FIDELITY & GUARANTY LIFE AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

(1) Basis of Presentation

Fidelity & Guaranty Life (formerly, Harbinger F&G, LLC (“HFG”)) (“FGL” and, collectively with its subsidiaries, the “Company”) is a subsidiary of HRG Group, Inc. (formerly, Harbinger Group Inc. (“HRG”). The accompanying unaudited consolidated financial statements are prepared in accordance with United States of America generally accepted accounting principles (“GAAP”) for interim financial information and with the instructions for the Securities and Exchange Commission (“SEC”) Quarterly Report on Form 10-Q, including Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by GAAP for complete financial statements. Therefore, the information contained in the Notes to Consolidated Financial Statements included in Fidelity & Guaranty Life and Subsidiaries' Annual Report on Form 10-K, for the year ended September 30, 2014 (“2014 Form 10-K”), should be read in connection with the reading of these interim unaudited consolidated financial statements.

FGL markets products through its wholly-owned insurance subsidiaries, Fidelity & Guaranty Life Insurance Company (“FGL Insurance”) and Fidelity & Guaranty Life Insurance Company of New York (“FGL NY Insurance”), which together are licensed in all fifty states and the District of Columbia.

On April 6, 2015, HRG Group, Inc, the parent of the Company, announced that it is exploring strategic alternatives for Fidelity & Guaranty Life regarding their FGL holdings. Following this announcement, FGL has begun a strategic process involving a potential sale of the Company. There can be no assurance that the exploration of strategic alternatives will result in a transaction or that any transaction, if pursued, will be consummated. The exploration of strategic alternatives may be terminated at any time and without notice. Neither HRG Group nor any of its affiliates - including FGL - intend to disclose developments with respect to this process unless and until the FGL Board of Directors has approved a specific transaction or course of action.

Certain GAAP policies, which significantly affect the determination of financial position, results of operations and cash flows, are summarized in our 2014 Form 10-K.

In the opinion of management, these statements include all normal recurring adjustments necessary for a fair presentation of the Company’s results. Operating results for the three and six months ended March 31, 2015, are not necessarily indicative of the results that may be expected for the full year ending September 30, 2015. All material inter-company accounts and transactions have been eliminated in consolidation. Amounts reclassified out of other comprehensive income are reflected in net investment gains in the Condensed Consolidated Statements of Operations.

Dollar amounts in the accompanying sections are presented in millions, unless otherwise noted.

(2) Significant Accounting Policies and Practices

Principles of Consolidation

The accompanying unaudited condensed consolidated financial statements include the accounts of the Company and all other entities in which FGL has a controlling financial interest (none of which are variable interest entities). All intercompany accounts and transactions have been eliminated in consolidation.

Recent Accounting Pronouncements

Investments in Qualified Affordable Housing Projects

In January 2014, the Financial Accounting Standards Board (“FASB”) issued amended guidance (ASU 2014-01, Investments - Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Qualified Affordable Housing Project) which allows investors in Low Income Housing Tax Credit (“LIHTC”) programs that meet specified conditions to present the net tax benefits (net of the amortization of the cost of the investment)

Table of Contents

within income tax expense. The cost of the investments that meet the specified conditions will be amortized in proportion to (and over the same period as) the total expected tax benefits, including the tax credits and other tax benefits, as they are realized on the tax return. The guidance is required to be applied retrospectively, if investors elect the proportional amortization method. However, if investors have existing LIHTC investments accounted for under the effective-yield method at adoption, they may continue to apply that method for those existing investments. The Company early adopted this guidance effective October 1, 2014 for all new LIHTC investments made subsequent to that date. Prior LIHTC investments will continue to be accounted for under the effective-yield method. This adoption did not have a material effect on the Company's consolidated financial position and results of operations.

Share-Based Payments When a Performance Target is achieved after the Requisite Service Period

In June 2014, the FASB issued new guidance on Stock Compensation (ASU 2014-12, Accounting for Share-Based Payments When the Term of an Award Provide that a Performance Target Could Be Achieved after the Requisite Service Period), effective for fiscal years beginning after December 15, 2015 and interim periods within those years. The new guidance requires performance targets that affect vesting and that could be achieved after the requisite service period to be treated as performance conditions. Such performance targets would not be included in the grant-date fair value calculation of the award, rather compensation cost should be recorded when it is probable the performance target will be reached and should represent the compensation cost attributable to period(s) for which the requisite service has already been rendered. This standard may be early adopted and the amendments may be applied either prospectively or retrospectively. The Company will not early adopt this standard and is currently evaluating the impact of this new accounting guidance on its consolidated financial statements.

Amendments to the Consolidation Analysis

In February 2015, the FASB issued amended consolidation guidance (ASU 2015-02, Amendments to the Consolidation Analysis), effective for fiscal years beginning after December 15, 2015. The amended guidance changes the consolidation analysis of reporting entities with variable interest entity ("VIE") relationships by i) modifying the criteria used to evaluate whether limited partnerships and similar legal entities are VIEs or voting interest entities and revising the primary beneficiary determination of a VIE, ii) eliminating the specialized consolidation model and guidance for limited partnerships thereby removing the presumption that a general partner should consolidate a limited partnership, iii) reducing the criteria in the variable interest model contained in Accounting Standards Codification Topic 810, Consolidation, that is used to evaluate whether the fees paid to a decision maker or service provider represents a variable interest, and iv) exempting reporting entities from consolidating money market funds that operate in accordance with Rule 2a-7 of the Investment Company Act of 1940. This standard may be early adopted and the amendments in this Update may be applied with a modified retrospective approach or retrospective approach. The Company will not early adopt this standard and is currently evaluating the impact of this new accounting guidance on its consolidated financial statements.

Presentation of Debt Issuance Costs

In April 2015, the FASB issued amended guidance (ASU 2015-03, Interest-Imputation of Interest (Subtopic 835-30), Simplifying the Presentation of Debt Issuance Costs), effective for fiscal years beginning after December 15, 2015 and interim periods within those years. The amended guidance requires debt issuance costs related to a recognized debt liability to be presented on the balance sheet as a direct deduction from the debt liability, similar to the presentation of debt discounts or premiums. The cost of issuing debt will no longer be recorded as a separate asset, except when incurred before the receipt of the funding from the associated debt liability. Instead, debt issuance costs will be presented on the balance sheet as a direct deduction from the carrying amount of the related debt liability, and the costs will be amortized to interest expense using the effective interest method. This standard may be early adopted. The amendments in this Update are required to be applied retrospectively to all prior periods presented in the financial statements. The Company will not early adopt this standard and is currently evaluating the impact of this new accounting guidance on its consolidated financial statements.

(3) Significant Risks and Uncertainties

Use of Estimates and Assumptions

The preparation of the Company's Consolidated Financial Statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of

contingent assets and liabilities at the date of the financial statements and the reported amounts of

9

Table of Contents

revenues and expenses during the reporting period. Actual results could differ from those estimates and assumptions used.

Concentrations of Financial Instruments

As of March 31, 2015 and September 30, 2014, the Company's most significant investment in one industry, excluding United States ("U.S.") Government securities, was its investment securities in the banking industry with a fair value of \$2,274 or 12% and \$2,240 or 12%, respectively, of the invested assets portfolio. The Company's holdings in this industry include investments in 83 different issuers with the top ten investments accounting for 39% of the total holdings in this industry. As of March 31, 2015, the Company had investments in 1 issuer, Wells Fargo & Company that exceeded 10% of shareholders' equity with a total fair value of \$188 or 1% of the invested assets portfolio. As of September 30, 2014, the Company had investments in 2 issuers, Wells Fargo & Company and J.P. Morgan Chase, that exceeded 10% of shareholders' equity with a total fair value of \$365 or 2% of the invested assets portfolio.

Additionally, the Company's largest concentration in any single issuer as of March 31, 2015 and September 30, 2014 was in Wells Fargo & Company which had a fair value of \$188 or 1% and \$185 or 1% of the invested assets portfolio, respectively.

Concentrations of Financial and Capital Markets Risk

The Company is exposed to financial and capital markets risk, including changes in interest rates and credit spreads which can have an adverse effect on the Company's results of operations, financial condition and liquidity. The Company expects to continue to face challenges and uncertainties that could adversely affect its results of operations and financial condition.

The Company's exposure to interest rate risk relates primarily to the market price and cash flow variability associated with changes in interest rates. A rise in interest rates, in the absence of other countervailing changes, will decrease the net unrealized gain position of the Company's investment portfolio and, if long-term interest rates rise dramatically within a six to twelve month time period, certain of the Company's products may be exposed to disintermediation risk. Disintermediation risk refers to the risk that policyholders may surrender their contracts in a rising interest rate environment, requiring the Company to liquidate assets in an unrealized loss position. This risk is mitigated to some extent by the high level of surrender charge protection provided by the Company's products.

Concentration of Reinsurance Risk

The Company has a significant concentration of reinsurance with Wilton Reassurance Company ("Wilton Re") and Front Street Re (Cayman) Ltd. ("FSRCI" - an affiliate) that could have a material impact on the Company's financial position in the event that Wilton Re or FSRCI fail to perform their obligations under the various reinsurance treaties. Wilton Re is a wholly owned subsidiary of Canada Pension Plan Investment Board ("CPPIB"). CPPIB has an AAA credit rating from Standard & Poor's Ratings Services ("S&P") as of March 31, 2015. As of March 31, 2015, the net amount recoverable from Wilton Re was \$1,514 and the net amount recoverable from FSRCI was \$1,289. The coinsurance agreement with FSRCI is on a funds withheld basis. The Company monitors both the financial condition of individual reinsurers and risk concentration arising from similar geographic regions, activities and economic characteristics of reinsurers to reduce the risk of default by such reinsurers.

Table of Contents

(4) Investments

The Company's debt and equity securities investments have been designated as available-for-sale and are carried at fair value with unrealized gains and losses included in accumulated other comprehensive income ("AOCI") net of associated adjustments for value of business acquired ("VOBA"), deferred acquisition costs ("DAC") and deferred income taxes. The Company's consolidated investments at March 31, 2015 and September 30, 2014 are summarized as follows:

March 31, 2015

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Carrying Value

Included in AOCI were cumulative unrealized gains of \$1 and unrealized losses of \$2 related to the non-credit portion of other than temporary impairments ("OTTI") on non-agency residential mortgage-backed securities ("RMBS") at March 31, 2015 and September 30, 2014. The non-agency RMBS unrealized gains and losses represent the difference between amortized cost and fair value on securities that were previously impaired. There have been no impairments or write downs on any of the non-agency RMBS purchased during the six months ended March 31, 2015.

Edgar Filing: Fidelity & Guaranty Life - Form 10-Q

Securities held on deposit with various state regulatory authorities had a fair value of \$15,986 and \$15,009 at March 31, 2015 and September 30, 2014, respectively. Under Iowa regulations, insurance companies are required to hold securities on deposit in an amount no less than the Company's legal reserve as prescribed by Iowa regulations.

Table of Contents

The Company held no non-income producing investments during the three and six months ended March 31, 2015 and 2014.

In accordance with the Company's Federal Home Loan Bank of Atlanta ("FHLB") agreements, the investments supporting the funding agreement liabilities are pledged as collateral to secure the FHLB funding agreement liabilities. The collateral investments had a fair value of \$558 and \$573 at March 31, 2015 and September 30, 2014, respectively.

The amortized cost and fair value of fixed maturity available-for-sale securities by contractual maturities, as applicable, are shown below. Actual maturities may differ from contractual maturities because issuers may have the right to call or pre-pay obligations.

	March 31, 2015	
	Amortized Cost	Fair Value
Corporates, Non-structured Hybrids, Municipal and U.S. Government securities:		
Due in one year or less	\$328	\$331
Due after one year through five years	2,293	2,352
Due after five years through ten years	2,894	3,027
Due after ten years	5,918	6,514
Subtotal	11,433	12,224
Other securities which provide for periodic payments:		
Asset-backed securities	2,200	2,192
Commercial mortgage-backed securities	707	729
Structured hybrids	713	716
Residential mortgage-backed securities	2,108	2,194
Subtotal	5,728	5,831
Total fixed maturity available-for-sale securities	\$17,161	\$18,055

The Company's available-for-sale securities with unrealized losses are reviewed for potential OTTI. In evaluating whether a decline in value is other-than-temporary, the Company considers several factors including, but not limited to the following: (1) the extent and the duration of the decline; (2) the reasons for the decline in value (credit event, currency or interest-rate related, including general credit spread widening); and (3) the financial condition of and near-term prospects of the issuer. The Company also considers the ability and intent to hold the investment for a period of time to allow for a recovery of value.

The Company analyzes its ability to recover the amortized cost by comparing the net present value of cash flows expected to be collected with the amortized cost of the security. For mortgage-backed and asset-backed securities, cash flow estimates consider the payment terms of the underlying assets backing a particular security, including interest rate and prepayment assumptions, based on data from widely accepted third-party data sources or internal estimates. In addition to interest rate and prepayment assumptions, cash flow estimates also include other assumptions regarding the underlying collateral including default rates and recoveries, which vary based on the asset type and geographic location, as well as the vintage year of the security. For structured securities, the payment priority within the tranche structure is also considered. For all other debt securities, cash flow estimates are driven by assumptions regarding probability of default and estimates regarding timing and amount of recoveries associated with a default. If the net present value is less than the amortized cost of the investment, an OTTI is recognized. FGL has concluded that the unrealized declines in fair values of the securities presented in the table below were not OTTI as of March 31, 2015.

