QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the quarterly period ended June 30, 2018

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the transition period from _____ to _____

Commission file number: 1-32381

HERBALIFE NUTRITION LTD.

(Exact name of registrant as specified in its charter)

Cayman Islands 98-0377871
(State or other jurisdiction of (I.R.S. Employer

incorporation or organization) Identification No.)

P.O. Box 309GT

Ugland House, South Church Street

Grand Cayman, Cayman Islands

Edgar Filing: HERBALIFE NUTRITION LTD. - Form 10-Q

(Address of principal executive offices) (Zip code)

(213) 745-0500

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

(Do not check if a smaller reporting company) Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Number of shares of registrant's common shares outstanding as of July 25, 2018 was 157,171,861.

HERBALIFE NUTRITION LTD. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Organization

Herbalife Nutrition Ltd. (formerly Herbalife Ltd.), a Cayman Islands exempted company with limited liability, was incorporated on April 4, 2002. Herbalife Nutrition Ltd. (and together with its subsidiaries, the “Company” or “Herbalife”) is a global nutrition company that sells weight management; targeted nutrition; energy, sports, & fitness; and outer nutrition products to and through a network of independent members, or Members. In China, the Company sells its products to and through independent service providers, sales representatives, and sales officers to customers and preferred customers, as well as through Company-operated retail stores when necessary. The Company sells its products in six geographic regions: North America; Mexico; South and Central America; EMEA, which consists of Europe, the Middle East, and Africa; Asia Pacific (excluding China); and China.

2. Significant Accounting Policies

Basis of Presentation

The unaudited condensed consolidated interim financial information of the Company has been prepared in accordance with Article 10 of the Securities and Exchange Commission’s, or the SEC, Regulation S-X. Accordingly, as permitted by Article 10 of the SEC’s Regulation S-X, it does not include all of the information required by generally accepted accounting principles in the U.S., or U.S. GAAP, for complete financial statements. The condensed consolidated balance sheet as of December 31, 2017 was derived from the audited financial statements at that date and does not include all the disclosures required by U.S. GAAP, as permitted by Article 10 of the SEC’s Regulation S-X. The Company’s unaudited condensed consolidated financial statements as of June 30, 2018 and for the three and six months ended June 30, 2018 and 2017 include Herbalife Nutrition Ltd. and all of its direct and indirect subsidiaries. In the opinion of management, the accompanying financial information contains all adjustments, consisting of normal recurring adjustments, necessary to present fairly the Company’s unaudited condensed consolidated financial statements as of June 30, 2018, and for the three and six months ended June 30, 2018 and 2017. These unaudited condensed consolidated financial statements should be read in conjunction with the Company’s Annual Report on Form 10-K for the year ended December 31, 2017, or the 2017 10-K. Operating results for the three and six months ended June 30, 2018, are not necessarily indicative of the results that may be expected for the year ending December 31, 2018.

On April 24, 2018, the Company’s shareholders approved a two-for-one stock split of the Company’s common shares. On May 14, 2018, shareholders of record received one additional share for each share held as of May 7, 2018. All share and per share amounts herein have been restated to reflect the stock split.

Recently Adopted Pronouncements

In May 2014, the Financial Accounting Standards Board, or FASB, issued Accounting Standards Update, or ASU, No. 2014-09, Revenue from Contracts with Customers (Topic 606). The new revenue recognition standard provides a

five-step analysis of contracts to determine when and how revenue is recognized. The core principle is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In August 2015, the FASB deferred the effective date of ASU No. 2014-09 for all entities by one year to annual reporting periods beginning after December 15, 2017. The FASB has issued several updates subsequently, including implementation guidance on principal versus agent considerations, on how an entity should account for licensing arrangements with customers, and to improve guidance on assessing collectability, presentation of sales taxes, noncash consideration, and contract modifications and completed contracts at transition. The amendments in this series of updates shall be applied either retrospectively to each period presented or as a cumulative-effect adjustment as of the date of adoption. The Company adopted Topic 606, Revenue from Contracts with Customers, with a date of initial application of January 1, 2018 using the modified retrospective method applied to all contracts existing as of January 1, 2018. Results for reporting periods beginning January 1, 2018 and thereafter are presented under Topic 606, while prior period amounts have not been adjusted and continue to be reported in accordance with Topic 605. The Company recorded a net reduction of \$2.3 million to beginning retained earnings as of January 1, 2018 due to the cumulative impact of adopting Topic 606 resulting from revenue recognition timing differences related to the transfer of control of products sold through certain of the Company's third-party importers which are not material. The cumulative impact to opening balance sheet accounts was not material. Additionally, certain third-party importer fees have changed classification from a reduction to revenue to selling, general, and administrative expense under Topic 606. For more information on the transitional impact of adopting Topic 606, see the section entitled "Revenue Recognition" below.

In January 2016, the FASB issued ASU No. 2016-01, Financial Instruments — Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities. The updated guidance enhances the reporting model for financial instruments by modifying how entities measure and recognize equity investments and present changes in the fair value of financial liabilities, and by simplifying the disclosure guidance for financial instruments. The adoption of this guidance during the first quarter of 2018 did not have a material impact on the Company's condensed consolidated financial statements.

In March 2016, the FASB issued ASU No. 2016-04, Liabilities — Extinguishments of Liabilities (Subtopic 405-20): Recognition of Breakage for Certain Prepaid Stored-Value Products. This ASU requires entities that sell prepaid stored-value products redeemable for goods, services or cash at third-party merchants to recognize breakage (i.e. the value that is ultimately not redeemed by the consumer) in a way that is consistent with how it will be recognized under the new revenue recognition standard. Under prior U.S. GAAP, there was diversity in practice in how entities accounted for breakage that resulted when a consumer did not redeem the entire product balance. This ASU clarifies that an entity's liability for prepaid stored-value products within its scope meets the definition of a financial liability. The adoption of this guidance during the first quarter of 2018 did not have a material impact on the Company's condensed consolidated financial statements.

In August 2016, the FASB issued ASU No. 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments. This ASU provides clarification on eight specific cash flow issues regarding presentation and classification in the statement of cash flows with the objective of reducing the existing diversity in practice. The adoption of this guidance during the first quarter of 2018 did not have a material impact on the Company's condensed consolidated financial statements.

In October 2016, the FASB issued ASU No. 2016-16, Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory. This ASU requires that entities recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. The amendments in this update do not change U.S. GAAP for the pre-tax effects of an intra-entity asset transfer under Topic 810, Consolidation, or for an intra-entity transfer of inventory. The adoption of this guidance during the first quarter of 2018 did not have a material impact on the Company's condensed consolidated financial statements.

In November 2016, the FASB issued ASU No. 2016-18, Statement of Cash Flows (Topic 230): Restricted Cash. This ASU requires that restricted cash and restricted cash equivalents be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period amounts shown on the statements of cash flows. The adoption of this guidance during the first quarter of 2018 resulted in a change in the presentation of restricted cash and restricted cash equivalents in the Company's condensed consolidated statements of cash flows for all periods presented. Other than this change, the adoption of this guidance did not have a material impact on the Company's condensed consolidated financial statements.

In May 2017, the FASB issued ASU No. 2017-09, Compensation — Stock Compensation (Topic 718): Scope of Modification Accounting. This ASU provides additional guidance for when a company should apply modification accounting when there is a change in either the terms or conditions of a share-based payment award. Specifically, a company should not apply modification accounting if the fair value, vesting conditions, and classification of the award remains the same immediately before and after the modification. The adoption of this guidance during the first quarter of 2018 did not have a material impact on the Company's condensed consolidated financial statements.

New Accounting Pronouncements

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842) and subsequently issued additional updates to Topic 842. The updated guidance requires lessees to recognize a lease liability and a right-of-use asset, measured at

the present value of the future minimum lease payments, at the lease commencement date. Recognition, measurement and presentation of expenses will depend on classification as a finance or operating lease. The amendments also require certain quantitative and qualitative disclosures. ASU 2016-02 is effective for all interim and annual reporting periods beginning after December 15, 2018, with early adoption permitted. As currently issued, the update requires entities to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach or allows entities to initially apply the new lease standard at the adoption date and recognize a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption. The Company is performing a comprehensive review to determine and implement changes required to support the adoption of this standard. As part of this review, the Company is implementing a new lease accounting system to support the lease reporting upon adoption. The Company is evaluating the potential impact of this adoption on its condensed consolidated financial statements. The adoption of this guidance is expected to increase both assets and liabilities.

In June 2016, the FASB issued ASU No. 2016-13, Financial Instrument — Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. This ASU changes the impairment model for most financial assets, requiring the use of an expected loss model which requires entities to estimate the lifetime expected credit loss on financial assets measured at amortized cost. Such credit losses will be recorded as an allowance to offset the amortized cost of the financial asset, resulting in a net presentation of the amount expected to be collected on the financial asset. In addition, credit losses relating to available-for-sale debt securities will now be recorded through an allowance for credit losses rather than as a direct write-down to the security. The amendments in this update are effective for reporting periods beginning after December 15, 2019, with early adoption permitted for reporting periods beginning after December 15, 2018. The Company is evaluating the potential impact of this adoption on its condensed consolidated financial statements.

In January 2017, the FASB issued ASU No. 2017-04, Intangibles — Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment. This ASU simplifies the test for goodwill impairment by removing Step 2 from the goodwill impairment test. Companies will now perform the goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount, recognizing an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value not to exceed the total amount of goodwill allocated to that reporting unit. An entity still has the option to perform the qualitative assessment for a reporting unit to determine if the quantitative impairment test is necessary. The amendments in this update are effective for goodwill impairment tests in fiscal years beginning after December 15, 2019, with early adoption permitted for goodwill impairment tests performed after January 1, 2017. The Company is evaluating the potential impact of this adoption on its condensed consolidated financial statements.

In August 2017, the FASB issued ASU No. 2017-12, Derivatives and Hedging: Targeted Improvements to Accounting for Hedging Activities. This ASU improves the financial reporting of hedging relationships to better portray the economic results of an entity's risk management activities in its financial statements and makes certain targeted improvements to simplify the application of existing hedge accounting guidance. The amendments in this update are effective for reporting periods beginning after December 15, 2018, with early adoption permitted. The Company is evaluating the potential impact of this adoption on its condensed consolidated financial statements.

In February 2018, the FASB issued ASU No. 2018-02, Income Statement — Reporting Comprehensive Income (Topic 220). This ASU allows a reclassification from accumulated other comprehensive income to retained earnings for tax effects of items within accumulated other comprehensive income, or stranded tax effects, resulting from the Tax Cuts and Jobs Act and requires certain disclosures about those stranded tax effects. The amendments in this update are effective for reporting periods beginning after December 15, 2018, with early adoption permitted. The Company is evaluating the potential impact of this adoption on its condensed consolidated financial statements.

In June 2018, the FASB issued ASU No. 2018-07, Compensation — Stock Compensation (Topic 718): Improvements to Nonemployee Share-Based Payment Accounting. This ASU expands the scope of Topic 718 to include share-based payment transactions for acquiring goods and services from nonemployees. The amendments in this update are effective for reporting periods beginning after December 15, 2018, with early adoption permitted. The Company is evaluating the potential impact of this adoption on its condensed consolidated financial statements.

Revenue Recognition

As a result of applying Topic 606, the impact to the Company's condensed consolidated balance sheet as of June 30, 2018 was as follows:

Edgar Filing: HERBALIFE NUTRITION LTD. - Form 10-Q

	June 30, 2018

Total shareholders' deficit	(779.4)	1.8	(777.6)
Total liabilities and shareholders' deficit	2,421.5	4.2	2,425.7

9

As a result of applying Topic 606, the impact to the Company's condensed consolidated statement of income for the three months ended June 30, 2018 was as follows:

	Three Months Ended June 30, 2018		
	As reported (in millions)	Impact due to ASC 606	Without adoption
Net sales	\$1,285.5	\$ (5.1)	\$1,280.4
Cost of sales	235.4	0.1	235.5
Gross profit	1,050.1	(5.2)	1,044.9
Royalty overrides	349.8	0.2	350.0
Selling, general, and administrative expenses	510.2	(5.5)	504.7
Other operating income	(1.7)	—	(1.7)
Operating income	191.8	0.1	191.9
Interest expense, net	44.3	—	44.3
Other expense, net	4.7	—	4.7
Income before income taxes	142.8	0.1	142.9
Income taxes	48.4	0.1	48.5
Net income	\$94.4	\$ —	\$94.4

As a result of applying Topic 606, the impact to the Company's condensed consolidated statement of income for the six months ended June 30, 2018 was as follows:

	Six Months Ended June 30, 2018		
	As reported (in millions)	Impact due to ASC 606	Without adoption
Net sales	\$2,462.4	\$(13.1)	\$2,449.3
Cost of sales	475.3	(0.4)	474.9
Gross profit	1,987.1	(12.7)	1,974.4
Royalty overrides	687.1	(1.0)	686.1
Selling, general, and administrative expenses	970.3	(11.1)	959.2
Other operating income	(17.9)	—	(17.9)
Operating income	347.6	(0.6)	347.0
Interest expense, net	84.2	—	84.2
Other expense, net	29.1	—	29.1

Edgar Filing: HERBALIFE NUTRITION LTD. - Form 10-Q

Income before income taxes	234.3	(0.6)	233.7
Income taxes	57.8	—	57.8
Net income	\$176.5	\$(0.6)	\$175.9

As a result of applying Topic 606, the impact to the Company's condensed consolidated statement of cash flows for the six months ended June 30, 2018 was not material.

In general, the Company's performance obligation is to transfer its products to its Members. The Company generally recognizes revenue when product is delivered to its Members. For China independent service providers, and for third-party importers utilized in certain other countries where sales historically have not been material, the Company recognizes revenue based on the Company's estimate of when the service provider or third-party importer sells the products because the Company is deemed to be the principal party of these product sales under Topic 606 due to the additional selling and operating requirements relating to pricing of products, conducting business with physical locations, and other selling and marketing activities required of the service providers and third-party importers; this timing difference relating to the Company recognizing revenues when these third-party entities sell the products compared to when the Company delivers the products to them did not have a material impact to the Company's consolidated net sales for the periods presented.

The Company's Members, excluding its China independent service providers, may receive distributor allowances, which are comprised of discounts, rebates and wholesale commission payments from the Company. Distributor allowances resulting from the Company's sales of its products to its Members are recorded against net sales because the distributor allowances represent discounts from the suggested retail price.

The Company compensates its sales leader Members with royalty overrides for services rendered, relating to the development, retention, and management of their sales organizations. Royalty overrides are payable based on achieved sales volume. Royalty overrides are classified as an operating expense reflecting the services provided to the Company. The Company compensates its China independent service providers and third-party importers utilized in certain other countries for providing marketing, selling, and customer support services. Under Topic 606, as the Company is the principal party of the product sales as described above, the service fees payable to China independent service providers and the compensation received by third-party importers for the services they provide are recorded within selling, general, and administrative expenses. For the periods presented under Topic 605, the service fees payable to its China independent service providers are similarly recognized within selling, general, and administrative expenses as they are under Topic 606. However, under Topic 605, the compensation received by third-party importers for the services they provide, which represents the discount provided to them, is recorded as a reduction to net sales, which differs from the treatment under Topic 606 as described above. This change in the accounting treatment under Topic 606 of the compensation for services provided by the Company's third-party importers did not impact the Company's consolidated net income and was not material to the Company's consolidated net sales for the periods presented.

The Company recognizes revenue when it delivers products to its United States Members; distributor allowances, inclusive of discounts and wholesale commissions, are recorded as a reduction to net sales; and royalty overrides are classified as an operating expense.

Shipping and handling services relating to product sales are recognized as fulfillment activities on the Company's performance obligation to transfer products and are therefore recorded within net sales as part of product sales and are not considered as separate revenues under Topic 606. Shipping and handling costs paid by the Company are included in cost of sales.

The Company presents sales taxes collected from customers on a net basis.

The Company generally receives the net sales price in cash or through credit card payments at the point of sale. Accounts receivable consist principally of credit card receivables arising from the sale of products to the Company's Members, and its collection risk is reduced due to geographic dispersion. Credit card receivables were \$82.3 million and \$68.1 million as of June 30, 2018 and December 31, 2017, respectively. Substantially all credit card receivables were current as of June 30, 2018 and December 31, 2017. The Company recorded \$0.4 million and \$0.2 million during the three months ended June 30, 2018 and 2017, respectively, and \$0.5 million and \$0.4 million during the six months ended June 30, 2018 and 2017, respectively, in bad-debt expense related to allowances for the Company's receivables. As of June 30, 2018 and December 31, 2017, the Company's allowance for doubtful accounts was \$1.3 million and \$1.2 million, respectively. As of June 30, 2018 and December 31, 2017, the majority of the Company's total outstanding accounts receivable were current.

The Company records advance sales deposits when payment is received but revenue has not yet been recognized. In the majority of the Company's markets, advance sales deposits are generally recorded to income when the product is delivered to its Members. Additionally, advance sales deposits also include deferred revenues due to the timing of revenue recognition for products sold through China independent service providers. The estimated deferral period for advance sales deposits is generally within one week. The Company recognized substantially all of the revenues that were included within advance sales deposits as of December 31, 2017 and any remaining such balance was not

material as of June 30, 2018. Advance sales deposits are included in Other current liabilities on the Company's condensed consolidated balance sheets. See Note 13, Detail of Certain Balance Sheet Accounts, for further information.

In general, if a Member returns product to the Company on a timely basis, they may obtain replacement product from the Company for such returned products. In addition, in general the Company maintains a buyback program pursuant to which it will repurchase products sold to a Member who has decided to leave the business. Allowances for product returns, primarily in connection with the Company's buyback program, are provided at the time the sale is recorded. This accrual is based upon historical return rates for each country and the relevant return pattern, which reflects anticipated returns to be received over a period of up to 12 months following the original sale. Allowances for product returns were \$4.8 million and \$3.9 million as of June 30, 2018 and December 31, 2017, respectively.

The Company's products are grouped in five principal categories: weight management; targeted nutrition; energy, sports & fitness; outer nutrition; and literature and promotional items. However, the effect of economic factors on the nature, amount, timing, and uncertainty of revenue recognition and cash flows are similar among all five product categories. The Company defines its operating segments through six geographic regions. The effect of economic factors on the nature, amount, timing, and uncertainty of revenue recognition and cash flows are similar among the regions with the Company's Primary Reporting Segment. See Note 6, Segment Information, for further information on the Company's reportable segments and the Company's presentation of disaggregated revenue by reportable segment.

Distributor Compensation – U.S.

In the U.S., distributor compensation, including Royalty overrides, is capped if the Company does not meet an annual requirement as described in the consent order discussed in more detail in Note 5, Contingencies. On a periodic basis, the Company evaluates if this requirement will be achieved by year end to determine if a cap on distributor compensation will be required, and then determines the appropriate amount of distributor compensation expense, which may vary in each reporting period. As of June 30, 2018, the Company believes that the cap to distributor compensation will not be applicable for the current year.

Other Operating Income

To encourage local investment and operations, governments in various China provinces conduct grant programs. The Company applied for and received several such grants in China. Government grants are recorded into income when a legal right to the grant exists, there is a reasonable assurance that the grant proceeds will be received, and the substantive conditions under which the grants were provided have been met. Generally, these substantive conditions are the Company maintaining operations and paying certain taxes in the relevant province and obtaining government approval by completing an annual application process. The Company believes the continuing obligation with respect to the funds is a general requirement that they are used only for its business in China. The Company recognized government grant income of approximately \$1.7 million and \$38.9 million during the three months ended June 30, 2018 and 2017, respectively, and \$17.9 million and \$38.9 million during the six months ended June 30, 2018 and 2017, respectively, in other operating income within its condensed consolidated statements of income, related to its regional headquarters and distribution centers within China. The Company intends to continue applying for government grants in China when programs are available; however, there is no assurance that the Company will receive grants in future periods.

Other Expense, Net

During the three months ended June 30, 2018, the Company recognized a loss of \$4.7 million on the revaluation of the non-transferable contractual contingent value right, or CVR, provided for each share tendered in the October 2017 modified Dutch auction tender offer (See Note 10, Shareholders' Deficit, for further information on the CVR). During the six months ended June 30, 2018, the Company recognized a loss of \$16.0 million on the revaluation of the CVR and a \$13.1 million loss on extinguishment of \$475.0 million aggregate principal amount of the Company's convertible senior notes due 2019 (See Note 4, Long-Term Debt) in other expense, net within its condensed consolidated statements of income. During the three and six months ended June 30, 2017, the Company did not recognize any other expense, net. These non-cash expenses are included as Other non-cash adjustments to net income in the Company's cash flows from operating activities within its condensed consolidated statements of cash flows.

Restricted Cash

The following table provides a reconciliation of cash, cash equivalents, and restricted cash reported within the Company's condensed consolidated balance sheets that sum to the total of the same such amounts shown in the Company's condensed consolidated statements of cash flows:

	June 30, December 31,	
	2018	2017
	(in millions)	
Cash and cash equivalents	\$839.4	\$ 1,278.8
Restricted cash included in Prepaid expenses and		
other current assets	3.5	4.0
Restricted cash included in Other assets	12.2	12.7
Total cash, cash equivalents, and restricted cash shown		
in the statement of cash flows	\$855.1	\$ 1,295.5

The majority of the Company's consolidated restricted cash is held by certain of its foreign entities and consists of cash deposits that are required due to the business operating requirements in those jurisdictions.

3. Inventories

Inventories consist primarily of finished goods available for resale. Inventories are stated at lower of cost (primarily on the first-in, first-out basis) and net realizable value.

The following are the major classes of inventory:

	June 30, December 31,	
	2018	2017
	(in millions)	
Raw materials	\$50.2	\$ 44.2
Work in process	5.8	4.8
Finished goods	259.1	292.2
Total	\$315.1	\$ 341.2

4. Long-Term Debt

Long-term debt consists of the following:

	June 30,	December 31,
	2018	2017
	(in millions)	
Borrowings under senior secured credit facility, carrying value	\$ 1,145.3	\$ 1,190.2
2.000% convertible senior notes due 2019, carrying value of		
liability component	642.0	1,070.0
2.625% convertible senior notes due 2024, carrying value of		
liability component	405.8	—
Other	7.6	7.9
Total	2,200.7	2,268.1
Less: current portion	744.3	102.4
Long-term portion	\$ 1,456.4	\$ 2,165.7

Senior Secured Credit Facility

On May 4, 2015, the Company amended its prior senior secured credit facility, or the Prior Credit Facility, to extend the maturity date of its revolving credit facility, or the Prior Revolving Credit Facility, by one year to March 9, 2017. Pursuant to this amendment and upon execution, the Company made prepayments of approximately \$20.3 million and \$50.9 million on its \$500.0 million term loan under the Prior Credit Facility, or the Prior Term Loan, and the Prior Revolving Credit Facility, respectively. Additionally, the Company's \$700.0 million borrowing capacity on its Prior Revolving Credit Facility was reduced by approximately \$235.9 million upon execution of this amendment, and was further reduced by approximately \$39.1 million on September 30, 2015, bringing the total available borrowing capacity to \$425.0 million. The Prior Term Loan matured on March 9, 2016 and was repaid in full. Prior to March 9, 2016, the interest rates on the Company's borrowings under the Prior Credit Facility remained effectively unchanged except that the minimum applicable margin was increased by 0.50% and LIBOR was subject to a minimum floor of 0.25%. After March 9, 2016, the applicable interest rates on the Company's borrowings under the Prior Credit Facility increased by 2.00% such that borrowings under the Prior Credit Facility began bearing interest at either LIBOR plus the applicable margin between 4.00% and 5.00% or the base rate plus the applicable margin between 3.00% and 4.00%, based on the Company's consolidated leverage ratio. The Company incurred approximately \$6.2 million of debt issuance costs in connection with the amendment. These debt issuance costs were recorded on the Company's condensed consolidated balance sheet and were amortized over the life of the Prior Revolving Credit Facility.

On February 15, 2017, the Company entered into a new \$1,450.0 million senior secured credit facility, or the Credit Facility, consisting of a \$1,300.0 million term loan B, or the Term Loan, and a \$150.0 million revolving credit facility, or the Revolving Credit Facility, with a syndicate of financial institutions as lenders, or Lenders. The Revolving Credit Facility matures on February 15, 2022 and the Term Loan matures on February 15, 2023. However, if the outstanding principal on the 2019 Convertible Notes, as defined below, exceeds \$250.0 million and the Company exceeds certain leverage ratios on February 14, 2019, the Revolving Credit Facility will mature on such date. In addition, if the outstanding principal on the 2019 Convertible Notes, as defined below, exceeds \$250.0 million and the Company exceeds certain leverage ratios on May 16, 2019, the Term Loan will mature on such date. The Credit Facility is secured by the equity interests of certain of Herbalife Nutrition Ltd.'s subsidiaries and substantially all of the assets of the domestic loan parties. The Credit Facility was amended, effective March 16, 2018, to make certain technical amendments in connection with the offering of the 2024 Convertible Notes, as defined below.

The Term Loan was issued to the Lenders at a 2% discount, or \$26.0 million. In connection with the Credit Facility, the Company also repaid the \$410.0 million outstanding balance on its Prior Revolving Credit Facility. The Company incurred approximately \$22.6 million of debt issuance costs in connection with the Credit Facility. The debt issuance costs and the discount are recorded on the Company's condensed consolidated balance sheet and are being amortized over the life of the Credit Facility using the effective-interest method.

Borrowings under the Term Loan bear interest at either the eurocurrency rate plus a margin of 5.50% or the base rate plus a margin of 4.50%. Prior to August 15, 2017, borrowings under the Revolving Credit Facility bore interest at the eurocurrency rate plus a margin of 4.75% or the base rate plus a margin of 3.75%. After August 15, 2017, borrowings under the Revolving Credit Facility, depending on the Company's consolidated leverage ratio, bear interest at either the eurocurrency rate plus a margin of either 4.50% or 4.75% or the base rate plus a margin of either 3.50% or 3.75%. The base rate represents the highest of the Federal Funds Rate plus 0.50%, one-month adjusted LIBOR plus 1.00%, and the prime rate set by Credit Suisse, and is subject to a floor of 1.75%. The eurocurrency rate is based on adjusted LIBOR and is subject to a floor of 0.75%. The Company is required to pay a commitment fee on the Revolving Facility of 0.50% per annum on the undrawn portion of the Revolving Credit Facility. Interest is due at least quarterly on amounts outstanding on the Credit Facility.

The Credit Facility requires the Company to comply with a leverage ratio. In addition, the Credit Facility contains customary events of default and covenants, including covenants that limit or restrict the Company's ability to incur liens, incur indebtedness, make investments, dispose of assets, make certain restricted payments, pay dividends, repurchase its common shares, merge or consolidate and enter into certain transactions with affiliates. The Company is also required to maintain a minimum balance of \$200.0 million of consolidated cash and cash equivalents. As of June 30, 2018 and December 31, 2017, the Company was in compliance with its debt covenants under the Credit Facility.

The Term Loan is payable in consecutive quarterly installments each in an aggregate principal amount of \$24.4 million which began on June 30, 2017. In addition, the Company may be required to make mandatory prepayments towards the Term Loan based on the Company's consolidated leverage ratio and annual excess cash flows as defined under the terms of the Credit Facility. The Company is also permitted to make voluntary prepayments. These prepayments, if any, will be applied against remaining quarterly installments owed under the Term Loan in order of maturity with the remaining principal due upon maturity.

As of June 30, 2018 and December 31, 2017, the weighted-average interest rate for borrowings under the Credit Facility was 7.34% and 6.79%, respectively.

During the three months ended March 31, 2018, the Company repaid a total amount of \$24.4 million on amounts outstanding under the Credit Facility. During the three months ended June 30, 2018, the Company repaid a total amount of \$24.4 million on amounts outstanding under the Credit Facility. During the three months ended March 31, 2017, the Company repaid a total amount of \$410.0 million to repay in full amounts outstanding under the Prior Revolving Credit Facility. During the three months ended June 30, 2017, the Company repaid a total amount of \$24.4 million on amounts outstanding under the Credit Facility. As of June 30, 2018 and December 31, 2017, the U.S. dollar amount outstanding under the Term Loan was \$1,178.1 million and \$1,226.9 million, respectively. There were no borrowings outstanding under the Revolving Credit Facility as of June 30, 2018 and December 31, 2017. There were no outstanding foreign currency borrowings as of June 30, 2018 and December 31, 2017 under the Credit Facility.

During the three months ended June 30, 2018 and 2017, the Company recognized \$24.5 million and \$23.4 million, respectively, of interest expense relating to the Term Loan, which included \$1.2 million and \$1.2 million, respectively, relating to non-cash interest expense relating to the debt discount and \$0.7 million and \$0.8 million, respectively, relating to amortization of debt issuance costs. During the six months ended June 30, 2018 and 2017, the Company recognized \$48.2 million and \$34.6 million, respectively, of interest expense relating to the Term Loan, which included \$2.3 million and \$1.8 million, respectively, relating to non-cash interest expense relating to the debt discount and \$1.5 million and \$1.2 million, respectively, relating to amortization of debt issuance costs.

The fair value of the outstanding borrowings on the Term Loan is determined by utilizing over-the-counter market quotes, which are considered Level 2 inputs as described in Note 12, Fair Value Measurements. As of June 30, 2018 and December 31, 2017, the carrying amount of the Term Loan was \$1,145.3 million and \$1,190.2 million, respectively, and the fair value was approximately \$1,189.2 million and \$1,226.1 million, respectively.

Convertible Senior Notes due 2019

During February 2014, the Company initially issued \$1 billion aggregate principal amount of convertible senior notes, or the 2019 Convertible Notes, in a private offering to qualified institutional buyers, pursuant to Rule 144A under the Securities Act of 1933, as amended. The Company granted an option to the initial purchasers to purchase up to an additional \$150 million aggregate principal amount of 2019 Convertible Notes which was subsequently exercised in full during February 2014, resulting in a total issuance of \$1.15 billion aggregate principal amount of 2019 Convertible Notes. The 2019 Convertible Notes are senior unsecured obligations which rank effectively subordinate to any of the Company's existing and future secured indebtedness, including amounts outstanding under the Credit Facility, to the extent of the value of the assets securing such indebtedness. The 2019 Convertible Notes pay interest at a rate of 2.00% per annum payable semiannually in arrears on February 15 and August 15 of each year, beginning on August 15, 2014. The 2019 Convertible Notes mature on August 15, 2019, unless earlier repurchased or converted. The Company may not redeem the 2019 Convertible Notes prior to their stated maturity date. Holders of the 2019 Convertible Notes may convert their notes at their option under the following circumstances: (i) during any calendar quarter commencing after the calendar quarter ending March 31, 2014, if the last reported sale price of the Company's common shares for at least 20 trading days (whether or not consecutive) in a period of 30 consecutive trading days ending on, and including, the last trading day of the immediately preceding calendar quarter exceeds 130% of the conversion price for the 2019 Convertible Notes on each applicable trading day; (ii) during the five business-day period immediately after any five consecutive trading day period, or the measurement period, in which the trading price per \$1,000 principal amount of 2019 Convertible Notes for each trading day of that measurement period was less than 98% of the product of the last reported sale price of the Company's common shares and the conversion rate for the 2019 Convertible Notes for each such day; or (iii) upon the occurrence of specified corporate

events. On and after May 15, 2019, holders may convert their 2019 Convertible Notes at any time, regardless of the foregoing circumstances. Upon conversion, the 2019 Convertible Notes will be settled in cash and, if applicable, the Company's common shares, based on the applicable conversion rate at such time. The 2019 Convertible Notes had an initial conversion rate of 23.1816 common shares per \$1,000 principal amount of the 2019 Convertible Notes, or an initial conversion price of approximately \$43.14 per common share, based on the retroactive adjustment due to the Company's two-for-one stock split described in Note 2, Significant Accounting Policies. The conversion rate is subject to adjustment upon the occurrence of certain events and was 23.2245 common shares per \$1,000 principal amount of the 2019 Convertible Notes, or a conversion price of approximately \$43.06 per common share, as of June 30, 2018.

The Company incurred approximately \$26.6 million of issuance costs during the first quarter of 2014 relating to the issuance of the 2019 Convertible Notes. Of the \$26.6 million issuance costs incurred, \$21.5 million and \$5.1 million were recorded as debt issuance costs and additional paid-in capital, respectively, in proportion to the allocation of the proceeds of the 2019 Convertible Notes. The \$21.5 million of debt issuance costs recorded on the Company's condensed consolidated balance sheet is being amortized over the contractual term of the 2019 Convertible Notes using the effective-interest method.

During February 2014, the \$1.15 billion aggregate principal amount of the 2019 Convertible Notes were initially allocated between long-term debt, or liability component, and additional paid-in capital, or equity component, within the Company's condensed consolidated balance sheet at \$930.9 million and \$219.1 million, respectively. The liability component was measured using the nonconvertible debt interest rate. The carrying amount of the equity component representing the conversion option was determined by deducting the fair value of the liability component from the face value of the 2019 Convertible Notes as a whole. Since the Company must still settle these 2019 Convertible Notes at face value at or prior to maturity, this liability component will be accreted up to its face value resulting in additional non-cash interest expense being recognized within the Company's condensed consolidated statements of income while the 2019 Convertible Notes remain outstanding. The effective-interest rate on the 2019 Convertible Notes is approximately 6.2% per annum. The equity component is not remeasured as long as it continues to meet the conditions for equity classification.

