QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
^x 1934

For the quarterly period ended September 24, 2016

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the transition period from _____ to _____

Commission file number 0-19882

KOPIN CORPORATION
(Exact name of registrant as specified in its charter)

Delaware 04-2833935
State or other jurisdiction of (I.R.S. Employer
incorporation or organization Identification No.)

125 North Drive, Westborough, MA 01581-3335
(Address of principal executive offices) (Zip Code)
Registrant's telephone number, including area code: (508) 870-5959

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each issuer's classes of common stock, as of the latest practicable date.

KOPIN CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION

The condensed consolidated financial statements of Kopin Corporation (the Company) as of September 24, 2016 and for the three and nine months ended September 24, 2016 and September 26, 2015 are unaudited and include all adjustments which, in the opinion of management, are necessary to present fairly the results of operations for the periods then ended. These condensed consolidated financial statements should be read in conjunction with the Company's financial statements and notes thereto, included in the Company's Annual Report on Form 10-K for the year ended December 26, 2015. The results of the Company's operations for any interim period are not necessarily indicative of the results of the Company's operations for any other interim period or for a full fiscal year.

In June 2016, the Company's subsidiary Kowon sold its plant and the land on which the plant resided for 9.5 billion KRW (approximately \$8.1 million on the closing date). Kowon had ceased its production activities at the facility in 2013. The plant and land had a cost basis of approximately \$0.4 million. Accordingly, the Company recorded a gain on the sale of the plant and land of \$7.7 million.

Recently Issued Accounting Pronouncements

Revenue from Contracts with Customers

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-09, Revenue from Contracts with Customers (Topic 606). This new standard outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. In addition, ASU 2014-09 provides guidance on accounting for certain revenue-related costs including, but not limited to, when to capitalize costs associated with obtaining and fulfilling a contract. The standard also requires certain new disclosures. The standard was effective for annual and interim reporting periods beginning after December 15, 2016.

In August 2015, the FASB issued ASU 2015-14, Revenue from Contracts with Customers. The amendments in this ASU defer the effective date of ASU 2014-09. Public companies should apply the guidance in ASU 2014-09 to annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period. Early adoption is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. The Company is currently evaluating the expected impact of this new guidance on its consolidated financial statements and available adoption methods.

Leases

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842). This new standard requires lessees to recognize a lease liability and a right-of-use asset on the balance sheet and aligns many of the underlying principles of the new lessor model with those in Topic 606, Revenue from Contracts with Customers. Lessees (for capital and operating leases) and lessors (for sales-type, direct financing, and operating leases) must apply a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. The modified retrospective approach would not require any transition accounting for leases that expired before the earliest comparative period presented. Lessees and lessors may not apply a full retrospective transition approach. The new standard is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early application is permitted for all public business entities and all nonpublic business entities. The Company is currently evaluating the expected impact of this new guidance on its consolidated financial statements and available adoption methods.

Compensation-Stock Compensation

In March 2016, the FASB issued ASU No. 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting. This guidance is intended to simplify the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities and classification on the statement of cash flows. The amendments in this update are effective for financial statements issued for annual periods beginning after December 15, 2016, including interim periods within those annual periods, and early application is permitted as of the beginning of an interim or annual reporting period. The Company is

currently evaluating the expected impact of this new guidance on its consolidated financial statements and available adoption methods.

8

Table of Contents

Statement of Comprehensive Income

During the nine months ended September 24, 2016, the change in the Company's accumulated other comprehensive income was net of \$2.4 million foreign currency translation adjustments and \$0.3 million unrealized holding gains on marketable securities.

2. CASH AND EQUIVALENTS AND MARKETABLE SECURITIES

The Company considers all highly liquid, short-term debt instruments with original maturities of three months or less to be cash equivalents.

Marketable debt securities consist primarily of certificates of deposit, medium-term corporate debt, and U.S. government and agency backed securities. The Company classifies these marketable debt securities as available-for-sale in "Marketable Debt Securities." The Company records the amortization of premium and accretion of discount on marketable debt securities in the results of operations.

The Company uses the specific identification method as a basis for determining cost and calculating realized gains and losses with respect to marketable debt securities. The gross gains and losses realized related to sales and maturities of marketable debt securities were not material during the three and nine months ended September 24, 2016 and the year ended December 26, 2015.

Investments in available-for-sale marketable debt securities are as follows at September 24, 2016 and December 26, 2015:

	Amortized Cost		Unrealized Gains		Unrealized Losses		Fair Value	
	2016	2015	2016	2015	2016	2015	2016	2015
U.S. government and agency backed securities	\$42,366,974	\$46,586,224	\$71,208	\$—	\$—	\$(121,561)	\$42,438,182	\$46,464,663
Corporate debt and certificates of deposit	20,654,599	14,534,247	—	—	(58,401)	(56,019)	20,596,198	14,478,228
Total	\$63,021,573	\$61,120,471	\$71,208	\$—	\$(58,401)	\$(177,580)	\$63,034,380	\$60,942,891

The contractual maturity of the Company's marketable debt securities is as follows at September 24, 2016:

	Less than One year	One to Five years	Greater than Five years	Total
U.S. government and agency backed securities	\$16,904,660	\$18,479,622	\$7,053,900	\$42,438,182
Corporate debt and certificates of deposit	16,491,826	4,104,372	—	20,596,198
Total	\$33,396,486	\$22,583,994	\$7,053,900	\$63,034,380

The Company conducts a review of its marketable debt securities on a quarterly basis for the presence of other-than-temporary impairment (OTTI). The Company assesses whether OTTI is present when the fair value of a debt security is less than its amortized cost basis at the balance sheet date. Under these circumstances OTTI is considered to have occurred (1) if the Company intends to sell the security before recovery of its amortized cost basis; (2) if it is "more likely than not" the Company will be required to sell the security before recovery of its amortized cost basis; or (3) the present value of expected cash flows is not sufficient to recover the entire amortized cost basis.

