PART I

ITEM 1 Business

Hubbell Incorporated (herein referred to as “Hubbell”, the “Company”, the “registrant”, “we”, “our” or “us”, which references include its divisions and subsidiaries as the context may require) was founded as a proprietorship in 1888, and was incorporated in Connecticut in 1905. Hubbell is primarily engaged in the design, manufacture and sale of quality electrical and electronic products for a broad range of non-residential and residential construction, industrial and utility applications. Products are either sourced complete, manufactured or assembled by subsidiaries in the United States, Canada, Switzerland, Puerto Rico, Mexico, the People’s Republic of China (“China”), Italy, the United Kingdom (“UK”), Brazil, Australia and Ireland. Hubbell also participates in joint ventures in Taiwan and Hong Kong, and maintains offices in Singapore, China, India, Mexico, South Korea and countries in the Middle East.

The Company’s reporting segments consist of the Electrical and the Power segments, as described below. See also Item 7. Management’s Discussion and Analysis – “Executive Overview

of the Business”, and “Results of Operations” as well as Note 19 — Industry Segments and Geographic Area Information in the Notes to Consolidated Financial Statements.

The Company’s annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports are made available free of charge through the Investor Relations section of the Company’s website at <http://www.hubbell.com> as soon as practicable after such material is electronically filed with, or furnished to, the SEC. These filings are also available for reading and copying at the SEC’s Public Reference Room at 100 F Street N.E., Washington, D.C. 20549. Information on the operation of the Public Reference Room may be obtained by calling the SEC at 1-800-SEC-0330. In addition, the Company’s SEC filings can be accessed from the SEC’s homepage on the Internet at <http://www.sec.gov>. The information contained on the Company’s website or connected to our website is not incorporated by reference into this Annual Report on Form 10-K and should not be considered part of this report.

Electrical Segment

The Electrical segment (70% of consolidated revenues in 2016 and 2015 and 71% in 2014) is comprised of businesses that sell stock and custom products including standard and special application wiring device products, rough-in electrical products, connector and grounding products, lighting fixtures and controls, components and assemblies for the natural gas distribution market, as well as other electrical equipment.

Products of the Electrical segment are typically used in and around industrial, commercial and institutional facilities by electrical contractors, maintenance personnel, electricians, utilities, and telecommunications companies. In addition, certain businesses design and manufacture a variety of high voltage test and measurement equipment, industrial controls and communication systems used in the non-residential and industrial markets. Many of these products are designed such that they can also be used in harsh and hazardous locations where a potential for fire and explosion exists due to the presence of flammable gasses and vapors. Harsh and hazardous products are primarily used in the oil and gas (onshore and offshore) and mining industries. There are also a variety of lighting fixtures, wiring devices and electrical products that have residential and utility applications.

These products are primarily sold through electrical and industrial distributors, home centers, retail and hardware outlets, lighting showrooms and residential product oriented internet sites. Special application products are sold

primarily through wholesale distributors to contractors, industrial customers and original equipment manufacturers (“OEMs”). High voltage products are sold primarily by direct sales to customers through our sales engineers.

Hubbell maintains a sales and marketing organization to assist potential users with the application of certain products to their specific requirements, and with architects, engineers, industrial designers, OEMs and electrical contractors for the design of electrical systems to meet the specific requirements of industrial, non-residential and residential users. Hubbell is also represented by independent manufacturers’ sales agents for many of its product offerings.

The Electrical segment, manufactures and sells thousands of wiring and electrical products, lighting fixtures and controls for indoor and outdoor applications as well as specialty lighting and communications products. The products within the segment have applications in the non-residential, residential, industrial, and energy-related (oil and gas) markets. A fast growing trend within the industry is the adoption of light emitting diode (“LED”) technology as the light source and the Company has a broad array of LED-luminaire products within its portfolio and the majority of new product development efforts are oriented towards expanding those offerings. These products include items such as:

- Commercial and Industrial
- Wiring devices & accessories
 - Switches & dimmers
 - Ground fault devices
 - Electrical motor controls
 - Junction boxes, plugs & receptacles
 - Steel & plastic enclosures
 - Pin & sleeve devices
 - Cable reels
 - Datacom connectivity & enclosures
 - High voltage test systems
- Lighting
- Canopy lights
 - Emergency lighting/exit signs
 - Floodlights & poles
 - LED components
 - Recessed, surface mounted & track fixtures
 - Parking lot/parking garage fixtures
 - Bollards
 - Bath/vanity fixtures & fans
 - Chandeliers & sconces
 - Athletic & recreational field fixtures
 - Decorative landscape fixtures
 - Fluorescent fixtures
 - Ceiling fans
 - Site & area lighting
 - Occupancy, dimming & daylight harvesting sensors
- Construction and Energy
- Mechanical connectors
 - Mechanical grounding devices
 - Compression connectors
 - Safety equipment
 - Gas connectors and assemblies
 - Installation tooling
 - Specialty lighting
 - Specialty communications equipment
 - Mining communication & controls
 - Cable glands & fittings

These products are sold under various brands and/or trademarks, including:

Power Segment

The Power segment (30% of consolidated revenues in 2016 and 2015 and 29% in 2014) consists of operations that design and manufacture various distribution, transmission, substation and telecommunications products primarily used by the electrical utility industry. In addition, certain of these products are used in the civil construction and transportation industries. Products are sold to distributors and directly to users such as electric utilities, telecommunication companies, pipeline and mining operations,

industrial firms, construction and engineering firms. While Hubbell believes its sales in this area are not materially dependent upon any customer or group of customers, a substantial decrease in purchases by electrical utilities would affect this segment.

Hubbell manufactures and sells a wide variety of electrical distribution, transmission, substation utility and telecommunications products. These products include items such as:

Arresters	Bushings	Grounding & bonding equipment
Cutouts & fuse links	Insulators	Programmable reclosers
Pole line hardware	Cable terminations & accessories	Sectionalizers
Helical anchors & foundations	Formed wire products	Lineman tools, hoses & gloves
Overhead, pad mounted & capacitor switches	Splices, taps & connectors	Polymer concrete & fiberglass enclosures and equipment pads

These products are sold under the following brands and/or trademarks:

Information Applicable to All General Categories

International Operations

The Company has several operations located outside of the United States. These operations manufacture, assemble and/or procure and market Hubbell products and service for both the Electrical and Power segments.

As a percentage of total net sales, shipments from foreign operations directly to third parties were 10% in 2016, 11% in 2015 and 14% in 2014, with the Canadian and UK operations representing approximately 33% and 21%, respectively, of 2016 total international net sales. Of the remaining 2016 international sales Switzerland, Brazil, and Mexico represent 12%, 10%, and 9%, respectively. See also Note 19 — Industry Segments and Geographic Area Information in the Notes to Consolidated Financial Statements and Item 1A. Risk Factors relating to manufacturing in and sourcing from foreign countries.

Customers

The Company does not have any customers whose annual consolidated purchases exceed 10 percent of our total net sales in 2016, 2015 nor 2014.

Raw Materials

Raw materials used in the manufacture of Hubbell products primarily include steel, aluminum, brass, copper, bronze, plastics, phenolics, zinc, nickel, elastomers and petrochemicals. Hubbell also purchases certain electrical and electronic components, including solenoids, lighting ballasts, printed circuit boards, integrated circuit chips and cord sets, from a number of suppliers. Hubbell is not materially dependent upon any one supplier for raw materials used in the manufacture of its products and equipment, and at the present time, raw materials and components essential to its operation are in adequate supply. However, some of these principal raw

materials are sourced from a limited number of suppliers. See also Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

Patents

Hubbell has approximately 1,700 active United States and foreign patents covering many of its products, which expire at various times. While Hubbell deems these patents to be of value, it does not consider its business to be dependent upon patent protection. Hubbell also licenses products under patents owned by others, as necessary, and grants licenses under certain of its patents.

Working Capital

Inventory, accounts receivable and accounts payable levels, payment terms and, where applicable, return policies are in accordance with the general practices of the electrical products industry and standard business procedures. See also Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Backlog

Substantially all of the backlog existing at December 31, 2016 is expected to be shipped to customers in 2017. Backlog of orders believed to be firm at December 31, 2016 was approximately \$297.4 million compared to \$319.4 million at December 31, 2015. Although this backlog is important, the majority of Hubbell's revenues result from sales of inventoried products or products that have short periods of manufacture.

Competition

Hubbell experiences substantial competition in all categories of its business, but does not compete with the same companies in all of its product categories. The number and size of competitors vary considerably depending on the product line. Hubbell cannot specify with precision the number of competitors in each product category or their relative market position. However, some of its competitors are larger companies with substantial financial and other resources. Hubbell considers product performance, reliability, quality and technological innovation as important factors relevant to all areas of its business, and considers its reputation as a manufacturer of quality products to be an important factor in its business. In addition, product price, service levels and other factors can affect Hubbell's ability to compete.

Research and Development

Research and development expenditures represent costs to discover and/or apply new knowledge in developing a new product or process, or in bringing about significant improvement in an existing product or process. Research and development expenses are recorded as a component of Cost of goods sold. Expenses for research and development were approximately 2% of Cost of goods sold for each of the years 2016, 2015 and 2014.

Environment

The Company is subject to various federal, state and local government requirements relating to the protection of employee health and safety and the environment. The Company believes that, as a general matter, its policies,

practices and procedures are properly designed to prevent unreasonable risk of environmental damage and personal injury to its employees and its customers' employees and that the handling, manufacture, use and disposal of hazardous or toxic substances are in accordance with environmental laws and regulations.

Like other companies engaged in similar businesses, the Company has incurred or acquired through business combinations, remedial response and voluntary cleanup costs for site contamination and is a party to product liability and other lawsuits and claims associated with environmental matters, including past production of product containing toxic substances. Additional lawsuits, claims and costs involving environmental matters are likely to continue to arise in the future. However, considering past experience and reserves, the Company does not anticipate that these matters will have a material impact on earnings, capital expenditures, financial condition or competitive position. See also Item 1A. Risk Factors and Note 14 — Commitments and Contingencies in the Notes to Consolidated Financial Statements.

Employees

As of December 31, 2016, Hubbell had approximately 17,400 salaried and hourly employees of which approximately 7,500 of these employees, or 43%, are located in the United States. Approximately 2,100 of these U.S. employees are represented by 15 labor unions. Hubbell considers its labor relations to be satisfactory.

Executive Officers of the Registrant

Name	Age ⁽¹⁾	Present Position	Business Experience
David G. Nord	59	Chairman of the Board, President and Chief Executive Officer	Present position since May 2014; President and Chief Executive Officer since January 2013; President and Chief Operating Officer from June 2012 to January 2013, and Senior Vice President and Chief Financial Officer from September 2005 to June 2012. Previously, various positions, including Vice President, Controller, of United Technologies and its subsidiaries, 2000-2005.
William R. Sperry	54	Senior Vice President and Chief Financial Officer	Present position since June 6, 2012; Vice President, Corporate Strategy and Development August 15, 2008 to June 6, 2012; previously, Managing Director, Lehman Brothers August 2006 to April 2008, various positions, including Managing Director, of J.P. Morgan and its predecessor institutions, 1994-2006.
Gerben W. Bakker	52	Group President, Power Systems	Present position since February 1, 2014; previously, Division Vice President, Hubbell Power Systems, Inc. ("HPS") August 2009 - February 1, 2014; President, HPS Brazil June 2005 – July 2009; Vice President, Sourcing, HPS March 2004 – May 2005.
Joseph A. Capozzoli	42	Vice President and Controller	Present position since April 22, 2013; previously, Assistant Corporate Controller of Stanley Black & Decker, Inc. ("Stanley") April 2011 to April 2013; Global Operations Controller at Stanley 2010-2011; Director of Cost Accounting at Stanley, 2006-2010.
An-Ping Hsieh	56	Senior Vice President, General Counsel	Present position since May 3, 2016; previously Vice President, General Counsel, September 2012 - May 2016; Vice President, Secretary and Associate General Counsel of United Technologies Corporation ("UTC") February 2008 to September 2012; Vice President and General Counsel, UTC Fire and Security 2003-2008; Deputy General Counsel, Otis Elevator Company, a United Technologies company 2001-2003.
Maria R. Lee	41	Treasurer and Vice President, Corporate Strategy and Investor Relations	Present position since January 1, 2016; previously Vice President, Corporate Strategy and Investor Relations, March 2015-December 2015; Director, Investor Relations of United Technologies Corporation ("UTC") 2011-2012; various positions, including Director, Financial Planning & Analysis, North and South America Area, Otis Elevator Company, at UTC, 2006-2011; various positions at Duff & Phelps, Affiliated Managers Group, Inc., and Booz Allen Hamilton, 1997-2006.
Stephen M. Mais	52	Senior Vice President, Human Resources	Present position since May 3, 2016, previously Vice President, Human Resources, August 2005 - May 2016; Director, Staffing and Capability, Pepsi Bottling Group ("Pepsi") 2001-2005; Director, Human Resources Southeastern U.S., Pepsi 1997-2001.
Kevin A. Poyck	47	Group President, Lighting	Present position since June 1, 2015; previously, Vice President, General Manager, Commercial and Industrial Lighting, Hubbell Lighting, Inc. ("HLI") 2014 - 2015; Vice President, Brand Management, Commercial and Industrial, HLI 2012-2014; Vice President, Operations, HLI 2009 - 2012; Vice President, Engineering, HLI 2005-2009.
Rodd R. Ruland	59	Group President, Construction and Energy	Present position since June 1, 2015; previously, President, BURNDY LLC, Hubbell Canada (HCLP) & Hubbell de Mexico (HdM) 2012-2015; President, BURNDY LLC 2009-2012; Corporate Vice President & General Manager, Electrical Power Interconnect Division, FCI (BURNDY) 2003-2009, Director, Business Development 2001-2003; various positions in Sales &

HUBBELL INCORPORATED - Form 10-K 7

ITEM 1A Risk Factors

Our business, operating results, financial condition, and cash flows may be impacted by a number of factors including, but not limited to those set forth below. Any one of these factors could cause our actual results to vary materially from recent results or future anticipated results. See also Item 7. Management's Discussion and Analysis — "Executive Overview of the Business", "Outlook", and "Results of Operations".

Global economic uncertainty could adversely affect us.

During periods of prolonged slow growth, or a downturn in conditions in the worldwide or domestic economies, we could experience reduced orders, payment delays, supply chain disruptions or other factors caused by economic challenges faced by our customers, prospective customers and suppliers. Depending upon their severity and duration, these conditions could have an adverse impact on our results of operations, financial condition and cash flows.

We operate in markets that are subject to competitive pressures that could affect selling prices or demand for our products.

We compete on the basis of product performance, quality, service and/or price. Competitors' behavior related to these areas could potentially have significant impacts on our financial results. Our competitive strategy is to design and manufacture high quality products at the lowest possible cost. Our strategy is to also increase selling prices to offset rising costs of raw materials and components. Competitive pricing pressures may not allow us to offset some or all of our increased costs through pricing actions. Alternatively, if raw material and component costs decline, the Company may not be able to maintain current pricing levels. Competition could also affect future selling prices or demand for our products which could have an adverse impact on our results of operations, financial condition and cash flows.

We may not be able to successfully implement initiatives, including our restructuring activities, that improve productivity and streamline operations to control or reduce costs.

Achieving our long-term profitability goals depends significantly on our ability to control or reduce our operating costs. Because many of our costs are affected by factors outside, or substantially outside, our control, we generally must seek to control or reduce costs through productivity initiatives. If we are not able to identify and implement initiatives that control or reduce costs and increase operating efficiency, or if the cost savings initiatives we have implemented to date do not generate expected cost savings, our financial results could be adversely impacted. Our efforts to control or reduce costs may include restructuring activities involving workforce reductions, facility consolidations and other cost reduction initiatives. If we do not successfully manage our current restructuring activities, or any other restructuring activities that we may undertake in the future, expected efficiencies and benefits may be delayed or not realized, and our operations and business could be disrupted.

We manufacture and source products and materials from various countries throughout the world. A disruption in the availability, price or quality of these products or materials could impact our operating results.

Our business is subject to risks associated with global manufacturing and sourcing. We use a variety of raw materials in the production of our products including steel, aluminum, brass, copper, bronze, zinc, nickel and plastics. We also purchase certain electrical and electronic components, including solenoids, lighting ballasts, printed circuit boards and integrated circuit chips and cord sets from a number of suppliers. Significant shortages in the availability of these materials or significant price increases could increase our operating costs and adversely impact the competitive

positions of our products, which could adversely impact our results of operations.

We rely on materials, components and finished goods that are sourced from or manufactured in foreign countries including Mexico, China, and other international countries. Political instability in any country where we do business could have an adverse impact on our results of operations.

We rely on our suppliers to produce high quality materials, components and finished goods according to our specifications. Although we have quality control procedures in place, there is a risk that products may not meet our specifications which could impact our ability to ship quality products to our customers on a timely basis, which could adversely impact our results of operations.

Future tax law changes could increase our prospective tax expense. In addition, tax payments may ultimately differ from amounts currently recorded by the Company.

We are subject to income taxes as well as non-income based taxes, in both the United States and numerous foreign jurisdictions. The determination of the Company's worldwide provision for income taxes and other tax liabilities requires judgment and is based on diverse legislative and regulatory structures that exist in the various jurisdictions where the company operates. As a result of the U.S. federal elections, there may be changes in tax policy pursued by the new administration, and the nature and outcome of those potential changes is uncertain at this time. Although management believes its estimates are reasonable, the ultimate tax outcome may differ from the amounts recorded in its financial statements and may adversely affect the Company's financial results for the period when such determination is made. We are subject to ongoing tax audits in various jurisdictions. Tax authorities may disagree with certain positions we have taken and assess additional taxes. We regularly assess the likely outcomes of these audits in order to determine the appropriateness of our tax provisions. However, there can be no assurance that we will accurately predict the outcomes of these audits, and the future outcomes of these audits could adversely affect our results of operations, financial condition and cash flows.

Significant developments stemming from the recent U.S. federal elections could have a material adverse effect on us.

As a result of the recent U.S. federal elections, there may be changes to existing trade agreements, like the North American Free Trade Agreement ("NAFTA"), and proposed trade agreements, like the Trans-Pacific Partnership ("TPP"), greater restrictions on free trade generally, significant increases in tariffs on goods imported into the United States particularly tariffs on products manufactured in Mexico, among other possible changes. Changes in U.S. social, political, regulatory and economic conditions or in laws and policies governing foreign trade, manufacturing, development and investment in the territories and countries where we currently manufacture and sell products, and any resulting negative sentiments towards the United States as a result of such changes, could have an adverse effect on our business.

We engage in acquisitions and strategic investments and may encounter difficulty in obtaining appropriate acquisitions and in integrating these businesses.

Part of the Company's growth strategy involves acquisitions. We have pursued and will continue to seek acquisitions and other strategic investments to complement and expand our existing businesses. The rate and extent to which acquisitions become available may impact our growth rate. The success of these transactions will depend on our ability to integrate these businesses into our operations and realize the planned synergies. We may encounter difficulties in integrating acquisitions into our operations and in managing strategic investments and foreign acquisitions and joint ventures may also present additional risk related to the integration of operations across different cultures and languages. Failure to effectively complete or manage acquisitions may adversely affect our existing businesses as well as our results of operations, financial condition and cash flows.

We are subject to risks surrounding our information systems failures, network, disruptions and breaches in data security.

The proper functioning of Hubbell's information systems is critical to the successful operation of our business. Although our information systems are protected with robust backup and security systems, these systems are still susceptible to cyber threats, outages due to fire, floods, power loss, telecommunications failures, viruses, break-ins and similar events, or breaches of physical security. A failure of our information technology systems could impact our ability to process orders, maintain proper levels of inventory, collect accounts receivable and pay expenses; all of which could have an adverse effect on our results of operations, financial condition and cash flows. In addition, security breaches could result in unauthorized disclosure of confidential information that may result in financial or reputational damage to the Company.

We have continued to work on improving our utilization of our enterprise resource planning system, expanding standardization of business processes and performing implementations at our remaining businesses. We expect to incur additional costs related to future implementations, process reengineering efforts as well as enhancements and upgrades to the system. These system modifications and implementations

could result in operating inefficiencies which could adversely impact our operating results and/or our ability to perform necessary business transactions.

Our success depends on attracting and retaining qualified personnel.

Our ability to sustain and grow our business requires us to hire, retain and develop a highly skilled and diverse management team and workforce. Failure to ensure that we have the depth and breadth of personnel with the necessary skill set and experience, or the loss of key employees, could impede our ability to deliver our growth objectives and execute our strategy.

Deterioration in the credit quality of our customers could have a material adverse effect on our operating results and financial condition.

We have an extensive customer base of distributors, wholesalers, electric utilities, OEMs, electrical contractors, telecommunications companies and retail and hardware outlets. We are not dependent on a single customer, however, our top ten customers account for approximately one-third of our net sales. Deterioration in the credit quality of several major customers could adversely affect our results of operations, financial condition and cash flows.

Inability to access capital markets or failure to maintain our credit ratings may adversely affect our business.

Our ability to invest in our business and make strategic acquisitions may require access to the capital markets. If general economic and capital market conditions deteriorate significantly, it could impact our ability to access capital. Failure to maintain our credit ratings could also impact our ability to access credit markets and could adversely impact our cost of borrowing. While we have not encountered significant financing difficulties recently, the capital and credit markets have experienced significant volatility in recent years. Market conditions could make it more difficult for us to access capital to finance our investments and acquisitions. This could adversely affect our results of operations, financial condition and cash flows.

If the underlying investments of our defined benefit plans do not perform as expected, we may have to make additional contributions to these plans.

We sponsor certain pension and other postretirement defined benefit plans. The performance of the financial markets and interest rates impact these plan expenses and funding obligations. Significant changes in market interest rates, investment losses on plan assets and reductions in discount rates may increase our funding obligations and could adversely impact our results of operations, cash flows, and financial condition. Furthermore, there can be no assurance that the value of the defined benefit plan assets will be sufficient to meet future funding requirements.

Volatility in currency exchange rates may adversely affect our financial condition, results of operations and cash flows.

Our international operations accounted for approximately 10% of our net sales in 2016. We are exposed to the effects (both positive and negative) that fluctuating exchange rates have on translating the financial statements of our international operations, most of which are denominated in local currencies, into the U.S. dollar. Fluctuations in exchange rates may affect product demand and reported profits in our international operations. In addition, currency fluctuations may affect the prices we pay suppliers for materials used in our products. As a result, fluctuating exchange rates may adversely impact our results of operations and cash flows.

Our reputation and our ability to conduct business may be impaired by improper conduct by any of our employees, agents or business partners.

We cannot provide absolute assurance that our internal controls and compliance systems will always protect us from acts committed by our employees, agents or business partners that would violate U.S. and/or non-U.S. laws, including the laws governing payments to government officials, bribery, fraud, anti-kickback and false claims rules, competition, export and import compliance, money laundering and data privacy. In particular, the U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act, and similar anti-bribery laws in other jurisdictions generally prohibit companies and their intermediaries from making improper payments to government officials for the purpose of obtaining or retaining business, and we operate in parts of the world that have experienced governmental corruption to some degree. Despite meaningful measures that we undertake to facilitate lawful conduct, which include training and internal control policies, these measures may not always prevent reckless or criminal acts by our employees or agents. Any such improper actions could damage our reputation and subject us to civil or criminal investigation in the United States and in other jurisdictions, could lead to substantial civil and criminal, monetary and non-monetary penalties and could cause us to incur significant legal and investigative fees.

Our inability to effectively develop and introduce new products could adversely affect our ability to compete.

New product introductions and enhancement of existing products and services are key to the Company's competitive strategy. The success of new product introductions is dependent on a number of factors, including, but not limited to, timely and successful development of new products, market acceptance of these products and the Company's ability to manage the risks associated with these introductions. These risks include production capabilities, management of inventory levels to support anticipated demand, the risk that new products may have quality defects in the early stages of introduction, and obsolescence risk of existing products. The Company cannot predict with certainty the ultimate impact new product introductions could have on our results of operations, financial condition or cash flows.

We could incur significant and/or unexpected costs in our efforts to successfully avoid, manage, defend and litigate intellectual property matters.

The Company relies on certain patents, trademarks, copyrights, trade secrets and other intellectual property of which the Company cannot be certain that others have not and will not infringe upon. Although management believes that the loss or expiration of any single intellectual property right would not have a material impact on its operating results, intellectual property litigation could be costly and time consuming and the Company could incur significant legal expenses pursuing these claims against others.

From time to time, we receive notices from third parties alleging intellectual property infringement. Any dispute or litigation involving intellectual property could be costly and time-consuming due to the complexity and the uncertainty of intellectual property litigation. Our intellectual property portfolio may not be useful in asserting a counterclaim, or negotiating a license, in response to a claim of infringement or misappropriation. In addition, as a

result of such claims, the Company may lose its rights to utilize critical technology or may be required to pay substantial damages or license fees with respect to the infringed rights or be required to redesign our products at a substantial cost, any of which could negatively impact our operating results. Even if we successfully defend against claims of infringement, we may incur significant costs that could adversely affect our results of operations, financial condition and cash flow. See Item 3 “Legal Proceedings” for a discussion of our legal proceedings.

We may be required to recognize impairment charges for our goodwill and other intangible assets.

As of December 31, 2016, the net carrying value of our goodwill and other intangible assets totaled approximately \$1.4 billion. As required by generally accepted accounting principles, we periodically assess these assets to determine if they are impaired. Impairment of intangibles assets may be triggered by developments both within and outside the Company’s control. Deteriorating economic conditions, technological changes, disruptions to our business, inability to effectively integrate acquired businesses, unexpected significant changes or planned changes in use of the assets, intensified competition, divestitures, market capitalization declines and other factors may impair our goodwill and other intangible assets. Any charges relating to such impairments could adversely affect our results of operations in the periods an impairment is recognized.