During March 2018, the Company issued \$550 million aggregate principal amount of new convertible senior notes due 2024, or 2024 Convertible Notes as described below, and subsequently used the proceeds, along with cash on hand, to repurchase \$475.0 million of its existing 2019 Convertible Notes from a limited number of holders in privately negotiated transactions for an aggregate purchase price of \$583.5 million, which included \$1.0 million of accrued interest. For accounting purposes, pursuant to ASC 470, Debt, these transactions were accounted for as an extinguishment of 2019 Convertible Notes and an issuance of new 2024 Convertible Notes. The Company allocated the purchase price between the fair value of the liability component and the equity component of the 2019 Convertible Notes at \$459.4 million and \$123.0 million, respectively. As a result, the Company recognized \$446.4 million as a reduction to long-term debt representing the carrying value of the liability component and \$123.0 million as a reduction to additional paid-in capital representing the equity component of the repurchased 2019 Convertible Notes. The \$13.1 million difference between the fair value and carrying value of the liability component of the repurchased 2019 Convertible Notes was recognized as a loss on extinguishment of debt as a result of the transaction and is recorded in other expense, net within the Company's condensed consolidated statement of income. The accounting impact of the new 2024 Convertible Notes is described in further detail below.

As of June 30, 2018, the remaining outstanding principal on the 2019 Convertible Notes was \$675.0 million, the unamortized debt discount and debt issuance costs were \$33.0 million, and the carrying amount of the liability component was \$642.0 million, which was recorded to current portion of long-term debt within the Company's condensed consolidated balance sheet, as holders may convert their 2019 Convertible Notes at any time on and after May 15, 2019 as described above within this Note. As of December 31, 2017, the outstanding principal on the 2019 Convertible Notes was \$1.15 billion, the unamortized debt discount and debt issuance costs were \$80.0 million, and the carrying amount of the liability component was \$1,070.0 million, which was recorded to long-term debt within the Company's condensed consolidated balance sheet. The fair value of the liability component relating to the 2019 Convertible Notes was approximately \$637.7 million and \$1,066.0 million as of June 30, 2018 and December 31, 2017, respectively.

During the three months ended June 30, 2018 and 2017, the Company recognized \$10.4 million and \$17.0 million, respectively, of interest expense relating to the 2019 Convertible Notes, which included \$6.4 million and \$10.2 million, respectively, relating to non-cash interest expense relating to the debt discount and \$0.6 million and \$1.0 million, respectively, relating to amortization of debt issuance costs. During the six months ended June 30, 2018 and 2017, the Company recognized \$27.4 million and \$33.7 million, respectively, of interest expense relating to the 2019 Convertible Notes, which included \$16.8 million and \$20.2 million, respectively, relating to non-cash interest expense relating to the debt discount and \$1.6 million and \$2.0 million, respectively, relating to amortization of debt issuance costs.

In conjunction with the issuance of the 2019 Convertible Notes, during February 2014, the Company paid approximately \$685.8 million to enter into prepaid forward share repurchase transactions, or the Forward

Transactions, with certain financial institutions, and paid approximately \$123.8 million to enter into capped call transactions with respect to its common shares, or the Capped Call Transactions, with certain financial institutions. Subsequently, in conjunction with the repurchase of a portion of the 2019 Convertible Notes, during March 2018, the Company entered into agreements with the option counterparties to the Capped Call Transactions to terminate a portion of such existing transactions. See Note 10, Shareholders' Deficit, for additional discussion on the Forward Transactions and Capped Call Transactions entered into in conjunction with the issuance of these 2019 Convertible Notes.

Convertible Senior Notes due 2024

During March 2018, the Company issued \$550 million aggregate principal amount of convertible senior notes, or the 2024 Convertible Notes, in a private offering to qualified institutional buyers, pursuant to Rule 144A under the Securities Act of 1933, as amended. The 2024 Convertible Notes are senior unsecured obligations which rank effectively subordinate to any of the Company's existing and future secured indebtedness, including amounts outstanding under the Credit Facility, to the extent of the value of the assets securing such indebtedness. The 2024 Convertible Notes pay interest at a rate of 2.625% per annum payable semiannually in arrears on March 15 and September 15 of each year, beginning on September 15, 2018. The 2024 Convertible Notes mature on March 15, 2024, unless redeemed, repurchased or converted in accordance with their terms prior to such date. Holders of the 2024 Convertible Notes may convert their notes at their option under the following circumstances: (i) during any calendar quarter commencing after the calendar quarter ending June 30, 2018, if the last reported sale price of the Company's common shares for at least 20 trading days (whether or not consecutive) in a period of 30 consecutive trading days ending on, and including, the last trading day of the immediately preceding calendar quarter exceeds 130% of the conversion price for the 2024 Convertible Notes on each applicable trading day; (ii) during the five business-day period immediately after any five consecutive trading day period, or the measurement period, in which the trading price per \$1,000 principal amount of 2024 Convertible Notes for each trading day of that measurement period was less than 98% of the product of the last reported sale price of the Company's common shares and the conversion rate for the 2024 Convertible Notes for each such day; (iii) if the Company calls the 2024 Convertible Notes for redemption; or (iv) upon the occurrence of specified corporate events. On and after December 15, 2023, holders may convert their 2024 Convertible Notes at any time, regardless of the foregoing circumstances. Upon conversion, the 2024 Convertible Notes will be settled, at the Company's election, in cash, the Company's common shares, or a combination thereof, based on the applicable conversion rate at such time. The 2024 Convertible Notes had an initial conversion rate of 16.0056 common shares per \$1,000 principal amount of the 2024 Convertible Notes, or an initial conversion price of approximately \$62.48 per common share, based on the retroactive adjustment due to the Company's two-for-one stock split described in Note 2, Significant Accounting Policies. The conversion rate is subject to adjustment upon the occurrence of certain events and was 16.0352 common shares per \$1,000 principal amount of the 2024 Convertible Notes, or a conversion price of approximately \$62.36 per common share, as of June 30, 2018.

The Company incurred approximately \$12.9 million of issuance costs during the first quarter of 2018 relating to the issuance of the 2024 Convertible Notes. Of the \$12.9 million issuance costs incurred, \$9.6 million and \$3.3 million were recorded as debt issuance costs and additional paid-in capital, respectively, in proportion to the allocation of the proceeds of the 2024 Convertible Notes. The \$9.6 million of debt issuance costs, which was recorded as an additional debt discount on the Company's consolidated balance sheet, is being amortized over the contractual term of the 2024 Convertible Notes using the effective interest method.

During March 2018, the \$550 million aggregate principal amount of the 2024 Convertible Notes were initially allocated between long-term debt, or liability component, and additional paid-in-capital, or equity component, within the Company's consolidated balance sheet at \$410.1 million and \$139.9 million, respectively. The liability component was measured using the nonconvertible debt interest rate. The carrying amount of the equity component representing the conversion option was determined by deducting the fair value of the liability component from the face value of the 2024 Convertible Notes as a whole. Since the Company must still settle these 2024 Convertible Notes at face value at or prior to maturity, this liability component will be accreted up to its face value resulting in additional non-cash interest expense being recognized within the Company's consolidated statements of income while the 2024 Convertible Notes remain outstanding. The effective interest rate on the 2024 Convertible Notes is approximately 8.4% per annum. The equity component is not remeasured as long as it continues to meet the conditions for equity classification.

As of June 30, 2018, the outstanding principal on the 2024 Convertible Notes was \$550.0 million, the unamortized debt discount and debt issuance costs were \$144.2 million, and the carrying amount of the liability component was \$405.8 million, which was recorded to long-term debt within the Company's condensed consolidated balance sheet. The fair value of the liability component relating to the 2024 Convertible Notes was approximately \$423.2 million as of June 30, 2018.

During the three months ended June 30, 2018, the Company recognized \$8.5 million of interest expense relating to the 2024 Convertible Notes, which included \$4.5 million relating to non-cash interest expense relating to the debt discount and \$0.3 million relating to amortization of debt issuance costs. During the six months ended June 30, 2018, the Company recognized \$9.3 million of interest expense relating to the 2024 Convertible Notes, which included \$5.0 million relating to non-cash interest expense relating to the debt discount and \$0.3 million relating to amortization of debt issuance costs.

Valuation of 2019 Convertible Notes and 2024 Convertible Notes – Level 2 and Level 3 Inputs

In order to determine the initial value of the 2019 Convertible Notes and the 2024 Convertible Notes, the Company determined the fair value of the liability component of the 2019 Convertible Notes and the 2024 Convertible Notes using two valuation methods. The Company reviewed market data that was available for publicly traded, senior, unsecured nonconvertible corporate bonds issued by companies with similar credit ratings. Assumptions used in the estimate represent what market participants would use in pricing the liability component, including market yields and credit standing to develop the straight debt yield estimate. The Company also used a lattice model, which included inputs such as stock price, the Convertible Note trading price, volatility and dividend yield to estimate the straight debt yield. The Company combined the results of the two valuation methods to determine the fair value of the liability component of the 2019 Convertible Notes and the 2024 Convertible Notes. Most of these inputs are primarily considered Level 2 and Level 3 inputs. The Company used similar valuation approaches to determine the subsequent fair value of the liability component only for disclosure purposes.

Total Debt

The Company's total interest expense was \$49.1 million and \$41.9 million for the three months ended June 30, 2018 and 2017, respectively, and \$93.7 million and \$74.4 million for the six months ended June 30, 2018 and 2017, respectively, which was recognized within its condensed consolidated statements of income.

As of June 30, 2018, annual scheduled principal payments of debt were as follows:

	Principal Payments (in millions)
2018	\$ 53.4
2019	775.0
2020	97.9
2021	97.5
2022	97.5
Thereafter	1,289.4
Total	\$ 2,410.7

Certain vendors and government agencies may require letters of credit or similar guaranteeing arrangements to be issued or executed. As of June 30, 2018, the Company had \$37.5 million of issued but undrawn letters of credit or similar arrangements, which included the Mexico Value Added Tax, or VAT, related surety bonds described in Note 5, Contingencies.

5. Contingencies

The Company is from time to time engaged in routine litigation. The Company regularly reviews all pending litigation matters in which it is involved and establishes reserves deemed appropriate by management for these litigation matters when a probable loss estimate can be made.

The matters described in this Note may take several years to resolve. While the Company believes it has meritorious defenses, it cannot be sure of their ultimate resolution. Although the Company may reserve amounts for certain matters that the Company believes represent the most likely outcome of the resolution of these related disputes, if the Company is incorrect in its assessment, the Company may have to record additional expenses, when it becomes probable that an increased potential liability is warranted.

Tax Matters

On May 7, 2010, the Company received an assessment from the Mexican Tax Administration Service in an amount equivalent to approximately \$57.6 million, translated at the June 30, 2018 spot rate, for various items, the majority of which was VAT allegedly owed on certain of the Company's products imported into Mexico during the years 2005 and 2006. This assessment is subject to interest and inflationary adjustments. On July 8, 2010, the Company initiated a formal administrative appeal process. On May 13, 2011, the Mexican Tax Administration Service issued a resolution on the Company's administrative appeal. The resolution nullified the assessment. Since the Mexican Tax Administration Service can further review the tax audit findings and re-issue some or all of the original assessment, the Company commenced litigation in the Tax Court of Mexico in August 2011 to dispute the assertions made by the Mexican Tax Administration Service in the case. The Company received notification on February 6, 2015 that the Tax Court of Mexico nullified substantially all of the assessment. On March 18, 2015, the Mexican Tax Administration Service filed an appeal against the verdict with the Circuit Court. On August 27, 2015, the Circuit Court remanded the case back to the Tax Court of Mexico to reconsider a portion of the procedural decision that was adverse to the Mexican Tax Administration Service. The Company received notification on March 18, 2016 that the Tax Court of Mexico nullified a portion of the assessment and upheld a portion of the original assessment. On August 25, 2016, the Company filed a further appeal of this decision to the Circuit Court. On April 6, 2017, the Circuit Court issued a verdict with the Company prevailing on some lesser issues and the Tax Administration Service prevailing on the core issue. On May 11, 2017, the Company filed a further appeal to the Supreme Court of Mexico. On June 14, 2017, the Supreme Court of Mexico agreed to hear the appeal. The Company believes that it has meritorious defenses if the assessment is reissued. The Company has not recognized a loss as the Company does not believe a loss is probable.

The Mexican Tax Administration Service commenced audits of the Company's Mexican subsidiaries for the period from January to September 2007 and on May 10, 2013, the Company received an assessment of approximately \$14.7 million, translated at the June 30, 2018 spot rate, related to that period. This assessment is subject to interest and inflationary adjustments. On July 11, 2013, the Company filed an administrative appeal disputing the assessment. On September 22, 2014, the Mexican Tax Administration Service denied the Company's administrative appeal. The Company commenced litigation in the Tax Court of Mexico in November 2014 to dispute the assertions made by the Mexican Tax Administration Service in the case. On January 16, 2018, the Tax Court of Mexico issued a verdict upholding the assessment issued by the Mexican Tax Administration Service. On April 16, 2018, the Company filed an appeal of this verdict, and litigation is ongoing. The Company has not recognized a loss as the Company does not believe a loss is probable. The Company issued a surety bond in the amount of \$17.4 million, translated at the June 30, 2018 spot rate, through an insurance company to guarantee payment of the tax assessment as required while the Company pursues an appeal of the assessment, and the surety bond remained effective as of June 30, 2018.

The Mexican Tax Administration Service has delayed processing VAT refunds for companies operating in Mexico and the Company believes that the process for its Mexico subsidiary to receive VAT refunds may be delayed. As of June 30, 2018, the Company had \$34.7 million of Mexico VAT related assets, of which \$26.1 million was within non-current other assets and \$8.6 million was within prepaid expenses and other current assets on its consolidated balance sheet. This amount relates to VAT payments made over various periods and the Company believes these amounts are recoverable by refund or they may be applied against certain future tax liabilities. The Company has not recognized any losses related to these VAT related assets as the Company does not believe a loss is probable.

On March 26, 2015, the Office of the President of Mexico issued a decree relating to the application of VAT to nutritional supplements. The Company continues to believe its application of the VAT law in Mexico is correct. As of June 30, 2018, the Company has not recognized any losses as the Company, based on its current analysis and guidance from its advisors, does not believe a loss is probable. The Company continues to evaluate and monitor its situation as it develops, including whether it will make any changes to its operations in Mexico.

With respect to these Mexican matters, the Company is currently unable to reasonably estimate a possible loss or range of loss that could result from an unfavorable outcome if an assessment was re-issued or any additional assessments were to be issued for these or other periods. The Company believes that it has meritorious defenses if an assessment is re-issued or would have meritorious defenses if any additional assessment is issued.

The Company received a tax assessment in September 2009 from the Federal Revenue Office of Brazil in an amount equivalent to approximately \$1.8 million, translated at the June 30, 2018 spot rate, related to withholding/contributions based on payments to the Company's Members during 2004. On December 28, 2010, the Company appealed this tax assessment to the Administrative Council of Tax Appeals (2nd level administrative appeal). The Company believes it has meritorious defenses and it has not recognized a loss as the Company does not believe a loss is probable. On March 6, 2014, the Company was notified of a similar audit of the 2011 year. In January 2016, the Company received a tax assessment for an amount equivalent to approximately \$4.6 million, translated at the June 30, 2018 spot rate, related to contributions based on payments to the Company's Members during 2011. The Company filed a first level administrative appeal against most of the assessment on February 23, 2016, which was subsequently denied. On March 13, 2017, the Company appealed this tax assessment to the Administrative Council of Tax Appeals (2nd level administrative appeal). The Company has not accrued a loss for the majority of the assessment because the Company does not believe a loss is probable. The Company is currently unable to reasonably estimate the amount of the loss that may result from an unfavorable outcome if additional assessments for other periods were to be issued.

The Company's Brazilian subsidiary pays ICMS-ST taxes on its product purchases, similar to VAT. As of June 30, 2018, the Company had \$8.4 million of Brazil ICMS-ST, of which \$2.2 million was within non-current other assets and \$6.2 million was within prepaid expenses and other current assets on its condensed consolidated balance sheet. The Company believes it will be able to utilize or recover these ICMS-ST credits in the future.

The Company is under examination in several Brazilian states related to ICMS and ICMS-ST taxation. Some of these examinations have resulted in assessments for underpaid tax that the Company has appealed. The State of Sao Paulo has audited the Company for the 2013 and 2014 tax years. During July 2016, for the State of Sao Paulo, the Company received an assessment in the aggregate amount of approximately \$41.6 million, translated at the June 30, 2018 spot rate, relating to various ICMS issues for its 2013 tax year. In August 2016, the Company filed a first level administrative appeal which was denied in February 2017. The Company filed a further appeal on March 9, 2017. On March 20, 2018, the Court held a hearing and a verdict is currently pending. During August 2017, for the state of Sao Paulo, the Company received an assessment in the aggregate amount of approximately \$15.4 million, translated at the June 30, 2018 spot rate, relating to various ICMS issues for its 2014 tax year. In September 2017, the Company filed a first level administrative appeal for the 2014 tax year. The Company has not recognized a loss as the Company does not believe a loss is probable. The Company has also received other ICMS tax assessments in Brazil. During the fourth quarter of 2015, the Company filed appeals with state judicial courts against three of the assessments. The Company had issued surety bonds in the aggregate amount of \$11.3 million, translated at the June 30, 2018 spot rate, to guarantee payment of some of the tax assessments as required while the Company pursues the appeals. In addition, the Company has received several ICMS tax assessments in the aggregate amount of \$6.6 million, translated at the June 30, 2018 spot rate, from several other Brazilian states where surety bonds have not been issued. Litigation in all these cases is currently ongoing. The Company has not recognized a loss as the Company does not believe a loss is probable.

The Company has received various tax assessments in multiple states in India for multiple years from the Indian VAT authorities in an amount equivalent to approximately \$9.2 million, translated at the June 30, 2018 spot rate. These assessments are for underpaid VAT. The Company is litigating these cases at the tax administrative level and the tax tribunal levels as it believes it has meritorious defenses. The Company has not recognized a loss as it does not believe a loss is probable.

The Korea Customs Service audited the importation activities of Herbalife Korea for the period January 2011 through May 2013. The total assessment for the audit period is \$31.8 million, translated at the June 30, 2018 spot rate. The Company has paid the assessment and has recognized these payments within other assets on its condensed consolidated balance sheet. The Company lodged a first level administrative appeal, which was denied on October 21,

2016. On January 31, 2017, the Company filed a further appeal to the National Tax Tribunal of Korea. The Company disagrees with the assertions made in the assessments, as well as the calculation methodology used in the assessments. The Company has not recognized a loss as the Company does not believe a loss is probable.

During the course of 2016, the Company received various questions from the Greek Social Security Agency and on December 29, 2016, the Greek Social Security Agency issued an assessment of approximately \$2.3 million, translated at the June 30, 2018 spot rate, with respect to Social Security Contributions on Member earnings for the 2006 year. For Social Security issues, the statute of limitations is open for 2007 and later years in Greece. The Company could receive similar assessments covering other years. The Company disputes the allegations that were raised in the assessment and filed an administrative appeal against the assessment with the Greek Social Security Agency. On November 14, 2017, the Administrative Review Committee of the Greek Social Security Agency notified the Company that it had remanded the case back to the Social Security Agency auditors with an instruction to reconsider the case since the majority of the assessment seemed to be unfounded. The administrative appeals committee published a mixed verdict in the case on June 5, 2018 whereby the Company won some issues and lost other issues. The Company intends to timely file an appeal to Civil Court. The Company has not recognized a loss as it does not believe a loss is probable.

The Italian tax authorities are currently auditing the Company covering the periods 2014 and 2015. The Company has responded to the various points relating to income tax and non-income tax matters initially raised by the tax authorities to date. The Italian tax authorities are discussing certain of its preliminary findings with the Company and the audit is ongoing. It is possible that the Company could receive a final assessment from the Italian tax authorities after these discussions and the audit are completed. The Company believes that it has adequately accrued for income tax matters that are known to date. In regards to non-income tax matters, the Company has not recognized a loss as it does not believe a loss is probable. The Company believes that it has meritorious defenses if a formal assessment is issued by the Italian tax authorities. The Company is currently unable to reasonably estimate the amount of loss that may result from an unfavorable outcome if a formal assessment is issued by the Italian tax authorities.

During March 2018, the Chinese Customs Service began an audit of the Company's Chinese importations covering the periods 2015 through 2017. The Company has responded to the initial questions from the Customs Service and the audit is ongoing. The Company is currently unable to reasonably estimate the amount of loss if an assessment is issued.

U.S. Federal Trade Commission Consent Order

On July 15, 2016, the Company and the Federal Trade Commission, or the FTC, entered into a proposed Stipulation to Entry of Order for Permanent Injunction and Monetary Judgment, or the Consent Order. The Consent Order was lodged with the U.S. District Court for the Central District of California on July 15, 2016 and became effective on July 25, 2016, or the Effective Date. The Consent Order resolved the FTC's multi-year investigation of the Company.

Pursuant to the Consent Order, under which the Company neither admitted nor denied the FTC's allegations (except as to the Court having jurisdiction over the matter), the Company made, through its wholly-owned subsidiary Herbalife International of America, Inc., a \$200 million payment to the FTC. Additionally, the Company agreed to implement certain new procedures and enhance certain existing procedures in the U.S., most of which the Company had 10 months from the Effective Date to implement. Among other requirements, the Consent Order requires the Company to categorize all existing and future Members in the U.S. as either "preferred members" – who are simply consumers who only wish to purchase products for their own household use, or "distributors" – who are Members who wish to resell some products or build a sales organization. The Company also agreed to compensate distributors on eligible U.S. sales within their downline organization, which include purchases by preferred members, purchases by a distributor for his or her personal consumption within allowable limits and sales of product by a distributor to his or her customers. The Consent Order also imposes restrictions on a distributor's ability to open Nutrition Clubs in the United States. The Consent Order subjects the Company to certain audits by an independent compliance auditor for a period of seven years; imposes requirements on the Company regarding compliance certification and record creation and maintenance; and prohibits the Company, its affiliates and its distributors from making misrepresentations and misleading claims regarding, among other things, income and lavish lifestyles. The FTC and the independent compliance auditor have the right to inspect Company records and request additional compliance reports for purposes of conducting audits pursuant to the Consent Order. In September 2016, the Company and the FTC mutually selected Affiliated Monitors, Inc. to serve as the independent compliance auditor. The Company continues to monitor the impact of the Consent Order and, while the Company currently does not expect the settlement to have a long-term and materially adverse impact on its business and its Member base, the Company's business and its Member base, particularly in the United States, may be negatively impacted as the Company and the Member base adjust to the changes. If the Company is unable to comply with the Consent Order then this could result in a material and adverse impact to the Company's results of operations and financial condition.

Other Matters

As a marketer of foods, dietary and nutritional supplements, and other products that are ingested by consumers or applied to their bodies, the Company has been and is currently subjected to various product liability claims. The effects of these claims to date have not been material to the Company. The Company currently maintains product liability insurance with an annual deductible of \$12.5 million.

As previously disclosed, the SEC and the Department of Justice have been conducting an investigation into the Company's anti-corruption compliance in China, which has mainly focused on entertainment and gift expenditures by the Company's local China external affairs department. The government has requested and is continuing to request documents and other information relating to these matters. The Company is conducting its own review and has taken remedial and improvement measures based upon this review, including replacement of a number of employees in China and enhancements of Company policies and procedures in China. The Company is continuing to cooperate with the government and cannot predict the eventual scope, duration, or outcome of the government investigation at this time.

A short seller has made allegations regarding the Company and its network marketing program. The Company believes these allegations are without merit and has vigorously defended itself against such claims, including proactively reaching out to governmental authorities about what the Company believes is manipulative activity with respect to its securities. Because of these allegations, the Company and others have received and may receive additional regulatory and governmental inquiries. For example, the Company has previously disclosed inquiries from the FTC, SEC and other governmental authorities. The SEC has also requested from the Company documents and other information relating to the Company's disclosures regarding its marketing plan in China and the Company cannot predict the eventual scope, duration, or outcome of this investigation at this time. In the future, governmental authorities may determine to seek information from the Company and other persons relating to these same or other allegations. If the Company believes any governmental or regulatory inquiry or investigation is or becomes material it will be disclosed individually. Consistent with its policies, the Company has cooperated and will continue to fully cooperate with any governmental or regulatory inquiries or investigations.

On September 18, 2017, the Company and certain of its subsidiaries and Members were named as defendants in a purported class action lawsuit, titled *Rodgers, et al. v Herbalife Ltd., et al.* and filed in the U.S. District Court for the Southern District of Florida, which alleges violations of Florida's Deceptive and Unfair Trade Practices statute and federal Racketeer Influenced and Corrupt Organizations statutes, unjust enrichment, and negligent misrepresentation. The plaintiffs seek damages in an unspecified amount. The Company believes the lawsuit is without merit and will vigorously defend itself against the claims in the lawsuit.

In September 2017, one of the Company's warehouses located in Mexico sustained flooding which damaged certain inventory stored within the warehouse. The Company maintains insurance coverage with third-party carriers on the affected property. As of June 30, 2018, the Company has recorded a loss relating to the damaged inventory and has recognized a combined equal and offsetting receivable and cash relating to the insurance recoveries. This event did not have a material negative impact on the Company's Mexico operations or its condensed consolidated financial statements.

6. Segment Information

The Company is a nutrition company that sells a wide range of weight management, targeted nutrition, energy, sports & fitness, and outer nutrition products. The Company's products are manufactured by the Company in its Changsha, Hunan, China extraction facility; Suzhou, China facility; Nanjing, China facility; Lake Forest, California facility; and Winston-Salem, North Carolina facility, as well as by third-party providers, and then are sold to Members who consume and sell Herbalife products to retail consumers or other Members. Revenues reflect sales of products by the Company to its Members and are categorized based on geographic location.

As of June 30, 2018, the Company sold products in 94 countries throughout the world and was organized and managed by six geographic regions: North America, Mexico, South & Central America, EMEA, Asia Pacific, and China. The Company defines its operating segments as those geographical operations. The Company aggregates its operating segments, excluding China, into a reporting segment, or the Primary Reporting Segment, as management believes that the Company's operating segments have similar operating characteristics and similar long term operating performance. In making this determination, management believes that the operating segments are similar in the nature of the products sold, the product acquisition process, the types of customers to whom products are sold, the methods used to distribute the products, the nature of the regulatory environment, and their economic characteristics. China has been identified as a separate reporting segment as it does not meet the criteria for aggregation. The Company reviews its net sales and contribution margin by operating segment, and reviews its assets and capital expenditures on a consolidated basis and not by operating segment. Therefore, net sales and contribution margin are presented by

reportable segment and assets and capital expenditures by segment are not presented.

22

The operating information for the two reportable segments is as follows:

	Three Months Ended		Six Months Ended	
	June 30, 2018	June 30, 2017	June 30, 2018	June 30, 2017
	(in millions)			
Net sales:				
Primary Reporting Segment	\$998.7	\$904.2	\$1,963.4	\$1,790.8
China	286.8	242.7	499.0	458.2
Total net sales	\$1,285.5	\$1,146.9	\$2,462.4	\$2,249.0
Contribution margin(1):				
Primary Reporting Segment	\$440.7	\$393.2	\$855.0	\$779.8
China(2)	259.6	216.0	445.0	411.8
Total contribution margin	\$700.3	\$609.2	\$1,300.0	\$1,191.6
Selling, general, and administrative expenses(2)	510.2	443.2	970.3	881.8
Other operating income	(1.7)	(38.9)	(17.9)	(38.9)
Interest expense, net	44.3	37.9	84.2	68.1
Other expense, net	4.7	—	29.1	—
Income before income taxes	142.8	167.0	234.3	280.6
Income taxes	48.4	29.4	57.8	57.8
Net income	\$94.4	\$137.6	\$176.5	\$222.8

(1) Contribution margin consists of net sales less cost of sales and Royalty overrides. For the China segment, contribution margin does not include service fees to China independent service providers.

(2) Service fees to China independent service providers totaling \$151.7 million and \$104.5 million for the three months ended June 30, 2018 and 2017, respectively, and \$262.6 million and \$216.1 million for the six months ended June 30, 2018 and 2017, respectively, are included in selling, general, and administrative expenses.

The following table sets forth net sales by geographic area:

	Three Months Ended		Six Months Ended	
	June 30, 2018	June 30, 2017	June 30, 2018	June 30, 2017
	(in millions)			
Net sales:				
United States	\$256.4	\$213.1	\$481.9	\$437.8
China	286.8	242.7	499.0	458.2
Mexico	118.2	115.6	232.2	220.4
Others	624.1	575.5	1,249.3	1,132.6

Total net sales \$1,285.5 \$1,146.9 \$2,462.4 \$2,249.0

7. Share-Based Compensation

The Company has share-based compensation plans, which are more fully described in Note 9, Share-Based Compensation, to the Consolidated Financial Statements included in the 2017 10-K. During the six months ended June 30, 2018, the Company granted restricted stock units subject to service conditions and service and performance conditions.

Share-based compensation expense amounted to \$10.4 million and \$11.4 million for the three months ended June 30, 2018 and 2017, respectively, and \$20.2 million and \$22.7 million for the six months ended June 30, 2018 and 2017, respectively. As of June 30, 2018, the total unrecognized compensation cost related to all non-vested stock awards was \$73.9 million and the related weighted-average period over which it is expected to be recognized is approximately 1.4 years.

The following tables summarize the activity under all share-based compensation plans for the six months ended June 30, 2018:

	Number of Awards (in thousands)	Weighted-Average Exercise Price Per Award	Weighted-Average Remaining Contractual Term	Aggregate Intrinsic Value(1) (in millions)
Outstanding as of December 31, 2017(2)(3)	19,193	\$ 23.36	6.2 years	\$ 212.0
Granted	—	\$ —		
Exercised(4)	(6,814)	\$ 20.54		
Forfeited(5)	(236)	\$ 28.52		
Outstanding as of June 30, 2018(2)(3)	12,143	\$ 24.84	5.9 years	\$ 350.7
Exercisable as of June 30, 2018(6)	8,737	\$ 22.94	5.0 years	\$ 268.9

- (1) The intrinsic value is the amount by which the current market value of the underlying stock exceeds the exercise price of the stock awards.
- (2) Includes less than 0.1 million and 0.2 million market condition SARs as of June 30, 2018 and December 31, 2017, respectively.
- (3) Includes 4.5 million and 6.2 million performance condition SARs as of June 30, 2018 and December 31, 2017, respectively, which represent the maximum amount that can vest.
- (4) Includes 0.2 million market condition and 1.7 million performance condition SARs.
- (5) Includes 0.1 million performance condition SARs.
- (6) Includes less than 0.1 million market condition and 3.2 million performance condition SARs.

There were no SARs granted during the three and six months ended June 30, 2018. The weighted-average grant date fair value of SARs granted during the three and six months ended June 30, 2017 was \$17.38 and \$14.17, respectively. The total intrinsic value of SARs exercised during the three months ended June 30, 2018 and 2017 was \$64.8 million and \$80.2 million, respectively. The total intrinsic value of SARs exercised during the six months ended June 30, 2018 and 2017 was \$187.0 million and \$97.0 million, respectively.

The following table summarizes the activities for stock units for the six months ended June 30, 2018:

	Number of Shares (in thousands)	Weighted-Average Grant Date Fair Value Per Share
Outstanding and nonvested as of December 31, 2017(1)	326	\$ 34.34
Granted(2)	1,366	\$ 43.57
Vested	(42)	\$ 35.75
Forfeited	(25)	\$ 43.15
Outstanding and nonvested as of June 30, 2018(1)	1,625	\$ 41.93

- (1) Includes 708,836 and 268,776 performance-based stock unit awards as of June 30, 2018 and December 31, 2017, respectively, which represents the maximum amount that can vest.
- (2) Includes 440,060 performance-based stock unit awards, which represents the maximum amount that can vest.

The total vesting date fair value of stock units which vested during the three months ended June 30, 2018 and 2017 was \$2.1 million and \$1.4 million, respectively. The total vesting date fair value of stock units which vested during the six months ended June 30, 2018 and 2017 was \$2.1 million and \$1.4 million, respectively.

8. Income Taxes

Income taxes were \$48.4 million and \$29.4 million for the three months ended June 30, 2018 and 2017, respectively, and \$57.8 million for both the six months ended June 30, 2018 and 2017. The effective income tax rate was 33.9% and 17.6% for the three months ended June 30, 2018 and 2017, respectively, and 24.7% and 20.6% for the six months ended June 30, 2018 and 2017, respectively. The increase in the effective tax rate for the three months ended June 30, 2018, as compared to the same period in 2017, was due to U.S. Tax Reform, which impacts the Company's ability to benefit from certain foreign tax credits, the impact of changes in the geographic mix of the Company's income, and a decrease in net benefits from discrete events. Included in the discrete events for the three months ended June 30, 2018 and 2017 was the impact of \$10.9 million and \$21.4 million, respectively, of excess tax benefits on share-based compensation arrangements. The increase in the effective tax rate for the six months ended June 30, 2018, as compared to the same period in 2017, was primarily due to U.S. Tax Reform, which impacts the Company's ability to benefit from certain foreign tax credits, and the impact of changes in the geographic mix of the Company's income, partially offset by an increase in net benefits from discrete events. Included in the discrete events for the six months ended June 30, 2018 and 2017 was the impact of \$30.2 million and \$25.7 million, respectively, of excess tax benefits on share-based compensation arrangements.

As of June 30, 2018, the total amount of unrecognized tax benefits, including related interest and penalties, was \$65.0 million. If the total amount of unrecognized tax benefits was recognized, \$46.8 million of unrecognized tax benefits, \$9.6 million of interest, and \$1.6 million of penalties would impact the effective tax rate.

The Company believes that it is reasonably possible that the amount of unrecognized tax benefits could decrease by up to approximately \$8.6 million within the next twelve months. Of this possible decrease, \$0.4 million would be due to the settlement of audits or resolution of administrative or judicial proceedings. The remaining possible decrease of \$8.2 million would be due to the expiration of statute of limitations in various jurisdictions. For a description on contingency matters relating to income taxes, see Note 5, Contingencies.

