Credit Facility contains common restrictions, including limitations on, among other things, distributions and dividends, acquisitions and investments, indebtedness, liens and affiliate transactions. The Credit Facility requires that we maintain a minimum fixed charge coverage ratio of one to one if availability under the Credit Facility is less than \$150.0. The Credit Facility's current availability significantly exceeds \$150.0. Availability is calculated as the lesser of the Credit Facility commitment or eligible collateral after advance rates, less outstanding revolver borrowings and letters of credit. We secure our Credit Facility obligations with our inventory and accounts receivable, and the Credit Facility's availability fluctuates monthly based on the varying levels of eligible

collateral.0.1080.0830.1080.0830.05000.083750.076250.076250.075002027-03-152025-03-142022-03-142024-03-142023-03-

AK STEEL HOLDING CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
(dollars in millions, except per share data, unless otherwise indicated)

NOTE 1 - Basis of Presentation

These financial statements consolidate the operations and accounts of AK Steel Holding Corporation (“AK Holding”), its wholly-owned subsidiary AK Steel Corporation (“AK Steel”), all subsidiaries in which AK Holding has a controlling interest, and two variable interest entities for which AK Steel is the primary beneficiary. Unless the context provides otherwise, references to “we,” “us” and “our” refer to AK Holding and its subsidiaries. In our opinion, the accompanying condensed consolidated financial statements contain all adjustments, consisting of normal recurring adjustments, necessary to present fairly our financial position as of June 30, 2017 and December 31, 2016, our results of operations for the three and six months ended June 30, 2017 and 2016, and our cash flows for the six months ended June 30, 2017 and 2016. Our results of operations for the three and six months ended June 30, 2017 are not necessarily indicative of the results we expect for the full year ending December 31, 2017. These condensed consolidated financial statements should be read along with our audited consolidated financial statements for the year ended December 31, 2016, included in our Annual Report on Form 10-K for the year ended December 31, 2016.

NOTE 2 - Supplementary Financial Statement Information*Inventory, net*

Inventories as of June 30, 2017 and December 31, 2016, are presented below:

	June 30, 2017	December 31, 2016
Finished and semi-finished	\$947.3	\$ 855.0
Raw materials	372.4	415.8
Total cost	1,319.7	1,270.8
Adjustment to state inventories at LIFO value	(216.2)	(156.9)
Inventory, net	\$1,103.5	\$ 1,113.9

Investments in Affiliates

We have investments in several businesses accounted for using the equity method of accounting. Cost of products sold includes \$2.2 and \$3.4 for the three months ended June 30, 2017 and 2016, and \$5.6 and \$6.3 for the six months ended June 30, 2017 and 2016, for our share of income of equity investees.

Summarized financial statement data for all investees is presented below.

	Three Months Ended June 30, 2017		Six Months Ended June 30, 2016	
	2016	2017	2016	2016

Edgar Filing: AK STEEL HOLDING CORP - Form 10-Q

Revenue	\$76.8	\$74.3	\$149.3	\$143.9
Gross profit	23.6	25.5	49.1	48.5
Net income	6.5	8.7	15.4	16.5

- 7 -

Table of Contents*Facility Idling*

In the fourth quarter of 2015, we temporarily idled the Ashland Works blast furnace and steelmaking operations (“Ashland Works Hot End”). We incurred charges during the fourth quarter of 2015 for supplemental unemployment and other employee benefit costs and for equipment idling, asset preservation and other costs. The supplemental unemployment and other employee benefit costs were recorded as accrued liabilities in the condensed consolidated balance sheet, and the activity for the six months ended June 30, 2017 and 2016 was as follows:

	Six Months Ended June 30, 2017 2016	
Balance at beginning of period	\$6.1	\$22.1
Payments	(3.0)	(10.3)
Balance at end of period	\$3.1	\$11.8

We estimate we will incur on-going costs of approximately \$2.0 per month for maintenance of the equipment, utilities and supplier obligations related to the temporarily idled Ashland Works Hot End. These costs were \$5.2 and \$5.4 for the three months ended June 30, 2017 and 2016, and \$10.8 and \$12.7 for the six months ended June 30, 2017 and 2016. The carrying value of the long-lived assets associated with the temporarily idled operations totaled approximately \$70.0 as of June 30, 2017.

NOTE 3 - Income Taxes

Income taxes recorded through June 30, 2017 and 2016, were estimated using the discrete method. Income taxes are based on our financial results through the end of the period, as well as the related change in the valuation allowance on deferred tax assets. We are unable to estimate the annual effective tax rate with sufficient precision for purposes of the effective tax rate method, which requires us to consider a projection of full-year income and the expected change in the valuation allowance. The estimated annual effective tax rate method was not reliable due to its sensitivity to small changes to forecasted annual pre-tax earnings and the effect of our valuation allowance, which create results with significant variations in the customary relationship between income tax expense and pre-tax income for the interim periods. As a result, we determined that using the discrete method is more appropriate than using the annual effective tax rate method. We have estimated the change in valuation allowances required based on our year-to-date financial results and the change in value of the identified tax-planning strategy, which is determined based on year-to-date changes in the LIFO reserve. In addition, the change in valuation allowance for the six months ended June 30, 2016 includes a \$4.4 benefit related to the realizability of certain alternative minimum tax credits.

NOTE 4 - Long-term Debt and Other Financing

Debt balances at June 30, 2017 and December 31, 2016, are presented below:

	June 30, 2017	December 31, 2016
Credit Facility	\$—	\$ —
7.50% Senior Secured Notes due July 2023 (effective rate of 8.3%)	380.0	380.0
5.00% Exchangeable Senior Notes due November 2019 (effective rate of 10.8%)	150.0	150.0

Edgar Filing: AK STEEL HOLDING CORP - Form 10-Q

7.625% Senior Notes due May 2020	—	529.8
7.625% Senior Notes due October 2021	406.2	406.2
8.375% Senior Notes due April 2022	279.8	279.8
7.00% Senior Notes due March 2027	400.0	—
Industrial Revenue Bonds due 2020 through 2028	99.3	99.3
Capital lease for Research and Innovation Center	26.3	25.2
Unamortized debt discount/premium and debt issuance costs	(51.9)	(53.7)
Total long-term debt	\$1,689.7	\$ 1,816.6

- 8-

Table of Contents

During the six months ended June 30, 2017, we were in compliance with all the terms and conditions of our debt agreements.

Credit Facility

We have a \$1,500.0 revolving credit facility (the “Credit Facility”), which expires in March 2019 and is guaranteed by AK Holding and by AK Tube LLC (“AK Tube”), AK Steel Properties, Inc. (“AK Properties”) and Mountain State Carbon LLC (“Mountain State Carbon”), three 100%-owned subsidiaries of AK Steel (referred to together as the “Subsidiary Guarantors”). The Credit Facility contains common restrictions, including limitations on, among other things, distributions and dividends, acquisitions and investments, indebtedness, liens and affiliate transactions. The Credit Facility requires that we maintain a minimum fixed charge coverage ratio of one to one if availability under the Credit Facility is less than \$150.0. The Credit Facility’s current availability significantly exceeds \$150.0. Availability is calculated as the lesser of the Credit Facility commitment or eligible collateral after advance rates, less outstanding revolver borrowings and letters of credit. We secure our Credit Facility obligations with our inventory and accounts receivable, and the Credit Facility’s availability fluctuates monthly based on the varying levels of eligible collateral. We do not expect any of these restrictions to affect or limit our ability to conduct business in the ordinary course. The Credit Facility includes a separate “first-in, last-out”, or “FILO” tranche, which allows us to use a portion of our eligible collateral at higher advance rates.

As of June 30, 2017, there were no outstanding borrowings under the Credit Facility. At June 30, 2017, our eligible collateral, after application of applicable advance rates, was \$1,335.7. Availability as of June 30, 2017 was reduced by \$70.5 for outstanding letters of credit, resulting in remaining availability of \$1,265.2.

Senior Unsecured Notes

In March 2017, AK Steel issued \$400.0 aggregate principal amount of 7.00% Senior Unsecured Notes due March 2027 (the “2027 Notes”) and generated net proceeds of \$394.0 after underwriting discount. The 2027 Notes are fully and unconditionally guaranteed by AK Holding and by the Subsidiary Guarantors. We used the net proceeds, along with cash on hand, to purchase and redeem all of our outstanding 7.625% Senior Unsecured Notes due May 2020 (the “2020 Notes”), as further discussed below. Similar to our other senior unsecured notes, the indenture governing the 2027 Notes includes covenants with customary restrictions on (a) the incurrence of additional debt by certain subsidiaries, (b) the incurrence of certain liens, (c) the incurrence of sale/leaseback transactions, and (d) our ability to merge or consolidate with other entities or to sell, lease or transfer all or substantially all of our assets to another entity. The 2027 Notes also contain customary events of default. Before March 15, 2022, we may redeem the 2027 Notes at a price equal to par plus a make-whole premium and all accrued and unpaid interest to the date of redemption. After that date, we may redeem them at 103.500% until March 15, 2023, 102.333% thereafter until March 15, 2024, 101.167% thereafter until March 15, 2025, and 100.000% thereafter, together with all accrued and unpaid interest to the date of redemption.

Concurrently with the issuance of the 2027 Notes, we repurchased \$361.3 of 2020 Notes through a cash tender offer (the “Tender Offer”) at a tender price equal to 102.125% of principal plus accrued and unpaid interest. We also subsequently redeemed all 2020 Notes that were not tendered and remained outstanding following the Tender Offer at a redemption price of 101.271% plus accrued and unpaid interest (the “2020 Notes Redemption”) in May 2017. In the second quarter of 2017, we recorded expense of \$3.4 related to the call premium paid on the 2020 Notes Redemption and the write-off of unamortized debt discount and issuance costs related to the remaining 2020 Notes redeemed in May 2017. In the first six months ended June 30, 2017, we recognized other expense of \$13.1 for expenses related to the issuance of the 2027 Notes and retirement of the 2020 Notes. Fees paid to holders of the 2020 Notes to tender their

notes and expenses paid to third parties related to the issuance of the 2027 Notes, totaling approximately \$7.5, were recognized as an adjustment of the carrying amount of the 2027 Notes and will be amortized over their term as an adjustment to interest expense.

Exchangeable Notes

AK Steel has outstanding 5.0% Exchangeable Senior Notes due November 2019 (the "Exchangeable Notes"). The indenture governing the Exchangeable Notes provides holders with an exchange right at their option before August 15, 2019, if the closing price of our common stock is greater than or equal to \$7.02 per share (130% of the exchange price of the Exchangeable Notes) for at least 20 trading days during the last 30 consecutive trading days of a calendar quarter. The triggering condition is assessed at the beginning of each quarter while any Exchangeable Notes remain outstanding. We would be required to pay cash to holders for the principal amount of the Exchangeable Notes and to pay cash or issue common stock (at our option) for the premium if any holders elect to exchange their Exchangeable Notes. As a result of meeting this trigger at January 1, 2017, a portion of the equity component of the Exchangeable Notes, calculated as the difference between the principal amount of the Exchangeable Notes and the carrying amount of the liability component of the Exchangeable Notes, was considered redeemable and classified as temporary equity of \$21.3 on the condensed consolidated balance sheets at

Table of Contents

December 31, 2016. The triggering condition was not met as of July 1, 2017. The value of the Exchangeable Notes if exchanged as of June 30, 2017, would have exceeded the principal amount by \$25.8.

NOTE 5 - Pension and Other Postretirement Benefits

We provide noncontributory pension and various healthcare and life insurance benefits to most employees and retirees. We are required to contribute \$44.1 to the master pension trust during 2017, of which \$6.0 was contributed in April 2017 and another \$6.0 was contributed in July 2017. Based on current actuarial assumptions, we estimate that our required pension contributions will be approximately \$60.0 and \$75.0 in 2018 and 2019. Factors that affect our estimates of future funding projections include return on plan assets, actuarial data and assumptions relating to plan participants, the discount rate used to measure the pension obligations and changes to regulatory funding requirements.

Net periodic benefit cost (income) for pension and other postretirement benefits was as follows:

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2017	2016	2017	2016
<u>Pension Benefits</u>				
Service cost	\$0.7	\$0.6	\$1.4	\$1.3
Interest cost	27.0	32.0	54.0	64.0
Expected return on assets	(37.5)	(42.8)	(75.1)	(85.7)
Amortization of prior service cost	1.1	1.3	2.3	2.6
Amortization of loss	2.7	7.0	5.4	14.0
Net periodic benefit cost (income)	\$(6.0)	\$(1.9)	\$(12.0)	\$(3.8)
<u>Other Postretirement Benefits</u>				
Service cost	\$1.1	\$1.2	\$2.3	\$2.4
Interest cost	4.4	4.9	8.7	9.9
Amortization of prior service cost (credit)	(14.7)	(15.1)	(29.3)	(30.2)
Amortization of (gain) loss	(1.0)	(1.0)	(2.1)	(2.1)
Net periodic benefit cost (income)	\$(10.2)	\$(10.0)	\$(20.4)	\$(20.0)

NOTE 6 - Environmental and Legal Contingencies*Environmental Contingencies*

We and our predecessors have been involved in steel manufacturing and related operations since 1900. Although we believe our operating practices have been consistent with prevailing industry standards, hazardous materials may have been released at operating sites or third-party sites in the past, including operating sites that we no longer own. If we reasonably can, we have estimated potential remediation expenditures for those sites where future remediation efforts are probable based on identified conditions, regulatory requirements or contractual obligations arising from the sale of a business or facility. For sites involving government-required investigations, we typically make an estimate of potential remediation expenditures only after the investigation is complete and when we better understand the nature and scope of the remediation. In general, the material factors in these estimates include the costs associated with

investigations, delineations, risk assessments, remedial work, governmental response and oversight, site monitoring, and preparation of reports to the appropriate environmental agencies. We have recorded the following liabilities for environmental matters on our condensed consolidated balance sheets:

	June 30, December 31,	
	2017	2016
Accrued liabilities	\$ 7.5	\$ 7.3
Other non-current liabilities	38.8	39.9

Table of Contents

We cannot predict the ultimate costs for each site with certainty because of the evolving nature of the investigation and remediation process. Rather, to estimate the probable costs, we must make certain assumptions. The most significant of these assumptions is for the nature and scope of the work that will be necessary to investigate and remediate a particular site and the cost of that work. Other significant assumptions include the cleanup technology that will be used, whether and to what extent any other parties will participate in paying the investigation and remediation costs, reimbursement of past response and future oversight costs by governmental agencies, and the reaction of the governing environmental agencies to the proposed work plans. Costs for future investigation and remediation are not discounted to their present value. If we have been able to reasonably estimate future liabilities, we do not believe that there is a reasonable possibility that we will incur a loss or losses that exceed the amounts we accrued for the environmental matters discussed below that would, either individually or in the aggregate, have a material adverse effect on our consolidated financial condition, results of operations or cash flows. However, since we recognize amounts in the consolidated financial statements in accordance with accounting principles generally accepted in the United States that exclude potential losses that are not probable or that may not be currently estimable, the ultimate costs of these environmental proceedings may be higher than the liabilities we currently have recorded in our consolidated financial statements.