We are subject to litigation and environmental regulations that may adversely impact our operating results.

We are a party to a number of legal proceedings and claims, including those involving product liability, intellectual property and environmental matters, which could be significant. It is not possible to predict with certainty the outcome of every claim and lawsuit. In the future, we could incur judgments or enter into settlements of lawsuits and claims that could have a materially adverse effect on our results of operations, cash flows, and financial condition. In addition, while we maintain insurance coverage with respect to certain claims, such insurance may not provide adequate coverage against such claims. We establish reserves based on our assessment of contingencies, including contingencies related to legal claims asserted against us. Subsequent developments in legal proceedings may affect our assessment and estimates of the loss contingency recorded as a reserve and require us to make additional payments, which could have a materially adverse effect on our results of operations, financial condition and cash flow.

We are also subject to various laws and regulations relating to environmental protection and the discharge of materials into the environment, and we could incur substantial costs as a result of the noncompliance with or liability for clean up or other costs or damages under environmental laws. In addition, we could be affected by future laws or regulations, including those imposed in response to climate change concerns. Compliance with any future laws and regulations could result in a materially adverse effect on our business and financial results. See Item 3 “Legal Proceedings” for a discussion of our legal proceedings.

Regulations related to conflict-free minerals may cause us to incur additional expenses and may create challenges with our customers.

The Dodd-Frank Wall Street Reform and Consumer Protection Act contains provisions to improve transparency and accountability regarding the use of “conflict” minerals mined from the Democratic Republic of Congo and adjoining countries (“DRC”). The SEC has established annual disclosure and reporting requirements for those companies who use “conflict” minerals sourced from the DRC in their products. These new requirements could limit the pool of suppliers who can provide conflict-free minerals and as a result, we cannot ensure that we will be able to obtain these conflict-free minerals at competitive prices. Compliance with these new requirements may also increase our costs. In addition, we may face challenges with our customers if we are unable to sufficiently verify the origins of the minerals used in our products.

We face the potential harms of natural disasters, terrorism, acts of war, international conflicts or other disruptions to our operations.

Natural disasters, acts or threats of war or terrorism, international conflicts, and the actions taken by the United States and other governments in response to such events could cause damage to or disrupt our business operations, our suppliers or our customers, and could create political or economic instability, any of which could have an adverse effect on our business. Although it is not possible to predict such events or their consequences, these events could decrease demand for our products, make it difficult or impossible for us to deliver products, or disrupt our supply chain.

None

ITEM 2 Properties

As of January 31, 2017, Hubbell's global headquarters are located in leased office space in Shelton, Connecticut. Other principal administrative offices are in Columbia, South Carolina, Greenville, South Carolina and Manchester, New Hampshire. Hubbell's manufacturing and warehousing facilities, classified by reporting segment, are located in the following countries. The Company believes its manufacturing and warehousing facilities are adequate to carry on its business activities.

Segment	Location	Number of Facilities		Total Approximate Floor Area in Square Feet	
		Warehouses	Manufacturing	Owned	Leased
Electrical segment	United States	11	25	3,089,800	2,052,300
	Australia	—	2	—	31,700
	Brazil	—	1	105,900	—
	Canada	1	2	178,700	2,300
	Italy	—	1	—	8,100
	Mexico	1	4	828,800	174,300
	China	—	2	—	287,900
	Puerto Rico	—	1	162,400	—
	Singapore	1	—	—	8,700
	Switzerland	—	1	95,000	—
	United Kingdom	2	3	122,200	64,600
Power segment	United States	1	14	2,638,300	149,700
	Brazil	—	2	188,100	24,000
	Canada	—	1	30,000	—
	Mexico	1	1	167,300	181,200
	China	—	3	—	226,100
TOTAL		18	63	7,606,500	3,210,900

(1) The Power segment shares an owned manufacturing building in Mexico with the Electrical segment. The building is included in the Electrical segment facility count.

ITEM 3 Legal Proceedings

The Company is subject to various legal proceedings arising in the normal course of its business. These proceedings include claims for damages arising out of use of the Company's products, intellectual property, workers' compensation and environmental matters. The Company is self-insured up to specified limits for certain types of claims, including product liability and workers' compensation, and is fully self-insured for certain other types of claims, including environmental and intellectual property matters. The Company recognizes a liability for any contingency that in management's judgment is probable of occurrence and can be reasonably estimated. We continually reassess the likelihood of adverse judgments and outcomes in these matters, as well as estimated ranges of possible losses based upon an analysis of each matter which includes

consideration of outside legal counsel and, if applicable, other experts. Information required by this item is incorporated herein by reference to the section captioned "Notes to Consolidated Financial Statements, Note 14 — Commitments and Contingencies" of this Form 10-K.

ITEM 4 Mine Safety Disclosures

Not applicable.

PART II

ITEM 5 Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

On December 23, 2015 the Company completed the Reclassification of its dual-class common stock into a single class of Common Stock. Trading in the Class A common stock and Class B common stock ceased after markets closed on December 23, 2015 and trading in the Company's single class of Common Stock commenced on the New York Stock Exchange ("NYSE") on December 24, 2015. The Company's Common Stock is principally traded on the NYSE. Prior to the Reclassification the Company's Class A common stock traded under the symbol "HUB.A" and the Company's Class B common stock traded under the symbol "HUB.B". The Common Stock, resulting from the Reclassification, trades under the symbol "HUBB". See Note 15 — Capital Stock in the Notes to Consolidated Financial Statements for more information about the Reclassification.

The information required by Item 5 with respect to securities authorized for issuance under equity compensation plans is incorporated herein by reference to Part III, Item 12 of this Form 10-K.

The following tables provide information on market prices, dividends declared, number of common shareholders, and repurchases by the Company of shares of its Class A common stock, Class B common stock, and the Common Stock resulting from the Reclassification.

Market Prices (Dollars Per Share)	Class A		Class B		Common

Our dividends are declared at the discretion of our Board of Directors. In October 2016, the Company's Board of Directors approved an increase in the common stock dividend rate from \$0.63 to \$0.70 per share per quarter. The

increased quarterly dividend payment commenced with the December 15, 2016 payment made to the shareholders of record on November 30, 2016.

14 HUBBELL INCORPORATED - Form 10-K

Purchases of Equity Securities

As of December 31, 2015, we had \$141.4 million of remaining share repurchase authorization under the share repurchase program authorized by our Board of Directors on October 21, 2014 (the "October 2014 program") and \$250 million of remaining share repurchase authorization under the share repurchase program authorized by our Board of Directors on August 23, 2015 (the "August 2015 program"), for a total remaining share repurchase authorization of \$391.4 million. In 2016, the Company repurchased shares for an aggregate purchase price of \$237.8 million. As a result, as of December 31, 2016, our remaining share repurchase authorization was \$153.6 million. Our remaining share repurchase authorization expires in October 2017. Subject to numerous factors, including market conditions and alternative uses of cash, we may conduct discretionary repurchases through open market or privately negotiated transactions, which may include repurchases under plans complying with Rules 10b5-1 and 10b-18 under the Securities Exchange Act of 1934, as amended.

The following table summarizes the Company's repurchase activity of Common Stock during the quarter ended December 31, 2016:

Period	Total Number of Shares of Common Stock Purchased (000's)	Average Price Paid Per Share of Common Stock	Approximate Value of Shares that May Yet Be Purchased Under the Programs (in millions)
BALANCE AS OF SEPTEMBER 30, 2016			\$ 153.6
October 2016	—	\$	—\$ 153.6
November 2016	—	\$	—\$ 153.6
December 2016	—	\$	—\$ 153.6
TOTAL FOR THE QUARTER ENDED DECEMBER 31, 2016	—	\$	—

Corporate Performance Graph

The following graph compares the total return to shareholders on the Company's common stock during the five years ended December 31, 2016, with a cumulative total return on the (i) Standard & Poor's MidCap 400 ("S&P MidCap 400"), (ii) The Weighted Average of Hubbell Class A and Class B common stock, and (iii) the Dow Jones U.S. Electrical Components & Equipment Index ("DJUSEC"). The Company is a member of the S&P MidCap 400. As of December 31, 2016, the DJUSEC reflects a group of fourteen company stocks in the electrical components and equipment market segment, and serves as the Company's peer group for purposes of this graph. The comparison assumes \$100 was invested on December 31, 2011 in the Company's Common Stock and in each of the foregoing indices and assumes reinvestment of dividends.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN*

Among Hubbell Incorporated, the S&P Midcap 400 Index, and the Dow Jones US Electrical Components & Equipment Index

The Hubbell Incorporated line above uses the weighted average of Hubbell Class A and Class B shares for the three annual periods from December 2012 through December 2014.

*\$100 invested on 12/31/11 in stock or index, including reinvestment of dividends. Fiscal year ending December 31.

(1) The selected non-GAAP measures of adjusted operating income, adjusted operating income as a percent of sales (adjusted operating margin), and adjusted earnings per share-diluted should be read in conjunction with Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations".

(2) Defined as current assets less current liabilities.

ITEM 7 Management's Discussion and Analysis of Financial Condition and Results of Operations

Executive Overview of the Business

The Company is primarily engaged in the design, manufacture and sale of quality electrical and electronic products for a broad range of non-residential and residential construction, industrial and utility applications. Products are either sourced complete, manufactured or assembled by subsidiaries in the United States, Canada, Switzerland, Puerto Rico, China, Mexico, Italy, the United Kingdom, Brazil, Australia and Ireland. The Company also participates in joint ventures in Taiwan and Hong Kong, and maintains offices in Singapore, China, India, Mexico, South Korea and countries in the Middle East. The Company employs approximately 17,400 individuals worldwide.

The Company's reporting segments consist of the Electrical segment and the Power segment. Results for 2016, 2015 and 2014 by segment are included under "Segment Results" within this Management's Discussion and Analysis.

The Company's long-term strategy is to serve its customers with reliable and innovative solutions delivered through a competitive cost structure; to complement organic growth with acquisitions that enhance its product offerings; and to allocate capital effectively to create shareholder value. In executing this strategy the Company is focused on growing profits and delivering attractive returns to shareholders by executing a business plan focused on the following key initiatives: growing revenue, aligning the cost structure, improving productivity, and deploying capital effectively.

Our strategy to grow revenue is focused on complementing organic growth with acquisitions that expand our product offerings and present opportunities to compete in core, adjacent or complementary markets. Our organic growth initiatives remain focused on expanding market share through new product introductions and more effective utilization of sales and marketing efforts across the organization. Acquisitions are a key component of our revenue growth strategy, not only to expand our reach into new markets and further into existing markets with new products, but also to advance our revenue growth objectives during periods of weakness or inconsistency in our end-markets.

Aligning our cost structure with the needs of our business is a key initiative and has resulted in the restructuring and related activities we have initiated, beginning in 2014. Our restructuring and related efforts include the consolidation of manufacturing and distribution facilities, workforce actions, as well as streamlining and consolidating our back-office functions. The primary objectives of our restructuring and related activities are to optimize our manufacturing footprint, cost structure, and effectiveness and efficiency of our workforce.

Productivity improvement also continues to be a key area of focus for the Company and efforts to drive productivity work with our restructuring and related activities to minimize the impact of rising material costs and administrative

cost inflation. Material costs are approximately two-thirds of our cost of goods sold therefore volatility in this area can significantly impact profitability. Our goal is to have pricing and productivity programs that offset material and other inflationary cost increases as well as pay for investments in key growth areas.

Productivity programs impact virtually all functional areas within the Company by reducing or eliminating waste and improving processes. We continue to expand our efforts surrounding global product and component sourcing and supplier cost reduction programs. Value engineering efforts, product transfers and the use of lean process improvement techniques are expected to continue to increase manufacturing efficiency. In addition, we continue to build upon the benefits of our enterprise resource planning system across all functions.

Outlook

In 2017, we expect growth across our end markets to be more consistent than in 2016. We expect modest end market growth of approximately two percent in the aggregate, with two to four percent growth in the non-residential market and four to six percent growth in the residential market. We expect the electrical transmission and distribution market, the industrial market, and the oil and gas market to each be flat-to-up by two percent.

We expect our organic net sales growth to outperform end markets and that acquisitions will continue to be a key driver of growth, however we anticipate pricing pressure in our Lighting business group could continue to be a challenge.

We expect our operating margins in 2017 will benefit from cost structure improvements, through incremental savings from our restructuring and related activities, and that our operating margins will also reflect lower Restructuring and Related Costs as well as incremental profit from higher sales. However, we

also expect our operating margins in 2017 will reflect continued pricing challenges in our Lighting business and headwinds from foreign exchange and material costs across the Company.

We anticipate earnings per diluted share in the range of \$5.60 to \$5.80 in 2017, including approximately \$0.25 of Restructuring and Related Costs as well as \$0.20 of incremental savings in 2017 from restructuring and related actions initiated prior to December 31, 2016.

Finally, with our strong financial position and cash flows provided by operating activities, we expect to continue to enhance shareholder value through capital deployment. We expect free cash flow (defined as cash flows from operating activities less capital expenditures) equal to net income attributable to Hubbell in 2017.

Results of Operations

Our operations are classified into two reportable segments: Electrical and Power. For a complete description of the Company's segments, see Part I, Item 1 of this Annual Report on Form 10-K. Within these segments, Hubbell primarily serves customers in the non-residential and residential construction, industrial, energy-related markets (also referred to as oil and gas markets) and utility markets (also referred to as the electrical transmission and distribution market). In order of magnitude of net sales, the Company's served markets are primarily non-residential construction, industrial, utility, oil and gas, and residential construction.

Our overall end markets were mixed in 2016 leading to organic growth in the year of one percent and a continuation of pressure on operating margins from business and product mix, as lower margin non-residential and residential markets grew, while higher margin industrial and oil markets continued to decline, although at rates that moderated as compared to 2015. The utility market was approximately flat in 2016 driven by project delays.

Considering these overall market conditions, we continued our focus on productivity and the restructuring and related program that began in 2014. The savings from our productivity and restructuring and related actions have helped to reduce the impact of unfavorable sales mix on operating margins as well as headwinds from pricing in certain markets and foreign exchange. Our productivity measures are aimed to offset inflationary cost increases, while our

restructuring and related actions are focused on reducing structural costs of the business, aligning our cost structure with market demand, and achieving greater back-office efficiencies.

SUMMARY OF CONSOLIDATED RESULTS (IN MILLIONS, EXCEPT PER SHARE DATA)

	For the Year Ending December 31,					
	2016	% of Net sales	2015	% of Net sales	2014	% of Net sales
Net sales	\$3,505.2		\$3,390.4		\$3,359.4	
Cost of goods sold	2,404.5	68.6%	2,298.6	67.8%	2,250.4	67.0%
Gross profit	1,100.7	31.4%	1,091.8	32.2%	1,109	33.0%
Selling & administrative expenses	622.9	17.8%	617.2	18.2%	591.6	17.6%
Operating income	477.8	13.6%	474.6	14.0%	517.4	15.4%
Net income attributable to Hubbell	293.0	8.4%	277.3	8.2%	325.3	9.7%
EARNINGS PER SHARE - DILUTED	\$5.24		\$4.77		\$5.48	

Our consolidated results of operations in 2016, 2015 and 2014 include what we refer to as "Restructuring and Related Costs". Restructuring actions support our cost reduction efforts involving the consolidation of manufacturing and distribution facilities as well as workforce reductions and the sale or exit of business units we determine to be non-strategic. Restructuring costs include severance and employee benefits, asset impairments, as well as facility closure, contract termination and certain pension costs that are directly related to restructuring actions.

Restructuring-related costs are costs associated with our business transformation initiatives, including the consolidation of back-office functions and streamlining our processes, and certain other costs and gains associated with restructuring actions. In the fourth quarter of 2016 restructuring-related costs include a gain on the sale of a property associated with restructuring activities.

Our consolidated results of operations in 2015 also include costs associated with the reclassification of the Company's common stock to eliminate its two-class structure (the "Reclassification" and the "Reclassification Costs").

Reclassification Costs are primarily professional fees associated with the reclassification and are recognized in Other expense, net in the Consolidated Statement of Income. Only a portion of the Reclassification Costs were tax deductible.

We believe certain non-GAAP measures that exclude the impact of these costs may provide investors with useful information regarding our underlying performance from period to period and allow investors to assess the impact of the Company's restructuring and related activities and business transformation initiatives on the results of operations. Adjusted gross profit, adjusted selling & administrative ("S&A") expense, and adjusted operating income each exclude Restructuring and Related Costs. Adjusted net income attributable to Hubbell and adjusted earnings per diluted share exclude Restructuring and Related Costs as well as Reclassification Costs. Management uses these adjusted measures when assessing the performance of the business.

Additional information about the Reclassification is included in Note 15 — Capital Stock of the Notes to Consolidated Financial Statements as well as the Company's current reports on Form 8-K filed on August 24, 2015 and December 23, 2015 and the Company's registration statement on Form S-4 (File No. 333-206898), initially filed with the SEC on September 11, 2015 and declared effective on November 23, 2015.

Edgar Filing: HUBBELL INC - Form 10-K

The following table reconciles our adjusted financial measures to the directly comparable GAAP financial measure (in millions, except per share amounts):

	For the Year Ending December 31,					
	2016	% of Net sales	2015	% of Net sales	2014	% of Net sales
Gross profit (GAAP measure)	\$1,100.7	31.4%	\$1,091.8	32.2%	\$1,109.0	33.0%
Restructuring and related costs	30.1		23.7		3.4	
Adjusted gross profit	\$1,130.8	32.3%	\$1,115.5	32.9%	\$1,112.4	33.1%

The following table reconciles our restructuring costs to our Restructuring and Related Costs for 2016 and 2015 (in millions):

	For the Year Ending December 31,					
	2016	2015	2016	2015	2016	2015
	Cost of goods sold		S&A expense		Total	
Restructuring costs (GAAP measure, Note 21 — Restructuring Costs)	\$27.5	\$15.3	\$7.5	\$8.3	\$35.0	\$23.6
Restructuring related costs	2.6	8.4	(2.6)	6.9	—	15.3
Restructuring and related costs (non-GAAP measure)	\$30.1	\$23.7	\$4.9	\$15.2	\$35.0	\$38.9

Of the \$35.0 million of Restructuring and Related Costs incurred in 2016, \$32.1 million is recorded in the Electrical segment and \$2.9 million is recorded in the Power segment. Of the \$38.9 million of Restructuring and Related Costs incurred in 2015, \$32.8 million is recorded in the Electrical segment and \$6.1 million is recorded in the Power segment. Restructuring and Related Costs in Cost of goods sold increased in 2016 primarily due to a \$12.5 million charge in the fourth quarter of 2016 to record an estimated liability associated with the anticipated withdrawal from a multi-employer pension plan associated with the consolidation of two of our Lighting facilities. Restructuring related costs in S&A expense declined as compared to the prior year as 2016 includes a \$7.2 million gain on the sale of a

property associated with a restructuring action.

2016 Compared to 2015

Net Sales

Net sales of \$3.5 billion in 2016 increased three percent as compared to 2015. Acquisitions added three percentage points to net sales in 2016 and organic volume, including pricing headwinds, added one percentage point, while foreign currency translation reduced net sales by one percentage point. Within our Electrical segment, organic net sales of products sold into the non-residential and residential construction markets grew, but was mostly offset by lower organic net sales of products into the energy-related and industrial markets, which experienced continued, but moderating, weakness in 2016, primarily impacting our harsh and hazardous products. Within our Power segment, organic net sales were slightly higher, by less than one percentage point, in 2016.

Cost of Goods Sold

As a percentage of net sales, cost of goods sold increased to 68.6% for 2016 compared to 67.8% in 2015. The increase was primarily due to unfavorable business and product mix, pricing headwinds in our Electrical segment, the impact of our acquisitions, as well as foreign exchange headwinds. We also incurred \$6.4 million of higher Restructuring and Related Costs within Cost of goods sold in 2016, primarily relating to the proposed consolidation of two of our Lighting facilities. Those unfavorable impacts were partially offset by higher realized savings from our restructuring and related actions in 2016, and favorable material costs.

Gross Profit

The gross profit margin for 2016 declined to 31.4% compared to 32.2% in 2015. Restructuring and Related Costs in Cost of goods sold were \$6.4 million higher in 2016 as compared to 2015. Excluding Restructuring and Related Costs, the adjusted gross profit margin was 32.3% in 2016 as compared to 32.9% in 2015. The decrease in the adjusted gross margin is primarily due to unfavorable business and product mix, pricing headwinds in our Electrical segment, the impact of our acquisitions, as well as foreign exchange headwinds. Those unfavorable impacts were partially offset by higher realized savings from our restructuring and related actions in 2016, and favorable material costs.

Selling & Administrative Expenses

S&A expense in 2016 was \$622.9 million and increased one percent compared to 2015 as we added S&A costs in 2016 from our acquisitions, made investments in our business, and experienced higher pension costs. Those increases were almost completely offset by realized savings from our restructuring and related actions, \$10.3 million lower Restructuring and Related Costs in S&A expense in 2016 and foreign currency translation. S&A expense as a percentage of net sales declined by 40 basis points to 17.8% in 2016. Excluding Restructuring and Related Costs, adjusted S&A expense as a percentage of net sales declined by 20 basis points to 17.6% in 2016 primarily due to realized savings from our restructuring and related actions and the favorable impact of higher volume, partially offset by higher pension costs and investments in our business in 2016.

Operating Income

Operating income increased one percent in 2016 to \$477.8 million while operating margin declined by 40 basis points to 13.6%. Excluding Restructuring and Related Costs, adjusted operating income of \$512.8 million was flat as compared to 2015 and the adjusted operating margin declined by 50 basis points to 14.6%. The adjusted operating margin decreased primarily due to unfavorable product and business mix, pricing headwinds in our Electrical segment, foreign exchange headwinds and cost increases that were greater than productivity gains. Those unfavorable impacts to the adjusted operating margin were partially offset by realized savings from our restructuring and related

actions and lower material costs.

Total Other Expense

Total other expense was \$47.4 million in 2016 compared to \$56.0 million in 2015. Excluding Reclassification Costs that were incurred in 2015, adjusted total other expense was \$47.4 in 2016 compared to \$36.3 million in 2015 and increased largely due to a \$12.4 million increase in interest expense primarily related to the \$400 million debt offering we completed in March 2016.

Income Taxes

The effective tax rate was 30.8% in 2016 as compared to 32.6% in 2015. The effective tax rate was higher in 2015 as compared to 2016 due to certain costs of the Reclassification that were not deductible partially offset by international reorganization actions in 2015 as well as certain discrete items in 2016. Additional information related to the Company's effective tax rate is included in Note 12 — Income Taxes in the Notes to Consolidated Financial Statements.

Net Income Attributable to Hubbell and Earnings Per Diluted Share

Net income attributable to Hubbell was \$293.0 million in 2016 and increased 6% as compared to 2015. Excluding Restructuring and Related Costs and Reclassification Costs, adjusted net income attributable to Hubbell was \$316.8 million in 2016 and decreased 1% as compared to 2015, which reflects flat adjusted operating earnings, higher interest expense in 2016, partially offset by the benefit of a lower effective tax rate as compared to 2015. Earnings per diluted share in 2016 increased 10% compared to 2015. Adjusted earnings per diluted share in 2016, increased 3% and reflects a lower average number of diluted shares outstanding for the year, which declined by approximately 2.3 million as compared to 2015.

Segment Results

Electrical Segment

(In millions)	2016	2015	
Net sales	\$2,460.2	\$2,388.3	
Operating income	\$267.4	\$279.0	
Restructuring and related costs	32.1	32.8	
Adjusted operating income	\$299.5	\$311.8	
Operating margin	10.9	% 11.7	%
Adjusted operating margin	12.2	% 13.1	%

Net sales in the Electrical segment were \$2.5 billion, up three percent in 2016 as compared with 2015 due to the contribution of net sales from acquisitions. Organic volume was higher, despite pricing headwinds, and was offset by the unfavorable impact of foreign currency translation. Net sales were three percentage points higher due to the contribution of acquisitions. Organic volume, including pricing headwinds, added one percentage point to net sales and foreign currency translation reduced net sales by one percentage point.

Within the segment, net sales of our Lighting business group increased four percent in 2016 due to organic net sales growth of six percent, partially offset by a two percentage point headwind on pricing. Within the Lighting business group, organic net sales of residential lighting products increased by thirteen percent, partially offset by a three percentage point headwind on pricing, and commercial and industrial lighting products increased by four percent, partially offset by a two percentage point headwind on pricing. The aggregate net sales of our other business groups in the Electrical segment increased by three percentage points, primarily due to five percentage points of net sales growth from acquisitions partially offset by two percentage points from foreign currency translation. The aggregate organic net sales volume of those other business groups was lower, by less than one percent, as lower net sales of products in industrial and energy-related markets, primarily our harsh and hazardous products, were almost entirely offset by net sales growth in construction-related businesses.

Operating income in the Electrical segment for 2016 was \$267.4 million and decreased four percent compared to 2015. Operating margin in 2016 decreased by approximately 80 basis points to 10.9%. Excluding Restructuring and Related Costs, the adjusted operating margin decreased by 90 basis points to 12.2% in 2016. The decrease in the adjusted operating margin is primarily due to unfavorable product and business mix, foreign exchange headwinds, cost increases that were mostly offset by productivity gains, and pricing headwinds in our Lighting business group. Those unfavorable impacts were partially offset by realized savings from our restructuring and related actions and lower material costs.

