ELLINGTON RESIDENTIAL MORTGAGE REIT  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
March 31, 2015  
(UNAUDITED)

1. Organization and Investment Objective

Ellington Residential Mortgage REIT, or "EARN," was formed as a Maryland real estate investment trust, or "REIT," on August 2, 2012, and commenced operations on September 25, 2012. EARN conducts its business through its wholly owned subsidiaries, EARN OP GP LLC, or the "General Partner," and Ellington Residential Mortgage LP, or the "Operating Partnership," which were formed as a Delaware limited liability company and a Delaware limited partnership, respectively, on July 31, 2012 and commenced operations on September 25, 2012. The Operating Partnership conducts its business of acquiring, investing in, and managing residential mortgage-related and real estate-related assets through its wholly owned subsidiaries. EARN, the General Partner, the Operating Partnership, and their consolidated subsidiaries are hereafter defined as the "Company."

Ellington Residential Mortgage Management LLC, or the "Manager," serves as the Manager of the Company pursuant to the terms of a management agreement (the "Management Agreement"). The Manager is an affiliate of Ellington Management Group, L.L.C., or "EMG," an investment management firm that is registered as an investment adviser with a 20-year history of investing in a broad spectrum of mortgage-backed securities and related derivatives, with an emphasis on the residential mortgage-backed securities, or "RMBS," market. In accordance with the terms of the Management Agreement and the Services Agreement, as discussed in Note 10, the Manager is responsible for administering the Company's business activities and day-to-day operations, and performs certain services, subject to oversight by the Board of Trustees. See Notes 8 and 10 for further information on the Management Agreement.

The Company was formed through an initial strategic venture among affiliates of EMG and the Blackstone Tactical Opportunity Funds, or the "Blackstone Funds." These initial investors made an aggregate investment of approximately \$31.5 million on September 25, 2012. On May 1, 2013, the Company priced an initial public offering of its common shares, pursuant to which it sold 6,450,000 shares to the public at a price of \$20.00 per share. Concurrent with the initial public offering, the Company completed a private placement of 1,050,000 common shares to its initial investors at a purchase price of \$20.00 per share which generated gross proceeds of \$21.0 million. Proceeds to the Company from the initial public offering and concurrent private placement, net of offering costs, were approximately \$148.5 million.

The Company acquires and manages Agency and non-Agency RMBS, including Agency pools and Agency collateralized mortgage obligations, or "CMOs," and non-Agency CMOs, both investment grade and non-investment grade. The Company may also acquire and manage mortgage servicing rights, residential mortgage loans, and other mortgage- and real estate-related assets. The Company may also invest in other instruments including, but not limited to, forward-settling To-Be-Announced Agency pass-through certificates, or "TBAs," interest rate swaps and swaptions, U.S. Treasury securities, Eurodollar and U.S. Treasury futures, other financial derivatives, and cash equivalents. The Company's targeted investments may range from unrated (first loss) securities to AAA senior securities.

The Company made the election to be taxed as a REIT under the Internal Revenue Code of 1986, as amended, or "the Code," commencing with the Company's short taxable year ended December 31, 2013. As a REIT, the Company is required to distribute annually at least 90% of its taxable income. As long as the Company continues to qualify as a REIT, it will not be subject to U.S. federal or state corporate taxes on its taxable income to the extent that it distributes all of its annual taxable income to its shareholders. It is the intention of the Company to distribute at least 100% of its taxable income, after application of available tax attributes, within the limits prescribed by the Code, which may extend into the subsequent taxable year.

2. Significant Accounting Policies

(A) Basis of Presentation: The Company's unaudited interim consolidated financial statements have been prepared in conformity with generally accepted accounting principles in the United States of America, or "U.S. GAAP." Entities in which the Company has a controlling financial interest, through ownership of the majority of the entities' voting equity interests, or through other contractual right that give the Company control, are consolidated by the Company.

All inter-company balances and transactions have been eliminated. The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates and those differences could be material. In management's opinion, all material adjustments, considered necessary for a fair presentation of the Company's interim consolidated financial statements have been included and are only of a normal recurring nature. Interim results are not necessarily indicative of the results that may be

expected for the entire fiscal year. The information included in this Quarterly Report on Form 10-Q should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

(B) Valuation: The Company applies ASC 820-10, Fair Value Measurement and Disclosures ("ASC 820-10"), to its holdings of financial instruments. ASC 820-10 establishes a three-level valuation hierarchy for disclosure of fair value measurements. The valuation hierarchy is based upon the observability of inputs to the valuation of an asset or liability as of the measurement date. The three levels are defined as follows:

Level 1—inputs to the valuation methodology are observable and reflect quoted prices (unadjusted) for identical assets or liabilities in active markets. Currently, the types of financial instruments the Company generally includes in this category are, exchange-traded derivatives and cash and cash equivalents;

Level 2—inputs to the valuation methodology other than quoted prices included in Level 1 are observable for the asset or liability, either directly or indirectly. Currently, the types of financial instruments that the Company generally includes in this category are Agency RMBS, non-Agency RMBS determined to have sufficiently observable market data, U.S. Treasury securities, actively traded derivatives such as TBAs, interest rate swaps, and swaptions; and

Level 3—inputs to the valuation methodology are unobservable and significant to the fair value measurement. Currently, this category includes RMBS where there is less price transparency.

For certain financial instruments, the various inputs that management uses to measure fair value for such financial instrument may fall into different levels of the fair value hierarchy. In such cases, the determination of which category within the fair value hierarchy is appropriate for such financial instrument is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the financial instrument. The Company may use valuation techniques consistent with the market and income approaches to measure the fair value of its assets and liabilities. The market approach uses third-party valuations and information obtained from market transactions involving identical or similar assets or liabilities. The income approach uses projections of the future economic benefits of an instrument to determine its fair value, such as in the discounted cash flow methodology. The inputs or methodology used for valuing financial instruments are not necessarily an indication of the risk associated with investing in these financial instruments. Transfers between levels of the fair value hierarchy are assumed to occur at the end of the reporting period.

#### Summary Valuation Techniques

For financial instruments that are traded in an "active market," the best measure of fair value is the quoted market price. However, many of the Company's financial instruments are not traded in an active market. Therefore, management generally uses third-party valuations when available. If third-party valuations are not available, management uses other valuation techniques, such as the discounted cash flow methodology. The following are summary descriptions, for the various categories of financial instruments, of the valuation methodologies management uses in determining fair value of the Company's financial instruments in such categories. Management utilizes such methodologies to assign a good faith fair value (the estimated price that, in an orderly transaction at the valuation date, would be received to sell an asset, or paid to transfer a liability, as the case may be) to each such financial instrument. Valuations for fixed rate RMBS pass-throughs issued by a U.S government agency or government-sponsored enterprise, or "GSE," are typically based on observable pay-up data (pay-ups are price premiums for specified categories of fixed rate pools relative to their TBA counterparts) or models that use observable market data, such as interest rates and historical prepayment speeds, and are validated against third-party valuations. With respect to the Company's other RMBS investments and TBAs, management seeks to obtain at least one third-party valuation, and often obtains multiple valuations when available. Management has been able to obtain third-party valuations on the vast majority of these instruments and expects to continue to solicit third-party valuations in the future. Management generally values each financial instrument at the average of third-party valuations received and not rejected as described below. Third-party valuations are not binding, and while management generally does not adjust the valuations it receives, management may challenge or reject a valuation when, based on its validation criteria, management determines that such valuation is unreasonable or erroneous. Furthermore, based on its validation criteria management may determine that the average of the third-party valuations received for a given instrument does not result in what management believes to be the fair value of such instrument, and in such circumstances management

may override this average with its own good faith valuation. The validation criteria may take into account output from management's own models, recent trading activity in the same or similar instruments, and valuations received from third parties. The use of proprietary models requires the use of a significant amount of judgment and the application of various assumptions including, but not limited to, assumptions concerning future prepayment rates and default rates. Given their relatively high level of price transparency, Agency RMBS pass-throughs and TBAs are typically designated as Level 2 assets, although Agency interest only and inverse interest only RMBS are currently designated as Level 3 assets since

they generally have less price transparency. Non-Agency RMBS are generally classified as either Level 2 or Level 3 based on analysis of available market data such as recent trades, executable bids, and reported "market color." Furthermore, the methodology used by the third-party valuation providers is reviewed at least annually by management, so as to ascertain whether such providers are utilizing observable market data to determine the valuations that they provide.

Interest rate swaps and swaptions are typically valued based on internal models that use observable market data, including applicable interest rates in effect as of the measurement date; the model-generated valuations are then typically compared to counterparty valuations for reasonableness. These financial derivatives are generally designated as Level 2 instruments.

The Company's repurchase and reverse repurchase agreements are carried at cost, which approximates fair value. Repurchase agreements and reverse repurchase agreements are classified as Level 2 assets and liabilities based on the adequacy of the collateral and their short term nature.

The Company's valuation process, including the application of validation criteria, is overseen by the Manager's Valuation Committee. The Valuation Committee includes senior level executives from various departments within the Manager, and each quarter the Valuation Committee reviews and approves the valuations of the Company's investments. The valuation process also includes a monthly review by the Company's third party administrator. The goal of this review is to replicate various aspects of the Company's valuation process based on the Company's documented procedures.

Because of the inherent uncertainty of valuation, the estimated fair value of the Company's financial instruments may differ significantly from the values that would have been used had a ready market for the financial instruments existed, and the differences could be material to the consolidated financial statements.

(C) Accounting for Mortgage-Backed Securities: Purchases and sales of investments are recorded on trade date and realized and unrealized gains and losses are calculated based on identified cost.

The Company has chosen to make a fair value election pursuant to ASC 825-10, Financial Instruments, for its mortgage-backed securities portfolio. Electing the fair value option allows the Company to record changes in fair value in the Consolidated Statement of Operations, which, in management's view, more appropriately reflects the results of operations for a particular reporting period as all securities activities will be recorded in a similar manner. As such, mortgage-backed securities are recorded at fair value on the Consolidated Balance Sheet and the period change in fair value is recorded in current period earnings on the Consolidated Statement of Operations as a component of Change in net unrealized gains (losses) on mortgage-backed securities.

(D) Interest Income: Coupon interest income on investment securities is accrued based on the outstanding principal balance or notional amount and the current coupon rate on each security. The Company amortizes premiums and accretes discounts on its fixed income securities. For RMBS that are deemed to be of high credit quality at the time of purchase, premiums and discounts are generally amortized/accreted into interest income over the life of such securities using the effective interest method. For securities whose cash flows vary depending on prepayments, an effective yield retroactive to the time of purchase is periodically recomputed based on actual prepayments and changes in projected prepayment activity, and a catch-up adjustment is made to amortization to reflect the cumulative impact of the change in effective yield. For RMBS that are deemed not to be of high credit quality at the time of purchase, interest income is recognized based on the effective interest method. For purposes of determining the effective interest rate, management estimates the future expected cash flows of its investment holdings based on assumptions including, but not limited to, assumptions for future prepayment rates, default rates, and loss severities (each of which may in turn incorporate various macro-economic assumptions, such as future housing prices). These assumptions are re-evaluated not less than quarterly. Principal write-offs are generally treated as realized losses. Changes in projected cash flows, as applied to the current amortized cost of the security, may result in a prospective change in the yield/interest income recognized on such securities.

The Company's accretion of discounts and amortization of premiums on securities for U.S. federal and other tax purposes is likely to differ from the accounting treatment under U.S. GAAP of these items as described above.

(E) Cash and Cash Equivalents: Cash and cash equivalents include cash and short term investments with original maturities of three months or less at the date of acquisition. Cash equivalents are recorded at cost plus accrued interest,

which approximates fair value. Cash and cash equivalents typically include amounts held in an interest bearing overnight account and amounts held in money market funds, and these balances generally exceed insured limits. (F) Due from brokers/Due to brokers: Due from brokers and Due to brokers accounts on the Consolidated Balance Sheet include collateral transferred to or received from counterparties, including clearinghouses, along with receivables and payables for open and/or closed derivative positions.

(G) Financial Derivatives: The Company may enter into various types of financial derivatives subject to its investment guidelines, which include restrictions associated with maintaining qualification as a REIT. The Company's financial derivatives are predominantly subject to bilateral collateral arrangements or clearing in accordance with the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. The Company may be required to deliver or may receive cash or securities as collateral upon entering into derivative transactions. In addition, changes in the relative value of financial derivative transactions may require the Company or the counterparty to post or receive additional collateral. In the case of cleared financial derivatives, the clearinghouse becomes the Company's counterparty and a futures commission merchant acts as intermediary between the Company and the clearinghouse with respect to all facets of the related transaction, including the posting and receipt of required collateral. Collateral received by the Company is reflected on the Consolidated Balance Sheet as "Due to Brokers." Conversely, collateral posted by the Company is reflected as "Due from Brokers" on the Consolidated Balance Sheet. The types of financial derivatives that have been utilized by the Company to date are interest rate swaps, TBAs, swaptions, and futures.

Swaps: The Company has entered into interest rate swaps, which are contractual agreements whereby one party pays a floating interest rate on a notional principal amount and receives a fixed rate payment on the same notional principal, or vice versa, for a fixed period of time.

Swaps change in value with movements in interest rates or total return of the reference securities. During the term of swap contracts, changes in value are recognized as unrealized gains or losses on the Consolidated Statement of Operations. When a contract is terminated, the Company realizes a gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the Company's basis in the contract, if any. Periodic payments or receipts required by swap agreements are recorded as unrealized gains or losses when accrued and realized gains or losses when received or paid. Upfront payments paid and/or received by the Company to open swap contracts are recorded as an asset and/or liability on the Consolidated Balance Sheet and are recorded as a realized gain or loss on the termination date.

TBA Securities: The Company has transacted in the forward settling TBA market. A TBA position is a forward contract for the purchase ("long position") or sale ("short position") of Agency RMBS at a predetermined price, face amount, issuer, coupon, and maturity on an agreed-upon future delivery date. For each TBA contract and delivery month, a uniform settlement date for all market participants is determined by the Securities Industry and Financial Markets Association. The specific Agency RMBS to be delivered into the contract at the settlement date are not known at the time of the transaction. The Company typically does not take delivery of TBAs, but rather enters into offsetting transactions and settles the associated receivable and payable balances with its counterparties. The Company primarily uses TBAs to mitigate interest rate risk, but from time to time it also holds net long positions in certain TBA securities as a means of acquiring exposure to Agency RMBS.

TBAs are accounted for by the Company as financial derivatives. The difference between the contract price and the fair value of the TBA position as of the reporting date is included in Change in net unrealized gains (losses) on financial derivatives, in the Consolidated Statement of Operations. Upon settlement of the TBA contract, the realized gain (loss) on the TBA contract is equal to the net cash amount received (paid).