Except as we expressly note below, we do not currently anticipate any material effect on our consolidated financial position, results of operations or cash flows as a result of compliance with current environmental regulations. Moreover, because all domestic steel producers operate under the same federal environmental regulations, we do not believe that we are more disadvantaged than our domestic competitors by our need to comply with these regulations. Some foreign competitors may benefit from less stringent environmental requirements in the countries where they produce, resulting in lower compliance costs for them and providing those foreign competitors with a cost advantage on their products.

According to the Resource Conservation and Recovery Act (“RCRA”), which governs the treatment, handling and disposal of hazardous waste, the United States Environmental Protection Agency (“EPA”) and authorized state environmental agencies may conduct inspections of RCRA-regulated facilities to identify areas where there have been releases of hazardous waste or hazardous constituents into the environment and may order the facilities to take corrective action to remediate such releases. Environmental regulators may inspect our major steelmaking facilities. While we cannot predict the future actions of these regulators, it is possible that they may identify conditions in future inspections of these facilities which they believe require corrective action.

Under authority from the Comprehensive Environmental Response, Compensation and Liability Act (“CERCLA”), the EPA and state environmental authorities have conducted site investigations at certain of our facilities and other third-party facilities, portions of which previously may have been used for disposal of materials that are currently regulated. The results of these investigations are still pending, and we could be directed to spend funds for remedial activities at the former disposal areas. Because of the uncertain status of these investigations, however, we cannot reliably predict whether or when such spending might be required or their magnitude.

As previously reported, on July 27, 2001, we received a Special Notice Letter from the EPA requesting that we agree to conduct a Remedial Investigation/Feasibility Study (“RI/FS”) and enter an administrative order on consent pursuant to Section 122 of CERCLA regarding our former Hamilton Plant located in New Miami, Ohio. The Hamilton Plant ceased operations in 1990, and all of its former structures have been demolished and removed. Although we did not believe that a site-wide RI/FS was necessary or appropriate, in April 2002 we entered a mutually agreed-upon administrative order on consent to perform a RI/FS of the Hamilton Plant site. We submitted the investigation portion of the RI/FS, and we completed a supplemental study in 2014. We currently have accrued \$0.7 for the remaining cost of the RI/FS. Until the RI/FS is complete, we cannot reliably estimate the additional costs, if any, we may incur for

potentially required remediation of the site or when we may incur them.

As previously reported, on September 30, 1998, our predecessor, Armco Inc., received an order from the EPA under Section 3013 of RCRA requiring it to develop a plan for investigation of eight areas of our Mansfield Works that allegedly could be sources of contamination. A site investigation began in November 2000 and is continuing. We cannot reliably estimate at this time how long it will take to complete this site investigation. We currently have accrued approximately \$1.1 for the projected cost of the study. Until the site investigation is complete, we cannot reliably estimate the additional costs, if any, we may incur for potentially required remediation of the site or when we may incur them.

As previously noted, on September 26, 2012, the EPA issued an order under Section 3013 of RCRA requiring us to develop a plan for investigation of four areas at our Ashland Works coke plant. The Ashland Works coke plant ceased operations in 2011 and all of its former structures have been demolished and removed. In 1981, we acquired the plant from Honeywell International Corporation (as successor to Allied Corporation), who had managed the coking operations there for

- 11-

Table of Contents

approximately 60 years. In response to the Section 3013 order, we submitted a Sampling and Analysis Plan (“SAP”) to the EPA on October 25, 2012, and the EPA ultimately approved it on June 27, 2014. We completed Phase I of the SAP and submitted a report to the EPA on December 23, 2014. We cannot reliably estimate how long it will take to complete the site investigation. On March 10, 2016, the EPA invited us to participate in settlement discussions regarding an enforcement action. Settlement discussions between the parties are ongoing, though whether the parties will reach agreement and any such agreement’s terms are uncertain. We currently have accrued approximately \$1.4 for the projected cost of the investigation and known remediation. Until the site investigation is complete, we cannot reliably estimate the costs, if any, we may incur for potential additional required remediation of the site or when we may incur them.

As previously reported, on July 15, 2009, we and the Pennsylvania Department of Environmental Protection (“PADEP”) entered a Consent Order and Agreement (the “Consent Order”) to resolve an alleged unpermitted discharge of wastewater from the closed Hillside Landfill at our former Ambridge Works. Under the terms of the Consent Order, we paid a penalty and also agreed to implement various corrective actions, including an investigation of the area where landfill activities occurred, submission of a plan to collect and treat surface waters and seep discharges, and upon approval from PADEP, implementation of that plan. We have accrued approximately \$5.6 for the remedial work required under the approved plan and Consent Order. We submitted a National Pollution Discharge Elimination System (“NPDES”) permit application to move to the next work phase. We currently estimate that the remaining work will be completed in 2018, though it may be delayed.

As previously reported, on June 29, 2000, the United States filed a complaint on behalf of the EPA against us in the U.S. District Court for the Southern District of Ohio, Case No. C-1-00530, alleging violations of the Clean Air Act, the Clean Water Act and RCRA at our Middletown Works. Subsequently, the State of Ohio, the Sierra Club and the National Resources Defense Council intervened. On May 15, 2006, the court entered a Consent Decree in Partial Resolution of Pending Claims (the “Consent Decree”). Under the Consent Decree, we agreed to undertake a comprehensive RCRA facility investigation at Middletown Works and, as appropriate, complete a corrective measures study. The Consent Decree required us to implement certain RCRA corrective action interim measures to address polychlorinated biphenyls (“PCBs”) in sediments and soils at Dicks Creek and certain other specified surface waters, adjacent floodplain areas and other previously identified geographic areas. We have completed the remedial activity at Dicks Creek, but continue to work on the RCRA facility investigation and certain interim measures. We have accrued approximately \$13.6 for the cost of known work required under the Consent Decree for the RCRA facility investigation and remaining interim measures.

As previously reported, on May 12, 2014, the Michigan Department of Environmental Quality (“MDEQ”) issued to our Dearborn Works an Air Permit to Install No. 182-05C (the “PTI”) to increase the emission limits for the blast furnace and other emission sources. The PTI was issued as a correction to a prior permit to install that did not include certain information during the prior permitting process. On July 10, 2014, the South Dearborn Environmental Improvement Association (“SDEIA”), Detroiters Working for Environmental Justice, Original United Citizens of Southwest Detroit and the Sierra Club filed a Claim of Appeal of the PTI in the State of Michigan, Wayne County Circuit, Case No. 14-008887-AA. Appellants and the MDEQ required the intervention of Severstal Dearborn, LLC (“Dearborn”) (now owned by us) in this action as an additional appellee. The appellants allege multiple deficiencies with the PTI and the permitting process. On October 9, 2014, the appellants filed a Motion for Peremptory Reversal of the MDEQ’s decision to issue the PTI. We believe that the MDEQ issued the PTI properly in compliance with applicable law and will vigorously contest this appeal. On October 17, 2014, we filed a motion to dismiss the appeal. Additionally, on December 15, 2014, we filed a motion to dismiss the appeal for lack of jurisdiction. At the conclusion of a hearing on all three motions on February 12, 2015, all three motions were denied. On July 12, 2016, the Michigan Court of Appeals denied our motion seeking to overturn the decision of the Circuit Court denying our motion to dismiss for

lack of jurisdiction. On October 5, 2016, we filed an application with the Michigan Supreme Court for leave to appeal, seeking to overturn the decision of the Michigan Court of Appeals. Until the appeal is resolved, we cannot determine what the ultimate permit limits will be. Until the permit limits are determined and final, we cannot reliably estimate the costs, if any, that we may incur if the appeal causes the permit limits to change, nor can we determine if the costs will be material or when we would incur them.

As previously reported, on August 21, 2014, the SDEIA filed a Complaint under the Michigan Environmental Protection Act ("MEPA") in the State of Michigan, Wayne County Circuit Case No. 14-010875-CE. The plaintiffs allege that the air emissions from our Dearborn Works are impacting the air, water and other natural resources, as well as the public trust in such resources. The plaintiffs are requesting, among other requested relief, that the court assess and determine the sufficiency of the PTI's limitations. On October 15, 2014, the court ordered a stay of the proceedings until a final order is issued in Wayne County Circuit Court Case No. 14-008887-AA (discussed above). When the proceedings resume, we will vigorously contest these claims. Until the claims in this Complaint are resolved, we cannot reliably estimate the costs we may incur, if any, or when we may incur them.

Table of Contents

As previously reported, on April 27, 2000, MDEQ issued a RCRA Corrective Action Order No. 111-04-00-07E to Rouge Steel Company and Ford Motor Company for the property that includes our Dearborn Works. The Corrective Action Order has been amended five times. We are a party to the Corrective Action Order as the successor-in-interest to Dearborn, which was the successor-in-interest to Rouge Steel Company. The Corrective Action Order requires the site-wide investigation, and where appropriate, remediation of the facility. The site investigation and remediation is ongoing. We cannot reliably estimate at this time how long it will take to complete this site investigation and remediation. To date, Ford Motor Company has incurred most of the costs of the investigation and remediation due to its prior ownership of the steelmaking operations at Dearborn Works. Until the site investigation is complete, we cannot reliably estimate the additional costs we may incur, if any, for any potentially required remediation of the site or when we may incur them.

As previously reported, AK Steel received an order in October 2002 from the EPA under Section 3013 of RCRA requiring it to investigate several areas of Zanesville Works that allegedly could be sources of contamination. A site investigation began in 2003 and was approved by EPA in November 2012. On October 28, 2016, the EPA requested that we conduct a corrective measures study and implement these measures as necessary. Settlement discussions between the parties are ongoing, though whether the parties will reach agreement and any such agreement's terms are uncertain. We currently have accrued \$0.7 for the projected cost of the corrective measures study as well as a supplemental investigation. Until the study is complete, we cannot reliably estimate the costs, if any, we may incur for potential required remediation of the site or when we may incur them.

On December 22, 2016 and February 7, 2017, we received Notices of Violations from the Southwest Ohio Air Quality Agency on a pickling line at our Middletown Works, alleging violations of hydrochloric acid emission rates based on source testing events conducted between October 2016 and January 2017. We investigated these claims and implemented several corrective measures. Based on additional testing conducted in January 2017, we believe that the pickling line is currently in compliance with emission limitations. We are negotiating a settlement of this matter with the Ohio Environmental Protection Agency and we expect to reach an agreed upon civil penalty of less than \$0.1.

In addition to the foregoing matters, we are or may be involved in proceedings with various regulatory authorities that may require us to pay fines, comply with more rigorous standards or other requirements or incur capital and operating expenses for environmental compliance. We believe that the ultimate disposition of the proceedings will not have, individually or in the aggregate, a material adverse effect on our consolidated financial condition, results of operations or cash flows.

Legal Contingencies

As previously reported, since 1990 we have been named as a defendant in numerous lawsuits alleging personal injury as a result of exposure to asbestos. The great majority of these lawsuits have been filed on behalf of people who claim to have been exposed to asbestos while visiting the premises of one of our current or former facilities. The majority of asbestos cases pending in which we are a defendant do not include a specific dollar claim for damages. In the cases that do include specific dollar claims for damages, the complaint typically includes a monetary claim for compensatory damages and a separate monetary claim in an equal amount for punitive damages, and does not attempt to allocate the total monetary claim among the various defendants.

The number of asbestos cases pending at June 30, 2017, is presented below:

**Asbestos
Cases
Pending**

**at
June 30,
2017**

Cases with specific dollar claims for damages:	
Claims up to \$0.2	126
Claims above \$0.2 to \$5.0	5
Claims above \$5.0 to \$15.0	1
Claims above \$15.0 to \$20.0	2
Total claims with specific dollar claims for damages (a)	134
Cases without a specific dollar claim for damages	209
Total asbestos cases pending	343
(a) Involve a total of 2,334 plaintiffs and 17,548 defendants	

Table of Contents

In each case, the amount described is per plaintiff against all of the defendants, collectively. Thus, it usually is not possible at the outset of a case to determine the specific dollar amount of a claim against us. In fact, it usually is not even possible at the outset to determine which of the plaintiffs actually will pursue a claim against us. Typically, that can only be determined through written interrogatories or other discovery after a case has been filed. Therefore, in a case involving multiple plaintiffs and multiple defendants, we initially only account for the lawsuit as one claim. After we have determined through discovery whether a particular plaintiff will pursue a claim, we make an appropriate adjustment to statistically account for that specific claim. It has been our experience that only a small percentage of asbestos plaintiffs ultimately identify us as a target defendant from whom they actually seek damages and most of these claims ultimately are either dismissed or settled for a small fraction of the damages initially claimed.