Power Segment

(In millions)	2016	2015	
Net sales	\$1,045.0	\$1,002.1	
Operating income	\$210.4	\$195.6	
Restructuring and related costs	2.9	6.1	
Adjusted operating income	\$213.3	\$201.7	
Operating margin	20.1	% 19.5	%
Adjusted operating margin	20.4	% 20.1	%

Net sales in the Power segment were \$1.0 billion, up four percent compared to 2015, due to the contribution of net sales from acquisitions. Organic volume and the impact of foreign currency translation were effectively flat, as

organic volume increased by less than one percent and was offset by foreign currency headwinds of less than one percent.

Operating income in the Power segment increased eight percent to \$210.4 million in 2016. Operating margin in 2016 increased by 60 basis points to 20.1%. Excluding Restructuring and Related Costs, the adjusted operating margin in 2016 increased 30 basis points to 20.4%. The increase in the adjusted operating margin is primarily due to favorable pricing and material costs, and productivity in excess of cost increases, including the reduction of an environmental liability in the fourth quarter of 2016, partially offset by acquisitions, which increased operating income, but reduced operating margin by approximately 40 basis points.

2015 Compared to 2014

Net Sales

Net sales for the year ended 2015 were \$3.4 billion, an increase of one percent over 2014. Acquisitions added three percentage points to net sales in 2015, offset by the impact of foreign currency translation which reduced net sales by two percentage points. Organic volume was flat as net sales growth in our Power segment and in our Electrical segment products in the non-residential and residential construction markets was offset by lower organic net sales of our Electrical segment products in the energy-related and industrial markets, primarily our harsh and hazardous products.

Cost of Goods Sold

As a percentage of net sales, cost of goods sold increased to 67.8% for 2015 compared to 67.0% in 2014. The increase was primarily due to higher Restructuring and Related Costs in 2015 as compared to 2014, contributing approximately 60 basis points to the increase, unfavorable product and business mix, and the unfavorable impact of foreign exchange, partially offset by the favorable net impact of price and material costs as well as productivity in excess of cost inflation.

Gross Profit

The gross profit margin for 2015 declined to 32.2% compared to 33.0% in 2014. Excluding Restructuring and Related Costs, the adjusted gross profit margin was 32.9% in 2015 as compared to 33.1% in 2014. The decrease in the adjusted gross margin is primarily due to unfavorable product and business mix, and the unfavorable impact of foreign exchange, partially offset by the favorable net impact of price and material costs as well as productivity in excess of cost inflation.

Selling & Administrative Expenses

S&A expense increased four percent compared to 2014 primarily due to the addition of S&A expense of acquired businesses and higher Restructuring and Related Costs in 2015 as compared to 2014. As a percentage of net sales, S&A expense increased to 18.2% in 2015 compared to 17.6% in 2014. Excluding Restructuring and Related Costs, adjusted S&A expense as a percentage of net sales increased to 17.8% in 2015 compared to 17.6% in 2014. The increase in adjusted S&A expense is primarily due to acquired businesses with relatively higher S&A as a proportion of net sales in the near-term post-acquisition.

Operating Income

Operating income decreased eight percent in 2015 to \$474.6 million and operating margin declined by 140 basis points to 14.0%. Excluding Restructuring and Related Costs, adjusted operating income decreased two percent and the adjusted operating margin was 15.1% in 2015 compared to 15.6% in 2014. Adjusted operating income and the adjusted operating margin decreased primarily due to unfavorable product and business mix, and the unfavorable impact of foreign exchange, partially offset by the favorable net impact of price and material costs as well as productivity in excess of cost inflation.

Total Other Expense

In 2015, total other expense was \$56.0 million compared to \$31.9 million in 2014. Excluding Reclassification Costs that were incurred in 2015, adjusted total other expense was \$36.3 million in 2015 compared to \$31.9 million in 2014 and increased primarily due to the write-off of an indemnification asset related to an acquisition.

Income Taxes

The full year effective tax rate was 32.6% in 2015 and was flat as compared to 2014. In 2015 the effective tax rate increased due to certain costs associated with the Reclassification that were not deductible. That increase in the effective tax rate for 2015 was primarily offset by international reorganization actions in the current year as well as certain discrete tax items in 2014. Additional information related to the Company's effective tax rate is included in Note 12 — Income Taxes in the Notes to Consolidated Financial Statements.

Net Income attributable to Hubbell and Earnings Per Diluted Share

Net income attributable to Hubbell was \$277.3 million in 2015 and decreased 14.8% as compared to 2014. Excluding Restructuring and Related Costs and Reclassification Costs, adjusted net income attributable to Hubbell was \$321.0

million in 2015 and decreased 2.4% as compared to 2014. Earnings per diluted share in 2015 decreased 13.1% compared to 2014. Adjusted earnings per diluted share declined slightly in 2015 as compared to 2014 due to lower adjusted operating income, partially offset by the impact of a lower average number of diluted shares outstanding for the year, which declined by approximately 1.2 million as compared to 2014.

Segment Results

Electrical Segment

(In millions)	2015	2014		
Net sales	\$2,388.3	\$2,398.2		
Operating income	\$279.0	\$337.9		
Restructuring and related costs	32.8	5.1		
Adjusted operating income	\$311.8	\$343.0		
Operating margin	11.7	% 14.1	%	
Adjusted operating margin	13.1	% 14.3	%	

Net sales in the Electrical segment were approximately flat in 2015 compared with 2014 as the contribution of net sales from acquisitions were more than offset by the impact of foreign currency translation and lower organic net sales volume. Acquisitions contributed three percentage points to net sales offset by two percentage points due to foreign currency translation and one percentage point due to lower organic volume.

Within the segment, net sales of our Lighting business group increased six percent in 2015 compared to 2014, while the aggregate net sales of our other business groups in the Electrical segment declined by four percent in the same period. Net sales of the Lighting business group increased five percent due to organic growth in both the non-residential and residential construction markets, and one percent due to acquisitions. The aggregate net sales of our other business groups in the Electrical segment declined by four percent due to a four percentage point decline in organic volume and three percentage points of unfavorable foreign currency translation, partially offset by three percent net sales growth from completed acquisitions. The decline in organic net sales volume is primarily due to lower net sales of products in the energy-related and industrial markets, primarily our harsh and hazardous products, partially offset by net sales growth in our other products, primarily in the non-residential and residential construction markets.

Operating income in the Electrical segment for 2015 was \$279.0 million and decreased seventeen percent or \$58.9 million compared to 2014. Operating margin in 2015 decreased by approximately 240 basis points to 11.7% as compared to the same period of 2014. Excluding Restructuring and Related Costs, the adjusted operating margin was 13.1% in 2015 as compared to 14.3% in 2014. The decrease in the adjusted operating margin is primarily due to unfavorable product and business mix and the unfavorable impact of foreign exchange, partially offset by the favorable net impact of price and material costs as well as productivity in excess of cost inflation. Acquisitions contributed approximately 30 basis points to the decrease in operating margin.

Power Segment

(In millions)	2015	2014	
Net sales	\$1,002.1	\$961.2	
Operating income	\$195.6	\$179.5	
Restructuring and related costs	6.1	—	
Adjusted operating income	\$201.7	\$179.5	
Operating margin	19.5	% 18.7	%
Adjusted operating margin	20.1	% 18.7	%

Net sales in the Power segment were \$1.0 billion, up four percent compared to 2014, due to the contribution of net sales from acquisitions. Growth from organic volume was offset by the unfavorable impact of foreign currency translation. The net sales contribution of completed acquisitions added four percentage points. Organic volume contributed one percentage point and was offset by one percentage point of unfavorable foreign currency translation. The increase in organic volume was primarily due to higher sales of telecommunications products.

Operating income in the Power segment increased nine percent to \$195.6 million in 2015 compared to 2014. Operating margin in 2015 increased by 80 basis points to 19.5% as compared to 2014. Excluding Restructuring and Related Costs, the adjusted operating margin was 20.1% in 2015 as compared to 18.7% in 2014. The increase in the adjusted operating margin is primarily due to productivity in excess of costs increases, including favorable material costs. Operating margin improvement from pricing was offset by cost inflation from foreign currency. Acquisitions increased operating income, but reduced operating margin by approximately 20 basis points.

Financial Condition, Liquidity and Capital Resources

Cash Flow

(In millions)	December 31,		
	2016	2015	2014
Net cash provided by (used in):			
Operating activities	\$398.2	\$331.1	\$391.5
Investing activities	(230.0)	(249.2)	(242.6)
Financing activities	(46.8)	(371.1)	(215.6)
Effect of foreign currency exchange rate changes on cash and cash equivalents	(27.3)	(21.2)	(20.1)
NET CHANGE IN CASH AND CASH EQUIVALENTS	\$94.1	\$(310.4)	\$(86.8)

Edgar Filing: HUBBELL INC - Form 10-K

The following table reconciles our cash flows from operating activities to free cash flows for 2016, 2015 and 2014 (in millions):

(In millions)	December 31,		
	2016	2015	2014
Net cash provided by operating activities (GAAP measure)	\$398.2	\$331.1	\$391.5
Less: Capital expenditures	(67.2)	(77.1)	(60.3)
Free cash flow	\$331.0	\$254.0	\$331.2
Free cash flow as a percent of net income attributable to Hubbell	113.0	%92.0	%102.0

Free cash flow is a non-GAAP measure and is defined as cash flow from operations less capital expenditures. Management believes that free cash flow provides useful information regarding Hubbell's ability to generate cash without reliance on external financing. In addition, management uses free cash flow to evaluate the resources available for investments in the business, strategic acquisitions and further strengthening the balance sheet.

HUBBELL INCORPORATED - Form 10-K 25

2016 Compared to 2015

Cash provided by operating activities for 2016 increased compared to 2015 primarily due to higher net income after adjusting for the non-cash impacts of depreciation and amortization, stock-based compensation and deferred income taxes and by lower uses of cash for working capital and cash spent for restructuring and related activities. Cash used for working capital was \$10.1 million in 2016 compared to \$32.3 million in 2015 primarily due to lower inventories partially offset by higher accounts receivable in 2016.

Cash used for investing activities of \$230.0 million in 2016 decreased compared to cash used of \$249.2 million in 2015. This decrease is primarily due to \$9.9 million of lower capital expenditures and \$9.6 million of proceeds from the sale of a real estate asset in our Lighting business. Those decreases in the use of cash for investing activities are partially offset by higher cash used for acquisitions in 2016 as compared to 2015.

Cash used for financing activities of \$46.8 million in 2016 decreased compared to \$371.1 million of cash used in 2015. The decrease in cash used in 2016 as compared to 2015 is primarily the result of \$393.4 million of net proceeds received from the \$400 million public note offering the Company completed in March 2016, as well as \$200.7 million of Class A Cash Consideration paid in connection with the Reclassification in 2015. Those decreases in cash used were partially offset by a \$167.7 million increase in shares repurchased in 2016, as well as \$97.1 million change year over year in cash flows from short term borrowings and a \$8.1 million increase in dividends paid in 2016. For more information about the \$400 million public note offering refer to Note 11 — Debt, in the Notes to Consolidated Financial Statements.

The unfavorable impact of foreign currency exchange rates on cash increased to \$27.3 million in 2016 as compared to \$21.2 million in 2015. The unfavorable impact in 2016 and 2015 was primarily related to the U.S. dollar strengthening against the British pound, Australian dollar, and Mexican peso.

2015 Compared to 2014

Cash provided by operating activities for 2015 decreased compared to 2014 primarily due to lower net income after adjusting for the non-cash impacts of depreciation and amortization, stock-based compensation and deferred income taxes, offset partially by lower use of cash for working capital. Cash used for working capital was \$32.3 million in 2015 compared to \$44.7 million in 2014 primarily due to increased collection of accounts receivable and increased current liabilities, offset partially by higher inventories.

Cash used for investing activities of \$249.2 million in 2015 increased compared to cash used of \$242.6 million in 2014. This increase is primarily due to an approximately \$22 million increase in investments in our business, including a \$16.8 million increase in capital expenditures as well as a \$5.0 million investment in a privately-held electrical utility substation security provider as well as lower proceeds from the disposition of assets in 2015. Those increases in the use of cash for investing activities are partially offset by lower cash used for acquisitions in 2015 as compared to 2014.

Cash used for financing activities of \$371.1 million in 2015 increased compared to \$215.6 million of cash used in 2014. The increase in cash used is primarily the result of \$200.7 million of Class A Cash Consideration paid in connection with the Reclassification and a \$15.8 million increase in dividends paid, partially offset by cash provided by \$48.0 million of commercial paper outstanding at December 31, 2015 and lower cash used on the repurchase of common shares. There was no commercial paper outstanding at December 31, 2014.

The unfavorable impact of foreign currency exchange rates on cash increased to \$21.2 million in 2015 as compared to \$20.1 million in 2014. The unfavorable impact in 2015 and 2014 was primarily related to the U.S. dollar strengthening

against the British pound, Australian dollar, Canadian dollar, and Mexican peso.

Investments in the Business

Investments in our business include cash outlays for the acquisition of businesses as well as expenditures to support our restructuring and related activities and to maintain the operation of our equipment and facilities.

In 2016, the Company completed acquisitions for an aggregate purchase price of \$184.6 million, net of cash received. Acquisitions in 2016 included the following:

In January 2016, the Company acquired all of the issued and outstanding shares of capital stock of R.W Lyall & Company, Inc ("Lyall"), a leader in the design and application of components and assemblies for the natural gas distribution market for a cash purchase price of approximately \$129.1 million. Lyall has been added to the Electrical segment.

In February 2016, the Company acquired all of the issued and outstanding shares of Electric Motion Company, Inc. and all of the membership interests in Elmot Realty Associates, LLC, Elmot Realty Associates II, LLC and DelRi LLC, collectively referred to as "EMC", for approximately \$40.3 million, net of cash received. EMC is a leading manufacturer of grounding and connector products for the communication, power and transportation industries. EMC has been added to the Power segment.

In July 2016, the Company acquired all of the equity interest of Jiangsu Xin Yuan Electric Equipment Co., Ltd. ("Longbow") for approximately \$14.5 million, net of cash received. Longbow is a leading manufacturer of high voltage polymer insulators for the electric utility and railway industry. Longbow has been added to the Power segment.

For more information refer to Note 2 — Business Acquisitions in the Notes to Consolidated Financial Statements.

Beginning in the fourth quarter of 2014 and continuing through 2016 we have initiated certain restructuring and related actions, primarily to align our cost structure with the needs of our business and also in response to weakness in certain of our end markets. As a result of those restructuring and related actions

we have exited a total of 20 manufacturing and warehousing facilities and have exceeded our expected cost savings in 2016 associated with restructuring and related activities. We expect to initiate additional restructuring actions in 2017.

In connection with our restructuring and related actions we have incurred restructuring costs, which are primarily severance and employee benefits, asset impairments, as well as facility closure, contract termination and certain pension costs that are directly related to restructuring actions. These restructuring costs are predominantly settled in cash from our operating activities and are generally settled within one year, with the exception of asset impairments, which are non-cash. Restructuring costs also include a \$12.5 million charge in the fourth quarter of 2016 to recognize the estimated liability associated with the anticipated withdrawal from a multi-employer pension plan, which is anticipated to be settled in periodic payments over several years, subject to negotiations expected to occur in 2017.

The table below presents the restructuring costs incurred in 2016, additional expected restructuring costs and the expected completion date for restructuring actions initiated in 2016 and separately for those initiated in 2015 (in millions):

	Costs Incurred in 2016	Additional Expected Costs	Expected Completion Date
2016 Restructuring Actions	\$ 31.8	\$ 9.7	2017
2015 Restructuring Actions	3.2	2.5	2017
Total	\$ 35.0	\$ 12.2	

Costs incurred in 2016 relating to 2016 Restructuring Actions in the preceding table include the previously mentioned \$12.5 million charge representing the estimated withdrawal liability from a multi-employer pension plan. Any potential future liability in excess of the amount already recognized in 2016 is not included in the additional expected costs relating to 2016 Restructuring Actions referred to in the preceding table. Additional information about the estimated withdrawal liability is included in Note 10 — Retirement Benefits in the Notes to Consolidated Financial Statements.

In connection with our restructuring and related actions we also incur restructuring-related costs. Restructuring-related costs are costs associated with our business transformation initiatives, including the consolidation of back-office functions and streamlining our processes, and certain other costs and gains associated with restructuring actions. In 2016 restructuring-related costs include a fourth quarter gain on the sale of a property associated with restructuring activities. We refer to restructuring costs (which is a GAAP measure) and

restructuring-related costs on a combined basis as "restructuring and related costs", which is a non-GAAP measure. Refer to Management's Discussion and Analysis - Results of Operations, for further detail of the costs associated with our restructuring and related activities and reconciliations of our non-GAAP measures.

During 2016, we used cash of \$67.2 million for capital expenditures, a decrease of \$9.9 million from 2015 as we made higher investments in facilities and equipment during 2015.

Additional information with respect to future investments in the business can be found under "Outlook" within Management's Discussion and Analysis.

Stock Repurchase Program

At December 31, 2015, we had total remaining share repurchase authorization of \$391.4 million. In 2016, the Company repurchased shares for an aggregate purchase price of \$237.8 million bringing our remaining share repurchase authorization to \$153.6 million. Subject to numerous factors, including market conditions and alternative

uses of cash, we may conduct discretionary repurchases through open market or privately negotiated transactions, which may include repurchases under plans complying with Rules 10b5-1 and 10b-18 under the Securities Exchange Act of 1934, as amended.

Debt to Capital

At December 31, 2016 and 2015, the Company had \$990.5 million and \$595.9 million, respectively, of long-term unsecured, unsubordinated notes, net of unamortized discount and the unamortized balance of capitalized debt issuance costs.

At December 31, 2016 and 2015, the Company had \$3.2 million and \$48.2 million, respectively, of short-term debt outstanding.

There were no commercial paper borrowings outstanding at December 31, 2016. Short-term debt at December 31, 2015 includes \$48.0 million of commercial paper borrowings to partially fund the Class A Cash Consideration paid on December 23, 2015 in connection with the Reclassification.

Short-term debt at December 31, 2016 and 2015 also includes \$3.2 million and \$0.2 million, respectively of borrowings to support our international operations in China and Brazil.

Net debt, defined as total debt less cash and investments, is a non-GAAP measure that may not be comparable to definitions used by other companies. We consider net debt to be a useful measure of our financial leverage for evaluating the Company's ability to meet its funding needs.

The following table sets forth the reconciliation of net debt at December 31, 2016 and 2015:

(In millions)	December 31,		
	2016	2015	
Total Debt	\$993.7	\$644.1	
Total Hubbell Shareholders' Equity	1,592.8	1,740.6	
TOTAL CAPITAL	\$2,586.5	\$2,384.7	
Debt to Total Capital	38	% 27	%
Cash and Investments	\$505.2	\$405.2	
NET DEBT	\$488.5	\$238.9	
Net Debt to Total Capital	19	% 10	%

In March 2016, the Company completed a public debt offering of \$400 million of long-term unsecured, unsubordinated notes maturing in March 2026 and bearing interest at a fixed rate of 3.35% (the "2026 Notes"). Net proceeds from the issuance were \$393.4 million after deducting the discount on the notes and offering expenses paid by the Company.

In November 2010, the Company completed a public debt offering for \$300 million of long-term unsecured, unsubordinated notes maturing in November 2022 ("2022 Notes") and bearing interest at a fixed rate of 3.625%. Prior to the issuance of the 2022 Notes, the Company entered into a forward interest rate lock which resulted in a \$1.6 million loss. This amount was recorded in Accumulated other comprehensive loss, net of tax, and is being amortized over the life of the 2022 Notes.

In May 2008, the Company completed a public offering for \$300 million of long-term unsecured, unsubordinated notes maturing in May 2018 (the "2018 Notes"). The 2018 Notes bear interest at a fixed rate of 5.95%. Prior to the issuance of the 2018 Notes, the Company entered into a forward interest rate lock which resulted in a \$1.2 million gain. This amount was recorded in Accumulated other comprehensive loss, net of tax, and is being amortized over the life of the notes.

The 2018 Notes, 2022 Notes and 2026 Notes are all fixed rate indebtedness, are callable at any time with a make whole premium and are only subject to accelerated payment prior to maturity in the event of a default (including as a result of the Company's failure to meet certain non-financial covenants) under the indenture governing the notes, as modified by the supplemental indentures creating such notes, or upon a change in control event as defined in such indenture. The Company was in compliance with all non-financial covenants as of December 31, 2016.

Liquidity

We measure liquidity on the basis of our ability to meet short-term and long-term operational funding needs, fund additional investments, including acquisitions, and make dividend payments to shareholders. Significant factors affecting the management of liquidity are cash flows from operating activities, capital expenditures, cash dividend payments, stock repurchases, access to bank lines of credit and our ability to attract long-term capital with satisfactory terms.

In 2016, we invested in acquisitions and also returned capital to our shareholders through share repurchases and shareholder dividends. These activities were funded primarily with the

proceeds of our \$400 million public debt offering completed on March 1, 2016, short-term borrowings, and cash flows from operations.

Cash used for the acquisition of businesses in 2016, net of cash acquired was \$173.4 million. Further discussion of our acquisitions can be found in Note 2 — Business Acquisitions, of the Notes to Condensed Consolidated Financial

Statements.

In 2016, cash settlements for share repurchases were \$246.8 million. Shareholder dividends paid in 2016 were \$144.0 million.

We also require cash outlays to fund our operations, our capital expenditures, and an increase in working capital that would be required to accommodate a higher level of business activity for the foreseeable future, as well as our rate of cash dividends, potential future acquisitions, and the remaining Longbow acquisition purchase price. We also have contractual obligations for long-term debt, operating leases, purchase obligations, and certain other long-term liabilities that are summarized in the table of Contractual Obligations as of December 31, 2016.

Our sources of funds and available resources to meet these funding needs are as follows:

Cash flows from operations and existing cash resources: We are targeting free cash flow (defined as cash flows from operations less capital expenditures) equal to net income attributable to Hubbell in 2017. We also have \$437.6 million of cash and cash equivalents at December 31, 2016, of which approximately 25% was held inside the United States and the remainder held internationally. The Company's intent is to indefinitely reinvest all of its undistributed international earnings and cash internationally.

We have the ability to issue commercial paper for general corporate purposes and our \$750 million revolving credit facility, which expires in December 2020, serves as a backup to our commercial paper program. We maintain investment grade credit ratings from the major U.S. rating agencies.

On December 16, 2015 the Company entered into a five-year revolving credit agreement (the "Credit Agreement") with a syndicate of lenders that provides a \$750 million committed revolving credit facility. Commitments under the Credit Agreement may be increased to an aggregate amount not to exceed

\$1.250 billion. The interest rate applicable to borrowing under the Credit Agreement is generally either the adjusted LIBOR plus an applicable margin (determined by reference to a ratings based grid) or the alternate base rate. The single financial covenant in the Credit Agreement, which the Company is in compliance with at December 31, 2016, requires that total debt not exceed 55% of total capitalization as of the last day of each fiscal quarter of the Company. Annual commitment fees to support availability under the credit facility are not material. Although not the principal source of liquidity, we believe our credit facility is capable of providing significant financing flexibility at reasonable rates of interest. However, in the event of a significant deterioration in the results of our operations or cash flows, leading to deterioration in financial condition, our borrowing costs could increase and/or our ability to borrow could be restricted. We have not entered into any guarantees that could give rise to material unexpected cash requirements. As of December 31, 2016 the credit facility had not been drawn against.

In addition to our commercial paper program and existing revolving credit facility we also have the ability to obtain additional financing through the issuance of long-term debt. Considering our current credit rating, historical earnings performance, and financial position we believe that we would be able to obtain additional long-term debt financing on attractive terms.

The Company also maintains other lines of credit that are primarily used to support the issuance of letters of credit. Interest rates and other terms of borrowing under these lines of credit vary from country to country, depending on local market conditions. At December 31, 2016 and 2015 these lines totaled \$51.4 million and \$54.6 million, respectively, of which \$21.0 million and \$22.5 million was utilized to support letters of credit and the remaining amount was unused. The annual commitment fees associated with these lines of credit are not material.

Pension Funding Status

We have a number of funded and unfunded non-contributory U.S. and foreign defined benefit pension plans. Benefits under these plans are generally provided based on either years of service and final average pay or a specified dollar amount per year of service. The funded status of our qualified, defined benefit pension plans is dependent upon many factors including future returns on invested pension assets, the level of market interest rates, employee earnings and employee demographics.

In December 2016, the Company approved amendments to the domestic qualified defined benefit pension plan and non-qualified defined benefit plan, which will freeze service accruals for active participants effective February 28, 2017 and further will freeze compensation accruals effective December 31, 2020. The Company also froze all accruals in a second non-qualified defined benefit plan effective December 31, 2016. As a result of the amendments, the Company has recognized a \$34.1 million curtailment gain in Accumulated other comprehensive income as of December 31, 2016 and recognized \$0.2 million of pension expense in 2016 associated with previously unrecognized prior service costs. In addition, effective January 1, 2017, the amortization of unrecognized gains and losses of these plans will be recognized over the remaining life expectancy of participants, as all participants are considered inactive as a result of the amendments.

In 2016, we also completed a transaction with a third-party insurer to settle approximately \$40 million of projected benefit obligations of our domestic qualified defined benefit pension plans.

Changes in the value of the defined benefit plan assets and liabilities will affect the amount of pension expense ultimately recognized. Although differences between actuarial assumptions and actual results are no longer deferred for balance sheet purposes, deferral is still permitted for pension expense purposes. Unrecognized gains and losses in excess of an annual calculated minimum amount (the greater of 10% of the projected benefit obligation or 10% of the market value of assets) have been amortized and recognized in net periodic pension cost. For our primary defined

benefit plans that amortization in 2016 is over the average remaining service period of our active employees, which approximates 9-15 years. Effective January 1, 2017, the amortization of unrecognized gains and losses of our primary domestic defined benefit plan will be recognized over the remaining life expectancy of participants, which is approximately 22 years. During 2016 and 2015, we recorded \$13.9 million and \$12.1 million, respectively, of pension expense related to the amortization of these unrecognized losses. We expect to record \$11.1 million of expense related to unrecognized losses and prior service cost in 2017.