The Company further estimates the amount of OTTI resulting from a decline in the creditworthiness of the issuer (credit-related OTTI) and the amount of non credit-related OTTI. Non credit-related OTTI can be caused by such factors as market illiquidity. Credit-related OTTI is recognized in earnings while non credit-related OTTI on securities not expected to be sold is recognized in other comprehensive income (loss). The Company did not record an OTTI for the three and nine months ended September 24, 2016 and September 26, 2015.

Table of Contents**3. FAIR VALUE MEASUREMENTS**

Financial instruments are categorized as Level 1, Level 2 or Level 3 based upon the method by which their fair value is computed. An investment is categorized as Level 1 when its fair value is based on unadjusted quoted prices in active markets for identical assets that the Company has the ability to access at the measurement date. An investment is categorized as Level 2 if its fair market value is based on quoted market prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, based on observable inputs such as interest rates, yield curves, or derived from or corroborated by observable market data by correlation or other means. An investment is categorized as Level 3 if its fair value is based on assumptions developed by the Company about what a market participant would use in pricing the assets.

The following table details the fair value measurements of the Company's financial assets:

	Fair Value Measurement			
	September 24, 2016 Using:			
	Total	Level 1	Level 2	Level 3

Certificates of Deposit	12,104,762	—	12,104,762	—
GCS Holdings	329,767	329,767	—	—
	\$84,362,549	\$32,971,559	\$51,390,990	\$ —

	Fair Value Measurement			
	December 26, 2015 Using:			
	Total	Level 1	Level 2	Level 3
Cash and Equivalents	\$19,767,889	\$19,767,889	\$—	\$ —
U.S. Government Securities	46,464,663	16,381,152	30,083,511	—
Corporate Debt	6,886,495	—	6,886,495	—
Certificates of Deposit	7,591,733	—	7,591,733	—
GCS Holdings	232,037	232,037	—	—
	\$80,942,817	\$36,381,078	\$44,561,739	\$ —

The corporate debt consists of floating rate notes with a maturity that is over multiple years but has interest rates which are reset every three months based on the then-current three month London Interbank Offering Rate (three month Libor). The Company validates the fair market values of the financial instruments above by using discounted cash flow models, obtaining independent pricing of the securities or through the use of a model which incorporates the three month Libor, the credit default swap rate of the issuer and the bid and ask price spread of the same or similar investments which are traded on several markets.

The carrying amounts of cash and equivalents, accounts receivable, accounts payable and accrued liabilities approximate fair value because of their short-term nature. If accrued liabilities were carried at fair value, these would be classified as Level 2 in the fair value hierarchy.

4. INVENTORY

Inventory is stated at the lower of cost (determined on the first-in, first-out) or market and consists of the following at September 24, 2016 and December 26, 2015:

	September 24, 2016	December 26, 2015
Raw materials	\$ 1,786,401	\$ 844,475
Work-in-process	1,242,020	1,281,891
Finished goods	169,563	386,107
	\$ 3,197,984	\$ 2,512,473

Table of Contents

5. NET LOSS PER SHARE

Basic net loss per share is computed using the weighted average number of shares of common stock outstanding during the period less any non-vested restricted shares. Diluted earnings per common share, if applicable, is calculated using weighted average shares outstanding and contingently issuable shares, less weighted average shares reacquired during the period. The net outstanding shares are adjusted for the dilutive effect of shares issuable upon the assumed conversion of the Company's common stock equivalents, which consist of outstanding stock options and non-vested restricted stock units.

Weighted average common shares outstanding used to calculate basic and diluted earnings per share are as follows:

	Three Months Ended		Nine Months Ended	
	September 28, 2016	September 26, 2015	September 28, 2016	September 26, 2015
Weighted average common shares outstanding-basic	64,047,852	63,068,321	64,012,490	63,072,668
Stock options and non-vested restricted common stock	—	—	—	—
Weighted average common shares outstanding-diluted	64,047,852	63,068,321	64,012,490	63,072,668

The following were not included in weighted average common shares outstanding-diluted because they are anti-dilutive or performance or market conditions had not been met at the end of the period:

	Three Months Ended		Nine Months Ended	
	September 28, 2016	September 26, 2015	September 28, 2016	September 26, 2015
Non-vested restricted common stock	2,692,516	2,924,811	2,692,516	2,924,811

6. STOCK-BASED COMPENSATION

The fair value of non-vested restricted common stock awards is generally the market value of the Company's common stock on the date of grant. The non-vested restricted common stock awards require the employee to fulfill certain obligations, including remaining employed by the Company for one, two or four years (the vesting period) and in certain cases also require meeting either performance criteria or the Company's stock achieving a certain price. For non-vested restricted common stock awards which solely require the recipient to remain employed with the Company, the stock compensation expense is amortized over the anticipated service period. For non-vested restricted common stock awards which require the achievement of performance criteria, the Company reviews the probability of achieving the performance goals on a periodic basis. If the Company determines that it is probable that the performance criteria will be achieved, the amount of compensation cost derived for the performance goal is amortized over the anticipated service period. If the performance criteria are not met, no compensation cost is recognized and any previously recognized compensation cost is reversed. The Company recognizes compensation costs on a straight-line basis over the requisite service period for time-vested awards.

Non-Vested Restricted Common Stock

	Shares	Weighted Average Grant Fair Value
Balance, December 26, 2015	2,192,016	\$ 3.82
Granted	634,500	1.88
Forfeited	(59,000)	3.14
Vested	(75,000)	3.60
Balance, September 24, 2016	2,692,516	\$ 3.38

Table of Contents

Stock-Based Compensation

The following table summarizes stock-based compensation expense within each of the categories below as it relates to non-vested restricted common stock awards for the nine months ended September 24, 2016 and September 26, 2015 (no tax benefits were recognized):

	Nine Months Ended	
	September 24, 2016	September 26, 2015
Cost of component revenues	\$426,357	\$ 620,494
Research and development	378,156	669,605
Selling, general and administrative	674,968	1,496,395
Total	\$1,479,481	\$ 2,786,494

Unrecognized compensation expense for non-vested restricted common stock as of September 24, 2016 totaled \$3.8 million and is expected to be recognized over a weighted average period of approximately two years.

