2014 extension. During the second quarter of 2014, through a series of letter agreements, the JPMorgan agreed to temporarily waive compliance with the compliance with the minimum liquidity covenant under the JPMorgan Facility that requires the Company to maintain minimum liquidity of the greater of 10% of total consolidated recourse indebtedness and \$12,500 and temporarily amended the JPMorgan Facility to increase the maximum permitted borrowing from \$100,000 to approximately \$146,814 and amended the terms in order to finance the acquisition of certain mezzanine real estate loans. On June 12, 2014, the Company and two of the Company's subsidiaries entered into a third amendment and restatement of the JP Morgan Facility (the "Third Amendment and Restatement") with JPMorgan. The Third Amendment and Restatement amended the JPMorgan Facility to facilitate the financing of mezzanine loans under the JPMorgan Facility and increased the maximum permitted borrowing to \$175,000. Pricing on the JPMorgan Facility will remain at LIBOR+2.5%. In connection with the Third Amendment and Restatement, the full guarantee provided by the Company for the obligations of its borrower subsidiaries under the JPMorgan Facility was also amended to require the Company to hold minimum liquidity equal to the greater of 5% of its total recourse indebtedness and \$15,000. The JPMorgan Facility contains, among others, the following restrictive covenants: (1) negative covenants relating to restrictions on the Company's operations that would cease to allow the Company to qualify as a REIT and (2) financial covenants to be met by the Company when the repurchase facility is being utilized, including a minimum consolidated tangible net worth covenant (\$125,000), maximum total debt to consolidated tangible net worth covenant (3:1), a minimum liquidity covenant (the greater of 10% of total consolidated recourse indebtedness and \$12,500) and a minimum net income covenant (\$1 during any four consecutive fiscal quarters). As amended and restated, the JPMorgan Facility expires in January 2015.

As of June 30, 2014, the Company had \$146,698 of borrowings outstanding under the JPMorgan Facility.

Wells Facility

During August 2010, the Company, through an indirect wholly-owned subsidiary, entered into the Wells Facility, pursuant to which the Company may borrow up to \$250,000 in order to finance the acquisition of AAA-rated CMBS. The Wells Facility had a term of one year, with two one-year extensions available at the Company's option, subject to certain restrictions, and upon the payment of an extension fee equal to 25 basis points on the then outstanding balance of the facility for each one-year extension. Advances under the Wells Facility accrue interest at a per annum pricing rate equal to the sum of (i) 30 day LIBOR and (ii) a pricing margin of 1.25%. The purchase price of the CMBS is determined on a per asset basis by applying an advance rate schedule agreed upon by the Company and Wells Fargo. Advance rates under the Wells Facility typically range from 85%-90% on the face amount of the underlying collateral depending on the weighted average life of the collateral pledged. Margin calls will occur any time the outstanding loan balance exceeds the lender's required advance in accordance with agreed upon advance rates by more than \$250. The Wells Facility contains, among others, the following restrictive covenants: (1) negative covenants intended to restrict the Company from failing to qualify as a REIT and (2) financial covenants to be met by the Company, including a minimum net asset value covenant (which shall not be less than an amount equal to (i) \$100,000, (ii) 75% of the greatest net asset value during the prior calendar quarter and (iii) 65% of the greatest net asset value during the prior calendar year), a maximum total debt to consolidated tangible net worth covenant (8:1), a minimum liquidity covenant (\$2,500) and a minimum EBITDA to interest expense covenant (1.5:1). The Company has agreed to provide

a limited guarantee of up to 15%, or a maximum of \$37,500, of the obligations of its indirect wholly-owned subsidiary under the Wells Facility.

During December 2011, the Company, through an indirect wholly-owned subsidiary, entered into an amendment letter (the "Amendment Letter") related to the Wells Facility to increase its maximum permitted borrowing under the facility from \$250,000 to \$506,000 in order to pay down its borrowings under the Term Asset-Backed Securities Loan Facility (the "TALF") program administered by the Federal Reserve Bank of New York and to finance the CMBS that had been financed under the TALF program. The Amendment Letter additionally adjusted the pricing margin for all assets financed under the Wells Facility occurring after December 22, 2011 from 1.25% to 1.50%, and added a minimum liquidity covenant, requiring the Company to maintain at all times an amount in Repo Liquidity (as generally defined under the Wells Facility to include all amounts held in the collection account established under the Wells Facility for the benefit of Wells Fargo, cash, cash equivalents, super-senior CMBS rated AAA by at least two rating agencies, and total amounts immediately and unconditionally available on an

Table of Contents

unrestricted basis under all outstanding capital commitments, subscription facilities and secured revolving credit or repurchase facilities) no less than the greater of 10% of the total consolidated recourse indebtedness of the Company and \$12,500. Advances under the Wells Facility accrue interest at a per annum pricing rate equal to the sum of (i) 30 day LIBOR and (ii) the applicable pricing margin.