In 2016, 2015 and 2014, we contributed \$18.0 million, \$22.6 million, and \$23.5 million, respectively, to our qualified foreign and domestic defined benefit pension plans. These contributions have improved the funded status of all of our plans. Although not required by ERISA and the Internal Revenue Code, the Company may elect to make a voluntary contribution to its qualified domestic defined benefit pension plan in 2017. The Company expects to contribute approximately \$1.7 million to its foreign plans in 2017. The anticipated 2017 level of pension funding is not expected to have a significant impact on our overall liquidity.

Assumptions

The following assumptions were used to determine projected pension and other benefit obligations at the measurement date and the net periodic benefit costs for the year:

	Pension Benefits		Other Benefits	
	2016	2015	2016	2015
Weighted-average assumptions used to determine benefit obligations at December 31,				
Discount rate	4.12 %	4.71 %	4.10 %	4.60 %
Rate of compensation increase	3.55 %	3.59 %	3.93 %	3.92 %
Weighted-average assumptions used to determine net periodic benefit cost for years ended December 31,				
Discount rate	4.71 %	4.23 %	4.60 %	4.10 %
Expected return on plan assets	6.04 %	6.36 %	N/A	N/A
Rate of compensation increase	3.59 %	3.15 %	3.92 %	3.60 %

At the end of each year, we estimate the expected long-term rate of return on pension plan assets based on the strategic asset allocation for our plans. In making this determination, we utilize expected rates of return for each asset class based upon current market conditions and expected risk premiums for each asset class. A one percentage point change in the expected long-term rate of return on pension fund assets would have an impact of approximately \$7.1 million on 2017 pretax pension expense. The expected long-term rate of return is applied to the fair market value of pension fund assets to produce the expected return on fund assets that is included in pension expense. The difference between this expected return and the actual return on plan assets was recognized at December 31, 2016 for balance sheet purposes, but continues to be deferred for expense purposes. The net deferral of past asset gains (losses) ultimately affects future pension expense through the amortization of gains (losses) with an offsetting adjustment to Hubbell shareholders' equity through Accumulated other comprehensive loss.

At the end of each year, we determine the discount rate to be used to calculate the present value of our pension plan liabilities. For our U.S. and Canadian pension plans, this discount rate is determined by matching the expected cash flows associated with our benefit obligations to a yield curve based on high quality, fixed income debt instruments with maturities that closely match the expected funding period of our pension liabilities. This yield curve is derived using a bond matching approach which incorporates a selection of bonds that align with our projected benefit obligations. As of December 31, 2016, we used a discount rate of 4.30% for our U.S. pension plans compared to a discount rate of 4.80% used in 2015. For our Canadian pension plan, we used a discount rate of 3.85% in 2016, compared to the 3.90% discount rate used in 2015.

For our UK pension plan the discount rate was derived using a yield curve fitted to the yields on AA bonds in the Barclays Capital Sterling Aggregate Corporate Index and uses sample plan cash flow data as a proxy to plan specific liability cash flows. The derived discount rate is the single discount rate equivalent to discounting these liability cash flows at the term-dependent spot rates of AA corporate bonds. This methodology resulted in a December 31, 2016 discount rate for the UK pension plan of 2.70% as compared to a discount rate of 4.00% used in 2015.

An increase of one percentage point in the discount rate would lower our 2017 pretax pension expense by approximately \$2.1 million. A discount rate decline of one percentage point would increase our 2017 pretax pension expense by approximately \$2.1 million.

In 2014 we changed the mortality table used to calculate the present value of our pension plan liabilities from the RP-2000 mortality table to the RP-2000 mortality table with generational projection using Scale BB-2D. That change resulted in an approximately \$40 million increase in the projected benefit obligation of our U.S. defined benefit

pension plans upon remeasurement at December 31, 2014. The same mortality assumption was used to calculate the present value of pension plan liabilities as of December 31, 2015 and 2016. The RP-2000 mortality table with generational projection using Scale BB-2D was chosen as the best estimate based on the observed and anticipated experience of the plans after considering alternative tables, including RP-2014 and generational projection using Scale MP-2016.

Other Post Employment Benefits (“OPEB”)

The Company also has a number of health care and life insurance benefit plans covering eligible employees who reached retirement age while working for the Company. These benefits have been discontinued for substantially all future retirees. These plans are not funded and, therefore, no assumed rate of return on assets is required. We use a similar methodology to derive the yield curve for our post employment benefit plan obligations that we use for our pension plans. As of December 31, 2016, the Company used a discount rate of 4.10% to determine the projected benefit obligation compared to a discount rate of 4.60% used in 2015. In accordance with the accounting guidance for retirement benefits, we recorded to Accumulated other comprehensive loss, within Hubbell shareholders’ equity, a charge, net of tax, of approximately \$0.7 million in 2016 and a charge, net of tax, of approximately \$1.1 million in 2015, related to the annual remeasurement of the OPEB plans and the amortization of prior service credits and net actuarial gains.

Off-Balance Sheet Arrangements

Off-balance sheet arrangements are defined as any transaction, agreement or other contractual arrangement to which an entity that is not included in our consolidated results is a party, under which we, whether or not a party to the arrangement, have, or in the future may have: (1) an obligation under a direct or indirect guarantee or similar arrangement, (2) a retained or contingent

interest in assets or (3) an obligation or liability, including a contingent obligation or liability, to the extent that it is not fully reflected in the financial statements.

We do not have any off-balance sheet arrangements as defined above which have or are likely to have a material effect on our financial condition, results of operations or cash flows.

Contractual Obligations

A summary of our contractual obligations and commitments at December 31, 2016 is as follows (in millions):

	Payments due by period				
	Total	2017	2018-2019	2020-2021	2022 and thereafter
Debt obligations ^(a)	\$1,003.2	\$3.2	\$ 300.0	\$ —	\$ 700.0
Expected interest payments	228.1	42.9	59.0	50.0	76.2
Operating lease obligations	87.8	18.7	29.7	16.3	23.1
Retirement and other benefits ^{(b) (c)}	227.4	8.8	18.2	16.5	183.9
Purchase obligations	211.9	202.4	9.5	—	—
Obligations under customer incentive programs	41.2	41.2	—	—	—
Income tax payments	7.0	7.0	—	—	—
TOTAL	\$1,806.6	\$324.2	\$ 416.4	\$ 82.8	\$ 983.2

(a) Amounts exclude unamortized discount and capitalized debt issuance costs.

Amounts above reflect projected funding related to the Company's non-qualified defined benefit plans. Projected funding obligations of the Company's qualified defined benefit pension plans are excluded from the table as there are significant factors, such as the future market value of plan assets and projected investment return rates, which could cause actual funding requirements to differ materially from projected funding.

Amounts above reflect a \$12.5 million obligation based on an assessment it is probable the Company will withdraw from a multi-employer plan. See Note 10 — Retirement Benefits in the Notes to Consolidated Financial Statements for further information.

Our purchase obligations include amounts committed under legally enforceable contracts or purchase orders for goods and services with defined terms as to price, quantity, delivery and termination liability. These obligations primarily consist of inventory purchases made in the normal course of business to meet operational requirements and commitments for equipment purchases. As of December 31, 2016, we have \$20.2 million of uncertain tax positions reflected in our Consolidated Balance Sheet. We are unable to make a reasonable estimate regarding the timing of settlement of these uncertain tax positions and, as a result, they have been excluded from the table. See Note 12 — Income Taxes in the Notes to Consolidated Financial Statements.

Critical Accounting Estimates

Note 1 — Significant Accounting Policies of the Notes to Consolidated Financial Statements describes the significant accounting policies used in the preparation of our financial statements.

Use of Estimates

We are required to make assumptions and estimates and apply judgments in the preparation of our financial statements that affect the reported amounts of assets and liabilities, revenues and expenses and related disclosures. We base our assumptions, estimates and judgments on historical experience, current trends and other factors deemed relevant by management. We continually review these estimates and their underlying assumptions to ensure they are appropriate for

the circumstances. Changes in estimates and assumptions used by us could have a material impact on our financial results. We believe that the following estimates are among the most critical in fully understanding and evaluating our reported financial results. These items utilize assumptions and estimates about the effect of future events that are inherently uncertain and are based on our judgment.

Revenue Recognition

We recognize revenue when persuasive evidence of an arrangement exists, delivery has occurred, the price is fixed and determinable and collection is probable. Product is considered delivered to the customer once it has been shipped and title and risk of loss have been transferred. The majority of our revenue is recognized at the time of shipment. Certain of our businesses account for sales discounts and allowances based on sales volumes, specific programs and customer deductions as is customary in the electrical products industry. These items primarily relate to sales volume incentives, special pricing allowances, and returned goods. This requires us to estimate at the time of sale the amounts that should not be recorded as revenue as these amounts are not expected to be collected from customers. We principally rely on historical experience, specific customer agreements, and anticipated future trends to estimate these amounts at the time of shipment.

Inventory Valuation

Inventories in the U.S. are primarily valued at the lower of LIFO cost or market, while non-U.S. inventories are valued at the lower of FIFO cost or market. We routinely evaluate the carrying value of our inventories to ensure they are carried at the lower of LIFO or FIFO cost or market value. Such evaluation is based on our judgment and use of estimates, including sales forecasts, gross margins for particular product groupings, planned dispositions of product lines, technological events and overall industry trends. In addition, the evaluation is based on changes in inventory management practices which may influence the timing of exiting products and method of disposing of excess inventory.

Excess inventory is generally identified by comparing future expected inventory usage to actual on-hand quantities. Inventory values are reduced for on-hand inventory in excess of pre-defined usage forecasts. Forecast usage is primarily determined by projecting historical (actual) sales and inventory usage levels forward to future periods. Changes in these estimates may necessitate future adjustments to inventory values.

Customer Credit and Collections

We maintain allowances for doubtful accounts receivable in order to reflect the potential uncollectability of receivables related to purchases of products on open credit. If the financial condition of our customers were to deteriorate, resulting in their inability to make required payments, we may be required to record additional allowances for doubtful accounts.

Accrued Insurance

We retain a significant portion of the risks associated with workers' compensation, medical, automobile and general liability insurance. We estimate self-insurance liabilities using a number of factors, including historical claims experience, demographic factors, severity factors and other actuarial assumptions. The accrued liabilities associated with these programs are based on our estimates of ultimate costs to settle known claims as well as claims incurred but not reported as of the balance sheet date. These assumptions are periodically reviewed with a third-party actuary to determine the adequacy of these self-insurance reserves. Changes in these assumptions may necessitate future adjustments to these self-insurance liabilities.

Employee Benefits Costs and Funding

We sponsor domestic and foreign defined benefit pension, defined contribution and other postretirement plans. Major assumptions used in the accounting for these employee benefit plans include the discount rate, expected return on the pension fund assets, rate of increase in employee compensation levels and health care cost increase projections. These assumptions are determined based on Company data and appropriate market indicators, and are evaluated each year as of the plans' measurement date. Further discussion of the assumptions used in 2016 and 2015 are included above under "Pension Funding Status" and in Note 10 — Retirement Benefits of the Notes to Consolidated Financial Statements.

Taxes

We account for income taxes in accordance with the applicable accounting guidance which requires that deferred tax assets and liabilities be recognized using enacted tax rates for the effect of temporary differences between the book and tax basis of recorded assets and liabilities. Additionally, deferred tax assets are required to be reduced by a valuation allowance if it is more-likely-than-not that some portion or all of the deferred tax asset will not be realized. The factors used to assess the likelihood of realization of deferred tax assets are the forecast of future taxable income,

available tax planning strategies that could be implemented to realize the net deferred tax assets, and future reversals of deferred tax liabilities. Failure to achieve forecasted taxable income can affect the ultimate realization of net deferred tax assets.

We operate within multiple taxing jurisdictions and are subject to audit in these jurisdictions. The Internal Revenue Service (“IRS”) and other tax authorities routinely review our tax returns. These audits can involve complex issues, which may require an extended period of time to resolve. The Company records uncertain tax positions only when it has determined that it is more-likely-than-not that a tax position will be sustained upon examination by taxing authorities based on the technical merits of the position. The Company uses the criteria established in the accounting guidance to determine whether an item meets the definition of more-likely-than-not. The Company’s policy is to recognize these uncertain tax positions when the more-likely-than-not threshold is met, when the statute of limitations has expired or upon settlement. In management’s opinion, adequate provision has been made for potential adjustments arising from any examinations. See also Note 12 — Income Taxes in the Notes to Consolidated Financial Statements.

Contingent Liabilities

We are subject to proceedings, lawsuits, and other claims or uncertainties related to environmental, legal, product and other matters. We routinely assess the likelihood of an adverse judgment or outcome to these matters, as well as the range of potential losses. We record a liability when it is both probable that a liability has been incurred and the amount can be reasonably estimated. A determination of the reserves required, if any, is made after careful analysis, including consultations with outside advisors, where applicable. Where no amount within a range of estimates is more likely, the minimum is accrued. The required reserves may change in the future due to new developments.

Valuation of Long-Lived Assets

Our long-lived assets include land, buildings, equipment, molds and dies, software, goodwill and other intangible assets. Long-lived assets, other than land, goodwill and indefinite-lived intangibles, are depreciated over their estimated useful lives. The assets and liabilities of acquired businesses are recorded under the acquisition method of accounting at their estimated fair values at the dates of acquisition. Goodwill represents purchase price in excess of fair values assigned to the underlying identifiable net assets of acquired businesses. Intangible assets primarily consist of patents, tradenames and customer related intangibles.

We review depreciable long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount may not be fully recoverable. If such a change in circumstances occurs, the related estimated future undiscounted cash flows expected to result from the use of the asset group and its eventual disposition is compared to the carrying amount. If the sum of the expected cash flows of the asset group is less than the carrying amount, an impairment charge is recorded. The impairment charge is measured as the amount by which the carrying amount exceeds the fair value of the asset. The fair value of impaired assets is determined using expected cash flow estimates, quoted market prices when available and appraisals as appropriate. We did not record any material impairment charges related to long-lived assets in 2016, 2015, or 2014.

Goodwill and indefinite-lived intangible assets are reviewed annually for impairment unless circumstances dictate the need for more frequent assessment. We perform our goodwill impairment testing as of April 1st of each year unless circumstances dictate the need for more frequent assessments. The accounting guidance provides entities an option of performing a qualitative assessment before performing a quantitative analysis. If the entity determines, on the basis of certain qualitative factors, that it is more-likely-than-not that the goodwill is not impaired, the entity would not need to proceed to the two step goodwill impairment testing process as prescribed in the guidance. The Company performed a qualitative assessment of its Hubbell Power Systems ("HPS") reporting unit. The Company elected to bypass the qualitative assessment and proceeded directly to the quantitative analysis for its remaining reporting units. The goodwill impairment test requires judgment, including the identification of reporting units, assigning assets and liabilities to reporting units, and determining the fair value of each reporting unit. Significant judgments required to estimate the fair value of reporting units include estimating future discounted cash flows, determining appropriate discount rates and other assumptions. We use internal discounted cash flow estimates to determine fair value. These cash flow estimates are derived from historical experience and future long-term business plans and the application of an appropriate discount rate. Changes in these estimates and assumptions could materially affect the determination of fair value and/or goodwill impairment for each reporting unit. As of April 1, 2016, our goodwill testing resulted in fair values for each reporting unit that substantially exceeded the reporting unit's carrying value. We have not recorded any goodwill impairments since the initial adoption of the accounting guidance in 2002.

The identification and measurement of impairment of indefinite-lived intangible assets involves an assessment of qualitative factors to determine whether events or circumstances indicate that it is more likely than not that an indefinite-lived intangible asset is impaired. If it is more likely than not that the asset is impaired, the fair value of the indefinite lived intangibles will be determined using discounted cash flow estimates. If the carrying value of these assets exceeds the estimated fair value, the carrying value will be reduced to the estimated fair value. We did not record any impairments related to indefinite-lived intangible assets in 2016, 2015, or 2014.

Stock-Based Compensation

We determine the grant date fair value of certain stock-based compensation awards using either a lattice model or the Black-Scholes option pricing model. Both of these models require management to make certain assumptions with respect to selected model inputs. These inputs include assumptions for the expected term, stock volatility, dividend yield and risk-free interest rate. Changes in these inputs impact fair value and could impact our stock-based compensation expense in the future. In addition, we are required to estimate the expected forfeiture rate and recognize expense only for those awards expected to meet the service and performance vesting conditions. If our actual forfeiture rate is different from our estimate, adjustments to stock-based compensation expense may be required. See also Note 16 — Stock-Based Compensation in the Notes to Consolidated Financial Statements.

Forward-Looking Statements

Some of the information included in this Management's Discussion and Analysis of Financial Condition and Results of Operations, and elsewhere in this Form 10-K, contain "forward-looking statements" as defined by the Private Securities

Litigation Reform Act of 1995. These include statements about our expected capital resources, liquidity, financial performance, pension funding, and results of operations and are based on our reasonable current expectations. In addition, all statements regarding restructuring plans and expected associated costs and benefits, intent to repurchase shares of Common Stock, and the expected amount of such repurchases, and improvement in operating results, anticipated market conditions and productivity initiatives are forward looking. Forward-looking statements may be identified by the use of words, such as “believe”, “expect”, “anticipate”, “intend”, “depend”, “should”, “plan”, “estimated”, “projected”, “could”, “may”, “subject to”, “continues”, “growing”, “prospective”, “forecast”, “projected”, “purport”, “might”, “if”, “contingent”, “pending,” “target”, “goals”, “scheduled”, “will likely be”, and similar words and phrases. Discussions of strategies, plans or intentions often contain forward-looking statements. Important factors, among others, that could cause our actual results and future actions to differ materially from those described in forward-looking statements include, but are not limited to:

- Changes in demand for our products, market conditions, product quality, or product availability adversely affecting sales levels.
- Changes in markets or competition adversely affecting realization of price increases.
- Failure to achieve projected levels of efficiencies, cost savings and cost reduction measures, including those expected as a result of our lean initiative and strategic sourcing plans.
- The expected benefits and the timing of other actions in connection with our Enterprise Resource Planning ("ERP") system.
- Availability and costs of raw materials, purchased components, energy and freight.
- Changes in expected or future levels of operating cash flow, indebtedness and capital spending.
- General economic and business conditions in particular industries, markets or geographic regions, as well as inflationary trends.

Regulatory issues, changes in tax laws or changes in geographic profit mix affecting tax rates and availability of tax incentives.

A major disruption in one or more of our manufacturing or distribution facilities or headquarters, including the impact of plant consolidations and relocations.

Changes in our relationships with, or the financial condition or performance of, key distributors and other customers, agents or business partners which could adversely affect our results of operations.

Impact of productivity improvements on lead times, quality and delivery of product.

Anticipated future contributions and assumptions including changes in interest rates and plan assets with respect to pensions.

Adjustments to product warranty accruals in response to claims incurred, historical experiences and known costs.

Unexpected costs or charges, certain of which might be outside of our control.

Changes in strategy, economic conditions or other conditions outside of our control affecting anticipated future global product sourcing levels.

Ability to carry out future acquisitions and strategic investments in our core businesses as well as the acquisition related costs.

The ability to effectively implement ERP systems without disrupting operational and financial processes.

Unanticipated difficulties integrating acquisitions as well as the realization of expected synergies and benefits anticipated when we first enter into a transaction.

The ability of governments to meet their financial obligations.

Political unrest in foreign countries.

Natural disasters.

Failure of information technology systems or security breaches resulting in unauthorized disclosure of confidential information.

Future repurchases of common stock under our common stock repurchase program.

Changes in accounting principles, interpretations, or estimates.

The outcome of environmental, legal and tax contingencies or costs compared to amounts provided for such contingencies.

Adverse changes in foreign currency exchange rates and the potential use of hedging instruments to hedge the exposure to fluctuating rates of foreign currency exchange on inventory purchases.

Other factors described in our Securities and Exchange Commission filings, including the “Business”, “Risk Factors” and

“Quantitative and Qualitative Disclosures about Market Risk” sections in this Company’s Annual Report on Form 10-K for the year ended December 31, 2016.

Any such forward-looking statements are not guarantees of future performances and actual results, developments and business decisions may differ from those contemplated by such forward-looking statements. The Company disclaims any duty to update any forward-looking statement, all of which are expressly qualified by the foregoing, other than as required by law.

ITEM 7A Quantitative and Qualitative Disclosures about Market Risk

In the operation of our business, we have various exposures to areas of risk related to factors within and outside the control of management. Significant areas of risk and our strategies to manage the exposure are discussed below.

We manufacture and/or assemble our products in the United States, Canada, Switzerland, Puerto Rico, Mexico, China, Italy, UK, Brazil and Australia and sell products in those markets as well as through offices in Singapore, China, India, Mexico, South Korea and countries in the Middle East. Hubbell also participates in joint ventures in Taiwan and

Hong Kong. Shipments from non-U.S. subsidiaries as a percentage of the Company's total net sales were 10% in 2016, 11% in 2015 and 14% in 2014, with the Canadian and UK operations representing approximately 33% and 21%, respectively, of 2016 total international net sales. Of the remaining 2016 international sales Switzerland, Brazil, and Mexico represent 12%, 10%, and 9%, respectively. As such, our operating results could be affected by changes in foreign currency exchange rates or weak economic conditions in the foreign markets in which we sell our products. To manage this exposure, we closely monitor the working capital requirements of our international units and may enter into forward foreign exchange contracts. Further discussion of forward exchange contracts can be found in Note 13 — Financial Instruments and

Fair Value Measurement in the Notes to Consolidated Financial Statements.

Product purchases representing approximately 11% of our net sales are sourced from unaffiliated suppliers located outside the United States, primarily in China and other Asian countries, Europe and Brazil. Foreign sourcing of products may result in unexpected fluctuations in product cost or increased risk of business interruption due to lack of product or component availability due to any one of the following:

- Political or economic uncertainty in the source country
- Fluctuations in the rate of exchange between the U.S. dollar and the currencies of the source countries
- Changes in U.S. laws and policies governing foreign trade
- Increased logistical complexity including supply chain interruption or delay, port of departure or entry disruption and overall time to market
- Loss of proprietary information
- Product quality issues outside the control of the Company

We have developed plans that address many of these risks. Such actions include careful selection of products to be outsourced and the suppliers selected; ensuring multiple sources of supply; limiting concentrations of activity by port, broker, freight forwarder, etc.; processes related to quality control; and maintaining control over operations, technologies and manufacturing deemed to provide competitive advantage. Many of our businesses have a dependency on certain basic raw materials needed to produce their products including steel, aluminum, brass, copper, bronze, plastics, phenols, zinc, nickel, elastomers and petrochemicals as well as purchased electrical and electronic components. Our financial results could be affected by the availability and changes in prices of these materials and components.

Certain of these materials are sourced from a limited number of suppliers. These materials are also key source materials for many other companies in our industry and within the universe of industrial manufacturers in general. As such, in periods of rising demand for these materials, we may experience both increased costs and/or limited supply. These conditions can potentially result in our inability to acquire these key materials on a timely basis to produce our products and satisfy our incoming sales orders. Similarly, the cost of these materials can rise suddenly and result in materially higher costs of producing our products. We believe we have adequate primary and secondary sources of supply for each of our key materials and that, in periods of rising prices, we expect to recover a majority of the increased cost in the form of higher selling prices. However, recoveries typically lag the effect of cost increases due to the nature of our markets.

Our financial results are subject to interest rate fluctuations to the extent there is a difference between the amount of our interest-earning assets and the amount of interest-bearing liabilities. The principal objectives of our investment management activities are to preserve capital while earning net investment income that is commensurate with acceptable levels of interest rate, default and liquidity risk taking into account our funding needs. As part of our investment management strategy, we may use derivative financial products such as interest rate hedges and interest rate swaps.

From time to time or when required, we issue commercial paper, which exposes us to changes in interest rates. Our cash position includes amounts denominated in foreign currencies. We manage our worldwide cash requirements by considering available funds held by our subsidiaries and the cost effectiveness with which these funds can be accessed.

We continually evaluate risk retention and insurance levels for product liability, property damage and other potential exposures to risk. We devote significant effort to maintaining and improving safety and internal control programs, which are intended to reduce our exposure to certain risks. We determine the level of insurance coverage and the likelihood of a loss and believe that the current levels of risk retention are consistent with those of comparable companies in the industries in which we operate. There can be no assurance that we will not incur losses beyond the limits of our insurance. However, our liquidity, financial position and profitability are not expected to be materially affected by the levels of risk retention that we accept.

The following table presents cost and weighted average interest rate information related to fixed rate interest risk sensitive instruments by maturity at December 31, 2016 (dollars in millions):

	2017	2018	2019	2020	2021	Thereafter	Total	Fair Value 12/31/16
ASSETS								
Available-for-sale investments	\$11.2	\$8.2	\$6.3	\$12.5	\$4.5	\$11.0	\$53.7	\$53.6

LIABILITIES

Long-term debt	\$—	\$299.3	\$—	\$—	\$—	\$ 691.2	\$990.5	\$1,017.8
Avg. interest rate	—	5.95	%—	—	—	3.468	%4.22%	

We use derivative financial instruments only if they are matched with a specific asset, liability, or proposed future transaction. We do not speculate or use leverage when trading a financial derivative product.

In September 2015, we purchased redeemable preferred stock of a privately held company for \$5.0 million which is classified as an available-for-sale security, but is not interest rate sensitive and so has been excluded from the above analysis. See also Note 1 — Significant Accounting Policies, Note 6 — Investments and Note 11 — Debt in the Notes to Consolidated Financial Statements.