7. OTHER ASSETS AND NOTE RECEIVABLE

In January 2016, the Company received the final \$15.0 million payment resulting from the sale of its III-V product line and its investment in KTC.

On February 25, 2015, the Company acquired approximately 251,000 shares of Vuzix Corporation (Vuzix) common stock through a cashless exercise of warrants. The Company received the warrants in August 2013 as part of a restructuring of debt owed by Vuzix to the Company. Upon receipt of the warrants, the Company should have recorded the value of the warrant of approximately \$352,000 in its consolidated financial statements. Subsequently, the Company should have marked to market the warrants at the end of each reporting period. Had the Company recorded the warrants in its consolidated financial statements and marked to market the warrants as of December 28, 2013 and December 27, 2014, the Company would have recorded gains in its statement of operations of approximately \$646,000 and \$171,000, respectively. In the first quarter of 2015, the Company recorded the warrants in its consolidated financial statements and as a result recorded a gain of approximately \$1.3 million with \$817,000 attributed to prior periods. The value of the warrants as of August 2013, December 28, 2013 and December 27, 2014 was determined using the Black-Scholes pricing model. The Company does not believe the unrecorded gains were material to the consolidated financial statements as the loss from operations for the fiscal years ended December 28, 2013 and December 27, 2014 were \$35.9 million and \$28.5 million, respectively.

8. GOODWILL

The Company's goodwill balance is as follows:

Balance, December 26, 2015	\$946,082
Change due to exchange rate fluctuations	(76,098)
Balance, September 24, 2016	\$869,984

9. ACCRUED WARRANTY

The Company typically warrants its products against defect for 12 months. A provision for estimated future costs and estimated returns for credit relating to such warranty is recorded in the period when product is shipped and revenue recognized, and is updated as additional information becomes available. The Company's estimate of future costs to satisfy warranty obligations is based primarily on historical warranty expense experienced and a provision for potential future product failures. Changes in the accrued warranty for the nine months ended September 24, 2016 are as follows:

Balance, December 26, 2015	\$518,000
Additions	442,305
Claims	(442,305)
Balance, September 24, 2016	\$518,000

Table of Contents

10. INCOME TAXES

The Company's tax provision of approximately \$114,000 for the three months ended September 24, 2016 represents \$14,000 of state income tax and \$0.1 million of foreign income taxes including interest income on intercompany loan and net movement in estimated foreign withholding. The Company's tax provision of approximately \$2.2 million for the nine months ended September 24, 2016 represents \$1.0 million of income taxes on the gain on the sale of Kowon's plant and land, \$1.2 million of net movement in estimated foreign withholding on anticipated future remitted earnings of a foreign subsidiary, and \$22,000 in state income taxes. The Company's tax benefit of approximately \$62,500 and \$37,500 for the three and nine month periods ended September 26, 2015 represents the net movement in estimated foreign withholding on anticipated future remitted earnings of an international subsidiary and state taxes.

As of September 24, 2016, the Company has available for tax purposes U.S. federal NOLs of approximately \$105 million expiring through 2035. The Company has recognized a full valuation allowance on its domestic and certain foreign net deferred tax assets due to the uncertainty of realization of such assets. The Company has not historically recorded, nor does it intend to record the tax benefits from stock awards until realized. Unrecorded benefits from stock awards approximate \$10 million.

The Company's income tax returns have not been examined by the Internal Revenue Service and are subject to examination for all years since 2001. State income tax returns are generally subject to examination for a period of 3 to 5 years after filing of the respective return. The state impact of any federal changes remains subject to examination by various states for a period of up to one year after formal notification to the states.

11. SEGMENTS AND GEOGRAPHICAL INFORMATION

The Company's chief operating decision maker is its Chief Executive Officer. The Company has determined it has two reportable segments, FDD, the manufacturer of its reflective display products for test and simulation products, and Kopin, which is comprised of Kopin Corporation, Kowon, Kopin Software Ltd. and eMDT. The following table presents the Company's reportable segment results (in thousands):

	Three Months Ended					
	September 24, 2016			September 26, 2015		
	Kopin	FDD	Total	Kopin	FDD	Total
Revenues	\$4,707	\$1,087	\$5,794	\$7,036	\$965	\$8,001
Net loss attributable to the controlling interest	(7,982)	(216)	(8,198)	(4,029)	(646)	(4,675)
	Nine Months Ended					
	September 24, 2016			September 26, 2015		
	Kopin	FDD	Total	Kopin	FDD	Total
Revenues	\$13,176	\$3,093	\$16,269	\$24,800	\$2,643	\$27,443
Net loss attributable to the controlling interest	(17,628)	(616)	(18,244)	(6,548)	(1,184)	(7,732)
Total assets	92,799	1,699	94,498	113,510	1,367	114,877
Long-lived assets	2,937	—	2,937	3,550	92	3,642

The total assets of Kopin are net of \$6.2 million and \$5.8 million in intercompany loans to FDD as of September 24, 2016 and September 26, 2015, respectively.

Table of Contents

During the three and nine month periods ended September 24, 2016 and September 26, 2015, the Company derived its sales from the following geographies (as a percentage of net revenues):

	Three Months Ended			Nine Months Ended		
	September 24, 2016	September 26, 2015	%	September 24, 2016	September 26, 2015	%
United States	49 %	68 %	%	36 %	73 %	%
Others	— %	— %	%	— %	1 %	%
Americas	49 %	68 %	%	36 %	74 %	%
Asia-Pacific	37 %	22 %	%	48 %	19 %	%
Europe	14 %	10 %	%	16 %	7 %	%
Total Revenues	100 %	100 %	%	100 %	100 %	%

12. LITIGATION

The Company may engage in legal proceedings arising in the ordinary course of business. Claims, suits, investigations and proceedings are inherently uncertain and it is not possible to predict the ultimate outcome of such matters and our business, financial condition, results of operations or cash flows could be affected in any particular period.

