The carrying amount of goodwill for the quarter ended July 29, 2005 increased from the end of fiscal 2004 by \$62.1 million to \$1,058.7 million. The purchase price allocation to goodwill for the Samuel Cabot acquisition is preliminary and is subject to change upon completion of a post closing valuation.

Total intangible amortization expense for the nine months ended July 29, 2005 was \$3.6 million, compared to \$3.3 million for the same period last year. Estimated amortization expense for each of the five succeeding fiscal years based on the intangible assets as of July 29, 2005 is expected to be approximately \$4.8 million annually.

NOTE 6: SEGMENT INFORMATION

Edgar Filing: VALSPAR CORP - Form 10-Q

In accordance with Statement of Financial Accounting Standards No. 131 (SFAS 131), Disclosures about Segments of an Enterprise and Related Information, and based on the nature of the Company's products, technology, manufacturing processes, customers, and regulatory environment, the Company has determined that it operates its business in two reportable segments: Paints and Coatings.

Table of Contents

-8-

THE VALSPAR CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
JULY 29, 2005 CONTINUED

SFAS 131 requires an enterprise to report segment information in the same way that management internally organizes its business for assessing performance and making decisions regarding allocation of resources. The Company evaluates the performance of operating segments and allocates resources based on profit or loss from operations before interest expense and taxes (EBIT).

The Paints segment includes the products from the Architectural, Automotive and Specialty (AAS) product line. AAS products include interior and exterior decorative paints, primers, varnishes and specialty decorative products, such as enamels, aerosols and faux finishes for the do-it-yourself and professional markets in North America. Other Paints products include automotive refinish paints and high performance floor paints.

The Coatings segment includes the products from the Industrial and Packaging product lines. Industrial products include a broad range of decorative and protective coatings for metal, wood, plastic and glass. Packaging products include both interior and exterior coatings used in rigid packaging containers, principally food containers and beverage cans. The products of this segment are sold throughout the world.

The Company's remaining activities are included in All Other. These activities include specialty polymers and colorants that are used internally and sold to other coatings manufacturers, as well as composites (gelcoats and related products) and furniture protection plans. Also, included within All Other are the administrative expenses of the Company's corporate headquarters site. The administrative expenses include interest and amortization expense, certain environmental-related expenses and other expenses not directly allocated to any other operating segment.

In the following table, sales between segments are recorded at selling prices that are below market prices, generally intended to recover internal costs. Segment EBIT includes income realized on inter-segment sales. Comparative results for the three and nine months ended July 29, 2005 and July 30, 2004 on this basis are as follows:

(Dollars in thousands)	Three Months Ended		Nine Months Ended

NOTE 7: FINANCIAL INSTRUMENTS

The Company's involvement with derivative financial instruments is limited principally to managing well-defined interest rate and foreign currency exchange risks. Forward foreign currency exchange contracts are used primarily to hedge the impact of currency fluctuations on certain inter-company transactions.

The Company also holds interest rate swaps used to manage the interest rate risk associated with its borrowings. The interest rate swap contracts are reflected at fair value in the condensed consolidated balance sheets. Amounts to be paid or received under the contracts are accrued as interest rates change and are recognized over the life of the contracts as an adjustment to interest expense. Credit risk is only applicable to gains on derivatives.

At July 29, 2005, the Company had a \$100 million notional amount interest rate swap contract designated as a cash flow hedge to pay a fixed rate of interest and receive variable rates of interest based on LIBOR. This contract began during fiscal 2004 and will mature during fiscal 2008. The Company also had a \$100 million notional amount interest rate swap contract designated as a fair value hedge to pay floating rates of interest based on LIBOR, maturing during fiscal 2008. As the critical terms of the interest rate swaps and hedged debt match, there is an assumption of no ineffectiveness for these hedges.

