FORM 10-Q  
UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
Washington D.C. 20549

QUARTERLY REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2015

OR

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission file number 001-34762

FIRST FINANCIAL BANCORP.  
(Exact name of registrant as specified in its charter)

Ohio 31-1042001  
(State or other jurisdiction of (I.R.S. Employer  
incorporation or organization) Identification No.)

255 East Fifth Street, Suite 700 45202  
Cincinnati, Ohio (Zip Code)  
(Address of principal executive offices)

Registrant's telephone number, including area code (877) 322-9530

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer  Accelerated filer

Non-accelerated filer  Smaller reporting company

Edgar Filing: FIRST FINANCIAL BANCORP /OH/ - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of Exchange Act).  
Yes  No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Outstanding at November 5, 2015
Common stock, No par value	61,644,723

FIRST FINANCIAL BANCORP. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
September 30, 2015  
(Unaudited)

NOTE 1: BASIS OF PRESENTATION

The Consolidated Financial Statements of First Financial Bancorp., a bank holding company, principally serving Ohio, Indiana and Kentucky, include the accounts and operations of First Financial and its wholly-owned subsidiary, First Financial Bank, N.A. All significant intercompany transactions and accounts have been eliminated in consolidation. Certain reclassifications of prior periods' amounts, including covered loans and the related allowance for loan and lease losses in the Consolidated Balance Sheets have been made to conform to current year presentation. Such reclassifications had no effect on net earnings.

Effective October 1, 2014, the five-year loss sharing coverage period for non-single family assets expired and the majority of the Company's covered assets were no longer subject to FDIC loss sharing protection. As a result of this expiration, and the insignificant balance of assets that remain subject to FDIC loss sharing protection through October 1, 2019 relative to the Company's total assets, all covered loans and the related allowance for loan and lease losses, as well as provision for covered loan and lease losses, have been reclassified in the Consolidated Financial Statements, and all credit quality metrics have been updated to include covered and formerly covered assets.

The preparation of financial statements in conformity with GAAP requires management to make estimates, assumptions and judgments that affect the amounts reported in the Consolidated Financial Statements and accompanying Notes. These estimates, assumptions and judgments are inherently subjective and may be susceptible to significant change. Actual realized amounts could differ materially from these estimates.

These interim financial statements have been prepared in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X, and serve to update the Form 10-K for the year ended December 31, 2014. These interim financial statements may not include all information and notes necessary to constitute a complete set of financial statements under GAAP applicable to annual periods and it is suggested that these interim statements be read in conjunction with the Form 10-K. Management believes these unaudited consolidated financial statements reflect all adjustments of a normal recurring nature which are necessary for a fair presentation of the results for the interim periods presented. The results of operations for the interim periods are not necessarily indicative of the results that may be expected for the full year or any other interim period. The Consolidated Balance Sheet as of December 31, 2014 has been derived from the audited financial statements in the Company's 2014 Form 10-K.

NOTE 2: RECENTLY ADOPTED AND ISSUED ACCOUNTING STANDARDS

In January 2014, the FASB issued an update (ASU 2014-01, Accounting for Investments in Qualified Affordable Housing Projects) that permits First Financial to make an accounting policy election to account for its investments in qualified affordable housing projects using a proportional amortization method if certain conditions are met. Under the proportional amortization method, First Financial would amortize the initial cost of the investment in proportion to the tax credits and other tax benefits received and recognize the net investment performance in the income statement as a component of income tax expense. The amended guidance requires disclosure of the nature of First Financial's investments in qualified affordable

housing projects, and the effect of the measurement of the investments in qualified affordable housing projects and the related

tax credits on First Financial's financial position and results of operation. The provisions of this update became effective for the interim reporting period ended March 31, 2015. First Financial made the election to adopt the proportional amortization method during the first quarter 2015 and had \$23.6 million of affordable housing commitments as of September 30, 2015. This update did not have a material impact on the Company's Consolidated Financial Statements.

In January 2014, the FASB issued an update (ASU 2014-04, Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure) which clarifies when an in substance repossession or foreclosure occurs, that is, when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan receivable should be de-recognized and the real estate property recognized. The provisions of this update became effective for the interim reporting period ended March 31, 2015. This update did not have a material impact on the Company's Consolidated Financial Statements.

In April 2014, the FASB issued an update (ASU 2014-08, Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity) which redefines what constitutes a discontinued operation. Under the revised standard, a discontinued operation is a component of an entity or group of components that has been disposed of by sale, disposed of other

Table of Contents

than by sale or is classified as held for sale, that represents a strategic shift that has or will have a major effect on an entity's operations and financial results, or an acquired business or nonprofit activity that is classified as held for sale on the date of the acquisition. A strategic shift that has or will have a major effect on an entity's operations and financial results could include the disposal of a major line of business, a major geographic area, a major equity method investment or other major parts of an entity. The new guidance eliminates the criteria prohibiting an entity from reporting a discontinued operation if it has certain continuing cash flows or involvement with the component after the disposal and requires additional disclosures for discontinued operations and new disclosures for individually material disposal transactions that do not meet the definition of a discontinued operation. The provisions of this update became effective for the interim reporting period ended March 31, 2015. This update did not have a material impact on the Company's Consolidated Financial Statements.

In May 2014, the FASB issued an update (ASU 2014-09, Revenue from Contracts with Customers) which outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. Under the revised standard, an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU applies to all contracts with customers except those that are within the scope of other topics in the FASB Accounting Standards Codification. Certain of the ASU's provisions also apply to transfers of nonfinancial assets, including in-substance nonfinancial assets that are not an output of an entity's ordinary activities, such as sales of property, plant, and equipment; real estate; or intangible assets. The ASU also requires significantly expanded disclosures about revenue recognition. The provisions of ASU 2014-09 become effective for interim and annual reporting periods beginning after December 15, 2017. Early adoption is permitted beginning January 1, 2017. First Financial is currently evaluating the impact of this update on its Consolidated Financial Statements.

In June 2014, the FASB issued an update (ASU 2014-11, Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures) that requires repurchase-to-maturity transactions to be accounted for as secured borrowings rather than as sales with a forward repurchase commitment and eliminates current guidance on repurchase financings. The ASU requires separate accounting for a transfer of a financial asset executed contemporaneously with a repurchase agreement with the same counterparty. If the derecognition criteria are met, the initial transfer will generally be accounted for as a sale and the repurchase agreement will generally be accounted for as a secured borrowing. The ASU requires new disclosures for repurchase agreements, securities lending transactions and repurchase-to-maturity transactions that are accounted for as secured borrowings. The ASU also requires new disclosures for transfers of financial assets that are accounted for as sales that involve an agreement with the transferee entered into in contemplation of the initial transfer that result in the transferor retaining substantially all of the exposure to the economic return on the transferred financial assets throughout the term of the transaction. The provisions of this update became effective for the interim reporting period ended March 31, 2015. This update did not have a material impact on the Company's Consolidated Financial Statements.

In August 2014, the FASB issued an update (ASU 2014-14, Receivables - Troubled Debt Restructurings by Creditors: Classification of Certain Government-Guaranteed Mortgage Loans upon Foreclosure) that requires a mortgage loan be derecognized and a separate other receivable be recognized upon foreclosure if the following conditions are met: a) the loan has a government guarantee that is not separable from the loan before foreclosure, b) at the time of foreclosure, the creditor has the intent to convey the real estate property to the guarantor and make a claim on the guarantee, and the creditor has the ability to recover under that claim and c) at the time of foreclosure, any amount of the claim that is determined on the basis of the fair value of the real estate is fixed. Upon foreclosure, the separate other receivable should be measured based on the amount of the loan balance (principal and interest) expected to be recovered from the guarantor. The provisions of this update became effective for the interim reporting period ended March 31, 2015. This update did not have a material impact on the Company's Consolidated Financial Statements.

In August 2014, the FASB issued an update (ASU 2014-15, Presentation of Financial Statements-Going Concern: Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern) that requires management perform a going concern evaluation similar to the auditor's evaluation required by standards issued by the PCAOB and the AICPA. The ASU requires management to evaluate relevant conditions, events and certain management plans that are known or reasonably knowable as of the evaluation date when determining whether substantial doubt about an entity's ability to continue as a going concern exists for both annual and interim reporting periods. If management concludes that substantial doubt about an entity's ability to continue as a going concern, the notes to the financial statements are required to include a statement that there is substantial doubt about the entity's ability to continue as a going concern within one year after the date that the financial statements are issued. The provisions of this update become effective for interim and annual periods ending after December 15, 2016. Early adoption is permitted. First Financial does not anticipate this update will have a material impact on its Consolidated Financial Statements.

Table of Contents

In April 2015, the FASB issued an update (ASU 2015-03, Interest-Imputation of Interest: Simplifying the Presentation of Debt Issuance Costs) that requires debt issuance costs to be presented as a deduction from the corresponding debt liability. Upon adoption, an entity must apply the new guidance retrospectively to all prior periods presented in the financial statements. The provisions of this update are effective for interim and annual periods beginning after December 15, 2015, with early adoption permitted. First Financial adopted this accounting standard during the third quarter of 2015 and recorded \$1.7 million of deferred debt issuance costs as a reduction to long-term debt in the Consolidated Balance Sheets as of September 30, 2015. Management concluded that the debt issuance costs capitalized in prior periods was immaterial as a component of other assets, total assets, total long-term debt and total liabilities, and as such, the Company's prior periods have not been restated. The amount of unamortized debt issuance costs not reclassified was \$0.1 million as of December 31, 2014.

In May 2015, the FASB issued an update (ASU 2015-07, Fair Value Measurement: Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share) which will eliminate the requirement to categorize investments whose fair values are measured at net asset value within the fair value hierarchy using the practical expedient. This update will require entities to disclose the fair values of such investments so that financial statement users can reconcile amounts reported in the fair value hierarchy table and the amounts reported on the balance sheet. The provisions of this update become effective for the interim and annual reporting periods beginning after December 15, 2015, with early adoption permitted. First Financial does not anticipate this update will have a material impact on its Consolidated Financial Statements.

In September 2015, the FASB issued an update (ASU 2015-16, Business Combinations: Simplifying the Accounting for Measurement-Period Adjustments) which eliminates the requirement for an acquirer in a business combination to account for measurement-period adjustments retrospectively. This update will require acquiring companies to recognize measurement-period adjustments during the period in which they determine the amounts, including the effect on earnings of any amounts they would have recorded in previous periods if the accounting had been completed at the acquisition date. The guidance in this ASU is effective for interim and annual reporting periods beginning after December 15, 2015 with early adoption permitted. First Financial does not anticipate this update will have a material impact on its Consolidated Financial Statements.

## NOTE 3: INVESTMENTS

The following is a summary of held-to-maturity and available-for-sale investment securities as of September 30, 2015:

(Dollars in thousands)	Held-to-maturity				Available-for-sale			
	Amortized cost	Unrealized gain	Unrealized loss	Market value	Amortized cost	Unrealized gain	Unrealized loss	Market value
U.S. Treasuries	\$0	\$0	\$0	\$0	\$98	\$1	\$0	\$99

Total	\$177,756	\$(967)	\$496,104	\$(16,090)	\$673,860	\$(17,057)

Gains and losses on debt securities are generally due to fluctuations in current market yields relative to the yields of the debt securities at their amortized cost. All securities with unrealized losses are reviewed quarterly to determine if any impairment is considered other than temporary, requiring a write-down to fair value. First Financial considers the percentage loss on a security, duration of the loss, average life or duration of the security, credit rating of the security and payment performance as well as the Company's intent and ability to hold the security to maturity when determining whether any impairment is other than temporary. At this time First Financial does not intend to sell, and it is not more likely than not that the Company will be required to sell debt securities temporarily impaired prior to maturity or recovery of the recorded value. First Financial had no other than temporary impairment related to its investment securities portfolio as of September 30, 2015 or December 31, 2014.

For further detail on the fair value of investment securities, see Note 14 – Fair Value Disclosures.

Table of Contents

## NOTE 4: LOANS AND LEASES

First Financial offers clients a variety of commercial and consumer loan and lease products with various interest rates and payment terms. Lending activities are primarily concentrated in states where the Bank currently operates banking centers (Ohio, Indiana and Kentucky). Additionally, First Financial has two national lending platforms, one that provides equipment and leasehold improvement financing for franchisees in the quick service and casual dining restaurant sector and another that provides loans secured by commissions and cash collateral accounts exclusively to insurance agents and brokers. Commercial loan categories include commercial and industrial (commercial), commercial real estate, construction real estate and lease financing. Consumer loan categories include residential real estate, home equity, installment and credit card.

Purchased impaired loans. Loans accounted for under FASB ASC Topic 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality, are referred to as purchased impaired loans. First Financial accounts for the majority of loans acquired in FDIC transactions as purchased impaired loans, except for loans with revolving privileges, which are outside the scope of FASB ASC Topic 310-30, and loans for which cash flows could not be estimated, which are accounted for under the cost recovery method. Purchased impaired loans include loans previously covered under loss sharing agreements as well as loans that remain subject to FDIC loss sharing coverage.

Purchased impaired loans are not classified as nonperforming assets as the loans are considered to be performing under FASB ASC Topic 310-30. Therefore, interest income, through accretion of the difference between the carrying value of the loans and the expected cash flows (accretable difference) is recognized on all purchased impaired loans. First Financial had purchased impaired loans totaling \$207.8 million and \$264.9 million, at September 30, 2015 and December 31, 2014, respectively. The outstanding balance of all purchased impaired loans, including all contractual principal, interest, fees and penalties, was \$236.5 million and \$314.5 million as of September 30, 2015 and December 31, 2014, respectively. These balances exclude contractual interest not yet accrued.

Changes in the carrying amount of accretable difference for purchased impaired loans were as follows:

(Dollars in thousands)	Three months ended		Nine months ended	
	September 30,		September 30,	
	2015	2014	2015	2014
Balance at beginning of period	\$78,945	\$127,764	\$106,622	\$133,671
Reclassification from/(to) nonaccretable difference	76	(2,295 )	(2,048 )	19,864
Accretion	(4,945 )	(8,158 )	(17,046 )	(26,808 )
Other net activity <sup>(1)</sup>	(4,746 )	(4,250 )	(18,198 )	(13,666 )
Balance at end of period	\$69,330	\$113,061	\$69,330	\$113,061

(1) Includes the impact of loan repayments and charge-offs.