Asbestos-related claims information for the three and six months ended June 30, 2017 and 2016 is presented below:

	Three Months Ended June 30, 2017		Six Months Ended June 30, 2016	
New Claims Filed	10	10	28	23
Pending Claims Disposed Of	13	2	24	48
Total Amount Paid in Settlements	\$0.5	\$0.1	\$0.6	\$0.3

Since the onset of asbestos claims against us in 1990, five asbestos claims against us have proceeded to trial in four separate cases. All five concluded with a verdict in our favor. We continue to vigorously defend the asbestos claims. Based upon present knowledge, and the factors above, we believe it is unlikely that the resolution in the aggregate of the asbestos claims against us will have a materially adverse effect on our consolidated results of operations, cash flows or financial condition. However, predictions about the outcome of pending litigation, particularly claims alleging asbestos exposure, are subject to substantial uncertainties. These uncertainties include (1) the significantly variable rate at which new claims may be filed, (2) the effect of bankruptcies of other companies currently or historically defending asbestos claims, (3) the litigation process from jurisdiction to jurisdiction and from case to case, (4) the type and severity of the disease each claimant alleged to suffer, and (5) the potential for enactment of legislation affecting asbestos litigation.

As previously reported, in September and October 2008 and again in July 2010, several companies filed purported class actions in the United States District Court for the Northern District of Illinois against nine steel manufacturers, including us. The case numbers for these actions are 08CV5214, 08CV5371, 08CV5468, 08CV5633, 08CV5700, 08CV5942, 08CV6197 and 10CV04236. On December 28, 2010, another action, case number 32,321, was filed in state court in the Circuit Court for Cocke County, Tennessee. The defendants removed the Tennessee case to federal court and in March 2012 it was transferred to the Northern District of Illinois. The plaintiffs in the various pending actions are companies that purport to have purchased steel products, directly or indirectly, from one or more of the defendants and they claim to file the actions on behalf of all persons and entities who purchased steel products for delivery or pickup in the United States from any of the named defendants at any time from at least as early as January 2005. The complaints allege that the defendant steel producers have conspired in violation of antitrust laws to restrict output and to fix, raise, stabilize and maintain artificially high prices for steel products in the United States. In March 2014, we reached an agreement with the direct purchaser plaintiffs to tentatively settle the claims asserted against us, subject to certain court approvals below. According to that settlement, we agreed to pay \$5.8 to the plaintiff class of direct purchasers in exchange for the members of that class to completely release all claims. We continue to believe that the claims made against us lack any merit, but we elected to enter the settlement to avoid the ongoing expense of defending ourselves in this protracted and expensive antitrust litigation. We provided notice of the proposed

settlement to members of the settlement class. After several class members received the notice, they elected to opt out of the class settlement. Following a fairness hearing, on October 21, 2014 the Court entered an order and judgment approving the settlement and dismissing all of the direct plaintiffs' claims against us with prejudice as to the settlement class. In 2014, we recorded a charge for the amount of the tentative settlement with the direct purchaser plaintiff class and paid that amount into an escrow account, which has now been disbursed in accordance with the order that approved the settlement. On March 3, 2017, the Court granted the defendants' motion to dismiss the indirect plaintiffs' amended complaint on the grounds that the plaintiffs lacked antitrust standing. On April 4, 2017, the indirect plaintiffs filed a motion for reconsideration and the defendants filed an opposition to that motion. On July 13, 2017, the Court denied the indirect plaintiffs' motion for reconsideration. Because we have been unable to determine that a potential loss in this case for the indirect plaintiffs is probable or estimable, we have not recorded an accrual for this matter. If our assumptions used to evaluate a probable or estimable loss for the indirect plaintiffs prove to be incorrect or change, we may be required to record a charge for their claims.

As previously reported, on January 20, 2010, ArcelorMittal France and ArcelorMittal Atlantique et Lorraine (collectively "ArcelorMittal") filed an action in the United States District Court for the District of Delaware, Case No. 10-050-SLR against

- 14-

Table of Contents

us, Dearborn, and Wheeling-Nisshin Inc., whom Dearborn indemnified in this action. By virtue of our responsibility as a successor-in-interest to Dearborn and an indemnitor of Wheeling-Nisshin Inc., we now have complete responsibility for the defense of this action. The three named defendants are collectively referred to hereafter as “we” or “us”, though the precise claims against each separate defendant may vary. The complaint alleges that we are infringing the claims of U.S. Patent No. 6,296,805 (the “Patent”) in making pre-coated cold-rolled boron steel sheet and seeks injunctive relief and unspecified compensatory damages. We filed an answer denying ArcelorMittal’s claims and raised various affirmative defenses. We also filed counterclaims against ArcelorMittal for a declaratory judgment that we are not infringing the Patent and that the Patent is invalid. Subsequently, the trial court separated the issues of liability and damages. The case proceeded with a trial to a jury on the issue of liability during the week of January 15, 2011. The jury returned a verdict that we did not infringe the Patent and that the Patent was invalid. Judgment then was entered in our favor. ArcelorMittal filed an appeal with the United States Court of Appeals for the Federal Circuit. On November 30, 2012, the court of appeals issued a decision reversing certain findings related to claim construction and the validity of the Patent and remanded the case to the trial court for further proceedings. On January 30, 2013, ArcelorMittal filed a motion for rehearing with the court of appeals. On March 20, 2013, the court of appeals denied ArcelorMittal’s motion for rehearing. The case then was remanded to the trial court for further proceedings. On April 16, 2013, according to a petition previously filed by ArcelorMittal and ArcelorMittal USA LLC, the U.S. Patent and Trademark Office (“PTO”) reissued the Patent as U.S. Reissue Patent RE44,153 (the “Reissued Patent”). Also on April 16, 2013, ArcelorMittal filed a second action against us in the United States District Court for the District of Delaware, Case Nos. 1:13-cv-00685 and 1:13-cv-00686 (collectively the “Second Action”). The complaint filed in the Second Action alleges that we are infringing the claims of the Reissued Patent and seeks injunctive relief and unspecified compensatory damages. On April 23, 2013, we filed a motion to dismiss key elements of the complaint filed in the Second Action. In addition, the parties briefed related non-infringement and claims construction issues in the original action. On October 25, 2013, the district court granted summary judgment in our favor, confirming that our product does not infringe the original Patent or the Reissued Patent. The court further ruled that ArcelorMittal’s Reissued Patent was invalid due to ArcelorMittal’s deliberate violation of a statutory prohibition on broadening a patent through reissue more than two years after the original Patent was granted and that the original Patent had been surrendered when the Reissued Patent was issued and thus is no longer in effect. Final Judgment was entered on October 31, 2013. On November 6, 2013, ArcelorMittal filed a motion to clarify or, in the alternative, to alter or amend the October 31, 2013 judgment. We opposed the motion. On December 5, 2013, the court issued a memorandum and order denying the motion and entered final judgment in our favor, and against ArcelorMittal, specifically ruling that all claims of ArcelorMittal’s Reissued Patent are invalid as violative of 35 U.S.C. §251(d). On December 30, 2013, ArcelorMittal filed notices of appeal to the Federal Circuit Court of Appeals. The appeal has been fully briefed and the court of appeals held a hearing on November 4, 2014. On May 12, 2015, the Federal Circuit issued its decision affirming in part and reversing in part the trial court’s decision and remanding the case for further proceedings. The Federal Circuit ruled that 23 of the 25 claims of the Reissued Patent were improperly broadened and therefore invalid. However, the Federal Court found that the district court erred in invalidating the remaining two claims and remanded the case for further proceedings before the district court. Following the remand, ArcelorMittal filed a motion in the trial court for leave to amend the Second Action to assert additional patent infringement claims based on another, related patent that the PTO issued on June 10, 2014, No. RE44,940 (Second Reissue Patent). It also filed a motion to dismiss the original action on the grounds that it is now moot in light of the Court of Appeals’ last ruling. We opposed both of those motions. In addition, we filed separate motions for summary judgment in the original action on the grounds of non-infringement and invalidity. A hearing on all motions was held on October 27, 2015. On December 4, 2015, the district court issued an order granting our motion for summary judgment that neither of the remaining claims of the Reissued Patent are infringed and both are invalid as obvious. The court therefore entered final judgment in favor of the defendants in the original case. In the court’s order, the judge also granted ArcelorMittal’s motion to file a first amended complaint and ArcelorMittal did file an amended complaint in Case No. 1:13-cv-00685 (“685 Action”) alleging we are infringing the claims of the Second Reissue Patent, which we deny. On December 21, 2015,

ArcelorMittal filed a notice of appeal from the district court's December 4, 2015 final judgment. On May 16, 2017, the Federal Circuit Court of Appeals affirmed the district court's judgment of invalidity and non-infringement of the reissued Patent. On June 14, 2017, ArcelorMittal filed a petition to the Federal Circuit for rehearing en banc of the May 16, 2017 decision. On January 20, 2016, we filed a motion to dismiss the amended complaint in the 685 Action, or in the alternative, a motion to stay pending a resolution of the appeal in the original case. On April 19, 2016, the district court issued an order denying our motion and ordering limited discovery. Following discovery, on August 17, 2016, we filed a motion for summary judgment on the basis that the claims in the 685 Action are precluded by the judgment in the original case. On January 19, 2017, the district court issued an opinion granting summary judgment in our favor in the 685 Action on the grounds of non-infringement and also entered a final judgment on that basis. On February 14, 2017, ArcelorMittal filed a notice of appeal of the district court's order in the Federal Circuit Court of Appeals. We intend to continue to contest this matter vigorously. We have not made a determination that a loss is probable and we do not have adequate information to reliably or accurately estimate potential loss if ArcelorMittal prevails in its appeal in this dispute. Because we have been unable to determine that the potential loss in this case is probable or estimable,

- 15-

Table of Contents

we have not recorded an accrual for this matter. If our assumptions used to evaluate whether a loss in this matter is either probable or estimable prove to be incorrect or change, we may be required to record a liability for an adverse outcome.

As previously reported, on June 13, 2013, Cliffs Sales Company (“Cliffs”) filed an action in the United States District Court for the Northern District of Ohio, Civil Action No. 1:13 cv 1308, against us pertaining to Dearborn Works. Cliffs claims that we breached a May 21, 2008, Agreement for Sale of Reclaimed Iron Units, as amended (the “Iron Unit Agreement”). Cliffs claims that we breached the Iron Unit Agreement by failing to purchase the required amount of pellets, chips and fines as allegedly required. We filed an answer denying the material allegations of the complaint and asserting several affirmative defenses. In January of 2014, the presiding judge ordered a stay of the proceedings. We intend to contest this matter vigorously. At this time, we have not made a determination that a loss is probable and do not have adequate information to reliably or accurately estimate our potential loss if Cliffs prevails in this lawsuit. Because we have been unable to determine that a loss is probable or estimable, we have not recorded an accrual. If our assumptions used to evaluate whether a loss in this matter is either probable or estimable prove to be incorrect or change, we may be required to record a liability for an adverse outcome.

Trade CasesSection 232 Investigation of Imported Foreign Steel

On April 19, 2017, the United States Department of Commerce (“Commerce Department”) initiated an investigation pursuant to Section 232 of the Trade Expansion Act, as amended by the Trade Act of 1974 (“Section 232”), into whether imports of foreign steel into the U.S. pose a threat to U.S. national security. The Commerce Department has notified the U.S. Department of Defense of its initiation of the investigation, as required under applicable law, and may consult with the Defense Department and other U.S. government departments during the course of the investigation. Within 270 days of the initiation of the investigation (which will be mid-January 2018), the Commerce Department will submit a report to the President with recommendations. Within 90 days of receiving that report, the President will determine the nature and duration of any actions to be taken to ensure that imports of foreign steel will not threaten to impair U.S. national security. Such actions may include, without limitation, quotas, tariffs, fees or other measures as a means of adjusting the threatening imports. We strongly support this action by the Commerce Department and we have and will continue to cooperate with the investigation to the fullest extent.

Corrosion-Resistant Steel

On June 3, 2015, we, along with five other domestic producers, filed anti-dumping (“AD”) and countervailing duty (“CVD”) petitions against imports of corrosion-resistant steel (“CORE”) from China, India, Italy, South Korea and Taiwan. The petitions alleged that unfairly traded imports of CORE from those five countries are causing material injury to the domestic industry. On May 25, 2016, the Commerce Department announced final affirmative determinations that (a) imports of CORE from China, India, Italy, South Korea and Taiwan are being sold at less-than-fair-value and should be subject to final AD duties, and that (b) imports of CORE from China, India, Italy and South Korea are benefiting from government subsidies and should be subject to CVD duties. After correcting certain ministerial errors, the Commerce Department calculated final dumping and subsidy margins as follows:

Country	Corrosion-Resistant CVD Margins	Corrosion-Resistant AD Margins
China	241.07% – 39.05%	209.97%
India	29.49% – 8.00%	4.43% – 3.05%
Italy	38.51% – 0.00%	92.12% – 12.63%

Edgar Filing: AK STEEL HOLDING CORP - Form 10-Q

South Korea	1.19% – 0.00%	47.80% – 8.75%
Taiwan	0.00%	10.34%

On June 24, 2016, the International Trade Commission (“ITC”) determined that the domestic steel industry is materially injured by reason of imports of CORE from China, India, Italy, South Korea and Taiwan that are sold in the United States at less than fair value and that such products are subsidized by the governments of China, India, Italy and South Korea. As a result of the Commerce Department’s and the ITC’s final determinations, importers are required to post cash deposits with the U.S. government on imports of CORE from China, India, Italy, South Korea and Taiwan at the above CVD margins and AD margins. AD and CVD measures remain in effect for a minimum of five years.