During the quarter, the Company entered into \$150 million and \$100 million of treasury locks to hedge, or lock-in, interest rates on anticipated long-term debt the Company planned to issue during fiscal year 2005 and during fiscal year 2007, respectively. The treasury locks are derivative instruments as defined by SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, and as the critical terms of the treasury locks and hedged debt match, there is an assumption of no ineffectiveness for these hedges. Once the treasury locks are terminated, any realized gain or loss will be reclassified ratably to our statements of income as a component of interest expense over the term of debt. The \$150 million treasury lock was terminated on July 12, 2005, as a result of the bond issuance during the quarter, yielding a deferred pre-tax loss of \$0.9 million. This loss is reflected, net of tax, in accumulated other comprehensive loss in our consolidated balance sheet as of July 29, 2005 and will be reclassified ratably to our statements of income as an increase to interest expense over the term of the related debt.

THE VALSPAR CORPORATION AND SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
 JULY 29, 2005 CONTINUED

On July 15, 2005, the Company issued \$150.0 million of unsecured, unsubordinated notes that mature on August 1, 2015 and have a coupon rate of 5.10% via a private placement under Rule 144A of the Securities Act of 1933. The net proceeds of \$148.9 million were used to pay off short-term borrowings, including borrowings used to finance our acquisition of Samuel Cabot Incorporated in June 2005. The notes include covenants that, with certain exceptions, restrict our ability to incur debt secured by liens, engage in certain sale-leaseback transactions. The covenants may also, under certain limited circumstances, restrict our ability to merge and consolidate or sell all or substantially all of our assets. We have agreed to file a registration statement with the Securities and Exchange Commission relating to an exchange offer of new notes with terms substantially identical to the existing notes, or under circumstances, to file a shelf registration statement covering re-sales of the existing notes.

NOTE 8: GUARANTEES AND CONTRACTUAL OBLIGATIONS

The Company sells extended furniture protection plans and offers warranties for certain of its products. For the furniture protection plans, revenue is deferred over the contract period, generally five years, and is recognized based on the ratio of costs incurred to estimated total costs at program completion. For product warranties, the Company estimates the costs that may be incurred under these warranties based on historical claim data and records a liability in the amount of such costs at the time revenue is recognized. The Company periodically assesses the adequacy of these recorded amounts and adjusts as necessary.

Changes in the recorded amounts during the period are as follows (dollars in thousands):

Balance, October 29, 2004	\$ 88,376
Additional net deferred revenue/accrual made during the period	25,268
Payments made during the period	(16,435)
	<hr/>
Balance, July 29, 2005	\$ 97,209
	<hr/>

NOTE 9: STOCK PLANS

Under the Company's Stock Option Plans, options for the purchase of up to 10,250,000 shares of common stock may be granted to officers, employees, and non-employee directors. Options are issued at market value at the date of grant and are exercisable in full or in part over a prescribed period of time. The Company accounts for these plans under the recognition and measurement principles of APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and related interpretations. No stock-based employee compensation is reflected in income, as all options granted under these plans had an exercise price equal to the market value of the underlying common stock on the date of grant. The following table illustrates the effect on net income and earnings per share if the Company had applied the fair value recognition provisions of FASB Statement No. 123, *Accounting for Stock-Based Compensation*, to stock-based employee compensation.

NOTE 11: SUBSEQUENT EVENTS

On August 17, 2005, the Company announced a two-for-one stock split, effected in the form of a 100% stock dividend. The shares used in the basic and diluted earnings per share computation and the basic and diluted earnings per share amounts have been retroactively restated to reflect the stock split in accordance with Statement of Financial Accounting Standards (SFAS) 128. On August 15, 2005, prior to the Board of Director's approval of the stock split, the Company issued its third quarter earnings release. Accordingly, the shares and earnings per share amounts did not reflect the stock split and are presented in the table below:

	Three Months Ended		Nine Months Ended

Shareholders of record as of the close of business on September 2, 2005, will receive one additional share for every one share owned. The additional shares will be distributed on September 23, 2005.