First Financial regularly reviews its forecast of expected cash flows for purchased impaired loans. The Company recognized reclassifications from nonaccretable to accretable difference of \$0.1 million for the third quarter of 2015, however, during the nine months ended September 30, 2015, the Company recognized reclassifications from accretable to nonaccretable difference of \$2.0 million. During the third quarter of 2014, First Financial recognized \$2.3 million of reclassifications from accretable to nonaccretable difference, while in the nine months ended September 30, 2014, the Company recognized reclassifications from nonaccretable to accretable difference of \$19.9 million due to changes in the cash flow expectations related to certain loan pools. Reclassifications from nonaccretable to accretable difference can result in impairment and provision expense in the current period and reclassifications from accretable to nonaccretable difference can result in yield adjustments on the related loan pools on a prospective basis.

Covered loans. Loans acquired in FDIC-assisted transactions covered under loss sharing agreements whereby the FDIC will reimburse First Financial for the majority of any losses incurred are referred to as covered loans. Pursuant to the terms of the loss sharing agreements, covered loans are subject to a stated loss threshold whereby the FDIC will reimburse First Financial for 80% of losses up to a stated loss threshold and 95% of losses in excess of the threshold. These loss sharing agreements provide for partial loss protection on single-family, residential loans for a period of ten years and First Financial is required to share any recoveries of previously charged-off amounts for the same time period, on the same pro-rata basis with the FDIC. All other loans are provided loss protection for a period of five years and recoveries of previously charged-off amounts must be shared with the FDIC for an additional three year period, on the same pro-rata basis.

Table of Contents

The Company's loss sharing agreements with the FDIC related to non-single family loans expired effective October 1, 2014, and the ten year period of loss protection on all other covered loans and covered OREO expires October 1, 2019. Covered loans totaled \$117.6 million as of September 30, 2015 and \$135.7 million as of December 31, 2014.

**Credit Quality.** To facilitate the monitoring of credit quality for commercial loans, and for purposes of determining an appropriate allowance for loan and lease losses, First Financial utilizes the following categories of credit grades:

**Pass** - Higher quality loans that do not fit any of the other categories described below.

**Special Mention** - First Financial assigns a special mention rating to loans and leases with potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or lease or in First Financial's credit position at some future date.

**Substandard** - First Financial assigns a substandard rating to loans or leases that are inadequately protected by the current sound financial worth and paying capacity of the borrower or of the collateral pledged, if any. Substandard loans and leases have well-defined weaknesses that jeopardize repayment of the debt. Substandard loans and leases are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not addressed.

**Doubtful** - First Financial assigns a doubtful rating to loans and leases with all the attributes of a substandard rating with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The possibility of loss is extremely high, but because of certain important and reasonably specific pending factors that may work to the advantage and strengthening of the credit quality of the loan or lease, its classification as an estimated loss is deferred until its more exact status may be determined. Pending factors include proposed merger, acquisition or liquidation procedures, capital injection, perfecting liens on additional collateral and refinancing plans.

The credit grades described above, which are derived from standard regulatory rating definitions, are assigned upon initial approval of credit to borrowers and updated periodically thereafter.

First Financial considers repayment performance to be the best indicator of credit quality for consumer loans. Consumer loans that have principal and interest payments that are past due by 90 days or more are generally classified as nonperforming. Additionally, consumer loans that have been modified in a TDR are classified as nonperforming.

Commercial and consumer credit exposure by risk attribute was as follows:

As of September 30, 2015

(Dollars in thousands)	Real Estate		Commercial	Leasing	Total

Table of Contents

Nonaccrual. Loans are classified as nonaccrual when, in the opinion of management, collection of principal or interest is doubtful or when principal or interest payments are 90 days or more past due. Generally, loans are classified as nonaccrual due to the continued failure to adhere to contractual payment terms by the borrower, coupled with other pertinent factors such as insufficient collateral value. The accrual of interest income is discontinued, and previously accrued but unpaid interest is reversed when a loan is classified as nonaccrual. Any payments received while a loan is on nonaccrual status are applied as a reduction to the carrying value of the loan. A loan may return to accrual status if collection of future principal and interest payments is no longer doubtful.

Purchased impaired loans are classified as performing, even though they may be contractually past due, as any nonpayment of contractual principal or interest is considered in the periodic re-estimation of expected cash flows and is included in the resulting recognition of current period loan loss provision or prospective yield adjustments.

Troubled Debt Restructurings. A loan modification is considered a TDR when the borrower is experiencing financial difficulty and concessions are made by the Company that would not otherwise be considered for a borrower with similar credit characteristics. The most common types of modifications include interest rate reductions, maturity extensions and modifications to principal amortization, including interest only structures. Modified terms are dependent upon the financial position and needs of the individual borrower. If the modification agreement is violated, the loan is managed by the Company's credit administration group for resolution, which may result in foreclosure in the case of real estate.

TDRs are generally classified as nonaccrual for a minimum period of six months and may qualify for return to accrual status once they have demonstrated performance with the restructured terms of the loan agreement.

First Financial had 271 TDRs totaling \$33.8 million at September 30, 2015, including \$20.2 million on accrual status and \$13.6 million classified as nonaccrual. First Financial had an insignificant amount of commitments outstanding to lend additional funds to borrowers whose loan terms have been modified through TDRs at September 30, 2015. At September 30, 2015, the allowance for loan and lease losses included reserves of \$2.4 million related to TDRs. For the three and nine months ended September 30, 2015, First Financial charged off \$0.7 million and \$2.5 million, respectively, for the portion of TDRs determined to be uncollectible. Additionally, at September 30, 2015, approximately \$8.8 million of accruing TDRs have been performing in accordance with the restructured terms for more than one year.

First Financial had 262 TDRs totaling \$28.2 million at December 31, 2014, including \$15.9 million of loans on accrual status and \$12.3 million classified as nonaccrual. First Financial had an insignificant amount of commitments outstanding to lend additional funds to borrowers whose loan terms had been modified through TDRs. At December 31, 2014, the allowance for loan and lease losses included reserves of \$3.7 million related to TDRs. For the year ended December 31, 2014, First Financial charged off \$1.0 million for the portion of TDRs determined to be uncollectible. At December 31, 2014, approximately \$10.5 million of the accruing TDRs had been performing in accordance with the restructured terms for more than one year.

Table of Contents

The following tables provide information on loan modifications classified as TDRs during the three and nine months ended September 30, 2015 and 2014:

(Dollars in thousands)	Three months ended			September 30, 2014		
	September 30, 2015			September 30, 2014

Total	\$3,346	\$4,152	\$18,502	\$8,351

(1) Includes covenant modifications and other concessions, or combination of concessions, that do not consist of interest rate adjustments, forbearance and maturity extensions

First Financial considers repayment performance as an indication of the effectiveness of the Company's loan modifications. Borrowers classified as a TDR that are 90 days or more past due on any principal or interest payments, or who prematurely terminate a restructured loan agreement without paying off the contractual principal balance (for example, in a deed-in-lieu arrangement), are considered to be in payment default of the terms of the TDR agreement.

Table of Contents

The following table provides information on TDRs for which there was a payment default during the period that occurred within twelve months of the loan modification:

(Dollars in thousands)	Three months ended		September 30, 2014

Total interest included in income	259	296	806	684
Net impact on interest income	\$593	\$614	\$1,944	\$1,859

First Financial individually reviews all impaired commercial loan relationships greater than \$250,000, as well as consumer loan TDRs greater than \$100,000, to determine if a specific allowance is necessary based on the borrower's overall financial condition, resources and payment record, support from guarantors and the realizable value of any collateral. Specific allowances are based on discounted cash flows using the loan's initial effective interest rate or the fair value of the collateral for certain collateral dependent loans.

Table of Contents

First Financial's investment in impaired loans was as follows:

As of September 30, 2015

(Dollars in thousands)	Current balance	Contractual principal balance	Related allowance	Average current balance	YTD interest income recognized	Quarterly interest income recognized

Table of Contents

OREO. OREO is comprised of properties acquired by the Company primarily through the loan foreclosure or repossession process, or other resolution activity that results in partial or total satisfaction of problem loans.

Changes in OREO were as follows:

(Dollars in thousands)	Three months ended		Nine months ended	
	September 30,		September 30,	
	2015 <sup>(1)</sup>	2014 <sup>(1)</sup>	2015 <sup>(1)</sup>	2014 <sup>(1)</sup>
Balance at beginning of period	\$16,401	\$32,809	\$22,674	\$46,926

Balance at end of period	\$15,187	\$22,496	\$15,187	\$22,496

(1) Includes OREO subject to loss sharing agreements of \$1.4 million and \$11.2 million at September 30, 2015 and 2014, respectively.

FDIC indemnification asset. Changes in the balance of the FDIC indemnification asset and the related impact to the Consolidated Statements of Income are presented in the table that follows:

(Dollars in thousands)	Three months ended		Nine months ended		Affected Line Item in the Consolidated Statements of Income
	September 30,		September 30,		
	2015	2014	2015	2014	
Balance at beginning of period	\$20,338	\$30,420	\$22,666	\$45,091	
Adjustments not reflected in income					
Net FDIC claims (received) / paid	758	(1,423	) 2,382	(7,422	)
Adjustments reflected in income					
Amortization	(1,192	) (1,486	) (3,562	) (4,215	) Interest income, other earning assets
FDIC loss sharing income	(973	) (192	) (2,323	) 408	Noninterest income, FDIC loss sharing income
Offset to accelerated discount	0	(3,159	) (232	) (9,702	) Noninterest income, accelerated discount on covered loans
Balance at end of period	\$18,931	\$24,160	\$18,931	\$24,160	

The accounting for FDIC indemnification assets is closely related to the accounting for the underlying, indemnified assets as well as on-going assessment of the collectibility of the indemnification assets. The primary activities impacting the FDIC indemnification asset are FDIC claims, amortization, FDIC loss sharing income and accelerated discount.

FDIC claims - First Financial files quarterly certifications with the FDIC and submits claims for losses, valuation adjustments and collection expenses incurred, less recoveries of any previous amounts claimed that are reimbursable back to the FDIC, as allowed under the loss sharing agreements. Cash reimbursements are generally received within 30 days of filing and are recorded as a credit to the indemnification asset balance, thus reducing its carrying value.

Table of Contents

Amortization - As the yield on covered loans increased over time as a result of improvement in the expected cash flows on covered loans, the yield on the indemnification asset declined. The yield on the indemnification asset became negative in the first quarter of 2011 at which time the indemnification asset began to decline through monthly amortization at the negative yield.

FDIC loss sharing income - FDIC loss sharing income represents the proportionate share of credit costs on covered assets that First Financial expects to receive from the FDIC. Credit costs on covered assets include provision expense on covered loans, losses on covered OREO and other covered collection and asset resolution costs recorded as loss sharing expense under noninterest expenses in the Consolidated Statements of Income.

Offset to accelerated discount - Accelerated discounts on covered loans occur when covered loans prepay and represent the accelerated recognition of the remaining discount that would have been recognized over the life of the loan had the loan not prepaid. In conjunction with the recognition of accelerated discount, First Financial also recognizes a related offset through noninterest income and reduction to the indemnification asset for a portion of the discount representing expected credit loss included in the discount recorded at acquisition.

**NOTE 5: ALLOWANCE FOR LOAN AND LEASE LOSSES**

Loans and leases. For each reporting period, management maintains the ALLL at a level that it considers sufficient to absorb probable loan and lease losses inherent in the portfolio. Management determines the adequacy of the allowance based on historical loss experience as well as other significant factors such as composition of the portfolio, economic conditions, geographic footprint, the results of periodic internal and external evaluations of delinquent, nonaccrual and classified loans and any other adverse situations that may affect a specific borrower's ability to repay, including the timing of future payments. This evaluation is inherently subjective as it requires utilizing material estimates that may be susceptible to significant change. There were no material changes to First Financial's accounting policies or methodology related to the allowance for loan and lease losses during the first nine months of 2015.

The allowance is increased by provision expense and decreased by actual charge-offs, net of recoveries of amounts previously charged-off. First Financial's policy is to charge-off all or a portion of a loan when, in management's opinion, it is unlikely to collect the principal amount owed in full either through payments from the borrower or from the liquidation of collateral.

In the third quarter of 2015, First Financial closed its merger with Oak Street. Loans acquired in this transaction were recorded at estimated fair value at the acquisition date with no carryover of the related ALLL. See Note 15 - Business Combinations for further detail.

Covered/formerly covered loans. The majority of covered/formerly covered loans are purchased impaired loans, whereby First Financial is required to periodically re-estimate the expected cash flows on the loans. First Financial updated the valuations related to covered/formerly covered loans during the third quarter of 2015. First Financial recognized provision expense of \$1.3 million and net charge-offs of \$1.0 million during the third quarter of 2015, resulting in an ending allowance of \$11.0 million as of September 30, 2015. First Financial recognized provision expense of \$1.7 million and realized net charge-offs of \$0.7 million for the first nine months of 2015. For the third quarter of 2014, First Financial recognized negative provision expense, or impairment recapture, on covered loans of \$0.2 million and net charge-offs of \$0.7 million, resulting in an ending allowance of \$11.5 million. For the first nine months of 2014, the Company recognized negative provision expense on covered loans of \$2.8 million and net charge-offs of \$4.6 million.

First Financial recognized loss sharing expenses of \$0.6 million and \$1.0 million for the third quarters of 2015 and 2014, respectively. The Company also recognized losses on covered/formerly covered OREO of \$0.1 million for the

third quarter of 2015 and gains on covered OREO of \$1.4 million for the third quarter of 2014. The net payable due to the FDIC under loss sharing agreements related to covered loan recoveries, gains/losses on covered OREO and loss sharing expenses of \$1.0 million was recognized as negative FDIC loss sharing income during the third quarter of 2015. The net payable due to the FDIC under loss sharing agreements of \$0.2 million for the third quarter of 2014, was recognized as negative FDIC loss sharing income and a corresponding decrease to the FDIC indemnification asset.