As described in Note 12, Income Taxes, to the Consolidated Financial Statements included in the 2017 10-K, on December 22, 2017, the U.S. enacted the Tax Cuts and Jobs Act, or the Act. The Act, which is also commonly referred to as "U.S. Tax Reform," significantly changes U.S. corporate income tax laws by, among other things, reducing the U.S. corporate income tax rate to 21% starting in 2018 and creating a modified territorial tax system with a one-time mandatory tax on previously deferred foreign earnings of U.S. subsidiaries. As a result of the Act, the Company recorded a provisional net expense during the fourth quarter of 2017 which was reflected in its prior year financial statements. There have not been any adjustments to these provisional amounts during the six months ended June 30, 2018. The Company continues to analyze other information and regulatory guidance, and accordingly the Company may record additional provisional amounts or adjustments to provisional amounts in future periods. Pursuant to the SEC's Staff Accounting Bulletin No. 118, Income Tax Accounting Implications of the Tax Cuts and Jobs Act, any adjustments to these provisional amounts will be reported as a component of tax expense in the reporting period in which any such adjustments are determined, which will be no later than the fourth quarter of 2018.

9. Derivative Instruments and Hedging Activities

Foreign Currency Instruments

The Company designates certain foreign currency derivatives, primarily comprised of foreign currency forward contracts, as freestanding derivatives for which hedge accounting does not apply. The changes in the fair market value of these freestanding derivatives are included in selling, general, and administrative expenses in the Company's

condensed consolidated statements of income. The Company uses freestanding foreign currency derivatives to hedge foreign currency-denominated intercompany transactions and to partially mitigate the impact of foreign currency fluctuations. The fair value of the freestanding foreign currency derivatives is based on third-party quotes. The Company's foreign currency derivative contracts are generally executed on a monthly basis.

The Company designates as cash-flow hedges those foreign currency forward contracts it enters into to hedge forecasted inventory purchases and intercompany management fees that are subject to foreign currency exposures. Forward contracts are used to hedge forecasted inventory purchases over specific months. Changes in the fair value of these forward contracts, excluding forward points, designated as cash-flow hedges are recorded as a component of accumulated other comprehensive loss within shareholders' deficit, and are recognized in cost of sales in the condensed consolidated statement of income during the period which approximates the time the hedged inventory is sold. The Company also hedges forecasted intercompany management fees over specific months. These contracts allow the Company to sell Euros in exchange for U.S. dollars at specified contract rates. Changes in the fair value of these forward contracts designated as cash flow hedges are recorded as a component of accumulated other comprehensive loss within shareholders' deficit, and are recognized in selling, general, and administrative expenses in the condensed consolidated statement of income during the period when the hedged item and underlying transaction affect earnings.

As of June 30, 2018 and December 31, 2017, the aggregate notional amounts of all foreign currency contracts outstanding designated as cash flow hedges were approximately \$78.2 million and \$104.9 million, respectively. As of June 30, 2018, these outstanding contracts were expected to mature over the next fifteen months. The Company's derivative financial instruments are recorded on the condensed consolidated balance sheets at fair value based on third-party quotes. As of June 30, 2018, the Company recorded assets at fair value of \$1.5 million and liabilities at fair value of \$1.0 million relating to all outstanding foreign currency contracts designated as cash-flow hedges. As of December 31, 2017, the Company recorded assets at fair value of \$2.9 million and liabilities at fair value of \$4.0 million relating to all outstanding foreign currency contracts designated as cash-flow hedges. The Company assesses hedge effectiveness and measures hedge ineffectiveness at least quarterly. During the three and six months ended June 30, 2018 and 2017, the ineffective portion relating to these hedges was immaterial and the hedges remained effective as of June 30, 2018 and December 31, 2017.

As of June 30, 2018 and December 31, 2017, the majority of the Company's outstanding foreign currency forward contracts had maturity dates of less than twelve months with the majority of freestanding derivatives expiring within one month as of June 30, 2018 and December 31, 2017. As of June 30, 2018, the Company had aggregate notional amounts of approximately \$291.8 million of foreign currency contracts, inclusive of freestanding contracts and contracts designated as cash flow hedges.

The following tables summarize the derivative activity during the three and six months ended June 30, 2018 and 2017 relating to all the Company's derivatives.

Gains and Losses on Derivative Instruments

The following table summarizes gains (losses) relating to derivative instruments recorded in other comprehensive (loss) income during the three and six months ended June 30, 2018 and 2017:

	Amount of Gain (Loss) Recognized in Other Comprehensive (Loss) Income			
	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
	(in millions)			
Derivatives designated as hedging instruments:				
Foreign exchange currency contracts relating to inventory				
and intercompany management fee hedges	\$4.5	\$ (4.4)	\$0.5	\$ (10.5)

As of June 30, 2018, the estimated amount of existing net gains related to cash flow hedges recorded in accumulated other comprehensive loss that are expected to be reclassified into earnings over the next twelve months was \$2.7 million.

The following table summarizes gains (losses) relating to derivative instruments recorded to income during the three and six months ended June 30, 2018 and 2017:

	Amount of (Loss) Gain Recognized in Income				Location of (Loss) Gain Recognized in Income
	Three Months Ended June 30		Six Months Ended June 30		
	2018	2017	2018	2017	
	(in millions)				
Derivatives designated as hedging					
instruments:					
Foreign exchange currency contracts					
relating to inventory and					
intercompany management fee					
hedges(1)	\$ (0.2)	\$ 1.7	\$ (2.2)	\$ 1.2	Selling, general, and administrative expenses
Derivatives not designated as					
hedging					
instruments:					
Foreign exchange currency contracts	\$ 1.1	\$ (5.2)	\$ (1.6)	\$ (6.5)	Selling, general, and administrative expenses

(1) For foreign exchange contracts designated as hedging instruments, the amounts recognized in income primarily represent the amounts excluded from the assessment of hedge effectiveness. There were no material ineffective amounts reported for derivatives designated as hedging instruments.

The following table summarizes gains (losses) relating to derivative instruments reclassified from accumulated other comprehensive loss into income during the three and six months ended June 30, 2018 and 2017:

	Amount of Gain (Loss) Reclassified from Accumulated Other Comprehensive Loss to Income				Location of Gain (Loss) Reclassified from Accumulated Other Comprehensive Loss to Income (Effective Portion)
	Three Months Ended June 30,		Six Months Ended June 30,		
	2018	2017	2018	2017	
Derivatives designated as hedging instruments:					
Foreign exchange currency contracts					
relating to inventory hedges	\$1.5	\$ 0.7	\$2.0	\$ 1.6	Cost of sales
Foreign exchange currency contracts					
relating to intercompany management					
fee hedges	\$(1.6)	\$ 0.4	\$(4.0)	\$ 0.9	Selling, general, and administrative expenses

The Company reports its derivatives at fair value as either assets or liabilities within its condensed consolidated balance sheets. See Note 12, Fair Value Measurements, for information on derivative fair values and their condensed consolidated balance sheets location as of June 30, 2018 and December 31, 2017.

10. Shareholders' Deficit

Changes in shareholders' deficit for the six months ended June 30, 2018 were as follows:

Total
shareholders'
deficit

Edgar Filing: HERBALIFE NUTRITION LTD. - Form 10-Q

	(in millions)
Balance as of December 31, 2017	\$ (334.7)

Increase in additional paid-in capital due to partial unwind	
of Capped Call Transactions	55.9
Balance as of June 30, 2018	\$ (779.4)

Dividends

The declaration of future dividends is subject to the discretion of the Company's board of directors and will depend upon various factors, including its earnings, financial condition, Herbalife Nutrition Ltd.'s available distributable reserves under Cayman Islands law, restrictions imposed by the Credit Facility and the terms of any other indebtedness that may be outstanding, cash requirements, future prospects and other factors deemed relevant by its board of directors.

Share Repurchases

On February 21, 2017, the Company's board of directors authorized a new three-year \$1.5 billion share repurchase program that will expire on February 21, 2020, which replaced the Company's prior share repurchase authorization that was set to expire on June 30, 2017 and had approximately \$233 million of remaining authorized capacity as of December 31, 2016. This share repurchase program allows the Company, which includes an indirect wholly-owned subsidiary of Herbalife Nutrition Ltd., to repurchase the Company's common shares at such times and prices as determined by management, as market conditions warrant, and to the extent Herbalife Nutrition Ltd.'s distributable reserves are available under Cayman Islands law. The Credit Facility permits the Company to repurchase its common shares as long as no default or event of default exists and other conditions, such as specified consolidated leverage ratios, are met.

In conjunction with the issuance of the 2019 Convertible Notes during February 2014, the Company paid approximately \$685.8 million to enter into Forward Transactions with certain financial institutions, or the Forward Counterparties, pursuant to which the Company purchased approximately 19.9 million common shares, at an average cost of \$34.51 per share, for settlement on or around the August 15, 2019 maturity date for the 2019 Convertible Notes, subject to the ability of each Forward Counterparty to elect to settle all or a portion of its Forward Transactions early. The Forward Transactions were generally expected to facilitate privately negotiated derivative transactions between the Forward Counterparties and holders of the 2019 Convertible Notes, including swaps, relating to the common shares by which holders of the 2019 Convertible Notes establish short positions relating to the common shares and otherwise hedge their investments in the 2019 Convertible Notes concurrently with, or shortly after, the pricing of the 2019 Convertible Notes. The approximate 19.9 million common shares effectively repurchased through the Forward Transactions are treated as retired shares for basic and diluted EPS purposes. During the three months ended June 30, 2018, the Forward Counterparties delivered approximately 8.4 million shares to the Company, which were subsequently retired by the Company, and as a result, the Company expensed \$3.1 million of unamortized non-cash issuance costs relating to these shares, which is included in the non-cash interest expense amounts disclosed below. As of June 30, 2018, approximately 11.5 million shares still remained legally outstanding.

As a result of the Forward Transactions, the Company's total shareholders' equity within its condensed consolidated balance sheet was reduced by approximately \$685.8 million during the first quarter of 2014, with amounts of \$653.9 million and \$31.9 million being allocated between accumulated deficit and additional paid-in capital, respectively, within total shareholders' equity. Also, upon executing the Forward Transactions, the Company recorded, at fair value, \$35.8 million in non-cash issuance costs to other assets and a corresponding amount to additional paid-in capital within its condensed consolidated balance sheet. These non-cash issuance costs will be amortized to interest expense over the contractual term of the Forward Transactions. The Company recognized \$4.7 million and \$1.6 million for the three months ended June 30, 2018 and 2017, respectively, and \$6.3 million and \$3.2 million for the six months ended June 30, 2018 and 2017, respectively, of non-cash interest expense within its condensed consolidated statements of income relating to amortization of these non-cash issuance costs.

During the three months ended March 31, 2018, an indirect wholly-owned subsidiary of the Company purchased 8,400 of Herbalife Nutrition Ltd.'s common shares through open market purchases at an aggregate cost of approximately \$0.3 million, or an average cost of \$33.90 per share. The Company's indirect wholly-owned subsidiary did not purchase any of Herbalife Nutrition Ltd.'s common shares in the open market during the three months ended June 30, 2018. During the three months ended March 31, 2017, an indirect wholly-owned subsidiary of the Company purchased approximately 2.2 million of Herbalife Nutrition Ltd.'s common shares through open market purchases at an aggregate cost of approximately \$60.7 million, or an average cost of \$28.05 per share. During the three months ended June 30, 2017, an indirect wholly-owned subsidiary of the Company purchased approximately 5.3 million of Herbalife Nutrition Ltd.'s common shares through open market purchases at an aggregate cost of approximately \$179.8 million, or an average cost of \$33.53 per share. These share repurchases increased the Company's total shareholders' deficit and

are reflected at cost within the Company's accompanying condensed consolidated balance sheets. Although these shares are owned by an indirect wholly-owned subsidiary of the Company and remain legally outstanding, they are reflected as treasury shares under U.S. GAAP and therefore reduce the number of common shares outstanding within the Company's condensed consolidated financial statements and the weighted-average number of common shares outstanding used in calculating earnings per share. The common shares of Herbalife Nutrition Ltd. held by the indirect wholly-owned subsidiary, however, remain outstanding on the books and records of the Company's transfer agent and therefore still carry voting and other share rights related to ownership of the Company's common shares, which may be exercised. So long as it is consistent with applicable laws, such shares will be voted by such subsidiary in the same manner, and to the maximum extent possible in the same proportion, as all other votes cast with respect to any matter properly submitted to a vote of Herbalife Nutrition Ltd.'s shareholders. As of both June 30, 2018 and December 31, 2017, the Company held approximately 10.0 million of treasury shares for U.S. GAAP purposes. In May 2018, the Company completed its modified Dutch auction tender offer and then subsequently paid cash to repurchase and retire a total of approximately 11.4 million of its common shares at an aggregate cost of approximately \$600.0 million, or \$52.50 per share. As of June 30, 2018, the remaining authorized capacity under the Company's \$1.5 billion share repurchase program was \$113.3 million.

In connection with the Company's October 2017 modified Dutch auction tender offer, the Company incurred \$1.6 million in transaction costs and also provided a non-transferable contractual contingent value right, or CVR, for each share tendered, allowing participants in the tender offer to receive a contingent cash payment in the event Herbalife is acquired in a going-private transaction (as defined in the CVR Agreement) within two years of the commencement of the tender offer. The initial fair value of the CVR was \$7.3 million, which was recorded as a liability in the fourth quarter with a corresponding decrease to shareholders' equity. In determining the initial fair value of the CVR, the Company used a lattice model, which included inputs such as the underlying stock price, strike price, time to expiration, and dividend yield. Subsequent changes in the fair value of the CVR liability, using a similar valuation approach as the initial fair value determination, are recognized within the Company's condensed consolidated balance sheets with corresponding gains or losses being recognized in non-operating expense (income) within the Company's condensed consolidated statements of income during each reporting period until the CVR expires in August 2019 or is terminated due to a going-private transaction, which is also incorporated in the valuation of the CVR; this going-private probability input is considered to be a Level 3 input in the fair value hierarchy. Any subsequent increase or decrease in this input or other inputs described above in subsequent valuations could significantly impact the fair value of the CVR. The Company recognized a \$4.7 million and \$16.0 million loss in other expense, net within its condensed consolidated statement of income during the three and six months ended June 30, 2018, respectively, due to the change in the fair value of the CVR, which was primarily driven by the increase in the market price of the Company's common shares. As of June 30, 2018 and December 31, 2017, the fair value of the CVR was \$22.9 million and \$6.9 million, respectively.

During the three and six months ended June 30, 2018 and 2017, the Company also withheld shares on its vested restricted stock units and exercised SARs relating to its share-based compensation plans, which are treated as share repurchases in the Company's condensed consolidated financial statements as discussed further below.

The Company reflects the aggregate purchase price of its common shares repurchased as an increase to shareholders' deficit. The Company allocated the purchase price of the repurchased shares to accumulated deficit, common shares, and additional paid-in capital, with the exception of treasury shares, which are recorded separately on the Company's condensed consolidated balance sheets.

The number of shares issued upon vesting or exercise for certain restricted stock units and SARs granted pursuant to the Company's share-based compensation plans is net of the statutory withholding requirements that the Company pays on behalf of its employees. Although shares withheld are not issued, they are treated as common share repurchases in the Company's condensed consolidated financial statements, as they reduce the number of shares that would have been issued upon vesting. These shares do not count against the authorized capacity under the Company's share repurchase program described above.

For the six months ended June 30, 2018 and 2017, the Company's share repurchases, inclusive of transaction costs, were \$600.7 million and \$240.5 million, respectively, under the Company's share repurchase programs, and \$80.7 million and \$45.7 million, respectively, due to shares withheld for tax purposes related to the Company's share-based compensation plans. For the six months ended June 30, 2018 and 2017, the Company's total share repurchases, including shares withheld for tax purposes, were \$681.4 million and \$286.2 million, respectively, and have been recorded as an increase to shareholders' deficit within the Company's condensed consolidated balance sheets. The Company recorded \$685.6 million of total share repurchases within financing activities on its condensed consolidated statement of cash flows for the six months ended June 30, 2018, which includes \$4.2 million of share repurchases that were reflected as an increase to shareholders' deficit within the Company's condensed consolidated balance sheet as of December 31, 2017 but were subsequently paid during the six months ended June 30, 2018. The Company recorded \$273.6 million of total share repurchases within financing activities on its condensed consolidated statement of cash flows for the six months ended June 30, 2017, which excludes \$12.6 million of share repurchases for which payment was made subsequent to the period end and was therefore reflected as a liability within the

Company's condensed consolidated balance sheet as of June 30, 2017.

Capped Call Transactions

In February 2014, in connection with the issuance of the 2019 Convertible Notes, the Company paid approximately \$123.8 million to enter into Capped Call Transactions with certain financial institutions. The Capped Call Transactions are expected generally to reduce the potential dilution upon conversion of the 2019 Convertible Notes in the event that the market price of the common shares is greater than the strike price of the Capped Call Transactions, initially set at \$43.14 per common share based on the retroactive adjustment due to the Company's two-for-one stock split described in Note 2, Significant Accounting Policies, with such reduction of potential dilution subject to a cap based on the cap price initially set at \$60.39 per common share based on the retroactive adjustment due to the Company's two-for-one stock split described in Note 2, Significant Accounting Policies. The strike price and cap price are subject to certain adjustments under the terms of the Capped Call Transactions. Therefore, as a result of executing the Capped Call Transactions, the Company in effect will only be exposed to potential net dilution once the market price of its common shares exceeds the adjusted cap price. As of June 30, 2018, the weighted-average adjusted cap price was approximately \$54.44 per common share. As a result of the Capped Call Transactions, the Company's additional paid-in capital within shareholders' equity on its condensed consolidated balance sheet was reduced by \$123.8 million during the first quarter of 2014.

During March 2018, in connection with the Company's repurchase of a portion of the 2019 Convertible Notes, the Company entered into partial settlement agreements with the option counterparties to the Capped Call Transactions to terminate a portion of such existing transactions, in each case, in a notional amount corresponding to the aggregate principal amount of 2019 Convertible Notes that were repurchased. As a result of terminating a portion of the Capped Call Transactions, which were in a favorable position, the Company received \$55.9 million in cash and recognized an offsetting increase to additional paid-in capital as of June 30, 2018.

Accumulated Other Comprehensive Loss

The following table summarizes changes in accumulated other comprehensive loss by component during the three months ended June 30, 2018 and 2017:

	Changes in Accumulated Other Comprehensive Loss by Component					
	Three Months Ended June 30, 2018			June 30, 2017		
	Foreign Currency Translation Adjustments	Unrealized Gain (Loss) on Derivatives	Total	Foreign Currency Translation Adjustments	Unrealized Gain (Loss) on Derivatives	Total
	(in millions)					
Beginning balance	\$ (149.4)	\$ 2.1	\$ (147.3)	\$ (192.5)	\$ 2.9	\$ (189.6)

Total other comprehensive (loss) income, net of reclassifications	(50.8)	4.5	(46.3)	6.7	(5.5)	1.2
Ending balance	\$ (200.2)	\$ 6.6	\$ (193.6)	\$ (185.8)	\$ (2.6)	\$ (188.4)

(1) See Note 9, Derivative Instruments and Hedging Activities, for information regarding the location in the condensed consolidated statements of income of gains (losses) reclassified from accumulated other comprehensive loss into income during the three months ended June 30, 2018 and 2017.

Other comprehensive income (loss) before reclassifications was net of tax benefit of \$3.1 million for foreign currency translation adjustments for the three months ended June 30, 2018.

Other comprehensive income (loss) before reclassifications was net of tax expense of \$2.7 million for foreign currency translation adjustments for the three months ended June 30, 2017.

The following table summarizes changes in accumulated other comprehensive loss by component during the six months ended June 30, 2018 and 2017:

	Changes in Accumulated Other Comprehensive Loss by Component					
	Six Months Ended June 30, 2018			June 30, 2017		
	Foreign Currency Translation Adjustments	Unrealized Gain (Loss) Derivatives	Total	Foreign Currency Translation Adjustments	Unrealized Gain (Loss) Derivatives	Total
(in millions)						
Beginning balance	\$(170.6)	\$ 5.2	\$(165.4)	\$(215.5)	\$ 10.4	\$(205.1)
Other comprehensive (loss) income						
before reclassifications, net of tax	(29.6)	0.5	(29.1)	29.7	(10.5)	19.2

Total other comprehensive (loss) income, net of reclassifications	(29.6)	1.4	(28.2)	29.7	(13.0)	16.7
Ending balance	\$(200.2)	\$ 6.6	\$(193.6)	\$(185.8)	\$ (2.6)	\$(188.4)

(1) See Note 9, Derivative Instruments and Hedging Activities, for information regarding the location in the condensed consolidated statements of income of gains (losses) reclassified from accumulated other comprehensive loss into income during the six months ended June 30, 2018 and 2017.

Other comprehensive income (loss) before reclassifications was net of tax benefit of \$2.0 million for foreign currency translation adjustments for the six months ended June 30, 2018.

Other comprehensive income (loss) before reclassifications was net of tax expense of \$5.3 million for foreign currency translation adjustments for the six months ended June 30, 2017.

11. Earnings Per Share

Basic earnings per share represents net income divided by the weighted-average number of common shares outstanding for the period. Diluted earnings per share represents net income divided by the weighted-average number of common shares outstanding, inclusive of the effect of dilutive securities, such as outstanding SARs, stock units, and convertible notes.

The following are the common share amounts used to compute the basic and diluted earnings per share for each period:

	Three Months Ended June 30, June 30,		Six Months Ended June 30, June 30,	
	2018	2017	2018	2017
	(in millions)			
Weighted-average shares used in basic computations	142.3	162.9	144.0	164.6
Dilutive effect of exercise of equity grants outstanding	6.8	7.7	7.1	7.5
Dilutive effect of 2019 Convertible Notes	2.8	—	1.9	—
Weighted-average shares used in diluted computations	151.9	170.6	153.0	172.1

There were an aggregate of 1.7 million and 6.6 million of equity grants, consisting of SARs and stock units, that were outstanding during the three months ended June 30, 2018 and 2017, respectively, and an aggregate of 2.1 million and 7.2 million of equity grants, consisting of SARs and stock units, that were outstanding during the six months ended June 30, 2018 and 2017, respectively, but were not included in the computation of diluted earnings per share because their effect would be anti-dilutive or the performance condition for the award had not been satisfied.

Since the Company will settle the principal amount of its 2019 Convertible Notes in cash and settle the conversion feature for the amount above the conversion price in common shares, or the conversion spread, the Company uses the treasury stock method for calculating any potential dilutive effect of the conversion spread on diluted earnings per share, if applicable. The conversion spread will have a dilutive impact on diluted earnings per share when the average market price of the Company's common shares for a given period exceeds the conversion price of the 2019 Convertible Notes. The dilutive impact for the three and six months ended June 30, 2018 is disclosed in the table above. For the three and six months ended June 30, 2017, the 2019 Convertible Notes have been excluded from the computation of diluted earnings per share, as the effect would be anti-dilutive since the conversion price of the 2019 Convertible Notes exceeded the average market price of the Company's common shares for the three and six months ended June 30, 2017. The initial conversion rate and conversion price for the 2019 Convertible Notes are described further in Note 4, Long-Term Debt.

For the 2024 Convertible Notes, the Company has the intent and ability to settle the principal amount in cash and intends to settle the conversion feature for the amount above the conversion price, or the conversion spread, in common shares. The Company uses the treasury stock method for calculating any potential dilutive effect of the conversion spread on diluted earnings per share, if applicable. The conversion spread will have a dilutive impact on diluted earnings per share when the average market price of the Company's common shares for a given period exceeds the conversion price of the 2024 Convertible Notes. For the three and six months ended June 30, 2018, the 2024 Convertible Notes have been excluded from the computation of diluted earnings per share, as the effect would be anti-dilutive since the conversion price of the 2024 Convertible Notes exceeded the average market price of the Company's common shares for the three and six months ended June 30, 2018. The initial conversion rate and conversion price for the 2024 Convertible Notes are described further in Note 4, Long-Term Debt.

The Capped Call Transactions are excluded from the calculation of diluted earnings per share because their impact is always anti-dilutive. Additionally, the Forward Transactions are treated as retired shares for basic and diluted EPS purposes. See Note 10, Shareholders' Deficit, for additional discussion regarding the Capped Call Transactions and Forward Transactions.

See Note 10, Shareholders' Deficit, for a discussion of how common shares repurchased by the Company's indirect wholly-owned subsidiary are treated under U.S. GAAP.

12. Fair Value Measurements

The Company applies the provisions of FASB ASC Topic 820, Fair Value Measurements and Disclosures, or ASC 820, for its financial and non-financial assets and liabilities. ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 establishes a fair value hierarchy, which prioritizes the inputs used in measuring fair value into three broad levels as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 inputs are unobservable inputs for the asset or liability.

32

The Company measures certain assets and liabilities at fair value as discussed throughout the notes to its condensed consolidated financial statements. Foreign exchange currency contracts are valued using standard calculations and models primarily based on inputs such as observable forward rates, spot rates and foreign currency exchange rates at the reporting period ended date. The Company's derivative assets and liabilities are measured at fair value and consisted of Level 2 inputs and their amounts are shown below at their gross values as of June 30, 2018 and December 31, 2017:

Balance Sheet Location	Significant Other Observable Inputs (Level 2) Fair Value as of		Significant Other Observable Inputs (Level 2) Fair Value as of	
	June 30,	December 31,	2018	2017
	(in millions)			
ASSETS:				
Derivatives designated as hedging				
instruments:				
Foreign exchange currency contracts relating				
to inventory and intercompany				
management fee hedges	Prepaid expenses and other current assets	\$ 1.5	\$	2.9
Derivatives not designated as hedging				
instruments:				
Foreign exchange currency contracts	Prepaid expenses and other current assets	4.2		2.9
		\$ 5.7	\$	5.8
LIABILITIES:				
Derivatives designated as hedging				
instruments:				
Foreign exchange currency contracts relating				
to inventory and intercompany				
management fee hedges	Other current liabilities	\$ 1.0	\$	4.0
Derivatives not designated as hedging				
instruments:				
Foreign exchange currency contracts	Other current liabilities	2.0		2.6
		\$ 3.0	\$	6.6

The Company's CVR liability is measured at fair value and consisted of Level 3 inputs. See Note 10, Shareholders' Deficit, for a further description of the CVR liability. The following is a reconciliation of the CVR liability reported in Other non-current liabilities within the Company's condensed consolidated balance sheet as of June 30, 2018:

	Contingent Value Right (in millions)
Fair value as of December 31, 2017	\$ 6.9
Net unrealized loss(1)	16.0
Fair value as of June 30, 2018	\$ 22.9

(1) Unrealized gains and losses related to the revaluation of the CVR are recorded in Other expense, net within the Company's condensed consolidated statements of income.

The Company considers all highly liquid investments purchased with a maturity of three months or less to be cash equivalents. Cash and cash equivalents are comprised of money market funds and foreign and domestic bank accounts. These cash and cash equivalents are valued based on Level 1 inputs which consist of quoted prices in active markets. To reduce its credit risk, the Company monitors the credit standing of the financial institutions that hold the Company's cash and cash equivalents.

The Company's deferred compensation plan assets consist of Company owned life insurance policies. As these policies are recorded at their cash surrender value, they are not required to be included in the fair value table above. See Note 6, Employee Compensation Plans, to the Consolidated Financial Statements included in the 2017 10-K for a further description of the Company's deferred compensation plan assets.

The following tables summarize the offsetting of the fair values of the Company's derivative assets and derivative liabilities for presentation in the Company's condensed consolidated balance sheets as of June 30, 2018 and December 31, 2017:

	Offsetting of Derivative Assets		
	Gross Amounts of Recognized Assets	Offset in the Balance Sheet	Net Amounts of Assets Presented in the Balance Sheet
	(in millions)		
June 30, 2018			
Foreign exchange currency contracts	\$5.7	\$ (2.5)	\$ 3.2
Total	\$5.7	\$ (2.5)	\$ 3.2
December 31, 2017			
Foreign exchange currency contracts	\$5.8	\$ (4.3)	\$ 1.5
Total	\$5.8	\$ (4.3)	\$ 1.5

	Offsetting of Derivative Liabilities		
	Gross Amounts of Recognized Liabilities	Offset in the Balance Sheet	Net Amounts of Liabilities Presented in the Balance Sheet
	(in millions)		
June 30, 2018			
Foreign exchange currency contracts	\$3.0	\$ (2.5)	\$ 0.5
Total	\$3.0	\$ (2.5)	\$ 0.5
December 31, 2017			
Foreign exchange currency contracts	\$6.6	\$ (4.3)	\$ 2.3
Total	\$6.6	\$ (4.3)	\$ 2.3

The Company offsets all of its derivative assets and derivative liabilities in its condensed consolidated balance sheet to the extent it maintains master netting arrangements with related financial institutions. As of June 30, 2018 and December 31, 2017, all of the Company's derivatives were subject to master netting arrangements and no collateralization was required for the Company's derivative assets and derivative liabilities.

13. Detail of Certain Balance Sheet Accounts

Other Assets

The Other assets on the Company's accompanying condensed consolidated balance sheets includes deferred compensation plan assets of \$33.8 million and \$33.6 million and deferred tax assets of \$74.4 million and \$77.5 million as of June 30, 2018 and December 31, 2017, respectively.

Other Current Liabilities

Other current liabilities consist of the following:

	June 30, December 31,	
	2018	2017
	(in millions)	
Accrued compensation	\$103.3	\$ 117.3
Accrued service fees to China independent service providers	66.3	58.7
Accrued advertising, events, and promotion expenses	45.7	46.3
Advance sales deposits	90.9	65.2
Income taxes payable	29.2	25.7
Other accrued liabilities	150.9	145.7
Total	\$486.3	\$ 458.9

Other Non-Current Liabilities

The Other non-current liabilities on the Company's accompanying condensed consolidated balance sheets includes deferred compensation plan liabilities of \$55.3 million and \$58.1 million and deferred income tax liabilities of \$7.3 million and \$7.8 million as of June 30, 2018 and December 31, 2017, respectively. See Note 6, Employee Compensation Plans, to the Consolidated Financial Statements included in the 2017 10-K for a further description of the Company's deferred compensation plan assets and liabilities.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our condensed consolidated financial statements and related notes included in Part I, Item 1 — Financial Information, of this Quarterly Report on Form 10-Q and our consolidated financial statements appearing in our Annual Report on Form 10-K for the year ended December 31, 2017, or the 2017 10-K. Unless the context otherwise requires, all references herein to the “Company,” “we,” “us” or “our,” or similar terms, refer to Herbalife Nutrition Ltd., a Cayman Islands exempt limited liability company, and its consolidated subsidiaries.

Overview

We are a global nutrition company that sells weight management, targeted nutrition, energy, sports & fitness, and outer nutrition products to and through independent members, or Members. In China, we sell our products to and through independent service providers, sales representatives, and sales officers to customers and preferred customers, as well as through Company-operated retail stores when necessary. We refer to Members that distribute our products and achieve certain qualification requirements as “sales leaders.”

In certain geographic markets, we have introduced segmentation of our Member base into two categories: “preferred members” – who are simply consumers who wish to purchase product for their own household use, and “distributors” – who are Members who also wish to resell products or build a sales organization. Any existing Members in these markets who do not convert to preferred member will be categorized as distributors and may convert at a later date; future new Members will join as either a preferred member or a distributor. Future increases in the number of preferred members, as conversions take place or as we introduce segmentation into other markets, does not in and of itself represent an increase in the total number of Members, nor is it necessarily indicative of our future expected financial performance.

As of December 31, 2017, we had approximately 4.0 million Members, including 0.6 million preferred members and 0.5 million distributors in the markets where we have provided these two categories and 0.3 million sales representatives, sales officers and independent service providers in China.

We pursue our purpose to make the world healthier and happier by providing high quality, science-based products to Members and their customers who seek a healthy lifestyle and we also offer a business opportunity to those Members who seek additional income. We believe the global obesity epidemic has made our products more relevant and the effectiveness of our distribution network has been the primary reason for our recent success.

Our products are grouped in four principal categories: weight management; targeted nutrition; energy, sports & fitness; and outer nutrition, along with literature and promotional items. Our products are often sold through a series of related products and literature designed to simplify weight management and nutrition for consumers and maximize our Members' cross-selling opportunities.

Industry-wide factors that affect us and our competitors include the global obesity epidemic, the aging of the worldwide population and rising public health care costs, which are driving demand for weight management, nutrition and wellness-related products along with the global increase in under employment and unemployment which can affect the recruitment and retention of Members seeking additional income opportunities.

While we continue to monitor the current global financial environment, we remain focused on the opportunities and challenges in retailing of our products, sponsoring and retaining Members, improving Member productivity, further penetrating existing markets, globalizing successful Distributor Methods of Operation, or DMOs, such as Nutrition Clubs and Weight Loss Challenges, introducing new products and globalizing existing products, developing niche market segments and further investing in our infrastructure.

We sell our products in six geographic regions:

- ◆ North America;
- ◆ Mexico;
- ◆ South and Central America;
- ◆ EMEA, which consists of Europe, the Middle East, and Africa;
- ◆ Asia Pacific (excluding China); and
- ◆ China.

On July 15, 2016, we reached a settlement with the FTC and entered into the Consent Order, which resolved the FTC's multi-year investigation of the Company. We are monitoring the impact of the Consent Order and our Board of Directors has established the Implementation Oversight Committee in connection with the Consent Order. The committee has met and will meet regularly with management to oversee our compliance with the terms of the Consent Order. While we currently do not expect the settlement to have a long-term and materially adverse impact on our business and our Member base, our business and our Member base, particularly in the U.S., may be negatively impacted as we and they continue to adjust to the changes. The terms of the Consent Order do not change our going to market through direct selling by independent distributors, and compensating those distributors based upon the product they and their sales organization sell. See Item 1A — Risk Factors of this Quarterly Report on Form 10-Q for a discussion of risks related to the settlement with the FTC.

