FRONTLINE LTD. REPORTS RESULTS FOR THE THIRD QUARTER AND NINE MONTHS ENDED SEPTEMBER 30, 2017

Frontline Ltd. (the "Company" or "Frontline"), today reported unaudited results for the three and nine months ended September 30, 2017:

Highlights

Reports a net loss attributable to the Company of \$24.1 million, or \$0.14 per share, for the third quarter of 2017, primarily due to weak average spot daily time charter equivalent ("TCE") earnings achieved by our fleet and a \$5.8 million loss on the termination of the charter of Front Ardenne.

Reports a net loss attributable to the Company adjusted for certain non-cash items of \$23.1 million, or \$0.14 per share, for the third quarter of 2017.

Reports net loss attributable to the Company of \$16.4 million, or \$0.10 per share, and a net loss attributable to the Company adjusted for certain non-cash items of \$9.4 million, or \$0.06 per share, for the nine months ended September 30, 2017.

Terminated the long-term charter for the 1997-built Suezmax tanker Front Ardenne in the third quarter of 2017.

Took delivery of five newbuildings, including two VLCCs, one Suezmax and two LR2/Aframax tankers in the third quarter of 2017.

Robert Hvide Macleod, Chief Executive Officer of Frontline Management AS commented:

"The impact of the significant fleet growth over the last two years was felt across the industry and is reflected in our results for the third quarter. Indeed, the rate environment presented in the quarter was the weakest we have experienced since 2013. During this time, we showed commercial discipline by not accepting unreasonably low offers from charterers. This resulted in extended waiting time, particularly on our VLCC's, and impacted our average TCE earnings. We continue to take proactive steps to increase the earnings potential of our fleet as demonstrated by reducing the average age of our fleet from 8.1 to 5.4 years since 2016. We believe we are well positioned to continue to execute our strategy over a long term horizon with the goal of returning value to shareholders."

Inger M. Klemp, Chief Financial Officer of Frontline Management AS, added:

"Frontline is proactively focused on establishing and maintaining low cash break-even rates as we grow our fleet and the financing of our current newbuilding program has been completed on terms which support Frontline's low cash break-even levels."

The average daily time charter equivalents ("TCE") earned by Frontline in the quarter ended September 30, 2017, the prior quarter and in the nine months ended September 30, 2017 are shown below, along with estimates for the fourth quarter in 2017 and the estimated average daily cash break-even ("BE") rates for the fourth quarter of 2017:

(\$ per day) Spot and time charter	Spot		Spot estimates	% covered	Estimated average cash BE rates

The estimated average daily cash break-even rates are the daily TCE rates the vessels must earn in order to cover operating expenses including dry dock, repayments of loans, interest on loans, bareboat hire and general and administrative expenses.

#### The Fleet

As of September 30, 2017, the Company's fleet consisted of 61 vessels, with an aggregate capacity of approximately 11.8 million DWT. The Company's fleet consisted of:

- (i) 43 vessels owned by the Company (10 VLCCs, 16 Suezmax tankers, 17 LR2/Aframax tankers);
- (ii) nine vessels that are under capital leases, all of which are VLCCs;
- (iii) one VLCC that is recorded as an investment in finance lease;
- (iv) two VLCCs where the cost/revenue is split 50/50 with an unrelated third party, one of which was redelivered in October;
- (v) one MR product tanker that is chartered-in on a short term time charter which was subsequently redelivered in October; and
- (vi) five vessels that are under the Company's commercial management (two Suezmax tankers and three Aframax oil tankers)

Furthermore, the Company has five newbuildings under construction: four VLCCs and one LR2/Aframax tanker with an aggregate carrying capacity of 1.3 million DWT.

As of September 30, 2017, the Company had entered into the following time charter-out contracts for six vessels:

- (i) five LR2 tankers at an average rate of \$27,600, expiry Q1 2018; and
- (ii) one Suezmax tanker built in 2010 with a base rate of \$27,000 per day with a profit share arrangement, expiry Q1 2018. The agreement is index-linked.

In July 2017, the Company agreed with Ship Finance International Limited ("Ship Finance") to terminate the long-term charter for the 1997-built Suezmax tanker Front Ardenne upon the sale and delivery of the vessel by Ship Finance to an unrelated third party. The charter with Ship Finance terminated in August and the Company recorded a loss on termination of \$5.8 million in the third quarter.

#### Newbuilding Program/ financing update

As of September 30, 2017, the Company's newbuilding program was comprised of four VLCCs and one LR2/Aframax tanker. As of September 30, 2017, total instalments of \$71.4 million had been paid and the remaining commitments amounted to \$310.9 million, of which \$5.5 million is due in 2017, \$252.0 million is due in 2018 and \$53.4 million is due in 2019.

In July 2017, the Company took delivery of the Suezmax newbuilding Front Cascade and the VLCC newbuilding Front Earl. In August 2017, the Company took delivery of the LR2 newbuilding Front Pollux. In September 2017, the Company took delivery of the VLCC newbuilding Front Prince and the LR2 newbuilding Front Capella.

The Company drew down \$103.1 million from its \$321.6 million term loan facility with China Exim Bank in connection with the delivery of Front Cascade, Front Pollux and Front Capella, \$54.9 million from its \$110.5 million term loan facility with Credit Suisse in connection with the delivery of Front Earl and \$55.3 million from its \$110.5 million term loan facility with ING in connection with the delivery of Front Prince.

Frontline has committed bank financing in place to partially finance delivery of all of the Company's five remaining newbuildings.

## Corporate Update

In the third quarter, the Company sold 1.0 million shares in DHT Holdings, Inc. ("DHT") for proceeds of \$4.2 million and a loss of \$0.1 million and received dividends of \$0.1 million. This follows the sale of 4.9 million shares in DHT for proceeds of \$21.7 million and a gain of \$1.3 million and receipt of dividends of \$1.4 million in the six months ended June 30, 2017.