First Financial recognized loss sharing expenses of \$1.5 million and \$4.0 million for the nine months ended September 30, 2015 and 2014, respectively. First Financial also recognized losses on covered/formerly covered OREO of \$0.5 million for the nine months ended September 30, 2015 and gains on covered/formerly covered OREO of \$1.0 million for the nine months ended September 30, 2014. The net payable due to the FDIC under loss sharing agreements of \$2.3 million for the first nine months of 2015 was recognized as negative loss sharing income. The receivable due from the FDIC under loss sharing

Table of Contents

agreements of \$0.4 million for the first nine months of 2014, was recognized as loss sharing income and a corresponding increase to the FDIC indemnification asset.

Changes in the allowance for loan and lease losses were as follows:

## NOTE 6: GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill. Assets and liabilities acquired in a business combination are recorded at their estimated fair values as of the acquisition date. The excess cost of the acquisition over the fair value of net assets acquired is recorded as goodwill. During the third quarter of 2015, First Financial recorded additions to goodwill resulting from the Oak Street acquisition. For further detail on the Oak Street acquisition, see Note 15 – Business Combinations.

Table of Contents

Changes in the carrying amount of goodwill for the quarter ended September 30, 2015 and the year ended December 31, 2014 are shown below.

(Dollars in thousands)	September 30, 2015	December 31, 2014
Balance at beginning of year	\$137,739	\$95,050
Goodwill resulting from business combinations	66,276	42,689
Balance at end of period	\$204,015	\$137,739

Goodwill is not amortized, but is measured for impairment on an annual basis as of October 1 of each year, or whenever events or changes in circumstances indicate that the fair value of a reporting unit may be below its carrying value. First Financial performed its most recent annual impairment test as of October 1, 2014 and no impairment was indicated. As of September 30, 2015, no events or changes in circumstances indicated that the fair value of a reporting unit was below its carrying value.

Other intangible assets. As of September 30, 2015 and December 31, 2014, First Financial has \$7.7 million and \$8.1 million, respectively, of other intangibles which are included in Goodwill and other intangibles in the Consolidated Balance Sheets and primarily consist of core deposit intangibles. Core deposit intangibles represent the estimated fair value of acquired customer deposit relationships. Core deposit intangibles are recorded at their estimated fair value as of the acquisition date and are then amortized on an accelerated basis over their estimated useful lives. Core deposit intangibles were \$6.4 million and \$7.7 million as of September 30, 2015 and December 31, 2014, respectively. First Financial's core deposit intangibles have an estimated weighted average remaining life of 5.9 years. Amortization expense was \$0.4 million and \$0.5 million for the three months ended September 30, 2015 and 2014, respectively. Amortization expense recognized on intangible assets for the nine months ended September 30, 2015 and 2014 was \$1.3 million and \$1.2 million, respectively.

**NOTE 7: BORROWINGS**

Short-term borrowings on the Consolidated Balance Sheets include repurchase agreements utilized for corporate sweep accounts with cash management account agreements in place, overnight advances from the Federal Loan Home Bank (FHLB) and a short-term line of credit. All repurchase agreements are subject to terms and conditions of repurchase security agreements between First Financial Bank and the client. To secure the Bank's liability to the client, First Financial Bank is authorized to sell or repurchase U.S. Treasury, government agency and mortgage-backed securities.

First Financial had \$701.2 million in short-term borrowings with the FHLB at September 30, 2015 and \$558.2 million as of December 31, 2014. These short-term borrowings are used to manage the Company's normal liquidity needs and support the Company's asset and liability management strategies.

First Financial has a \$15.0 million short-term credit facility with an unaffiliated bank that matures on May 30, 2016. This facility can have a variable or fixed interest rate and provides First Financial additional liquidity, if needed, for various corporate activities, including the repurchase of First Financial shares and the payment of dividends to shareholders. As of September 30, 2015 and December 31, 2014, there was no outstanding balance. The credit agreement requires First Financial to comply with certain covenants including those related to asset quality and capital levels, and First Financial was in compliance with all covenants associated with this facility as of September 30, 2015 and December 31, 2014.

During the third quarter of 2015, First Financial issued \$120.0 million of subordinated notes. The subordinated notes have a fixed interest rate of 5.125% payable semiannually and mature on August 25, 2025. These notes are not

redeemable by the Company or callable by the holders of the notes prior to maturity. The subordinated notes will be treated as Tier 2 capital for regulatory capital purposes and are included in Long-term debt on the Consolidated Balance Sheets.

Long-term debt also includes \$0.5 million and \$22.5 million of FHLB long-term advances as of September 30, 2015 and December 31, 2014, respectively. These instruments are primarily utilized to reduce overnight liquidity risk and to mitigate interest rate sensitivity on the Consolidated Balance Sheets. As of December 31, 2014, First Financial also had \$25.0 million in repurchase agreements recorded in Long-term debt on the Consolidated Balance Sheets which matured during the third quarter of 2015. Securities pledged as collateral in conjunction with the repurchase agreements were included within Investment securities on the Consolidated Balance Sheets.

Table of Contents

The following is a summary of First Financial's long-term debt:

(Dollars in thousands)	September 30, 2015			December 31, 2014		
	Amount	Average rate		Amount	Average rate	
Subordinated debt	\$118,286	5.20	%	\$0	0.00	%
FHLB advances	454	2.36	%	22,466	2.52	%
National market repurchase agreement	0	0.00	%	25,000	3.54	%
Capital loan with municipality	775	0.00	%	775	0.00	%
Total long-term debt	\$119,515	5.15	%	\$48,241	3.01	%

## NOTE 8: ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

Shareholders' equity is affected by transactions and valuations of asset and liability positions that require adjustments to accumulated other comprehensive income (loss). The related tax effects allocated to other comprehensive income and reclassifications out of accumulated other comprehensive income (loss) are as follows:

(Dollars in thousands)	Three months ended September 30, 2015					Total accumulated other comprehensive income		
	Total other comprehensive income		Pre-tax	Tax-effect	Net of tax	Beginning Balance	Net Activity	Ending Balance

Total reclassifications for the period, before tax	\$ 59	\$(419)	\$ 453	\$(1,357)	

(1) Negative amounts are reductions to net income.

(2) Included in the computation of net periodic pension cost (see Note 12 - Employee Benefit Plans for additional details).

## NOTE 9: DERIVATIVES

First Financial uses derivative instruments, including interest rate caps, floors and swaps, to meet the needs of its clients while managing the interest rate risk associated with certain transactions. First Financial does not use derivatives for speculative purposes.

First Financial primarily utilizes interest rate swaps as a means to offer borrowers credit-based products that meet their needs and may from time to time utilize interest rate swaps to manage the interest rate risk profile of the Company.

Interest rate swap agreements establish the basis on which interest rate payments are exchanged with counterparties, referred to as the notional amount. As only interest rate payments are exchanged, the cash requirements and credit risk associated with interest rate swaps are significantly less than the notional amount and the Company's credit risk exposure is limited to the market value of the instruments. First Financial manages this market value credit risk through counterparty credit policies. These policies require the Company to maintain a total derivative notional position of less than 35% of assets, total credit exposure of less than 3% of capital and no single counterparty credit risk exposure greater than \$20.0 million. The Company is currently below all single counterparty and portfolio limits.

At September 30, 2015, the Company had a total counterparty notional amount outstanding of approximately \$528.5 million, spread among seven counterparties, with an outstanding liability from these contracts of \$18.3 million. At December 31, 2014,

Table of Contents

the Company had a total counterparty notional amount outstanding of approximately \$566.2 million, spread among nine counterparties, with an outstanding liability from these contracts of \$12.4 million.

First Financial's exposure to credit loss, in the event of nonperformance by a borrower, is limited to the market value of the derivative instrument associated with that borrower. First Financial monitors its derivative credit exposure to borrowers by monitoring the creditworthiness of the related loan customers through the normal credit review processes the Company performs on all borrowers. Additionally, the Company monitors derivative credit risk exposure related to problem loans through the Company's allowance for loan and lease losses committee. First Financial considers the market value of a derivative instrument to be part of the carrying value of the related loan for these purposes as the borrower is contractually obligated to pay First Financial this amount in the event the derivative contract is terminated.

Fair Value Hedges. First Financial utilizes interest rate swaps designated as fair value hedges as a means to offer commercial borrowers fixed rate funding while providing the Company with floating rate assets. The following table details the location and amounts recognized in the Consolidated Balance Sheets for fair value hedges:

(Dollars in thousands)	Balance sheet location	September 30, 2015			December 31, 2014		
		Notional amount	Estimated fair value		Notional amount	Estimated fair value	
			Gain	Loss		Gain	Loss
Fair value hedges - instruments associated with loans							
Pay fixed interest rate swaps with counterparty	Accrued interest and other liabilities	\$6,261	\$0	\$(235 )	\$8,739	\$0	\$(440 )
Matched interest rate swaps with borrower	Accrued interest and other assets	522,260	18,555	0	407,423	11,150	(249 )
Matched interest rate swaps with counterparty	Accrued interest and other liabilities	522,260	0	(18,601 )	407,423	249	(11,227 )
Total		\$1,050,781	\$18,555	\$(18,836)	\$823,585	\$11,399	\$(11,916)

In connection with its use of derivative instruments, First Financial and its counterparties are required to post cash collateral to offset the market position of the derivative instruments under certain conditions. First Financial maintains the right to offset these derivative positions with the collateral posted against them by or with the relevant counterparties. First Financial classifies the derivative cash collateral outstanding with its counterparties as an adjustment to the fair value of the derivative contracts within Accrued interest and other assets or Accrued interest and other liabilities in the Consolidated Balance Sheets.

The following table discloses the gross and net amounts of liabilities recognized in the Consolidated Balance Sheets:

(Dollars in thousands)	September 30, 2015			December 31, 2014		
	Gross amounts of recognized liabilities	Gross amounts offset in the Consolidated Balance Sheets	Net amounts of liabilities presented in the Consolidated Balance Sheets	Gross amounts of recognized liabilities	Gross amounts offset in the Consolidated Balance Sheets	Net amounts of assets presented in the Consolidated Balance Sheets
Fair value hedges	\$235	\$(84 )	\$151	\$440	\$0	\$440

Pay fixed interest rate swaps with counterparty							
Matched interest rate swaps with counterparty	18,600	(17,916	) 684	11,476	(12,260	) (784	)
Total	\$18,835	\$ (18,000	) \$ 835	\$11,916	\$ (12,260	) \$ (344	)

Table of Contents

The following table details the derivative financial instruments, the average remaining maturities and the weighted-average interest rates being paid and received by First Financial at September 30, 2015:

(Dollars in thousands)	Notional amount	Average maturity (years)	Fair value	Weighted-average rate		
				Receive	Pay	
Asset conversion swaps						
Pay fixed interest rate swaps with counterparty	\$6,261	2.0	\$(235 )	2.01	% 6.85	%
Receive fixed, matched interest rate swaps with borrower	522,260	4.7	18,555	4.46	% 2.56	%
Pay fixed, matched interest rate swaps with counterparty	522,260	4.7	(18,601 )	2.56	% 4.46	%
Total asset conversion swaps	\$1,050,781	4.7	\$(281 )	3.51	% 3.53	%

**Cash Flow Hedges.** First Financial utilizes interest rate swaps designated as cash flow hedges to hedge against interest rate volatility on indexed floating rate deposits. These interest rate swaps qualify for hedge accounting and involve the receipt by First Financial of variable-rate interest amounts in exchange for fixed-rate interest payments by First Financial. As of December 31, 2014, the Company had active interest rate swaps with a notional value of \$150.0 million. Accrued interest and other liabilities included \$1.7 million at December 31, 2014, reflecting the fair value of the cash flow hedges. First Financial terminated all cash flow hedges during the second quarter 2015.

**Credit Derivatives.** In conjunction with participating interests in commercial loans, First Financial periodically enters into risk participation agreements with counterparties whereby First Financial assumes a portion of the credit exposure associated with an interest rate swap on the participated loan in exchange for a fee. Under these agreements, First Financial will make payments to the counterparty if the loan customer defaults on its obligation to perform under the interest rate swap contract with the counterparty. The total notional value of these agreements totaled \$31.0 million as of September 30, 2015 and \$26.4 million as of December 31, 2014. The fair value of these agreements were recorded on the Consolidated Balance Sheets as Accrued interest and other liabilities of \$0.1 million as of September 30, 2015 and December 31, 2014.

**Mortgage Derivatives.** First Financial enters into IRLCs and forward commitments for the future delivery of mortgage loans to third party investors, which are considered derivatives. When borrowers secure an IRLC with First Financial and the loan is intended to be sold, First Financial will enter into forward commitments for the future delivery of the loans to third party investors in order to hedge against the effect of changes in interest rates impacting IRLCs and Loans held for sale. At September 30, 2015, the notional amount of the IRLCs was \$29.0 million and the notional amount of forward commitments was \$60.3 million. The fair value of these agreements was \$0.3 million as of September 30, 2015 and was recorded on the Consolidated Balance Sheets in Accrued interest and other assets.

**NOTE 10: INCOME TAXES**

For the third quarter 2015, income tax expense was \$9.2 million, resulting in an effective tax rate of 33.0%, compared with income tax expense of \$7.2 million and an effective tax rate of 32.0% for the comparable period in 2014. For the first nine months of 2015, income tax expense was \$26.9 million, resulting in an effective tax rate of 32.8%, compared with income tax expense of \$22.3 million and an effective tax rate of 32.4% for the comparable period in 2014.

At September 30, 2015, and December 31, 2014, First Financial had no FASB ASC Topic 740-10 unrecognized tax benefits recorded. First Financial does not expect the total amount of unrecognized tax benefits to significantly increase within the next twelve months.

First Financial regularly reviews its tax positions and establishes reserves for income tax-related uncertainties based on estimates of whether it is more likely than not that the tax uncertainty would be sustained upon challenge by the appropriate tax authorities, which would then result in additional taxes, penalties and interest due. These evaluations are inherently subjective as they require material estimates and may be susceptible to significant change.

Management determined that no reserve for income tax-related uncertainties was necessary as of September 30, 2015 and December 31, 2014.