Table of Contents

The fair value and gross unrealized losses of available-for-sale securities, aggregated by investment category, were as follows:

	March 31, 2015					
	Less than 12 months		12 months or longer		Total	Gross Unrealized Losses
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value

311

Total number of
available-for-sale securities in an
unrealized loss position

635

At March 31, 2015 and September 30, 2014, securities in an unrealized loss position were primarily concentrated in investment grade corporate debt instruments.

At March 31, 2015 and September 30, 2014, securities with a fair value of \$21 and \$0, respectively, were depressed greater than 20% of amortized cost (excluding U.S. Government and U.S. Government sponsored agency securities), which represented less than 1% of the carrying value of all investments.

Table of Contents

The following table provides a reconciliation of the beginning and ending balances of the credit loss portion of OTTI on fixed maturity securities held by the Company for the three and six months ended March 31, 2015 and 2014, for which a portion of the OTTI was recognized in AOCI:

	Three months ended		Six months ended	
	March 31, 2015	March 31, 2014	March 31, 2015	March 31, 2014
Beginning balance	\$3	\$3	\$3	\$3
Increases attributable to credit losses on securities:				
Other-than-temporary impairment was previously recognized	—	—	—	—
Other-than-temporary impairment was not previously recognized	—	—	—	—
Ending balance	\$3	\$3	\$3	\$3

For the three and six months ended March 31, 2015, the Company recognized \$61 of credit impairment losses in operations related to asset-backed, corporate securities and other invested assets with an amortized cost of \$116 and a fair value of \$55 at March 31, 2015. For the three and six months ended March 31, 2014, the Company recognized no impairment losses in operations.

Details underlying write-downs taken as a result of OTTI that were recognized in net income and included in net realized (losses) gains on securities were as follows:

	Three months ended		Six months ended	
	March 31, 2015	March 31, 2014	March 31, 2015	March 31, 2014
OTTI Recognized in Net Income:				
Asset-backed securities	\$24	\$—	\$24	\$—
Corporates	2	—	2	—
Other invested assets	35	—	35	—
Total	\$61	\$—	\$61	\$—

The portion of OTTI recognized in AOCI is disclosed in the Statement of Comprehensive Income.

In the second fiscal quarter ended March 31, 2015, the Company recognized credit-related impairment losses of \$59 on available-for-sale debt securities, available-for-sale equity securities and other invested assets, net of reinsurance, related to direct and indirect investments in RadioShack Corporation ("RSH") because the Company concluded the decline in the fair value of these investments was other than temporary. A summary to the RSH-related impairments by investment is as follows:

Type	Balance Sheet Classification	Impairment Loss
Collateralized loan obligations (a)	Fixed maturities, available-for-sale	\$25
Preferred equity (a)	Equity securities, available-for-sale	21
Participations	Other invested assets	35
Impairment, gross of reinsurance		\$81
Preferred equity (a)	Equity securities, available-for-sale	(21)
Collateralized loan obligations (a)	Fixed maturities, available-for-sale	(1)
Impairment, net of reinsurance		\$59

(a) Preferred equity and a portion of the collateralized loan obligations are included in the FSRCI funds withheld portfolio, accordingly all income on these assets are ceded to FSRCI.

The fair values of the impairments summarized above were determined using the following inputs as follows:

•

Collateralized loan obligations ("CLOs") - The Company utilized a price from a third party pricing service which considered the sufficiency of underlying loan collateral for the RSH loan.

Table of Contents

Preferred equity - The Company utilized a price from a third party pricing service which considered the updated fair value estimates of the Salus Capital Partners, LLC ("Salus") CLO and the Salus participation in RSH, both of which Salus owns investment interests.

Participations - The Company considered the sufficiency and recoverability of the underlying loan collateral for RSH. The total gross impact of the impairment losses above, excluding reinsurance with FSRCI is \$81. RSH filed for bankruptcy on February 5, 2015. In late March 2015, the Court awarded a sale of assets at auction to another bidder, causing our collateral claim to become more junior to other claimants and resulting in our conclusion that the Company had realized an other than temporary impairment. Please refer to "Note 14. Related Party Transactions" to the Company's Consolidated Financial Statements for more detail on the investments impacted by this impairment.

Mortgage Loans on Real Estate

Commercial mortgage loans ("CMLs") represented approximately 2% and 1% of the Company's total investments as of March 31, 2015 and September 30, 2014, respectively. The Company primarily makes mortgage loans on income producing properties including hotels, industrial properties, retail buildings, multifamily properties and office buildings. The Company diversifies its CML portfolio by geographic region and property type to reduce concentration risk. Subsequent to origination, the Company continuously evaluates CMLs based on relevant current information to ensure properties are performing at a consistent and acceptable level to secure the related debt. The distribution of CMLs, gross of valuation allowances, by property type and geographic region is reflected in the following tables:

	March 31, 2015			September 30, 2014		
	Gross Carrying Value	% of Total		Gross Carrying Value	% of Total	
Property Type:						
Industrial - General	\$20	7	%	\$—	—	%

East North Central	\$84	28	%	\$28	21	%
Middle Atlantic	18	6	%	11	8	%
Pacific	66	21	%	61	45	%
South Atlantic	63	21	%	—	—	%
West North Central	6	2	%	6	4	%
West South Central	20	6	%	30	22	%
Mountain	42	14	%	—	—	%
New England	5	2	%	—	—	%
Total commercial mortgage loans	\$304	100	%	\$136	100	%

The Company has a CML portfolio with 100% of all CMLs having a loan-to-value ("LTV") ratio of less than 75% at March 31, 2015 and September 30, 2014. As of March 31, 2015, all CMLs are current and have not experienced credit or other events which would require the recording of an impairment loss. The Company has not established a collective or specific CML valuation allowance as of March 31, 2015.

LTV and debt service coverage ("DSC") ratios are measures commonly used to assess the risk and quality of mortgage loans. The LTV ratio, calculated at time of origination, is expressed as a percentage of the amount of the loan relative to the value of the underlying property. A LTV ratio in excess of 100% indicates the unpaid loan amount exceeds the

underlying collateral. The DSC ratio, based upon the most recently received financial statements, is expressed as a percentage of the

15

Table of Contents

amount of a property's net income to its debt service payments. A DSC ratio of less than 1.00 indicates that a property's operations do not generate sufficient income to cover debt payments.

The following table presents the recorded investment in CMLs by LTV and DSC ratio categories and estimated fair value by the indicated loan-to-value ratios at March 31, 2015 and September 30, 2014:

	Debt-Service Coverage Ratios			Total Amount	% of Total	Estimated Fair Value	% of Total
	>1.25	1.00 - 1.25	N/A(a)				
March 31, 2015							
LTV Ratios:							
Less than 50%	\$74	\$—	\$1	\$75	25 %	\$75	25 %
50% to 60%	64	20	—	84	28 %	84	28 %
60% to 75%	145	—	—	145	47 %	145	47 %
Commercial mortgage loans	\$283	\$20	\$1	\$304	100 %	\$304	100 %
September 30, 2014							
LTV Ratios:							
Less than 50%	\$44	\$—	\$1	\$45	33 %	\$45	33 %
50% to 60%	20	—	—	20	15 %	20	15 %
60% to 75%	71	—	—	71	52 %	71	52 %
Commercial mortgage loans	\$135	\$—	\$1	\$136	100 %	\$136	100 %

(a) N/A - Current DSC ratio not available.

The Company recognizes a mortgage loan as delinquent when payments on the loan are greater than 30 days past due. At March 31, 2015, we had no CMLs that were delinquent in principal or interest payments. The following provides the current and past due composition of our CMLs:

	March 31, 2015	September 30, 2014
Current to 30 days	\$304	\$136
Total carrying value	\$304	\$136

A Troubled Debt Restructuring ("TDR") is a situation where we have granted a concession to a borrower for economic or legal reasons related to the borrower's financial difficulties that we would not otherwise consider. A mortgage loan that has been granted new terms, including workout terms as described previously, would be considered a TDR if it meets conditions that would indicate a borrower is experiencing financial difficulty and the new terms constitute a concession on our part. We analyze all loans where we have agreed to workout terms and all loans that we have refinanced to determine if they meet the definition of a TDR. We consider the following factors in determining whether or not a borrower is experiencing financial difficulty:

- borrower is in default,
- borrower has declared bankruptcy,
- there is growing concern about the borrower's ability to continue as a going concern,
- borrower has insufficient cash flows to service debt,
- borrower's inability to obtain funds from other sources, and
- there is a breach of financial covenants by the borrower.

If the borrower is determined to be in financial difficulty, we consider the following conditions to determine if the borrower was granted a concession:

- assets used to satisfy debt are less than our recorded investment,
- interest rate is modified,
- maturity date extension at an interest rate less than market rate,

Table of Contents

- capitalization of interest,
- delaying principal and/or interest for a period of three months or more, and
- partial forgiveness of the balance or charge-off.

Mortgage loan workouts, refinances or restructures that are classified as TDRs are individually evaluated and measured for impairment. As of March 31, 2015, our CML portfolio had no impairments, modifications or troubled debt restructuring.

Net investment income

The major sources of “Net investment income” on the accompanying Condensed Consolidated Statements of Operations were as follows:

	Three months ended		Six months ended	
	March 31,	March 31,	March 31,	March 31,
	2015	2014	2015	2014
Fixed maturity available-for-sale securities	\$194	\$175	\$390	\$351
Equity available-for-sale securities	9	5	18	9
Commercial mortgage loans	3	—	4	1
Related party loans	1	2	3	4
Other investments	5	6	11	10
Gross investment income	212	188	426	375
Investment expense	(4) (4) (10) (7
Net investment income	\$208	\$184	\$416	\$368
Net investment (losses) gains				

Details underlying “Net investment (losses) gains” reported on the accompanying Condensed Consolidated Statements of Operations were as follows:

	Three months ended		Six months ended	
	March 31,	March 31,	March 31,	March 31,
	2015	2014	2015	2014
Net realized (losses) gains on fixed maturity available-for-sale securities	\$(19) \$6	\$(23) \$20
Realized (losses) on equity securities	(3) —	(2) (1
Net realized (losses) gains on securities	(22) 6	(25) 19
Realized gains on certain derivative instruments	40	45	81	99
Unrealized (losses) gains on certain derivative instruments	(47) (24) (46) 37
Change in fair value of reinsurance related embedded derivative	(3) (29) 16	(33
Change in fair value of other derivatives and embedded derivatives	11	—	12	—
Realized (losses) gains on derivatives and embedded derivatives	1	(8) 63	103
Realized losses on other invested assets	(37) —	(37) —
Net investment (losses) gains	\$(58) \$(2) \$1	\$122

Realized gains and losses on the sale of securities are determined on the specific identification method.

For the three and six months ended March 31, 2015, principal repayments, calls, tenders, and proceeds from the sale of fixed maturity available-for-sale securities totaled \$996 and \$1,806, gross gains on such sales totaled \$10 and \$20, and gross losses totaled \$29 and \$43, respectively.

For the three and six months ended March 31, 2014, principal repayments, calls, tenders, and proceeds from the sale of fixed maturity available-for-sale securities, totaled \$964 and \$2,628, gross gains on such sales totaled \$8 and \$23, and gross losses totaled \$2 and \$3, respectively.

Table of Contents

Unconsolidated Variable Interest Entities

We own two investments in VIEs that are not consolidated within the Company's financial statements. VIEs do not have sufficient equity to finance their own activities without additional financial support and certain of its investors lack certain characteristics of a controlling financial interest. These VIEs are not consolidated in the Company's financial statements for the following reasons: 1) FGL Insurance does not have any voting rights or notice rights; 2) the Company does not have any rights to remove the investment manager; and 3) the Company was not involved in the design of the investment. These characteristics indicate that FGL Insurance lacks the ability to direct the activities, or otherwise exert control, of the VIEs and is not considered the primary beneficiary of them.

FGL Insurance participates in loans to third parties originated by Salus. Salus is an affiliated, limited liability company indirectly owned by HRG that originates senior secured asset-based loans to unaffiliated third-party borrowers. FGL Insurance also participates in CLOs managed by Salus. Because Salus is not consolidated, the Company's maximum exposure to loss as a result of its investments in Salus is limited to the carrying value of its investments in Salus which totaled \$275 and \$304 as of March 31, 2015 and September 30, 2014, respectively. FGL's investments in Salus are detailed in "Note 14. Related Party Transactions" to the Company's Consolidated Financial Statements.

FGL Insurance also participates in an investment managed by Fifth Street Management, LLC ("Fifth Street"). Fifth Street Senior Loan Fund II (the "Fund") invests in loans selected and/or originated by Fifth Street. Fifth Street is an unaffiliated, limited liability company that originates financing for the Fund's investment activity through CLOs. The Company's maximum exposure to loss as a result of its investments in Fifth Street is limited to the carrying value of its investments in Fifth Street which totaled \$40 at March 31, 2015 and September 30, 2014, respectively.

