Ventana Medical Systems, Inc.

Notes to Condensed Consolidated Financial Statements

(in thousands, except per share data)

(Unaudited)

1. Organization and Significant Accounting Policies

Organization: Ventana Medical Systems, Inc. (Ventana or the Company) develops, manufactures and markets proprietary instrument and reagent systems that automate diagnostic procedures used for molecular analysis of tissues and cells. At present, the Company's principal markets are North America, Europe, Japan and Australia.

Basis of Presentation: The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three months ended March 31, 2003 are not necessarily indicative of the results that may be expected for the year ended December 31, 2003. For further information, refer to the consolidated financial statements and footnotes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2002.

Recent Accounting Pronouncements: In January 2003, the FASB issued FIN No. 46, Consolidation of Variable Interest Entities, an interpretation of Accounting Research Bulletin No. 51. FIN No. 46 requires certain variable interest entities, or VIEs, to be consolidated by the primary beneficiary of the entity if the equity investors in the entity do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties. FIN No. 46 is effective for all VIEs created or acquired after January 31, 2003. For VIEs created or acquired prior to February 1, 2003, the provisions of FIN No. 46 must be applied for the first interim or annual period beginning after June 15, 2003. The Company currently has no contractual relationship or other business relationship with a variable interest entity and therefore the adoption of FIN No. 46 did not have a material effect on the Company's consolidated financial position, results of operations or cash flows.

Stock-Based Employee Compensation: At March 31, 2003, the Company has six stock-based employee compensation plans. The Company accounts for those plans under the recognition and measurement principles of Accounting Principles Board Opinion No. 25 (APB 25), Accounting for Stock Issued to Employees, and related Interpretations. No stock-based employee compensation cost is reflected in net income, as all options granted under those plans had an exercise price equal to the market value of the underlying common stock on the date of grant.

The following table illustrates the effect on net income and earnings per share if the company had applied the fair value recognition provisions of Statement of Financial Accounting Standards No. 123 (SFAS No. 123), Accounting for Stock-Based Compensation, to stock-based employee compensation:

Table of Contents**Ventana Medical Systems, Inc.**

Notes To Condensed Consolidated Financial Statements (continued)

	Three Months Ended	
	March 31,	
	2003	2002
Net income (loss), as reported	\$ 1,419	\$ (555)
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	(2,251)	(2,206)
Pro-forma net income (loss)	\$ (832)	\$ (2,761)
Earnings per share:		
Basic as reported	\$ 0.09	\$ (0.03)
Basic pro forma	\$ (0.05)	\$ (0.17)
Diluted as reported	\$ 0.09	\$ (0.03)
Diluted pro forma	\$ (0.05)	\$ (0.17)

As required, the pro forma disclosures above include options granted since January 1, 1995. Consequently, the effects of applying SFAS No. 123 for providing pro forma disclosures may not be representative of the effects on reported net income for future years until all options outstanding are included in the pro forma disclosures. For purposes of pro forma disclosures, the estimated fair value of stock-based compensation plans and other options is amortized to expense primarily over the vesting period.

Reclassification: Certain prior year amounts have been reclassified to conform to the current period presentation.

2. Inventories

Inventories consist of the following:

March 31, 2003	December 31, 2002
---------------------------	------------------------------

Edgar Filing: VENTANA MEDICAL SYSTEMS INC - Form 10-Q

Raw material and work-in-process	\$ 4,974	\$ 5,541
Finished goods	8,427	9,366
Valuation reserve	(950)	(1,006)
	<u> </u>	<u> </u>
	\$ 12,451	\$ 13,901
	<u> </u>	<u> </u>

Table of Contents**Ventana Medical Systems, Inc.**

Notes To Condensed Consolidated Financial Statements (continued)

3. Comprehensive Income (Loss)

The components of comprehensive income (loss) for the three months ending March 31, 2003 and 2002 are as follows:

	Three Months Ended	
	March 31,	
	2003	2002
Net income (loss)	\$ 1,419	\$ (555)
Foreign currency translation	(26)	(290)
Comprehensive income (loss)	\$ 1,393	\$ (845)

Accumulated comprehensive income (loss) consists exclusively of foreign currency translation adjustments.

4. Provision for Income Taxes

Income tax expense consists of certain state and international tax expenses for the three month period ended March 31, 2003 relating to taxable income in such jurisdictions. Income tax expense with respect to domestic income generated during the same period was offset by the utilization of existing net operating loss carryforwards. The Company also evaluated the recoverability of its net deferred tax assets and determined that the balances existing at March 31, 2003 represented the amount that is more likely than not of being recovered in the foreseeable future. Accordingly, the valuation reserve associated with the Company's gross deferred tax assets was reduced to the extent net operating loss carryforwards were utilized in the quarter ended March 31, 2003.