First Financial and its subsidiaries are subject to U.S. federal income tax as well as state and local income tax in several jurisdictions. The examination for the tax year 2012 was completed in the third quarter of 2015. There was no impact to the Company's financial position and results of operations as a result of this examination. Tax years prior to 2013 have been closed

Table of Contents

and are no longer subject to U.S. federal income tax examinations. Tax years 2013 and 2014 remain open to examination by the federal taxing authority.

First Financial is no longer subject to state and local income tax examinations for years prior to 2010. Tax years 2010 through 2014 remain open to state and local examination in various jurisdictions.

NOTE 11: COMMITMENTS AND CONTINGENCIES

First Financial offers a variety of financial instruments with off-balance-sheet risk to assist clients in meeting their requirements for liquidity and credit enhancement. These financial instruments include standby letters of credit and outstanding commitments to extend credit. GAAP does not require these financial instruments to be recorded in the Consolidated Financial Statements.

First Financial utilizes the same credit policies in issuing commitments and conditional obligations as it does for credit instruments recorded on the Consolidated Balance Sheets. First Financial's exposure to credit loss, in the event of nonperformance by the counterparty to the financial instrument for standby letters of credit and outstanding commitments to extend credit, is represented by the contractual amounts of those instruments. First Financial utilizes the allowance for loan and lease losses methodology to maintain a reserve that it considers sufficient to absorb probable losses inherent in standby letters of credit and outstanding loan commitments and records the reserve within Accrued interest and other liabilities on the Consolidated Balance Sheets.

Loan commitments. Loan commitments are agreements to extend credit to a client, absent any violation of conditions established in the commitment agreement. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if deemed necessary by First Financial upon extension of credit, is based on management's credit evaluation of the client. The collateral held varies, but may include securities, real estate, inventory, plant or equipment. First Financial had commitments outstanding to extend credit totaling \$1.8 billion at both September 30, 2015 and December 31, 2014.

Letters of credit. Letters of credit are conditional commitments issued by First Financial to guarantee the performance of a client to a third party. First Financial's portfolio of standby letters of credit consists primarily of performance assurances made on behalf of clients who have a contractual commitment to produce or deliver goods or services. The risk to First Financial arises from its obligation to make payment in the event of the client's contractual default to produce the contracted good or service to a third party. First Financial issued letters of credit (including standby letters of credit) aggregating \$17.0 million and \$22.8 million at September 30, 2015, and December 31, 2014, respectively. Management conducts regular reviews of these instruments on an individual client basis.

Investments in Affordable housing projects. First Financial has made investments in certain qualified affordable housing projects. These projects are an indirect federal subsidy that provide tax incentives to encourage investment in the development, acquisition and rehabilitation of affordable rental housing, and allow investors to claim tax credits and other tax benefits (such as deductions from taxable income for operating losses) on their federal income tax returns. The principal risk associated with qualified affordable housing investments is the potential for noncompliance with the tax code requirements, such as, failure to rent property to qualified tenants, resulting in unavailability or recapture of the tax credits and other tax benefits. First Financial's affordable housing commitments totaled \$23.6 million and \$14.9 million as of September 30, 2015 and December 31, 2014, respectively. The affordable housing investments resulted in \$0.4 million and \$0.3 million of tax credits for the three months ended September 30, 2015 and 2014, respectively, and \$1.1 million and \$0.8 million for the nine months ended September 30, 2015 and 2014, respectively. First Financial had no affordable housing contingent commitments as of September 30, 2015 or

December 31, 2014.

Contingencies/Litigation. First Financial and its subsidiaries are engaged in various matters of litigation, other assertions of improper or fraudulent loan practices or lending violations and other matters from time to time, and have a number of unresolved claims pending. Additionally, as part of the ordinary course of business, First Financial and its subsidiaries are parties to litigation involving claims to the ownership of funds in particular accounts, the collection of delinquent accounts, challenges to security interests in collateral and foreclosure interests that are incidental to our regular business activities. While the ultimate liability with respect to these other litigation matters and claims cannot be determined at this time, First Financial believes that damages, if any, and other amounts relating to pending matters are not probable or cannot be reasonably estimated as of September 30, 2015. Reserves are established for these various matters of litigation, when appropriate, under FASB ASC Topic 450, Contingencies, based in part upon the advice of legal counsel. First Financial had \$1.3 million and \$0.6 million of reserves related to litigation matters as of September 30, 2015 and December 31, 2014, respectively.

## NOTE 12: EMPLOYEE BENEFIT PLANS

First Financial sponsors a non-contributory defined benefit pension plan covering substantially all employees and uses a December 31 measurement date for the plan.

First Financial made no cash contributions to fund the pension plan during the nine months ended September 30, 2015 and does not expect to make cash contributions to the plan through the remainder of the year. First Financial made no cash contributions to fund the pension plan in 2014. As a result of the plan's actuarial projections for 2015, First Financial recorded income of \$0.3 million for each quarter ended September 30, 2015 and 2014. First Financial recorded income related to its pension plan of \$0.9 million for each of the nine months ended September 30, 2015 and 2014, respectively.

The following table sets forth information concerning amounts recognized in First Financial's Consolidated Statements of Income related to the Company's pension plan:

(Dollars in thousands)	Three months ended		Nine months ended	
	September 30,		September 30,	
	2015	2014	2015	2014
Service cost	\$1,175	\$1,007	\$3,525	\$3,089
Interest cost	550	551	1,650	1,791
Expected return on assets	(2,375)	(2,208)	(7,125)	(6,792)
Amortization of prior service cost	(100)	(103)	(300)	(309)
Net actuarial loss	450	405	1,350	1,368
Net periodic benefit (income) cost	\$(300)	\$(348)	\$(900)	\$(853)

## NOTE 13: EARNINGS PER COMMON SHARE

The following table sets forth the computation of basic and diluted earnings per share:

(Dollars in thousands, except per share data)	Three months ended		Nine months ended	
	September 30,		September 30,	
	2015	2014	2015	2014
<b>Numerator</b>				
Net income available to common shareholders	\$18,673	\$15,344	\$55,243	\$46,401
<b>Denominator</b>				
Basic earnings per common share - weighted average shares	61,135,749	59,403,109	61,088,794	57,907,203
Effect of dilutive securities				
Employee stock awards	715,585	576,543	643,536	594,082
Warrants	136,461	133,280	126,394	138,109
Diluted earnings per common share - adjusted weighted average shares	61,987,795	60,112,932	61,858,724	58,639,394
<b>Earnings per share available to common shareholders</b>				
Basic	\$0.31	\$0.26	\$0.90	\$0.80
Diluted	\$0.30	\$0.26	\$0.89	\$0.79

Warrants to purchase 369,377 and 465,117 shares of the Company's common stock were outstanding as of September 30, 2015 and 2014, respectively. These warrants, each representing the right to purchase one share of common stock, no par value per share, have an exercise price of \$12.12 and expire on December 23, 2018.

## Table of Contents

Stock options and warrants, where the exercise price was greater than the average market price of the common shares, were not included in the computation of net income per diluted share as they would have been antidilutive. Using the period-end price, there were no out-of-the-money options at September 30, 2015 and 378,017 out-of-the-money options at September 30, 2014.

During the second quarter of 2014, the Company received shareholder authorization to issue up to 10,000,000 preferred shares. As of September 30, 2015 and September 30, 2014, no preferred shares were issued or outstanding.

### NOTE 14: FAIR VALUE DISCLOSURES

#### Fair Value Measurement

The fair value framework as disclosed in the Fair Value Measurements and Disclosure Topic of FASB ASC Topic 825, Financial Instruments (Fair Value Topic) includes a hierarchy which focuses on prioritizing the inputs used in valuation techniques. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1), a lower priority to observable inputs other than quoted prices in active markets for identical assets and liabilities (Level 2) and the lowest priority to unobservable inputs (Level 3). When determining the fair value measurements for assets and liabilities, First Financial looks to active markets to price identical assets or liabilities whenever possible and classifies such items in Level 1. When identical assets and liabilities are not traded in active markets, First Financial looks to observable market data for similar assets and liabilities and classifies such items as Level 2. Certain assets and liabilities are not actively traded in observable markets and First Financial must use alternative techniques, based on unobservable inputs, to determine the fair value and classifies such items as Level 3. The level within the fair value hierarchy is based on the lowest level of input that is significant in the fair value measurement.

The following methods, assumptions and valuation techniques were used by First Financial to measure different financial assets and liabilities at fair value and in estimating its fair value disclosures for financial instruments.

**Cash and short-term investments.** The carrying amounts reported in the Consolidated Balance Sheets for cash and short-term investments, such as federal funds sold, approximated the fair value of those instruments. The Company classifies cash and short-term investments in Level 1 of the fair value hierarchy.

**Investment securities.** Investment securities classified as trading and available-for-sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted market prices, when available (Level 1). If quoted market prices are not available, fair values are measured utilizing independent valuation techniques of identical or similar investment securities. First Financial compiles prices from various sources who may apply such techniques as matrix pricing to determine the value of identical or similar investment securities (Level 2). Matrix pricing is a mathematical technique widely used in the banking industry to value investment securities without relying exclusively on quoted prices for the specific investment securities but rather relying on the investment securities' relationship to other benchmark quoted investment securities. Any investment securities not valued based upon the methods above are considered Level 3.

First Financial utilizes values provided by third-party pricing vendors to price the investment securities portfolio in accordance with the fair value hierarchy of the Fair Value Topic and reviews the pricing methodologies utilized by the pricing vendors to ensure that the fair value determination is consistent with the applicable accounting guidance. First Financial's month-end pricing process includes a series of quality assurance activities where prices are compared to recent market conditions, historical prices and other independent pricing services. Further, the Company periodically validates the fair values of a sample of securities in the portfolio by comparing the fair values to prices from other independent sources for the same or similar securities. First Financial analyzes unusual or significant variances, conducts additional research with the pricing vendor, and if necessary, takes appropriate action based on its findings.

The results of the quality assurance process are incorporated into the selection of pricing providers by the portfolio manager.

Loans held for sale. Loans held for sale are carried at fair value. These loans currently consist of one-to-four family residential real estate loans originated for sale to qualified third parties. Fair value is based on the market price or contractual price to be received from these third parties, which is not materially different than cost due to the short duration between origination and sale (Level 2). As such, First Financial records any fair value adjustments on a nonrecurring basis. Gains and losses on the sale of loans are recorded as net gains from sales of loans within noninterest income in the Consolidated Statements of Income.

Loans and leases. The fair value of commercial, commercial real estate, residential real estate and consumer loans were estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities or repricing frequency. The Company classifies the estimated fair value of loans as Level 3 in the fair value hierarchy.

## Table of Contents

Loans are designated as impaired when, in the judgment of management based on current information and events, it is probable that all amounts due according to the contractual terms of the loan agreement will not be collected. Impaired loans are specifically reviewed for purposes of determining the appropriate amount of impairment to be allocated to the allowance for loan and lease losses. Fair value is generally measured based on the value of the collateral securing the loans. Collateral may be in the form of real estate or business assets including equipment, inventory and accounts receivable. The vast majority of the collateral is real estate. The value of real estate collateral is determined utilizing an income or market valuation approach based on an appraisal conducted by an independent, licensed third-party appraiser (Level 3). The value of business equipment is based upon an outside appraisal if deemed significant, or the net book value on the applicable borrower financial statements if not considered significant. Likewise, values for inventory and accounts receivable collateral are based on borrower financial statement balances or aging reports on a discounted basis as appropriate (Level 3). Impaired loans allocated to the allowance for loan and lease losses are measured at fair value on a nonrecurring basis. Any fair value adjustments are recorded in the period incurred as provision for loan and lease losses on the Consolidated Statements of Income.

Fair values for purchased impaired loans are based on a discounted cash flow methodology that consider factors including the type of loan and related collateral, classification status, fixed or variable interest rate, term of loan, whether or not the loan was amortizing and a discount rate reflecting the Company's assessment of risk inherent in the cash flow estimates. These loans are grouped together according to similar characteristics and are treated in the aggregate when applying various valuation techniques. First Financial estimates the cash flows expected to be collected on these loans based upon the expected remaining life of the underlying loans, which includes the effects of estimated prepayments. These cash flow evaluations are inherently subjective as they require material estimates, all of which may be susceptible to significant change.

Fair values for acquired loans accounted for outside of FASB ASC Topic 310-30 are estimated by discounting the future cash flows using current interest rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities or repricing frequency. The carrying amount of accrued interest approximates its fair value.

The Company classifies the estimated fair value of covered loans as Level 3 in the fair value hierarchy.

FDIC indemnification asset. Fair value of the FDIC indemnification asset was estimated using projected cash flows related to the loss sharing agreements based on expected reimbursements for losses and the applicable loss sharing percentages. The expected cash flows are discounted to reflect the uncertainty of the timing and receipt of the loss sharing reimbursement from the FDIC. These cash flow evaluations are inherently subjective as they require material estimates, all of which may be susceptible to significant change. The five year period of loss protection expired for the majority of First Financial's covered commercial loans and covered OREO effective October 1, 2014. The Company classifies the estimated fair value of the indemnification asset as Level 3 in the fair value hierarchy.

Deposits. The fair value of demand deposits, savings accounts and certain money-market deposits represents the amount payable on demand at the reporting date. The carrying amounts for variable-rate CDs approximated their fair values at the reporting date. The fair value of fixed-rate CDs was estimated using a discounted cash flow calculation which applies the interest rates currently offered for deposits of similar remaining maturities. The carrying amount of accrued interest approximates its fair value. The Company classifies the estimated fair value of deposit liabilities as Level 2 in the fair value hierarchy.

Borrowings. The carrying amounts of federal funds purchased and securities sold under agreements to repurchase and other short-term borrowings approximate their fair values. The Company classifies the estimated fair value of short-term borrowings as Level 1 in the fair value hierarchy.

The fair value of long-term debt is estimated using a discounted cash flow calculation which utilizes the interest rates currently offered for borrowings of similar remaining maturities. The Company classifies the estimated fair value of long-term debt as Level 2 in the fair value hierarchy.

