Form 10-Q
August 09, 2011

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

Quarterly report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.
For the quarterly period ended June 30, 2011, or

Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.
For the transition period from _____ to _____ .
Commission file number: 0-2757

THE MONARCH CEMENT COMPANY

(Exact name of registrant as specified in its charter)

KANSAS

(state or other jurisdiction of incorporation
or organization)

48-0340590

(IRS employer identification no.)

P.O. BOX 1000, HUMBOLDT, KANSAS
(address of principal executive offices)

66748-0900
(zip code)

Registrant's telephone number, including area code: (620) 473-2222

(former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
YES NO

Edgar Filing: MONARCH CEMENT CO - Form 10-Q

As of July 22, 2011, there were 2,564,828 shares of Capital Stock, par value \$2.50 per share outstanding and 1,465,540 shares of Class B Capital Stock, par value \$2.50 per share outstanding.

PART I - FINANCIAL INFORMATION

The condensed consolidated financial statements included in this report have been prepared by our Company without audit. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted. Our Company believes that the disclosures are adequate to make the information presented not misleading. The accompanying consolidated financial statements reflect all adjustments that are, in the opinion of management, necessary for a fair statement of the results of operations for the interim periods presented. Those adjustments consist only of normal, recurring adjustments. The condensed consolidated balance sheet of the Company as of December 31, 2010 has been derived from the audited consolidated balance sheet of the Company as of that date. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in our Company's most recent annual report on Form 10-K for 2010 filed with the Securities and Exchange Commission. The results of operations for the interim periods are not necessarily indicative of the results to be expected for the full year.

Item 1. Financial Statements

THE MONARCH
CEMENT
COMPANY AND
SUBSIDIARIES
NOTES TO THE
CONDENSED
CONSOLIDATED
FINANCIAL
STATEMENTS
June 30, 2011 and
2010 (Unaudited),
and December 31,
2010

1. For a summary of accounting policies, the reader should refer to Note 1 of the consolidated financial statements included in our Company's most recent annual report on Form 10-K.
2. Our Company groups its operations into two lines of business - Cement Business and Ready-Mixed Concrete Business. The "Cement Business" refers to our manufacture and sale of cement and "Ready-Mixed Concrete Business" refers to our ready-mixed concrete, concrete products, precast concrete construction, and sundry building materials business. Our Ready-Mixed Concrete Business includes precast concrete construction which involve short-term and long-term contracts. Short-term contracts for specific projects are generally of three to six months in duration. Long-term contracts relate to specific projects with terms in excess of one year from the contract date. Revenues for these contracts are recognized under the percentage of completion method of accounting using cost-to-cost measures. Revenues from contracts using the cost-to-cost measures of completion are recognized based on the ratio of contract costs incurred to date to total estimated contract costs. Full provision is made for any anticipated losses. The majority of the long-term contracts will allow only scheduled billings and contain retainage provisions under which 5% to 10% of the contract invoicing may be withheld by the customer pending project completion. As of June 30, 2011, the amount of billed retainage which is included in accounts receivable was approximately \$55,000, all of which is expected to be collected within one year. The amount of billed retainage which was included in accounts receivable at December 31, 2010 was approximately \$120,000. The amount of unbilled revenue in accounts receivable was approximately \$357,000 and \$380,000 at June 30, 2011 and December 31, 2010, respectively. Unbilled revenue contained approximately \$3,000 and \$43,000 of not-currently-billable retainage at June 30, 2011 and December 31, 2010, respectively, which is expected to be collected within one year.
3. As of June 30, 2011, the amount of accounts payable related to property, plant and equipment was \$108,339 compared to December 31, 2010 which was \$12,495.

Depreciation, depletion and amortization related to manufacturing operations are recorded in Cost of Sales, those related to general operations are recorded in Selling, General and Administrative Expenses, and those related to non-operational activities are in Other, net on the Condensed Consolidated Statements of Income (Loss) and Retained Earnings.
4. We did not incur any temporary LIFO liquidation gain for the six months ended June 30, 2011 or 2010. During the three months ended June 30, 2010 and again during the corresponding period in 2011, we restored the \$0.2 million LIFO liquidation incurred in the first three months of each year as a result of reductions in finished cement and work in process inventory.
5. Corporate assets for 2011 and 2010 include cash and cash equivalents, refundable income taxes, deferred income taxes, investments and other assets. Corporate assets for 2011 also include short-term investments. Following is a

Edgar Filing: MONARCH CEMENT CO - Form 10-Q

				\$ 179,516,245

6. Realized gains (losses) on equity investments are computed using the specific identification method. The Company defines fair value as the exchange price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. The Company measures fair value using the following fair value hierarchy which is based on three levels of inputs intended to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value:

Level 1 - quoted prices in active markets for identical assets or liabilities.

Edgar Filing: MONARCH CEMENT CO - Form 10-Q

Level 2 - observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Cash and cash equivalents, short-term investments, receivables, accounts payable and long-term debt have carrying values that approximate fair values. Equity securities for which the Company has no immediate plan to sell but that may be sold in the future are classified as available for sale. If the fair value of the equity security is readily determinable, it is carried at fair value and unrealized gains and losses are recorded, net of related income tax effects, in stockholders' equity. Realized gains and losses, based on the specifically identified cost of the security, are included in net income (loss). The Company's valuation techniques used to measure the fair value of its marketable equity securities were derived from quoted prices in active markets for identical assets. Equity securities whose fair value is not readily determinable are carried at cost unless the Company is aware of significant adverse effects which have impaired the investments. Investments that are recorded at cost are evaluated quarterly for events that may adversely impact their fair value.

The aggregate amount of equity securities carried at cost, for which the Company has not elected the fair value option, was \$2.5 million as of June 30, 2011. The remaining \$18.3 million in equity security investments are stated at fair value. As of December 31, 2010, the aggregate amount of equity securities carried at cost was \$2.4 million and the remaining \$21.6 million in equity security investments were stated at fair value. The following table summarizes the bases used to measure certain assets at fair value on a recurring basis in the balance sheet:

		Fair Value at Reporting Date Using:		
		Quoted		
		Prices		
		in Active	Significant	
		Markets for	Other	Significant
		Identical	Observable	Unobservable

Residential construction industry	896,346	896,346	-	-
Total assets measured at fair value	\$ 21,565,708	\$ 21,565,708	\$ -	\$ -

No reconciliation (roll forward) of the beginning and ending balances for Level 3 is presented since the Company does not have any assets or liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during any of the periods reported in the table above. The Company has no liabilities in either year requiring remeasurement to fair value on a recurring basis in the balance sheet. The Company has no additional assets or liabilities in either year requiring remeasurement to fair value on a non-recurring basis in the balance sheet.