5. Line of Credit

The Company has a \$12,000 line of credit arrangement with a bank that is subject to renewal in August 2004. Borrowings under the line are collateralized by the Company's receivables, inventories, and machinery and equipment. The line of credit contains certain financial covenants (measured quarterly) with which the Company must comply, prohibits the payment of dividends on the Company's stock and limits the number of treasury shares the Company may purchase. In addition, borrowings are limited to 50% of outstanding accounts receivable plus 25% of the

Edgar Filing: VENTANA MEDICAL SYSTEMS INC - Form 10-Q

value of finished goods of the Company, which as of March 31, 2003 resulted in available borrowing of \$12,000, of which, \$2,160 has been committed in support of various standby letters of credit. At March 31, 2003 the Company was in compliance with all covenants.

Table of Contents**Ventana Medical Systems, Inc.**

Notes To Condensed Consolidated Financial Statements (continued)

6. Stock Repurchase

On September 8, 1998, the Company's Board of Directors authorized the Company to repurchase up to 750 shares of its common stock in the open market or in privately negotiated transactions. During the three months ended March 31, 2003, the Company purchased 40.4 shares of its common stock for \$750. The repurchased shares were returned to the status of authorized but unissued shares. The timing and amount of any future repurchases will depend on market conditions and corporate considerations.

7. Operating Segment and Enterprise Data

The Company has two reportable segments: North America (the United States and Canada) and International (primarily Europe, Japan and Australia). Segment information for the three months ended March 31, 2003 and 2002 are as follows:

	Three months ended March 31, 2003			
	U.S.	International	Eliminations	Totals
Sales to external customers	\$ 20,938	\$ 8,322	\$	\$ 29,260
Segment profit (loss)	294	1,125		1,419
Segment assets	119,802	25,415	(19,723)	125,494
Three months ended March 31, 2002				
	U.S.	International	Eliminations	Totals
Sales to external customers	\$ 16,974	\$ 5,208	\$	\$ 22,182
Segment profit (loss)	(637)	82		(555)
Segment assets	110,664	22,991	(20,550)	113,105

8. Commitments and Contingencies

On March 8, 2002, Ventana filed a patent infringement action against CytoLogix in Arizona Federal District Court, Case No. CIV02-117TUCRCC, alleging infringement of U.S. Patent No. 6,352,861 (Automated Biological Reaction Apparatus) by the making, using and selling of the ARTISAN automated staining system. The suit seeks injunctive relief including a preliminary injunction against the continued making, using and selling of the instrument. On April 19, 2002, the court issued an Order that reflects the agreement of CytoLogix to stop marketing and selling the ARTISAN automated staining system in its infringing embodiment until the matter is decided at the preliminary

Edgar Filing: VENTANA MEDICAL SYSTEMS INC - Form 10-Q

injunction hearing postponed to December, 2002. In September 2002, DAKO Cytomation announced it had purchased the ARTISAN product line from CytoLogix. In December CytoLogix filed a motion to dismiss the case. In January 2003, we filed a motion opposing that motion, and asking the court to re-schedule the Preliminary Injunction hearing.

Table of Contents

Ventana Medical Systems, Inc.

Notes To Condensed Consolidated Financial Statements (continued)

8. Commitments and Contingencies (Continued)

The case was dismissed with prejudice by the court on March 28, 2003, the court reasoning that, based on representations made by CytoLogix President and Chief Science Officer that CytoLogix would no longer infringe the 6,352,861 patent, and since Ventana was no longer seeking damages, the case was moot.

CytoLogix Corp. has filed three separate actions against us in various courts. The first action is CYTOLOGIX v. VENTANA, Case No. 00-12231 REK, filed October 27, 2000 in federal district court in Boston. The complaint claims, under state-law based unfair competition law, that Ventana misappropriated CytoLogix's trade secrets related to individual slide heating and incorporated such secrets into our DISCOVERY[®] and BENCHMARK[®] instruments. CytoLogix seeks assignment of our patent applications relating to individual slide heating claiming the idea, treble damages (unspecified amount) and an injunction against our further sales of DISCOVERY[®] and BENCHMARK[®] instruments. In February 2002, CytoLogix filed a motion to amend their complaint to add the related claims of attempted monopolization and monopolization under the Sherman Act, and various Lanham Act violations which was allowed by the court. Previously this case and the patent infringement dispute, Case No. 01-10178 REK (see below) had been consolidated for discovery; they were bifurcated for trial at the January 28, 2003 status conference. This case is not presently scheduled for trial. We believe that we have meritorious defenses to the claims in this action and that resolution of this matter will not have a material adverse effect on our business, financial condition or results of operation; however, the results of the proceeding are uncertain and there can be no assurance to that effect.