Reports of Management

Report on Management's Responsibility for Financial Statements

Our management is responsible for the preparation, integrity and fair presentation of its published financial statements. The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and include amounts based on informed judgments made by management.

We believe it is critical to provide investors and other users of our financial statements with information that is relevant, objective, understandable and timely, so that they can make informed decisions. As a result, we have established and maintain systems and practices and internal control processes designed to provide reasonable, but not absolute, assurance that transactions are properly executed and recorded and that our policies and procedures are carried out appropriately. Management strives to recruit, train and retain high quality people to ensure that controls are designed, implemented and maintained in a high-quality, reliable manner.

Our independent registered public accounting firm audited our financial statements and the effectiveness of our internal control over financial reporting in accordance with standards established by the Public Company Accounting Oversight Board (United States). Their report appears on the next page within this Annual Report on Form 10-K.

Our Board of Directors normally meets nine times per year to provide oversight, to review corporate strategies and operations, and to assess management's conduct of the business. The Audit Committee of our Board of Directors is comprised of at least three individuals all of whom must be "independent" under current New York Stock Exchange listing standards and regulations adopted by the SEC under the federal securities laws. The Audit Committee meets regularly with our internal auditors and independent registered public accounting firm, as well as management to review, among other matters, accounting, auditing, internal controls and financial reporting issues and practices. Both the internal auditors and independent registered public accounting firm have full, unlimited access to the Audit Committee.

Management's Annual Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate systems of internal control over financial reporting as defined by Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. Our internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external reporting purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Management has assessed the effectiveness of our internal control over financial reporting as of December 31, 2016. In

making this assessment, management used the criteria set forth in Internal Control-Integrated Framework (2013 framework) issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based on

this assessment, management concluded that our internal control over financial reporting was effective at a reasonable assurance level as of December 31, 2016.

The effectiveness of our internal control over financial reporting as of December 31, 2016 has been audited by PricewaterhouseCoopers LLP, our independent registered public accounting firm as stated in their report which is included on the next page within this Annual Report on Form 10-K.

/s/ WILLIAM R. SPERRY

William R. Sperry

Senior Vice President and Chief Financial Officer

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Hubbell Incorporated:

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of Hubbell Incorporated and its subsidiaries (the “Company”) at December 31, 2016 and 2015, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2016 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2016 based on criteria established in Internal Control - Integrated Framework (2013 framework) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Annual Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

⁽¹⁾ For accounting purposes, the Company treats repurchased shares as constructively retired when acquired and accordingly charges the purchase price against Common Stock par value, Additional paid-in capital, to the extent

available, and Retained earnings. The change in Retained earnings of \$155.5 million in 2016 reflects this accounting treatment.

Notes to Consolidated Financial Statements

NOTE 1 Significant Accounting Policies

Basis of Presentation

The accompanying consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”).

Principles of Consolidation

The Consolidated Financial Statements include all wholly owned subsidiaries. All significant intercompany balances and transactions have been eliminated. The Company participates in two joint ventures, one of which is accounted for using the equity method, the other has been consolidated in accordance with the consolidation accounting guidance. An analysis is performed to determine which reporting entity, if any, has a controlling financial interest in a variable interest entity (“VIE”) with a primarily qualitative analysis. The qualitative analysis is based on identifying the party that has both the power to direct the activities that most significantly impact the VIE’s economic performance (the “power criterion”) and the obligation to absorb losses from or the right to receive benefits of the VIE that could potentially be significant to the VIE (the “losses/benefit criterion”). The party that meets both these criteria is deemed to have a controlling financial interest. The party with the controlling financial interest is considered to be the primary beneficiary and as a result is required to consolidate the VIE. The Company has a 50% interest in a joint venture in Hong Kong, established as Hubbell Asia Limited (“HAL”). The principal objective of HAL is to manage the operations of its wholly-owned manufacturing company in China. Under the accounting guidance, the Company is the primary beneficiary of HAL and as a result consolidates HAL. This determination is based on the fact that HAL’s sole business purpose is to manufacture product exclusively for the Company (the power criterion) and the Company is financially responsible for ensuring HAL maintains a fixed operating margin (the losses/benefit criterion). The consolidation of HAL is not material to the Company’s consolidated financial statements.

Use of Estimates

The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts in the Consolidated Financial Statements and accompanying Notes to Consolidated Financial Statements. Actual results could differ from the estimates that are used.

Revenue Recognition

The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, the price is fixed and determinable and collection is probable. Product is considered delivered to the customer once it has been shipped

and title and risk of loss have been transferred. The majority of the Company’s revenue is recognized at the time of shipment. The Company recognizes less than one percent of total annual consolidated net revenue from post shipment obligations and service contracts, primarily within the Electrical segment. Revenue is recognized under these contracts when the service is completed and all conditions of sale have been met. In addition, within the Electrical segment, certain businesses sell large and complex equipment which requires construction and assembly and occasionally has long lead times. It is customary in these businesses to require a portion of the selling price to be paid in advance of construction. These payments are treated as deferred revenue and are classified in Other accrued liabilities in the Consolidated Balance Sheet. Once the equipment is shipped to the customer and meets the revenue recognition criteria, the deferred revenue is recognized in the Consolidated Statement of Income.

Further, certain of our businesses provide for sales discounts and allowances based on sales volumes, specific programs and customer deductions, as is customary in the electrical products industry. These items primarily relate to sales volume incentives, special pricing allowances, and returned goods. Sales volume incentives represent rebates with specific sales volume targets for specific customers. Certain distributors qualify for price rebates by subsequently reselling the Company's products into select channels of end users. Following a distributor's sale of an eligible product, the distributor submits a claim for a price rebate. Customers also have a right to return goods under certain circumstances which are reasonably estimable by affected businesses. Customer returns have historically ranged from 1%-2% of gross sales. These arrangements require us to estimate at the time of sale the amounts that should not be recorded as revenue as these amounts are not expected to be collected from customers. The Company principally relies on historical experience, specific customer agreements and anticipated future trends to estimate these amounts at the time of shipment.

Shipping and Handling Fees and Costs

The Company records shipping and handling costs as part of Cost of goods sold in the Consolidated Statement of Income. Any amounts billed to customers for reimbursement of shipping and handling are included in Net sales in the Consolidated Statement of Income.

Foreign Currency Translation

The assets and liabilities of international subsidiaries are translated to U.S. dollars at exchange rates in effect at the end of the year, and income and expense items are translated at average exchange rates in effect during the year. The effects of exchange rate fluctuations on the translated amounts of foreign currency assets and liabilities are included as translation adjustments in Accumulated other comprehensive loss within

Hubbell shareholders' equity. Gains and losses from foreign currency transactions are included in results of operations.

Cash and Cash Equivalents

The carrying value of cash equivalents approximates fair value. Cash equivalents consist of highly liquid investments with original maturities to the Company of three months or less.

Investments

Investments in debt and equity securities are classified by individual security as available-for-sale, held-to-maturity or trading securities. Our available-for-sale securities, consisting of municipal bonds and the redeemable preferred stock of a privately held company, are carried on the balance sheet at fair value with current period adjustments to carrying value recorded in Accumulated other comprehensive loss within Hubbell shareholders' equity, net of tax. Realized gains and losses are recorded in income in the period of sale. The Company's trading securities are carried on the balance sheet at fair value and consist primarily of debt and equity mutual funds. Gains and losses associated with these trading securities are reflected in the results of operations. The Company did not have any investments classified as held-to-maturity as of December 31, 2016 and 2015.

Accounts Receivable and Allowances

Trade accounts receivable are recorded at the invoiced amount and generally do not bear interest. The allowance for doubtful accounts is based on an estimated amount of probable credit losses in existing accounts receivable. The allowance is calculated based upon a combination of historical write-off experience, fixed percentages applied to aging categories and specific identification based upon a review of past due balances and problem accounts. Account balances are charged off against the allowance when it is determined that internal collection efforts should no longer be pursued. The Company also maintains a reserve for credit memos, cash discounts and product returns which are principally calculated based upon historical experience, specific customer agreements, as well as anticipated future trends.

Inventories

Inventories are stated at the lower of cost or market value. Approximately 72% of total net inventory value is determined utilizing the last-in, first-out (LIFO) method of inventory accounting. The cost of foreign inventories and certain domestic inventories is determined utilizing average cost or first-in, first-out (FIFO) methods of inventory accounting. Reserves for excess and obsolete inventory are provided based on current assessments about future demand compared to on-hand quantities.

Property, Plant, and Equipment

Property, plant, and equipment values are stated at cost less accumulated depreciation. Maintenance and repair expenditures that do not significantly increase the life of an asset are charged to expense when incurred. Property, plant, and equipment placed in service prior to January 1, 1999 are

depreciated over their estimated useful lives, principally using accelerated methods. Assets placed in service subsequent to January 1, 1999 are depreciated over their estimated useful lives, using straight-line methods. Leasehold improvements are amortized over the shorter of their economic lives or the lease term. Gains and losses arising on the disposal of property, plant and equipment are included in Operating income in the Consolidated Statement of Income.

Capitalized Computer Software Costs

Capitalized computer software costs, net of amortization, were \$15.6 million and \$12.4 million at December 31, 2016 and 2015, respectively. This balance is reflected in Other long-term assets in the Consolidated Balance Sheet.

Capitalized computer software is for internal use and costs primarily consist of purchased materials and services. Software is amortized on a straight-line basis over appropriate periods, generally five years. The Company recorded amortization expense of \$5.2 million in 2016, \$4.6 million in 2015 and \$4.3 million in 2014 relating to capitalized computer software.

Goodwill and Other Intangible Assets

Goodwill represents purchase price in excess of fair values of the underlying net assets of acquired companies. Indefinite-lived intangible assets and goodwill are subject to annual impairment testing using the specific guidance and criteria described in the accounting guidance. The Company performs its goodwill impairment testing as of April 1st of each year, unless circumstances dictate the need for more frequent assessments. The accounting guidance provides entities an option of performing a qualitative assessment (a "step-zero" test) before performing a quantitative analysis. If the entity determines, on the basis of certain qualitative factors, that it is more-likely-than-not that the goodwill is not impaired, the entity would not need to proceed to the two step goodwill impairment testing process (quantitative analysis) as prescribed in the guidance. The Company applied the "step-zero" test to its Hubbell Power Systems ("HPS") reporting unit. Based on that qualitative assessment, the Company concluded it was more-likely-than-not that the fair value of the HPS reporting unit substantially exceeded its carrying value and therefore, further quantitative analysis was not required. For each of the Company's other reporting units the Company has elected to utilize the two step goodwill impairment testing process as permitted in the accounting guidance. Step 1 compares the fair value of the Company's reporting units to their carrying values. If the fair value of the reporting unit exceeds its carrying value, no further analysis is necessary. If the carrying value of the reporting unit exceeds its fair value, Step 2 must be completed to determine the amount of impairment.

Goodwill impairment testing requires judgment, including the identification of reporting units, assigning assets and liabilities to reporting units and determining the fair value of each reporting unit. Significant judgments required to estimate the fair value of reporting units include estimating future cash flows, determining appropriate discount rates and other assumptions. The Company uses internal discounted cash flow estimates to determine fair value. These cash flow estimates are derived from historical experience and future long-term business plans and the application of an appropriate discount rate. Changes in these estimates and assumptions could materially affect the

determination of fair value and/or goodwill impairment for each reporting unit. The Company's estimated aggregate fair value of its reporting units are reasonable when compared to the Company's market capitalization on the valuation date.

As of April 1, 2016, our impairment testing resulted in implied fair values for each reporting unit that exceeded the reporting unit's carrying value, including goodwill. The Company did not have any reporting units at risk of failing Step 1 of the impairment test as the excess of the estimated fair value over carrying value (expressed as a percentage of carrying value) ranged from approximately 75% to approximately 315% for the respective reporting units. Additionally, the Company did not have any reporting units with zero or negative carrying amounts. The Company has not recorded any goodwill impairments since the initial adoption of the accounting guidance in 2002.

The Company's intangible assets consist primarily of customer relationships, tradenames and patents. Intangible assets with definite lives are amortized over periods generally ranging from 5-30 years. These definite lived intangibles are tested for impairment whenever events or circumstances indicate that the carrying amount of an asset (asset group) may not be recoverable. An impairment loss is recognized when the carrying amount of an asset exceeds the estimated undiscounted cash flows used in determining the fair value of the asset. The Company did not record any impairments related to its definite lived intangible assets in 2016, 2015 or 2014. The Company also has some tradenames that are considered to be indefinite-lived intangible assets. These indefinite-lived intangible assets are not amortized and are tested for impairment annually, unless circumstances dictate the need for more frequent assessment.

The accounting guidance related to testing indefinite-lived intangible assets for impairment provides entities an option of performing a qualitative assessment before calculating the fair value of the asset. If the entity determines, on the basis of certain qualitative factors, that it is more-likely-than-not that the asset is not impaired, the entity would not need to calculate the fair value of the asset. The Company performed the qualitative assessment which resulted in no impairment in 2016 and 2015. The Company elected to bypass the qualitative assessment and proceeded directly to the determination of fair value of its indefinite lived intangibles which resulted in no impairment in 2014.

Other Long-Lived Assets

The Company reviews depreciable long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount may not be fully recoverable. If such a change in circumstances occurs, the related estimated future undiscounted cash flows expected to result from the use of the asset group and its eventual disposition is compared to the carrying amount. If the sum of the expected cash flows is less than the carrying amount, an impairment charge is recorded. The impairment charge is measured as the amount by which the carrying amount exceeds the fair value of the asset. The fair value of impaired assets is determined using expected cash flow estimates, quoted market prices when available and appraisals as appropriate. The Company did not record any material impairment charges in 2016, 2015 or 2014.

Accrued Insurance

The Company retains a significant portion of the risks associated with workers' compensation, medical, automobile and general liability insurance. The Company estimates self-insurance liabilities using a number of factors, including historical claims experience, demographic factors, and other actuarial assumptions. The accrued liabilities associated with these programs are based on the Company's estimate of the ultimate costs to settle known claims as well as claims incurred but not reported as of the balance sheet date. The Company periodically reviews the assumptions with a third party actuary to determine the adequacy of these self-insurance reserves.

Income Taxes

The Company operates within multiple taxing jurisdictions and is subject to audit in these jurisdictions. The IRS and other tax authorities routinely review the Company's tax returns. These audits can involve complex issues which may require an extended period of time to resolve. The Company makes adequate provisions for best estimates of exposures on previously filed tax returns. Deferred income taxes are recognized for the tax consequence of differences between financial statement carrying amounts and the tax basis of assets and liabilities by applying the currently enacted statutory tax rates in accordance with the accounting guidance for income taxes. The effect of a change in statutory tax rates is recognized in the period that includes the enactment date. Additionally, deferred tax assets are required to be reduced by a valuation allowance if it is more-likely-than-not that some portion or all of the deferred tax asset will not be realized. The Company uses factors to assess the likelihood of realization of deferred tax assets such as the forecast of future taxable income and available tax planning strategies that could be implemented to realize the deferred tax assets.

In addition, the accounting guidance prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of the tax position taken or expected to be taken in a tax return. For any amount of benefit to be recognized, it must be determined that it is more-likely-than-not that a tax position will be sustained upon examination by taxing authorities based on the technical merits of the position. The amount of benefit to be recognized is based on the Company's assertion of the most likely outcome resulting from an examination, including resolution of any related appeals or litigation processes. Companies are required to reflect only those tax positions that are more-likely-than-not to be sustained. See also Note 12 — Income Taxes.

Research and Development

Research and development expenditures represent costs to discover and/or apply new knowledge in developing a new product, process, or in bringing about a significant improvement to an existing product or process. Research and development expenses are recorded as a component of Cost of goods sold. Expenses for research and development were approximately 2% of Cost of goods sold for each of the years 2016, 2015 or 2014.

Retirement Benefits

The Company maintains various defined benefit pension plans for some of its U.S. and foreign employees. The accounting guidance for retirement benefits requires the Company to recognize the funded status of its defined benefit pension and postretirement plans as an asset or liability in the Consolidated Balance Sheet. Gains or losses, prior service costs or credits, and transition assets or obligations that have not yet been included in net periodic benefit cost as of the end of the year are recognized as components of Accumulated other comprehensive loss, net of tax, within Hubbell shareholders' equity. The Company's policy is to fund pension costs within the ranges prescribed by applicable regulations. In addition to providing defined benefit pension benefits, the Company provides health care and life insurance benefits for some of its active and retired employees. The Company's policy is to fund these benefits through insurance premiums or as actual expenditures are made. See also Note 10 — Retirement Benefits.

Earnings Per Share

Restricted stock granted by the Company is considered a participating security since it contains a non-forfeitable right to dividends. As a result, the earnings per share accounting guidance requires the Company to use the two-class method for calculating earnings per share. The two-class method is an earnings allocation formula that determines earnings per share for common stock and participating securities. Basic earnings per share is calculated as net income available to common shareholders divided by the weighted average number of shares of common stock outstanding. Earnings per diluted share is calculated as net income available to common shareholders divided by the weighted average number of shares outstanding of common stock plus the incremental shares outstanding assuming the exercise of dilutive stock options, stock appreciation rights and performance shares. See also Note 17 — Earnings Per Share.

Stock-Based Compensation

The Company recognizes the grant-date fair value of all stock-based awards on a straight-line basis over their respective requisite service periods (generally equal to an award's vesting period), except for certain restricted stock awards granted in 2013 with a performance condition, which are expensed using the graded vesting attribution method. A stock-based award is considered vested for expense attribution purposes when the retention of the award is no longer contingent on providing subsequent service. Accordingly, the Company recognizes compensation cost immediately for awards granted to retirement-eligible individuals or over the period from the grant date to the date retirement eligibility is achieved, if less than the stated vesting period. The expense is recorded in Cost of goods sold and S&A expense in the Consolidated Statement of Income based on the recipients' respective functions within the organization.

The Company records deferred tax assets for awards that will result in deductions on its tax returns, based upon the amount of compensation cost recognized and the statutory tax rate in the jurisdiction in which it will receive a deduction. Differences between the deferred tax assets recognized for financial

reporting purposes and the actual tax deduction reported in the Company's tax return are recorded to Additional paid-in capital to the extent that previously recognized credits to paid-in capital are still available. See also Note 16 — Stock-Based Compensation.

Derivatives

In order to limit financial risk in the management of its assets, liabilities and debt, the Company may use derivative financial instruments such as foreign currency hedges, interest rate hedges and interest rate swaps. All derivative financial instruments are matched with an existing Company asset, liability or proposed transaction. The Company does not speculate or use leverage when trading a derivative product. Market value gains or losses on the derivative financial instrument are recognized in income when the effects of the related price changes of the underlying asset or

liability are recognized in income. See Note 13 — Fair Value Measurement for more information regarding our derivative instruments.

Recent Accounting Pronouncements

In March 2016, the Financial Accounting Standards Board ("FASB") issued an Accounting Standards Update (ASU 2016-09) relating to the accounting for share-based payments. Upon adoption, from a statement of income viewpoint, the new guidance will require all income tax effects of share-based awards to be recognized in the income statement when the awards vest or are settled, and allows companies an additional election in the methods to estimate forfeitures of share-based payments. It also increases the amount an employer can withhold to satisfy the employer's statutory income tax withholding obligation while still qualifying for the exception to liability classification of the share-based awards. From a statement of cash flows viewpoint, the new guidance requires that excess tax benefits be classified as an operating activity and cash paid to a tax authority when shares are withheld to satisfy the employer's statutory income tax withholdings be classified as a financing activity. This update is effective for fiscal years beginning after December 15, 2016 with early adoption permitted. The Company does not believe the standard will have a material impact on its financial statements.

In February 2016, the FASB issued an Accounting Standards Update (ASU 2016-02) related to the accounting for leases. This guidance will require a lessee to recognize a right-to-use asset and a lease liability for both financing and operating leases, with a policy election permitting an exception to this guidance for leases whose term is twelve months or less. For finance leases, the lessee will recognize interest expense and amortization of the right-of-use asset, and for operating leases the lessee will recognize a straight-line lease expense. This guidance is effective for fiscal years beginning after December 15, 2018, with early adoption permitted. The new standard must be adopted using a modified retrospective transition at the beginning of the earliest comparative period presented. The Company is currently assessing the impact of adopting this standard on its financial statements.

In May 2014, the FASB issued an Accounting Standards Update (ASU 2014-09) related to new revenue recognition guidance that supersedes the existing revenue recognition guidance and most industry-specific guidance applicable to revenue recognition. According to the new guidance an entity will apply a principles-based five step model to recognize revenue upon the transfer of promised goods or services to customers and in an amount that reflects the consideration for which the entity expects to be entitled in exchange for those goods or services. The guidance is effective for fiscal years beginning after December 15, 2017 with earlier application permitted for annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. This standard can be applied on either a retrospective or modified

retrospective approach. Through the course of 2016 a number of ASU's have been issued which further refine the original guidance issued under ASU 2014-09 and are effective in conjunction with this original standard. The Company has formed a project assessment and adoption team and is currently reviewing contract terms and assessing the impact of adopting the standard on its financial statements.

NOTE 2 Business Acquisitions

In the first quarter of 2016, the Company acquired all of the outstanding shares of R.W. Lyall & Company, Inc. ("Lyall"), a leader in the design and application of components and assemblies for the natural gas distribution market. Lyall was purchased for \$129.1 million, net of cash received, and has been added to the Electrical segment, resulting in the recognition of intangible assets of \$68.9 million and goodwill of \$48.7 million. The \$68.9 million of intangible assets consists primarily of customer relationships and trade names and will be amortized over a weighted average period of approximately 21 years. All of the goodwill is expected to be deductible for tax purposes.

In the first quarter of 2016, the Company acquired all of the issued and outstanding shares of Electric Motion Company, Inc. and all of the membership interests in Elmot Realty Associates, LLC, Elmot Realty Associates II, LLC, and DelRi LLC, collectively referred to as "EMC". EMC is a leading manufacturer of grounding and connector products for the communications, power, and transportation industries and was purchased for \$40.3 million, net of cash received, and has been added to the Power segment, resulting in the recognition of intangible assets of \$16.9 million and goodwill of \$18.1 million. The \$16.9 million of intangible assets consists primarily of customer relationships and trade names and will be amortized over a weighted average period of approximately 19 years. None of the goodwill associated with the EMC acquisition is expected to be deductible for tax purposes.

In the third quarter of 2016, the Company acquired all of the equity interests of Jiangsu Xiang Yuan Electric Equipment Co., Ltd. ("Longbow"). Longbow is a leading manufacturer of high voltage polymer insulators for the electric utility and railway industry. Longbow was purchased for approximately \$14.5 million, net of \$2.0 million cash received, of which \$2.9 million was paid at closing, and the remaining approximately \$11.6 million is to be paid in future installments. The purchase price is subject to customary post-closing adjustments. Longbow has been added to the Power segment. We have recognized intangible assets of \$6.9 million and goodwill of \$2.5 million as a result of this acquisition. The \$6.9 million of intangible assets consists primarily of customer relationships and trade names and will be amortized over a weighted average period of approximately 11 years. None of the goodwill associated with the Longbow acquisition is expected to be deductible for tax purposes.

All of these business acquisitions have been accounted for as business combinations and have resulted in the recognition of goodwill. The goodwill relates to a number of factors built into the purchase price, including the future earnings and cash flow potential of the businesses as well as the complementary strategic fit and resulting synergies they bring to the Company's existing operations. The purchase price allocation associated with Lyall and EMC is substantially complete as of December 31, 2016.

The following table summarizes the preliminary fair values of the assets acquired and liabilities assumed at the date of acquisition related to all transactions (in millions):

Tangible assets acquired, net of cash received	\$62.3
Intangible assets	92.6
Goodwill	70.0
Net deferred taxes	(8.2)
Liabilities assumed	(32.1)
TOTAL CONSIDERATION, NET OF CASH RECEIVED	\$184.6

The Consolidated Financial Statements include the results of operations of the acquired businesses from their respective dates of acquisition. Net sales and earnings related to these acquisitions for the year ended December 31, 2016 were not significant to the consolidated results. Pro forma information related to these acquisitions has not been included because the impact to the Company's consolidated results of operations was not material.

Cash used for the acquisition of businesses, net of cash acquired as reported in the Consolidated Statement of Cash Flows for the twelve months ended December 31, 2016 is \$173.4 million.

NOTE 3 Receivables and Allowances

Receivables consist of the following components at December 31, (in millions):

	2016	2015
Trade accounts receivable	\$565.5	\$491.5
Non-trade receivables	15.1	21.3
Accounts receivable, gross	580.6	512.8
Allowance for credit memos, returns and cash discounts	(45.9)	(41.5)
Allowance for doubtful accounts	(4.7)	(4.7)
Total allowances	(50.6)	(46.2)
ACCOUNTS RECEIVABLE, NET	\$530.0	\$466.6

NOTE 4 Inventories

Inventories are classified as follows at December 31, (in millions):

	2016	2015
Raw material	\$162.7	\$167.5
Work-in-process	102.8	99.6
Finished goods	327.9	342.6
	593.4	609.7
Excess of FIFO over LIFO cost basis	(61.0)	(69.7)
INVENTORIES, NET	\$532.4	\$540.0

NOTE 5 Goodwill and Other Intangible Assets

Changes in the carrying amounts of goodwill for the years ended December 31, 2016 and 2015, by segment, were as follows (in millions):

	Segment		
	Electrical	Power	Total
BALANCE AT DECEMBER 31, 2014	\$568.9	\$305.8	\$874.7
Current year acquisitions	43.3	12.0	55.3
Foreign currency translation and prior year acquisitions	(1.0)	(0.5)	(1.5)
BALANCE AT DECEMBER 31, 2015	\$611.2	\$317.3	\$928.5
Current year acquisitions	49.4	20.6	70.0
Foreign currency translation and prior year acquisitions	(8.6)	1.1	(7.5)
BALANCE AT DECEMBER 31, 2016	\$652.0	\$339.0	\$991.0

In 2016, the Company completed multiple acquisitions. These acquisitions have been accounted for as business combinations and have resulted in the recognition of \$70.0 million of goodwill. See also Note 2 — Business Acquisitions.