Pursuant to the Company's stated dividend policy, and due to the net loss attributable to the Company in the third quarter, the Board has decided not to pay a dividend for the third quarter.

The Company had 169,809,324 ordinary shares outstanding as of September 30, 2017, and the weighted average number of shares outstanding for the quarter was 169,809,324.

## Third Quarter 2017 Results

The Company reports a net loss attributable to the Company of \$24.1 million, or \$0.14 per share, for the third quarter of 2017 compared with a net loss attributable to the Company of \$19.4 million, or \$0.11 per share in the second quarter. The loss was primarily due to the weak average daily spot TCE earnings achieved by our fleet and a \$5.8 million loss on the termination of the charter of Front Ardenne. The net loss attributable to the Company adjusted for certain non-cash items was \$23.1 million, or \$0.14 per share, for the third quarter of 2017 compared to a net loss of \$14.2 million or \$0.08 per share in the second quarter. These non-cash items consisted of a loss on the termination of the long-term charter of Front Ardenne, net of termination payment due, of \$1.2 million, and a gain on derivatives of \$0.2 million. The net loss attributable to the Company in the second quarter of 2017 included a loss on the termination of the long-term charters of Front Scilla and Front Brabant, net of termination payment due, of \$2.1 million, and a loss on derivatives of \$3.1 million.

Total ship operating expenses of \$34.2 million in the third quarter were \$3.4 million lower than in the previous quarter primarily due to the dry docking of four vessels in the second quarter.

Contingent rental income in the third quarter relates to the charter party contracts with Ship Finance and results from the actual profit share in the third quarter being \$6.7 million less than the amount accrued in the lease obligations payable when the leases were recorded at fair value at the time of the merger with Frontline 2012.

The Company generated net loss attributable to the Company of \$16.4 million, or \$0.10 per share, for the nine month ended September 30, 2017 compared with net income attributable to the Company of \$98.7 million, or \$0.63 per share for the nine months ended September 30, 2016. The net loss attributable to the Company adjusted for certain non-cash items was \$9.4 million, or \$0.06 per share, for the nine months ended September 30, 2017 compared with net income attributable to the Company adjusted for certain non-cash items of \$154.4 million, or \$0.99 per share in the nine months ended September 30, 2016. These non-cash items consisted of a vessel impairment loss of \$21.2 million on four vessels leased from Ship Finance, a net loss on derivatives of \$3.1 million, a loss on the termination of the long-term charters of Front Scilla, Front Brabant and Front Ardenne net of termination payment due, of \$3.3 million, offset by a gain on the termination of the long-term charter of Front Century of \$20.6 million. Net income attributable to the Company in the nine months ended September 30, 2016 included a loss on the cancellation and sale of newbuildings and vessels of \$2.7 million, a vessel impairment loss of \$34.4 million, an impairment loss on shares of \$7.2 million, and a loss on derivatives of \$11.4 million.

As of November 2017, the Company estimates that the average daily cash breakeven rates for the remainder of 2017 will be approximately \$21,600, \$17,700 and \$15,700 for its owned and leased VLCCs, Suezmax tankers and LR2/Aframax tankers, respectively. The Company believes these rates are highly competitive.

A reconciliation of net income attributable to the Company to net income attributable to the Company adjusted for certain non-cash items for the three and nine months ended September 30, 2017 is as follows:

The calculation of net income attributable to the Company adjusted for certain non-cash items per share in each period has been calculated using the same number of shares as used in the GAAP earnings per share calculations.

This press release describes net income attributable to the Company adjusted for certain non-cash items and related per share amounts, which are not measures prepared in accordance with US GAAP ("non-GAAP"). We believe the non-GAAP financial measures presented in this press release provides investors with a means of evaluating and understanding how the Company's management evaluates the Company's operating performance. These non-GAAP financial measures should not be considered in isolation from, as substitutes for, nor superior to financial measures prepared in accordance with GAAP.

### Strategy and Market Outlook

The growth in crude tanker tonne-mile demand is forecasted to remain strong due to increasing underlying demand for crude oil from areas that are geographically dislocated from incremental sources of supply. Additionally, global crude inventories are declining after reaching peak levels last year, and the oil market is showing signs of recalibrating. The current crude oil tanker rate environment does not presently reflect that strong demand. This is mainly due to the increases in the size of the global crude oil tanker fleet we have seen over the last two years, which is expected to continue into next year.

There has been some new ordering activity this year, including vessels ordered by Frontline, but orders are limited and have been placed by large, industrial owners as part of organic fleet renewal programs. It is important to remember that over 20% of the crude oil tanker fleet is nearing scrapping age. The longer the current market conditions persist, the greater the likelihood that owners will scrap vessels, particularly if the alternative is an impending costly dry docking. Older vessels are also more difficult to charter at attractive rates, as many charterers and terminal operators place age restrictions on the vessels.

Frontline has a positive long-term view of the market. We believe we are at the bottom of the cycle, and this is reflected in rates and asset prices. There will surely be challenges as well as opportunities, and we will continue to execute our strategy of fleet growth and renewal.

Since the start of 2016, Frontline has grown its fleet on water by approximately 2.5 million DWT and in the process lowered the average age for our fleet from 8.1 years to 5.4 years. This has also had the effect of reducing our average daily vessel operating expenses and cash breakeven rates.

Frontline is uniquely positioned to participate in a market recovery due to its very low cash break even rates, efficient operations and opportunistic approach to fleet growth. We expect to generate substantial returns to our shareholders in a strong tanker market and healthy returns in a more muted market. The Company has a long track record of doing so, and it seeks to carry on that tradition as it increases its leadership role in the market.