The second is CYTOLOGIX v. VENTANA, Case No. 4 Ni 54/00 (EU) (Nullity suit), filed November 9, 2000 in the German Federal Patent Court, Munich, Germany. In a decision at the oral hearing March 20, 2002, the German Federal Patent Court ruled that our German patent no. DE 69117052.5, which covers various aspects of our previous generation GENII[®] automated slide staining system, is invalid. The technology addressed by the German patent is unrelated to the technologies involved in any of the other patent litigations, including the individual slide heating technology that is the subject of the Boston-based patent litigation. The decision affects our ability to enforce this patent in Germany subject to an appeal and final decision on validity. On May 22, 2002, we filed an appeal to the German Federal Court of Justice seeking that the previous judgment be set aside, and that the complaint be dismissed substituting an amended claim into the patent. We have been advised by German patent counsel that the appeal process will take up to two years; therefore, we do not expect a decision until the second or third quarter of 2004. It is management's opinion that there will be no material adverse outcome from this matter.

The third action is CYTOLOGIX v. VENTANA, Case No. 01-10178 REK, filed January 30, 2001 in the U.S. District Court, Eastern District of Massachusetts. This complaint claims that we infringed on CytoLogix's patent No. 6,180,061, entitled "Moving Platform Slide Stainer with Heating Elements," and was later amended to add U.S. Patent No. 6,183,693, issued February 7, 2001, entitled "Random Access Slide Stainer with Independent Slide Heating Regulation," both assigned to CytoLogix. CytoLogix seeks assignment of our patent applications claiming the independent slide heater idea, treble damages (unspecified amount) and an injunction against our further sales of DISCOVERY[®] and BENCHMARK[®] instruments. At the pre-trial hearing on February 3, 2003, the trial was indefinitely postponed until sometime in the Fall 2003, however no specific trial date has been set. A pre-trial hearing date is set for August 13, 2003.

Table of Contents

Ventana Medical Systems, Inc.

Notes To Condensed Consolidated Financial Statements (continued)

8. Commitments and Contingencies (Continued)

We believe that we have meritorious defenses to the claims in this action and that resolution of this matter will not have a material adverse effect on our business, financial condition or results of operation; however, the results of the proceeding are uncertain and there can be no assurance to that effect.

On November 19, 2001 a patent infringement claim was filed against us titled DIGENE CORPORATION v. VENTANA MEDICAL SYSTEMS, INC., (Case No. 01-752) in Delaware Federal District Court. This complaint alleges that we infringed two US patents held by Digene, U.S. 4,849,331 and 4,849,332 by activities relating to our INFORM® HPV High-risk and Low-risk probe products. We filed an answer denying the allegations on February 4, 2002. The parties have filed cross-motions for summary judgment. In addition, in November 2002 Digene filed a motion to amend its complaint to add numerous causes of action related to our September 2002 acquisition of Beckman Coulter's HPV business. Digene seeks, among other remedies, an injunction against the sale of our INFORM products, unspecified monetary damages, cancellation of the Beckman HPV acquisition, and related claims. A hearing was held March 5, 2003 on several pending motions, however the court only ruled on one of them, allowing Digene to amend its amended complaint. The other motions are currently awaiting decision. On March 28, 2003, Ventana received a copy of a letter sent by Institut Pasteur, Paris, France, to Beckman Coulter purporting to be notice of termination of the sublicense agreement existing between them, which was sold to Ventana in September, 2002. The court is currently considering the impact of this letter on the litigation, and is receiving briefing on the matter from both parties. We believe that we have meritorious defenses to the claims in this action and that resolution of this matter will not have a material adverse effect on our business, financial condition or results of operation; however, the results of the proceeding are uncertain and there can be no assurance to that effect.

On January 2, 2003, Ventana filed a Complaint in Arizona Federal District Court naming Vision Systems Ltd., (Vision) an Australian biomedical company, for infringement of U.S. Patent Nos. 5,355,439 (Method and Apparatus for Automated Tissue Assay) and 6,352,861 (Automated Biological Reaction Apparatus). The Company served its suit on Vision on March 20, 2003. Vision filed its response April 2, 2003 which included a motion to dismiss the Tucson action. No date for hearing has been set. The Company believes its allegations are meritorious and that it will prevail, however, results of the proceedings are uncertain and there can be no assurance to that effect.

On March 5, 2003 Ventana was served with a Summons and Complaint by Vision Biosystems, Ltd. (Vision) for Declaratory Judgment seeking a declaration of no infringement and invalidity of US patents 5,355,439 and 6,352,861, both owned by Ventana, in the U.S. Federal Court for the Eastern District of Massachusetts. The Complaint alleges that Ventana has asserted that Vision's BOND® system infringes both of the aforementioned patents, and that Vision has a reasonable apprehension of being sued. In addition to invalidity and non-infringement declarations, Vision also alleges tortious interference with business advantage under Massachusetts law. On March 24, 2003 the Company filed its motion to dismiss or transfer the case for lack of jurisdiction on the grounds that it filed first in Tucson, and should be accorded deference on that basis. We believe our defenses are meritorious and that we will prevail, however, results of the proceedings are uncertain and there can be no assurance to that effect.

Ventana Medical Systems, Inc.