(5) Derivative Financial Instruments

The carrying amounts of derivative instruments, including derivative instruments embedded in fixed indexed annuity ("FIA") contracts, is as follows:

	March 31, 2015	September 30, 2014
Assets:		
Derivative investments:		
Call options	\$268	\$ 296
Other invested assets:		
Other derivatives and embedded derivatives	25	13
Other assets:		
Reinsurance related embedded derivative	92	77
	\$385	\$ 386
Liabilities:		
Contractholder funds:		
FIA embedded derivative	\$2,217	\$1,908
Funds withheld for reinsurance liabilities:		
Call options payable to FSRCI	18	23
Other liabilities:		
Futures contracts	1	1
	\$2,236	\$1,932

Table of Contents

The change in fair value of derivative instruments included in the accompanying Condensed Consolidated Statements of Operations is as follows:

	Three months ended		Six months ended		
	March 31, 2015	March 31, 2014	March 31, 2015	March 31, 2014	
Revenues:					
Net investment (losses) gains:					
Call options	\$ (7) \$ 19	\$ 31	\$ 121	
Futures contracts	—	2	4	15	
Other derivatives and embedded derivatives	11	—	12	—	
Reinsurance related embedded derivative	(3) (29) 16	(33)
	\$ 1	\$ (8) \$ 63	\$ 103	
Benefits and other changes in policy reserves					
FIA embedded derivatives	\$ 77	\$ 74	\$ 309	\$ 175	

Additional Disclosures

Other Derivatives and Embedded Derivatives

On June 16, 2014, FGL Insurance invested in a \$35 fund-linked note issued by Nomura International Funding Pte. Ltd. The note provides for an additional payment at maturity based on the value of an embedded derivative in AnchorPath Dedicated Return Fund (the "AnchorPath Fund") of \$11 on June 16, 2014 which is based on the actual return of the fund. At March 31, 2015 the fair value of the embedded derivative is \$12. At maturity of the fund-linked note, FGL Insurance will receive the \$35 face value of the note plus the value of the embedded derivative in the AnchorPath Fund. The additional payment at maturity is an embedded derivative reported in "Other invested assets", while the host is an available-for-sale security reported in "Fixed maturities, available-for-sale".

FGL Insurance participates in loans to third parties originated by Salus, an affiliated VIE, indirectly owned by HRG that provides asset-based financing. Five of the participating loans are denominated in Canadian dollars ("CAD") which is different from FGL Insurance's functional currency. Two of the participating loans include a provision for reimbursement from the borrower to FGL Insurance for any net foreign exchange losses realized by FGL Insurance under the loan in which FGL Insurance has a participation interest. FGL Insurance's ability to recover the foreign exchange losses under these loan participations is such that the Company has established embedded derivatives equal to FGL Insurance's cumulative net foreign exchange loss on these loan participations. The value of the embedded derivatives is reflected in "Other invested assets" as of the balance sheet date with changes in fair value reflected in the Company's Condensed Consolidated Statements of Operations. The value of the embedded derivatives at each balance sheet date is equal to the cumulative net foreign exchange loss recognized on these loan participations at the balance sheet date. The Company had realized gains of \$10 and \$11, respectively, for the three and six months ended March 31, 2015 related to its foreign exchange embedded derivatives included in other invested assets. The Company had no realized gains or losses for the three and six months ended March 31, 2014 related to its foreign exchange embedded derivatives included in other invested assets.

The remaining three participating loans denominated in CAD also require reimbursement from borrower in CAD but do not include a provision for reimbursement of any net foreign exchange losses from the borrower. Consequently, Salus has executed CAD swap agreements with FGL Insurance to convert the CAD cash flows into USD cash flows. FGL Insurance recognizes the cumulative net foreign exchange loss recognized on these loan participations in "Other invested assets" with the changes in the fair value reflected in the Company's Condensed Consolidated Statements of Operations. In the second fiscal quarter 2015, we executed CAD swap agreements with Salus for three of the Salus participation interest with Canadian issuers. Under these swap agreements, Salus will reimburse the Company for any foreign exchange losses related to these loan participations since the origination date. As a result, the Company accrued an expected recoverable of \$9 and corresponding gain in our Condensed Consolidated Statements of Operations for the amount of cumulative net foreign exchange loss since the origination of the participation.

Table of Contents

Credit Risk

The Company is exposed to credit loss in the event of nonperformance by its counterparties on the call options and reflects assumptions regarding this nonperformance risk in the fair value of the call options. The nonperformance risk is the net counterparty exposure based on the fair value of the open contracts less collateral held. The Company maintains a policy of requiring all derivative contracts to be governed by an International Swaps and Derivatives Association ("ISDA") Master Agreement.

Information regarding the Company's exposure to credit loss on the call options it holds is presented in the following table:

Counterparty	Credit Rating (Fitch/Moody's/S&P) (a)	March 31, 2015			Net Credit Risk	September 30, 2014			Net Credit Risk
		Notional Amount	Fair Value	Collateral		Notional Amount	Fair Value	Collateral

(a) An * represents credit ratings that were not available.

Collateral Agreements

The Company is required to maintain minimum ratings as a matter of routine practice as part of its over-the-counter derivative agreements on ISDA forms. Under some ISDA agreements, the Company has agreed to maintain certain financial strength ratings. A downgrade below these levels provides the counterparty under the agreement the right to terminate the open derivative contracts between the parties, at which time any amounts payable by the Company or the counterparty would be dependent on the market value of the underlying derivative contracts. The Company's current rating allows multiple counterparties the right to terminate ISDA agreements. No ISDA agreements have been terminated, although the counterparties have reserved the right to terminate the ISDA agreements at any time. In certain transactions, the Company and the counterparty have entered into a collateral support agreement requiring either party to post collateral when the net exposures exceed pre-determined thresholds. These thresholds vary by counterparty and credit rating. As of March 31, 2015 and September 30, 2014, counterparties posted \$178 and \$188 of collateral of which \$143 and \$135, respectively, is included in "Cash and cash equivalents" with an associated payable for this collateral included in "Other liabilities" on the Condensed Consolidated Balance Sheets. The remaining \$35 and \$53 of non-cash collateral was held by a third-party custodian at March 31, 2015 and September 30, 2014, respectively. Accordingly, the maximum amount of loss due to credit risk that the Company would incur if parties to the call options failed completely to perform according to the terms of the contracts was \$90 and \$108 at March 31, 2015 and September 30, 2014, respectively.

The Company held 1,652 and 2,348 futures contracts at March 31, 2015 and September 30, 2014, respectively. The fair value of the futures contracts represents the cumulative unsettled variation margin (open trade equity, net of cash settlements). The Company provides cash collateral to the counterparties for the initial and variation margin on the futures contracts which is included in "Cash and cash equivalents" in the accompanying Condensed Consolidated Balance Sheets. The amount of cash collateral held by the counterparties for such contracts was \$8 and \$11 at March 31, 2015 and September 30, 2014, respectively.

Table of Contents

(6) Fair Value of Financial Instruments

The Company's measurement of fair value is based on assumptions used by market participants in pricing the asset or liability, which may include inherent risk, restrictions on the sale or use of an asset or non-performance risk, which may include the Company's own credit risk. The Company's estimate of an exchange price is the price in an orderly transaction between market participants to sell the asset or transfer the liability ("exit price") in the principal market, or the most advantageous market in the absence of a principal market, for that asset or liability, as opposed to the price that would be paid to acquire the asset or receive a liability ("entry price"). The Company categorizes financial instruments carried at fair value into a three-level fair value hierarchy, based on the priority of inputs to the respective valuation technique. The three-level hierarchy for fair value measurement is defined as follows:

Level 1 - Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

Level 2 - Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads and yield curves.

Level 3 - Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date based on the best information available in the circumstances.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lower level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the investment.

When a determination is made to classify an asset or liability within Level 3 of the fair value hierarchy, the determination is based upon the significance of the unobservable inputs to the overall fair value measurement.

Because certain securities trade in less liquid or illiquid markets with limited or no pricing information, the determination of fair value for these securities is inherently more difficult. However, Level 3 fair value investments may include, in addition to the unobservable or Level 3 inputs, observable components, which are components that are actively quoted or can be validated to market-based sources.

Table of Contents

The carrying amounts and estimated fair values of the Company's financial instruments for which the disclosure of fair values is required, including financial assets and liabilities measured and carried at fair value on a recurring basis, with the exception of investment contracts and debt, are summarized according to the hierarchy previously described, as follows:

	March 31, 2015			Fair Value	Carrying Amount
	Level 1	Level 2	Level 3		
Assets					
Cash and cash equivalents	\$ 849	\$—	\$—	\$ 849	\$ 849

Total financial liabilities at fair value	\$—	\$340	\$15,017	\$15,357	\$16,787

The carrying amounts of accrued investment income, and portions of other insurance liabilities, approximate fair value due to their short duration and, accordingly, they are not presented in the tables above.

Valuation Methodologies

Fixed Maturity Securities & Equity Securities

The Company measures the fair value of its securities based on assumptions used by market participants in pricing the security. The most appropriate valuation methodology is selected based on the specific characteristics of the fixed maturity or equity security, and the Company will then consistently apply the valuation methodology to measure the security's fair value. The Company's fair value measurement is based on a market approach, which utilizes prices and other relevant information generated by market transactions involving identical or comparable securities. Sources of inputs to the market approach include a third-party pricing service, independent broker quotations or pricing matrices. The Company uses observable and unobservable inputs in its valuation methodologies. Observable inputs include benchmark yields, reported trades, broker-dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data. In addition, market indicators and industry and economic events are monitored and further market data will be acquired when certain thresholds are met. For certain security types, additional inputs may be used, or some of the inputs described above may not be applicable. The significant unobservable input used in the fair value measurement of equity securities available-for-sale for which the market-approach valuation technique is

employed is yields for comparable securities. Increases (decreases) in the yields would result in lower or higher, respectively, fair value measurements. For broker-quoted only securities, quotes from market makers or broker-dealers are obtained from sources recognized to be market participants. The fair value of the Company's investment in mutual funds is based on the net asset value published by the respective mutual fund and represents the value the Company would have received if it withdrew its investment on the balance sheet date. Management believes the broker quotes are prices at which trades could be executed based on historical trades executed at broker-quoted or slightly higher prices.

Table of Contents

The Company did not adjust prices received from third parties as of March 31, 2015 and September 30, 2014. However, the Company does analyze the third-party valuation methodologies and its related inputs to perform assessments to determine the appropriate level within the fair value hierarchy.

Derivative Financial Instruments

The fair value of derivative assets and liabilities is based upon valuation pricing models, which represents what the Company would expect to receive or pay at the balance sheet date if it canceled the options, entered into offsetting positions, or exercised the options. Fair values for these instruments are determined externally by an independent consulting firm using market-observable inputs, including interest rates, yield curve volatilities, and other factors. The fair values of the embedded derivatives in the Company's FIA products are derived using market indices, pricing assumptions and historical data. The fair value of the reinsurance related embedded derivative in the funds withheld reinsurance agreement with FSRCI is estimated based upon the change in the fair value of the assets supporting the funds withheld from reinsurance liabilities. As the fair value of the assets is based on a quoted market price of similar assets (Level 2), the fair value of the embedded derivative is based on market-observable inputs and is classified as Level 2. The fair value of futures contracts represents the cumulative unsettled variation margin (open trade equity, net of cash settlements).

Investment contracts include deferred annuities, FIAs, indexed universal life policies ("IULs") and immediate annuities. The fair value of deferred annuity, FIA, and IUL contracts is based on their cash surrender value (i.e. the cost the Company would incur to extinguish the liability) as these contracts are generally issued without an annuitization date. The fair value of immediate annuities contracts is derived by calculating a new fair value interest rate using the updated yield curve and treasury spreads as of the respective reporting date. At March 31, 2015 and September 30, 2014, this resulted in lower fair value reserves relative to the carrying value. The Company is not required to, and has not, estimated the fair value of the liabilities under contracts that involve significant mortality or morbidity risks, as these liabilities fall within the definition of insurance contracts that are exceptions from financial instruments that require disclosures of fair value.

The significant unobservable inputs used in the fair value measurement of FIA embedded derivatives included in contractholder funds are market value of option, interest swap rates, mortality multiplier, surrender rates, and non-performance spread. The mortality multiplier at March 31, 2015 and September 30, 2014 is applied to the Annuity 2000 mortality tables. Significant increases (decreases) in the market value of option in isolation would result in a higher or lower, respectively, fair value measurement. Significant increases or decreases in interest swap rates, mortality multiplier, surrender rates, or non-performance spread in isolation would result in a lower or higher, respectively, fair value measurement. Generally, a change in any one unobservable input would not result in a change in any other unobservable input.

Other Invested Assets

Fair value of our loan participation interest securities approximates the unpaid principal balance of the participation interest as of March 31, 2015. In making this assessment, the Company considered the sufficiency of the underlying loan collateral, movements in the benchmark interest rate between origination date and March 31, 2015, the primary market participant for these securities and the short-term maturity of these loans (less than 1 year).