Table of Contents

13. EMBEZZLEMENT

During the third quarter of 2016, the Company discovered embezzlement activities at its Korean subsidiary. Based upon the results of forensic investigation procedures, we identified that the embezzlement activities occurred from fiscal year 2011 through fiscal year 2016. The embezzlement resulted in a total theft loss of \$1,589,000 over that period and will result in the immaterial restatement of previously issued annual financial statements and unaudited quarterly financial information in the Company's 2016 annual report on Form 10-K.

In the three and nine month periods ended September 26, 2016, the Company has recorded in Other (expense) income, embezzlement expense of approximately \$200,000 and \$420,000, respectively, representing the total amount of theft loss that occurred in the first nine months of fiscal 2016. Of that amount, \$114,000 had previously been expensed, although misclassified (\$47,000 as Cost of component revenues and \$67,000 as Foreign currency transaction losses), and \$86,000 had been incurred but not yet recorded in the first two quarters of 2016. Accordingly, the embezzlement expense recorded in the accompanying financial statements includes the effects of correcting those misstatements. The Company will restate the above referenced first and second quarter 2016 amounts when they are next presented as comparative balances in its first and second quarter reports on Form 10-Q for fiscal 2017.

The family of the embezzler has contributed certain assets as reparations. In addition, the Company has insurance to cover employee fraud. Whether the Company can collect the insurance and keep the assets is pending civil and criminal investigations against the embezzler. The value of the assets recovered, if any, will be recorded during the period in which settlement is determined to be probable.

14. SUBSEQUENT EVENTS

Subsequent to September 24, 2016, we entered into two strategic agreements.

The first agreement established a strategic relationship with a Chinese company under which the Company and the Chinese Company will provide services for each other and jointly develop and manufacture products. In addition the Chinese company will acquire 7,589,000 shares of unregistered stock of the Company for approximately USD \$24.7 million.

The second agreement established a joint venture (JV Agreement) in China. Under the terms of the JV Agreement the Company will contribute certain intellectual property and the equivalent of USD \$1 million in Renminbi for a minority equity ownership. The purpose of the joint venture is to develop and market wearable products.

Both transactions are subject to standard closing conditions and government approval.

Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

This Quarterly Report on Form 10-Q which we have filed with the Securities and Exchange Commission contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995, including, without limitation, statements made relating to our expectation that we will ship Solos headsets in the fourth quarter of 2016; we will incur significant development and marketing costs in 2016 to commercialize our Wearable technologies; our expectation that the cash and marketable debt securities held by Kowon will eventually be remitted back to the U.S.; our expectation that the U.S. government will significantly reduce funding for programs through which we sell high margin military products; our expectation that customers that purchase our products for Wearable applications will launch products in 2016; our expectation that we will offer our proprietary noise cancellation chip which we refer to as "Whisper Chip™" in 2016; our expectation that any market risk associated with our international operations is unlikely to have a material adverse effect on our business, financial condition or results of operation; our belief that a strengthening of the U.S. dollar could increase the price of our products in foreign markets; our expectation that we will expend between \$2.0 million and \$3.0 million on capital expenditures over the next twelve months; our belief that our available cash resources will support our operations and capital needs for at least the next twelve months; our expectation that we will have taxes based on federal alternative minimum tax rules and on our foreign operations in 2016; our expectation that we will have a state tax provision in 2016; and our belief that the effect, if any, of reasonably possible near-term changes in interest rates on our financial position, results of operations, and cash flows should not be material. This Quarterly Report on Form 10-Q should be read in conjunction with our Form 10-K and other documents filed with the Securities and Exchange Commission. Our Form 10-K and other

documents we have filed with the Securities and Exchange Commission also contain these additional forward-looking statements. These forward-looking statements are based on current expectations, estimates, forecasts and projections about the industries in which we operate, management's beliefs, and assumptions made by management. In addition, other written or oral statements, which constitute forward-looking statements, may be made by or on behalf of us. Words such as “expects”, “anticipates”, “intends”, “plans”, “believes”, “could”, “seeks”, “estimates”, and variations of such words and similar expressions are intended to identify such forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties

Table of Contents

and assumptions, which are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements, whether as a result of new information, future events or otherwise. Factors that could cause or contribute to such differences in outcomes and results include, but are not limited to, those discussed below in Item 1A and those set forth in our other periodic filings filed with the Securities and Exchange Commission. Except as required by law, we do not intend to update any forward-looking statements even if new information becomes available or other events occur in the future.

Critical Accounting Policies

Management's discussion and analysis of our financial condition and results of operations are based upon our unaudited condensed consolidated financial statements. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amount of assets, liabilities, revenues and expenses and related disclosures of contingent assets and liabilities. We continually evaluate our estimates used in the preparation of our financial statements, including those related to revenue recognition under the percentage of completion method, bad debts, inventories, warranty reserves, investment valuations, valuation of stock compensation awards and recoverability of deferred tax assets. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about carrying values of assets and liabilities that are not apparent from other sources. Actual results will most likely differ from these estimates. Further detail regarding our critical accounting policies can be found in "Item 7. Management Discussion and Analysis of Financial Condition and Results of Operations" included in our Annual Report on Form 10-K for the year ended December 26, 2015.

Business Matters

We were incorporated in Delaware in 1984 and are a leading inventor, developer, manufacturer and seller of Wearable technologies which include components and systems.

Kopin Wearable technology includes component technologies which can be integrated to create products, and proprietary headset systems which use voice as the primary user interface and, through the use of wireless technologies, can contact other user devices in close proximity or information from the cloud.

Components

The components we offer for sale primarily consist of our displays, backlights, ASICs and optical lenses. In 2016, we also anticipate offering our proprietary noise cancellation chip which we refer to as "Whisper Chip™".

Our principal display products are miniature high density color or monochrome Active Matrix Liquid Crystal Displays (AMLCDs) with resolutions which range from approximately 320 x 240 resolution to 2048 x 2048 resolution, sold in either a transmissive or reflective format. We sell our displays individually or in combination with our other components assembled in a unit. For example, we sell a module unit which includes a single display, backlight and optics in a plastic housing, a binocular display module unit which includes two displays, backlights and optics in a plastic housing or a Higher-Level Assembly (HLA) which contains a display, light emitting diode based illumination, optics, and electronics in a sealed housing, primarily for military applications.

