ITEM 7.01. Regulation FD Disclosure.

Rentrak Corporation has entered into an agreement with an AT&T subsidiary to measure AT&T U-verse(SM) TV viewing patterns across traditional broadcast and cable network linear television, Video On Demand (VOD) and Digital Video Recorder (DVR) programming aggregated on a totally anonymous basis from all set-top boxes across AT&T's U-verse distribution footprint.

Rentrak receives completely anonymized data which cannot be matched, traced or targeted to any specific subscriber or to the name, physical address, IP address, telephone number or any other personally identifiable information of any specific TV viewer.

As part of the agreement, AT&T will co-market with Rentrak the TVEssentials service to content providers, local TV stations and marketing clients. The data will provide programmers, advertisers and marketing agencies with information regarding programming and advertising such as the total number of subscribers watching a particular program, average length of time customers viewed a program, and to what extent subscribers fast forwarded through all commercial breaks or just specific commercials via a DVR. Rentrak believes the anonymous data from the full U-verse subscriber base meets a significant market demand for non-sample viewership data.