Item 2. Management's Discussion and Analysis of Financial Conditions and Results of Operations

The following discussion of the financial condition and results of operations of the Company should be read in conjunction with the Condensed Consolidated Financial Statements and related Notes thereto included elsewhere in this Form 10-Q. This Report on Form 10-Q contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements, by their very nature, contain risks and uncertainties. Accordingly, actual events or results may differ materially from those anticipated by such forward-looking statements. A wide variety of factors could cause or contribute to such differences and could adversely impact revenues, profitability, cash flows and capital needs. Such factors, many of which are beyond the Company's control, include the following: market acceptance of new automated histology products, continued success in asset management, continued improvements in our manufacturing efficiencies, on-schedule launches of our new products, currency exchange rate variability, adverse determinations in various outstanding litigations, competition and competitive pressures on pricing and general economic conditions in the United States and in the regions served by the Company.

Results of Operations

Net Sales

Net sales for the three months ended March 31, 2003 increased 32% compared to the same period in 2002 to \$29.3 million from \$22.2 million. This sales growth was attributable to a 40% increase in instrument sales, primarily due to an increased number of placement conversions generated in the clinical market. Reagents and other sales increased 30%, primarily due to the growth in the underlying installed base and the expansion of the Company's reagent menu. By geographic segment, total sales increased in the first quarter of 2003 compared to the same period in 2002 by 23% and 59% in the US (\$20.9 million versus \$17.0 million) and internationally (\$8.3 million versus \$5.2 million) respectively.

Gross Profit

Gross profit for the three months ended March 31, 2003 increased to \$20.8 million from \$15.4 million for the same period in 2002. The Company's gross margin for the three months ended March 31, 2003 increased to 71% from 69% for the same period in 2002 primarily due to the higher mix of reagent and other sales, which have a higher gross margin than instruments.

Table of Contents**Ventana Medical Systems, Inc.****Item 2. Management's Discussion and Analysis of Financial Conditions and Results of Operations***Research and Development*

Research and development spending for the three months ended March 31, 2003 increased to \$4.3 million from \$3.6 million for the same period in 2002. The increase results primarily from several major platform development projects underway including the Benchmark XT and the H&E Primary Stainer together with investment in expanding the Company's life science capabilities.

Selling, General and Administrative (SG&A)

Presented below is a summary of SG&A expense for the three months ended March 31, 2003 and 2002:

	(in thousands)			
	Three Months Ended			
	March 31,			
	2003		2002	
	\$	% Net Sales	\$	% Net Sales
Sales and marketing	\$ 10,748	37%	\$ 8,772	40%
Administration	3,945	13%	2,936	13%
Total SG&A	\$ 14,693	50%	\$ 11,708	53%

SG&A expense for the three months ended March 31, 2003 increased to \$14.7 million from \$11.7 million for the same period in 2002. The increase is primarily attributed to increased investments in our sales and marketing infrastructure and outside service expenses including costs associated with various legal matters. As a percentage of sales, SG&A expense has decreased by 300 basis points for the three-month period due to focused cost containment while growing top line revenues.

Amortization of Intangible Assets

Edgar Filing: VENTANA MEDICAL SYSTEMS INC - Form 10-Q

Intangible assets consist primarily of developed technology, customer base, supply and license agreements, and patents. These assets are amortized on a straight-line basis over estimated useful lives ranging from four to nine years, resulting in quarterly costs approximating \$0.5 million. Estimated amortization expense for intangible assets as of March 31, 2003 for each of the five succeeding fiscal years is as follows (all amounts are in millions): 2003: \$1.9, 2004: \$1.9, 2005: \$1.6, 2006: \$1.4, 2007: \$0.8.

Item 2. Management's Discussion and Analysis of Financial Conditions and Results of Operations

Interest and Other Income (Expense)

Interest and other income for the three months ended March 31, 2003 increased to \$168,000 from \$3,000 for the same period in 2002. The increase is primarily due to higher average investment balances in 2003 compared to 2002.

Risk Factors

We may be required to bring litigation to enforce our intellectual property rights, which may result in substantial expense.

We rely on patents to protect our intellectual property rights. The strength of this protection, however, is uncertain. In particular, it is not certain that:

our patents and pending patent applications use technology that we invented first;

we were the first to file patent applications for these inventions;

others will not independently develop similar or alternative technologies or duplicate our technologies;

any of our pending patent applications will result in issued patents; or

any patents issued to us will provide a basis for commercially viable products, will provide us with any competitive advantages or will not face third party challenges or be the subject of further proceedings limiting their scope

We may become involved in interference proceedings in the U.S. Patent and Trademark Office to determine the priority of our inventions. We could also become involved in opposition proceedings in foreign countries challenging the validity of our patents. In addition, costly litigation could be necessary to protect our patent position. Patent law relating to the scope of claims in the technology fields in which we operate is still evolving and, consequently, patent positions in our industry are generally uncertain. We may not prevail in any lawsuit or, if we do prevail, we may not receive commercially valuable remedies. Failure to protect our patent rights or intellectual property could harm us.

