

INTERNATIONAL BUSINESS MACHINES CORP
Form 10-Q
April 28, 2015

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, DC 20549

FORM 10 - Q

QUARTERLY REPORT PURSUANT TO SECTION 13 or 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934
FOR THE QUARTER ENDED MARCH 31, 2015

1-2360

(Commission file number)

INTERNATIONAL BUSINESS MACHINES CORPORATION

(Exact name of registrant as specified in its charter)

New York
(State of incorporation)

13-0871985
(IRS employer identification number)

Armonk , New York
(Address of principal executive offices)

10504
(Zip Code)

914-499-1900

(Registrant's telephone number)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The registrant had 984,734,067 shares of common stock outstanding at March 31, 2015.

Index

Part I - Financial Information:

Item 1. Consolidated Financial Statements:

Consolidated Statement of Earnings for the three months ended March 31, 2015 and 2014

Consolidated Statement of Comprehensive Income for the three months ended March 31, 2015 and 2014

Consolidated Statement of Financial Position at March 31, 2015 and December 31, 2014

Consolidated Statement of Cash Flows for the three months ended March 31, 2015 and 2014

Consolidated Statement of Changes in Equity for the three months ended March 31, 2015 and 2014

Notes to Consolidated Financial Statements

Item 2. Management's Discussion and Analysis of Results of Operations and Financial Condition

Item 4. Controls and Procedures

Part II - Other Information:

Item 1. Legal Proceedings

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds and Issuer Repurchases of Equity Securities

Item 6. Exhibits

Notes to Consolidated Financial Statements:

1. Basis of Presentation: The accompanying Consolidated Financial Statements and footnotes of the International Business Machines Corporation (IBM or the company) have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). The financial statements and footnotes are unaudited. In the opinion of the company's management, these statements include all adjustments, which are only of a normal recurring nature, necessary to present a fair statement of the company's results of operations, financial position and cash flows.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amount of assets, liabilities, revenue, costs, expenses and other comprehensive income/(loss) that are reported in the Consolidated Financial Statements and accompanying disclosures. These estimates are based on management's best knowledge of current events, historical experience, actions that the company may undertake in the future and on various other assumptions that are believed to be reasonable under the circumstances. As a result, actual results may be different from these estimates. Refer to the company's 2014 Annual Report on pages 68 to 71 for a discussion of the company's critical accounting estimates.

On October 20, 2014, the company announced a definitive agreement to divest its Microelectronics business and manufacturing operations to GLOBALFOUNDRIES. The assets and liabilities of the Microelectronics business are reported as held for sale at March 31, 2015. The operating results of the Microelectronics business have been reported as discontinued operations. Prior periods have been reclassified to conform to this presentation to allow for a meaningful comparison of continuing operations. Refer to Note 9, "Acquisitions/Divestitures," for additional information on the transaction. In addition, in the first quarter of 2015, the company renamed its Systems & Technology segment to Systems Hardware.

Interim results are not necessarily indicative of financial results for a full year. The information included in this Form 10-Q should be read in conjunction with the company's 2014 Annual Report.

Noncontrolling interest amounts in income of \$1.2 million and \$(0.5) million, net of tax, for the three months ended March 31, 2015 and 2014, respectively, are included in the Consolidated Statement of Earnings within the other (income) and expense line item.

Within the financial statements and tables presented, certain columns and rows may not add due to the use of rounded numbers for disclosure purposes. Percentages presented are calculated from the underlying whole-dollar amounts. Certain prior year amounts have been reclassified to conform to the current year presentation. This is annotated where applicable.

2. Accounting Changes: In April 2015, the Financial Accounting Standards Board (FASB) issued guidance which requires debt issuance costs related to a recognized debt liability to be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The guidance is effective January 1, 2016 with early adoption permitted. The guidance is a change in financial statement presentation only and will not have a material impact in the consolidated financial results. At March 31, 2015, the company had approximately \$80 million in debt issuance costs included in investments and sundry assets in the Consolidated Statement of Financial Position.

In May 2014, the FASB issued guidance on the recognition of revenue from contracts with customers. Revenue recognition will depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance also requires disclosures regarding the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. The guidance permits two methods of adoption: retrospectively to each prior reporting period presented, or retrospectively with the cumulative effect of initially applying the guidance recognized at the date of initial application. The guidance is effective January 1, 2017 and early adoption is not permitted. The company is currently evaluating the impact of the new guidance and the method of adoption.

In April 2014, the FASB issued guidance that changed the criteria for reporting a discontinued operation. Only disposals of a component that represents a strategic shift that has (or will have) a major effect on an entity's operations and financial results is a discontinued operation. The guidance also requires expanded disclosures about discontinued operations and disposals of a significant part of an entity that does not qualify for discontinued operations reporting. The guidance was effective January 1, 2015. The impact to the company will be dependent on any transaction that is within the scope of the new guidance.

In July 2013, the FASB issued guidance regarding the presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. Under certain circumstances, unrecognized tax benefits should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss

Notes to Consolidated Financial Statements – (continued)

carryforward, a similar tax loss, or a tax credit carryforward. The guidance was effective January 1, 2014. The guidance was a change in financial statement presentation only and did not have a material impact in the consolidated financial results.

In March 2013, the FASB issued guidance on when foreign currency translation adjustments should be released to net income. When a parent entity ceases to have a controlling financial interest in a subsidiary or group of assets that is a business within a foreign entity, the parent is required to release any related cumulative translation adjustment into net income. Accordingly, the cumulative translation adjustment should be released into net income only if the sale or transfer results in the complete or substantially complete liquidation of the foreign entity in which the subsidiary or group of assets had resided. The guidance was effective January 1, 2014 and did not have a material impact in the consolidated financial results.

In February 2013, the FASB issued guidance for the recognition, measurement and disclosure of obligations resulting from joint and several liability arrangements for which the total amount of the obligation within the scope of the guidance is fixed at the reporting date. Examples include debt arrangements, other contractual obligations and settled litigation matters. The guidance requires an entity to measure such obligations as the sum of the amount that the reporting entity agreed to pay on the basis of its arrangement among its co-obligors plus additional amounts the reporting entity expects to pay on behalf of its co-obligors. The guidance was effective January 1, 2014 and did not have a material impact in the consolidated financial results.

3. Financial Instruments:

Fair Value Measurements

Accounting guidance defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Under this guidance, the company is required to classify certain assets and liabilities based on the following fair value hierarchy:

- Level 1—Quoted prices (unadjusted) in active markets for identical assets or liabilities that can be accessed at the measurement date;
- Level 2—Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3—Unobservable inputs for the asset or liability.

The guidance requires the use of observable market data if such data is available without undue cost and effort.

When available, the company uses unadjusted quoted market prices in active markets to measure the fair value and classifies such items as Level 1. If quoted market prices are not available, fair value is based upon internally developed models that use current market-based or independently sourced market parameters such as interest rates and currency rates. Items valued using internally generated models are classified according to the lowest level input or value driver that is significant to the valuation.

The determination of fair value considers various factors including interest rate yield curves and time value underlying the financial instruments. For derivatives and debt securities, the company uses a discounted cash flow analysis using discount rates commensurate with the duration of the instrument.

In determining the fair value of financial instruments, the company considers certain market valuation adjustments to the “base valuations” calculated using the methodologies described below for several parameters that market participants would consider in determining fair value:

- Counterparty credit risk adjustments are applied to financial instruments, taking into account the actual credit risk of a counterparty as observed in the credit default swap market to determine the true fair value of such an instrument.
- Credit risk adjustments are applied to reflect the company’s own credit risk when valuing all liabilities measured at fair value. The methodology is consistent with that applied in developing counterparty credit risk adjustments, but incorporates the company’s own credit risk as observed in the credit default swap market.

As an example, the fair value of derivatives is derived utilizing a discounted cash flow model that uses observable market inputs such as known notional value amounts, yield curves, spot and forward exchange rates as well as discount rates. These inputs relate to liquid, heavily traded currencies with active markets which are available for the full term of the derivative.

Notes to Consolidated Financial Statements – (continued)

Certain financial assets are measured at fair value on a nonrecurring basis. These assets include equity method investments that are recognized at fair value at the measurement date to the extent that they are deemed to be other-than-temporarily impaired. Certain assets that are measured at fair value on a recurring basis can be subject to nonrecurring fair value measurements. These assets include available-for-sale equity investments that are deemed to be other-than-temporarily impaired. In the event of an other-than-temporary impairment of a financial investment, fair value is measured using a model described above.

Non-financial assets such as property, plant and equipment, land, goodwill and intangible assets are also subject to nonrecurring fair value measurements if they are deemed to be impaired. The impairment models used for nonfinancial assets depend on the type of asset. In the third quarter of 2014, the company recorded an impairment on certain assets that were initially reported as held for sale at September 30, 2014. See note 9, “Acquisitions/Divestitures,” for additional information. There were no material impairments of non-financial assets for the three months ended March 31, 2015 and 2014, respectively.

Accounting guidance permits the measurement of eligible financial assets, financial liabilities and firm commitments at fair value, on an instrument-by-instrument basis, that are otherwise not permitted to be accounted for at fair value under other accounting standards. This election is irrevocable. The company has not applied the fair value option to any eligible assets or liabilities.

The following tables present the company’s financial assets and financial liabilities that are measured at fair value on a recurring basis at March 31, 2015 and December 31, 2014.

(1) Included within cash and cash equivalents in the Consolidated Statement of Financial Position.

(2) Included within investments and sundry assets in the Consolidated Statement of Financial Position.

(3) The gross balances of derivative assets contained within prepaid expenses and other current assets, and investments

and sundry assets in the Consolidated Statement of Financial Position at December 31, 2014 were \$751 million and

\$681 million, respectively.

(4) The gross balances of derivative liabilities contained within other accrued expenses and liabilities, and other liabilities in the Consolidated Statement of Financial Position at December 31, 2014 were \$165 million and \$31 million, respectively.

(5) Available-for-sale securities with carrying values that approximate fair value.

(6) If derivative exposures covered by a qualifying master netting agreement had been netted in the Consolidated Statement of Financial Position, the total derivative asset and liability positions would have been reduced by \$97

million each.

There were no transfers between Levels 1 and 2 for the quarter ended March 31, 2015. During the year ended December 31, 2014, the company transferred trading security investments valued at \$74 million from Level 2 to Level 1 due to the expiration of certain regulatory restrictions.

Financial Assets and Liabilities Not Measured at Fair Value

Short-Term Receivables and Payables

Notes and other accounts receivable and other investments are financial assets with carrying values that approximate fair value. Accounts payable, other accrued expenses and short-term debt (excluding the current portion of long-term debt) are financial liabilities with carrying values that approximate fair value. If measured at fair value in the financial statements, these financial instruments would be classified as Level 3 in the fair value hierarchy.

Loans and Long-term Receivables

Fair values are based on discounted future cash flows using current interest rates offered for similar loans to clients with similar credit ratings for the same remaining maturities. At March 31, 2015 and December 31, 2014, the difference between the carrying amount and estimated fair value for loans and long-term receivables was immaterial. If measured at fair value in the financial statements, these financial instruments would be classified as Level 3 in the fair value hierarchy.

Notes to Consolidated Financial Statements – (continued)**Long-Term Debt**

Fair value of publicly-traded long-term debt is based on quoted market prices for the identical liability when traded as an asset in an active market. For other long-term debt for which a quoted market price is not available, an expected present value technique that uses rates currently available to the company for debt with similar terms and remaining maturities is used to estimate fair value. The carrying amount of long-term debt was \$34,295 million and \$35,073 million, and the estimated fair value was \$36,844 million and \$37,524 million at March 31, 2015 and December 31, 2014, respectively. If measured at fair value in the financial statements, long-term debt (including the current portion) would be classified as Level 2 in the fair value hierarchy.

Debt and Marketable Equity Securities

The company's cash equivalents and current debt securities are considered available-for-sale and recorded at fair value, which is not materially different from carrying value, in the Consolidated Statement of Financial Position.

The following tables summarize the company's noncurrent debt and marketable equity securities which are considered available-for-sale and recorded at fair value in the Consolidated Statement of Financial Position.

(Dollars in millions)	Adjusted	Gross	Gross	Fair
At March 31, 2015:	Cost	Unrealized	Unrealized	Value
		Gains	Losses	
Debt securities – noncurrent(1)	\$ 6	\$ 3	\$ —	\$ 9
Available-for-sale equity investments(1)	\$ 278	\$ 8	\$ 5	\$ 281

(1) Included within investments and sundry assets in the Consolidated Statement of Financial Position.

(Dollars in millions)	Adjusted	Gross	Gross	Fair
At December 31, 2014:	Cost	Unrealized	Unrealized	Value
		Gains	Losses	
Debt securities – noncurrent(1)	\$ 7	\$ 3	\$ —	\$ 9
Available-for-sale equity investments(1)	\$ 272	\$ 2	\$ 31	\$ 243

(1) Included within investments and sundry assets in the Consolidated Statement of Financial Position.

During the fourth quarter of 2014, the company acquired equity securities in conjunction with the sale of the industry standard server business which are classified as available-for-sale securities. Gross unrealized gains related to available-for-sale securities of \$26 million for the three months ended March 31, 2015 were recorded in the

Consolidated Statement of Financial Position.

Based on an evaluation of available evidence as of March 31, 2015 and December 31, 2014, the company believes that unrealized losses on debt and available-for-sale equity investments were temporary and did not represent a need for an other-than-temporary impairment.

Sales of debt and available-for-sale equity investments during the period were as follows:

(Dollars in millions)

For the three months ended March 31:

	2015		2014
Proceeds	\$ 4	\$	14
Gross realized gains (before taxes)	0		—
Gross realized losses (before taxes)	0		4

Notes to Consolidated Financial Statements – (continued)

The after-tax net unrealized holding gains/(losses) on available-for-sale debt and marketable equity securities that have been included in other comprehensive income/(loss) for the period and the after-tax net (gains)/losses reclassified from accumulated other comprehensive income/(loss) to net income were as follows:

(Dollars in millions)

For the three months ended March 31:

		2015		2014
Net unrealized gains/(losses) arising during the period	\$	20	\$	0
Net unrealized (gains)/losses reclassified to net income*		0		3

* There were no writedowns for the three months ended March 31, 2015 and 2014, respectively.

The contractual maturities of substantially all available-for-sale debt securities are less than one year at March 31, 2015.

Derivative Financial Instruments

The company operates in multiple functional currencies and is a significant lender and borrower in the global markets. In the normal course of business, the company is exposed to the impact of interest rate changes and foreign currency fluctuations, and to a lesser extent equity and commodity price changes and client credit risk. The company limits these risks by following established risk management policies and procedures, including the use of derivatives, and, where cost effective, financing with debt in the currencies in which assets are denominated. For interest rate exposures, derivatives are used to better align rate movements between the interest rates associated with the company's lease and other financial assets and the interest rates associated with its financing debt. Derivatives are also used to manage the related cost of debt. For foreign currency exposures, derivatives are used to better manage the cash flow volatility arising from foreign exchange rate fluctuations.

As a result of the use of derivative instruments, the company is exposed to the risk that counterparties to derivative contracts will fail to meet their contractual obligations. To mitigate the counterparty credit risk, the company has a policy of only entering into contracts with carefully selected major financial institutions based upon their overall credit profile. The company's established policies and procedures for mitigating credit risk on principal transactions include reviewing and establishing limits for credit exposure and continually assessing the creditworthiness of counterparties. The right of set-off that exists under certain of these arrangements enables the legal entities of the company subject to the arrangement to net amounts due to and from the counterparty reducing the maximum loss from credit risk in the event of counterparty default.

The company is also a party to collateral security arrangements with most of its major derivative counterparties. These arrangements require the company to hold or post collateral (cash or U.S. Treasury securities) when the derivative fair values exceed contractually established thresholds. Posting thresholds can be fixed or can vary based on credit default swap pricing or credit ratings received from the major credit agencies. The aggregate fair value of all

derivative instruments under these collateralized arrangements that were in a liability position at March 31, 2015 and December 31, 2014 was \$10 million and \$21 million, respectively, for which no collateral was posted at March 31, 2015 and December 31, 2014. Full collateralization of these agreements would be required in the event that the company's credit rating falls below investment grade or if its credit default swap spread exceeds 250 basis points, as applicable, pursuant to the terms of the collateral security arrangements. The aggregate fair value of derivative instruments in asset positions as of March 31, 2015 and December 31, 2014 was \$1,991 million and \$1,432 million, respectively. This amount represents the maximum exposure to loss at the reporting date if the counterparties failed to perform as contracted. This exposure was reduced by \$141 million and \$97 million at March 31, 2015 and December 31, 2014, respectively, of liabilities included in master netting arrangements with those counterparties. Additionally, at March 31, 2015 and December 31, 2014, this exposure was reduced by \$734 million and \$487 million of cash collateral, respectively, received by the company. At March 31, 2015 and December 31, 2014, the net exposure related to derivative assets recorded in the Consolidated Statement of Financial Position was \$1,070 million and \$817 million, respectively. At March 31, 2015 and December 31, 2014, the net exposure related to derivative liabilities recorded in the Consolidated Statement of Financial Position was \$40 million and \$99 million, respectively.

In the Consolidated Statement of Financial Position, the company does not offset derivative assets against liabilities in master netting arrangements nor does it offset receivables or payables recognized upon payment or receipt of cash collateral against the fair values of the related derivative instruments. No amount was recognized in other receivables at March 31, 2015 or December 31, 2014 for the right to reclaim cash collateral. The amount recognized in accounts payable for the obligation to return cash collateral totaled \$734 million and \$487 million at March 31, 2015 and December 31, 2014, respectively. The company restricts the use of cash collateral received to rehypothecation, and therefore reports it in prepaid expenses and other current assets in the Consolidated Statement of Financial Position. No amount was rehypothecated at

Notes to Consolidated Financial Statements – (continued)

March 31, 2015 and December 31, 2014. At March 31, 2015 and December 31, 2014, the company held \$46 million and \$31 million in non-cash collateral in U.S. Treasury securities, respectively.

The company may employ derivative instruments to hedge the volatility in stockholders' equity resulting from changes in currency exchange rates of significant foreign subsidiaries of the company with respect to the U.S. dollar. These instruments, designated as net investment hedges, expose the company to liquidity risk as the derivatives have an immediate cash flow impact upon maturity which is not offset by a cash flow from the translation of the underlying hedged equity. The company monitors this cash loss potential on an ongoing basis and may discontinue some of these hedging relationships by de-designating or terminating the derivative instrument in order to manage the liquidity risk. Although not designated as accounting hedges, the company may utilize derivatives to offset the changes in the fair value of the de-designated instruments from the date of de-designation until maturity.

In its hedging programs, the company uses forward contracts, futures contracts, interest-rate swaps, cross-currency swaps, and options depending upon the underlying exposure. The company is not a party to leveraged derivative instruments.

A brief description of the major hedging programs, categorized by underlying risk, follows.