The Wells Facility was further amended during the second quarter of 2012 to provide an additional \$100,000 of financing capacity for the purchase of Hilton CMBS at a rate of LIBOR plus 235 basis points with respect to borrowings secured by the Hilton CMBS. The additional \$100,000 of capacity to finance the Hilton CMBS matures in November 2014 and may be extended for an additional year upon the payment of an extension fee equal to 0.50% on the then aggregate outstanding repurchase price for all such assets. Additionally, during August 2012, the Company exercised the final one-year extension of the term of the Wells Facility and extended the maturity date to August 2013 (except with respect to \$100,000 of capacity under the facility to finance the Hilton CMBS described below).

In February 2013, the Company further amended the Wells Facility to reduce the interest rate as follows: (i) with respect to the outstanding borrowings used to provide financing for the AAA CMBS, the interest rate was reduced to LIBOR+1.05% from LIBOR+1.25%-1.50% (depending on the collateral pledged); and (ii) with respect to the outstanding borrowings used to provide financing for the Hilton CMBS, the interest rate was reduced to LIBOR+1.75% from LIBOR+2.35%. In addition, the maturity date of the Wells Facility with respect to the outstanding borrowings used to provide financing for the AAA CMBS was extended to March 2014. The Hilton CMBS and related borrowings were repaid in November 2013. In February 2014, the maturity date of the Wells Facility was extended to March 2015. In addition, the Company reduced the interest rate to LIBOR + 80 basis points from LIBOR + 105 basis points.

At June 30, 2014, the Company had \$26,774 of borrowings outstanding under the Wells Facility secured by CMBS held by the Company.

UBS Facility

During September 2013, the Company through an indirect wholly-owned subsidiary entered into the UBS Facility with UBS pursuant to which the Company may borrow up to \$133,333 in order to finance the acquisition of CMBS. The UBS Facility has a term of four years, with a one-year extension available at the Company's option, subject to certain restrictions. Advances under the UBS Facility accrue interest at a per annum pricing rate equal to a spread of 1.55% per annum over the rate implied by the fixed rate bid under a fixed-for-floating interest rate swap for the receipt of payments indexed to six-month U.S. dollar LIBOR. The Company borrows 100% of the estimated fair value of the collateral pledged and posts margin equal to 22.5% of that borrowing amount in cash. The margin posted is classified as restricted cash on the Company's condensed consolidated balance sheets. Additionally, beginning on the 121st day following the closing date and depending on the utilization rate of the facility, a portion of the undrawn amount may be subject to non-use fees. The UBS Facility contains customary terms and conditions for repurchase facilities of this type and financial covenants to be met by the Company, including a minimum net asset value covenant (which shall not be less than an amount equal to \$500,000 and a maximum total debt to consolidated tangible net worth covenant (3:1). The Company has agreed to provide a full guarantee of the obligations of its indirect wholly-owned subsidiary under the UBS Facility. During December 2013, the UBS Facility was amended to increase the maximum amount to \$133,899.

As of June 30, 2014, the Company had \$133,899 of borrowings outstanding under the UBS Facility secured by CMBS held by the Company.

DB Facility

During April 2014, the Company through an indirect wholly-owned subsidiary entered into the DB Facility with DB pursuant to which the Company may borrow up to \$100,000 in order to finance the acquisition of CMBS. The DB Facility was amended in May 2014 to permit the Company to borrow up to \$200,000, which maximum may be increased one further time at the Company's request by \$100,000. The DB Facility has a term of four years, subject to certain restrictions. Advances under the DB Facility accrue interest at a per annum pricing rate based on the rate implied by the fixed rate bid under a fixed for floating interest rate swap for the receipt of payments indexed to three-month U.S. dollar LIBOR, plus a financing spread ranging from 1.80% to 2.32% based on the rating of the collateral pledged. The Company borrows an amount equal to the product of the estimated fair value of the collateral

pledged divided by a margin ratio ranging from 125.00% to 181.82% depending on the collateral pledged. Additionally, beginning on August 1, 2014 and depending on the utilization rate of the facility, a portion of the undrawn amount may be subject to non-use fees. The DB Facility contains customary terms and conditions for repurchase facilities of this type and financial covenants to be met by the Company, including minimum shareholder's equity of 50% of the gross capital proceeds of its initial public offering and any subsequent public or private offerings.