In December 2004, the FASB issued Staff Position No. 109-2, *Accounting and Disclosure Guidance for the Foreign Earnings Repatriation Provision within the American Jobs Creation Act of 2004*, (FSP No. 109-2). FSP No. 109-2 provides guidance with respect to recording the impact of the repatriation provisions of the American Jobs Creation Act of 2004 (The AJCA). Among its many provisions, the AJCA provides a one-time opportunity to repatriate the undistributed earnings of our non-U.S. subsidiaries during the fiscal year ended 2005 at a U.S. tax cost that may be lower than the normal tax cost on such distributions. During the third quarter of 2005, the Company finalized its repatriation plan under the AJCA and recorded tax expense associated with the plan of \$1.0 million.

NOTE 13: NEW PRONOUNCEMENTS

The Financial Accounting Standards Board (FASB) issued FASB Statement No. 123R, Shareholder Based Payment on December 16, 2004. This statement requires companies to measure and recognize compensation cost relating to share-based payment transactions in a company's financial statements. That cost will be measured based on the fair value of the equity or liability instruments issued. Statement No. 123R covers a wide range of share-based compensation arrangements including share options, restricted share plans, performance-based awards, share appreciation rights, and employee share purchase plans. Originally, this statement was effective for public companies as of the first interim or annual reporting period beginning after June 15, 2005 or the fourth quarter of fiscal year 2005. On April 14, 2005, the Securities and Exchange Commission adopted a rule that allows companies to implement Statement 123R at the beginning of their next fiscal year, instead of the next reporting period that begins after June 15, 2005. Under such rules, the Company will adopt SFAS 123R in the first quarter of fiscal 2006. At that time, we will begin recognizing compensation expense related to unvested stock-based awards and newly granted awards. The Company is currently evaluating the impact of the adoption of this statement on its financial position and results of operations.

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview: In the third quarter of fiscal 2005, our sales increased compared to the prior year, primarily due to higher selling prices to customers. However, we continued to experience increases in the cost of our raw materials, compared to the prior year period. This continues a trend of raw material cost increases that began in the second half of fiscal 2004. This factor reduced our gross margin in the third quarter from the 2004 levels, although net income for the quarter was up slightly compared to the prior year period. Our near-term ability to return to historical levels of gross margins depends on our ability to implement further price increases to offset increases in raw material costs.

We also announced in the third quarter the planned closure of seven manufacturing facilities as the first phase of a broad-based strategy to reduce our manufacturing capacity and better utilize our remaining plants. By the end of 2006, we plan to reduce manufacturing capacity worldwide by approximately 10%.

Critical Accounting Policies: There were no material changes in the Company's critical accounting policies during the quarter and nine months ended July 29, 2005.

Operations: Consolidated net sales increased 10.7% in the quarter to \$725.5 million from \$655.6 million in the prior year. Excluding the positive effect of foreign currency exchange and acquisitions, net sales increased 6.8% in the quarter. Consolidated net sales increased 10.7% in the nine-month period to \$1,988.6 million from \$1,795.6 million in the prior year. Excluding the positive effect of foreign currency exchange and acquisitions, net sales increased 7.1% in the nine-month period.

Net sales for the Paints segment increased 7.0% to \$245.2 million in the quarter compared to the prior year. Net sales increased 6.6% to \$637.6 million year to date compared to the same period last year. Before acquisitions and excluding the positive effect of foreign currency exchange, core sales growth in Paints was 1.3% and 2.2% in the third quarter and year to date, respectively. Paints sales growth in the quarter was primarily attributable to favorable price/mix, partially offset by lower volumes in the architectural business driven by a reduction in our customer's inventories. Net sales for the Coatings segment increased 12.4% to \$409.6 million in the quarter compared to the same period last year. Net sales increased 11.2% to \$1,148.8 million year to date compared to the prior year. Before acquisitions and excluding the positive effect

Edgar Filing: VALSPAR CORP - Form 10-Q

of foreign currency exchange, core sales growth in Coatings was 9.1% and 7.7% in the third quarter and year to date, respectively. Coatings core sales growth in the quarter was primarily attributable to higher selling prices to customers and stronger demand in international markets. Due to the seasonal nature of the Company's business, sales for the third quarter are not necessarily indicative of sales for the full year.