The following table shows the unrealized losses and fair value of the Company's investments with unrealized losses that are not deemed to be other-than-temporarily impaired, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at June 30, 2011 and December 31, 2010:

Edgar Filing: MONARCH CEMENT CO - Form 10-Q

June 30, 2011 Impairment Analysis - - The Company's investments in marketable equity securities carried at fair value were evaluated for impairment by comparing the specifically identified cost of each investment to market price. As a result of these evaluations, the Company did not identify any other-than-temporary impairments in investments which would have resulted in a recognized loss in earnings of equity investments. The Company did identify some specific investments in available-for-sale equity securities that were not other-than-temporarily impaired resulting in the recognition of unrealized losses (see table above). These unrealized losses relate to investments in the common stock of four companies; one in the general building materials industry, one in the residential construction industry and two in the cement industry. When the Company evaluated impairment by comparing the specifically identified cost of each investment to market price as of July 15, 2011, the general building materials industry securities had increased their temporary impairments to approximately \$296,000 (8.1% below cost). The residential construction industry securities had increased their temporary impairments to approximately \$29,800 (9.2% below cost). The temporary impairment in the securities of one company in the cement industry remained unchanged from the June 30, 2011 levels while the second company's securities increased their temporary impairments to approximately \$41,000 (16.8% below cost). The Company evaluated the near-term prospects of all of the issuers in relation to the severity of the impairments (fair value was approximately 12.6% less than cost in the general building materials industry investment, approximately 8.8% less than cost in the residential construction industry investment, and approximately 5.0% less than cost in the cement industry investment as of June 30, 2011) and the duration of the impairments (less than three months in the general building materials industry investment, approximately 6 to 12 months in the residential construction industry investment and less than 3 months in the majority of the cement industry investment). Based on that evaluation, the Company does not consider these investments to be other-than-temporarily impaired at June 30, 2011.

The Company owns stock in two privately-owned companies accounted for by the cost method; one in the brick industry and the other in the ethanol production industry. These investments were evaluated for impairment based on average cost and specific identification, respectively. The evaluations of the ethanol production industry investment were based on quoted prices in markets that are not active and no impairments were identified during the year. Since there is not an active market for the brick industry investment, the Company relied on a discounted future net cash flow valuation of the investee, which did not identify any impairment. As a result of those evaluations, the Company does not consider these cost-method investments to be impaired at June 30, 2011. The aggregate cost of the

Edgar Filing: MONARCH CEMENT CO - Form 10-Q

Company's cost-method investments totaled \$2.5 million at June 30, 2011.

December 31, 2010 Impairment Analysis - - The Company's investments in marketable equity securities carried at fair value were evaluated for impairment by comparing the specifically identified cost of each investment to market price. In its third quarter evaluations, the Company identified a \$0.9 million other-than-temporary impairment in its general building materials industry investments, resulting in a recognized loss in earnings of equity investments. The fair value of those investments then became the new cost basis. No further other-than-temporary impairments were identified in the fourth quarter. In its fourth quarter evaluation, the Company identified some specific investments in marketable equity securities it believes are temporarily impaired resulting in the recognition of unrealized losses (see 2010 information in table above). These unrealized losses relate to investments in the common stock of two companies; one in the residential construction industry and another in the cement industry. When the Company evaluated the impairments by comparing the specifically identified cost of each investment to market price as of February 14, 2011, the residential construction industry securities had recovered approximately \$8,400 (9.8%) of their December 31, 2010 temporary impairments. The cement industry securities slightly increased their temporary impairments. The Company evaluated the near-term prospects of all of the issuers in relation to the severity of the impairments (fair value was approximately 15 percent less than cost in the residential construction industry investment and approximately 9 percent less than cost in the cement industry investment as of December 31, 2010) and the duration of the impairments (approximately 6 months in the residential construction industry investment and 12 months in the cement industry investment). Based on that evaluation, the Company does not consider these investments to be other-than-temporarily impaired at December 31, 2010.

The Company owns stock in two privately-owned companies accounted for by the cost method; one in the brick industry and the other in the ethanol production industry. These investments were evaluated for impairment based on average cost and specific identification, respectively. The evaluations of the ethanol production industry investment were based on quoted prices in markets that are not active and no impairments were identified during the year. Since there is not an active market for the brick industry investment, the Company relied on a discounted future net cash flow valuation of the investee, which did not identify any impairment. As a result of those evaluations, the Company does not consider these cost-method investments to be impaired at December 31, 2010. The aggregate cost of the Company's cost-method investments totaled \$2.4 million at December 31, 2010.

Investment Results - - The investment results for June 30, 2011 and December 31, 2010 are as follows:

June 30, 2011	Amortized Cost	Gross Unrealized Gains	Losses	Fair Value
Available-for-sale equity securities				
Cement industry	\$ 4,813,000	\$ 3,892,000	\$-	\$ 8,705,000
General building materials industry	3,973,000	141,000	-	4,114,000
Oil and gas refining and marketing industry	782,000	3,991,500	-	4,773,500
Residential construction industry	599,000	135,500	-	734,500
Total available for sale equity securities	\$ 10,167,000	\$ 8,160,000	\$-	\$ 18,327,000
Less: Deferred taxes on unrealized holding gains		3,264,000		
Unrealized gains recorded in equity, net of deferred tax		\$ 4,896,000		

December 31, 2010	Amortized Cost	Gross Unrealized Gains	Losses	Fair Value
Available-for-sale equity securities				
Cement industry	\$ 4,971,000	\$ 4,529,000	\$-	\$ 9,500,000
General building materials industry	2,866,000	758,000	-	3,624,000

Edgar Filing: MONARCH CEMENT CO - Form 10-Q

Oil and gas refining and marketing industry	2,600,000	4,946,000	-	7,546,000
Residential construction industry	849,000	47,000	-	896,000
Total available for sale equity securities	\$ 11,286,000	\$ 10,280,000	\$-	\$ 21,566,000
Less: Deferred taxes on unrealized holding gains		4,112,000		
Unrealized gains recorded in equity, net of deferred tax		\$ 6,168,000		

Investment-related cash flow information for June 30, 2011 and December 31, 2010 are as follows:

	June 30, 2011	December 31, 2010
Proceeds from sale of equity securities	\$ 7,878,129	\$ 412,532
Realized gain/(loss) on equity securities	\$ 5,197,438	\$ (79,793)
Realized losses due to other-than-temporary impairment of equity securities	\$ -	\$ (858,787)

7. The following table presents the components of net periodic pension and postretirement benefit costs allocated to Cost of Sales and Selling, General and Administrative expenses for the six months ended June 30, 2011 and 2010:

Edgar Filing: MONARCH CEMENT CO - Form 10-Q

	Pension Benefits		Other Benefits	
	2011	2010	2011	2010
Service cost	\$ 375,834	\$ 334,490	\$ 307,132	\$ 272,785
Interest cost	1,010,353	1,031,658	872,456	934,243
Less: Expected return on plan assets	968,550	862,668	-	-

Net periodic expense	\$ 929,120	\$ 992,796	\$ 1,494,649	\$ 1,567,482

The following table presents the components of net periodic pension and postretirement benefit costs allocated to Cost of Sales and Selling, General and Administrative expenses for the three months ended June 30, 2011 and 2010:

	Pension Benefits		Other Benefits	
	2011	2010	2011	2010
Service cost	\$ 187,917	\$ 167,245	\$ 144,716	\$ 136,392
Interest cost	505,176	515,829	411,088	467,122
Less: Expected return on plan assets	484,275	431,334	-	-
Amortization of prior service cost	27,495	27,495	(11,957)	-
Recognized net actuarial loss	228,247	217,163	-	-
Unrecognized net loss	-	-	160,409	180,227
Net periodic expense	\$ 464,560	\$ 496,398	\$ 704,256	\$ 783,741

As previously disclosed in our financial statements for the year ended December 31, 2010, Monarch expects to contribute approximately \$3,120,000 to the pension fund in 2011. As of June 30, 2011, we have contributed approximately \$503,000 and anticipate contributing an additional \$2,617,000 to this plan in 2011 for a total of \$3,120,000.