Options: The Company has entered into swaption contracts. It may purchase or write put, call, straddle, or other similar options contracts. The Company enters into options contracts primarily to help mitigate interest rate risk. When the Company purchases an options contract, the option asset is initially recorded at an amount equal to the premium paid, if any, and is subsequently marked-to-market. Premiums paid for purchasing options contracts that expire unexercised are recognized on the expiration date as realized losses. If an options contract is exercised, the premium paid is subtracted from the proceeds of the sale or added to the cost of the purchase to determine whether the Company has realized a gain or loss on the related investment transaction. When the Company writes an options contract, the option liability is initially recorded at an amount equal to the premium received, if any, and is subsequently marked-to-market. Premiums received for writing options contracts that expire unexercised are recognized on the expiration date as realized gains. If an options contract is exercised, the premium received is subtracted from the cost of the purchase or added to the proceeds of the sale to determine whether the Company has realized a gain or loss on the related investment transaction. When the Company enters into a closing transaction, the Company will realize a gain or loss depending upon whether the amount from the closing transaction is greater or less

than the premiums paid or received. In general, the Company's options contracts contain forward-settling premiums. In this case, no money is exchanged upfront; instead, the agreed-upon premium is paid by the buyer upon expiration of the options contract, regardless of whether or not the options contract is exercised.

**Futures Contracts:** A futures contract is an exchange-traded agreement to buy or sell an asset for a set price on a future date. Initial margin deposits are made upon entering into futures contracts and can be either in the form of cash or securities. During the period the futures contract is open, changes in the value of the contract are recognized as unrealized gains or losses by marking-to-market to reflect the current market value of the contract. Variation margin payments are made or received periodically, depending upon whether unrealized losses or gains are incurred. When the contract is closed, the Company records

a realized gain or loss equal to the difference between the proceeds of the closing transaction and the Company's basis in the contract.

Financial derivative assets are included in Financial derivatives—assets, at fair value on the Consolidated Balance Sheet while financial derivative liabilities are included in Financial derivatives—liabilities, at fair value on the Consolidated Balance Sheet.

(H) Repurchase Agreements and Reverse Repurchase Agreements: The Company enters into repurchase agreements with third-party broker-dealers, whereby it sells securities under agreements to repurchase at an agreed upon price and date. The Company also enters into reverse repurchase agreement transactions with third-party broker-dealers, whereby it purchases securities under agreements to resell at an agreed upon price and date. The Company accounts for repurchase agreements as collateralized borrowings, with the initial sale price representing the amount borrowed, and with the future repurchase price consisting of the amount borrowed plus interest, at the implied interest rate of the repurchase agreement, on the amount borrowed over the term of the repurchase agreement. The interest rate on a repurchase agreement or a reverse repurchase agreement is based on competitive market rates (or competitive market spreads, in the case of agreements with floating interest rates) at the time such agreement is entered into. When the Company enters into a repurchase agreement, the lender establishes and maintains an account containing cash and/or securities having a value not less than the repurchase price, including accrued interest, of the repurchase agreement. Repurchase and reverse repurchase agreements that are conducted with the same counterparty can be reported on a net basis if they meet the requirements under the authoritative guidance. Repurchase agreements and reverse repurchase agreements are carried at their contractual amounts, which approximate fair value.

(I) U.S. Treasury Securities: The Company may purchase or sell short U.S. Treasury securities to help mitigate the potential impact of changes in interest rates on the performance of its portfolio. The Company may borrow securities under reverse repurchase agreements to enable it to deliver U.S. Treasury securities that it has sold short.

(J) Offering Costs/Deferred Offering Costs: Offering costs are charged against shareholders' equity and typically include legal, accounting, printing, and other fees associated with the cost of raising equity capital.

(K) Share Based Compensation: The Company applies the provisions of ASC 718, Compensation—Shares Compensation ("ASC 718"), with regard to its equity incentive plans. ASC 718 covers a wide range of share-based compensation arrangements including share options, restricted share plans, performance-based awards, share appreciation rights, and employee share purchase plans. ASC 718 requires that compensation cost relating to share-based payment transactions be recognized in financial statements. The cost is measured based on the fair value of the equity or liability instruments issued.

(L) Dividends: Dividends payable are recorded on the declaration date.

(M) Earnings Per Share: In accordance with the provisions of ASC 260, Earnings per Share, the Company calculates basic income (loss) per share by dividing net income (loss) for the period by the weighted average of the Company's common shares outstanding for that period. Diluted income (loss) per share takes into account the effect of dilutive instruments, such as share options and warrants, and uses the average share price for the period in determining the number of incremental shares that are to be added to the weighted average number of shares outstanding.

(N) Share Repurchases: Common shares that are repurchased by the Company subsequent to issuance decrease the total number of shares issued and outstanding.

(O) Income Taxes: The Company has elected to be taxed as a REIT under Sections 856 to 860 of the Code. As a REIT, the Company is generally not subject to corporate-level federal and state income tax on net income it distributes to its stockholders. To qualify as a REIT, the Company must meet a number of organizational and operational requirements, including the distribution of at least 90% of its annual taxable income to shareholders. Even if the Company qualifies as a REIT, it may be subject to certain federal, state, local and foreign taxes on its income and property and to federal income and excise taxes on its undistributed taxable income.

The Company follows the authoritative guidance on accounting for and disclosure of uncertainty on tax positions, which requires management to determine whether a tax position of the company is more likely than not to be sustained upon examination by the applicable taxing authority, including resolution of any related appeals of the litigation process, based on the technical merits of the position. For uncertain tax positions, the tax benefit to be recognized is measured as the largest amount of benefit that is greater than fifty percent likely of being realized upon

ultimate settlement. The Company did not have any unrecognized tax benefits at March 31, 2015. In the normal course of business, the Company may be subject to examination by federal, state, local, and foreign jurisdictions, where applicable, for the current period, 2014, 2013, and 2012 (its open tax years). The Company may take positions with respect to certain tax issues which depend on legal interpretation of facts or applicable tax regulations. Should the relevant tax regulators successfully challenge any of such positions, the Company might

be found to have a tax liability that has not been recorded in the accompanying consolidated financial statements. Also, management's conclusions regarding the authoritative guidance may be subject to review and adjustment at a later date based on changing tax laws, regulations, and interpretations thereof. There were no amounts accrued for penalties or interest as of or during the periods presented in these consolidated financial statements.

(P) Recent Accounting Pronouncements: Under the Jumpstart Our Business Startups Act, or the "JOBS Act," the Company meets the definition of an "emerging growth company." The Company has elected to follow the extended transition period for complying with new or revised U.S. accounting standards pursuant to Section 107(b) of the JOBS Act. As a result, the Company will comply with new or revised accounting standards on the relevant dates on which adoption of such standards is required for non-public entities.

In June 2014, the FASB issued ASU No. 2014-11, Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures ("ASU 2014-11"). This amends ASC 860, Transfers and Servicing ("ASC 860"), to require disclosure of repurchase-to-maturity transactions to be accounted for as secured borrowings rather than sales of an asset, and transfers of financial assets with a contemporaneous repurchase agreement will no longer be evaluated to determine whether they should be accounted for on a combined basis as forward contracts. The new guidance also prescribes additional disclosures particularly on the nature of collateral pledged under repurchase agreements accounted for as secured borrowings. ASU 2014-11 is effective for annual periods beginning after December 15, 2014 and interim periods beginning after December 31, 2015. The adoption of ASC 860, as amended by ASU 2014-11 is not expected to have a material impact on the Company's consolidated financial statements.

In August 2014, the FASB issued ASU 2014-15, Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern ("ASU 2014-15"). ASU 2014-15 requires management to perform interim and annual assessments of an entity's ability to continue as a going concern and to provide disclosure if events or conditions arise that would place substantial doubt on the entity's ability to continue as a going concern. ASU 2014-15 is effective for the annual period ending after December 15, 2016, and subsequent interim and annual periods with early adoption permitted. The adoption of ASU 2014-15 is not expected to have a material impact on the Company's consolidated financial statements.

In February 2015, the FASB issued ASU 2015-02, Amendments to the Consolidation Analysis ("ASU 2015-02"). This amends ASC 810, Consolidation (ASC "810"), to improve targeted areas of consolidation guidance by simplifying the requirements of consolidation and placing more emphasis on risk of loss when determining a controlling financial interest. ASU 2015-02 is effective for annual periods beginning after December 15, 2016 and interim periods beginning after December 15, 2017 with early adoption permitted. The adoption of ASU 2015-02 is not expected to have a material impact on the Company's consolidated financial statements.

### 3. Mortgage-Backed Securities

The following tables present details of the Company's mortgage-backed securities portfolio at March 31, 2015 and December 31, 2014, respectively. The Company's Agency RMBS include mortgage pass-through certificates and CMOs representing interests in or obligations backed by pools of residential mortgage loans issued or guaranteed by a U.S. government agency or GSE. The non-Agency RMBS portfolio is not issued or guaranteed by the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation, or any agency of the U.S. Government and is therefore subject to greater credit risk.

There were no transfers of financial instruments between Levels 1 or 2 of the fair value hierarchy during the year ended December 31, 2014.

The following tables present additional information about the Company's investments which are measured at fair value for which the Company has utilized Level 3 inputs to determine fair value:

Three month period ended March 31, 2015:

(In thousands)

	Non-Agency RMBS	Agency RMBS
Beginning balance as of December 31, 2014	\$ 10,082	\$ 11,244
Purchases	—	1,099
Proceeds from sales	(2,861 )	(4,538 )
Principal repayments	(601 )	—
(Amortization)/accretion, net	309	(656 )
Net realized gains	791	601
Change in net unrealized gains (losses)	(276 )	(1,307 )
Transfers:		
Transfers into level 3	3,359	—
Transfers out of level 3	(4,977 )	—
Ending balance as of March 31, 2015	\$ 5,826	\$ 6,443

All amounts of net realized and changes in net unrealized gains (losses) in the table above are reflected in the accompanying Consolidated Statement of Operations. The table above incorporates changes in net unrealized gains (losses) for both Level 3 financial instruments held by the Company at March 31, 2015, as well as Level 3 financial instruments disposed of by the Company during the three month period ended March 31, 2015. For Level 3 financial instruments held by the Company at March 31, 2015, change in net unrealized gains (losses) of \$0.2 million and \$(0.4) million, for the three month period ended March 31, 2015 relate to non-Agency RMBS and Agency RMBS, respectively.

At March 31, 2015, the Company transferred \$5.0 million of non-Agency RMBS from Level 3 to Level 2. These assets were transferred from Level 3 to Level 2 based on an increased volume of observed trading of these and similar assets. This increase in observed trading activity has led to greater price transparency for these assets, thereby making a Level 2 designation appropriate in the Company's view. However, changes in the volume of observable inputs for these assets, such as a decrease in observed trading, could impact price transparency, and thereby cause a change in the level designation for these assets in future periods.

At March 31, 2015, the Company transferred \$3.4 million of non-Agency RMBS from Level 2 to Level 3. Since year end, these securities have exhibited indications of a reduced level of price transparency. Examples of such indications include wider spreads and/or higher delinquencies relative to similar securities and a reduction in observable transactions or executable quotes involving these and similar securities. Changes in these indications could impact price transparency, and thereby cause a change in the level designation in future periods.

Three month period ended March 31, 2014:

(In thousands)	Non-Agency RMBS	Agency RMBS
Beginning balance as of December 31, 2013	\$30,681	\$13,527
Purchases	7,663	4,096
Proceeds from sales	(5,423)	(1,282)
Principal repayments	(1,104)	—
(Amortization)/accretion, net	389	(658)
Net realized gains	205	358
Change in net unrealized gains (losses)	(366)	(117)
Transfers:		
Transfers into level 3	—	—
Transfers out of level 3	—	—
Ending balance as of March 31, 2014	\$32,045	\$15,924

All amounts of net realized and changes in net unrealized gains (losses) in the table above are reflected in the accompanying Consolidated Statement of Operations. The table above incorporates changes in net unrealized gains (losses) for both Level 3 financial instruments held by the Company at March 31, 2014, as well as Level 3 financial instruments disposed of by the Company during the three month period ended March 31, 2014. For Level 3 financial instruments held by the Company at March 31, 2014, change in net unrealized gains (losses) of \$(0.2) million and \$0.1 million, for the three month period ended March 31, 2014 relate to non-Agency RMBS and Agency RMBS, respectively.

Edgar Filing: Ellington Residential Mortgage REIT - Form 10-Q

The following tables identify the significant unobservable inputs that affect the valuation of the Company's Level 3 assets and liabilities as of March 31, 2015 and December 31, 2014:

March 31, 2015:

Description	Fair Value (In thousands)	Valuation Technique	Significant Unobservable Input	Range		Weighted Average <sup>(1)</sup>

(2) Shown in basis points.

Third-party non-binding valuations are validated by comparing such valuations to internally generated prices based on the Company's models and to recent trading activity in the same or similar instruments. For those instruments valued using discounted cash flows, collateral prepayments, losses, recoveries, and scheduled amortization are projected over the remaining life of the collateral and expressed as a percentage of the collateral's current principal balance. For those assets valued using the LIBOR Option Adjusted Spread, or "OAS," valuation methodology, cash flows are projected using the Company's models over multiple interest rate scenarios, and these projected cash flows are then discounted using the LIBOR rates implied by each interest rate scenario. The LIBOR OAS of an asset is then computed as the unique constant yield spread that, when added to all LIBOR rates in each interest rate scenario generated by the model, will equate (a) the expected present value of the projected asset cash flows over all model scenarios to (b) the actual current market price of the asset. LIBOR OAS is therefore model-dependent. Generally speaking, LIBOR OAS measures the additional yield spread over LIBOR that an asset provides at its current market price after taking into account any interest rate options embedded in the asset.

Material changes in any of the inputs above in isolation could result in a significant change to reported fair value measurements. Fair value measurements are impacted by the interrelationships of these inputs. For example, a higher expectation of collateral prepayments will generally result in a lower expectation of collateral losses. Conversely, higher losses will generally result in lower prepayments.

## 5. Financial Derivatives

The Company is exposed to certain risks arising from both its business operations and economic conditions. Specifically, the Company's primary source of financing is repurchase agreements and the Company enters into financial derivative and other instruments to manage exposure to variable cash flows on portions of its borrowings under those repurchase agreements. Since the interest rates on repurchase agreements typically change with market interest rates such as LIBOR, the Company is exposed to constantly changing interest rates, which accordingly affects cash flows associated with these rates on its borrowings. To mitigate the effect of changes in these interest rates and their related cash flows, the Company may enter into a variety of derivative contracts, including interest rate swaps, swaptions, and TBAs. Additionally, from time to time, the Company may use short positions in U.S. Treasury securities to mitigate its interest rate risk.

The following table details fair value of the Company's holdings of financial derivatives as of March 31, 2015 and December 31, 2014:

	March 31, 2015 (In thousands)	December 31, 2014
Financial derivatives—assets, at fair value:		
TBA securities purchase contracts	\$936	\$387
TBA securities sale contracts	53	89
Fixed payer interest rate swaps	175	2,518
Swaptions	315	78
Total financial derivatives—assets, at fair value:	1,479	3,072
Financial derivatives—liabilities, at fair value:

Total	\$424,820	\$(4,508)	) 1.87	% 0.23	% 8.56

# Interest Rate Swaptions

The following tables provide information about the Company's swaptions as of March 31, 2015 and December 31, 2014.