Volume Points by Geographic Region

A key non-financial measure we focus on is Volume Points on a Royalty Basis, or Volume Points, which is essentially our weighted-average measure of product sales volume. Volume Points, which are unaffected by exchange rates or price changes, are used by management as a proxy for sales trends because in general, excluding the impact of price changes, an increase in Volume Points in a particular geographic region or country indicates an increase in our local currency net sales while a decrease in Volume Points in a particular geographic region or country indicates a decrease in our local currency net sales. The criteria we use to determine how and when we recognize Volume Points are not identical to our revenue recognition policies under U.S. GAAP. Unlike net sales, which are generally recognized when the product is delivered and when control passes to the Member, as discussed in greater detail in Note 2, Significant Accounting Policies, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q, we recognize Volume Points when a Member pays for the order, which is generally prior to the product being delivered. Further, the periods in which Volume Points are tracked can vary slightly from the fiscal periods for which we report our results under U.S. GAAP. Therefore, there can be timing differences between the product orders for which net sales are recognized and for which Volume Points are recognized within a given period. However, historically these timing differences generally have been immaterial in the context of using changes in Volume Points as a proxy to explain volume-driven changes in net sales. We are evaluating our current approach to assigning and maintaining Volume Point values for certain products or markets. Any changes to this approach may have an impact on the use of Volume Points as a proxy for sales trends in future periods.

Currently, the specific number of Volume Points assigned to a product, and generally consistent across all markets, is based on a Volume Point to suggested retail price ratio for similar products. If a product is available in different quantities, the various sizes will have different Volume Point values. In general, once assigned, a Volume Point value is consistent in each region and country and does not change from year to year. For strategic reasons, certain Volume Point values were adjusted during 2018 for the Mexico and certain South & Central America markets. The reason Volume Points are used in the manner described above is that we use Volume Points for Member qualification and recognition purposes and therefore we generally keep Volume Points for a similar or like product consistent on a global basis. However, because Volume Points are a function of value rather than product type or size, they are not a reliable measure for product mix. As an example, an increase in Volume Points in a specific country or region could mean a significant increase in sales of less expensive products or a marginal increase in sales of more expensive

products.

37

	Three Months Ended			Six Months Ended		
	June 30, 2018	June 30, 2017	% Change	June 30, 2018	June 30, 2017	% Change
	(Volume Points in millions)					
North America	336.4	284.1	18.4 %	639.6	586.7	9.0 %
Mexico(1)	237.1	228.9	3.6 %	458.9	454.4	1.0 %
South & Central America(2)	136.3	137.5	(0.9) %	284.8	290.7	(2.0) %
EMEA	319.5	283.6	12.7 %	614.2	557.8	10.1 %
Asia Pacific	302.8	275.9	9.7 %	589.4	536.7	9.8 %
China	196.1	153.9	27.4 %	337.2	335.9	0.4 %
Worldwide(3)	1,528.2	1,363.9	12.0 %	2,924.1	2,762.2	5.9 %

(1) Excluding Volume Point adjustments made during 2018 for certain products, the percent change for the three and six months ended June 30, 2018 would have been an increase of 1.7% and a decrease of 0.8%, respectively.

(2) Excluding Volume Point adjustments made during 2018 for certain products in certain markets, the percent change for the three and six months ended June 30, 2018 would have been a decrease of 2.9% and 3.5%, respectively.

(3) Excluding the Volume Point adjustments made during 2018 for certain products in Mexico and certain South & Central America markets noted above, the percent change for the three and six months ended June 30, 2018 would have been an increase of 11.6% and 5.4%, respectively.

Volume Points increased 12.0% for the three months ended June 30, 2018 after having decreased 8.1% for the same period in 2017, and increased 5.9% for the six months ended June 30, 2018 after having decreased 3.5% for the same period in 2017. Excluding the impact of the adjustments made in the 2018 periods, Volume Points increased 11.6% and 5.4% for the three and six months ended June 30, 2018, respectively. We believe North America's increase for the quarter and year-to-date period, after decreases for 2017, reflects the successful adaptation to date of our Members to the Consent Order implementation actions, including new tools and methods for documenting sales. We believe Mexico's increase for the quarter, after a decrease for the prior year period, reflects the contribution of programs designed to increase the activity and productivity of sales leaders and promotions to encourage sponsorship and Member activity. The South & Central America region saw a continuing, though lesser, decline in Volume Points for 2018 as we believe markets in the region continue to transition to sustainable, customer-oriented business practices. The EMEA region saw increased Volume Point growth, a result, we believe, of customer-oriented efforts including Member training, brand awareness, and product line expansion. The Volume Point performance for the APAC region has been mixed by country, with positive net results for the quarter, after a decline for the prior year period, led by the India market. The significant Volume Point increase in China for the three months ended June 30, 2018 is primarily due to reduced sales for the prior year quarter as a result of Member response to a price increase announced in March 2017 that was effective April 1, 2017. This price increase announcement, our first for the market in six years, drove significant sales orders late in March 2017, including orders that were pulled forward from the second quarter of 2017, as Members made purchases ahead of the price change. Results are discussed further below in the applicable sections of Sales by Geographic Region.

Presentation

“Retail value” represents the suggested retail price of products we sell to our Members and is the gross sales amount reflected on our invoices. Retail value is a Non-GAAP measure which may not be comparable to similarly-titled measures used by other companies. This is not the price paid to us by our Members. Our Members purchase product from us at a discount from the suggested retail price. We refer to these discounts as “distributor allowance”, and we refer to retail value less distributor allowances as “product sales.”

Total distributor allowances were 39.5% and 40.1% of retail value for the three months ended June 30, 2018 and 2017, respectively, and 39.9% and 40.3% of retail value for the six months ended June 30, 2018 and 2017, respectively. Distributor allowances and Marketing Plan payouts generally utilize 90% to 95% of suggested retail price, depending on the product and market, to which we apply discounts of up to 50% for distributor allowances and payout rates of up to 15% for royalty overrides, up to 7% for production bonuses, and approximately 1% for the Mark Hughes bonus. Distributor allowances as a percentage of retail value may vary by country depending upon regulatory restrictions that limit or otherwise restrict distributor allowances. We also offer reduced distributor allowances with respect to certain products worldwide. Each Member's level of discount is determined by qualification based on volume of purchases. In cases where a Member has qualified for less than the maximum discount, the remaining discount, which we also refer to as a wholesale commission, is received by their sponsoring Members. Therefore, product sales are recognized net of product returns and distributor allowances.

“Net sales” equal product sales plus shipping and handling, and generally represents what we collect.

We do not have visibility into all of the sales from our Members to their customers, but such a figure would differ from our reported “retail value” by factors including (a) the amount of product purchased by our Members for their own personal consumption and (b) prices charged by our Members to their customers other than our suggested retail prices. We discuss retail value because of its fundamental role in our systems, internal controls and operations, and its correlation to Member discounts and Royalty overrides. In addition, retail value is a component of the financial reports we use to analyze our financial results because, among other things, it can provide additional detail and visibility into our net sales results on a Company-wide and a geographic region and product category basis. Therefore, this non-GAAP measure may be useful to investors because it provides investors with the same information used by management. As this measure is not in accordance with U.S. generally accepted accounting principles, or U.S. GAAP, retail value should not be considered in isolation from, nor as a substitute for, net sales and other consolidated income or cash flow statement data prepared in accordance with U.S. GAAP, or as a measure of profitability or liquidity. A reconciliation of retail value to net sales is presented below under Results of Operations.

Our international operations have provided and will continue to provide a significant portion of our total net sales. As a result, total net sales will continue to be affected by fluctuations in the U.S. dollar against foreign currencies. In order to provide a framework for assessing how our underlying businesses performed excluding the effect of foreign currency fluctuations, in addition to comparing the percent change in net sales from one period to another in U.S. dollars, we also compare the percent change in net sales from one period to another period using “net sales in local currency”. Net sales in local currency is not a U.S. GAAP financial measure. Net sales in local currency removes from net sales in U.S. dollars the impact of changes in exchange rates between the U.S. dollar and the local currencies of our foreign subsidiaries, by translating the current period net sales into U.S. dollars using the same foreign currency exchange rates that were used to translate the net sales for the previous comparable period. We believe presenting net sales in local currency is useful to investors because it allows a meaningful comparison of net sales of our foreign operations from period to period. However, net sales in local currency measures should not be considered in isolation or as an alternative to net sales in U.S. dollar measures that reflect current period exchange rates, or to other financial measures calculated and presented in accordance with U.S. GAAP.

Additionally, the impact of foreign currency fluctuations in Venezuela and the price increases we implement as a result of the highly inflationary economy in that market can each, when considered in isolation, have a disproportionately large impact to our consolidated results despite the offsetting nature of these drivers and that net sales in Venezuela, which represent less than 1% of our consolidated net sales, are not material to our consolidated results. Therefore, in certain instances, we believe it is helpful to provide additional information with respect to these factors as reported and excluding the impact of Venezuela to illustrate the disproportionate nature of Venezuela’s individual pricing and foreign exchange impact to our consolidated results. However, excluding the impact of Venezuela from these measures is not in accordance with U.S. GAAP and should not be considered in isolation or as an alternative to the presentation and discussion thereof calculated in accordance with U.S. GAAP.

Our “gross profit” consists of net sales less “cost of sales,” which represents our manufacturing costs, the price we pay to our raw material suppliers and manufacturers of our products as well as shipping and handling costs including duties, tariffs, and similar expenses.

While certain Members may profit from their activities by reselling our products for amounts greater than the prices they pay us, Members that develop, retain, and manage other Members may earn additional compensation for those activities, which we refer to as “Royalty overrides.” Royalty overrides are our most significant operating expense and consist of:

- royalty overrides and production bonuses;
- the Mark Hughes bonus payable to some of our most senior Members; and
- other discretionary incentive cash bonuses to qualifying Members.

Royalty overrides are compensation to Members for the development, retention and improved productivity of their sales organizations and are paid to several levels of Members on each sale. Royalty overrides are compensation for services rendered to us and, as such, are recorded as an operating expense.

In China, our independent service providers are compensated for marketing, sales support, and other services instead of the distributor allowances and royalty overrides utilized in our global marketing plan. Service fees to China independent service providers are included in selling, general, and administrative expenses.

Because of local country regulatory constraints, we may be required to modify our Member incentive plans as described above. We also pay reduced royalty overrides with respect to certain products worldwide. Consequently, the total Royalty override percentage may vary over time.

Our “contribution margins” consist of net sales less cost of sales and Royalty overrides.

“Selling, general, and administrative expenses” represent our operating expenses, which include labor and benefits, service fees to China service providers, sales events, professional fees, travel and entertainment, Member promotions, occupancy costs, communication costs, bank fees, depreciation and amortization, foreign exchange gains and losses, and other miscellaneous operating expenses.

Our “other operating income” consists of government grant income related to China.

Our “other expense, net” consists of non-operating income and expenses such as gains or losses on extinguishment of debt and gains or losses due to subsequent changes in the fair value of the non-transferable contractual contingent value right, or CVR, provided for each share tendered in the October 2017 modified Dutch auction tender offer. See Note 10, Shareholders’ Deficit, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q for further information on the CVR.

Most of our sales to Members outside the United States are made in the respective local currencies. In preparing our financial statements, we translate revenues into U.S. dollars using average exchange rates. Additionally, the majority of our purchases from our suppliers generally are made in U.S. dollars. Consequently, a strengthening of the U.S. dollar versus a foreign currency can have a negative impact on our reported sales and contribution margins and can generate foreign currency losses on intercompany transactions. Foreign currency exchange rates can fluctuate significantly. From time to time, we enter into foreign currency derivatives to partially mitigate our foreign currency exchange risk as discussed in further detail in Part I, Item 3 — Quantitative and Qualitative Disclosures about Market Risk.

Summary Financial Results

Net sales for the three and six months ended June 30, 2018 were \$1,285.5 million and \$2,462.4 million, respectively. Net sales increased \$138.6 million, or 12.1% (\$137.7 million, or 12.0% excluding Venezuela), and \$213.4 million, or 9.5% (\$208.4 million, or 9.3% excluding Venezuela) for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. In local currency, net sales increased 28.1% and 18.0% (10.6% and 6.1% excluding Venezuela) for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. The increase in net sales of 12.1% for the three months ended June 30, 2018 was primarily driven by a 19.9% favorable impact of price increases (2.3% favorable impact excluding Venezuela) and an increase in sales volume, as indicated by a 12.0% increase in Volume Points; partially offset by a 16.0% unfavorable impact of fluctuations in foreign currency rates (1.5% favorable impact excluding Venezuela), a 2.6% unfavorable impact of timing differences between recognition of net sales and sales volume mainly driven by China, and a 0.9% unfavorable impact of country sales mix. The increase in net sales of 9.5% for the six months ended June 30, 2018 was primarily driven by a 14.6% favorable impact of price increases (2.6% favorable impact excluding Venezuela) and an increase in sales volume as indicated by a 5.9% increase in Volume Points; partially offset by an 8.5% unfavorable impact of fluctuations in foreign currency rates (3.2% favorable impact excluding Venezuela), and a 0.6% unfavorable impact of country sales mix.

Net income for the three and six months ended June 30, 2018 was \$94.4 million, or \$0.62 per diluted share, and \$176.5 million, or \$1.15 per diluted share, respectively. Net income decreased \$43.2 million, or 31.4%, and \$46.3 million, or 20.8%, for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. The decrease in net income for the three months ended June 30, 2018 was mainly due to \$67.0 million higher selling, general, and administrative expenses; \$37.2 million lower government grant income from China; and \$19.0 million higher income taxes; partially offset by \$91.1 million higher contribution margin from higher net sales. The decrease in net income for the six months ended June 30, 2018 was mainly due to \$88.5 million

higher selling, general, and administrative expenses; \$21.0 million lower government grant income from China; a \$16.0 million loss on the revaluation of the CVR (See Note 10, Shareholders' Deficit, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q); a \$13.1 million loss on extinguishment of \$475.0 million of our 2019 Convertible Notes (See Note 4, Long-Term Debt, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q); and \$16.1 million higher interest expense; partially offset by \$108.4 million higher contribution margin from higher net sales.

Net income for the three months ended June 30, 2018 included a \$1.7 million pre-tax favorable impact (\$1.4 million post-tax) of government grant income in China; a \$15.6 million pre-tax unfavorable impact (\$17.0 million post-tax) of non-cash interest expense related to the 2019 Convertible Notes, 2024 Convertible Notes, and the Forward Transactions (See Note 4, Long-Term Debt, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q); a \$2.0 million pre-tax unfavorable impact (\$2.6 million post-tax) from expenses related to regulatory inquiries; a \$0.2 million post-tax unfavorable impact of foreign exchange losses related to Venezuela; a \$1.6 million post-tax unfavorable impact of loss on extinguishment of \$475.0 million of our 2019 Convertible Notes; and a \$4.7 million pre-tax unfavorable impact (\$5.2 million post-tax) of loss on the revaluation of the CVR.

Net income for the six months ended June 30, 2018 included a \$17.9 million pre-tax favorable impact (\$11.8 million post-tax) of government grant income in China; a \$28.1 million pre-tax unfavorable impact (\$29.2 million post-tax) of non-cash interest expense related to the 2019 Convertible Notes, 2024 Convertible Notes, and the Forward Transactions (See Note 4, Long-Term Debt, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q); a \$4.3 million pre-tax unfavorable impact (\$4.7 million post-tax) from expenses related to regulatory inquiries; a \$4.7 million pre-tax unfavorable impact (\$3.3 million post-tax) of foreign exchange losses related to Venezuela; a \$13.1 million pre-tax unfavorable impact (\$11.0 million post-tax) of loss on extinguishment of \$475.0 million of our 2019 Convertible Notes; and a \$16.0 million pre-tax unfavorable impact (\$13.2 million post-tax) of loss on the revaluation of the CVR.

The income tax impact of the expenses discussed above is based on forecasted items affecting our 2018 full year effective tax rate. Adjustments to forecasted items unrelated to these expenses, as well as impacts related to interim reporting, will have an effect on the income tax impact of these items in subsequent periods.

Net income for the three months ended June 30, 2017 included a \$38.9 million pre-tax favorable impact (\$27.7 million post-tax) of government grant income in China; an \$11.8 million pre-tax unfavorable impact (\$12.6 million post-tax) of non-cash interest expense related to the 2019 Convertible Notes and the Forward Transactions (See Note 4, Long-Term Debt, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q); a \$2.9 million pre-tax unfavorable impact (\$1.9 million post-tax) from expenses related to regulatory inquiries; a \$1.6 million pre-tax unfavorable impact (\$1.2 million post-tax) related to legal, advisory services and other expenses for our response to allegations and other negative information put forward in the marketplace by a hedge fund manager which started in late 2012; and a \$5.2 million pre-tax unfavorable impact (\$3.5 million post-tax) from expenses related to the implementation of the Consent Order.

Net income for the six months ended June 30, 2017 included a \$38.9 million pre-tax favorable impact (\$27.7 million post-tax) of government grant income in China; a \$23.5 million pre-tax unfavorable impact (\$25.3 million post-tax) of non-cash interest expense related to the 2019 Convertible Notes and the Forward Transactions (See Note 4, Long-Term Debt, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q); a \$6.7 million pre-tax unfavorable impact (\$4.4 million post-tax) from expenses related to regulatory inquiries; a \$3.1 million pre-tax unfavorable impact (\$2.3 million post-tax) related to legal, advisory services and other expenses for our response to allegations and other negative information put forward in the marketplace by a hedge fund manager which started in late 2012; and a \$13.7 million pre-tax unfavorable impact (\$9.2 million post-tax) from expenses related to the implementation of the Consent Order.

Results of Operations

Our results of operations for the periods below are not necessarily indicative of results of operations for future periods, which depend upon numerous factors, including our ability to sponsor Members and retain sales leaders, further penetrate existing markets, introduce new products and programs that will help our Members increase their retail

efforts and develop niche market segments.

41

The following table sets forth selected results of our operations expressed as a percentage of net sales for the periods indicated:

	Three Months		Six Months	
	Ended		Ended	
	June 30,	June 30,	June 30,	June 30,
	2018	2017	2018	2017
Operations:				
Net sales	100.0%	100.0 %	100.0%	100.0 %
Cost of sales	18.3	19.1	19.3	18.8
Gross profit	81.7	80.9	80.7	81.2
Royalty overrides(1)	27.2	27.8	27.9	28.2
Selling, general, and administrative expenses(1)	39.7	38.6	39.4	39.2
Other operating income	(0.1)	(3.4)	(0.7)	(1.7)
Operating income	14.9	17.9	14.1	15.5
Interest expense, net	3.4	3.3	3.4	3.0
Other expense, net	0.4	—	1.2	—
Income before income taxes	11.1	14.6	9.5	12.5
Income taxes	3.8	2.6	2.3	2.6
Net income	7.3 %	12.0 %	7.2 %	9.9 %

(1) Service fees to our independent service providers in China are included in selling, general, and administrative expenses while Member compensation for all other countries is included in Royalty overrides.

Reporting Segment Results

We aggregate our operating segments, excluding China, into a reporting segment, or the Primary Reporting Segment. The Primary Reporting Segment includes the North America, Mexico, South & Central America, EMEA, and Asia Pacific regions. China has been identified as a separate reporting segment as it does not meet the criteria for aggregation. See Note 6, Segment Information, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q for further discussion of our reporting segments. See below for discussions of net sales and contribution margin by our reporting segments.

Net Sales by Reporting Segment

The Primary Reporting Segment reported net sales of \$998.7 million and \$1,963.4 million for the three and six months ended June 30, 2018, respectively, representing an increase of \$94.5 million, or 10.5% (\$93.6 million, or 10.4% excluding Venezuela), and \$172.6 million, or 9.6% (\$167.6 million, or 9.4% excluding Venezuela) for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. In local currency, net sales increased 33.0% and 22.4% (10.8% and 7.4% excluding Venezuela) for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. The 10.5% increase in net sales for the three months ended June 30, 2018 was primarily due to a 25.2% favorable impact of price increases (2.9% favorable impact excluding Venezuela) and an increase in sales volume, as indicated by a 10.1% increase in Volume Points; partially offset by a 22.5% unfavorable impact of fluctuations in foreign currency rates (0.4% unfavorable impact excluding Venezuela) and a 1.4% unfavorable impact of country sales mix. The 9.6% increase in net sales for the six months ended June 30, 2018 was primarily due to a 17.8% favorable impact of price increases (2.8% favorable impact excluding Venezuela)

and an increase in sales volume, as indicated by a 6.6% increase in Volume Points; partially offset by a 12.8% unfavorable impact of fluctuations in foreign currency rates (2.0% favorable impact excluding Venezuela) and a 1.1% unfavorable impact of country sales mix.

For a discussion of China's net sales for the three and six months ended June 30, 2018, see the China section of Sales by Geographic Region below.

Contribution Margin by Reporting Segment

As discussed above under "Presentation," contribution margin consists of net sales less cost of sales and Royalty overrides.

The Primary Reporting Segment reported contribution margin of \$440.7 million, or 44.1% of net sales, and \$855.0 million, or 43.5% of net sales, for the three and six months ended June 30, 2018, respectively, representing an increase of \$47.5 million, or 12.1% (\$48.0 million, or 12.2% excluding Venezuela), and \$75.2 million, or 9.6% (\$72.9 million, or 9.4% excluding Venezuela), as compared to the same periods in 2017. The 12.1% increase for the three months ended June 30, 2018 was primarily the result of a 39.4% favorable impact of price increases (4.6% favorable impact excluding Venezuela), an 11.7% favorable impact of volume increases, and a 1.6% favorable impact of lower inventory write-downs; partially offset by a 33.3% unfavorable impact of fluctuations in foreign currency rates (1.2% favorable impact excluding Venezuela), a 3.5% unfavorable impact of country sales mix, and a 2.1% unfavorable impact of cost changes related to self-manufacturing and strategic sourcing. The 9.6% increase for the six months ended June 30, 2018 was primarily the result of a 27.8% favorable impact of price increases (4.3% favorable impact excluding Venezuela) and an 8.6% favorable impact of volume increases; partially offset by a 20.9% unfavorable impact of fluctuations in foreign currency rates (2.6% favorable impact excluding Venezuela), a 3.0% unfavorable impact of country sales mix, and a 1.7% unfavorable impact of cost changes related to self-manufacturing and strategic sourcing.

China reported contribution margin of \$259.6 million and \$445.0 million for the three and six months ended June 30, 2018, respectively, representing an increase of \$43.6 million, or 20.2%, and \$33.2 million, or 8.1%, as compared to the same periods in 2017. The increase of 20.2% for the three months ended June 30, 2018 was primarily the result of a 29.6% favorable impact of volume increases and a 9.6% favorable impact of fluctuations in foreign currency rates; partially offset by a 20.6% unfavorable impact of timing differences between recognition of net sales and sales volume. The increase of 8.1% for the six months ended June 30, 2018 was primarily the result of a 7.9% favorable impact of fluctuations in foreign currency rates and a 2.2% favorable impact of price increases; partially offset by a 3.1% unfavorable impact of timing differences between recognition of net sales and sales volume.

Sales by Geographic Region

The following chart reconciles retail value to net sales by geographic region:

	Three Months Ended June 30, 2018					June 30, 2017					% Change in Net Sales
	Retail Value(1) (Dollars in millions)	Distributo Allowanc&)	Product Sales	Shipping & Net Handlin& g	Net Sales	Retail Value(1)	Distributo Allowanc&)	Product Sales	Shipping & Net Handlin& g	Net Sales

(1) Retail value is a Non-GAAP measure which may not be comparable to similarly-titled measures used by other companies. See "Presentation" above for a discussion of how we calculate retail value and why we believe the measure is useful to investors.

Changes in net sales are directly associated with the retailing of our products, recruitment of new Members, and retention of sales leaders. Our strategies involve providing quality products, improved DMOs, including daily consumption approaches such as Nutrition Clubs, easier access to product, systemized training and education of Members on our products and methods, and continued promotion and branding of Herbalife products.

Management's role, in-country and at the region and corporate level, is to provide Members with a competitive, broad, and innovative product line, offer leading edge business tools and technology services, and encourage strong teamwork and Member leadership to make doing business with Herbalife simple. Management uses the Marketing Plan, which reflects the rules for our global network marketing organization that specify the qualification requirements and general compensation structure for Members, coupled with educational and motivational tools and promotions to encourage Members to increase retailing, retention, and recruiting, which in turn affect net sales. Such tools include sales events such as Extravanzas, Leadership Development Weekends and World Team Schools where large groups of Members gather, thus allowing them to network with other Members, learn retailing, retention, and recruiting techniques from our leading Members and become more familiar with how to market and sell our products and business opportunities. Accordingly, management believes that these development and motivation programs increase the productivity of the sales leader network. The expenses for such programs are included in selling, general, and administrative expenses. We also use event and non-event product promotions to motivate Members to increase retailing, retention, and recruiting activities. These promotions have prizes ranging from qualifying for events to product prizes and vacations. A program that we have seen success with in many markets is the Member Activation Program, under which new Members, who order a modest number of Volume Points in each of their first three months, earn a prize. Our objective is to improve the quality of sales leaders by encouraging new Members to begin acquiring retail customers before attempting to qualify for sales leader status. Additionally, in certain markets we have begun to utilize the segmentation of our Member base into "preferred members" and "distributors", discussed above, for more targeted and efficient communication and promotions for these two differently motivated types of Members. In certain other markets that have not been segmented we have begun using Member data to similarly categorize Members for communication and promotion efforts.

DMOs are being generated in many of our markets and are globalized where applicable through the combined efforts of Members and country, regional and corporate management. While we support a number of different DMOs, one of the most popular DMOs is the daily consumption DMO. Under our traditional DMO, a Member typically sells to its customers on a somewhat infrequent basis (e.g., monthly) which provides fewer opportunities for interaction with their customers. Under a daily consumption DMO, a Member interacts with its customers on a more frequent basis, including such activities as weekly weigh-ins, which enables the Member to better educate and advise customers about nutrition and the proper use of the products and helps promote daily usage as well, thereby helping the Member grow his or her business. Specific examples of DMOs include the Nutrition Club concept in Mexico, the Healthy Breakfast concept in Russia, and the Internet/Sampling and Weight Loss Challenge in the United States. Management's strategy is to review the applicability of expanding successful country initiatives throughout a region, and where appropriate, support the globalization of these initiatives.

The factors described above help Members increase their business, which in turn helps drive Volume Point growth in our business, and thus, net sales growth. The discussion below of net sales details some of the specific drivers of changes in our business and causes of sales fluctuations during the three and six months ended June 30, 2018, as compared to the same periods in 2017, as well as the unique growth or contraction factors specific to certain geographic regions or significant countries within a region during these periods. Net sales fluctuations, both Company-wide and within a particular geographic region or country, are primarily the result of changes in volume, changes in prices, and/or changes in foreign currency translation rates. The discussion of changes in net sales quantifies the impact of those drivers that are quantifiable such as changes in foreign currency translation rates, and cites the estimated impact of any significant price changes. The remaining drivers, which management believes are the primary drivers of changes in volume, are typically qualitative factors whose impact cannot be quantified. We use

Volume Points as an indication for changes in sales volume. Management is evaluating our current approach to assigning and maintaining Volume Point values for certain products or markets. Any changes to this approach may have an impact on the use of Volume Points as a proxy for sales trends in future periods.

North America

The North America region reported net sales of \$262.5 million and \$493.7 million for the three and six months ended June 30, 2018, respectively. Net sales increased \$44.1 million, or 20.2%, and \$45.5 million, or 10.2%, for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. In local currency, net sales increased 20.0% and 10.0% for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. The 20.2% increase in net sales for the North America region for the three months ended June 30, 2018 was primarily the result of increases in sales volume, as indicated by an 18.4% increase in Volume Points, and price increases, which contributed approximately 3.8%. The 10.2% increase in net sales for the North America region for the six months ended June 30, 2018 was also primarily the result of increases in sales volume, as indicated by a 9.0% increase in Volume Points, and price increases, which contributed approximately 2.4%. In the U.S., net sales were \$256.4 million and \$481.9 million for the three and six months ended June 30, 2018, respectively. U.S. net sales increased \$43.3 million, or 20.3%, and \$44.1 million, or 10.1%, for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017.

As part of the Consent Order, effective May 2017 we have implemented certain new procedures and enhanced certain existing procedures in the United States. We believe North America's sales volume increase for the quarter and year-to-date periods, after decreases for 2017, reflects the successful adaptation to date of our Members to the Consent Order implementation actions, including new tools and methods for documenting sales. The region is leveraging the segmentation of the Member base into Distributors and Preferred Members to target and refine our communications and promotions, and the requirements for Distributors to document customer sales has been utilized to pilot lower sales volume thresholds for sales leader qualification. North America has also implemented programs to encourage sponsorship and increase Distributor, Preferred Member, and customer activity and has continued to extend the product line.

Mexico

The Mexico region reported net sales of \$118.2 million and \$232.2 million for the three and six months ended June 30, 2018, respectively. Net sales increased \$2.6 million, or 2.2%, and \$11.8 million, or 5.4%, for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. In local currency, net sales increased 6.7% and 3.7% for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. The 2.2% increase in net sales for the three months ended June 30, 2018 was primarily the result of increases in sales volume, as indicated by a 3.6% increase in Volume Points (1.7% excluding the impact of the Volume Point adjustments noted above in the Volume Points by Geographic Region section), and price increases which contributed approximately 5.1%. These increases were partially offset by an unfavorable fluctuation in foreign currency exchange rates of approximately 4.5%. The 5.4% increase in net sales for the six months ended June 30, 2018 was primarily the result of price increases and a favorable fluctuation in foreign currency exchange rates, which contributed approximately 5.7% and 1.6% to net sales, respectively. These increases were partially offset by a slight decrease in sales volume. Volume Points for the region, generally an indicator of sales volume, increased by 1.0% for the period versus the prior year; however, excluding the impact of the Volume Point adjustments noted above in the Volume Points by Geographic Region, Volume Points decreased 0.8%.

We believe the Volume Point increase for the three months ended June 30, 2018, after a decrease for the same period in 2017 and the first quarter of 2018, and despite continuing difficult economic conditions in the market, reflect the contribution of programs designed to increase the activity and productivity of sales leaders and promotions to encourage sponsorship and Member activity. We continue to expand product access in the market. Recently enacted tariffs by the Mexican government on products imported from the United States are applicable to a significant portion of our product line, and may have an adverse impact on future sales, particularly if the Company deems it necessary to increase product prices.

South and Central America

The South and Central America region reported net sales of \$105.0 million and \$230.7 million for the three and six months ended June 30, 2018, respectively. Net sales decreased \$5.0 million, or 4.5% (\$5.9 million, or 5.5% excluding Venezuela), and \$1.7 million, or 0.7% (\$6.7 million, or 2.9% excluding Venezuela) for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. In local currency, net sales increased 183.1% and 116.8% (0.3% and 1.0% excluding Venezuela) for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. The 4.5% decrease in net sales for the three months ended June 30, 2018 was due to a 186.0% favorable impact of price increases (2.6% favorable impact excluding Venezuela); offset by a 187.6% unfavorable impact of fluctuations in foreign currency exchange rates (5.7% unfavorable impact excluding Venezuela) and a decline in sales volume, as indicated by a 0.9% decrease in Volume Points (2.9% excluding the impact of the Volume Point Adjustments noted above in the Volume Points by Geographic Region section). The 0.7% decrease in net sales for the six months ended June 30, 2018 was due to a 119.4% favorable impact of price increases (3.5% favorable impact excluding Venezuela); offset by a 117.6% unfavorable impact of fluctuations in foreign currency exchange rates (3.9% unfavorable impact excluding Venezuela) and a decline in sales volume, as indicated by a 2.0% decrease in Volume Points (3.5% excluding the impact of the Volume Point Adjustments noted above in the Volume Points by Geographic Region section). Marketing Plan changes intended to build more sustainable business for our Members through a focus on daily product consumption and retailing are taking hold more slowly in many markets of the region than we have seen in our other global regions.

In Brazil, the region's largest market, net sales were \$33.0 million and \$78.8 million for the three and six months ended June 30, 2018, respectively. Net sales decreased \$10.2 million, or 23.6%, and \$15.7 million, or 16.6%, for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. In local currency, net sales decreased 14.6% and 11.1% for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. The fluctuation of foreign currency rates had an unfavorable impact of \$3.9 million and \$5.3 million on net sales for the three and six months ended June 30, 2018, respectively. As noted for the region broadly, Marketing Plan changes intended to build more sustainable business for our Members through a focus on daily product consumption and retailing are taking hold more slowly than we have seen in other regions. Additionally, Members in Brazil saw their product costs increase during the quarter when we began to pass through certain indirect taxes that we had previously absorbed; these increases will be concluded during the third quarter of 2018. The market also faces an uncertain economic and political outlook. To help stimulate sales growth, we are increasing the number of product access points, enhancing our training efforts, and expanding our product offering in the market.

Net sales in Peru were \$15.5 million and \$32.2 million for the three and six months ended June 30, 2018, respectively. Net sales increased \$0.9 million, or 6.2%, and \$1.5 million, or 4.9%, for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. In local currency, net sales increased 5.7% and 4.1% for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. The fluctuation of foreign currency rates did not have a material impact on net sales for the three months ended June 30, 2018 and had a favorable impact of \$0.3 million on net sales for the six months ended June 30, 2018. We believe the favorable comparisons for this year's quarter and year-to-date period were due to the success during 2018 of revised event qualifications and promotions for the market, as well as lower sales volume in the prior year first quarter, which we believe was due to severe inclement weather.

EMEA

The EMEA region reported net sales of \$260.0 million and \$508.2 million for the three and six months ended June 30, 2018, respectively. Net sales increased \$35.3 million, or 15.7%, and \$73.7 million, or 17.0%, for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. In local currency, net sales increased 12.4% and 9.7% for the three and six months ended June 30, 2018, respectively, as compared to the same

periods in 2017. The 15.7% increase in net sales for the three months ended June 30, 2018 was driven by an increase in sales volume, as indicated by a 12.7% increase in Volume Points, a 3.3% favorable impact of fluctuations in foreign currency exchange rates, and a 2.4% favorable impact of price increases. The 17.0% increase in net sales for the six months ended June 30, 2018 was driven by an increase in sales volume, as indicated by a 10.1% increase in Volume Points, a 7.2% favorable impact of fluctuations in foreign currency exchange rates, and a 2.6% favorable impact of price increases. Though the EMEA region is made up of a large number of markets with different levels of maturity and success for our business, generally we believe volume growth for the region is correlated with efforts to enhance the quality and activity of sales leaders including Member training, brand awareness, and product line expansion. The Volume Point and net sales growth for the quarter and year-to-date was led by Russia, Spain, and Turkey.