- 16-

Table of Contents

Several of the named countries have filed appeals of the final determinations on CORE with the Court of International Trade (“CIT”). We intend to oppose all appeals vigorously.

On September 23, 2016, we and other domestic producers made a filing with the Commerce Department asserting that Chinese steel producers are attempting to circumvent the AD and CVD duties discussed above by transshipping Chinese steel through Vietnam for minor processing before importing CORE into the U.S. market. Our filing requests that the Commerce Department find that imports of Vietnamese CORE that originated in China be subjected to the same AD and CVD duties of shipments of CORE imported directly from China. On November 7, 2016, the Commerce Department made a favorable determination and announced that it would initiate an investigation into imports of Vietnamese CORE. We expect the Commerce Department to complete its investigation in the third quarter of 2017.

Cold-Rolled Steel

On July 28, 2015, we, along with four other domestic producers, filed AD petitions against imports of cold-rolled steel from Brazil, China, India, Japan, the Netherlands, Russia, South Korea and the United Kingdom, as well as CVD petitions against imports of cold-rolled steel from Brazil, China, India, Russia and South Korea. The petitions alleged that unfairly traded imports of cold-rolled steel from those eight countries are causing material injury to the domestic industry. On May 17, 2016, the Commerce Department announced its final affirmative determinations that (a) imports of cold-rolled steel from China and Japan are being sold at less-than-fair-value and should be subject to final AD duties and that (b) imports of cold-rolled steel from China are benefiting from government subsidies and should be subject to CVD duties. On July 21, 2016, the Commerce Department announced its final affirmative determinations that (a) imports of cold-rolled steel from Brazil, India, Russia, South Korea and the United Kingdom are being sold at less-than-fair-value and should be subject to final AD duties and that (b) imports of cold-rolled steel from Brazil, India, Russia and South Korea are benefiting from government subsidies and should be subject to CVD duties. After correcting certain ministerial errors, the Commerce Department calculated final dumping and subsidy margins as follows (the below chart does not include the margins determined for Russia because the ITC determined that the imports of cold-rolled steel are negligible, as further discussed below):

Country	Cold-Rolled CVD Margins	Cold-Rolled AD Margins
Brazil	11.31% – 11.09%	35.43% – 19.58%
China	256.44%	265.79%
India	10.00%	7.60%
Japan	NA	71.35%
South Korea	59.72% – 3.89%	34.33% – 6.32%
United Kingdom	NA	25.17% – 5.40%

On June 22, 2016 and September 2, 2016, the ITC announced its final determinations that the domestic steel industry is materially injured by reason of imports of cold-rolled steel from Brazil, China, India, Japan, South Korea and the United Kingdom. The ITC determined that imports of cold-rolled steel from Russia that are sold in the United States at less-than-fair-value and subsidized by the government of Russia are negligible and terminated the investigations as to Russia. However, in October 2016, we and other domestic steel producers filed an appeal with the CIT appealing the ITC’s determination on Russian cold-rolled steel.

As a result of the Commerce Department’s and the ITC’s final determinations, importers are required to post cash deposits with the U.S. government on imports of cold-rolled steel from Brazil, China, India, Japan, South Korea and the United Kingdom at the above CVD margins and AD margins. AD and CVD measures remain in effect for a

minimum of five years.

Several of the named countries have filed appeals of the final determinations on cold-rolled steel with the CIT. We intend to oppose all appeals vigorously.

On September 27, 2016, we and other domestic producers made a filing with the Commerce Department asserting that Chinese steel producers are attempting to circumvent the AD and CVD duties discussed above by transshipping Chinese steel through Vietnam for minor processing before importing cold-rolled steel into the U.S. market. Our filing requests that the Commerce Department find that imports of Vietnamese cold-rolled steel that originated in China be subjected to the same AD and CVD duties of shipments of cold-rolled steel imported directly from China. On November 7, 2016, the Commerce Department made a favorable determination and announced that it would initiate an investigation into Vietnamese cold-rolled steel. We expect the Commerce Department to complete its investigation in the third quarter of 2017.

- 17-

Table of ContentsHot-Rolled Steel

On August 11, 2015, we, along with five other domestic producers, filed AD petitions against imports of hot-rolled steel from Australia, Brazil, Japan, the Netherlands, South Korea, Turkey and the United Kingdom, as well as CVD petitions against imports of hot-rolled steel from Brazil, South Korea and Turkey. The petitions alleged that unfairly traded imports of hot-rolled steel from those seven countries are causing material injury to the domestic industry. On August 5, 2016, the Commerce Department announced its final affirmative determinations that (a) imports of hot-rolled steel from Australia, Brazil, Japan, the Netherlands, South Korea, Turkey and the United Kingdom are being sold at less-than-fair-value and should be subject to final AD duties and that (b) imports of hot-rolled steel from Brazil and South Korea are benefiting from government subsidies and should be subject to CVD duties. After correcting certain ministerial errors, the Commerce Department calculated final dumping and subsidy margins as follows:

Country	Hot-Rolled CVD Margins	Hot-Rolled AD Margins
Australia	NA	29.58%
Brazil	11.30% – 11.09%	34.28% – 33.14%
Japan	NA	7.51% – 4.99%
Netherlands	NA	3.73%
South Korea	58.68% – 3.89%	9.49% – 4.61%
Turkey	NA	6.77% – 4.15%
United Kingdom	NA	33.06%

On September 12, 2016, the ITC announced its final determinations that the domestic steel industry is materially injured by reason of imports of hot-rolled steel from Australia, Brazil, Japan, the Netherlands, South Korea, Turkey and the United Kingdom. As a result of the Commerce Department's and the ITC's final determinations, importers are required to post cash deposits with the U.S. government on imports of hot-rolled steel from Australia, Brazil, Japan, the Netherlands, South Korea, Turkey and the United Kingdom at the above CVD margins and AD margins. AD and CVD measures remain in effect for a minimum of five years.

The final determinations on hot-rolled steel have been appealed to the CIT. We intend to oppose all appeals vigorously.

Stainless Steel

On February 12, 2016, we, along with three other domestic producers, filed AD and CVD petitions against imports of stainless steel from China. The petitions allege that unfairly traded imports of stainless steel from China are causing material injury to the domestic industry. On March 25, 2016, the ITC made a unanimous preliminary determination of injury to the domestic industry caused by imports of stainless steel from China. On June 23, 2016, the Commerce Department preliminarily determined that Chinese producers significantly increased their shipments of products into the U.S. market before the Commerce Department's preliminary determination of AD and CVD duties and, as such, that critical circumstances exist for imports of certain stainless steel from China. On July 12, 2016, the Commerce Department preliminarily determined that imports of stainless steel from China are benefiting from unfair government subsidies and should be subject to CVD duties. On September 12, 2016, the Commerce Department also preliminarily determined that imports of stainless steel from China are being sold at less-than-fair-value and should be subject to AD duties. The Commerce Department's critical circumstances preliminary determination also allows the Commerce Department to impose CVD duties on certain stainless steel imports from China retroactively from April 19, 2016 and AD duties retroactively from 90 days prior to the publication of the Commerce Department's preliminary

determination in the Federal Register. On February 2, 2017, the Commerce Department announced its final affirmative determinations that (a) imports of stainless steel from China (a) are being sold at less-than-fair-value and should be subject to final AD duties, and (b) are benefiting from government subsidies and should be subject to CVD duties. The Commerce Department calculated final dumping and subsidy margins as follows:

Country	Stainless CVD Margins	Stainless AD Margins
China	190.71% – 75.60%	76.64% – 63.86%

On March 3, 2017, the ITC announced its final unanimous determinations that the domestic steel industry is materially injured by reason of imports of stainless steel sheet and strip from China. As a result of the Commerce Department's and ITC's final determinations, importers will be required to post cash deposits with the U.S. government on imports of stainless

Table of Contents

steel sheet and strip from China at the above CVD and AD margins. AD and CVD measures remain in effect for a minimum of five years.

In addition, on July 25, 2017, the ITC held the final hearing on its five-year “sunset” review of the outstanding orders on stainless steel sheet and strip from Japan, Korea and Taiwan. We expect the Commerce Department to complete its review in the third or fourth quarter of 2017.

Other Contingencies

In addition to the matters discussed above, there are various pending and potential claims against us and our subsidiaries involving product liability, commercial, employee benefits and other matters arising in the ordinary course of business. Because of the considerable uncertainties which exist for any claim, it is difficult to reliably or accurately estimate what would be the amount of a loss if a claimant prevails. If material assumptions or factual understandings we rely on to evaluate exposure for these contingencies prove to be inaccurate or otherwise change, we may be required to record a liability for an adverse outcome. If, however, we have reasonably evaluated potential future liabilities for all of these contingencies, including those described more specifically above, it is our opinion, unless we otherwise noted, that the ultimate liability from these contingencies, individually and in the aggregate, should not have a material effect on our consolidated financial position, results of operations or cash flows.

NOTE 7 - Share-based Compensation

AK Holding’s Stock Incentive Plan (“SIP”) permits the granting of nonqualified stock option, restricted stock, performance share and restricted stock unit awards to our Directors, officers and other employees. We have estimated share-based compensation expense to be \$8.1 for 2017. The second quarter information is presented below:

	Three Months Ended June 30, 2017		Six Months Ended June 30, 2016	
<u>Share-based Compensation Expense</u>	2017	2016	2017	2016
Stock options	\$0.2	\$0.1	\$1.7	\$0.6
Restricted stock	0.4	0.3	2.3	1.1
Restricted stock units issued to Directors	0.3	0.4	0.7	0.7
Performance shares	0.4	0.4	0.8	0.8
Total share-based compensation expense	\$1.3	\$1.2	\$5.5	\$3.2

We granted stock options on 513,600 shares during the six months ended June 30, 2017, with a weighted-average fair value of \$5.33 per share of stock option. Options on 58,999 shares were exercised during the six months ended June 30, 2017.

We granted restricted stock awards of 355,600 shares during the six months ended June 30, 2017, at a weighted-average fair value of \$9.78 per share. The total intrinsic value of restricted stock awards that vested (i.e., restrictions lapsed) during the six months ended June 30, 2017 was \$4.1.

We granted performance share awards of 263,600 shares during the six months ended June 30, 2017, with a weighted-average fair value of \$10.78 per share. The total intrinsic value of performance share awards that vested

during the six months ended June 30, 2017 was \$4.5.

Balance at end of period	\$ (130.0)	\$ (165.5)	\$ (130.0)	\$ (165.5)
(a) Included in cost of products sold.				
(b) Included in pension and OPEB expense (income).				

Table of Contents**NOTE 9 - Earnings per Share**

Earnings per share are calculated using the “two-class” method. Under the “two-class” method, undistributed earnings are allocated to both common shares and participating securities. We divide the sum of distributed earnings to common stockholders and undistributed earnings to common stockholders by the weighted-average number of common shares outstanding during the period. The restricted stock granted by AK Holding is entitled to dividends before vesting and meets the criteria of a participating security.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2017	2016	2017	2016
Net income attributable to AK Steel Holding Corporation	\$61.2	\$17.3	\$123.7	\$3.7

Diluted earnings per share	\$0.19	\$0.08	\$0.38	\$0.02
Potentially issuable common shares (in millions) excluded from earnings per share calculation due to anti-dilutive effect	1.5	2.7	1.1	3.3

NOTE 10 - Variable Interest Entities

SunCoke Middletown

We purchase substantially all the coke and electrical power generated from SunCoke Middletown's plant under long-term supply agreements. SunCoke Middletown is a consolidated variable interest entity because we have committed to purchase all the expected production from the facility through at least 2031 and we are the primary beneficiary. Therefore, we consolidate SunCoke Middletown's financial results with our financial results, even though we have no ownership interest in SunCoke Middletown. SunCoke Middletown had income before income taxes of \$15.3 and \$16.6 for the three months ended June 30, 2017 and 2016, and \$31.5 and \$34.6 for the six months ended June 30, 2017 and 2016, that was included in our consolidated income before income taxes.

- 21-

Table of Contents

Vicksmetal/Armco Associates

We indirectly own a 50% interest in Vicksmetal/Armco Associates (“VAA”), a joint venture with Vicksmetal Company, which is owned by Sumitomo Corporation. VAA slits electrical steel primarily for us, though it also does so for third parties. VAA is a consolidated variable interest entity and we are the primary beneficiary. Therefore, we consolidate VAA’s financial results with our financial results.

NOTE 11 - Fair Value Measurements

We measure certain assets and liabilities at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., the “exit price”) in an orderly transaction between market participants at the measurement date. In determining fair value, we use various valuation approaches. The hierarchy of those valuation approaches is broken down into three levels based on the reliability of inputs as follows:

Level 1 inputs are quoted prices in active markets for identical assets or liabilities that we have the ability to access at the measurement date.

Level 2 inputs are inputs, other than quoted prices, that are directly or indirectly observable for the asset or liability. Level 2 inputs include model-generated values that rely on inputs either directly observed or readily-derived from available market data sources, such as Bloomberg or other news and data vendors. They include quoted prices for similar assets or liabilities in active markets, inputs other than quoted prices that are observable for the asset or liability (e.g., interest rates and yield curves observable at commonly quoted intervals or current market) and contractual prices for the underlying financial instrument, as well as other relevant economic factors. As a practical expedient, we estimate the value of money market mutual funds by using a \$1.00 per share multiplied by the number of shares in the fund as of the measurement date. We generate fair values for our commodity derivative contracts and foreign currency forward contracts from observable futures prices for the respective commodity or currency, from sources such as the New York Mercantile Exchange (NYMEX) or the London Metal Exchange (LME). We use the Black-Scholes option valuation model to value option contract derivatives (including caps, floors and collars). We use independent sources for implied volatilities, and we discount model-generated future values with discount factors that reflect the counterparty’s credit quality. We apply different discount rates to different contracts since the maturities and counterparties differ. As of June 30, 2017, a spread over benchmark rates of less than 1% was used for derivatives valued as assets and less than 2% for derivatives valued as liabilities. We have estimated the fair value of long-term debt based upon quoted market prices for the same or similar issues or on the current interest rates available to us for debt on similar terms and with similar maturities.

Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs are used to measure fair value if observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. This level of categorization is not applicable to our valuations on a normal recurring basis.

Table of Contents

Assets and liabilities measured at fair value on a recurring basis are presented below:

	June 30, 2017			December 31, 2016		
	Level 1	Level 2	Total	Level 1	Level 2	Total
<u>Assets measured at fair value</u>						
Cash and cash equivalents (a)	\$91.3	\$45.0	\$136.3	\$48.2	\$125.0	\$173.2
Other current assets:						
Foreign exchange contracts	—	—	—	—	0.1	0.1
Commodity hedge contracts	—	27.8	27.8	—	47.0	47.0
Other non-current assets:						
Commodity hedge contracts	—	3.8	3.8	—	15.3	15.3
Assets measured at fair value	\$91.3	\$76.6	\$167.9	\$48.2	\$187.4	\$235.6
<u>Liabilities measured at fair value</u>						
Accrued liabilities:						
Foreign exchange contracts	\$—	\$(0.6)	\$(0.6)	\$—	\$—	\$—
Commodity hedge contracts	\$—	\$(3.3)	\$(3.3)	\$—	\$(1.8)	\$(1.8)
Other non-current liabilities:						
Commodity hedge contracts	—	(0.7)	(0.7)	—	(0.6)	(0.6)
Liabilities measured at fair value	\$—	\$(4.6)	\$(4.6)	\$—	\$(2.4)	\$(2.4)
<u>Liabilities measured at other than fair value</u>						
Long-term debt, including current portions:						
Fair value	\$—	\$(1,893.3)	\$(1,893.3)	\$—	\$(2,123.2)	\$(2,123.2)
Carrying amount	—	(1,689.7)	(1,689.7)	—	(1,816.6)	(1,816.6)

(a) Level 2 assets include money market mutual funds invested in U.S. Treasury obligations.

The carrying amounts of our other financial instruments do not differ materially from their estimated fair values at June 30, 2017 and December 31, 2016.

NOTE 12 - Derivative Instruments and Hedging Activities

Exchange rate fluctuations affect a portion of intercompany receivables that are denominated in foreign currencies, and we use forward currency contracts to reduce our exposure to certain of these currency price fluctuations. These contracts have not been designated as hedges for accounting purposes and gains or losses are reported in earnings immediately in other income (expense).

We are exposed to fluctuations in market prices of raw materials and energy sources. We may use cash-settled commodity price swaps and options (including collars) to hedge the market risk associated with the purchase of certain of our raw materials and energy requirements. For input commodities, these derivatives are typically used for a portion of our natural gas, nickel, iron ore, zinc and electricity requirements. Our hedging strategy is to reduce the effect on earnings from the price volatility of these various commodity exposures. Independent of any hedging activities, price changes in any of these commodity markets could negatively affect operating costs.

All commodity derivatives are recognized as an asset or liability at fair value. We record the effective gains and losses for commodity derivatives designated as cash flow hedges of forecasted purchases of raw materials and energy sources in accumulated other comprehensive income (loss) and reclassify them into cost of products sold in the same period we recognize earnings for the associated underlying transaction. We recognize gains and losses on these designated derivatives immediately in cost of products sold for calculated hedge ineffectiveness and for components excluded from the assessment of effectiveness. We record all gains or losses from commodity derivatives for which hedge accounting treatment has not been elected to earnings immediately in cost of products sold. We have provided no collateral to counterparties under collateral funding arrangements as of June 30, 2017.

- 23-

Table of Contents

Outstanding commodity price swaps and options and forward foreign exchange contracts are presented below:

<u>Commodity</u>	June 30, 2017	December 31, 2016
Natural gas (in MMBTUs)	35,818,000	43,865,000
Zinc (in lbs)	47,600,000	58,750,000
Iron ore (in metric tons)	2,280,000	2,555,000
Electricity (in MWHs)	1,140,000	1,578,821
Foreign exchange contracts (in euros)	€2,000,000	€5,000,000

The fair value of derivative instruments in the condensed consolidated balance sheets is presented below:

<u>Asset (liability)</u>	June 30, December 31,	
	2017	2016
Derivatives designated as hedging instruments:		
Other current assets—commodity contracts	\$ 8.4	\$ 18.5
Other non-current assets—commodity contracts	0.3	5.2
Accrued liabilities—commodity contracts	(3.3)	(1.8)
Other non-current liabilities—commodity contracts	(0.5)	(0.1)
Derivatives not designated as hedging instruments:		
Other current assets:		
Foreign exchange contracts	—	0.1
Commodity contracts	19.4	28.5
Other non-current assets—commodity contracts	3.5	10.1
Accrued liabilities—foreign exchange contracts	(0.6)	—
Other non-current liabilities—commodity contracts	(0.2)	(0.5)

Gains (losses) on derivative instruments included in the condensed consolidated statements of operations are presented below:

	Three Months Ended June 30, 2017		Six Months Ended June 30, 2016	
<u>Gain (loss)</u>				
Derivatives designated as cash flow hedges—				
Commodity contracts:				
Reclassified from accumulated other comprehensive income into cost of products sold (effective portion)	\$2.1	\$(14.5)	\$5.3	\$(27.7)
Recognized in cost of products sold (ineffective portion and amount excluded from effectiveness testing)	0.7	(14.1)	0.5	(9.7)
Derivatives not designated as hedging instruments:				
Foreign exchange contracts—recognized in other income (expense)	(0.6)	1.0	(0.7)	(0.8)
Commodity contracts—recognized in cost of products sold	(8.2)	—	7.1	(0.5)

We routinely use iron ore derivatives to reduce the volatility of the cost of our iron ore purchases. Historically, these derivatives qualified for hedge accounting—meaning that gains and losses on the derivatives were reflected in the company's financial results in the same period that the hedged iron ore purchases affected earnings. Beginning in the

third quarter of 2016, our iron ore derivatives no longer qualify for hedge accounting treatment. Therefore, adjustments to mark these derivatives to fair value each period are recognized immediately in our financial results versus being recognized in the period that iron ore purchases affect earnings. Gains (losses) recognized in cost of products sold shown in the table above includes \$(8.4) and \$7.9 for the three and six months ended June 30, 2017, for unrealized mark-to-market gains (losses) on iron ore derivatives that are not designated as hedging instruments for accounting purposes. Not included in the financial results for the second quarter and first half of 2017 were realized gains of \$8.9 and \$20.3 for iron ore derivatives contracts that settled during the period for which we had recognized mark-to-market gains in our financial results in prior quarters.

- 24-

Table of Contents

Gains (losses) before tax expected to be reclassified into cost of products sold within the next twelve months for our existing derivatives designated as cash flow hedges and thus qualify for hedge accounting, as well as the period over which we are hedging our exposure to the volatility in future cash flows, are presented below:

<u>Commodity Hedge Settlement Dates</u>	Gains (losses)
Natural gas July 2017 to March 2019	\$ 6.2
Zinc July 2017 to June 2019	6.2
Electricity July 2017 to December 2018	(1.0)

NOTE 13 - Supplementary Cash Flow Information

Net cash paid (received) during the period for interest, net of capitalized interest, and income taxes are presented below:

	Six Months Ended June 30, 2017 2016	
Net cash paid (received) during the period for:		
Interest, net of capitalized interest	\$61.6	\$78.7
Income taxes	(0.5)	(3.2)

Included in net cash flows from operations was cash provided by SunCoke Middletown of \$39.2 and \$43.9 for the six months ended June 30, 2017 and 2016. Consolidated cash and cash equivalents at June 30, 2017 and December 31, 2016, include SunCoke Middletown's cash and cash equivalents of \$2.2 and \$5.0. SunCoke Middletown's cash and cash equivalents have no compensating balance arrangements or legal restrictions, but are not available for our use.

We had capital investments during the six months ended June 30, 2017 and 2016, that had not been paid as of the end of the respective period. These amounts are included in accounts payable and accrued liabilities and have been excluded from the condensed consolidated statements of cash flows until paid. We have included changes in our new leased Research and Innovation Center in property, plant and equipment and as a capital lease obligation in the condensed consolidated balance sheets, which represents a non-cash transaction for us. Under our SIP, we also issued stock to certain employees for vested performance shares and granted restricted stock to certain employees and restricted stock units to directors. Non-cash investing and financing activities are presented below:

	Six Months Ended June 30, 2017 2016	
Capital investments	\$22.7	\$24.3
Research and Innovation Center capital lease	1.1	15.4
Issuance of performance shares, restricted stock and restricted stock units	4.1	1.8

NOTE 14 - Union Contracts

In the first quarter of 2017, members of the United Steelworkers, Local 169, ratified a labor agreement covering approximately 305 employees at Mansfield Works. The new agreement expires March 31, 2021.

In March 2017, we and the United Auto Workers, Local 600, which represents approximately 1,165 employees at Dearborn Works, agreed to extend the current labor agreement to May 31, 2017, two months from its original March 31, 2017 expiration. On May 31, 2017, we and the United Auto Workers, Local 600, agreed to continue to negotiate in good faith to reach a new labor agreement, and that the parties shall continue to operate under the terms and conditions of the existing labor agreement.

An agreement with the United Auto Workers, Local 3044, that governs approximately 325 employees at Rockport Works, is scheduled to expire on September 30, 2017. As of January 1, 2016, approximately 135 hourly Rockport Works maintenance

- 25-

Table of Contents

employees transferred to our employment from an independent contractor. Effective June 1, 2017, the United Auto Workers, Local 3044, ratified an agreement concerning the terms governing those maintenance employees.

An agreement with the United Steelworkers, Local 1915-15, that governs approximately 85 production employees at AK Tube in Walbridge, Ohio, is scheduled to expire on January 22, 2018.

An agreement with the International Association of Machinists and Aerospace Workers, Local 1943, that governs approximately 1,710 production employees at Middletown Works, is scheduled to expire on March 15, 2018.

NOTE 15 - New Accounting Pronouncements

The Financial Accounting Standards Board (“FASB”) issued a standard update during the first quarter of 2016 to simplify several aspects of the accounting for employee share-based payments. The new guidance requires companies to record excess tax benefits and tax deficiencies in the income statement when stock awards vest or are settled. In addition, companies will no longer separately classify cash flows related to excess tax benefits as a financing activity apart from other income tax cash flows. The standard also allows companies to repurchase more of each employee’s vesting shares for tax withholding purposes without triggering liability accounting, clarifies that all cash payments made to tax authorities on each employee’s behalf for withheld shares should be presented as a financing activity on companies’ cash flows statements, and provides an accounting policy election to account for forfeitures as they occur. We adopted this update effective January 1, 2017. The adoption had a minimal effect on us. We recognized previously unrecorded excess tax benefits offset with an equal change in valuation allowance. We have elected to continue to estimate forfeitures expected to occur to determine the compensation cost we recognize each period. The presentation requirements for cash flows related to employee taxes paid for withheld shares has no effect on us since we have historically presented these as a financing activity.

FASB issued Accounting Standards Update No. 2014-09, *Revenue from Contracts with Customers (Topic 606)*, during the second quarter of 2014. Topic 606, as further amended by subsequent Accounting Standard Updates, affects virtually all aspects of an entity’s revenue recognition, including determining the measurement of revenue and the timing of when it is recognized for the transfer of goods or services to customers. Topic 606 is effective for us beginning January 1, 2018. The guidance permits two methods of adoption—retrospectively to each prior reporting period presented (full retrospective method), or retrospectively with the cumulative effect of initially applying the guidance recognized at the date of initial application (modified retrospective method). We are evaluating the effect of the adoption of Topic 606 on our financial position and results of operations, but we do not currently expect it to have a material effect on us. Based on our evaluation of our current contracts and revenue streams to date, we believe that most revenue transactions recorded under Topic 606 will be substantially consistent with treatment under existing guidance. Our revenue transactions generally consist of a single performance obligation to transfer promised goods and are not accounted for under industry-specific guidance. We currently anticipate adopting the standard using the modified retrospective method as of January 1, 2018.

FASB issued Accounting Standards Update No. 2016-02, *Leases (Topic 842)*, during the first quarter of 2016. Topic 842 requires entities to recognize lease assets and lease liabilities and disclose key information about leasing arrangements for certain leases. We will be required to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach. Topic 842 is effective for us beginning January 1, 2019. We are currently evaluating the effect of the adoption of Topic 842 on our financial position and results of operations.

In June 2016, the FASB issued a new standard to replace the incurred loss impairment methodology with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. In connection with recognizing credit losses on receivables and other financial instruments, we will be required to use a forward-looking expected loss model rather than the incurred loss model. The new standard will be effective for us beginning January 1, 2020, with early adoption permitted beginning January 1, 2019. Adoption of this standard is through a cumulative-effect adjustment to retained earnings as of the effective date. We are currently evaluating the effect of this standard on our financial position and results of operations.

NOTE 16 - Pending Acquisition of Precision Partners Holding Company

Effective June 30, 2017, we signed an agreement to acquire Precision Partners Holding Company (“Precision Partners”) for \$360.0 in cash. Precision Partners is a leading North American company that provides engineering, tooling, die design and hot and cold stamped steel components for the automotive market. The company is headquartered in Ontario, Canada, and

- 26-

Table of Contents

has more than 1,000 employees, including approximately 300 engineers and skilled tool makers, across eight plants in Ontario, Alabama and Kentucky. Among other benefits, we believe this strategic acquisition will complement our focus on product innovation, provide a fully integrated downstream platform that further strengthens collaboration with our automotive customers and their suppliers, and leverage our expertise in both materials and metals forming. On July 14, 2017, we received U.S. antitrust clearance for the transaction. The transaction remains subject to customary closing conditions and regulatory approval in Canada. Depending on the timing and outcome of the regulatory reviews, we expect the closing to occur during the third quarter of 2017. We expect to initially fund the acquisition with cash on hand and borrowings under our Credit Facility.