Interest Rate Risk

Fixed and Variable Rate Borrowings

The company issues debt in the global capital markets, principally to fund its financing lease and loan portfolios. Access to cost-effective financing can result in interest rate mismatches with the underlying assets. To manage these mismatches and to reduce overall interest cost, the company uses interest-rate swaps to convert specific fixed-rate debt issuances into variable-rate debt (i.e., fair value hedges) and to convert specific variable-rate debt issuances into fixed-rate debt (i.e., cash flow hedges). At March 31, 2015 and December 31, 2014, the total notional amount of the company's interest rate swaps was \$6.6 billion and \$5.8 billion, respectively. The weighted-average remaining maturity of these instruments at March 31, 2015 and December 31, 2014 was approximately 7.8 years and 8.7 years, respectively.

Forecasted Debt Issuance

The company is exposed to interest rate volatility on future debt issuances. To manage this risk, the company may use forward starting interest-rate swaps to lock in the rate on the interest payments related to the forecasted debt issuance. These swaps are accounted for as cash flow hedges. The company did not have any derivative instruments relating to this program outstanding at March 31, 2015 and December 31, 2014.

At March 31, 2015 and December 31, 2014, net gains of approximately \$1 million (before taxes) were recorded in accumulated other comprehensive income/(loss) in connection with cash flow hedges of the company's borrowings. Within these amounts, gains of less than \$1 million are expected to be reclassified to net income within the next 12 months, providing an offsetting economic impact against the underlying transactions.

Foreign Exchange Risk

Long-Term Investments in Foreign Subsidiaries (Net Investment)

A large portion of the company's foreign currency denominated debt portfolio is designated as a hedge of net investment in foreign subsidiaries to reduce the volatility in stockholders' equity caused by changes in foreign currency exchange rates in the functional currency of major foreign subsidiaries with respect to the U.S. dollar. The company also uses cross-currency swaps and foreign exchange forward contracts for this risk management purpose. At March 31, 2015 and December 31, 2014, the total notional amount of derivative instruments designated as net investment hedges was \$4.2 billion and \$2.2 billion, respectively. The weighted-average remaining maturity of these instruments at March 31, 2015 and December 31, 2014 was approximately 0.2 years for both periods.

Anticipated Royalties and Cost Transactions

The company's operations generate significant nonfunctional currency, third-party vendor payments and intercompany payments for royalties and goods and services among the company's non-U.S. subsidiaries and with the parent company. In anticipation of these foreign currency cash flows and in view of the volatility of the currency markets, the company selectively employs foreign exchange forward contracts to manage its currency risk. These forward contracts are accounted

Notes to Consolidated Financial Statements – (continued)

for as cash flow hedges. The maximum length of time over which the company has hedged its exposure to the variability in future cash flows is four years. At March 31, 2015 and December 31, 2014, the total notional amount of forward contracts designated as cash flow hedges of forecasted royalty and cost transactions was \$9.3 billion for both periods, with a weighted-average remaining maturity of 0.7 years for both periods.

At March 31, 2015 and December 31, 2014, in connection with cash flow hedges of anticipated royalties and cost transactions, the company recorded net gains of \$972 million and net gains of \$602 million (before taxes), respectively, in accumulated other comprehensive income/(loss). Within these amounts, \$921 million of gains and \$572 million of gains, respectively, are expected to be reclassified to net income within the next 12 months, providing an offsetting economic impact against the underlying anticipated transactions.

Foreign Currency Denominated Borrowings

The company is exposed to exchange rate volatility on foreign currency denominated debt. To manage this risk, the company employs cross-currency swaps to convert fixed-rate foreign currency denominated debt to fixed-rate debt denominated in the functional currency of the borrowing entity. These swaps are accounted for as cash flow hedges. The maximum length of time over which the company has hedged its exposure to the variability in future cash flows is approximately seven years. At March 31, 2015, and December 31, 2014, no amounts were outstanding under this program.

At March 31, 2015 and December 31, 2014, in connection with cash flow hedges of foreign currency denominated borrowings, the company recorded net losses of \$2 million (before taxes) in accumulated other comprehensive income/(loss). Within these amounts, less than \$1 million of losses are expected to be reclassified to net income within the next 12 months, providing an offsetting economic impact against the underlying exposure.

Subsidiary Cash and Foreign Currency Asset/Liability Management

The company uses its Global Treasury Centers to manage the cash of its subsidiaries. These centers principally use currency swaps to convert cash flows in a cost-effective manner. In addition, the company uses foreign exchange forward contracts to economically hedge, on a net basis, the foreign currency exposure of a portion of the company's nonfunctional currency assets and liabilities. The terms of these forward and swap contracts are generally less than one year. The changes in the fair values of these contracts and of the underlying hedged exposures are generally offsetting and are recorded in other (income) and expense in the Consolidated Statement of Earnings. At March 31, 2015 and December 31, 2014, the total notional amount of derivative instruments in economic hedges of foreign currency exposure was \$11.2 billion and \$13.1 billion, respectively.

Equity Risk Management

The company is exposed to market price changes in certain broad market indices and in the company's own stock primarily related to certain obligations to employees. Changes in the overall value of these employee compensation obligations are recorded in selling, general and administrative (SG&A) expense in the Consolidated Statement of Earnings. Although not designated as accounting hedges, the company utilizes derivatives, including equity swaps and futures, to economically hedge the exposures related to its employee compensation obligations. The derivatives are linked to the total return on certain broad market indices or the total return on the company's common stock, and are recorded at fair value with gains or losses also reported in SG&A expense in the Consolidated Statement of Earnings. At March 31, 2015 and December 31, 2014, the total notional amount of derivative instruments in economic hedges of these compensation obligations was \$1.2 billion and \$1.3 billion, respectively.

Other Risks

The company may hold warrants to purchase shares of common stock in connection with various investments that are deemed derivatives because they contain net share or net cash settlement provisions. The company records the changes in the fair value of these warrants in other (income) and expense in the Consolidated Statement of Earnings. The company did not have any warrants qualifying as derivatives outstanding at March 31, 2015 and December 31, 2014.

The company is exposed to a potential loss if a client fails to pay amounts due under contractual terms. The company may utilize credit default swaps to economically hedge its credit exposures. The swaps are recorded at fair value with gains and losses reported in other (income) and expense in the Consolidated Statement of Earnings. The company did not have any derivative instruments relating to this program outstanding at March 31, 2015 and December 31, 2014.

Notes to Consolidated Financial Statements – (continued)

The company is exposed to market volatility on certain investment securities. The company may utilize options or forwards to economically hedge its market exposure. The derivatives are recorded at fair value with gains and losses reported in other (income) and expense in the Consolidated Statement of Earnings. At March 31, 2015 and December 31, 2014, the total notional amount of derivative instruments in economic hedges of investment securities was less than \$0.1 billion for both periods.

The following tables provide a quantitative summary of the derivative and non-derivative instrument-related risk management activity as of March 31, 2015 and December 31, 2014, as well as for the three months ended March 31, 2015 and 2014, respectively.

Fair Values of Derivative Instruments in the Consolidated Statement of Financial Position
As of March 31, 2015 and December 31, 2014

- (1) The amount includes changes in clean fair values of the derivative instruments in fair value hedging relationships and the periodic accrual for coupon payments required under these derivative contracts.
- (2) The amount includes basis adjustments to the carrying value of the hedged item recorded during the period and amortization of basis adjustments recorded on de-designated hedging relationships during the period.
- (3) Instruments in net investment hedges include derivative and non-derivative instruments.
- (4) For the three month period ended March 31, 2015, fair value hedges resulted in a gain of \$2 million in ineffectiveness. There were no amounts recorded as ineffectiveness on fair value hedges for the three month period ended March 31, 2014.

Notes to Consolidated Financial Statements – (continued)

For the three months ending March 31, 2015 and 2014, there were no significant gains or losses recognized in earnings representing hedge ineffectiveness or excluded from the assessment of hedge effectiveness (for fair value hedges), or associated with an underlying exposure that did not or was not expected to occur (for cash flow hedges); nor are there any anticipated in the normal course of business.

4. Financing Receivables: The following table presents financing receivables, net of allowances for credit losses, including residual values.

(Dollars in millions)	At March 31,		At December 31,	
	2015		2014	
<u>Current:</u>				
Net investment in sales-type and direct financing leases	\$	3,560	\$	3,781
Commercial financing receivables		6,026		8,423
Client loan and installment payment receivables (loans)		6,717		7,631
Total	\$	16,303	\$	19,835
<u>Noncurrent:</u>				
Net investment in sales-type and direct financing leases	\$	4,081	\$	4,449
Client loan and installment payment receivables (loans)		5,740		6,660
Total	\$	9,820	\$	11,109

Net investment in sales-type and direct financing leases relates principally to the company's systems products and are for terms ranging generally from two to six years. Net investment in sales-type and direct financing leases includes unguaranteed residual values of \$649 million and \$671 million at March 31, 2015 and December 31, 2014, respectively, and is reflected net of unearned income of \$491 million and \$517 million, and net of the allowance for credit losses of \$188 million and \$165 million at those dates, respectively.

Commercial financing receivables, net of the allowance for credit losses of \$13 million and \$17 million at March 31, 2015 and December 31, 2014, respectively, relate primarily to inventory and accounts receivable financing for dealers and remarketers of IBM and OEM products. Payment terms for inventory and accounts receivable financing generally range from 30 to 90 days.

Client loan and installment payment receivables (loans), net of the allowance for credit losses of \$408 million and \$396 million at March 31, 2015 and December 31, 2014, respectively, are loans that are provided primarily to clients to finance the purchase of hardware, software and services. Payment terms on these financing arrangements are generally for terms up to seven years.

Client loan and installment payment receivables (loans) financing contracts are priced independently at competitive market rates. The company has a history of enforcing the terms of these financing agreements.

The company utilizes certain of its financing receivables as collateral for nonrecourse borrowings. Financing receivables pledged as collateral for borrowings were \$596 million and \$642 million at March 31, 2015 and December 31, 2014, respectively.

The company did not have any financing receivables held for sale as of March 31, 2015 and December 31, 2014.

Financing Receivables by Portfolio Segment

The following tables present financing receivables on a gross basis, excluding the allowance for credit losses and residual value, by portfolio segment and by class, excluding current commercial financing receivables and other miscellaneous current financing receivables at March 31, 2015 and December 31, 2014. The company determines its allowance for credit losses based on two portfolio segments: lease receivables and loan receivables, and further segments the portfolio into two classes: major markets and growth markets.

Notes to Consolidated Financial Statements – (continued)

(Dollars in millions) At March 31, 2015	Major Markets	Growth Markets	Total

Individually evaluated for impairment	\$ 69	\$ 411	\$ 480

When determining the allowances, financing receivables are evaluated either on an individual or a collective basis. For individually evaluated receivables, the company determines the expected cash flow for the receivable and calculates an estimate of the potential loss and the probability of loss. For those accounts in which the loss is probable, the company records a specific reserve. In addition, the company records an unallocated reserve that is determined by applying a reserve rate to its different portfolios, excluding accounts that have been specifically reserved. This reserve rate is based upon credit rating, probability of default, term, characteristics (lease/loan) and loss history.

Notes to Consolidated Financial Statements – (continued)

Financing Receivables on Non-Accrual Status

The following table presents the recorded investment in financing receivables which were on non-accrual status at March 31, 2015 and December 31, 2014.

(Dollars in millions)	At March 31, 2015		At December 31, 2014

Credit Quality Indicators

The company's credit quality indicators, which are based on rating agency data, publicly available information and information provided by customers, are reviewed periodically based on the relative level of risk. The resulting indicators are a numerical rating system that maps to Moody's Investors Service credit ratings as shown below. The company uses information provided by Moody's, where available, as one of many inputs in its determination of customer credit ratings.

The following tables present the gross recorded investment for each class of receivables, by credit quality indicator, at March 31, 2015 and December 31, 2014. Receivables with a credit quality indicator ranging from Aaa to Baa3 are considered investment grade. All others are considered non-investment grade. The credit quality indicators do not reflect mitigation actions that the company may take to transfer credit risk to third parties.

(Dollars in millions) At March 31, 2015:	Lease Receivables		Loan Receivables	
	Major Markets	Growth Markets	Major Markets	Growth Markets
Credit Rating:				
Aaa – Aa3	\$ 541	\$ 43	\$ 916	\$ 93

Total	\$ 82	\$ 22,250	\$ 22,332	\$ 47	

* Does not include accounts that are fully reserved.

Troubled Debt Restructurings

The company did not have any troubled debt restructurings during the three months ended March 31, 2015 and for the year ended December 31, 2014.

Notes to Consolidated Financial Statements – (continued)

5. Stock-Based Compensation: Stock-based compensation cost is measured at grant date, based on the fair value of the award, and is recognized over the employee requisite service period. The following table presents total stock-based compensation cost included in income from continuing operations.

(Dollars in millions)

For the three months ended March 31:	2015		2014	
Cost	\$	27	\$	31
Selling, general and administrative		87		88
Research, development and engineering		14		14
Other (income) and expense*		(1)		(9)
Pre-tax stock-based compensation cost		127		124
Income tax benefits		(42)		(41)
Total net stock-based compensation cost	\$	85	\$	83

* Reflects the one-time effects related to the divestiture of the customer care business and industry standard server businesses in 2014 and 2015, respectively.

Pre-tax stock-based compensation cost for the three months ended March 31, 2015 increased \$3 million compared to the corresponding period in the prior year. This was due to increases related to restricted stock units (\$4 million) and performance share units (\$1 million), offset by a decrease in the company's assumption of stock-based awards previously issued by acquired entities (\$2 million).

The amount of stock-based compensation cost included in the loss from discontinued operations, net of tax, was immaterial in both periods.

As of March 31, 2015, the total unrecognized compensation cost of \$793 million related to non-vested awards is expected to be recognized over a weighted-average period of approximately 2.5 years.

There was no significant capitalized stock-based compensation cost at March 31, 2015 and 2014.

6. Segments: The table on page 26 reflects the results of continuing operations of the company's segments consistent with the management and measurement system utilized within the company. Performance measurement is based on pre-tax income from continuing operations. These results are used, in part, by the chief operating decision maker, both in evaluating the performance of, and in allocating resources to, each of the segments.

In January 2015, the company's business process outsourcing business, Global Process Services, which was previously managed within Global Technology Services, was integrated into Global Business Services, creating an end-to-end business transformation capability for clients and to better leverage the company's industry knowledge. The following table reflects this reclassification for the prior-year period.

In March 2014, the Supreme Court of Spain issued a ruling in litigation involving IBM Spain's defined benefit (DB) and defined contribution (DC) plans. As a result of this ruling, the company recorded a pre-tax retirement-related obligation of \$148 million in 2014 (\$55 million in the first quarter of 2014) in selling, general and administrative (SG&A) expense in the Consolidated Statement of Earnings. The Constitutional Court denied IBM Spain's requested leave to appeal the decision. In March 2015, the National Audience Court issued a ruling that, in part, required IBM to stop making DC contributions and also ruled that the company should promptly reinstate the DB plan. As a result of this ruling, in the first quarter of 2015, the company recorded an additional pre-tax retirement obligation of \$230 million in SG&A in the Consolidated Statement of Earnings. This obligation is reflected in "Non-U.S. Plans - Multi-employer plans/other costs" in the table above. See note 12, "Contingencies" for additional information. IBM Spain has appealed that ruling.

In 2015, the company expects to contribute to its non-U.S. defined benefit and multi-employer plans approximately \$600 million, which will be mainly contributed to the defined benefit pension plans in the UK, Japan, the Netherlands and Spain. This amount represents the legally mandated minimum contribution. Total net contributions to the non-U.S. plans in the first three months of 2015 were \$90 million.

The following table provides the components of the cost/(income) for the company's nonpension postretirement plans.

Cost of Nonpension Postretirement Plans

(Dollars in millions) For the three months ended March 31:	<u>U.S. Plan</u>		<u>Non-U.S. Plans</u>

9. Acquisitions/Divestitures:

Acquisitions: During the three months ended March 31, 2015, the company completed two acquisitions at an aggregate cost of \$47 million.

The Software segment completed acquisitions of two privately held businesses in the first quarter: AlchemyAPI, Inc. (AlchemyAPI) and Blekko, Inc. (Blekko).

Notes to Consolidated Financial Statements – (continued)

The following table reflects the purchase price related to these acquisitions and the resulting purchase price allocations as of March 31, 2015.

(Dollars in millions)	Amortization Life (in yrs.)	Total Acquisitions
Current assets		\$ 1
Fixed assets/noncurrent assets		1
Intangible assets:		
Goodwill	N/A	36
Completed technology	5	10
Patents/trademarks	3-5	3
Total assets acquired		51
Current liabilities		0
Noncurrent liabilities		(3)
Total liabilities assumed		(3)
Total purchase price		\$ 47

N/A - not applicable

Each acquisition further complemented and enhanced the company's portfolio of product and services offerings. AlchemyAPI is a leading provider of scalable cognitive computing application program interface (API) services and computing applications. Blekko technology provides advanced Web-crawling, categorization and intelligent filtering. Purchase price consideration for these acquisitions as reflected in the table above, was paid primarily in cash. All acquisitions are reported in the Consolidated Statement of Cash Flows net of acquired cash and cash equivalents.

The acquisitions were accounted for as business combinations using the acquisition method, and accordingly, the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquired entity was recorded at their estimated fair values at the date of acquisition. The primary items that generated the goodwill are the value of the synergies between the acquired businesses and IBM and the acquired assembled workforce, neither of which qualify as an amortizable intangible asset. The overall weighted-average life of the identified amortizable intangible assets acquired is 4.9 years. These identified intangible assets will be amortized on a straight-line basis over their useful lives. Goodwill of \$36 million has been assigned to the Software segment. It is expected that approximately 11 percent of the goodwill will be deductible for tax purposes.

On April 13, 2015, IBM announced a definitive agreement for the purchase of Phytel. Phytel is a leading provider of integrated population health management software that specializes in an engagement system that analyzes patient behavior and activity and looks for optimal outcomes. The engagement platform reminds patients about things such as appointments and prescription refills. This transaction is expected to close in the second quarter of 2015.

On April 13, 2015, IBM announced the acquisition of Explorys. Explorys is a healthcare intelligence cloud company that has built one of the largest clinical data sets in the world specializing in real time data collection used to link healthcare data for analytics, both clinical and financial. At the date of issuance of the financial statements, the initial business combination accounting was not complete for this acquisition.

Divestitures:

Microelectronics – On October 20, 2014, IBM and GLOBALFOUNDRIES announced a definitive agreement in which GLOBALFOUNDRIES will acquire the company’s Microelectronics business, including existing semiconductor manufacturing assets and operations in East Fishkill, NY and Essex Junction, VT. The commercial OEM business to be acquired by GLOBALFOUNDRIES includes custom logic and specialty foundry, manufacturing and related operations.

The companies have also agreed to a 10-year exclusive manufacturing sourcing agreement in which GLOBALFOUNDRIES will provide server processor semiconductor technology for use in IBM Systems. The agreement provides the company with capacity and market-based pricing for current semiconductor nodes in production and progression to nodes in the future for both development and production needs. As part of the transaction agreement, the company will provide GLOBALFOUNDRIES with certain transition services, including IT, supply chain, packaging and test services and lab services. The initial term for these transition services is one to three years, with GLOBALFOUNDRIES having the ability to renew.