Net sales in Italy were \$39.6 million and \$76.9 million for the three and six months ended June 30, 2018, respectively. Net sales increased \$1.6 million, or 4.2%, and \$5.6 million, or 7.9%, for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. In local currency, net sales decreased 4.0% and 3.5% for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. The fluctuation of foreign currency rates had a favorable impact of \$3.1 million and \$8.1 million on net sales for the three and six months ended June 30, 2018, respectively. Italy has seen some decline in Members after several years of growth. We have revised certain Member promotions and training in a way that we believe is more targeted for the market.

Net sales in Russia were \$35.0 million and \$70.4 million for the three and six months ended June 30, 2018, respectively. Net sales increased \$2.3 million, or 7.0%, and \$5.7 million, or 8.8%, for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. In local currency, net sales increased 15.9% and 11.7% for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. The fluctuation of foreign currency rates had an unfavorable impact of \$2.9 million and \$1.8 million on net sales for the three and six months ended June 30, 2018, respectively. The market continues to focus on expansion of Nutrition Clubs and the use of the Member Activation Program to attract and enhance the quality of new Members. Russia has had success with new products, including a dinner shake, new education, training and communication approaches, and enhanced brand awareness activities.

Net sales in Spain were \$34.4 million and \$64.3 million for the three and six months ended June 30, 2018, respectively. Net sales increased \$7.7 million, or 28.8%, and \$14.4 million, or 28.9%, for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. In local currency, net sales increased 18.6% and 15.4% for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. The fluctuation of foreign currency rates had a favorable impact of \$2.7 million and \$6.7 million on net sales for the three and six months ended June 30, 2018, respectively. Product prices in Spain were increased 2% in July 2017. Spain has benefited from ongoing programs of promotions and sponsorships that have raised brand awareness through healthy active lifestyle and contributed to momentum in the market.

Asia Pacific

The Asia Pacific region, which excludes China, reported net sales of \$253.0 million and \$498.6 million for the three and six months ended June 30, 2018, respectively. Net sales increased \$17.5 million, or 7.4%, and \$43.3 million, or 9.5%, for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. In local currency, net sales increased 7.4% and 7.5% for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. The 7.4% increase in net sales for the three months ended June 30, 2018 was primarily the result of an increase in sales volume, as indicated by a 9.7% increase in Volume Points, and a 1.7% favorable impact of price increases. These increases to net sales were partially offset by an unfavorable change in country sales mix resulting from a 2.2% unfavorable impact of a lower percentage of our sales volume coming from markets with higher prices. The 9.5% increase in net sales for the six months ended June 30, 2018 was primarily the result of an increase in sales volume, as indicated by a 9.8% increase in Volume Points, a 2.0% favorable impact of fluctuations in foreign currency exchange rates, and a 1.6% favorable impact of price increases. These increases to net sales were partially offset by an unfavorable change in country sales mix resulting from a 2.7% unfavorable impact of a lower percentage of our sales volume coming from markets with higher prices. The Volume Point and net sales performance for the region has been mixed by country, with continuing increases in India and Indonesia as well as significant contributions from Vietnam and Malaysia, partially offset by declines primarily in South Korea and Taiwan.

Net sales in India were \$56.2 million and \$110.5 million for the three and six months ended June 30, 2018, respectively. Net sales increased \$8.3 million, or 17.3%, and \$21.3 million, or 23.9%, for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. In local currency, net sales increased

22.1% and 24.0% for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. The fluctuation of foreign currency rates had an unfavorable impact of \$2.2 million on net sales for the three months ended June 30, 2018 and did not have a material impact on net sales for the six months ended June 30, 2018. India continues to expand its product line, add product pickup locations, and utilize an Associate Activation Program. Our India Member base is undergoing segmentation into Associates and Preferred Customers, comparable to Distributors and Preferred Members, respectively, in the United States.

Net sales in South Korea were \$36.1 million and \$68.6 million for the three and six months ended June 30, 2018, respectively. Net sales decreased \$0.4 million, or 1.1%, and \$2.5 million, or 3.5%, for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. In local currency, net sales decreased 6.0% and 9.1% for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. The fluctuation of foreign currency rates had a favorable impact of \$1.6 million and \$4.0 million on net sales for the three and six months ended June 30, 2018, respectively. Several years of transitional impact from Marketing Plan changes, including certain changes unique to South Korea, have led to contraction in our business in the market.

Net sales in Indonesia were \$33.2 million and \$68.7 million for the three and six months ended June 30, 2018, respectively. Net sales increased \$1.4 million, or 4.4%, and \$3.7 million, or 5.7%, for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. In local currency, net sales increased 9.4% and 9.0% for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. The fluctuation of foreign currency rates had an unfavorable impact of \$1.6 million and \$2.1 million on net sales for the three and six months ended June 30, 2018, respectively. The Indonesia market has continued to strengthen by focusing on a customer-based business and daily consumption through Nutrition Clubs, training activities, new products, and increased product access points.

Net sales in Taiwan were \$26.0 million and \$54.3 million for the three and six months ended June 30, 2018, respectively. Net sales decreased \$8.0 million, or 23.5%, and \$10.2 million, or 15.8%, for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. In local currency, net sales decreased 24.9% and 19.2% for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. The fluctuation of foreign currency rates had a favorable impact of \$0.4 million and \$2.1 million on net sales for the three and six months ended June 30, 2018, respectively. Taiwan sales declines have continued as the market continues to adjust to programs and training intended to help Members establish customer-based, sustainable business approaches that have succeeded elsewhere.

China

The China region reported net sales of \$286.8 million and \$499.0 million for the three and six months ended June 30, 2018, respectively. Net sales increased \$44.1 million, or 18.2%, and \$40.8 million, or 8.9%, for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. In local currency, net sales increased 9.8% and 0.9% for the three and six months ended June 30, 2018, respectively, as compared to the same periods in 2017. The 18.2% increase in net sales for the three months ended June 30, 2018 was primarily the result of an increase in sales volume, as indicated by a 27.4% increase in Volume Points, and a 8.4% favorable impact of fluctuations in foreign currency exchange rates; partially offset by an 18.4% unfavorable impact of timing differences between the recognition of net sales and Volume Points. The 8.9% increase in net sales for the six months ended June 30, 2018 was primarily the result of an 8.0% favorable impact of fluctuations in foreign currency exchange rates and a 2.0% favorable impact of price increases; partially offset by a 2.8% unfavorable impact of timing differences between the recognition of net sales and Volume Points.

The significant increase in volume for the quarter versus the prior year quarter, net of the noted timing difference, was primarily driven by Member response to a price increase announced in March 2017 to be effective April 2017. This price increase announcement drove significant sales orders late in March 2017 as Members made purchases ahead of the price change. However, a significant portion of the pull-forward sales volume was not recorded as net sales until the second quarter of 2017. Actions for the market which we believe position us for continued success include a Member Activation Program for new Members, new products for the market, and active promotional campaigns. One new program intended to enhance the training, quality and activity of certain service providers provides them with additional service fee incentives. We have also announced a new initiative, the China Growth and Impact Investment Program, to stimulate the development of our business in China and help address challenging public-policy issues such as the rise in obesity.

Sales by Product Category

	Three Months Ended June 30, 2018					June 30, 2017					% Change in Net Sales
	Retail Value(2) (Dollars in millions)	Distributor Allowance	Product Sales	Shipping & Net Handling Sales	Net Sales	Retail Value(2)	Distributor Allowance	Product Sales	Shipping & Net Handling Sales	Net Sales

(1) Product buybacks and returns in all product categories are included in the Literature, Promotional, and Other category.

(2) Retail value is a Non-GAAP measure which may not be comparable to similarly-titled measures used by other companies. See "Presentation" above for a discussion of how we calculate retail value and why we believe the measure is useful to investors.

Net sales for all product categories, except Outer Nutrition, increased for the three months ended June 30, 2018 as compared to the same period in 2017. Net sales for all product categories, except Outer Nutrition and Literature, Promotional, and Other, increased for the six months ended June 30, 2018 as compared to the same period in 2017. The trends and business factors described in the above discussions of the individual geographic regions apply generally to all product categories.

Gross Profit

Gross profit was \$1,050.1 million and \$928.1 million for the three months ended June 30, 2018 and 2017, respectively, and \$1,987.1 million and \$1,825.6 million for the six months ended June 30, 2018 and 2017, respectively. Gross profit as a percentage of net sales was 81.7% and 80.9% for the three months ended June 30, 2018 and 2017, respectively, or a favorable net increase of 76 basis points, and 80.7% and 81.2% for the six months ended June 30, 2018 and 2017, respectively, or an unfavorable net decrease of 48 basis points. The increase in gross profit as a percentage of net sales for the three months ended June 30, 2018, as compared to the same period in 2017, included the favorable impact of retail price increases of 339 basis points (favorable impact of 39 basis points excluding Venezuela) and lower inventory write-downs of 41 basis points, partially offset by the unfavorable impact of foreign currency fluctuations of 215 basis points (favorable impact of 83 basis points excluding Venezuela), unfavorable cost changes related to self-manufacturing and strategic sourcing of 79 basis points, and country mix of 10 basis points. The net favorable impact of foreign currency fluctuations and retail price increases in Venezuela for the three months ended June 30, 2018, as compared to the same period in 2017, was 2 basis points. The decrease in gross profit as a percentage of net sales for the six months ended June 30, 2018, as compared to the same period in 2017, included the unfavorable impact of foreign currency fluctuations of 194 basis points (favorable impact of 28 basis points excluding Venezuela), unfavorable cost changes related to self-manufacturing and strategic sourcing of 78 basis points, other cost changes of 28 basis points, country mix of 16 basis points, and higher inventory write-downs of 7 basis points, partially offset by the favorable impact of retail price increases of 275 basis points (favorable impact of 49 basis points excluding Venezuela). The net favorable impact of foreign currency fluctuations and retail price increases in Venezuela for the six months ended June 30, 2018, as compared to the same period in 2017, was 4 basis points. Generally, gross profit as a percentage of net sales may vary from period to period due to the impact of foreign currency fluctuations, changes in country mix as volume changes among countries with varying margins, retail price increases, cost changes related to self-manufacturing and strategic sourcing, and inventory write-downs.

Royalty Overrides

Royalty overrides were \$349.8 million and \$318.9 million for the three months ended June 30, 2018 and 2017, respectively, and \$687.1 million and \$634.0 million for the six months ended June 30, 2018 and 2017, respectively. Royalty overrides as a percentage of net sales were 27.2% and 27.8% for the three months ended June 30, 2018 and 2017, respectively, and 27.9% and 28.2% for the six months ended June 30, 2018 and 2017, respectively. Service fees to our independent service providers in China are included in selling, general, and administrative expenses while Member compensation for all other countries is included in Royalty overrides. Generally, Royalty overrides as a percentage of net sales may vary slightly from period to period due to changes in the mix of products and countries because full royalty overrides are not paid on certain products and in certain countries.

Selling, General, and Administrative Expenses

Selling, general, and administrative expenses were \$510.2 million and \$443.2 million for the three months ended June 30, 2018 and 2017, respectively, and \$970.3 million and \$881.8 million for the six months ended June 30, 2018 and 2017, respectively. Selling, general, and administrative expenses as a percentage of net sales were 39.7% and 38.6% for the three months ended June 30, 2018 and 2017, respectively, and 39.4% and 39.2% for the six months ended June 30, 2018 and 2017, respectively.

The increase in selling, general, and administrative expenses for the three months ended June 30, 2018 was driven by \$45.9 million in higher service fees for China independent service providers due to sales growth in China and a new program which provides certain service providers with additional service fee incentives; \$9.4 million in higher labor and employee benefit costs; \$5.5 million relating to importer fees due to the change in income statement classification pursuant to Accounting Standards Codification Topic 606, as discussed in Note 2, Significant Accounting Policies, to

the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q; partially offset by \$4.2 million in lower non-income tax expense.

The increase in selling, general, and administrative expenses for the six months ended June 30, 2018 was driven by \$45.2 million in higher service fees for China independent service providers due to sales growth in China and a new program which provides certain service providers with additional service fee incentives; \$11.1 million relating to importer fees due to the change in income statement classification pursuant to Accounting Standards Codification Topic 606, as discussed in Note 2, Significant Accounting Policies, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q; \$8.9 million in higher labor and employee benefit costs; \$8.9 million in higher Member promotion and event costs; \$5.0 million in higher rent expense; \$4.5 million in higher foreign exchange losses, which includes \$4.7 million impact of the devaluation of the Venezuela Bolivar in 2018; partially offset by \$6.9 million in lower non-income tax expense.

Other Operating Income

Other operating income was \$1.7 million and \$38.9 million for the three months ended June 30, 2018 and 2017, respectively, and \$17.9 million and \$38.9 million for the six months ended June 30, 2018 and 2017, respectively, relating to government grant income for China. See Note 2, Significant Accounting Policies, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q for further discussion.

Interest Expense, Net

Interest expense, net is as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
	(in millions)			
Interest expense	\$49.1	\$ 41.9	\$93.7	\$ 74.4
Interest income	(4.8)	(4.0)	(9.5)	(6.3)
Interest expense, net	\$44.3	\$ 37.9	\$84.2	\$ 68.1

The increase in interest expense, net for the three months ended June 30, 2018, as compared to the same period in 2017, was primarily due to higher interest expense relating to our 2024 Convertible Notes and additional non-cash interest expense related to the Forward Transactions for the shares delivered and retired (See Note 10, Shareholders' Deficit, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q).

The increase in interest expense, net for the six months ended June 30, 2018, as compared to the same period in 2017, was primarily due to higher interest rates and longer period outstanding for our new \$1.45 billion senior secured credit facility, which includes a \$1.3 billion term loan B, that was entered into on February 15, 2017 as discussed further below in Liquidity and Capital Resources, higher interest expense relating to our 2024 Convertible Notes, and additional non-cash interest expense related to the Forward Transactions for the shares delivered and retired (See Note 10, Shareholders' Deficit, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q). These increases were partially offset by higher interest income related to proceeds from the \$1.3 billion term loan B.

Other Expense, Net

The \$4.7 million of other expense, net for the three months ended June 30, 2018 relates to a \$4.7 million loss on the revaluation of the CVR provided to the participants of the October 2017 modified Dutch auction tender offer (See Note 10, Shareholders' Deficit, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q).

The \$29.1 million of other expense, net for the six months ended June 30, 2018 consists of a \$16.0 million loss on the revaluation of the CVR provided to the participants of the October 2017 modified Dutch auction tender offer (See

Note 10, Shareholders' Deficit, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q); and a \$13.1 million loss on the extinguishment of \$475.0 million aggregate principal amount of our 2019 Convertible Notes (See Note 4, Long-Term Debt, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q).

Income Taxes

Income taxes were \$48.4 million and \$29.4 million for the three months ended June 30, 2018 and 2017, respectively, and \$57.8 million for both the six months ended June 30, 2018 and 2017. The effective income tax rate was 33.9% and 17.6% for the three months ended June 30, 2018 and 2017, respectively, and 24.7% and 20.6% for the six months ended June 30, 2018 and 2017, respectively. The increase in the effective tax rate for the three months ended June 30, 2018, as compared to the same period in 2017, was due to U.S. Tax Reform, which impacts our ability to benefit from certain foreign tax credits, the impact of changes in the geographic mix of our income, and a decrease in net benefits from discrete events. Included in the discrete events for the three months ended June 30, 2018 and 2017 was the impact of \$10.9 million and \$21.4 million, respectively, of excess tax benefits on share-based compensation arrangements. The increase in the effective tax rate for the six months ended June 30, 2018, as compared to the same period in 2017, was primarily due to U.S. Tax Reform, which impacts our ability to benefit from certain foreign tax credits, and the impact of changes in the geographic mix of our income, partially offset by an increase in net benefits from discrete events. Included in the discrete events for the six months ended June 30, 2018 and 2017 was the impact of \$30.2 million and \$25.7 million, respectively, of excess tax benefits on share-based compensation arrangements.

Liquidity and Capital Resources

We have historically met our working capital and capital expenditure requirements, including funding for expansion of operations, through net cash flows provided by operating activities. Variations in sales of our products directly affect the availability of funds. There are no material contractual restrictions on our ability to transfer and remit funds among our international affiliated companies. However, there are foreign currency restrictions in certain countries which could reduce our ability to timely obtain U.S. dollars. Even with these restrictions, we believe we will have sufficient resources, including cash flow from operating activities and access to capital markets, to meet debt service obligations in a timely manner and be able to continue to meet our objectives.

Historically, our debt has not resulted from the need to fund our normal operations, but instead has resulted primarily from our share repurchase programs. Since inception in 2007, total share repurchases amounted to approximately \$4.5 billion. While a significant net sales decline could potentially affect the availability of funds, many of our largest expenses are variable in nature, which we believe protects our funding in all but a dramatic net sales downturn. Our \$839.4 million cash and cash equivalents and our senior secured credit facility, in addition to cash flow from operations, can be used to support general corporate purposes, including, any future share repurchases, dividends, and strategic investment opportunities.

We have a cash pooling arrangement with a financial institution for cash management purposes. This cash pooling arrangement allows certain of our participating subsidiaries to withdraw cash from this financial institution based upon our aggregate cash deposits held by subsidiaries who participate in the cash pooling arrangement. We did not owe any amounts to this financial institution under the pooling arrangement as of June 30, 2018 and December 31, 2017.

For the six months ended June 30, 2018, we generated \$344.9 million of operating cash flow, as compared to \$277.1 million for the same period in 2017. The increase in our operating cash flow was the result of favorable changes in operating assets and liabilities and higher non-cash items, partially offset by lower net income (See Summary Financial Results above for further discussion). The change in operating assets and liabilities was primarily the result of favorable changes in accounts payable, royalty overrides, and other current liabilities; partially offset by an unfavorable change in prepaid expenses and other current assets. The increase in non-cash items was primarily the result of the \$13.1 million loss on the extinguishment of \$475.0 million aggregate principal of our 2019 Convertible Notes and the \$16.0 million loss on the revaluation of the CVR. The \$13.1 million loss on the extinguishment of \$475.0 million aggregate principal of our 2019 Convertible Notes and the \$16.0 million loss on the revaluation of the CVR had no impact on our operating cash flow, as these decreased our net income by \$29.1 million, and increased our non-cash adjustments to net income by \$29.1 million.

Capital expenditures, including accrued capital expenditures, for the six months ended June 30, 2018 and 2017 were \$31.6 million and \$42.3 million, respectively. The majority of these expenditures represented investments in management information systems including initiatives to develop web-based Member tools. We expect to incur total capital expenditures of approximately \$100 million to \$120 million for the full year of 2018.

In March 2018, we hosted our annual Herbalife Honors event in Los Angeles, California where sales leaders from around the world met and shared best practices, conducted leadership training, and our management awarded Members \$64.8 million of Mark Hughes bonus payments related to their 2017 performance. In March 2017, our management awarded Members \$65.2 million of Mark Hughes bonus payments related to their 2016 performance.

Senior Secured Credit Facility

On February 15, 2017, we entered into a new \$1,450.0 million senior secured credit facility, or the Credit Facility, consisting of a \$1,300.0 million term loan B, or the Term Loan, and a \$150.0 million revolving credit facility, or the Revolving Credit Facility, with a syndicate of financial institutions as lenders, or Lenders. The Revolving Credit Facility matures on February 15, 2022 and the Term Loan matures on February 15, 2023. However, if the outstanding principal on the 2019 Convertible Notes, as defined below, exceeds \$250.0 million and we exceed certain leverage ratios on February 14, 2019, the Revolving Credit Facility will mature on such date. In addition, if the outstanding principal on the 2019 Convertible Notes, as defined below, exceeds \$250.0 million and we exceed certain leverage ratios on May 16, 2019, the Term Loan will mature on such date. The Credit Facility is secured by the equity interests of certain of Herbalife Nutrition Ltd.'s subsidiaries and substantially all of the assets of the domestic loan parties. The Credit Facility was amended, effective March 16, 2018, to make certain technical amendments in connection with the offering of the 2024 Convertible Notes, as defined below.

The Credit Facility requires us to comply with a leverage ratio. In addition, the Credit Facility contains customary events of default and covenants, including covenants that limit or restrict our ability to incur liens, incur indebtedness, make investments, dispose of assets, make certain restricted payments, pay dividends, repurchase our common shares, merge or consolidate and enter into certain transactions with affiliates. We are also required to maintain a minimum balance of \$200.0 million of consolidated cash and cash equivalents. As of June 30, 2018 and December 31, 2017, we were in compliance with our debt covenants under the Credit Facility.

The Term Loan is payable in consecutive quarterly installments each in an aggregate principal amount of \$24.4 million which began on June 30, 2017. Interest is due at least quarterly on amounts outstanding on the Credit Facility. In addition, we may be required to make mandatory prepayments towards the Term Loan based on our consolidated leverage ratio and annual excess cash flows as defined under the terms of the Credit Facility. We are also permitted to make voluntary prepayments. These prepayments, if any, will be applied against remaining quarterly installments owed under the Term Loan in order of maturity with the remaining principal due upon maturity.

During the three months ended March 31, 2018, we repaid a total amount of \$24.4 million under the Credit Facility. During the three months ended June 30, 2018, we repaid a total amount of \$24.4 million on amounts outstanding under the Credit Facility. During the three months ended March 31, 2017, we repaid a total amount of \$410.0 million to repay in full amounts outstanding on our prior revolving credit facility. During the three months ended June 30, 2017, we repaid a total amount of \$24.4 million on amounts outstanding under the Credit Facility. As of June 30, 2018 and December 31, 2017, the U.S. dollar amount outstanding under the Term Loan was \$1,178.1 million and \$1,226.9 million, respectively. There were no borrowings outstanding on the Revolving Credit Facility as of June 30, 2018 and December 31, 2017. There were no outstanding foreign currency borrowings as of June 30, 2018 and December 31, 2017 under the Credit Facility. As of June 30, 2018 and December 31, 2017, the weighted-average interest rate for borrowings under the Credit Facility was 7.34% and 6.79%, respectively. We are currently evaluating a refinancing of our Credit Facility.

See Note 4, Long-Term Debt, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q for a further discussion on our Credit Facility.

Convertible Senior Notes due 2019

During February 2014, we issued \$1.15 billion aggregate principal amount of convertible senior notes due 2019, or the 2019 Convertible Notes. The 2019 Convertible Notes are senior unsecured obligations which rank effectively subordinate to any of our existing and future secured indebtedness, including amounts outstanding under the Credit Facility, to the extent of the value of the assets securing such indebtedness. The 2019 Convertible Notes pay interest at a rate of 2.00% per annum payable semiannually in arrears on February 15 and August 15 of each year, beginning on August 15, 2014. The 2019 Convertible Notes mature on August 15, 2019, unless earlier repurchased or converted. The primary purpose of the issuance of the 2019 Convertible Notes was for share repurchase purposes.

During March 2018, we issued \$550 million aggregate principal of new convertible senior notes due 2024 as described below, and subsequently used the proceeds, along with cash on hand, to repurchase \$475.0 million of our existing 2019 Convertible Notes from a limited number of holders in privately negotiated transactions for an aggregate purchase price of \$583.5 million, which included \$1.0 million of accrued interest.

See Note 4, Long-Term Debt, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q for a further discussion on our 2019 Convertible Notes.

Convertible Senior Notes due 2024

During March 2018, we issued \$550.0 million aggregate principal amount of convertible senior notes due 2024, or the 2024 Convertible Notes. The 2024 Convertible Notes are senior unsecured obligations which rank effectively subordinate to any of our existing and future secured indebtedness, including amounts outstanding under the Credit Facility, to the extent of the value of the assets securing such indebtedness. The 2024 Convertible Notes pay interest at a rate of 2.625% per annum payable semiannually in arrears on March 15 and September 15 of each year, beginning on September 15, 2018. The 2024 Convertible Notes mature on March 15, 2024, unless redeemed, repurchased or converted in accordance with their terms prior to such date. The primary purpose of the issuance of the 2024 Convertible Notes was to repurchase a portion of the 2019 Convertible Notes. See Note 4, Long-Term Debt, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q for a further discussion on our 2024 Convertible Notes.

Cash and Cash Equivalents

The majority of our foreign subsidiaries designate their local currencies as their functional currencies. As of June 30, 2018 and December 31, 2017, the total amount of our foreign subsidiary cash and cash equivalents was \$769.1 million and \$1,133.5 million, respectively, of which \$221.2 million and \$633.3 million, respectively, was invested in U.S. dollars. As of June 30, 2018 and December 31, 2017, the total amount of cash and cash equivalents held by Herbalife Nutrition Ltd. and its U.S. entities, inclusive of U.S. territories, was \$70.3 million and \$145.3 million, respectively.

For earnings not considered to be indefinitely reinvested, deferred taxes have been provided. For earnings considered to be indefinitely reinvested, deferred taxes have not been provided. Should we make a determination to remit the cash and cash equivalents from our foreign subsidiaries that are considered indefinitely reinvested to our U.S. consolidated group for the purpose of repatriation of undistributed earnings, we would need to accrue and pay taxes. As of December 31, 2017, our U.S. consolidated group had approximately \$97.9 million of permanently reinvested unremitted earnings from certain foreign subsidiaries, and if these monies were ever needed to be remitted, the impact of any tax consequences on our overall liquidity position would not be material. As of December 31, 2017, Herbalife Nutrition Ltd. had \$2.4 billion of permanently reinvested unremitted earnings relating to its operating subsidiaries. As of June 30, 2018, we do not have any plans to repatriate these unremitted earnings to Herbalife Nutrition Ltd.; therefore, we do not have any liquidity concerns relating to these unremitted earnings and related cash and cash equivalents. See Note 12, Income Taxes, to the Consolidated Financial Statements included in our 2017 10-K for additional discussion on our unremitted earnings.

Currency restrictions enacted by the Venezuelan government continue to be restrictive and have impacted the ability of our subsidiary in Venezuela, or Herbalife Venezuela, to obtain U.S. dollars in exchange for Venezuelan Bolivars at the official foreign exchange rate. As a result, any increase in our Bolivar-denominated cash and cash equivalents could cause the Company to incur foreign exchange losses if there are any foreign currency devaluations in future periods. As of June 30, 2018, Herbalife Venezuela's Bolivar-denominated cash and cash equivalents continue to be immaterial to the Company's condensed consolidated balance sheet.

Off-Balance Sheet Arrangements

As of June 30, 2018 and December 31, 2017, we had no material off-balance sheet arrangements as defined in Item 303(a)(4)(ii) of Regulation S-K.

Dividends

The declaration of future dividends is subject to the discretion of our board of directors and will depend upon various factors, including our earnings, financial condition, Herbalife Nutrition Ltd.'s available distributable reserves under Cayman Islands law, restrictions imposed by the Credit Facility and the terms of any other indebtedness that may be outstanding, cash requirements, future prospects and other factors deemed relevant by our board of directors.

Share Repurchases

On February 21, 2017, our board of directors authorized a new three-year \$1.5 billion share repurchase program that will expire on February 21, 2020, which replaced our prior share repurchase authorization that was set to expire on June 30, 2017 and had approximately \$233 million of remaining authorized capacity as of December 31, 2016. This share repurchase program allows us, which includes an indirect wholly-owned subsidiary of Herbalife Nutrition Ltd., to repurchase our common shares at such times and prices as determined by management, as market conditions warrant, and to the extent Herbalife Nutrition Ltd.'s distributable reserves are available under Cayman Islands law. The Credit Facility permits us to repurchase our common shares as long as no default or event of default exists and other

conditions, such as specified consolidated leverage ratios, are met.

In conjunction with the issuance of the 2019 Convertible Notes during February 2014, we paid approximately \$685.8 million to enter into prepaid forward share repurchase transactions, or the Forward Transactions, with certain financial institutions, or the Forward Counterparties, pursuant to which we purchased approximately 19.9 million common shares, at an average cost of \$34.51 per share, for settlement on or around the August 15, 2019 maturity date for the 2019 Convertible Notes, subject to the ability of each Forward Counterparty to elect to settle all or a portion of its Forward Transactions early. The shares are treated as retired shares for basic and diluted EPS purposes. See Note 10, Shareholders' Deficit, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q, for a further discussion on the Forward Transactions.

During the three months ended March 31, 2018, an indirect wholly-owned subsidiary of ours purchased 8,400 of Herbalife Nutrition Ltd.'s common shares through open market purchases at an aggregate cost of approximately \$0.3 million, or an average cost of \$33.90 per share. Our indirect wholly-owned subsidiary did not purchase any of Herbalife Nutrition Ltd.'s common shares in the open market during the three months ended June 30, 2018. During the three months ended March 31, 2017, an indirect wholly-owned subsidiary of ours purchased approximately 2.2 million of Herbalife Nutrition Ltd.'s common shares through open market purchases at an aggregate cost of approximately \$60.7 million, or an average cost of \$28.05 per share. During the three months ended June 30, 2017, an indirect wholly-owned subsidiary of ours purchased approximately 5.3 million of Herbalife Nutrition Ltd.'s common shares through open market purchases at an aggregate cost of approximately \$179.8 million, or an average cost of \$33.53 per share. These share repurchases increased our total shareholders' deficit and are reflected at cost within our accompanying condensed consolidated balance sheets. Although these shares are owned by an indirect wholly-owned subsidiary of ours, they are reflected as treasury shares under U.S. GAAP and therefore reduce the number of common shares outstanding within our condensed consolidated financial statements and the weighted-average number of common shares outstanding used in calculating earnings per share. The common shares of Herbalife Nutrition Ltd. held by the indirect wholly-owned subsidiary, however, remain outstanding on the books and records of our transfer agent and therefore still carry voting and other share rights related to ownership of our common shares, which may be exercised. So long as it is consistent with applicable laws, such shares will be voted by such subsidiary in the same manner, and to the maximum extent possible in the same proportion, as all other votes cast with respect to any matter properly submitted to a vote of Herbalife Nutrition Ltd.'s shareholders. As of both June 30, 2018 and December 31, 2017, we held approximately 10.0 million of treasury shares for U.S. GAAP purposes. In May 2018, we completed our modified Dutch auction tender offer and then subsequently paid cash to repurchase and retire a total of approximately 11.4 million of our common shares at an aggregate cost of approximately \$600.0 million, or \$52.50 per share. As of June 30, 2018, the remaining authorized capacity under our \$1.5 billion share repurchase program was \$113.3 million. See Note 10, Shareholders' Deficit, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q, for a further discussion on our share repurchases.

In connection with our October 2017 modified Dutch auction tender offer, we incurred \$1.6 million in transaction costs and also provided a CVR for each share tendered, allowing participants in the tender offer to receive a contingent cash payment in the event Herbalife is acquired in a going-private transaction (as defined in the CVR Agreement) within two years of the commencement of the tender offer. The initial fair value of the CVR was \$7.3 million, which was recorded as a liability in the fourth quarter with a corresponding decrease to shareholders' equity. In determining the initial fair value of the CVR, we used a lattice model, which included inputs such as the underlying stock price, strike price, time to expiration, and dividend yield. Subsequent changes in the fair value of the CVR liability, using a similar valuation approach as the initial fair value determination, are recognized within our condensed consolidated balance sheets with corresponding gains or losses being recognized in non-operating expense (income) within our condensed consolidated statements of income during each reporting period until the CVR expires in August 2019 or is terminated due to a going-private transaction, which is also incorporated in the valuation of the CVR; this going-private probability input is considered to be a Level 3 input in the fair value hierarchy. Any subsequent increase or decrease in this input or other inputs described above in subsequent valuations could significantly impact the fair value of the CVR. We recognized a \$4.7 million and \$16.0 million loss in other expense, net within our condensed consolidated statement of income during the three and six months ended June 30, 2018, respectively, due to the change in the fair value of the CVR. As of June 30, 2018 and December 31, 2017, the fair value of the CVR was \$22.9 million and \$6.9 million, respectively. See Note 10, Shareholders' Deficit, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q, for a further discussion on the CVR.

Capped Call Transactions

In February 2014, in connection with the issuance of the 2019 Convertible Notes, we paid approximately \$123.8 million to enter into capped call transactions with respect to our common shares, or the Capped Call Transactions, with certain financial institutions. The Capped Call Transactions are expected generally to reduce the potential dilution upon conversion of the 2019 Convertible Notes in the event that the market price of the common shares is greater than the strike price of the Capped Call Transactions, initially set at \$43.14 per common share based on the retroactive adjustment due to our two-for-one stock split described in Note 2, Significant Accounting Policies, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q, with such reduction of potential dilution subject to a cap based on the cap price initially set at \$60.39 per common share based on the retroactive adjustment due to our two-for-one stock split described in Note 2, Significant Accounting Policies, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q.

During March 2018, in connection with our repurchase of a portion of the 2019 Convertible Notes, we entered into partial settlement agreements with the option counterparties to the Capped Call Transactions to terminate a portion of the Capped Call Transactions, in each case, in a notional amount corresponding to the aggregate principal amount of the 2019 Convertible Notes that were repurchased.

See Note 10, Shareholders' Deficit, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q, for a further discussion of the Capped Call Transactions.

Working Capital and Operating Activities

As of June 30, 2018 and December 31, 2017, we had negative working capital of \$133.9 million and positive working capital of \$953.5 million, respectively, or a decrease of \$1,087.4 million. This decrease was primarily due to a decrease in cash and cash equivalents mainly due to the May 2018 modified Dutch auction tender offer and an increase in the current portion of long-term debt primarily relating to our 2019 Convertible Notes as described further in Note 4, Long-Term Debt, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q.