The other benefits consist of postretirement benefits that are self-insured by Monarch and are paid out of Monarch's general assets. As previously disclosed in our financial statements for the year ended December 31, 2010, Monarch expects expenditures of approximately \$1,775,000 for this plan in 2011. As of June 30, 2011, we have contributed approximately \$720,000 and anticipate contributing an additional \$1,055,000 on this plan in 2011 for a total of \$1,775,000.

8. Other, net contains miscellaneous nonoperating income (expense) items other than interest income, interest expense, gains on sale of equity investments and dividend income.

9. Basic earnings per share of capital stock has been calculated based on the weighted average shares outstanding during each of the reporting periods. The weighted average number of shares outstanding was 4,078,756 and 4,046,069 in the second quarter and first six months of 2011, respectively. The weighted average number of shares outstanding was 4,024,198 in the second quarter and first six months of 2010. The Company has no capital stock equivalents and therefore, does not report diluted earnings per share.

10. The Company files income tax returns in the U.S. Federal jurisdiction and various state jurisdictions. With few exceptions, the Company is no longer subject to U.S. Federal or state income tax examinations by tax authorities for years before 2007. The Company believes it is not subject to any significant tax risk. The Company does not have any accrued interest or penalties associated with any unrecognized tax benefits, nor were any interest expenses recognized during the six months ended June 30, 2011 or June 30, 2010.

Edgar Filing: MONARCH CEMENT CO - Form 10-Q

As a result of the Patient Protection and Affordable Care Act, as modified by the Health Care and Education Reconciliation Act of 2010, we will no longer be able to claim an income tax deduction related to prescription drug benefits provided to retirees and reimbursed under the Medicare Part D retiree drug subsidy beginning in 2013. This resulted in a \$685,000 charge to income tax provision during the first quarter of 2010.

11. Pursuant to a Stock Purchase Agreement among the Company and the owners of Kay Concrete Materials Co. ("Kay Concrete"), on April 15, 2011 the Company acquired all of the issued and outstanding shares of common stock of Kay Concrete, a ready-mix concrete company located in southwest Missouri. The purpose of the acquisition was to expand our ready-mixed concrete business in the region. The aggregate consideration paid by the Company at closing was approximately \$5.0 million consisting of \$1.4 million cash, 105,750 shares of the Company's capital stock valued at \$2.7 million based on the April 15, 2011 price per share of \$26.00, and a note payable of \$0.9 million.

In accordance with Accounting Standards Codification ("ASC") 805, the Company determined the assets and liabilities acquired constituted a business and applied purchase accounting to the assets acquired and the liabilities assumed. Since Kay Concrete is not a substantial subsidiary, pro forma information is not provided for the combined entity. The following table summarizes the consideration paid for acquisition of the assets acquired and the liabilities assumed at the acquisition date as well as the fair value at the acquisition date:

Consideration:		
Cash paid, gross	\$	1,360,000
Fair value of Monarch stock given		
105,750 shares at \$26.00 per share		2,749,500
Note payable		927,443
	\$	5,036,943
Fair Value of assets acquired and liabilities assumed:		
Assets		
Cash	\$	825,608
Accounts receivable		363,246
Inventories		288,620
Property, plant and equipment		5,255,986
Goodwill/non-compete		1,565,443
Other assets		180,712
Liabilities		
Accounts payable		(120,735)
Short-term debt		(175,000)
Accrued liabilities		(56,937)
Long-term debt		(1,255,000)
Deferred taxes		(1,835,000)
Total:	\$	5,036,943

12. Recently Adopted Accounting Standards

In January 2010, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2010-06, "Improving Disclosures About Fair Value Measurements", which amends Subtopic 820-10 with new disclosure requirements and clarification of existing disclosure requirements. Reporting entities must make new disclosures about recurring or nonrecurring fair-value measurements including significant transfers into and out of Level 1 and Level 2 fair-value measurements and information on purchases, sales, issuances, and

settlements on a gross basis in the reconciliation of Level 3 fair-value measurements. The ASU also provides additional guidance related to the level of disaggregation in determining classes of assets and liabilities and disclosures about inputs and valuation techniques. ASU 2010-06 was effective for the Company beginning January 1, 2010 except for Level 3 reconciliation disclosures which were effective for the Company beginning January 1, 2011. The adoption of the Level 3 reconciliation disclosures did not have a material impact on our disclosures or our consolidated financial statements.

In April 2010, the FASB issued ASU No. 2010-17, "Revenue Recognition - Milestone Method (Topic 605): Milestone Method of Revenue Recognition". This ASU provides guidance on defining a milestone and determining when it may be appropriate to apply the milestone method of revenue recognition. Consideration that is contingent on achievement of a milestone in its entirety may be recognized as revenue in the period in which the milestone is achieved only if the milestone is judged to meet certain criteria to be considered substantive. The updated guidance was effective on a prospective basis for the Company beginning January 1, 2011. The adoption of these provisions did not have a material effect on the Company's consolidated financial statements.

In December 2010, the FASB issued ASU 2010-28, "Intangibles - Goodwill and Other (Topic 350)", which amends Subtopic 350-20 with modifications to Step 1 of the goodwill impairment test for those reporting units with zero or negative carrying amounts so that an entity is required to perform Step 2 of the goodwill impairment test if it is more likely than not, based on an assessment of qualitative indicators, that a goodwill impairment exists. ASU 2010-28 was effective for the Company beginning January 1, 2011. Adoption of this standard did not have a material impact on the Company's consolidated financial statements.

In December 2010, the FASB issued ASU No. 2010-29, "Business Combinations (Topic 805)" which requires public entities that present comparative financial statements to disclose revenue and earnings of the combined entity as though the business combination(s) that occurred during the current year had occurred at the beginning of the comparable prior annual reporting period only. The amendments also expand the supplemental pro forma disclosures under Topic 805 to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. These amendments were effective for the Company beginning January 1, 2011. The adoption of this standard did not have a material impact on the Company's consolidated financial statements.