March 31, 2015:

Option	Fair Value	Months to Expiration	Underlying Swap		Fixed Rate
			Notional Amount	Term (Years)	
Type					
(\$ in thousands)					
Straddle	\$ 315	3.5	\$9,700	10	3.00%

December 31, 2014:

Option			Underlying Swap		
Type	Fair Value	Months to Expiration	Notional Amount	Term (Years)	Fixed Rate
(\$ in thousands)					
Straddle	\$ 78	6.5	\$ 9,700	10	3.00%

#### TBAs

The Company uses TBAs primarily to mitigate interest rate risk, typically in the form of short positions. However, the Company may also invest in TBAs for speculative purposes, including holding long positions. Overall, the Company typically holds a net short position.

The Company transacts in the forward settling To Be Announced MBS ("TBA") market. Pursuant to these TBA transactions, the Company agrees to purchase or sell, for future delivery, Agency RMBS with certain principal and interest terms and certain types of underlying collateral, but the particular Agency RMBS to be delivered is not identified until shortly before the TBA settlement date. TBAs are liquid and have quoted market prices and represent the most actively traded class of MBS. The Company primarily uses TBAs to mitigate interest rate risk, typically in the form of short positions. However, from time to time the Company also invests in TBAs as a means of acquiring additional exposure to Agency RMBS, or for speculative purposes, including holding long positions. Overall, the Company typically holds a net short position.

The Company does not generally take delivery of TBAs; rather, it settles the associated receivable and payable with its trading counterparties on a net basis. Transactions with the same counterparty for the same TBA that result in a reduction of the position are treated as extinguished.

As of March 31, 2015 and December 31, 2014, the Company had outstanding contracts to purchase ("long positions") and sell ("short positions") TBA securities as follows:

	March 31, 2015				December 31, 2014			
TBA Securities	Notional Amount <sup>(1)</sup>	Cost Basis <sup>(2)</sup>	Market Value <sup>(3)</sup>	Net Carrying Value <sup>(4)</sup>	Notional Amount <sup>(1)</sup>	Cost Basis <sup>(2)</sup>	Market Value <sup>(3)</sup>	Net Carrying Value <sup>(4)</sup>
(In thousands)								
Purchase contracts:								
Assets	\$92,898	\$94,607	\$95,543	\$936	\$53,319	\$54,757	\$55,144	\$387
Liabilities	—	—	—	—	15,000	15,603	15,598	(5)
	92,898	94,607	95,543	936	68,319	70,360	70,742	382
Sale contracts:								
Assets	(72,260)	(76,568)	(76,515)	53	(79,090)	(85,730)	(85,641)	89
Liabilities	(529,475)	(565,990)	(568,274)	(2,284)	(525,986)	(559,219)	(560,888)	(1,669)
	(601,735)	(642,558)	(644,789)	(2,231)	(605,076)	(644,949)	(646,529)	(1,580)
Total TBA securities, net	\$(508,837)	\$(547,951)	\$(549,246)	\$(1,295)	\$(536,757)	\$(574,589)	\$(575,787)	\$(1,198)

(1) Notional amount represents the principal balance of the underlying Agency RMBS.

(2) Cost basis represents the forward price to be paid for the underlying Agency RMBS.

(3) Market value represents the current market value of the underlying Agency RMBS (on a forward delivery basis) as of period end.

Net carrying value represents the difference between the market value of the TBA contract as of period end and the (4) cost basis and is reported in Financial derivatives-assets at fair value and Financial derivatives-liabilities at fair value on the Consolidated Balance Sheet.

Edgar Filing: Ellington Residential Mortgage REIT - Form 10-Q

The tables below detail the average notional values of the Company's financial derivatives, using absolute value of month end notional values, for the three month period ended March 31, 2015 and the year ended December 31, 2014:

Derivative Type	Three Month Period Ended March 31, 2015 (In thousands)	Year Ended December 31, 2014
Interest rate swaps	\$407,528	\$566,379
TBAs	698,600	545,646
Interest rate swaptions	9,700	20,631

Gains and losses on the Company's financial derivatives for the three month periods ended March 31, 2015 and 2014 are summarized in the tables below:

Three Month Period Ended March 31, 2015

Derivative Type	Net Realized Gains (Losses) on Periodic Settlements of Interest Rate Swaps	Net Realized Gains (Losses) Other Than Periodic Settlements of Interest Rate Swaps	Net Realized Gains (Losses) on Financial Derivatives	Change in Net Unrealized Gains (Losses) on Accrued Periodic Settlements of Interest Rate Swaps	Change in Net Unrealized Gains (Losses) Other Than on Accrued Periodic Settlements of Interest Rate Swaps	Change in Net Unrealized Gains (Losses) on Financial Derivatives

As of March 31, 2015, the Company also held short positions in U.S. Treasury securities, with a principal amount of \$62.0 million and a fair value of \$62.8 million. As of December 31, 2014, the Company also held short positions in U.S. Treasury securities, with a principal amount of \$13.9 million and a fair value of \$14.0 million.

6. Borrowings under Repurchase Agreements

The Company enters into repurchase agreements. A repurchase agreement involves the sale of an asset to a counterparty together with a simultaneous agreement to repurchase the transferred asset or similar asset from such counterparty at a future date. The Company accounts for its repurchase agreements as collateralized borrowings, with the transferred assets effectively serving as collateral for the related borrowing. The Company's repurchase agreements typically range in term from 30 to 180 days. The principal economic terms of each repurchase agreement—such as loan amount, interest rate, and maturity date—are typically negotiated on a transaction-by-transaction basis. Other terms and conditions, such as relating to events of default, are typically governed under the Company's master repurchase agreements, or "MRAs." Absent an event of default, the Company maintains beneficial ownership of the transferred securities during the term of the repurchase agreement and receives the related

principal and interest payments. Interest rates on these borrowings are generally fixed based on prevailing rates corresponding to the terms of the borrowings, and interest is paid at the termination of the repurchase agreement at which time the Company may enter into a new repurchase agreement at prevailing market rates with the same counterparty, repay that counterparty and possibly negotiate financing terms with a different counterparty, or choose to no longer finance the related asset. In response to a decline in the fair value of the transferred securities, whether as a result of changes in market conditions, security paydowns, or other factors, repurchase agreement counterparties will typically make a margin call, whereby the Company will be required to post additional securities and/or cash as collateral with the counterparty in order to re-establish the agreed-upon collateralization requirements. In the event of increases in fair value of the transferred securities, the Company generally can require the counterparty to post collateral with it in the form of cash or securities. The Company is generally permitted to sell or re-pledge any securities posted by the counterparty as collateral; however, upon termination of the repurchase agreement the Company must return to the counterparty the same security that had been posted. The contractual amount (loan amount) of the Company's repurchase agreements approximates fair value, as the debt is short-term in nature. At any given time, the Company seeks to have its outstanding borrowings under repurchase agreements with several different counterparties in order to reduce the exposure to any single counterparty. As of March 31, 2015 and December 31, 2014, the Company had outstanding borrowings under repurchase agreements with nine and ten counterparties, respectively.

The following table details the Company's outstanding borrowings under repurchase agreements as of March 31, 2015 and December 31, 2014:

Remaining Days to Maturity	March 31, 2015			December 31, 2014		
	Borrowings Outstanding	Weighted Average Interest Rate	Remaining Days to Maturity	Borrowings Outstanding	Weighted Average Interest Rate	Remaining Days to Maturity
	(In thousands)					
30 days or less	\$412,648	0.34	% 15	\$437,633	0.33	% 15
31-60 days	274,524	0.34	45	417,009	0.34	44
61-90 days	269,022	0.36	74	333,580	0.36	72
91-120 days	50,066	0.38	105	—	—	—
151-180 days	139,513	0.43	168	85,917	0.41	165
301-330 days	65,337	0.47	227	48,941	0.47	317
Total	\$1,211,110	0.36	% 68	\$1,323,080	0.35	% 60

Repurchase agreements involving underlying investments that the Company sold prior to year end, for settlement following year end, are shown using their original maturity dates even though such repurchase agreements may be expected to be terminated early upon settlement of the sale of the underlying investment.

As of March 31, 2015 and December 31, 2014, the fair value of Agency RMBS transferred as collateral under outstanding borrowings under repurchase agreements was \$1.3 billion and \$1.4 billion, respectively. Collateral transferred under outstanding borrowings as of March 31, 2015 includes Agency RMBS in the amount of \$26.9 million that were sold prior to period end but for which such sale had not yet settled. Collateral transferred under outstanding borrowings as of December 31, 2014 includes Agency RMBS in the amount of \$41.8 million that were sold prior to period end but for which such sale had not yet settled. In addition the Company posted net cash collateral of \$5.6 million and additional securities with a fair value of \$1.3 million as of March 31, 2015 as a result of margin calls from various counterparties. The Company posted additional net cash collateral of \$5.7 million and additional securities with a fair value of \$2.1 million as of December 31, 2014 as a result of margin calls from various counterparties. The Company also held investments with an aggregate value of approximately \$0.4 million, as of December 31, 2014, which were received to satisfy collateral requirements for various repurchase agreements.

#### 7. Offsetting of Assets and Liabilities

The Company records financial instruments at fair value as described in Note 2. All financial instruments are recorded on a gross basis on the Consolidated Balance Sheet. In connection with its financial derivatives, repurchase

agreements, and related trading agreements, the Company and its counterparties are required to pledge collateral. Cash or other collateral is exchanged as required with each of the Company's counterparties in connection with open derivative positions and repurchase agreements.

The following tables present information about certain assets and liabilities representing financial instruments as of March 31, 2015 and December 31, 2014. The Company has not previously entered into master netting agreements with any of its counterparties. Certain of the Company's repurchase and reverse repurchase agreements and financial derivative transactions are governed by underlying agreements that generally provide a right of offset in the event of default or in the event of a bankruptcy of either party to the transaction.

March 31, 2015:

Description	Amount of Assets (Liabilities) Presented in the Consolidated Balance Sheet <sup>(1)</sup>	Financial Instruments Available for Offset	Financial Instruments Transferred or Pledged as Collateral <sup>(2)(3)</sup>	Cash Collateral (Received) Pledged <sup>(2)(3)</sup>	Net Amount
(In thousands)					
Assets:					
Financial derivatives—assets	\$1,479	\$(799)	\$—	\$—	\$680
Reverse repurchase agreements	62,973	(62,973)	—	—	—
Liabilities:					
Financial derivatives—liabilities	(14,201)	799	—	12,974	(428)
Repurchase agreements	(1,211,110)	62,973	1,142,532	5,605	—

(1) In the Company's Consolidated Balance Sheet, all balances associated with the repurchase agreements and financial derivatives are presented on a gross basis.

(2) For the purpose of this presentation, for each row the total amount of financial instruments transferred or pledged and cash collateral (received) or pledged may not exceed the applicable gross amount of assets or (liabilities) as presented here. Therefore, the Company has reduced the amount of financial instruments transferred or pledged as collateral related to the Company's repurchase agreements and cash collateral pledged on the Company's financial derivative assets and liabilities. Total financial instruments transferred or pledged as collateral on the Company's repurchase agreements as of March 31, 2015 were \$1.27 billion. As of March 31, 2015 total cash collateral on financial derivative assets and financial derivative liabilities excludes \$0.6 million and \$9.2 million of net excess cash collateral.

(3) When collateral is pledged to or pledged by a counterparty, it is often pledged or posted with respect to all positions with such counterparty, and in such cases such collateral cannot be specifically identified as relating to a specific asset or liability. As a result, in preparing the above table, the Company has made assumptions in allocating pledged or posted collateral among the various rows.

December 31, 2014:

Description	Amount of Assets (Liabilities) Presented in the Consolidated Balance Sheet <sup>(1)</sup>	Financial Instruments Available for Offset	Financial Instruments Transferred or Pledged as Collateral <sup>(2)(3)</sup>	Cash Collateral (Received) Pledged <sup>(2)(3)</sup>	Net Amount
(In thousands)					
Assets:					
Financial derivatives—assets	\$3,072	\$(2,722)	\$—	\$—	\$350
Reverse repurchase agreements	13,987	(13,987)	—	—	—
Liabilities:					
Financial derivatives—liabilities	(8,700)	2,722	—	5,783	(195)
Repurchase agreements	(1,323,080)	13,987	1,303,360	5,733	—

(1) In the Company's Consolidated Balance Sheet, all balances associated with the repurchase agreements and financial derivatives are presented on a gross basis.

(2) For the purpose of this presentation, for each row the total amount of financial instruments transferred or pledged and cash collateral (received) or pledged may not exceed the applicable gross amount of assets or (liabilities) as

presented here. Therefore the Company has reduced the amount of financial instruments transferred or pledged as collateral related to the Company's repurchase agreements and cash collateral pledged on the Company's financial derivative assets and liabilities. Total financial instruments transferred or pledged as collateral on the Company's repurchase agreements as of December 31, 2014 were \$1.39 billion. As of December 31, 2014 total cash collateral on financial derivative assets and liabilities excludes \$0.5 million and \$6.3 million, respectively of net excess cash collateral.

(3) When collateral is pledged to or pledged by a counterparty, it is often pledged or posted with respect to all positions with such counterparty, and in such cases such collateral cannot be specifically identified as relating to a specific asset or liability. As a result, in preparing the above table, the Company has made assumptions in allocating pledged or posted collateral among the various rows.

## 8. Management Fees

The Manager receives an annual management fee in an amount equal to 1.50% per annum of shareholders' equity (as defined in the Management Agreement) as of the end of each fiscal quarter (before deductions for any management fee with respect to such fiscal period). The management fee is payable quarterly in arrears. For both the three month periods ended March 31, 2015 and 2014, the total management fee incurred was approximately \$0.6 million.

Effective January 1, 2015 the Company entered into a Third Amended and Restated Management Agreement with the Manager, which replaces and supersedes the Second Amended and Restated Management Agreement. The Third Amended and Restated Management Agreement was adopted and executed for the primary purpose of redefining shareholders' equity. Shareholders' equity per the Second Amended and Restated Management Agreement had the definition as described below. Effective January 1, 2015, shareholders' equity is defined in the Third Amended and Restated Management Agreement, as of the end of any fiscal quarter, as (a) the sum of (1) the net proceeds from any issuances of common shares or other equity securities of the Company or the Operating Partnership (without double counting) since inception, plus (2) the Company's and the Operating Partnership's (without double counting) retained earnings or accumulated deficit calculated in accordance with U.S. GAAP at the end of the most recently completed fiscal quarter (without taking into account any non-cash equity compensation expense incurred in current or prior periods), less (b) any amount that the Company or the Operating Partnership has paid to repurchase common shares, limited partnership interests in the Operating Partnership or other equity securities since inception. Shareholders' equity excludes (1) non-cash equity compensation expenses that have impacted shareholders' equity as reported in the financial statements prepared in accordance with U.S. GAAP, and (2) one-time events pursuant to changes in U.S. GAAP, and certain non-cash items not otherwise described above, in each case, after discussions between the Manager and the Company's independent trustees and approval by a majority of the Company's independent trustees. From inception through December 31, 2014, Shareholders' equity is defined in the Management Agreement, as of the end of any fiscal quarter, as (a) the sum of (1) the net proceeds from any issuances of common shares or other equity securities of the Company or the Operating Partnership (without double counting) since inception, plus (2) the Company's and the Operating Partnership's (without double counting) retained earnings or accumulated deficit calculated in accordance with U.S. GAAP at the end of the most recently completed fiscal quarter (without taking into account any non-cash equity compensation expense incurred in current or prior periods), less (b) any amount that the Company or the Operating Partnership has paid to repurchase common shares, limited partnership interests in the Operating Partnership or other equity securities since inception. Shareholders' equity excludes (1) any unrealized gains, losses, or non-cash equity compensation expenses that have impacted shareholders' equity as reported in the financial statements prepared in accordance with U.S. GAAP, regardless of whether such items are included in net income, and (2) one-time events pursuant to changes in U.S. GAAP, and certain non-cash items not otherwise described above, in each case, after discussions between the Manager and the Company's independent trustees and approval by a majority of the Company's independent trustees.