Our transmissive display products, which we refer to as CyberDisplay™ products, utilize high quality, single crystal silicon-the same high quality silicon used in conventional integrated circuits. This single crystal silicon is not grown on glass; rather, it is first formed on a silicon wafer and patterned into an integrated circuit (including the active matrix, driver circuitry and other logic circuits) in an integrated circuit foundry. The silicon wafer is then sent to our facilities and the integrated circuit is lifted off as a thin film and transferred to glass using our proprietary Wafer™ Engineering technology, so that the transferred layer is a fully functional active matrix integrated circuit which now resides on a transparent substrate.

Our reflective LCOS display products are miniature high density dual mode color sequential/monochrome reflective micro displays with resolutions which range from approximately 1280 x 720 pixels (720P) resolution to 2048 x 1536 pixels (QXGA) resolution. These displays are manufactured at our facility in Scotland, U.K. Our reflective displays are based on a proprietary, very high-speed, ferroelectric liquid crystal on silicon (FLCOS) platform. Our digital software and logic-based drive electronics combined with the very fast switching binary liquid crystal enables our micro display to process images purely digitally and create red, green and blue gray scale in the time domain. This architecture has major advantages in visual performance over other liquid crystal, organic light-emitting diode and

MEMS based technologies: precisely controlled full color or monochrome gray scale is achieved on a matrix of undivided high fill factor pixels, motion artifacts are reduced to an insignificant level and there are no sub-pixels, no moving mirrors and no analog conversions to detract from the quality of the image.

We offer a variety of optical lenses, some of which we have developed internally and others we license the rights to sell. We also offer a variety of backlights, some of which we have developed and are “off-the-shelf” components. Our lenses come in a variety of sizes with the smallest being our Pupil lens, followed by our Pearl lens and then our largest being our Prism lens. The different sizes of lenses give us and our customers design flexibility when creating headset systems. There is a trade-off between the lens size and the size of the perceived image to the viewer. For example, a Pearl lens will provide the viewer with

Table of Contents

an image approximately equivalent to what the viewer would see looking at a smart phone, whereas a Prism lens provides the viewer with an image approximately equivalent to what the viewer would see looking at a tablet. A Pearl lens is smaller than a Prism lens, however, it may enable a more fashionable design. Therefore a customer designing a consumer-oriented product may choose a Pearl lens but a customer designing an enterprise-oriented product might choose a Prism lens. We use third parties to manufacture these lenses.

The Whisper Chip is designed to enhance the performance of existing audio systems and speech recognition engines by allowing the speaker's voice to be clearly "heard" by the listener, whether the "listener" is a person or a machine. The Whisper chip incorporates our Voice Extraction™ Filter (VEF). VEF is a patented approach to singulating the voice signal without distorting it. The Whisper Chip is an all-digital solution that runs at 16MHz, consumes less than 12mW of power and replaces the CODEC so no ADC or DAC is needed. The Whisper Chip is 4 x 4 mm in size and accepts up to four (4) digital microphone inputs. We use third parties to manufacture the Whisper Chip.

Headset Systems

Our headset systems include:

- Consumer-oriented headsets which resemble typical eyeglasses but include voice and audio capabilities allowing the user to communicate with other users and a Pupil display module;

- Augmented reality health and fitness sunglasses, called Solos™, that have voice and audio capabilities, a Pupil display module which overlays situational information on the glasses, our Whisper Chip; and an

- Industrial headset reference design, which is essentially a complete head-worn computer that includes an optical pod with one of our display products, a microprocessor, battery, camera, memory and various commercially available software packages that we license.

Our headsets receive or transmit data from or to the internet by interfacing with a smartphone or similar device via WiFi or Bluetooth. They can also receive information from devices in close proximity using ANT+. The display module or optical pod allows users to view the information such as WEB data, emails, text messages, maps or biometric data (heart rate), situational data (speed, distance traveled, Watts produced) at a "normal" viewing size because of our specialized optics. Our industrial headset provides the capability of viewing technical diagrams, by enabling the user to zoom in to see finer details or zoom out to see a larger perspective. Our industrial headset is equipped with a camera to enable a picture to be taken, video to be streamed or face-to-face communication to occur. The camera enables users to send pictures or stream live video to a remote subject matter expert so that both the user and expert can analyze an issue at the same time and collaboratively identify and implement a solution. Our headset reference designs utilize operating system software we developed. We expect to ship units of the Solos headset in the second half of 2016.

We have three sources of revenues: product revenues, which are our primary source of revenues, research and development (R&D) revenues primarily from development contracts with agencies or prime contractors of the U.S. government and commercial enterprises and license revenues from our reference designs. To date our license revenues have been de minimis. For the three and nine months ended September 24, 2016, R&D revenues were \$0.3 and \$0.7 million, or 4.7% and 4.1% of total revenues, respectively. This contrasted with \$0.9 million and \$3.7 million, or 11.0% and 13.5% of total revenues, respectively, for the corresponding periods in 2015.

On October 27, 2016, we issued a press release and filed a Form 8-K with a preliminary net loss of \$17.9 million and a preliminary cash used in operations of \$19.4 million for the nine months ended September 24, 2016. Subsequent to the press release, certain adjustments were made which resulted in a net loss of \$18.2 million and cash used in operations of \$20.0 million for the nine month period ended September 24, 2016.

Results of Operations

The three and nine month periods ended September 24, 2016 and September 26, 2015 are referred to as 2016 and 2015, respectively. The year ended period December 26, 2015 is referred to as fiscal year 2015.