New Accounting Standards Issued But Not Yet Adopted

In May 2011, the FASB issued ASU No. 2011-04, "Fair Value Measurement - Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS", which updated the guidance in ASC Topic 820. The amendments in this ASU result in common principles and requirements for measuring fair value and for disclosing information about fair value measurements in accordance with U.S. GAAP and International Financial Reporting Standards. The amendments change the wording used to describe many of the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements to ensure that U.S. GAAP and IFRS fair value measurement and disclosure requirements are described in the same way. The ASU also provides for certain changes in current GAAP disclosure requirements, for example with respect to the measurement of level 3 assets and for measuring the fair value of an instrument classified in a reporting entity's shareholders' equity. The amendments in this Update are to be applied prospectively. For public entities, the amendments are effective during interim and annual periods beginning after December 15, 2011, and early application is not permitted. This guidance will become effective for the Company beginning January 1, 2012 and is not anticipated to have a material impact on our consolidated financial statements.

13. Subsequent events have been evaluated through the date the financial statements were issued. During this period, no material recognizable subsequent events were identified.

FORWARD-LOOKING STATEMENTS

Certain statements under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations," and elsewhere in this Form 10-Q report filed with the Securities and Exchange Commission, constitute "forward-looking statements". Except for historical information, the statements made in this report are forward-looking statements that involve risks and uncertainties. You can identify these statements by forward-looking words such as "should", "expect", "anticipate", "believe", "intend", "may", "hope", "forecast" or similar words. In particular, statements with respect to variations in future demand for our products in our market area or the future activity of federal and state highway programs and other major construction projects, the timing, scope, cost and benefits of our proposed and recently completed capital improvements and expansion plans, including the resulting increase in production capacity, our forecasted cement sales, the timing and source of funds for the repayment of our revolving line of credit, our ability to pay dividends at the current level, the timing and/or collectability of retainage, our anticipated expenditures for benefit plans, and our anticipated increase in solid fuels and electricity required to operate our facilities and equipment are all forward-looking statements. You should be aware that forward-looking statements involve known and unknown risks, uncertainties, and other factors that may affect the actual results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others:

- general economic and business conditions;
- competition;
- raw material and other operating costs;
- costs of capital equipment;
- changes in business strategy or expansion plans;
- demand for our Company's products;
- cyclical and seasonal nature of our business;
- the effect of weather on our business;
- the effect of environmental and other government regulations;
- the availability of credit at reasonable prices; and
- the effect of federal and state funding on demand for our products.

We have described under the caption "Risk Factors" in Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2010, and in other reports that we file with the SEC from time to time, additional factors that could cause actual results to be materially different from those described in the forward-looking statements. You are cautioned not to put undue reliance on any forward-looking statements, which speak only as of the date they were made.

RESULTS OF OPERATIONS - CRITICAL ACCOUNTING POLICIES

Reference is made to the Management's Discussion and Analysis of Financial Condition and Results of Operations - Accounting Policies incorporated herein by reference to Item 7 of the Company's Annual Report on Form 10-K for the year ended December 31, 2010 for accounting policies which are considered by management to be critical to an understanding of the Company's financial statements.

RESULTS OF OPERATIONS - OVERVIEW

Our products are used in residential, commercial and governmental construction. In recent years, the Company has spent substantial sums on major plant modifications designed to increase our cement production capacity to meet our customers' needs and to improve our production processes. Improvements are planned over the next few years to further enhance our production processes and to meet emission limitations included in the latest regulations issued by the Environmental Protection Agency (EPA).

The residential and commercial construction slowdown, which began during 2008 and continued into 2011, has resulted in a declining demand for cement and ready-mixed concrete. Recent economic forecasts from the Portland Cement Association (PCA) indicate the construction industry is likely to remain weak until 2013. They indicate the negative drag on construction activity is due to uncertainty regarding highway spending and government policy related to the debt crisis. This weakness in the industry is putting downward pressure on the pricing of cement and ready-mixed concrete. The decline in volume and pricing pressure in the industry has adversely impacted our revenues, gross margins, and net profits. The impact of these adverse economic conditions was greater in the first six months of 2011 than in the corresponding period of 2010.

Based on sales forecasts and inventory levels, the Company elected to reduce cement production in both the first quarter of 2010 and of 2011 to undertake plant repairs and maintenance, largely using our own production personnel. The Company normally performs repairs and maintenance every winter, but the decision to use employees or outside contractors is determined by anticipated sales demand, by whether we have the internal expertise and by our inventory target levels. During the remainder of the year, the Company evaluates inventory levels and sales forecasts to determine if reductions in cement production are warranted and can be scheduled around maintenance needs. In addition to costs that vary with the volume of production, our cost of sales includes certain fixed costs that do not vary with the volume of production. We have extremely limited ability to reduce these fixed costs in the short term. As a result, lower production levels which result from extended shutdowns generally have, and in 2010 and 2011 have had, a negative impact on our gross profit margins.

RESULTS OF OPERATIONS - SECOND QUARTER OF 2011 COMPARED TO SECOND QUARTER OF 2010

Consolidated net sales, for the three months ended June 30, 2011, decreased by \$2.7 million when compared to the three months ended June 30, 2010. Sales in our Cement Business were lower by \$1.0 million and sales in our Ready-Mixed Concrete Business were lower by \$1.7 million. Cement Business sales decreased \$0.8 million due to a 5.5% decrease in volume sold and decreased \$0.2 million due to price decreases. Ready-mixed concrete sales decreased by \$1.0 million due to a 7.4% decrease in cubic yards sold and \$0.3 million due to price decreases in addition to decreases in brick, block, aggregates and other sundry item sales of \$0.5 million. An increase of \$0.1 million in construction contract sales slightly offset the Ready-Mixed Concrete Business declines.

Consolidated cost of sales, for the three months ended June 30, 2011, increased by \$0.7 million when compared to the three months ended June 30, 2010. Cost of sales in our Cement Business was higher by \$1.8 million and cost of sales in our Ready-Mixed Concrete Business was lower by \$1.1 million. Cement Business cost of sales decreased \$0.4 million primarily due to the 5.5% decrease in volume sold which was more than offset by a \$2.2 million increase related to higher production costs primarily resulting from the continuation of fixed costs during production shutdowns and the inefficiencies of lower production levels. Ready-Mixed Concrete Business cost of sales decreased \$0.8 million primarily due to the 7.4% decrease in cubic yards of ready-mixed concrete sold and \$0.3 million due to declines in cost of sales for construction contracts.

As a result of the above sales and cost of sales factors, our overall gross profit rate declined from 22.0% for the three months ended June 30, 2010 to 13.2% for the three months ended June 30, 2011. The gross profit rate for the Cement Business declined from 43.3% for the three months ended June 30, 2010 to 25.1% for the three months ended June 30, 2011. The gross profit rate for the Ready-Mixed Concrete Business declined from 7.5% for the three months ended June 30, 2010 to 5.0% for the three months ended June 30, 2011.

Selling, general, and administrative expenses increased by \$0.2 million for the three months ended June 30, 2011 compared to the three months ended June 30, 2010. These costs are normally considered fixed costs that do not vary significantly with changes in sales volume.

Gain on sale of equity investments increased by \$2.6 million for the three months ended June 30, 2011 compared to the three months ended June 30, 2010.