## 9. Earnings Per Share

Basic earnings per share, or "EPS," is calculated by dividing net income (loss) for the period by the weighted average of the Company's common shares outstanding for the period. Diluted EPS takes into account the effect of outstanding dilutive instruments, such as share options and warrants, if any, and uses the average share price for the period in determining the number of incremental shares that are to be added to the weighted average number of shares outstanding. As of March 31, 2015 and 2014, the Company did not have any dilutive instruments outstanding. The following table presents a reconciliation of the earnings/(losses) and shares used in calculating basic EPS for the three month periods ended March 31, 2015 and 2014:

(In thousands except for share amounts)	Three Month Period Ended March 31, 2015	Three Month Period Ended March 31, 2014
Numerator:		
Net income	\$3,677	\$2,761
Denominator:		
Basic and diluted weighted average shares outstanding	9,149,274	9,139,842

Edgar Filing: Ellington Residential Mortgage REIT - Form 10-Q

Basic and Diluted Earnings Per Share	\$0.40	\$0.30
--------------------------------------	--------	--------

25

---

## 10. Related Party Transactions

### Management Agreement

The Company is party to a management agreement with the Manager, which provides for an initial term through September 24, 2017, and which will be renewed automatically each year thereafter for an additional one-year period, subject to certain termination rights. The Company is externally managed and advised by the Manager. Pursuant to the terms of the Management Agreement, the Manager provides the Company with its management team, including its officers and appropriate support personnel. The Company does not have any employees. The Manager is responsible for the day-to-day operations of the Company.

### Services Agreement

The Manager and EMG are parties to a services agreement, pursuant to which EMG is required to provide to the Manager sufficient personnel, services, and resources to enable the Manager to carry out its obligations and responsibilities under the Management Agreement. The Company is a named third-party beneficiary to the services agreement and, as a result, has, as a non-exclusive remedy, a direct right of action against EMG in the event of any breach by the Manager of any of its duties, obligations, or agreements under the Management Agreement that arise out of or result from any breach by EMG of its obligations under the services agreement. The services agreement will terminate upon the termination of the Management Agreement. Pursuant to the services agreement, the Manager makes certain payments to EMG in connection with the services provided. The Manager and EMG are under common ownership and control. As a result, all management fee compensation earned by the Manager and all service agreement fees earned by EMG accrue to the common benefit of the owners of the Manager and EMG, other than in respect of certain special non-voting membership interests in Ellington Residential Mortgage Management LLC held by certain shareholders of the Company.

### Expense Reimbursement

Under the terms of the Management Agreement the Company is required to reimburse the Manager for operating expenses related to the Company that are incurred by the Manager, including expenses relating to legal, accounting, due diligence, other services, and all other costs and expenses. The Company's reimbursement obligation is not subject to any dollar limitation. Expenses will be reimbursed in cash within 60 days following delivery of the expense statement by the Manager; provided, however, that such reimbursement may be offset by the Manager against amounts due to the Company from the Manager. The Company will not reimburse the Manager for the salaries and other compensation of the Manager's personnel except that the Company will be responsible for expenses incurred by the Manager in employing certain dedicated or partially dedicated personnel as further described below.

The Company reimburses the Manager for the allocable share of the compensation, including, without limitation, wages, salaries, and employee benefits paid or reimbursed, as approved by the Compensation Committee of the Board of Trustees, to certain dedicated or partially dedicated personnel who spend all or a portion of their time managing the Company's affairs, based upon the percentage of time devoted by such personnel to the Company's affairs. In their capacities as officers or personnel of the Manager or its affiliates, such personnel will devote such portion of their time to the Company's affairs as is necessary to enable the Company to operate its business.

For the three month periods ended March 31, 2015 and 2014, the Company reimbursed the Manager \$0.4 million and \$0.5 million, respectively, for previously incurred operating and compensation expenses.

### Termination Fee

The Management Agreement requires the Company to pay a termination fee to the Manager in the event of (1) the Company's termination or non-renewal of the Management Agreement without cause or (2) the Manager's termination of the Management Agreement upon a default by the Company in the performance of any material term of the Management Agreement. Such termination fee will be equal to 5% of Shareholders' Equity, as defined in the Management Agreement (see Note 8 above) as of the month-end preceding termination.

### Registration Rights Agreement

The Company is a party to a registration rights agreement with an affiliate of EMG and with the Blackstone Tactical Opportunities Funds (the "Blackstone Funds") pursuant to which the Company has granted its initial investors and each of their permitted transferees and other holders of the Company's "registrable common shares" (as such term is defined in the registration rights agreement) who become parties to the registration rights agreement with certain

demand and/or piggy-back registration and shelf takedown rights.

# 11. Capital

The Company has authorized 500,000,000 common shares, \$0.01 par value per share, and 100,000,000 preferred shares, \$0.01 par value per share. The Board of Trustees may authorize the issuance of additional shares of either class. As of both March 31, 2015 and December 31, 2014, there were 9,149,274 common shares outstanding, respectively. No preferred shares have been issued.

The below table details cash dividends declared by the Board of Trustees during the three month period ended March 31, 2015:

	Dividend Per Share	Dividend Amount (In thousands)	Declaration Date	Record Date	Payment Date
First Quarter	\$0.55	\$5,032	March 11, 2015	March 31, 2015	April 27, 2015

The below table details cash dividends declared by the Board of Trustees during the three month period ended March 31, 2014:

	Dividend Per Share	Dividend Amount (In thousands)	Declaration Date	Record Date	Payment Date
First Quarter	\$0.55	\$5,027	March 12, 2014	March 31, 2014	April 28, 2014

On August 13, 2013, the Company's Board of Trustees approved the adoption of a \$10 million share repurchase program. The program, which is open-ended in duration, allows the Company to make repurchases from time to time on the open market or in negotiated transactions. Repurchases are at the Company's discretion, subject to applicable law, share availability, price and the Company's financial performance, among other considerations. No purchases have been made under the program to date.

## Distribution Policy

The timing and frequency of distributions will be determined by the Board of Trustees based upon a variety of factors deemed relevant by the Company's trustees, including restrictions under applicable law, capital requirements of the Company, and the REIT requirements of the Code. Distributions to shareholders generally will be taxable as ordinary income, although a portion of such distributions may be designated as long-term capital gain or qualified dividend income, or may constitute a return of capital. The Company will furnish annually to each shareholder a statement setting forth distributions paid during the preceding year and their U.S. federal income tax treatment.

It is the intention of the Company to distribute at least 100% of its taxable income, after application of available tax attributes, within the limits prescribed by the Internal Revenue Code, which may extend into the subsequent taxable year.

# 12. Commitments and Contingencies

From time to time, the Company may become involved in various claims and legal actions arising in the ordinary course of business. Management is not aware of any significant contingencies at March 31, 2015.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

In this Quarterly Report on Form 10-Q, except where the context suggests otherwise, "EARN," "we," "us," and "our" refer to Ellington Residential Mortgage REIT and its subsidiaries, our "Manager" refers to Ellington Residential Mortgage Management LLC, our external manager, and "Ellington" refers to Ellington Management Group, L.L.C. and its affiliated investment advisory firms.

### SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

When used in this quarterly report on Form 10-Q, in future filings with the Securities and Exchange Commission ("SEC") or in press releases or other written or oral communications, statements which are not historical in nature, including those containing words such as "believe," "expect," "anticipate," "estimate," "project," "plan," "continue," "intend," "should," "would," "could," "goal," "objective," "will," "may," "seek" or similar expressions, are intended to identify "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and, as such, may involve known and unknown risks, uncertainties, and assumptions.

Forward-looking statements are based on our beliefs, assumptions, and expectations of our future performance, taking into account all information currently available to us. These beliefs, assumptions and expectations are subject to risks and uncertainties and can change as a result of many possible events or factors, not all of which are known to us. If a change occurs, our business, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements. The following factors are examples of those that could cause actual results to vary from our forward-looking statements: changes in interest rates and the market value of our securities; our use and dependence on leverage; the impact of Fannie Mae and Freddie Mac being placed into conservatorship and related events, including the lack of certainty as to the future roles and structures of these entities and changes to legislation and regulations affecting these entities; market volatility; changes in the prepayment rates on the mortgage loans underlying the securities we own and intend to acquire; changes in rates of default and/or recovery rates on our non-agency assets; our ability to borrow to finance our assets and the costs of such borrowings; changes in government regulations affecting our business; our ability to maintain our exclusion from registration under the Investment Company Act of 1940, as amended (the "Investment Company Act"); and risks associated with investing in real estate related assets, including changes in business conditions and the general economy. These and other risks, uncertainties and factors, including the risk factors described under Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2014 as filed with the SEC, could cause our actual results to differ materially from those projected in any forward-looking statements we make. All forward-looking statements speak only as of the date on which they are made. New risks and uncertainties arise over time and it is not possible to predict those events or how they may affect us. Except as required by law, we are not obligated to, and do not intend to, update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

### Executive Summary

We are a Maryland real estate investment trust, or "REIT," formed in August 2012 that specializes in acquiring, investing in, and managing residential mortgage- and real estate-related assets. Our primary objective is to generate attractive current yields and risk-adjusted total returns for our shareholders by making investments that we believe compensate us appropriately for the risks associated with them. We seek to attain this objective by constructing and actively managing a portfolio comprised primarily of Agency residential mortgage-backed securities, or "RMBS," and, to a lesser extent, non-Agency RMBS. We also may opportunistically acquire and manage other types of residential mortgage-related and real estate-related asset classes, such as residential mortgage loans, and mortgage servicing rights, or "MSRs." We believe that being able to combine Agency RMBS with non-Agency RMBS and other residential mortgage- and real estate-related asset classes enables us to balance a range of mortgage-related risks. We were formed through an initial strategic venture among affiliates of Ellington, an investment management firm and registered investment adviser with a 20-year history of investing in a broad spectrum of mortgage-backed securities and related derivatives, with an emphasis on the RMBS market, and the Blackstone Tactical Opportunity Funds, or the "Blackstone Funds." These initial investors made an aggregate investment of approximately \$31.5 million on September 25, 2012. On May 6, 2013, we closed our initial public offering of our common shares, pursuant to which we sold 6,450,000 of our common shares to the public at a price of \$20.00 per share. Concurrent with the initial public offering, we completed a private placement with our initial investors pursuant to which we issued

Edgar Filing: Ellington Residential Mortgage REIT - Form 10-Q

1,050,000 common shares at a purchase price of \$20.00 per share, resulting in gross proceeds of \$21.0 million. Total gross proceeds to us from the initial public offering and concurrent private placement were \$150.0 million. Proceeds to us, net of offering costs, were approximately \$148.5 million.

We are externally managed and advised by our Manager, an affiliate of Ellington.

We use leverage in our Agency RMBS strategy and, while we have not done so to date, we may use leverage in our non-Agency RMBS strategy as well, although we expect such leverage to be lower. We have financed our purchases of Agency RMBS exclusively through repurchase agreements, which we account for as collateralized borrowings. As of March 31, 2015, we had outstanding borrowings under repurchase agreements in the amount of \$1.2 billion with nine counterparties.

We have elected to be taxed as a REIT for U.S. federal income tax purposes. Accordingly, we generally will not be subject to U.S. federal income taxes on our taxable income that we distribute currently to our shareholders as long as we maintain our qualification as a REIT. We intend to conduct our operations so that neither we nor any of our subsidiaries is required to register as an investment company under the Investment Company Act of 1940, as amended.

As of March 31, 2015, our book value per share was \$17.71 as compared to \$17.86 as of December 31, 2014.

#### Trends and Recent Market Developments

Key trends and recent market developments for the mortgage-backed security, or "MBS," market include the following:

**Federal Reserve and U.S. Monetary Policy**—Given the relative strength in the U.S. economy, the Federal Reserve has shifted its focus from quantitative easing to monitoring the economy for signs of when it should begin increasing its target interest rate;

**Global Monetary Policy**—As a result of the implementation of quantitative easing measures by various foreign governments, global interest rates and government bond yields fell, which in turn put downward pressure on longer term U.S. Treasury yields;

**Housing and Mortgage Market Statistics**—Data released by S&P Indices for its S&P/Case-Shiller Home Price Indices for February 2015 showed that the pace of home price appreciation remained relatively low; meanwhile the Freddie Mac survey 30-year mortgage rate ended the first quarter of 2015 at 3.70% after dropping as low as 3.59% in early February, down from 3.87% at the end of 2014;

**Prepayment Rate Trends**—Prepayment rates have spiked in early 2015, primarily driven by a decline in mortgage rates and policy announcements; the pace of refinancings in 2015 has remained above average levels observed in 2014;

**Government Sponsored Enterprise, or "GSE," and Government Agency Developments**—In early 2015, the Federal Housing Finance Agency, or "FHFA," and the GSEs continued to announce program and policy changes and clarifications intended to increase mortgage credit availability;

**Portfolio Overview and Outlook**—The first three months of 2015 were marked by significant interest rate volatility. In response to declining mortgage rates, prepayment activity increased during the three month period ended March 31, 2015 and specified pools of Agency RMBS performed well relative to their generic-pool counterparts. Pay-ups for certain segments of the specified pool market appreciated materially during the period while others were largely unchanged. Non-Agency RMBS continued to exhibit price stability relative to the broader financial markets.

#### Federal Reserve and U.S. Monetary Policy

In its April 2015 statement, the Federal Open Market Committee, or "FOMC," maintained the target range for the federal funds rate at 0% to 0.25%. The FOMC also indicated that, based on its assessment of labor market conditions, inflationary pressures and expectations, and other factors, it will be appropriate to raise the target rate when it has seen further improvement in the labor market and is reasonably confident that inflation will move to its 2% inflation objective over the medium term. The FOMC also indicated that, despite a slowdown in economic growth during the first quarter, it continues to expect that, with appropriate policy accommodation, economic activity will expand at a moderate pace. Currently the FOMC anticipates that economic conditions may warrant keeping the target rate below normal long-run levels for "some time," even once employment and inflation have reached levels consistent with the Federal Reserve's mandate.

Since the Federal Reserve's initial announcement in December 2013 that it would begin reducing its monthly purchase of Agency RMBS and U.S. Treasury securities, long-term interest rates have generally declined. As of March 31, 2015, the 10-year U.S. Treasury yield was 1.92% as compared to 2.17% as of December 31, 2014. Prices of Agency RMBS have rallied since the Federal Reserve's initial taper announcement. For example, the price of TBA 30-year Fannie Mae 3.5s, a widely traded Agency RMBS, was 105.09 as of March 31, 2015, as compared to 99.34 as of December 31, 2013.