The Company has not recorded any material goodwill impairments since the initial adoption of the accounting guidance in 2002.

Identifiable intangible assets are recorded in Intangible assets, net in the Consolidated Balance Sheet. Identifiable intangible assets are comprised of the following (in millions):

	December 31, 2016		December 31, 2015	
	Gross Amount	Accumulated Amortization	Gross Amount	Accumulated Amortization
Definite-lived:				
Patents, tradenames and trademarks	\$143.7	\$ (43.4)	\$133.8	\$ (38.0)
Customer/agent relationships and other	405.9	(128.0)	331.2	(108.3)
TOTAL DEFINITE-LIVED INTANGIBLES	549.6	(171.4)	465.0	(146.3)
Indefinite-lived:				
Tradenames and other	53.3	—	53.5	—
TOTAL INTANGIBLE ASSETS	\$602.9	\$ (171.4)	\$518.5	\$ (146.3)

Amortization expense associated with these definite-lived intangible assets was \$32.3 million, \$28.2 million and \$23.8 million in 2016, 2015 and 2014, respectively. Amortization expense associated with these intangible assets is expected to be \$32.4 million in 2017, \$31.2 million in 2018, \$29.5 million in 2019, \$28.2 million in 2020 and \$27.3 million in 2021.

NOTE 6 Investments

At December 31, 2016 and December 31, 2015, the Company held investments classified as available-for-sale and investments classified as trading securities. Investments classified as available-for-sale consisted of municipal bonds with an amortized cost basis of \$53.7 million and an investment in the redeemable preferred stock of a privately-held electrical utility substation security provider with an amortized cost basis of \$5.0 million. The investment in redeemable preferred stock was classified in Level 3 of the fair value hierarchy and had a fair value of \$3.8 million and \$4.6 million at December 31, 2016 and 2015, respectively. Investments classified as trading securities were comprised primarily of debt and equity mutual funds and are stated at fair market value based on current quotes.

The following table sets forth selected data with respect to the Company's investments at December 31, (in millions):

	2016				2015					
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Carrying Value	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Carrying Value
Available-for-sale securities	\$58.6	\$ 0.3	\$ (1.5)	\$57.4	\$ 57.4	\$51.9	\$ 0.5	\$ (0.4)	\$52.0	\$ 52.0
Trading securities	7.1	3.1	—	10.2	10.2	7.3	2.4	—	9.7	9.7
TOTAL INVESTMENTS	\$65.7	\$ 3.4	\$ (1.5)	\$67.6	\$ 67.6	\$59.2	\$ 2.9	\$ (0.4)	\$61.7	\$ 61.7

Contractual maturities of our investments in available-for-sale securities at December 31, 2016 were as follows (in millions):

	Amortized Cost	Fair Value
Available-for-sale securities		
Due within 1 year	\$ 11.2	\$ 11.2
After 1 year but within 5 years	36.4	35.4
After 5 years but within 10 years	9.2	9.0
Due after 10 years	1.8	1.8
TOTAL	\$ 58.6	\$ 57.4

At December 31, 2016, the total unrealized gain/(loss) recorded relating to available-for-sale securities, net of tax, was \$(0.9) million and the corresponding amount at December 31, 2015 was immaterial. These net unrealized gains/(losses) are included in Accumulated other comprehensive loss, net of tax. Net unrealized gains relating to trading securities have been reflected in the results of operations. The Company uses the specific identification method when identifying the cost basis used to calculate the gain or loss on these securities. Gains and losses for both available-for-sale and trading securities were not material in 2016, 2015 and 2014.

NOTE 7 Property, Plant, and Equipment

Edgar Filing: HUBBELL INC - Form 10-K

Property, plant, and equipment, carried at cost, is summarized as follows at December 31, (in millions):

	2016	2015
Land	\$43.1	\$42.5
Buildings and improvements	268.7	259.4
Machinery, tools, and equipment	784.7	761.7
Construction-in-progress	36.9	37.5
Gross property, plant, and equipment	1,133.4	1,101.1
Less accumulated depreciation	(693.6)	(681.4)
NET PROPERTY, PLANT, AND EQUIPMENT	\$439.8	\$419.7

Depreciable lives on buildings range between 20-45 years. Depreciable lives on machinery, tools, and equipment range between 3-15 years. The Company recorded depreciation expense of \$53.4 million, \$51.2 million and \$49.9 million for 2016, 2015 and 2014, respectively.

50HUBBELL INCORPORATED - Form 10-K

NOTE 8 Other Accrued Liabilities

Other accrued liabilities consists of the following at December 31, (in millions):

	2016	2015
Customer program incentives	\$41.2	\$40.7
Accrued income taxes	8.4	2.1
Deferred revenue	11.8	15.0
Other	94.8	81.9
TOTAL	\$156.2	\$139.7

NOTE 9 Other Non-Current Liabilities

Other non-current liabilities consists of the following at December 31, (in millions):

	2016	2015
Pensions	\$208.3	\$150.7
Other post-employment benefits	24.0	24.3
Deferred tax liabilities	41.2	36.1
Other	68.2	49.6
TOTAL	\$341.7	\$260.7

NOTE 10 Retirement Benefits

The Company has funded and unfunded non-contributory U.S. and foreign defined benefit pension plans. Benefits under these plans are generally provided based on either years of service and final average pay or a specified dollar amount per year of service. The U.S. defined benefit pension plan has been closed to new participants since 2004, while the Canadian and UK defined benefit pension plans have been closed to new entrants since 2006 and 2007, respectively. These U.S., Canadian and UK employees are eligible instead for defined contribution plans.

The Company also has a number of health care and life insurance benefit plans covering eligible employees who reached retirement age while working for the Company. These benefits have been discontinued for substantially all future retirees. The Company anticipates future cost-sharing charges for its discontinued plans that are consistent with past practices. The Company uses a December 31 measurement date for all of its plans.

In December 2016, the Company approved amendments to the domestic qualified defined benefit pension plan and non-qualified defined benefit plan, which will freeze service accruals for active participants effective February 28, 2017 and further will freeze compensation accruals effective December 31, 2020. The Company also froze all accruals in a second non-qualified defined benefit plan effective December 31, 2016.

As a result of these amendments, the Company has recognized a \$34.1 million curtailment gain in Accumulated other comprehensive income as of December 31, 2016 and also recognized \$0.2 million of pension expense in 2016 associated with previously unrecognized prior service costs. In addition, effective January 1, 2017, the amortization of actuarial gains and losses of these plans will be recognized over the remaining life expectancy of participants, as all participants are considered inactive as a result of the amendment.

In 2016, we also completed a transaction with a third-party insurer to settle approximately \$40 million of projected benefit obligation of our domestic qualified defined benefit pension plans.

In 2015, we amended our domestic qualified defined benefit pension plans to offer a voluntary lump sum pension payout program to certain eligible terminated vested participants that would settle our obligation to those participants accepting the offer. As part of this voluntary lump sum program, in 2015 the Company made approximately \$27.7 million of payments to participants, settling its pension obligation by approximately the same amount. There were no other amendments made in 2016 or 2015 to the defined benefit pension plans which had a significant impact on the total pension benefit obligation.

The Company's U.S. defined benefit pension plans were approximately 87% of the \$917.4 million total pension benefit obligations at December 31, 2016.

Edgar Filing: HUBBELL INC - Form 10-K

The following table sets forth the reconciliation of beginning and ending balances of the benefit obligations and the plan assets for the Company's defined benefit pension and other benefit plans at December 31, (in millions):

	Pension Benefits		Other Benefits	
	2016	2015	2016	2015
Change in benefit obligation				
Benefit obligation at beginning of year	\$912.3	\$976.3	\$26.6	\$26.7
Service cost	12.9	17.7	—	0.1

TOTAL EXPECTED TO BE RECOGNIZED THROUGH INCOME DURING NEXT FISCAL YEAR	\$11.1			\$(1.0)		

The Company also maintains six defined contribution pension plans. The total cost of these plans was \$15.6 million in 2016, \$13.3 million in 2015 and \$12.9 million in 2014, excluding the employer match for the 401(k) plan. This cost is not included in the above net periodic benefit cost for the defined benefit pension plans.

The Company participated in two multi-employer defined benefit pension plans under the terms of collective-bargaining agreements that cover its union represented employees at December 31, 2016 and 2015, respectively. The Company's total contributions to these plans were \$0.5 million in 2016, and \$0.8 million in 2015 and 2014. These contributions represent more than five percent of the total contributions made to one of these plans in 2016 and 2015 and two of these plans in 2014. As of December 31, 2016 one of the two multi-employer defined benefit pension plans in which the Company participates is considered to be less than 65 percent funded.

The risks of participating in these multi-employer plans are different from single-employer plans in that assets contributed are pooled and may be used to provide benefits to employees of other participating employers. If a participating employer

stops contributing to the plan, the unfunded obligations of the plan may have to be assumed by the remaining participant employers. If we choose to stop participating in these multi-employer plans we may be required to pay those plans a withdrawal liability based on the unfunded status of the plan.

In the fourth quarter of 2016, the Company recorded a charge of \$12.5 million in Cost of goods sold based on an assessment it is probable the Company will withdraw from one of the plans in 2017. Although the Company has

received no indication that its expectations regarding its estimated withdrawal liability is not accurate, depending on actions of third parties, including bankruptcy or withdrawals from the multi-employer plan, under terms customary to multi-employer plans, it is possible that the Company could in the future be subject to certain additional liabilities associated with its participation and withdraw from the multi-employer pension plan, which the Company estimates could be up to an additional \$28 million.

Assumptions

The following assumptions were used to determine the projected benefit obligations at the measurement date and the net periodic benefit cost for the year:

	Pension Benefits			Other Benefits		
	2016	2015	2014	2016	2015	2014
Weighted-average assumptions used to determine benefit obligations at December 31,						
Discount rate	4.12 %	4.71 %	4.23 %	4.10 %	4.60 %	4.10 %
Rate of compensation increase	3.55 %	3.59 %	3.15 %	3.93 %	3.92 %	3.60 %
Weighted-average assumptions used to determine net periodic benefit cost for years ended December 31,						
Discount rate	4.71 %	4.23 %	5.04 %	4.60 %	4.10 %	4.60 %
Expected return on plan assets	6.04 %	6.36 %	6.06 %	N/A	N/A	N/A
Rate of compensation increase	3.59 %	3.15 %	3.18 %	3.92 %	3.60 %	3.58 %

At the end of each year, the Company determines the appropriate expected return on assets for each plan based upon its strategic asset allocation (see discussion below). In making this determination, the Company utilizes expected returns for each asset class based upon current market conditions and expected risk premiums for each asset class.

The Company also determines the discount rate to be used to calculate the present value of pension plan liabilities at the end of each year. The discount rate for the Company's U.S. and Canadian pension plans is determined by matching the expected cash flows associated with its benefit obligations to a yield curve based on high quality, fixed income debt instruments with maturities that closely match the expected funding period of its pension liabilities. This yield curve is derived using a bond matching approach which incorporates a selection of bonds that align with the Company's projected benefit obligations. As of December 31, 2016, the Company used a discount rate of 4.3% for its U.S. pension plans compared to a discount rate of 4.8% used in 2015. For its Canadian pension plan, the Company used a discount rate of 3.85% as of December 31, 2016 compared to the 3.90% discount rate used in 2015.

For its UK pension plan the discount rate was derived using a yield curve fitted to the yields on AA bonds in the Barclays Capital Sterling Aggregate Corporate Index and uses sample plan cash

flow data as a proxy to plan specific liability cash flows. The derived discount rate is the single discount rate equivalent to discounting these liability cash flows at the term-dependent spot rate of AA corporate bonds. This methodology resulted in a December 31, 2016 discount rate for the UK pension plan of 2.7% as compared to a discount rate of 4.0% used in 2015.

In 2014 we changed the mortality table used to calculate the present value of our pension plan liabilities from the RP-2000 mortality table to the RP-2000 mortality table with generational projection using Scale BB-2D. That change resulted in an approximately \$40 million increase in the projected benefit obligation of our U.S. defined benefit pension plans upon remeasurement at December 31, 2014. The same mortality assumption was used to calculate the present value of pension plan liabilities as of December 31, 2015 and 2016. The RP-2000 mortality table with generational projection using Scale BB-2D was chosen as the best estimate based on the observed and anticipated experience of the plans after considering alternative tables, including RP-2014 and generational projection using Scale MP-2016.

The rate of compensation increase assumption reflects the Company's actual experience and best estimate of future increases.

Edgar Filing: HUBBELL INC - Form 10-K

The assumed health care cost trend rates used to determine the projected postretirement benefit obligation are as follows:

	Other Benefits		
	2016	2015	2014
Assumed health care cost trend rates at December 31,			
Health care cost trend assumed for next year	7.2	%7.4	%7.6
Rate to which the cost trend is assumed to decline	5.0	%5.0	%5.0
Year that the rate reaches the ultimate trend rate	2028	2028	2028

HUBBELL INCORPORATED - Form 10-K 55

Assumed health care cost trend rates have an effect on the amounts reported for the postretirement benefit plans. A one-percentage-point change in assumed health care cost trend rates would have the following effects (in millions):

	One Percentage Point Increase	One Percentage Point Decrease
Effect on total of service and interest cost	\$ 0.1	\$ (0.1)
Effect on postretirement benefit obligation	\$ 1.7	\$ (1.5)

Plan Assets

The Company's combined targeted 2015 weighted average asset allocation for domestic and foreign pension plans and the actual weighted average asset allocation for domestic and foreign pension plans at December 31, 2016 and 2015 by asset category are as follows:

Asset Category	Percentage of Plan Assets			
	Target	Actual	2016	2015
Equity securities	19	% 16	% 25	%
Debt securities & Cash	64	% 65	% 52	%
Alternative Investments	17	% 19	% 23	%
TOTAL	100	% 100	% 100	%

At the end of each year, the Company estimates the expected long-term rate of return on pension plan assets based on the strategic asset allocation for its plans. In making this determination, the Company utilizes expected rates of return for each asset class based upon current market conditions and expected risk premiums for each asset class. The Company has written investment policies and asset allocation guidelines for its domestic and foreign pension plans. In establishing these policies, the Company has considered that its various pension plans are a major retirement vehicle for most plan participants and has acted to discharge its fiduciary responsibilities with regard to the plans solely in the interest of such participants and their beneficiaries. The goal underlying the establishment of the investment policies is to provide that pension assets shall be invested in a prudent manner and so that, together with the expected contributions to the plans, the funds will be sufficient to meet the obligations of the plans as they become due. To achieve this result, the Company conducts a periodic strategic asset allocation study to form a basis for the allocation of pension assets between various asset categories. Specific policy benchmark percentages are assigned to each asset category

with minimum and maximum ranges established for each. The assets are then tactically managed within these ranges. Equity securities include investments in large-cap, mid-cap and small-cap companies located inside and outside the United States. Fixed income securities include corporate bonds of companies from diversified industries, mortgage-backed securities and US Treasuries. Derivative investments include futures contracts used by the plan to adjust the level of its investments within an asset allocation category. The actual and target percentages reported in the preceding table reflect the economic exposure to each asset category, including the impact of derivative positions. All futures contracts are 100% supported by cash or cash equivalent investments. At no time may derivatives be utilized to leverage the asset portfolio. Equity securities include Company common stock in the amounts of \$40.0 million (6.6% of total domestic plan assets) and \$34.7 million (5.3% of total domestic plan assets) at December 31, 2016 and 2015, respectively.

The Company's other post-employment benefits are unfunded; therefore, no asset information is reported.

Edgar Filing: HUBBELL INC - Form 10-K

(a) Includes an actively managed portfolio of large-cap US stocks.

(b) Includes \$40.0 million and \$34.7 million of the Company's common stock at December 31, 2016 and 2015, respectively, and an investment in a small cap open ended mutual fund.

(c) Includes open ended emerging markets mutual funds.

(d) Includes primarily investment grade bonds of primarily U.S. issuers from diverse industries.

(e) Includes primarily U.S. and foreign equity futures as well as foreign fixed income futures and short positions in U.S. Treasury futures to adjust the duration of the portfolio.

(f) Includes investments in hedge funds, including fund of funds products and open end mutual funds

(g) Investments in Common Pooled Funds, consisting of equities and fixed income securities.

HUBBELL INCORPORATED - Form 10-K 57

Investments Priced Using Net Asset Value ("NAV") within Alternative Investment Funds in the preceding tables consist of fund of fund products. These products invest in a number of investment funds managed by a diversified group of third-party investment managers who employ a variety of alternative

investment strategies, including relative value, security selection, distressed value, global macro, specialized credit and directional strategies. The objective of these funds is to achieve the desired capital appreciation with lower volatility than either traditional equity or fixed income securities.

Contributions

Although not required under the Pension Protection Act of 2006, the Company made approximately \$16 million of voluntary contributions to its qualified defined benefit pension plans in December 2016. The Company expects to contribute approximately \$1.7 million to its foreign plans in 2017.

Estimated Future Benefit Payments

The following domestic and foreign benefit payments, which reflect future service, as appropriate, are expected to be paid as follows, (in millions):

	Pension Benefits	Other Benefits
2017	\$ 41.3	\$ 2.3
2018	\$ 43.9	\$ 2.2
2019	\$ 44.0	\$ 2.2
2020	\$ 45.4	\$ 2.1
2021	\$ 47.2	\$ 2.1
2022-2026	\$ 265.7	\$ 8.9

NOTE 11 Debt

The following table sets forth the Company's long-term debt at December 31, (in millions):

	Maturity	2016	2015
Senior notes at 5.95%, net of unamortized discount and unamortized debt issuance costs	2018	\$299.3	\$298.8
Senior notes at 3.625%, net of unamortized discount and unamortized debt issuance costs	2022	297.5	297.1
Senior notes at 3.35%, net of unamortized discount and unamortized debt issuance costs	2026	393.7	—
TOTAL LONG-TERM DEBT		\$990.5	\$595.9

In March 2016, the Company completed a public debt offering of \$400 million of long-term unsecured, unsubordinated notes maturing in March 2026 and bearing interest at a fixed rate of 3.35% (the "2026 Notes"). Net proceeds from the issuance were \$393.4 million after deducting the discount on the notes and offering expenses paid by the Company.

In November 2010, the Company completed a public debt offering for \$300 million of long-term unsecured, unsubordinated notes maturing in November 2022 ("2022 Notes") and bearing interest at a fixed rate of 3.625%. Prior to the issuance of the 2022 Notes, the Company entered into a forward interest rate lock which resulted in a \$1.6 million loss. This amount was recorded in Accumulated other comprehensive loss, net of tax, and is being amortized over the life of the 2022 Notes.

In May 2008, the Company completed a public offering for \$300 million of long-term senior unsecured, unsubordinated notes maturing in May 2018 (the "2018 Notes"). The 2018 Notes bear interest at a fixed rate of 5.95%. Prior to the issuance of the 2018 Notes, the Company entered into a forward interest rate lock which resulted in a \$1.2 million gain. This amount was recorded in Accumulated other comprehensive loss, net of tax, and is being amortized over the life of the notes.

The 2018 Notes, 2022 Notes and 2026 Notes are all fixed rate indebtedness, are callable at any time with a make whole premium and are only subject to accelerated payment prior to maturity in the event of a default (including as a result of the Company's failure to meet certain non-financial covenants) under the indenture governing the notes, as modified by the supplemental indentures creating such notes, or upon a change in control event as defined in such indenture. The Company was in compliance with all non-financial covenants as of December 31, 2016.

At December 31, 2016 and 2015, the Company had \$3.2 million and \$48.2 million, respectively, of short-term debt outstanding.

There were no commercial paper borrowings outstanding at December 31, 2016. Short-term debt at December 31, 2015 includes \$48.0 million of commercial paper borrowings to partially fund the Class A Cash Consideration paid on December 23, 2015 in connection with the Reclassification. Refer to Note 15 — Capital Stock, for more information about the Reclassification.

Short-term debt at December 31, 2016 and 2015 also includes \$3.2 million and \$0.2 million, respectively of other borrowings to support our international operations in China and Brazil.

Other information related to short-term debt at December 31, is summarized below:

	2016	2015
Interest rate on short-term debt:		
At year end ^(a)	6.89 %	0.47 %
Paid during the year (weighted average)	0.72 %	4.54 %

(a) The interest rate at December 31, 2016 reflects short term borrowings which are predominately related to our operations in China and Brazil and reflect market interest rates in those regions.

On December 16, 2015 the Company entered into a five-year revolving credit agreement (the "Credit Agreement") with a syndicate of lenders that provides a \$750 million committed revolving credit facility. The revolving credit facility serves as a backup to the Company's commercial paper program. Commitments under the Credit Agreement may be increased to an aggregate amount not the exceed \$1.250 billion. The interest rate applicable to borrowing under the Credit Agreement is generally either the adjusted LIBOR plus an applicable margin (determined by reference to a ratings based grid) or the alternative base rate. The single financial covenant in the Credit Agreement, which the Company is in compliance with, requires that total debt not exceed 55% of total capitalization as of the last day of each fiscal quarter of the Company. Annual commitment fees to support availability under the credit facility are not material. As of December 31, 2016 the revolving credit facility has not been drawn against.

The Company also maintains other lines of credit that are primarily used to support the issuance of letters of credit. Interest rates and other terms of borrowing under these lines of credit vary from country to country, depending on local market conditions. At December 31, 2016 and 2015 these lines totaled \$51.4 million and \$54.6 million, respectively, of which \$21.0 million and \$22.5 million was utilized to support letters of credit and the remaining amount was unused. The annual commitment fees associated with these lines of credit are not material.

Interest and fees paid related to total indebtedness was \$37.1 million, \$29.5 million and \$29.4 million in 2016, 2015 and 2014, respectively.

NOTE 12 Income Taxes

The following table sets forth selected data with respect to the Company's income tax provisions for the years ended December 31, (in millions):

	2016	2015	2014
Income before income taxes:			
United States	\$349.5	\$347.2	\$385.6
International	80.9	71.4	99.9
TOTAL INCOME BEFORE INCOME TAXES	\$430.4	\$418.6	\$485.5
Provision for income taxes — current:			
Federal	\$85.5	\$110.4	\$90.1
State	17.4	13.7	15.4
International	17.0	17.6	22.5
Total provision-current	119.9	141.7	128.0
Provision for income taxes — deferred:			
Federal	13.5	(1.7))24.4
State	1.3	0.4	2.7
International	(2.1))3.9)3.2
Total provision — deferred	12.7	(5.2))30.3
TOTAL PROVISION FOR INCOME TAXES	\$132.6	\$136.5	\$158.3

Deferred tax assets and liabilities result from differences in the basis of assets and liabilities for tax and financial statement purposes. The components of the deferred tax assets/(liabilities) at December 31, were as follows (in millions):

	2016	2015
Deferred tax assets:		
Inventories	\$8.8	\$6.8
Income tax credits	30.9	31.9
Accrued liabilities	20.8	25.0
Pension	77.6	58.2
Post retirement and post employment benefits	10.0	10.4
Stock-based compensation	17.5	12.6
Net operating loss carryforwards	27.2	31.0
Miscellaneous other	7.5	7.0
Gross deferred tax assets	200.3	182.9
Valuation allowance	(22.6))22.0
Total deferred tax assets, net of valuation allowance	177.7	160.9
Deferred tax liabilities:		
Acquisition basis difference	(162.1)	(149.2)
Property, plant, and equipment	(46.3)	(41.6)
Total deferred tax liabilities	(208.4)	(190.8)
TOTAL NET DEFERRED TAX LIABILITY	\$(30.7)	\$(29.9)
Deferred taxes are reflected in the Consolidated Balance Sheet as follows:		
Non-current tax assets (included in Other long-term assets)	10.5	6.2
Non-current tax liabilities (included in Other Non-Current Liabilities)	(41.2)	(36.1)
TOTAL NET DEFERRED TAX LIABILITY	\$(30.7)	\$(29.9)

As of December 31, 2016, the Company had a total of \$30.9 million of Federal, State (net of Federal benefit) and foreign tax credit carryforwards, available to offset future income taxes. As of December 31, 2016, \$11.7 million of

the tax credits may be carried forward indefinitely while the remaining \$19.2 million will begin to expire at various times in 2017 through 2037. As of

December 31, 2016, the Company had recorded tax benefits totaling \$27.2 million for Federal, State and foreign net operating loss carryforwards (“NOLs”). As of December 31, 2016, \$8.6 million of NOLs may be carried forward indefinitely while the remaining \$18.6 million will begin to expire at various times in 2021 through 2030. The tax benefit related to a portion of these

NOLs has been adjusted to reflect an “ownership change” pursuant to Internal Revenue Code Section 382, which imposes an annual limitation on the utilization of pre-acquisition operating losses. The Company has recorded a net valuation allowance of \$22.6 million for the portion of the foreign tax and state tax credit carryforwards and foreign NOLs that the Company anticipates will expire prior to utilization.

At December 31, 2016, income and withholding taxes have not been provided on approximately \$890 million of undistributed international earnings that are permanently reinvested in international operations. If such earnings were not indefinitely reinvested, a tax liability of approximately \$200 million would be recognized.

Cash payments of income taxes were \$117.4 million, \$139.1 million and \$125.4 million in 2016, 2015, and 2014, respectively.