In the third quarter of 2005, consolidated gross profit increased \$10.9 million from the prior year to \$219.6 million. As a percent of consolidated net sales, consolidated gross profit during the third quarter of 2005 decreased to 30.3% from 31.8%. Excluding the impact in the third quarter for the planned closure of seven manufacturing facilities of \$3.1 million, the gross margin decreased to 30.7% from 31.8%. For the nine-month period, consolidated gross profit increased \$9.4 million to \$580.5 million. As a percent of consolidated net sales, consolidated gross profit during the nine-month period of 2005 decreased to 29.2% from 31.8%. The decrease in gross profit in the third quarter and year to date was caused by continued increases in raw material costs, partially offset by price increases.

Consolidated operating expenses (research and development, selling and administrative) increased 8.2% to \$134.2 million (18.5% of consolidated net sales) in the third quarter of 2005 from \$124.0 million (18.9% of consolidated net sales) in 2004. For the nine-month period, consolidated operating expenses increased 6.4% to \$396.0 million (19.9% of consolidated net sales) from \$372.2 million (20.7% of consolidated net sales) in the prior year. As a percent of consolidated net sales, expenses decreased in the third quarter primarily due to the effect of sales growing faster than expenses and tight expense controls.

Third quarter earnings before interest and taxes (EBIT) increased \$0.6 million or 0.8% from the prior year third quarter. First nine months EBIT decreased \$13.6 million or 6.9% from the prior year. Foreign currency exchange fluctuation had an immaterial effect on EBIT. EBIT in the Paints segment decreased to \$30.4 million from \$38.3 million in the prior year third quarter. The decrease in EBIT in the quarter was largely attributable to higher raw material costs, partially offset by higher prices to customers. Year to date EBIT in the Paints segment decreased to \$63.4 million from \$88.3 million. As a percent of net sales for the Paints segment, EBIT decreased to 12.4% from 16.7% in the prior year third quarter and to 10.0% from 14.8% in the prior year to date period. EBIT in the Coatings segment increased to \$52.1 million from \$46.3 million in the prior year third quarter. The increase in EBIT in the quarter was primarily driven by revenue growth. Year to date EBIT in the Coatings segment decreased to \$120.9 million from \$126.7 million. As a percent of net sales for the Coatings segment, EBIT remained unchanged at 12.7%

from the prior year third quarter and decreased to 10.5% from 12.3% in the prior year to date period. Due to the seasonal nature of the Company's business, EBIT for the third quarter is not necessarily indicative of EBIT for subsequent quarters or for the full year.

Interest expense increased to \$11.5 million in the third quarter of 2005 from \$10.3 million in the third quarter of 2004. The increase was primarily driven by higher interest rates on borrowings as well as higher debt levels related to the Samuel Cabot acquisition and share repurchases. Year to date interest expense increased to \$33.0 million in 2005 from \$31.2 million in the prior year. The year to date increase in interest expense was driven by higher interest rates on borrowings and higher debt levels.

Other expense remained unchanged at \$2.0 million in both the third quarter and the same period last year.

The effective tax rate decreased from 38.0% in the third quarter last year to 36.3% in the third quarter of 2005. The third quarter tax rate includes the accrual of tax for our planned repatriation under the American Jobs Creation Act that is mostly offset by an audited and approved research and development credit claim. The tax rate decreased from 38% to 35.5% for the nine-month period in 2005. The decline in the quarter and year to date tax rate is primarily related to an improvement in the geographical mix of earnings. We expect our effective tax rate from continuing operations to be approximately 36% for the remainder of 2005.

Net income in the third quarter of 2005 increased 1.8% to \$45.7 million or \$0.44 per diluted share. For the nine-month period, net income decreased 5.6% to \$96.7 million or \$0.92 per diluted share.