Derivatives. The fair values of derivative instruments are based primarily on a net present value calculation of the cash flows related to the interest rate swaps at the reporting date, using primarily observable market inputs such as interest rate yield curves. The discounted net present value calculated represents the cost to terminate the swap if First Financial should choose to do so. Additionally, First Financial utilizes a vendor-developed, proprietary model to value the credit risk component of both the derivative assets and liabilities. The credit valuation adjustment is recorded as an adjustment to the fair value of the derivative asset or liability on the reporting date. Derivative instruments are classified as Level 2 in the fair value hierarchy.

Table of Contents

The estimated fair values of First Financial's financial instruments not measured at fair value on a recurring or nonrecurring basis in the consolidated financial statements were as follows:

(Dollars in thousands)	Carrying value	Estimated fair value Total	Level 1	Level 2	Level 3
September 30, 2015					
Financial assets					
Cash and short-term investments	\$ 136,489	\$ 136,489	\$ 136,489	\$ 0	\$ 0

December 31, 2014				
Assets				
Derivatives	\$0	\$11,399	\$0	\$11,399
Investment securities available-for-sale	8,406	832,062	0	840,468
Total	\$8,406	\$843,461	\$0	\$851,867
Liabilities				
Derivatives	\$0	\$13,662	\$0	\$13,662

Certain financial assets and liabilities are measured at fair value on a nonrecurring basis. Adjustments to the fair market value of these assets usually result from the application of lower of cost or fair value accounting or write-downs of individual assets. The following table summarizes financial assets and liabilities measured at fair value on a nonrecurring basis.

(Dollars in thousands)	Fair value measurements using		
	Level 1	Level 2	Level 3
September 30, 2015			
Assets			
Impaired loans <sup>(1)</sup>	\$0	\$0	\$8,456
OREO	0	0	9,996
(Dollars in thousands)	Fair value measurements using		
	Level 1	Level 2	Level 3
December 31, 2014			
Assets			
Impaired loans <sup>(1)</sup>	\$0	\$0	\$14,096
OREO	0	0	13,094

(1) Amounts represent the fair value of collateral for impaired loans allocated to the allowance for loan and lease losses. Fair values are determined using actual market prices (Level 1), observable market data for similar assets and liabilities (Level 2), and independent third party valuations and borrower records, discounted as appropriate (Level 3).

Table of Contents

## NOTE 15: BUSINESS COMBINATIONS

First Financial completed the acquisition of Oak Street during the third quarter of 2015 and Oak Street became a wholly-owned subsidiary of First Financial Bank. Oak Street, a nationwide lender based in Indianapolis, Indiana, was formed in 2003 to provide loans, secured by commissions and cash collateral accounts, exclusively to insurance agents and brokers to maximize their book-of-business value and grow their agency business. First Financial acquired Oak Street for \$110.0 million in cash and, concurrent with the close of the transaction, paid off \$197.8 million of existing long-term debt on behalf of Oak Street. The Company recorded \$2.6 million of noninterest expenses related to the acquisition of Oak Street during the third quarter 2015.

The Oak Street transaction was accounted for using the acquisition method of accounting and accordingly, assets acquired, liabilities assumed and consideration exchanged were recorded at estimated fair value on the acquisition date, in accordance with FASB ASC Topic 805, Business Combinations. The fair value measurements of assets acquired and liabilities assumed are subject to refinement for up to one year after the closing date of the acquisition as additional information relative to closing date fair values become available. The Company continues to finalize the fair values of loans and intangible assets and liabilities. As a result, the fair value adjustments are preliminary and may change as information becomes available, but no later than August 2016.

The following table provides the purchase price calculation as of the acquisition date and the identifiable assets purchased and the liabilities assumed at their estimated fair value:

(Dollars in thousands)	Oak Street
Purchase consideration	
Cash consideration	\$110,000
Payoff of long-term borrowings	197,839
Total purchase consideration	\$307,839
Assets acquired	
Cash	\$2,248
Loans	238,029
Intangible assets	268
Other assets	2,633
Total assets	\$243,178
Liabilities assumed	
Other liabilities	\$1,615
Total liabilities	\$1,615
Net identifiable assets	\$241,563
Goodwill	\$66,276

The goodwill arising from the Oak Street acquisition reflects the business's high growth potential and scalable platform. The acquisition leverages First Financial's excess capital and is expected to provide additional revenue growth and diversification. The goodwill is not deductible for income tax purposes as the merger was accounted for as a tax-free exchange. The tax-free exchange resulted in a carryover of tax attributes and tax basis to the Company's subsequent income tax filings and was adjusted for any fair value adjustments required in accounting for the acquisitions. For further detail, see Note 6 – Goodwill and Other Intangible Assets.

Table of Contents

ITEM 2 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL  
CONDITION AND RESULTS OF OPERATIONS (MD&A)  
FIRST FINANCIAL BANCORP. AND SUBSIDIARIES  
(Unaudited)

Effective October 1, 2014, the five-year loss sharing coverage period for non-single family assets expired and the majority of the Company's covered assets were no longer subject to FDIC loss sharing protection. As a result of this expiration, and the insignificant balance of assets that remain subject to FDIC loss sharing protection through October 1, 2019 relative to the Company's total assets, all covered loans and the related allowance for loan and lease losses, as well as provision for covered loan and lease losses, have been reclassified in the Consolidated Financial Statements, and all credit quality metrics have been updated to include covered and formerly covered assets. The proportionate share (generally 80%) of credit losses and resolution expenses on covered assets expected to be reimbursed by the FDIC and recorded as FDIC loss sharing income in the Company's Consolidated Statements of Income during those prior periods are not reflected in these credit quality ratios.

All other reclassifications of prior period amounts, if applicable, have also been made to conform to the current period's presentation and had no effect on the Company's previously reported net income or financial condition.

SUMMARY

First Financial is a \$7.9 billion bank holding company headquartered in Cincinnati, Ohio. First Financial, through its subsidiaries, operates primarily in Ohio, Indiana and Kentucky. These subsidiaries include a commercial bank, First Financial Bank, with 106 banking centers and 131 ATMs. First Financial provides banking and financial services products through its four lines of business: commercial, consumer, wealth management and mortgage. The commercial, consumer and mortgage business lines provide credit-based products, deposit accounts, retail brokerage, corporate cash management support and other services to commercial and consumer clients. First Financial Wealth Management provides wealth planning, portfolio management, trust and retirement plan services and had approximately \$2.3 billion in assets under management as of September 30, 2015. First Financial has two national specialty lending platforms, one that provides equipment and leasehold improvement financing for franchisees in the quick service and casual dining restaurant sector and another that provides loans secured by commissions and cash collateral accounts exclusively to insurance agents and brokers.

First Financial acquired the banking operations of Peoples Community Bank, and Irwin Union Bank and Trust Company and Irwin Union Bank, F.S.B., through FDIC-assisted transactions in 2009. In connection with these FDIC-assisted transactions, First Financial entered into loss sharing agreements with the FDIC. Under the terms of these agreements the FDIC reimburses First Financial for a percentage of losses with respect to certain loans (covered loans) and other real estate owned (covered OREO) (collectively, covered assets). These agreements provide for loss protection on covered single-family, residential loans for a period of ten years and First Financial is required to share any recoveries of previously charged-off amounts for the same time period, on the same pro-rata basis with the FDIC. All other covered loans were provided loss protection for a period of five years and recoveries of previously charged-off amounts must be shared with the FDIC for an additional three year period, on the same pro-rata basis. The Company's five year loss sharing indemnification period related to non-single-family loans expired effective October 1, 2014. The loss sharing protection related to all other covered loans of approximately \$117.6 million will expire October 1, 2019. Covered assets represented approximately 1.5% of First Financial's total assets at September 30, 2015.

MARKET STRATEGY AND BUSINESS COMBINATIONS

Oak Street. First Financial completed the acquisition of Oak Street during the third quarter of 2015 and Oak Street became a wholly-owned subsidiary of First Financial Bank. Oak Street, a nationwide lender based in Indianapolis, Indiana, was formed in 2003 to provide loans, secured by commissions and cash collateral accounts, exclusively to insurance agents and brokers to maximize their book-of-business value and grow their agency business. First Financial acquired Oak Street for \$110.0 million in cash and, concurrent with the close of the transaction, paid off \$197.8 million of existing long-term borrowings on behalf of Oak Street. The Company recorded \$2.6 million of noninterest expenses related to the acquisition of Oak Street during the third quarter 2015.

Oak Street utilizes deep industry knowledge, a proprietary technology platform and partner relationships to offer commission-based commercial financing for insurance professionals and third-party loan servicing for financial institutions nationwide. Oak Street's well-developed business model provides a strong strategic complement to First Financial's existing nationwide franchise finance business and an opportunity to expand and diversify the Company's service offerings.

Table of Contents

The following table provides a summary of the purchase consideration, assets acquired and liabilities assumed, at their estimated fair value, and the resulting goodwill from the Oak Street acquisition. For further detail on the Oak Street acquisition, see Note 15 - Business Combinations in the Notes to the Consolidated Financial Statements.

(Dollars in thousands)	Oak Street
Purchase consideration	
Cash consideration	\$ 110,000
Payoff of long-term borrowings	197,839
Total purchase consideration	\$307,839
Assets acquired	
Cash	\$2,248
Loans	238,029
Intangible assets	268
Other assets	2,633
Total assets	\$243,178
Liabilities assumed	
Other liabilities	\$1,615
Total liabilities	\$1,615
Net identifiable assets	\$241,563
Goodwill	\$66,276

## OVERVIEW OF OPERATIONS

Third quarter 2015 net income was \$18.7 million and earnings per diluted common share were \$0.30. This compares with third quarter 2014 net income of \$15.3 million and earnings per diluted common share of \$0.26. For the nine months ended September 30, 2015, net income was \$55.2 million, and earnings per diluted common share were \$0.89. This compares with net income of \$46.4 million and earnings per diluted common share of \$0.79 for the first nine months of 2014.

Return on average assets for the third quarter 2015 was 0.97% compared to 0.88% for the comparable period in 2014 and return on average shareholders' equity for the third quarter 2015 was 9.12% compared to 8.16% for the third quarter 2014. Return on average assets for the nine months ended September 30, 2015 was 1.00% compared to 0.94% for the same period in 2014. Return on average shareholders' equity was 9.23% and 8.75% for the first nine months of 2015 and 2014, respectively.

A discussion of First Financial's results of operations for the three months and nine months ended September 30, 2015 follows.

## NET INTEREST INCOME

Net interest income, First Financial's principal source of income, is the excess of interest received from earning assets, including loan-related fees, over interest paid on interest-bearing liabilities. The amount of net interest income is determined by the volume and mix of earning assets, the rates earned on such earning assets and the volume, mix and rates paid for the deposits and borrowed money that support the earning assets.

For analytical purposes, net interest income is also presented in the table that follows, adjusted to a tax equivalent basis assuming a 35% marginal tax rate for interest earned on tax-exempt assets such as municipal loans and investments. This is to recognize the income tax savings that facilitates a comparison between taxable and tax-exempt assets. Management believes that it is a standard practice in the banking industry to present net interest margin and net interest income on a fully tax equivalent basis as these measures provide useful information to make peer comparisons.

Table of Contents

(Dollars in thousands)	Three months ended		Nine months ended		
	September 30,		September 30,		
	2015	2014	2015	2014	
Net interest income	\$63,159	\$58,363	\$180,419	\$167,486	
Tax equivalent adjustment	1,000	818	2,971	2,278	
Net interest income - tax equivalent	\$64,159	\$59,181	\$183,390	\$169,764	
Average earning assets	\$6,938,107	\$6,326,315	\$6,711,900	\$6,011,310	
Net interest margin <sup>(1)</sup>	3.61	% 3.66	% 3.59	% 3.73	%
Net interest margin (fully tax equivalent) <sup>(1)</sup>	3.67	% 3.71	% 3.65	% 3.78	%

<sup>(1)</sup> Margins are calculated using annualized net interest income divided by average earning assets.

Net interest income for the third quarter 2015 was \$63.2 million, increasing \$4.8 million or 8.2% from third quarter 2014 net interest income of \$58.4 million. Net interest income on a fully tax-equivalent basis for the third quarter 2015 was \$64.2 million compared to \$59.2 million for the third quarter 2014. Net interest margin on a fully tax equivalent basis was 3.67% for the third quarter 2015 compared to 3.71% for the third quarter 2014. The increase in net interest income for the third quarter 2015 as compared to the same period in 2014 was primarily driven by higher earning asset balances, partially offset by lower yields as a result of the prolonged low interest rate environment. The decline in net interest margin was primarily related to changes in the composition of the Company's earning assets, including the continued decline in the high-yielding covered loan portfolio, as well as lower yields on recent loan originations resulting from the combination of the low interest rate environment and the volume of variable rate loan originations which have a lower initial yield than comparable fixed rate loans.

The increase in net interest income for the third quarter 2015, as compared to the third quarter 2014, was driven by a \$5.3 million or 8.3% increase in total interest income to \$68.7 million in the third quarter of 2015 from \$63.4 million in the third quarter 2014. Partially offsetting the increase in interest income was a corresponding increase in interest expense of \$0.5 million, or 9.7%, to \$5.5 million in the third quarter 2015 from \$5.0 million in the third quarter 2014.

The rise in total interest income resulted from an increase in interest and fee income earned on the Company's loan portfolio. This was primarily a result of strong organic loan growth in recent periods as well as the impact from the addition of \$238.0 million of high-yielding loans acquired in the Oak Street transaction, partially offset by continued paydowns and resolutions in the Company's high-yielding covered loan portfolio and lower new origination loan yields. Average loan balances increased \$629.3 million or 14.3% in the third quarter 2015 as compared to the third quarter 2014, however, new loan originations continue to be recorded at yields lower than the yields on loans that pay-off or mature during the period, muting the impact of higher loan balances on interest income and net interest margin.

Interest expense increased as the average balance of interest-bearing deposits increased \$574.6 million or 14.2%, from the third quarter 2014 due to the Company's deposit generation efforts in recent quarters. Additionally, the cost of funds related to these deposits increased 1 bp to 42 bps for the third quarter 2015 from 41 bps for the comparable quarter in 2014, negatively impacting net interest margin. Partially offsetting the increase in interest expense on deposits was a decrease in interest expense on long-term borrowings. The decrease in interest expense on long-term borrowings was primarily attributable to a decline in the yield on long-term borrowings of 144 bps to 1.56% for the third quarter 2015 from 3.00% in the third quarter 2014, due to the accelerated recognition of a valuation adjustment resulting from the prepayment of previously acquired FHLB advances, which was partially offset by additional interest expense resulting from the issuance of \$120.0 million of subordinated notes during the period.