Notwithstanding the drop in interest rates since the Federal Reserve's initial taper announcement, we believe that there remains substantial risk that interest rates could begin to rise again, driven by a tightening of Federal Reserve monetary policy in response to employment and economic growth in the United States. The risk of rising interest rates reinforces the importance of our ability, subject to our qualifying and maintaining our qualification as a REIT, to hedge interest rate risk in both our Agency and non-Agency RMBS portfolios using a variety of tools, including TBAs, interest rate swaps, and various other

instruments. Additionally, the Federal Reserve has not yet provided significant guidance regarding its expected timeline to curtail the reinvestment of principal payments from its holdings into new asset purchases. Monthly purchases under this program currently total approximately \$30 billion. Uncertainty around the tapering of Federal Reserve reinvestments poses an additional risk to the Agency RMBS market.

#### Global Monetary Policy

Beginning in late 2014 and continuing through the first quarter of 2015, a number of central banks worldwide instituted or significantly expanded quantitative easing, or "QE," programs. On January 22, 2015, the European Central Bank, or "ECB," announced a substantial expansion of its QE program, introducing a €60 billion per month bond buying program in an effort to combat deflationary pressures. The program began on March 9, 2015 and is expected to continue until at least September 2016. Similarly, the Bank of Japan announced in October 2014 that it would greatly expand its already substantial QE program, raising its asset purchase program from ¥60 to ¥70 trillion per year to ¥80 trillion per year. On April 19, 2015 the People's Bank of China announced a sharp reduction in the reserve requirement ratio for banks, the second reduction this year and the largest such reduction since 2009. This move followed the first benchmark interest rate cuts by the bank in over two years, which were announced in November 2014 and February 2015.

As a result of these actions, non-U.S. interest rates and government bond yields fell, which contributed to the downward pressure on longer term U.S. Treasury yields. Additionally, easing monetary policy in countries with which the U.S. trades generally results in foreign currency devaluation, thereby reducing U.S. inflation by lowering the prices of imported goods.

#### Housing and Mortgage Market Statistics

The following table demonstrates the decline in residential mortgage delinquencies and foreclosure inventory on a national level, as reported by CoreLogic in its February and January 2015 National Foreclosure Reports:

	As of		
Number of Units (In thousands)	February 2015	November 2014	February 2014
Seriously Delinquent Mortgages <sup>(1)</sup>	1,530	1,592	1,897
Foreclosure Inventory	553	571	761

<sup>(1)</sup> Seriously Delinquent Mortgages are ninety days and over in delinquency and include foreclosures and real estate owned, or "REO," property.

As the above table indicates, both the number of seriously delinquent mortgages and the number of homes in foreclosure have declined significantly over the past year. This decline supports the thesis that as many homeowners have re-established equity in their homes through recovering real estate prices, they have become less likely to become delinquent and default on their mortgages.

Monthly housing starts provide another indicator of market fundamentals. The following table shows the trailing three-month average housing starts for the periods referenced:

	March 2015	December 2014
Single-family <sup>(1)</sup>	636	705
Multi-family <sup>(1)</sup>	321	342

<sup>(1)</sup> Shown in thousands of units:

Source: U.S. Census Bureau

As of March 2015, on a period-over-period basis, single-family housing starts decreased by 9.8% during the trailing three months, while multi-family housing starts declined by approximately 6.1% during the same period. Even though home prices have recovered meaningfully over the last few years, this recovery has not translated into notable growth in single-family housing starts, although poor weather may have negatively impacted housing starts during the first quarter of 2015.

Data released by S&P Indices for its S&P/Case-Shiller Home Price Indices for February 2015 showed that, on average, home prices had increased from November 2014 by 0.5% for both its 10- and 20-City Composites, respectively. Home price appreciation has been relatively modest in 2014 and early 2015, following strong appreciation in 2013. According to the report, home prices remain below the peak levels of 2006, but, on average, are back to their autumn 2004 levels for both the 10- and 20-City Composites. Finally, as indicated in the table above, as of February 2015, the national inventory of foreclosed homes fell to 553,000 units, a 27% decline when compared to

February 2014; this represented the fortieth consecutive month with a year-over-year decline and the lowest level since March 2008. As a result, there are many fewer unsold foreclosed homes overhanging the housing market than there were a year ago. We believe that near-term home price trends are more likely to be driven by fundamental factors such as economic growth, mortgage rates, and affordability, rather than by technical factors such

as shadow inventory. Shadow inventory represents the number of properties that are seriously delinquent, in foreclosure, or held as REO by mortgage servicers, but not currently listed on multiple listing services. On April 3, 2015, the U.S. Bureau of Labor Statistics, or "BLS," reported that, as of March 2015, the U.S. unemployment rate remained at 5.5%. Another, perhaps more relevant, measure of labor market conditions is employment growth, which slowed down in March after having been relatively robust in recent months. The BLS reported that non-farm payrolls rose by 126,000 during March, ending a one-year streak of employment gains above 200,000 per month. We believe that this decline was likely attributable in part to adverse weather and a stronger dollar restraining U.S. exports. While it is difficult to quantify the relationship between employment data and the housing and mortgage markets, we believe that, notwithstanding March's relatively lackluster payroll report, current levels of unemployment and job creation do not represent an impediment to a continuing housing recovery. However, the continued recovery of the housing market, while supported by still-historically-low mortgage rates and the improvement in home prices, faces a number of potential headwinds. These include volatility in interest rates, the sluggish rate of growth in housing starts and new loan origination due to still-tight credit standards, and the uneven pace of the recovery of the U.S. economy.

#### Prepayment Rate Trends

The relatively muted level of prepayment activity as interest rates broadly declined in recent years has in large part been the result of: (i) home price declines during the financial crisis, which has left some borrowers with minimal or negative home equity; (ii) more restrictive underwriting guidelines, even for refinancings; and (iii) increased origination costs, especially related to underwriting and compliance. These factors have resulted in substantial variations in prepayment rates between Agency pools as a function of loan-to-value, or "LTV," ratio, loan balance, credit score, geography, property type, loan purpose, and other factors. In recognition of the importance of these underlying characteristics on prepayment behavior, the MBS market continues to promote the creation of "specified" Agency pools that emphasize or de-emphasize many of these characteristics, such as pools where the principal balance of every underlying mortgage loan is below \$85,000. The Making Homes Affordable, or "MHA," refinancing program, which was initiated in response to the housing market crisis, has facilitated the origination of many of these kinds of specified Agency pools. The extension of the MHA refinancing program into 2015 should sustain creation of such pools in the coming years. We expect that the ongoing origination of Agency pools with a wide variety of loan characteristics will continue to create opportunities for us to exploit the resulting differences in prepayments. The Freddie Mac survey 30-year fixed mortgage rate ended the first quarter at 3.70%, reflecting a 17-basis point decline since year end. The Refinance Index published by the Mortgage Bankers Association, or "MBA," increased considerably on a seasonally adjusted basis during the first quarter of 2015, after remaining essentially flat during 2014. The index spiked significantly in January 2015, peaking on January 16th at almost 90% above its average 2014 level. While the index declined during February and March of 2015, it remained considerably higher than it had been in 2014. Similarly, the MBA's Market Composite Index, a measure of mortgage application volume, was also essentially flat over 2014 on a seasonally adjusted basis, but has been consistently higher in 2015, peaking on January 16th at 55% above its average 2014 level.

The table below illustrates the relationship between the Freddie Mac survey 30-year fixed mortgage rate and the MBA Refinance Index since September 2012. Generally speaking, over the period September 2012 through September 2013, mortgage rates and the level of refinancing activity were nearly linearly correlated. However, following September 2013 and through April 2015, there has been a decoupling of these two time series. As the figure below shows, by April 2015 the MBA Refinance Index was meaningfully lower than one might have expected given the nearly linear relationship that had existed between the two indices from September 2012 and September 2013. However, the increases in refinancings in October 2014 and January 2015 clearly reflect the decline in average mortgage rates during the same periods.

While the number of refinancing applications has been consistently low relative to interest rates since September 2013, the table below illustrates that the average refinanced loan size has steadily increased over that same time period, with a 32.0% increase from September 2013 through April 2015. In the October 2014 and January 2015 refinancing spikes, average refinanced loan size also spiked significantly. These trends suggest strongly that higher balance loans are becoming increasingly more prepayment sensitive relative to lower balance loans.

#### GSE/Government Agency Developments

On January 7, 2015, President Obama announced a reduction in Federal Housing Administration, or "FHA," mortgage insurance premiums, or "MIPs," to 85 basis points from 135 basis points, effective January 26, 2015. This essentially reduces FHA loan rates for impacted borrowers by 50 basis points. The reduction in MIPs has resulted in an increase in refinancings, particularly for recent vintage, low FICO and high LTV FHA loans. Increased media focus on historically low mortgage rates may have also contributed to the January spike in refinancings and increased prepayment risk for both Agency and non-Agency mortgages.

On January 27, 2015, Mel Watt, Director of the FHFA, testified before the U.S. House of Representatives Committee on Financial Services regarding the FHFA's progress in 2014 and the 2015 Scorecard for Fannie Mae, Freddie Mac and Common Securitization Solutions, or "the 2015 Scorecard," released in January 2015. The 2015 Scorecard builds on the strategic objectives and priorities that the FHFA outlined in 2014. During 2014, the FHFA announced significant changes to the GSE's representation and warranty framework, including: dramatically shortening the good payment history periods for representation and warranty relief; offering alternatives to loan repurchases when mortgage insurance is rescinded; and clarifying the criteria for the "life-of-loan exclusions" that enable the GSEs to force repurchases on account of fraud or non-compliance even after the representation and warranty relief period has expired. Watt stated that the FHFA expects to finalize its improvements to the GSE's representation and warranty framework in 2015. To increase credit availability, Watt announced in October 2014 that the GSEs would increase maximum LTV ratios from 95% to 97%, with the goal of responsibly expanding credit to lower-down payment borrowers. Further detail provided in December 2014 indicated that the program will target fixed-rate loans to low to middle income borrowers, focusing on first-time homebuyers and requiring borrowers to be owner-occupants. The program began in December 2014 for Fannie Mae and in March 2015 for Freddie Mac. Credit risk transfers to private investors, which increase private capital flows to the mortgage sector while reducing taxpayer risk, are planned to grow to \$150 billion and \$120 billion for Fannie Mae and Freddie Mac, respectively, subject to market conditions, a significant increase from the \$90 billion

of transfers that each Agency was required to meet in 2014. The FHFA continues to work with Fannie Mae and Freddie Mac to build a Common Securitization Platform to be utilized by both agencies, which the FHFA believes will improve the liquidity of GSE securities and housing finance markets more broadly. While this is a multiyear initiative, the FHFA expects to finalize the single security structure in 2015.

On March 2, 2015, the FHFA announced the implementation of new rules applicable to the sales of non-performing loans, or "NPLs," by Freddie Mac and Fannie Mae, in an effort to ensure that these loans are sold to capable mortgage servicers. These new rules were based on two pilot sales of NPLs by Freddie Mac in August 2014 and February 2015. Following this announcement, Freddie Mac executed its largest-ever sale of severely delinquent loans, accepting bids for loans totaling \$985 million in unpaid principal balance. On April 8, 2015, Fannie Mae began marketing its first large sale of NPLs, with a pool totaling \$786 million in unpaid principal balance.

On April 17, 2015, the FHFA announced that it would not change the general level of guarantee fees, or "g-fees," on new Fannie Mae and Freddie Mac originations, but that it would make certain minor and targeted fee adjustments, including removing the 25 basis point adverse market charge established in 2008, and applying small, targeted fee increases to a subset of Fannie Mae and Freddie Mac loans. G-fees are the fees charged by the GSEs to include mortgage loans in Agency pools, and thereby insure the mortgage loans against loss. Since these fees are passed on to borrowers whose loans are originated for inclusion in Agency pools, increased g-fees have the effect of reducing housing affordability for GSE borrowers, but potentially make it more attractive for private lenders to replace the GSEs.

To date, no definitive legislation has been enacted with respect to a possible unwinding of the GSEs or a material reduction in their roles in the U.S. mortgage market. There have been several proposals offered by members of Congress, including the Corker-Warner bill introduced in June 2013, the Johnson-Crapo bill introduced in March 2014, and the Partnership to Strengthen Homeownership Act, which was introduced in July 2014. Though it appears unlikely that any of these bills will be passed in its current form, features may be incorporated into future proposals.

#### Portfolio Overview and Outlook

##### Agency

As of March 31, 2015, the value of our long Agency portfolio was \$1.357 billion, as compared to \$1.361 billion as of December 31, 2014.

Our Agency RMBS portfolio is principally comprised of "specified pools." Specified pools are fixed rate Agency pools with special characteristics, such as pools comprised of low loan balance mortgages, pools comprised of mortgages backed by investor properties, pools containing mortgages originated through the government-sponsored "Making Homes Affordable" refinancing programs, and pools containing mortgages with various other characteristics. During the year, our Agency RMBS purchasing activity continued to focus primarily on specified pools, especially those with higher coupons.

The first three months of 2015 were marked by significant interest rate volatility in the face of global economic weakness (especially in Europe and China) and uncertainty as to the timing of future Federal Reserve interest rate increases. The ten-year U.S. Treasury yield began the first quarter at 2.17%, fell as low as 1.64% mid-quarter, and ended the first quarter at 1.92%.

The average rate for a fixed-rate 30-year conventional mortgage also declined over the course of the first quarter of 2015, dropping 0.17% to 3.70% as of March 31, 2015, after reaching as low as 3.59% mid-quarter. The decline in mortgage rates finally sparked significantly greater refinancing activity, as the MBA Refinance Index surged in January. This was in marked contrast to the fourth quarter of 2014, when interest rates dropped substantially, but refinancing activity was relatively muted. The recent reduction in FHA MIPs, which took effect in late January, also contributed to the increase in prepayment speeds, particularly for GNMA pools.

The combination of increased prepayment rates and reduced Federal Reserve support led to a drop in TBA roll prices and the overall underperformance of TBAs, especially higher coupon TBAs such as 30-year 4%'s and 4.5%'s, relative to interest rate swaps. Meanwhile, many specified pools performed well during the quarter as their favorable prepayment characteristics became more valuable in a higher prepayment environment, and as they became less expensive to hedge with TBAs given lower TBA roll prices. However, increases in prepayments were not consistent across coupon and issue year vintages. Many of the more recent vintage coupons showed very sharp increases in prepayment speeds while more seasoned vintages were generally less reactive. As a result, the relative price

movements of specified pools were not uniform and pay-ups for certain segments of the specified pool market appreciated greatly, while others were largely unchanged. Pay-ups are price premiums for specified pools relative to their TBA counterparts. However, notwithstanding the variation in pay-up appreciation across

specified pool sectors, the weighted average pay-up on our specified pools increased significantly to 1.12% as of March 31, 2015 from 0.74% as of December 31, 2014.