Fair value of our loan participation interest in RSH is based upon a best estimate of the expected liquidation value of the underlying collateral. RSH is in the process of liquidation to satisfy creditor obligations. Valuation of the collateral was based upon a variety of assumptions by asset class depending upon the availability of market-participant indicators of fair value. Where such market data was not available, a best estimate of expected liquidation value as a percentage of book value was calculated based upon experience in similar liquidations. Our best estimate of recovery value is 30% of the par value of the investment based upon the documentation currently available. As the liquidation process continues and more information becomes known about expected or actual sales price/recovery value, our estimates and the evaluation of the fair value and other than temporary impairment will be updated. The actual recovery value from the liquidation process could vary from the estimates that have been used for the current fair value estimation.

Fair value of our embedded derivative is based on an unobservable input, the net asset value of the AnchorPath fund at the balance sheet date. The embedded derivative is similar to a call option on the net asset value of the AnchorPath

fund with a strike price of zero since FGL Insurance will not be required to make any additional payments at maturity of the fund-linked note in order to receive the net asset value of the AnchorPath fund on the maturity date. Therefore, the Black Scholes model returns the net asset value of the AnchorPath fund as the fair value of the call option regardless of the values used for the other inputs to the option pricing model. The net asset value of the AnchorPath fund is provided by the fund manager at the end of each calendar month and represents the value an investor would receive if

Table of Contents

it withdrew its investment on the balance sheet date. Therefore, the key unobservable input used in the Black Scholes model is the value of the AnchorPath fund. As the value of the AnchorPath fund increases or decreases, the fair value of the embedded derivative will increase or decrease.

Fair value of foreign exchange derivatives and embedded derivatives are based on the quoted United States dollar ("USD")/CAD exchange rates.

Valuation Methodologies and Associated Inputs for Financial Instruments Not Carried at Fair Value

The following discussion outlines the methodologies and assumptions used to determine the fair value of our financial instruments not carried at fair value. Considerable judgment is required to develop these assumptions used to measure fair value. Accordingly, the estimates shown are not necessarily indicative of the amounts that would be realized in a one-time, current market exchange of all of our financial instruments.

Mortgage Loans on Real Estate

The fair value of mortgage loans on real estate is established using a discounted cash flow method based on credit rating, maturity and future income. The ratings for mortgages in good standing are based on property type, location, market conditions, occupancy, debt-service coverage, loan-to-value, quality of tenancy, borrower and payment record. The fair value for impaired mortgage loans is based on the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's market price or the fair value of the collateral if the loan is collateral dependent. The inputs used to measure the fair value of our mortgage loans on real estate are classified as Level 3 within the fair value hierarchy.

In September 2013, the Company initiated a commercial loan program utilizing a third party CML asset manager, Principal Real Estate Investors ("Principal"). Subsequently in October 2014, the Company transitioned this program to CorAmerica, a subsidiary of Harbinger Group, as an additional CML asset manager, and in April 2015 transferred the management and servicing responsibilities of all CMLs to CorAmerica. As part of these programs, the Company has funded CMLs with a fair value of \$304 at March 31, 2015, which is equal to amortized cost. None of these loans are past due or have material credit issues and given that there have not been material changes in market interest since origination the Company views amortized cost as representative of fair value. The CML asset managers monitor the status of the payment obligations, the credit quality of the borrower, the condition of the property, and any other events that may impact the performance and principal repayment of the CMLs. Additionally, the Company periodically reviews the asset managers' valuation methodologies and investment processes to ensure the program is performing in line with the objectives of the program. A CML's current standing and payment obligations are material factors in evaluating the CML's carrying value and related fair value. At March 31, 2015, all CMLs are current with no payments past due and there are no credit or other events which would require impairment evaluation.

Policy Loans (included within Other Invested Assets)

Also included in other invested assets are policy loans. Fair values for policy loans are estimated using discounted cash flow analysis, using interest rates currently being offered for loans with similar credit risk. Loans with similar characteristics are aggregated for purposes of the calculations.

Related Party Loans

The related party loans (discussed in "Note 14. Related Party Transactions") carrying value at par approximates fair value, as this is the exit price for the obligation of these loans.

Debt

The fair value of debt is based on quoted market prices. The inputs used to measure the fair value of our outstanding debt are classified as Level 2 within the fair value hierarchy.

Table of Contents

Quantitative information regarding significant unobservable inputs used for recurring Level 3 fair value measurements of financial instruments carried at fair value as of March 31, 2015 and September 30, 2014 are as follows:

	Fair Value at	Valuation	Unobservable	Range (Weighted
	March 31, 2015	Technique	Input(s)	average)
				March 31, 2015

Changes in unrealized losses (gains), net in the Company's FIA embedded derivatives are included in "Benefits and other changes in policy reserves" in the Condensed Consolidated Statements of Operations.

Table of Contents

The following tables summarize changes to the Company's financial instruments carried at fair value and classified within Level 3 of the fair value hierarchy for the three and six months ended March 31, 2015 and 2014, respectively. This summary excludes any impact of amortization of VOBA and DAC. The gains and losses below may include changes in fair value due in part to observable inputs that are a component of the valuation methodology.

Total assets at Level 3 fair value	\$870	\$—	\$4	\$373	\$—	\$(71)	\$(209)	\$967
Liabilities								
FIA embedded derivatives, included in contractholder funds	\$1,544	\$175	\$—	\$—	\$—	\$—	\$—	\$1,719
Total liabilities at Level 3 fair value	\$1,544	\$175	\$—	\$—	\$—	\$—	\$—	\$1,719

(a) The net transfers out of Level 3 during the six months ended March 31, 2014 were exclusively to Level 2. There was a \$6.0 transfer within the Level 3 asset class from commercial mortgage-backed securities to asset-backed securities.

The Company reviews the fair value hierarchy classifications each reporting period. Changes in the observability of the valuation attributes may result in a reclassification of certain financial assets or liabilities. Such reclassifications are reported as transfers in and out of Level 3, or between other levels, at the beginning fair value for the reporting period in which the changes occur. There were no transfers between Level 1 and Level 2 for the three and six months ended March 31, 2015 and 2014.

Primary market issuance and secondary market activity for certain asset-backed securities during the three and six months ended March 31, 2015 and 2014 increased the market observable inputs used to establish fair values for similar securities. These factors, along with more consistent pricing from third-party sources, resulted in the Company concluding that there is sufficient trading activity in similar instruments to support classifying these securities as Level 2 as of March 31, 2015 and 2014. Accordingly, the Company's assessment resulted in net transfers out of Level 3 of \$28 and \$34 related to asset-backed and corporate securities during the three and six months ended March 31, 2015.

During the three and six months ended March 31, 2014, there were net transfers out of Level 3 of \$203 related to asset-backed securities.

(7) Intangible Assets

Information regarding VOBA and DAC which includes deferred sales inducement, is as follows:

	VOBA	DAC	Total
Balance at September 30, 2014	\$59	\$456	\$515
Deferrals	—	174	174
Less: Amortization related to:			
Unlocking	—	(8) (8
Interest	6	11	17
Amortization	(22) 4	(18
Add: Adjustment for unrealized investment losses	(17) (53) (70
Balance at March 31, 2015	\$26	\$584	\$610

	VOBA	DAC	Total
Accumulated amortization	\$370		
Balance at September 30, 2013	\$192	\$331	\$523
Deferrals	—	116	116
Less: Amortization related to:			
Unlocking	12	1	13
Interest	7	7	14
Amortization	(39) (22) (61
Add: Adjustment for unrealized investment losses	(63) (42) (105
Balance at March 31, 2014	\$109	\$391	\$500

Accumulated amortization \$323

Amortization of VOBA and DAC is based on the amount of gross margins or profits recognized, including investment gains and losses. The interest accrual rate utilized to calculate the accretion of interest on VOBA ranged from 4% to 5%. The adjustment for unrealized net investment gains represents the amount of VOBA and DAC that would have been amortized if such unrealized gains and losses had been recognized. This is referred to as the “shadow adjustments” as the additional amortization is reflected in AOCI rather than the statement of operations. As of March 31, 2015 and September 30, 2014, the VOBA balance included cumulative adjustments for net unrealized investment gains/losses of \$182 and \$164, respectively, and the DAC balances included cumulative adjustments for net unrealized investment gains/losses of \$108 and \$56, respectively.

The above DAC balances include \$37 and \$33 of deferred sales inducements, net of shadow adjustments, as of March 31, 2015 and September 30, 2014, respectively.

The weighted average amortization period for VOBA is approximately 4.9 years. Estimated amortization expense for VOBA in future fiscal periods is as follows:

Fiscal Year	Estimated Amortization Expense VOBA
2015	\$19
2016	35
2017	29
2018	23
2019	19
Thereafter	82

Table of Contents

(8) Debt

The Company's outstanding debt as of March 31, 2015 and September 30, 2014 was as follows:

(dollars in millions)	March 31, 2015	September 30, 2014
Debt	\$300	\$300
Revolving credit facility	—	—

The interest expense and amortization of debt issuance costs of the Company's debt for the three and six months ended March 31, 2015 and 2014, respectively, were as follows:

(dollars in millions)	Three months ended				Six months ended			
	March 31, 2015		March 31, 2014		March 31, 2015		March 31, 2014	
	Interest Expense	Amortization	Interest Expense	Amortization	Interest Expense	Amortization	Interest Expense	Amortization
Debt	\$5	\$1	\$5	\$1	\$9	\$2	\$9	\$2
Revolving credit facility	—	—	—	—	—	1	—	—

As of August 26, 2014, Fidelity & Guaranty Life Holdings, Inc. ("FGLH"), a wholly owned subsidiary of FGL, as borrower, and the Company as guarantor, entered into a three-year \$150 unsecured revolving credit facility (the "Credit Agreement") with certain lenders and RBC Capital Markets and Credit Suisse Securities (USA) LLC, acting as joint lead arrangers. The loan proceeds from the Credit Agreement may be used for working capital and general corporate purposes. As of March 31, 2015, the Company has not drawn on the revolver. If the Company were to draw on the revolver, the interest rate would be equal to a fluctuating rate per annum equal to the highest of (a) the Federal Funds Rate plus 0.5%, (b) the rate of interest determined by Royal Bank of Canada as its prime commercial lending rate for USD loans in the United States for such day as the "U.S. Prime Rate", and (c) the Eurodollar Rate for an interest period of one month beginning on such day (or if such day is not a business day, the business day immediately preceding such day) plus 1.00% per annum. As of March 31, 2015 and September 30, 2014, the interest rate would be equal to 5.25%, had the Company drawn on the revolver.

(9) Equity

Share Repurchase

On September 2, 2014, the Company's Board of Directors authorized the repurchase of up to 500 thousand shares of the Company's outstanding shares of common stock over the next twelve months. As of March 31, 2015, 463 thousand shares of common stock have been repurchased at cost for a total cost of \$10, which are held in treasury, of which 451 thousand shares were pursuant to the repurchase program and 12 thousand shares were acquired to satisfy employee income tax withholding pursuant to the Company's stock compensation plan. Subsequent to the Company's repurchase of shares, HRG indirectly held 47,000 thousand shares of FGL's outstanding common stock, representing an 81% interest at March 31, 2015.

Dividends

On November 18, 2014, FGL's Board of Directors declared a quarterly cash dividend of \$0.065 per share. The dividend was paid on December 15, 2014 to shareholders of record as of the close of business on December 1, 2014 and total cash paid was \$4 (based on fully vested, outstanding shares of 58,279 thousand).

On February 10, 2015, FGL's Board of Directors declared a quarterly cash dividend of \$0.065 per share. The dividend was paid on March 9, 2015 to shareholders of record as of the close of business on February 23, 2015 and total cash paid was \$4 (based on fully vested, outstanding shares of 57,975 thousand).

On May 1, 2015, FGL's Board of Directors declared a quarterly cash dividend of \$0.065 per share. The dividend is payable on June 1, 2015 to shareholders of record as of the close of business on May 18, 2015.

Table of Contents

(10) Stock Compensation

The Company recognized total stock compensation expense related to the FGL Plans and FGLH Plans as follows:

	Three months ended		Six months ended	
	March 31, 2015	March 31, 2014	March 31, 2015	March 31, 2014
FGL Plans

	2	
Total unrecognized stock compensation expense	\$14	2

FGL Plans

FGL's Compensation Committee is authorized to grant up to 2,838 thousand equity awards under the FGL Plans. At March 31, 2015, 1,395 thousand equity awards are available for future issuance under the FGL Plans. On December 1, 2014, FGL granted 176 thousand stock options to certain officers, directors and other key employees under the Omnibus Plan. These stock options vest in equal installments over a period of three years and expire

Table of Contents

on the seventh anniversary of the grant date. The total fair value of the option grants to certain officers, directors and other employees on the grant date was \$1. On February 11, 2014, FGL granted 7 thousand stock options to certain directors under the Omnibus Plan. These stock options vest in equal installments over a period of three years and expire on the seventh anniversary of the grant date. The total fair value of the option grants to certain officers, directors and other employees on the grant date was \$0.

On March 31, 2015, the Company entered into an agreement with its former Chief Executive Officer in connection with his resignation pursuant to which the vesting for certain FGL and FGLH equity awards to the former Chief Executive Officer were accelerated. The former Chief Executive Officer forfeited two-thirds of the performance restricted stock units granted in fiscal year 2014, and all other previously awarded equity grants became vested as of March 31, 2015. The exercise date of the outstanding stock options was extended to December 31, 2015. No other terms of the equity awards were modified. The Company recognized total incremental compensation expense of \$2 as a result of these modifications.