We expect that cash and funds provided from operations, available borrowings under the Credit Facility, and access to capital markets will provide sufficient working capital to operate our business, to make expected capital expenditures and to meet foreseeable liquidity requirements, including payment of amounts outstanding under the Credit Facility, for the next twelve months and thereafter.

The majority of our purchases from suppliers are generally made in U.S. dollars, while sales to our Members generally are made in local currencies. Consequently, strengthening of the U.S. dollar versus a foreign currency can have a negative impact on net sales and contribution margins and can generate transaction gains or losses on intercompany transactions. For discussion of our foreign exchange contracts and other hedging arrangements, see Part I, Item 3 — Quantitative and Qualitative Disclosures about Market Risk.

Contingencies

See Note 5, Contingencies, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q, for a further discussion of our contingencies as of June 30, 2018.

Critical Accounting Policies

U.S. GAAP requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the year. We regularly evaluate our estimates and assumptions related to revenue recognition, allowance for product returns, inventory, goodwill and purchased intangible asset valuations, deferred income tax asset valuation allowances, uncertain tax positions, tax contingencies, and other loss contingencies. We base our estimates and assumptions on current facts, historical experience and various other factors that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the recording of revenue, costs and expenses. Actual results could differ from those estimates. We consider the following policies to be most critical in understanding the judgments that are involved in preparing the financial statements and the uncertainties that could impact our operating results, financial condition and cash flows.

We are a nutrition company that sells a wide range of weight management, targeted nutrition, energy, sports & fitness, and outer nutrition products. Our products are manufactured by us in our Changsha, Hunan, China extraction facility, Suzhou, China facility, Nanjing, China facility, Lake Forest, California facility, and in our Winston-Salem, North Carolina facility, and by third-party providers, and then are sold to Members who consume and sell Herbalife products to retail consumers or other Members. As of June 30, 2018, we sold products in 94 countries throughout the world and we are organized and managed by geographic region. We aggregate our operating segments into one reporting segment, except China, as management believes that our operating segments have similar operating characteristics and similar long term operating performance. In making this determination, management believes that the operating segments are similar in the nature of the products sold, the product acquisition process, the types of customers to whom products are sold, the methods used to distribute the products, the nature of the regulatory environment, and

their economic characteristics.

We generally recognize revenue upon delivery when control passes to the Member. Product sales are recognized net of product returns, and discounts referred to as “distributor allowances.” We generally receive the net sales price in cash or through credit card payments at the point of sale. Royalty overrides are generally recorded when revenue is recognized. See Note 2, Significant Accounting Policies, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q, for a further discussion of our adoption of Topic 606, Revenue Recognition from Contracts with Customers, with initial application of January 1, 2018 and distributor compensation in the U.S.

Allowances for product returns, primarily in connection with our buyback program, are provided at the time the sale is recorded. This accrual is based upon historical return rates for each country and the relevant return pattern, which reflects anticipated returns to be received over a period of up to 12 months following the original sale. Historically, product returns and buybacks have not been significant. Product returns and buybacks were approximately 0.2% and 0.1% for the three months ended June 30, 2018 and 2017, respectively, and 0.1% for both the six months ended June 30, 2018 and 2017.

We adjust our inventories to lower of cost and net realizable value. Additionally we adjust the carrying value of our inventory based on assumptions regarding future demand for our products and market conditions. If future demand and market conditions are less favorable than management's assumptions, additional inventory write-downs could be required. Likewise, favorable future demand and market conditions could positively impact future operating results if previously written down inventories are sold. We have obsolete and slow moving inventories which have been adjusted downward \$33.8 million and \$30.8 million to present them at their lower of cost and net realizable value in our condensed consolidated balance sheets as of June 30, 2018 and December 31, 2017, respectively.

Goodwill and marketing-related intangible assets not subject to amortization are tested annually for impairment, and are tested for impairment more frequently if events and circumstances indicate that the asset might be impaired. An impairment loss is recognized to the extent that the carrying amount exceeds the asset's fair value. As discussed below, for goodwill impairment testing, we have the option to perform a qualitative assessment of whether it is more likely than not that a reporting unit's fair value is less than its carrying amount before applying the two-step goodwill impairment test. If we conclude it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then there is no need to perform the two-step impairment test. Currently, we do not use this qualitative assessment option but we could in the future elect to use this option. For our marketing-related intangible assets a similar qualitative option is also currently available. However, we currently use a discounted cash flow model, or the income approach, under the relief-from-royalty method to determine the fair value of our marketing-related intangible assets in order to confirm there is no impairment required. For our marketing-related intangible assets, if we do not use this qualitative assessment option, we could still in the future elect to use this option.

In order to estimate the fair value of goodwill, we also primarily use an income approach. The determination of impairment is made at the reporting unit level and consists of two steps. First, we determine the fair value of a reporting unit and compare it to its carrying amount. The determination of the fair value of the reporting units requires us to make significant estimates and assumptions. These estimates and assumptions include estimates of future revenues and expense growth rates, capital expenditures and the depreciation and amortization related to these capital expenditures, discount rates, and other inputs. Due to the inherent uncertainty involved in making these estimates, actual future results could differ. Changes in assumptions regarding future results or other underlying assumptions could have a significant impact on the fair value of the reporting unit. Second, if the carrying amount of a reporting unit exceeds its fair value, an impairment loss is recognized for any excess of the carrying amount of the reporting unit's goodwill and other intangibles over the implied fair value as determined in Step 2 of the goodwill impairment test. Also, if during Step 1 of a goodwill impairment test we determine we have reporting units with zero or negative carrying amounts, then we perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. During Step 2 of a goodwill impairment test, the implied fair value of goodwill is determined in a similar manner as how the amount of goodwill recognized in a business combination is determined, in accordance with Financial Accounting Standards Board, or FASB, Accounting Standards Codification, or ASC, Topic 805, Business Combinations. We would assign the fair value of a reporting unit to all of the assets and liabilities of that reporting unit as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the price paid to acquire the reporting unit. The excess of the fair value of a reporting unit over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. As of June 30, 2018 and December 31, 2017, we had goodwill of approximately \$93.5 million and \$96.9 million, respectively. As of both June 30, 2018 and December 31, 2017, we had marketing-related intangible assets of approximately \$310.0 million. The decrease in goodwill during the six months ended June 30, 2018 was due to foreign currency translation adjustments. No marketing-related intangibles or goodwill impairment was recorded during the three and six months ended June 30, 2018 and 2017.

Contingencies are accounted for in accordance with FASB ASC Topic 450, Contingencies, or ASC 450. ASC 450 requires that we record an estimated loss from a loss contingency when information available prior to issuance of our financial statements indicates that it is probable that an asset has been impaired or a liability has been incurred at the

date of the financial statements and the amount of the loss can be reasonably estimated. We also disclose material contingencies when we believe a loss is not probable but reasonably possible as required by ASC 450. Accounting for contingencies such as legal and non-income tax matters requires us to use judgment related to both the likelihood of a loss and the estimate of the amount or range of loss. Many of these legal and tax contingencies can take years to be resolved. Generally, as the time period increases over which the uncertainties are resolved, the likelihood of changes to the estimate of the ultimate outcome increases.

57

We evaluate the realizability of our deferred tax assets by assessing the valuation allowance and by adjusting the amount of such allowance, if necessary. Although realization is not assured, we believe it is more likely than not that the net carrying value will be realized. The amount of the carryforwards that is considered realizable, however, could change if estimates of future taxable income are adjusted. In the ordinary course of our business, there are many transactions and calculations where the tax law and ultimate tax determination is uncertain. As part of the process of preparing our condensed consolidated financial statements, we are required to estimate our income taxes in each of the jurisdictions in which we operate prior to the completion and filing of tax returns for such periods. These estimates involve complex issues and require us to make judgments about the likely application of the tax law to our situation, as well as with respect to other matters, such as anticipating the positions that we will take on tax returns prior to us actually preparing the returns and the outcomes of disputes with tax authorities. The ultimate resolution of these issues may take extended periods of time due to examinations by tax authorities and statutes of limitations. In addition, changes in our business, including acquisitions, changes in our international corporate structure, changes in the geographic location of business functions or assets, changes in the geographic mix and amount of income, as well as changes in our agreements with tax authorities, valuation allowances, applicable accounting rules, applicable tax laws and regulations, rulings and interpretations thereof, developments in tax audit and other matters, and variations in the estimated and actual level of annual pre-tax income can affect the overall effective income tax rate.

We account for uncertain tax positions in accordance with FASB ASC Topic 740, Income Taxes, or ASC 740, which provides guidance on the determination of how tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under ASC 740, we must recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position are measured based on the largest benefit that has a greater than fifty percent likelihood of being realized upon ultimate resolution.

On December 22, 2017, the U.S. enacted the 2017 Tax Cuts and Jobs Act, or the U.S. Tax Reform, which contains several key tax provisions that affect us, including, but not limited to, a one-time mandatory transition tax on accumulated foreign earnings, changes in the sourcing and calculation of foreign income, and a reduction of the corporate income tax rate to 21% effective January 1, 2018. We are required to recognize the effect of the tax law changes in the period of enactment, such as determining the transition tax, remeasuring its U.S. deferred tax assets and liabilities as well as reassessing the net realizability of our deferred tax assets and liabilities. In December 2017, the staff of the Securities and Exchange Commission issued Staff Accounting Bulletin No. 118, Income Tax Accounting Implications of the Tax Cuts and Jobs Act, which allows us to record provisional amounts during a measurement period not to extend beyond one year of the enactment date. See Note 12, Income Taxes, to the Consolidated Financial Statements included in the 2017 10-K for a further discussion of the U.S. Tax Reform.

We account for foreign currency transactions in accordance with FASB ASC Topic 830, Foreign Currency Matters. In a majority of the countries where we operate, the functional currency is the local currency. Our foreign subsidiaries' asset and liability accounts are translated for consolidated financial reporting purposes into U.S. dollar amounts at period-end exchange rates. Revenue and expense accounts are translated at the average rates during the year. Our foreign currency translation adjustments are included in accumulated other comprehensive loss on our accompanying condensed consolidated balance sheets. Foreign currency transaction gains and losses and foreign currency remeasurements are generally included in selling, general, and administrative expenses in the accompanying condensed consolidated statements of income.

New Accounting Pronouncements

See discussion under Note 2, Significant Accounting Policies, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q, for information on new accounting pronouncements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risks, which arise during the normal course of business from changes in interest rates and foreign currency exchange rates. On a selected basis, we use derivative financial instruments to manage or hedge certain risks. All hedging transactions are authorized and executed pursuant to written guidelines and procedures.

58

We apply FASB ASC Topic 815, Derivatives and Hedging, or ASC 815, which established accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities. All derivatives, whether designated in hedging relationships or not, are required to be recorded on the balance sheet at fair value. If the derivative is designated as a fair-value hedge, the changes in the fair value of the derivative and the underlying hedged item are recognized concurrently in earnings. If the derivative is designated as a cash-flow hedge, changes in the fair value of the derivative are recorded in other comprehensive income (loss) and are recognized in the condensed consolidated statements of income when the hedged item affects earnings. ASC 815 defines the requirements for designation and documentation of hedging relationships as well as ongoing effectiveness assessments in order to use hedge accounting. For a derivative that does not qualify as a hedge, changes in fair value are recognized concurrently in earnings.

A discussion of our primary market risk exposures and derivatives is presented below.

Foreign Exchange Risk

We transact business globally and are subject to risks associated with changes in foreign exchange rates. Our objective is to minimize the impact to earnings and cash flow associated with foreign exchange rate fluctuations. We enter into foreign exchange derivatives in the ordinary course of business primarily to reduce exposure to currency fluctuations attributable to intercompany transactions, translation of local currency earnings, inventory purchases subject to foreign currency exposure, and to partially mitigate the impact of foreign currency rate fluctuations. Due to volatility in foreign exchange markets, our current strategy, in general, is to hedge some of the significant exposures on a short-term basis. We will continue to monitor the foreign exchange markets and evaluate our hedging strategy accordingly. With the exception of our foreign exchange forward contracts relating to forecasted inventory purchases and intercompany management fees discussed below, all of our foreign exchange contracts are designated as freestanding derivatives for which hedge accounting does not apply. The changes in the fair value of the derivatives not qualifying as cash flow hedges are included in selling, general, and administrative expenses in our condensed consolidated statements of income.

The foreign exchange forward contracts designated as freestanding derivatives are used to hedge advances between subsidiaries and to partially mitigate the impact of foreign currency fluctuations. The fair value of foreign exchange derivative contracts is based on third-party quotes. Our foreign currency derivative contracts are generally executed on a monthly basis.

We also purchase foreign currency forward contracts in order to hedge forecasted inventory transactions and intercompany management fees that are designated as cash-flow hedges and are subject to foreign currency exposures. We applied the hedge accounting rules as required by ASC 815 for these hedges. These contracts allow us to buy and sell certain currencies at specified contract rates. As of June 30, 2018 and December 31, 2017, the aggregate notional amounts of these contracts outstanding were approximately \$78.2 million and \$104.9 million, respectively. As of June 30, 2018, the outstanding contracts were expected to mature over the next fifteen months. Our derivative financial instruments are recorded on the condensed consolidated balance sheets at fair value based on quoted market rates. For the forecasted inventory transactions, the forward contracts are used to hedge forecasted inventory transactions over specific months. Changes in the fair value of these forward contracts, excluding forward points, designated as cash-flow hedges are recorded as a component of accumulated other comprehensive loss within shareholders' deficit, and are recognized in cost of sales in the condensed consolidated statements of income during the period which approximates the time the hedged inventory is sold. We also hedge forecasted intercompany management fees over specific months. Changes in the fair value of these forward contracts designated as cash flow hedges are recorded as a component of accumulated other comprehensive loss within shareholders' deficit, and are recognized in selling, general, and administrative expenses in the condensed consolidated statements of income in the period when the hedged item and underlying transaction affects earnings. As of June 30, 2018, we recorded assets at

fair value of \$1.5 million and liabilities at fair value of \$1.0 million relating to all outstanding foreign currency contracts designated as cash-flow hedges. As of December 31, 2017, we recorded assets at fair value of \$2.9 million and liabilities at fair value of \$4.0 million relating to all outstanding foreign currency contracts designated as cash-flow hedges. During the three and six months ended June 30, 2018 and 2017, the ineffective portion relating to these hedges was immaterial and the hedges remained effective as of June 30, 2018 and December 31, 2017.

As of June 30, 2018 and December 31, 2017, the majority of our outstanding foreign currency forward contracts had maturity dates of less than twelve months with the majority of freestanding derivatives expiring within one month as of June 30, 2018 and December 31, 2017.

The following table provides information about the details of our foreign exchange forward contracts:

	Weighted-Average Contract Rate (in millions, except weighted-average contract rate)	Notional Amount	Fair Value Gain (Loss)
As of June 30, 2018			
Buy Argentine peso sell U.S. dollar	27.65	\$ 0.3	\$ —
Buy Brazilian real sell Euro	4.44	0.4	—
Buy Brazilian real sell U.S. dollar	3.80	5.3	(0.1)
Buy Chinese yuan sell Euro	8.14	59.7	1.2
Buy Colombian peso sell U.S. dollar	2,888.56	2.9	—
Buy Czech koruna sell Euro	25.91	0.7	—
Buy Euro sell Australian dollar	1.57	4.4	—
Buy Euro sell Brazilian real	4.35	0.5	—
Buy Euro sell Canadian dollar	1.54	0.6	—
Buy Euro sell Czech koruna	25.78	0.7	—
Buy Euro sell Ghanaian cedi	5.69	6.8	—
Buy Euro sell Hong Kong dollar	9.17	8.1	—
Buy Euro sell Indonesian rupiah	16,673.21	5.0	—
Buy Euro sell Japanese yen	128.19	0.2	—
Buy Euro sell Kazakhstani tenge	398.90	1.3	—
Buy Euro sell Mexican peso	24.07	35.0	(0.3)
Buy Euro sell Malaysian ringgit	4.68	3.8	—
Buy Euro sell Peruvian nuevo sol	3.83	2.2	—
Buy Euro sell Philippine peso	62.48	3.5	—
Buy Euro sell Russian ruble	73.35	9.1	—
Buy Euro sell Thai baht	38.26	0.6	—
Buy Euro sell Taiwan dollar	35.38	1.3	—
Buy Euro sell Ukrainian hryvnia	31.27	2.1	—
Buy Euro sell U.S. dollar	1.19	67.8	(0.8)
Buy Euro sell South African rand	15.59	6.7	0.2

The majority of our foreign subsidiaries designate their local currencies as their functional currencies. See Liquidity and Capital Resources — Cash and Cash Equivalents in Part I, Item 2 — Management’s Discussion and Analysis of Financial Condition and Results of Operations for further discussion of our foreign subsidiary cash and cash equivalents.

Interest Rate Risk

As of June 30, 2018, the aggregate annual maturities of the Credit Facility were expected to be \$48.8 million for the remainder of 2018, \$97.5 million for 2019, \$97.5 million for 2020, \$97.5 million for 2021, \$97.5 million for 2022, and \$739.4 million thereafter. As of June 30, 2018, the fair value of the Term Loan was approximately \$1,189.2 million and the carrying value was \$1,145.3 million. As of December 31, 2017, the fair value of the Term Loan was approximately \$1,226.1 million and the carrying value was \$1,190.2 million. There were no outstanding borrowings on the Revolving Credit Facility as of June 30, 2018 and December 31, 2017. The Credit Facility bears variable interest rates, and as of June 30, 2018 and December 31, 2017, the weighted-average interest rate of the Credit Facility was 7.34% and 6.79%, respectively. As of June 30, 2018 the fair values of the liability component of the 2019 Convertible Notes and 2024 Convertible Notes were approximately \$637.7 million and \$423.2 million, respectively, and the carrying values were \$642.0 million and \$405.8 million, respectively. As of December 31, 2017, the fair value of the liability component of the 2019 Convertible Notes was approximately \$1,066.0 million and the carrying value was \$1,070.0 million. The 2019 Convertible Notes pay interest at a fixed rate of 2.00% per annum payable semiannually in arrears on February 15 and August 15 of each year, beginning on August 15, 2014. The 2019 Convertible Notes mature on August 15, 2019, unless earlier repurchased or converted. We may not redeem the 2019 Convertible Notes prior to their stated maturity date. The 2024 Convertible Notes pay interest at a fixed rate of 2.625% per annum payable semiannually in arrears on March 15 and September 15 of each year, beginning on September 15, 2018. The 2024 Convertible Notes mature on March 15, 2024, unless redeemed, repurchased or converted in accordance with their terms prior to such date. Since our Credit Facility is based on variable interest rates, and as we have not entered into any interest swap arrangements, if interest rates were to increase or decrease by 1% for the year, and our borrowing amounts stayed constant on our Credit Facility, our annual interest expense could increase or decrease by approximately \$11.8 million.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures. Our management, including our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, or the Exchange Act) as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on such evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of June 30, 2018.

Changes in Internal Control over Financial Reporting. There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the quarter ended June 30, 2018 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

FORWARD-LOOKING STATEMENTS

This document contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements other than statements of historical fact are “forward-looking statements” for purposes of federal and state securities laws, including any projections of earnings, revenue or other financial items; any statements of the plans, strategies and objectives of management for future operations; any statements concerning proposed new services or developments; any statements regarding future economic conditions or performance; any statements of belief; and any statements of assumptions underlying any of the foregoing. Forward-looking statements may include, among other, the words “may,” “will,” “estimate,” “intend,” “continue,” “believe,” “expect,” “anticipate” or any other similar words.

Although we believe that the expectations reflected in any of our forward-looking statements are reasonable, actual results could differ materially from those projected or assumed in any of our forward-looking statements. Our future financial condition and results of operations, as well as any forward-looking statements, are subject to change and to inherent risks and uncertainties, such as those disclosed or incorporated by reference in our filings with the Securities and Exchange Commission. Important factors that could cause our actual results, performance and achievements, or industry results to differ materially from estimates or projections contained in our forward-looking statements include, among others, the following:

- our relationship with, and our ability to influence the actions of, our Members;
- improper action by our employees or Members in violation of applicable law;
- adverse publicity associated with our products or network marketing organization, including our ability to comfort the marketplace and regulators regarding our compliance with applicable laws;
- changing consumer preferences and demands;
- the competitive nature of our business;
- regulatory matters governing our products, including potential governmental or regulatory actions concerning the safety or efficacy of our products and network marketing program, including the direct selling markets in which we operate;
- legal challenges to our network marketing program;
- the consent order entered into with the FTC, the effects thereof and any failure to comply therewith;
- risks associated with operating internationally and the effect of economic factors, including foreign exchange, inflation, disruptions or conflicts with our third-party importers, pricing and currency devaluation risks, especially in countries such as Venezuela;
- uncertainties relating to interpretation and enforcement of legislation in China governing direct selling and anti-pyramiding;
- our inability to obtain the necessary licenses to expand our direct selling business in China;
- adverse changes in the Chinese economy;
- our dependence on increased penetration of existing markets;
- any material disruption to our business caused by natural disasters, other catastrophic events, acts of war or terrorism, or cyber-security incidents;
- contractual limitations on our ability to expand our business;
- our reliance on our information technology infrastructure and outside manufacturers;
- the sufficiency of our trademarks and other intellectual property rights;
- product concentration;
- our reliance upon, or the loss or departure of any member of, our senior management team which could negatively impact our Member relations and operating results;
- U.S. and foreign laws and regulations applicable to our international operations;
- uncertainties relating to the United Kingdom’s vote to exit from the European Union;
- restrictions imposed by covenants in our credit facility;

- risks related to the convertible notes;
- uncertainties relating to the application of transfer pricing, duties, value added taxes, and other tax regulations, and changes thereto;
- changes in tax laws, treaties or regulations, or their interpretation;
- taxation relating to our Members;
- product liability claims;
- our incorporation under the laws of the Cayman Islands;
- whether we will purchase any of our shares in the open markets or otherwise; and
- share price volatility related to, among other things, speculative trading and certain traders shorting our common shares.

Additional factors that could cause actual results to differ materially from our forward-looking statements are set forth in this Quarterly Report on Form 10-Q, including under the heading “Risk Factors,” “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and in our Condensed Consolidated Financial Statements and the related Notes.

Forward-looking statements in this Quarterly Report on Form 10-Q speak only as of the date hereof, and forward-looking statements in documents attached that are incorporated by reference speak only as of the date of those documents. We do not undertake any obligation to update or release any revisions to any forward-looking statement or to report any events or circumstances after the date hereof or to reflect the occurrence of unanticipated events, except as required by law.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

See discussion under Note 5, Contingencies, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q, which is incorporated herein by reference.

Item 1A. Risk Factors

Risks Related to Us and Our Business

Our failure to establish and maintain Member and sales leader relationships for any reason could negatively impact sales of our products and harm our financial condition and operating results.

We distribute our products exclusively to and through independent Members, and we depend upon them directly for substantially all of our sales. Our Members, including our sales leaders, may voluntarily terminate their Member agreements with us at any time. To increase our revenue, we must increase the number of, or the productivity of, our Members. Accordingly, our success depends in significant part upon our ability to recruit, retain and motivate a large base of Members. The loss of a significant number of Members for any reason could negatively impact sales of our products and could impair our ability to attract new Members. In our efforts to attract and retain Members, we compete with other network marketing organizations, including those in the weight management, dietary and nutritional supplement and personal care and cosmetic product industries. Our operating results could be harmed if our existing and new business opportunities and products do not generate sufficient interest to retain existing Members and attract new Members.

Our Member organization has a high turnover rate, which is a common characteristic found in the direct selling industry. See Item 7 — Management's Discussion and Analysis of Financial Condition and Results of Operations of the 2017 10-K for additional information regarding sales leader retention rates.

Because we cannot exert the same level of influence or control over our independent Members as we could were they our own employees, our Members could fail to comply with applicable law or our Member rules and procedures, which could result in claims against us that could harm our financial condition and operating results.

Our Members are independent contractors and, accordingly, we are not in a position to directly provide the same direction, motivation and oversight as we would if Members were our own employees. As a result, there can be no assurance that our Members will participate in our marketing strategies or plans, accept our introduction of new products, or comply with our Member rules and procedures.

Extensive federal, state and local laws regulate our business, products and network marketing program. Because we have expanded into foreign countries, our policies and procedures for our independent Members differ due to the different legal requirements of each country in which we do business. While we have implemented Member policies and procedures designed to govern Member conduct and to protect the goodwill associated with Herbalife trademarks and tradenames, it can be difficult to enforce these policies and procedures because of the large number of Members and their independent status. Violations by our independent Members of applicable law or of our policies and procedures in dealing with customers could reflect negatively on our products and operations and harm our business reputation. In addition, it is possible that a court could hold us civilly or criminally accountable based on vicarious liability because of the actions of our independent Members.

Adverse publicity associated with our products, ingredients or network marketing program, or those of similar companies, could harm our financial condition and operating results.

The size of our distribution force and the results of our operations may be significantly affected by the public's perception of the Company and similar companies. This perception is dependent upon opinions concerning:

- the safety and quality of our products and ingredients;
- the safety and quality of similar products and ingredients distributed by other companies;
- our Members;
- our network marketing program; and
- the direct selling business generally.

64

Adverse publicity concerning any actual or purported failure of our Company or our Members to comply with applicable laws and regulations regarding product claims and advertising, good manufacturing practices, the regulation of our network marketing program, the registration of our products for sale in our target markets or other aspects of our business, whether or not resulting in enforcement actions or the imposition of penalties, could have an adverse effect on the goodwill of our Company and could negatively affect our ability to attract, motivate and retain Members, which would negatively impact our ability to generate revenue. We cannot ensure that all of our Members will comply with applicable legal requirements relating to the advertising, labeling, licensing or distribution of our products.

In addition, our Members' and consumers' perception of the safety and quality of our products and ingredients as well as similar products and ingredients distributed by other companies can be significantly influenced by media attention, publicized scientific research or findings, widespread product liability claims and other publicity concerning our products or ingredients or similar products and ingredients distributed by other companies. Adverse publicity, whether or not accurate or resulting from consumers' use or misuse of our products, that associates consumption of our products or ingredients, or any similar products or ingredients with illness or other adverse effects, questions the benefits of our or similar products or claims that any such products are ineffective, inappropriately labeled or have inaccurate instructions as to their use, could lead to lawsuits or other legal challenges and could negatively impact our reputation, the market demand for our products, or our general business.

From time to time, we receive inquiries from government agencies and third parties requesting information concerning our products. We fully cooperate with these inquiries including, when requested, by the submission of detailed technical dossiers addressing product composition, manufacturing, process control, quality assurance, and contaminant testing. Further, we periodically respond to requests from regulators for additional information regarding product-specific adverse events. We are confident in the safety of our products when used as directed. However, there can be no assurance that regulators in these or other markets will not take actions that might delay or prevent the introduction of new products, or require the reformulation or the temporary or permanent withdrawal of certain of our existing products from their markets.

Adverse publicity relating to us, our products or our operations, including our network marketing program or the attractiveness or viability of the financial opportunities provided thereby, has had, and could again have, a negative effect on our ability to attract, motivate and retain Members, and it could also affect our share price. In the mid-1980s, our products and marketing program became the subject of regulatory scrutiny in the United States, resulting in large part from claims and representations made about our products by our Members, including impermissible therapeutic claims. The resulting adverse publicity caused a rapid, substantial loss of Members in the United States and a corresponding reduction in sales beginning in 1985. In addition, in late 2012, a hedge fund manager publicly raised allegations regarding the legality of our network marketing program and announced that his fund had taken a significant short position regarding our common shares, leading to intense public scrutiny and governmental inquiries, and significant stock price volatility. We expect that negative publicity will, from time to time, continue to negatively impact our business in particular markets and may adversely affect our share price.

Our failure to appropriately respond to changing consumer preferences and demand for new products or product enhancements could significantly harm our Member and customer relationships and product sales and harm our financial condition and operating results.

Our business is subject to changing consumer trends and preferences, especially with respect to weight management, targeted nutrition, energy, sports & fitness, and other nutrition products. Our continued success depends in part on our ability to anticipate and respond to these changes, and we may not respond in a timely or commercially appropriate manner to such changes. Furthermore, the nutritional supplement industry is characterized by rapid and frequent changes in demand for products and new product introductions and enhancements. Our failure to accurately predict

these trends could negatively impact consumer opinion of our products, which in turn could harm our customer and Member relationships and cause the loss of sales. The success of our new product offerings and enhancements depends upon a number of factors, including our ability to:

- accurately anticipate customer needs;
- innovate and develop new products or product enhancements that meet these needs;
 - successfully commercialize new products or product enhancements in a timely manner;
- price our products competitively;
- manufacture and deliver our products in sufficient volumes and in a timely manner; and
- differentiate our product offerings from those of our competitors.

65

If we do not introduce new products or make enhancements to meet the changing needs of our customers in a timely manner, some of our products could be rendered obsolete, which could negatively impact our revenues, financial condition and operating results.

Due to the high level of competition in our industry, we might fail to retain our customers and Members, which would harm our financial condition and operating results.

The business of marketing weight management and nutrition products is highly competitive and sensitive to the introduction of new products or weight management plans, including various prescription drugs, which may rapidly capture a significant share of the market. These market segments include numerous manufacturers, distributors, marketers, retailers and physicians that actively compete for the business of consumers both in the United States and abroad. In addition, we are subject to increasing competition from sellers that utilize electronic commerce. Some of these competitors have longer operating histories, significantly greater financial, technical, product development, marketing and sales resources, greater name recognition, larger established customer bases and better-developed distribution channels than we do. Our present or future competitors may be able to develop products that are comparable or superior to those we offer, adapt more quickly than we do to new technologies, evolving industry trends and standards or customer requirements, or devote greater resources to the development, promotion and sale of their products than we do. For example, if our competitors develop other diet or weight management products that prove to be more effective than our products, demand for our products could be reduced. Accordingly, competition may intensify and we may not be able to compete effectively in our markets.

We are also subject to significant competition for the recruitment of Members from other network marketing organizations, including those that market weight management products, dietary and nutritional supplements, personal care products, and other types of products, as well as those organizations in which former employees or Members of the Company are involved. We compete for global customers and Members with regard to weight management, nutritional supplement and personal care products. Our competitors include both direct selling companies such as NuSkin Enterprises, Nature's Sunshine, Alticor/Amway, Melaleuca, Avon Products, Oriflame, Omnilife, Tupperware and Mary Kay, as well as retail establishments such as Weight Watchers, Jenny Craig, General Nutrition Centers, Wal-Mart and retail pharmacies.

In addition, because the industry in which we operate is not particularly capital intensive or otherwise subject to high barriers to entry, it is relatively easy for new competitors to emerge that will compete with us for our Members and customers. Furthermore, the fact that our Members may easily enter and exit our network marketing program contributes to the level of competition that we face. For example, a Member can enter or exit our network marketing system with relative ease at any time without facing a significant investment or loss of capital because (1) we have a low upfront financial cost to become a Herbalife Member, (2) we do not require any specific amount of time to work as a Member, (3) we do not charge Members for any training that we might require, (4) we do not prohibit a new Member from working with another company, and (5) in substantially all jurisdictions, we maintain a buyback program pursuant to which we will repurchase products sold to a Member who has decided to leave the business. Our ability to remain competitive therefore depends, in significant part, on our success in recruiting and retaining Members through an attractive compensation plan, the maintenance of an attractive product portfolio and other incentives. We cannot ensure that our programs for recruitment and retention of Members will be successful and if they are not, our financial condition and operating results would be harmed.

We are affected by extensive laws, governmental regulations, administrative determinations, court decisions and similar constraints both domestically and abroad, and our failure or our Members' failure to comply with these constraints could lead to the imposition of significant penalties or claims, which could harm our financial condition and operating results.

In both domestic and foreign markets, the formulation, manufacturing, packaging, labeling, distribution, advertising, importation, exportation, licensing, sale and storage of our products are affected by extensive laws, governmental regulations, administrative determinations, court decisions and other similar constraints. Such laws, regulations and other constraints may exist at the federal, state or local levels in the United States and at all levels of government in foreign jurisdictions. There can be no assurance that we or our Members are in compliance with all of these regulations. Our failure or our Members' failure to comply with these regulations or new regulations could disrupt our Members' sale of our products, or lead to the imposition of significant penalties or claims and could negatively impact our business. In addition, the adoption of new regulations or changes in the interpretations of existing regulations, such as those relating to genetically modified foods, may result in significant compliance costs or discontinuation of product sales and may negatively impact the marketing of our products, resulting in significant loss of sales revenues.

The Consent Order prohibits us from making, or allowing our Members to make, any representation regarding the amount or level of income, including full-time or part-time income, that a participant can reasonably expect to earn in our network marketing program, unless the representation is non-misleading and we possess competent and reliable evidence sufficient to substantiate that the representation is true. The Consent Order also prohibits us and other persons who act in active concert with us from representing that participation in the network marketing program will result in a lavish lifestyle and from using images or descriptions to represent or imply that participation in the program is likely to result in a lavish lifestyle. In addition, the Consent Order prohibits specified misrepresentations in connection with marketing the program, including misrepresentations regarding any fact material to participation such as the cost to participate or the amount of income likely to be earned. The Consent Order also requires us to clearly and conspicuously disclose all information material to participation in the marketing program, including our refund and buyback policy before the participant pays any money to us.

On January 4, 2018, the FTC released its Business Guidance Concerning Multi-Level Marketing, or MLM Guidance, in order to help multi-level marketers, or MLMs, apply core consumer protection principles applicable to the multi-level marketing industry to their business practices. Although the MLM Guidance is not binding, the MLM Guidance explains, among other things, how the FTC distinguishes between MLMs with lawful and unlawful compensation structures, how MLMs with unfair or deceptive compensation structures harm consumers, how the FTC treats personal or internal consumption by participants in determining if an MLM's compensation structure is unfair or deceptive, and how an MLM should approach representations to current and prospective participants. Although we believe our current business practices, which include new and enhanced procedures implemented in connection with the Consent Order, are in compliance with the MLM Guidance, there can be no assurances that the FTC or other third parties would agree.