The effective tax rates for the three months ended June 30, 2011 and 2010 were 2.5% and 28.0%, respectively. The Company's effective tax rate differs from the federal and state statutory income tax rate primarily due to the effects of percentage depletion, domestic production activities deduction and valuation allowance. Taxes for the current year are estimated based on prior years' effective tax rates.

RESULTS OF OPERATIONS - FIRST SIX MONTHS OF 2011 COMPARED TO THE FIRST SIX MONTHS OF 2010

Consolidated net sales, for the six months ended June 30, 2011, decreased by \$3.5 million when compared to the six months ended June 30, 2010. Sales in our Cement Business were lower by \$1.8 million and sales in our Ready-Mixed Concrete Business were lower by \$1.7 million. Cement Business sales decreased \$1.6 million due to a 7.6% decrease in volume sold and decreased \$0.2 million due to price decreases. Ready-mixed concrete sales decreased \$1.5 million due to a 7.0% decrease in cubic yards sold and \$0.5 million due to price decreases in addition to decreases in brick, block, aggregates and other sundry items sales of \$0.2 million. This decrease was offset by an increase due to an increase in construction contract sales of \$0.5 million.

Consolidated cost of sales, for the six months ended June 30, 2011, increased by \$1.1 million when compared to the six months ended June 30, 2010. Cost of sales in our Cement Business was higher by \$2.5 million and cost of sales in our Ready-Mixed Concrete Business was lower by \$1.5 million. Cement Business cost of sales decreased \$1.2 million due to the 7.6% decrease in volume sold which was more than offset by a \$3.7 million increase related to higher production costs primarily resulting from the continuation of fixed costs during production shutdowns and the inefficiencies of lower production levels. Ready-Mixed Concrete Business cost of sales decreased \$1.5 million due to the 7.0% decrease in cubic yards of ready-mixed concrete sold and decreased \$0.1 million primarily due to declines in material costs. An additional decline of \$0.2 million in our Ready-Mixed Concrete Business was the result of lower costs of sales for construction contracts. These decreases were slightly offset by a \$0.3 million increase in cost of sales related to brick, block, aggregates and other sundry items.

Our overall gross profit rate declined from 9.7% for the six months ended June 30, 2010 to 1.0% for the six months ended June 30, 2011. The gross profit rate for the Cement Business declined from 21.7% for the six months ended June 30, 2010 to 0.8% for the six months ended June 30, 2011. The gross profit rate for the Ready-Mixed Concrete Business remained largely unchanged from 1.7% for the six months ended June 30, 2010 to 1.2% for the six months ended June 30, 2011.

Selling, general, and administrative expenses increased by \$0.1 million for the six months ended June 30, 2011 compared to the six months ended June 30, 2010. These costs are normally considered fixed costs that do not vary significantly with changes in sales volume.

Gain on sale of equity investments increased by \$5.2 million for the six months ended June 30, 2011 compared to the six months ended June 30, 2010.

Other, net decreased by \$0.4 million for the six months ended June 30, 2011 from the six months ended June 30, 2010 primarily due to a \$0.7 million gain related to the sale of a non-operating asset during the first six months of 2010 while Other, net during the first six months of 2011 primarily consisted of \$0.1 million proceeds from scrap metal sales.

The effective tax rates for the six months ended June 30, 2011 and 2010 were 28.0% and (4.8)%, respectively. The Company's effective tax rate differs from the federal and state statutory income tax rate primarily due to the effects of percentage depletion, domestic production activities deduction and valuation allowance. Taxes for the current year are estimated based on prior years' effective tax rates. The change in the effective tax rate for 2010 was primarily due to an income tax charge of \$685,000 recorded during the first quarter of 2010 as a result of the Patient Protection and Affordable Care Act, as modified by the Health Care and Education Reconciliation Act of 2010.

LIQUIDITY

The Company considers all liquid investments with original maturities of three months or less to be cash equivalents. At June 30, 2011 and December 31, 2010, cash equivalents consisted primarily of money market investments and repurchase agreements with various banks. The FDIC, through the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act), has permanently raised the standard maximum deposit insurance amount (SMDIA) to fully guarantee all deposit accounts up to \$250,000. In addition, the FDIC has adopted section 343 of the Dodd-Frank Act, effective December 31, 2010, which provides for unlimited deposit insurance for noninterest-bearing transaction accounts for two years starting December 31, 2010. This temporary unlimited coverage is in addition to, and separate from, the coverage of at least \$250,000 available to depositors under the FDIC's general deposit insurance rules.

We are able to meet our cash needs primarily from a combination of operations, the sale of equity investments and bank loans.

Operating activities used \$4.3 million more in cash for the six months ended June 30, 2011 over the same period in 2010. For the six months ended June 30, 2011 and June 30, 2010, cash usage was \$5.4 million and \$1.1 million, respectively. Despite 2011's decline in overall sales volume combined with a decline in gross profit margins compared to 2010, net losses were not as great in the first six months of 2011 compared to the corresponding period in 2010 primarily due to the \$5.2 million gain on the sale of equity investments during the first six months of 2011. The Company did not have any gain on the disposal of other assets in the first six months of 2011, but the corresponding period in 2010 had a gain on the disposal of a non-operating asset of \$0.7 million. Accrued postretirement benefits and pension expense decreased \$0.9 million in the first six months of 2011 over the first six months of 2010. Accounts payable excluding acquisitions of property, plant and equipment increased less for June 2011 over December 2010 compared to the the increase for June 2010 over December 2009 which resulted in 2011 providing \$0.8 million less cash for operating activities. The net result of production levels and sales volumes in the first six months of 2011 and 2010 resulted in inventories decreasing \$1.0 million more in the first six months of 2011 than the corresponding period of 2010.

Net cash provided by investing activities totaled \$3.4 million in the first six months of 2011 while \$3.2 million was used in the first six months months of 2010. The \$6.6 million increase in net cash provided by investing activities for the first six months of 2011 compared to the first six months of 2010 is principally due to the \$7.7 million increase in proceeds from disposals of equity investments in the first six months of 2011 over the corresponding period of 2010. The purchase of equity investments in 2011 used \$1.4 million more cash than the corresponding period of 2010. The Company used \$1.6 million less cash for the acquisition of property, plant and equipment in the first six months of

2011 than in the corresponding period of 2010, however the disposal of other assets provided \$0.7 million in cash during the first six months of 2010 while there were no proceeds in the first six months of 2011. The acquisition of Kay Concrete used \$0.5 million in cash, net of cash acquired, in the second quarter of 2010 while no such acquisitions were made in the first six months of 2010.

Net cash provided by financing activities totaled \$0.5 million and \$3.7 million for the six months ending June 30, 2011 and June 30, 2010, respectively. The \$3.1 million decrease in cash provided in 2011 compared to 2010 was primarily the result of the \$2.2 million purchase of capital stock during the second quarter of 2011 while there were no such purchases in the same period in 2010.