Table of Contents

Revenues. For 2016 and 2015, our revenues, which include component sales and amounts earned from research and development contracts, were as follows (in millions):

Display Revenues by Application	Three Months Ended		Nine Months Ended	
	September 2016	September 2015	September 2016	September 2015
Wearable	\$ 1.5	\$ 3.5	\$ 5.9	\$ 10.6
Military	1.2	1.9	3.6	8.9
Industrial	2.4	1.2	4.6	2.9
Consumer	0.4	0.5	1.5	1.3
Research & Development	0.3	0.9	0.7	3.7
Total	\$ 5.8	\$ 8.0	\$ 16.3	\$ 27.4

Wearable Applications primarily represents sales of our components for products that are worn on the body for other than Military Applications. In the third quarter of 2015, revenues from the sale of our products for Wearable Applications was primarily driven by shipments to a customer launching a new product. The decrease in Wearable Applications revenues in 2016 as compared to 2015 is primarily because in the third quarter of 2015, a customer decreased their forecasted orders for products and as such we billed at higher price per unit in accordance with the contractual terms which increased revenues by approximately \$1.8 million. Sales of our products to customers that use our products for Wearable Applications is a critical part of our strategy to increase revenues and return to profitability and positive cash flow. Our success in selling our products for Wearable Applications will depend on the demand for our customers' new products, which we are unable to predict. Sales of our products for Military Applications decreased in 2016 as compared to 2015 because of a decrease in demand from the U.S. government for our products used in Thermal Weapon Sights (TWS) program as the U.S. government transitions to new programs. We are in qualification for the US military's Family of Weapon Sights (FWS) program. The FWS program has several sub-programs and we are currently proposing to be a supplier for the FWS-I and FWS-C programs. As part of the qualification process we are receiving low volume orders for the FWS-I program. Industrial Applications represents customers who purchase our display products for use in headsets used for applications in public safety and equipment such as 3D metrology. Sales of our products for use in 3D metrology applications in 2016 have increased as compared to 2015. For the first quarter of 2015, a substantial portion of our Research & Development (R&D) revenue was earned from customers funding development efforts associated with Wearable Applications. The decline in R&D from 2015 to 2016 is because these customers either discontinued the program or the products moved into the commercialization phase. Consumer Applications primarily represents customers who purchase our products for personal electronics applications.

International sales represented 64% and 27% of product revenues for the nine months ended September 24, 2016 and September 26, 2015, respectively. Our international sales are primarily denominated in U.S. currency. Consequently, a strengthening of the U.S. dollar could increase the price in local currencies of our products in foreign markets and make our products relatively more expensive than competitors' products that are denominated in local currencies, leading to a reduction in sales or profitability in those foreign markets. In addition, our Korean subsidiary, Kowon, holds U.S. dollars. As a result, our financial position and results of operations are subject to exchange rate fluctuation in transactional and functional currency. We have not taken any protective measures against exchange rate fluctuations, such as purchasing hedging instruments with respect to such fluctuations, because of the historically stable exchange rate between the Japanese yen, Great Britain pound, Korean won and the U.S. dollar.

Cost of Component Revenues.

Cost of product revenues (in millions):	Three Months Ended		Nine Months Ended	
	September 2016	September 2015	September 2016	September 2015
Cost of product revenues (in millions):	\$4.6	\$ 5.4	\$13.9	\$ 17.0
Cost of product revenues as a % of net product revenues	82.8 %	75.3 %	88.8 %	71.6 %

For the three and nine months ended September 24, 2016, cost of product revenues, which is comprised of materials, labor and manufacturing overhead related to the production of our products, increased as a percentage of revenues in

2016 as compared to 2015 because in the third quarter of 2015 a customer decreased their forecasted orders for products and as such we billed at higher price per unit in accordance with the contractual terms which increased revenues by approximately \$1.8 million with no corresponding increase in cost of sales in the quarter and the under absorption of fixed costs due to lower volume of sales.

18

Table of Contents

Research and Development. Research and development (R&D) expenses are incurred in support of internal development programs or programs funded by agencies or prime contractors of the U.S. government and commercial partners. In fiscal year 2016, our R&D expenditures will be related to our display products and wearable technologies. R&D revenues associated with funded programs are presented separately in revenue in the statement of operations. Research and development costs include staffing, purchases of materials and laboratory supplies, circuit design costs, fabrication and packaging of display products, and overhead. For the three and nine months ended September 24, 2016 and September 26, 2015, R&D expense was as follows (in millions):

	Three Months Ended		Nine Months Ended	
	September 24, 2016	September 26, 2015	September 24, 2016	September 26, 2015
Funded	\$ 0.2	\$ 0.7	\$ 0.4	\$ 2.8
Internal	3.9	3.3	11.9	11.0
Total research and development expense	\$ 4.1	\$ 4.0	\$ 12.3	\$ 13.8

Funded R&D expense for the nine months ended September 24, 2016 decreased as compared to the prior year due to a reduction in programs with customers developing products for Wearable Applications. The decrease occurred because customers either discontinued the program or the products moved into the commercialization phase. For the nine months ended September 24, 2016, internal R&D costs increased as compared to the same period in 2015 due to investments in Wearable product development and military programs. We expect to incur significant development costs in fiscal year 2016 to commercialize our Wearable technologies.

Selling, General and Administrative. Selling, general and administrative (S,G&A) expenses consist of the expenses incurred by our sales and marketing personnel and related expenses, and administrative and general corporate expenses.

	Three Months Ended		Nine Months Ended	
	September 24, 2016	September 26, 2015	September 24, 2016	September 26, 2015
Selling, general and administration expense (in millions):	\$ 4.0	\$ 4.6	\$ 12.0	\$ 14.1
Selling, general and administration expense as a % of revenues	68.7 %	57.0 %	73.9 %	51.2 %

S,G&A decreased for the nine months ended September 24, 2016 as compared to the same period in 2015, reflecting a decrease in professional and consulting fees and patent amortization which were partially offset by higher compensation expense.

Gain on sale of property and plant. In June 2016, our subsidiary Kowon sold its plant and the land the plant resided on and we recorded a gain on the sale of \$7.7 million.