The Company operates within multiple taxing jurisdictions and is subject to audit in these jurisdictions. The IRS and other tax

authorities routinely audit the Company’s tax returns. These audits can involve complex issues which may require an extended period of time to resolve. During 2015 the IRS commenced an examination of the Company’s 2013 and 2014 Federal income tax returns. The Company expects this examination to be completed within the next 12 months. With few exceptions, the Company is no longer subject to state, local, or non-U.S. income tax examinations by tax authorities for years prior to 2009.

The following tax years, by major jurisdiction, are still subject to examination by taxing authorities:

Jurisdiction	Open Years
United States	2013-2016
UK	2015-2016
Puerto Rico	2012-2016
Canada	2012-2016

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows (in millions):

	2016	2015	2014
Unrecognized tax benefits at beginning of year	\$20.3	\$21.6	\$14.8
Additions based on tax positions relating to the current year	2.8	2.9	2.9
Reductions based on expiration of statute of limitations	(5.7)	(2.8)	(1.2)
Additions to tax positions relating to previous years	2.9	0.4	9.5
Settlements	(0.1)	(1.8)	(4.4)
TOTAL UNRECOGNIZED TAX BENEFITS	\$20.2	\$20.3	\$21.6

Included in the balance at December 31, 2016 are \$16.0 million of tax positions which, if in the future are determined to be recognizable, would affect the annual effective income tax rate. Additionally, there are \$1.2 million of tax positions for which the ultimate deductibility is highly certain but for which there is uncertainty as to the timing of such deductibility. Because of the impact of deferred tax accounting, other than interest and penalties, the disallowance of the shorter deductibility period would not affect the annual effective tax rate but would accelerate the payment of cash to the applicable taxing authority to an earlier period. It is reasonably possible that in the next twelve months, because of changes in facts and circumstances, the unrecognized tax benefits may increase or decrease.

The Company estimates a possible decrease of \$3.0 to \$5.0 million within the next twelve months due to the expiration of the statute of limitations and the completion of certain tax audits on various unrecognized tax positions.

The Company's policy is to record interest and penalties associated with the underpayment of income taxes within Provision for income taxes in the Consolidated Statement of Income. The Company recognized expense, before federal tax impact, related to interest and penalties of approximately \$0.7 million in 2016, \$1.2 million in 2015 and \$1.7 million 2014. The Company had \$4.8 million and \$4.1 million accrued for the payment of interest and penalties as of December 31, 2016 and December 31, 2015, respectively.

The consolidated effective income tax rate varied from the United States federal statutory income tax rate for the years ended December 31, as follows:

	2016	2015	2014	
Federal statutory income tax rate	35.0	% 35.0	% 35.0	%
State income taxes, net of federal benefit	2.4	2.3	2.0	
Foreign income taxes	(3.4)	(3.9)	(2.1)	
Other, net	(3.2)	(0.8)	(2.3)	
CONSOLIDATED EFFECTIVE INCOME TAX RATE	30.8	% 32.6	% 32.6	%

The foreign income tax benefit shown is primarily due to lower statutory rates in foreign jurisdictions compared to the Federal statutory rate.

NOTE 13 Financial Instruments and Fair Value Measurement

Financial Instruments

Concentrations of Credit Risk: Financial instruments which potentially subject the Company to significant concentrations of credit risk consist of trade receivables, cash equivalents and investments. The Company grants credit terms in the normal course of business to its customers. Due to the diversity of its product lines, the Company has an extensive customer base including electrical distributors and wholesalers, electric utilities, equipment manufacturers, electrical contractors, telecommunication companies and retail and hardware outlets. No single customer accounted for more than 10% of total sales in any year during the three years ended December 31, 2016. However, the Company's top ten customers account for

approximately one-third of its net sales. As part of its ongoing procedures, the Company monitors the credit worthiness of its customers. Bad debt write-offs have historically been minimal. The Company places its cash and cash equivalents with financial institutions and limits the amount of exposure in any one institution.

Fair Value: The carrying amounts reported in the Consolidated Balance Sheet for cash and cash equivalents, short-term investments, receivables, bank borrowings, accounts payable and accruals approximate their fair values given the immediate or short-term nature of these items. See also Note 6 — Investments.

Fair value measurements

At December 31, 2016 and 2015 the Company had \$67.6 million and \$61.7 million respectively, of investments carried on the balance sheet at fair value. Fair value is defined as the amount that would be received for selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The FASB fair value measurement guidance established a fair value hierarchy that prioritizes the inputs used to measure fair value. Refer to Note 6 — Investments for more information about these investments.

The three broad levels of the fair value hierarchy are as follows:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities

Edgar Filing: HUBBELL INC - Form 10-K

Level 2 - Quoted prices for similar assets and liabilities in active markets or inputs that are observable for the asset or liability, either directly or indirectly

Level 3 - Unobservable inputs for which little or no market data exists, therefore requiring a company to develop its own assumptions

62 HUBBELL INCORPORATED - Form 10-K

Edgar Filing: HUBBELL INC - Form 10-K

The following tables show, by level within the fair value hierarchy, the Company's financial assets and liabilities that are accounted for at fair value on a recurring basis at December 31, 2016 and 2015 (in millions):

Asset (Liability)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Quoted Prices in Active Markets for Similar Assets (Level 2)	Unobservable inputs for which little or no market data exists (Level 3)	Total
Money market funds ^(a)	\$ 263.5	\$ —	\$ —	\$263.5
Available for sale investments	—	53.6	3.8	57.4
Trading securities	10.2	—	—	10.2
Deferred compensation plan liabilities	(10.2)	—	—	(10.2)
Derivatives:				
Forward exchange contracts-Assets ^(b)	—	0.8	—	0.8
Forward exchange contracts-(Liabilities) ^(c)	—	(0.1)	—	(0.1)
BALANCE AT DECEMBER 31, 2016	\$ 263.5	\$ 54.3	\$ 3.8	\$321.6

Asset (Liability)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Quoted Prices in Active Markets for Similar Assets (Level 2)	Unobservable inputs for which little or no market data exists (Level 3)	Total
Money market funds ^(a)	\$ 210.9	\$ —	\$ —	\$210.9
Available-for-sale investments	—	47.4	4.6	52.0
Trading securities	9.7	—	—	9.7
Deferred compensation plan liabilities	(9.7)	—	—	(9.7)
Derivatives:				
Forward exchange contracts-Assets ^(b)	—	2.5	—	2.5
Forward exchange contracts-(Liabilities) ^(c)	—	(0.1)	—	(0.1)
BALANCE AT DECEMBER 31, 2015	\$ 210.9	\$ 49.8	\$ 4.6	\$265.3

(a) Money market funds are included in Cash and cash equivalents in the Consolidated Balance Sheet.

(b) Forward exchange contracts-Assets are reflected in Other current assets in the Consolidated Balance Sheet.

(c) Forward exchange contracts-(Liabilities) are reflected in Other accrued liabilities in the Consolidated Balance Sheet.

The methods and assumptions used to estimate the Level 2 fair values were as follows:

Forward exchange contracts – The fair value of forward exchange contracts were based on quoted forward foreign exchange prices at the reporting date.

Municipal bonds – The fair value of available-for-sale investments in municipal bonds is based on observable market-based inputs, other than quoted prices in active markets for identical assets.

Available-for-sale redeemable preferred stock classified in Level 3 – The fair value of the available-for-sale investment in redeemable preferred stock is valued based on a discounted cash flow model, using significant unobservable inputs, including assumptions regarding expected cash flows and discount rates.

During 2016 and 2015, there were no transfers of financial assets or liabilities in or out of Level 1 or Level 2 of the fair value hierarchy. As of December 31, 2016 and 2015, the Company had one financial asset that was classified in Level 3 of the fair value hierarchy.

Deferred compensation plan

The Company offers certain employees the opportunity to participate in non-qualified deferred compensation plans. A participant's deferrals are invested in a variety of participant-directed debt and equity mutual funds that are classified as trading securities. During 2016 and 2015, the Company purchased \$1.4 million and \$1.0 million, respectively, of trading securities related to these deferred compensation plans. As a result of participant distributions, the Company sold \$1.6 million and \$0.3 million of these trading securities in 2016 and 2015 respectively. The unrealized gains and losses associated with these trading securities are directly offset by the changes in the fair value of the underlying deferred compensation plan obligation.

Derivatives

In order to limit financial risk in the management of its assets, liabilities and debt, the Company may use derivative financial instruments such as foreign currency hedges, commodity hedges, interest rate hedges and interest rate swaps. All derivative financial instruments are matched with an existing Company asset, liability or proposed transaction. Market value gains or losses on the derivative financial instrument are recognized in income when the effects of the related price changes of the underlying asset or liability are recognized in income.

Forward exchange contracts

In 2016 and 2015, the Company entered into a series of forward exchange contracts to purchase U.S. dollars in order to hedge its exposure to fluctuating rates of exchange on anticipated inventory purchases and forecasted sales by its subsidiaries who transact business in Canadian dollars. As of December 31, 2016, the Company had 51 individual forward exchange contracts for notional amounts which range from \$0.4 million to \$1.2 million each, which have various expiration dates through December 2017. These contracts have been designated as cash flow hedges in accordance with the accounting guidance for derivatives.

The following table summarizes the results of cash flow hedging relationships for years ended December 31, (in millions):

Derivative Instrument	Derivative Gain/(Loss) Recognized in Accumulated Other Comprehensive Loss, net of tax		Location of Gain/(Loss) when reclassified (Effective Portion)	Gain/(Loss) Reclassified into Earnings (Effective Portion)	
	2016	2015		2016	2015
Forward exchange contract	\$ (1.4)	\$ 1.7	Net sales Cost of goods sold	\$ (0.3)	\$ — \$ 0.3

There was no material hedge ineffectiveness with respect to the forward exchange cash flow hedges during 2016, 2015 and 2014.

Long-term Debt

The total carrying value of long-term debt as of December 31, 2016 and 2015 was \$990.5 million and \$595.9 million, respectively, net of unamortized discount and debt issuance costs. As of December 31, 2016 and 2015, the estimated fair value of the long-term debt was \$1,017.8 million and \$630.5 million, respectively, based on quoted market prices. The Company's long-term debt falls within level 2 of the fair value hierarchy.

NOTE 14 Commitments and Contingencies

Legal and Environmental

The Company is subject to various legal proceedings arising in the normal course of its business. These proceedings include claims for damages arising out of use of the Company's products, intellectual property, workers' compensation and environmental matters. The Company is self-insured up to specified limits for certain types of claims, including product liability and workers' compensation, and is fully self-insured for certain other types of claims, including environmental and intellectual property matters. The Company recognizes a liability for any contingency that in management's judgment is probable of occurrence and can be reasonably estimated. We continually reassess the likelihood of adverse judgments and outcomes in these matters, as well as estimated ranges of possible losses based upon an analysis of each matter which includes consideration of outside legal counsel and, if applicable, other experts.

On October 16, 2015, Norfolk County Retirement System, a purported former holder of the Company's Class B common stock, filed a complaint in the United States District Court for the District of Connecticut challenging the Reclassification of the Company's dual-class common stock into a single class of common stock (the "Reclassification"). The complaint was captioned Norfolk County Retirement System v. Cardoso, et al., No. 3:15-cv-01507-AWT. The plaintiff asserted claims against the Company's Board of Directors, Bessemer Trust Co., N.A. ("Bessemer"), as Trustee for the Trusts, and the Company (collectively, "Defendants"). The plaintiff claimed, among other

things, that the Company and its Board of Directors had violated the Company's certificate of incorporation by agreeing to make a payment to the holders of Class A common stock in connection with the Reclassification, and that the Board of Directors had violated its fiduciary duties by structuring the Reclassification in a supposedly coercive way and by allegedly making materially misleading disclosures to shareholders. The plaintiff also claimed, among other things, that Bessemer had aided and abetted the Board of Directors' purported violation of the certificate of incorporation and breach of fiduciary duties. As relief, the plaintiff demanded an injunction against the shareholder vote on the Reclassification, damages, an award of costs and attorneys' fees, and other relief. At the same time as filing its complaint, the plaintiff sent a derivative demand letter to the Board of Directors, making similar allegations of wrongdoing, and demanding, among other things, that the Company file suit against the Board and Bessemer to recover damages supposedly sustained by the Company.

On February 1, 2016, the plaintiff filed an amended direct and derivative complaint. The amended complaint contained allegations and claims for relief that were generally similar to the plaintiff's previous complaint, but also asserted that the plaintiff had the right to sue derivatively on behalf of the Company to recoup damages supposedly sustained by the Company in connection with the Reclassification and included derivative claims. Thereafter, the plaintiff and Defendants engaged in arm's-length settlement discussions. On June 21, 2016, the plaintiff and Defendants entered into a Stipulation of

Settlement (the "Stipulation"), which provided for the complete settlement, release and dismissal of all claims alleged.

Under the Stipulation, among other things, (a) for a period of 150 days from and after the date upon which the settlement became final, Bessemer has agreed it will refrain from engaging in any sales of the Company's common stock unless it determines, in its sole discretion, that the failure to sell the Company's common stock will constitute a breach of its fiduciary duties to the Trusts and their beneficiaries and (b) for a period of 365 days from and after the date upon which the Stipulation was executed, the Company has agreed that it will refrain from knowingly repurchasing any shares of common stock of the Company from Bessemer in a block trade, in a privately negotiated transaction between the Company and Bessemer or through a stock repurchase program similar in structure to the Company's previous stock repurchase program authorized by the Company's Board of Directors. On November 22, 2016, following a hearing, the Court approved the settlement and dismissed the action without prejudice. The settlement became final on December 23, 2016.

The Company is subject to environmental laws and regulations which may require that it investigate and remediate the effects of potential contamination associated with past and present operations as well as those acquired through business combinations. Environmental liabilities are recorded when remedial efforts are probable and the costs can be reasonably estimated. The Company continues to monitor these environmental matters and revalues its liabilities as necessary. Total environmental liabilities were \$5.2 million and \$14.2 million as of December 31, 2016 and 2015, respectively.

The Company accounts for conditional asset retirement and environmental obligations in accordance with the applicable accounting guidance. The accounting guidance defines "conditional asset retirement obligation" as a legal obligation to perform an asset retirement activity in which the timing and/or method of settlement are conditional on a future event that may or may not be within the control of the Company. Accordingly, an entity is required to recognize a liability for the fair value of a conditional asset retirement obligation if the fair value of the liability can be reasonably estimated. Asset retirement obligations were not material as of December 31, 2016 and 2015.

Leases

Total rental expense under operating leases was in \$28.8 million 2016, \$25.7 million in 2015 and \$24.7 million in 2014. The minimum annual rentals on non-cancelable, long-term, operating leases in effect at December 31, 2016 are expected to approximate \$18.7 million in 2017, \$16.7 million in 2018, \$13.0 million in 2019, \$9.3 million in 2020, \$7.0 million in 2021 and \$23.1 million thereafter. The Company's leases primarily consist of operating leases for buildings or equipment. The terms for building leases typically range from month-to-month to up to 12 years, with various renewal periods depending on the terms.

NOTE 15 Capital Stock

Activity in the Company's common shares outstanding is set forth below for the three years ended December 31, 2016 (in thousands):

	Common Stock		Common Stock
	Class A	Class B	
OUTSTANDING AT DECEMBER 31, 2013	7,167	52,005	—
Exercise of stock options/stock appreciation rights	—	155	—

Restricted/performance shares activity, net of forfeitures	—	136	—
Acquisition/surrender of shares	—	(980)	—
OUTSTANDING AT DECEMBER 31, 2014	7,167	51,329	—
Exercise of stock appreciation rights	—	29	—
Director compensation arrangements, net	—	17	—
Restricted/performance shares activity, net of forfeitures	—	122	—
Acquisition/surrender of shares	—	(708)	(119)
Share reclassification	(7,167)	(50,789)	57,956
OUTSTANDING AT DECEMBER 31, 2015	—	—	57,837
Exercise of stock appreciation rights	—	—	78
Director compensation arrangements, net	—	—	6
Restricted/performance shares activity, net of forfeitures	—	—	98
Acquisition/surrender of shares	—	—	(2,487)
OUTSTANDING AT DECEMBER 31, 2016	—	—	55,532

On December 23, 2015, the Company completed the reclassification of its dual-class common stock into a single class of Common Stock (the "Reclassification").

The Reclassification, among other benefits, simplified the Company's capital structure, better aligned voting rights with economic interests of all shareholders, and has eliminated the ability of the Louie E. Roche Trust and the Harvey Hubbell Trust (collectively, the "Trusts"), which, prior to the Reclassification, collectively owned 3,488,460 shares of the Company's Class A common stock, par value \$0.01 per share (the "Class A common stock"), representing approximately 49% of Class A common stock then outstanding, and approximately 36% of the total voting power of the Company's shareholders, to effectively prevent the approval of any matter that comes before the shareholders that requires, under Connecticut law, the approval of holders of two-thirds of the Company's outstanding common stock.

Following the filing of the Amended and Restated Certificate of Incorporation of the Company with the Secretary of the State of Connecticut, the Reclassification became effective at 11:59 p.m. on December 23, 2015 (the "Effective Time"), at which time (i) each holder of Class A common stock as of immediately prior to the Effective Time became entitled to receive cash in the amount of \$28.00 for each share of Class A common stock held ("Class A Cash Consideration") and (ii) each share of Class A common stock issued and outstanding immediately prior to the Effective Time and each share of Class B common stock of the Company, par value \$0.01 per share (the "Class B common stock"), issued and outstanding immediately prior to the Effective Time was reclassified into one share of common stock of the Company, par value \$0.01 per share and having one vote per share upon all matters brought

before any meeting of the shareholders (the "Common Stock"). Trading in the Class A Common Stock and Class B Common Stock ceased after markets closed on December 23, 2015 and trading in the Company's single class of Common Stock commenced on the NYSE on December 24, 2015, under the ticker "HUBB."

Prior to the Reclassification, shares of Class A common stock had twenty votes per share, while shares of Class B common shares had one vote per share. Following the Reclassification, shares of the Company's Common Stock have one vote per share.

The Company accounted for the Reclassification by adjusting the Company's capital stock accounts. The par value of the Class A common stock and the Class B common stock was reclassified to Common Stock par value. Paid-in capital of the Class A Common Stock was zero at the time of the Reclassification and, therefore, the full amount of the Class A Cash Consideration paid in the Reclassification was applied as a reduction to Retained earnings for the fiscal year ended December 31, 2015.

For accounting purposes, the Company treats repurchased shares as constructively retired when acquired and accordingly charges the purchase price against Common Stock par value, Additional paid-in capital and Retained earnings to the extent required. Shares may be repurchased through the Company's stock repurchase program, acquired by the Company from employees under the Hubbell Incorporated Stock Option Plan for Key Employees (the "Option Plan") or surrendered to the Company by employees in settlement of their minimum tax liability on vesting of restricted shares and performance shares

under the Hubbell Incorporated 2005 Incentive Award Plan as amended and restated, (the "Award Plan").

In connection with the completion of the Reclassification, the Company entered into a Second Amended and Restated Rights Agreement, dated December 23, 2015 (the "Rights Agreement"), between the Company and Computershare Inc. (successor to Mellon Investor Services, L.L.C.), as rights agent,

under which holders of Common Stock had a preferred share purchase right for each share of Common Stock (the "Rights"). The Rights expired at the close of business on December 17, 2016 and the Rights Agreement is no longer in effect.

Shares of the Company's common stock were reserved at December 31, 2016 as follows (in thousands):

	Common Stock
Future grant of stock-based compensation	3,194
Shares reserved under other equity compensation plans	165
TOTAL	3,359

HUBBELL INCORPORATED - Form 10-K 67

NOTE 16 Stock-Based Compensation

As of December 31, 2016, the Company had various stock-based awards outstanding which were issued to executives and other key employees. The Company recognizes the grant-date fair value of all stock-based awards to employees over their respective requisite service periods (generally equal to an award's vesting period), net of estimated forfeitures. A stock-based award is considered vested for expense attribution purposes when the employee's retention of the award is no longer contingent on providing subsequent service. Accordingly, the Company generally recognizes compensation cost immediately for awards granted to retirement-eligible individuals or over the period from the grant date to the date retirement eligibility is achieved, if less than the stated vesting period.

The Company's long-term incentive program for awarding stock-based compensation uses a combination of restricted stock, stock appreciation rights ("SARs"), and performance shares of the Company's Common Stock pursuant to the Award Plan. The Award Plan was amended and restated during 2015 to add an additional 2.8 million shares. Under the Award Plan, the Company may authorize up to 9.7 million shares of Common Stock in settlement of restricted stock, performance shares, SARs or any-post 2004 grants of stock options. The Company issues new shares for settlement of any stock-based awards. In 2016, the Company granted stock-based awards using a combination of restricted stock, SARs and performance shares.

On December 23, 2015, the Company completed the reclassification of its dual-class common stock into a single class of Common Stock (the "Reclassification"), as more fully described in Note 15 — Capital Stock. At the effective time of the Reclassification, each outstanding stock-based award granted under the Award Plan was adjusted by substituting, on a one for one basis, shares of Common Stock for shares the of Class B Common Stock granted under the Award Plan.

In 2016, 2015 and 2014, the Company recorded \$22.3 million, \$17.0 million and \$16.4 million of stock-based compensation costs, respectively. The total income tax benefit/(expense) recognized in 2016 was \$8.2 million, \$6.2 million during 2015, and \$7.8 million during 2014. The net tax windfall recorded as a result of exercise or vesting (depending on the type of award) was \$3.7 million, \$0.9 million, and \$9.2 million for the years ended December 31, 2016, 2015 and 2014, respectively. As of December 31, 2016, there was \$29.3 million, pretax, of total unrecognized compensation cost related to non-vested share-based compensation arrangements. This cost is expected to be recognized through 2019.

Stock-based compensation expense is recorded in S&A expense as well as Cost of goods sold. Of the total 2016 expense, \$21.6 million was recorded to S&A expense and \$0.7 million was recorded to Cost of goods sold. In 2015 and 2014, \$16.2 million and \$15.7 million, respectively, was recorded to S&A expense and \$0.8 million in 2015 and \$0.7 million in 2014, was recorded to Cost of goods sold. Stock-based compensation costs capitalized to inventory was \$0.2 million in 2016, 2015 and 2014.

Each of the compensation arrangements is discussed below.

Restricted Stock

The Company issues several types of restricted stock awards all of which are considered outstanding at the time of grant, as the award holders are entitled to dividends and voting rights. Unvested restricted stock awards are considered participating securities in computing earnings per share. Restricted stock granted is not transferable and is subject to forfeiture in the event of the recipient's termination of employment prior to vesting.

Restricted Stock Issued to Employees - Service Condition

Service-based restricted stock awards are expensed on a straight-line basis over the requisite service period. The restricted stock vests in one-third increments annually for three years on each anniversary of the date of grant. The restricted stock fair values are measured using the average of the high and low trading prices of the Company's common stock on the most recent trading day immediately preceding the grant date ("measurement date").

Restricted Stock Issued to Employees - Market Condition

Certain restricted stock awards issued in 2014, 2015 and 2016 will vest subject to the achievement of a market-based condition. The awards are expensed on a straight-line basis over the requisite service period which starts on the date of the grant and ends upon the completion of the performance period. Expense is recognized irrespective of the market condition being achieved.

The market-based condition is the Company's total shareholder return ("TSR") compared to the TSR generated by the companies that comprise the S&P Capital Goods 900 Index and is measured over a three year performance period beginning on January 1st of the first year and ending on December 31st of the third year. The awards will vest contingent upon achievement of the market condition, service through the requisite service period or the retirement-eligibility date. If the market-based condition is achieved,

the awards will vest at 100% of the restricted stock awards granted. If the market-based condition is not achieved the awards will not vest. The fair value of these awards was determined based upon a lattice model.

The following table summarizes the assumptions used in estimating the fair value of these awards:

Stock Price on Measurement Date	Expected Volatility	Risk Free Interest Rate	Expected Term	Weighted Avg. Grant Date Fair Value
2016\$ 113.69	25.6	% 1.4	% 3 Years	\$ 104.93
2015\$ 97.48	23.3	% 1.3	% 3 years	\$ 87.61
2014\$ 106.44	22.7	% 1.0	% 3 years	\$ 95.96

Restricted stock Issued to Employees - Performance Condition

Certain restricted stock issued in 2013 will vest subject to the achievement of an annual performance-based condition. The awards vest in one-third increments for each of the years ending December 31, 2014, 2015 and 2016, contingent upon meeting the annual performance condition. These awards are expensed on a graded basis over the requisite service period. The probability of vesting is reassessed each reporting period and compensation cost is adjusted accordingly. The fair value of the award is measured based upon the average of the high and low trading prices of the Company's common stock on the measurement date.

The performance condition for the year ending December 31, 2016 was met and 8,457 shares vested and were approved by the Compensation Committee in February 2017. The fair value of the shares at vesting was \$0.9 million.

Restricted Stock Issued to Non-employee Directors

In 2016, 2015 and 2014, each non-employee director received a restricted stock grant. These grants were made on the date of the annual meeting of shareholders and vested or will vest at the following year's annual meeting of shareholders, upon a change of control or termination of service by reason of death. These shares will be subject to forfeiture if the director's service terminates prior to the date of the next regularly scheduled annual meeting of shareholders to be held in the following calendar year. During the years 2016, 2015 and 2014, the Company issued to non-employee directors 9,128 shares, 8,008 shares, and 10,329 shares, respectively.