In December 2010, Monarch entered into an amendment to the loan agreement with its current lender, Bank of Oklahoma, N.A., to, among other things, renew and modify the terms of Monarch's term loan and revolving line of credit. The amendment added a financial covenant that requires the Company to pledge its investment account to the Bank of Oklahoma, N.A. as collateral for the term loan and revolving line of credit. The fair value of the investment account pledged as collateral was \$17.6 million as of June 30, 2011. The proceeds of the sale of any assets held in the investment account would be paid to the Bank of Oklahoma, N.A. to be applied to the balance of the revolving line of credit and then to the term loan, at the lender's discretion. Monarch's secured credit commitment consists of a \$17.8 million term loan maturing December 31, 2014 and a \$15.0 million line of credit maturing December 31, 2011. Under the amended loan agreement, interest rate terms were not changed. The interest rate on the Company's line of credit remains variable and based on the lender's national prime rate less 0.50% with a 3.50% interest rate minimum or floor. The interest rate on the Company's term loan remains variable and based on the lender's national prime rate less 0.75% with a 3.00% interest rate minimum or floor. The loan agreement contains a financial covenant related to net worth which the Company was in compliance with at the end of the second quarter of 2011.

As of June 30, 2011, we had \$10.5 million outstanding on the term loan and \$7.6 million outstanding on the line of credit leaving a balance available on the line of credit of \$7.4 million. The annual weighted average interest rate we paid on the term loan during the second quarter and first six months of 2011 and 2010 was 3.25%. The annual weighted average interest rate we paid on the line of credit during the second quarter and first six months of 2011 and 2010 was 3.50%. As of June 30, 2011, the applicable interest rate was 3.25% on the term loan and 3.50% on the line of credit. The term loan was used to help finance the expansion project at our cement manufacturing facility. The line of credit was used during the year to fund temporary operating expenses. Our Board of Directors has given management the authority to borrow a maximum of \$50 million. We have not discussed additional financing with any banks or other financial institutions; therefore, no assurances can be given that we will be able to obtain this additional borrowing on favorable terms, if at all.

The Company has projects in the planning and design phases in addition to projects already in progress. For discussion of these projects, see "Capital Resources" below. We anticipate capital expenditures for 2011 to exceed 2010 levels, but we do not anticipate the need for additional bank financing other than that available under the existing line of credit.

For several years the Company has paid a dividend in January, March, June and September. At the April 2011 Board of Directors' meeting, the Board declared a dividend of \$0.23 per share payable in June. Under the terms and conditions of our loan agreement, the Company's ability to pay dividends is subject to its satisfaction of a requirement to maintain a tangible net worth of \$90 million and an adjusted tangible net worth, which is tangible net worth before other comprehensive income, of \$95 million. The Company was in compliance with these requirements at the end of the second quarter of 2011. The minimum net worth requirements could impact the Company's ability to pay dividends in the future. Although dividends are declared at the Board's discretion and could be impacted by the minimum net worth requirements of the Company's loan agreement, we project future cash flow will support the continued payment of dividends at the current level.

The Company has been required to make a pension contribution each of the past two years. In 2010 and 2009, the Company contributed approximately \$2.3 million and \$2.1 million, respectively, to the pension fund. The decline in the bond and stock markets in 2008 significantly reduced the value of our pension funds at December 31, 2008. By December 31, 2010, actual returns on plan assets had increased the value of our pension funds enough to recover approximately 80% of the 2008 year reductions. Based on the pension laws currently in effect, any resulting increases in minimum funding requirements could cause a negative impact to our liquidity. See Note 7 for disclosures about 2011 pension contributions.

FINANCIAL CONDITION

Total assets as of June 30, 2011 were \$178.1 million, an increase of \$4.0 million since December 31, 2010 due primarily to increases in receivables; inventories; refundable income taxes; prepaid expenses; goodwill and noncompete agreements; and property, plant and equipment. Sales were \$5.4 million higher in the month of June 2011 compared to the month of December 2010 which led to a \$3.7 million increase in receivables. From year-to-year the weather conditions in these two months can vary significantly which impacts sales and resulting receivables at month-end. Increases in receivables and generally inventory are common during the first six months of the year due to the seasonality of our business (see "Seasonality" below). Total inventories increased \$0.9 million primarily due to a \$1.3 million increase in fuel, gypsum, paper sacks and other inventory resulting from purchases of coal and petroleum coke exceeding amounts consumed in the production process, increases related to the acquisition of Kay Concrete, and smaller increases from various other subsidiaries in preparation for increased demand during the summer. Additional increases in inventory occurred in building products (\$0.2 million) and in operating and maintenance supplies (\$0.1 million). These increases were partially offset by decreases in finished cement and in work in process of \$0.5 million and \$0.2 million, respectively, resulting from shutdowns of the production facilities during the first quarter of 2011.

During 2011, we experienced a net loss during the first six months which resulted in an increase in refundable income taxes of \$1.5 million compared to the December 31, 2010. Prepaid expenses increased by \$0.5 million primarily due to insurance deposits. Investments decreased \$3.2 million primarily due to the \$6.3 million sale, net of purchases, of available-for-sale equity securities offset by an increase in the market value of remaining equities held. Property, plant and equipment net of depreciation and depletion increased by \$2.3 million primarily due to the acquisition of Kay Concrete which increased property, plant and equipment by \$5.3 million. The \$1.6 million increase in other assets was primarily a result of the acquisition which added \$0.6 million and \$0.9 million to goodwill and noncompete agreements, respectively.

Accounts payable increased by \$0.7 million primarily due to increases in the Ready-Mixed Concrete Business segment related to increased sales volume in June 2011 over December 2010. Accrued liabilities decreased from December 31, 2010 to June 30, 2011 by \$2.4 million due to a \$0.8 million decline in prepayments held on account and by \$1.8 million due to a decrease in cash dividends liability due to the timing of when dividends are declared and paid.

Indebtedness increased \$7.5 million during the first six months of 2011 primarily due to increased utilization of our line of credit to fund the \$3.3 million increase in receivables, approximately \$2.4 million for cash expenditures for property, plant and equipment, and to fund temporary operating expenses.

Accrued postretirement and pension liabilities increased by \$0.8 million and \$0.4 million, respectively, due to net periodic expense exceeding contributions.

Additional-paid-in-capital increased by \$2.5 million as a result of the purchase of Kay Concrete on April 15, 2011, and the resulting issuance of 105,750 shares of the Company's capital stock with a market value on that date of \$26.00 per share compared to a \$2.50 per share par value.

Unrealized holding gain, which is included in accumulated other comprehensive loss, decreased by \$1.3 million during the first six months of 2011 primarily due to the realization of previously unrealized gains through the sale of \$7.9 million of available-for-sale equity securities .

CAPITAL RESOURCES

The Company regularly invests in miscellaneous equipment and facility improvements in both the Cement Business and Ready-Mixed Concrete Business. Capital expenditures included routine equipment purchases during the first six months of 2011, equally in the Cement Business and in the Ready-Mixed Concrete Business. During the first six months of 2011, cash expenditures for property, plant and equipment totaled approximately \$2.4 million, excluding the amounts that are included in accounts payable.