Notes to Consolidated Financial Statements – (continued)

The transaction will be completed as soon as is practical, subject to the satisfaction of regulatory requirements, customary closing conditions and any other required approvals. The transaction is expected to close in 2015.

In the third quarter of 2014, the company recorded a pre-tax charge of \$4.7 billion related to the sale of the Microelectronics disposal group, which was part of the Systems and Technology reportable segment. The pre-tax charge reflected the fair value less the estimated cost of selling the disposal group including an impairment to the semiconductor long-lived assets of \$2.4 billion, \$1.5 billion representing the cash consideration expected to be transferred to GLOBALFOUNDRIES and \$0.8 billion of other related costs. The asset impairment was reflected in property, plant and equipment, net and the other costs of disposal were reflected in other accrued expenses and liabilities and other liabilities in the Consolidated Statement of Financial Position at March 31, 2015. These estimates may be adjusted, and the company may incur additional charges prior to the closing of the transaction. All assets and liabilities of the business are reported as held for sale at March 31, 2015. The cash consideration is expected to be transferred over three years with \$750 million transferred at the closing date. The actual net cash related to the transaction will be adjusted by the amount of the working capital due from GLOBALFOUNDRIES, estimated to be between \$200 million and \$250 million.

Reporting the related assets and liabilities initially as held for sale at September 30, 2014 was based on meeting all of the criteria for such reporting in the applicable accounting guidance. While the company met certain criteria for held for sale reporting in prior periods, it did not meet all of the criteria until September 30, 2014. In addition, at September 30, 2014, the company concluded that the Microelectronics business met the criteria for discontinued operations reporting. The disposal group constitutes a component under accounting guidance. The continuing cash inflows and outflows with the discontinued component are related to the manufacturing sourcing arrangement and the transition, packaging and test services. These cash flows are not direct cash flows as they are not significant and the company will have no significant continuing involvement.

Summarized financial information for discontinued operations is shown below.

(Dollars in millions)	Three Months Ended March 31,	
	2015	2014
Total revenue	\$ 339	\$ 248

Industry Standard Server – On January 23, 2014, IBM and Lenovo Group Limited (Lenovo) announced a definitive agreement in which Lenovo would acquire the company’s industry standard server portfolio (System x) for an adjusted purchase price of \$2.1 billion, consisting of approximately \$1.8 billion in cash, with the balance in Lenovo common stock. The stock represented less than 5 percent equity ownership in Lenovo. The company would sell to Lenovo its System x, BladeCenter and Flex System blade servers and switches, x86-based Flex integrated systems, NeXtScale and iDataPlex servers and associated software, blade networking and maintenance operations.

Notes to Consolidated Financial Statements – (continued)

IBM and Lenovo have entered into a strategic relationship which includes a global OEM and reseller agreement for sales of IBM's industry-leading entry and midrange Storwize disk storage systems, tape storage systems, General Parallel File System software, SmartCloud Entry offering, and elements of IBM's system software, including Systems Director and Platform Computing solutions. Effective with the initial closing of the transaction, Lenovo has assumed related customer service and maintenance operations. IBM will continue to provide maintenance delivery on Lenovo's behalf for an extended period of time. In addition, as part of the transaction agreement, the company will provide Lenovo with certain transition services, including IT and supply chain services. The initial term for these transition services ranges from less than one year to three years. Lenovo can renew certain services for an additional year.

The initial closing occurred on October 1, 2014. A subsequent closing occurred in most other countries in which there was a large business footprint on December 31, 2014. The remaining countries closed on March 31, 2015. In line with these remaining countries closing and certain adjustments made to the provisions recorded at the time the transaction closed in the fourth quarter of 2014, an additional pre-tax gain of \$16 million was recorded in the first quarter of 2015.

Overall, the company continues to expect to recognize a total pre-tax gain on the sale of approximately \$1.5 billion, which does not include associated costs related to transition and performance-based costs. Net of these charges, the pre-tax gain is approximately \$1.2 billion, of which \$1.1 billion was recorded in the fourth quarter of 2014. The balance of the gain is expected to be recognized in 2019 upon conclusion of the maintenance agreement.

Customer Care – On September 10, 2013, IBM and SYNnex announced a definitive agreement in which SYNnex would acquire the company's worldwide customer care business process outsourcing services business for \$501 million, consisting of approximately \$430 million in cash, net of balance sheet adjustments, and \$71 million in SYNnex common stock, which represented less than 5 percent equity ownership in SYNnex. As part of the transaction, SYNnex entered into a multi-year agreement with the company, and Concentrix, SYNnex's outsourcing business, has become an IBM strategic business partner for global customer care business process outsourcing services.

The initial closing of the transaction was completed on January 31, 2014, with subsequent closings occurring in 2014. In the fourth quarter of 2014, the company continued to work toward resolution of the required final balance sheet adjustments. A charge in the amount of \$10 million was recorded to reflect the expected resolution. For the full year of 2014, the company recorded a pre-tax gain of \$202 million related to this transaction.

Through the first quarter of 2015, final resolution of the required final balance sheet adjustments has not been concluded. As of March 31, 2015, the cumulative pre-tax gain attributed to this transaction remains at \$202 million.

Retail Store Solutions – On April 17, 2012, the company announced that it had signed a definitive agreement with Toshiba TEC for the sale of its Retail Store Solutions business. As part of the transaction, the company agreed to

transfer the maintenance business to Toshiba TEC within three years of the original closing of the transaction.

In first quarter of 2015, the company completed the fifth phase of the transfer of the maintenance workforce to Toshiba. A subsequent wave closing is scheduled to be completed in the second quarter of 2015. The parts and inventory transfer to Toshiba will commence in the second quarter of 2015 and is expected to be completed by the third quarter of 2015. The workforce transfer and an assessment of the ongoing contractual terms of the transaction resulted in the recognition of pre-tax loss of \$2 million in the first quarter of 2015.

The company expects to close the final phase of the divestiture in the third quarter of 2015. Overall, the company expects to recognize a cumulative total pre-tax gain on the sale of approximately \$511 million of which \$510 million has been recognized through March 31, 2015.

Others – In the first quarter of 2015, the company completed the divestiture of the Algorithmics Collateral Management suite of products to Smartstream Inc. and the divestiture of the Commerce ILOG Supply Chain Optimization Tools suite of products to Llamasoft, Inc.

The financial terms of each transaction were not material.

Notes to Consolidated Financial Statements – (continued)

10. Intangible Assets Including Goodwill: The following table details the company's intangible asset balances by major asset class:

(Dollars in millions) Intangible asset class	At March 31, 2015		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Capitalized software	\$ 1,385	\$ (646)	\$ 739
Client relationships	2,204	(1,335)	870
Completed technology	2,622	(1,407)	1,215
Patents/trademarks	323	(172)	150
Other*	24	(7)	17
Total	\$ 6,558	\$ (3,567)	\$ 2,991

(Dollars in millions) Intangible asset class	At December 31, 2014		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Capitalized software	\$ 1,375	\$ (679)	\$ 696
Client relationships	2,208	(1,271)	937
Completed technology	2,831	(1,533)	1,298
Patents/trademarks	374	(214)	161
Other*	18	(6)	12
Total	\$ 6,806	\$ (3,702)	\$ 3,104

* Other intangibles are primarily acquired proprietary and nonproprietary business processes, methodologies and systems.

The net carrying amount of intangible assets decreased \$113 million during the first quarter of 2015, primarily due to amortization, partially offset by intangible asset additions resulting from capitalized software and acquisitions. The aggregate intangible amortization expense was \$298 million and \$339 million for the quarters ended March 31, 2015 and 2014, respectively. In addition, in the first three months of 2015, the company retired \$429 million of fully amortized intangible assets, impacting both the gross carrying amount and accumulated amortization by this amount.

The amortization expense for each of the five succeeding years relating to intangible assets currently recorded in the Consolidated Statement of Financial Position is estimated to be the following at March 31, 2015:

(Dollars in millions)	Capitalized Software	Acquired Intangibles	Total
2015 (for Q2-Q4)	\$ 340	\$ 492	\$ 832
2016	274	603	878

Systems Hardware	1,601	—	—	(110)	(19)	1,472	
Total	\$ 31,184	\$ 442	\$ 4	\$ (183)	\$ (891)	\$ 30,556	

* Reclassified to conform with 2015 presentation.

**Primarily driven by foreign currency translation.

Purchase price adjustments recorded in the first three months of 2015 and full year 2014 were related to acquisitions that were completed on or prior to December 31, 2014 or December 31, 2013, respectively, and were still subject to the measurement period that ends at the earlier of 12 months from the acquisition date or when information becomes available. There were no goodwill impairment losses recorded during the first three months of 2015 or the full year of 2014 and the company has no accumulated impairment losses.

11. Borrowings:

Short-Term Debt

(Dollars in millions)	At March 31, 2015	At December 31, 2014
Commercial paper	\$	\$ 650
Short-term loans	460	480
Long-term debt—current maturities	4,072	4,601
Total	\$ 4,532	\$ 5,731

The weighted-average interest rate for commercial paper at December 31, 2014 was 0.1 percent. The weighted-average interest rate for short-term loans was 7.6 percent and 4.0 percent at March 31, 2015 and December 31, 2014, respectively.

Notes to Consolidated Financial Statements – (continued)

Euros (1.9%)	2015–2025	\$ 4,843	\$ 5,463
Pound sterling (2.8%)	2017–2020	1,118	1,176
Japanese yen (0.5%)	2017-2019	732	733
Swiss francs (3.8%)	2015–2020	165	162
Canadian (2.2%)	2017	394	432
Other (9.8%)	2015–2018	169	367
		\$ 38,306	\$ 39,737
Less: net unamortized discount		851	853
Add: fair value adjustment*		911	792
		\$ 38,367	\$ 39,675
Less: current maturities		4,072	4,601
Total		\$ 34,295	\$ 35,073

* The portion of the company's fixed-rate debt obligations that is hedged is reflected in the Consolidated Statement of Financial Position as an amount equal to the sum of the debt's carrying value plus a fair value adjustment representing changes in the fair value of the hedged debt obligations attributable to movements in benchmark interest rates.

The company's indenture governing its debt securities and its various credit facilities each contain significant covenants which obligate the company to promptly pay principal and interest, limit the aggregate amount of secured

indebtedness and sale and leaseback transactions to 10 percent of the company's consolidated net tangible assets, and restrict the company's ability to merge or consolidate unless certain conditions are met. The credit facilities also include a covenant on the company's consolidated net interest expense ratio, which cannot be less than 2.20 to 1.0, as well as a cross default provision with respect to other defaulted indebtedness of at least \$500 million.

The company is in compliance with all of its significant debt covenants and provides periodic certifications to its lenders. The failure to comply with its debt covenants could constitute an event of default with respect to the debt to which such provisions apply. If certain events of default were to occur, the principal and interest on the debt to which such event of default applied would become immediately due and payable.

Pre-swap annual contractual maturities of long-term debt outstanding at March 31, 2015, are as follows:

12. Contingencies: As a company with a substantial employee population and with clients in more than 175 countries, IBM is involved, either as plaintiff or defendant, in a variety of ongoing claims, demands, suits, investigations, tax matters and proceedings that arise from time to time in the ordinary course of its business. The company is a leader in the information technology industry and, as such, has been and will continue to be subject to claims challenging its IP rights and associated products and offerings, including claims of copyright and patent infringement and violations of trade secrets and other IP rights. In addition, the company enforces its own IP against infringement, through license negotiations, lawsuits or otherwise. Also, as is typical for companies of IBM's scope and scale, the company is party to actions and proceedings in various jurisdictions involving a wide range of labor and employment issues (including matters related to contested employment decisions, country-specific labor and employment laws, and the company's pension, retirement and other benefit plans), as well as actions with respect to contracts, product liability, securities, foreign operations, competition law and environmental matters. These actions may be commenced by a number of different parties, including competitors, clients, current or former employees, government and regulatory agencies, stockholders and representatives of the locations in which the company does business. Some of the actions to which the company is party may involve particularly complex technical issues, and some actions may raise novel questions under the laws of the various jurisdictions in which these matters arise.

The company records a provision with respect to a claim, suit, investigation or proceeding when it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Any recorded liabilities, including any changes to such liabilities for the quarter ended March 31, 2015 were not material to the Consolidated Financial Statements.

In accordance with the relevant accounting guidance, the company provides disclosures of matters for which the likelihood of material loss is at least reasonably possible. In addition, the company also discloses matters based on its consideration of other matters and qualitative factors, including the experience of other companies in the industry, and investor, customer and employee relations considerations.

With respect to certain of the claims, suits, investigations and proceedings discussed herein, the company believes at this time that the likelihood of any material loss is remote, given, for example, the procedural status, court rulings, and/or the strength of the company's defenses in those matters. With respect to the remaining claims, suits, investigations and proceedings discussed in this Note, the company is unable to provide estimates of reasonably possible losses or range of losses, including losses in excess of amounts accrued, if any, for the following reasons. Claims, suits, investigations and proceedings are inherently uncertain, and it is not possible to predict the ultimate outcome of these matters. It is the company's experience that damage amounts claimed in litigation against it are unreliable and unrelated to possible outcomes, and as such are not meaningful indicators of the company's potential liability. Further, the company is unable to provide such an estimate due to a number of other factors with respect to these claims, suits, investigations and proceedings, including considerations of the procedural status of the matter in question, the presence of complex or novel legal theories, and/or the ongoing discovery and development of information important to the matters. The company reviews claims, suits, investigations and proceedings at least quarterly, and decisions are made with respect to recording or adjusting provisions and disclosing reasonably possible losses or range of losses (individually or in the aggregate), to reflect the impact and status of

Notes to Consolidated Financial Statements – (continued)

settlement discussions, discovery, procedural and substantive rulings, reviews by counsel and other information pertinent to a particular matter.

Whether any losses, damages or remedies finally determined in any claim, suit, investigation or proceeding could reasonably have a material effect on the company's business, financial condition, results of operations or cash flows will depend on a number of variables, including: the timing and amount of such losses or damages; the structure and type of any such remedies; the significance of the impact any such losses, damages or remedies may have in the Consolidated Financial Statements; and the unique facts and circumstances of the particular matter that may give rise to additional factors. While the company will continue to defend itself vigorously, it is possible that the company's business, financial condition, results of operations or cash flows could be affected in any particular period by the resolution of one or more of these matters.

The following is a summary of the more significant legal matters involving the company.

The company is a defendant in an action filed on March 6, 2003 in state court in Salt Lake City, Utah by the SCO Group (SCO v. IBM). The company removed the case to Federal Court in Utah. Plaintiff is an alleged successor in interest to some of AT&T's UNIX IP rights, and alleges copyright infringement, unfair competition, interference with contract and breach of contract with regard to the company's distribution of AIX and Dynix and contribution of code to Linux and the company has asserted counterclaims. On September 14, 2007, plaintiff filed for bankruptcy protection, and all proceedings in this case were stayed. The court in another suit, the SCO Group, Inc. v. Novell, Inc., held a trial in March 2010. The jury found that Novell is the owner of UNIX and UnixWare copyrights; the judge subsequently ruled that SCO is obligated to recognize Novell's waiver of SCO's claims against IBM and Sequent for breach of UNIX license agreements. On August 30, 2011, the Tenth Circuit Court of Appeals affirmed the district court's ruling and denied SCO's appeal of this matter. In June 2013, the Federal Court in Utah granted SCO's motion to reopen the SCO v. IBM case, and proceedings have resumed in that case.

On May 13, 2010, IBM and the State of Indiana (acting on behalf of the Indiana Family and Social Services Administration) sued one another in a dispute over a 2006 contract regarding the modernization of social service program processing in Indiana. The State terminated the contract, claiming that IBM was in breach, and the State is seeking damages. IBM believes the State's claims against it are without merit and is seeking payment of termination amounts specified in the contract. After six weeks of trial, on July 18, 2012, the Indiana Superior Court in Marion County rejected the State's claims in their entirety and awarded IBM \$52 million plus interest and costs. On February 13, 2014, the Indiana Court of Appeals reversed portions of the trial judge's findings, found IBM in material breach, and ordered the case remanded to the trial judge to determine the State's damages, if any. The Indiana Court of Appeals also affirmed approximately \$50 million of the trial court's award of damages to IBM. This matter remains pending in the Indiana courts.

On April 16, 2014, Iusacell SA de C.V. (Iusacell) sued IBM, claiming that IBM made fraudulent misrepresentations that induced Iusacell to enter into an agreement with IBM Mexico. Iusacell claims damages for lost

profits. Iusacell's complaint relates to a contractual dispute in Mexico, which is the subject of a pending arbitration proceeding in Mexico initiated by IBM Mexico against Iusacell for breach of the underlying agreement. On November 14, 2014, the District Court in the Southern District of New York granted IBM's motion to stay Iusacell's action against the company pending the arbitration in Mexico between Iusacell and IBM Mexico.

IBM United Kingdom Limited (IBM UK) initiated legal proceedings in May 2010 before the High Court in London against the IBM UK Pensions Trust (the UK Trust) and two representative beneficiaries of the UK Trust membership. IBM UK is seeking a declaration that it acted lawfully both in notifying the Trustee of the UK Trust that it was closing its UK defined benefit plans to future accruals for most participants and in implementing the company's new retirement policy. In April 2014, the High Court acknowledged that the changes made to its UK defined benefit plans were within IBM's discretion, but ruled that IBM breached its implied duty of good faith both in implementing these changes and in the manner in which it consulted with employees. Proceedings to determine remedies were held in July 2014, and in February 2015 the High Court held that for IBM to make changes to accruals under the plan would require a new consultation of the participants, but other changes (including to early retirement policy) would not require such consultation. IBM intends to appeal both the breach and remedies judgments. In addition, IBM UK is a defendant in approximately 290 individual actions brought since early 2010 by participants of the defined benefits plans who left IBM UK. These actions, which allege constructive dismissal and age discrimination, are pending before the Employment Tribunal in Southampton UK.

On March 24, 2014, in a suit brought by local Works Councils, the Supreme Court of Spain held that IBM Spain's Defined Contribution (DC) Plan implemented in 1993 based on the voluntary participation of its employees was null and void. The Supreme Court also held that current employees could reinstate their rights to a Defined Benefit (DB) Plan, although with an offset for DC contributions paid to date. The Court held that IBM Spain did not consult with the Works

Notes to Consolidated Financial Statements – (continued)

Councils in seeking to change the pension scheme, and recommended that IBM Spain and the Works Councils engage in discussions over how to carry out the offset. The Constitutional Court denied IBM Spain's requested leave to appeal the decision. In March 2015, the National Audience Court ruled that the Works Council was not entitled to dictate the means by which IBM should carry out the offset of DC contributions, but also ruled that the Supreme Court's judgment could be executed without the need for individual lawsuits by employees, rejecting the position that the judgment was declaratory only. The National Audience Court also ruled that IBM should stop making DC contributions, and that the company should promptly reinstate the DB Plan. IBM Spain has appealed that ruling and is reexamining its business model as it prepares to reinstitute an outdated pension plan that employees elected to forego 20 years ago, which benefits a limited subset of the overall population of employees in Spain.