For the nine month period ended September 30, 2015, net interest income was \$180.4 million, an increase of \$12.9 million from net interest income of \$167.5 million for the comparable period in 2014. Net interest income on a fully-tax equivalent basis for the nine month period ended September 30, 2015 was \$183.4 million as compared to \$169.8 million for the comparable period in 2014. Similar to the quarterly year-over-year items discussed above, the increase was primarily driven by higher earning asset balances, partially offset by lower yields as a result of the prolonged low interest rate environment. The decline in net interest margin was primarily related to changes in the composition of the Company's earning assets, including the continued decline in the high-yielding covered loan portfolio, as well as lower yields on recent loan originations. Higher interest income was partially offset by a \$2.5 million, or 18.3% increase in interest expense during the nine months ended September 30, 2015 as compared to the nine months ended September 30, 2014. The increase in interest expense for the nine

Table of Contents

month period ended September 30, 2015 was primarily related to an increase in average interest-bearing deposits of \$618.0 million, or 16.0% when compared to the similar period in 2014, as well as an increase in the cost of funds related to those deposits of 4 bps from 39 bps in 2014 to 43 bps in 2015.

## CONSOLIDATED AVERAGE BALANCE SHEETS AND NET INTEREST INCOME ANALYSIS

(1) Loans held for sale, nonaccrual loans, covered loans and indemnification asset are included in gross loans.

## NONINTEREST INCOME

Third quarter 2015 noninterest income was \$20.4 million, representing a \$3.8 million or 23.3% increase from noninterest income of \$16.5 million in the third quarter 2014. The increase in noninterest income from the comparable quarter in 2014 was due primarily to a \$3.0 million increase in accelerated discount on covered loans, a \$1.4 million increase in other noninterest income and a \$0.4 million net gain on sale of investment securities, partially offset by a \$0.8 million decrease in FDIC loss sharing income.

Income from the accelerated discount on covered loans increased \$3.0 million from \$0.8 million during the third quarter 2014 to \$3.8 million for the third quarter 2015. Accelerated discounts on covered loans that prepay result from the accelerated recognition of the remaining covered loan discount that would have been recognized over the expected life of the loan had it not prepaid. Higher income from the accelerated discount on covered loans during the third quarter 2015 was related to the expiration of loss sharing coverage on non-single-family assets on October 1, 2014 as well as elevated levels of prepayment activity during the quarter. Due to the expiration of the loss sharing coverage on non-single family assets, the Company no longer recognizes a proportionate share of accelerated discount as relief to the FDIC indemnification asset for prepayment activity on non-single-family assets. The increase in noninterest income related to the increase in accelerated discount was partially offset by a related \$1.5 million increase in provision expense during the period.

Other noninterest income was impacted by a \$1.0 million increase in swap fee income compared to the third quarter 2014, as increases in variable rate lending led to strong customer demand for interest rate swaps. The increase in gain on sale of investment securities was primarily related to sales of agency mortgage-backed securities during the third quarter 2015 in an effort to rebalance the mix and duration of certain investments in the portfolio.

FDIC loss sharing income represents the proportionate share of credit losses on covered assets that First Financial expects to receive from the FDIC. FDIC loss sharing income decreased \$0.8 million or 406.8% from negative loss sharing income of \$0.2 million during the third quarter 2014 to \$1.0 million of negative loss sharing income for the third quarter 2015. Negative FDIC loss sharing income during the third quarter 2015 reflects a net payable due to the FDIC.

Noninterest income for the nine months ended September 30, 2015 was \$59.4 million, which represents a \$12.4 million or 26.3% increase from noninterest income of \$47.0 million for the first nine months of 2014. The increase in noninterest income from the comparable period in 2014 was due primarily to a \$7.6 million increase in the accelerated discount on covered loans, a \$2.4 million increase in net gains from sales of loans, a \$4.4 million increase in other noninterest income and a \$1.5 million increase in gain on sale of investment securities, partially offset by a \$2.7 million decline in FDIC loss sharing income.

## Table of Contents

Similar to the quarterly year-over-year items previously discussed, the increase in accelerated discount on covered loans was driven by elevated levels of prepayment activity and the expiration of non-single family loss sharing agreements. Increases in net gains on sales of loans was a product of higher sales volume during 2015 due to strong demand and the impact from the Columbus acquisitions during the third quarter 2014. The increase in other noninterest income was driven by \$1.3 million of distributions received from SBICs during the period, as well as a \$2.3 million increase in swap fee income as customer swap demand increased with higher levels of variable rate loan originations. FDIC loss sharing income was impacted by the expiration of non-single family loss sharing agreements.

### NONINTEREST EXPENSE

Third quarter 2015 noninterest expense was \$53.0 million compared with \$51.4 million for the third quarter of 2014. The \$1.6 million increase from the comparable quarter in 2014 was primarily attributable to a \$2.5 million increase in professional services, a \$1.8 million increase in other noninterest expense and a \$0.8 million increase in losses on OREO. These increases were partially offset by a \$1.8 million decline in data processing expenses, a \$0.9 million decline in salaries and employee benefits and a \$0.4 million decline in loss sharing expense.

The increase in professional services was primarily related to the Oak Street acquisition which contributed \$2.2 million of additional expenses. The increase in other noninterest expense was driven by a \$0.9 million prepayment fee related to the extinguishment of FHLB debt and \$0.7 million of reserve adjustments for litigation related items which were resolved during the third quarter of 2015. The Company recorded losses on OREO of \$0.2 million during the third quarter 2015 compared to gains of \$0.6 million in the third quarter of 2014.

Data processing expenses declined \$1.8 million in the third quarter 2015 compared to the same period in 2014 primarily due to expenses related to the Columbus acquisitions in the third quarter of 2014. Salaries and employee benefits decreased from the comparable quarter, which was primarily attributable to lower health care costs in the third quarter 2015 and expenses related to the Columbus acquisitions in the third quarter of 2014. Additionally, the decrease in loss sharing expense in the third quarter of 2015 was due to lower collection costs resulting from the decline in covered asset balances.

Noninterest expense for the nine months ended September 30, 2015 was \$149.8 million compared with \$146.4 million for the nine months ended September 30, 2014. The \$3.5 million or 2.4% increase from the comparable period in 2014 was primarily attributable to a \$2.6 million increase in salaries and benefits expense, a \$3.0 million increase in professional services and a \$2.4 million increase in other noninterest expense. The increase in salaries and benefits was primarily due to the Columbus acquisitions and annual salary adjustments, while the increase in professional services was primarily due to the Oak Street acquisition. A prepayment fee on extinguished FHLB debt and higher marketing research related expenses contributed to the increase in other noninterest expense during the first nine months of 2015. These increases were partially offset by a decrease in loss sharing expense of \$2.6 million due to lower collection costs resulting from the decline in covered asset balances and a \$2.0 million decrease in data processing expenses as a result of increased expenses in 2014 due to the Columbus acquisitions.

### INCOME TAXES

Income tax expense was \$9.2 million and \$7.2 million for the third quarter of 2015 and 2014, respectively. The effective tax rate for the third quarter 2015 and 2014 was 33.0% and 32.0%, respectively. Income tax expense for the nine months ended September 30, 2015 and 2014 was \$26.9 million and \$22.3 million, respectively. The year-to-date effective tax rate through September 30, 2015 was 32.8% compared to 32.4% for the comparable period in 2014.

The increase in the effective tax rate for the third quarter 2015, as compared to the same period in 2014, was primarily the result of nondeductible acquisition related expenses during the period. The slight increase in the year-to-date

effective tax rate was primarily the result of an increase in nondeductible acquisition related expenses, partially offset by an increase in tax-exempt income in 2015.

While the Company's effective tax rate may fluctuate from quarter to quarter due to tax jurisdiction changes and the level of tax-enhanced assets, the overall effective tax rate for 2015 is expected to be approximately 32.0% - 34.0%.

## Table of Contents

### LOANS

First Financial continues to experience strong loan demand in 2015 as a result of the Company's sales efforts, expanded presence in key metropolitan markets and investments in a diversified product suite. Loans, excluding loans held for sale, totaled \$5.2 billion as of September 30, 2015, increasing \$438.8 million, or 9.2%, compared to December 31, 2014. The increase in loan balances from December 31, 2014 was primarily related to a \$322.4 million increase in commercial loans and a \$78.7 million increase in construction real estate loans. The increase in commercial loans was attributable to the Oak Street acquisition, as well as strong organic growth during the period. Construction real estate originations were particularly strong for the first nine months of 2015 as high-quality development needs resulted in \$315.8 million of new commitments during the period, of which \$222.7 million had yet to fund as of September 30, 2015.

Third quarter 2015 average loans, excluding loans held for sale, increased \$629.3 million or 14.3% from the third quarter of 2014. The increase in average loans, excluding loans held for sale, was primarily the result of a \$242.9 million increase in commercial loans, a \$237.9 million increase in commercial real estate loans, a \$105.5 million increase in construction real estate loans, a \$25.0 million increase in residential real estate loans and a \$17.5 million increase in home equity loans. Increases in average loan balances were attributable to strong organic loan growth as well as the Oak Street and Columbus acquisitions.

Covered loans declined to \$117.6 million at September 30, 2015 from \$135.7 million as of December 31, 2014. Declines in covered loan balances were expected as there were no acquisitions of loans subject to loss sharing agreements during the period. The ten year period of loss protection on all remaining covered loans and covered OREO expire October 1, 2019. The covered loan portfolio will continue to decline through payoffs, loan sales, charge-offs and termination or expiration of loss sharing coverage unless First Financial acquires additional loans subject to loss sharing agreements in the future.

### ASSET QUALITY

Nonperforming assets consist of nonaccrual loans, accruing TDRs (collectively, nonperforming loans) and OREO. Loans are classified as nonaccrual when, in the opinion of management, collection of principal or interest is doubtful or when principal or interest payments are 90 days or more past due. Generally, loans are classified as nonaccrual due to the continued failure to adhere to contractual payment terms by the borrower coupled with other pertinent factors, such as insufficient collateral value. The accrual of interest income is discontinued and previously accrued but unpaid interest is reversed when a loan is classified as nonaccrual.

Loans accounted for under FASB ASC Topic 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality, are referred to as purchased impaired loans. Purchased impaired loans were grouped into pools for purposes of periodically re-estimating expected cash flows and recognizing impairment or improvement in the loan pools. Accordingly, purchased impaired loans are classified as performing, even though they may be contractually past due, as any nonpayment of contractual principal or interest is considered in the periodic re-estimation of expected cash flows and is included in the resulting recognition of current period provision for loan and lease losses or prospective yield adjustments.

As a result of the Company's strong resolution efforts, nonperforming assets decreased \$15.9 million, or 18.3%, to \$71.1 million at September 30, 2015 from \$87.1 million as of December 31, 2014, due to an \$8.5 million, or 13.1%, decline in nonperforming loans and a \$7.5 million, or 33.0%, decline in OREO balances during the period.

Nonperforming loans declined during the first nine months of 2015, as commercial real estate loans on nonaccrual decreased \$10.5 million, or 37.9%, nonaccrual residential real estate loans decreased \$2.3 million, or 31.8% and

covered/formerly covered loans on nonaccrual decreased \$0.7 million, or 17.2%. These decreases were partially offset by a \$1.4 million, or 23.6% increase in nonaccrual commercial loans and a \$4.3 million, or 27.0% increase in accruing TDRs as of September 30, 2015, which was primarily related to a single commercial real estate relationship restructured during the period.

OREO represents properties acquired by First Financial primarily through loan defaults by borrowers. OREO balances declined during the first nine months of 2015 as resolutions and valuation adjustments of \$13.4 million exceeded additions of \$6.0 million.

Loans are classified as TDRs when borrowers are experiencing financial difficulties and concessions are made by the Company that would not otherwise be considered for a borrower with similar credit characteristics. TDRs are generally classified as nonaccrual for a minimum period of six months and may qualify for return to accrual status once they have demonstrated performance with the restructured terms of the loan agreement. TDRs totaled \$33.8 million at September 30, 2015, which was

Table of Contents

a \$5.6 million, or 19.9% increase from \$28.2 million at December 31, 2014. This increase is primarily related to the restructuring of a \$4.4 million commercial real estate relationship that was already classified as nonaccrual in 2015.

Classified assets, which are defined by the Company as nonperforming assets plus performing loans internally rated substandard or worse, totaled \$130.1 million as of September 30, 2015 compared to \$154.8 million at December 31, 2014. Loans 30-to-89 days past due decreased to \$8.0 million, or 0.15% of period end loans at September 30, 2015, as compared to \$18.2 million, or 0.38%, at December 31, 2014. The declines in nonperforming, classified and delinquent assets during 2015 reflect the Company's disciplined underwriting approach, ongoing resolution efforts and a stable credit outlook.

The table that follows shows the categories that are included in nonperforming and underperforming assets, as well as related credit quality ratios as of September 30, 2015 and the four previous quarters.

(Dollars in thousands)	Quarter ended				2014 Dec. 31,	2014 Sep. 30

## Table of Contents

### INVESTMENTS

First Financial's investment portfolio totaled \$1.9 billion or 23.8% of total assets at September 30, 2015 compared with a balance of \$1.8 billion or 24.4% of total assets at December 31, 2014. Securities available-for-sale at September 30, 2015 totaled \$1.1 billion, compared with a balance of \$840.5 million at December 31, 2014, while held-to-maturity securities totaled \$756.0 million at September 30, 2015 compared to \$868.0 million at December 31, 2014.

The investment portfolio increased \$118.0 million, or 6.7%, during the first nine months of 2015 as \$384.9 million of purchases were offset by \$67.1 million in sales and \$200.9 million in principal runoff, amortization and other portfolio reductions. The overall duration of the investment portfolio decreased to 3.2 years as of September 30, 2015 from 3.4 years as of December 31, 2014, as the Company implemented investment strategies in preparation for a rising interest rate environment.