Table of Contents

As of June 30, 2014, the Company had \$138,853 of borrowings outstanding under the DB Facility secured by CMBS held by the Company.

Convertible Senior Notes

On March 17, 2014, the Company issued \$143,750 aggregate principal amount of 5.50% Convertible Senior Notes due 2019, for which the Company received net proceeds, after deducting the underwriting discount and estimated offering expenses payable by the Company, of approximately \$139,037.

Other Potential Sources of Financing

The Company's primary sources of cash currently consist of the \$63,335 of cash available at June 30, 2014, principal and interest payments the Company receives on its portfolio of assets, as well as available borrowings under its repurchase agreements. The Company expects its other sources of cash to consist of cash generated from operations and the possible prepayments of principal received on the Company's portfolio of assets. Such prepayments are difficult to estimate in advance. At June 30, 2014, \$28,302 of borrowing capacity under the JPMorgan Facility was available and \$61,147 of borrowing capacity under the DB Facility was available; however, the Company may need to acquire additional commercial first mortgage loans or CMBS in order to utilize all of that capacity. Depending on market conditions, the Company may utilize additional borrowings as a source of cash, which may also include additional repurchase agreements as well as other borrowings such as credit facilities.

The Company maintains policies relating to its borrowings and use of leverage. See "—Leverage policies" below. In the future, the Company may seek to raise further equity capital, issue debt securities or engage in other forms of borrowings in order to fund future investments or to refinance expiring indebtedness.

The Company generally intends to hold its target assets as long-term investments, although it may sell certain of its investments in order to manage its interest rate risk and liquidity needs, meet other operating objectives and adapt to market conditions.

To maintain its qualification as a REIT under the Internal Revenue Code of 1986, as amended, the Company must distribute annually at least 90% of its taxable income. These distribution requirements limit the Company's ability to retain earnings and thereby replenish or increase capital for operations.

Leverage policies

The Company uses leverage for the sole purpose of financing its portfolio and not for the purpose of speculating on changes in interest rates. In addition to its repurchase agreements, in the future the Company may access additional sources of borrowings. The Company's charter and bylaws do not limit the amount of indebtedness the Company can incur; however, the Company is limited by certain financial covenants under its repurchase agreements. Consistent with the Company's strategy of keeping leverage within a conservative range, the Company expects that its total borrowings on loans will be in an amount that is approximately 35% of the value of its total loan portfolio.

Investment Guidelines

During April 2014, based on the Manager's recommendation, the Company's Board of Directors amended the Company's investment guidelines by removing certain limitations related to non-U.S. assets, undeveloped land, construction loans and for-sale residential real-estate loans. The Company's board of directors has adopted the following investment guidelines:

- no investment will be made that would cause the Company to fail to qualify as a REIT for U.S. federal income tax purposes;
- no investment will be made that would cause the Company to register as an investment company under the 1940 Act;
- investments will be predominantly in the Company's target assets;
- no more than 20% of the Company's cash equity (on a consolidated basis) will be invested in any single investment at the time of the investment;
- until appropriate investments can be identified, the Manager may invest the proceeds of any offering in interest bearing, short-term investments, including money market accounts and/or funds, that are consistent with the Company's intention to qualify as a REIT.

Contractual obligations and commitments

Table of Contents

The Company's contractual obligations including expected interest payments as of June 30, 2014 are summarized as follows:

	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years	Total
Wells Facility borrowings *	\$26,950	\$—	\$—	\$—	\$26,950
UBS Facility borrowings **	4,751	129,168	11,787	—	145,706
DB Facility borrowings	6,618	122,283	23,292	—	152,193
JPMorgan Facility borrowings*	149,017	—	—	—	149,017
Total	\$187,336	\$251,451	\$35,079	\$—	\$473,866

* Assumes current LIBOR of 0.16% for interest payments due under the JPMorgan Facility and Wells Facility.

** Assumes extension options are exercised.

KBC Bank Deutschland AG. In September 2013, the Company, together with other affiliates of Apollo, reached an agreement to make an investment in an entity that has agreed to acquire a minority participation in KBCD. The Company committed to invest up to approximately \$50,000 (€38,000), representing approximately 21% of the ownership in KBCD. The acquisition is subject to regulatory approval, which is expected to conclude during the second half of 2014. Consequently, there is no assurance that the acquisition will close.