As interest rates declined sharply during the three month period ended March 31, 2015, our long specified pool positions generated significant gains. We were well positioned at the beginning of the period and were able to monetize gains as we actively traded the portfolio. Market volatility generally presents us with trading opportunities, particularly given our active style of portfolio management. As a result, our portfolio turnover for the quarter, as measured by sales and excluding paydowns was 25% (as measured by sales and excluding paydowns), and we captured net realized gains of \$6.7 million. Over the course of the first quarter, our interest rate hedges, which were largely concentrated in interest rate swaps and short TBA positions, generated losses that more than offset net realized and unrealized gains from our long portfolio. In the case of the hedging losses generated by our short TBA positions as opposed to our interest rate swaps, these losses were partially mitigated by the underperformance of TBA prices relative to specified pools (i.e., the outperformance of specified pool pay-ups), as well as by the drop in TBA roll prices (which kept down the cost of maintaining our short TBA positions). We believe that there remains a heightened risk of substantial interest rate and prepayment volatility in the near term, thus reinforcing the importance of our ability to hedge our risks using a variety of tools, including TBAs.

During the three month period ended March 31, 2015, we continued to focus our Agency RMBS purchasing activity primarily on specified pools, especially those with higher coupons. We also continued to be active in the reverse mortgage pool sector and purchased new issue reverse mortgage pools, which we continue to believe offer attractive relative value. Our Agency RMBS portfolio also includes a small allocation to Agency IOs. Despite the increase in prepayment activity in the first quarter, the market response in this sector was relatively subdued. Option-adjusted spreads on Agency IOs widened somewhat over the quarter, but not to a significant degree. During the quarter, we reduced our holdings of Agency IOs. However, with interest rates well below year end levels and with prepayment activity potentially poised to increase materially, we remain prepared to take advantage of possible dislocations in the Agency IO market.

We expect to continue to target specified pools that, taking into account their particular composition and based on our prepayment projections: (1) should generate attractive yields relative to other Agency RMBS and U.S. Treasury securities, (2) should have less prepayment sensitivity to government policy shocks, and/or (3) create opportunities for trading gains once the market recognizes their value, which for newer pools may come only after several months, when actual prepayment experience can be observed. We believe that our research team, our proprietary prepayment models, and our extensive databases remain essential tools in our implementation of this strategy.

Our net Agency premium as a percentage of our long Agency RMBS holdings is one metric that we use to measure our overall prepayment risk. Net Agency premium represents the total premium (excess of market value over outstanding principal balance) on long Agency RMBS holdings less the total premium on related net short TBA positions. The lower our net Agency premium, the less we believe we are exposed to market-wide increases in Agency RMBS prepayments. As of March 31, 2015, our net Agency premium as a percentage of fair value on long Agency RMBS holdings was approximately 4.7% as compared to 4.0%, as of December 31, 2014. Excluding TBA positions used to hedge our long Agency RMBS portfolio, our Agency premium as a percentage of fair value was approximately 7.7% and 6.9% as of March 31, 2015 and December 31, 2014, respectively. These percentages may fluctuate from period to period based on market factors, including interest rates and mortgage rates, as well as with respect to the net percentages, the degree to which we hedge prepayment risk with short TBAs. We believe that our focus on purchasing pools with specific prepayment characteristics provides a measure of protection against prepayments.

#### Non-Agency

As of March 31, 2015, the value of our long non-Agency portfolio was \$31.7 million, as compared to \$32.5 million as of December 31, 2014, representing an decrease of 2.5%.

During the three month period ended March 31, 2015, non-Agency RMBS, supported by technical factors such as lack of new issue supply, as well as fundamental factors such as rising home prices and declining foreclosure inventory, continued to exhibit price stability relative to the broader financial markets, which experienced significant volatility. However, prudent asset selection, based on loan-level analysis performed on a security-by-security basis, remains extremely important. While our portfolio continues to generate attractive yield, we also seek to take advantage of

trading opportunities that we believe can enhance both our returns and portfolio composition.

Financing

Through the first three months of 2015, we have found access to repo financing widely available for our Agency RMBS assets. However, under Dodd-Frank regulations, bank capital treatment of repo transactions has become more onerous, thereby making it less attractive for banks to provide repo financing. While large banks still dominate the repo market, non-bank firms,

not subject to the same regulations as large banks, are becoming more active in providing repo financing. The vast majority of our outstanding repo financing is provided by larger banks and dealers; however, in limited amounts, we have also entered into repo agreements with smaller non-bank dealers. In general, we continue to see strong appetite and competitive terms from both types of lenders.

#### Critical Accounting Policies

Our consolidated financial statements have been prepared in conformity with generally accepted accounting principles in the United States of America, or "U.S. GAAP." Entities in which we have a controlling financial interest, through ownership of the majority of the entities' voting equity interests, or through other contractual right that give us control, are consolidated by us. All inter-company balances and transactions have been eliminated.

Certain of our critical accounting policies require management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. We believe that all of the decisions and assessments upon which our consolidated financial statements are based were reasonable at the time made based upon information available to us at that time. We rely on our Manager and Ellington's experience and analysis of historical and current market data in order to arrive at what we believe to be reasonable estimates. See Note 2 to the consolidated financial statements included in this Quarterly Report on Form 10-Q for a complete discussion of our significant accounting policies. We have identified our most critical accounting policies to be the following:

**Valuation:** We apply ASC 820-10, Fair Value Measurement and Disclosures ("ASC 820-10"), to our holdings of financial instruments. ASC 820-10 establishes a three-level valuation hierarchy for disclosure of fair value measurements. The valuation hierarchy is based upon the observability of inputs to the valuation of an asset or liability as of the measurement date. The three levels are defined as follows:

Level 1—inputs to the valuation methodology are observable and reflect quoted prices (unadjusted) for identical assets or liabilities in active markets. Currently, the types of financial instruments we generally include in this category are, exchange-traded derivatives and cash and cash equivalents,

Level 2—inputs to the valuation methodology other than quoted prices included in Level 1 are observable for the asset or liability, either directly or indirectly. Currently, the types of financial instruments that we generally include in this category are Agency RMBS, non-Agency RMBS determined to have sufficiently observable market data, U.S. Treasury securities, actively traded derivatives such as TBAs, interest rate swaps, and swaptions, and

Level 3—inputs to the valuation methodology are unobservable and significant to the fair value measurement. Currently, this category includes RMBS where there is less price transparency.

See the notes to our consolidated financial statements for more information on valuation.

**Accounting for Mortgage-Backed Securities:** Investments in mortgage-backed securities are recorded on trade date. We have chosen to make a fair value election pursuant to ASC 825-10, Financial Instruments, for our mortgage-backed securities portfolio. Electing the fair value option allows us to record changes in fair value in our Consolidated Statement of Operations, which, in our view, more appropriately reflects the results of our operations for a particular reporting period as all securities activities will be recorded in a similar manner. As such, the mortgage-backed securities are recorded at fair market value on our Consolidated Balance Sheet and the period change in fair value is recorded in current period earnings on our Consolidated Statement of Operations as a component of Change in net unrealized gains (losses) on mortgage-backed securities.

Realized gains or losses on sales of mortgage-backed securities are included in Net realized gains (losses) on mortgage-backed securities on the Consolidated Statement of Operations, and are recorded at the time of disposition. The cost of positions sold is calculated based on identified cost. Principal write-offs are generally treated as realized losses.

**Interest Income:** Coupon interest income on investment securities is accrued based on the outstanding principal balance and the current coupon rate on each security. We amortize premiums and accrete discounts on our fixed income investments.

Our accretion of discounts and amortization of premiums on securities for U.S. federal and other tax purposes is likely to differ from the accounting treatment under U.S. GAAP of these items as described above.

See the notes to our consolidated financial statements for more information on amortization of premiums and accretion of discounts.

**Income Taxes:** We made an election to be taxed as a REIT for U.S. federal income tax purposes. As a REIT, we generally are not subject to corporate-level federal and state income tax on net income we distribute to our stockholders. To qualify as a

REIT, we must meet a number of organizational and operational requirements, including a requirement to distribute at least 90% of our taxable income to our stockholders. Even if we qualify as a REIT, we may be subject to certain federal, state, local and foreign taxes on our income and property and to federal income and excise taxes on our undistributed taxable income. We follow the authoritative guidance on accounting for and disclosure of uncertainty on tax positions, which requires management to determine whether a tax position is more likely than not to be sustained upon examination by the applicable taxing authority, including resolution of any related appeals of the litigation process, based on the technical merits of the position. For uncertain tax positions, the tax benefit to be recognized is measured as the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement. In the normal course of business, we may be subject to examination by federal, state, local, and foreign jurisdictions, where applicable, for the current period, 2014, 2013 or 2012 (our open tax years). We may take positions with respect to certain tax issues which depend on legal interpretation of facts or applicable tax regulations. Should the relevant tax regulators successfully challenge any such positions; we might be found to have a tax liability that has not been recorded in the accompanying consolidated financial statements. Also, management's conclusions regarding the authoritative guidance may be subject to review and adjustment at a later date based on changing tax laws, regulations, and interpretations thereof. There were no amounts accrued for penalties or interest as of or during the periods presented in the consolidated financial statements included in this Quarterly Report on Form 10-Q.

"Emerging Growth Company" Status: On April 5, 2012, the Jumpstart Our Business Startups Act, or the "JOBS Act," was signed into law. The JOBS Act contains provisions that, among other things, reduce certain reporting requirements for qualifying public companies. Because we qualify as an "emerging growth company," we may, under Section 7(a)(2)(B) of the Securities Act of 1933, or "the Securities Act," delay adoption of new or revised accounting standards applicable to public companies until such standards would otherwise apply to private companies. We may take advantage of this extended transition period until the first to occur of the date that we (i) are no longer an "emerging growth company" or (ii) affirmatively and irrevocably opt out of this extended transition period. We have elected to take advantage of the benefits of this extended transition period. As a result, our financial statements may not be comparable to those of other public companies that comply with such new or revised accounting standards. Until the date that we are no longer an "emerging growth company" or affirmatively and irrevocably opt out of the exemption provided by Securities Act Section 7(a)(2)(B), upon issuance of a new or revised accounting standard that applies to our financial statements and that has a different effective date for public and private companies, we will disclose the date on which adoption is required for non-emerging growth companies and the date on which we will adopt the recently issued accounting standard.

#### Recent Accounting Pronouncements

Refer to the notes to our consolidated financial statements for a description of relevant recent accounting pronouncements.

Edgar Filing: Ellington Residential Mortgage REIT - Form 10-Q

Financial Condition

Investment portfolio

The following tables summarize our mortgage-backed securities portfolio of as of March 31, 2015 and December 31, 2014:

March 31, 2015:

	Current Principal	Unamortized Premium (Discount)	Amortized Cost	Gross Unrealized		Fair Value	Weighted Average		
				Gains	Losses		Coupon	Yield	Weighted Average Life(Years) <sup>(1)</sup>
Agency RMBS:									
15-year fixed rate mortgages	\$ 139,211	\$ 7,020	\$ 146,231	\$ 2,154	\$ (22 )	\$ 148,363	3.42%	2.43%	5.35
20-year fixed rate mortgages	9,505	559	10,064	247	—	10,311	4.00%	3.01%	6.71

Interest only securities	n/a	n/a	10,780	1,190	(726 )	11,244	4.04%	11.82%	2.68
Total Agency RMBS	1,256,156	73,524	1,340,460	23,299	(2,957 )	1,360,802	4.05%	3.24%	7.54
Non-Agency RMBS	50,668	(20,377 )	30,291	2,896	(686 )	32,501	2.29%	10.76%	4.97
Total RMBS	\$1,306,824	\$53,147	\$1,370,751	\$26,195	\$(3,643 )	\$1,393,303	3.99%	3.41%	7.45

Average lives of MBS are generally shorter than stated contractual maturities. Average lives are affected by the (1) contractual lives of the underlying mortgages, scheduled periodic payments of principal, and unscheduled prepayments of principal.

The vast majority of our capital is allocated to our Agency RMBS strategy, which includes investments in Agency pools and Agency CMOs. Within this strategy, we generally target Agency RMBS pools that, taking into account their particular composition and based on our prepayment projections: (1) should generate attractive yields relative to other Agency RMBS and U.S. Treasury securities, (2) should have less prepayment sensitivity to government policy shocks and/or (3) create opportunities for trading gains once the market recognizes their value, which for newer pools may come only after several months when actual prepayment experience can be observed. As of both March 31, 2015 and December 31, 2014, investments

in non-Agency RMBS constituted a relatively small portion of our total investments.

Our most prevalent method of financing RMBS is through short-term repurchase agreements, which generally have maturities of 180 days or less. The weighted average life of the RMBS we own is generally much longer.

Consequently, the weighted average term of our repurchase agreement financings will almost always be substantially shorter than the expected average maturity of our RMBS. This mismatch in maturities, together with the uncertainty of RMBS prepayments, and other potential changes in timing and/or amount of cash flows on our RMBS assets, creates the risk that changes in interest rates will cause our financing costs with respect to our RMBS to increase relative to the income on our RMBS over the term of our investments.

#### Financial Derivatives

The following table summarizes our portfolio of financial derivative holdings as of March 31, 2015 and December 31, 2014:

(In thousands)	March 31, 2015	December 31, 2014
Financial derivatives—assets, at fair value:		
TBA securities purchase contracts	\$936	\$387
TBA securities sale contracts	53	89
Fixed payer interest rate swaps	175	2,518
Swaptions	315	78
Total financial derivatives—assets, at fair value:	\$1,479	\$3,072
Financial derivatives—liabilities, at fair value:		
TBA securities purchase contracts	\$—	\$(5 )
TBA securities sale contracts	(2,284 )	(1,669 )
Fixed payer interest rate swaps	(11,917 )	(7,026 )
Total financial derivatives—liabilities, at fair value:	\$(14,201 )	\$(8,700 )
Total	\$(12,722 )	\$(5,628 )

Pursuant to our hedging program, we engage in a variety of interest rate hedging activities that are designed to reduce the interest rate risk with respect to the liabilities incurred to acquire or hold RMBS. These interest rate hedges generally seek to reduce the interest rate sensitivity of our liabilities or, in other words, reduce the volatility of our financing cost over time attributable to interest rate changes. Our interest rate hedging transactions may include:

- Interest rate swaps (a contract exchanging a variable rate for a fixed rate, or vice versa);
- Interest rate swaptions (options to enter into interest rate swaps at a future date);
- TBA forward contracts on Agency pass-through certificates;
- Short sales of U.S. Treasury securities;
- Eurodollar and U.S. Treasury futures; and
- Other derivatives.

We generally enter into these transactions to offset the potential adverse effects of rising interest rates on short-term repurchase agreements. Our repurchase agreements generally have maturities of up to 180 days and carry interest rates that are determined by reference to LIBOR or correlated benchmark rates for those same periods. As each then-existing fixed rate repo borrowing matures, it will generally be replaced with a new fixed rate repo borrowing based on market interest rates established at that future date.

In the case of interest rate swaps, most of our agreements are structured such that we receive payments based on a variable interest rate and make payments based on a fixed interest rate. The variable interest rate on which payments are received is generally calculated based on various reset mechanisms for LIBOR. To the extent that our future repo borrowing costs continue to be highly correlated with LIBOR, our swap agreements help to reduce the variability of our overall repo borrowing costs, thus reducing risk to the extent we hold fixed rate assets that are financed with repo borrowings.

In the case of TBAs, most of our positions are short TBA positions with a negative duration, meaning that as interest rates rise, the value of the short position increases, so these positions serve as a hedge against increases in interest rates. In the event that interest rates rise, the increase in value of the short TBA position serves to offset corollary increases in our current and/or

future borrowing costs under our repurchase agreements. While we primarily use TBAs to hedge interest rate risk, from time to time, we also hold net long positions in certain TBA securities as a means of acquiring exposure to Agency RMBS. Our ability to engage in TBA transactions may be limited by our intention to remain qualified as a REIT.