The Company invests in certain securities whose realization is dependent on future principal and interest repayments and thus carries credit risk. As in past quarters, First Financial has avoided adding to its portfolio any particular securities that would materially increase credit risk or geographic concentration risk and First Financial continuously monitors and considers these risks in its evaluation of market opportunities that would enhance the overall performance of the portfolio.

First Financial recorded a \$1.8 million unrealized after-tax gain on the investment portfolio at September 30, 2015, as a component of equity in accumulated other comprehensive income. The total unrealized gain on the investment portfolio increased \$4.3 million from a \$2.5 million after-tax unrealized loss at December 31, 2014 due to favorable movements in interest rates during 2015.

First Financial will continue to monitor loan and deposit demand, as well as balance sheet, capital sensitivity and the interest rate environment as it manages investment strategies in future periods.

### DEPOSITS AND FUNDING

Total deposits as of September 30, 2015 were \$6.1 billion, representing an increase of \$425.7 million or 7.5% compared to December 31, 2014, as total interest-bearing deposits increased \$380.3 million or 8.7% and total noninterest-bearing deposits increased \$45.4 million or 3.5%.

Non-time deposit balances totaled \$4.6 billion as of September 30, 2015, increasing \$240.8 million, or 5.5%, compared to December 31, 2014, while time deposit balances increased \$184.9 million, or 14.7%.

Year-to-date average deposits increased \$739.5 million, or 14.2%, to \$6.0 billion at September 30, 2015 from September 30, 2014 due to a \$246.2 million increase in average time deposit balances, a \$232.9 million increase in average savings deposits and a \$164.8 million increase in average noninterest-bearing deposits. The increase in average time deposits was impacted by a \$211.5 million increase in brokered CDs that First Financial originated in conjunction with the Oak Street acquisition during the third quarter of 2015. The year-over-year growth in average deposits was due to the Columbus acquisitions as well as strong organic deposit generation during the period.

From time to time, First Financial executes interest rate swaps to manage interest rate volatility on market-priced or indexed floating rate deposit products. First Financial considers these interest rate swaps in conjunction with other strategic balance sheet and interest rate risk objectives, and as a result terminated all active cash flow hedges during the second quarter 2015. First Financial had interest rate swaps with a total notional value of \$150.0 million as of December 31, 2014.

Borrowed funds increased to \$883.0 million at September 30, 2015 from \$709.6 million at December 31, 2014. During the third quarter of 2015, First Financial issued \$120.0 million of subordinated notes. The subordinated notes have a fixed interest rate of 5.125% payable semiannually and mature on August 25, 2025. These notes are not redeemable by the Company or callable by the holders of the notes prior to maturity. The subordinated notes will be treated as Tier 2 capital for regulatory capital purposes and are included in Long-term debt on the Consolidated Balance Sheets.

## LIQUIDITY

Liquidity management is the process by which First Financial manages the continuing flow of funds necessary to meet its financial commitments on a timely basis and at a reasonable cost. These funding commitments include withdrawals by depositors, credit commitments to borrowers, shareholder dividends, share repurchases, operating expenses and capital expenditures. Liquidity is derived primarily from deposit growth, principal and interest payments on loans and investment securities, maturing loans and investment securities, access to wholesale funding sources and collateralized borrowings.

## Table of Contents

First Financial's most stable source of liability-funded liquidity for both long and short-term needs is deposit growth and retention of the core deposit base. In addition to core deposit funding, First Financial also utilizes a variety of other short and long-term funding sources, which include subordinated notes, longer-term advances from the FHLB and its short-term line of credit. As of September 30, 2015, outstanding subordinated debt totaled \$118.3 million, which included prepaid debt issuance costs of \$1.7 million. Long-term debt also included FHLB long-term advances of \$0.5 million and \$22.5 million as of September 30, 2015 and December 31, 2014, respectively. First Financial's total remaining borrowing capacity from the FHLB was \$440.0 million at September 30, 2015. For ease of borrowing execution, First Financial utilizes a blanket collateral agreement with the FHLB. First Financial pledged certain eligible residential and farm real estate loans, home equity lines of credit and government and agency securities totaling \$3.2 billion as collateral for borrowings from the FHLB as of September 30, 2015.

First Financial maintains a short-term credit facility with an unaffiliated bank for \$15.0 million that matures on May 30, 2016. This facility can have a variable or fixed interest rate and provides First Financial additional liquidity, if needed, for various corporate activities, including the repurchase of First Financial shares and the payment of dividends to shareholders. As of September 30, 2015, there was no outstanding balance. The credit agreement requires First Financial to comply with certain covenants including those related to asset quality and capital levels, and First Financial was in compliance with all covenants associated with this line of credit as of September 30, 2015.

First Financial's principal source of asset-funded liquidity is marketable investment securities, particularly those of shorter maturities. The market value of investment securities classified as available-for-sale totaled \$1.1 billion at September 30, 2015. Securities classified as held-to-maturity that are maturing within a short period of time are an additional source of liquidity and totaled \$4.5 million at September 30, 2015. Other types of assets such as cash and due from banks, interest-bearing deposits with other banks and loans maturing within one year, are also sources of liquidity.

At September 30, 2015, in addition to liquidity on hand of \$136.5 million, First Financial had unused and available overnight wholesale funding of \$1.7 billion, or 21.3% of total assets, to fund loan and deposit activities, as well as general corporate requirements.

Certain restrictions exist regarding the ability of First Financial's subsidiary, First Financial Bank, to transfer funds to First Financial in the form of cash dividends, loans, other assets or advances. The approval of the Bank's primary federal regulator is required to pay dividends in excess of regulatory limitations. Dividends paid to First Financial from the Bank totaled \$17.3 million for the first nine months of 2015. As of September 30, 2015, First Financial Bank had retained earnings of \$426.6 million of which \$78.4 million was available for distribution to First Financial without prior regulatory approval. Additionally, First Financial had \$113.6 million in cash at the parent company as of September 30, 2015, which is approximately two times the Company's annual regular shareholder dividend and operating expenses.

Under a previously announced share repurchase plan, First Financial repurchased 148,935 shares of the Company's common stock for \$2.8 million during the first nine months of 2015 and purchased 40,255 shares of the Company's common stock for \$0.7 million during same period in 2014.

Capital expenditures, such as banking center expansions and technology investments were \$6.4 million and \$7.6 million for the first nine months of 2015 and 2014, respectively. Management believes that First Financial has sufficient liquidity to fund its future capital expenditure commitments.

Management is not aware of any other events or regulatory requirements that, if implemented, are likely to have a material effect on First Financial's liquidity.

## CAPITAL

Risk-Based Capital. In 2013, the Board of Governors of the Federal Reserve System approved a final rule implementing changes intended to strengthen the regulatory capital framework for all banking organizations (Basel III) which became effective January 1, 2015, subject to a phase-in period for certain provisions. Basel III establishes and defines quantitative measures to ensure capital adequacy which require First Financial to maintain minimum amounts and ratios of Common Equity tier 1 capital, total and tier 1 capital to risk-weighted assets and tier 1 capital to average assets (leverage ratio) as set forth in the table below.

The rule includes a new minimum ratio of common equity tier 1 capital to risk-weighted assets of 4.5% and a capital conservation buffer of 2.5% of risk-weighted assets that will begin on January 1, 2016 at 0.625% and be phased in over a four-

Table of Contents

year period, increasing by the same amount on each subsequent January 1, until fully phased-in on January 1, 2019. Further, the minimum ratio of tier 1 capital to risk-weighted assets increased from 4.0% to 6.0% and all banks are now subject to a 4.0% minimum leverage ratio. The required total risk-based capital ratio was unchanged. Failure to maintain the required common equity tier 1 capital conservation buffer will result in potential restrictions on a bank's ability to pay dividends, repurchase stock and/or pay discretionary compensation to its employees.

Management believes, as of September 30, 2015, that First Financial met all capital adequacy requirements to which it was subject. At September 30, 2015, and December 31, 2014, regulatory notifications categorized First Financial as "well-capitalized" under the regulatory framework for prompt corrective action. There have been no conditions or events since those notifications that management believes has changed the Company's categorization.

Consolidated regulatory capital ratios at September 30, 2015, included the leverage ratio of 8.58%, common equity tier 1 capital ratio of 10.51%, tier 1 capital ratio of 10.52% and total capital ratio of 13.37%. All regulatory capital ratios exceeded the amounts necessary to be classified as "well capitalized," and total regulatory capital exceeded the "minimum" requirement by \$326.1 million on a consolidated basis.

The revised capital requirements also provide strict eligibility criteria for regulatory capital instruments and change the method for calculating risk-weighted assets in an effort to better identify riskier assets, such as highly volatile commercial real estate and nonaccrual loans, requiring higher capital allocations. First Financial's tier 1 and total capital ratios decreased from 12.69% and 13.71%, respectively, as of December 31, 2014 to 10.52% and 13.37% as of September 30, 2015. The decline in the tier 1 capital ratio was due primarily to an increase in risk-weighted assets resulting from the Oak Street acquisition, organic loan growth and the previously mentioned changes in the calculation of risk-weighted assets, as well as a reduction in tier 1 capital due to the addition of goodwill from the Oak Street acquisition. The total capital ratio was positively impacted by the issuance of subordinated notes during the third quarter, which qualify as tier 2 capital and offset the increase to risk-weighted assets during the period. The leverage ratio declined to 8.58% at September 30, 2015 compared to 9.44% as of December 31, 2014 and the Company's tangible common equity ratio decreased from 9.02% at December 31, 2014 to 7.84% during the current quarter primarily due to the increase in goodwill associated with the acquisition of Oak Street.

Table of Contents

The following table presents the actual and required capital amounts and ratios as of September 30, 2015 under the Basel III Capital Rules. The minimum required capital amounts presented include the minimum required capital levels as of September 30, 2015 based on the phase-in provisions of the Basel III Capital Rules as well as the minimum required capital levels as of January 1, 2019 when the Basel III Capital Rules have been fully phased-in. Capital levels required to be considered well capitalized are based upon prompt corrective action regulations, as amended to reflect the changes under the Basel III Capital Rules.

(Dollars in thousands)	Actual		Minimum capital required - Basel III current period		Required to be considered well capitalized - current period		Minimum capital required - Basel III fully phased-in			
	Capital amount	Ratio	Capital amount	Ratio	Capital amount	Ratio	Capital amount	Ratio

## Table of Contents

Shareholder Dividends. First Financial paid a dividend of \$0.16 per common share on October 1, 2015 to shareholders of record as of August 28, 2015. Additionally, First Financial's board of directors authorized a dividend of \$0.16 per common share for the next regularly scheduled dividend, payable on January 4, 2016 to shareholders of record as of December 4, 2015.

Share Repurchases. In October 2012, First Financial's board of directors approved a share repurchase plan under which the Company has the ability to repurchase up to 5,000,000 shares. During the third quarter of 2015, First Financial repurchased 148,935 shares at an average price of \$18.68 per share. At September 30, 2015, 3,600,165 common shares remained available for repurchase under the 2012 share repurchase plan. During the first nine months of 2014, the Company repurchased 40,255 shares at an average price of \$17.32 per share.

The Company generally expects to return to shareholders a target range of 60% - 80% of earnings through a combination of its regular dividend and share repurchases while still maintaining capital ratios that exceed internal target thresholds and current regulatory capital requirements.

Shareholders' Equity. Total shareholders' equity at September 30, 2015 was \$813.0 million compared to total shareholders' equity at December 31, 2014 of \$784.1 million.

For further detail, see the Consolidated Statements of Changes in Shareholders' Equity.

## RISK MANAGEMENT

First Financial manages risk through a structured ERM approach that routinely assesses the overall level of risk, identifies specific risks and evaluates the steps being taken to mitigate those risks. First Financial continues to enhance its risk management capabilities and has embedded risk awareness as part of the culture of the Company. First Financial has identified nine types of risk that it monitors in its ERM framework. These risks include information technology, market, legal, strategic, reputation, credit, regulatory (compliance), operational and external/environmental.

For a full discussion of these risks, see the Risk Management section in Management's Discussion and Analysis in First Financial's 2014 Annual Report. The sections that follow provide additional discussion related to credit risk and market risk.

## CREDIT RISK

Credit risk represents the risk of loss due to failure of a customer or counterparty to meet its financial obligations in accordance with contractual terms. First Financial manages credit risk through its underwriting process, periodically reviewing and approving its credit exposures using credit policies and guidelines approved by its board of directors.

Allowance for loan and lease losses. First Financial records a provision for loan and lease losses in the Consolidated Statements of Income to maintain the ALLL at a level considered sufficient to absorb probable loan and lease losses inherent in the portfolio.

The ALLL was \$53.3 million as of September 30, 2015 and \$52.9 million as of December 31, 2014. As a percentage of period-end loans, the ALLL was 1.02% as of September 30, 2015 compared to 1.11% as of December 31, 2014. The ALLL was relatively unchanged from December 31, 2014, consistent with the Company's stable overall credit outlook.

The ALLL as a percentage of nonaccrual loans, including nonaccrual TDRs was 149.3% at September 30, 2015 compared with 109.1% at December 31, 2014. The ALLL as a percentage of nonperforming loans, which include accruing TDRs, increased to 95.3% as of September 30, 2015 compared with 82.1% as of December 31, 2014 due to a \$8.5 million, or 13.1% decrease in nonperforming loans.

Third quarter 2015 net charge-offs were \$2.2 million or 0.17% of average loans and leases on an annualized basis, compared to net charge-offs of \$1.4 million or 0.12% of average loans and leases on an annualized basis for the comparable quarter in 2014. The \$0.8 million increase in net charge-offs from the comparable period in 2014 was primarily the result of higher charge-offs of commercial loans and lower recoveries on commercial and commercial real estate loans, partially offset by lower charge-offs on commercial real estate loans and higher recoveries on residential real estate loans during the period.

Provision expense is a product of the Company's ALLL model, as well as net charge-off activity during the period. Third quarter 2015 provision expense was \$2.6 million compared to \$0.9 million during the comparable quarter in 2014. Provision expense was \$7.8 million compared to a negative \$0.5 million for the nine months ended September 30, 2015 and 2014, respectively.