At March 31, 2015, the intrinsic value of stock options outstanding, exercisable and vested or expected to vest was \$1, \$1, and \$1, respectively. At March 31, 2015, the weighted average remaining contractual term of stock options outstanding, exercisable and vested or expected to vest was 6 years, 6 years and 6 years, respectively.

During the six months ended March 31, 2015 and March 31, 2014, the intrinsic value of stock options exercised, total cash received upon exercise and the related tax benefit realized was \$0, \$0 and \$0, respectively.

A summary of FGL's outstanding stock options as of March 31, 2015, and related activity during the six months then ended, is as follows (option amount in thousands):

Stock Option Awards	Options	Weighted Average Exercise Price
Stock options outstanding at September 30, 2014	242	\$17.00
Granted	182	24.87
Exercised	(3) 17.00
Forfeited or expired	(12) 20.08
Stock options outstanding at March 31, 2015	409	20.35
Exercisable at March 31, 2015	221	19.52
Vested or expected to vest at March 31, 2015	397	20.30

The following assumptions were used in the determination of the grant date fair values using the Black-Scholes option pricing model and based on the value of FGL's common stock for stock options granted during the six months ended March 31, 2015:

Weighted average fair value per option granted	\$5.02
Risk-free interest rate	1.4%
Assumed dividend yield	1.2%
Expected option term	4.5 years
Volatility	25.0%

The following assumptions were used in the determination of the grant date fair values using the Black-Scholes option pricing model for the former Chief Executive Officer's modified stock options and based on the value of FGL's common stock:

Weighted average fair value per option modified	\$2.53
Risk-free interest rate	0.2%
Assumed dividend yield	1.2%
Expected option term	0.75 years
Volatility	25.0%

Expected volatility is based on the historical volatility of FGL's stock price for awards granted in 2015.

Table of Contents

On October 6, 2014, FGL granted 12 thousand restricted shares to a certain officer under the Omnibus Plan. These shares cliff vest in one year. The total fair value of the restricted shares granted to this officer on their grant date was \$0.

On November 19, 2014, FGL also granted 100 thousand restricted shares to a certain director under the Omnibus Plan. These shares vest in three tranches; 20% on the first anniversary of the grant date; 50% on the second anniversary of the grant date; and 30% on the third anniversary of the grant date. The total fair value of the restricted shares granted to a certain director on their grant date was \$2.

On December 1, 2014, FGL also granted 138 thousand restricted shares to certain directors, officers and other key employees under the Omnibus Plan. These shares vest in equal installments over a period of three years. The total fair value of the restricted shares granted to certain officers, directors and key employees on their grant date was \$3.

On February 11, 2015, FGL also granted 48 thousand restricted shares to certain directors under the Omnibus Plan. 40 thousand shares vest in three tranches; 20% on the first anniversary of the grant date; 50% on the second anniversary of the grant date; and 30% on the third anniversary of the grant date and the remaining shares granted on February 11, 2015 vest in equal installments over a period of three years. The total fair value of the restricted shares granted to certain officers, directors and key employees on their grant date was \$1.

On March 18, 2015, the expected requisite service periods for board members and executives that received certain FGL restricted shares granted on November 19, 2014 and February 11, 2015 were completed resulting in expense acceleration under the terms of the original awards due to their resignation from the Company's Board and all related committee positions of the two grantees. The Company recognized additional compensation expense of \$3 as a result of the related equity compensation expense acceleration.

A summary of FGL's restricted shares outstanding as of March 31, 2015, and related activity during the six months then ended, is as follows (share amount in thousands):

Restricted Stock Awards	Shares	Weighted Average Grant Date Fair Value
Nonvested restricted shares outstanding at September 30, 2014	172	\$18.18
Granted	298	23.81
Vested	(228)) 21.64
Forfeited or expired	(13)) 20.62
Nonvested restricted shares outstanding at March 31, 2015	229	21.96

On October 6, 2014, FGL also granted 32 thousand performance restricted stock units ("PRSUs") to a senior executive officer under the Omnibus Plan. These units vest on September 30, 2016, contingent on the satisfaction of performance criteria and on the officer's continued employment unless otherwise noted in the agreement. PRSUs subject to vesting are adjusted based on FGL's financial yearly performance, which is evaluated on two non-GAAP measures: (1) adjusted operating income, and (2) return on equity. Depending on the performance results for each year, the ultimate payout of PRSUs could range from zero to 200% of the target award for each year. One-half of the award is earned based on each year's results. The total fair value of the PRSUs on the grant date of October 6, 2014 assuming attainment of the target performance level in each year was \$1.

Table of Contents

A summary of PRSUs outstanding as of March 31, 2015, and related activity during the six months then ended, is as follows (share amount in thousands):

Performance Restricted Stock Units (PRSUs)	Shares	Weighted Average Grant Date Fair Value
Nonvested PRSUs outstanding at September 30, 2014	578	\$17.37
Granted, including 8 additional units based on 2014 financial performance	40	20.36
Vested	(45) 17.00
Forfeited	(72) 17.00
Nonvested PRSUs outstanding at March 31, 2015	501	17.69

Additionally, on October 6, 2014 and February 11, 2015, FGL granted unrestricted shares totaling 8 thousand and 1 thousand, respectively to certain directors in payment for services rendered. Total fair value of the unrestricted shares on the grant date was \$0 and \$0, respectively.

FGLH Plans

A summary of FGLH's outstanding stock options as of March 31, 2015, and related activity during the six months then ended, is as follows (share amount in thousands):

Stock Option Awards	FGLH Options	Weighted Average Exercise Price (a)
Stock options outstanding at September 30, 2014	225	\$46.19
Granted	—	—
Exercised	(47) 43.36
Forfeited or expired	(1) 49.45
Stock options outstanding at March 31, 2015	177	46.94
Vested and exercisable at March 31, 2015	149	46.45
Vested or expected to vest at March 31, 2015	175	46.91

(a) The exercise price is based on the value of FGLH's common stock, not the value of the Company's common stock.

(a) The fair value of FGLH stock at March 31, 2015 is \$103.20 per share.

At March 31, 2015, the intrinsic value of stock options outstanding, exercisable and vested or expected to vest was \$10, \$8 and \$10, respectively. At March 31, 2015, the weighted average remaining contractual term of stock options outstanding, exercisable and vested or expected to vest was 3 years, 2 years and 3 years, respectively. The intrinsic value of stock options exercised during the six months ended March 31, 2015 and 2014 was \$3 and \$2, respectively.

A summary of FGLH's restricted stock units outstanding as of March 31, 2015 and related activity during the six months then ended is as follows (share amount in thousands):

Restricted Stock Awards	Shares	Weighted Average Grant Date Fair Value (a)
Nonvested restricted shares outstanding at September 30, 2014	26	\$49.55
Granted	—	—
Vested	(14) 49.45
Forfeited	—	49.45
Nonvested restricted stock units outstanding at March 31, 2015	12	49.68

(a) Fair value is based on the value of FGLH's common stock, not the value of the Company's common stock.

The primary assumption used in the determination of the fair value of FGLH's awards is the value of the Company's common stock, which was \$21.20 and \$21.35 as of March 31, 2015 and September 30, 2014, respectively, with other assumptions as summarized in our 2014 Form 10-K.

Table of Contents

(11) Income Taxes

The provision for income taxes represents federal income taxes. The effective tax rates for the three and six months ended March 31, 2015 were 0% and 82%, respectively. The effective tax rates for the three and six months ended March 31, 2014 were 292% and (31)%, respectively. The effective tax rate on pre-tax income differs from the U.S. Federal statutory rate primarily due to current period changes to the Company's valuation allowance. The largest component impacting the current six month period is the valuation allowance established against non-life losses, which include impairment losses, compared to the prior six month period which did not have any non-life impairment losses.

The Company maintains a valuation allowance against certain U.S. Internal Revenue Code, Section 382 ("Section 382") limited capital loss carry forwards and the deferred tax assets of its non-life insurance company subsidiaries. A valuation allowance has been placed against Section 382 limited capital loss carry forwards to reduce these deferred tax assets to an amount that is more-likely than not to be realized before the attributes expire. The non-life insurance company subsidiaries have a history of losses and insufficient sources of future income in order to recognize any portion of their deferred tax assets. All other deferred tax assets are more likely than not to be realized based on expectations as to our future taxable income and considering all other available evidence, both positive and negative. The valuation allowance is reviewed quarterly and will be maintained until there is sufficient positive evidence to support a release. At each reporting date, management considers new evidence, both positive and negative, that could impact the future realization of deferred tax assets. Management will consider a release of the valuation allowance once there is sufficient positive evidence that it is more likely than not that the deferred tax assets will be realized. Any release of the valuation allowance will be recorded as a tax benefit increasing net income or other comprehensive income.

During the period ended March 31, 2014, market conditions changed sufficiently that Management determined it was prudent and feasible to adopt a new tax planning strategy. The strategy involved repositioning a portion of the investment portfolio to trigger \$100 in net unrealized built-in gains ("NUBIG"). The sale of these assets will result in an increase to the Company's Section 382 limit (i.e. the "adjusted limit"), enabling the Company to utilize capital loss carry forwards that will offset NUBIG-related gains. This strategy makes it more likely than not that the amount of capital loss carryforwards needed to offset those gains will be utilized. Therefore, a partial release of the valuation allowance offsetting the deferred tax asset related to capital loss carry forwards was recorded at the March 31, 2014 reporting date. Management intends to execute the remaining transactions prior to the expiration of Section 382-limited capital loss carry forwards. As of March 31, 2015, approximately \$73 of NUBIG has been recognized locking in \$26 in tax benefits. The Company currently has capital loss carry forwards of \$245 that will expire December 31, 2015 if unused. The Company expects to utilize \$27 of those capital loss carryforwards as part of its tax planning strategy adopted March 31, 2014.

As of March 31, 2015, the Company had a partial valuation allowance of \$124 against its gross deferred tax assets of \$228. The valuation allowance is an offset to capital loss carryforwards (post tax planning strategy execution) expected to expire, as well as non-life company deferred tax assets that will most likely not be recovered due to lack of forecasted taxable income in the non-life segment.

(12) Commitments and Contingencies

Contingencies

Regulatory and Litigation Matters

FGL is assessed amounts by the state guaranty funds to cover losses to policyholders of insolvent or rehabilitated insurance companies. Those mandatory assessments may be partially recovered through a reduction in future premium taxes in certain states. At March 31, 2015, FGL has accrued \$4 for guaranty fund assessments which is expected to be offset by estimated future premium tax deductions of \$4.

The Company has received inquiries from a number of state regulatory authorities regarding its use of the U.S. Social Security Administration's Death Master File (the "Death Master File") and compliance with state claims practices regulation. Legislation requiring insurance companies to use the Death Master File to identify potential claims has

been enacted in a number of states. As a result of these legislative and regulatory developments, in May

37

Table of Contents

2012, the Company undertook an initiative to use the Death Master File and other publicly available databases to identify persons potentially entitled to benefits under life insurance policies, annuities and retained asset accounts. In addition, the Company has received audit and examination notices from several state agencies responsible for escheatment and unclaimed property regulation in those states and in some cases has challenged the audits. The Company established a contingency of \$2 based on its estimates related to the external legal costs and administrative costs of challenging said audits and examinations of which \$2 has been paid through March 31, 2015. Additional costs that cannot be reasonably estimated as of the date of this filing are possible as a result of ongoing regulatory developments and other future requirements related to this matter.

The Company is involved in various pending or threatened legal proceedings, including purported class actions, arising in the ordinary course of business. In some instances, these proceedings include claims for unspecified or substantial punitive damages and similar types of relief in addition to amounts for alleged contractual liability or requests for equitable relief. In the opinion of management and in light of existing insurance and other potential indemnification, reinsurance and established reserves, such litigation is not expected to have a material adverse effect on the Company's financial position, although it is possible that the results of operations and cash flows could be materially affected by an unfavorable outcome in any one period.

Except for the Eddie L. Cressy v. Fidelity Guaranty [sic] Life Insurance Company, et. al. class action Complaint and the complaint filed by Dale R. Ludwick, discussed below, there has been no material updates to our legal proceedings during the period. See "Note 14. Related Party Transactions", in our 2014 Form 10-K for a detailed discussion of our legal proceedings.

On July 5, 2013, a putative class action Complaint was filed in the Superior Court of California, County of Los Angeles (the "Court"), captioned Eddie L. Cressy v. Fidelity Guaranty [sic] Life Insurance Company, et. al. Case No. BC-514340. The state court Complaint asserts, inter alia, that the Plaintiff and members of the putative class relied on Defendants' advice in purchasing unsuitable equity-indexed insurance policies.

On April 4, 2014, the Plaintiff, FGL Insurance and the other two defendants signed a Settlement Agreement, pursuant to which FGL Insurance has agreed to pay a total of \$5 to settle the claims of a nationwide class consisting, with certain exclusions, of all persons who own or owned an OM Financial/FGL Insurance indexed universal life insurance policy issued from January 1, 2007 through March 31, 2014, inclusive. As part of the settlement, FGL Insurance agreed to certification of the nationwide class for settlement purposes only. An Amended Settlement Agreement was filed with the Court on June 5, 2014.