Activity related to both employee and non-employee restricted stock for the year ended December 31, 2016 is as follows (in thousands, except per share amounts):

	Shares	Weighted Average Grant Date Fair Value/Share
RESTRICTED STOCK AT DECEMBER 31, 2015	199	\$ 102.22
Shares granted	87	109.95
Shares vested	(57)) 104.20
Shares forfeited	(5)) 101.99
RESTRICTED STOCK AT DECEMBER 31, 2016	224	\$ 102.37

The weighted average fair value per share of restricted stock granted during the years 2016, 2015 and 2014 was \$109.95, \$96.26 and \$105.35, respectively. The total fair value of restricted stock vested during the years 2016, 2015 and 2014 was \$6.4 million, \$7.7 million and \$7.0 million, respectively.

Stock Appreciation Rights

SARs granted entitle the recipient to the difference between the fair market value of the Company's Common Stock on the date of exercise and the grant price as determined using the average of the high and the low trading prices of the Company's common stock on the measurement date. This amount is payable in shares of the Company's Common Stock. SARs vest and become exercisable in three equal installments during the first three years following their grant date and expire ten years from the grant date.

Activity related to SARs for the year ended December 31, 2016 is as follows (in thousands, except per share amounts):

	Number of Rights	Weighted Average Exercise Price	Weighted Average Term	Contractual Remaining	Aggregate Intrinsic Value
OUTSTANDING AT DECEMBER 31, 2015	1,704	\$ 83.77			
Granted	382	113.48			
Exercised	(270)	53.50			
Forfeited	(4)	100.39			
Canceled	(1)	106.44			
OUTSTANDING AT DECEMBER 31, 2016	1,811	\$ 94.51	7.4		\$ 40,195
EXERCISABLE AT DECEMBER 31, 2016	1,108	\$ 86.35	6.2		\$ 33,640

The aggregated intrinsic value of SARs exercised during 2016, 2015 and 2014 was \$13.8 million, \$4.8 million and \$19.4 million, respectively.

The fair value of each SAR award was measured using the Black-Scholes option pricing model.

The following table summarizes the weighted-average assumptions used in estimating the fair value of the SARs granted during the years 2016, 2015 and 2014:

Expected Dividend Yield	Expected Volatility	Risk Free Interest Rate	Expected Term	Weighted Avg. Grant Date Fair Value of 1 SAR
2016 2.6 %	22.3 %	1.9 %	5.5 Years	\$ 18.76
2015 2.7 %	22.7 %	1.7 %	5.5 Years	\$ 16.05
2014 2.0 %	21.8 %	1.6 %	5.3 Years	\$ 18.42

The expected dividend yield was calculated by dividing the Company's expected annual dividend by the average stock price for the past three months. Expected volatilities are based on historical volatilities of the Company's stock for a period consistent with the expected term. The expected term of SARs granted was based upon historical exercise behavior of stock options and SARs. The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of grant for the expected term of the award.

Performance Shares

Performance shares represent the right to receive a share of the Company's Common Stock after a three year period subject to the achievement of certain market or performance conditions established by the Company's Compensation Committee. Partial vesting in these awards may occur after separation from the Company for retirement eligible employees. Shares are not vested until approved by the Company's Compensation Committee.

Performance Shares - Market Condition

In December 2016, 2015 and 2014, the Company granted 29,012, 32,687 and 28,871, respectively, of performance shares that will vest subject to a market condition and service through the performance period. The market condition associated with the awards is the Company's TSR compared to the TSR generated by the companies of a reference index over a three year performance period. Performance at target will result in vesting and issuance of the number of performance shares granted, equal to 100% payout. Performance below or above target can result in issuance in the range of 0%-200% of the number of shares granted. Expense is recognized irrespective of the market condition being achieved.

In February 2017, the Company paid out 17,260 shares related to the December 2013 performance award grant. The performance period associated with this award was from January 1, 2014 through December 31, 2016 and was based upon the Company's TSR compared to the TSR generated by the other companies that comprise the S&P Mid-Cap 400 Index. The number of shares vested in February 2017 was based upon achieving 64% of the market-based criteria and the fair value of the awards at vesting was \$2.2 million.

The fair value of the performance share awards with a market condition for the fiscal years 2016, 2015 and 2014 was determined based upon a lattice model.

70HUBBELL INCORPORATED - Form 10-K

The following table summarizes the related assumptions used to determine the fair values of the performance share awards with a market condition granted during the years 2016, 2015 and 2014:

Stock Price on Measurement Date	Dividend Yield	Expected Volatility	Risk Free Interest Rate	Expected Term	Weighted Avg. Grant Date Fair Value
2016\$ 113.69	2.5 %	25.6 %	1.4 %	3 Years	\$ 126.65
2015\$ 97.48	2.6 %	23.3 %	1.3 %	3 Years	\$ 105.77
2014\$ 106.44	2.1 %	22.7 %	1.0 %	3 Years	\$ 117.55

Expected volatilities are based on historical volatilities of the Company's stock over a three year period. The risk free interest rate is based on the U.S. Treasury yield curve in effect at the time of the grant for the expected term of the award.

Performance Shares - Performance Condition

In December 2016, 2015 and 2014 the Company granted 29,012, 32,687 and 28,871 respectively, of performance share awards that are subject to a performance condition and service requirement during the three year performance period. The performance condition associated with the awards is based on the Company's net sales growth compared to the net sales growth of the companies of a reference index, further adjusted by the Company achieving a target net income margin, each measured over the same three year performance period. Performance at target will result in vesting and issuance of the number of performance shares granted, equal to 100% payout. Performance below or above target can result in issuance in the range of 0%-250% of the number of shares granted.

The fair value of the award is measured based upon the average of the high and low trading prices of the Company's common stock on the measurement date reduced by the present value of dividends expected to be paid during the requisite service period. The Company expenses these awards on a straight-line basis over the requisite service period. The weighted average fair value per share was \$105.48 for the awards granted in 2016.

The following table summarizes the attributes of the performance shares granted during 2016, 2015 and 2014:

Shares Outstanding at 12/31/2016	Fair Value	Performance Period	Payout Range
2016 29,012	105.48	Jan 2017-Dec 2019	0-250%
2015 31,553	97.48	Jan 2016-Dec 2018	0-250%
2014 24,008	106.44	Jan 2015-Dec 2017	0-250%

NOTE 17 Earnings Per Share

The Company computes earnings per share using the two-class method, which is an earnings allocation formula that determines earnings per share for common stock and participating securities. Restricted stock granted by the Company is considered a participating security since it contains a non-forfeitable right to dividends.

The following table sets forth the computation of earnings per share for the three years ended December 31 (in millions, except per share amounts):

	2016	2015	2014
Numerator:			
Net income attributable to Hubbell	\$293.0	\$277.3	\$325.3
Less: Earnings allocated to participating securities	(0.9)	(0.7)	(0.9)
Net income available to common shareholders	\$292.1	\$276.6	\$324.4
Denominator:			
Average number of common shares outstanding	55.5	57.7	58.8
Potential dilutive shares	0.2	0.3	0.4
Average number of diluted shares outstanding	55.7	58.0	59.2
Earnings per share:			
Basic	\$5.26	\$4.79	\$5.51
Diluted	\$5.24	\$4.77	\$5.48

The Company did not have any significant anti-dilutive securities in 2016, 2015 or 2014. The calculation of diluted earnings per share for the year ended December 31, 2016, 2015 and 2014 excludes 58,418, 30,482 and an insignificant amount of weighted average of performance shares, respectively, that are subject to a performance condition. These shares are excluded from the calculation of diluted earnings per share because all necessary performance conditions have not been satisfied at the end of the respective reporting periods. Refer to Note 16 — Stock-Based Compensation for further information about those awards.

Other Comprehensive Loss

A summary of the changes in Accumulated other comprehensive loss (net of tax) for the three years ended December 31, 2016 is provided below (in millions):

(Debit) credit	Cash Flow Hedge (Loss) Gain	Unrealized Gain (Loss) on Available-for-Sale Securities	Pension and Post Retirement Benefit Plan Adjustment	Cumulative Translation Adjustment	Total
BALANCE AT DECEMBER 31, 2013	\$ (0.2)	\$ 0.4	\$ (67.0)	\$ (4.2)	\$(71.0)
Other comprehensive income (loss) before Reclassifications	0.9	(0.1)	(59.8)	(35.7)	(94.7)
Amounts reclassified from accumulated other comprehensive loss	(0.7)	—	2.1	—	1.4

BALANCE AT DECEMBER 31, 2014	\$ —	\$ 0.3	\$ (124.7)	\$ (39.9)	\$(164.3)
Other comprehensive income (loss) before Reclassifications	1.7	(0.3)	(22.5)	(45.5)	(66.6)
Amounts reclassified from accumulated other comprehensive loss	(0.3)	—	7.0	—	6.7
Current period other comprehensive income (loss)	1.4	(0.3)	(15.5)	(45.5)	(59.9)
BALANCE AT DECEMBER 31, 2015	\$ 1.4	\$ —	\$ (140.2)	\$ (85.4)	\$(224.2)
Other comprehensive income (loss) before Reclassifications	(1.4)	(1.2)	(48.5)	(35.4)	(86.5)
Amounts reclassified from accumulated other comprehensive loss	—	—	8.2	—	8.2
Current period other comprehensive income (loss)	(1.4)	(1.2)	(40.3)	(35.4)	(78.3)
BALANCE AT DECEMBER 31, 2016	\$ —	\$ (1.2)	\$ (180.5)	\$ (120.8)	\$(302.5)

A summary of the gain (loss) reclassifications out of Accumulated other comprehensive loss for the two years ended December 31 is provided below (in millions):

Details about Accumulated Other Comprehensive Loss Components	2016	2015	Location of Gain (Loss) Reclassified into Income
Cash flow hedges gain (loss):			
Forward exchange contracts	\$ (0.3)	\$ —	Net Sales
	0.3	0.4	Cost of goods sold
	—	0.4	Total before tax
	—	(0.1)	Tax (expense) benefit
	\$ —	\$ 0.3	Gain (loss) net of tax
Amortization of defined benefit pension and post retirement benefit items:			
Prior-service costs	\$ 0.9 (a)	\$ 0.8 (a)	
Actuarial gains/(losses)	(13.9) (a)	(12.0) (a)	

Edgar Filing: HUBBELL INC - Form 10-K

	(13.0)	(11.2)	Total before tax
	4.8	4.2	Tax benefit (expense)
	\$ (8.2)	\$ (7.0)	(Loss) gain net of tax
Losses reclassified into earnings	\$ (8.2)	\$ (6.7)	(Loss) gain net of tax

(a) These accumulated other comprehensive loss components are included in the computation of net periodic pension cost (see Note 10 — Retirement Benefits for additional details).

NOTE 19 Industry Segments and Geographic Area Information

Nature of Operations

Hubbell Incorporated was founded as a proprietorship in 1888, and was incorporated in Connecticut in 1905. Hubbell designs, manufactures and sells quality electrical and electronic products for a broad range of non-residential and residential construction, industrial and utility applications. Products are either sourced complete, manufactured or assembled by subsidiaries in the United States, Canada, Switzerland, Puerto Rico, China, Mexico, Italy, the UK, Brazil, Australia and Ireland. Hubbell also participates in joint ventures in Taiwan and Hong Kong, and maintains offices in Singapore, China, India, Mexico, South Korea and countries in the Middle East.

The Company's reporting segments consist of the Electrical segment and the Power segment, as described below.

The Electrical segment is comprised of businesses that sell stock and custom products including standard and special application wiring device products, rough-in electrical products, connector and grounding products, lighting fixtures and controls, components and assemblies for the natural gas distribution market and other electrical equipment. The products are typically used in and around industrial, commercial and institutional facilities by electrical contractors, maintenance personnel, electricians, utilities, and telecommunications companies. In addition, certain businesses design and manufacture a variety of high voltage test and measurement equipment, industrial controls and communication systems used in the non-residential and industrial markets. Many of these products are designed such that they can also be used in harsh and hazardous locations where a potential for fire and explosion exists due to the presence of flammable gasses and vapors. Harsh and hazardous products are primarily used in the oil and gas (onshore and offshore) and mining industries. There are also a variety of lighting fixtures, wiring devices and electrical products that have residential and utility applications. These products are primarily sold through electrical and industrial distributors, home centers, some retail and hardware outlets, lighting showrooms

and residential product oriented internet sites. Special application products are sold primarily through wholesale distributors to contractors, industrial customers and OEMs. High voltage products are also sold direct to customers through our sales engineers. The Electrical segment is comprised of three business groups, which have been aggregated as they have similar economic characteristics, customers and distribution channels, among other factors.

The Power segment consists of operations that design and manufacture various distribution, transmission, substation and telecommunications products primarily used by the electrical utility industry. In addition, certain of these products are used in the civil construction and transportation industries. Products are sold to distributors and directly to users such as electric utilities, telecommunication companies, mining operations, industrial firms, construction and engineering firms.

Financial Information

Financial information by industry segment, product class and geographic area for each of the three years ended December 31, 2016, 2015 and 2014 is summarized below (in millions). When reading the data the following items should be noted:

Net sales comprise sales to unaffiliated customers — inter-segment and inter-area sales are not significant.

Segment operating income consists of net sales less operating expenses, including total corporate expenses, which are generally allocated to each segment on the basis of the segment's percentage of consolidated net sales. Interest expense and investment income and other expense, net have not been allocated to segments as these items are centrally

managed by the Company.

• General corporate assets not allocated to segments are principally cash, prepaid pensions, investments and deferred taxes. These assets have not been allocated as they are centrally managed by the Company.

INDUSTRY SEGMENT DATA

	2016	2015	2014
Net Sales:

TOTAL LONG-LIVED ASSETS	\$1,963.0	\$1,814.8	\$1,692.2

HUBBELL INCORPORATED - Form 10-K 75

On a geographic basis, the Company defines “international” as operations based outside of the United States and its possessions. As a percentage of total net sales, shipments from foreign operations directly to third parties were 10% in 2016, 11% in 2015 and 14% in 2014, with the Canadian and UK operations representing approximately 33% and 21%, respectively, of 2016 total international net sales. Of the remaining 2016 international sales Switzerland, Brazil, and Mexico represent 12%, 10%, and 9%, respectively.

Long-lived assets, excluding deferred tax assets, of international subsidiaries were 10% of the consolidated total in 2016, 10% in 2015 and 12% in 2014, with the UK, Mexico and Canada operations representing approximately 25%, 22%, and 17%, respectively, of the 2016 international total. Export sales from United States operations were \$213.8 million in 2016, \$224.9 million in 2015 and \$234.5 million in 2014.

NOTE 20 Guarantees

The Company records a liability equal to the fair value of guarantees in the Consolidated Balance Sheet in accordance with the accounting guidance for guarantees. When it is probable that a liability has been incurred and the amount can be reasonably estimated, the Company accrues for costs associated with guarantees. The most likely costs to be incurred are accrued based on an evaluation of currently available facts and, where no amount within a range of estimates is more likely, the minimum is accrued.

As of December 31, 2016, the fair value and maximum potential payment related to the Company’s guarantees were not material.

The Company offers product warranties which cover defects on most of its products. These warranties primarily apply to products that are properly installed, maintained and used for their intended purpose. The Company accrues estimated

warranty costs at the time of sale. Estimated warranty expenses, recorded in cost of goods sold, are based upon historical information such as past experience, product failure rates, or the estimated number of units to be repaired or replaced. Adjustments are made to the product warranty accrual as claims are incurred, additional information becomes known or as historical experience indicates.

Changes in the accrual for product warranties in 2016 are set forth below (in millions):

BALANCE AT DECEMBER 31, 2014	\$13.7
Provision	10.0
Expenditures/other	(10.5)
BALANCE AT DECEMBER 31, 2015	\$13.2
Provision	9.7
Expenditures/other	(9.1)
BALANCE AT DECEMBER 31, 2016	\$13.8

NOTE 21 Restructuring Costs

During 2016, we incurred costs for restructuring actions initiated in 2016 as well as costs involving restructuring actions initiated in the prior year. Our restructuring actions are associated with cost reduction efforts that include the consolidation of manufacturing and distribution facilities as well as workforce reductions and the sale or exit of business units we determine to be non-strategic. Restructuring costs are primarily severance and employee benefits, asset impairments, as well as facility closure, contract termination and certain pension costs that are directly related to restructuring actions. These costs are predominantly settled in cash from our operating activities and are generally settled within one year, with the exception of asset impairments, which are non-cash, and a \$12.5 million charge in the fourth quarter of 2016 to recognize the estimated liability associated with the withdrawal from a multi-employer pension plan, which is expected to be settled over approximately 19 years.

Pre-tax restructuring costs incurred in each of our segments and the location of the costs in the Consolidated Statement of Income for the years ended December 31, 2016, 2015 and 2014 are as follows (in millions):

Year Ended December 31, 2014	Cost of goods sold	Selling & administrative expense	Total
Electrical Segment	\$ 3.4	\$ 1.7	\$ 5.1
Power Segment	—	—	—
Total 2014 Restructuring Costs	\$ 3.4	\$ 1.7	\$ 5.1
Year Ended December 31, 2015			
Electrical Segment	\$ 14.5	\$ 7.2	\$ 21.7
Power Segment	0.8	1.1	1.9
Total 2015 Restructuring Costs	\$ 15.3	\$ 8.3	\$ 23.6
Year Ended December 31, 2016			
Electrical Segment	\$ 27.3	\$ 6.6	\$ 33.9
Power Segment	0.2	0.9	1.1
Total 2016 Restructuring Costs	\$ 27.5	\$ 7.5	\$ 35.0

The following table summarizes the accrued liabilities for our restructuring actions (in millions):

	Beginning Accrued Restructuring Balance 1/1/16	Pre-tax Restructuring Costs	Utilization and Foreign Exchange	Ending Accrued Restructuring Balance 12/31/2016
2016 Restructuring Actions				
Severance	\$ —	\$ 13.8	\$ (4.4)	\$ 9.4
Asset write-downs	—	2.9	(2.9)	—
Facility closure and other costs ^(a)	—	15.1	(1.2)	13.9
Total 2016 Restructuring Actions	\$ —	\$ 31.8	\$ (8.5)	\$ 23.3
2015 Restructuring Actions				
Severance	\$ 7.4	\$ 0.6	\$ (7.0)	\$ 1.0
Asset write-downs	—	0.1	(0.1)	—
Facility closure and other costs	0.4	2.5	(2.7)	0.2
Total 2015 Restructuring Actions	\$ 7.8	\$ 3.2	\$ (9.8)	\$ 1.2
Total Restructuring Actions	\$ 7.8	\$ 35.0	\$ (18.3)	\$ 24.5

(a) Facility closure and other costs in 2016 include a charge of approximately \$12.5 million to accrue the estimated liability associated with the anticipated withdrawal from a multi-employer pension plan as a result of a restructuring action.

The actual and expected costs for our restructuring actions are as follows (in millions):

	Expected Costs	Costs incurred in 2014	Costs incurred in 2015	Costs incurred in 2016	Remaining costs at 12/31/16
2016 Restructuring Actions					
Electrical Segment	\$ 40.3	\$ —	\$ —	\$ 30.7	\$ 9.6
Power Segment	1.2	—	—	1.1	0.1
Total 2016 Restructuring Actions	\$ 41.5	\$ —	\$ —	\$ 31.8	\$ 9.7
2015 Restructuring Actions					
Electrical Segment	\$ 23.0	\$ —	\$ 17.3	\$ 3.2	\$ 2.5
Power Segment	1.9	—	1.9	—	—
Total 2015 Restructuring Actions	\$ 24.9	\$ —	\$ 19.2	\$ 3.2	\$ 2.5
2014 Restructuring Actions					
Electrical Segment	\$ 9.5	\$ 5.1	\$ 4.4	\$ —	\$ —
Power Segment	—	—	—	—	—
Total 2014 Restructuring Actions	\$ 9.5	\$ 5.1	\$ 4.4	\$ —	\$ —
Total Restructuring Actions	\$ 75.9	\$ 5.1	\$ 23.6	\$ 35.0	\$ 12.2

Costs incurred in 2016 relating to 2016 Restructuring Actions in the Electrical segment in the preceding table include the \$12.5 million previously mentioned charge representing the estimated withdrawal liability from a multi-employer pension plan. Any potential future liability in excess of the amount already recognized in 2016 is not included in the remaining costs at December 31, 2016 in the preceding table. Additional information about the estimated withdrawal liability is included in Note 10 — Retirement Benefits in the Notes to Consolidated Financial Statements.

NOTE 22 Quarterly Financial Data (Unaudited)

The table below sets forth summarized quarterly financial data for the years ended December 31, 2016 and 2015 (in millions, except per share amounts):

	Reported First Quarter	Reported Second Quarter	Reported Third Quarter	Reported Fourth Quarter
2016				
Net sales	\$ 834.8	\$ 908.8	\$ 907.4	\$ 854.2
Cost of goods sold	\$ 574.9	\$ 615.3	\$ 618.7	\$ 595.6
Gross profit	\$ 259.9	\$ 293.5	\$ 288.7	\$ 258.6
Selling & administrative expenses	\$ 158.0	\$ 161.4	\$ 152.7	\$ 150.8
Net income	\$ 62.0	\$ 82.0	\$ 88.1	\$ 65.7
Net Income attributable to Hubbell	\$ 60.9	\$ 81.0	\$ 86.7	\$ 64.4
Earnings per share — Basic	\$ 1.08	\$ 1.46	\$ 1.56	\$ 1.16
Earnings per share — Diluted	\$ 1.08	\$ 1.45	\$ 1.56	\$ 1.16
	Reported First Quarter	Reported Second Quarter	Reported Third Quarter	Reported Fourth Quarter
2015				
Net sales	\$ 809.7	\$ 874.0	\$ 877.0	\$ 829.7
Cost of goods sold	\$ 557.9	\$ 590.9	\$ 587.0	\$ 562.8
Gross profit	\$ 251.8	\$ 283.1	\$ 290.0	\$ 266.9
Selling & administrative expenses	\$ 146.8	\$ 156.4	\$ 159.0	\$ 155.0
Net income	\$ 63.4	\$ 81.3	\$ 74.7	\$ 62.7

Earnings per share — Basic	\$ 1.07	\$ 1.39	\$ 1.27	\$ 1.06
Earnings per share — Diluted	\$ 1.07	\$ 1.37	\$ 1.27	\$ 1.06

ITEM 9 Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

ITEM 9A Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. Management necessarily applied its judgment in assessing the costs and benefits of such controls and procedures which, by their nature, can provide only reasonable assurance that the controls and procedures will meet their objectives.

The Company carried out an evaluation, under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as defined in Exchange Act Rules 13a-15(e) and 15d-15(e), as of the end of the period covered by this report on Form 10-K. Based upon that evaluation, each of the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective at a reasonable assurance level. Management's annual report on internal control over financial reporting and the independent registered public accounting firm's audit report on the effectiveness of our internal control over financial reporting as of December 31, 2016 are included in Item 8 of this Annual Report on Form 10-K.

There have been no changes in the Company's internal control over financial reporting that occurred during the Company's most recently completed quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 9B Other Information

Not applicable.

PART III

ITEM 10 Directors, Executive Officers and Corporate Governance⁽¹⁾ITEM 11 Executive Compensation⁽²⁾

ITEM 12 Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Equity Compensation Plan Information

The following table provides information as of December 31, 2016 with respect to the Company's common stock that may be issued under the Company's equity compensation plans (in thousands, except per share amounts):

Plan Category	A	B	C
	Number of Securities to be Issued upon Exercise of Outstanding Options, Warrants and Rights	Weighted Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column A)
Equity Compensation Plans Approved by Shareholders ^(a)	2,209	^{(c)(e)} \$ 94.51	^(f) 3,194
Equity Compensation Plans Not Requiring Shareholder Approval ^(b)	63	^{(c)(d)} —	165
TOTAL	2,272	\$ 94.51	3,359

(a) The Company's (1) Stock Option Plan for Key Employees and (2) 2005 Incentive Award Plan as amended and restated.

(b) The Company's Deferred Compensation Plan for Directors as amended and restated.

(c) Hubbell Common Stock.

(d) Represents amount of shares currently deferred under this plan. These shares are not included in the total weighted average exercise price included in column B.

(e) Includes 398 thousand performance share awards assuming a maximum payout target. The Company does not anticipate that the maximum payout target will be achieved for all of these awards.

(f) Weighted average exercise price excludes performance share awards included in column A.

The remaining information required by this item is incorporated by reference to the subheading "Voting Rights and Security Ownership of Certain Beneficial Owners and Management" of the definitive proxy statement for the Company's annual meeting of shareholders scheduled to be held on May 3, 2017.

(1) Certain of the information required by this item regarding executive officers is included under the subheading "Executive Officers of the Registrant" at the end of Part I of this Form 10-K and the remaining required information

is incorporated by reference to the subheadings “Item 1 – Election of Directors,” “General – Section 16(a) Beneficial Ownership Reporting Compliance,” “Corporate Governance – Code of Business Conduct and Ethics,” and “Corporate Governance – Board Committees – Audit Committee” of the definitive proxy statement for the Company’s annual meeting of shareholders scheduled to be held on May 3, 2017.

The information required by this item is incorporated by reference to the subheadings “Compensation Discussion (2) and Analysis,” “Compensation Committee Report,” “Executive Compensation” and “Compensation of Directors” of the definitive proxy statement for the Company’s annual meeting of shareholders scheduled to be held on May 3, 2017.

ITEM 13 Certain Relationships and Related Transactions and Director Independence⁽³⁾

ITEM 14 Principal Accountant Fees and Services⁽⁴⁾

The information required by this item is incorporated by reference to the subheadings “General – Review and (3) Approval of Related Person Transactions” and “Corporate Governance – Director Independence” of the definitive proxy statement for the Company’s annual meeting of shareholders scheduled to be held on May 3, 2017.

The information required by this item is incorporated by reference to the heading “Item 2 – Ratification of the (4) Selection of Independent Registered Public Accounting Firm” of the definitive proxy statement for the Company’s annual meeting of shareholders scheduled to be held on May 3, 2017.

PART IV