In March 2011, the company announced that it had agreed to settle a civil enforcement action with the Securities and Exchange Commission (SEC) relating to alleged violations of the Foreign Corrupt Practices Act of 1977. On July 25, 2013, the court approved that 2011 settlement and required that for a two-year period IBM make reports to the SEC and the court on certain matters, including those relating to compliance with the FCPA. In early 2012, IBM notified the SEC of an investigation by the Polish Central Anti-Corruption Bureau involving allegations of illegal activity by a former IBM Poland employee in connection with sales to the Polish government. IBM is cooperating with the SEC and Polish authorities in this matter. In April 2013, IBM learned that the U.S. Department of Justice (DOJ) is also investigating allegations related to the Poland matter, as well as allegations relating to transactions in Argentina, Bangladesh and Ukraine. The DOJ is also seeking information regarding the company's global FCPA compliance program and its public sector business. The company is cooperating with the DOJ in this matter.

In March 2015, putative class action litigation was commenced in the United States District Court for the Southern District of New York related to the company's October 2014 announcement that it was divesting its global commercial semiconductor technology business. The company and three of its officers are named as defendants. Plaintiffs allege that defendants violated Sections 20(a) and 10(b) of the Securities Exchange Act of 1934 and Rule 10b-5 thereunder.

The company is a defendant in numerous actions filed after January 1, 2008 in the Supreme Court for the State of New York, county of Broome, on behalf of hundreds of plaintiffs. The complaints allege numerous and different causes of action, including for negligence and recklessness, private nuisance and trespass. Plaintiffs in these cases seek medical monitoring and claim damages in unspecified amounts for a variety of personal injuries and property damages allegedly arising out of the presence of groundwater contamination and vapor intrusion of groundwater contaminants into certain structures in which plaintiffs reside or resided, or conducted business, allegedly resulting from the release of chemicals into the environment by the company at its former manufacturing and development facility in Endicott. These complaints also seek punitive damages in an unspecified amount.

The company is party to, or otherwise involved in, proceedings brought by U.S. federal or state environmental agencies under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), known as "Superfund," or laws similar to CERCLA. Such statutes require potentially responsible parties to participate in remediation activities regardless of fault or ownership of sites. The company is also conducting environmental investigations, assessments or remediations at or in the vicinity of several current or former operating sites globally pursuant to permits, administrative orders or agreements with country, state or local environmental agencies, and is

involved in lawsuits and claims concerning certain current or former operating sites.

The company is also subject to ongoing tax examinations and governmental assessments in various jurisdictions. Along with many other U.S. companies doing business in Brazil, the company is involved in various challenges with Brazilian tax authorities regarding non-income tax assessments and non-income tax litigation matters. The total potential amount related to these matters for all applicable years is approximately \$525 million. The company believes it will prevail on these matters and that this amount is not a meaningful indicator of liability.

13. Commitments: The company's extended lines of credit to third-party entities include unused amounts of \$5,712 million and \$5,365 million at March 31, 2015 and December 31, 2014, respectively. A portion of these amounts was available to the company's business partners to support their working capital needs. In addition, the company has committed to provide future financing to its clients in connection with client purchase agreements for approximately \$1,634 million and \$1,816 million at March 31, 2015 and December 31, 2014, respectively.

The company has applied the guidance requiring a guarantor to disclose certain types of guarantees, even if the likelihood of requiring the guarantor's performance is remote. The following is a description of arrangements in which the company is the guarantor.

Notes to Consolidated Financial Statements – (continued)

The company is a party to a variety of agreements pursuant to which it may be obligated to indemnify the other party with respect to certain matters. Typically, these obligations arise in the context of contracts entered into by the company, under which the company customarily agrees to hold the party harmless against losses arising from a breach of representations and covenants related to such matters as title to the assets sold, certain intellectual property (IP) rights, specified environmental matters, third-party performance of nonfinancial contractual obligations and certain income taxes. In each of these circumstances, payment by the company is conditioned on the other party making a claim pursuant to the procedures specified in the particular contract, the procedures of which typically allow the company to challenge the other party's claims. While typically indemnification provisions do not include a contractual maximum on the company's payment, the company's obligations under these agreements may be limited in terms of time and/or nature of claim, and in some instances, the company may have recourse against third parties for certain payments made by the company.

It is not possible to predict the maximum potential amount of future payments under these or similar agreements due to the conditional nature of the company's obligations and the unique facts and circumstances involved in each particular agreement. Historically, payments made by the company under these agreements have not had a material effect on the company's business, financial condition or results of operations.

In addition, the company guarantees certain loans and financial commitments. The maximum potential future payment under these financial guarantees was \$40 million and \$46 million at March 31, 2015 and December 31, 2014, respectively. The fair value of the guarantees recognized in the Consolidated Statement of Financial Position is not material.

Changes in the company's warranty liability for standard warranties and deferred income for extended warranty contracts are presented in the following tables.

Standard Warranty Liability

(Dollars in millions)	2015		2014	
Balance at January 1	\$	197	\$	376
Current period accruals		35		54
Accrual adjustments to reflect actual experience		10		(3)
Charges incurred		(51)		(85)

Current portion	\$	245	\$	268
Noncurrent portion		258		280
Aggregate deferred revenue at March 31	\$	503	\$	548

* Other primarily consists of foreign currency translation adjustments.

14. Subsequent Events: On April 28, 2015, the company announced that the Board of Directors approved a quarterly dividend of \$1.30 per common share. The dividend is payable June 10, 2015 to shareholders of record on May 8, 2015. The dividend declaration represents an increase of \$0.20 per common share, which is 18 percent higher than the prior quarterly dividend of \$1.10 per common share.

* (4.2) percent adjusted for currency; flat adjusted for divestitures and currency.

Organization of Information:

In October 2014, the company announced a definitive agreement to divest its Microelectronics business. The assets and liabilities of the Microelectronics business are reported as held for sale at December 31, 2014 and March 31, 2015. The operating results of the Microelectronics business are reported as discontinued operations. Prior periods have been reclassified to conform to this presentation in the Consolidated Financial Statements and Management Discussion, where applicable, to allow for a meaningful comparison of continuing operations. In addition, in the first quarter of 2015, the company renamed its Systems & Technology segment to Systems Hardware.

Currency:

The references to "adjusted for currency" or "at constant currency" in the Management Discussion do not include operational impacts that could result from fluctuations in foreign currency rates. Certain financial results are adjusted based on a simple mathematical model that translates current period results in local currency using the comparable prior year period's currency conversion rate. This approach is used for countries where the functional currency is the local country currency. This information is provided so that certain financial results can be viewed without the impact of fluctuations in foreign currency rates, thereby facilitating period-to-period comparisons of business performance. See "Currency Rate Fluctuations" on page 62 for additional information.

Management Discussion – (continued)

Divestitures:

In September 2013, the company announced that it had signed a definitive agreement with SYNEX for the sale of its customer care process outsourcing business, and in January 2014, the company announced that it had signed a definitive agreement with Lenovo for the sale of its industry standard server business (System x). These transactions closed in 2014. The company presents certain financial results in the Management Discussion excluding the effects of the customer care and/or the System x business divestitures. The company believes that presenting financial information without either or both of these items is more representative of operational performance and provides insights into, and clarifies the basis for, historical and/or future performance, which may be more useful to users of the financial statements.

Operating (non-GAAP) Earnings:

In an effort to provide better transparency into the operational results of the business, the company separates business results into operating and non-operating categories. Operating earnings from continuing operations is a non-GAAP measure that excludes the effects of certain acquisition-related charges, retirement-related costs, discontinued operations and their related tax impacts. For acquisitions, operating earnings exclude the amortization of purchased intangible assets and acquisition-related charges such as in-process research and development, transaction costs, applicable restructuring and related expenses and tax charges related to acquisition integration. For retirement-related costs, the company characterizes certain items as operating and others as non-operating. The company includes defined benefit plan and nonpension postretirement benefit plan service cost, amortization of prior service cost and the cost of defined contribution plans in operating earnings. Non-operating retirement-related cost includes defined benefit plan and nonpension postretirement benefit plan interest cost, expected return on plan assets, amortized actuarial gains/losses, the impacts of any plan curtailments/settlements and multi-employer plan costs, pension insolvency costs and other costs. Non-operating retirement-related costs are primarily related to changes in pension plan assets and liabilities which are tied to financial market performance and the company considers these costs to be outside the operational performance of the business.

Overall, the company believes that providing investors with a view of operating earnings as described above provides increased transparency and clarity into both the operational results of the business and the performance of the company's pension plans; improves visibility to management decisions and their impacts on operational performance; enables better comparisons to peer companies; and allows the company to provide a long-term strategic view of the business going forward. The company's reportable segment financial results reflect operating earnings from continuing operations, consistent with the company's management and measurement system.

The following table provides the company's (non-GAAP) operating earnings for the first quarter of 2015 and 2014.

(Dollars in millions except per share amounts)			Yr. to Yr. Percent Change
For the three months ended March 31:	2015	2014	
Net income as reported	\$ 2,328	\$ 2,384	(2.4)%
Loss from discontinued operations, net of tax	(88)	(146)	(40.1)
Income from continuing operations	\$ 2,415	\$ 2,530	(4.6)%
Non-operating adjustments (net of tax):			
Acquisition-related charges	142	161	(12.1)
Non-operating retirement-related costs/(income)	333	98	239.5
Operating (non-GAAP) earnings*	\$ 2,890	\$ 2,790	3.6%
Diluted operating (non-GAAP) earnings per share	\$ 2.91	\$ 2.68	8.6%

* See page 70 for a more detailed reconciliation of net income to operating earnings.

Financial Performance Summary:

In the first quarter of 2015, the company delivered \$19.6 billion in revenue, \$2.4 billion in income from continuing operations and \$2.9 billion in operating (non-GAAP) earnings resulting in diluted earnings per share from continuing operations of \$2.44 as reported and \$2.91 on an operating (non-GAAP) basis. The results of continuing operations exclude a net loss from discontinued operations of \$0.1 billion in both the first quarter of 2015 and 2014 related to the expected divestiture of the Microelectronics business. On a consolidated basis, net income in the first quarter of 2015 was \$2.3 billion, with diluted earnings per share of \$2.35. The company generated \$3.6 billion in cash from operations and \$1.1 billion in free cash flow in the first quarter enabling shareholder returns of \$2.3 billion in gross common stock repurchases and dividends.

Management Discussion – (continued)

Total consolidated revenue decreased 11.9 percent as reported, but was flat year to year adjusted for divestitures and currency in the first quarter of 2015; this represented a 2 point sequential improvement in year-to-year performance from the third and fourth quarters of 2014. Currency had an 8 point, or \$1.7 billion impact on reported revenue in the first quarter. Additionally, revenue was impacted by 4 points in the first quarter as the company continued to shift its portfolio to higher value and divest businesses that no longer fit its strategic portfolio. Combined, the impact of currency and the divested businesses reduced the reported revenue growth by 12 points.

In February 2015, the company met with investors to describe how it's transforming the business to areas with long-term value in enterprise IT. The company has a core portfolio that is high value to its clients and high value to the company, and it is essential to both. While the market for these capabilities may not be growing, the company continues to reinvent and innovate to deliver that value. The company also continues to invest in its strategic imperatives solutions that address the opportunities in data, cloud, social, mobile and security. These are high value solutions. The company is able to grow the strategic imperatives at a rate significantly faster than the market because its offerings are highly differentiated, and because the core businesses provide the industry perspective and deep insight into how clients operate.

In the first quarter of 2015, strategic imperatives revenue grew more than 20 percent as reported and more than 30 percent year to year adjusted for currency and divestitures. Business analytics revenue increased 12 percent as reported and more than 20 percent adjusted for currency and divestitures. Social revenue increased 35 percent as reported and more than 40 percent adjusted for currency and divestitures, and mobile revenue grew more than 4 times the prior year period. Cloud revenue was up over 60 percent as reported and over 75 percent year to year in the first quarter adjusted for currency and divestitures. On a trailing twelve month basis, cloud revenue was \$7.7 billion, demonstrating the high growth in the higher value cloud opportunities across public, private and hybrid. The company had strong performance in its cloud foundational and as-a-service offerings and exited the quarter with an annual as-a-service run rate of \$3.8 billion, an increase of approximately \$1.5 billion from the prior year. The majority of that growth was organic, the result of the company's deep insights into how its clients run their business. In February 2015, the company announced a program to make hybrid cloud a reality for the enterprise extending clients' control, visibility, security and governance in a hybrid cloud environment similar to what they have in their private cloud and existing IT systems.

While the company is investing and driving growth in the strategic imperatives, it's continuing to reinvent and bring innovation to the core portfolio. For example, in the hardware business, the company has continued to invest and innovate. This led to the introduction of the z13 mainframe which is built for the mobile economy, and the roll out of POWER8, optimized for data and cloud. The company has also executed divestitures in the hardware business. The company is now starting to see the results of these actions. In March 2015, the first z13 system shipped and first-quarter 2015 mainframe revenue more than doubled year to year with MIPS shipments up 95 percent. Power Systems revenue returned to growth, at constant currency, leveraging strong performance in the scale-out systems.

All of this is driving the shift to higher value, resulting in a higher margin and supporting targeted investments. In 2015, the company is shifting \$4 billion of spending to data, cloud and engagement to extend its differentiation in the market. In April 2015, the company announced two initiatives, Internet of Things (IoT) and Watson Health. These initiatives will further strengthen its position as a high value innovation company providing solutions at the intersection of business and IT. The first quarter results reflect the transformation in the business, including:

- Continued momentum in the strategic imperatives,
- Strong growth in hardware resulting from continued innovation,
- Declines in the core portfolio consistent with the second half of 2014,
- Margin expansion driven by the shift to higher value, and
- Continuing to shift investments and rebalancing resources to address the best long-term opportunities in the market.

From a segment perspective, Global Services revenue declined 11.6 percent as reported and 2 percent adjusted for currency (9 points) and divestitures (1 point). Global Technology Services (GTS) declined 10.9 percent as reported and 1 percent adjusted for currency (9 points) and divestitures (1 point) primarily driven by the mix and timing of contracts from the GTS Outsourcing backlog. Global Business Services (GBS) revenue decreased 13.0 percent as reported and 4 percent adjusted for currency (8 points) and divestitures (1 point). Declines in the more traditional application areas, particularly in North America, were partially offset by strong growth in the strategic imperatives. Software revenue declined 8.2 percent (2 percent adjusted for currency) reflecting a modest sequential improvement at constant currency from the rate in the fourth quarter of 2015. Key branded middleware returned to growth at constant currency led by growth in the software-as-a-service offerings, which increased approximately 50 percent. Systems Hardware revenue decreased 22.6 percent as reported, but

Management Discussion – (continued)

increased 30 percent adjusted for the divested System x business (49 points) and currency (4 points). Performance reflected the strong start in the z13 product cycle and Power Systems revenue returning to growth year to year at constant currency.

From a geographic perspective, revenue in the major markets declined 10.7 percent as reported, but was flat year to year adjusted for currency (8 points) and divestitures (3 points) with growth in the U.S. and Japan on an adjusted basis. Growth markets revenue decreased 16.1 percent as reported and 1 percent adjusted for divestitures (9 points) and currency (6 points) compared to the first quarter of 2014, with growth in Brazil and India on an adjusted basis. The company had sequential improvement year to year on an adjusted basis in both the major markets and the growth markets.

The consolidated gross profit margin of 48.2 percent improved 0.5 points year to year. The operating (non-GAAP) gross margin of 49.3 percent increased 0.8 points compared to the prior year primarily driven by both portfolio actions and the strong growth in System z.

Total expense and other (income) decreased 13.3 percent in the first quarter of 2015 versus the prior year. Total operating (non-GAAP) expense and other (income) decreased 16.8 percent compared to the prior year. The year-to-year drivers were approximately:

	Total Consolidated	Operating (non-GAAP)
Currency*	(9) points	(8) points
System x divestiture	(2) points	(2) points
Divestiture gains (1Q14)	1 point	1 point
Workforce rebalancing	(7) points	(7) points

* Reflects impacts of translation and hedging programs.

The reduction in expense was driven by a lower level of workforce rebalancing charges (a decrease of \$0.6 billion); the fact that the divested System x business is no longer in the spending base; and currency impacts. These benefits were partially offset by the impact of a divestiture gain (\$0.1 billion) in the prior year and a current year charge for an additional pension obligation in Spain (\$0.2 billion year-to-year impact). The reduction in operating (non-GAAP) expense was driven by the same factors, excluding the Spain pension obligation which is not reflected in operating (non-GAAP) expense. The company is continuing to shift resources and spending to areas with the most opportunity and plans to shift \$4 billion of spending across expense, cost and capital, to its strategic imperatives in 2015. In the first quarter of 2015, the company has been executing that plan and increased expense in key areas including SoftLayer, Watson and Bluemix.

Pre-tax income from continuing operations decreased 5.7 percent and the pre-tax margin was 15.3 percent, an increase of 1.0 points versus the first quarter of 2014. The continuing operations effective tax rate for the first quarter of 2015 was 19.5 percent, a decrease of 1.0 points versus the prior year. Income from continuing operations of \$2.4 billion decreased 4.6 percent and the net income margin was 12.3 percent, an increase of 0.9 points versus the first quarter of 2014. Losses from discontinued operations, net of tax, were \$0.1 billion in both the first quarter of 2015 and 2014, respectively. Net income of \$2.3 billion decreased 2.4 percent year to year. Operating (non-GAAP) pre-tax income from continuing operations increased 3.0 percent year to year and the operating (non-GAAP) pre-tax margin from continuing operations improved 2.7 points to 18.4 percent. Operating (non-GAAP) income from continuing operations of \$2.9 billion increased 3.6 percent and the operating (non-GAAP) income margin from continuing operations of 14.8 percent increased 2.2 points. The operating (non-GAAP) effective tax rate from continuing operations in the first quarter of 2015 was 20.0 percent versus 20.5 percent in the first quarter of 2014. The lower tax rates in the first quarter of 2015 benefited from a more favorable mix of geographic income offset by a decrease in the utilization of foreign tax credits.

Diluted earnings per share from continuing operations of \$2.44 increased 0.4 percent year to year. In the first quarter of 2015, the company repurchased 7.7 million shares of its common stock. Operating (non-GAAP) diluted earnings per share of \$2.91 increased 8.6 percent versus the prior year driven primarily by margin expansion and the impact of share repurchases, partially offset by the impact of lower as-reported revenue. Diluted earnings per share from discontinued operations was (\$0.09) in the first quarter of 2015 compared to (\$0.14) in the first quarter of 2014.

At March 31, 2015, the company continues to have the financial flexibility to support the business over the long term. Cash and marketable securities at quarter end were \$8.8 billion, an increase of \$0.3 billion from December 31, 2014. Key drivers in the balance sheet and total cash flows were:

Management Discussion – (continued)

Total assets decreased \$5.5 billion (\$1.1 billion adjusted for currency) from December 31, 2014 driven by:

- Decreases in total receivables (\$5.3 billion) and goodwill (\$0.7 billion); partially offset by
- Increased prepaid expenses and sundry assets (\$0.8 billion).