NOTE 17 - Supplementary Guarantor Information

AK Steel's 7.50% Senior Secured Notes due 2023, 7.625% Senior Notes due 2021, 8.375% Senior Notes due 2022 and 7.00% Senior Notes due 2027 (collectively, the "Senior Notes") and Exchangeable Notes are governed by indentures entered into by AK Holding and its 100%-owned subsidiary, AK Steel. Under the terms of the indentures, AK Holding and the Guarantor Subsidiaries each fully and unconditionally, jointly and severally, guarantee the payment of interest, principal and premium, if any, on each of the notes included in the Senior Notes.

Under the terms of the indenture for the Exchangeable Notes, AK Holding fully and unconditionally, jointly and severally, guarantees the payment of interest, principal and premium, if any, on the Exchangeable Notes.

We present all investments in subsidiaries in the supplementary guarantor information using the equity method of accounting. Therefore, the net income (loss) of the subsidiaries accounted for using the equity method is in their parents' investment accounts. The principal elimination entries eliminate investments in subsidiaries and inter-company balances and transactions. The following supplementary condensed consolidating financial statements present information about AK Holding, AK Steel, the Guarantor Subsidiaries of the Senior Notes and the other non-guarantor subsidiaries.

Table of Contents**Condensed Consolidated Statements of Comprehensive Income (Loss)
Three Months Ended June 30, 2017**

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

(dollars in millions, except per share and per ton data or as otherwise specifically noted)

Results of Operations

We are the only steelmaker in North America that can produce all three major categories of flat-rolled steels—namely carbon, stainless and electrical. In addition, we are the only domestic producer of flat-rolled steels that operates both blast furnaces and electric arc furnaces, providing us operational flexibility and the opportunity to innovate across markets and within our product portfolios. We operate eight steelmaking and finishing plants, two coke plants, a metallurgical coal production facility and two tube manufacturing plants across six states (Indiana, Kentucky, Michigan, Ohio, Pennsylvania and West Virginia) and a tube manufacturing plant in Mexico. These operations produce flat-rolled carbon steels, including premium-quality coated, cold-rolled and hot-rolled carbon steel products, and specialty stainless and electrical steels that we sell in sheet and strip form, as well as carbon and stainless steel that we manufacture into welded steel tubing. We sell these products to our customers in three primary markets: (i) automotive; (ii) infrastructure and manufacturing; and (iii) distributors and converters markets. We sell carbon steel products principally to North American customers and electrical and stainless steel products both domestically and internationally. We also produce carbon and stainless steel that we manufacture into welded steel tubing used in the automotive, large truck, industrial and construction markets. In addition, we operate Mexican and European trading companies that buy and sell steel and steel products and other materials.

Overview

We generated increased margins in the second quarter of 2017 by selling higher-value carbon, stainless and electrical steels and realizing the effects of improved carbon steel spot market pricing. Both net income attributable to AK Holding and adjusted EBITDA (as defined in the “Non-GAAP Financial Measures” section below) increased substantially for the second quarter of 2017 from the second quarter of 2016. Our net income attributable to AK Holding was \$61.2, or \$0.19 per diluted share of common stock, in the second quarter of 2017, as compared to net income attributable to AK Holding of \$17.3, or \$0.08 per diluted share, in the second quarter of 2016. Adjusted EBITDA was \$142.0, or 9.1% of net sales, for the second quarter of 2017, compared to adjusted EBITDA of \$99.3, or 6.7% of net sales, for the second quarter of 2016.

Net sales for the second quarter of 2017 increased 4% to \$1,557.2, compared to net sales of \$1,492.2 in the second quarter of 2016. Shipments of 1,465,200 tons for the second quarter of 2017 were 6% lower than the same quarter a year ago, primarily as a result of a moderate decrease in automotive demand. Average selling price per ton increased 11% to \$1,058 from \$957 in the same quarter a year ago, primarily as a result of higher average selling prices on both contract and spot market sales and higher surcharges on specialty steel products.

The increase in net sales and our continued focus on cost management, partially offset by higher raw material and energy costs, contributed to adjusted EBITDA of \$142.0 for the three months ended June 30, 2017, which represented a 43% increase in adjusted EBITDA from a year ago. We recorded a LIFO charge of \$23.9 in the second quarter of 2017, compared to a LIFO charge of \$20.7 in the second quarter of 2016. Included in adjusted EBITDA for the second quarter of 2017, were mark-to-market losses of \$8.4 from iron ore derivatives that do not qualify as cash flow hedges for accounting purposes. Not included in second quarter of 2017 adjusted EBITDA were \$8.9 of settled iron ore derivative gains, as these gains were recognized in our income statements in prior periods.

We ended the second quarter of 2017 with total liquidity of \$1,398.5, consisting of cash and cash equivalents and \$1,265.2 of availability under our Credit Facility. This represents an increase from total liquidity of \$1,353.8 at

December 31, 2016. We also continued to strengthen our balance sheet during the second quarter as we completed actions to reduce our long-term debt by \$129.8 in the first half of 2017.

On April 20, 2017, the Trump Administration announced that the Commerce Department had initiated a Section 232 investigation into whether imports of foreign steel into the U.S. pose a threat to our national security. We strongly support this action and have been cooperating with the Commerce Department on this matter.

Effective June 30, 2017, we signed an agreement to acquire Precision Partners for \$360.0 in cash. Precision Partners is a leading North American company that provides engineering, tooling, die design and hot and cold stamped steel components for the automotive market. The company is headquartered in Ontario, Canada, and has more than 1,000 employees, including approximately 300 engineers and skilled tool makers, across eight plants in Ontario, Alabama and Kentucky. On July 14, 2017, we received U.S. antitrust clearance for the transaction. The transaction remains subject to customary closing

- 36-

Table of Contents

conditions and regulatory approval in Canada. Depending on the timing and outcome of the regulatory reviews, we expect the closing to occur during the third quarter of 2017. See further discussion in *Pending Acquisition of Precision Partners*.

Steel Shipments

Total shipments were 1,465,200 tons and 1,555,500 tons for the three months ended June 30, 2017 and 2016. Total shipments were 2,952,100 tons and 3,213,700 tons for the six months ended June 30, 2017, and 2016. The decrease in shipments during the three months ended June 30, 2017, was primarily a result of a moderate decline in demand in the automotive market from our record high shipment level to that market in the same period in 2016. For the six months ended June 30, 2017, total shipments declined as a result of a moderate decrease in automotive demand and the transition effects of our strategy to reduce the production of commodity grades of carbon steels by temporarily idling our Ashland Works Hot End, which reduced our sales of lower margin products. Shipments by product category for the six months ended June 30, 2017 and 2016, as a percent of total shipments, were as follows:

Shipments by Product Category**Six Months Ended June 30,***Net Sales*

Despite the lower shipments, net sales for the three months ended June 30, 2017 of \$1,557.2 were 4% higher than net sales of \$1,492.2 for the three months ended June 30, 2016. Net sales for the six months ended June 30, 2017 of \$3,090.6 were 3% higher than net sales of \$3,011.0 for the six months ended June 30, 2016. The average selling price increased 11% to \$1,058 in the second quarter of 2017 from \$957 in the second quarter of 2016, primarily from higher prices on both contract and spot market sales and higher surcharges on specialty steel products. The average selling price for the six months ended June 30, 2017 of \$1,040 per ton was 11% higher than our average selling price of \$935 per ton for the six months ended June 30, 2016, reflecting our strategy of producing and selling higher-value carbon, stainless and electrical steels, higher prices on both contract and spot market sales, and higher surcharges on specialty steel products.

Net sales to customers outside the United States for the three and six months ended June 30, 2017 were \$157.7 and \$312.8, compared to \$171.4 and \$349.8 for the corresponding periods in 2016, primarily due to lower international sales of electrical steel.

The following table presents the percentage of net sales to each of our markets:

Market	Six Months Ended June 30,	
	2017	2016
Automotive	66%	68%
Infrastructure and Manufacturing	15%	16%
Distributors and Converters	19%	16%

Table of Contents

Cost of Products Sold

Cost of products sold was \$1,343.7 for the three months ended June 30, 2017, an increase from \$1,325.0 for the three months ended June 30, 2016, primarily driven by an increase in costs for raw materials, especially scrap and alloys. Cost of products sold was \$2,654.5 for the six months ended June 30, 2017, a decline from \$2,690.5 for the six months ended June 30, 2016, principally due to lower shipment levels, continuous operational improvements and lower costs for iron ore pellets, partially offset by higher costs for other raw materials, particularly scrap and alloys.

Cost of products sold as a percentage of sales declined to 86.3% and 85.9% for the three and six months ended June 30, 2017, from 88.8% and 89.4% for the corresponding periods in 2016. We recorded LIFO charges of \$23.9 and \$59.3 for the three and six months ended June 30, 2017, compared to LIFO charges of \$20.7 and \$8.4 for the corresponding periods in 2016 due to higher costs for raw materials. Planned maintenance outage costs were \$22.4 and \$29.7 in the three and six months ended June 30, 2017, compared to \$19.7 and \$23.1 for the corresponding periods in 2016. The three and six months ended June 30, 2017 included a benefit of \$10.1 related to refundable state incentive credits for the 2015 and 2016 years that became realizable during the second quarter of 2017.

We recorded mark-to-market gains (losses) of \$(8.4) and \$7.9 for the three and six months ended June 30, 2017, from iron ore derivatives that do not qualify as cash flow hedges for accounting purposes. Not included in the results for the three and six months ended June 30, 2017, were gains of \$8.9 and \$20.3 for settled iron ore derivative contracts that had been recognized in our financial results in prior periods.

Selling and Administrative Expenses

Selling and administrative expenses for the three and six months ended June 30, 2017 were \$65.1 and \$136.3, compared to \$62.2 and \$125.7 for the corresponding periods in 2016. The increases were primarily related to higher expenses for stock-based and incentive-based compensation in 2017 than in 2016.

Depreciation

Depreciation expense for the three and six months ended June 30, 2017 was \$55.1 and \$110.2, compared to \$54.3 and \$108.0 for the three and six months ended June 30, 2016.

Pension and Other Postretirement Employee Benefit (“OPEB”) Expense (Income)

Pension and OPEB income was \$16.2 and \$32.4 for the three and six months ended June 30, 2017, compared to \$11.9 and \$23.8 for the corresponding periods in 2016. The increases in income were principally a result of lower amortization of unrealized actuarial losses.

Operating Profit

Operating profit was \$109.5 and \$222.0 for the three and six months ended June 30, 2017, compared to \$62.6 and \$110.6 for the three and six months ended June 30, 2016. Included in operating profit was \$15.3 and \$31.5 related to SunCoke Middletown for the three and six months ended June 30, 2017, compared to \$16.6 and \$34.6 for the corresponding periods in 2016.

Interest Expense

Interest expense for the three and six months ended June 30, 2017 was \$38.2 and \$77.6, compared to \$41.4 and \$84.2 for the same periods in 2016. The decreases from 2016 were primarily related to lower debt obligations in 2017 compared to 2016, reflecting our successful actions to enhance our balance sheet through capital market transactions and cash flow generation.

Other Income (Expense)

Other income (expense) was \$(3.6) and \$(11.4) for the three and six months ended June 30, 2017, compared to other income (expense) of \$2.1 and \$1.4 for the three and six months ended June 30, 2016. The differences were principally due to expenses of \$3.4 and \$13.1 that we incurred in connection with the retirement of debt in the three and six months ended

Table of Contents

June 30, 2017, as compared to \$2.6 and \$2.6 of expenses that we incurred in connection with the retirement of debt in the corresponding periods in 2016.

Income Tax Expense (Benefit)

Income taxes recorded through June 30, 2017 and 2016, were estimated using the discrete method. Income taxes are based on our actual year-to-date financial results through the end of the period, as well as the related changes in the valuation allowance on deferred tax assets. We are unable to estimate the annual effective tax rate with sufficient precision for purposes of the effective tax rate method, which requires us to consider a projection of full-year income, the expected change in the valuation allowance and the projected change in value of our identified tax-planning strategy, which is determined based on year-to-date changes in the LIFO reserve. The estimated annual effective tax rate method is not reliable due to its sensitivity to small changes to forecasted annual pre-tax earnings and the effect of our valuation allowance and tax planning strategy, which creates results that vary significantly from the customary relationship between income tax expense and pre-tax income for interim periods. As a result, we determined that the discrete method is more appropriate than the annual effective tax rate method. We estimated the change in valuation allowances required based on our year-to-date financial results and the change in value of the identified tax-planning strategy. In addition, the change in valuation allowance for the six months ended June 30, 2016 includes a \$4.4 benefit related to the realizability of certain alternative minimum tax credits.

Net Income Attributable to AK Steel Holding Corporation

As a result of the various factors and conditions described above, we reported net income attributable to AK Holding of \$61.2, or \$0.19 per diluted share, for the three months ended June 30, 2017, compared to net income attributable to AK Holding of \$17.3, or \$0.08 per diluted share, for the three months ended June 30, 2016. We reported net income attributable to AK Holding of \$123.7, or \$0.38 per diluted share, for the six months ended June 30, 2017, compared to net income attributable to AK Holding of \$3.7, or \$0.02 per diluted share, for the six months ended June 30, 2016.

Adjusted EBITDA

Adjusted EBITDA (as defined below under Non-GAAP Financial Measures) of \$142.0, or 9.1% of net sales, for the three months ended June 30, 2017, was higher than adjusted EBITDA of \$99.3, or 6.7% of net sales, for the three months ended June 30, 2016. Adjusted EBITDA of \$284.9, or 9.2% of net sales, for the six months ended June 30, 2017, was higher than adjusted EBITDA of \$180.4, or 6.0% of net sales, for the six months ended June 30, 2016.