We also rely on trade secrets, unpatented proprietary know-how and continuing technological innovation that we seek to protect with confidentiality agreements with employees, consultants and others with whom we discuss our business. These individuals may breach our confidentiality agreements and our remedies may not be adequate to enforce these agreements. Disputes may arise concerning the ownership of intellectual property or the applicability or enforceability of these agreements, and we may not be able to resolve these disputes in our favor. Furthermore, our competitors may independently develop trade secrets and proprietary technology similar to ours. We may not be able to maintain the confidentiality of information relating to our products.

Table of Contents

Ventana Medical Systems, Inc.

Item 2. Management's Discussion and Analysis of Financial Conditions and Results of Operations

Our products could infringe the intellectual property rights of others, which may cause us to engage in costly litigation and, if we are not successful, could cause us to pay substantial damages and prohibit us from selling our products.

Third parties may assert patent, trademark or copyright infringement or other intellectual property claims against us based on their patents or other intellectual property. We may be required to pay substantial damages, including treble damages, for past infringement if it is ultimately determined that our products infringe a third party's intellectual property rights. Even if infringement claims against us are without merit, defending a lawsuit takes significant time, may be expensive and may divert management's attention from other business concerns. If we are not successful in a lawsuit, we may be unable to sell our products or continue to sell our products until we obtain a license from the owner of the relevant technology or other intellectual property rights. Even if a license is available, it may require us to pay substantial royalties.

Although we feel that we have strong legal defenses to both infringement allegations, if we received an adverse determination in the CytoLogix litigation, described in *Item 3. Legal Proceedings*, and are determined to infringe CytoLogix's patents for Moving Platform Slide Stainer With Heating Elements (U.S. 6,180,061), or Random Access Slide Stainer with Independent Slide Heating Regulation (U.S. 6,183,693), we might be enjoined from manufacturing or selling our DISCOVERY® and BENCHMARK® instruments, two of our principal products, which could reduce our sales revenue.

In addition, in November 2001, a complaint was filed by Digene Corporation, Gaithersburg, MD, alleging that we infringe upon two patents with the sale of our INFORM® HPV High-risk and Low-risk probe products. Although we feel that we have strong legal defenses to both infringement allegations, if we received an adverse determination, we might be enjoined or otherwise restricted from selling our INFORM® HPV probes, which could reduce our sales revenue.

If our customers do not receive adequate third-party reimbursement, our products may not be accepted in the market.

In the United States, our products are primarily purchased by medical institutions and laboratories that bill third-party payers such as government health administration authorities, private health coverage insurers, managed care organizations and other similar organizations. Our ability to earn sufficient returns on our products will depend in part on the extent to which reimbursement for our products and related treatments will be available to our customers from third-party payers. Third-party payers are increasingly attempting to limit both the coverage and the level of reimbursement of products to contain costs. If third-party payers are successful in such efforts, our ability to sustain revenue growth and profitably will be adversely effected.

If government funding is reduced, the ability of research centers to purchase our products may also be reduced.

Edgar Filing: VENTANA MEDICAL SYSTEMS INC - Form 10-Q

Some of our products are sold to universities, research laboratories, private foundations and other institutions where funding is dependent upon grants from government agencies, such as the National Institutes of Health. Research funding by the government could be significantly reduced and could materially affect the ability of many of our research customers to purchase our products.

Table of Contents

Ventana Medical Systems, Inc.

Item 2. Management's Discussion and Analysis of Financial Conditions and Results of Operations

If we fail to develop new products, we may not be profitable in the future.

A large part of our future growth and profitability will be dependent on our ability to develop, introduce and market new instruments and reagents used in disease diagnosis and treatment selection. We depend, in part, on the success of medical research done by others in developing new antibodies, nucleic acid probes and clinical diagnostic procedures that can be adapted for use in our systems. We may need to license some of these technologies. We may not be able to enter into these licenses on terms that would allow us to economically develop and market new products. If this were to occur, our operating results would suffer.

We face intense competition and rapid technological change that could result in products that are superior to the products we are developing.

We have numerous competitors in the United States and abroad. These competitors include Sakura Fine Technical, DAKO Cytomation A/S, BioGenex Laboratories, Lab Vision Corporation, Digene Corporation, Genomic Solutions, and Molecular Dynamics. These competitors may develop technologies and products that are more effective or less costly than our current or future products or that could render our technologies and products obsolete or noncompetitive. Many of these competitors have greater experience and name recognition. If we are not able to compete effectively, our result would suffer.

We need to convince the medical community of the superiority of our product to be successful.

The use of automated systems to perform diagnostic tests is relatively new. Historically, laboratory personnel have manually performed diagnostic tests that are now performed by our automated systems. Our ability to sell products is dependent on our ability to demonstrate to the medical community the benefits of automated diagnostic testing using our products. The quality and price of our products compared to manual testing and to our competitor's products will affect acceptance and sales of our products. If the medical community were not receptive to our products, our results would suffer.

If we fail to obtain or maintain necessary FDA clearances or approvals for our products, or if clearances or approvals are delayed, we will be unable to commercially distribute and market our products in the United States.

