\*for the relevant reporting period

In the face of severe adversities resulting from stiffening market competition, a rapid decline in data value and a significant reduction in revenue subsequent to the cancellation of data “roaming” charges, the Group has made prompt adjustments to its business strategy and actively responded to market competition. Following its endeavours to increase revenue and reduce costs, reinforce its market share and customer base and improve network and service quality, the Group managed to maintain overall stable development for the first three quarters of 2018.

As at 30 September 2018, the Group’s total number of mobile customers was around 916 million. Among them, 4G customers amounted to 695 million, representing a net increase of 45.78 million for the first three quarters. Data traffic business maintained accelerating growth momentum with handset data traffic recording a 172% increase year-on-year, or an increase of 19 percentage points from the first half of 2018. Handset customer DOU reached 3,132MB, representing a year-on-year increase of 156%. Voice business continued with its downward trajectory with total voice usage (minutes) declining by 8.0% year-on-year. ARPU of mobile customers continued to face a strong headwind, standing at RMB55.7 for the first three quarters.

Buoyed by the Group's efforts to actively establish broadband brand superiority, enhance network quality and enrich contents and applications for the household market, the number of wireline broadband customers continued to demonstrate robust growth momentum. As at 30 September 2018, the total number of wireline broadband customers reached 147 million, and with a net increase of 34.13 million for the first three quarters, the Group continued to lead the industry in terms of the scale of customer net increase. ARPU of wireline broadband customers was RMB34.3.

The Group's telecommunications services revenue increased by 0.6% year-on-year to RMB518.4 billion for the first three quarters of 2018. After applying the new revenue standard (IFRS/HKFRS 15) to the revenue figures of the comparative period last year pursuant to a static calculation, the corresponding growth rate stood at 3.5% on a comparable basis. The cancellation of data "roaming" charges, which has been implemented starting July 2018 in compliance with the state's requirement, has posed a significant negative impact on the Group's revenue. This move, together with the rapid decline in data value triggered by mounting competition from large-data, low-tariff packages, has put a heavy strain on the Group's telecommunications services revenue. The Group will further promote the integrated development of the "four growth engines", enhance product and service differentiation, make full use of price elasticity and stimulate customers' demand, striving to achieve stable revenue growth for the full year. The Group's revenue from the sales of products went down by 9.0% year-on-year to RMB49.3 billion for the first three quarters of 2018.

Confronted with increasing expenditures on business transformation and on inflexible items, the Group continues to step up measures to benchmark and reduce per unit costs of business and optimize the use of resources, making endeavours to minimise the corresponding policy impact on the Group's performance. EBITDA for the first three quarters of 2018 stood at RMB214.1 billion, up by 1.3% compared to the same period last year. Inclusive of the tentative estimate of the one-off gain resulting from the initial public offering of China Tower Corporation Limited, profit attributable to equity shareholders increased by 3.1% year-on-year to RMB95.0 billion for the first three quarters of 2018.

The Group will continue to adhere to the principles of forward-looking planning, effective resources allocation, rational investment and refined management in cost allocation, endeavour to strike a balance between the Group's short-term performance and long-term development, strive to increase revenue and save costs and maintain favourable profitability, thereby continuously creating value for investors.

The Board wishes to remind investors that the above performance indicators are based on the Group's unaudited management accounts. Investors are cautioned not to unduly rely on such data.

In the meantime, investors are advised to exercise caution in dealing in the securities of the Company.
