First Quarter Report

MARCH 31, 2011

Lazard World Dividend & Income Fund, Inc.

Investment Overview

Dear Stockholders,

We are pleased to present this report for Lazard World Dividend & Income Fund, Inc. (LOR or the Fund), for the quarter ended March 31, 2011. The Fund is a diversified, closed-end management investment company that began trading on the New York Stock Exchange (NYSE) on June 28, 2005. Its ticker symbol is LOR.

As of March 31, 2011, the Fund's net asset value (NAV) performance for the first quarter of 2011 is ahead of its benchmark, the Morgan Stanley Capital International (MSCI®) All Country World Index (ACWI®) (the Index), and we believe that, since inception, LOR has provided investors with an attractive yield and diversification, backed by the extensive experience, commitment, and professional management of Lazard Asset Management LLC (the Investment Manager or Lazard).

Portfolio Update (as of March 31, 2011)

For the first quarter of 2011, the Fund's NAV increased by 5.3%, outperforming the Index gain of 4.4%. Over the one-year period ended March 31, 2011, the Fund gained 14.2% slightly ahead of the Index return of 14.1%. The Fund's since-inception annualized NAV return of 7.0% is well ahead of the Index return of 5.7% for the same period. Shares of LOR ended the first quarter of 2011 with a market price of \$13.45, representing a 6.7% discount to the Fund's NAV of \$14.41.

The Fund's net assets were \$99.1 million as of March 31, 2011, with total leveraged assets of \$130.0 million, representing a 23.7% leverage rate. This leverage rate was a slight decrease from the 24.5% level at the end of 2010.

During the first quarter, the Fund's world equity portfolio benefited from stock selection within the financials and consumer discretionary sectors. Conversely, performance was hurt by stock selection in the telecom services and industrial sectors. The smaller, short-duration¹ emerging market currency and debt portion of the Fund has experienced modest positive performance in the first quarter of 2011, and has been a positive contributor to performance since the Fund's inception.

As of March 31, 2011, 74.0% of the Fund's total leveraged assets consisted of world equities and 24.5% consisted of emerging market currency and debt instruments, while the remaining 1.5% consisted of cash and other net assets.

Declaration of Distributions

Pursuant to LOR's Level Distribution Policy, the Fund declares, monthly, a distribution equal to 6.5% (on an annualized basis) of the Fund's NAV on the last business day of the previous year (December 31, 2010). The current monthly distribution rate per share of \$0.0753 represents a distribution yield of 6.7% based on the Fund's \$13.45 market price as of the close of trading on the NYSE on March 31, 2011. It is currently estimated that \$0.03524 of the \$0.2259 distributed per share year-to-date through March 31, 2011 may represent a return of capital.

Additional Information

Please note that, available on www.LazardNet.com, are frequent updates on the Fund's performance, press releases, distribution information, and a monthly fact sheet that provides information about the Fund's major holdings, sector weightings, regional exposures, and other characteristics, including notices required by Section 19(a) of the Investment Company Act of 1940, as amended. You may also reach Lazard by phone at 1-800-823-6300.

On behalf of Lazard, we thank you for your investment in Lazard World Dividend & Income Fund, Inc. and look forward to continuing to serve your investment needs in the future.

Message from the Portfolio Managers

World Equity Portfolio
(74.0% of total leveraged assets)

The Fund's world equity portfolio is typically invested in 60 to 90 securities, consisting primarily of the high-

Lazard World Dividend & Income Fund, Inc.

Investment Overview (continued)

est dividend-yielding stocks selected from the current holdings of other accounts managed by the Investment Manager. The portfolio is broadly diversified in both developed and emerging market countries and across the capitalization spectrum. Examples include Pfizer, a research-based, global pharmaceutical company that is based in the United States; Zurich Financial Services, a Swiss insurance-based financial services provider active in North America, Europe, Asia-Pacific, Latin America and other markets; and Kumba Iron Ore, an iron ore mining company based in South Africa.