In the United States, the FDA regulates, as medical devices, instruments, diagnostic tests and reagents that are traditionally manufactured and commercially marketed as equipment or finished test kits. Some clinical laboratories, however, purchase clinical products, which are marketed as analytic specific reagents, or ASRs, and develop and prepare their own finished diagnostic tests called "home brews." The FDA restricts the sale

Edgar Filing: VENTANA MEDICAL SYSTEMS INC - Form 10-Q

of these products to clinical laboratories certified under the Clinical Laboratory Improvement Amendments of 1988, known as CLIA, to perform high complexity testing. We intend to market some diagnostic products as finished test kits , and others as individual reagents. Consequently, these clinical products will be regulated as medical devices

Ventana Medical Systems, Inc.

Item 2. Management's Discussion and Analysis of Financial Conditions and Results of Operations

If we make future acquisitions, such acquisitions may not be profitable.

We may make additional acquisitions of complementary businesses, products or technologies in the future. Acquisitions of companies, divisions of companies, or products entail numerous risks. We cannot assure that we will not incur problems in any future acquisitions, or that future acquisitions will increase our profitability. We also cannot assure that we will realize value from any acquisitions that would justify the consideration paid.

We depend on key personal to grow and sustain our business.

We are dependent upon the retention of principal members of our management, Board of Directors, scientific, technical, marketing and sales staffs and the recruitment of additional personnel. Except as otherwise, described in other sections, we do not have employment agreements with any of our executive officers and we do not maintain key person life insurance on any of our personnel. We compete with other companies, academic institutions, government entities and other organizations for qualified personnel. Our inability to hire or retain qualified personnel could cause our results of operations to suffer.

If we have problems with key suppliers, our product development and commercialization efforts could be delayed or stopped.

Our reagent products are formulated from chemical and biological materials using proprietary technology, and standard processing techniques. We purchase components and raw materials used to make our reagent products from single-source vendors. We cannot assure that the materials or reagents needed will be available in commercial quantities or at acceptable prices. Any supply interruption or yield problems encountered in the use of materials from these vendors could have a significant effect on our ability to manufacture our products. Developing an alternative or additional suppliers could be time consuming and expensive.

A number of components used to manufacture instruments are made on a custom basis to our specifications and are available from a limited number of sources. If the supply of materials or components from any of these vendors were delayed or interrupted for any reason, or if the quality or reliability of the materials or components is not adequate for use in our instruments, our ability to make instruments in a timely fashion could be impaired and our results of operations would suffer.

We deal with hazardous materials and generate hazardous wastes and must comply with environmental laws and regulations, which can be expensive and restrict how we do business. We could also be liable for damages or penalties, if we are involved in a hazardous material or waste spill or other accident.

Edgar Filing: VENTANA MEDICAL SYSTEMS INC - Form 10-Q

Our manufacturing processes, primarily those involved in producing some of our reagent products, require the use of potentially hazardous and carcinogenic chemicals. We are subject to federal, state and local laws and regulations governing the use, manufacture, storage, handling and disposal of these materials and waste. In the event of a hazardous material or waste spill or other accident, we could also be liable for damages or penalties. In addition, we may be liable or potentially liable for injury or contamination that results from our, or a third party's, use of these materials, and our liability could exceed our total assets.

Table of Contents

Ventana Medical Systems, Inc.

Item 2. Management's Discussion and Analysis of Financial Conditions and Results of Operations

We cannot assure that we will be able to fund our future capital requirements through internal sources, our existing line of credit or from other sources.

We anticipate that our existing capital resources and borrowing capacity will be adequate to satisfy our capital requirements for the next 12 months. Our future capital requirements will depend on many factors including:

- the extent that our products gain market acceptance;
- the mix of instruments placed through direct sales, rental or through our PEP program;
- the progression of our product development programs;
- competing technological and market developments;
- expansion of our sales and marketing activities;
- the cost of manufacturing scale-up activities;
- possible acquisitions of complementary businesses, products or technologies; and
- our ability to sustain profitability with the uncertain timing of regulatory approvals.

We may require additional capital resources and cannot assure that capital will be available to the extent required, on terms acceptable to us, or at all. Any such future capital requirements could result in the issuance of equity securities, which may affect the market price of our common stock and would dilute the interests of our existing stockholders.

Liquidity and Capital Resources

As of March 31, 2003, the Company's principal source of liquidity consisted of cash and cash equivalents of \$20.9 million. The Company also had an unused \$12.0 million revolving bank credit facility of which \$2.2 million has been committed in support of various standby letters of credit. Borrowings under the Company's bank credit facility are secured by the Company's receivables, inventories, machinery and equipment, and intellectual property and bear interest at the bank's prime rate.

During the three months ended March 31, 2003, net cash provided by operating and investing activities increased to \$2.0 million versus (\$3.1) million in the three months ended March 31, 2002. The increase was primarily associated with improved profitability in 2003 and lower spending on property and equipment due to the completion of our new facility in 2001.