The FTC revised its Guides Concerning the Use of Endorsements and Testimonials in Advertising, or Guides, which became effective on December 1, 2009. Although the Guides are not binding, they explain how the FTC interprets Section 5 of the FTC Act's prohibition on unfair or deceptive acts or practices. Consequently, the FTC could bring a Section 5 enforcement action based on practices that are inconsistent with the Guides. Under the revised Guides, advertisements that feature a consumer and convey his or her atypical experience with a product or service are required to clearly disclose the results that consumers can generally expect. In contrast to the 1980 version of the Guides, which allowed advertisers to describe atypical results in a testimonial as long as they included a disclaimer such as "results not typical", the revised Guides no longer contain such a safe harbor. The revised Guides also add new examples to illustrate the long-standing principle that "material connections" between advertisers and endorsers (such as payments or free products), connections that consumers might not expect, must be disclosed. Herbalife has revised its marketing materials to be compliant with the revised Guides and the Consent Order. However, it is possible that our use, and that of our Members, of testimonials in the advertising and promotion of our products, including but not limited to our weight management products and our income opportunity, will be significantly impacted and therefore might negatively impact our sales.

Governmental regulations in countries where we plan to commence or expand operations may prevent or delay entry into those markets. In addition, our ability to sustain satisfactory levels of sales in our markets is dependent in significant part on our ability to introduce new products into such markets. However, governmental regulations in our markets, both domestic and international, can delay or prevent the introduction, or require the reformulation or withdrawal, of certain of our products. Any such regulatory action, whether or not it results in a final determination adverse to us, could create negative publicity, with detrimental effects on the motivation and recruitment of Members and, consequently, on sales.

We are subject to rules of the Food and Drug Administration, or FDA, for current good manufacturing practices, or cGMPs, for the manufacture, packing, labeling and holding of dietary supplements and over-the-counter drugs distributed in the United States. Herbalife has implemented a comprehensive quality assurance program that is

designed to maintain compliance with the cGMPs for products manufactured by or on behalf of Herbalife for distribution in the United States. However, if Herbalife should be found not to be in compliance with cGMPs for the products we self-manufacture, it could negatively impact our reputation and ability to sell our products even after any such situation had been rectified. Further, if contract manufacturers that manufacture products for Herbalife fail to comply with the cGMPs, this could negatively impact Herbalife's reputation and ability to sell its products even though Herbalife is not directly liable under the cGMPs for such compliance. In complying with the dietary supplement cGMPs, we have experienced increases in production costs as a result of the necessary increase in testing of raw ingredients, work in process and finished products.

A hedge fund manager has made allegations regarding the Company and its network marketing program. We believe these allegations are without merit and are vigorously defending ourselves against such claims, including proactively reaching out to governmental authorities about what we believe is manipulative activity with respect to our securities. Because of these allegations, we and others have received and may receive additional regulatory and governmental inquiries. For example, we have previously disclosed inquiries from the FTC, SEC and other governmental authorities. The SEC has also requested from the Company documents and other information relating to the Company's disclosures regarding its marketing plan in China and we cannot predict the eventual scope, duration, or outcome of this investigation at this time. In the future, these and other governmental authorities may determine to seek information from us and other persons relating to these same or other allegations. If we believe any governmental or regulatory inquiry or investigation is or becomes material, it will be disclosed individually. Consistent with our policies, we have cooperated and will continue to fully cooperate with any governmental or regulatory inquiries or investigations.

Our network marketing program could be found to be not in compliance with current or newly adopted laws or regulations in one or more markets, which could prevent us from conducting our business in these markets or require us to alter compensation practices under our network marketing program, and harm our financial condition and operating results.

Our network marketing program is subject to a number of federal and state regulations administered by the FTC and various federal and state agencies in the United States as well as regulations on direct selling in foreign markets administered by foreign agencies. We are subject to the risk that, in one or more markets, our network marketing program could be found by federal, state or foreign regulators not to be in compliance with applicable law or regulations or we may be required to alter compensation practices under our network marketing program in order to comply with applicable law or regulations. As previously disclosed, we entered into the Consent Order with the FTC to settle the FTC's multi-year investigation into our business for compliance with these regulations. Another example is the 1986 permanent injunction entered in California in proceedings initiated by the California Attorney General. There can be no assurances other federal, state attorneys general or foreign regulators will not take similar actions.

Regulations applicable to network marketing organizations generally are directed at preventing fraudulent or deceptive schemes, sometimes referred to as "pyramid" or "chain sales" schemes, by ensuring that product sales ultimately are made to consumers and that advancement within an organization is based on sales of the organization's products rather than investments in the organization or other non-retail sales-related criteria. The regulatory requirements concerning network marketing programs do not include "bright line" rules and are inherently fact-based and, thus, we are subject to the risk that these laws or regulations or the enforcement or interpretation of these laws and regulations by governmental agencies or courts can change. While we believe we are in compliance with these regulations, including those enforced by the FTC and the permanent injunction in California, and are compliant with the Consent Order, there is no assurance any federal, state or foreign courts or agencies or the independent compliance auditor under the Consent Order would agree, including a federal court or the FTC in respect of the Consent Order or a court or the California Attorney General in respect to the permanent injunction.

The ambiguity surrounding these laws can also affect the public perception of the Company. Specifically, in late 2012, a hedge fund manager publicly raised allegations regarding the legality of our network marketing program and announced that his fund had taken a significant short position regarding our common shares, leading to intense public scrutiny and significant stock price volatility. The failure of our network marketing program to comply with current or newly adopted laws or regulations, the Consent Order or the California injunction or any allegations or charges to that effect brought by federal, state, or foreign regulators could negatively impact our business in a particular market or in general and may adversely affect our share price.

We are also subject to the risk of private party challenges to the legality of our network marketing program, whether as a result of the Consent Order or otherwise. Some network marketing programs of other companies have been successfully challenged in the past, while other challenges to network marketing programs of other companies have been defeated. Adverse judicial determinations with respect to our network marketing program, or in proceedings not involving us directly but which challenge the legality of network marketing systems, in any other market in which we operate, could negatively impact our business.

68

We are subject to the Consent Order with the FTC, the effects of which, or any failure to comply therewith, could harm our financial condition and operating results.

As previously disclosed, on July 15, 2016, we reached a consensual resolution with the FTC regarding its multi-year investigation of our business resulting in the entry into a Stipulation to Entry of Order for Permanent Injunction and Monetary Judgment in the U.S. District Court for the Central District of California. The Consent Order became effective on July 25, 2016 upon final approval by the Court. As part of the Consent Order, we agreed to make a payment of \$200 million and to implement certain new procedures and enhance certain existing procedures in the United States. We also agreed to be subject to certain audits by an independent compliance auditor, or the ICA, for a period of seven years; requirements regarding compliance certification and record creation and maintenance; and a prohibition on misrepresentations and misleading claims regarding, among other things, income and lavish lifestyles. The FTC and ICA will also have the right to inspect Company records and request additional compliance reports for purposes of conducting audits pursuant to the Consent Order. In September 2016, we and the FTC mutually selected Affiliated Monitors, Inc. to serve as the ICA. The terms of the Consent Order are described in greater detail in our Current Report on Form 8-K filed on July 15, 2016.

The Consent Order includes a number of restrictions and requirements and therefore creates compliance risks, and while we believe we are fully compliant with the Consent Order, there is no guarantee that we are fully compliant or in the future will continue to be fully compliant with the Consent Order. We do not believe the Consent Order changes our business model as a direct selling company. However, compliance with the Consent Order required us to implement enhanced procedures regarding, among other things, tracking retail sales and internal consumption by distributors. We have instituted controls and procedures and developed technology solutions that we believe address these Consent Order requirements, including tools and software used by distributors to, among other things, document their sales and more efficiently track and manage their customer base. However, there can be no assurances that some or all of these controls and procedures and technology solutions will continue to operate as expected. Any failure of these systems to operate as designed could cause us to fail to maintain the records required under, or otherwise violate terms of, the Consent Order. Compliance with the Consent Order will require the cooperation of Members and, while we have updated our training programs and policies to address the Consent Order and expect our Members to cooperate, we do not have the same level of influence or control over our Members as we could were they our own employees. Failure by our Members to comply with the relevant aspects of the Consent Order could be a violation of the Consent Order and impact our ability to comply. While we believe we are compliant with the Consent Order and our board of directors has established the Implementation Oversight Committee, a committee which meets regularly with management to oversee our compliance with the terms of the Consent Order, there can be no assurances that the FTC or ICA would agree now or will agree in the future. In the event we are found to be in violation of the Consent Order, the FTC could, among other things, take corrective actions such as initiating enforcement actions, seeking an injunction or other restrictive orders and imposing civil monetary penalties against us and our officers and directors.

The Consent Order has impacted, and may continue to impact, our business operations, including our net sales and profitability. For example, the Consent Order imposes certain requirements regarding the verification and receipting of sales and there can be no assurances that these or other requirements of the Consent Order, our compliance therewith and the business procedures implemented as a result thereof, will not continue to lead to reduced sales, whether as a result of undocumented sales activity or otherwise. The Consent Order also imposes restrictions on distributors' ability to open Nutrition Clubs in the United States. Additionally, the procedures described above, and any other actions taken in respect of continuing compliance efforts with the Consent Order, may continue to be costly. These extensive costs or any amounts in excess of our cost estimates could have a material adverse effect on our financial condition and results of operations. Our Members may also disagree with our decision to enter into the Consent Order, whether because they disagree with certain terms thereof, they believe it will negatively impact their personal business or they would not have settled the investigation on any terms. The Consent Order also provides that if the total eligible U.S. sales on which compensation may be paid falls below 80% of the Company's total U.S. sales

for a given year, compensation payable to distributors on eligible U.S. sales will be capped at 41.75% of the Net Rewardable Sales amount as defined in the Consent Order. While we believe we will continue to achieve the required 80% threshold necessary to pay full distributor compensation, this result is subject to the review and audit of the FTC and ICA and they may not agree with our conclusions. Because our business is dependent on our Members, our business operations and net sales could be adversely affected if U.S. distributor compensation is restricted or if any meaningful number of Members are dissatisfied, choose to reduce activity levels or leave our business altogether. Member dissatisfaction may also negatively impact the willingness of new Members to join Herbalife as a distributor. Further, management and the board of directors may be required to focus a substantial amount of time on compliance activities, which could divert their attention from running and growing our business. We may also be required to suspend or defer many or all of our current or anticipated business development, capital deployment and other projects unrelated to compliance with the Consent Order to allow resources to be focused on our compliance efforts, which could cause us to fall short of our guidance or analyst or investor expectations. In addition, while we believe the Consent Order has set new standards within the industry, our competitors are not required to comply with the Consent Order and may not be subject to similar actions, which could limit our ability to effectively compete for Members, customers and ultimately net sales.

The Consent Order also creates additional third-party risks. Although the Consent Order resolved the FTC's multi-year investigation into the Company, it does not prevent other third-parties from bringing actions against us, whether in the form of other state, federal or foreign regulatory investigations or proceedings, or private litigation, any of which could lead to, among other things, monetary settlements, fines, penalties or injunctions. Although we neither admitted nor denied the allegations in the FTC's complaint in agreeing to the terms of the Consent Order (except as to the Court having jurisdiction over the matter), third-parties may use specific statements or other matters addressed in the Consent Order as the basis for their action. The Consent Order or any subsequent legal or regulatory claim may also lead to negative publicity, whether because some view it as a condemnation of the Company or our direct selling business model or because other third parties use it as justification to make unfounded and baseless assertions against us, our business model or our Members. An increase in the number, severity or scope of third-party claims, actions or public assertions may result in substantial costs and harm to our reputation. The Consent Order may also impact third parties' willingness to work with us as a company.

We believe we have complied with the Consent Order and we will continue to do so. However, the impact of the Consent Order on our business, including the effectiveness of the controls, procedures and technology solutions implemented to comply therewith, and on our business and our member base, could be significant. If our business is adversely impacted, it is uncertain as to whether, or how quickly, we would be able to rebuild, irrespective of market conditions. Our financial condition and results of operations could be harmed if we fail to continue to comply with the Consent Order, if costs related to compliance exceed our estimates, if it continues to have a negative impact on net sales, or if it leads to further legal, regulatory, or compliance claims, proceedings, or investigations or litigation.

A substantial portion of our business is conducted in foreign markets, exposing us to the risks of trade or foreign exchange restrictions, increased tariffs, foreign currency fluctuations, disruptions or conflicts with our third-party importers and similar risks associated with foreign operations.

Approximately 80% of our net sales for the year ended December 31, 2017 were generated outside the United States, exposing our business to risks associated with foreign operations. For example, a foreign government may impose trade or foreign exchange restrictions or increased tariffs, or otherwise limit or restrict our ability to import products into a country, any of which could negatively impact our operations. We are also exposed to risks associated with foreign currency fluctuations. For instance, purchases from suppliers are generally made in U.S. dollars while sales to Members are generally made in local currencies. Accordingly, strengthening of the U.S. dollar versus a foreign currency could have a negative impact on us. Although we engage in transactions to protect against risks associated with foreign currency fluctuations, we cannot be certain any hedging activity will effectively reduce our exchange rate exposure. Additionally, we may be negatively impacted by conflicts with or disruptions caused or faced by our third-party importers, as well as conflicts between such importers and local governments or regulating agencies. Our operations in some markets also may be adversely affected by political, economic and social instability in foreign countries, as well as due to economic tensions between governments, the implementation of new or increased tariffs and other changes in international trade policies. Our operations, both domestically and internationally, could also be affected by laws and regulations related to immigration. For example, current and future tightening of U.S. immigration controls may adversely affect the residence status of non-U.S. employees in our U.S. locations or our ability to hire new non-U.S. employees in such locations and may adversely affect the ability of non-U.S. Members from entering the United States. As we continue to focus on expanding our existing international operations, these and other risks associated with international operations may increase, which could harm our financial condition and operating results.

Another risk associated with our international operations is the possibility that a foreign government may impose foreign currency remittance restrictions. Due to the possibility of government restrictions on transfers of cash out of the country and control of exchange rates, we may not be able to immediately repatriate cash at the official exchange rate. If this should occur, or if the official exchange rate devalues, it may have a material adverse effect on our

business, assets, financial condition, liquidity, results of operations or cash flows. For example, currency restrictions enacted by the Venezuelan government continue to be restrictive and have impacted the ability of our subsidiary in Venezuela, or Herbalife Venezuela, to obtain U.S. dollars in exchange for Venezuelan Bolivars at the official foreign exchange rate. These currency restrictions and current pricing restrictions continue to limit Herbalife Venezuela's ability to import U.S. dollar denominated raw materials and finished goods which in addition to the Venezuelan Bolivar devaluations has significantly negatively impacted our Venezuelan operations. If we are unsuccessful in implementing any financially and economically viable strategies, including local manufacturing, we may be required to fundamentally change our business model or suspend or cease operations in Venezuela. Also, if the foreign currency and pricing or other restrictions in Venezuela intensify or do not improve and, as a result, impact our ability to control our Venezuelan operations, we may be required to deconsolidate Herbalife Venezuela for U.S. GAAP purposes and would be subject to the risk of further impairments.

Our business in China is subject to general, as well as industry-specific, economic, political and legal developments and risks in China and requires that we utilize a modified version of the business model we use elsewhere in the world.

Our expansion of operations into China and the continued success of our business in China are subject to risks and uncertainties related to general economic, political and legal developments in China, among other things. The Chinese government exercises significant control over the Chinese economy, including but not limited to controlling capital investments, allocating resources, setting monetary policy, controlling and monitoring foreign exchange rates, implementing and overseeing tax regulations, providing preferential treatment to certain industry segments or companies and issuing necessary licenses to conduct business. In addition, we could face additional risks resulting from changes in China's data privacy and cybersecurity requirements. Accordingly, any adverse change in the Chinese economy, the Chinese legal system or Chinese governmental, economic or other policies could have a material adverse effect on our business in China and our prospects generally.

China has published regulations governing direct selling and prohibiting pyramid promotional schemes, and a number of administrative methods and proclamations have been issued. These regulations require us to use a modified version of the business model we use in other markets. To allow us to operate under these regulations, we have created and introduced a model specifically for China based on our understanding as to how Chinese regulators are interpreting and enforcing these regulations, our interpretation of applicable regulations and our understanding of the practices of other international direct selling companies in China.

In China, we have sales representatives who are permitted by the terms of our direct selling licenses to sell away from fixed retail locations in the provinces of Jiangsu, Guangdong, Shandong, Zhejiang, Guizhou, Beijing, Fujian, Sichuan, Hubei, Shanxi, Shanghai, Jiangxi, Liaoning, Jilin, Henan, Chongqing, Hebei, Shaanxi, Tianjin, Heilongjiang, Hunan, Guangxi, Hainan, Anhui, Yunnan, Gansu, Ningxia, and Inner Mongolia. In Xinjiang province, where the Company does not have a direct selling license, it has a Company-operated retail store that can directly serve customers and preferred customers. With online orderings throughout China, there has been a declining demand in Company-operated retail stores.

We also engage independent service providers who meet both the requirements to operate their own business under Chinese law as well as the conditions set forth by Herbalife to provide marketing, sales support and other services to Herbalife customers. In China, our independent service providers are compensated for marketing, sales support, and other services instead of the Member allowances and royalty overrides utilized in our global marketing plan. The service hours and related fees eligible to be earned by the independent service providers are based on a number of factors, including the sales generated through them and through others to whom they may provide marketing, sales support and other services, the quality of their service, and other factors. Total compensation available to our independent service providers in China can generally be comparable to the total compensation available to other sales leaders globally. The Company does this by performing an analysis in our worldwide system to estimate the potential compensation available to the service providers, which is generally comparable to that of sales leaders in other countries. After adjusting such amounts for other factors and dividing by each service provider's hourly rate, we then notify each independent service provider the maximum hours of work for which they are eligible to be compensated in the given month. In order for a service provider to be paid, the Company requires each service provider to invoice the Company for their services.

These business model features in China are not common to the business model we employ elsewhere in the world, and based on the direct selling licenses we have received and the terms of those which we hope to receive in the future to conduct a direct selling enterprise in China, our business model in China will continue to incorporate some or all of these features. The direct selling regulations require us to apply for various approvals to conduct a direct selling enterprise in China. The process for obtaining the necessary licenses to conduct a direct selling business is protracted

and cumbersome and involves multiple layers of Chinese governmental authorities and numerous governmental employees at each layer. While direct selling licenses are centrally issued, such licenses are generally valid only in the jurisdictions within which related approvals have been obtained. Such approvals are generally awarded on local and provincial bases, and the approval process requires involvement with multiple ministries at each level. Our participation and conduct during the approval process is guided not only by distinct Chinese practices and customs, but is also subject to applicable laws of China and the other jurisdictions in which we operate our business, including the United States, as well as our internal code of ethics. There is always a risk that in attempting to comply with local customs and practices in China during the application process or otherwise, we will fail to comply with requirements applicable to us in China itself or in other jurisdictions, and any such failure to comply with applicable requirements could prevent us from obtaining the direct selling licenses or related local or provincial approvals. Furthermore, we rely on certain key personnel in China to assist us during the approval process, and the loss of any such key personnel could delay or hinder our ability to obtain licenses or related approvals. For all of the above reasons, there can be no assurance that we will obtain additional direct selling licenses, or obtain related approvals to expand into any or all of the localities or provinces in China that are important to our business. Our inability to obtain, retain, or renew any or all of the licenses or related approvals that are required for us to operate in China could negatively impact our business.

Additionally, although certain regulations have been published with respect to obtaining and operating under such approvals and otherwise conducting business in China, other regulations are pending and there continues to be uncertainty regarding the interpretation and enforcement of Chinese regulations. The regulatory environment in China is evolving, and officials in the Chinese government, including at the local and central level, exercise broad discretion in deciding how to interpret, apply, and enforce regulations as they deem appropriate, including to promote social order. Regulators in China may change how they interpret and enforce the direct selling regulations, both current interpretations and enforcement thereof or future iterations. Regulators in China may also modify the regulations. We cannot be certain that our business model will continue to be deemed by national or local Chinese regulatory authorities to be compliant with any such regulations. The Chinese government rigorously monitors the direct selling market in China, and in the past has taken serious action against companies that the government believed were engaging in activities they regarded to be in violation of applicable law, including shutting down their businesses and imposing substantial fines. For example, China's State Administration for Industry and Commerce, Ministry of Education, Ministry of Public Security and Ministry of Human Resources and Social Security carried out a three-month campaign which ended on November 15, 2017 to investigate pyramid selling activities in order to eliminate activities prohibited under relevant regulations. The campaign sought to eliminate organizations that use recruitment to lure and mislead people into participating in pyramid schemes. As a result, there can be no guarantee that the Chinese government's current or future interpretation and application of the existing and new regulations will not negatively impact our business in China, result in regulatory investigations or lead to fines or penalties against us or our Chinese Members. If our business practices are deemed to be in violation of applicable regulations as they are or may be interpreted or enforced, or modified regulations, in particular with respect to the factors used in determining the services a service provider is eligible to perform and service fees they are eligible to earn and to receive, then we could be sanctioned and/or required to change our business model, either of which could have a significant adverse impact on our business in China.

Chinese regulations prevent persons who are not Chinese nationals from engaging in direct selling in China. We cannot guarantee that any of our Members living outside of China or any of our sales representatives or independent service providers in China have not engaged or will not engage in activities that violate our policies in this market, or that violate Chinese law or other applicable law, and therefore result in regulatory action and adverse publicity.

China has also enacted labor contract and social insurance legislation. We have reviewed our employment contracts and contractual relations with employees in China, which include certain of our employed sales personnel, and have transferred those employed sales personnel to independent service providers and have made such other changes as we believe to be necessary or appropriate to bring these contracts and contractual relations into compliance with these laws and their implementing regulations. In addition, we continue to monitor the situation to determine how these laws and regulations will be implemented in practice. There is no guarantee that these laws will not adversely impact us, cause us to change our operating plan for China or otherwise have an adverse impact on our business operations in China.

We may continue to experience growth in China, and there can be no assurances that we will be able to successfully manage expansion of manufacturing operations and a growing and dynamic sales force. If we are unable to effectively scale our supply chain and manufacturing infrastructure to support future growth in China, our operations in China may be adversely impacted.

If we fail to further penetrate existing markets, then the growth in sales of our products, along with our operating results, could be negatively impacted.

The success of our business is to a large extent contingent on our ability to further penetrate existing markets which is subject to numerous factors, many of which are out of our control. Government regulations in both our domestic and international markets can delay or prevent the introduction, or require the reformulation or withdrawal, of some of our

products, which could negatively impact our business, financial condition and results of operations. Also, our ability to increase market penetration in certain countries may be limited by the finite number of persons in a given country inclined to pursue a direct selling business opportunity or consumers willing to purchase Herbalife products. Moreover, our growth will depend upon improved training and other activities that enhance Member retention in our markets. While we have recently experienced significant growth in certain of our markets, we cannot assure you that such growth levels will continue in the immediate or long term future. Furthermore, our efforts to support growth in such international markets could be hampered to the extent that our infrastructure in such markets is deficient when compared to our infrastructure in our more developed markets, such as the United States. Therefore, we cannot assure you that our general efforts to increase our market penetration and Member retention in existing markets will be successful. If we are unable to further penetrate existing markets, our operating results could suffer.

Our business could be materially and adversely affected as a result of natural disasters, other catastrophic events, acts of war or terrorism, or cyber-security incidents and other acts by third parties.

We depend on the ability of our business to run smoothly, including the ability of Members to engage in their day-to-day selling and business building activities and the ability of our inventories and products to move reasonably unimpeded around the world. Any material disruption caused by natural disasters, including, but not limited to, fires, floods, hurricanes, volcanoes, and earthquakes; power loss or shortages; environmental disasters; telecommunications or business information systems failures; acts of war or terrorism and other similar disruptions, including those due to cyber-security incidents, ransomware, or other actions by third parties, could adversely affect our ability to conduct business. If such disruptions result in significant cancellations of Member orders, contribute to a general decrease in local, regional or global economic activity, directly impact our marketing, manufacturing, financial or logistics functions, or impair our ability to meet Member demands, our operating results and financial condition could be materially adversely affected. For example, our operations in Mexico were impacted by flooding in September 2017. The severe weather conditions directly affected inventory stored at that facility. Furthermore, our headquarters and one of our distribution facilities are located in Southern California, an area susceptible to earthquakes. Although the events in Mexico did not have a material negative impact to our Mexico operations, we cannot assure you that any future natural disasters, catastrophic events, acts of war or terrorism and other similar disruptions, including those due to cyber-security incidents, ransomware, or other actions by third parties, will not adversely affect our ability to operate our business and our financial condition and results of operations.

Our contractual obligation to sell our products only through our Herbalife Member network and to refrain from changing certain aspects of our Marketing Plan may limit our growth.

We are a party to an agreement with our Members that provides assurances, to the extent legally permitted, we will not sell Herbalife products worldwide through any distribution channel other than our network of independent Herbalife Members. Thus, we are contractually prohibited from expanding our business by selling Herbalife products through other distribution channels that may be available to our competitors, such as over the Internet, through wholesale sales, by establishing retail stores or through mail order systems. Since this is an open-ended commitment, there can be no assurance that we will be able to take advantage of innovative new distribution channels that are developed in the future.

In addition, this agreement with our Members provides that we will not make any material changes adverse to our Members to certain aspects of our Marketing Plan without the approval described below. For example, our agreement with our Members provides that we may increase, but not decrease, the discount percentages available to our Members for the purchase of products or the applicable royalty override percentages, and production and other bonus percentages available to our Members at various qualification levels within our Member hierarchy. We may not modify the eligibility or qualification criteria for these discounts, royalty overrides and production and other bonuses unless we do so in a manner to make eligibility and/or qualification easier than under the applicable criteria in effect as of the date of the agreement. Our agreement with our Members further provides that we may not vary the criteria for qualification for each Member tier within our Member hierarchy, unless we do so in such a way so as to make qualification easier.

Although we reserved the right to make these changes to our Marketing Plan without the consent of our Members in the event that changes are required by applicable law or are necessary in our reasonable business judgment to account for specific local market or currency conditions to achieve a reasonable profit on operations, we may initiate other changes that are adverse to our Members based on an assessment of what will be best for the Company and its Members. Under the agreement with our Members, these other adverse changes would then be submitted to our Member leadership for a vote. The vote would require the approval of at least 51% of our Members then at the level of President's Team earning at the production bonus level of 6% who vote, provided that at least 50% of those Members

entitled to vote do in fact vote. Therefore, while we believe that this agreement has strengthened our relationship with our existing Members, improved our ability to recruit new Members and generally increased the long-term stability of our business, there can be no assurance that our agreement with our Members will not restrict our ability to adapt our Marketing Plan to the evolving requirements of the markets in which we operate. As a result, our growth may be limited.

We depend on the integrity and reliability of our information technology infrastructure, and any related inadequacies may result in substantial interruptions to our business.

Our ability to provide products and services to our Members depends on the performance and availability of our core transactional systems. We operate our global back office transactional systems on an Oracle Enterprise Suite which is supported by a robust hardware and network infrastructure. The Oracle Enterprise Suite is a scalable and stable solution that provides a solid foundation upon which we are building our next generation Member facing Internet toolset. While we continue to invest in our information technology infrastructure, there can be no assurance that there will not be any significant interruptions to such systems or that the systems will be adequate to meet all of our future business needs.

The most important aspect of our information technology infrastructure is the system through which we record and track Member sales, Volume Points, royalty overrides, bonuses and other incentives. We have encountered, and may encounter in the future, errors in our software or our enterprise network, or inadequacies in the software and services supplied by our vendors, although to date none of these errors or inadequacies has had a meaningful adverse impact on our business. Any such errors or inadequacies that we may encounter in the future may result in substantial interruptions to our services and may damage our relationships with, or cause us to lose, our Members if the errors or inadequacies impair our ability to track sales and pay royalty overrides, bonuses and other incentives, which would harm our financial condition and operating results. Any such errors could create compliance risks under the Consent Order or any applicable laws or regulations. Such errors may be expensive or difficult to correct in a timely manner, and we may have little or no control over whether any inadequacies in software or services supplied to us by third parties are corrected, if at all.

Our ability to effectively manage our network of Members, and to ship products, and track royalty and bonus payments on a timely basis, depends significantly on our information systems. The failure of our information systems to operate effectively, or a breach in security of these systems, could adversely impact the promptness and accuracy of our product distribution and transaction processing. We could be required to make significant additional expenditures to remediate any such failure, problem or breach.

Anyone who is able to circumvent our security measures could misappropriate confidential or proprietary information, including that of third parties such as our Members, cause interruption in our operations, damage our computers or otherwise damage our reputation and business. We may need to expend significant resources to protect against security breaches or to address problems caused by such breaches. Any actual security breaches could damage our reputation and result in a violation of applicable privacy and other laws, legal and financial exposure, including litigation and other potential liability, and a loss of confidence in our security measures, which could have an adverse effect on our results of operations and our reputation as a brand, business partner or employer. In addition, employee error or malfeasance or other errors in the storage, use or transmission of any such information could result in a disclosure to third parties. If this should occur we could incur significant expenses addressing such problems. Since we collect and store Member and vendor information, including credit card information, these risks are heightened.

In addition, the use and handling of this information is regulated by evolving and increasingly demanding laws and regulations, such as the European Union General Data Protection Regulation, or the GDPR, which took effect in May 2018. These laws and regulations are increasing in complexity and number, change frequently and increasingly conflict among the various countries in which we operate, which has resulted in greater compliance risk and cost for us. If we fail to comply with these laws or regulations, we could be subject to significant litigation, monetary damages, regulatory enforcement actions or fines in one or more jurisdictions, which could have a material adverse effect on our results of operations.

Since we rely on independent third parties for the manufacture and supply of certain of our products, if these third parties fail to reliably supply products to us at required levels of quality and which are manufactured in compliance with applicable laws, including the dietary supplement and OTC drug cGMPs, then our financial condition and operating results would be harmed.

A significant portion of our products are manufactured by third-party contract manufacturers. We cannot assure you that our outside contract manufacturers will continue to reliably supply products to us at the levels of quality, or the quantities, we require, and in compliance with applicable laws, including under the FDA's cGMP regulations. Additionally, while we are not presently aware of any current liquidity issues with our suppliers, we cannot assure you that they will not experience financial hardship.

For the portion of our product supply that is self-manufactured, we believe we have significantly lowered the product supply risk, as the risk factors of financial health, liquidity, capacity expansion, reliability and product quality are all within our control. However, increases to the volume of products that we self-manufacture in our Winston-Salem, Lake Forest, Nanjing, Suzhou, and Changsha facilities raise the concentration risk that a significant interruption of production at any of our facilities due to, for example, natural disasters including earthquakes, hurricanes and floods, technical issues or work stoppages could impede our ability to conduct business. While our business continuity programs contemplate and plan for such events, if we were to experience such an event resulting in the temporary, partial or complete shutdown of one of these manufacturing facilities, we could be required to transfer manufacturing to the surviving facility and/or third-party contract manufacturers if permissible. When permissible, converting or transferring manufacturing to a third-party contract manufacturer could be expensive, time-consuming, result in delays in our production or shipping, reduce our net sales, damage our relationship with Members and damage our reputation in the marketplace, any of which could harm our business, results of operations and financial condition.

Our product supply contracts generally have a three-year term. Except for force majeure events such as natural disasters and other acts of God, and non-performance by Herbalife, our manufacturers generally cannot unilaterally terminate these contracts. These contracts can generally be extended by us at the end of the relevant time period and we have exercised this right in the past. Globally, we have over 50 product suppliers, with Fine Foods (Italy) being a major supplier for meal replacements, protein powders and nutritional supplements. Additionally, we use contract manufacturers in the United States, India, Brazil, Korea, Japan, Taiwan, Germany, and the Netherlands to support our global business. In the event any of our contract manufacturers were to become unable or unwilling to continue to provide us with products in required volumes and at suitable quality levels, we would be required to identify and obtain acceptable replacement manufacturing sources. There is no assurance that we would be able to obtain alternative manufacturing sources on a timely basis. An extended interruption in the supply of products would result in the loss of sales. In addition, any actual or perceived degradation of product quality as a result of reliance on contract manufacturers may have an adverse effect on sales or result in increased product returns and buybacks.

If we fail to protect our trademarks and tradenames, then our ability to compete could be negatively affected, which would harm our financial condition and operating results.

The market for our products depends to a significant extent upon the goodwill associated with our trademark and tradenames. We own, or have licenses to use, the material trademark and trade name rights used in connection with the packaging, marketing and distribution of our products in the markets where those products are sold. Therefore, trademark and trade name protection is important to our business. Although most of our trademarks are registered in the United States and in certain foreign countries in which we operate, we may not be successful in asserting trademark or trade name protection. In addition, the laws of certain foreign countries may not protect our intellectual property rights to the same extent as the laws of the United States. The loss or infringement of our trademarks or tradenames could impair the goodwill associated with our brands and harm our reputation, which would harm our financial condition and operating results.

Unlike in most of the other markets in which we operate, limited protection of intellectual property is available under Chinese law. Accordingly, we face an increased risk in China that unauthorized parties may attempt to copy or otherwise obtain or use our trademarks, copyrights, product formulations or other intellectual property. Further, because Chinese commercial law is relatively undeveloped, we may have limited legal recourse in the event we encounter significant difficulties with intellectual property theft or infringement. As a result, we cannot assure you that we will be able to adequately protect our product formulations or other intellectual property.

We permit the limited use of our trademarks by our Members to assist them in marketing our products. It is possible that doing so may increase the risk of unauthorized use or misuse of our trademarks in markets where their registration status differs from that asserted by our Members, or they may be used in association with claims or products in a manner not permitted under applicable laws and regulations. Were these to occur it is possible that this could diminish the value of these marks or otherwise impair our further use of these marks.