On January 2, 2015, the Court entered the Final Judgment in Cressy, finally certifying the class for settlement purposes, and finally approving the class settlement. The implementation shall commence on or about August 10, 2015. The parties will advise the Court when the settlement is complete.

At March 31, 2015, the Company estimated the total cost for the settlement, legal fees and other costs related to this class action would be \$9 and established a liability for the unpaid portion of the estimate of \$3. The Company has incurred and paid \$4 related to legal fees and other costs and \$2 related to settlement costs as of March 31, 2015. Based on the information currently available the Company does not expect the actual cost for settlement, legal fees and other related costs to differ materially from the amount accrued. The Company is seeking indemnification from OM Group (UK) Limited ("OMGUK") under the First Amended and Restated Stock Purchase Agreement, dated February 17, 2011 (the "F&G Stock Purchase Agreement") between HFG and OMGUK related to the settlement and the costs and fees in defending the Cressy litigation in both the federal and state courts. The Company has established an amount recoverable from OMGUK for the amount of \$4, the collection of which the Company believes is probable. The actual amount recovered from OMGUK could be greater or less than the Company's estimate, but the Company anticipates that the amount recovered will not be materially different than its current estimate. The settlement, legal fees and other costs related to this class action and the amount recoverable from OMGUK is presented net in the Condensed Consolidated Statements of Operations in "Benefits and other changes in policy reserves."

On January 7, 2015, a putative class action complaint was filed in the United States District Court, Western District of Missouri, captioned Dale R. Ludwick, on behalf of Herself and All Others Similarly Situated v. Harbinger Group Inc., Fidelity & Guaranty Life Insurance Company, Raven Reinsurance Company, and Front Street Re (Cayman) Ltd. The complaint asserts claims of violation of the Racketeer Influenced and Corrupt Organizations Act ("RICO") and

injunctive and declaratory relief. The complaint seeks unspecified compensatory damages in an amount not presently determinable, treble damages, and injunctive relief, among other forms of relief. The Company believes it has meritorious defenses and intends to vigorously defend the litigation. On April 13, 2015,

Table of Contents

the Company joined in the filing of a joint motion to dismiss the complaint that was filed by all of the defendants. As of March 31, 2015, the Company did not have sufficient information to determine that the Company is exposed to any losses that would be either probable or reasonably estimable beyond an expense contingency estimate of \$1, which was accrued during the three months ended March 31, 2015. On April 2, 2015, the Court entered a Scheduling Order, which requires the parties to: (i) hold a discovery conference by June 1, 2015; (ii) submit a discovery plan by June 15, 2015, with Plaintiff's counsel taking the lead "in preparing the proposed plan"; (iii) designate a mediator by June 15, 2015 (unless the discovery conference is held earlier, and then the designation is fourteen days after the conference); (iv) hold a mediation within 75 days after June 1, 2015, which would be approximately August 15, 2015. The Court has not set a trial date.

In light of the inherent uncertainties involved in the matter aforementioned, there can be no assurance that the litigation discussed above, or any other pending or future litigation, will not have a material adverse effect on our business, financial condition, or results of operations.

(13) Reinsurance

The Company reinsures portions of its policy risks with other insurance companies. The use of reinsurance does not discharge an insurer from liability on the insurance ceded. The insurer is required to pay in full the amount of its insurance liability regardless of whether it is entitled to or able to receive payment from the reinsurer. The portion of risks exceeding the Company's retention limit is reinsured with other insurers. The Company seeks reinsurance coverage in order to limit its exposure to mortality losses and enhance capital management. The Company follows reinsurance accounting when there is adequate risk transfer. Otherwise, the deposit method of accounting is followed. The Company also assumes policy risks from other insurance companies.

The effect of reinsurance on premiums earned, benefits incurred and reserve changes for the three and six months ended March 31, 2015 and 2014 were as follows:

	Three months ended				Six months ended			
	March 31, 2015		March 31, 2014		March 31, 2015		March 31, 2014	
	Net	Net	Net	Net	Net	Net	Net	Net
	Premiums	Benefits	Premiums	Benefits	Premiums	Benefits	Premiums	Benefits
	Earned	Incurred	Earned	Incurred	Earned	Incurred	Earned	Incurred
Direct	\$64	\$239	\$67	\$256	\$127	\$533	\$134	\$553
Assumed	8	9	10	6	17	16	19	12
Ceded	(57) (76) (62) (83) (118) (153) (125) (169
Net	\$15	\$172	\$15	\$179	\$26	\$396	\$28	\$396

Amounts payable or recoverable for reinsurance on paid and unpaid claims are not subject to periodic or maximum limits. During the three and six months ended March 31, 2015 and 2014, the Company did not write off any reinsurance balances. During the three and six months ended March 31, 2015 and 2014, the Company did not commute any ceded reinsurance.

No policies issued by the Company have been reinsured with any foreign company, which is controlled, either directly or indirectly, by a party not primarily engaged in the business of insurance.

The Company has not entered into any reinsurance agreements in which the reinsurer may unilaterally cancel any reinsurance for reasons other than non-payment of premiums or other similar credit issues.

Table of Contents

(14) Related Party Transactions

FSRCI

We have reinsured certain of our liabilities and obligations to FSRCI. As we are not relieved of our liability to the ceding companies for this business, the liabilities and obligations associated with the reinsured policies remain on our Condensed Consolidated Balance Sheets with a corresponding reinsurance recoverable from FSRCI. In addition to various remedies that we would have in the event of a default by FSRCI, we continue to hold assets in support of the transferred reserves. At March 31, 2015 and September 30, 2014, the Company's reinsurance recoverable included \$1,289 and \$1,267, respectively, related to FSRCI and funds withheld for reinsurance liabilities included \$1,291 and \$1,293, respectively, related to FSRCI.

Below are the ceded operating results to FSRCI for the three and six months ended March 31, 2015 and 2014:

	Three Months Ended		Six Months Ended	
	March 31, 2015	March 31, 2014	March 31, 2015	March 31, 2014
Revenues:

Acquisition & operating expenses, net of deferrals	(1) (1) (2) (4
Total benefits and expenses	(14) (15) (30) (36
Operating (loss) income	\$ (17) \$ 7	\$ (10) \$ 10

FGL Insurance participates in loans to third parties originated by Salus, an affiliated, limited liability company indirectly owned by HRG. Salus is also considered a VIE as described in "Note 4. Investments" to the Company's Condensed Consolidated Financial Statements. Salus originates senior secured asset-based loans to unaffiliated third-party borrowers. In addition to the participation in loans originated by Salus, FGL Insurance also agreed to provide Salus with financing in the form of a revolving loan and promissory note. In January 2014, FGL Insurance acquired from FSRCI preferred equity interests in Salus which have a 10% per annum return and a total par value of \$30 which is included in the FSRCI funds withheld portfolio. Accordingly all income on this asset is ceded to FSRCI. The Company's maximum exposure to loss as a result of its investments in Salus is limited to the carrying value of the preferred equity interests, the promissory note and any amounts owed under the revolving loan as reported in its balance sheet. The carrying value of these investments in Salus as of March 31, 2015 and September 30, 2014 are disclosed in the tables below.

On February 27, 2015, FGL Insurance entered into a transaction with Salus whereby Salus transferred \$14 of loan participations and \$16 of CLO subordinated debt (i.e., equity tranche) to FGL Insurance in exchange for retirement of the \$20 promissory note and \$10 revolving loan owed by Salus to FGL Insurance resulting in the termination of these facilities. Additionally, FGL Insurance also entered into a transaction with the Salus CLO whereby FGL insurance transferred \$29 of loan participations into the CLO in exchange for \$27 of CLO subordinated notes (i.e., equity tranche) and a promissory note of \$2 from Salus. Both transactions qualified as sales of financial assets accounted for at fair value and therefore did not result in any gain or loss. FGL Insurance also concluded that it is not the primary beneficiary of the Salus CLO before and after these two transactions as FGL Insurance lacks the power to direct the activities that significantly affect the economic performance of the CLO and, to a lesser extent, FGL Insurance continues to own less than a majority ownership of the CLO subordinated notes (46%) after the two transactions. Please refer to "Note 4. Investments" to the Company's Consolidated Financial Statements for details on the impairment of the Salus preferred equity interest recognized in the second fiscal quarter 2015.

Table of Contents

Please refer to "Note 5. Derivatives" to the Company's Consolidated Financial Statements for disclosure of a new Canadian dollar foreign exchange swap agreement for one of our Salus loan participations that was executed during the second fiscal quarter 2015.

The Company's consolidated related party investments as of March 31, 2015 and September 30, 2014, and related net investment income for the three and six months ended March 31, 2015 and 2014 are summarized as follows:

Type	Balance Sheet Classification	March 31, 2015		
		Asset carrying value	Accrued Investment Income	Total carrying value
Salus collateralized loan obligations	Fixed maturities, available-for-sale	\$260	\$1	\$261
Fortress Investment Group collateralized loan obligations	Fixed maturities, available-for-sale	203	2	205
Salus preferred equity (a)	Equity securities, available-for-sale	12	—	12
Salus participations (b)	Other invested assets	186	1	187
Energy & Infrastructure Capital ("EIC") participations	Other Invested Assets	9	—	9
Foreign exchange derivatives and embedded derivatives	Other invested assets	13	—	13
HGI energy loan (c)	Related party loans	70	2	72
Salus 2012 participations	Related party loans	1	—	1
Salus promissory note	Related party loans	2	—	2

(a) Salus preferred equity is included in the FSRCI funds withheld portfolio, accordingly all income on this asset is ceded to FSRCI.

(b) Includes loan participations with 21 different borrowers with an average loan fair value of \$9 as of March 31, 2015.

(c) \$20 of the total HGI energy loan is included in the FSRCI funds withheld portfolio, accordingly the income related to this portion is ceded to FSRCI.

Type	Balance Sheet Classification	September 30, 2014		
		Asset carrying value	Accrued Investment Income	Total carrying value
Salus collateralized loan obligations	Fixed maturities, available-for-sale	\$239	\$1	\$240
Fortress Investment Group collateralized loan obligations	Fixed maturities, available-for-sale	195	2	197
Salus preferred equity(a)	Equity securities, available-for-sale	34	—	34
Salus participations	Other invested assets	213	2	215
Foreign exchange embedded derivative	Other invested assets	2	—	2
HGI energy loan (b)	Related party loans	70	2	72
Salus 2012 participations	Related party loans	11	—	11
Salus promissory note	Related party loans	20	—	20
Salus revolver	Related party loans	10	—	10

(a) Salus preferred equity is included in the FSRCI funds withheld portfolio, accordingly all income on this asset is ceded to FSRCI.

(b) \$20 of the total HGI energy loan is included in the FSRCI funds withheld portfolio, accordingly the income related to this portion is ceded to FSRCI.

Table of Contents

Type	Investment Income Classification	Three months ended		Six months ended	
		March 31, 2015 Net investment income	March 31, 2014 Net investment income	March 31, 2015 Net investment income	March 31, 2014 Net investment income
Salus collateralized loan obligations	Fixed maturities	\$3	\$3	\$6	\$6
Fortress Investment Group collateralized loan obligations	Fixed maturities	2	—	4	—
Salus participations	Other invested assets	3	6	8	10
HGI energy loan	Related party loans	1	1	2	2
Salus promissory note	Related party loans	—	1	1	1

The Company had realized foreign exchange losses of \$1 and \$3 for the three and six months ended March 31, 2015 related to its CAD denominated loan participations originated by Salus. Additionally, the Company had foreign exchange derivative and embedded derivative gains of \$10 and \$11 for the three and six months ended March 31, 2015, respectively, included in other invested assets. The Company had foreign exchange losses of \$0 and \$0 and no foreign exchange embedded derivative gains or losses for the three and six months ended March 31, 2014, respectively. See "Note 5. Derivatives" for further details.

The Company had realized impairment losses of \$24 and \$35 included in fixed maturities, available for sale and Other invested assets, respectively due to direct and indirect investments in RSH included within the Salus CLOs and the Salus participations. See "Note 4. Investments" to the Company's Consolidated Financial Statements for further details.

(15) Earnings Per Share

The following table sets forth the computation of basic and diluted earnings per share (share amounts in thousands):

	Three months ended		Six months ended	
	March 31, 2015	March 31, 2014	March 31, 2015	March 31, 2014
Net (loss) income attributable to common shares - basic	\$(12)	\$25	\$2	\$68
Weighted-average common shares outstanding - basic	58,033	58,271	58,160	53,656
Dilutive effect of unvested restricted stock & PRSU	—	149	145	86
Dilutive effect of stock options	—	27	27	15
Weighted-average shares outstanding - diluted	58,033	58,447	58,332	53,757

Net (loss) income per common share:

Basic	\$(0.21)	\$0.43	\$0.03	\$1.26
Diluted	\$(0.21)	\$0.42	\$0.03	\$1.26

The number of shares of common stock outstanding used in calculating the weighted average thereof reflects the actual number of FGL shares of common stock outstanding, excluding unvested restricted stock and shares held in treasury.