Edgar Filing: VENTANA MEDICAL SYSTEMS INC - Form 10-Q

We believe that our current cash and cash equivalents, line of credit and cash generated from operations will satisfy funding requirements including working capital and capital expenditures for the foreseeable future.

Table of Contents

Ventana Medical Systems, Inc.

Item 2. Management's Discussion and Analysis of Financial Conditions and Results of Operations

Foreign Currency Risk

The value of the U.S. Dollar affects our financial results. Changes in exchange rates may positively or negatively affect our revenues, gross margins, operating expenses and shareholders' equity as expressed in U.S. Dollars. We have determined that hedging of non-U.S. dollar net monetary assets is not cost effective, at the present time and instead attempt to minimize currency exposure risk through working capital management. There can be no assurance that such an approach will be successful, especially if a significant or sudden decline occurs in the value of local currencies. We conduct a growing portion of our business in the Euro, the Japanese Yen, and the Australian Dollar.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

At March 31, 2003, our only cash equivalent investments are in money market accounts and overnight reverse repurchase agreements (\$17.5 million) that are reflected as cash equivalents because all maturities are within 90 days. Our interest rate risk with respect to existing investments is limited due to the short-term duration of these arrangements and the yields earned which approximate current interest rates.

At present, we have only \$2.5 million in debt obligations and there are \$2.2 million of borrowings under our line of credit facility at March 31, 2003. As such, our interest rate risk is limited with respect to existing debt. A sizable portion of our revenue and capital spending is transacted in U.S. Dollars. However, we do at times enter into these transactions in other currencies, such as the Euro, the Japanese Yen and the Australian Dollar. No hedging transactions were entered into to limit this exposure.

Item 4. Controls and Procedures

Under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, we conducted an evaluation of our disclosure controls and procedures, as such term is defined under Rule 13a-14(c) promulgated under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), within 90 days of the filing date of this report. Based on their evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures are effective.

There have been no significant changes (including corrective actions with regard to significant deficiencies or material weaknesses) in our internal controls or in other factors that could significantly affect these controls subsequent to the date of the evaluation referenced in paragraph above.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

On March 8, 2002, Ventana filed a patent infringement action against CytoLogix in Arizona Federal District Court, Case No. CIV02-117TUCRCC, alleging infringement of U.S. Patent No. 6,352,861 (Automated Biological Reaction Apparatus) by the making, using and selling of the ARTISAN automated staining system. The suit seeks injunctive relief including a preliminary injunction against the continued making, using and selling of the instrument. On April 19, 2002, the court issued an Order that reflects the agreement of CytoLogix to stop marketing and selling the ARTISAN automated staining system in its infringing embodiment until the matter is decided at the preliminary injunction hearing postponed to December, 2002. In September 2002, DAKO Cytomation announced it had purchased the ARTISAN product line from CytoLogix. In December CytoLogix filed a motion to dismiss the case. In January 2003, we filed a motion opposing that motion, and asking the court to re-schedule the Preliminary Injunction hearing.

The case was dismissed with prejudice by the court on March 28, 2003, the court reasoning that, based on representations made by CytoLogix President and Chief Science Officer that CytoLogix would no longer infringe the 6,352,861 patent, and since Ventana was no longer seeking damages, the case was moot.

CytoLogix Corp. has filed three separate actions against us in various courts. The first action is CYTOLOGIX v. VENTANA, Case No. 00-12231 REK, filed October 27, 2000 in federal district court in Boston. The complaint claims, under state-law based unfair competition law, that Ventana misappropriated CytoLogix's trade secrets related to individual slide heating and incorporated such secrets into our DISCOVERY[®] and BENCHMARK[®] instruments. CytoLogix seeks assignment of our patent applications relating to individual slide heating claiming the idea, treble damages (unspecified amount) and an injunction against our further sales of DISCOVERY[®] and BENCHMARK[®] instruments. In February 2002, CytoLogix filed a motion to amend their complaint to add the related claims of attempted monopolization and monopolization under the Sherman Act, and various Lanham Act violations which was allowed by the court. Previously this case and the patent infringement dispute, Case No. 01-10178 REK (see below) had been consolidated for discovery; they were bifurcated for trial at the January 28, 2003 status conference. This case is not presently scheduled for trial. We believe that we have meritorious defenses to the claims in this action and that resolution of this matter will not have a material adverse effect on our business, financial condition or results of operation; however, the results of the proceeding are uncertain and there can be no assurance to that effect.