As of March 31, 2011, 32.8% of the Fund's world equity portfolio investments were based in North America, 25.6% were based in Continental Europe (not including the United Kingdom), 20.2% were based in Asia (not including Japan), 6.8% were based in Africa and the Middle East, 6.7% were based in Latin America, 5.5% were based in the United Kingdom, and 2.4% were based in Japan. The world equity portfolio is similarly well diversified across a number of industry sectors. The top two sectors, by weight, at March 31, 2011, were financials (26.4%), which includes banks, insurance companies, and financial services companies, and telecommunication services (16.9%) which includes companies specializing in communications or telecommunication equipment production. Other sectors in the portfolio include consumer staples, consumer discretionary, energy, health care, industrials, information technology, materials, and utilities. The average dividend yield on the securities held in the world equity portfolio was approximately 5.2% as of March 31, 2011.

World Equity Markets Review

The Index increased during the first quarter of 2011 despite global shocks. During the quarter, the market was confronted with escalating political turmoil in the Middle East and North Africa, the devastating earthquake and nuclear crisis in Japan, and the ongoing sovereign debt problems of peripheral Europe, with Portugal the most recent focus. Additionally, commodity prices, including oil, rose as did inflation in a number of emerging markets. However, these negative factors were more than offset by better-than-expected economic and corporate earnings growth in many areas, which propelled the market higher. Regionally, the United States and Europe were notably strong performers, a result of solid corporate earnings. Japanese equities were volatile, and the market posted a negative return following the tragic events in the country. Emerging markets underperformed versus the Index on concerns over inflation, interest rates, the Middle East and North Africa.

In currency markets, the euro and British pound appreciated relative to the U.S. dollar due to the perception that European central banks will tighten monetary policy before the U.S. Federal Reserve. The Japanese yen was volatile but depreciated overall versus the U.S. dollar.

The energy sector had the largest gain in the Index, as crude oil prices climbed 17% during the quarter. The industrials sector was the second best performer as booming prices in commodities helped drive returns. The consumer staples and utilities sectors, which are generally considered defensive, posted some of the lowest returns in the Index.

What Helped and What Hurt LOR

Within the consumer discretionary sector, one of the positions that contributed the most to performance was OPAP, the Greek sports betting and lottery company. The company's shares rebounded since their decline amid sovereign debt concerns in the spring of 2010. We find the business attractive, as sports betting and lottery are, generally, very resilient to economic weakness and management is launching new games to expand its customer base. The company is debt free, has a large cash balance, and offers an attractive yield, which we believe is sustainable. Within financials, a position in Sampo, the market leader in property and casualty insurance in the Nordic region, also helped returns as shares of the company rose on quarterly earnings, which saw solid operating performance across all of its businesses. The company also increased its dividend significantly year over year. In our view, rising interest rates and disciplined pricing across Sampo's key markets provide a strong backdrop for the year ahead.

Lazard World Dividend & Income Fund, Inc.

Investment Overview (continued)

In contrast, within the industrials sector, the portfolio's position in Orascom Construction Industries, a leading construction contractor and fertilizer business in emerging markets, detracted from performance. The company, which is based in Egypt, declined largely due to the unrest in the region. However, it enjoys a healthy construction backlog and its fertilizer business has largely been unaffected by the region's turmoil. In telecom services, shares of Philippine Long Distance Telephone also hurt returns as the company has been weak on inflation concerns and the issues in the Middle East and Japan (there are large numbers of Filipinos working in both areas). However, the company has dominant market share and plans to expand its footprint. At the end of the quarter, the company announced an offer to purchase rival Digital Telecommunication Philippines. If the deal closes, Philippine Long Distance Telephone will have approximately two-thirds of the Philippines' mobile-phone revenue.

Emerging Market Currency and Debt Portfolio

(24.5% of total leveraged assets)

The Fund also seeks enhanced income through investing in primarily high-yielding, short-duration emerging market forward currency contracts and local currency debt instruments. As of March 31, 2011, this portfolio consisted of forward currency contracts (72.3%) and sovereign debt obligations (27.7%). The average duration of the emerging market currency and debt portfolio increased from approximately 5 months to approximately 8 months during the quarter, with an average yield of 6.2%² as of quarter end.

