Item 2.02 Results of Operations and Financial Condition

GMAC SECOND QUARTER 2005 EARNINGS SUMMARY

General Motors Acceptance Corporation (GMAC) earned \$816 million in the second quarter of 2005, representing a modest decline of \$30 million from the record earnings of \$846 million earned in the second quarter of 2004. Although net income from GMAC's Financing operations was lower as compared to a year ago, increased earnings from GMAC's Mortgage and Insurance operations helped sustain overall earnings for the quarter. These results were achieved despite GMAC credit rating downgrades during the second quarter of 2005. In addition, GMAC continued to maintain adequate liquidity, with cash reserve balances at June 30, 2005 of \$22.2 billion, comprised of \$19.7 billion in cash and cash equivalents and \$2.5 billion in cash invested in marketable securities. GMAC also provided a significant source of cash flow to GM through the payment of a \$500 million dividend in the second quarter, bringing total year to date dividends paid to its parent to \$1 billion.

Net income from Financing operations totaled \$378 million in the second quarter of 2005, as compared with \$452 million earned in the same period of the prior year. The decrease reflects the unfavorable impact of lower net interest margins as a result of increased borrowing costs. The decline in net interest margins was somewhat mitigated by the impact of improved used vehicle prices on lease terminations and favorable consumer credit loss experience in the second quarter of 2005 as compared to the second quarter of 2004.

Mortgage operations earned \$338 million in the second quarter of 2005, up from the \$319 million earned in the second quarter of the prior year. While mortgage market interest rates were lower in the second quarter of 2005, as compared to the same period in the prior year, GMAC's Mortgage operations experienced gains on certain investments and benefited from favorable net servicing results. However, the interest rate environment contributed to lower gains on sales of loans, which had a negative impact on second quarter results.

GMAC's Insurance operations generated record quarterly earnings of \$100 million in the second quarter of 2005, an increase of 33% from the \$75 million earned in the second quarter of 2004. Continued improvement in net underwriting revenue due to favorable loss experience contributed to the increase in earnings. In addition, GMAC Insurance maintained a strong investment portfolio, with a market value of \$7.5 billion at June 30, 2005.

For the second half of 2005, GMAC expects solid operating results, with net income expected to exceed \$2.5 billion for the full year, while continuing to be a significant contributor to GM's cash flow, with expected dividends to GM in 2005 in excess of \$2 billion.

* * * *

This earnings summary contains various forward-looking statements within the meaning of applicable federal securities laws that are based upon GMAC's current expectations and assumptions concerning future events, which are subject to a number of risks and uncertainties that could cause actual results to differ