The Company does not currently meet certain emission limitations included in latest regulations issued by the EPA. For discussion on the regulations, see NESHAP discussed below under "Environmental Regulations". To comply with these new regulations, the Company will need to install additional pollution control equipment in its Cement Business. There is no proven technology that enables us to give 100% assurance that we can reach the limits required by the new regulations; however, we feel compliance is possible at our modern facility through the installation of additional pollution control equipment. We plan to use a step approach, beginning with the installation of additional dust collectors on one of our two kilns. Once they are installed, we will test for compliance to determine if other pollution control equipment is needed. If we are not in compliance, we will continue to install pollution control equipment, testing for compliance after each installation, until our emissions are within limits. Once we have successfully modified one kiln to meet the new emission standards, we will proceed with our second kiln. We have also initiated plans to modify our roller mill and related equipment at an estimated cost of \$6.0 million dollars. Supplemental equipment (and estimated cost) which may be required include additional dust collectors on both kilns (\$4.0 million), upgraded dust collectors on both clinker coolers (\$4.0 million), hydrated lime injection system (\$0.4 million), and a chloride by-pass system (\$7.0 million). Cost estimates will be updated as the modifications are engineered and priced for our facility. We are hopeful that we can comply with the new regulations without having to install a chloride by-pass system. We have until September 2013 to comply and may be able to get a one year extension if we have shown continuous progress toward becoming compliant. Various court challenges and legislative actions are pending against the NESHAP regulations issued by the EPA. If any of these court challenges or legislative actions are successful in delaying or overruling the regulation, we will evaluate whether or not to complete the projects currently in process.

NESHAP regulations also require us to install analyzers capable of continuously monitoring certain pollutants. Analyzers capable of continuously monitoring these pollutants at the extremely low levels (i.e. emissions of particulate matter are limited to 3 parts per million) specified in the regulation do not currently exist. We are partnering with an analyzer manufacturer to assist in the development of the required technology and estimate we will spend approximately \$0.8 million for these analyzers.

The Company plans to invest in other miscellaneous equipment and facility improvements in both the Cement Business and Ready-Mixed Concrete Business in 2011. These expenditures, including the ones discussed in the above paragraphs related to NESHAP compliance, are expected to reach approximately \$7.4 million during 2011 and will be funded with a mixture of cash from operations and temporary bank loans. We do not anticipate the need for additional bank financing beyond the amount available through our existing revolving line of credit.

MARKET RISK

Market risks relating to the Company's operations result primarily from changes in demand for our products. Construction activity, particularly in the residential market, has been adversely impacted by the global

financial crisis even though interest rates continue to be at low levels. A continuation of the financial crisis, including a scarcity of credit, or a significant increase in interest rates could lead to a further reduction in construction activities in both the residential and commercial market. Budget shortfalls during economic slowdowns could cause money to be diverted away from highway projects, schools, detention facilities and other governmental construction projects. Reduction in construction activity lowers the demand for cement, ready-mixed concrete, concrete products and sundry building materials. As demand decreases, competition to retain sales volume could create downward pressure on sales prices. The manufacture of cement requires a significant investment in property, plant and equipment and a trained workforce to operate and maintain this equipment. These costs do not materially vary with the level of production. As a result, by operating at or near capacity, regardless of demand, companies can reduce per unit production costs. The continual need to control production costs encourages overproduction during periods of reduced demand.

INFLATION

Inflation directly affects the Company's operating costs. The manufacture of cement requires the use of a significant amount of energy. The Company burns primarily solid fuels, such as coal and petroleum coke, and to a lesser extent natural gas, in its kilns. Increases above the rate of inflation in the cost of these solid fuels, natural gas, or in the electricity required to operate our cement manufacturing equipment could adversely affect our operating profits. Prices of the specialized replacement parts and equipment the Company must continually purchase tend to increase directly with the rate of inflation with the exception of equipment and replacement parts containing large amounts of steel. In recent years, steel prices have tended not to follow inflationary trends, but rather have been influenced by worldwide demand. Prices for diesel fuel used in the transportation of our raw materials and finished products also vary based on supply and demand and in some years exceed the rate of inflation adversely affecting our operating profits.

ENVIRONMENTAL REGULATIONS

The Company's cement plant emissions are regulated by the Kansas Department of Health and Environment (KDHE) and the EPA. KDHE is responsible for the administration and enforcement of Kansas environmental regulations, which typically mirror national regulations.

A recent ruling promulgated by the EPA in 2009 required us to install carbon dioxide (CO₂) Continuous Emission Monitors (CEMs) to track various aspects of the production process to effectively establish a Greenhouse Gas (GHG) inventory for our cement manufacturing facility.

The EPA Administrator has made two important findings clearing the way for EPA to regulate greenhouse gases under the Clean Air Act. The "Endangerment Finding" clarifies EPA's belief that current and projected concentrations of six key greenhouse gases in the atmosphere pose a threat to human health and welfare. Further, the "Cause or Contribute Finding," associates the emissions of the six named GHGs with the threat to public health and welfare. At this time it is difficult to determine if the EPA will act on the "Endangerment Finding", what that action may involve, and when it might be put into place.

At this time, we are not aware of any proposed or pending climate change regulations. There are many variables making it difficult to predict the overall cost of carbon legislation. It is equally difficult to determine when those costs will be realized, or even the feasibility of legislation being passed. There is consensus in the industry that the costs of CO₂ limits required through regulation or legislation could be substantial enough to fundamentally change the cement manufacturing business.

On September 9, 2010, the EPA published modifications to the National Emission Standard for Hazardous Air Pollutants (NESHAP) regulation in the Federal Register. The compliance date for all U.S. cement plants is September

9, 2013. The final rule differs from the proposed rule by requiring more stringent emission limitations on mercury (Hg), total hydrocarbons (THC), hydrochloric acid (HCL), and particulate matter less than 10 microns in diameter (PM 10). Our current emission levels are below the proposed limitations for mercury and THC so additional control equipment is not required for these pollutants; however, we expect to incur increased costs for control equipment for PM 10 & HCL. There will also be additional costs for monitoring, testing, and increased maintenance labor. Initial costs to comply are discussed above under "Capital Resources"

On September 9, 2010 the EPA published New Source Performance Standards (NSPS) for nitrous oxide (NOx), sulphur dioxide (SO2), and particulate matter (PM 10). The rule applies to new or modified sources. At this time, management does not anticipate that modifications necessitated to comply with NESHAP will trigger application of NSPS.

Although there are presently no proposed or pending climate change regulations, climate change regulation could result in (1) increased energy costs, (2) a shift toward carbon neutral fuels or carbon neutral offset strategies, and (3) increased labor costs to acquire the specialized technical expertise needed to comply with the environmental regulations. Demand for our products could decrease due to increased pollution control costs. Conversely, demand could increase as others try to meet their government environmental mandates by using concrete products known for their sustainability benefits and energy efficiency.

In management's opinion, the physical impact of a warmer climate in our market area will increase the number of days with weather conducive for work to proceed on construction projects which in turn will create the potential for greater profitability. Conversely, legislation and regulatory attempts to interfere with natural warming and cooling cycles will, if successful, have an adverse affect on profitability. In addition, differences in environmental regulations in the United States from those of other cement producing countries could affect our ability to continue to compete with the cost of cement imported from other countries.