Total liabilities decreased \$5.8 billion (\$2.3 billion adjusted for currency) from December 31, 2014 driven by:

- Decreases in total debt (\$2.0 billion), taxes (\$1.5 billion), retirement-related liabilities (\$1.1 billion) and compensation and benefits (\$0.7 billion).

Total equity of \$12.3 billion increased \$0.3 billion from December 31, 2014 as a result of:

- Higher retained earnings (\$1.2 billion) and higher common stock (\$0.3 billion); partially offset by
- Increased treasury stock (\$1.3 billion).

The company generated \$3.6 billion in cash flow provided by operating activities, an increase of \$0.3 billion when compared to the first quarter of 2014, driven primarily by a lower level of income tax payments (\$1.2 billion) and improvements from inventory (\$0.2 billion), partially offset by a decrease in cash provided by receivables (\$0.8 billion) and higher performance-based compensation payments (\$0.4 billion). Net cash provided by investing activities of \$0.6 billion was \$0.5 billion higher than the prior year, primarily due to higher cash sourced from non-operating finance receivables (\$1.0 billion), partially offset by a decrease in cash provided from divestitures (\$0.4 billion). Net cash used in financing activities of \$3.4 billion decreased \$1.3 billion compared to the first quarter of 2014, driven primarily by a decrease in cash used for gross common stock repurchases (\$7.0 billion), partially offset by a reduction in cash sourced from net debt transactions (\$5.5 billion) driven by lower issuances in 2015.

The company has been transforming the business and continues to see evidence that the transformation is working. In April 2015, the company disclosed that it is expecting GAAP earnings in the range of \$14.17 to \$14.92

and, it continues to expect operating (non-GAAP) earnings between \$15.75 and \$16.50 per diluted share from continuing operations for 2015. The company also stated that it continues to expect free cash flow in 2015 to be flat compared to 2014.

Management Discussion – (continued)**First Quarter in Review***Results of Continuing Operations*Segment Details

The following is an analysis of the first quarter of 2015 versus the first quarter of 2014 reportable segment external revenue and gross margin results. Segment pre-tax income includes transactions between the segments that are intended to reflect an arm's-length transfer price and excludes certain unallocated corporate items.

Global Services

In the first quarter of 2015, the Global Services segments, GTS and GBS, delivered combined revenue of \$12,204 million, a decrease of 11.6 percent as reported and 2 percent adjusted for currency (9 points) and divestitures (1 point). This quarter, the company closed fifteen deals greater than \$100 million with about half for new clients, or new scope with existing clients. This reflects the strength of the company's offerings and client's confidence in its ability to manage the most critical assets in their business. Pre-tax income in the first quarter decreased 19.4 percent and the pre-tax margin decreased 1.2 points to 12.7 percent.

Management Discussion – (continued)

(Dollars in millions) For the three months ended March 31:			Yr. to Yr. Percent	Yr. to Yr. Percent Change Adjusted For
	2015	2014**	Change	Currency
Global Services external revenue:	\$ 12,204	\$ 13,813	(11.6)%	(2.0)%*
Global Technology Services	\$ 7,886	\$ 8,849	(10.9)%	(1.1)%*
Outsourcing	4,219	4,800	(12.1)	(2.1)
Integrated Technology Services	2,112	2,329	(9.3)	(0.7)

Outsourcing	1,228	1,415	(13.2)	(1.1)*
Consulting and Systems Integration	3,090	3,549	(12.9)	(4.6)

* Adjusted for divestitures and currency.

** Reclassified to conform with 2015 presentation.

Global Technology Services revenue of \$7,886 million decreased 10.9 percent as reported and 1 percent adjusted for currency (9 points) and the System x divestiture (1 point). Within GTS, outsourcing revenue of \$4,219 million decreased 12.1 percent as reported and 2 percent adjusted for currency. This performance reflects the mix and timing of contracts coming from the backlog. As expected, many of the larger contracts signed in the prior year did not contribute to revenue in the first quarter. The company is continuing to see clients sign large infrastructure outsourcing deals with embedded cloud and mobile initiatives to create large-scale hybrid IT environments. The company is the trusted partner for these core business transformations because of its global capabilities and portfolio breadth. The Forrester Research Wave evaluation recently cited the company as the leading supplier in the global infrastructure outsourcing segment. Integrated Technology Services (ITS) revenue of \$2,112 million decreased 9.3 percent and 1 percent adjusted for currency. Within ITS, there was good growth at constant currency in cloud, security and business resiliency, but overall revenue performance was impacted by a shift away from lower-value services such as datacenter build-outs and OEM hardware deployments. SoftLayer grew solid double digits this quarter on an adjusted basis, improving sequentially and building on the expanded datacenter capacity. The company continued its steady progress with the opening of new footprints in Montreal, Sydney and Amsterdam this quarter. Clients are choosing SoftLayer as the platform on which to integrate cloud initiatives with their core systems into a unified hybrid IT model. Maintenance revenue of \$1,554 million decreased 9.7 percent as reported, but was up 2 percent for the quarter adjusted for currency (8 points) and the System x divestiture (4 points). This growth was driven by Multivendor Support Services, which is the company's third party hardware maintenance offering. The continued growth of maintenance is another demonstration of the strength of the company's global reach and capabilities. As organizations expand, they want a partner who has scale and can provide global parts and support capabilities.

Global Business Services revenue of \$4,318 million decreased 13.0 percent and 4 percent adjusted for currency (8 points) and divestitures (1 point) in the first quarter of 2015. Consulting and Systems Integration revenue of \$3,090 million declined 12.9 percent as reported and 5 percent adjusted for currency in the first quarter. GBS Outsourcing revenue of \$1,228 million decreased 13.2 percent and 1 percent adjusted for currency (8 points) and the divestitures (5

points). As announced last year, Global Process Services, the company's business process outsourcing business has now been integrated into GBS to create a seamless end-to-end business transformation capability for clients and to better leverage the company's industry knowledge. In the first quarter, GBS had solid performance in many markets and solution areas. On an adjusted basis, Japan has been consistently growing revenue and expanding margin, with solid growth in consulting and application outsourcing. In the first quarter, Europe returned to revenue growth on an adjusted basis. Across all geographies, GBS continued to drive strong growth in the offerings that address the strategic imperatives. On an adjusted basis, cloud solutions more than tripled year to year, analytics grew double digits, and there was good growth in mobile and social. The company is helping clients create new business models and opportunities for client engagement. The challenge for GBS is North America. While there is strong business growth in the strategic imperatives, the company is dealing with a slowdown in some of the more traditional areas. While GBS has some very positive elements in the U.S., its performance overall in the country has had a significant impact on the segment due to its relative size.

Management Discussion – (continued)

(Dollars in millions)			Yr. to Yr. Percent/ Margin Change
For the three months ended March 31:	2015	2014*	
Global Technology Services:			
External gross profit	\$ 2,950	\$ 3,432	(14.1)%
External gross profit margin	37.4%	38.8%	(1.4)pts.
Pre-tax income	\$ 994	\$ 1,215	(18.2)%
Pre-tax margin	12.3%	13.4%	(1.1)pts.
Global Business Services:			
External gross profit	\$ 1,184	\$ 1,450	(18.3)%
External gross profit margin	27.4%	29.2%	(1.8)pts.
Pre-tax income	\$ 597	\$ 759	(21.3)%
Pre-tax margin	13.4%	14.9%	(1.4)pts.

* Reclassified to conform with 2015 presentation.

The GTS gross profit margin of 37.4 percent decreased 1.4 points in the first quarter of 2015 compared to prior year. In the first quarter, pre-tax income decreased 18.2 percent to \$994 million and the pre-tax margin declined 1.1 points to 12.3 percent compared to the prior year. The year-to-year decrease in margin was driven by a few elements. Currency was the biggest impact to profit on a year-to-year basis, and maintenance profit was down due to the System x divestiture. Profit and margin performance also reflect the continued investments in the business to expand operational capabilities. The SoftLayer datacenter expansion is one example. This gives the company a highly differentiated offering in hybrid cloud, especially as it relates to data residency requirements. The company is also increasing sales hiring in its mobile and security practices, and making investments in its resiliency business. It is accelerating its transition to a more significant global delivery model, which requires hiring and training costs ahead of the expected savings. Finally, though there was a year-to-year benefit from a smaller workforce rebalancing charge in the quarter, the bulk of the savings from the recent actions have not yet been realized.

The GBS gross profit margin of 27.4 percent decreased 1.8 points in the first quarter 2015 compared to prior year and pre-tax income decreased 21.3 percent to \$597 million. Pre-tax margin declined 1.4 points to 13.4 percent compared to the prior year with a mix of drivers. There was some benefit from the lower workforce rebalancing charges this year and some savings from the action taken in the prior year. There was an impact from the customer care divestiture, both by the loss of operational profit and by not having the gain in the current year results. The balance of the margin decline was driven by the cost structure in those geographies where the company is not growing revenue. The company is making investments and taking actions to make the cost structure more competitive, including rebalancing to more global delivery, use of alternate labor models, and shifting resources toward higher-value strategic imperative offerings.

Global Services Backlog

Edgar Filing: INTERNATIONAL BUSINESS MACHINES CORP - Form 10-Q

The estimated Global Services backlog at March 31, 2015 was \$121 billion, a decrease of 12.3 percent (flat adjusted for currency) compared to the March 31, 2014 balance. The estimated transactional backlog at March 31, 2015 decreased 12.5 percent (2 percent adjusted for currency) from the March 31, 2014 levels. The estimated outsourcing backlog decreased 11.7 percent as reported and increased 2 percent adjusted for currency compared to the prior year.

(Dollars in billions)	At March 31, 2015	At March 31, 2014	Yr. to Yr. Percent Change	Yr. to Yr. Percent Change Adjusted For Currency
<u>Backlog:</u>				
Total backlog	\$ 120.7	\$ 137.6	(12.3)%	(0.1)%
Outsourcing backlog	\$ 76.1	\$ 86.2	(11.7)%	1.8%

Total Global Services backlog includes GTS Outsourcing, ITS, GBS Outsourcing, Consulting and Systems Integration and Maintenance. Outsourcing backlog includes GTS Outsourcing and GBS Outsourcing. Transactional backlog includes ITS and Consulting and Systems Integration. Total backlog is intended to be a statement of overall work under contract and therefore does include Maintenance. Backlog estimates are subject to change and are affected by several factors, including terminations, changes in the scope of contracts, periodic revalidations, adjustments for revenue not materialized and adjustments for currency.

Management Discussion – (continued)

Global Services signings are management's initial estimate of the value of a client's commitment under a Global Services contract. There are no third-party standards or requirements governing the calculation of signings. The calculation used by management involves estimates and judgments to gauge the extent of a client's commitment, including the type and duration of the agreement, and the presence of termination charges or wind-down costs.

Signings include GTS Outsourcing, ITS, GBS Outsourcing and Consulting and Systems Integration contracts. Contract extensions and increases in scope are treated as signings only to the extent of the incremental new value. Maintenance is not included in signings as maintenance contracts tend to be more steady state, where revenues equal renewals.

Contract portfolios purchased in an acquisition are treated as positive backlog adjustments provided those contracts meet the company's requirements for initial signings. A new signing will be recognized if a new services agreement is signed incidental or coincidental to an acquisition or divestiture.

(Dollars in millions)			Yr. to Yr. Percent Change	Yr. to Yr. Percent Change Adjusted For Currency
For the three months ended March 31:	2015	2014		
Total signings:	\$ 10,651	\$ 11,153	(4.5)%	4.9%
Outsourcing signings	\$ 5,531	\$ 5,488	0.8%	10.9%
Transactional signings	5,120	5,665	(9.6)%	(0.9)%

Software

(Dollars in millions)			Yr. to Yr. Percent Change	Yr. to Yr. Percent Change Adjusted For Currency
For the three months ended March 31:	2015	2014		
Software external revenue:	\$ 5,199	\$ 5,661	(8.2)%	(1.8)%
Middleware:	\$ 4,365	\$ 4,695	(7.0)%	(0.5)%
Key branded middleware:	3,472	3,656	(5.0)	1.3
WebSphere			(4.1)	1.4
Information Management			(6.3)	0.2
Workforce Solutions			1.0	10.0
Tivoli			(2.8)	4.0
Rational			(15.5)	(10.0)
Other middleware	893	1,039	(14.0)	(7.2)
Operating systems	441	519	(15.0)	(8.9)

Other	392	447	(12.3)	(6.2)
-------	-----	-----	--------	-------

Software revenue of \$5,199 million decreased 8.2 percent (2 percent adjusted for currency) in the first quarter of 2015 compared to the prior year. Adjusted for currency, year-to-year performance reflected a modest sequential improvement from the fourth quarter of 2014. Middleware decreased 7.0 percent (1 percent adjusted for currency), while operating systems were down 15.0 percent (9 percent adjusted for currency). The decline in operating systems impacted total software growth year to year at constant currency by approximately 1 point.

Key branded middleware revenue decreased 5.0 percent as reported and grew 1 percent adjusted for currency compared to the prior year. While there were mixed results across the brands, there was strong growth on an adjusted basis for currency across many solution areas. Software-as-a-service offerings were up nearly 50 percent. Analytics software was up, and mobile software grew at a strong double digit rate, led by the MobileFirst offerings. There was solid growth in commerce solutions where a large proportion of the business is software-as-a-service. Social solutions grew double-digits at constant currency driven by strong performance in Kenexa and advanced collaboration offerings.

Across software, the company continues to drive innovation and capture growth areas, building its software into broader solution capabilities. Recently, the company made two major announcements: the Internet of Things (IoT) and Watson Health. These initiatives are a continuation of what was started in 2014 with Watson and expanded earlier in 2015 with analytics, commerce and security. There are some common threads throughout. They are all based on a unique point of view around cloud and the value of hybrid. They all use analytics to leverage data and they all have an industry dimension.

Management Discussion – (continued)

The company announced the IoT initiative at the end of March, committing \$3 billion of spending over the next four years. As part of this initiative, a cloud-based open platform to help clients and partners build and deliver vertical industry IoT solutions is being established. The company has also created an IoT zone within Bluemix, its platform-as-a-service, and is expanding an IoT ecosystem to leverage a growing developer and entrepreneur community. This is similar to what has been done with Watson, where there are not only large partners, but where there are also hundreds of smaller, less known ecosystem partners, all of whom are building commercial applications on Watson.

Watson Health was announced in April. The company believes it will transform healthcare by bringing together the advanced cognitive capabilities of Watson with a vast ecosystem of partners, practitioners and researchers. There are several aspects to the Watson Health announcement from the creation of a Watson Health Cloud, to partnerships with leading companies and the acquisition of two companies that extend the company's healthcare analytics capabilities.

These are the two most recent examples of where the company is partnering in new ways to drive innovation and build an ecosystem to transform industries.

(Dollars in millions)				Yr. to Yr. Percent/ Margin Change
For the three months ended March 31:	2015		2014	
Software:				
External gross profit	\$ 4,502	\$	4,956	(9.2)%
External gross profit margin	86.6%		87.5%	(0.9)pts.
Pre-tax income	\$ 1,936	\$	1,918	0.9%
Pre-tax margin	31.4%		29.1%	2.3pts.

The Software gross profit margin decreased 0.9 points to 86.6 percent in the first quarter 2015 compared to the prior year. Software pre-tax income of \$1,936 million increased 0.9 percent, including the year-to-year benefit from lower workforce rebalancing charges, with a pre-tax margin of 31.4 percent, an increase of 2.3 points.

Systems Hardware

**Yr. to Yr.
Percent**

(Dollars in millions)			Yr. to Yr. Percent	Change Adjusted For
For the three months ended				
March 31:	2015	2014	Change	Currency
Systems Hardware external revenue:	\$ 1,659	\$ 2,143	(22.6)%	30.2%*
System z			118.4%	130.5%
Power Systems			(3.0)	1.5
Storage			(7.6)	(2.1)
System x			(99.5)	(99.4)

* Adjusted for divestitures and currency.

In the first quarter of 2015, Systems Hardware revenue of \$1,659 million decreased 22.6 percent as reported but grew 30 percent year to year adjusted for the divestiture of the System x business (49 points) and currency (4 points) as the company continues to deliver innovation across its high end systems.

System z revenue increased 118.4 percent (130 percent adjusted for currency), compared to the prior year period. MIPS (millions of instructions per second) shipments increased 95 percent year to year resulting in revenue more than doubling. Shipments of the new z13 mainframe began in the second week of March and it was the fastest start in number of systems shipped in over a decade. Additionally, the year-to-year growth rate reported in the first quarter was the highest in any quarter in more than a decade. The capabilities of the z13 mainframe around data, mobile, cloud and real-time insights and fraud detection are resonating well with customers. The new mainframe was built to handle workloads of the future that are secure and available 100 percent of the time.

Management Discussion – (continued)

Power Systems revenue decreased 3.0 percent, but returned to growth of 1 percent adjusted for currency, leveraging on strong performance in its scale-out systems. In the quarter, the company not only gained share in the declining Unix market, but it also expanded beyond Unix with Linux on Power and the OpenPOWER IP opportunity. The company is expanding its customer base in entry-level Linux systems as well as with large cloud-based customers. In addition, just over a year ago, the OpenPOWER Foundation was launched to open up the Power technology and build an ecosystem to share intellectual property. The ecosystem of partners includes established companies such as Google, Nvidia, Mellanox, Samsung, Tyan and Inspur. It also includes other smaller, emerging companies adding breadth and reach. In March, the foundation unveiled more than ten new hardware innovations that continue to make Power technology relevant beyond the Unix market. Zoom Netcom, a data communication and equipment supplier, will launch a system in the market later this year, which is based on the first derivative of a POWER chip unveiled by Suzhou PowerCore. This demonstrates that the company's Power strategy is working and that there is momentum in the business.

Storage revenue decreased 7.6 percent (2 percent adjusted for currency) in the first quarter representing a modest year-to-year sequential improvement compared to the fourth quarter of 2014. There was continued strong growth in FlashSystems. However, this growth was offset by the wind down of the OEM business and continued price weakness in high-end disk. The company sees the value in storage shifting to software and, in the first quarter, it introduced IBM Spectrum Storage, new storage software in support of hybrid cloud environments. The portfolio provides greater access to data, accelerates speed to insights and improves data economics.

Overall, the Systems Hardware segment growth, on an adjusted basis, is a result of the actions the company has taken to position its Systems business for the future.

(Dollars in millions)			Yr. to Yr. Percent/ Margin Change
For the three months ended March 31:	2015	2014	
Systems Hardware:			
External gross profit	\$ 738	\$ 729	1.2 %
External gross profit margin	44.5%	34.0%	10.5pts.
Pre-tax income/(loss)	\$ 24	\$ (457)	nm
Pre-tax margin	1.4%	(19.8)%	21.2pts.

nm - not meaningful

The Systems Hardware gross profit margin of 44.5 percent increased 10.5 points in the first quarter of 2015 versus the prior year. The increase was due to mix (17.0 points) driven by the strong growth in System z and the divestiture of the lower margin System x business. This improvement was offset by a decrease due to margin (6.6 points), with lower margins in System z (3.7 points), Power Systems (1.3 points) and Storage (1.5 points). Systems Hardware pre-tax income was \$24 million, an increase of \$481 million compared to the prior year, with a pre-tax

margin of 1.4 percent, up 21 points year to year.