Other Income and Expense

	Three Months Ended		Nine Months Ended	
	September 24, 2016	September 26, 2015	September 24, 2016	September 26, 2015
Other income and expense (in millions):	\$(1.2)	\$ 1.2	\$(1.5)	\$ 9.6

Other income and expense, net, is primarily composed of interest income, foreign currency transaction and remeasurement gains and losses incurred by our Korean and UK-based subsidiaries and gains and losses resulting from the impairment or sale of investments. During the three and nine months ended September 24, 2016, we recorded \$1.1 million and \$1.6 million of foreign currency losses. During the three and nine months ended September 26, 2015, we recorded \$0.6 million and \$1.0 million of foreign currency gains. During the three and nine months ended September 26, 2015 we sold investments and recorded \$0.4 million and \$8.0 million of gains, respectively. During the nine months ended September 26, 2015, we recorded a non-cash gain of \$1.3 million as a result of recording warrants determined to be derivative assets. We received the warrants in August 2013 as part of a restructuring of debt owed by Vuzix Corporation to us. Upon receipt of the warrants, we should have recorded the value of the warrants of approximately \$352,000 in our consolidated financial statements. Subsequently, we

determined that we should have marked to market the warrants at the end of each reporting period. Had we recorded the warrants in our consolidated financial statements and marked to market the warrants as of December 28, 2013 and December 27, 2014, we would have recorded gains in our statement of operations of approximately \$646,000 and \$171,000, respectively. In the first quarter of 2015, we recorded the warrants in our

Table of Contents

condensed consolidated financial statements and as a result recorded a gain of approximately \$1.3 million with \$817,000 attributed to prior periods.

During the third quarter of 2016, the Company discovered embezzlement activities at Kowon, its Korean subsidiary. The amount stolen for the nine month period ended September 24, 2016 was approximately \$420,000.

Equity Losses in Unconsolidated Affiliates. For the nine months ended September 26, 2015, the equity loss in unconsolidated affiliate of \$47,000 represents our funding of the operations of one of our investments.

Tax Provision. For the three and nine months ended September 24, 2016, we recorded a tax provision of \$114,000 and \$2.2 million respectively, for estimated foreign income taxes, an increase in estimated foreign withholding on anticipated future remitted earnings of an foreign subsidiary and estimated state income tax, as compared to a tax benefit of \$62,500 and \$37,500, respectively, for the three and nine months ended September 26, 2015.

Net Income Attributable to Noncontrolling Interest. As of September 24, 2016, we owned approximately 93% of the equity of Kowon and 80% of the equity of eMDT. Net loss attributable to noncontrolling interest on our consolidated statement of operations represents the portion of the results of operations of our majority owned subsidiaries which is allocated to the shareholders of the equity interests not owned by us. The change in net income attributable to noncontrolling interest is the result of the change in the results of operations of Kowon and eMDT for the three and nine month periods ended September 24, 2016 and Kowon, Kopin Software Ltd and eMDT for the three and nine month periods ended September 26, 2015. In October 2015, we acquired the remaining equity of Kopin Software Ltd. for £1 as part of a transaction in which we contributed the intellectual property of two software products for 17.5% equity ownership in a new company formed to commercialize the software products.

Liquidity and Capital Resources

As of September 24, 2016, we had cash and equivalents and marketable securities of \$84.0 million and working capital of \$76.9 million compared to \$80.7 million and \$89.9 million, respectively, as of December 26, 2015. The change in cash and equivalents and marketable securities was primarily due to net outflow of cash used in operating activities of \$20.0 million, offset by cash provided by investing activities of \$20.7 million. The cash provided by investing activities was primarily from the receipt of final installment of \$15 million from the 2013 sale of our III-V product line and investment in Kopin Taiwan Corporation and the sale of our Korean subsidiary plant and land for approximately \$8.1 million.

Cash and marketable debt securities held in U.S. dollars:

Domestic	\$63,713,314
Foreign	9,012,195
Subtotal cash and marketable debt securities	72,725,509
Cash and marketable debt securities held in other currencies and converted to U.S. dollars	11,307,273
Total cash and marketable debt securities	\$84,032,782

We have no plans to repatriate the cash and marketable debt securities held in our foreign subsidiaries FDD and Kopin Software Ltd. and, as such, we have not recorded any deferred tax liability with respect to such cash. The manufacturing operations at our Korean facility, Kowon, have ceased. Kowon has approximately \$19.2 million of cash and marketable debt securities which we anticipate will eventually be remitted to the U.S. and, accordingly, we have recorded deferred tax liabilities associated with its unremitted earnings.

In December 2016, we entered into an agreement with a Chinese company under which they will acquire 7,589,000 shares of unregistered stock of the Company for approximately USD \$24.7 million. The transaction is subject to standard closing conditions and government approval.

We lease facilities located in Westborough, Massachusetts, San Jose, California and Scotts Valley, California under non-cancelable operating leases. The Westborough, San Jose and Scotts Valley leases expire in 2023, 2021 and 2018, respectively.

We lease a facility in Dalgety Bay, Scotland which expires in 2019, two facilities in Nottingham, United Kingdom, which expire in 2016 and 2017, respectively, an office in Hong Kong which expires in 2018 and an office in Japan which expires in 2017.

Table of Contents

We expect to expend between \$2 million and \$3 million on capital expenditures over the next twelve months. We own approximately 93% of Kowon, our Korean subsidiary. The owners of the remaining 7% have expressed a desire to sell their shares to the Company. We are evaluating whether to purchase the shares.

As of September 24, 2016, we had U.S. federal and state tax loss carry-forwards, which may be used to offset U.S. future federal and state taxable income. We also had tax loss carry-forwards generated in our foreign subsidiaries which may be used to offset future foreign taxable income. We may be subject to alternative minimum taxes, foreign taxes and state income taxes depending on our taxable income and sources of taxable income.

Historically, we have financed our operations primarily through public and private placements of our equity securities and cash generated from operations. We believe our available cash resources will support our operations and capital needs for at least the next twelve months.

Seasonality

There has been no seasonal pattern to our sales in fiscal years 2016 and 2015.