Emerging Market Currency and Debt Market Review

Emerging Market (EM) central banks continue to normalize monetary conditions in response to favorable economic growth and rising inflationary pressures. Accordingly, results were supported by higher yields and modest EM currency gains. Emerging market monetary tightening measures have come in many forms, limited not only to hard measures taken with regard to interest rate policy, but also quantitative tightening actions such as higher reserve requirement ratios and more flexible currency policies. Indeed, the group of central banks that raised interest rates during the month was diverse and included Israel, Vietnam, India, Brazil, Peru, Chile, South Korea, Thailand, Serbia, Uruguay, Colombia, Kenya, and the Philippines. Other countries such as China, Turkey, Russia, Romania, Brazil, and Indonesia relied on reserve requirement ratio hikes or they demonstrated tolerance for currency gains in an effort to mitigate imported food and energy price pressures.

The U.S. Federal Reserve's continued loose monetary stance, coupled with rising geopolitical tensions in the Middle East and North Africa, have propelled energy prices sharply higher, increasing inflation and fiscal (i.e., subsidy-related) pressures in the emerging world. Thus far, neither the EM monetary tightening measures nor an increase in the price of oil has negatively impacted global growth but we feel that this potential risk should be monitored closely. EM local markets proved to be resilient to the events in the Middle East and North Africa and the downturn in global equity, commodity, and risk markets, following the tsunami in Japan.

What Helped and What Hurt LOR

In Emerging Europe, Romania and Serbia helped due to export-led growth recoveries, rising foreign direct investment inflows, and sound policy implementation. The Czech koruna recovered sharply from weakness early in the quarter into which we had aggressively added to our position.

Mexico, the top-performing Latin local market and the Fund's heaviest weighting, benefited from high energy prices, the cyclical U.S. rebound, and a relatively non-interventionist central bank. Brazil also contributed as its strong domestic economy and relentless pace of capital inflows fueled ongoing foreign exchange gains, which complemented high local yields.

South Korea, India, and Malaysia benefited from rate hikes, rising inflation, and ample inflows supported the won and rupee, while Malay local markets maintained low levels of volatile Asian revaluation exposure, supported by the country's substantial (10-11%/GDP) current account surplus.

Lazard World Dividend & Income Fund, Inc.

Investment Overview (continued)

Russia and Kazakhstan benefited from a quickening pace of foreign currency exchange appreciation. Substantial terms of trade gains from rising energy prices, coupled with above-target domestic inflation led to more flexible currency policies in both countries.

Turkish exposure detracted from Fund performance due to lira depreciation. The central bank's unorthodox monetary framework, investors' inflation concerns, and rising oil prices (which further worsen the country's trade imbalance) fueled weakness. However, a very aggressive reserve requirement hike aimed at cooling the rate of credit growth and reigning in economic imbalances prompted renewed investor inflows and the lira recouped some of its earlier losses during March. Longstanding Egyptian exposure also detracted as treasury bill positions were liquidated following the popular uprising, which resulted in Mubarak's exodus, brought economic activity to an abrupt halt and weakened the money market during the quarter. Uganda and Kenya also hurt due to political tensions in the former, and rising inflation across the East African region. Both central banks have tightened liquidity since quarter-end, supporting currency performance and higher yields in the interim.

Notes to Investment Overview:

- ¹ A measure of the average cash weighted term-to-maturity of the investment holdings. Duration is a measure of the price sensitivity of a bond to interest rate movements. Duration for a forward currency contract is equal to its term-to-maturity.
- ² The quoted yield does not account for the implicit cost of borrowing on the forward currency contracts, which would reduce the yield shown.

All returns reflect reinvestment of all dividends and distributions. Past performance is not indicative, or a guarantee, of future results.