Global Financing

See pages 64 through 69 for a discussion of Global Financing's segment results.

Geographic Revenue

In addition to the revenue presentation by reportable segment, the company also measures revenue performance on a geographic basis. The following geographic, regional and country-specific revenue performance excludes OEM revenue.

Management Discussion – (continued)

(Dollars in millions)			Yr. to Yr. Percent	Yr. to Yr. Percent Change Adjusted For
For the three months ended March 31:	2015	2014	Change	Currency*
Total Revenue	\$ 19,590	\$ 22,236	(11.9)%	0.0%
Geographies:	\$ 19,498	\$ 22,129	(11.9)%	0.0%
Americas	9,312	9,596	(3.0)	2.4
Europe/Middle East/Africa (EMEA)	6,125	7,578	(19.2)	(2.0)
Asia Pacific	4,061	4,955	(18.0)	(1.7)
Major markets			(10.7)%	0.1%
Growth markets			(16.1)%	(0.6)%
BRIC countries			(20.7)%	(3.2)%

* Adjusted for divestitures and currency.

Total geographic revenue of \$19,498 million decreased 11.9 percent as reported and was flat adjusted for currency (8 points) and divestitures (4 points) in the first quarter of 2015 compared to the prior year. Major market countries decreased 10.7 percent as reported and were flat adjusted for currency (8 points) and divestitures (3 points). Growth market countries decreased 16.1 percent as reported and 1 percent adjusted for divestitures (9 points) and currency (6 points). On an adjusted basis, there was sequential improvement in year-to-year performance in both the major markets and the growth markets led by the U.S., Japan and Latin America.

In the growth markets, the year-to-year performance adjusted for currency and the divestitures improved sequentially by approximately 2 points from the fourth quarter of 2014. This performance was driven by broad-based growth in Latin America which decreased 2.1 percent as reported, but grew 14 percent adjusted for currency (12 points) and divestitures (4 points). On an adjusted basis, there was also growth in the Middle East and Africa region which decreased 6.6 percent as reported, but grew 4 percent adjusted for divestitures (9 points) and currency (2 points). Within the BRIC countries, combined revenue decreased 20.7 percent as reported and 3 percent adjusted for divestitures (12 points) and currency (5 points). On an adjusted basis, this represented sequential improvement compared to year-to-year performance in the fourth quarter of 2014. However, this overall growth rate was not reflective of the individual country performance. On an adjusted basis, growth in Brazil and India was offset by declines in Russia and China. While the company has a profitable business in China and it continues to have strong growth in mainframes, services revenue declined as the company shifts its focus away from some of the lower margin offerings.

Americas revenue of \$9,312 million decreased 3.0 percent as reported and grew 2 percent adjusted for divestitures (3 points) and currency (3 points) compared to the first quarter of 2014. On an adjusted basis, there was growth in both the major markets and Latin American growth markets. North America declined 3.1 percent as reported and grew

1 percent adjusted for divestitures (2 points) and currency (1 point). The U.S. decreased 0.6 percent, but grew 2 percent adjusted for divestitures. There was good transactional performance in the U.S. with strong growth across the hardware portfolio and some large software deals. The broad based growth in the Latin American growth markets on an adjusted basis included strong performance in Brazil and Mexico. Brazil decreased 5.4 percent as reported, but grew 11 percent adjusted for currency (14 points) and divestitures (3 points). Mexico grew 7 percent as reported and 20 percent adjusted for currency (8 points) and divestitures (5 points).

EMEA revenue of \$6,125 million decreased 19.2 percent as reported, but only 2 percent adjusted for currency (14 points) and divestitures (3 points) on a year-to-year basis. Major market countries were down 19.6 percent as reported and 2 percent adjusted for currency (15 points) and divestitures (3 points). Growth market countries were down 15.8 percent as reported and 3 percent adjusted for divestitures (8 points) and currency (5 points). In the first quarter, there was mixed performance within the major market countries with growth on an adjusted basis in the UK and declines in Germany and France. From a brand perspective, adjusted for currency, there was good growth in mainframe and Power, and continued momentum in outsourcing signings as clients look to integrate cloud and mobile capabilities into large scale IT environments. Overall, the company's performance decelerated, but it was in line with the market. Within the growth markets, the growth on an adjusted basis in the Middle East and Africa region was more than offset by declines in the central and eastern European countries. Russia decreased 25.4 percent as reported and 18 percent adjusted for divestitures.

Management Discussion – (continued)

Asia Pacific first quarter revenue of \$4,061 million decreased 18.0 percent as reported and 2 percent adjusted for divestitures (8 points) and currency (8 points) year over year. Japan decreased 12.7 percent as reported, but grew 4 percent adjusted for currency (14 points) and divestitures (3 points). Growth in Japan accelerated in the first quarter on the strength of services and hardware. Within growth markets, China decreased 36.6 percent as reported and 17 percent adjusted for divestitures (19 points) and currency (1 point). India decreased 6.2 percent as reported and increased 4 percent adjusted for divestitures (9 points) and currency (1 point). Although Asia Pacific growth markets in total declined again this quarter, there was sequential improvement in some key countries on an adjusted basis.

ExpenseTotal Expense and Other (Income)

(Dollars in millions)			Yr. to Yr. Percent Change
For the three months ended March 31:	2015	2014	
Total consolidated expense and other (income)	\$ 6,451	\$ 7,444	(13.3)%
Non-operating adjustments:			
Amortization of acquired intangible assets	(79)	(92)	(13.5)
Acquisition-related charges	0	(6)	(99.3)
Non-operating retirement-related (costs)/income	(321)	(70)	356.8
Operating (non-GAAP) expense and other (income)	\$ 6,051	\$ 7,276	(16.8)%
Total consolidated expense-to-revenue ratio	32.9%	33.5%	(0.5)pts.
Operating (non-GAAP) expense-to-revenue ratio	30.9%	32.7%	(1.8)pts.

Total expense and other (income) decreased 13.3 percent in the first quarter of 2015 compared to the first quarter of 2014. Total operating (non-GAAP) expense and other (income) decreased 16.8 percent versus the first quarter of 2014. The key drivers of the year-to-year change in total expense and other (income) were approximately:

	Total Consolidated	Operating (non-GAAP)
Currency*	(9) points	(8) points
System x divestiture	(2) points	(2) points
Divestiture gains (1Q14)	1 point	1 point
Workforce rebalancing	(7) points	(7) points

* Reflects impacts of translation and hedging programs.

For additional information regarding total expense and other (income) for both expense presentations, see the following analyses by category.

Management Discussion – (continued)Selling, general and administrative expense

(Dollars in millions)			Yr. to Yr. Percent Change
For the three months ended March 31:	2015	2014	
Selling, general and administrative expense:			
Selling, general and administrative – other	\$ 4,077	\$ 4,599	(11.3)%
Advertising and promotional expense	313	338	(7.5)
Workforce rebalancing charges	285	869	(67.2)
Retirement-related costs	438	231	89.4
Amortization of acquired intangible assets	79	92	(13.5)
Stock-based compensation	87	88	(1.8)
Bad debt expense	83	55	49.7
Total consolidated selling, general and administrative expense	\$ 5,362	\$ 6,272	(14.5)%
Non-operating adjustments:			
Amortization of acquired intangibles assets	(79)	(92)	(13.5)
Acquisition-related charges	0	(6)	(99.2)
Non-operating retirement-related (costs)/income	(308)	(87)	252.8
Operating (non-GAAP) selling, general and administrative expense	\$ 4,975	\$ 6,087	(18.3)%

Total selling, general and administrative (SG&A) expense decreased 14.5 percent in the first quarter of 2015 versus the prior year. The decrease was primarily driven by currency (8 points), lower workforce rebalancing charges (8 points) and the impact of the divested System x business (2 points), partially offset by an increase in retirement-related costs which included an additional retirement-related obligation of \$230 million related to a court ruling in Spain. Operating (non-GAAP) expense decreased 18.3 percent year to year driven by primarily the same factors, excluding the Spain pension obligation which is not reflected in operating (non-GAAP) expense. Bad debt expense increased \$28 million year to year. The receivables provision coverage was 2.6 percent at March 31, 2015, an increase of 40 basis points from year-end 2014 and 80 basis points from March 31, 2014.

Research, Development and Engineering

(Dollars in millions)			Yr. to Yr. Percent Change
For the three months ended March 31:	2015	2014	
Total consolidated research, development and engineering expense	\$ 1,298	\$ 1,402	(7.4)%
Non-operating adjustment:			
Non-operating retirement-related (costs)/income	(13)	17	nm
Operating (non-GAAP) research, development and engineering expense	\$ 1,285	\$ 1,419	(9.4)%

nm - not meaningful

Research, development and engineering (RD&E) expense was 6.6 percent of revenue in the first quarter of 2015 compared to 6.3 percent of revenue in the first quarter of 2014. RD&E expense decreased 7.4 percent year to year in the first quarter of 2015 primarily driven by currency (4 points) and the impact of the divested System x business (5 points). Operating (non-GAAP) RD&E expense decreased 9.4 percent compared to the first quarter of 2014 driven by the same factors.

Management Discussion – (continued)Intellectual Property and Custom Development Income

(Dollars in millions)			Yr. to Yr. Percent Change
For the three months ended March 31:	2015	2014	
Intellectual Property and Custom Development Income:			
Sales and other transfers of intellectual property	\$ 71	\$ 93	(23.0)%
Licensing/royalty-based fees	31	33	(4.6)
Custom development income	70	82	(14.0)
Total	\$ 173	\$ 207	(16.5)%

The timing and amount of Sales and other transfers of IP may vary significantly from period to period depending upon the timing of divestitures, economic conditions, industry consolidation and the timing of new patents and know-how development. There were no significant individual IP transactions in the first quarter of 2015 and 2014.

Other (income) and expense

(Dollars in millions)			Yr. to Yr. Percent Change
For the three months ended March 31:	2015	2014	
Other (income) and expense:			
Foreign currency transaction losses/(gains)	\$ 90	\$ 43	109.0%
(Gains)/losses on derivative instruments	(177)	5	nm
Interest income	(19)	(22)	(15.2)
Net (gains)/losses from securities and investment assets	(1)	6	nm
Other	(37)	(159)	(76.5)
Total consolidated other (income) and expense	\$ (143)	\$ (127)	12.5%
Non-operating adjustment:			
Acquisition-related charges	0	0	(100.0)
Operating (non-GAAP) other (income) and expense	\$ (143)	\$ (128)	12.4%

nm - not meaningful

The increase in income of \$16 million year over year was primarily driven by higher gains on derivative instruments (\$182 million), partially offset by the gain associated with the divestiture of the customer care business (\$98 million) in the first quarter of 2014 and higher foreign currency transaction losses (\$47 million) year to year due to foreign currency rate volatility.

Interest Expense

(Dollars in millions)			Yr. to Yr. Percent Change
For the three months ended March 31:	2015	2014	

Interest expense	\$	108	\$	105	2.7%
------------------	----	-----	----	-----	------

Interest expense increased \$3 million year to year in the first quarter of 2015. Interest expense is presented in cost of financing in the Consolidated Statement of Earnings only if the related external borrowings are to support the Global Financing external business. Overall interest expense (excluding capitalized interest) for the first quarter of 2015 was \$247 million, a decrease of \$13 million year to year driven primarily by lower average debt levels.

Retirement-Related Plans

The following table provides the total pre-tax cost for all retirement-related plans. These amounts are included in the Consolidated Statement of Earnings within the caption (e.g., Cost, SG&A, RD&E) relating to the job function of the plan participants.

Management Discussion – (continued)

(Dollars in millions)			Yr. to Yr. Percent Change
For the three months ended March 31:	2015	2014	
Retirement-related plans – cost:			
Service cost	\$ 116	\$ 124	(6.7)%
Amortization of prior service costs/(credits)	(26)	(29)	(12.9)
Cost of defined contribution plans	288	324	(11.0)
Total operating costs/(income)	\$ 379	\$ 419	(9.6)%
Interest cost	\$ 834	\$ 1,006	(17.1)%
Expected return on plan assets	(1,474)	(1,599)	(7.8)
Recognized actuarial losses	829	632	31.3
Curtailments/settlements	4	4	(9.3)
Multi-employer plans/other costs	248	79	214.7
Total non-operating costs/(income)	\$ 442	\$ 123	260.4%
Total retirement-related plans – cost	\$ 820	\$ 541	51.6%

In the first quarter of 2015, total pre-tax retirement-related plan cost increased by \$279 million compared to the first quarter of 2014, primarily driven by an increase in recognized actuarial losses (\$198 million), higher pension obligations resulting from a court ruling in Spain (\$175 million) and lower actual return on plan assets (\$125 million), partially offset by lower interest cost (\$173 million).

As discussed in the “Snapshot” on page 42, the company characterizes certain retirement-related costs as operating and others as non-operating. Utilizing this characterization, operating retirement-related costs in the first quarter of 2015 were \$379 million, a decrease of \$40 million compared to the first quarter of 2014, primarily driven by lower defined contribution plans cost (\$35 million). Non-operating costs of \$442 million increased \$319 million in the first quarter of 2015 year to year, driven primarily by an increase in recognized actuarial losses (\$198 million), higher pension obligations resulting from a court ruling in Spain (\$175 million) and lower actual return on plan assets (\$125 million), partially offset by lower interest cost (\$173 million).

Taxes

The continuing operations effective tax rate for the first quarter of 2015 was 19.5 percent, a decrease of 1.0 points compared to the first quarter of 2014. The operating (non-GAAP) tax rate for the first quarter of 2015 was 20.0 percent, a decrease of 0.5 points compared to the first quarter of 2014. The lower rates in the first quarter of 2015 were the result of a more favorable mix of geographic income offset by a decrease in the utilization of foreign tax credits.

With respect to major U.S. state and foreign taxing jurisdictions, the company is generally no longer subject to tax examinations for years prior to 2008. The company is no longer subject to income tax examination of its U.S. federal

tax return for years prior to 2011. The open years contain matters that could be subject to differing interpretations of applicable tax laws and regulations as it relates to the amount and/or timing of income, deductions and tax credits. Although the outcome of tax audits is always uncertain, the company believes that adequate amounts of tax and interest have been provided for any adjustments that are expected to result for these years.

The amount of unrecognized tax benefits at December 31, 2014 increased by \$52 million in the first quarter of 2015 to \$5,156 million. The total amount of unrecognized tax benefits that, if recognized, would favorably affect the effective tax rate was \$4,258 million at March 31, 2015.

In April 2010, the company appealed the determination of the Japanese Tax Authorities with respect to certain foreign tax losses. The tax benefit of these losses, approximately \$999 million adjusted for currency, has been included in unrecognized tax benefits. In April 2011, the company received notification that the appeal was denied, and in June 2011, the company filed a lawsuit challenging this decision. In May 2014, the Tokyo District Court ruled in favor of the company. The Japanese government appealed the ruling to the Tokyo High Court. On March 25, 2015, the Tokyo High Court ruled in favor of IBM and, on April 7, 2015, the Japanese government appealed the ruling to the Japan Supreme Court. No final determination has been reached on this matter.

In the fourth quarter of 2013, the company received a draft tax assessment notice for approximately \$866 million from the Indian Tax Authorities for 2009. The company believes it will prevail on these matters and that this amount is not a

Management Discussion – (continued)

meaningful indicator of liability. At March 31, 2015, the company has recorded \$496 million as prepaid income taxes in India. A significant portion of this balance represents cash tax deposits paid over time to protect the company's right to appeal various income tax assessments made by the Indian Tax Authorities.

In the first quarter of 2014, the IRS commenced its audit of the company's U.S. tax returns for 2011 and 2012. The company anticipates that this audit will be completed by the end of 2015.

Earnings Per Share

Basic earnings per share is computed on the basis of the weighted-average number of shares of common stock outstanding during the period. Diluted earnings per share is computed on the basis of the weighted-average number of shares of common stock outstanding plus the effect of dilutive potential common shares outstanding during the period using the treasury stock method. Dilutive potential common shares include outstanding stock options and stock awards.

	2015	2014	Yr. to Yr. Percent Change
For the three months ended March 31:			
Earnings per share of common stock from continuing operations:			
Assuming dilution	\$ 2.44	\$ 2.43	0.4%
Basic	\$ 2.45	\$ 2.44	0.4%
Diluted operating (non-GAAP)	\$ 2.91	\$ 2.68	8.6%
Weighted-average shares outstanding: (in millions)			
Assuming dilution	992.3	1,041.8	(4.7)%
Basic	988.1	1,035.2	(4.5)%

Actual shares outstanding at March 31, 2015 were 984.7 million. The average number of common shares outstanding assuming dilution during the first quarter was 49.4 million shares lower in 2015 versus 2014. The decrease was primarily the result of the common stock repurchase program.

Results of Discontinued Operations

The loss from discontinued operations, net of tax, was \$88 million in the first quarter of 2015 compared to \$146 million in the first quarter of 2014. The discontinued operations effective tax rate in the first quarter of 2015 was 26.3 percent compared to 27.9 percent in the prior year period.

Financial Position

Dynamics

At March 31, 2015, the company continues to have the financial flexibility to support the business over the long term. Cash and marketable securities at quarter end were \$8,803 million. Total debt of \$38,827 million decreased \$1,978 million from prior year-end levels, driven by maturities of \$2,824 million. The company continues to manage the investment portfolio to meet its capital preservation and liquidity objectives. In the first three months of 2015, the company generated \$3,610 million in cash from operations, an increase of \$284 million compared to the first three months of 2014. The company has consistently generated strong cash flow from operations and continues to have access to additional sources of liquidity through the capital markets and its \$10 billion global credit facility.

The assets and debt associated with the Global Financing business are a significant part of the company's financial position. The financial position amounts appearing on pages 5 and 6 are the consolidated amounts including Global Financing. The amounts appearing in the separate Global Financing section, beginning on page 64, are supplementary data presented to facilitate an understanding of the Global Financing business.

Management Discussion – (continued)Working Capital

(Dollars in millions)	At March 31, 2015	At December 31, 2014
Current assets	\$ 46,316	\$ 49,422
Current liabilities	35,640	39,600
Working capital	\$ 10,676	\$ 9,822
Current ratio	1.30:1	1.25:1

Working capital increased \$854 million from the year-end 2014 position. The key changes are described below:

Current assets decreased \$3,105 million (a decrease of \$1,015 million adjusted for currency), due to:

- A decline of \$3,532 million (\$2,641 million adjusted for currency) in financing receivables primarily due to collections of higher year-end balances; and
- A decline of \$285 million (an increase of \$142 million adjusted for currency) in trade receivables; and
- A decline of \$240 million (\$184 million adjusted for currency) in deferred taxes due primarily to changes in the value of financial instruments, partially offset by
- An increase of \$923 million (\$1,109 million adjusted for currency) in prepaid expenses and other driven by increases in derivatives of \$453 million and counterparty collateral postings of \$246 million due to strengthening of the U.S. dollar.