As of March 31, 2015, as part of our interest rate hedging program, we also held short positions in U.S. Treasury securities, with a total principal amount of \$62.0 million and a fair value of \$62.8 million. As of December 31, 2014, we also held short positions in U.S. Treasury securities, with a total principal amount of \$13.9 million and a fair value of \$14.0 million.

The composition and relative mix of instruments we use to hedge various risks may vary from period to period given the amount of our liabilities outstanding or anticipated to be entered into, the overall market environment and our view as to which instruments best enable us to execute our hedging goals.

#### Leverage

The following table summarizes our outstanding liabilities under repurchase agreements as of March 31, 2015 and December 31, 2014. We had no other borrowings outstanding.

Remaining Days to Maturity	March 31, 2015			December 31, 2014		
	Borrowings Outstanding	Interest Rate	Weighted Average Remaining Days to Maturity	Borrowings Outstanding	Interest Rate	Weighted Average Remaining Days to Maturity
	(In thousands)					
30 days or less	\$412,648	0.34	% 15	\$437,633	0.33	% 15
31-60 days	274,524	0.34	45	417,009	0.34	44
61-90 days	269,022	0.36	74	333,580	0.36	72
91-120 days	50,066	0.38	105	—	—	0
151-180 days	139,513	0.43	168	85,917	0.41	165
301-330 days	65,337	0.47	227	48,941	0.47	317
Total	\$1,211,110	0.36	% 68	\$1,323,080	0.35	% 60

We finance our assets with what we believe to be a prudent amount of leverage, which will vary from time to time based upon the particular characteristics of our portfolio, availability of financing, and market conditions. As of both March 31, 2015 and December 31, 2014, our borrowings consisted entirely of repurchase agreements collateralized by our Agency RMBS. Because our strategy is flexible, dynamic, and opportunistic, our overall leverage will vary over time. As of March 31, 2015 and December 31, 2014, our total debt-to-equity ratio was 7.47 to 1 and 8.10 to 1, respectively. Collateral transferred with respect to our outstanding repo borrowings as of March 31, 2015 and December 31, 2014 had an aggregate fair value of \$1.3 billion and \$1.4 billion, respectively, and was entirely comprised of Agency RMBS.

#### Shareholders' Equity

As of March 31, 2015, our shareholders' equity decreased to \$162.0 million from \$163.4 million as of December 31, 2014. This decrease principally consisted of dividends declared of \$5.0 million partially offset by net income of \$3.7 million. As of March 31, 2015, our book value per share was \$17.71 as compared to \$17.86 as of December 31, 2014.

# Results of Operations for the Three Month Periods Ended March 31, 2015 and 2014:

The following table summarizes our results of operations for the three month periods ended March 31, 2015 and 2014:

(In thousands except for per share amounts)	Three Month Period Ended March 31, 2015	Three Month Period Ended March 31, 2014
Net Interest income		
Net interest income	\$9,022	\$10,804
Expenses		
Management fees	610	592
Other operating expenses	806	802
Total expenses	1,416	1,394
Other Income (Loss)		
Net realized and change in net unrealized gains (losses) on mortgage-backed securities	11,908	14,556
Net realized and change in net unrealized gains (losses) on financial derivatives	(15,837)	(21,205)
Total Other Income (Loss)	(3,929)	(6,649)
Net Income	\$3,677	\$2,761
Net Income Per Common Share	\$0.40	\$0.30

## Core Earnings

The table below reconciles Core Earnings for the three month periods ended March 31, 2015 and 2014 to the line, Net Income (Loss), on our Consolidated Statement of Operations, which we believe is the most directly comparable U.S. GAAP measure:

(In thousands except for share amounts)	Three Month Period Ended March 31, 2015	Three Month Period Ended March 31, 2014
Net Income (Loss)	\$3,677	\$2,761
Less:		
Net realized gains (losses) on mortgage-backed securities	6,722	(3,025)
Net realized gains (losses) on financial derivatives, excluding periodic payments <sup>(1)</sup>	(8,036)	(2,614)
Change in net unrealized gains (losses) on mortgage-backed securities	5,186	17,581
Change in net unrealized gains (losses) on financial derivatives, excluding accrued periodic payments <sup>(2)</sup>	(6,243)	(16,213)
Subtotal	(2,371)	(4,271)
Core Earnings	\$6,048	\$7,032
Weighted Average Shares Outstanding	9,149,274	9,139,842
Core Earnings Per Share	\$0.66	\$0.77

For the three month period ended March 31, 2015, represents Net realized gains (losses) on financial derivatives of \$(8,743) less Net realized gains (losses) on periodic settlements of interest rate swaps of \$(707). For the three (1) month period ended March 31, 2014, represents Net realized gains (losses) on financial derivatives of \$(3,409) less Net realized gains (losses) on periodic settlements of interest rate swaps of \$(795). See Note 5 in the notes to the consolidated financial statements.

For the three month period ended March 31, 2015, represents Change in net unrealized gains (losses) on financial derivatives of \$(7,094) less Change in net unrealized gains (losses) on accrued periodic settlements of interest rate (2) swaps of \$(851). For the three month period ended March 31, 2014, represents Change in net unrealized gains (losses) on financial derivatives of \$(17,796) less Change in net unrealized gains (losses) on accrued periodic settlements of interest rate swaps of \$(1,583). See Note 5 in the notes to the consolidated financial statements.

## Results of Operations for the Three Month Periods Ended March 31, 2015 and 2014

### Net Income (Loss)

We had net income for the three month period ended March 31, 2015 of \$3.7 million, or \$0.40 per share, and we had Core Earnings of \$6.0 million, or \$0.66 per share. For the three month period ended March 31, 2014, we had net income of \$2.8 million, or \$0.30 per share, and we had Core Earnings of \$7.0 million, or \$0.77 per share. The increase in net income period over period was principally due to a decrease in net realized and unrealized losses on mortgage-backed securities and financial derivatives. Our Core Earnings was lower principally because the yields on our Agency RMBS have declined as interest rates have steadily declined.

### Interest Income

Our portfolio as of each of March 31, 2015 and 2014 consisted primarily of Agency RMBS, and to a lesser extent, non-Agency RMBS. We earned approximately \$10.3 million and \$12.0 million in interest income on these securities for the three month periods ended March 31, 2015 and 2014, respectively. The period-over-period decrease in interest income resulted from lower yields on our Agency RMBS, as well as a "catch-up amortization adjustment." This catch-up amortization adjustment for the three month period ended March 31, 2015, includes \$0.4 million related to the effects of a downward adjustment to premium amortization in interest income (accompanied by a corresponding \$0.4 million downward adjustment to realized and unrealized gains).

### Interest Expense

For the three month periods ended March 31, 2015 and 2014, the vast majority of interest expense that we incurred was related to our repo borrowings, which we use to finance our assets. We also incur interest expense in connection with our short positions in U.S. Treasury securities. Our average outstanding borrowings for the three month period ended March 31, 2015 was \$1.24 billion, resulting in an annualized average cost of funds of 0.36%. Our average outstanding borrowings for the three month period ended March 31, 2014 was \$1.26 billion, resulting in an annualized average cost of funds of 0.37%. Our interest expense for the three month period ended March 31, 2015 was \$1.3 million as compared to \$1.2 million for the three month period ended March 31, 2014. The period-over-period increase was mainly due to an increase in interest expense paid on short U.S. Treasury securities.

The following table shows information related to our annualized average cost of funds for the three month periods ended March 31, 2015 and 2014.

(\$ in thousands)	Average Borrowed Funds	Interest Expense	Annualized Average Cost of Funds	Average One-Month LIBOR	Average Six-Month LIBOR
Three Month Period Ended March 31, 2015	\$1,239,167	\$1,106	0.36 %	0.17 %	0.38 %
Three Month Period Ended March 31, 2014	\$1,259,901	\$1,148	0.37 %	0.16 %	0.33 %

As an alternative measure of our cost of funds, we add to our repo interest cost the net periodic amounts paid or payable by us on our interest rate swaps and interest expense we incur on our short U.S. Treasury securities as a percentage of our average outstanding borrowings. Our net periodic expense paid or payable under our interest rate swaps and our interest expense on short U.S. Treasury was \$1.7 million for the three month period ended March 31, 2015, or 0.57% of our average outstanding borrowings on an annualized basis, thereby resulting in an annualized average cost of funds including interest rate swaps of 0.93%. Our net periodic expense paid or payable under our interest rate swaps was \$2.4 million for the three month period ended March 31, 2014, or 0.77% of our average outstanding borrowings on an annualized basis, thereby resulting in an annualized average cost of funds including interest rate swaps of 1.14%. This metric does not take into account other instruments that we use to hedge interest rate risk, such as TBAs, swaptions, and futures.

### Management Fees

For each of the three month periods ended March 31, 2015, and March 31, 2014, our management fee expense was approximately \$0.6 million.

### Other Operating Expenses

Other operating expenses include professional fees and various other expenses necessary to operate our business. Other operating expenses for each of the three month periods ended March 31, 2015 and 2014 were approximately \$0.8 million. Our expense ratio, which represents our management fees and other operating expenses as a percentage

of our average shareholders'

42

---

equity was 3.5% on an annualized basis for the three month period ended March 31, 2015, as compared to 3.4% for the three month period ended March 31, 2014. The increase in our annualized expense ratio is due to a slightly lower capital base.

#### Other Income (Loss)

Other income (loss) consisted of net realized and net change in unrealized gain (losses) on mortgage-backed securities and financial derivatives. For the three month period ended March 31, 2015, other loss was \$3.9 million, and consisted of net realized and change in net unrealized gains (losses) of \$(15.8) million on our financial derivatives, partially offset by net realized and change in net unrealized gains (losses) of approximately \$11.9 million on our mortgage-backed securities, primarily our Agency RMBS. Long-term interest rates generally declined over the course of the quarter, causing our mortgage-backed securities to increase in value and our derivatives to decline in value. Other loss for the three month period ended March 31, 2014 was \$6.6 million and consisted of net realized and change in net unrealized gains (losses) of \$(21.2) million on our financial derivatives, partially offset by net realized and change in net unrealized gains (losses) of approximately \$14.6 million on our mortgage-backed securities, principally our Agency RMBS.

#### Liquidity and Capital Resources

Liquidity refers to our ability to meet our cash needs, including repaying our borrowings, funding and maintaining RMBS and other assets, paying dividends, and other general business needs. Our short-term (one year or less) and long-term liquidity requirements include acquisition costs for assets we acquire, payment of our management fee, compliance with margin requirements under our repurchase agreements, TBA and other financial derivative contracts, repayment of repurchase agreement borrowings to the extent we are unable or unwilling to extend our repurchase agreements, the payment of dividends, and payment of our general operating expenses. Our capital resources primarily include cash on hand, cash flow from our investments (including monthly principal and interest payments received on our RMBS and proceeds from the sale of MBS), borrowings under repurchase agreements, and proceeds from equity offerings. We expect that these sources of funds will be sufficient to meet our short-term and long-term liquidity needs.

We borrow funds in the form of repurchase agreements. The terms of these borrowings under our Master Repurchase Agreements, or "MRAs," generally conform to the terms in the standard master repurchase agreement as published by the Securities Industry and Financial Markets Association as to repayment and margin requirements. In addition, each lender may require that we include supplemental terms and conditions to the standard master repurchase agreement. Typical supplemental terms and conditions include the addition of or changes to provisions relating to margin calls, net asset value requirements, cross default provisions, certain key person events, changes in corporate structure, and requirements that all controversies related to the repurchase agreement be litigated in a particular jurisdiction. These provisions may differ for each of our lenders.

As of March 31, 2015 and December 31, 2014, we had \$1.2 billion and \$1.3 billion outstanding under our repurchase agreements, respectively. As of March 31, 2015, we had MRAs in place with fourteen counterparties and our outstanding repurchase agreements were with nine counterparties.

Amount at risk represents the aggregate excess, if any, for each counterparty of the fair value of collateral held by such counterparty over the amounts outstanding under repurchase agreements. The following table reflects counterparties for which the amounts at risk relating to our repurchase agreements was greater than 5% of shareholders' equity as of March 31, 2015 and December 31, 2014.

March 31, 2015:

Counterparty	Amount at Risk <sup>(1)</sup>	Weighted Average Remaining Days to Maturity	Percentage of Shareholders' Equity	
	(In thousands)			
J.P. Morgan Securities Inc.	\$16,090	79	9.9	%
Deutsche Bank Securities	\$15,475	55	9.6	%
RBC Capital Markets LLC	\$12,828	94	7.9	%

(1) Amounts at risk exclude, in aggregate, \$2.3 million of net accrued interest, defined as accrued interest on securities held as collateral less interest payable on cash borrowed.

Edgar Filing: Ellington Residential Mortgage REIT - Form 10-Q

December 31, 2014:

Counterparty	Amount at Risk <sup>(1)</sup>	Weighted Average Remaining Days to Maturity	Percentage of Shareholders' Equity	
	(In thousands)			
Bank of America Securities	\$15,754	69	9.6	%
J.P. Morgan Securities Inc.	\$12,012	27	7.4	%
Deutsche Bank Securities	\$11,919	55	7.3	%
RBC Capital Markets LLC	\$10,374	113	6.3	%

(1) Amounts at risk exclude, in aggregate, \$2.7 million of net accrued interest, defined as accrued interest on securities held as collateral less interest payable on cash borrowed.

The amounts borrowed under our repurchase agreements are generally subject to the application of "haircuts." A haircut is the percentage discount that a repo lender applies to the market value of an asset serving as collateral for a repo borrowing, for the purpose of determining whether such reverse repo borrowing is adequately collateralized. As of March 31, 2015 and December 31, 2014, the weighted average contractual haircut applicable to the assets that serve as collateral for our outstanding repo borrowings was 4.7% and 4.5%, respectively. As of both March 31, 2015 and December 31, 2014, all of our repo borrowings were related to its Agency RMBS.

We held cash and cash equivalents of approximately \$53.3 million and \$45.2 million as of March 31, 2015 and December 31, 2014, respectively.

We may declare dividends based on, among other things, our earnings, our financial condition, the REIT qualification requirements of the Internal Revenue Code, our working capital needs and new opportunities. The declaration of dividends to our shareholders and the amount of such dividends are at the discretion of our Board of Trustees. The following table sets forth the dividend distributions authorized by the Board of Trustees for the periods indicated below:

Three Month Period Ended March 31, 2015

	Dividend Per Share	Dividend Amount (In thousands)	Declaration Date	Record Date	Payment Date
First Quarter	\$0.55	\$5,032	March 11, 2015	March 31, 2015	April 27, 2015

Three Month Period Ended March 31, 2014

	Dividend Per Share	Dividend Amount (In thousands)	Declaration Date	Record Date	Payment Date
First Quarter	\$0.55	\$5,027	March 12, 2014	March 31, 2014	April 28, 2014

For the three month period ended March 31, 2015, our operating activities provided net cash of \$1.2 million and our investing activities provided net cash of \$123.9 million. Our repo activity used to finance our Agency RMBS (including repayments, in conjunction with the sales of Agency RMBS, of amounts borrowed under our repurchase agreements) used net cash of \$112.0 million. Thus our operating and investing activities, when combined with our net repo financing activities, provided net cash of \$13.1 million. We used \$5.0 million to pay dividends. As a result of these activities, there was an increase in our cash holdings of \$8.1 million from \$45.2 million as of December 31, 2014 to \$53.3 million as of March 31, 2015.