SEASONALITY

Portland cement is the basic material used in the production of ready-mixed concrete that is used in highway, bridge and building construction. These construction activities are seasonal in nature. During winter months when the ground is frozen, groundwork preparation cannot be completed. Cold temperatures affect concrete set-time, strength and durability, limiting its use in winter months. Dry ground conditions are also required for construction activities to proceed. During the summer, winds and warmer temperatures tend to dry the ground quicker creating fewer delays in construction projects.

Variations in weather conditions from year-to-year significantly affect the demand for our products during any particular quarter; however, our Company's highest revenue and earnings historically occur in its second and third fiscal quarters, April through September.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The Company invests in equity investments which are subject to market fluctuations. The Company had \$20.8 million of equity securities, primarily of publicly traded entities, as of June 30, 2011. The aggregate amount of securities carried at cost, for which the Company has not elected the fair value option, was \$2.5 million as of June 30, 2011. The remaining \$18.3 million in equity investments, which are stated at fair value, are not hedged and are exposed to the risk of changing market prices. The Company classifies all securities as "available-for-sale" for accounting purposes and marks them to fair value on the balance sheet at the end of each period unless they are securities for which the Company has not elected the fair value option. Securities carried at cost are adjusted for impairment, if conditions warrant. Management estimates that its publicly traded investments will generally be consistent with trends and movements of the overall stock market excluding any unusual situations. An immediate

10% change in the fair value of our equity securities would have a \$1.1 million effect, net of deferred tax, on comprehensive income. At June 30, 2011, the Company evaluated all of its equity investments for impairment. The results of those evaluations are discussed in Note 6 of Notes to the Condensed Consolidated Financial Statements.

The Company also has \$18.0 million of bank loans as of June 30, 2011. Interest rates on the Company's term loan and line of credit are variable, subject to interest rate minimums or floors, and are based on the lender's National Prime rate less 0.75% and lender's National Prime rate less 0.50%, respectively.

Item 4. Controls and Procedures

The Company maintains disclosure controls and procedures (as defined in Rules 13a-5(e) and 15d-15(e) under the Securities Exchange Act of 1934) that are designed to ensure that information required to be disclosed in the Company's reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission, and that such information is accumulated and communicated to the Company's management, including its President and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

As of the end of the period covered by this report, an evaluation was carried out by the Company's management, including its President and Chairman of the Board of Directors and Chief Financial Officer, of the effectiveness of its disclosure controls and procedures (as defined in Rules 13a-5(e) or 15d-15(e) under the Exchange Act). Based upon that evaluation, the Company's President and Chairman of the Board of Directors and Chief Financial Officer concluded that these disclosure controls and procedures were effective as of the end of the period covered by this report.

There were no changes in our internal control over financial reporting that occurred during the quarter ended June 30, 2011 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company self-reported potential violations of certain permitting requirements of the Kansas Department of Health and Environment (KDHE). As a result, the Company was notified by letter dated April 27, 2009 of allegations by KDHE that the Company has performed multiple modifications and alterations at the Company's facility for which the Company did not apply for or obtain the KDHE construction permits required by the Kansas Air Quality Act and related regulations. KDHE also alleged that the Company did not apply for or obtain from KDHE the necessary permits for modifications or alterations to a facility that are significant for Prevention of Significant Deterioration (PSD). Based on these allegations, KDHE proposes to assess a civil penalty of \$351,000, and to require the Company to submit a new, complete PSD permit application, including therein a proposal by the Company for installation of air emission controls to achieve Best Available Control Technology (BACT) as provided in applicable regulations. The Company does not agree with certain of KDHE's factual and legal allegations, and is attempting to resolve these issues through negotiation and mutual agreement between the Company and KDHE. The Company reserves all legal rights in the event such a resolution cannot be reached. As of June 30, 2011, it is probable that losses may result, but such losses are estimated to be insignificant.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table summarizes the purchases made by or on behalf of our Company or certain affiliated purchasers of shares of our capital stock during the second quarter ended June 30, 2011:

Period	(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs *
Beginning repurchase authority**				186,728
April 1-30, 2011	0	0	0	186,728
May 1-31, 2011	0	0	0	186,728
June 1-30, 2011	88,400	25.04	88,400	98,328
Total	88,400	\$25.04	88,400	98,328

In 1996, our Board of Directors authorized the purchase, through open market transactions, of up to 400,000 * shares of our Company's capital stock. The authorization has no expiration. Management was given discretion to determine the number and pricing of the shares to be purchased as well as the timing of any such purchases.

** The beginning repurchase authority has been revised by 73,576 shares (from 113,152 shares to 186,728 shares) after a recalculation of the maximum number of shares that may yet be purchased under the plans or programs.

On August 5, 2011, our Board of Directors authorized the purchase, through open market transactions, of an additional 101,672 shares of our Company's capital stock in addition to the existing 98,328 shares remaining from the Board's 1996 authorization for a total repurchase authority of 200,000 shares. Management's authorization has no expiration. Management was given discretion to determine the number and pricing of shares to be purchased as well as the timing of any such purchases.

Item 5. Other Information

Under Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act, each operator of a coal or other mine is required to include disclosures regarding certain mine safety results in its periodic reports filed with the SEC. The operation of the Company's quarries is subject to regulation by the federal Mine Safety and Health Administration ("MSHA") under the Federal Mine Safety and Health Act of 1977. The information required under Section 1503(a) regarding certain mining safety and health matters is presented in Exhibit 95 to this report.

Item 6. Exhibits

31.1 Certificate of the President and Chairman of the Board pursuant to Section 13a-14(a)/15d-14(a) of the Securities Exchange Act of 1934.

31.2 Certificate of the Chief Financial Officer pursuant to Section 13a-14(a)/15d-14(a) of the Securities Exchange Act of 1934.

32.118 U.S.C. Section 1350 Certificate of the President and Chairman of the Board dated August 9, 2011.

32.218 U.S.C. Section 1350 Certificate of the Chief Financial Officer dated August 9, 2011.

95 Dodd-Frank Act Section 1503(a) Disclosures of Mine Safety and Health Administration Safety Data.

101*The following financial statements from the Company's Quarterly Report on Form 10-Q for the fiscal quarter ended June 30, 2011, formatted in XBRL: (i) Condensed Consolidated Balance Sheets, (ii) Condensed Consolidated Statements of Income (Loss) and Retained Earnings, (iii) Condensed Consolidated Statements of Comprehensive Income (Loss), (iv) Condensed Consolidated Statements of Cash Flows, and (v) Notes to the Condensed Consolidated Financial Statements.

* Pursuant to Rule 406T of Regulation S-T, the XBRL-related information in Exhibit 101 to this Quarterly Report on Form 10-Q shall not be deemed to be "filed" for purposes of Section 18 of the Exchange Act, or otherwise subject to the liability of that section, and shall not be deemed part of a registration statement, prospectus or other document filed under the Securities Act or the Exchange Act, except as shall be expressly set forth by specific reference in such filings.