Current liabilities decreased \$3,960 million (\$2,645 million adjusted for currency), as a result of:

- A decrease in taxes of \$1,545 million (\$1,365 million adjusted for currency) primarily driven by income tax payments; and

- A decrease in short-term debt of \$1,199 million (\$1,118 million adjusted for currency) primarily as a result of maturities of \$2,824 million and declines in commercial paper of \$650 million, partially offset by reclassifications of \$2,223 million from long term to reflect upcoming maturities; and
- A decrease in compensation and benefits of \$703 million (\$533 million adjusted for currency), primarily driven by payments related to prior year performance-based compensation, and
- A decrease in accounts payable of \$550 million (\$352 million adjusted for currency) reflecting declines from typically higher year-end balances and the wind-down of the System x business payables.

Cash Flow

The company's cash flows from operating, investing and financing activities, as reflected in the Consolidated Statement of Cash Flows on page 7, are summarized in the following table. These amounts include the cash flows associated with the Global Financing business.

(Dollars in millions)

For the three months ended March 31:

	2015		2014
Net cash provided by/(used in) continuing operations:			
Operating activities	\$ 3,610	\$	3,326
Investing activities	560		35
Financing activities	(3,402)		(4,673)
Effect of exchange rate changes on cash and cash equivalents	(449)		5
Net change in cash and cash equivalents	\$ 319	\$	(1,307)

Management Discussion – (continued)

Net cash provided by operating activities increased by \$284 million as compared to the first three months of 2014 driven by the following factors:

- A decrease in income taxes paid of \$1,179 million; and
- An improvement in inventory of \$228 million, partially offset by
- A decrease in cash provided from receivables of \$808 million; and
- An increase in performance based compensation payments of \$420 million.

Net cash provided by investing activities increased \$525 million compared to the first three months in 2014 driven by:

- Higher cash from non-operating finance receivables of \$950 million, partially offset by
- A decrease in net cash related to acquisitions and divestitures of \$256 million.

Net cash used in financing activities decreased \$1,272 million as compared to the first three months of 2014 driven by the following factors:

- A decrease of \$7,000 million of cash used for gross share repurchases, partially offset by
- A decrease in cash sourced from debt transactions of \$5,522 million driven by a lower level of issuances in the current year.

Noncurrent Assets and Liabilities

(Dollars in millions)	At March 31,		At December 31,	
	2015		2014	
Noncurrent assets	\$	65,720	\$	68,110
Long-term debt	\$	34,295	\$	35,073
Noncurrent liabilities (excluding debt)	\$	29,812	\$	30,844

The decrease in noncurrent assets of \$2,390 million (\$122 million adjusted for currency) was driven by:

- A decrease of \$1,289 million in long-term financing receivables (\$719 million adjusted for currency) reflecting seasonal reductions from higher year-end balances, and
- A decrease of \$685 million in goodwill driven by a currency impact of \$716 million, and
- A decrease of \$434 million in deferred taxes (\$161 million adjusted for currency) partially offset by
- An increase in retirement plans assets of \$530 million (\$627 million adjusted for currency) driven by the expected returns on plan assets.

Long-term debt decreased \$779 million from the year-end balance primarily driven by currency impacts of \$636 million.

The decrease in noncurrent liabilities (excluding debt) of \$1,032 million (an increase of \$537 million adjusted for currency) was driven by:

- A decrease in retirement and nonpension postretirement liabilities of \$1,051 million driven by a currency impact of \$1,094 million.

Debt

The company's funding requirements are continually monitored and strategies are executed to manage the overall asset and liability profile. Additionally, the company maintains sufficient flexibility to access global funding sources

as needed.

Management Discussion – (continued)

(Dollars in millions)	At March 31,		At December 31,	
	2015		2014	
Total company debt	\$	38,827	\$	40,804
Total Global Financing segment debt	\$	26,242	\$	29,103
Debt to support external clients		22,594		25,531
Debt to support internal clients		3,648		3,572
Non-Global Financing debt	\$	12,585	\$	11,701

Global Financing provides financing predominantly for the company's external client assets, as well as for assets under contract by other IBM units. These assets, primarily for Global Services, generate long-term, stable revenue streams similar to the Global Financing asset portfolio. Based on their attributes, these Global Services assets are leveraged with the balance of the Global Financing asset base. The debt analysis above is further detailed in the Global Financing section on page 68.

Non-Global Financing debt of \$12,585 million was up \$884 million from December 31, 2014, but down \$3,142 million from the first quarter of 2014.

Given the significant leverage, the company presents a debt-to-capitalization ratio which excludes Global Financing debt and equity as management believes this is more representative of the company's core business operations. This ratio can vary from period to period as the company manages its global cash and debt positions.

"Core" debt-to-capitalization ratio (excluding Global Financing debt and equity) was 59.6 percent at March 31, 2015 compared to 59.4 percent at December 31, 2014 and 55.3 percent at March 31, 2014. The year to year change was impacted by pension, currency and the Microelectronics divestiture-related charges in the second half of 2014.

Consolidated debt-to-capitalization ratio at March 31, 2015 was 76.0 percent versus 77.3 percent at December 31, 2014 and 72.4 percent at March 31, 2014.

Equity

Total equity increased by \$276 million from December 31, 2014 as a result of an increase in retained earnings of \$1,237 million, an increase in retirement-related pension amounts of \$492 million and an increase in common stock of \$262 million, partially offset by an increase in treasury stock of \$1,259 million primarily due to common stock

repurchases and declines of \$718 million related to currency translation.

Looking Forward

The company measures the success of its business model over the long term, not any individual quarter or year. The company's strategies, investments and actions are all taken with an objective of optimizing long-term performance. A long-term perspective ensures that the company is well-positioned to take advantage of major shifts occurring in technology, business and the global economy.

Within the IT industry, there are major shifts occurring—driven by data, cloud and changes in the ways individuals and enterprises are engaging. In February 2015, the company met with investors to discuss how it is transforming the business to where the company sees the long term value in enterprise IT. The company's strategic direction is clear and compelling, and the company has been successful in shifting to the higher value areas. The strong revenue growth in the strategic imperatives confirms that, as does the overall profitability of the business. The company expects the industry to continue to shift. The company expects revenue from its strategic imperatives to continue to grow at a double-digit rate. These offerings are as high value as other parts of the business, which continue to manage clients' most critical business processes. As the cloud business gets to scale, and with ongoing productivity improvements across the business, the company expects to have an opportunity to expand margin. In addition, the company expects to continue to allocate its capital efficiently and effectively to investments, and to return value to its shareholders through a combination of dividends and share repurchases. Over the longer term, in considering the opportunities it will continue to develop, the company expects to have the ability to generate low single-digit revenue growth, and with a higher value business mix, high single-digit operating (non-GAAP) earnings per share growth, with free cash flow realization in the 90's percent range. This is a longer term growth trajectory, not an absolute end point or a multi-year objective.

In the first quarter of 2015, at both the consolidated level and in the segments, the company continues to see signs that its transformation efforts are working. In the quarter, total revenue was flat year to year, adjusted for currency and the impact of

Management Discussion – (continued)

divested businesses. This represented an improvement in trajectory on an adjusted basis, driven by acceleration in the strategic imperatives. There was significant strength in high-end systems, as the company's new products address the most contemporary workloads in data, cloud and mobile. This strength, together with the overall shift to higher value, drove margin expansion for the company. Also, workforce rebalancing charges decreased significantly year to year contributing to profit growth in the period. The company delivered mid-single digit operating (non-GAAP) net income growth and high-single digit operating (non-GAAP) earnings per share growth in the first quarter compared to the prior year. In addition, the company made several bold moves that build on the momentum started in 2014: the introduction of System z13 mainframe in January; the hybrid cloud announcement in February; a set of initiatives around the Internet of Things in March; and the launch of Watson Health in early April. Overall, a good start to the year.

Looking forward in 2015, the company expects to continue to deliver strong growth in its strategic imperatives, while the transitions in some of the other businesses continue. The strategic imperatives represent a substantial part of the business, and with respect to the more than 30 percent growth on an adjusted basis in the first quarter, part of that growth was driven by the mainframe and Power Systems – product cycles, as they deliver workloads in data, cloud and mobile. The company's full year earnings expectations do not require a 30 percent growth rate in revenue from the strategic imperatives. The company expects the growth rate to return to what it has been, 19 to 20 percent, a very strong growth rate, ahead of the market and contributing growth to the total company. The company expects to continue to expand its margin as it continues to shift to higher value, and the company expects to continue a high level of investment – shifting that investment to areas where it sees the best opportunities. The company is deploying its capital through organic R&D, capital expenditures and acquisitions. The company is also building partnerships and ecosystems – not only with the large familiar companies, but with hundreds of smaller firms. This leverages the mutual strengths of the partners and the company, and expands the company's reach – at a high level of return. In addition, the company will continue to return value to shareholders through both share repurchase and dividends.

In the current currency environment, and considering the impact from the completed divestitures, total revenue as reported is not expected to grow in 2015. At April 2015 spot rates, the company expects the negative impact from currency on revenue to be approximately 9 points in the second quarter and approximately 7 points for the full year. The impact of divested businesses is expected to be 4 points in the second quarter and 3 points for the full year 2015. Therefore, the combined negative impact of currency at these spot rates and the divested businesses is expected to be approximately 13 points in the second quarter and 10 points for the full year. Also, as with all companies with a similar global business profile, with the dollar strengthening, the company expects currency will have a significant translation impact on its profit growth. The estimated impact to operating (non-GAAP) earnings growth in the first quarter was \$0.15-0.20 per share. The company expects to have less workforce rebalancing charges in 2015 versus 2014, and while it may have some gains, it does not expect to replicate the \$1.8 billion of gains recorded in 2014, resulting in a net impact to profit growth. In the second quarter of 2015, the company expects workforce rebalancing charges to be similar to the first quarter, impacting year-to-year profit growth. In the second quarter of 2015, with essentially the same level of workforce rebalancing as the first quarter, the continued transformation of the business and the mainframe cycle, the company expects a typical sequential improvement of approximately \$1 billion in operating (non-GAAP) pre-tax income from the first quarter of 2015. Overall, the company expects GAAP earnings per share from continuing operations for 2015 to be in the range of \$14.17 to \$14.92, and it continues to expect operating (non-GAAP) earnings per share to be in the range of \$15.75 to \$16.50. At that level of profit, the company continues to expect free cash flow to be flat for the year compared to 2014, with free cash flow generation skewed to

the back end of the year. With these dynamics and level of performance, the company expects to exit 2015 as a higher value business.

Within the company's earnings per share expectation for 2015, the company is expecting a 2-3 point benefit from share repurchases—less than the benefit in 2014. At the end of March 2015, the company had approximately \$5 billion of repurchase authorization remaining. With the flow through from the prior year share reduction, the first quarter repurchase amount and the remaining authorization, the company expects to achieve the level of share reduction that it has assumed within its earnings expectations for the full year 2015.

From a segment perspective, in the Systems Hardware business, with the good adoption of the z13 mainframe and Power Systems in the first quarter, and the launch of the remaining POWER8 based systems in the second quarter, the company expects to see continued good growth in this business. The company expects mainframe revenue to be greater in the second quarter compared to the first quarter, but the year-to-year growth will be lower as the mainframe business had a strong second quarter in 2014. For the first half of 2015, the company expects mainframe revenue growth at constant currency to be approximately 50 percent compared to the first half of 2014, which is typical for a mainframe product cycle.

Management Discussion – (continued)

The company expects, in the normal course of business, that its effective tax rate and operating (non-GAAP) tax rate will be approximately 20 percent in 2015. The rate will change year to year based on nonrecurring events, such as the settlement of income tax audits and changes in tax laws, as well as recurring factors including the geographic mix of income before taxes, the timing and amount of foreign dividend repatriation, state and local taxes and the effects of various global income tax strategies.

The company expects 2015 pre-tax retirement-related plan cost to be approximately \$2.6 billion, an increase of approximately \$600 million compared to 2014. This estimate reflects current pension plan assumptions at December 31, 2014. Within total retirement-related plan cost, operating retirement-related plan cost is expected to be approximately \$1.5 billion, a decrease of approximately \$100 million versus 2014. Non-operating retirement-related plan cost is expected to be approximately \$1.1 billion, an increase of approximately \$700 million compared to 2014, driven by increased recognized actuarial losses and the additional Spain pension-related obligation. Cash disbursements for all retirement-related plans are expected to be approximately \$2.7 billion in 2015, an increase of approximately \$100 million compared to 2014.

Currency Rate Fluctuations

Changes in the relative values of non-U.S. currencies to the U.S. dollar affect the company's financial results and financial position. At March 31, 2015, currency changes resulted in assets and liabilities denominated in local currencies being translated into fewer dollars than at year-end 2014. The company uses financial hedging instruments to limit specific currency risks related to financing transactions and other foreign currency-based transactions.

Foreign currency fluctuations often drive operational responses that mitigate the simple mechanical translation of earnings. During periods of sustained movements in currency, the marketplace and competition adjust to the changing rates. For example, when pricing offerings in the marketplace, the company may use some of the advantage from a weakening U.S. dollar to improve its position competitively, and price more aggressively to win the business, essentially passing on a portion of the currency advantage to its customers. Competition will frequently take the same action. Consequently, the company believes that some of the currency-based changes in cost impact the prices charged to clients. The company also maintains currency hedging programs for cash management purposes which mitigate, but do not eliminate, the volatility of currency impacts on the company's financial results.

The company translates revenue, cost and expense in its non-U.S. operations at current exchange rates in the reported period. References to "adjusted for currency" or "constant currency" reflect adjustments based upon a simple constant currency mathematical translation of local currency results using the comparable prior period's currency conversion rate. However, this constant currency methodology that the company utilizes to disclose this information does not incorporate any operational actions that management could take to mitigate fluctuating currency rates. Currency movements impacted the company's year-to-year revenue and earnings per share growth in the first three months of 2015. Based on the currency rate movements in the first three months of 2015, total revenue decreased 11.9 percent as reported and decreased 4.2 percent at constant currency versus the first three months of 2014. On an income

from continuing operations before income tax basis, these translation impacts offset by the net impact of hedging activities resulted in a theoretical maximum (assuming no pricing or sourcing actions) decrease of approximately \$175 million in the first three months of 2015 on an as reported basis, and a decrease of approximately \$320 million on an operating (non-GAAP) basis. The same mathematical exercise resulted in a decrease of approximately \$60 million in the first three months of 2014 on both an as reported and operating (non-GAAP) basis. The company views these amounts as a theoretical maximum impact to its as-reported financial results. Considering the operational responses mentioned above, movements of exchange rates, and the nature and timing of hedging instruments, it is difficult to predict future currency impacts on any particular period, but the company believes it could be substantially less than the theoretical maximum given the competitive pressure in the marketplace.

For non-U.S. subsidiaries and branches that operate in U.S. dollars or whose economic environment is highly inflationary, translation adjustments are reflected in results of operations. Generally, the company manages currency risk in these entities by linking prices and contracts to U.S. dollars.

The company continues to monitor the economic conditions in Venezuela. In March 2013, the Venezuelan government created a new foreign exchange mechanism called the “Complimentary System of Foreign Currency Acquirement” (or the “SICAD 1”). This system operates similar to an auction system and allows entities in specific sectors to bid for U.S. dollars to be used for specific import transactions. In March 2014, the Venezuelan government published operating rules for SICAD 2 in Exchange Agreement No. 27. SICAD 2 began operating on March 24, 2014. In March 2014, the company adopted the SICAD 1 rate of 10.7 BsF per USD. In the first quarter of 2014, the company recorded a pre-tax loss of \$31 million as a result of the devaluation in Other (income) and expense in the Consolidated Statement of Earnings. In February 2015, the

Management Discussion – (continued)

Venezuelan government created a new foreign exchange platform, the Marginal Currency System, or SIMADI. The company will monitor transactions from this new system going-forward in 2015. At March 31, 2015, the company's net asset position in Venezuela was \$40 million. The company's operations in Venezuela comprised less than 1 percent of total 2014 and 2013 revenue, respectively.

Liquidity and Capital Resources

In the company's 2014 Annual Report, on pages 65 to 68, there is a discussion of the company's liquidity including two tables that present five years of data. The table presented on page 65 includes net cash from operating activities, cash and marketable securities and the size of the company's global credit facilities for each of the past five years. For the three months ended, or as of, as applicable, March 31, 2015, those amounts are \$3.6 billion for net cash from operating activities, \$8.8 billion of cash and marketable securities and \$10 billion in global credit facilities, respectively. The company's five-year global credit facility expires on November 10, 2019.

The major rating agencies' ratings on the company's debt securities at March 31, 2015 appear in the table below. The agency ratings remain unchanged from December 31, 2014. Standard and Poor's and Moody's Investors Service reaffirmed their credit ratings on April 21, 2015 and March 30, 2015, respectively. The company does not have "ratings trigger" provisions in its debt covenants or documentation, which would allow the holders to declare an event of default and seek to accelerate payments thereunder in the event of a change in credit rating. The company's contractual agreements governing derivative instruments contain standard market clauses which can trigger the termination of the agreement if the company's credit rating were to fall below investment grade. At March 31, 2015, the fair value of those instruments that were in a liability position was \$181 million, before any applicable netting, and this position is subject to fluctuations in fair value period to period based on the level of the company's outstanding instruments and market conditions. The company has no other contractual arrangements that, in the event of a change in credit rating, would result in a material adverse effect on its financial position or liquidity.

	STANDARD AND POOR'S	MOODY'S INVESTORS SERVICE	FITCH RATINGS
Senior long-term debt	AA-	Aa3	A+
Commercial paper	A-1+	Prime-1	F1

The table appearing on page 66 of the company's 2014 Annual Report presents the format in which management reviews cash flows for each of the past five years and is accompanied by a description of the way cash flow is managed, measured and reviewed. The company prepares its Consolidated Statement of Cash Flows in accordance with applicable accounting standards for cash flow presentation on page 7 of this Form 10-Q and highlights causes and events underlying sources and uses of cash in that format on page 59. The following is management's view of cash flows for the first three months of 2015 and 2014 prepared in a manner consistent with the table and description on

pages 66 and 67 of the company's 2014 Annual Report.

(Dollars in millions)

For the three months ended March 31:

	2015	2014
Net cash from operating activities per GAAP	\$ 3,610	\$ 3,326
Less: the change in Global Financing receivables	1,605	1,807
Net cash from operating activities, excluding Global Financing receivables	2,004	1,518
Capital expenditures, net	(923)	(887)
Free cash flow	1,081	631
Acquisitions	(148)	(264)
Divestitures	19	391
Share repurchases	(1,165)	(8,166)
Dividends	(1,088)	(990)
Non-Global Financing debt	361	3,634
Other (includes Global Financing receivables and Global Financing debt)	1,266	3,402
Change in cash, cash equivalents and short-term marketable securities	\$ 327	\$ (1,361)

Free cash flow of \$1,081 million for the first three months of 2015 increased \$450 million year to year. The increase was driven primarily by a reduction in cash tax payments of \$1.2 billion compared to the first quarter of 2014. This was partially

Management Discussion – (continued)

offset by changes in working capital associated with the divestiture of the System x business and a higher level of payments for performance-based compensation which was accrued for in 2014. Net capital expenditures increased \$36 million year to year, and spending included a shift as the company continues to build out the SoftLayer cloud centers. In the first three months of 2015, the company continued to focus its cash utilization on returning value to shareholders including \$1.1 billion in dividends and \$1.2 billion in common stock repurchases.