Loan Commitments. At June 30, 2014, the Company had \$100,100 of unfunded loan commitments.

Management Agreement. On September 23, 2009, the Company entered into the Management Agreement with the Manager pursuant to which the Manager is entitled to receive a management fee and the reimbursement of certain expenses. The table above does not include amounts due under the Management Agreement as those obligations do not have fixed and determinable payments. Pursuant to the Management Agreement, the Manager is entitled to a base management fee calculated and payable quarterly in arrears in an amount equal to 1.5% of the Company's stockholders' equity (as defined in the Management Agreement), per annum. The Manager will use the proceeds from its management fee in part to pay compensation to its officers and personnel. The Company does not reimburse its Manager or its affiliates for the salaries and other compensation of their personnel, except for the allocable share of the compensation of (1) the Company's Chief Financial Officer based on the percentage of his time spent on the Company's affairs and (2) other corporate finance, tax, accounting, internal audit, legal, risk management, operations, compliance and other non-investment professional personnel of the Manager or its affiliates who spend all or a portion of their time managing the Company's affairs based on the percentage of time devoted by such personnel to the Company's affairs. The Company is also required to reimburse its Manager for operating expenses related to the Company incurred by its Manager, including expenses relating to legal, accounting, due diligence and other services. Expense reimbursements to the Manager are made in cash on a monthly basis following the end of each month. The Company's reimbursement obligation is not subject to any dollar limitation.

The current term of the Management Agreement expires on September 29, 2014 and shall be automatically renewed for successive one-year terms on each anniversary thereafter. The Management Agreement may be terminated upon expiration of the one-year terms only upon the affirmative vote of at least two-thirds of the Company's independent directors, based upon (1) unsatisfactory performance by the Manager that is materially detrimental to the Company or (2) a determination that the management fee payable to the Manager is not fair, subject to the Manager's right to prevent such a termination based on unfair fees by accepting a mutually acceptable reduction of management fees agreed to by at least two-thirds of the Company's independent directors. The Manager must be provided with written notice of any such termination at least 180 days prior to the expiration of the then existing term and will be paid a termination fee equal to three times the sum of the average annual base management fee during the 24-month period immediately preceding the date of termination, calculated as of the end of the most recently completed fiscal quarter prior to the date of termination. Amounts payable under the Company's Management Agreement are not fixed and determinable. Following a meeting by the Company's independent directors in February 2014, which included a discussion of the Manager's performance and the level of the management fees thereunder, the Company determined

not to terminate the Management Agreement.

Off-balance sheet arrangements

The Company does not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured investment vehicles, or special purpose or variable interest entities, established to facilitate off-balance sheet arrangements or other contractually narrow or limited purposes. Further, the Company has not guaranteed any obligations of unconsolidated entities or entered into any commitment to provide additional funding to any such entities.

Table of Contents

Dividends

The Company intends to continue to make regular quarterly distributions to holders of its common stock. U.S. federal income tax law generally requires that a REIT distribute annually at least 90% of its REIT taxable income, without regard to the deduction for dividends paid and excluding net capital gains, and that it pay tax at regular corporate rates to the extent that it annually distributes less than 100% of its net taxable income. The Company generally intends over time to pay dividends to its stockholders in an amount equal to its net taxable income, if and to the extent authorized by its board of directors. Any distributions the Company makes will be at the discretion of its board of directors and will depend upon, among other things, its actual results of operations. These results and the Company's ability to pay distributions will be affected by various factors, including the net interest and other income from its portfolio, its operating expenses and any other expenditures. If the Company's cash available for distribution is less than its net taxable income, the Company could be required to sell assets or borrow funds to make cash distributions or the Company may make a portion of the required distribution in the form of a taxable stock distribution or distribution of debt securities.

The Company has 3,450,000 shares of Series A Preferred Stock outstanding, which entitles holders to receive dividends at an annual rate of 8.625% of the liquidation preference of \$25.00 per share, or \$2.16 per share per annum. The dividends on the Series A Preferred Stock are cumulative and payable quarterly in arrears. Except under certain limited circumstances, the Series A Preferred Stock is generally not convertible into or exchangeable for any other property or any other securities of the Company at the election of the holders. After August 1, 2017, the Company may, at its option, redeem the shares at a redemption price of \$25.00, plus any accrued unpaid distribution through the date of the redemption.

