FOR IMMEDIATE RELEASE
APRIL 19, 2005

TSX: GGG
AMEX: GLE

Glencairn Places First Ore on Leach Pads at Bellavista Mine

Glencairn Gold Corporation is pleased to announce that commissioning of its Bellavista Mine in Costa Rica is progressing on schedule with approximately 12,000 tonnes of ore currently placed on leach pads in preparation for gold recovery.

As previously announced, Glencairn expects to begin producing gold at Bellavista in the second quarter of 2005 with commercial production to begin in the third quarter. Bellavista is expected to produce an average of 60,000 ounces gold per year over eight years based on current reserves.

This is an important milestone of Glencairn's growth towards mid-tier producer status, said Kerry Knoll, President and CEO. Bellavista will push our gold production past the 100,000 ounces per year mark, lower our costs per ounce and demonstrate our ability to grow through new mine development.

Ore is being placed on the leach pads at a rate of 4,000 tonnes per day during the commissioning phase. A total of approximately 53,000 tonnes of ore at grades equal to or higher than expected from the mine's feasibility study have been mined to date. As of April 18th, 41,000 tonnes of ore

Edgar Filing: Glencairn Gold CORP - Form 6-K

have been stockpiled and approximately 608,000 tonnes of waste material mined. In addition, approximately 27,000 tonnes of ore have been prepared in the pit and are ready to be stockpiled. All conveyor systems, crushers, agglomerators and ore stackers are operating as designed.

The Company is also pleased to announce the appointment of Gary Biles, P.Eng., as General Manager for the Bellavista Mine. Mr. Biles is a Professional Engineer with more than 30 years experience in mining. He managed several mines during this time, including seven years as General Manager of the Eskay Creek gold mine in British Columbia, two years as General Manager of Claude Resources' Seabee Mine and five years as General Manager of Corona Corporation's Jolu Gold Mine.

FORWARD-LOOKING STATEMENTS: This news release contains certain forward-looking statements within the meaning of Section 21E of the United States Securities Exchange Act of 1934, as amended. Except for statements of historical fact relating to the company, certain information contained herein constitutes forward-looking statements. Forward-looking statements are frequently characterized by words such as plan, expect, project, intend, believe, anticipate, estimate and other similar words, or statements of certain events or conditions may or will occur. Forward-looking statements are based on the opinions and estimates of management at the date the

2

statements are made, and are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking statements. These factors include the inherent risks involved in the exploration and development of mineral properties, the uncertainties involved in interpreting drilling results and other geological data, fluctuating metal prices, the possibility of project cost overruns or unanticipated costs and expenses, uncertainties relating to the availability and costs of financing needed in the future and other factors. The Company undertakes no obligation to update forward-looking statements if circumstances or management's estimates or opinions should change. The reader is cautioned not to place undue reliance on forward-looking statements.