Under applicable accounting guidance, companies in a loss position are required to use basic weighted-average common shares outstanding in the calculation of diluted loss per share. Therefore, as a result of our net loss for the three months ended March 31, 2015, we were required to use basic weighted-average common shares outstanding in the calculation of the three months ended March 31, 2015 diluted loss per share, as the inclusion of shares for stock options, restricted stock and PRSUs of 169 would have been antidilutive to the calculation. If we had not incurred a net loss in the three months ended March 31, 2015, dilutive potential common shares would have been 58,202.

Table of Contents

The calculation of diluted earnings per share for the three and six months ended March 31, 2015 excludes the incremental effect related to certain outstanding stock options and restricted stock due to their anti-dilutive effect. The number of weighted average equivalent shares excluded is 42 shares for the three months ended March 31, 2015 and 27 shares for the six months ended March 31, 2015. Also, stock-based compensation awards under the FGLH Plans are settled in cash and, therefore, are excluded from the computation of diluted earnings per share.

(16) Insurance Subsidiary Financial Information and Regulatory Matters

FGL Insurance's statutory carrying value of Raven Re reflects the effect of permitted practices Raven Re received to treat the available amount of a letter of credit as an admitted asset which increased Raven Re's statutory capital and surplus by \$239 and \$251 at March 31, 2015 and September 30, 2014, respectively. Raven Re is also permitted to follow Iowa prescribed statutory accounting practice for its reserves on reinsurance assumed from FGL Insurance which increased Raven Re's statutory capital and surplus by \$12 and \$19 at March 31, 2015 and September 30, 2014, respectively. Without such permitted statutory accounting practices Raven Re's statutory capital and surplus would be negative \$63 and negative \$81 as of March 31, 2015 and September 30, 2014, respectively, and its risk-based capital would fall below the minimum regulatory requirements. The letter of credit facility is collateralized by National Association of Insurance Commissioners ("NAIC") 1 rated debt securities. If the permitted practice was revoked, the letter of credit could be replaced by the collateral assets with Nomura's consent.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations
 Special Note Regarding Forward-Looking Statements

This quarterly report includes forward-looking statements. Some of the forward-looking statements can be identified by the use of terms such as “believes”, “expects”, “may”, “will”, “should”, “could”, “seeks”, “intends”, “plans”, “estimates”, “other comparable terms. However, not all forward-looking statements contain these identifying words. These forward-looking statements include all matters that are not related to present facts or current conditions or that are not historical facts. They appear in a number of places throughout this report and include statements regarding our intentions, beliefs or current expectations concerning, among other things, our consolidated results of operations, financial condition, liquidity, prospects and growth strategies and the industries in which we operate and including, without limitation, statements relating to our future performance.

Forward-looking statements are subject to known and unknown risks and uncertainties, many of which are beyond our control. We caution you that forward-looking statements are not guarantees of future performance and that our actual consolidated results of operations, financial condition and liquidity, and industry development may differ materially from those made in or suggested by the forward-looking statements contained in this report. In addition, even if our consolidated results of operations, financial condition and liquidity, and industry development are consistent with the forward-looking statements contained in this report, those results or developments may not be indicative of results or developments in subsequent periods. A number of important factors could cause actual results to differ materially from those contained in or implied by the forward-looking statements, including the risks and uncertainties discussed in “Risk Factors” included in our Annual Report on Form 10-K, for the year ended September 30, 2014 (“2014 Form 10-K”), which can be found at the U.S. Securities & Exchange Commission's ("SEC's") website, www.sec.gov. Factors that could cause actual results to differ from those reflected in forward-looking statements relating to our operations and business include:

- the accuracy of management’s assumptions and estimates;
- the accuracy of our assumptions regarding the fair value and future performance of our investments;
- our and our insurance subsidiaries’ ability to maintain or improve financial strength ratings;
- our and our insurance subsidiaries’ potential need for additional capital to maintain our and their financial strength and credit ratings and meet other requirements and obligations;
- the stock of our primary operating subsidiary is subject to the security interest of its former owner;
- our ability to manage our business in a highly regulated industry, which is subject to numerous legal restrictions and regulations;
 - regulatory changes or actions, including those relating to regulation of financial services affecting (among other things) underwriting of insurance products and regulation of the sale, underwriting and pricing of products and
 - minimum capitalization and statutory reserve requirements for insurance companies, or the ability of our insurance subsidiaries to make cash distributions to us (including dividends or payments on surplus notes those subsidiaries issue to us);
 - the impact of our reinsurers failing to meet or timely meet their assumed obligations, increasing their rates, or
 - becoming subject to adverse developments that could materially adversely impact their ability to provide reinsurance to us at consistent and economical terms;
 - restrictions on our ability to use captive reinsurers;
 - being forced to sell investments at a loss to cover policyholder withdrawals;
 - the impact of interest rate fluctuations;
 - the availability of credit or other financings and the impact of equity and credit market volatility and disruptions on both our ability to obtain capital and the value and liquidity of our investments;
- changes in the federal income tax laws and regulations which may affect the relative income tax advantages of our products;
- increases in our valuation allowance against our deferred tax assets, and restrictions on our ability to fully utilize such assets;
- being the target or subject of, and our ability to defend ourselves against or respond to, litigation (including class action litigation), enforcement investigations or regulatory scrutiny;

the performance of third parties including distributors, underwriters, actuarial consultants and other service providers;
the loss of key personnel;
interruption or other operational failures in telecommunication, information technology and other operational systems,
or a failure to maintain the security, integrity, confidentiality or privacy of sensitive data residing on such systems;

Table of Contents

the continued availability of capital required for our insurance subsidiaries to grow;

the impact on our business of new accounting rules or changes to existing accounting rules;

our risk management policies and procedures could leave us exposed to unidentified or unanticipated risk;

general economic conditions and other factors, including prevailing interest and unemployment rate levels and stock and credit market performance which may affect (among other things) our ability to sell our products and the fair value of our investments, which could result in impairments and other than temporary impairments ("OTTI") and certain liabilities, and the lapse rate and profitability of policies;

our ability to protect our intellectual property;

difficulties arising from outsourcing relationships;

the impact on our business of man-made catastrophes, pandemics, and malicious and terrorist acts;

our ability to compete in a highly competitive industry and maintain competitive unit costs;

adverse consequences if the independent contractor status of our independent insurance marketing organizations ("IMOs") is successfully challenged;

our ability to attract and retain national marketing organizations and independent agents;

adverse tax consequences if we generate passive income in excess of operating expenses;

significant operating and financial restrictions, which may prevent us from capitalizing on business opportunities;

the inability of our subsidiaries and affiliates to generate sufficient cash to service all of their obligations;

our subsidiaries' ability to pay dividends to us;

the ability to maintain or obtain approval of the Iowa Insurance Division ("IID") and other regulatory authorities as required for our operations and those of our insurance subsidiaries; and

the other factors discussed in "Risk Factors", of our 2014 Form 10-K.

You should read this report completely and with the understanding that actual future results may be materially different from expectations. All forward looking statements made in this report are qualified by these cautionary statements. These forward-looking statements are made only as of the date of this report and we do not undertake any obligation, other than as may be required by law, to update or revise any forward-looking statements to reflect future events or developments. Comparisons of results for current and any prior periods are not intended to express any future trends, or indications of future performance, unless expressed as such, and should only be viewed as historical data.

Table of Contents

Introduction

Management's discussion and analysis reviews our consolidated financial position at March 31, 2015 (unaudited) and September 30, 2014, and the unaudited consolidated results of operations for the three and six months ended March 31, 2015 and 2014 and where appropriate, factors that may affect future financial performance. This analysis should be read in conjunction with our unaudited Consolidated Financial Statements and notes thereto appearing elsewhere in this Form 10-Q and "Management's Discussion and Analysis of Financial Condition and Results of Operations" of Fidelity & Guaranty Life ("FGL"), which was included with our audited consolidated financial statements for the year ended September 30, 2014 included within the Company's 2014 Form 10-K. Certain statements we make under this Item 2 constitute "forward-looking statements" under the Private Securities Litigation Reform Act of 1995. See "Forward-Looking Statements" in this report. You should consider our forward-looking statements in light of our unaudited condensed consolidated financial statements, related notes, and other financial information appearing elsewhere in this report, and our filings with the SEC, including our 2014 Form 10-K, which can be found at the SEC website, www.sec.gov. In this Quarterly Report on Form 10-Q we refer to the three months ended March 31, 2015 and 2014 as the "Fiscal 2015 Quarter" and the "Fiscal 2014 Quarter", respectively; and the six months ended March 31, 2015 and 2014 as the "Fiscal 2015 Six Months" and the "Fiscal 2014 Six Months", respectively.

Overview

We provide our principal life and annuity products through our insurance subsidiaries- Fidelity & Guaranty Life Insurance Company ("FGL Insurance") and Fidelity & Guaranty Life Insurance Company of New York ("FGL NY Insurance"). Our customers range across a variety of age groups and are concentrated in the middle-income market. Our fixed indexed annuities ("FIAs") provide for pre-retirement wealth accumulation and post-retirement income management. Our life insurance provides wealth protection and transfer opportunities through indexed universal life products. Life and annuity products are primarily distributed through independent insurance marketing organizations ("IMOs") and independent insurance agents. We have ceded nearly all of our traditional life insurance business, with the exception of the return of premium rider benefit, to third party reinsurers including Wilton Re.

In setting the features and pricing new FIA products relative to our targeted net margin, we take into account our expectations regarding (1) net investment spread, which is the difference between the net investment income we earn and the sum of the interest credited to policyholders and the cost of hedging our risk on the policies; (2) fees, including surrender charges and rider fees, partly offset by vesting bonuses that we pay our policyholders; and (3) a number of related expenses, including benefits and reserves, acquisition costs, and general and administrative expenses.

Trends and Uncertainties

The following factors represent some of the key trends and uncertainties that have influenced the development of our business and our historical financial performance and that we believe will continue to influence our business and financial performance in the future.

Exploration of Strategic Alternatives

On April 6, 2015, HRG Group, Inc, the parent of the Company, announced that it is exploring strategic alternatives for Fidelity & Guaranty Life regarding their FGL holdings. Following this announcement, FGL has begun a strategic process involving a potential sale of the Company. There can be no assurance that the exploration of strategic alternatives will result in a transaction or that any transaction, if pursued, will be consummated. The exploration of strategic alternatives may be terminated at any time and without notice. Neither HRG Group nor any of its affiliates - including FGL - intend to disclose developments with respect to this process unless and until the FGL Board of Directors has approved a specific transaction or course of action.

Market Conditions

Market volatility has affected and may continue to affect our business and financial performance in varying ways. Volatility can pressure sales and reduce demand as consumers hesitate to make financial decisions. In the long-term, however, we believe that the 2008 through 2010 financial crisis and resultant lingering financial uncertainty will motivate individuals to seek solutions combining elements of capital preservation, income and growth. We believe current market conditions may ultimately enhance the attractiveness of our product portfolio. To enhance the attractiveness and profitability of our products and services, we continually monitor the behavior

Table of Contents

of our customers, as evidenced by mortality rates, morbidity rates, annuitization rates and lapse rates, which vary in response to changes in market conditions.

Interest Rate Environment

Certain of our products include guaranteed minimum crediting rates, most notably our fixed rate annuities. As of March 31, 2015, in accordance with accounting principles generally accepted in the United States (“GAAP”) reserves, net of reinsurance, and average crediting rate on our fixed rate annuities were \$3 billion and 3%, respectively. We are required to pay these guaranteed minimum crediting rates even if earnings on our investment portfolio decline, which would negatively impact earnings. In addition, we expect more policyholders to hold policies with comparatively high guaranteed rates for a longer period in a low interest rate environment. Conversely, a rise in average yield on our investment portfolio would increase earnings if the average interest rate we pay on our products does not rise correspondingly. Similarly, we expect that policyholders would be less likely to hold policies with existing guarantees as interest rates rise and the relative value of other new business offerings are increased, which would negatively impact our earnings and cash flows.

See “Item 3. Quantitative and Qualitative Disclosures about Market Risk” for a more detailed discussion of interest rate risk.

Aging of the U.S. Population

We believe that the aging of the United States (“U.S.”) population will affect the demand for our products. As the “baby boomer” generation prepares for retirement, we believe that demand for retirement savings, growth and income products will grow. The impact of this growth may be offset to some extent by asset outflows as an increasing percentage of the population begins withdrawing assets to convert their savings into income.

Industry Factors and Trends Affecting Our Results of Operations

Demographics and macroeconomic factors are increasing the demand for our FIA and indexed universal life (“IUL”) products, for which demand is large and growing: over 10,000 people will turn 65 each day in the United States over the next 15 years. According to the U.S. Census Bureau, the proportion of the U.S. population over the age of 65 is expected to grow from 15% in 2015 to 20% in 2030.

Due to turbulence in the stock market in 2007 and 2008, many middle-income Americans have grown to appreciate the security these indexed products afford. As a result, the IUL market expanded from \$100 million of annual premiums in 2002 to over \$1.5 billion of annual premiums in 2014. Similarly, the FIA market grew from nearly \$12 billion of sales in 2002 to \$47 billion of sales in 2014.