The second is CYTOLOGIX v. VENTANA, Case No. 4 Ni 54/00 (EU) (Nullity suit), filed November 9, 2000 in the German Federal Patent Court, Munich, Germany. In a decision at the oral hearing March 20, 2002, the German Federal Patent Court ruled that our German patent no. DE 69117052.5, which covers various aspects of our previous generation GENII[®] automated slide staining system, is invalid. The technology addressed by the German patent is unrelated to the technologies involved in any of the other patent litigations, including the individual slide heating technology that is the subject of the Boston-based patent litigation. The decision affects our ability to enforce this patent in Germany subject to an appeal and final decision on validity. On May 22, 2002, we filed an appeal to the German Federal Court of Justice seeking that the previous judgment be set aside, and that the complaint be dismissed substituting an amended claim into the patent. We have been advised by German patent counsel that the appeal process will take up to two years; therefore, we do not expect a decision.

Table of Contents

Ventana Medical Systems, Inc.

until the second or third quarter of 2004. It is management's opinion that there will be no material adverse outcome from this matter.

The third action is CYTOLOGIX v. VENTANA, Case No. 01-10178 REK, filed January 30, 2001 in the U.S. District Court, Eastern District of Massachusetts. This complaint claims that we infringed on CytoLogix's patent No. 6,180,061, entitled "Moving Platform Slide Stainer with Heating Elements," and was later amended to add U.S. Patent No. 6,183,693, issued February 7, 2001, entitled "Random Access Slide Stainer with Independent Slide Heating Regulation," both assigned to CytoLogix. CytoLogix seeks assignment of our patent applications claiming the independent slide heater idea, treble damages (unspecified amount) and an injunction against our further sales of DISCOVERY® and BENCHMARK® instruments. At the pre-trial hearing on February 3, 2003, the trial was indefinitely postponed until sometime in the Fall 2003, however no specific trial date has been set. A pre-trial hearing date is set for August 13, 2003. We believe that we have meritorious defenses to the claims in this action and that resolution of this matter will not have a material adverse effect on our business, financial condition or results of operation; however, the results of the proceeding are uncertain and there can be no assurance to that effect.

On November 19, 2001 a patent infringement claim was filed against us titled DIGENE CORPORATION v. VENTANA MEDICAL SYSTEMS, INC., (Case No. 01-752) in Delaware Federal District Court. This complaint alleges that we infringed two US patents held by Digene, U.S. 4,849,331 and 4,849,332 by activities relating to our INFORM® HPV High-risk and Low-risk probe products. We filed an answer denying the allegations on February 4, 2002. The parties have filed cross-motions for summary judgment. In addition, in November 2002 Digene filed a motion to amend its complaint to add numerous causes of action related to our September 2002 acquisition of Beckman Coulter's HPV business. Digene seeks, among other remedies, an injunction against the sale of our INFORM products, unspecified monetary damages, cancellation of the Beckman HPV acquisition, and related claims. A hearing was held March 5, 2003 on several pending motions, however the court only ruled on one of them, allowing Digene to amend its amended complaint. The other motions are currently awaiting decision. On March 28, 2003, Ventana received a copy of a letter sent by The Institute Pasteur, Paris, France, to Beckman Coulter, purporting to be notice of termination of the sublicense agreement existing between them, which was sold to Ventana in September, 2002. The court is currently considering the impact of this letter on the litigation, and is receiving briefing on the matter from both parties. We believe that we have meritorious defenses to the claims in this action and that resolution of this matter will not have a material adverse effect on our business, financial condition or results of operation; however, the results of the proceeding are uncertain and there can be no assurance to that effect.

On January 2, 2003, Ventana filed a Complaint in Arizona Federal District Court naming Vision Systems Ltd., ("Vision") an Australian biomedical company, for infringement of U.S. Patent Nos. 5,355,439 ("Method and Apparatus for Automated Tissue Assay") and 6,352,861 ("Automated Biological Reaction Apparatus"). The Company served its suit on Vision on March 20, 2003. Vision filed its response April 2, 2003 which included a motion to dismiss the Tucson action. No date for hearing has been set. The Company believes its allegations are meritorious and that it will prevail, however, results of the proceedings are uncertain and there can be no assurance to that effect.

Table of Contents

Ventana Medical Systems, Inc.

On March 5, 2003 Ventana was served with a Summons and Complaint by Vision Biosystems, Ltd. ("Vision") for Declaratory Judgment seeking a declaration of no infringement and invalidity of US patents 5,355,439 and 6,352,861, both owned by Ventana, in the U.S. Federal Court for the Eastern District of Massachusetts. The Complaint alleges that Ventana has asserted that Vision's BOND[®] system infringes both of the aforementioned patents, and that Vision has a reasonable apprehension of being sued. In addition to invalidity and non-infringement declarations, Vision also alleges tortious interference with business advantage under Massachusetts law. On March 24, 2003 the Company filed its motion to dismiss or transfer the case for lack of jurisdiction on the grounds that it filed first in Tucson, and should be accorded deference on that basis. We believe our defenses are meritorious and that we will prevail, however, results of the proceedings are uncertain and there can be no assurance to that effect.

With respect to each of the matters above, management's estimate of the potential loss, if any, is set forth therein unless such an estimate is not possible. It is the opinion of management the ultimate resolution of these contingencies will not have a material adverse effect on the financial condition, results of operations or cash flows of the Company.