Non-GAAP Financial Measures

Operating Earnings

For the three and six months ended June 30, 2014, respectively, the Company's Operating Earnings were \$18,045, or \$0.42 per share, and \$32,036, or \$0.80 per share. For the three and six months ended June 30, 2013, respectively, the Company's Operating Earnings were \$11,721, or \$0.31 per share, and \$23,682, or \$0.70 per share. Operating Earnings is a non-GAAP financial measure that is used by the Company to approximate cash available for distribution and is defined as net income available to common stockholders, computed in accordance with GAAP, adjusted for (i) equity-based compensation expense (a portion of which may become cash-based upon final vesting and settlement of awards should the holder elect net share settlement to satisfy income tax withholding), (ii) any unrealized gains or losses or other non-cash items included in net income and (iii) the non-cash amortization expense related to the reclassification of a portion of the senior convertible notes to stockholders' equity in accordance with GAAP.

In order to evaluate the effective yield of the portfolio, the Company uses Operating Earnings to reflect the net investment income of the Company's portfolio as adjusted to include the net interest expense related to the Company's derivative instruments. Operating Earnings allows the Company to isolate the net interest expense associated with the Company's swaps in order to monitor and project the Company's full cost of borrowings. The Company also believes that its investors use Operating Earnings or a comparable supplemental performance measure to evaluate and compare the performance of the Company and its peers and, as such, the Company believes that the disclosure of Operating Earnings is useful to its investors.

The primary limitation associated with Operating Earnings as a measure of the Company's financial performance over any period is that it excludes net realized and unrealized gains (losses) from investments. In addition, the Company's presentation of Operating Earnings may not be comparable to similarly-titled measures of other companies, who may use different calculations. As a result, Operating Earnings should not be considered as a substitute for the Company's GAAP net income as a measure of its financial performance or any measure of its liquidity under GAAP.

The table below summarizes the reconciliation from net income available to common stockholders to Operating Earnings:

Table of Contents

	For the three months ended June 30,		For the six months ended June 30,		
	2014	2013	2014	2013	
Net income available to common stockholders	\$22,098	\$9,929	\$37,819	\$20,001	
Adjustments:					
Unrealized (gain) loss on securities	(4,749) 1,421	(6,934) 2,500	
Unrealized (gain) loss on derivative instruments	1,093	(57) 1,093	(130)
Equity-based compensation expense	362	428	788	1,311	
Foreign currency gain	(959) —	(959) —	
Amortization of the 2019 Notes related to equity reclassification	200	—	229	—	
Total adjustments:	(4,053) 1,792	(5,783) 3,681	
Operating Earnings	\$18,045	\$11,721	\$32,036	\$23,682	
Basic and diluted Operating Earnings per share of common stock	\$0.42	\$0.31	\$0.80	\$0.70	
Basic weighted average shares of common stock outstanding	42,888,747	36,880,410	40,021,722	33,511,889	
Diluted weighted average shares of common stock outstanding	43,099,354	37,373,885	40,236,109	33,946,329	

Table of Contents

ITEM 3. Quantitative and Qualitative Disclosures about Market Risk

The Company seeks to manage its risks related to the credit quality of its assets, interest rates, liquidity, prepayment speeds and market value, while, at the same time, seeking to provide an opportunity to stockholders to realize attractive risk-adjusted returns through ownership of its capital stock. While risks are inherent in any business enterprise, the Company seeks to quantify and justify risks in light of available returns and to maintain capital levels consistent with the risks the Company undertakes.

Credit risk

One of the Company's strategic focuses is acquiring assets that it believes to be of high credit quality. The Company believes this strategy will generally keep its credit losses and financing costs low. However, the Company is subject to varying degrees of credit risk in connection with its other target assets. The Company seeks to mitigate this risk by seeking to acquire high quality assets, at appropriate prices given anticipated and unanticipated losses, and by deploying a value-driven approach to underwriting and diligence, consistent with the Manager's historical investment strategy, with a focus on current cash flows and potential risks to cash flow. The Company enhances its due diligence and underwriting efforts by accessing the Manager's knowledge base and industry contacts. Nevertheless, unanticipated credit losses could occur, which could adversely impact the Company's operating results.