The performance data of the Index and other market data have been prepared from sources and data that the Investment Manager believes to be reliable, but no representation is made as to their accuracy. Notes to Portfolio of Investments (continued)

March 31, 2011 (unaudited)

Valuation of Investments:

Market values for securities are generally based on the last reported sales price on the principal exchange or market on which the security is traded, generally as of the close of regular trading on the NYSE (normally 4:00 p.m. Eastern time) on each valuation date. Any securities not listed, for which current over-the-counter market quotations or bids are readily available, are valued at the last quoted bid price or, if available, the mean of two such prices. Securities listed on foreign exchanges are valued at the last reported sales price except as described below; securities listed on foreign exchanges that are not traded on the valuation date are valued at the last quoted bid price. Forward currency contracts are valued at the current cost of offsetting the contracts. Options on stock and stock indices traded on national securities exchanges are valued as of the close of options trading on such exchanges (which is normally 4:10 p.m. Eastern time). Investments in money market funds are valued at the fund's net asset value.

Bonds and other fixed-income securities that are not exchange-traded are valued on the basis of prices provided by pricing services which are based primarily on institutional trading in similar groups of securities, or by using brokers' quotations.

If a significant event materially affecting the value of securities occurs between the close of the exchange or market on which the security is principally traded and the time when the Fund's net asset value is calculated, or when current market quotations otherwise are determined not to be readily available or reliable (including restricted or other illiquid securities such as derivative instruments), such securities will be valued at their fair values as determined by, or in accordance with procedures approved by, the Board of Directors. The Valuation Committee of the Investment Manager may evaluate a variety of factors to determine the fair value of securities for which market quotations are determined not to be readily available or reliable. These factors include, but are not limited to, the type of security, the value of comparable securities, observations from financial institutions and relevant news events. Input from the Investment Manager's analysts will also be considered.

Fair Value Measurements:

Fair value is defined as the price that the Fund would receive to sell an asset, or would pay to transfer a liability, in an orderly transaction between market participants at the date of measurement. The Fair Value Measurements and Disclosures provisions of accounting principles generally accepted in the United States of America also establish a framework for measuring fair value, and a three-level hierarchy for fair value measurement that is based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer, broadly, to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions that market participants would use in pricing the asset or liability, developed based on the best information available in the circumstances. Each investment's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the overall fair value measurement. The three-level hierarchy of inputs is summarized below.

Level 1 unadjusted quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including unadjusted quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)
The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in these securities.

Lazard World Dividend & Income Fund, Inc.

Notes to Portfolio of Investments (concluded)

March 31, 2011 (unaudited)

The following table summarizes the valuation of the Fund's investments by each fair value hierarchy level as of March 31, 2011:

Description	Unadjusted Quoted Prices in Active Markets for Identical Investments (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of March 31, 2011
Assets:				
Common Stocks*	\$ 95,471,929	\$	\$	\$ 95,471,929
Preferred Stock*	702,638			702,638
Foreign Government Obligations*		12,288,491		12,288,491
Short-Term Investment		1,279,520		1,279,520
Other Financial Instruments**				
Forward Currency Contracts		814,152		814,152
Total	\$ 96,174,567	\$ 14,382,163	\$	\$ 110,556,730
Liabilities:				
Other Financial Instruments**				
Forward Currency Contracts	\$	\$ (687,920)	\$	\$ (687,920)

* Please refer to Portfolio of Investments and Notes to Portfolio of Investments, on pages 7 to 9 and 18, for portfolio holdings by country and industry.

** Other financial instruments are derivative instruments which are valued at the unrealized appreciation/depreciation. Following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value during the period ended March 31, 2011:

Description	Balance as of December 31, 2010	Accrued Discounts	Realized Loss	Change in Unrealized Appreciation	Purchases	Sales	Net Transfers into Level 3	Net Transfers out of Level 3	Balance as of March 31, 2011	Net Change in Unrealized Appreciation from Investments Still Held at March 31, 2011
Foreign Government Obligations	\$ 497,077	\$ 4,061	\$ (82,471)	\$ 68,623	\$	\$ (368,118)	\$	\$ (119,172)	\$	\$

There were no significant transfers into or out of Levels 1, 2 and 3 during the period ended March 31, 2011.

Lazard World Dividend & Income Fund, Inc.