Competition

Our insurance subsidiaries operate in highly competitive markets. We face a variety of large and small industry participants. These companies compete for the growing pool of retirement assets driven by a number of factors, such as the continued aging of the U.S. population and the reduction in financial safety nets provided by governments and corporations. In many segments, product differentiation is difficult as product development and life cycles have shortened.

Our own sales of annuities and IULs by quarter were as follows:

(in millions)	Annuity Sales		IUL Sales	
	Fiscal 2015	Fiscal 2014	Fiscal 2015	Fiscal 2014
First fiscal quarter	\$903	\$540	\$7	\$5
Second fiscal quarter	610	728	7	5
Total	\$1,513	\$1,268	\$14	\$10

Key Components of Our Historical Results of Operations

Under GAAP, premium collections for fixed indexed annuities, fixed rate annuities, and immediate annuities without life contingency are reported as deposit liabilities (i.e., contractholder funds) not sales or revenues. Similarly, cash payments to customers are reported as decreases in the liability for contractholder funds and not as expenses. Sources of revenues for products accounted for as deposit liabilities are net investment income, surrender and other charges

deducted from contractholder funds, and net realized gains (losses) on investments.

47

Table of Contents

Components of expenses for products accounted for as deposit liabilities are interest-sensitive and index product benefits (primarily interest credited to account balances or the cost of providing index credits to the policyholder), amortization of deferred acquisition costs (“DAC”) and value of business acquired (“VOBA”), other operating costs and expenses, and income taxes.

Through our insurance subsidiaries, we issue a broad portfolio of deferred annuities (fixed indexed and fixed rate annuities) and immediate annuities. A deferred annuity is a type of contract that accumulates value on a tax deferred basis and typically begins making specified periodic or lump sum payments a certain number of years after the contract has been issued. An immediate annuity is a type of contract that begins making specified payments within one annuity period (e.g., one month or one year) and typically makes payments of principal and interest earnings over a period of time.

The Company hedges certain portions of its exposure to product related equity market risk by entering into derivative transactions. We purchase derivatives consisting predominantly of call options and, to a lesser degree, futures contracts on the equity indices underlying the applicable policy. These derivatives are used to fund the statutory reserve impact of the index credits due to policyholders under the FIA contracts. The majority of all such call options are one-year options purchased to match the funding requirements underlying the FIA contracts. We attempt to manage the cost of these purchases through the terms of our FIA contracts, which permit us to change caps, spread, or participation rates, subject to certain guaranteed minimums that must be maintained. The change in the fair value of the call options and futures contracts is generally designed to offset the equity market related change in the fair value of the FIA contract’s embedded derivative. The call options and futures contracts are marked to fair value with the change in fair value included as a component of net investment gains (losses). The change in fair value of the call options and futures contracts includes the gains and losses recognized at the expiration of the instruments’ terms or upon early termination and the changes in fair value of open positions.

Earnings from products accounted for as deposit liabilities are primarily generated from the excess of net investment income earned over the sum of interest credited to policyholders and the cost of hedging our risk on FIA policies, known as the net investment spread. With respect to FIAs, the cost of hedging our risk includes the expenses incurred to fund the annual index credits, and where applicable, minimum guaranteed interest credited. Proceeds received upon expiration or early termination of call options purchased to fund annual index credits are recorded as part of the change in fair value of derivatives, and are largely offset by an expense for index credits earned on annuity contractholder fund balances.

Our profitability depends in large part upon the amount of assets under management (“AUM”), the net investment spreads earned on our average assets under management (“AAUM”), our ability to manage our operating expenses and the costs of acquiring new business (principally commissions to agents and bonuses credited to policyholders). As we grow AUM, earnings generally increase. AUM increases when cash inflows, which include sales, exceed cash outflows. Managing net investment spreads involves the ability to manage our investment portfolios to maximize returns and minimize risks on our AUM such as interest rate changes and defaults or impairment of investments, and our ability to manage interest rates credited to policyholders and costs of the options and futures purchased to fund the annual index credits on the FIAs or IULs. We analyze returns on AAUM pre- and post-DAC and VOBA as well as pre- and post-tax to measure our profitability in terms of growth and improved earnings.

Adjusted Operating Income (“AOI”)

Management believes that certain non-GAAP financial measures may be useful in certain instances to provide additional meaningful comparisons between current results and results in prior operating periods. Reconciliations of such measures to the most comparable GAAP measures are included herein.

AOI is a non-GAAP economic measure we use to evaluate financial performance each period. AOI is calculated by adjusting net income to eliminate (i) the impact of net investment gains including OTTI losses recognized in operations, but excluding gains and losses on derivatives hedging our indexed annuity policies, (ii) the effect of changes in the rates used to discount the FIA embedded derivative liability, (iii) the effect of change in fair value of reinsurance related embedded derivative, (iv) the effect of class action litigation reserves and (v) residual net income of distributed subsidiaries we no longer own. All adjustments to AOI are net of the corresponding VOBA, DAC and income tax impact related to these adjustments as appropriate. While these adjustments are an integral part of the

overall performance of FGL, market conditions impacting these items can overshadow the underlying performance of the business. Accordingly, we believe using a measure which excludes their impact is effective in analyzing the trends of our operations. Our non-GAAP measures may not be comparable to similarly titled measures

Table of Contents

of other organizations because other organizations may not calculate such non-GAAP measures in the same manner as we do.

In the second quarter of 2014, we revised our definition of AOI from a pre-tax basis to an after-tax basis to better reflect the basis on which the performance of our business is assessed internally. AOI now includes interest expense and an effective tax rate of 35.0% is now applied to reconciling items made to net income. All prior periods presented have been revised to reflect this new definition. Additionally, during the second quarter of 2014 we revised our definition of AOI to exclude the effect of class action litigation reserves, net of the corresponding VOBA, DAC and income tax impact related to these adjustments. This change has been reflected in Fiscal 2015 AOI. Lastly, during the second quarter of 2014, we revised our definition of AOI to exclude residual net income of distributed subsidiaries; specifically the portion of Front Street Re (Cayman) Ltd. ("FSRCI") income not already accounted for in the AOI adjustments above. From the inception of the reinsurance treaty on December 31, 2012 through August 9, 2013, FSRCI was a fully consolidated subsidiary of FGL. On August 9, 2013 in preparation for the initial public offering ("IPO"), FGL distributed this subsidiary to its parent company. Adjusting for this distribution provides a better view of the underlying performance of FGL as it is now structured post-IPO.

AUM is the sum of (i) total invested assets at amortized cost, excluding derivatives; and including (ii) related party loans and investments and (iii) cash and cash equivalents. AAUM is the sum of AUM at the end of each month in the period divided by the number of months in the period.

Together with net income we believe AOI provides a meaningful financial metric that helps investors understand our underlying results and profitability.

AOI should not be used as a substitute for net income. However, we believe the adjustments made to net income in order to derive AOI provide an understanding of our overall results of operations. For example, we could have strong operating results in a given period, yet report net income that is materially less, if during such period the fair value of our derivative assets hedging the FIA index credit obligations decreased due to general equity market conditions but the embedded derivative liability related to the index credit obligation did not decrease in the same proportion as the derivative assets because of non-equity market factors such as interest rate movements. Similarly, we could also have poor operating results in a given period yet show net income that is materially greater, if during such period the fair value of the derivative assets increases but the embedded derivative liability did not increase in the same proportion as the derivative assets. We hedge our FIA index credits with a combination of static and dynamic strategies, which can result in earnings volatility, the effects of which are generally likely to reverse over time. Our management and board of directors review AOI and net income as part of their examination of our overall financial results. However, these examples illustrate the significant impact derivative and embedded derivative movements can have on our net income. Accordingly, our management and board of directors perform a review and analysis of these items, as part of their review of our hedging results each period.

The adjustments to net income are net of DAC and VOBA amortization and income tax expense related to these adjustments. Amounts attributable to the fair value accounting for derivatives hedging the FIA index credits and the related embedded derivative liability fluctuate from period to period based upon changes in the fair values of call options purchased to fund the annual index credits for FIAs, changes in the interest rates used to discount the embedded derivative liability, and the fair value assumptions reflected in the embedded derivative liability. The accounting standards for fair value measurement require the discount rates used in the calculation of the embedded derivative liability to be based on risk-free interest rates. The impact of the change in risk-free interest rates has been removed from net income. Additionally, in evaluating our operating results, the effect of change in the fair value of the reinsurance related embedded derivative has been removed from net income.

In addition, we regularly monitor and report the production volume metric titled "Sales". Sales are not derived from any specific GAAP income statement accounts or line items and should not be viewed as a substitute for any financial measure determined in accordance with GAAP. For GAAP purposes annuity sales are recorded as deposit liabilities (i.e. contract holder funds). Management believes that presentation of sales as measured for management purposes enhances the understanding of our business and helps depict longer term trends that may not be apparent in the results of operations due to the timing of sales and revenue recognition.

Table of Contents

Critical Accounting Policies and Estimates

The preparation of the Company's Consolidated Financial Statements requires management to make estimates and judgments that affect the reported amounts of certain assets, liabilities, revenues, expenses and related disclosures regarding contingencies and commitments. Actual results could differ from these estimates. During the three and six months ended March 31, 2015, the Company did not make any material changes in its critical accounting policies as previously disclosed in Management's Discussion and Analysis in the Company's 2014 Form 10-K as filed with the SEC.

Recent Accounting Pronouncements

Investments in Qualified Affordable Housing Projects

In January 2014, the Financial Accounting Standards Board ("FASB") issued amended guidance (ASU 2014-01, Investments - Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Qualified Affordable Housing Project) which allows investors in Low Income Housing Tax Credit ("LIHTC") programs that meet specified conditions to present the net tax benefits (net of the amortization of the cost of the investment) within income tax expense. The cost of the investments that meet the specified conditions will be amortized in proportion to (and over the same period as) the total expected tax benefits, including the tax credits and other tax benefits, as they are realized on the tax return. The guidance is required to be applied retrospectively, if investors elect the proportional amortization method. However, if investors have existing LIHTC investments accounted for under the effective-yield method at adoption, they may continue to apply that method for those existing investments. The Company early adopted this guidance effective October 1, 2014 for all new LIHTC investments made subsequent to that date. Prior LIHTC investments will continue to be accounted for under the effective-yield method. This adoption did not have a material effect on the Company's consolidated financial position and results of operations.

Share-Based Payments When a Performance Target is achieved after the Requisite Service Period

In June 2014, the FASB issued new guidance on Stock Compensation (ASU 2014-12, Accounting for Share-Based Payments When the Term of an Award Provide that a Performance Target Could Be Achieved after the Requisite Service Period), effective for fiscal years beginning after December 15, 2015 and interim periods within those years. The new guidance requires that performance targets that affect vesting and that could be achieved after the requisite service period to be treated as performance conditions. Such performance targets would not be included in the grant-date fair value calculation of the award, rather compensation cost should be recorded when it is probable the performance target will be reached and should represent the compensation cost attributable to period(s) for which the requisite service has already been rendered. This standard may be early adopted and the amendments in this Update may be applied either prospectively or retrospectively. The Company will not early adopt this standard and is currently evaluating the impact of this new accounting guidance on its consolidated financial statements.

Amendments to the Consolidation Analysis

In February 2015, the FASB issued amended consolidation guidance (ASU 2015-02, Amendments to the Consolidation Analysis), effective for fiscal years beginning after December 15, 2015. The amended guidance changes the consolidation analysis of reporting entities with variable interest entity ("VIE") relationships by i) modifying the criteria used to evaluate whether limited partnerships and similar legal entities are VIEs or voting interest entities and revising the primary beneficiary determination of a VIE, ii) eliminating the specialized consolidation model and guidance for limited partnerships thereby removing the presumption that a general partner should consolidate a limited partnership, iii) reducing the criteria in the variable interest model contained in Accounting Standards Codification Topic 810, Consolidation, that is used to evaluate whether the fees paid to a decision maker or service provider represents a variable interest, and iv) exempting reporting entities from consolidating money market funds that operate in accordance with Rule 2a-7 of the Investment Company Act of 1940. This standard may be early adopted and the amendments in this Update may be applied with a modified retrospective approach or retrospective approach. The Company will not early adopt this standard and is currently evaluating the impact of this new accounting guidance on its consolidated financial statements.

Presentation of Debt Issuance Costs

In April 2015, the FASB issued amended guidance (ASU 2015-03, Interest-Imputation of Interest (Subtopic 835-30), Simplifying the Presentation of Debt Issuance Costs), effective for fiscal years beginning after December 15, 2015 and interim periods within those years. The amended guidance requires debt issuance costs related to a recognized debt liability to be presented on the balance sheet as a direct deduction from the debt liability, similar to the presentation of debt discounts or premiums. The cost of issuing debt will no longer be recorded as a separate asset, except when incurred before the receipt of the funding from the associated debt liability. Instead, debt issuance costs will be presented on the balance sheet as a direct deduction from the carrying amount of the related debt liability, and the costs will be amortized to interest expense using the effective interest method. This standard may be early adopted. The amendments in this Update are required to be applied retrospectively to all prior periods presented in the financial statements. The Company will not early adopt this standard and is currently evaluating the impact of this new accounting guidance on its consolidated financial statements.