Contractual Obligations

The following is a summary of our contractual payment obligations for operating leases as of September 24, 2016:

Contractual Obligations	Total	Less than 1 year	1-3 Years	3-5 years	More than 5 years
Operating Lease Obligations	\$6,094,310	\$ 1,218,401	\$2,043,354	\$2,488,625	\$2,459,222
					\$ 373,333

Item 3. Quantitative and Qualitative Disclosures about Market Risk

We invest our excess cash in high-quality U.S. government, government-backed (i.e: Fannie Mae, FDIC guaranteed bonds and certificates of deposit) and corporate debt instruments, which bear lower levels of relative risk. We believe that the effect, if any, of reasonably possible near-term changes in interest rates on our financial position, results of operations, and cash flows should not be material to our cash flows or income. It is possible that interest rate movements would increase our unrealized gain or loss on interest rate securities. We are exposed to changes in foreign currency exchange rates primarily through our translation of our foreign subsidiaries' financial position, results of operations, and transaction gains and losses as a result of non U.S. dollar denominated cash flows related to business activities in Asia and Europe, and remeasurement of U.S. dollars to the functional currency of our U.K. and Kowon subsidiaries. We are also exposed to the effects of exchange rates in the purchase of certain raw materials which are in U.S. dollars but the price on future purchases is subject to change based on the relationship of the Japanese yen to the U.S. dollar. We do not currently hedge our foreign currency exchange rate risk. We estimate that any market risk associated with our international operations is unlikely to have a material adverse effect on our business, financial condition or results of operation. Our portfolio of marketable debt securities is subject to interest rate risk although our intent is to hold securities until maturity. The credit rating of our investments may be affected by the underlying financial health of the guarantors of our investments. We use silicon wafers but do not enter into forward or futures hedging contracts.

Item 4. Controls and ProceduresEvaluation of Disclosure Controls and Procedures

As of the end of the period covered by this Quarterly Report on Form 10-Q, Kopin carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of our disclosure controls and procedures, (as defined in Rule 13a-15(e) under the Securities and Exchange Act of 1934, as amended, ("the Exchange Act")). Disclosure controls and procedures are controls and other procedures designed to reasonably assure that information required to be disclosed in our reports filed or submitted under the Exchange Act, such as this Quarterly Report on Form 10-Q, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures are also designed to reasonably assure that this information is accumulated and communicated to our management, including the Chief Executive Officer and the Chief Financial Officer, to allow timely decisions regarding required disclosure.

Based on that evaluation, Kopin's Chief Executive Officer and Chief Financial Officer have concluded that, as of September 24, 2016, our disclosure controls and procedures were not effective as a result of the material weaknesses that existed in our internal control over financial reporting described below.

Notwithstanding the material weaknesses discussed below, our Chief Executive Officer and Chief Financial Officer have concluded that the consolidated financial statements included in this report fairly present, in all material respects, our financial

Table of Contents

condition, results of operations and cash flows for the periods presented in conformity with accounting principles generally accepted in the United States.

Material Weaknesses in Internal Control over Financial Reporting

A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis. Management identified the following material weaknesses as of September 24, 2016:

- We did not maintain effective controls related to segregation of duties with respect to the establishment of bank accounts, cash disbursements, the cash reconciliation process, and posting of journal entries.

- We did not maintain effective controls related to the monitoring and oversight of accounting and financial reporting functions and reviews of financial statements.

While these material weaknesses did not result in any material misstatement of our historical financial statements, they did result in errors in income statement classifications for each of the respective quarterly periods in the three and nine-month periods ended September 24, 2016 and September 26, 2015, which were corrected by immaterial restatement of the quarterly financial statements included in the Company's 2016 Annual Report on Form 10-K.

Management's Plan to Remediate the Material Weaknesses

Our Korean subsidiary had stopped production in 2013 and was maintained by a small staff, pending sale of the facilities, which occurred in June of 2016. The Company seal, which was necessary to commit the embezzlement, was removed from local management's control by December 31, 2016 and now resides with an independent party. Local management must now make requests of the Company's corporate accounting department to execute transactions. The Company's corporate accounting department coordinates with the independent party to execute any transactions. IN addition, enhanced reviews of bank statements, account reconciliations and supporting analysis are now being performed by the Company's corporate accounting department.

Management believes that these efforts will effectively remediate the material weaknesses. However, the material weaknesses in our internal control over financial reporting will not be considered remediated until the new controls are fully implemented, in operation for a sufficient period of time and tested and concluded by management to be designed and operating effectively, and we cannot provide any assurance that these remediation efforts will be successful or that our internal control over financial reporting will be effective as a result of these efforts. In addition, as the Company continues to evaluate and work to improve its internal control over financial reporting, management may determine to take additional measures to address control deficiencies or determine to modify the remediation plan described above. Management will test and evaluate the implementation of these new processes and internal controls during its 2017 fiscal year to ascertain whether they are designed and operating effectively to provide reasonable assurance that they will prevent or detect a material error in the Company's financial statements. Subject to the foregoing, management believes these remediation efforts will be completed by December 30, 2017.

Changes in Internal Control over Financial Reporting

Except for the material weaknesses described above, there were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the period covered by this Quarterly Report on Form 10-Q that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 5. None

Part II. OTHER INFORMATION

Item 1. Legal Proceedings

We may engage in legal proceedings arising in the ordinary course of business. Claims, suits, investigations and proceedings are inherently uncertain and it is not possible to predict the ultimate outcome of such matters and our business, financial condition, results of operations or cash flows could be affected in any particular period.

22

Table of Contents

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A. "Risk Factors" in our Annual Report on Form 10-K for our fiscal year ended December 26, 2015. The risks discussed in our Annual Report on Form 10-K could materially affect our business, financial condition and future results. The risks described in our Annual Report on Form 10-K are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially and adversely affect our business, financial condition or operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Sale of Unregistered Securities

In the past three years we have not sold any securities which were not registered under the Securities Act.

Use of Proceeds

The information required by this item regarding use of proceeds by the Company is reported herein in Part I, Item 2 under "Liquidity and Capital Resources".