Interest rate risk

Interest rates are highly sensitive to many factors, including fiscal and monetary policies and domestic and international economic and political considerations, as well as other factors beyond the Company's control. The Company is subject to interest rate risk in connection with its target assets and its related financing obligations. To the extent consistent with maintaining the Company's REIT qualification, the Company seeks to manage risk exposure to protect its portfolio of financial assets against the effects of major interest rate changes. The Company generally seeks to manage this risk by:

- attempting to structure its financing agreements to have a range of different maturities, terms, amortizations and interest rate adjustment periods;
- using hedging instruments, interest rate swaps and interest rate caps; and
- to the extent available, using securitization financing to better match the maturity of the Company's financing with the duration of its assets.

At June 30, 2014, all of the Company's borrowings outstanding under the Wells Facility and the JPM Facility were floating-rate borrowings. At June 30, 2014, the Company also had floating rate loans with a face amount of \$386,690, resulting in net variable rate exposure of \$213,218. A 50 basis point increase in LIBOR would increase the net interest income related to the \$213,218 in variable rate exposure by \$267. Any such hypothetical impact on interest rates on the Company's variable rate borrowings does not consider the effect of any change in overall economic activity that could occur in a rising interest rate environment. Further, in the event of a change in interest rates of that magnitude, the Company may take actions to further mitigate the Company's exposure to such a change. However, due to the uncertainty of the specific actions that would be taken and their possible effects, this analysis assumes no changes in the Company's financial structure.

Prepayment risk

Prepayment risk is the risk that principal will be repaid at a different rate than anticipated, causing the return on an asset to be less than expected. The Company does not anticipate facing prepayment risk on most of its portfolio of assets since the Company anticipates that most of the commercial loans held directly by the Company or securing the Company's CMBS assets will contain provisions preventing prepayment or imposing prepayment penalties in the event of loan prepayments.

Market risk

Market value risk. The Company's available-for-sale securities and securities at estimated fair value are reflected at their estimated fair value. The change in estimated fair value of securities available-for-sale is reflected in accumulated other comprehensive income while the change in estimated fair value of securities at estimated fair value is reflected as a component of net income. The estimated fair value of these securities fluctuates primarily due to changes in interest rates and other factors. Generally, in a rising interest rate environment, the estimated fair value of these securities would be expected to decrease; conversely, in a decreasing interest rate environment, the estimated

fair value of these securities would be expected to increase. As market volatility increases or liquidity decreases, the fair value of the Company's assets may be adversely impacted.

Table of Contents

Real estate risk. Commercial mortgage assets are subject to volatility and may be affected adversely by a number of factors, including, but not limited to, national, regional and local economic conditions (which may be adversely affected by industry slowdowns and other factors); local real estate conditions; changes or continued weakness in specific industry segments; construction quality, age and design; demographic factors; and retroactive changes to building or similar codes. In addition, decreases in property values reduce the value of the collateral and the potential proceeds available to a borrower to repay the underlying loans or loans, as the case may be, which could also cause the Company to suffer losses.

Inflation

Virtually all of the Company's assets and liabilities will be interest rate sensitive in nature. As a result, interest rates and other factors influence the Company's performance far more so than does inflation. Changes in interest rates do not necessarily correlate with inflation rates or changes in inflation rates. The Company's financial statements are prepared in accordance with GAAP and distributions are declared in order to distribute at least 90% of its REIT taxable income on an annual basis in order to maintain the Company's REIT qualification. In each case, the Company's activities and balance sheet are measured with reference to historical cost and/or fair market value without considering inflation.

ITEM 4. Controls and Procedures

The Company's Chief Executive Officer and Chief Financial Officer, based on their evaluation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) required by paragraph (b) of Rule 13a-15 or Rule 15d-15, have concluded that as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective to give reasonable assurances to the timely collection, evaluation and disclosure of information relating to the Company that would potentially be subject to disclosure under the Exchange Act, and the rules and regulations promulgated thereunder.

During the period ended June 30, 2014, there was no change in the Company's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Notwithstanding the foregoing, a control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that it will detect or uncover failures within the Company to disclose material information otherwise required to be set forth in the Company's periodic reports.

PART II — OTHER INFORMATION

ITEM 1. Legal Proceedings

From time to time, the Company may be involved in various claims and legal actions arising in the ordinary course of business. As of June 30, 2014, the Company was not involved in any material legal proceedings.

ITEM 1A. Risk Factors

See the Company's Annual Report on Form 10-K for the year ended December 31, 2013. There have been no material changes to the Company's risk factors during the six months ended June 30, 2014.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

ITEM 3. Defaults Upon Senior Securities

None.

ITEM 4. Mine Safety Disclosures

Not applicable.

ITEM 5. Other Information

None.

ITEM 6. Exhibits

Exhibit No.	Description