Non-GAAP Financial Measures

In certain of our disclosures, we have reported adjusted EBITDA and adjusted EBITDA margin that exclude the effects of noncontrolling interests. EBITDA is an acronym for earnings before interest, taxes, depreciation and amortization. It is a metric that is sometimes used to compare the results of different companies by removing the effects of different factors that might otherwise make comparisons inaccurate or inappropriate. For purposes of this report, we have made adjustments to EBITDA to exclude the effect of noncontrolling interests. The adjusted results, although not financial measures under generally accepted accounting principles in the United States ("GAAP") and not identically applied by other companies, facilitate the ability to analyze our financial results in relation to those of our competitors and to our prior financial performance by excluding items that otherwise would distort the comparison. Adjusted EBITDA and adjusted EBITDA margin are not, however, intended as alternative measures of operating results or cash flow from operations as determined in accordance with GAAP and are not necessarily comparable to similarly titled measures used by other companies.

Neither current nor potential investors in our securities should rely on adjusted EBITDA or adjusted EBITDA margin as a substitute for any GAAP financial measure, and we encourage current and potential investors to review the following reconciliation of adjusted EBITDA.

- 39-

Table of Contents**Reconciliation of Adjusted EBITDA**

	Three Months Ended June 30,		Six Months Ended June 30,	
	2017	2016	2017	2016
Net income (loss) attributable to AK Holding	\$61.2	\$17.3	\$123.7	\$3.7
Net income attributable to noncontrolling interests	15.2	16.6	31.4	34.6
Income tax expense (benefit)	(8.7)	(10.6)	(22.1)	(10.5)
Interest expense	38.2	41.4	77.6	84.2
Interest income	(0.4)	(0.6)	(0.8)	(0.9)
Depreciation	55.1	54.3	110.2	108.0
Amortization	1.0	1.1	4.8	3.1
EBITDA	161.6	119.5	324.8	222.2
Less: EBITDA of noncontrolling interests (a)	19.6	20.2	39.9	41.8
Adjusted EBITDA (b)	\$142.0	\$99.3	\$284.9	\$180.4
Adjusted EBITDA margin	9.1	% 6.7	% 9.2	% 6.0

(a) The reconciliation of EBITDA of noncontrolling interests to net income attributable to noncontrolling interests is as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2017	2016	2017	2016
Net income attributable to noncontrolling interests	\$15.2	\$16.6	\$31.4	\$34.6
Depreciation	4.4	3.6	8.5	7.2
EBITDA of noncontrolling interests	\$19.6	\$20.2	\$39.9	\$41.8

(b) Included in adjusted EBITDA for the June 30, 2017, were \$(8.4) and \$7.9 of unrealized gains (losses) on iron ore derivatives. See Note 12 to the condensed consolidated financial statements for additional information.

Outlook

All of the statements in this *Outlook* section are subject to, and qualified by, the information in the *Forward-Looking Statements* section.

Below are certain factors relevant to our third quarter 2017 outlook. Those factors include the following:

1. We expect relatively flat shipments in the third quarter compared to the second quarter of 2017. We anticipate that increased shipments to the distributor and converter market will be offset by a normal seasonal decline in carbon automotive shipments, along with the impact from some automotive companies lowering production in order to better balance their vehicle inventory levels.

2. We currently estimate that the average selling price will be marginally lower than the second quarter. The decrease in average selling price primarily reflects the impact of lower surcharge revenue and the mix impact of moderately lower automotive shipments.

3. We currently expect that raw material surcharge revenue in the third quarter will be lower than the second quarter. As a result, we expect margins to be negatively impacted as we work through higher cost inventory.

4. We have significant maintenance outages planned in the second half of 2017, primarily at our Mansfield and

Middletown Works. Maintenance outage costs are expected to be approximately \$16.0 in the third quarter, compared to \$22.4 in the second quarter of 2017, with additional significant maintenance outages occurring in the fourth

- 40-

Table of Contents

quarter. The outages will also include related capital investments of about \$25.0 in the third quarter compared to about \$9.0 of outage-related capital investments in the second quarter.

As a result of these and other factors, we expect adjusted EBITDA margins to be in the range of 5% to 6%. Our 5. adjusted EBITDA margin guidance excludes any impact of unrealized mark-to-market changes in our iron ore derivatives.

The foregoing factors are based on our current estimates and may change based on business conditions and other factors. The foregoing factors also do not contemplate or include any effects relating to the pending acquisition of Precision Partners. There are many other factors that could significantly affect our third quarter 2017 results, including developments in the domestic and global economies, in our business, and in the businesses of our customers, suppliers and competitors. Therefore, our outlook may change as a result of those and other factors.

Liquidity and Capital Resources

At June 30, 2017, we had total liquidity of \$1,398.5, consisting of \$133.3 of cash and cash equivalents and \$1,265.2 of availability under the Credit Facility. At June 30, 2017, our eligible collateral, after application of advance rates, was \$1,335.7. At June 30, 2017, we had no outstanding borrowings under the Credit Facility, and \$70.5 of outstanding letters of credit that reduced availability. During the six months ended June 30, 2017, we did not utilize our Credit Facility, though we may from time to time use it to fund requirements for working capital, capital investments, other investments and general corporate purposes. Consolidated cash and cash equivalents of \$136.3 at June 30, 2017, included \$3.0 of cash and cash equivalents of consolidated variable interest entities, which are not available for our use.

We expect to initially fund the pending acquisition of Precision Partners with cash on hand and borrowings under the Credit Facility. As part of our commitment to prudently manage our balance sheet and maintain current credit metrics, we intend to ultimately finance the acquisition with a combination of borrowings under our Credit Facility and proceeds from the sale of equity securities, depending on capital market conditions. We believe that this intended financing will supplement our current sources of liquidity to enable us to continue to meet our obligations for the foreseeable future. We expect to fund future liquidity requirements for items such as employee and retiree benefit obligations, scheduled debt maturities, debt redemptions and capital investments with internally-generated cash and other financing sources. We may also, from time to time, repurchase outstanding notes in the open market on an unsolicited basis, by tender offer, through privately negotiated transactions or otherwise. If we would need to fund any of our working capital, planned capital investments or debt repayment other than through internally-generated cash, we have \$1,265.2 of availability under our Credit Facility. In addition, we regularly evaluate accessing the equity and debt capital markets as a source of liquidity if we view conditions to be favorable. We have no scheduled debt maturities until November 2019, when our \$150.0 of Exchangeable Notes are due. In addition, our Credit Facility does not expire until March 2019, when we would need to repay or refinance any outstanding balance. Our forward-looking statements on liquidity are based on currently available information and expectations and, if the information or expectations are inaccurate or conditions deteriorate, there could be a material adverse effect on our liquidity.

Cash from operations totaled \$203.2 for the six months ended June 30, 2017. This total included cash generated by SunCoke Middletown of \$39.2, which can only be used by SunCoke Middletown for its operations or for distribution to its equity owners. Significant sources of cash included cash generated from normal business activities, partially offset by an increase in accounts receivable.

Investing and Financing Activities

Edgar Filing: AK STEEL HOLDING CORP - Form 10-Q

During the six months ended June 30, 2017, net cash used for investing activities totaled \$49.2, primarily due to capital investments of \$52.1. We anticipate 2017 capital investments of \$140.0 to \$160.0. In the near-term, we expect to fund these investments from cash generated from operations or from borrowings under our Credit Facility. We currently anticipate that our normal, ongoing maintenance capital investments (i.e., excluding strategic investments and non-routine maintenance investments, such as blast furnace re-lines) will be at a similar level over the next few years.

During the six months ended June 30, 2017, net cash used by financing activities was \$190.9, which included distributions from SunCoke Middletown to its noncontrolling interest owners of \$41.9. During the first half of 2017, we issued \$400.0 in principal amount of 7.00% 2027 Notes and repaid \$529.8 in principal amount of the old 7.625% 2020 Notes.

Table of Contents

Restrictions Under Debt Agreements

The Credit Facility and indentures governing our senior indebtedness and tax-exempt fixed-rate Industrial Revenue Bonds (collectively, the “Notes”) contain restrictions and covenants that may limit our operating flexibility.

The indentures governing the Notes (other than the Exchangeable Notes) include customary restrictions on (a) the incurrence of additional debt by certain of our subsidiaries, (b) the incurrence of certain liens, (c) sale/leaseback transactions, and (d) our ability to merge or consolidate with other entities or to sell, lease or transfer all or substantially all of our assets to another entity. They also contain customary events of default. In addition, the indenture governing the 7.50% Senior Secured Notes due 2023 includes covenants with customary restrictions on the use of proceeds from the sale of collateral. The indenture governing the Exchangeable Notes does not contain any financial or operating covenants or restrictions on the payments of dividends, the incurrence of indebtedness or the issuance or repurchase of securities by us.

The Credit Facility contains customary restrictions, including limitations on, among other things, distributions and dividends, acquisitions and investments, indebtedness, liens and affiliate transactions. In addition, the Credit Facility requires us to maintain a minimum fixed charge coverage ratio of one to one if availability under the Credit Facility is less than \$150.0.

We do not expect any of these restrictions to affect or limit our ability to conduct our business in the ordinary course. During the period, we were in compliance with all the terms and conditions of our debt agreements.

Employee Benefit Obligations

We are required to contribute \$44.1 to the master pension trust during 2017, of which \$6.0 was contributed in April 2017 and another \$6.0 was contributed in July 2017. Based on current actuarial assumptions, we estimate that our required annual pension contributions will be approximately \$60.0 and \$75.0 for 2018 and 2019. Factors that affect our estimates of future funding projections include return on plan assets, actuarial data and assumptions relating to plan participants, the discount rate used to measure the pension obligations and changes to regulatory funding requirements. Because of the variability of factors underlying these assumptions, including the possibility of future pension legislation, the reliability of estimated future pension contributions decreases as the length of time until we must make the contribution increases.

Innovation and Product Development

Over the last several years, we have been increasing our investment in research and innovation to create new opportunities for achieving competitive advantages. One of our principal strategies is to produce differentiated products to serve the current needs of our customers and address the future challenges they will face.

Specialty Steel

We continue to develop new and improved specialty stainless and electrical steels for expanding applications in electrical transmission and distribution networks, automotive and other markets. In May 2017, the U.S. Department of Energy (“DOE”) selected AK Steel to receive an award under the Advanced Manufacturing Office’s Next Generation Electric Machines program to develop the next generation of advanced, non-oriented electrical steels (“NOES”) for motors used in a wide variety of industrial and automotive applications, including hybrid/electric vehicles (“H/EVs”). The three-year project will be conducted in collaboration with the DOE, Oak Ridge National Laboratory’s Power

Electronics and Electric Machinery Research Center, and Regal Beloit Corporation, a leading manufacturer of electric motors and motion control products. We will receive up to \$1.8 to jointly develop an innovative motor design with high-alloy NOES with a goal to achieve an efficiency improvement of more than 30% when compared to existing motor designs. While the program targets a vast array of industrial motors, pumps and generators, H/EVs represent one of the fastest growing markets for NOES. Many motors used in H/EVs being sold in the U.S. today are imported from foreign suppliers, but a trend toward local sourcing and manufacturing appears to be underway. We believe this project will build on our strong foundation of collaboration with automotive manufacturers to develop the most efficient motor designs available in the world.

Press Hardenable Steel (“PHS”)

We continue to develop innovative PHS products that achieve even greater lightweighting solutions to meet our customers’ needs. For example, our ULTRALUME® PHS is an aluminum-silicon alloy coated steel that our customers depend on for high-strength parts with complex geometries. These steels enable automotive manufacturers to reduce vehicle weight while continuing to keep pace with critical safety requirements. In addition, our pending acquisition of Precision Partners

Table of Contents

strategically advances our mission to innovate in the high-growth automotive lightweighting space and enhance our position in hot stamping technology.

Next-Generation Advanced High Strength Steel (“AHSS”)

We also continue to broaden our portfolio of Next-Generation AHSS products for automotive components produced in traditional cold stamping operations. These steels help our customers achieve vehicle weight savings for ambitious fuel efficiency standards while avoiding the significant capital costs to re-design production facilities that alternative materials may require.

In the third quarter of 2016, we introduced our NEXMET™ family of high-strength steels, which offer improved material formability at higher ultimate tensile strength levels. The first of these products, NEXMET 440EX, was developed specifically for exposed automotive body panels where formability, surface finish and dent resistance are critical.

In the fourth quarter of 2016, we completed a significant upgrade of our state-of-the-art continuous galvanizing line at our Dearborn Works facility. Enhanced furnace technology and modifications to the line’s configuration now provide us the additional capability to utilize the line as a continuous anneal line. This upgrade permits us to produce both coated and cold-rolled Next-Generation AHSS products on the same line. With these modifications now complete, we recently introduced our NEXMET 1000 and NEXMET 1200 AHSS products, which permit our customers to achieve significant lightweighting and optimization of unexposed automobile structures. Demonstration samples of coated NEXMET 1000 and NEXMET 1200 AHSS products were supplied to numerous automotive customers earlier in 2017 as a key step in the material qualification process. The combination of Precision Partners’ cold stamping capabilities with AK Steel’s new product introductions enhances our ability to deliver innovative, lightweighting solutions for our customers.

Third-Generation Advanced High Strength Steel (“3rd Gen AHSS”)

Looking beyond Next-Generation AHSS products, we continue to push our innovation efforts toward groundbreaking steel technologies, including collaborations with other companies, such as The NanoSteel Company. During 2016, we delivered 3rd Gen AHSS, NanoSteel® NXG™ 1200, to several automotive customers for testing and evaluation. This 3rd Gen AHSS solution, produced at our facilities using proprietary production methods, possesses a unique combination of strength and formability at high ultimate tensile strength, which we believe represents a leap in performance over many other AHSS products. We anticipate that Next-Generation and 3rd Gen AHSS products will enable automotive manufacturers to stamp and form lightweight auto parts using traditional manufacturing methods without the additional infrastructure investment that would be required for the use of aluminum and other competing materials.