Events that could temporarily change the historical cash flow dynamics discussed above and in the company's 2014 Annual Report include significant changes in operating results, material changes in geographic sources of cash, unexpected adverse impacts from litigation, future pension funding requirements during periods of severe downturn in the capital markets or the timing of tax payments. Whether any litigation has such an adverse impact will depend on a number of variables, which are more completely described in note 12, "Contingencies," in this Form 10-Q. With respect to pension funding, the company expects to make legally mandated pension plan contributions to certain non-U.S. plans of approximately \$600 million in 2015. Cash disbursements related to all retirement-related plans is expected to be approximately \$2.7 billion in 2015. Financial market performance could increase the legally mandated minimum contributions in certain non-U.S. countries that require more frequent remeasurement of the funded status. The company is not quantifying any further impact from pension funding because it is not possible to predict future movements in the capital markets or pension plan funding regulations.

The company's U.S. cash flows continue to be sufficient to fund its current domestic operations and obligations, including investing and financing activities such as dividends and debt service. The company's U.S. operations generate substantial cash flows, and, in those circumstances where the company has additional cash requirements in the U.S., the company has several liquidity options available. These options may include the ability to borrow additional funds at reasonable interest rates, utilizing its committed global credit facility, repatriating certain foreign earnings and utilizing intercompany loans with certain foreign subsidiaries.

The company does earn a significant amount of its pre-tax income outside the U.S. The company's policy is to indefinitely reinvest the undistributed earnings of its foreign subsidiaries, and accordingly, no provision for federal income taxes has been made on accumulated earnings of foreign subsidiaries. The company periodically repatriates a portion of these earnings to the extent that it does not incur an additional U.S. tax liability. Quantification of the deferred tax liability, if any, associated with indefinitely reinvested earnings is not practicable. While the company currently does not have a need to repatriate funds held by its foreign subsidiaries, if these funds are needed for operations and obligations in the U.S., the company could elect to repatriate these funds which could result in a reassessment of the company's policy and increased tax expense.

Global Financing

Global Financing is a reportable segment that is measured as a stand-alone entity. Global Financing facilitates IBM clients' acquisition of information technology systems, software and services by providing financing solutions in the areas where the company has the expertise, while generating strong returns on equity.

Results of Operations

(Dollars in millions)	Three Months Ended		2014
	2015	March 31,	
External revenue	\$	461	\$ 512
Internal revenue		586	617
Total revenue		1,048	1,129
Cost		342	321
Gross profit	\$	706	\$ 808
Gross profit margin		67.4%	71.6%
Pre-tax income	\$	515	\$ 596
After-tax income*	\$	345	\$ 404
Return on equity*		35.6%	41.2%

* See page 69 for the details of the after-tax income and the return on equity calculation.

The decrease in revenue in the first quarter, as compared to the same period in 2014, was due to:

Management Discussion – (continued)

- A decline in external revenue of 9.9 percent (1.1 percent adjusted for currency), due to decreases in equipment sales revenue (down 24.5 percent to \$91 million) and in financing revenue (down 5.5 percent to \$369 million); and
- A decline in internal revenue of 5.0 percent, due to decreases in financing revenue (down 15.4 percent to \$93 million) and used equipment sales revenue (down 2.8 percent to \$493 million).

The decrease in external financing revenue in the first quarter of 2015, compared to the same period in 2014, was due to a decrease in the average asset balance. The decrease in internal financing revenue in the first quarter of 2015, compared to the same period in 2014, was due to decreases in asset yields and the average asset balance.

Global Financing gross profit decreased 12.7 percent in the first quarter of 2015, compared to the same period in 2014, due to decreases in used equipment sales gross profit and financing gross profit. The gross profit margin decreased 4.2 points in the first quarter of 2015, compared to the same period in 2014, due to margin decreases in used equipment sales and financing.

Global Financing pre-tax income decreased 13.6 percent to \$515 million in the first quarter of 2015, compared to the same period in 2014, due to the lower gross profit (\$102 million) and an increase in financing receivables provisions (\$19 million), partially offset by a decrease in selling, general and administrative expenses (\$39 million). The increase in financing receivables provisions was due to higher specific reserve requirements in the current year.

The decrease in return on equity in the first quarter of 2015, compared to the same period of 2014, was due to the decrease in after-tax income.

Financial Position

Balance Sheet

(Dollars in millions)	At March 31,		At December 31,	
	2015		2014	
Cash and cash equivalents	\$	1,384	\$	1,538
Net investment in sales-type and direct financing leases		7,674		8,263
Equipment under operating leases:				
External clients (1)		737		774
Client loans		12,455		14,290
Total client financing assets		20,865		23,327
Commercial financing receivables		6,026		8,424

Edgar Filing: INTERNATIONAL BUSINESS MACHINES CORP - Form 10-Q

Intercompany financing receivables (2) (3)		4,558		4,611
Other receivables		520		368
Other assets		506		577
Total assets	\$	33,859	\$	38,845
Intercompany payables (2)	\$	1,994	\$	3,631
Debt (4)		26,242		29,103
Other liabilities		1,879		2,094
Total liabilities		30,115		34,828
Total equity		3,744		4,017
Total liabilities and equity	\$	33,859	\$	38,845

(1) Includes intercompany markup, priced on an arm's-length basis, on products purchased from the company's product divisions which is eliminated in IBM's consolidated results.

(2) Entire amount eliminated for purposes of IBM's consolidated results and therefore does not appear on pages 5 and 6.

(3) These assets, along with all other financing assets in this table, are leveraged at the value in the table using Global Financing debt.

(4) Global Financing debt is comprised of intercompany loans and external debt. A portion of Global Financing debt is in support

of the company's internal business, or related to intercompany markup embedded in the Global Financing assets.

Management Discussion – (continued)

Sources and Uses of Funds

The primary use of funds in Global Financing is to originate client and commercial financing assets. Client financing assets for end users consist of IBM systems, software and services, and OEM equipment, software and services to meet IBM clients' total solutions requirements. Client financing assets are primarily sales-type, direct financing and operating leases for systems products, as well as loans for systems, software and services, with terms up to seven years. Global Financing's client loans are primarily for software and services and are unsecured. These loans are subjected to credit analysis to evaluate the associated risk and, when deemed necessary, actions are taken to mitigate risks in the loan agreements which include covenants to protect against credit deterioration during the life of the obligation.

Commercial financing receivables arise primarily from inventory and accounts receivable financing for dealers and remarketers of IBM and OEM products. Payment terms for inventory financing and accounts receivable financing generally range from 30 to 90 days. These short-term receivables are primarily unsecured and are also subjected to additional credit analysis in order to evaluate the associated risk.

In addition to the actions previously described, in certain circumstances, the company may take mitigation actions to transfer credit risk to third parties.

At March 31, 2015, substantially all financing assets were IT related assets, and approximately 56 percent of the total external portfolio was with investment grade clients with no direct exposure to consumers.

Originations

The following are total financing originations:

(Dollars in millions)	Three Months Ended			
	March 31,			
	2015		2014	
Client financing	\$	3,004	\$	3,019
Commercial financing		8,828		10,360
Total	\$	11,831	\$	13,380

Cash collections of both commercial financing and client financing assets exceeded new financing originations in both the first quarter of 2015 and 2014, which resulted in a net decrease in financing assets in these periods. The decrease in originations in 2015 versus 2014 was primarily due to lower volumes in commercial financing. Internal

loan financing with Global Services is executed under a loan facility and is not considered originations.

Cash generated by Global Financing was deployed to pay intercompany payables and dividends to IBM as well as business partners and OEM suppliers. Intercompany payables declined in 2015 due to lower IBM volumes and shorter settlement terms, which are in line with external suppliers.

Global Financing Receivables and Allowances

The following table presents external financing receivables excluding residual values and the allowance for credit losses.

(Dollars in millions)	At March 31, 2015	At December 31, 2014
Gross financing receivables	\$ 26,393	\$ 31,007
Specific allowance for credit losses	519	484
Unallocated allowance for credit losses	92	96
Total allowance for credit losses	611	580
Net financing receivables	\$ 25,782	\$ 30,427
Allowance for credit losses coverage	2.3%	1.9%

Management Discussion – (continued)

Roll Forward of Global Financing Receivables Allowance for Credit Losses

(Dollars in millions)		Allowance Used*		Additions/ (Reductions)		Other**		March 31, 2015		
January 1, 2015	\$	580	\$	(1)	\$	52	\$	(20)	\$	611

* Represents reserved receivables, net of recoveries, that were disposed of during the period.

** Primarily represents translation adjustments.

The percentage of Global Financing receivables reserved increased from 1.9 percent at December 31, 2014, to 2.3 percent at March 31, 2015, primarily due to an increase in specific reserve requirements. Specific reserves increased 7 percent from \$484 million at December 31, 2014, to \$519 million at March 31, 2015. Unallocated reserves decreased 4 percent from \$96 million at December 31, 2014, to \$92 million at March 31, 2015, primarily due to the decline in gross financing receivables.

Global Financing's bad debt expense was \$52 million for the three months ended March 31, 2015, compared to \$33 million for the same period in 2014. The year-to-year increase in bad debt expense was due to higher specific reserve requirements, primarily in China, in the current year.

Residual Value

Residual value is a risk unique to the financing business and management of this risk is dependent upon the ability to accurately project future equipment values at lease inception. Global Financing has insight into product plans and cycles for the IBM products under lease. Based upon this product information, Global Financing continually monitors projections of future equipment values and compares them with the residual values reflected in the portfolio.

Global Financing optimizes the recovery of residual values by selling assets sourced from lease returns, leasing used equipment to new clients, or extending lease arrangements with current clients. Sales of equipment include equipment returned off of a lease, surplus internal equipment, or used equipment purchased externally. These sales represented 55.9 percent of Global Financing's revenue in the first quarter of 2015, and 55.6 percent in the first quarter of 2014. The gross profit margins on these sales were 63.6 percent and 67.9 percent in the first quarter of 2015 and 2014, respectively. The decrease in the gross profit margin was driven by margin decreases in internal equipment sales and external equipment sales, partially offset by a shift in mix toward higher margin internal equipment sales.

The table on page 68 presents the recorded amount of unguaranteed residual value for sales-type, direct financing and operating leases at January 1, 2015 and March 31, 2015. In addition, the table presents the residual value as a percentage of the related original amount financed and a run out of when the unguaranteed residual value assigned to equipment on leases at March 31, 2015 is expected to be returned to the company. In addition to the unguaranteed residual value, on a limited basis, Global Financing will obtain guarantees of the future value of the equipment to be returned at end of lease. While primarily focused on IBM products, guarantees are also obtained for certain OEM products. These third-party guarantees are included in minimum lease payments as provided for by accounting standards in the determination of lease classifications for the covered equipment and provide protection against risk of loss arising from declines in equipment values for these assets.

The residual value guarantee increases the minimum lease payments that are utilized in determining the classification of a lease as a sales-type lease, direct financing lease or operating lease. The aggregate asset values associated with the guarantees of sales-type leases were \$101 million and \$86 million for the financing transactions originated during the quarters ended March 31, 2015 and 2014, respectively. The aggregate asset values associated with the guarantees of direct financing leases were \$50 million and \$46 million for the financing transactions originated during the quarters ended March 31, 2015 and 2014, respectively. The associated aggregate guaranteed future values at the scheduled end of lease were \$8 million and \$5 million for the financing transactions originated during the quarters ended March 31, 2015 and 2014, respectively. The cost of guarantees was \$0.8 million and \$0.5 million for the quarters ended March 31, 2015 and 2014, respectively.

Management Discussion – (continued)

Unguaranteed Residual Value

(Dollars in millions)	At	At	Estimated Run Out of			2018 and Beyond
	January 1, 2015	March 31, 2015	2015	2016	2017	
Sales-type and direct financing leases	\$ 671	\$ 649	\$ 111	\$ 206	\$ 196	\$ 137
Operating leases	166	151	51	51	37	12
Total unguaranteed residual value	\$ 837	\$ 800	\$ 162	\$ 257	\$ 233	\$ 149
Related original amount financed	\$ 15,636	\$ 14,615				
Percentage	5.4%	5.5%				

Debt

	At March 31, 2015	At December 31, 2014
Debt-to-equity ratio	7.0x	7.2x

The company funds Global Financing through borrowings using a debt-to-equity ratio target of approximately 7 to 1. The debt used to fund Global Financing assets is composed of intercompany loans and external debt. The terms of the intercompany loans are set by the company to substantially match the term and currency underlying the financing receivable and are based on arm's-length pricing.

Global Financing provides financing predominantly for the company's external client assets, as well as for assets under contract by other IBM units. As previously stated, the company measures Global Financing as a stand-alone entity, and accordingly, interest expense relating to debt supporting Global Financing's external client and internal business is included in the "Global Financing Results of Operations" on page 64 and in "Segment Information" on page 26.

In the company's Consolidated Statement of Earnings on page 3, the external debt-related interest expense supporting Global Financing's internal financing to the company is reclassified from cost of financing to interest expense.

The following table provides additional information on total company debt. In this table, intercompany activity includes internal loans and leases at arm's-length pricing in support of Global Services' long-term contracts and other internal activity. The company believes these assets should be appropriately leveraged in line with the overall Global Financing business model.

(Dollars in millions)	At March 31, 2015		At December 31, 2014	
Global Financing Segment		\$ 26,242		\$ 29,103
Debt to support external clients	\$ 22,594		\$ 25,531	
Debt to support internal clients	3,648		3,572	
Non-Global Financing Segments		12,585		11,701
Debt supporting operations	16,233		15,274	
Intercompany activity	(3,648)		(3,572)	
Total company debt		\$ 38,827		\$ 40,804

Liquidity and Capital Resources

Global Financing is a segment of the company, and therefore is supported by the company's overall liquidity position and access to capital markets. Cash generated by Global Financing was deployed to pay dividends to the company in order to maintain an appropriate debt-to-equity ratio.

Management Discussion – (continued)

Return on Equity

(Dollars in millions)	Three Months Ended	
	March 31,	
	2015	2014

Global Financing return on equity(a)/(b)	35.6%	41.2%

* Calculated based upon an estimated tax rate principally based on Global Financing's geographic mix of earnings as IBM's

provision for income taxes is determined on a consolidated basis.

** Average of the ending equity for Global Financing for the last 2 quarters.

Looking Forward

Global Financing's financial position provides flexibility and funding capacity which enables the company to be well positioned in the current environment. Global Financing's assets and new financing volumes are IBM and OEM products and services financed to the company's clients and business partners, and substantially all financing assets are IT related assets which provide a stable base of business for future growth. Global Financing's offerings are competitive and available to clients as a result of the company's borrowing cost and access to the capital markets. Overall, Global Financing's originations will be dependent upon the demand for IT products and services as well as client participation rates.

IBM continues to access both the short-term commercial paper market and the medium- and long-term debt markets. A protracted period where IBM could not access the capital markets would likely lead to a slowdown in originations.

Interest rates and the overall economy (including currency fluctuations) will have an effect on both revenue and gross profit. The company's interest rate risk management policy, however, combined with the Global Financing pricing strategy should mitigate gross margin erosion due to changes in interest rates.

The economy could impact the credit quality of the Global Financing receivables portfolio and therefore the level of provision for credit losses. Global Financing will continue to apply rigorous credit policies in both the origination of new business and the evaluation of the existing portfolio.

As previously discussed, Global Financing has historically been able to manage residual value risk both through insight into the company's product cycles, as well as through its remarketing business.

Global Financing has policies in place to manage each of the key risks involved in financing. These policies, combined with product and client knowledge, should allow for the prudent management of the business going forward, even during periods of uncertainty with respect to the global economy.

Management Discussion – (continued)**GAAP Reconciliation**

The tables below provide a reconciliation of the company's income statement results as reported under GAAP to its operating earnings presentation which is a non-GAAP measure. The company's calculation of operating (non-GAAP) earnings, as presented, may differ from similarly titled measures reported by other companies. Please refer to the "Snapshot" section on page 42 for the company's rationale for presenting operating earnings information.

(Dollars in millions except per share amounts)**For the three months ended March 31, 2015**

Management Discussion – (continued)

Forward-Looking and Cautionary Statements

Except for the historical information and discussions contained herein, statements contained in this Form 10-Q may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are based on the company's current assumptions regarding future business and financial performance. These statements involve a number of risks, uncertainties and other factors that could cause actual results to differ materially, including the following: a downturn in the economic environment and client spending budgets; the company's failure to meet growth and productivity objectives; a failure of the company's innovation initiatives; risks from investing in growth opportunities; failure of the company's intellectual property portfolio to prevent competitive offerings and the failure of the company to obtain necessary licenses; cybersecurity and data privacy considerations; fluctuations in financial results; impact of local legal, economic, political and health conditions; adverse effects from environmental matters, tax matters and the company's pension plans; ineffective internal controls; the company's use of accounting estimates; the company's ability to attract and retain key personnel and its reliance on critical skills; impacts of relationships with critical suppliers and business with government clients; currency fluctuations and customer financing risks; impact of changes in market liquidity conditions and customer credit risk on receivables; reliance on third party distribution channels; the company's ability to successfully manage acquisitions, alliances and dispositions; risks from legal proceedings; risk factors related to IBM securities; and other risks, uncertainties and factors discussed in the company's Form 10-Qs, Form 10-K and in the company's other filings with the U.S. Securities and Exchange Commission (SEC) or in materials incorporated therein or herein by reference. The company assumes no obligation to update or revise any forward-looking statements.

Item 4. Controls and Procedures

The company's management evaluated, with the participation of the Chief Executive Officer and Chief Financial Officer, the effectiveness of the company's disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the company's disclosure controls and procedures were effective as of the end of the period covered by this report. There has been no change in the company's internal control over financial reporting that occurred during the quarter covered by this report that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting.

Part II – Other Information

Item 1. Legal Proceedings

Refer to note 12, "Contingencies," on pages 37 to 39 of this Form 10-Q.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds and Issuer Repurchases of Equity Securities

The following table provides information relating to the company's repurchase of common stock for the first quarter of 2015.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Approximate Dollar Value of Shares that May Yet Be Purchased Under The Program*
January 1, 2015 - January 31, 2015	2,599,900	\$ 156.06	2,599,900	\$ 5,858,351,857
February 1, 2015 - February 28, 2015	2,389,633	\$ 159.67	2,389,633	\$ 5,476,793,844
March 1, 2015 - March 31, 2015	2,749,211	\$ 159.80	2,749,211	\$ 5,037,480,284
Total	7,738,744	\$ 158.50	7,738,744	

* On October 29, 2013, the Board of Directors authorized \$15.0 billion in funds for use in the company's common stock repurchase program. On October 28, 2014, the Board of Directors authorized an additional \$5.0 billion in funds for use in such program. In each case, the company stated that it would repurchase shares on the open market or in private transactions depending on market conditions. The common stock repurchase program does not have an expiration date. This table does not include shares tendered to satisfy the exercise price in connection with cashless exercises of employee stock options or shares tendered to satisfy tax withholding obligations in connection with employee equity awards.