Dividend Reinvestment Plan

(unaudited)

Unless you elect to receive distributions in cash (i.e., opt-out), all dividends, including any capital gain distributions, on your common stock will be automatically reinvested by Computershare, Inc., as dividend disbursing agent (the Plan Agent), in additional common stock under the Fund's Dividend Reinvestment Plan (the Plan). You may elect not to participate in the Plan by contacting the Plan Agent. If you do not participate, you will receive all distributions in cash, paid by check mailed directly to you by the Plan Agent.

Under the Plan, the number of shares of common stock you will receive will be determined on the dividend or distribution payment date, as follows:

- (1) If the common stock is trading at or above net asset value at the time of valuation, the Fund will issue new shares at a price equal to the greater of (i) net asset value per common share on that date or (ii) 95% of the common stock's market price on that date.
- (2) If the common stock is trading below net asset value at the time of valuation, the Plan Agent will receive the dividend or distribution in cash and will purchase common stock in the open market, on the NYSE or elsewhere, for the participants' accounts. It is possible that the market price for the common stock may increase before the Plan Agent has completed its purchases. Therefore, the average purchase price per share paid by the Plan Agent may exceed the market price at the time of valuation, resulting in the purchase of fewer shares than if the dividend or distribution had been paid in common stock issued by the Fund. The Plan Agent will use all dividends and distributions received in cash to purchase common stock in the open market within 30 days of the valuation date. Interest will not be paid on any uninvested cash payments.

You may withdraw from the Plan at any time by giving written notice to the Plan Agent. If you withdraw or the Plan is terminated, you will receive whole shares in your account under the Plan and you will receive a cash payment for any fraction of a share in your account. If you wish, the Plan Agent will sell your shares and send you the proceeds, minus an initial \$15 service fee plus \$0.12 per share being liquidated (for processing and brokerage expenses).

The Plan Agent maintains all stockholders' accounts in the Plan and gives written confirmation of all transactions in the accounts, including information you may need for tax records. Shares of common stock in your account will be held by the Plan Agent in non-certificated form. Any proxy you receive will include all common stock you have received under the Plan.

There is no brokerage charge for reinvestment of your dividends or distributions in newly-issued shares of common stock. However, all participants will pay a pro rata share of brokerage commissions incurred by the Plan Agent when it makes open market purchases.

Automatically reinvesting dividends and distributions does not mean that you do not have to pay income taxes due upon receiving dividends and distributions.

If you hold your common stock with a brokerage firm that does not participate in the Plan, you will not be able to participate in the Plan and any dividend reinvestment may be effected on different terms than those described above. Consult your financial advisor for more information.

The Fund reserves the right to amend or terminate the Plan if, in the judgment of the Board of Directors, the change is warranted. There is no direct service charge to participants in the Plan (other than the service charge when you direct the Plan Agent to sell your common stock held in a dividend reinvestment account); however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants. Additional information about the Plan may be obtained from the Plan Agent at P.O. Box 43010, Providence, Rhode Island 02940-3010.

Interested Director:		
Ashish Bhutani (51)	Director	Investment Manager, <i>Chief Executive Officer</i> (2004 – present)

Edgar Filing: Lazard World Dividend & Income Fund, Inc. - Form N-30B-2

Lazard Ltd, *Vice Chairman and Director* (2010 - present)

- (1) Each Director also serves as a Director of The Lazard Funds, Inc., Lazard Retirement Series, Inc. and Lazard Global Total Return and Income Fund, Inc. (collectively with the Fund, the Lazard Funds). All of the Independent Directors, except Mr. Lieberman, are also board members of Lazard Alternative Strategies Fund, L.L.C., a privately-offered fund registered under the Investment Company Act of 1940, as amended (the Act) and advised by an affiliate of the Investment Manager.
- (2) It is possible that Mr. Davidson could be deemed to be an affiliate of a company that has an indirect ownership interest in a broker-dealer that the Investment Manager may use to execute portfolio transactions for clients other than the Fund, and thus an interested person (as defined in the Act) of the Fund. However, due to the structure of Mr. Davidson's relationship with the company and the remote nature of any deemed affiliation with the broker-dealer, Mr. Davidson is not identified as an interested person (as defined in the Act) of the Fund. Mr. Davidson participates in Fund Board meetings as if his status were that of an interested person (as defined in the Act).