For the three month period ended March 31, 2014, our operating activities provided net cash of \$6.4 million and our investing activities provided net cash of \$28.0 million. Our repo activity used to finance our Agency RMBS (including repayments, in conjunction with the sales of Agency RMBS, of amounts borrowed under our repurchase agreements) used net cash of \$28.9 million. Thus our operating and investing activities, when combined with our net repo financing activities, provided net cash of \$5.6 million for the three month period ended March 31, 2014. We used \$4.6 million to pay dividends. As a result of these activities, there was an increase in our cash holdings of \$1.0 million from \$50.1 million as of December 31, 2013 to \$51.1 million as of March 31, 2014.

On August 13, 2013, our Board of Trustees approved the adoption of a \$10 million share repurchase program. The program, which is open-ended in duration, allows us to make repurchases from time to time on the open market or in

negotiated

44

---

transactions. Repurchases are at our discretion, subject to applicable law, share availability, price and our financial performance, among other considerations. No purchases have been made under the program to date.

Based on our current portfolio, amount of free cash on hand, debt-to-equity ratio and current and anticipated availability of credit, we believe that our capital resources will be sufficient to enable us to meet anticipated short-term and long-term liquidity requirements.

We are not required by our investment guidelines to maintain any specific debt-to-equity ratio, and we believe that the appropriate leverage for the particular assets we hold depends on the credit quality and risk of those assets, as well as the general availability and terms of stable and reliable financing for those assets.

#### Contractual Obligations and Commitments

We are a party to a management agreement with our Manager. Pursuant to that agreement, our Manager is entitled to receive a management fee based on shareholders' equity, reimbursement of certain expenses and, in certain circumstances, a termination fee. Such fees and expenses do not have fixed and determinable payments. For a description of the management agreement provisions, see Note 10 to our consolidated financial statements.

We enter into repurchase agreements with third-party broker-dealers whereby we sell securities to such broker-dealers at agreed-upon purchase prices at the initiation of the repurchase agreements and agree to repurchase such securities at predetermined repurchase prices and termination dates, thus providing the broker-dealers with an implied interest rate on the funds initially transferred to us by the broker-dealers. We may enter into reverse repurchase agreements with third-party broker-dealers whereby we purchase securities under agreements to resell at an agreed-upon price and date. In general, we most often will enter into reverse repurchase agreement transactions in order to effectively borrow securities that we can then deliver to counterparties to whom we have made short sales of the same securities. The implied interest rates on the repurchase agreements and reverse repurchase agreements we enter into are based upon competitive market rates at the time of initiation. Repurchase agreements and reverse repurchase agreements that are conducted with the same counterparty may be reported on a net basis if they meet the requirements of ASC 210-20, Balance Sheet, Offsetting. As of both March 31, 2015 and December 31, 2014, there were no repurchase agreements and reverse repurchase agreements reported on a net basis on the Consolidated Balance Sheet.

As of March 31, 2015 we had \$1.2 billion of outstanding borrowings with nine counterparties and as of December 31, 2014 we had \$1.3 billion of outstanding borrowings with ten counterparties. As of March 31, 2015, we had MRAs with fourteen counterparties. We expect to continue to have discussions with various other financial institutions in order to expand our repurchase agreement capacity.

#### Off-Balance Sheet Arrangements

As of March 31, 2015 and December 31, 2014, we did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. Further, we have not guaranteed any obligations of unconsolidated entities nor do we have any commitment or intent to provide funding to any such entities. As such, we are not materially exposed to any market, credit, liquidity, or financing risk that could arise if we had engaged in such relationships.

#### Inflation

Virtually all of our assets and liabilities are interest rate-sensitive in nature. As a result, interest rates and other factors influence our performance far more so than does inflation. Changes in interest rates do not necessarily correlate with inflation rates or changes in inflation rates. Our activities and balance sheet are measured with reference to historical cost and/or fair market value without considering inflation.

#### Item 3. Quantitative and Qualitative Disclosures About Market Risk

The primary components of our market risk are related to interest rate risk, prepayment risk, and credit risk. We seek to actively manage these and other risks and to acquire and hold assets that we believe justify bearing those risks, and to maintain capital levels consistent with those risks.

##### Interest Rate Risk

Interest rates are highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations, and other factors beyond our control. We are subject to interest rate risk in

connection with most of our assets and liabilities. For some securities in our portfolio, the coupon interest rates on, and therefore also the values of, such securities are highly sensitive to interest rate movements, such as inverse floating rate RMBS, which benefit from falling interest rates. Subject to qualifying and maintaining our qualification as a REIT and our exemption from registration under the Investment Company Act, we opportunistically hedge our interest rate risk by entering into interest rate swaps, TBAs, U.S. Treasury securities, Eurodollar and U.S. Treasury futures, and other instruments. In general, such hedging instruments are used to offset the large majority of the interest rate risk we estimate to arise from our repurchase agreement indebtedness associated with our Agency RMBS positions. Hedging instruments may also be used to offset a portion of the interest rate risk arising from our repurchase agreement liabilities associated with non-Agency RMBS positions, if any.

In addition to measuring and mitigating the risk related to changes in interest rates with respect to the generally shorter-term liabilities we incur to acquire and hold generally longer-lived RMBS, we also monitor the effect of changes in interest rates on the discounted present value of our portfolio of assets and liabilities. The following sensitivity analysis table shows the estimated impact on the fair value of our portfolio segregated by certain identified categories as of March 31, 2015, assuming a static portfolio and immediate and parallel shifts in interest rates from current levels as indicated below.

(In thousands)	Estimated Change in Value for a Decrease in Interest Rates by		Estimated Change in Value for an Increase in Interest Rates by	
	50 Basis Points	100 Basis Points	50 Basis Points	100 Basis Points
Category of Instruments				
Agency RMBS, excluding TBAs	\$20,399	\$34,084	\$(27,111)	\$(60,934)
TBAs	(5,342)	(7,219)	8,807	21,079
Non-Agency RMBS	386	790	(370)	(723)
U.S. Treasury Securities, and Interest Rate Swaps and Swaptions	(16,727)	(34,341)	15,840	30,792
Repurchase and Reverse Repurchase Agreements	(911)	(911)	1,151	2,302
Total	\$(2,195)	\$(7,597)	\$(1,683)	\$(7,484)

Our analysis of interest rate risk is derived from Ellington's proprietary models as well as third-party information and analytics. Many assumptions have been made in connection with the calculations set forth in the table above and, as such, there can be no assurance that assumed events will occur or that other events will not occur that would affect the outcomes. For example, for each hypothetical immediate shift in interest rates, assumptions have been made as to the response of mortgage prepayment rates, the shape of the yield curve, and market volatilities of interest rates; each of the foregoing factors can significantly and adversely affect the fair value of our interest rate sensitive instruments.

The above analysis utilizes assumptions and estimates based on management's judgment and experience, and relies on financial models, which are inherently imperfect; in fact, different models can produce different results for the same securities. While the table above reflects the estimated impacts of immediate parallel interest rate increases and decreases on specific categories of instruments in our portfolio, we intend to actively trade many of the instruments in our portfolio and intend to diversify our portfolio to reflect a portfolio comprised primarily of Agency RMBS, and, to a lesser extent, non-Agency RMBS and mortgage-related assets. Therefore, our current or future portfolios may have risks that differ significantly from those of our March 31, 2015 portfolio estimated above. Moreover, the impact of changing interest rates on fair value can change significantly when interest rates change by a greater amount than the hypothetical shifts assumed above. Furthermore, our portfolio is subject to many risks other than interest rate risks, and these additional risks may or may not be correlated with changes in interest rates. For all of the foregoing reasons and others, the table above is for illustrative purposes only and actual changes in interest rates would likely cause changes in the actual fair value of our portfolio that would differ from those presented above, and such differences might be significant and adverse. See "Special Note Regarding Forward-Looking Statements."

#### Prepayment Risk

Prepayment risk is the risk of change, whether an increase or a decrease, in the rate at which principal is returned in respect to mortgage loans underlying RMBS, including both through voluntary prepayments and through liquidations due to defaults and foreclosures. This rate of prepayment is affected by a variety of factors, including the prevailing

level of interest rates as well as economic, demographic, tax, social, legal, and other factors. Changes in prepayment rates will have varying effects on the different types of securities in our portfolio. We attempt to take these effects into account in making asset management decisions with respect to our assets. Additionally, increases in prepayment rates may cause us to experience losses on our IOs and inverse interest only securities, or "IIOs," as these securities are extremely sensitive to prepayment rates. Finally, prepayment rates, besides being subject to interest rates and borrower behavior, are also substantially affected by

government policy and regulation.

#### Credit Risk

We are subject to credit risk in connection with our assets, especially our non-Agency RMBS. Credit losses on real estate loans underlying our non-Agency RMBS can occur for many reasons, including, but not limited to, poor origination practices, fraud, faulty appraisals, documentation errors, poor underwriting, legal errors, poor servicing practices, weak economic conditions, decline in the value of homes, special hazards, earthquakes and other natural events, over-leveraging of the borrower on the property, reduction in market rents and occupancies and poor property management services in the case of rented homes, changes in legal protections for lenders, reduction in personal income, job loss, and personal events such as divorce or health problems. Property values are subject to volatility and may be affected adversely by a number of factors, including, but not limited to, national, regional, and local economic conditions (which may be adversely affected by industry slowdowns and other factors), local real estate conditions (such as an oversupply of housing), changes or continued weakness in specific industry segments, construction quality, age and design, demographic factors, and retroactive changes to building or similar codes. For mortgage-related instruments, the two primary components of credit risk are default risk and severity risk.

#### Default Risk

Default risk is the risk that borrowers will fail to make principal and interest payments on their mortgage loans. Subject to qualifying and maintaining our qualification as a REIT and our exemption from registration under the Investment Company Act, we may selectively attempt to mitigate our default risk by, among other things, opportunistically entering into credit default swaps and total return swaps. These instruments can reference various RMBS indices, corporate bond indices, or corporate entities, such as publicly traded REITs. We also rely on third-party mortgage servicers to mitigate our default risk, but such third-party mortgage servicers may have little or no economic incentive to mitigate loan default rates.

#### Severity Risk

Severity risk is the risk of loss upon a borrower default on a mortgage loan underlying our RMBS. Severity risk includes the risk of loss of value of the property underlying the mortgage loan as well as the risk of loss associated with taking over the property, including foreclosure costs. We rely on third-party mortgage servicers to mitigate our severity risk, but such third-party mortgage servicers may have little or no economic incentive to mitigate loan loss severities. Such mitigation efforts may include loan modification programs and prompt foreclosure and property liquidation following a default.

#### Item 4. Controls and Procedures

##### Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and that such information is accumulated and communicated to our management as appropriate to allow timely decisions regarding required disclosures. An evaluation was performed under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of March 31, 2015. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of March 31, 2015.

##### Internal Control Over Financial Reporting

There have been no changes in our internal control over financial reporting that occurred during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

#### PART II. OTHER INFORMATION

##### Item 1. Legal Proceedings

Neither we nor our Manager is currently subject to any legal proceedings that we or our Manager considers to be material. Nevertheless, at any time, industry-wide or company-specific regulatory inquiries or proceedings can be initiated and we cannot predict when or if any such regulatory inquiries or proceedings will be initiated that involve us, Ellington, or its affiliates, including our Manager. See "Risk Factors—We, Ellington, or its affiliates may be subject to regulatory inquiries or proceedings" included in Part 1 Item 1A of our Annual Report on Form 10-K for the year

ended December 31, 2014. Ellington and its affiliates have, over the years, received, and we expect in the future that they may receive, inquiries and requests for documents and information from various regulators.

We can give no assurances that regulatory inquiries will not result in investigations of Ellington or its affiliates or enforcement actions, fines or penalties or the assertion of private litigation claims against Ellington or its affiliates. In the event regulatory inquiries were to result in investigations, enforcement actions, fines, penalties, or the assertion of private litigation claims against Ellington or its affiliates, our Manager's ability to perform its obligations to us under the Management Agreement between us and our Manager, or Ellington's ability to perform its obligations to our Manager under the services agreement between Ellington and our Manager, could be adversely impacted, which could in turn have a material adverse effect on our business, financial condition and results of operations, and our ability to make distributions to our shareholders.

#### Item 1A. Risk Factors

For information regarding factors that could affect our results of operations, financial condition, and liquidity, see the risk factors discussed under "Risk Factors" in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2014. There have been no material changes from these previously disclosed risk factors. See also "Special Note Regarding Forward-Looking Statements," included in Part I, Item 2 of this Quarterly Report on Form 10-Q.

#### Item 5. Other Information

Pursuant to Section 13(r) of the Exchange Act, if during the fiscal quarter ended March 31, 2015, we or any of our affiliates had engaged in certain transactions with Iran or with persons or entities designated under certain executive orders, we would be required to disclose information regarding such transactions in our Quarterly Report on Form 10-Q as required under Section 219 of the Iran Threat Reduction and Syria Human Rights Act of 2012 ("ITRA"). During the fiscal quarter ended March 31, 2015, we did not engage in any transactions with Iran or with persons or entities related to Iran.

Blackstone Tactical Opportunities EARN Holdings L.L.C., an affiliate of The Blackstone Group L.P. ("Blackstone"), is a holder of approximately 28% of the outstanding equity interests of our Common Shares and has a representative on our Board of Trustees. Accordingly, Blackstone may be deemed an "affiliate" of us, as that term is defined in Exchange Act Rule 12b-2. We have received notice from Blackstone that it may include in its Quarterly Report on Form 10-Q for the fiscal quarter ended March 31, 2015 disclosures pursuant to ITRA regarding one of its portfolio companies that may be deemed to be an affiliate of Blackstone. Because of the broad definition of "affiliate" in Exchange Act Rule 12b-2, this portfolio company of Blackstone, through Blackstone's ownership of us, may also be deemed to be an affiliate of ours.

We have reproduced below the disclosure of Travelport Limited, as provided to us by Blackstone. Travelport Limited may be considered an affiliate of Blackstone. We have no involvement in or control over the activities of Travelport Limited, any of its predecessor companies or any of its subsidiaries, and we have not independently verified or participated in the preparation of this disclosure.

"As part of our global business in the travel industry, we provide certain passenger travel-related Travel Commerce Platform and Technology Services to Iran Air. We also provide certain Technology Services to Iran Air Tours. All of these services are either exempt from applicable sanctions prohibitions pursuant to a statutory exemption permitting transactions ordinarily incident to travel or, to the extent not otherwise exempt, specifically licensed by the U.S. Office of Foreign Assets Control. Subject to any changes in the exempt/licensed status of such activities, we intend to continue these business activities, which are directly related to and promote the arrangement of travel for individuals. The gross revenue and net profit attributable to these activities in the quarter ended March 31, 2015 are still being determined."

Neither Travelport Limited nor Blackstone has provided us with gross revenues and net profits attributable to the activities described above.