Corporate Average Fuel Economy (“CAFE”) Standards

Our extensive product portfolio, encompassing carbon, stainless and electrical steel products, positions us to collaborate with automotive manufacturers to assist their ongoing efforts to meet future CAFE requirements. The CAFE standards generally require automobile manufacturers to meet an average fuel economy of 54.5 miles per gallon across the fleet of vehicles they produce by the year 2025, with certain milestones in the interim periods. We are working very closely with our automotive customers and their suppliers to develop and produce a variety of products across our portfolio to support their achievement of these CAFE standards. For example, these efforts include the development of:

- Electrical steels for motors in the next generations of hybrid and electrical vehicles;
- Stainless steels with increased thermal fatigue and corrosion resistance for use in exhaust systems associated with higher temperature engines that provide increased fuel economy;
- Next-Generation AHSS and 3rd Gen AHSS with high strength and formability, which are intended to provide manufacturers significant opportunities for lightweighting, at a lower cost than aluminum; and
- PHS with higher strengths and improved ductility, which is used in hot stamping applications to produce complex geometries for improved crash performance in safety critical components.

In addition to these actions, we are also working with trade organizations to educate stakeholders on the need to evaluate the total carbon footprint of alternative materials in relation to steel over the entire lifecycle of an automobile. We believe that when the entire lifecycle from production of materials through vehicle disposal is considered, steel is more environmentally responsible than competing materials, including aluminum.

Table of Contents

Pending Acquisition of Precision Partners

Effective June 30, 2017, we signed an agreement to acquire Precision Partners, a leading North American company that provides engineering, tooling, die design and hot and cold stamped steel components for the automotive market. Precision Partners specializes in manufacturing lightweight, complex components and assemblies, and it offers a broad portfolio of highly-engineered solutions. Among other benefits, we believe this strategic acquisition will:

- Complement our core focus on product innovation, accelerating the development and introduction of existing and new AHSS and PHS to the high-growth automotive lightweighting space;
- Provide a fully integrated downstream platform that further strengthens our close collaboration with our automotive customers and their Tier 1 suppliers; and
- Leverage our expertise in materials and metals forming with Precision Partners' expertise in tooling and die design and advanced capabilities in hot and cold stamping.

Founded in 1955, Precision Partners is headquartered in Ontario, Canada, and has more than 1,000 employees, including approximately 300 engineers and skilled tool makers, across eight plants in Ontario, Alabama and Kentucky. We anticipate that Precision Partners' results will be accretive to our earnings per share, operating profit and cash flows from operating activities over the year following the acquisition. On July 14, 2017, we received U.S. antitrust clearance for the transaction. The transaction remains subject to customary closing conditions and regulatory approval in Canada. Depending on the timing and outcome of the regulatory reviews, we expect the closing to occur during the third quarter of 2017. We expect to initially fund the acquisition with cash on hand and borrowings under our Credit Facility.

New Accounting Pronouncements

FASB issued a standard update during the first quarter of 2016 to simplify several aspects of the accounting for employee share-based payments. The new guidance requires companies to record excess tax benefits and tax deficiencies in the income statement when stock awards vest or are settled. In addition, companies will no longer separately classify cash flows related to excess tax benefits as a financing activity apart from other income tax cash flows. The standard also allows companies to repurchase more of each employee's vesting shares for tax withholding purposes without triggering liability accounting, clarifies that all cash payments made to tax authorities on each employee's behalf for withheld shares should be presented as a financing activity on companies' cash flows statements, and provides an accounting policy election to account for forfeitures as they occur. We adopted this update effective January 1, 2017, and the adoption had a minimal effect on us. At adoption, we recognized excess tax benefits that we had not previously recorded, but these were offset with an equal change in the valuation allowance. We have elected to continue to estimate forfeitures expected to occur to determine the compensation cost we recognize each period. The presentation requirements for cash flows related to employee taxes paid for withheld shares has no effect on us since we have historically presented these as a financing activity.

FASB issued Accounting Standards Update No. 2014-09, *Revenue from Contracts with Customers (Topic 606)*, during the second quarter of 2014. Topic 606, as further amended by subsequent Accounting Standard Updates, affects virtually all aspects of an entity's revenue recognition, including determining the measurement of revenue and the timing of when it is recognized for the transfer of goods or services to customers. Topic 606 will be effective for us beginning January 1, 2018. The guidance permits two methods of adoption—retrospectively to each prior reporting period presented (full retrospective method), or retrospectively with the cumulative effect of initially applying the guidance recognized at the date of initial application (modified retrospective method). We are evaluating the effect of the adoption of Topic 606 on our financial position and results of operations, but we do not currently expect it to have

a material effect on us. Based on our evaluation of our current contracts and revenue streams to date, we believe that most revenue transactions recorded under Topic 606 will be substantially consistent with treatment under existing guidance. Our revenue transactions generally consist of a single performance obligation to transfer promised goods and are not accounted for under industry-specific guidance. We currently anticipate adopting the standard using the modified retrospective method as of January 1, 2018.

FASB issued Accounting Standards Update No. 2016-02, *Leases (Topic 842)*, during the first quarter of 2016. Topic 842 requires entities to recognize lease assets and lease liabilities and disclose key information about leasing arrangements for certain leases. We will be required to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach. Topic 842 is effective for us beginning January 1, 2019. We are currently evaluating the effect of the adoption of Topic 842 on our financial position and results of operations.

In June 2016, the FASB issued a new standard to replace the incurred loss impairment methodology with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to

Table of Contents

inform credit loss estimates. In connection with recognizing credit losses on receivables and other financial instruments, we will be required to use a forward-looking expected loss model rather than the incurred loss model. The new standard will be effective for us beginning January 1, 2020, with early adoption permitted beginning January 1, 2019. Adoption of this standard is through a cumulative-effect adjustment to retained earnings as of the effective date. We are currently evaluating the effect of this standard on our financial position and results of operations.

Forward-Looking Statements

Certain statements we made or incorporated by reference in this Form 10-Q, or made in other documents furnished to or filed with the Securities Exchange Commission, as well as in press releases or in presentations made by our employees, reflect our estimates and beliefs and are intended to be, and hereby are identified as “forward-looking statements” for purposes of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Words such as “expects,” “anticipates,” “believes,” “intends,” “plans,” “estimates” and other similar references to future periods typically identify forward-looking statements. We caution readers that forward-looking statements reflect our current beliefs and judgments, but are not guarantees of future performance or outcomes. They are based on a number of assumptions and estimates that are inherently subject to economic, competitive, regulatory, and operational risks, uncertainties and contingencies that are beyond our control, and upon assumptions about future business decisions and conditions that may change. In particular, these include, but are not limited to, statements in the *Outlook* and *Liquidity and Capital Resources* sections and Item 3. *Quantitative and Qualitative Disclosure about Market Risk*.

Forward-looking statements are only predictions and involve risks and uncertainties, resulting in the possibility that actual events or performance will differ materially from such predictions as a result of certain risk factors, including that our acquisition of Precision Partners may not be consummated, or may not be consummated in a timely manner; that regulatory approval may not be obtained or may only be obtained subject to conditions that are not anticipated; that we will not integrate Precision Partners successfully following the consummation of the acquisition; and that potential growth opportunities, accretion to earnings and cash flow and other anticipated benefits and opportunities from the acquisition, such as providing enhanced customer solutions and accelerated research and innovation, may not be fully realized or may take longer to realize than expected. In addition, factors that could cause our actual results and financial condition and any benefits from the acquisition, if consummated, to differ materially from the results contemplated by such forward-looking statements include reduced selling prices, shipments and profits associated with a highly competitive and cyclical industry; domestic and global steel overcapacity; changes in the cost of raw materials and energy; our significant amount of debt and other obligations; severe financial hardship or bankruptcy of one or more of our major customers or key suppliers; our significant proportion of sales to the automotive market; reduced demand in key product markets due to competition from aluminum and other alternatives to steel; excess inventory of raw materials; supply chain disruptions or poor quality of raw materials; production disruption or reduced production levels; our healthcare and pension obligations; not reaching new labor agreements on a timely basis; major litigation, arbitrations, environmental issues and other contingencies; regulatory compliance and changes; climate change and greenhouse gas emission limitations; conditions in the financial, credit, capital and banking markets; our use of derivative contracts to hedge commodity pricing volatility; potential permanent idling of facilities; inability to fully realize benefits of margin enhancement initiatives; information technology security threats and cybercrime; as well as those risks and uncertainties discussed in more detail in our Annual Report on Form 10-K for the year ended December 31, 2016 (“2016 Form 10-K”), as updated in subsequent Quarterly Reports on Form 10-Q and Current Reports on Form 8-K filed with or furnished to the Securities and Exchange Commission.

As such, we caution readers not to place undue reliance on forward-looking statements, which speak only to our plans, assumptions and expectations as of the date hereof. We undertake no obligation to publicly update any forward-looking statement, except as required by law.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

There have been no significant changes in our exposures to market risk since December 31, 2016. See Item 3. *Quantitative and Qualitative Disclosures about Market Risk* in our 2016 Form 10-K for a discussion on our exposures to market risk.

Item 4. Controls and Procedures.

We maintain a system of disclosure controls and procedures that is designed to provide reasonable assurance that information is disclosed and accumulated and communicated to management in a timely fashion. An evaluation of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) was performed as of the end of the period covered by this report. This evaluation

- 45-

Table of Contents

was performed under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective to provide reasonable assurance that information we are required to disclose in the reports that we file or submit under the Exchange Act is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure and are effective to provide reasonable assurance that such information is recorded, processed, summarized and reported within the time periods specified by the Securities and Exchange Commission's rules and forms.

There has been no change in our internal control over financial reporting during the quarter covered by this report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II. OTHER INFORMATION**

(dollars in millions, except per share data)

Item 1. Legal Proceedings.

The information called for by this item is incorporated herein by reference to Note 6 of the condensed consolidated financial statements included in Part I, Item 1.

Item 1A. Risk Factors.

We caution readers that our business activities involve risks and uncertainties that could cause actual results to differ materially from those currently expected by management. We described the principal risk factors that could impact our results in our 2016 Form 10-K. Set forth below is an update to those prior risk factor descriptions.

Risks related to the completion of the Precision Partners acquisition. Completion of the proposed acquisition of Precision Partners is conditioned upon, among other things, the expiration or termination of the applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976 (“HSR”) and the Canadian Competition Act, as well as certain customary conditions to closing included in the Purchase Agreement governing the transaction. On July 14, 2017, we received U.S. antitrust clearance for the transaction. Clearance under the Canadian Competition Act remains outstanding and there is a risk that the acquisition may not receive such clearance in time to permit the acquisition to be completed during the third quarter of 2017, as anticipated, that such clearance may only be obtained subject to conditions that are not expected or acceptable to us, or that such clearance may not be obtained at all. In addition, other matters, including the failure of one or both parties to satisfy other remaining conditions to closing in the Purchase Agreement, may preclude us from consummating the acquisition on a timely basis or at all.

Risk of failure to achieve expected benefits of the Precision Partners acquisition and/or to integrate Precision Partners successfully following completion of the transaction. We may be unable to achieve the strategic, operational, financial and other benefits contemplated as part of the acquisition of Precision Partners to the full extent expected or in a timely manner. To the extent that we are not as successful as expected in integrating Precision Partners, the potential growth opportunities, ability to provide enhanced solutions to our customers, the leveraging and acceleration of combined research and innovation efforts, accretion to earnings or other anticipated financial and non-financial benefits and opportunities from the acquisition may not be fully realized or may take longer to realize than expected. In addition, the announcement, pendency and consummation of the acquisition could cause disruptions in and create uncertainty surrounding our relationships with existing and future customers, suppliers and employees, which could have an adverse effect on our business, financial results and cash flows, regardless of whether the acquisition is completed in a timely manner or at all.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

There were no unregistered sales of equity securities in the quarter ended June 30, 2017.

ISSUER PURCHASES OF EQUITY SECURITIES

Period	Total Number of Shares Purchased Per	Average Price Paid	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs (b)	Approximate Dollar Value of Shares that
---------------	---	-----------------------------------	--	--

	(a)	Share (a)		May Yet be Purchased Under the Plans or Programs (b)
April 2017	—	\$	—	
May 2017	7,077	6.00	—	
June 2017	9,946	6.24	—	
Total	17,023	6.14	—	\$ 125.6

During the quarter, we repurchased common stock owned by participants under the terms of the AK Steel Holding Corporation Stock Incentive Plan. To pay federal, state and local taxes due upon the vesting of restricted stock or performance shares, employees may have us (a) withhold shares that have a fair market value equal to the minimum statutory withholding rate that tax authorities could impose on the transaction. We repurchase the withheld shares at the quoted average of the reported high and low sales prices on the day we withhold the shares.

(b) On October 21, 2008, the Board of Directors authorized us to repurchase, from time to time, up to \$150.0 of our outstanding equity securities. The Board of Directors' authorization specified no expiration date.

Item 4. Mine Safety Disclosures.

The operations of AK Coal’s North Fork mine and Coal Innovations, LLC coal wash plant (collectively, the “AK Coal Operations”) are subject to regulation by the Mine Safety and Health Administration (“MSHA”) under the Federal Mine Safety and Health Act of 1977, as amended (“Mine Act”). MSHA inspects mining and processing operations, such as the AK Coal Operations, on a regular basis and issues various citations and orders when it believes a violation has occurred under the Mine Act. Exhibit 95.1 to this Quarterly Report on Form 10-Q presents citations and orders from MSHA and other regulatory matters required to be disclosed by Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act or otherwise under this Item 4.