Table of Contents

See Note 5 - Allowance for Loan and Lease Losses in the Notes to Consolidated Financial Statements, for further discussion of First Financial's ALLL.

The table that follows includes the activity in the allowance for loan and lease losses for the quarterly periods presented.

(Dollars in thousands)	Three months ended			2014		Nine months ended		
	2015 Sep. 30	June 30,	Mar. 31,	Dec. 31,	Sep. 30	September 30, 2015	2014

## MARKET RISK

Market risk is the risk of loss arising from adverse changes in the fair value of financial instruments due to changes in interest rates, foreign exchange rates and equity prices. The primary source of market risk for First Financial is interest rate risk. Interest rate risk is the risk to earnings and the value of the Company's equity arising from changes in market interest rates and arises in the normal course of business to the extent that there is a divergence between the amount of First Financial's interest-earning assets and the amount of interest-bearing liabilities that are prepaid, withdrawn, re-priced or mature in specified periods. First Financial seeks to achieve consistent growth in net interest income and equity while managing volatility arising from shifts in market interest rates.

First Financial monitors the Company's interest rate risk position using income simulation models and EVE sensitivity analyses that capture both short-term and long-term interest rate risk exposure. Income simulation involves forecasting NII under a variety of interest rate scenarios including instantaneous shocks. First Financial uses EVE sensitivity analysis to understand the impact of changes in interest rates on long-term cash flows, income and capital. EVE is calculated by discounting the cash flows for all balance sheet instruments under different interest-rate scenarios. For both NII and EVE modeling, First Financial leverages instantaneous parallel shocks to evaluate interest rate risk exposure across rising and falling rate scenarios. Additional scenarios evaluated include implied market forward rate forecasts and various non-parallel yield curve twists.

First Financial's interest rate risk models are based on the contractual and assumed cash flows and repricing characteristics for all of the Company's assets, liabilities and off-balance sheet exposure. A number of assumptions are also incorporated into the interest rate risk models, including prepayment behaviors and repricing spreads for assets and attrition and repricing rates for liabilities. Assumptions are primarily derived from behavior studies of the Company's historical client base and are continually refined. Modeling the sensitivity of NII and EVE to changes in market interest rates is highly dependent on the assumptions incorporated into the modeling process.

Non-maturity deposit modeling is particularly dependent on the assumption for repricing sensitivity known as a beta. Beta is the amount by which First Financial's interest bearing non-maturity deposit rates will increase when short-term interest rates rise. The Company applied a weighted average deposit beta of 55%. First Financial also includes an assumption for the migration of non-maturity deposit balances into CDs for all upward rate scenarios beginning with the +200 BP scenario, thereby increasing deposit costs and reducing asset sensitivity.

Presented below is the estimated impact on First Financial's NII and EVE position as of September 30, 2015, assuming immediate, parallel shifts in interest rates:

	% Change from base case for immediate parallel changes in rates				
	-100 BP <sup>(1)</sup>	+100 BP	+200 BP		
NII-Year 1	(4.53	)% (0.19	)% 1.04		%
NII-Year 2	(6.24	)% 1.72	% 4.08		%
EVE	(5.50	)% (0.63	)% 1.10		%

(1) Because certain current interest rates are at or below 1.00%, the 100 basis point downward shock assumes that certain corresponding interest rates approach an implied floor that, in effect, reflects a decrease of less than the full 100 basis point downward shock.

First Financial was within all internal policy limits set for interest rate risk monitoring as of September 30, 2015. Projected results for NII and EVE became more asset sensitive during the third quarter 2015 as a result of the issuance of the fixed rate subordinated notes and the acquisition of Oak Street, which increased floating-rate loan balances. First Financial continues to manage its balance sheet with a bias toward asset sensitivity while simultaneously balancing the potential earnings impact of this strategy.

First Financial continually evaluates the sensitivity of its interest rate risk position to modeling assumptions. The table that follows reflects First Financial's estimated NII sensitivity profile as of September 30, 2015 assuming both a 25% increase and decrease to the managed rate deposit beta assumption:

49

---

Table of Contents

	Beta sensitivity (% change from base)			
	+100 BP		+200 BP	
	Beta 25% lower	Beta 25% higher	Beta 25% lower	Beta 25% higher
NII-Year 1	1.19	% (1.58)	)% 3.03	% (0.97)
NII-Year 2	3.41	% 0.02	% 6.41	% 1.74

“Risk-neutral” refers to the absence of a strong bias toward either asset or liability sensitivity. “Asset sensitivity” is when a company’s interest-earning assets reprice more quickly or in greater quantities than interest-bearing liabilities. Conversely, “liability sensitivity” is when a company’s interest-bearing liabilities reprice more quickly or in greater quantities than interest-earning assets. In a rising interest rate environment, asset sensitivity results in higher net interest income while liability sensitivity results in lower net interest income. In a declining interest rate environment, asset sensitivity results in lower net interest income while liability sensitivity results in higher net interest income.

See the Net Interest Income section of Management’s Discussion and Analysis for further discussion.

**CRITICAL ACCOUNTING POLICIES**

First Financial’s Consolidated Financial Statements are prepared based on the application of the Company’s accounting policies. These policies require the reliance on estimates and assumptions. Changes in underlying factors, assumptions or estimates could have a material impact on First Financial’s future financial condition and results of operations. In management’s opinion, certain accounting policies have a more significant impact than others on First Financial’s financial reporting. For First Financial, these areas currently include accounting for the allowance for loan and lease losses, acquired loans, the FDIC indemnification asset, goodwill, pension and income taxes. These accounting policies are discussed in detail in the Critical Accounting Policies section of Management’s Discussion and Analysis in First Financial’s 2014 Annual Report. There were no material changes to these accounting policies during the nine months ended September 30, 2015.

**ACCOUNTING AND REGULATORY MATTERS**

Note 2 - Recently Adopted and Issued Accounting Standards in the Notes to Consolidated Financial Statements, discusses new accounting standards adopted by First Financial during 2015 and the expected impact of accounting standards recently issued but not yet required to be adopted. To the extent the adoption of new accounting standards materially affects financial condition, results of operations or liquidity, the impacts are discussed in the applicable section(s) of Management’s Discussion and Analysis and the Notes to the Consolidated Financial Statements.

**FORWARD-LOOKING INFORMATION**

Certain statements contained in this report which are not statements of historical fact constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act (the Act). In addition, certain statements in future filings by First Financial with the SEC, in press releases, and in oral and written statements made by or with the approval of First Financial which are not statements of historical fact constitute forward-looking statements within the meaning of the Act. Examples of forward-looking statements include, but are not limited to, projections of revenues, income or loss, earnings or loss per share, the payment or non-payment of dividends, capital structure and other financial items, statements of plans and objectives of First Financial or its management or board of directors and statements of future economic performances and statements of assumptions underlying such statements. Words such as "believes," "anticipates," "likely," "expected," "intends," and other similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. Management’s analysis contains forward-looking statements that are provided to assist in the understanding of anticipated future financial performance. However, such performance involves risks and uncertainties that may cause actual results to

differ materially. Factors that could cause actual results to differ from those discussed in the forward-looking statements include, but are not limited to:

- management's ability to effectively execute its business plan;
- the risk that the strength of the United States economy in general and the strength of the local economies in which we conduct operations may deteriorate resulting in, among other things, a deterioration in credit quality or a reduced demand for credit, including the resultant effect on our loan portfolio, allowance for loan and lease losses and overall financial performance;
- U.S. fiscal debt and budget matters;
- the ability of financial institutions to access sources of liquidity at a reasonable cost;

Table of Contents

the impact of upheaval in the financial markets and the effectiveness of domestic and international governmental actions taken in response, and the effect of such governmental actions on us, our competitors and counterparties, financial markets generally and availability of credit specifically, and the U.S. and international economies, including potentially higher FDIC premiums arising from increased payments from FDIC insurance funds as a result of depository institution failures;

the effect of and changes in policies and laws or regulatory agencies (notably the Dodd-Frank Wall Street Reform and Consumer Protection Act and the new capital rules promulgated by federal banking regulators);

the effect of the current low interest rate environment or changes in interest rates on our net interest margin and our loan originations and securities holdings;

our ability to keep up with technological changes;

failure or breach of our operational or security systems or infrastructure, or those of our third party vendors or other service providers;

our ability to comply with the terms of loss sharing agreements with the FDIC;

the expiration of loss sharing agreements with the FDIC;

mergers and acquisitions, including costs or difficulties related to the integration of acquired companies and the wind-down of non-strategic operations that may be greater than expected;

the risk that exploring merger and acquisition opportunities may detract from management's time and ability to successfully manage our business;

expected cost savings in connection with the consolidation of recent acquisitions may not be fully realized or realized within the expected time frames, and deposit attrition, customer loss and revenue loss following completed acquisitions may be greater than expected;

our ability to increase market share and control expenses;

the effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies as well as the Financial Accounting Standards Board and the SEC;

adverse changes in the creditworthiness of our borrowers and lessees, collateral values, the value of investment securities and asset recovery values, including the value of the FDIC indemnification asset and related assets covered by FDIC loss sharing agreements;

adverse changes in the securities, debt and/or derivatives markets;

our success in recruiting and retaining the necessary personnel to support business growth and expansion and maintain sufficient expertise to support increasingly complex products and services;

monetary and fiscal policies of the Board of Governors of the Federal Reserve System (Federal Reserve) and the U.S. government and other governmental initiatives affecting the financial services industry;

unpredictable natural or other disasters could have an adverse effect on us in that such events could materially disrupt our operations or our vendors' operations or willingness of our customers to access the financial services we offer;

our ability to manage loan delinquency and charge-off rates and changes in estimation of the adequacy of the allowance for loan losses; and

the costs and effects of litigation and of unexpected or adverse outcomes in such litigation.

In addition, please refer to our Annual Report on Form 10-K for the year ended December 31, 2014, as well as our other filings with the SEC, for a more detailed discussion of these risks and uncertainties and other factors. Such forward-looking statements are meaningful only on the date when such statements are made, and First Financial undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such a statement is made to reflect the occurrence of unanticipated events.

**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

The information contained in “Item 2-Management’s Discussion and Analysis of Financial Condition and Results of Operations—Market Risk” of this report is incorporated herein by reference in response to this item.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Management is responsible for establishing and maintaining effective disclosure controls and procedures, as defined under Rule 13a-15 of the Securities Exchange Act of 1934, that are designed to cause the material information required to be disclosed by First Financial in the reports it files or submits under the Securities Exchange Act of 1934 to be recorded, processed, summarized, and reported to the extent applicable within the time periods required by the Securities and Exchange Commission's rules and forms. In designing and evaluating the disclosure controls and procedures, management recognized that a control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

As of the end of the period covered by this report, First Financial performed an evaluation under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of its disclosure controls and procedures pursuant to Rule 13a-15 of the Securities Exchange Act of 1934. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective at the reasonable assurance level.

On August 14, 2015, First Financial acquired Oak Street Holdings Corporation. The internal control over financial reporting of Oak Street's operations were excluded from the evaluation of effectiveness of First Financial's disclosure controls and procedures as of the period end covered by this report as a result of the timing of the acquisition. As a result of the Oak Street acquisition, First Financial will be evaluating changes to processes, information technology systems and other components of internal control over financial reporting as part of its integration activities. The acquired Oak Street operations represents 3.9% of total consolidated assets as of the period covered by this report.

Changes in Internal Control over Financial Reporting

No changes were made to the Corporation's internal control over financial reporting (as defined in Rule 13a-15 under the Securities Exchange Act of 1934) during the last fiscal quarter that materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting.

PART II-OTHER INFORMATION

Item 1. Legal Proceedings.

There have been no material changes to the disclosure in response to "Part I - Item 3. Legal Proceedings" in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

Item 1A. Risk Factors.

There are a number of factors that may adversely affect the Company's business, financial results, or stock price. See "Risk Factors" as disclosed in response to "Item 1A. to Part I - Risk Factors" of Form 10-K for the year ended December 31, 2014.

Table of Contents

## Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) The following table shows the total number of shares repurchased in the third quarter of 2015.

## Issuer Purchases of Equity Securities

Period	(a) Total Number Of Shares Purchased <sup>(1)</sup>	(b) Average Price Paid Per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans <sup>(2)</sup>	(d) Maximum Number of Shares that may yet be purchased Under the Plans
July 1 to July 31, 2015				
Share repurchase program	0	\$0.00	0	3,749,100
Director Fee Stock Plan	0	0.00	N/A	N/A
Stock Plans	0	0.00	N/A	N/A
August 1 to August 31, 2015				
Share repurchase program	0	\$0.00	0	3,749,100
Director Fee Stock Plan	0	0.00	N/A	N/A
Stock Plans	9,800	19.49	N/A	N/A
September 1 to September 30, 2015				
Share repurchase program	148,935	\$18.68	148,935	3,600,165
Director Fee Stock Plan	0	0.00	N/A	N/A
Stock Plans	2,591	18.77	N/A	N/A
Total				
Share repurchase program	148,935	\$18.68	148,935	
Director Fee Stock Plan	0	\$0.00	N/A	
Stock Plans	12,391	\$19.34	N/A	

Except with respect to the share repurchase program, the number of shares purchased in column (a) and the average price paid per share in column (b) include the purchase of shares other than through publicly announced plans. The shares purchased other than through publicly announced plans were purchased pursuant to First Financial's Director Fee Stock Plan, 1999 Stock Option Plan for Non-Employee Directors, 1999 Stock Incentive Plan for Officers and Employees, 2009 Employee Stock Plan, Amended and Restated 2009 Non-Employee Director Stock Plan and 2012 Stock Plan (the last five plans are referred to hereafter as the Stock Plans). The table shows the number of shares purchased pursuant to those plans and the average price paid per share. Purchases for the Director Fee Stock Plan were made in open-market transactions directly for each director's account. Under the Stock Plans, shares were purchased from plan participants at the then current market value in satisfaction of stock option exercise prices.

First Financial has one previously announced stock repurchase plan under which it is authorized to purchase shares (2) of its common stock. The plan has no expiration date. The table that follows provides additional information regarding this plan.

Announcement Date	Total Shares Approved for Repurchase	Total Shares Repurchased Under the Plan	Expiration Date
10/25/2012	5,000,000	1,399,835	None