Edgar Filing: VALSPAR CORP - Form 10-Q

Financial Condition: The net cash provided by the Company's operations was \$66.3 million for the first nine months of 2005, compared with net cash provided by operations of \$116.8 million for the first nine months of 2004. For the first nine months of 2005, \$143.0 million in proceeds from bank borrowings and sale of treasury stock were used to fund \$119.6 million in acquisitions and capital expenditures, \$59.9 million in treasury stock purchases, and \$30.6 million in dividend payments.

The cash generated from net income was reduced by increases in accounts receivable and inventories, along with decreases in accrued liabilities and accounts payable. Accounts receivable increased \$43.8 million as a result of increased sales primarily driven by increased customer pricing. Inventory increased \$24.5 million due to higher raw material costs. Accrued liabilities and accounts payable decreased \$29.6 million as a result of timing of disbursements.

Capital expenditures for property, plant and equipment were \$40.9 million in the first nine months of 2005, compared with \$39.2 million in the first nine months of 2004. The Company expects capital spending in 2005 to be in the range of \$60 to \$65 million.

The ratio of total debt to capital increased to 45.3% at the end of third quarter of 2005 compared to 41.8% at the close of fiscal 2004. The total debt to capital ratio as of July 30, 2004 was 44.0%. The Company believes its cash flow from operations, existing lines of credit, access to credit facilities and access to debt and capital markets will be sufficient to meet its current and projected needs for financing. The Company has a five-year \$500 million unsecured committed revolving multi-currency credit facility with a syndicate of banks maturing November 2005. The intent of the Company is to replace this facility with a new credit facility on or before November 2005.

There were no material changes in the Company's fixed cash obligations during the nine months ended July 29, 2005.

Off-Balance Sheet Financing: The Company has no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on its financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

Forward-Looking Statements: This discussion contains certain forward-looking statements. These forward-looking statements are based on management's expectations and beliefs concerning future events. Forward-looking statements are necessarily subject to risks, uncertainties and other factors, many of which are outside the control of the Company that could cause actual results to differ materially from such statements. These uncertainties and other factors include, but are not limited to, dependence of internal earnings growth on economic conditions and growth in the domestic and international coatings industry; risks related to any future acquisitions, including risks of adverse changes in the results of acquired businesses and the assumption of unforeseen liabilities; risks of disruptions in business resulting from the integration process and higher interest costs resulting from further borrowing for any such acquisitions; our reliance on the efforts of vendors, government agencies, utilities and other third parties to achieve adequate compliance and avoid disruption of our business; risks of disruptions in business resulting from the Company's relationships with customers and suppliers; unusual weather conditions adversely affecting sales; changes in raw materials pricing and availability; delays in passing along cost increases to customers; changes in governmental regulation, including more stringent environmental, health and safety regulations; the nature, cost and outcome of pending and future litigation and other legal proceedings; the outbreak of war and other significant national and international events; and other risks and uncertainties. The foregoing list is not exhaustive, and the Company disclaims any obligations to subsequently revise any forward-looking statements to reflect events or circumstances after the date of such statements.

ITEM 3: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company's foreign sales and results of operations are subject to the impact of foreign currency fluctuations. The Company has not hedged its exposure to translation gains and losses; however, it has reduced its exposure by borrowing funds in local currencies. A 10% adverse change in foreign currency rates would not have a material effect on the Company's results of operations or financial position.

The Company is also subject to interest rate risk. At July 29, 2005, approximately 30% of the Company's total debt consisted of floating rate debt. From time to time, the Company may enter into interest rate swaps to hedge a portion of either its variable or fixed rate debt. Assuming the current level of borrowings, a 10% increase in interest rates from those in effect at the end of the third quarter would not have a material effect on the Company's results of operations or financial position.

ITEM 4: CONTROLS AND PROCEDURES

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of our disclosure controls and procedures, as such term is defined under Rules 13a-15(e) or 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the Exchange Act), as of the end of the period covered by this report. Based on their evaluation, our Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective.

There have been no significant changes (including corrective actions with regard to significant deficiencies or material weaknesses) in our internal controls or in other factors that could significantly affect these controls subsequent to the date of the evaluation referenced above.