If our Members fail to comply with labeling laws, then our financial condition and operating results would be harmed.

Although the physical labeling of our products is not within the control of our Members, our Members must nevertheless advertise our products in compliance with the extensive regulations that exist in certain jurisdictions, such as the United States, which considers product advertising to be labeling for regulatory purposes.

Our products are sold principally as foods, dietary supplements and cosmetics and are subject to rigorous FDA and related legal regimens limiting the types of therapeutic claims that can be made for our products. The treatment or cure of disease, for example, is not a permitted claim for these products. While we train our Members and attempt to monitor our Members' marketing materials, we cannot ensure that all such materials comply with applicable

regulations, including bans on therapeutic claims. If our Members fail to comply with these restrictions, then we and our Members could be subjected to claims, financial penalties, mandatory product recalls or relabeling requirements, which could harm our financial condition and operating results. Although we expect that our responsibility for the actions of our Members in such an instance would be dependent on a determination that we either controlled or condoned a noncompliant advertising practice, there can be no assurance that we could not be held vicariously liable for the actions of our Members.

75

If our intellectual property is not adequate to provide us with a competitive advantage or to prevent competitors from replicating our products, or if we infringe the intellectual property rights of others, then our financial condition and operating results would be harmed.

Our future success and ability to compete depend upon our ability to timely produce innovative products and product enhancements that motivate our Members and customers, which we attempt to protect under a combination of copyright, trademark and trade secret laws, confidentiality procedures and contractual provisions. However, our products are generally not patented domestically or abroad, and the legal protections afforded by common law and contractual proprietary rights in our products provide only limited protection and may be time-consuming and expensive to enforce or maintain. Further, despite our efforts, we may be unable to prevent third parties from infringing upon or misappropriating our proprietary rights or from independently developing non-infringing products that are competitive with, equivalent to or superior to our products.

Monitoring infringement or misappropriation of intellectual property can be difficult and expensive, and we may not be able to detect every infringement or misappropriation of our proprietary rights. Even if we do detect infringement or misappropriation of our proprietary rights, litigation to enforce these rights could cause us to divert financial and other resources away from our business operations. Further, the laws of some foreign countries do not protect our proprietary rights to the same extent as do the laws of the United States.

Additionally, third parties may claim that products or marks that we have independently developed or which bear certain of our trademarks infringe upon their intellectual property rights and there can be no assurance that one or more of our products or marks will not be found to infringe upon third-party intellectual property rights in the future.

Since one of our products constitutes a significant portion of our net sales, significant decreases in consumer demand for this product or our failure to produce a suitable replacement should we cease offering it would harm our financial condition and operating results.

For 2017, 2016, and 2015, our Formula 1 Healthy Meal, our best-selling product line, approximated 30% of our net sales. If consumer demand for this product decreases significantly or we cease offering this product without a suitable replacement, then our financial condition and operating results would be harmed.

If we lose the services of members of our senior management team, then our financial condition and operating results could be harmed.

We depend on the continued services of our Executive Chairman, Michael O. Johnson, our Chief Executive Officer, Richard P. Goudis, and our senior management team as it works closely with the senior Member leadership to create an environment of inspiration, motivation and entrepreneurial business success. Any significant leadership change or senior management transition involves inherent risk and any failure to ensure a smooth transition could hinder our strategic planning, execution and future performance. While we strive to mitigate the negative impact associated with changes to our senior management team, there may be uncertainty among investors, employees, Members and others concerning our future direction and performance. Any disruption in our operations or uncertainty could have a material adverse effect on our business, financial condition or results of operations.

Additionally, although we have entered into employment agreements with certain members of our senior management team, and do not believe that any of them are planning to leave or retire in the near term, we cannot assure you that our senior managers will remain with us. The loss or departure of any member of our senior management team could adversely impact our Member relations and operating results. If any of these executives do not remain with us, our business could suffer. Also, the loss of key personnel, including our regional and country managers, could negatively impact our ability to implement our business strategy, and our continued success will also be dependent on our ability

to retain existing, and attract additional, qualified personnel to meet our needs. We currently do not maintain “key person” life insurance with respect to our senior management team.

76

Our international operations are subject to the laws and regulations of the United States and many foreign countries, including the U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act, and other similar laws in a number of countries.

We are subject to a variety of laws regarding our international operations, including the U.S. Foreign Corrupt Practices Act, or the FCPA, the U.K. Bribery Act of 2010, or the UK Bribery Act, and regulations issued by U.S. Customs and Border Protection, U.S. Treasury Department's Office of Foreign Assets Control, or OFAC, and various foreign governmental agencies. The FCPA, the UK Bribery Act and similar anti-bribery laws in other jurisdictions generally prohibit companies and their intermediaries from making improper payments for the purpose of obtaining or retaining business as well as requiring companies to maintain accurate books and records. In recent years there has been a substantial increase in anti-bribery law enforcement activity with more frequent and aggressive investigations and enforcement proceedings by both the Department of Justice and the SEC, increased enforcement activity by non-U.S. regulators and increases in criminal and civil proceedings brought against companies and individuals. Our policies mandate compliance with these anti-bribery laws, including the requirements to maintain accurate information and internal controls. We operate in many parts of the world that have experienced governmental corruption to some degree and in certain circumstances, strict compliance with anti-bribery laws may conflict with local customs and practices. Notwithstanding our compliance programs, which include annual training and certification requirements, there is no assurance that our internal control policies and procedures will protect us from acts committed by our employees or agents. Additionally, we cannot predict the nature, scope or effect of future regulatory requirements to which our international operations might be subject or the manner in which existing or new laws might be administered or interpreted. Alleged or actual violations of any such existing or future laws (either due to our own acts or our inadvertence, or due to the acts or inadvertence of others) may result in criminal or civil sanctions, including contract cancellations or debarment, and loss of reputation, which could have a material adverse effect on our business, financial condition, and results of operations. As previously disclosed, the SEC and the Department of Justice have been conducting an investigation into the Company's anti-corruption compliance in China, which has mainly focused on entertainment and gift expenditures by the Company's local China external affairs department. The government has requested and is continuing to request documents and other information relating to these matters. The Company is conducting its own review and has taken remedial and improvement measures based upon this review, including replacement of a number of employees in China and enhancements of Company policies and procedures in China. The Company is continuing to cooperate with the government and cannot predict the eventual scope, duration, or outcome of the government investigation at this time.

The United Kingdom's vote to exit from the European Union could adversely impact us.

On June 23, 2016, in a referendum vote commonly referred to as "Brexit," a majority of British voters voted to exit the European Union and, in March 2017, the British government delivered formal notice of the U.K.'s intention to leave the European Union. The British government is currently in negotiations with the European Union to determine the terms of the U.K.'s exit. A withdrawal could potentially disrupt the free movement of goods, services and people between the U.K. and the European Union, undermine bilateral cooperation in key geographic areas and significantly disrupt trade between the U.K. and the European Union or other nations as the U.K. pursues independent trade relations. In addition, Brexit could lead to legal uncertainty and potentially divergent national laws and regulations as the U.K. determines which European Union laws to replace or replicate. The effects of Brexit will depend on any agreements the U.K. makes to retain access to European Union or other markets either during a transitional period or more permanently. It is unclear what long-term economic, financial, trade and legal implications the withdrawal of the U.K. from the European Union would have and how such withdrawal would affect our business globally and in the region. In addition, Brexit may lead other European Union member countries to consider referendums regarding their European Union membership. Any of these events, along with any political, economic and regulatory changes that may occur, could cause political and economic uncertainty in Europe and internationally and harm our business and financial results.

The covenants in our existing indebtedness limit our discretion with respect to certain business matters, which could limit our ability to pursue certain strategic objectives and in turn harm our financial condition and operating results.

Our credit facility contains financial and operating covenants that restrict our and our subsidiaries' ability to, among other things:

- pay dividends, redeem share capital or capital stock and make other restricted payments and investments;
- incur or guarantee additional debt;
- impose dividend or other distribution restrictions on our subsidiaries; and
- create liens on our and our subsidiaries' assets.

77

In addition, our credit facility requires us to meet certain financial ratios and financial conditions. Our ability to comply with these covenants may be affected by events beyond our control, including prevailing economic, financial and industry conditions. Failure to comply with these covenants could result in a default causing all amounts to become due and payable under our credit facility, which is secured by the equity interests of certain of our subsidiaries and substantially all of the assets of the domestic loan parties, against which the lenders thereunder could proceed to foreclose.

We may use from time to time a certain amount of cash in order to satisfy the obligations relating to our convertible notes. The maturity or conversion of any of our convertible notes may adversely affect our financial condition and operating results, which could adversely affect the amount or timing of future potential share repurchases or the payment of dividends to our shareholders.

In February 2014, we issued convertible senior notes due on August 15, 2019, or the 2019 Convertible Notes, in the aggregate principal amount of \$1.15 billion, of which \$675 million aggregate principal amount remains outstanding. Additionally, in March 2018, we issued convertible senior notes due on March 15, 2024, or the 2024 Convertible Notes, in the aggregate principal amount of \$550 million. On their respective maturity dates, we will have to pay the holders of the 2019 Convertible Notes and the 2024 Convertible Notes the full aggregate principal amount of the 2019 Convertible Notes or 2024 Convertible Notes then outstanding.

Holders of our 2019 Convertible Notes may convert their notes at their option under the following circumstances: (i) during any calendar quarter commencing after the calendar quarter ending March 31, 2014, if the last reported sale price of our common shares for at least 20 trading days (whether or not consecutive) in a period of 30 consecutive trading days ending on, and including, the last trading day of the immediately preceding calendar quarter exceeds 130% of the conversion price for the 2019 Convertible Notes on each applicable trading day; (ii) during the five business-day period immediately after any five consecutive trading day period, or the measurement period, in which the trading price per \$1,000 principal amount of 2019 Convertible Notes for each trading day of that measurement period was less than 98% of the product of the last reported sale price of our common shares and the conversion rate for the 2019 Convertible Notes for each such day; or (iii) upon the occurrence of specified corporate events. On and after May 15, 2019, holders may convert their 2019 Convertible Notes at any time, regardless of the foregoing circumstances.

Holders of our 2024 Convertible Notes may convert their notes at their option under the following circumstances: (i) during any calendar quarter commencing after the calendar quarter ending June 30, 2018, if the last reported sale price of our common shares for at least 20 trading days (whether or not consecutive) in a period of 30 consecutive trading days ending on, and including, the last trading day of the immediately preceding calendar quarter exceeds 130% of the conversion price for the 2024 Convertible Notes on each applicable trading day; (ii) during the five business-day period immediately after any five consecutive trading day period, or the measurement period, in which the trading price per \$1,000 principal amount of 2024 Convertible Notes for each trading day of that measurement period was less than 98% of the product of the last reported sale price of our common shares and the conversion rate for the 2024 Convertible Notes for each such day; (iii) if the Company calls the 2024 Convertible Notes for redemption; or (iv) upon the occurrence of specified corporate events. On and after December 15, 2023, holders may convert their 2024 Convertible Notes at any time, regardless of the foregoing circumstances.

Upon conversion of the 2019 Convertible Notes, the principal amount is due in cash, and to the extent that the conversion value exceeds the principal amount, the difference is due in common shares. The 2024 Convertible Notes may be settled in cash, common shares, or a combination of cash and common shares, at our option. If one or more holders elect to convert their 2019 Convertible Notes or their 2024 Convertible Notes when conversion is permitted, we could be required to make cash payments equal to the par amount of each 2019 Convertible Note, and we could elect to make cash payments to satisfy our conversion obligations with respect to the 2024 Convertible Notes, which

could adversely affect our liquidity. In addition, even if holders do not elect to convert their 2019 Convertible Notes or 2024 Convertible Notes, we could be required under applicable accounting rules to reclassify all or a portion of the outstanding principal of our 2019 Convertible Notes or 2024 Convertible Notes as a current rather than long-term liability, which could result in a material reduction of our net working capital. Payment of cash upon conversion of the 2019 Convertible Notes or the 2024 Convertible Notes, or any adverse accounting treatment of the 2019 Convertible Notes or 2024 Convertible Notes, may adversely affect our financial condition and operating results, each of which could in turn adversely impact the amount or timing of future potential share repurchases or the payment of dividends to our shareholders.

The conversion of any of the convertible notes into common shares could have a dilutive effect that could cause our share price to go down.

The 2019 Convertible Notes, until May 15, 2019, and the 2024 Convertible Notes, until December 14, 2023, are convertible into common shares only if specified conditions are met and thereafter convertible at any time, at the option of the holder. We have reserved common shares for issuance upon conversion of the 2019 Convertible Notes and 2024 Convertible Notes. Upon conversion of the 2019 Convertible Notes, the principal amount is due in cash, and to the extent that the conversion value exceeds the principal amount, the difference is due in common shares. While we have entered into capped call transactions to effectively increase the conversion of the 2019 Convertible Notes and lessen the risk of dilution to shareholders upon conversion, if the market price of our common shares, as measured under the terms of the capped call transactions, exceeds the cap price of the capped call transactions, the number of our common shares we receive upon exercise of the capped call transactions will be capped. In that case, there would be dilution in respect of our common shares, because the number of our common shares or amounts of cash that we would owe upon conversion of the 2019 Convertible Notes in excess of the principal amount of converted 2019 Convertible Notes would exceed the number of common shares that we would be entitled to receive upon exercise of the capped call transactions, which would cause a dilutive effect that could cause our share price to go down. Upon conversion of the 2024 Convertible Notes, we may deliver cash, common shares or a combination of cash and common shares, at our option, to satisfy our conversion obligations. We did not enter into any similar arrangements to the capped call transactions in connection with the issuance of the 2024 Convertible Notes.

If any or all of the 2019 Convertible Notes or 2024 Convertible Notes are converted into common shares, our existing shareholders will experience immediate dilution of voting rights and our common share price may decline. Furthermore, the perception that such dilution could occur may cause the market price of our common shares to decline. The conversion rate for the 2019 Convertible Notes as of February 7, 2014, the date of issuance thereof, was 11.5908 common shares per \$1,000 principal amount, or a conversion price of approximately \$86.28 per common share, and the conversion rate for the 2024 Convertible Notes as of March 23, 2018, the date of issuance thereof, was 8.0028 common shares per \$1,000 principal amount, or a conversion price of approximately \$124.96 per common share. The conversion rate for the 2019 Convertible Notes was adjusted to 23.1816 common shares per \$1,000 principal amount, or a conversion price of approximately \$43.14 per common share, and the conversion rate for the 2024 Convertible Notes was adjusted to 16.0056 common shares per \$1,000 principal amount, or a conversion price of approximately \$62.48 per common share, due to our two-for-one stock split effected in May 2018 and described in Note 2, Significant Accounting Policies, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q. As of June 30, 2018, the conversion rate for the 2019 Convertible Notes was further adjusted to 23.2245 common shares per \$1,000 principal amount, or a conversion price of approximately \$43.06 per common share, and the conversion rate for the 2024 Convertible Notes was further adjusted to 16.0352 common shares per \$1,000 principal amount, or a conversion price of approximately \$62.36 per common share, due to the Company's modified Dutch auction tender offer completed in May 2018. Because the conversion rates of the 2019 Convertible Notes and 2024 Convertible Notes adjust upward upon the occurrence of certain events, our existing shareholders may experience more dilution if any or all of the 2019 Convertible Notes or 2024 Convertible Notes are converted into common shares after the adjusted conversion rates became effective.

If we do not comply with transfer pricing, customs duties, VAT, and similar regulations, then we may be subjected to additional taxes, duties, interest and penalties in material amounts, which could harm our financial condition and operating results.

As a multinational corporation, operating in many countries including the United States, we are subject to transfer pricing and other tax regulations designed to ensure that our intercompany transactions are consummated at prices that have not been manipulated to produce a desired tax result, that appropriate levels of income are reported as earned by our United States or local entities, and that we are taxed appropriately on such transactions. In addition, our operations

are subject to regulations designed to ensure that appropriate levels of customs duties are assessed on the importation of our products. We are currently subject to pending or proposed audits that are at various levels of review, assessment or appeal in a number of jurisdictions involving transfer pricing issues, income taxes, customs duties, value added taxes, withholding taxes, sales and use and other taxes and related interest and penalties in material amounts. In some circumstances, additional taxes, interest and penalties have been assessed and we will be required to pay the assessments or post surety, in order to challenge the assessments.

The imposition of new taxes, even pass-through taxes such as VAT, could have an impact on our perceived product pricing and will likely require that we increase prices in certain jurisdictions, and therefore could have a potential negative impact on our business and results of operations. We have reserved in our consolidated financial statements an amount that we believe represents the most likely outcome of the resolution of these disputes, but if we are incorrect in our assessment we may have to pay the full amount asserted which could potentially be material. Ultimate resolution of these matters may take several years, and the outcome is uncertain. If the United States Internal Revenue Service or the taxing authorities of any other jurisdiction were to successfully challenge our transfer pricing practices or our positions regarding the payment of income taxes, customs duties, value added taxes, withholding taxes, sales and use, and other taxes, we could become subject to higher taxes, we may determine it is necessary to raise prices in certain jurisdictions accordingly, and our revenue and earnings and our results of operations could be adversely affected.

See Note 5, Contingencies, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q for further information on contingencies relating to VAT and other related matters.

U.S. Tax Reform may adversely impact certain U.S. shareholders of the Company.

A non-U.S. corporation will be classified as a controlled foreign corporation (a “CFC”) for any particular taxable year, if U.S. persons (including individuals and entities) who own (directly, indirectly through foreign entities, or constructively pursuant to the application of certain constructive ownership rules) 10% or more of the voting power or value of the shares (“10% U.S. Shareholders”) own, in the aggregate, more than 50% of the total combined voting power or value of the shares. In determining whether a shareholder is treated as a 10% U.S. Shareholder, the voting power of the shares, special voting rights to appoint directors, whether by law, agreement, or other arrangement, may also be taken into account. In addition, certain constructive ownership rules apply, which attribute share ownership among certain family members and certain entities and their owners. Such constructive ownership rules may also attribute share ownership to persons (including individuals and entities) that are entitled to acquire shares pursuant to an option, such as the holders of our 2019 Convertible Notes and 2024 Convertible Notes. Generally, 10% U.S. Shareholders of a CFC are required to include currently in gross income their respective shares of (i) the CFC’s “Subpart F income” (e.g. items of passive income and certain income resulting from inter-company sales and services), (ii) the CFC’s earnings (that have not been subject to tax under the Subpart F rules) to the extent the CFC holds certain U.S. property, and (iii) global intangible low-taxed income pursuant to the Tax Cuts and Jobs Act of 2017 (“U.S. Tax Reform”). Such 10% U.S. Shareholders are subject to current U.S. federal income tax with respect to the foregoing income items, even if the CFC has not made an actual distribution to such shareholders.

As a result of certain changes to the CFC constructive ownership rules introduced by U.S. Tax Reform, one or more of our non-U.S. corporate subsidiaries that were not previously classified as CFCs are now classified as CFCs (each, a “New Herbalife CFC Subsidiary”), including on a retroactive basis. For 10% U.S. Shareholders, this may result in adverse tax consequences, including the current inclusion of earnings of certain of our non-U.S. corporate subsidiaries (regardless of whether we make any distributions in respect of such earnings). Any shareholders who own, or contemplate owning, 10% or more of our shares (taking into account the impact of any share repurchases we may undertake as well as the impact of the constructive ownership rules) are urged to consult their tax advisors with respect to the special rules applicable to 10% U.S. Shareholders of CFCs.

While we do not believe that Herbalife Nutrition Ltd. is classified as a CFC, such entity and one or more of our non-U.S. corporate subsidiaries not already classified as a CFC could become classified as CFCs either (i) as a result of additional changes to tax laws, including future pronouncements or other guidance from the Internal Revenue Service or (ii) on the basis of an increase in the percentage ownership of our stock by shareholders who presently hold, or in the future may hold, 10% or more of our shares, as a result of future share acquisitions or after taking into account the impact of any share repurchases we may undertake.

Further, under U.S. Tax Reform, a one-time tax is imposed upon our 10% U.S. Shareholders on certain historic accumulated, undistributed foreign earnings of CFCs and other “specified foreign corporations,” which earnings have not been previously subject to tax at the 10% U.S. Shareholder level. A specified foreign corporation is any CFC or other non-U.S. corporation that has at least one U.S. corporate shareholder that is a 10% U.S. Shareholder. Herbalife Nutrition Ltd. believes that it may be classified as a specified foreign corporation and that one or more of our non-U.S. corporate subsidiaries may be classified as specified foreign corporations.

Shareholders who own, or contemplate owning, 10% or more of our shares (taking into account the impact of any share repurchases we may undertake pursuant to share repurchase programs as well as the impact of the constructive ownership rules) are urged to consult their tax advisors.

No assurances can be given that future legislative, administrative, or judicial developments will not result in an increase in the amount of U.S. taxes payable by an investor in our shares. If any such developments occur, such developments could have a material and adverse effect on an investment in our shares.

Changes in tax laws, treaties or regulations, or their interpretation could adversely affect us.

A change in applicable tax laws, treaties or regulations or their interpretation could result in a higher effective tax rate on our worldwide earnings and such change could be significant to our financial results. The Organisation for Economic Co-operation and Development has, within recent years, released guidance covering various international tax standards as part of its “base erosion and profit shifting” or “BEPS” initiative. The anticipated implementation of BEPS by non-U.S. jurisdictions in which we operate could result in changes to tax laws and regulations, including with respect to transfer pricing that could materially increase our effective tax rate.

No assurances can be given that future legislative, administrative, or judicial developments will not result in an increase in the amount of U.S. taxes payable by us or our subsidiaries. If any such developments occur, our business, financial condition, and results of operations could be materially and adversely affected.

We may be held responsible for certain taxes or assessments relating to the activities of our Members, which could harm our financial condition and operating results.

Our Members are subject to taxation, and in some instances, legislation or governmental agencies impose an obligation on us to collect taxes, such as value added taxes and social contributions, and to maintain appropriate records. In addition, we are subject to the risk in some jurisdictions of being responsible for social security, withholding or other taxes with respect to payments to our Members. In addition, in the event that local laws and regulations or the interpretation of local laws and regulations change to require us to treat our Members as employees, or that our Members are deemed by local regulatory authorities in one or more of the jurisdictions in which we operate to be our employees rather than independent contractors under existing laws and interpretations, we may be held responsible for social security contributions, withholding and related taxes in those jurisdictions, plus any related assessments and penalties, which could harm our financial condition and operating results. See Note 5, Contingencies, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q for a more specific discussion of contingencies related to the activities of our Members.

We may incur material product liability claims, which could increase our costs and harm our financial condition and operating results.

Our ingestible products include vitamins, minerals and botanicals and other ingredients and are classified as foods or dietary supplements and are not subject to pre-market regulatory approval in the United States. Our products could contain contaminated substances, and some of our products contain some ingredients that do not have long histories of human consumption. We rely upon published and unpublished safety information including clinical studies on ingredients used in our products and conduct limited clinical studies on some key products but not all products. Previously unknown adverse reactions resulting from human consumption of these ingredients could occur. As a marketer of dietary and nutritional supplements and other products that are ingested by consumers or applied to their bodies, we have been, and may again be, subjected to various product liability claims, including that the products contain contaminants, the products include inadequate instructions as to their uses, or the products include inadequate warnings concerning side effects and interactions with other substances. It is possible that widespread product liability claims could increase our costs, and adversely affect our revenues and operating income. Moreover, liability claims arising from a serious adverse event may increase our costs through higher insurance premiums and deductibles, and may make it more difficult to secure adequate insurance coverage in the future. In addition, our product liability insurance may fail to cover future product liability claims, thereby requiring us to pay substantial monetary damages and adversely affecting our business. Finally, given the level of self-insured retentions that we have accepted under our current product liability insurance policies, which is \$12.5 million, in certain cases we may be subject to the full amount of liability associated with any injuries, which could be substantial.

Holders of our common shares may face difficulties in protecting their interests because we are incorporated under Cayman Islands law.

Our corporate affairs are governed by our amended and restated memorandum and articles of association, by the Companies Law (2018 Revision), or the Companies Law, and the common law of the Cayman Islands. The rights of our shareholders and the fiduciary responsibilities of our directors under Cayman Islands law are not as clearly established as under statutes or judicial precedent in existence in jurisdictions in the United States. Therefore, shareholders may have more difficulty in protecting their interests in the face of actions by our management or board of directors than would shareholders of a corporation incorporated in a jurisdiction in the United States due to the

comparatively less developed nature of Cayman Islands law in this area.

Shareholders of Cayman Islands exempted companies such as Herbalife have no general rights under Cayman Islands law to inspect corporate records and accounts or to obtain copies of lists of our shareholders. Our directors have discretion under our articles of association to determine whether or not, and under what conditions, our corporate records may be inspected by our shareholders, but are not obliged to make them available to our shareholders. This may make it more difficult for you to obtain the information needed to establish any facts necessary for a shareholder motion or to solicit proxies from other shareholders in connection with a proxy contest.

81

A shareholder can bring a suit personally where its individual rights have been, or are about to be, infringed. Our Cayman Islands counsel, Maples and Calder, is not aware of any reported class action having been brought in a Cayman Islands court. Derivative actions have been brought in the Cayman Islands courts, and the Cayman Islands courts have confirmed the availability of such actions. In most cases, we would be the proper plaintiff where an action is brought to redress any loss or damage suffered by us, or based on a breach of duty owed to us, and a claim against, for example, our officers or directors usually may not be brought by a shareholder. However, based on English authorities, which would in all likelihood be of persuasive authority and be applied by a court in the Cayman Islands, exceptions to the foregoing principle may apply and a shareholder may be permitted to bring a claim derivatively on a company's behalf, where:

- a company is acting or proposing to act illegally or outside the scope of its corporate authority;
- the act complained of, although not acting outside the scope of its corporate authority, could be effected only if authorized by more than a simple majority vote; or
- those who control the company are perpetrating a “fraud on the minority”.

Provisions of our articles of association and Cayman Islands corporate law may impede a takeover or make it more difficult for shareholders to change the direction or management of the Company, which could reduce shareholders' opportunity to influence management of the Company.

Our articles of association permit our board of directors to issue preference shares from time to time, with such rights and preferences as they consider appropriate. Our board of directors could authorize the issuance of preference shares with terms and conditions and under circumstances that could have an effect of discouraging a takeover or other transaction.

In addition, our articles of association contain certain other provisions which could have an effect of discouraging a takeover or other transaction or preventing or making it more difficult for shareholders to change the direction or management of our Company, including the inability of shareholders to act by written consent, a limitation on the ability of shareholders to call special meetings of shareholders and advance notice provisions. As a result, our shareholders may have less input into the management of our Company than they might otherwise have if these provisions were not included in our articles of association.

The Cayman Islands have provisions under the Companies Law to facilitate mergers and consolidations between Cayman Islands companies and non-Cayman Islands companies (provided that is facilitated by the laws of such other jurisdiction). These provisions, contained within Part XVI of the Companies Law, are broadly similar to the merger provisions provided for under Delaware Law.

There are however a number of important differences that could impede a takeover. First, the threshold for approval of the merger plan by shareholders is higher. The threshold is a special resolution of the shareholders (being 66 2/3% of those present in person or by proxy and voting) together with such other authorization, if any, as may be specified in the articles of association.

Additionally, the consent of each holder of a fixed or floating security interest (in essence a documented security interest as opposed to one arising by operation of law) is required to be obtained unless the Grand Court of the Cayman Islands waives such requirement.

The merger provisions contained within Part XVI of the Companies Law do contain shareholder appraisal rights similar to those provided for under Delaware law. Such rights are limited to a merger under Part XVI and do not apply to schemes of arrangement as discussed below.

The Companies Law also contains separate statutory provisions that provide for the merger, reconstruction and amalgamation of companies. These are commonly referred to in the Cayman Islands as “schemes of arrangement.”

The procedural and legal requirements necessary to consummate these transactions are more rigorous and take longer to complete than the procedures typically required to consummate a merger in the United States. Under Cayman Islands law and practice, a scheme of arrangement in relation to a solvent Cayman Islands company must be approved at a shareholders' meeting by a majority in number of each class of the company's shareholders who are present and voting (either in person or by proxy) at such meeting. The shares voted in favor of the scheme of arrangement must also represent at least 75% of the value of each relevant class of the company's shareholders present and voting at the meeting. The convening of these meetings and the terms of the arrangement must also be sanctioned by the Grand Court of the Cayman Islands. Although there is no requirement to seek the consent of the creditors of the parties involved in the scheme of arrangement, the Grand Court typically seeks to ensure that the creditors have consented to the transfer of their liabilities to the surviving entity or that the scheme of arrangement does not otherwise materially adversely affect creditors' interests. Furthermore, the court will only approve a scheme of arrangement if it is satisfied that:

- we are not proposing to act illegally or beyond the scope of our Company's corporate authority and the statutory provisions as to majority vote have been complied with;
- the shareholders who voted at the meeting in question fairly represent the relevant class of shareholders to which they belong;
- the scheme of arrangement is such as a businessman would reasonably approve; and
- the scheme of arrangement is not one that would more properly be sanctioned under some other provision of the Companies Law or that would amount to a "fraud on the minority".

If the scheme of arrangement is approved, the dissenting shareholder would have no rights comparable to appraisal rights, which would otherwise ordinarily be available to dissenting shareholders of U.S. corporations, providing rights to receive payment in cash for the judicially determined value of the shares.

In addition, if an offer by a third-party to purchase shares in us has been approved by the holders of at least 90% of our issued and outstanding shares (not including such a third-party) pursuant to an offer within a four-month period of making such an offer, the purchaser may, during the two months following expiration of the four-month period, require the holders of the remaining shares to transfer their shares on the same terms on which the purchaser acquired the first 90% of our issued and outstanding shares. An objection can be made to the Grand Court of the Cayman Islands, but this is unlikely to succeed unless there is evidence of fraud, bad faith, collusion or inequitable treatment of the shareholders.

There is uncertainty as to shareholders' ability to enforce certain foreign civil liabilities in the Cayman Islands.

We are incorporated as an exempted company with limited liability under the laws of the Cayman Islands. A material portion of our assets are located outside of the United States. As a result, it may be difficult for our shareholders to enforce judgments against us or judgments obtained in U.S. courts predicated upon the civil liability provisions of the federal securities laws of the United States or any state of the United States.

We have been advised by our Cayman Islands counsel, Maples and Calder, that although there is no statutory enforcement in the Cayman Islands of judgments obtained in the United States, the courts of the Cayman Islands will — based on the principle that a judgment by a competent foreign court imposes upon the judgment debtor an obligation to pay the sum for which judgment has been given — recognize and enforce a foreign judgment of a court of competent jurisdiction if such judgment is final, for a liquidated sum, not in respect of taxes or a fine or penalty, is not inconsistent with a Cayman Islands judgment in respect of the same matters, impeachable on the grounds of fraud, and was not obtained in a manner, and is not of a kind, the enforcement of which is contrary to natural justice or the public policy of the Cayman Islands. There is doubt, however, as to whether the Grand Court of the Cayman Islands will (1) recognize or enforce judgments of U.S. courts predicated upon the civil liability provisions of the federal securities laws of the United States or any state of the United States, or (2) in original actions brought in the Cayman Islands,

impose liabilities predicated upon the civil liability provisions of the federal securities laws of the United States or any state of the United States, on the grounds that such provisions are penal in nature.

The Grand Court of the Cayman Islands may stay proceedings if concurrent proceedings are being brought elsewhere.

Mail addressed to the Company and received at its registered office will be forwarded unopened to the forwarding address supplied by the Company. None of Herbalife, its directors, officers, advisors or service providers (including the organization that provides registered office services in the Cayman Islands) will bear any responsibility for any delay caused in mail reaching the forwarding address.

Our stock price may be adversely affected by third parties who raise allegations about our Company.

Short sellers and others who raise allegations regarding the legality of our business activities, some of whom are positioned to profit if our stock declines, can negatively affect our stock price. In late 2012, a hedge fund manager publicly raised allegations regarding the legality of our network marketing program and announced that his fund had taken a significant short position regarding our common shares, leading to intense public scrutiny and significant stock price volatility. Following this public announcement in December 2012, our stock price dropped significantly. This hedge fund manager has made allegations regarding the legality of our network marketing program, our product safety, our accounting practices and other matters. Additionally, from time to time the Company is subject to governmental and regulatory inquiries and inquiries from legislators that may adversely affect our stock price. Our stock price has continued to exhibit heightened volatility and the short interest in our common shares continues to remain high. Short sellers expect to make a profit if our common shares decline in value, and their actions and their public statements may cause further volatility in our share price. While a number of traders have publicly announced that they have taken long positions contrary to the hedge fund shorting our shares, the existence of such a short interest position and the related publicity may lead to continued volatility. The volatility of our stock may cause the value of a shareholder's investment to decline rapidly.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) None.

(b) None.

(c) On February 21, 2017, our board of directors authorized a new three-year \$1.5 billion share repurchase program that will expire on February 21, 2020, which replaced our prior share repurchase authorization which was set to expire on June 30, 2017 and had approximately \$233 million of remaining authorized capacity as of December 31, 2016. This share repurchase program allows us, which includes a wholly-owned subsidiary of Herbalife Nutrition Ltd., to repurchase our common shares, at such times and prices as determined by our management as market conditions warrant, and to the extent Herbalife Nutrition Ltd.'s distributable reserves are available under Cayman Islands law. The Credit Facility permits us to repurchase our common shares as long as no default or event of default exists and other conditions, such as specified consolidated leverage ratios, are met. As of June 30, 2018, the remaining authorized capacity under the Company's share repurchase program was approximately \$113.3 million. The following is a summary of our repurchases of common shares during the three months ended June 30, 2018. For further information on our share repurchases, see Note 10, Shareholders' Deficit, to the Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q:

	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs
